**9 Provisions for liabilities—Deferred tax**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
<b>Deferred tax provided in the Accounts is as follows:</b>		
Accelerated capital allowances .....	1,299	76
	<u>Note</u>	<u>2007</u>
		£'000
Deferred tax provided at 1 April 2006 .....		76
Charged in profit and loss account .....	4	1,223
<b>Deferred tax provided at 31 March 2007 .....</b>		<b>1,299</b>

The 2007 Budget introduced a potential corporation tax change that would impact the deferred tax calculation. The 2007 Finance Bill was passed through the House of Commons on 26 June 2007 and is regarded as substantially enacted from that date. The change is the reduction to the rate of corporation tax from 30% to 28% with effect from 1 April 2008. If this change was applied as at 31 March 2007 then the deferred tax would reverse at 28% and this would have the effect of reducing the deferred tax liability at 31 March 2007 to £1,213,000.

**10 Provisions for liabilities—Other provisions**

	<u>Notes</u>	<u>At 1 April</u>	<u>Unwinding of</u>	<u>At 31 March</u>

**Callagheen Wind Farm Limited**  
**Notes to the Accounts—(Continued)**  
**for the year ended 31 March 2007**

**14 Related party transactions**

Scottish Power Limited had ultimate control over the company during the year. The company has taken an exemption, as allowed by FRS 8, 'Related Party Disclosures', not to disclose related party transactions with other group companies as Scottish Power Limited publishes full statutory consolidated Accounts.

**15 Ultimate parent company**

At 31 March 2007 the directors regarded Scottish Power Limited to be the ultimate parent company, which is also the parent company of the largest group in which the results of the company are consolidated. The parent company of the smallest group in which the results of the company are consolidated is Scottish Power UK Holdings Limited. Copies of both companies' consolidated Accounts can be obtained from The Secretary, Scottish Power Limited., 1 Atlantic Quay, Glasgow, G2 8SP. Subsequent to the year end on 23 April 2007, Scottish Power Limited was acquired by Iberdrola S.A. From this date the directors consider Iberdrola S.A. to be the ultimate parent company.

**Independent Auditors' Report**  
**To the shareholder of Callagheen Wind Farm Limited**

We have audited the financial statements of Callagheen Energy Limited for the year ended 31 March 2007 which comprise the Accounting Policies and Definitions, the Profit and Loss Account, the Balance Sheet and the related notes 1 to 15. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with Article 243 of the Companies (Northern Ireland) Act 1986. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinion we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the financial statements in accordance with applicable Northern Ireland law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice) are set out in the Statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies (Northern Ireland) order 1986. We also report to you whether in our opinion the information given in the Directors' Report is consistent with the financial statements. In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgments made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatements, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the company's affairs as at 31 March 2007 and of its profit for the year then ended;
- the financial statements have been properly prepared in accordance with the Companies (Northern Ireland) Order 1986; and
- the information given in the Directors' Report is consistent with the financial statements.

## Callagheen Wind Farm Limited

### Report of the Directors

The directors present their report and audited Accounts for the five month period ended 31 March 2006.

#### Activities and review

The principal activity of Callagheen Wind Farm Limited, "the company", is the operation of a windfarm in Northern Ireland. The company will continue with this activity for the foreseeable future.

#### Review of business and future developments

The development of a 17MW wind farm located in Northern Ireland was completed during the year. Construction activities commenced in 2005 and the wind farm completed full commissioning and began operating in February 2006.

During the five months ended 31 March 2006 £6,457,000 (eighteen months ended 31 October 2005: £12,452,000) of costs were incurred on the development and construction of the wind farm. These costs have been capitalised and included on the balance sheet. Funding of these activities was achieved by a loan from another group undertaking.

The company has net current liabilities of £18,722,000 at 31 March 2006 (31 October 2005: £12,452,000), this includes a current loan from group undertakings of £18,894,000 at 31 March 2006. (31 October 2005: £5,480,000). The directors consider that sufficient funding will be made available to the company by its ultimate parent company to continue operations and to meet liabilities as they fall due.

On 31 October 2005, Scottish Power UK Holdings Limited completed the acquisition of 100% of the issued share capital of Callagheen Wind Farm Limited. The accounting reference date of the company was changed during the period from 31 October to 31 March in order to be co-terminous with the Scottish Power plc accounting reference date.

#### Results and dividend

The loss for the period amounted to £280,000 (2005: £nil). The aggregate dividends paid during the period amounted to £nil (2005: £nil).

#### Directors and their interests

The directors who held office during the period were as follows:

Keith S Anderson  
John Heasley

John Heasley resigned his directorship on 3 April 2006 and was replaced by Roger Seshan on the same day.

Neither of the directors who held office at the end of the financial period had any disclosable interests in the shares of the company. The interests of the directors in the shares of Scottish Power plc, at the beginning and end of the period were as follows:

	At 1 November 2005	Granted/ appropriated/ other net movement	Exercised	Lapsed	Vested	At 31 March 2006
<b>Keith Anderson</b>						
<b>Shares</b>						
Ordinary Shares(*)	10,454	184	—	—	—	10,638

- (\*) These shares include Partnership Shares purchased pursuant to the Inland Revenue approved ScottishPower Employee Share Ownership Plan (ESOP).
- (#) All Free Shares and Matching Shares appropriated pursuant to the Inland Revenue approved ScottishPower ESOP are held in Trust and are subject to forfeiture provisions during the three year period from the date of appropriation.
- (\*\*) These shares represent, in each case, the maximum number of shares which the directors may receive, dependent on the satisfaction of certain performance criteria as approved by the shareholders of Scottish Power plc in connection with the Long Term Incentive Plan.

### Directors' responsibilities

The directors are required by company law (Northern Ireland) to prepare Accounts for each financial period, which give a true and fair view of the state of affairs of the company as at the end of the financial period and of the profit or loss of the company for the period.

The directors confirm that suitable accounting policies have been used and applied consistently and that reasonable and prudent judgements have been made in the preparation of the Accounts for the period ended 31 March 2006. The directors also confirm that applicable accounting standards have been followed and that the Accounts have been prepared on the going concern basis.

The directors are responsible for maintaining proper accounting records which disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the financial statements comply with the Companies (Northern Ireland) Order 1986. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud or any other irregularities.

Each of the directors in office as at the date of this Directors' Report and Accounts confirms that:

- so far as he is aware, there is no relevant audit information of which the company's auditors are unaware; and
- he has taken all the steps that he ought to have taken as a director in order to make himself aware of any relevant audit information and to establish that the company's auditors are aware of that information.

### Auditors

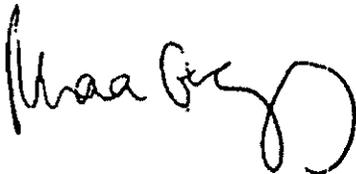

The company has elected, pursuant to Article 387A of the Companies (Northern Ireland) Order 1986, to dispense with the following obligations:

- to lay accounts and reports before general meetings;
- to hold annual general meetings; and
- to appoint auditors annually.

The directors appointed PricewaterhouseCoopers LLP as auditors on 9 January 2006.

During the period, Scottish Power plc, the company's ultimate parent company, carried out a competitive tender in relation to the provision of audit services. Following the outcome of this exercise, the Board of Scottish Power plc, on recommendation of the Audit Committee of Scottish Power plc, sought shareholder approval at the Annual General Meeting of Scottish Power plc to appoint Deloitte & Touche LLP in place of the retiring auditors, PricewaterhouseCoopers LLP. This approval was obtained and the directors of Callagheen Wind Farm Limited will propose the appointment of Deloitte & Touche LLP as auditors of the company for the year ending 31 March 2007.

By Order of the Board

Rhona Gregg  
Secretary  
16 November 2006

**Callagheen Wind Farm Limited**  
**Accounting Policies and Definitions**

**Definitions**

***Revenue cost definitions***

***Cost of sales***

Cost of sales reflects the direct costs of the generation of electricity.

***Other definitions***

***Company***

Callagheen Wind Farm Limited

***ScottishPower***

Scottish Power plc.

***Ultimate parent company***

Scottish Power plc.

**Accounting Policies**

***Basis of accounting***

The Accounts have been prepared under the historical cost convention, and in accordance with applicable accounting standards in the UK and comply with the requirements of the Companies (Northern Ireland) Order 1986.

***Cash flow statement***

The company is exempt from including a statement of cash flows in its Accounts as it is a wholly owned subsidiary of ScottishPower, which has included a consolidated statement of cash flows in its consolidated Accounts.

***Use of estimates***

The preparation of Accounts in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Accounts. Actual results can differ from those estimates.

***Turnover***

Turnover, which excludes Value Added Tax and trade discounts, comprises the invoiced value of electricity generated and accrued income. Accrued income represents the sales value of energy which is yet to be invoiced and is based on the value of units supplied. Units are determined by energy volumes recorded on the windfarm meters and industry-wide trading and settlement systems.

***Interest***

Interest payable and receivable is recognised in the profit and loss account as it is incurred.

***Taxation***

Where required, and in accordance with Financial Reporting Standard ("FRS") 19 'Deferred Tax', full provision is made for deferred tax on a non-discounted basis.

***Tangible fixed assets***

Tangible fixed assets are stated at cost and are depreciated on the straight-line method over their estimated operational lives. Tangible fixed assets include capitalised employee and other costs which are directly attributable to the construction of fixed assets. The main depreciation periods used by the company are as set out below.

	<u>Years</u>
Plant and machinery .....	20

The carrying values of tangible fixed assets are reviewed for impairment in periods if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the year in which they are identified.

***Decommissioning costs***

Provision is made on a discounted basis for the estimated decommissioning costs at the end of the producing lives of the company's power stations. Capitalised decommissioning costs are depreciated over the useful lives of the related assets. The unwinding of the discount is included within net interest and similar charges.

**Callagheen Wind Farm Limited**  
**Profit and Loss Account**  
**for the period ended 31 March 2006**

	Notes	Five months ended 31 March 2006 £'000	Eighteen months ended 31 October 2005 £'000
<b>Turnover</b> .....		81	—

**14 Related party transactions**

Scottish Power Limited had ultimate control over the company. The company has taken an exemption, as allowed by FRS 8, 'Related Party Disclosures', not to disclose related party transactions with other group companies as the ultimate parent company publishes full statutory consolidated Accounts.

**15 Ultimate parent company**

The directors regard Scottish Power plc to be the ultimate parent company, which is also the parent company of the largest group in which the results of the company are consolidated. The parent company of the smallest group in which the results are consolidated is Scottish Power UK Holdings Limited. Copies of both companies' consolidated Accounts can be obtained from The Secretary, Scottish Power plc, 1 Atlantic Quay, Glasgow, G2 8SP.

**Callagheen Wind Farm Limited**  
**Independent Auditors' Report**  
**To the members of Callagheen Wind Farm Limited**

We have audited the financial statements of Callagheen Wind Farm Limited for the period ended 31 March 2006 which comprise the Accounting Policies and Definitions, the Profit and Loss Account, the Balance Sheet and the related notes. These financial statements have been prepared under the accounting policies set out therein.

**Respective responsibilities of directors and auditors**

As described in the Statement of Directors' Responsibilities the company's directors are responsible for the preparation of the financial statements in accordance with applicable Northern Ireland law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice).

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland). This report, including the opinion, has been prepared for and only for the company's members as a body in accordance with Article 243 of the Companies (Northern Ireland) Order 1986 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We report to you whether in our opinion the information given in the Directors' Report is consistent with the financial statements. We also report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

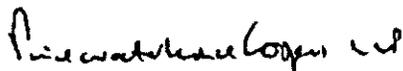

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgments made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the company's affairs as at 31 March 2006 and of its loss for the period then ended;
- the financial statement have been properly prepared in accordance with the Companies Act 1985; and
- the information given in the Directors' Report is consistent with the financial statements.

## Callagheen Wind Farm Limited

### Report of the Directors

The directors present their first report and audited Accounts for the eighteen month period from the company's incorporation on 1 May 2004 to 31 October 2005.

#### Activities and review

The company was incorporated on 1 May 2004 as L&B (No 62) Limited and changed its name on 21 September 2005 to Callagheen Wind Farm Limited. The company's principal activity is the development and construction of a windfarm in Northern Ireland. The company was not involved in trading during the period.

#### Review of business and future developments

During the period ended 31 October 2005 £12,452,000 of costs were incurred on the development and construction of the wind farm. These costs have been capitalised and included on the balance sheet. Funding of these activities was achieved by a loan from another group undertaking.

On 31 October 2005, Scottish Power UK Holdings Limited completed the acquisition of 100% of the issued share capital of Callagheen Wind Farm Limited from Wind Farm Developments Limited for a cash consideration, excluding expenses, of £2.

The accounting reference date of the company was changed upon acquisition from 31 May to 31 October.

The company has net current liabilities of £12,452,000 (which includes a current loan from group undertakings of £5,480,000) at 31 October 2005. The directors consider that sufficient funding will be made available to the company by its ultimate parent company to continue operations and to meet liabilities as they fall due.

#### Results and dividend

The profit of the company for the period amounted to £nil. The directors recommend that no dividend be paid in respect of the period ended 31 October 2005.

#### Directors and their interests

The directors who held office during the period were as follows:

L&B (No 62) Limited	(appointed at incorporation, resigned 8 September 2004)
Michael J Harper	(appointed 8 September 2004, resigned 31 October 2005)
Robert I Harvey	(appointed 8 September 2004, resigned 31 October 2005)
William Hopkins	(appointed 8 September 2004, resigned 31 October 2005)
Michael R O'Neill	(appointed 8 September 2004, resigned 31 October 2005)
Keith S Anderson	(appointed 31 October 2005)
John Heasley	(appointed 31 October 2005)

Neither of the directors who held office at the end of the financial period had any disclosable interests in the shares of the company. The interests of the directors in the shares of Scottish Power plc, at the beginning and end of the period were as follows:

	At date of appointment (31 Oct 2005)	Granted/ appropriated/ other net movement	Exercised	Lapsed	Vested	At 31 Oct 2005
<b>John Heasley</b>						
<b>Shares</b>

(\*) These shares include Partnership Shares purchased pursuant to the Inland Revenue approved ScottishPower Employee Share Ownership Plan (ESOP).

(#) All Free Shares and Matching Shares appropriated pursuant to the Inland Revenue approved ScottishPower ESOP are held in Trust and are subject to forfeiture provisions during the three year period from the date of appropriation.

(†) Deferred shares represent a portion of performance bonus and are held in trust for three years from the award date.

(\*\*) These shares represent, in each case, the maximum number of shares which the directors may receive, dependent on the satisfaction of certain performance criteria as approved by the shareholders of Scottish Power plc in connection with the Long Term Incentive Plan.

### Directors' responsibilities

The directors are required by company law (Northern Ireland) to prepare Accounts for each financial year, which give a true and fair view of the state of affairs of the company as at the end of the financial year and of the profit or loss of the company for the period.

The directors confirm that suitable accounting policies have been used and applied consistently and that reasonable and prudent judgements have been made in the preparation of the Accounts for the period ended 31 October 2005. The directors also confirm that applicable accounting standards have been followed and that the Accounts have been prepared on the going concern basis.

The directors are responsible for maintaining proper accounting records which disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the financial statements comply with the Companies (Northern Ireland) Order 1986. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud or any other irregularities.

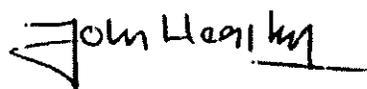

### Auditors

Deloitte & Touche LLP resigned as auditors on 31 October 2005 and the directors appointed PricewaterhouseCoopers LLP in their place on 9 January 2006.

The company has elected, pursuant to Article 387A of the Companies (Northern Ireland) Order 1986, to dispense with the following obligations:

- to lay accounts and reports before general meetings;
- to hold annual general meetings; and
- to appoint auditors annually.

### On Behalf of the Board

**John Heasley**  
Director  
22 February 2006

## **Callagheen Wind Farm Limited**

### **Accounting Policies**

#### **Basis of accounting**

The Accounts have been prepared on the going concern basis, under the historical cost convention, and in accordance with applicable accounting standards in the UK and the Companies (Northern Ireland) Order 1986.

#### **Use of estimates**

The preparation of Accounts in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Accounts. Actual results can differ from those estimates.

#### **Statement of cash flows**

No cash flow statement has been prepared because there was no cash balance at the beginning or end of the period and all costs incurred were paid for by the immediate parent on behalf of the company.

#### **Taxation**

Where required and in accordance with the Financial Reporting Standard ("FRS") 19 'Deferred Tax', full provision is made for deferred tax on a non-discounted basis.

#### **Tangible fixed assets**

Tangible fixed assets are stated at cost and are depreciated using the straight line method over their estimated operational lives. Tangible fixed assets include capitalised employee and other costs which are directly attributable to the construction of fixed assets. Fixed assets are not subject to depreciation while under construction. The carrying value of tangible fixed assets is reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the period in which they are identified.

**Callagheen Wind Farm Limited**

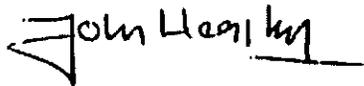

**Balance Sheet  
as at 31 October 2005**

During the period the company also had transactions with its previous parent, Wind Farm Developments Limited. These transactions related to the purchase of fixed assets which were paid for by Wind Farm Developments Limited with a cost of £1,165,748 funded by an intercompany loan. The amount of VAT recoverable relating to the fixed assets purchased totaled £204,006 of which only £72,756 had not been reclaimed at 31 October 2005; this balance of £72,756 was treated as an intercompany loan from Wind Farm Developments Limited. Upon acquisition of the company by Scottish Power UK Holdings Limited on 31 October 2005 the total intercompany loan of £1,238,504 was repaid to Wind Farm Developments Limited by Scottish Power UK Holdings Limited.

**11 Ultimate parent company**

Upon acquisition of the company by Scottish Power UK Holdings Limited on 31 October 2005, the directors regard Scottish Power plc as the ultimate parent company, which is also the parent company of the largest group in which the results of the company will be consolidated. The parent company of the smallest group in which the results of the company will be consolidated is Scottish Power UK Holdings Limited. Copies of both companies' consolidated Accounts can be obtained from The Secretary, Scottish Power plc, 1 Atlantic Quay, Glasgow, G2 8SP.

**Independent Auditors' Report  
to the members of Callagheen Wind Farm Limited**

We have audited the Accounts on pages 4 to 8 which have been prepared under the historical cost convention and the accounting policies set out on page 4.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the Directors' Report and Accounts in accordance with applicable Northern Ireland law and United Kingdom accounting standards are set out in the statement of directors' responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and United Kingdom Auditing Standards issued by the Auditing Practices Board. This report, including the opinion, has been prepared for and only for the company's members as a body in accordance with Article 243 of the Companies (Northern Ireland) Order 1986 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies (Northern Ireland) Order 1986. We also report to you if, in our opinion, the Report of Directors is not consistent with the Accounts, if the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and transactions is not disclosed.

We read the other information contained in the Directors' Report and Accounts and consider the implications for our report if we become aware of any apparent misstatements or material inconsistencies with the Accounts. The other information comprises the Report of the Directors.

**Basis of audit opinion**

We conducted our audit in accordance with auditing standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the Accounts. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the Accounts, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Accounts are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the Accounts.

**Opinion**

In our opinion the Accounts give a true and fair view of the state of the company's affairs at 31 October 2005 and have been properly prepared in accordance with the Companies (Northern Ireland) Order 1986.

**For the year ended 31 March 2007**

## Contents

Directors' report .....	F-336
Statement of directors' responsibilities .....	F-337
Independent auditors' report .....	F-338
Profit and loss account .....	F-339
Balance sheet .....	F-340
Notes to the financial statements .....	F-341 – F-345

## Directors' report

The directors present their annual report and the audited financial statements of Carland Cross Limited (the 'Company') for the year ended 31 March 2007.

### Principal activity and business review

The principal activity of the Company is to operate a windfarm on a site near Mitchell in Cornwall. The windfarm generates electricity using wind turbines, and consists of fifteen Vestas wind turbines.

### Capital investment and future developments

The Company will continue to manage and maximise investments in renewable energy generation.

### Profit and dividend

The profit for the year before tax amounted to £704,000 (2006: £466,700) and £492,900 (2006: £323,600) after tax. The directors paid a dividend for the year of £590,000 (2006: £330,000).

### Directors

The directors who served throughout the year were:

Samuel Robert James Anderson	alternate to David Neil Morrison
Stephen John Tivadar Balint	
Christopher David Sweatman	alternate to Stephen John Tivadar Balint
Tariq Masood	
David Neil Morrison	

None of the directors were materially interested in any contract of significance in relation to the Company's business.

### Statement of disclosure to auditors

In the case of each of the persons who were directors at the time when the report is approved under Section 234A the following applies:

- (a) so far as the directors are aware, there is no relevant audit information of which the Company's auditors are unaware, and
- (b) the directors have taken all the steps that they ought to have taken as directors in order to make themselves aware of any relevant audit information and to establish that the company's auditors are aware of this information.

### Auditors

In accordance with section 385 of the Companies Act 1985 a resolution for the reappointment of PKF (UK) LLP will be proposed at the forthcoming annual general meeting.

By Order of the Board,

T Masood  
Director

5 July 2007

### **Statement of directors' responsibilities**

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The financial statements are required to give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing those financial statements the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

**Independent auditors' report  
to the members of Carland Cross Limited**

We have audited the financial statements of Carland Cross Limited for the year ended 31 March 2007 which comprise the Profit and Loss Account, the Balance Sheet and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the Company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the annual report and the financial statements in accordance with applicable law and United Kingdom accounting standards ('United Kingdom Generally Accepted Accounting Practice') are set out in the statement of directors' responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you whether in our opinion the information given in the directors' report is consistent with the financial statements.

In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the Company's affairs as at 31 March 2007 and of its profit for the year then ended;
- the financial statements have been prepared in accordance with the Companies Act 1985; and
- the information given in the directors' report is consistent with the financial statements.

The accompanying notes are an integral part of these financial statements.

The financial statements on pages 4 to 11 were approved and authorised for issue by the Board of Directors on 5 July 2007 and were signed on its behalf by:

T Masood  
Director

**Notes to the financial statements  
For the year ended 31 March 2007**

**1 Accounting policies**

The principal accounting policies are summarised below.

***Basis of preparation***

The financial statements have been prepared under the historical cost convention and in accordance with the Companies Act 1985 and applicable accounting standards. They have been prepared under United Kingdom Generally Accepted Accounting Practice ("UK GAAP"). Accounting policies have been applied consistently throughout the year and the preceding year except where changes have been made to previous policies on adoption of new accounting standards.

***Turnover***

Turnover is stated net of value added tax (see Note 2).

***Leases***

Operating lease rentals are charged to the profit and loss account in relation to the total number of units generated (see Note 17).

***Tangible fixed assets***

Tangible fixed assets are stated at cost, net of depreciation and any provision for impairment.

***Depreciation***

The charge for depreciation is calculated to write off assets over their estimated useful economic lives taking into account anticipated residual values. The lives of depreciable plant and machinery generation assets are all 20 years.

***Stock***

Stocks are valued at the lower of cost and net realisable value.

***Tax***

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in years different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets and liabilities are not discounted.

***Cash flow statement***

There is no statement of cash flows as the Company is a wholly owned subsidiary of Wind Resources Limited, which is registered in England and Wales and which includes a consolidated cash flow statement in its financial statements. This treatment is permitted by FRS 1 (Revised).

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

**2 Turnover**

Turnover represents sales of electricity products to Npower Limited under a power sales agreement. The electricity products comprise sale of energy, levy exemption certificates, triad benefits and renewable obligation certificates. The prices are agreed in advance and stated in the power sales agreement. The Climate Change Levy allows the Company to receive a proportion of the exempting benefit available to Npower Limited as a consequence of wind energy being exempt from the Levy.

From 1 April 2002, the Government introduced the Renewables Obligation. Generation of electricity from wind energy is eligible under the Renewables Obligation. Renewable Obligation certificates are obtained and sold under a power purchase agreement, yielding additional income for the Company.

The Company operates wholly in the United Kingdom.

**3 Operating expenses**

The directors consider that the nature of the business is such that the analysis of expenses shown below is more informative than that set out in the Companies Act 1985 formats.

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Operating and maintenance costs .....	206.0	207.1
Operating lease rentals—land and buildings .....	21.2	17.6
Administration .....	13.6	13.6
Depreciation .....	339.3	339.3
Rates .....	13.0	12.7
Fees .....	0.6	4.0
Audit fees .....	1.7	1.6
	<u>595.4</u>	<u>595.9</u>

**4 Directors and employees**

No director received any emoluments from the Company during the year (2006: £nil).

The Company had no employees during the current or the prior year.

**5 Interest receivable**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Bank interest receivable .....	40.4	22.7

**6 Tax on profit on ordinary activities**

a) Analysis of tax charge in the year

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Current tax:		
UK corporation tax on profits for the year .....	298.1	223.1
Total current tax (Note 6 (b)) .....	298.1	223.1
Deferred tax (Note 12):		
Origination and reversal of timing differences .....	(86.9)	(83.0)
Adjustment in respect of prior years .....	(0.1)	3.0
Total deferred tax .....	(87.0)	(80.0)
Tax on profit on ordinary activities .....	<u>211.1</u>	<u>143.1</u>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

b) Factors affecting tax charge for the year

The tax assessed for the year is different to the standard rate of corporation tax in the UK (30%). The differences are explained below:

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Profit on ordinary activities before tax .....	704.4	466.7
Profit on ordinary activities multiplied by the standard rate of corporation tax in the UK of 30% (2006: 30%) .....	211.2	140.1
Effects of:		
Capital allowances for the year less than depreciation .....	86.9	83.0
Current tax charge for the year (Note 6 (a)) .....	<u>298.1</u>	<u>223.1</u>

**7 Dividends**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Equity shares:		
Interim paid up of 41.17p; (2006: 23.03p) per ordinary share .....	590.0	330.0

**8 Tangible fixed assets**

	<u>Plant and machinery</u>
	£'000
<b>Cost</b>	
At 1 April 2006 .....	6,786.9
Additions .....	—
At 31 March 2007 .....	<u>6,786.9</u>
<b>Depreciation</b>	
At 1 April 2006 .....	4,580.2
Charge for the year .....	339.3
At 31 March 2007 .....	<u>4,919.5</u>
<b>Net book value</b>	
At 31 March 2007 .....	<u>1,867.4</u>
At 31 March 2006 .....	<u>2,206.7</u>

**9 Stocks**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Spare parts .....	<u>10.1</u>	<u>10.1</u>

**10 Debtors**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Trade debtors .....	41.4	37.2
Prepayments and accrued income .....	505.9	367.8
Other debtor .....	20.0	20.0
	<u>567.3</u>	<u>425.0</u>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

The £20,000 other debtor relates to a deposit held by a bank in line with planning conditions. It will become repayable at the end of the planning period, which is after more than one year from the balance sheet date.

**11 Creditors**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Corporation tax .....	197.5	102.1
Value added tax .....	48.6	42.4
Accruals and deferred income .....	63.5	127.6
	<u>309.6</u>	<u>272.1</u>

**12 Provisions for liabilities and charges—deferred tax**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Deferred taxation provided in respect of accelerated capital allowances at 30% (2006: 30%):		
At 1 April .....	582.5	662.5
Adjustment in respect of prior years .....	(0.1)	3.0
Credit for the year .....	(86.9)	(83.0)
At 31 March .....	<u>495.5</u>	<u>582.5</u>

**13 Called up share capital**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
<b>Authorised:</b>		
1,500,000 ordinary shares of £1 each .....	<u>1,500.0</u>	<u>1,500.0</u>
<b>Allotted, called up and fully paid:</b>		
1,433,155 ordinary shares of £1 each .....	<u>1,433.2</u>	<u>1,433.2</u>

All shares are held by Wind Resources Limited.

**14 Profit and loss account**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
At 1 April .....	872.0	878.4

Dividends .....	(590.0)	(330.0)
At 31 March .....	<u>774.9</u>	<u>872.0</u>

**15 Reconciliation of movements in equity shareholders' funds**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Profit for the year .....	492.9	323.6
Dividends .....	(590.0)	(330.0)
Net deductions from equity shareholders' funds .....	(97.1)	(6.4)
Opening equity shareholders' funds .....	2,305.2	2,311.6
Closing equity shareholders' funds .....	<u>2,208.1</u>	<u>2,305.2</u>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

**16 Related party transactions**

Disclosure is not required of related party transactions between group companies since the Company meets the exemption criteria of being at least a 90% subsidiary of its parent, Wind Resources Limited.

Western Power Generation Limited, an associate company of Avonbank Investments Limited, which holds 45% of the share capital of Wind Resources Limited, has a contract to provide management services to the Company. During the year the Company was charged £13,600 (2006: £13,600) under this contract, and at 31 March 2007 the Company owed £3,400 to Western Power Generation Limited (2006: £3,400). Payments in future years are linked to movements in the retail price index.

**17 Lease commitments**

The Company has a lease on the land occupied by the wind turbines that expires in September 2017, under which it has an obligation to pay the landowner, on a half yearly basis, the greater of either £300 per turbine or 2% of income from total units generated as rental.

**18 Subsequent event**

The Finance Bill 2007, which was regarded as substantially enacted on 26 June 2007, has introduced a reduction in the corporation tax rate from 30% to 28% from 1 April 2008 and the immediate withdrawal of balancing adjustments for assets where Industrial Buildings Allowances have been claimed. The effect of these changes is estimated to be a credit to the profit and loss account of £18k.

**19 Ultimate parent undertaking**

The immediate parent undertaking of Carland Cross Limited is Wind Resources Limited, which is registered in England and Wales, and is the largest group into which the results of the Company are consolidated. Copies of the financial statements of Wind Resources Limited may be obtained from the company's registered office as stated below.

Given that no member owns more than 45% of the issued share capital of Wind Resources Limited, it is therefore considered to be the ultimate parent undertaking.

Carland Cross Limited

## Contents

Directors' report .....	F-348
Statement of directors' responsibilities .....	F-349
Independent auditors' report .....	F-350
Profit and loss account .....	F-351
Balance sheet .....	F-352
Notes to the financial statements .....	F-353 – F-357

## Directors' report

The directors present their annual report and the audited financial statements of Carland Cross Limited (the 'Company') for the year ended 31 March 2006.

### Principal activity and business review

The principal activity of the Company is to operate a windfarm on a site near Mitchell in Cornwall. The windfarm generates electricity using wind turbines, and consists of fifteen Vestas wind turbines.

### Capital investment and future developments

The Company will continue to manage and maximise investments in renewable energy generation.

### Profit and dividend

The profit for the year before tax amounted to £466,700 (2005: £157,800) and £323,600 (2005: £115,300) after tax. The directors paid a dividend for the year of £330,000 (2005: £530,000).

### Directors

The directors who served throughout the year were:

Samuel Robert James Anderson	alternate to David Neil Morrison
Stephen John Tivadar Balint	
Dominic Paul Keating	alternate to Stephen John Tivadar Balint (resigned 16 February 2006)
Tariq Masood	
David Neil Morrison	

On 16 February 2006 Dominic Paul Keating resigned and Chris Sweatman was appointed as alternate director to Stephen Tivadar Balint.

At 31 March 2006 and throughout the year, no director had any interest in the shares of the Company or other group companies which required notification to the Company under Section 324 and registration by the Company under Section 325 of the Companies Act 1985.

None of the directors were materially interested in any contract of significance in relation to the Company's business.

### Statement of disclosure to auditors

In the case of each of the persons who were directors at the time when the report is approved under Section 234A the following applies:

- (a) so far as the directors are aware, there is no relevant audit information of which the Company's auditors are unaware, and
- (b) the directors have taken all the steps that they ought to have taken as directors in order to make themselves aware of any relevant audit information and to establish that the company's auditors are aware of this information.

### Auditors

In accordance with section 385 of the Companies Act 1985 a resolution for the reappointment of PKF (UK) LLP will be proposed at the forthcoming annual general meeting.

By Order of the Board,

T Masood  
Director

22 January 2007

### **Statement of directors' responsibilities**

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The financial statements are required to give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing those financial statements the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

**Independent auditors' report  
to the members of Carland Cross Limited**

We have audited the financial statements of Carland Cross Limited for the year ended 31 March 2006 which comprise the Profit and Loss Account, the Balance Sheet and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the Company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the annual report and the financial statements in accordance with applicable law and United Kingdom accounting standards ('United Kingdom Generally Accepted Accounting Practices') are set out in the statement of directors' responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you whether in our opinion the information given in the directors' report is consistent with the financial statements.

In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the Company's affairs as at 31 March 2006 and of its profit for the year then ended;
- the financial statements have been prepared in accordance with the Companies Act 1985; and
- the information given in the directors' report is consistent with the financial statements.

**Notes to the financial statements  
For the year ended 31 March 2006**

**1 Accounting policies**

The principal accounting policies are summarised below.

***Basis of preparation***

The financial statements have been prepared under the historical cost convention and in accordance with the Companies Act 1985 and applicable accounting standards. They have been prepared under United Kingdom Generally Accepted Accounting Practice ("UK GAAP"). Accounting policies have been applied consistently throughout the year and the preceding year except where changes have been made to previous policies on adoption of new accounting standards.

***Turnover***

Turnover is stated net of value added tax (see Note 2).

***Changes in accounting policies***

The company has adopted Financial Reporting Standard ("FRS") 21 'Events after balance sheet date', FRS 25 'Financial instruments: disclosure and presentation', and FRS 28 'Corresponding amounts'. The adoption of these standards in the current year represents a change in accounting policies. This change in accounting policies has had no effect on the Company and restatement of comparative figures has not been required.

***Leases***

Operating lease rentals are charged to the profit and loss account in relation to the total number of units generated (see Note 17).

***Tangible fixed assets***

Tangible fixed assets are stated at cost, net of depreciation and any provision for impairment.

***Depreciation***

The charge for depreciation is calculated to write off assets over their estimated useful economic lives taking into account anticipated residual values. The lives of depreciable plant and machinery generation assets are all 20 years.

***Stock***

Stocks are valued at the lower of cost and net realisable value.

***Tax***

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in years different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2006**

Deferred tax is measured at the average tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets and liabilities are not discounted.

**Cash flow statement**

There is no statement of cash flows as the Company is a wholly owned subsidiary of Wind Resources Limited, which is registered in England and Wales and which includes a consolidated cash flow statement in its financial statements. This treatment is permitted by FRS 1 (Revised).

**2 Turnover**

Turnover represents sales of electricity products to Npower Limited under a power sales agreement. The electricity products comprise sale of energy, levy exemption certificates, triad benefits and renewable obligation certificates. The prices are agreed in advance and stated in the power sales agreement. The Climate Change Levy allows the Company to receive a proportion of the exempting benefit available to Npower Limited as a consequence of wind energy being exempt from the Levy.

From 1 April 2002, the Government introduced the Renewables Obligation. Generation of electricity from wind energy is eligible under the Renewables Obligation. Renewable Obligation certificates are obtained and sold under a power purchase agreement, yielding additional income for the Company.

The Company operates wholly in the United Kingdom.

**3 Operating expenses**

The directors consider that the nature of the business is such that the analysis of expenses shown below is more informative than that set out in the Companies Act 1985 formats.

	2006	2005
	£'000	£'000

**16 Related party transactions**

Disclosure is not required of related party transactions between group companies since the Company meets the exemption criteria of being at least a 90% subsidiary of its parent, Wind Resources Limited.

Western Power Generation Limited, an associate company of Avonbank Investments Limited, which holds 45% of the share capital of Wind Resources Limited, has a contract to provide management services to the Company. During the year the Company was charged £13,600 (2005: £13,200) under this contract, and at 31 March 2006 the Company owed £3,400 to Western Power Generation Limited (2005: £3,300). Payments in future years are linked to movements in the retail price index.

**17 Lease commitments**

The Company has a lease on the land occupied by the wind turbines that expires in September 2017, under which it has an obligation to pay the landowner, on a half yearly basis, the greater of either £300 per turbine or 2% of income from total units generated as rental.

**18 Ultimate parent undertaking**

The immediate parent undertaking of Carland Cross Limited is Wind Resources Limited, which is registered in England and Wales, and is the largest group into which the results of the Company are consolidated. Copies of the financial statements of Wind Resources Limited may be obtained from the company's registered office as stated below.

Given that no member owns more than 45% of the issued share capital of Wind Resources Limited, it is therefore considered to be the ultimate parent undertaking.

Carland Cross Limited

## Contents

Directors' report .....	F-360
Statement of directors' responsibilities .....	F-361
Independent auditors' report .....	F-362
Profit and loss account .....	F-363
Balance sheet .....	F-364
Notes to the financial statements: .....	F-365 – F-370

**Directors' report**  
**For the year ended 31 March 2005**

The directors present their annual report and the audited financial statements of Carland Cross Limited (the 'Company') for the year ended 31 March 2005.

**Principal activity and business review**

The principal activity of the Company is to operate a windfarm on a site near Mitchell in Cornwall. The windfarm generates electricity using wind turbines, and consists of fifteen Vestas wind turbines.

**Capital investment and future developments**

The Company will continue to manage and maximise investments in renewable energy generation.

**Profit and dividend**

The profit for the year before taxation amounted to £157,800 (2004: £1,967,200) and £115,300 (2004: £1,377,100) after taxation. The directors paid a dividend for the year of £530,000 (2004: £380,000).

The profit in 2004 included an impairment reversal. To make the profits in both years comparable, the impact of the impairment reversal in 2004 should be taken into account as detailed in note 4.

**Directors**

The directors who served throughout the year were:

Samuel Robert James Anderson	alternate to David Neil Morrison
Stephen John Tivadar Balint	
Dominic Paul Keating	alternate to Stephen John Tivadar Balint
Tariq Masood	
David Neil Morrison	

At 31 March 2005 and throughout the year, no director had any interest in the shares of the Company or other group companies which required notification to the Company under Section 324 and registration by the Company under Section 325 of the Companies Act 1985.

None of the directors were materially interested in any contract of significance in relation to the Company's business.

**Auditors**

On 23 May 2005, PKF transferred their business to PKF (UK) LLP, a limited liability partnership. Under section 26(5) of the Companies Act 1989, the company consented to extend the audit appointment to PKF (UK) LLP from 23 May 2005. Accordingly, the audit report has been signed in the name of PKF (UK) LLP and a resolution for the reappointment of PKF (UK) LLP will be proposed at the forthcoming annual general meeting.

By Order of the Board

T Masood  
Director

20 January 2006

### **Statement of directors' responsibilities**

Company law requires the directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that year. In preparing those financial statements the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors confirm that they have complied with the above requirements in preparing the financial statements.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for ensuring that the directors' report is prepared in accordance with Company Law in the United Kingdom.

**Independent auditors' report  
to the members of Carland Cross Limited**

We have audited the financial statements of Carland Cross Limited for the year ended 31 March 2005 which comprise the profit and loss account, the balance sheet and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the Company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the Annual Report and the financial statements in accordance with applicable law and United Kingdom Accounting Standards are set out in the Statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and United Kingdom Auditing Standards.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you if, in our opinion, the Directors' Report is not consistent with the financial statements, if the Company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and transactions with the Company is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with United Kingdom Auditing Standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion the financial statements give a true and fair view of the state of the Company's affairs as at 31 March 2005 and of its profit for the year then ended and have been properly prepared in accordance with the Companies Act 1985.

The financial statements on pages 4 to 13 were approved by the Board of Directors on 20 January 2006 and were signed on its behalf by:

T Masood  
Director

**Notes to the financial statements  
For the year ended 31 March 2005**

**1 Accounting policies**

A summary of the principal accounting policies, all of which have been consistently applied, is set out below.

***Basis of preparation***

The financial statements have been prepared under the historical cost convention and in accordance with applicable accounting standards.

***Turnover***

Turnover is stated net of value added tax (see Note 2).

***Leases***

Operating lease rentals are charged to the profit and loss account in relation to the total number of units generated (see Note 18).

***Tangible fixed assets***

Tangible fixed assets are stated at cost, net of depreciation and any provision for impairment.

***Depreciation***

The charge for depreciation is calculated to write off assets over their estimated useful economic lives taking into account anticipated residual values. The lives of depreciable plant and machinery generation assets are all 20 years.

***Stock***

Stocks are valued at the lower of cost and net realisable value.

***Taxation***

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in years different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

***Cash flow statement***

The Company is exempt from the requirement to prepare a cash flow statement under Financial Reporting Standard 1 (revised) on the basis that it is a wholly owned subsidiary of Wind Resources Limited which is registered in England and Wales and includes a consolidated cash flow statement in its consolidated financial statements.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

**2 Turnover**

Turnover represents sales of electricity products to London Electricity Group plc under a power sales agreement. The electricity products comprise sale of energy, levy exemption certificates, triad benefits and renewable obligation certificates. The prices are agreed in advance and stated in the power sales agreement. The Climate Change Levy allows the Company to receive a proportion of the exempting benefit available to London Electricity Group plc as a consequence of wind energy being exempt from the Levy.

From 1 April 2002, the Government introduced the Renewables Obligation. Generation of electricity from wind energy is eligible under the Renewables Obligation. Renewable Obligation certificates are obtained and sold under a power purchase agreement, yielding additional income for the Company.

The Company operates wholly in the United Kingdom.

**3 Operating expenses**

The directors consider that the nature of the business is such that the analysis of expenses shown below is more informative than that set out in the Companies Act 1985 formats.

	2005	2004
	£'000	£'000
Operating and maintenance costs .....	318.5	189.0
Operating lease rentals—land and buildings .....	17.5	19.7
Administration .....	13.2	12.9
Depreciation .....	357.7	161.5
Rates .....	13.7	15.0
Fees .....	4.0	1.1
Audit fees .....	1.4	1.1
	726.0	400.3

**4 Exceptional item—impairment reversal**

In 1998 and 1999 impairment reviews, which followed the provisions of Financial Reporting Standard 11 “Impairment of fixed assets and goodwill”, were carried out on the windfarm. The result of the impairment reviews was to account for an additional £2,454,200 of depreciation in order to reduce the net book value of the windfarm assets to their then estimated recoverable amounts.

Following the introduction of the Renewables Obligation on 1 April 2002 a further impairment review was carried out in 2004 which resulted in the revaluation of the windfarm assets to their original depreciated value. The total depreciation charged on the windfarm assets was reduced by £1,466,500.

A provision for deferred tax was made on the impairment reversal. The provision was based on the current tax rate of 30%, increasing the total deferred tax provision by £439,950.

In estimating the recoverable amount of the windfarm assets a forecast period of 9 years was used. Future output was assumed to be in line with historical trends, with sales being based on predicted power prices. General inflation was assumed to be 2.5% per annum. A discount rate of 10% was used.

**5 Directors and employees**

No director received any emoluments from the Company during the year (2004: £nil).

The Company had no employees during the current or the prior year.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

**6 Interest receivable (net)**

	<b>2005</b>	<b>2004</b>
	<b>£'000</b>	<b>£'000</b>
Bank interest receivable .....	20.8	9.5
Bank interest payable .....	—	(0.5)
Interest payable on corporation tax underpayment .....	—	(0.1)
Interest receivable (net) .....	20.8	8.9

**7 Tax on profit on ordinary activities**

a) Analysis of tax charge in the year

	<b>2005</b>	<b>2004</b>
	<b>£'000</b>	<b>£'000</b>
<b>Current tax:</b>		
UK corporation tax on profits for the year .....	129.0	167.7
Adjustment in respect of prior years .....	—	1.7
Total current tax (Note 7 (b)) .....	129.0	169.4
<b>Deferred tax (Note 13):</b>		
Origination and reversal of timing differences .....	(83.4)	(17.5)
Exceptional item—impairment reversal .....	—	440.0
Adjustment in respect of prior years .....	(3.1)	(1.8)
Total deferred tax .....	(86.5)	420.7
Tax on profit on ordinary activities .....	42.5	590.1

b) Factors affecting tax charge for the year

The tax assessed for the year is different to the standard rate of corporation tax in the UK (30%). The differences are explained below:

	<b>2005</b>	<b>2004</b>
	<b>£'000</b>	<b>£'000</b>
Profit on ordinary activities before tax .....	157.8	1,967.2
Profit on ordinary activities multiplied by the standard rate of corporation tax in the UK of 30% (2004: 30%) .....	47.3	590.2
<b>Effects of:</b>		
Capital allowances for the year less than depreciation .....	83.4	17.5
Exceptional item—impairment reversal .....	—	(440.0)
Adjustment in respect of prior years .....	—	1.7
Marginal relief .....	(1.7)	—
Current tax charge for the year (Note 7 (a)) .....	129.0	169.4

**17 Related party transactions**

Disclosure is not required of related party transactions between group companies since the Company meets the exemption criteria of being at least a 90% subsidiary of its parent, Wind Resources Limited.

Renewable Energy Systems Limited, an associate company of RES-Gen Limited, which owns 10% of Wind Resources Limited (the parent company), was the turnkey contractor for the construction of the windfarm, and held an operating and maintenance contract with the Company until March 2004. During the year the cost under this contract was £nil (2004: £66,378) and at 31 March 2005 the Company owed £nil to Renewable Energy Systems Limited (2004: £3,388).

Western Power Generation Limited, an associate company of Avonbank Investments Limited, which holds 45% of the share capital of Wind Resources Limited, has a contract to provide management services to the Company. During the year the Company was charged £13,200 (2004: £12,876) under this contract, and at 31 March 2005 the Company owed £3,300 to Western Power Generation Limited (2004: £3,219). Payments in future years are linked to movements in the retail price index.

**18 Lease commitments**

The Company has a lease on the land occupied by the wind turbines that expires in September 2017, under which it has an obligation to pay the landowner, on a half yearly basis, the greater of either £300 per turbine or 2% of income from total units generated as rental.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

**19 Ultimate parent undertaking**

The immediate parent undertaking of Carland Cross Limited is Wind Resources Limited, which is registered in England and Wales, and is the largest group into which the results of the Company are consolidated. Copies of the financial statements of Wind Resources Limited may be obtained from the company's registered office as stated below.

Given that no member owns more than 45% of the issued share capital of Wind Resources Limited, it is therefore considered to be the ultimate parent undertaking.

**CELTPOWER LIMITED**  
**for year ended 31 December 2006**

**Report of the Directors**

The directors present their report and audited Accounts for the year ended 31 December 2006.

**Activities and review**

The principal activity of Celtpower Limited "the company" is the operation of wind powered electricity generation. During the year the company continued to operate wind farm sites in Wales and this activity will continue for the foreseeable future.

**Directors and their interests**

The directors who held office during the year were as follows:

Keith Anderson  
Simon Christian  
David Morrison  
Kunihiko Okuma  
Minoru Saito  
Motoyasu Sakamoto

Minoru Saito resigned as a director on 6<sup>th</sup> February 2007 and was replaced by Malcolm Garrity on the same day.

None of the directors who held office at the end of the financial year had any disclosable interest in the shares of the company.

**Key factors affecting the business**

The key factors affecting the business include weather conditions and generation resource availability.

**Operational financial performance**

Operating profit increased by £922,000 to £3,133,000, principally due to a combination of an increase in generated output and an improved pricing structure.

During the year £431,000 of costs were incurred in the development of a new wind farm. These costs have been capitalised and included on the balance sheet.

Both the level of business and the year end financial position were satisfactory and the directors expect that the present level of activity will be sustained for the foreseeable future.

**Results and dividend**

The profit for the year amounted to £2,273,000 (2005: £1,553,000). The aggregate dividends paid during the year amounted to £1,000,000 (2005: £2,000,000).

**Financing review**

*Capital Structure*

The company is equity funded. The equity of the company is held jointly by ScottishPower Generation Limited and Eurus Energy UK Limited.

*Funding*

At the end of the year the company had short term bank deposits of £3,553,000 (2005: £2,044,000).

*Liquidity*

The directors confirm that the company remains a going concern on the basis of its future cash flow forecasts and has sufficient working capital for present requirements.

### **Statement of directors' responsibilities**

The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice).

The financial statements are required by law to give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period.

In preparing these financial statements, the directors are required to: select suitable accounting policies and then apply them consistently; make judgments and estimates that are reasonable and prudent; state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements, and prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that its financial statements comply with the Companies Act 1985. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities.

### **Charitable contributions**

During the year the company made charitable contributions totalling £3,088 (2005: £11,555).

### **Disclosure of information to auditors**

The directors who held office at the date of approval of this directors' report confirm that, so far as they are each aware, there is no relevant audit information of which the Company's auditors are unaware; and each director has taken all the steps that he ought to have taken as a director to make himself aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

### **Auditors**

The directors of the Company will re-appoint KPMG LLP as auditors of the company at the board meeting approving the Accounts for the year ended 31 December 2006.

### **On behalf of the Board**

A handwritten signature in black ink, appearing to read 'Simon Christian', with a horizontal line underneath it.

**Simon Christian**  
**Director**

**13 June 2007**

3 Prenton Way  
Prenton  
CH43 3ET

**CELTPOWER LIMITED**  
**for the year ended 31 December 2006**

**Accounting Policies**

**Basis of accounting**

The Accounts have been prepared under the historical cost convention and in accordance with applicable accounting standards in the UK and comply with the requirements of the Companies Act 1985.

**Turnover**

Turnover, which excludes Value Added Tax and trade discounts, represents the invoiced value of electricity generated, Renewable Obligation Certificates, Levy Exemption Certificates and accrued income. Accrued income represents the sales value of energy which is yet to be invoiced and is based on the value of units supplied. Units are determined by energy volumes recorded on the wind farm meters and industry-wide trading and settlement systems.

**Interest**

Interest payable and receivable is reflected in the profit and loss account as it arises.

**Taxation**

In accordance with Financial Reporting Standard ("FRS") 19 'Deferred tax', full provision is made for deferred tax on a non discounted basis.

**Operating leases**

Rentals payable under operating leases are charged to the profit and loss account as incurred.

**Tangible fixed assets**

Tangible fixed assets are stated at cost and include all costs which are directly attributable to the construction of fixed assets.

Depreciation is calculated in order to write off the cost of tangible fixed assets, less their estimated residual value, on a straight-line basis over the expected useful economic lives of the assets concerned. Assets in the course of construction are not depreciated.

The annual rate used for plant and machinery is as follows:

From acquisition to 31 December 1998 .....	13.3% per annum
Thereafter .....	6.6% per annum

The carrying values of tangible fixed assets are reviewed for impairment in periods if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the year in which they are identified.

**CELTPOWER LIMITED**  
**Profit and Loss Account**  
**for the year ended 31 December 2006**

	<u>Notes</u>	<u>Year ended 31 December 2006</u>	<u>Year ended 31 December 2005</u>
		£000	£000
<b>Turnover</b> .....		5,606	4,066
Operating expenses .....		<u>(2,473)</u>	<u>(1,855)</u>
<b>Operating profit</b> .....	1	3,133	2,211
Interest payable .....		(113)	(30)

#### 15 Financial commitments

At 31 December 2006 the company had annual commitments under non-cancellable operating leases for ground rent payable. The operating lease payments are dependent on the company's turnover.

#### 16 Related party transactions

During the year to 31 December 2006, CeltPower Limited sold electricity, Renewable Obligation Certificates and Levy Exemption Certificates to ScottishPower Energy Retail Limited (a subsidiary of the ScottishPower Group) amounting to £5,606,000 (2005: £4,066,000). At 31 December 2006 ScottishPower Energy Retail Limited owed CeltPower Limited £1,464,000 (2004: £957,000) in respect of these services.

During the year to 31 December 2006, CeltPower Limited paid management charges of £200,000 to ScottishPower Generation Limited and £200,000 to Eurus Energy UK Limited.

All transactions undertaken between related parties were provided in the ordinary course of business and at arms length.

#### 17 Ownership

The company is jointly owned and controlled by ScottishPower Generation Limited, a subsidiary of Scottish Power plc, incorporated and registered in Scotland and Eurus Energy UK Limited, a subsidiary of Eurus Energy Holdings Corporation which is incorporated and registered in Japan. Eurus Energy Holdings Corporation is owned jointly by Tokyo Electric Power Company and Toyota Tsusho Corporation. Eurus Energy Europe B.V. transferred its interest in the company to Eurus Energy UK Limited on the 29th December 2006.

### **Independent auditors' report to the members of Celtpower Limited**

We have audited the financial statements of Celtpower Limited for the year ended 31 December 2006 which comprise the Profit and Loss Account, the Balance Sheet, the Cash Flow Statement, and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

#### **Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the financial statements in accordance with applicable law and UK Accounting Standards (UK Generally Accepted Accounting Practice) are set out in the Statement of Directors' Responsibilities on page 2.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you whether in our opinion the information given in the Directors' Report is consistent with the financial statements.

In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

#### **Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgments made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with UK Generally Accepted Accounting Practice, of the state of the company's affairs as at 31 December 2006 and of its profit for the year then ended;
- the financial statements have been properly prepared in accordance with the Companies Act 1985; and
- the information given in the Directors' Report is consistent with the financial statements.

**CELTPOWER LIMITED**  
**for year ended 31 December 2005**

**Report of the Directors**

The directors present their report and audited Accounts for the year ended 31 December 2005.

**Results and dividend**

The profit for the year amounted to £1,553,000 (2004: £2,033,000). The directors recommended and paid a dividend of £2,000,000 during the year (2004: £2,000,000). The retained profit for the year of £1,553,000 (2004: £2,033,000) has been transferred to reserves.

**Activities and review**

The principal activity of the company is wind powered electricity generation.

Both the level of operations and the financial position at the year end were satisfactory. The directors expect to continue the present profitable operations.

**Directors and their interests**

The directors who held office during the year were as follows:

Keith Anderson	(appointed 23 December 2005)
Alan Bryce	(resigned 2 May 2005)
Simon Christian	
John Heasley	(resigned 23 December 2005)
John Matthew	(resigned 30 September 2005)
David Morrison	(appointed 2 May 2005)
Kunihiko Okuma	(appointed 30 September 2005)
Minoru Saito	
Motoyasu Sakamoto	

None of the directors who held office at the end of the financial year had any disclosable interest in the shares of the company.

**Statement of directors' responsibilities**

The directors are responsible for preparing the Directors' Report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with UK Accounting Standards.

The financial statements are required by law to give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period.

In preparing these financial statements, the directors are required to:

select suitable accounting policies and then apply them consistently;

make judgments and estimates that are reasonable and prudent;

state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements, and

prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that its financial statements comply with the Companies Act 1985. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities.

Under applicable law the directors are also responsible for preparing a Directors' Report that complies with that law.

### Charitable contributions

During the year the following donations were made:

Llidiartywaen Centre Committee .....	£1,000.00
Severn Valley Trotting Races .....	£ 250.00
Llandinam Community Primary School .....	£ 400.00

CH43 3ET

**CELTPOWER LIMITED**  
**for the year ended 31 December 2005**

**Accounting Policies**

**Basis of accounting**

The Accounts have been prepared under the historical cost convention and in accordance with applicable accounting standards in the UK and comply with the requirements of the Companies Act 1985.

**Turnover**

Turnover, which excludes Value Added Tax and trade discounts, represents the invoiced value of electricity generated.

**Tangible fixed assets**

The cost of tangible fixed assets comprises construction costs, together with any incidental costs of construction.

Depreciation is calculated in order to write off the cost of tangible fixed assets, less their estimated residual value, on a straight-line basis over the expected useful economic lives of the assets concerned. Assets in the course of construction are not depreciated.

The annual rate used for plant and machinery is as follows:

From acquisition to 31 December 1998 .....	13.3% per annum
Thereafter .....	6.6% per annum

The carrying values of tangible fixed assets are reviewed for impairment in periods if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the period in which they are identified.

**Operating leases**

All leases are regarded as operating leases and the total payments are charged to the profit and loss account as incurred.

**Interest**

Interest receivable is reflected in the profit and loss account as it arises.

**Taxation**

In accordance with Financial Reporting Standard 19 ("FRS") 'Deferred tax', full provision is made for deferred tax on a non discounted basis.

**CELTPOWER LIMITED**  
**Profit and Loss Account**  
**for the year ended 31 December 2005**

	Notes	Year ended 31 December 2005	Year ended 31 December 2004
		£000	£000
<b>Turnover</b> .....	1	4,066	4,283
Operating expenses .....		(1,855)	(1,475)
<b>Operating Profit</b> .....		2,211	2,808
Interest payable .....		(30)	—
Interest receivable .....		115	89
<b>Profit on ordinary activities before taxation</b> .....	2	2,296	2,897

## CELTPOWER LIMITED

### Notes to the Accounts—(Continued) for the year ended 31 December 2005

#### 16 Financial commitments

At 31 December 2005 the company had annual commitments under non-cancellable operating leases for ground rent payable. The operating lease payments are dependent on the company's turnover.

#### 17 Related party transactions

During the year to 31 December 2005, CeltPower Limited sold electricity to ScottishPower Energy Retail Limited (a subsidiary of the ScottishPower Group) amounting to £4,066,000 (2004: £4,283,000). At 31 December 2005 ScottishPower Energy Retail Limited owed CeltPower Limited £957,000 (2004: £926,000) in respect of these services.

All transactions undertaken between related parties were provided in the ordinary course of business and at arms length.

#### 18 Ownership

The company is jointly owned and controlled by ScottishPower Generation Limited, a subsidiary of Scottish Power plc, incorporated and registered in Scotland and Eurus Energy Europe B.V., a subsidiary of Eurus Energy Holdings Corporation which is incorporated and registered in Japan. Eurus Energy Holdings Corporation is owned jointly by Tokyo Electric Power Company and Tomen Corporation.

### **Independent auditors' report to the members of Celtpower Limited**

We have audited the financial statements of Celtpower Limited for the year ended 31 December 2005 which comprise the Profit and Loss Account, the Balance Sheet, the Cash Flow Statement and the related notes. These financial statements have been prepared under the accounting policies set out therein.

#### **Respective responsibilities of directors and auditors**

As described in the Statement of Directors' Responsibilities on page 3, the company's directors are responsible for the preparation of the financial statements in accordance with applicable law and UK Accounting Standards (UK Generally Accepted Accounting Practice).

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you if, in our opinion, the Directors' Report is not consistent with the financial statements, if the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

#### **Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgments made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

#### **Opinion**

In our opinion the financial statements:

- give a true and fair view, in accordance with UK Generally Accepted Accounting Practice, of the state of the company's affairs as at 31 December 2005 and of its profit for the year then ended; and
- have been properly prepared in accordance with the Companies Act 1985.

**DIRECTORS' REPORT AND ACCOUNTS**  
**For the year ended 31 December 2004**

**CELTPOWER LIMITED**  
**Directors' Report and Accounts**  
**for the year ended 31 December 2004**

**Contents**

	<u>Page</u>
Report of the Directors .....	F-400
Accounting Policies .....	F-402
Profit and Loss Account .....	F-403
Cash Flow Statement .....	F-404
Balance Sheet .....	F-405
Notes to the Accounts .....	F-406
Independent Auditors' Report .....	F-410

**CELTPOWER LIMITED**  
**for year ended 31 December 2004**

**Report of the Directors**

The directors present their report and audited Accounts for the year ended 31 December 2004.

**Results and dividend**

The profit for the year amounted to £2,033,000 (2003: £437,000). The directors recommended and paid a dividend of £2,000,000 during the year (2003: £Nil). The retained profit for the year of £33,000 (2003: £437,000) has been transferred to reserves.

**Activities and review**

The principal activity of the company is wind powered electricity generation.

Both the level of operations and the financial position at the year end were satisfactory. The directors expect to continue the present profitable operations.

**Directors and their interests**

The directors who held office during the year were as follows:

Alan Bryce	
Adrian Coats	(resigned 24 August 2004)
John Heasley	
John Matthew	
Minoru Saito	
Motoyasu Sakamoto	
Simon Christian	(appointed 24 August 2004)

None of the directors who held office at the end of the financial year had any disclosable interest in the shares of the company.

**Company Secretary**

Grace Buckley resigned as company secretary on 30 April 2004 and David Rhodes was appointed as her replacement on 1 May 2004.

**Directors' responsibilities**

Company law requires the directors to prepare financial statements for each financial period which give a true and fair view of the state of affairs of the company and of the profit or loss for that period. In preparing those financial statements, the directors are required to:

- Select suitable accounting policies and then apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- Prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy, at any time, the financial position of the company and to enable them to ensure that the Accounts comply with the Companies Act 1985. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the company and to prevent and detect fraud and other irregularities. The directors also confirm that applicable accounting standards have been followed.

**Charitable contributions**

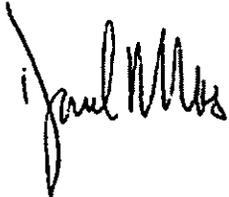

During the year the following donations were made:

Llandinam CP School .....	£1,000
Newtown Football Club .....	£ 500
Caersws Football Club .....	£ 200
Severn Valley Trotting Races .....	£ 200
Montgomery Junior FC .....	£ 300
Llidiartwaen Community Centre .....	£ 750
Chemotherapy Day Centre .....	£ 500
Llandinam Village Hall .....	£ 500
Llidiartwaen School .....	£ 300
Newtown Rugby Club .....	£ 300
St Michael's School .....	£1,000
Dolfor Community Primary School .....	£1,000

**Auditors**

A resolution for the re-appointment of KPMG LLP as auditors of the company will be proposed at the Annual General Meeting.

**By order of the Board**

**16 Financial commitments**

At 31 December 2004 the company had annual commitments under non-cancellable operating leases for ground rent payable. The operating lease payments are dependent on the company's turnover.

**17 Related party transactions**

During the year to 31 December 2004, CeltPower Limited sold electricity to ScottishPower Energy Retail Limited (a subsidiary of the ScottishPower Group) amounting to £4,283,000 (2003: £3,614,000). At 31 December 2004 ScottishPower Energy Retail Limited owed CeltPower Limited £926,000 (2003: £701,000) in respect of these services.

All transactions undertaken between related parties were provided in the ordinary course of business and at arms length.

**18 Ownership**

The company is jointly owned and controlled by ScottishPower Generation Limited, a subsidiary of Scottish Power plc, incorporated and registered in Scotland and Eurus Energy (Europe) B.V., a subsidiary of Eurus Holdings Japan which is incorporated and registered in Japan. Eurus Holdings Japan is owned jointly by Tomem Corporation and Tokyo Electric Power Company.

### **Report of the independent auditors to the members of Celtpower Limited**

We have audited the financial statements on pages 5 to 13.

This report is made solely to the company's members, as a body, in accordance with section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

#### **Respective responsibilities of directors and auditors**

The directors are responsible for preparing the directors' report and, as described on page 3, the financial statements in accordance with applicable United Kingdom law and accounting standards. Our responsibilities, as independent auditors, are established in the United Kingdom by statute, the Auditing Practices Board and by our profession's ethical guidance.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you if, in our opinion, the directors' report is not consistent with the financial statements, if the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and transactions with the company is not disclosed.

#### **Basis of audit opinion**

We conducted our audit in accordance with Auditing Standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

#### **Opinion**

In our opinion the financial statements give a true and fair view of the state of the company's affairs as at 31 December 2004 and of its profit for the year then ended and have been properly prepared in accordance with the Companies Act 1985.

**ANNUAL REPORT AND FINANCIAL STATEMENTS**  
**For the year ended 31 March 2007**

## Contents

Directors' report .....	F-413
Statement of directors' responsibilities .....	F-414
Independent auditors' report .....	F-415
Profit and loss account .....	F-416
Balance sheet .....	F-417
Notes to the financial statements .....	F-418 – F-422

## Directors' report

The directors present their annual report and the audited financial statements of Coal Clough Limited (the 'Company') for the year ended 31 March 2007.

### Principal activity and business review

The principal activity of the Company is to operate a windfarm on a site near Burnley in Lancashire. The windfarm generates electricity using wind turbines, and consists of twenty four Vestas wind turbines.

### Capital investment and future developments

The Company will continue to manage and maximise its investments in renewable energy generation.

### Profit and dividend

The profit for the year before tax amounted to £953,000 (2006: £579,600) and £667,100 (2006: £405,700) after tax. The directors paid a dividend for the year of £820,000 (2006: £550,000).

### Directors

The directors who served throughout the year were:-

Samuel Robert James Anderson	alternate to David Neil Morrison
Stephen John Tivadar Balint	
Christopher David Sweatman	alternate to Stephen John Tivadar Balint
Tariq Masood	
David Neil Morrison	

None of the directors were materially interested in any contract of significance in relation to the Company's business.

### Statement of disclosure to auditors

In the case of each of the persons who were directors at the time when the report is approved under Section 234A the following applies:

- (a) so far as the directors are aware, there is no relevant audit information of which the Company's auditors are unaware, and
- (b) the directors have taken all the steps that they ought to have taken as directors in order to make themselves aware of any relevant audit information and to establish that the company's auditors are aware of this information.

### Auditors

In accordance with Section 385 of the Companies Act 1985 a resolution for the reappointment of PKF (UK) LLP will be proposed at the forthcoming annual general meeting.

By Order of the Board

T Masood  
Director

5 July 2007

### **Statement of directors' responsibilities**

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The financial statements are required to give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

**Independent auditors' report  
to the members of Coal Clough Limited**

We have audited the financial statements of Coal Clough Limited for the year ended 31 March 2007 which comprise the Profit and Loss Account, the Balance Sheet and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the Company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the annual report and the financial statements in accordance with applicable law and United Kingdom accounting standards ('United Kingdom Generally Accepted Accounting Practice') are set out in the Statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and have been properly prepared in accordance with the Companies Act 1985. We also report to you whether in our opinion, the information given in the directors' report is consistent with the financial statements.

In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the Company's affairs as at 31 March 2007 and of its profit for the year then ended;
- the financial statements have been prepared in accordance with the Companies Act 1985; and
- the information given in the directors' report is consistent with the financial statements.

The financial statements on pages 4 to 11 were approved and authorised for issue by the Board of Directors on 5 July 2007 and were signed on its behalf by:

T Masood  
Director

**Notes to the financial statements**  
**For the year ended 31 March 2007**

**1 Accounting policies**

The principal accounting policies are summarised below.

***Basis of preparation***

The financial statements have been prepared under the historical cost convention and in accordance with the Companies Act 1985 and applicable accounting standards. They have been prepared under United Kingdom Generally Accepted Accounting Practice ("UK GAAP"). Accounting policies have been applied consistently throughout the year and the preceding year except where changes have been made to previous policies on adoption of new accounting standards.

***Turnover***

Turnover is stated net of value added tax (see Note 2).

***Leases***

Operating lease rentals are charged to the profit and loss account in relation to the total number of units generated (see Note 16).

***Tangible fixed assets***

Tangible fixed assets are stated at cost, net of depreciation and any provision for impairment.

***Depreciation***

The charge for depreciation is calculated to write off assets over their estimated useful economic lives taking into account anticipated residual values. The lives of depreciable plant and machinery generation assets are all 20 years.

***Tax***

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in years different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets and liabilities are not discounted.

***Cash flow statement***

There is no statement of cash flows as the Company is a wholly owned subsidiary of Wind Resources Limited, which is registered in England and Wales and which includes a consolidated cash flow statement in its financial statements. This treatment is permitted by FRS 1 (Revised).

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

**2 Turnover**

Turnover represents sales of electricity products to Npower Limited under a power sales agreement. The electricity products comprise sale of energy, levy exemption certificates, triad benefits and renewable obligation certificates. The prices are agreed in advance and stated in the power sales agreement. The Climate Change Levy allows the Company to receive a proportion of the exempting benefit available to Npower Limited as a consequence of wind energy being exempt from the Levy.

From 1 April 2002, the Government introduced the Renewables Obligation. Generation of electricity from wind energy is eligible under the Renewables Obligation. Renewable Obligation certificates are obtained and sold under a power purchase agreement, yielding additional income for the Company.

The Company operates wholly in the United Kingdom.

**3 Operating expenses**

The directors consider that the nature of the business is such that the analysis of expenses shown below is more informative than that set out in the Companies Act 1985 formats.

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Operating and maintenance costs .....	272.8	309.0
Operating lease rentals—land and buildings .....	35.4	25.3
Administration .....	13.6	13.6
Depreciation .....	549.4	549.4
Rates .....	20.8	20.3
Fees .....	0.4	12.2
Audit fees .....	1.6	1.6
	<u>894.0</u>	<u>931.4</u>

**4 Directors and employees**

No director received any emoluments from the Company during the year (2006: £nil).

The Company had no employees during the current or prior year.

**5 Interest receivable**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Bank interest receivable .....	<u>55.8</u>	<u>33.0</u>

**6 Tax on profit on ordinary activities**

a) Analysis of tax charge in the year

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Current tax:		
UK corporation tax on profits for the year .....	428.2	311.8
Total current tax (Note 6 (b)) .....	428.2	311.8
Deferred tax (Note 11):		
Origination and reversal of timing differences .....	(142.3)	(137.9)
Total deferred tax .....	(142.3)	(137.9)
Tax on profit on ordinary activities .....	<u>285.9</u>	<u>173.9</u>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

b) Factors affecting tax charge for the year

The tax assessed for the year is different to the standard rate of corporation tax in the UK (30%). The differences are explained below:

	<b>2007</b>	<b>2006</b>
	<b>£'000</b>	<b>£'000</b>
Profit on ordinary activities before tax .....	<b>953.0</b>	<b>579.6</b>
Profit on ordinary activities multiplied by standard rate of corporation tax in the UK of 30% (2006:30%) .....	<b>285.9</b>	173.9
Effects of:		
Capital allowances for the year less man depreciation .....	<b>142.3</b>	137.9
Current tax charge for the year (Note 6 (a)) .....	<b><u>428.2</u></b>	<b><u>311.8</u></b>

**7 Dividends**

	<b>2007</b>	<b>2006</b>
	<b>£'000</b>	<b>£'000</b>
Equity shares: Interim dividend paid of 33.88p (2006: 22.73p) per ordinary share .....	<b>820.0</b>	550.0

**8 Tangible fixed assets**

	<b>Plant and machinery</b>
	<b>£'000</b>
<b>Cost</b>	
At 1 April 2006 .....	10,986.3
Additions .....	7.5
31 March 2007 .....	<b><u>10,993.8</u></b>
<b>Depreciation</b>	
At 1 April 2006 .....	7,308.4
Charge for the year .....	549.4
At 31 March 2007 .....	<b><u>7,857.8</u></b>
<b>Net book value</b>	
At 31 March 2007 .....	<b><u>3,136.0</u></b>
At 31 March 2006 .....	<b><u>3,677.9</u></b>

**9 Debtors**

	<b>2007</b>	<b>2006</b>
	<b>£'000</b>	<b>£'000</b>
Trade debtors .....	<b>4.0</b>	26.3
Prepayments and accrued income .....	<b>746.8</b>	509.4
Other debtor .....	<b>58.0</b>	40.0
	<b><u>808.8</u></b>	<b><u>575.7</u></b>

The £58,000 (2006: £40,000) Other debtor relates to a deposit given to Burnley Council in line with planning conditions. It will become repayable at the end of the planning period, which is after more than one year from the balance sheet date.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

**10 Creditors**

	<u>2007</u>	<u>2006</u>

Dividends .....	(820.0)	(550.0)
At 31 March .....	<u>1,095.9</u>	<u>1,248.8</u>

**14 Reconciliation of movements in equity shareholders' funds**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Profit for the year .....	667.1	405.7
Dividends .....	(820.0)	(550.0)
Net deduction from equity shareholders' funds .....	(152.9)	(144.3)
Opening equity shareholders' funds .....	<u>3,668.8</u>	<u>3,813.1</u>
Closing equity shareholders' funds .....	<u>3,515.9</u>	<u>3,668.8</u>

**15 Related party transactions**

Disclosure is not required of related party transactions between group companies under FRS 8 since the Company meets the exemption criteria of being at least a 90% subsidiary of its parent, Wind Resources Limited.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

Western Power Generation Limited, an associate company of Avonbank Investments Limited, which holds 45% of the share capital of Wind Resources Limited, has a contract to provide management services to the Company. During the year the Company was charged £13,600 (2006: £13,600) under this contract, and at 31 March 2007 the Company owed £3,400 to Western Power Generation Limited (2006: £3,400). Payments in future years are linked to movements in the retail price index.

**16 Lease commitments**

The Company has a lease on the land occupied by the wind turbines that expires in July 2017, under which it has an obligation to pay the landowner, on a quarterly basis, the greater of either £100 per turbine or 2% of income from total units generated as rental.

**17 Subsequent event**

The Finance Bill 2007, which was regarded as substantially enacted on 26 June 2007, has introduced a reduction in the corporation tax rate from 30% to 28% from 1 April 2008 and the immediate withdrawal of balancing adjustments for assets where Industrial Buildings Allowances have been claimed. The effect of these changes is estimated to be a credit to the profit and loss account of £38k.

**18 Ultimate parent undertaking**

The immediate parent undertaking of Coal Clough Limited is Wind Resources Limited, which is registered in England and Wales, and is the largest group into which the results of the Company are consolidated. Copies of the financial statements of Wind Resources Limited may be obtained from the Company's registered office as stated below.

Given that no member owns more than 45% of the issued share capital of Wind Resources Limited, it is therefore considered to be the ultimate parent undertaking.

## Directors' report

The directors present their annual report and the audited financial statements of Coal Clough Limited (the 'Company') for the year ended 31 March 2006.

### Principal activity and business review

The principal activity of the Company is to operate a windfarm on a site near Burnley in Lancashire. The windfarm generates electricity using wind turbines, and consists of twenty four Vestas wind turbines.

### Capital investment and future developments

The Company will continue to manage and maximise its investments in renewable energy generation.

### Profit and dividend

The profit for the year before tax amounted to £579,600 (2005: £441,300) and £405,700 (2005: £308,900) after tax. The directors paid a dividend for the year of £550,000 (2005: £1,360,000).

### Directors

The directors who served throughout the year were:-

Samuel Robert James Anderson    alternate to David Neil Morrison  
Stephen John Tivadar Balint  
Dominic Paul Keating                alternate to Stephen John Tivadar Balint (resigned 16 February 2006)  
Tariq Masood  
David Neil Morrison

On 16 February 2006 Dominic Paul Keating resigned and Chris Sweatman was appointed as alternate director to Stephen John Tivadar Balint.

At 31 March 2006 and throughout the year, no director had any interest in the shares of the Company or other group companies which required notification to the Company under Section 324 and registration by the Company under Section 325 of the Companies Act 1985.

None of the directors were materially interested in any contract of significance in relation to the Company's business.

### Statement of disclosure to auditors

In the case of each of the persons who were directors at the time when the report is approved under Section 234A the following applies:

- (a) so far as the directors are aware, there is no relevant audit information of which the Company's auditors are unaware, and
- (b) the directors have taken all the steps that they ought to have taken as directors in order to make themselves aware of any relevant audit information and to establish that the company's auditors are aware of this information.

### Auditors

In accordance with Section 385 of the Companies Act 1985 a resolution for the reappointment of PKF (UK) LLP will be proposed at the forthcoming annual general meeting.

By Order of the Board

T Masood  
Director

22 January 2007

### **Statement of directors' responsibilities**

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The financial statements are required to give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

**Independent auditors' report  
to the members of Coal Clough Limited**

We have audited the financial statements of Coal Clough Limited for the year ended 31 March 2006 which comprise the Profit and Loss Account, the Balance Sheet and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the Company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the annual report and the financial statements in accordance with applicable law and United Kingdom accounting standards ('United Kingdom Generally Accepted Accounting Practice') are set out in the Statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you whether in our opinion, the information given in the directors' report is consistent with the financial statements.

In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the Company's affairs as at 31 March 2006 and of its profit for the year then ended;
- the financial statements have been prepared in accordance with the Companies Act 1985; and
- the information given in the directors' report is consistent with the financial statements.

The financial statements on pages 4 to 11 were approved and authorised for issue by the Board of Directors on 22 January 2007 and were signed on its behalf by:

T Masood  
Director

**Notes to the financial statements  
For the year ended 31 March 2006**

**1 Accounting policies**

The principal accounting policies are summarised below.

***Basis of preparation***

The financial statements have been prepared under the historical cost convention and in accordance with the Companies Act 1985 and applicable accounting standards. They have been prepared under United Kingdom Generally Accepted Accounting Practice ("UK GAAP"). Accounting policies have been applied consistently throughout the year and the preceding year except where changes have been made to previous policies on adoption of new accounting standards.

***Turnover***

Turnover is stated net of value added tax (see Note 2).

***Changes in accounting policies***

The company has adopted Financial Reporting Standard ("FRS") 21 'Events after balance sheet date', FRS 25 'Financial instruments: disclosure and presentation', and FRS 28 'Corresponding amounts'. The adoption of these standards in the current year represents a change in accounting policies. This change in accounting policies has had no effect on the Company and restatement of comparative figures has not been required.

***Leases***

Operating lease rentals are charged to the profit and loss account in relation to the total number of units generated (see Note 16).

***Tangible fixed assets***

Tangible fixed assets are stated at cost, net of depreciation and any provision for impairment.

***Depreciation***

The charge for depreciation is calculated to write off assets over their estimated useful economic lives taking into account anticipated residual values. The lives of depreciable plant and machinery generation assets are all 20 years.

***Tax***

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in years different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets and liabilities are not discounted.

***Cash flow statement***

There is no statement of cash flows as the Company is a wholly owned subsidiary of Wind Resources Limited, which is registered in England and Wales and which includes a consolidated cash flow statement in its financial statements. This treatment is permitted by FRS 1 (Revised).

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2006**

**2 Turnover**

Turnover represents sales of electricity products to Npower Limited under a power sales agreement. The electricity products comprise sale of energy, levy exemption certificates, triad benefits and renewable obligation certificates. The prices are agreed in advance and stated in the power sales agreement. The Climate Change Levy allows the Company to receive a proportion of the exempting benefit available to Npower Limited as a consequence of wind energy being exempt from the Levy.

From 1 April 2002, the Government introduced the Renewables Obligation. Generation of electricity from wind energy is eligible under the Renewables Obligation. Renewable Obligation certificates are obtained and sold under a power purchase agreement, yielding additional income for the Company.

The Company operates wholly in the United Kingdom.

**3 Operating expenses**

The directors consider that the nature of the business is such that the analysis of expenses shown below is more informative than that set out in the Companies Act 1985 formats.

	<u>2006</u>	<u>2005</u>
	£'000	£'000
Operating and maintenance costs .....	309.0	249.8
Operating lease rentals—land and buildings .....	25.3	25.8
Administration .....	13.6	13.2
Depreciation .....	549.4	566.5
Rates .....	20.3	21.9
Fees .....	12.2	5.5
Audit fees .....	1.6	1.4
	<u>931.4</u>	<u>884.1</u>

**4 Directors and employees**

No director received any emoluments from the Company during the year (2005: £nil).

The Company had no employees during the current or prior year.

**5 Interest receivable**

	<u>2006</u>	<u>2005</u>
	£'000	£'000
Bank interest receivable .....	33.0	38.7

**6 Tax on profit on ordinary activities**

a) Analysis of tax charge in the year

	<u>2006</u>	<u>2005</u>
	£'000	£'000
Current tax:		
UK corporation tax on profits for the year .....	311.8	270.1
Adjustment in respect of prior years .....	—	2.0
Total current tax (Note 6 (b)) .....	311.8	272.1
Deferred tax (Note 11):		
Origination and reversal of timing differences .....	(137.9)	(137.7)
Adjustment in respect of prior years .....	—	2.0
Total deferred tax .....	(137.9)	(139.7)
Tax on profit on ordinary activities .....	<u>173.9</u>	<u>132.4</u>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2006**

b) Factors affecting tax charge for the year

The tax assessed for the year is different to the standard rate of corporation tax in the UK (30%). The differences are explained below:

	<b>2006</b>	<b>2005</b>
	<b>£'000</b>	<b>£'000</b>
Profit on ordinary activities before tax .....	<b>579.6</b>	<b>441.3</b>
Profit on ordinary activities multiplied by standard rate of corporation tax in the UK of 30% (2005:30%) .....	<b>173.9</b>	132.4
Effects of:		
Capital allowances for the year less than depreciation .....	<b>137.9</b>	137.7
Adjustment in respect of prior years .....	<b>—</b>	2.0
Current tax charge for the year (Note 6 (a)) .....	<b>311.8</b>	<b>272.1</b>

**7 Dividends**

	<b>2006</b>	<b>2005</b>
	<b>£'000</b>	<b>£'000</b>
Equity shares:		
Interim dividend paid of 22.73p (2005 56.20p) per ordinary share .....	<b>550.0</b>	1,360.0

**8 Tangible fixed assets**

	<b>Plant and machinery</b>
	<b>£'000</b>
<b>Cost</b>	
At 1 April 2005 and 31 March 2006 .....	<b>10,986.3</b>
<b>Depreciation</b>	
At 1 April 2005 .....	6,759.0
Charge for the year .....	549.4
At 31 March 2006 .....	<b>7,308.4</b>
<b>Net book value</b>	
At 31 March 2006 .....	<b>3,667.9</b>
At 31 March 2005 .....	<b>4,227.3</b>

**9 Debtors**

	<b>2006</b>	<b>2005</b>
	<b>£'000</b>	<b>£'000</b>
Trade debtors .....	<b>26.3</b>	—
Prepayments and accrued income .....	<b>509.4</b>	408.2
Other debtor .....	<b>40.0</b>	40.0
	<b>575.7</b>	<b>448.2</b>

The £40,000 Other debtor relates to a deposit given to Burnley Council in line with planning conditions. It will become repayable at the end of the planning period, which is after more than one year from the balance sheet date.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2006**

**10 Creditors**

	<u>2006</u>	<u>2005</u>
	£'000	£'000
Corporation tax .....	150.3	143.3
Value added tax .....	66.6	60.2
Accruals and deferred income .....	73.5	67.9
	<u>290.4</u>	<u>271.4</u>

**11 Provisions for liabilities and charges—deferred tax**

	<u>2006</u>	<u>2005</u>
	£'000	£'000
Deferred tax provided in respect of accelerated capital allowances at 30% (2005: 30%):		
At 1 April .....	1,110.0	1,249.7
Adjustment in respect of prior years .....	—	(2.0)
Credit for the year .....	(137.9)	(137.7)
At 31 March .....	<u>972.1</u>	<u>1,110.0</u>

**12 Called up share capital**

	<u>2006</u>	<u>2005</u>
	£'000	£'000
<b>Authorised:</b>		
2,500,000 ordinary shares of £1 each .....	2,500.0	2,500.0
<b>Allotted, called up and fully paid:</b>		
2,420,002 ordinary shares of £1 each .....	<u>2,420.0</u>	<u>2,420.0</u>

All shares are held by Wind Resources Limited.

**13 Profit and loss account**

	<u>2006</u>	<u>2005</u>
	£'000	£'000
At 1 April .....	1,393.1	2,444.2
Profit after tax .....	405.7	308.9
Dividends .....	(550.0)	(1,360.0)
At 31 March .....	<u>1,248.8</u>	<u>1,393.1</u>

**14 Reconciliation of movements in equity shareholders' funds**

	<u>2006</u>	<u>2005</u>
	£'000	£'000
Profit for the year .....	405.7	308.9
Dividends .....	(550.0)	(1,360.0)
Net deduction from equity shareholders' funds .....	(144.3)	(1,051.1)
Opening equity shareholders' funds .....	3,813.1	4,864.2
Closing equity shareholders' funds .....	<u>3,668.8</u>	<u>3,813.1</u>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2006**

**15 Related party transactions**

Disclosure is not required of related party transactions between group companies under FRS 8 since the Company meets the exemption criteria of being at least a 90% subsidiary of its parent, Wind Resources Limited.

Western Power Generation Limited, an associate company of Avonbank Investments Limited, which holds 45% of the share capital of Wind Resources Limited, has a contract to provide management services to the Company. During the year the Company was charged £13,600 (2005: £13,200) under this contract, and at 31 March 2006 the Company owed £3,400 to Western Power Generation Limited (2005: £3,300). Payments in future years are linked to movements in the retail price index.

**16 Lease commitments**

The Company has a lease on the land occupied by the wind turbines that expires in July 2017, under which it has an obligation to pay the landowner, on a quarterly basis, the greater of either £100 per turbine or 2% of income from total units generated as rental.

**17 Ultimate parent undertaking**

The immediate parent undertaking of Coal Clough Limited is Wind Resources Limited, which is registered in England and Wales, and is the largest group into which the results of the Company are consolidated. Copies of the financial statements of Wind Resources Limited may be obtained from the Company's registered office as stated below.

Given that no member owns more than 45% of the issued share capital of Wind Resources Limited, it is therefore considered to be the ultimate parent undertaking.

**Directors' report**  
**For the year ended 31 March 2005**

The directors present their annual report and the audited financial statements of Coal Clough Limited (the 'Company') for the year ended 31 March 2005.

**Principal activity and business review**

The principal activity of the Company is to operate a windfarm on a site near Burnley in Lancashire. The windfarm generates electricity using wind turbines, and consists of twenty four Vestas wind turbines.

**Capital investment and future developments**

The Company will continue to manage and maximise its investments in renewable energy generation.

**Profit and dividend**

The profit for the year before taxation amounted to £441,300 (2004: £3,730,600) and £308,900 (2004: £2,611,300) after taxation. The directors paid a dividend for the year of £1,360,000 (2004: £550,000).

The profit in 2004 included an impairment reversal. To make the profits in both years comparable, the impact of the impairment reversal in 2004 should be taken into account as detailed in note 4.

**Directors**

The directors who served throughout the year were:-

Samuel Robert James Anderson	alternate to David Neil Morrison
Stephen John Tivadar Balint	
Dominic Paul Keating	alternate to Stephen John Tivadar Balint
Tariq Masood	
David Neil Morrison	

At 31 March 2005 and throughout the year, no director had any interest in the shares of the Company or other group companies which required notification to the Company under Section 324 and registration by the Company under Section 325 of the Companies Act 1985.

None of the directors were materially interested in any contract of significance in relation to the Company's business.

**Auditors**

On 23 May 2005, PKF transferred their business to PKF (UK) LLP, a limited liability partnership. Under section 26(5) of the Companies Act 1989, the company consented to extend the audit appointment to PKF (UK) LLP from 23 May 2005. Accordingly, the audit report has been signed in the name of PKF (UK) LLP and a resolution for the reappointment of PKF (UK) LLP will be proposed at the forthcoming annual general meeting.

By Order of the Board

T Masood  
Director

20 January 2006

### Statement of directors' responsibilities

Company law requires the directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that year. In preparing those financial statements the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors confirm that they have complied with the above requirements in preparing the financial statements.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for ensuring that the directors' report is prepared in accordance with Company Law in the United Kingdom.

**Independent auditors' report  
to the members of Coal Clough Limited**

We have audited the financial statements of Coal Clough Limited for the year ended 31 March 2005 which comprise the profit and loss account, the balance sheet and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the Company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the Annual Report and the financial statements in accordance with applicable law and United Kingdom Accounting Standards are set out in the Statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and United Kingdom Auditing Standards.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you if, in our opinion, the Directors' Report is not consistent with the financial statements, if the Company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and transactions with the Company is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with United Kingdom Auditing Standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion the financial statements give a true and fair view of the state of the Company's affairs as at 31 March 2005 and of its profit for the year then ended and have been properly prepared in accordance with the Companies Act 1985.

The financial statements on pages 4 to 12 were approved by the Board of Directors on 20 January 2006 and were signed on its behalf by :

T Masood  
Director

**Notes to the financial statements**  
**For the year ended 31 March 2005**

**1 Accounting policies**

A summary of the principal accounting policies, all of which have been consistently applied, is set out below.

***Basis of preparation***

The financial statements have been prepared under the historical cost convention and in accordance with applicable accounting standards.

***Turnover***

Turnover is stated net of value added tax (see Note 2).

***Leases***

Operating lease rentals are charged to the profit and loss account in relation to the total number of units generated (see Note 17).

***Tangible fixed assets***

Tangible fixed assets are stated at cost, net of depreciation and any provision for impairment.

***Depreciation***

The charge for depreciation is calculated to write off assets over their estimated useful economic lives taking into account anticipated residual values. The lives of depreciable plant and machinery generation assets are all 20 years.

***Taxation***

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in years different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

***Cash flow statement***

The Company is exempt from the requirement to prepare a cash flow statement under Financial Reporting Standard 1 (revised) on the basis that it is a wholly owned subsidiary of Wind Resources Limited which is registered in England and Wales and includes a consolidated cash flow statement in its consolidated financial statements.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

**2 Turnover**

Turnover represents sales of electricity products to London Electricity Group plc under a power sales agreement. The electricity products comprise sale of energy, levy exemption certificates, triad benefits and renewable obligation certificates. The prices are agreed in advance and stated in the power sales agreement. The Climate Change Levy allows the Company to receive a proportion of the exempting benefit available to London Electricity Group plc as a consequence of wind energy being exempt from the Levy.

From 1 April 2002, the Government introduced the Renewables Obligation. Generation of electricity from wind energy is eligible under the Renewables Obligation. Renewable Obligation certificates are obtained and sold under a power purchase agreement, yielding additional income for the Company.

The Company operates wholly in the United Kingdom.

**3 Operating expenses**

The directors consider that the nature of the business is such that the analysis of expenses shown below is more informative than that set out in the Companies Act 1985 formats.

	<b>2005</b>	<b>2004</b>
	<b>£'000</b>	<b>£'000</b>
Operating and maintenance costs .....	249.8	272.3
Operating lease rentals—land and buildings .....	25.8	24.3
Administration .....	13.2	12.9
Depreciation .....	566.5	228.8
Rates .....	21.9	24.0
Fees .....	5.5	1.1
Audit fees .....	1.4	1.1
	<b>884.1</b>	<b>564.5</b>

**4 Exceptional item—impairment reversal**

In 1998 and 1999 impairment reviews, which followed the provisions of Financial Reporting Standard 11 "Impairment of fixed assets and goodwill", were carried out on the windfarm. The result of the impairment reviews was to account for an additional £4,853,000 of depreciation in order to reduce the net book value of the windfarm assets to their then estimated recoverable amounts.

Following the introduction of the Renewables Obligation on 1 April 2002 a further impairment review was carried out in 2004 which resulted in the revaluation of the windfarm assets to their original depreciated value. The total depreciation charged on the windfarm assets was reduced by £3,035,900.

A provision for deferred tax was made on the impairment reversal. The provision was based on the current tax rate of 30%, increasing the total deferred tax provision by £910,770.

In estimating the recoverable amount of the windfarm assets a forecast period of 9 years was used. Future output was assumed to be in line with historical trends, with sales being based on predicted power prices. General inflation was assumed to be 2.5% per annum. A discount rate of 10% was used.

**5 Directors and employees**

No director received any emoluments from the Company during the year (2004: £nil).

The Company had no employees during the current or prior year.

**6 Interest receivable (net)**

	<b>2005</b>	<b>2004</b>
	<b>£'000</b>	<b>£'000</b>
Bank interest receivable .....	38.7	27.5
Interest payable on corporation tax underpayment .....	—	(0.5)
Interest receivable (net) .....	<b>38.7</b>	<b>27.0</b>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

**7 Tax on profit on ordinary activities**

a) Analysis of tax charge in the year

	2005	2004
	£'000	£'000
<b>Current tax:</b>		
UK corporation tax on profits for the year .....	270.1	235.6
Adjustment in respect of prior years .....	2.0	3.2
<b>Total current tax (Note 7 (b)) .....</b>	<b>272.1</b>	<b>238.8</b>
<b>Deferred tax (Note 12):</b>		
Origination and reversal of timing differences .....	(137.7)	(27.2)
Exceptional item—impairment reversal .....	—	910.8
Adjustment in respect of prior years .....	(2.0)	(3.1)
<b>Total deferred tax .....</b>	<b>(139.7)</b>	<b>880.5</b>
<b>Tax on profit on ordinary activities .....</b>	<b>132.4</b>	<b>1,119.3</b>

b) Factors affecting tax charge for the year

The tax assessed for the year is different to the standard rate of corporation tax in the UK (30%). The differences are explained below:

	2005	2004
	£'000	£'000
Profit on ordinary activities before tax .....	441.3	3,730.6
Profit on ordinary activities multiplied by standard rate of corporation tax in the UK of 30% (2006:30%) .....	132.4	1,119.2
<b>Effects of:</b>		
Capital allowances for the year less man depreciation .....	137.7	27.2
Exceptional item—impairment reversal .....	—	(910.8)
Adjustment in respect of prior years .....	2.0	3.2
<b>Current tax charge for the year (Note 7 (a)) .....</b>	<b>272.1</b>	<b>238.8</b>

**8 Dividends**

	2005	2004
	£'000	£'000
<b>Equity shares:</b>		
Interim dividend paid of 56.20p (2004: 22.7p) per ordinary share .....	1,360.0	550.0

**9 Tangible fixed assets**

	Plant and machinery
	£'000
<b>Cost</b>	
At 1 April 2004 and 31 March 2005 .....	10,986.3
<b>Depreciation</b>	
At 1 April 2004 .....	6,192.5
Charge for the year .....	566.5
At 31 March 2005 .....	6,759.0
<b>Net book value</b>	
At 31 March 2005 .....	4,227.3
At 31 March 2004 .....	4,793.8

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

**10 Debtors**

	<u>2005</u>	<u>2004</u>
	£'000	£'000
Trade debtors .....	—	50.6
Prepayments and accrued income .....	408.2	407.5
Other debtor .....	<u>40.0</u>	<u>40.0</u>
	<u>448.2</u>	<u>498.1</u>

The £40,000 Other debtor relates to a deposit given to Burnley Council in line with planning conditions. It will become repayable at the end of the planning period, which is after more than one year from the balance sheet date.

**11 Creditors**

	<u>2005</u>	<u>2004</u>
	£'000	£'000
Corporation tax .....	143.3	116.4
Value added tax .....	60.2	46.4
Accruals and deferred income .....	<u>67.9</u>	<u>67.4</u>
	<u>271.4</u>	<u>230.2</u>

**12 Provisions for liabilities and charges—deferred tax**

	<u>2005</u>	<u>2004</u>
	£'000	£'000
Deferred taxation provided in respect of accelerated capital allowances at 30% (2004: 30%):		
At 1 April .....	1,249.7	369.2
Adjustment in respect of prior years .....	(2.0)	(3.1)
Credit for the year .....	(137.7)	(27.2)
Exceptional item—impairment reversal .....	—	910.8
At 31 March .....	<u>1,110.0</u>	<u>1,249.7</u>

**13 Called up share capital**

	<u>2005</u>	<u>2004</u>
	£'000	£'000
<b>Authorised:</b>		
2,500,000 ordinary shares of £1 each .....	<u>2,500.0</u>	<u>2,500.0</u>
<b>Allotted, called up and fully paid:</b>		
2,420,002 ordinary shares of £1 each .....	<u>2,420.0</u>	<u>2,420.0</u>

All shares are held by Wind Resources Limited.

**14 Profit and loss account**

	<u>2005</u>	<u>2004</u>
	£'000	£'000
At 1 April .....	2,444.2	382.9
Retained (loss)/profit for the financial year .....	<u>(1,051.1)</u>	<u>2,061.3</u>
At 31 March .....	<u>1393.1</u>	<u>2,444.2</u>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

**15 Reconciliation of movements in equity shareholders' funds**

	2005	2004
	£'000	£'000
Profit for the financial year .....	308.9	2,611.3
Dividends .....	(1,360.0)	(550.0)
Net (deduction) from/addition to equity shareholders' funds .....	(1,051.1)	2,061.3
Opening equity shareholders' funds .....	4,864.2	2,802.9
Closing equity shareholders' funds .....	3,813.1	4,864.2

**16 Related party transactions**

Disclosure is not required of related party transactions between group companies since the Company meets the exemption criteria of being at least a 90% subsidiary of its parent, Wind Resources Limited.

Renewable Energy Systems Limited, an associate company of RES-Gen Limited, which owns 10% of Wind Resources Limited (the parent company), was the turnkey contractor for the construction of the windfarm, and held an operating and maintenance contract with the Company until March 2004. During the year the cost under this contract, was £nil (2004: £103,749) and at 31 March 2005 the Company owed £nil to Renewable Energy Systems Limited (2004: £5,374).

Western Power Generation Limited, an associate company of Avonbank Investments Limited, which holds 45% of the share capital of Wind Resources Limited, has a contract to provide management services to the Company. During the year the Company was charged £13,200 (2004: £12,876) under this contract, and at 31 March 2005 the Company owed £3,300 to Western Power Generation Limited (2004: £3,219). Payments in future years are linked to movements in the retail price index.

**17 Lease commitments**

The Company has a lease on the land occupied by the wind turbines that expires in July 2017, under which it has an obligation to pay the landowner, on a quarterly basis, the greater of either £100 per turbine or 2% of income from total units generated as rental.

**18 Ultimate parent undertaking**

The immediate parent undertaking of Coal Clough Limited is Wind Resources Limited, which is registered in England and Wales, and is the largest group into which the results of the Company are consolidated. Copies of the financial statements of Wind Resources Limited may be obtained from the Company's registered office as stated below.

Given that no member owns more than 45% of the issued share capital of Wind Resources Limited, it is therefore considered to be the ultimate parent undertaking.

## Coldham Windfarm Limited

### Report of the Directors

The directors present their report and audited Accounts for the year ended 31 March 2007.

This directors' report has been prepared in accordance with certain special provisions relating to small sized companies under section 246(4) of the Companies Act 1985.

#### Activities and review

The principal activity of Coldham Windfarm Limited, "the Company", is the operation of a windfarm near Coldham, Cambridgeshire. The company will continue with this activity for the foreseeable future.

#### Review of business and future development

The commissioning of a 16MW windfarm located near Coldham in Cambridgeshire was completed on 27 January 2006, following a period of limited generation which began in September 2005, therefore the year ended 31 March 2007 is the first full year of operations. The output from the windfarm is sold to a ScottishPower group company under a long-term power purchase agreement.

On 22 May 2007, Iberdrola S.A., the company's ultimate parent company, announced plans to sell up to 20% of the shares in its renewable energy subsidiary, Iberdrola Energias Renovables (Iberenova). The board of Iberdrola also authorised a reorganisation of this business area with the goal of incorporating all renewable energy-related companies within the Iberdrola and ScottishPower groups, including Coldham Windfarm Limited, in Iberenova, prior to the sale of the Iberenova shares.

#### Results and dividend

The profit for the year amounted to £1,065,000 (2006: £311,000). The aggregate dividends paid during the year amounted to £311,000 (2006: £nil). A final dividend of £1,065,000 is proposed in respect of the financial year ended 31 March 2007 and, if approved, will be paid in August 2007.

#### Directors

The directors who held office during the period were as follows:

Keith Anderson	
John Heasley	(resigned 15 December 2006)
David Morrison	(appointed 15 December 2006)
Graham Ramsbottom	
Christopher Stevens	

#### Statement of directors' responsibilities

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable laws and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors' have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The financial statements are required by law to give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

**Disclosure of information to auditors**

Each of the persons who is a director at the date of approval of this report confirms that:

- as far as the director is aware, there is no relevant audit information of which the company's auditors are unaware; and
- the director has taken all the steps he ought to have taken as a director in order to make himself aware of any relevant audit information and to establish the company's auditors are aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of Section 234ZA of the Companies Act 1985.

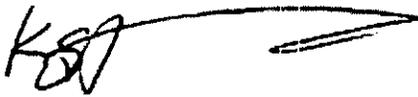

**Auditors**

Under Section 379A of the Companies Act 1985, the company has elected to dispense with the following obligations:

- to lay accounts and reports before general meetings;
- to hold annual general meetings; and
- to appoint auditors annually.

During the year Deloitte & Touche LLP were appointed as auditors of the company for the year ending 31 March 2007.

**On Behalf of the Board**

A handwritten signature in black ink, appearing to read 'K Anderson', with a long horizontal line extending to the right.

**Keith Anderson**  
Director  
13 July 2007

**Coldham Windfarm Limited**  
**Accounting Policies and Definitions**

**Definitions**

***Revenue cost definitions***

***Cost of sales***

Cost of sales reflects the direct costs of the generation of electricity and the costs of transmitting and distributing units of electricity.

***Administrative expenses***

Administrative expenses include the indirect costs of the business.

***Other definitions***

***Company***

Coldham Windfarm Limited

***ScottishPower***

Scottish Power Limited (formerly Scottish Power plc.)

**Accounting Policies**

***Basis of accounting***

The Accounts have been prepared under the historical cost convention and in accordance with applicable accounting standards in the UK and comply with the requirements of the Companies Act 1985.

***Turnover***

Turnover, which excludes Value Added Tax and trade discounts, represents the invoiced value of electricity generated, Renewable Obligation Certificates, Levy Exemption Certificates, and accrued income. Accrued income represents the sales value of energy which is yet to be invoiced and is based on the value of units supplied. Units are determined by energy volumes recorded on the windfarm meters and industry-wide trading and settlement systems. All revenue is earned wholly within the United Kingdom.

***Interest***

Interest payable and receivable is recognised in the profit and loss account as it is incurred.

***Current tax***

Current tax, comprising UK corporation tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

***Deferred tax***

Deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax is measured on a non-discounted basis at the tax rates that are expected to apply in the years in which timing differences are expected to reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

***Tangible Fixed Assets***

Tangible fixed assets are stated at cost and are generally depreciated on the straight-line method over their estimated operational lives. Tangible fixed assets include capitalised employee and other costs which are directly attributable to the construction of fixed assets. The main depreciation periods used by the company are as set out below.

	<u>Years</u>
Plant and machinery .....	20

The carrying values of tangible fixed assets are reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the period in which they are identified.

***Decommissioning costs***

Provision is made on a discounted basis for the estimated decommissioning costs at the end of the producing lives of the company's windfarm. Capitalised decommissioning costs are depreciated over the useful lives of the related assets. The unwinding of the discount is included within net interest and similar charges.

**Coldham Windfarm Limited**  
**Profit and Loss Account**  
**for the year ended 31 March 2007**

	<u>Notes</u>	<u>2007</u>	<u>2006</u>
		£'000	£'000
<b>Turnover</b> .....		<b>3,482</b>	1,093
Cost of sales .....		<b>(986)</b>	(186)
<b>Gross profit</b> .....		<b>2,496</b>	907
Administrative expenses .....		<b>(181)</b>	(75)
Other operating income .....		<b>19</b>	9
<b>Operating profit</b> .....	1	<b>2,334</b>	841
Net interest and similar charges .....	3	<b>(812)</b>	(397)
<b>Profit on ordinary activities before taxation</b> .....		<b>1,522</b>	444
Taxation .....	4	<b>(457)</b>	(133)
<b>Profit for the year</b> .....	15	<b><u>1,065</u></b>	<b><u>311</u></b>

The above results relate to continuing operations. The windfarm began limited generation in September 2005 and therefore the operating profit for the year ended 31 March 2006 represents trading results for the seven month period from September 2005 to March 2006. Full commissioning was completed on 27 January 2006.

A statement of total recognised gains and losses and a note of historical cost profits and losses are not shown, as all gains and losses for both years are recognised in the profit and loss account, under the historical cost convention.

The Accounting Policies and Definitions on pages 3 and 4, together with the Notes on pages 9 to 14, form part of these Accounts.

At 1 April 2006 .....	16,323	16,323

**Coldham Windfarm Limited**  
**Notes to the Accounts—(Continued)**  
**for the year ended 31 March 2007**

**9 Debtors**

	2007	2006
	£'000	£'000
<b>Amounts falling due within one year:</b>		
Amounts owed by group undertakings .....	657	389
Group relief receivable .....	364	187
Other debtors .....	—	455
	<b>1,021</b>	<b>1,031</b>

**10 Loans and other borrowings**

	2007	2006
	£'000	£'000
<b>Group loans payable</b> .....	<b>17,000</b>	<b>17,000</b>
<b>Repayments fall due as follows:</b>		
Within one year .....	1,062	—
Between one and two years .....	1,062	1,062
Between two and five years .....	3,186	3,186
After more than five years .....	11,690	12,752
	<b>17,000</b>	<b>17,000</b>

The loan is provided by Scottish Power UK Holdings Limited ("SPUKH"). Loan amounts owed at 31 March 2007 are repayable in equal annual instalments from 27 January 2008 until 27 January 2023, in accordance with the loan agreement.

The loan is secured upon the assets of the company in accordance with the debenture agreement between the company and SPUKH.

Interest is charged at the benchmark 15 year UK Gilts rate prevailing on 11 April 2005 plus 130 basis points, in accordance with the shareholders' agreement. The interest rate used is 5.707%.

**11 Other creditors**

	2007	2006
	£'000	£'000
<b>Amounts falling due within one year:</b>		
Amounts owed to group undertakings .....	513	597
Trade creditors .....	2	185
Other taxes and social security .....	94	—
Capital creditors and accruals .....	1,222	1,425
Accrued expenses .....	152	72
	<b>1,983</b>	<b>2,279</b>

**12 Provisions for liabilities—Deferred tax**

	2007	2006
	£'000	£'000
Deferred tax provided in the Accounts is as follows:		
Accelerated capital allowances .....	1,473	320

**Coldham Windfarm Limited**  
**Notes to the Accounts—(Continued)**  
**for the year ended 31 March 2007**

	Note	2007
		£'000
Deferred tax provided at 1 April 2006 .....		320
Charged in profit and loss account .....	4	1,153
<b>Deferred tax provided at 31 March 2007 .....</b>		<b>1,473</b>

The 2007 Budget introduced a potential corporation tax change that would impact the deferred tax calculation. The 2007 Finance Bill was passed through the House of Commons on 26 June 2007 and is regarded as substantially enacted from that date. This change is the reduction to the rate of corporation tax from 30% to 28% with effect from 1 April 2008. If this change was applied as at 31 March 2007 then the deferred tax would reverse at 28% and this would have the effect of reducing the deferred tax liability at 31 March 2007 to £1,375,000.

**13 Provisions for liabilities—Other provisions**

	Notes	At 1 April 2006	Unwinding of discount	At 31 March 2007
		£'000	£'000	£'000
Decommissioning .....	(a)	237	11	248

(a) The provision for decommissioning costs is the discounted future estimated costs of decommissioning the company's windfarm. Decommissioning is expected to occur from 2026.

**14 Share capital**

	2007	2006
	£	£
<b>Authorised:</b>		
800 ordinary – A shares of £1 each .....	800	800
200 ordinary – B shares of £1 each .....	200	200

Dividends .....	—	(311)	(311)
<b>As at 31 March 2007 .....</b>	<b>—</b>	<b>1,065</b>	<b>1,065</b>

**16 Contingent asset**

As a result of the delays in completing the wind farm construction, the company is pursuing liquidated damages from the contractor under the terms of the contract, for the period from October 2005 to January 2006. The company has not recognised any income or expense in relation to liquidated damages arising from this issue in the year ended 31 March 2007, as agreement of the total amount has not been finalised.

**19 Ultimate parent company**

Coldham Windfarm Limited is a subsidiary company owned 80% by Scottish Power UK Holdings Limited and 20% by Co-operative Group (CWS) Limited.

At 31 March 2007 the directors regarded Scottish Power Limited as the ultimate parent company, which is also the parent company of the largest group in which the results are consolidated. The parent company of the smallest group in which the results of the company are consolidated is Scottish Power UK Holdings Limited. Copies of both companies' consolidated Accounts may be obtained from The Secretary, Scottish Power Limited, 1 Atlantic Quay, Glasgow G2 8SP. Subsequent to the year end, on 23 April 2007, Scottish Power Limited was acquired by Iberdrola S.A. From this date, the directors consider Iberdrola S.A. to be the ultimate parent company.

**Independent Auditors' Report**  
**To the members of Coldham Windfarm Limited**

We have audited the financial statements of Coldham Windfarm Limited for the year ended 31 March 2007 which comprise the Accounting Policies and Definitions, the Profit and Loss Account, the Balance Sheet, the Cash Flow statement, the Reconciliation of Movements in Shareholders' Funds and the related notes 1 to 19. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the financial statements in accordance with applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice) are set out in the statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you whether in our opinion the information given in the Directors' Report is consistent with the financial statements. In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the company's affairs as at 31 March 2007 and of its profit for the year then ended;
- the financial statements have been properly prepared in accordance with the Companies Act 1985; and
- the information given in the Directors' Report is consistent with the financial statements.

## Coldham Windfarm Limited

### Report of the Directors

The directors present their report and audited Accounts for the year ended 31 March 2006.

#### Activities and review

The principal activity of Coldham Windfarm Limited, "the company", is the operation of a windfarm near Coldham, Cambridgeshire. The company will continue with this activity for the foreseeable future.

#### Review of business and future development

The development of a 16MW windfarm located near Coldham in Cambridgeshire was completed during the year. Construction activities commenced in Spring 2005, limited generation began on 5 September 2005 and the windfarm completed full commissioning on 27 January 2006. The output from the wind farm is sold to a ScottishPower group company under a long-term power purchase agreement.

#### Results and dividend

The profit for the year amounted to £311,000 (period ended 31 March 2005: £nil). No dividend was paid during the year. A final dividend of £311,000 is proposed in respect of the year end, if approved, will be paid in January 2007.

#### Directors and their interests

The directors who held office during the period were as follows:

Keith Anderson	(appointed 23 June 2005)
John Heasley	
Graham Ramsbottom	
Susan Reilly	(resigned 23 June 2005)
Christopher Stevens	

John Heasley resigned his directorship on 15 December 2006 and was replaced by David Morrison on the same day.

None of the directors who held office at the end of the financial year had any disclosable interests in the shares of the company. The interests of the directors (other than those who are also directors of a parent company of the company) in the shares of Scottish Power plc, at the beginning of the year, or date of appointment if later, and end of the year were as follows:

	As at date of appointment 23 June 2005	Granted/ appropriated/ other net movement	Exercised	Lapsed	Vested	At 31 March 2006
<b>Keith Anderson</b>						
<b>Shares</b>

- (\*) These shares include Partnership Shares purchased pursuant to the Inland Revenue approved ScottishPower Employee Share Ownership Plan (ESOP).
- (#) All Free Shares and Matching Shares appropriated pursuant to the Inland Revenue approved ScottishPower ESOP are held in Trust and are subject to forfeiture provisions during the three year period from the date of appropriation.
- (\*\*) These shares represent, in each case, the maximum number of shares which the directors may receive, dependent on the satisfaction of certain performance criteria as approved by the shareholders of Scottish Power plc in connection with the Long Term Incentive Plan.

### **Directors' responsibilities**

The directors are required by UK company law to prepare Accounts for each financial year which give a true and fair view of the state of affairs of the company as at the end of the financial year and of the profit or loss of the company for the year.

The directors confirm that suitable accounting policies have been used and applied consistently and that reasonable and prudent judgements have been made in the preparation of the Accounts for the year ended 31 March 2006. The directors also confirm that applicable accounting standards have been followed and that the Accounts have been prepared on the going concern basis.

The directors are responsible for maintaining proper accounting records, and sufficient internal controls to safeguard the assets of the company and to prevent and detect fraud or any other irregularities.

Each of the directors in office as at the date of this Directors' Report and Accounts confirms that:

- so far as he is aware, there is no relevant audit information of which the company's auditors are unaware; and
- he has taken all the steps that he ought to have taken as a director in order to make himself aware of any relevant audit information and to establish that the company's auditors are aware of that information.

### **Auditors**

Under Section 379A of the Companies Act 1985, the company has elected to dispense with the following obligations:

- to lay accounts and reports before general meetings;
- to hold annual general meetings; and
- to appoint auditors annually.

The directors appointed PricewaterhouseCoopers LLP as auditors on 9 January 2006.

During the period, Scottish Power plc, the company's ultimate parent company, carried out a competitive tender in relation to the provision of audit services. Following the outcome of this exercise, the Board of Scottish Power plc, on recommendation of the Audit Committee of Scottish Power plc, sought shareholder approval at the Annual General Meeting of Scottish Power plc to appoint Deloitte & Touche LLP in place of the retiring auditors, PricewaterhouseCoopers LLP. This approval was obtained and the directors of Coldham Windfarm Limited will propose the appointment of Deloitte & Touche LLP as auditors of the company for the year ending 31 March 2007.

**On Behalf of the Board**

**Keith Anderson**  
**Director**  
22 December 2006

**Coldham Windfarm Limited**  
**Accounting Policies and Definitions**

**Definitions**

**Revenue cost definitions**

*Cost of sales*

Cost of sales represents the direct costs of the generation of electricity.

*Administrative expenses*

Administrative expenses include the indirect costs of the business.

**Other definitions**

*Company*

Coldham Windfarm Limited

*ScottishPower*

Scottish Power plc.

*Ultimate parent company*

Scottish Power plc.

**Accounting Policies**

**Basis of accounting**

The Accounts have been prepared under the historical cost convention and in accordance with applicable accounting standards in the UK and comply with the requirements of the Companies Act 1985.

**Turnover**

Turnover, which excludes Value Added Tax and trade discounts, represents the invoiced value of electricity generated, Renewable Obligation Certificates and accrued income. Accrued income represents the sales value of energy which is yet to be invoiced and is based on the value of units supplied. Units are determined by energy volumes recorded on the windfarm meters and industry-wide trading and settlement systems.

**Interest**

Interest payable and receivable is recognised in the profit and loss account as it is incurred.

**Taxation**

Where required, and in accordance with Financial Reporting Standard ("FRS") 19 'Deferred Tax', full provision is made for deferred tax on a non-discounted basis.

**Tangible Fixed Assets**

Tangible fixed assets are stated at cost and are generally depreciated on the straight-line method over their estimated operational lives. Tangible fixed assets include capitalised employee and other costs which are directly attributable to the construction of fixed assets. The main depreciation periods used by the company are as set out below.

	<u>Years</u>
Plant and machinery .....	20

The carrying values of tangible fixed assets are reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the period in which they are identified.

**Decommissioning costs**

Provision is made on a discounted basis for the estimated decommissioning costs at the end of the producing lives of the company's windfarm. Capitalised decommissioning costs are depreciated over the useful lives of the related assets. The unwinding of the discount is included within net interest and similar charges.

**Coldham Windfarm Limited**  
**Profit and Loss Account**  
**for the year ended 31 March 2006**

	Notes	Year ended 31 March 2006 £'000	Eight months ended 31 March 2005 £'000
<b>Turnover</b> .....		<b>1,093</b>	—
Cost of sales .....		<u>(186)</u>	—
<b>Gross profit</b> .....		<b>907</b>	—
Administrative expenses .....		(75)	—
Other operating income .....		<u>9</u>	—
<b>Operating profit</b> .....	1	<b>841</b>	—

Taxation .....	4	<u>(133)</u>	—
<b>Profit for the year/period</b> .....	15	<u><b>311</b></u>	<u>—</u>

The above results relate to continuing operations. The wind farm began limited generation in September 2005 and therefore there are no prior period comparatives; and the operating profit for the year ended 31 March 2006 represents results for the seven month period from September 2005 to March 2006.

A statement of total recognised gains and losses and a note of historical cost profits and losses are not shown, as all gains and losses for both years are recognised in the profit and loss account, under the historical cost convention.

The Accounting Policies and Definitions on pages 4 and 5, together with the Notes on pages 10 to 15, form part of these Accounts.

The called up share capital of the company is £100 (2005: £100).

**16 Contingent asset and liability**

The company has entered into obligations to restore the wind farm site with the Cooperative Group (CWS) Limited and Fenland District Council. This liability will only arise if restoration is not carried out in accordance with the terms of the agreement. The maximum liability is £283,200 and £80,000 respectively.

As a result of the delays in completing the wind farm construction, the company is pursuing liquidated damages from the contractor under the terms of the contract, for the period from October 2005 to January 2006. The company has not recognised any income or expense in relation to liquidated damages arising from this issue in the year to 31 March 2006, as agreement of the total amount payable has not been finalised.

**17 Financial commitments**

**20 Ultimate parent company**

Coldham Windfarm Limited is a subsidiary company owned 80% by Scottish Power UK Holdings Limited and 20% by Co-operative Group (CWS) Limited.

The directors regard Scottish Power plc as the ultimate parent company, which is also the parent company of the largest group in which the results are consolidated. The parent company of the smallest group in which the results of the company are consolidated is Scottish Power UK Holdings Limited. Copies of both companies' consolidated Accounts may be obtained from The Secretary, Scottish Power plc, 1 Atlantic Quay, Glasgow G2 8SP.

**Coldham Windfarm Limited**  
**Independent Auditors' Report**  
**To the members of Coldham Windfarm Limited**

We have audited the financial statements of Coldham Windfarm Limited for the year ended 31 March 2006 which comprise the Accounting Policies and Definitions, the Profit and Loss Account, the Balance Sheet, the Cash Flow Statement, the Reconciliation of Movements in Shareholders' Funds and the related notes. These financial statements have been prepared under the accounting policies set out therein.

**Respective responsibilities of directors and auditors**

As described in the Statement of Directors' Responsibilities the company's directors are responsible for the preparation of the financial statements in accordance with applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice).

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland). This report including the opinion, has been prepared for and only for the company's members as a body in accordance with Section 235 of the Companies Act 1985 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We report to you whether in our opinion the information given in the Directors' Report is consistent with the financial statements. We also report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

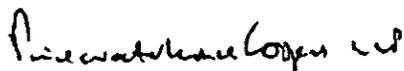

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgments made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the company's affairs as at 31 March 2006 and of its profit for the year then ended;
- the financial statement have been properly prepared in accordance with the Companies Act 1985; and
- the information given in the Directors' Report is consistent with the financial statements.

## Coldham Windfarm Limited

### Report of the Directors

The directors present their first report and audited Accounts for the period from the company's incorporation on 2 August 2004 to 31 March 2005.

#### Activities and review

The company was incorporated on 2 August 2004 as Continental Shelf 311 Limited and changed its name on 24 September 2004 to Coldham Windfarm Limited. The company is a subsidiary company owned 80% by Scottish Power UK Holdings Limited and 20% by the Co-operative Group (CWS) Limited. The company's principal activity will be the construction and operation of a windfarm near Coldham, Cambridgeshire. The company was not involved in trading during the year.

#### Review of business and future development

The principal activity of the company during the period was the development of a 16MW windfarm located near Coldham in Cambridgeshire. Construction activities commenced in Spring 2005 and the windfarm became fully operational in October 2005.

The output from the wind farm will be sold to a ScottishPower group company under a long-term power purchase agreement and is expected to be profitable in the first full year of operation.

#### Results and dividend

The profit of the company for the period amounted to £nil. The directors recommend that no dividend be paid in respect of the period ended 31 March 2005.

#### Post balance sheet event

The company entered into a number of contracts on 11 April 2005 in relation to the construction of the windfarm, land lease agreements and service and maintenance agreements. The value of the construction contracts entered into was some £15 million. Full construction activities commenced in April 2005 and the windfarm became fully operational in October 2005.

#### Directors and their interests

The directors who held office during the period were as follows:

MD Directors Limited	(appointed at incorporation on 2 August 2004, resigned 29 September 2004)
John Heasley	(appointed on 29 September 2004)
Graham Ramsbottom	(appointed on 29 September 2004)
Susan Reilly	(appointed on 29 September 2004)
Christopher Stevens	(appointed on 29 September 2004)

Susan Reilly resigned as a director on 23 June 2005 and was subsequently replaced by Keith Anderson on the same date.

None of the directors who held office at the end of the financial period had any disclosable interests in the shares of the company. The interests of the directors (other than those who are also directors of a parent company of the company) in the shares of Scottish Power plc, at the beginning and end of the period were as follows:

	At date of appointment (29 Sep 2004)	Granted/ appropriated/ other net movement	Exercised	Lapsed	Vested	31 Mar 2005

(\*) These shares include Partnership Shares purchased pursuant to the Inland Revenue approved ScottishPower Employee Share Ownership Plan (ESOP).

(#) All Free Shares and Matching Shares appropriated pursuant to the Inland Revenue approved ScottishPower ESOP are held in Trust and are subject to forfeiture provisions during the three year period from the date of appropriation.

(†) Deferred shares represent a portion of performance bonus and are held in trust for three years from the award date.

(\*\*) These shares represent, in each case, the maximum number of shares which the directors may receive, dependent on the satisfaction of certain performance criteria as approved by the shareholders of Scottish Power plc in connection with the Long Term Incentive Plan.

### Directors' responsibilities

The directors are required by UK company law to prepare Accounts for each financial period which give a true and fair view of the state of affairs of the company as at the end of the financial period and of the profit or loss of the company for the period.

The directors confirm that suitable accounting policies have been used and applied consistently and that reasonable and prudent judgements have been made in the preparation of the Accounts for the period ended 31 March 2005. The directors also confirm that applicable accounting standards have been followed and that the Accounts have been prepared on the going concern basis.

The directors are responsible for maintaining proper accounting records, and sufficient internal controls to safeguard the assets of the company and to prevent and detect fraud or any other irregularities.

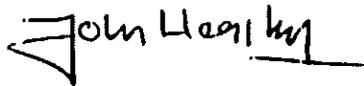

### Auditors

The directors appointed PricewaterhouseCoopers LLP as auditors on 9 January 2006.

Under Section 379A of the Companies Act 1985, the company has elected to dispense with the following obligations:

- to lay accounts and reports before general meetings;
- to hold annual general meetings; and
- to appoint auditors annually.

### On Behalf of the Board

**John Heasley**  
Director  
26 January 2006

## **Coldham Windfarm Limited**

### **Accounting Policies**

#### **Basis of accounting**

The Accounts have been prepared on the going concern basis, under the historical cost convention, and in accordance with applicable accounting standards in the UK and comply with the requirements of the Companies Acts 1985.

#### **Profit and Loss Account**

The company had no revenues or costs, or other recognised gains and losses in the period ended 31 March 2005. Accordingly, no profit and loss account or statement of total recognised gains and losses has been prepared.

#### **Cash Flow Statement**

The company had no cash flows in the period ended 31 March 2005 because all costs were incurred by another group company. Accordingly, no cash flow statement has been prepared.

#### **Taxation**

Where required, and in accordance with Financial Reporting Standard ("FRS") 19 'Deferred Tax', full provision for deferred tax is made on a non-discounted basis.

#### **Tangible Fixed Assets**

Tangible fixed assets are stated at cost and are depreciated using the straight line method over their estimated operational lives. Tangible fixed assets include capitalised employee and other costs which are directly attributable to the construction of fixed assets. Fixed assets are not subject to depreciation while under construction. The carrying value of tangible fixed assets is reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the period in which they are identified.

**Independent Auditors' Report  
to the members of Coldham Windfarm Limited**

We have audited the Accounts on pages 4 to 8 which have been prepared under the historical cost convention and the accounting policies set out on page 4.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the Directors' Report and Accounts in accordance with applicable United Kingdom law and accounting standards are set out in the statement of directors' responsibilities.

Our responsibility is to audit the Accounts in accordance with relevant legal and regulatory requirements and United Kingdom Auditing Standards issued by the Auditing Practices Board. This report, including the opinion, has been prepared for and only for the company's members as a body in accordance with Section 235 of the Companies Act 1985 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

We report to you our opinion as to whether the Accounts give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you if, in our opinion, the Report of the Directors is not consistent with the Accounts, if the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and transactions is not disclosed.

We read the other information contained in the Directors' Report and Accounts and consider the implications for our report if we become aware of any apparent misstatements or material inconsistencies with the Accounts. The other information comprises the Report of the Directors.

**Basis of audit opinion**

We conducted our audit in accordance with auditing standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the Accounts. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the Accounts, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Accounts are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the Accounts.

**Opinion**

In our opinion the Accounts give a true and fair view of the state of the company's affairs at 31 March 2005 and have been properly prepared in accordance with the Companies Act 1985.

## CRE Energy Limited

### Directors' Report

The directors present their report and audited Accounts for the year ended 31 March 2007.

#### Activities and review

The principal activity of CRE Energy Limited, "the company", is the construction and operation of wind powered electricity generation. During the year the company continued to operate wind farm sites in Scotland, Northern Ireland and Republic of Ireland and this activity will continue for the foreseeable future.

The company has net current liabilities of £257.0 million at 31 March 2007 (2006: £142.2 million), which includes loans owed to group and parent undertakings of £251.3 million (2006: £159.1 million). The directors consider that sufficient funding will be made available to the company to continue operations and to meet liabilities as they fall due.

On 22 May 2007, Iberdrola S.A., the company's ultimate parent company, announced plans to sell up to 20% of the shares in its renewable energy subsidiary, Iberdrola Energias Renovables (Ibernova). The board of Iberdrola also authorised a reorganisation of this business area with the goal of incorporating all renewable energy-related companies within the Iberdrola and ScottishPower groups, including CRE Energy Limited, in Ibernova, prior to the sale of the Ibernova shares.

#### Key factors affecting the business

The company is an integral component of ScottishPower's Energy Wholesale business. The company owns and operates the majority of ScottishPower's wind farm assets, which have a generating capacity of 290 MW.

The key driver impacting the company's financial performance is the delivery of wind farm developments with other factors including weather conditions, wholesale power prices, prices of Renewables Obligations Certificates ("ROCs") and generation resource availability.

#### Operational financial performance

Turnover increased by £21.1 million to £50.1 million primarily because of new wind farms, notably Beinn Tharsuinn, becoming operational during the year, resulting in higher volumes of power generation. In addition, the current financial year incorporates the first full year of revenue from the new wind farm at Black Law (phase one), which became operational midway through the financial year ended 31 March 2006. Cost of sales increased by £4.6 million, largely as a result of higher depreciation charges on the new operational wind farm capital expenditure. Overall, gross profit increased by £16.5 million to £33.5 million.

Operating profit increased by £15.7 million to £30.2 million, with the improved performance at gross profit level and other operating income of £0.4 million, being offset by increased administrative expenses of £1.2 million.

Profit before tax increased by £9.3 million to £22.2 million, as a result of the improved operating profit being offset by an increase in net interest payable of £6.4 million. Interest costs have increased significantly because the company has expanded its portfolio of wind farms over the last few years, resulting in higher funding requirements and therefore higher loan interest charges.

The construction of new wind farms at Whitelee and Wether Hill was the main reason for capital expenditure of £127.9 million during the year.

Both the level of business and the year end financial position were satisfactory and the directors expect that the present level of activity will grow as the level of installed capacity increases.

#### Results and dividend

The profit for the year amounted to £14.9 million (2006: £9.0 million). The aggregate dividends paid during the year amounted to £32.0 million (2006: £nil).

**CRE Energy Limited**  
**Directors' Report—(Continued)**

**Financing Review**

*Capital and Debt Structure*

The company is funded principally by debt. All of the called up share capital of £2 is held by the immediate parent undertaking, Beaufort Energy Limited. ScottishPower Generation Limited granted a loan facility of £219.3 million to the company and Beaufort Energy Limited granted a loan facility of £32.0 million to the company.

*Treasury and Interest Policy*

Treasury services are provided by Scottish Power UK plc. The risk policy within treasury and financing is designed to ensure that the company's exposure to variability of cash flows and asset values due to fluctuations in market interest rates, foreign exchange rates and inflation are minimised and managed at acceptable risk levels. Further details of the treasury and interest policy for ScottishPower group and how it manages them will be included in the Annual Report & Accounts of Scottish Power Limited (formerly Scottish Power plc) for the year ended 31 March 2007.

*Funding*

The loans from ScottishPower Generation Limited and Beaufort Energy Limited represent drawings under working capital facilities (refer Note 9). The principal outstanding accrued interest and associated costs are payable on written demand. Interest is calculated at a rate of 1% above base rate and is payable quarterly in arrears.

At the end of the year the company had net debt amounting to £250.8 million (2006: £139.4 million).

*Liquidity*

The directors confirm that the company remains a going concern on the basis of its future cash flow forecasts and that sufficient funding will be made available to the company to continue operations and to meet liabilities as they fall due.

**Management of risks**

The business identifies and assesses the key business risks associated with the achievement of its strategic objectives. Any key actions needed to enhance the control environments are identified, along with the person responsible for the management of the specific risk.

Further details of the risks facing the ScottishPower group and how it manages them will be included in the Annual Report & Accounts of Scottish Power Limited for the year ended 31 March 2007.

**Environment**

Throughout its operations the company strives to meet, or exceed, relevant legislative and regulatory environmental requirements and codes of practice.

A more extensive description of the ScottishPower group environmental requirements will be found in the Annual Report & Accounts of Scottish Power Limited for the year ended 31 March 2007.

**Health and Safety**

The company has a clear strategy to continue to improve health and safety performance using ScottishPower group health and safety standards.

A more extensive description of how ScottishPower as a group addresses health and safety requirements will be found in the Annual Report & Accounts of ScottishPower Limited for the year ended 31 March 2007.

**Directors and their interests**

The directors who held office during the year were as follows:

**Keith Anderson**

Alan Bryce

Roger Seshan

(resigned 16 October 2006)

## CRE Energy Limited

### Directors' Report—(Continued)

#### Creditor payment policy and practice

The current policy and practice of the ScottishPower group, concerning the payment of its trade creditors is to follow the Better Payment Practice Code to which it is signatory. Copies of the code may be obtained from the Department of Trade and Industry or from the website [www.payontime.co.uk](http://www.payontime.co.uk).

The company's policy and practice is to settle terms of payment when agreeing the terms of the transaction, to include the terms in contracts, and to pay in accordance with its contractual and legal obligations. The company's creditor days at 31 March 2007 were 23 days.

#### Statement of directors' responsibilities

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable laws and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The financial statements are required by law to give a true and fair view of the state of the affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies (Northern Ireland) Order 1986. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

#### Disclosure of information to auditors

Each of the persons who is a director at the date of approval of this report confirms that:

- as far as the director is aware, there is no relevant audit information of which the company's auditors are unaware; and
- the director has taken all the steps he or she ought to have taken as a director in order to make himself or herself aware of any relevant audit information and to establish the company's auditors are aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of Section 242ZA of the Companies (Northern Ireland) Order 1986.

#### Auditors

The company has elected, pursuant to provisions within the Companies (Northern Ireland) Order 1986, to dispense with the following obligations:

- to lay accounts and reports before general meetings;
- to hold annual general meetings; and
- to appoint auditors annually.

**CRE Energy Limited**  
**Directors' Report—(Continued)**

During the year Deloitte & Touche LLP were appointed as auditors of the company for the year ending 31 March 2007.

**On Behalf of the Board**

A handwritten signature in black ink, appearing to be 'KSA', with a long horizontal line extending to the right.

**Keith Anderson**  
Director  
17 July 2007

**CRE Energy Limited**  
**Accounting Policies and Definitions**

**Definitions**

***Revenue cost definitions***

***Cost of sales***

Cost of sales reflects the direct costs of the generation of electricity and the costs of transmitting and distributing units of electricity.

***Administrative expenses***

Administrative expenses include the indirect costs of the business and the costs of centralised services provided by Scottish Power UK plc.

***Other definitions***

***Company***

CRE Energy Limited

***Joint ventures***

Joint ventures are entities in which the company holds a long-term interest and shares control with another company.

***Scottish Power***

Scottish Power Limited (formerly Scottish Power plc.)

**Accounting Policies**

***Basis of accounting***

The Accounts have been prepared under the historical cost convention, and in accordance with applicable accounting standards in the UK and comply with the requirements of the Companies (Northern Ireland) Order 1986.

***Cash flow statement***

The company is exempt from including a statement of cash flows in its Accounts as it is a wholly owned subsidiary of Scottish Power Limited, which will include a consolidated statement of cash flows in its consolidated Accounts.

***Use of estimates***

The preparation of Accounts in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Accounts and the reported amounts of revenues and expenses during the reporting year. Actual results can differ from those estimates.

***Turnover***

Turnover, which excludes Value Added Tax and trade discounts, represents the invoiced value of electricity generated. Renewable Obligation Certificates, Levy Exemption Certificates, and accrued income. Accrued income represents the sales value of energy which is yet to be invoiced and is based on the value of units supplied. Units are determined by energy volumes recorded on the wind farm meters and industry-wide trading and settlement systems. All revenue is earned wholly within the United Kingdom and the Republic of Ireland.

***Interest***

Interest on the funding attributable to major capital projects is capitalised gross of tax relief during the period of construction and written off as part of the total cost over the operational life of the asset. All other interest payable and receivable is recognised in the profit and loss account as it is incurred.

**CRE Energy Limited**  
**Accounting Policies and Definitions—(Continued)**

***Current tax***

Current tax, comprising UK corporation tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

***Deferred tax***

Deferred taxation is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date.

Timing differences are differences between the company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in periods different from those in which they are recognised in the financial statements.

Deferred tax is measured on a non-discounted basis at the tax rates that are expected to apply in the years in which timing differences are expected to reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

***Tangible fixed assets***

Tangible fixed assets are stated at cost or valuation and are depreciated on the straight-line method over their estimated operational lives. Tangible fixed assets include capitalised employee, interest and other costs which are directly attributable to construction of fixed assets. Land is not depreciated. The main depreciation periods used by the company are as set out below.

	<u>Years</u>
Buildings .....	20
Plant and machinery .....	20

The carrying values of tangible fixed assets are reviewed for impairment in periods if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the year in which they are identified.

***Decommissioning costs***

Provision is made for the estimated decommissioning costs at the end of the producing lives of the company's wind farms on a discounted basis. Capitalised decommissioning costs are depreciated over the useful lives of the related assets. The unwinding of the discount is included within net interest and similar charges.

***Investments***

Investments in joint ventures are stated in the balance sheet at cost, or nominal value of shares issued as consideration where applicable, less provision for impairment in value.

***Leased assets***

Rentals payable under operating leases are charged to the profit and loss account on a straight-line basis over the term of the lease.

***Grants and contributions***

Capital grants and customer contributions in respect of additions to fixed assets are treated as deferred income and released to the profit and loss account on a straight-line basis over the estimated operational lives of the related assets.

***Foreign currencies***

Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. At the year end, monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date or where applicable, at the hedged contracted rate. Any gain or loss arising on the restatement of such balances is taken to the profit and loss account.

**CRE Energy Limited**  
**Profit and Loss Account**  
**for the year ended 31 March 2007**

	<u>Notes</u>	<u>2007</u>	<u>2006</u>
		£m	£m
<b>Turnover</b> .....		50.1	29.0

Loans owed to parent undertakings .....	32.0	—
	<u>251.3</u>	<u>159.1</u>

The amounts owed to group and parent undertakings are repayable on demand. Interest is calculated at a rate of 1% above the Royal Bank of Scotland plc's base rate.

**10 Other creditors**

	<u>2007</u>	<u>2006</u>
	£m	£m
<b>Amounts falling due within one year:</b>		
Amounts owed to group undertakings .....	11.5	1.8
Trade creditors .....	3.9	1.6
Capital accruals .....	13.9	4.3
Accrued expenses .....	1.3	0.9
	<u>30.6</u>	<u>8.6</u>

**11 Provision for liabilities—Deferred tax**

	<u>Note</u>	<u>2007</u>	<u>2006</u>
		£m	£m
Deferred tax is provided in the accounts as follows:			
Accelerated capital allowances .....		43.7	26.7
			<u>2007</u>
			£m
Deferred tax provided at 1 April 2006 .....			26.7
Charged to profit and loss account .....	4		<u>17.0</u>
<b>Deferred tax provided at 31 March 2007 .....</b>			<u><b>43.7</b></u>

The 2007 Budget introduced two potential corporation tax changes that would impact the deferred tax calculation. The 2007 Finance Bill was passed through the House of Commons on 26 June 2007 and is regarded as substantially enacted from that date. The two changes are the phasing out of Industrial Buildings Allowances (IBA) over the next four years and the reduction to the rate of corporation tax from 30% to 28%, with effect from 1 April 2006. If these changes were applied as at 31 March 2007 the accrued tax liability in respect of IBA of

**CRE Energy Limited**  
**Notes to the Accounts—(Continued)**  
**for the year ended 31 March 2007**

£2,000 would be written back to the profit and loss account and the remaining accelerated capital allowances would reverse at 28%. This would have the effect of reducing the deferred tax liability at 31 March 2007 to £40.8 million.

**12 Provisions for liabilities—Other provisions**

	<u>At 1 April 2006</u>	<u>New provisions</u>	<u>Unwinding of discount (Note 3)</u>	<u>At 31 March 2007</u>
	£m	£m	£m	£m
Decommissioning costs .....	4.6	1.3	0.3	<b>6.2</b>

The new provisions relate to the Black Law (phase 2) and Beinn Tharsuinn windfarms, which were placed into service in June 2006 and April 2006 respectively. The decommissioning of the company's windfarms is expected to occur over the period between 2015 and 2026.

**13 Share capital**

**CRE Energy Limited**  
**Notes to the Accounts—(Continued)**  
**for the year ended 31 March 2007**

**17 Directors' emoluments**

None of the directors received any remuneration from the company in respect of their services to the company.

**18 Related party transactions**

Scottish Power Limited had ultimate control over the company during the year. The company has taken an exemption, as allowed by Financial Reporting Standard 8, 'Related Party Disclosures', not to disclose related party transactions with other group companies as Scottish Power Limited publishes full statutory consolidated Accounts.

**19 Ultimate parent company**

At 31 March 2007 the directors regarded Scottish Power Limited to be the ultimate parent company, which is also the parent company of the largest group in which the results of the company are consolidated. The parent company of the smallest group in which the results of the company are consolidated is Scottish Power UK plc. Copies of both companies' consolidated Accounts can be obtained from The Secretary, Scottish Power Limited, 1 Atlantic Quay, Glasgow, G2 8SP. Subsequent to the year end, on 23 April 2007, Scottish Power Limited was acquired by Iberdrola S.A. From this date the directors consider Iberdrola S.A. to be the ultimate parent company.

**Independent Auditors' Report**  
**To the shareholder of CRE Energy Limited**

We have audited the financial statements of CRE Energy Limited for the year ended 31 March 2007 which comprise the Accounting Policies and Definitions, the Profit and Loss Account, the Balance Sheet, the Reconciliation of Movements in Shareholder's Funds and the related notes 1 to 19. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with Article 243 of the Companies (Northern Ireland) Order 1986. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The director's responsibilities for preparing the financial statements in accordance with applicable Northern Ireland law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice) are set out in the Statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies (Northern Ireland) Order 1986. We also report to you whether in our opinion the information given in the Directors' Report is consistent with the financial statements. In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgments made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the company's affairs as at 31 March 2007 and of its profit for the year then ended;
- the financial statements have been properly prepared in accordance with the Companies (Northern Ireland) Order 1986; and
- the information given in the Directors' Report is consistent with the financial statement.

## CRE Energy Limited

### Directors' Report

The directors present their report and audited Accounts for the year ended 31 March 2006.

#### Activities and review

The principal activity of CRE Energy Limited, "the company", is the construction and operation of wind powered electricity generation. During the year the company continued to operate wind farm sites in Scotland, Northern Ireland and Republic of Ireland and this activity will continue for the foreseeable future.

The company has net current liabilities of £142,160,000 at 31 March 2006 (2005: £113,942,000), which includes a loan owed to group undertakings of £159,117,000 (2005: £82,353,000). The directors consider that sufficient funding will be made available to the company by its ultimate parent company to continue operations and to meet liabilities as they fall due.

#### Key Factors Affecting the Business

The key driver impacting the company's financial performance is the delivery of windfarm developments. Other factors include weather conditions and generation resource availability.

#### Operational Financial Performance

Operating profit increased by £1,215,000 to £14,561,000 principally as the result of higher volumes due to new windfarms being brought on-line during the year, notably Black Law (phase one). The construction of Blacklaw and Beinn Tharsuinn was the main reason for capital expenditure of £54,143,000 during the year.

Profit before tax increased by £2,218,000 to £12,916,000, as a result of the operating profit improvement and reflecting an improvement of £1,003,000 in net interest payable primarily due to higher interest capitalised in the current year.

Both the level of business and the year end financial position were satisfactory and the directors expect that the present level of activity will be sustained for the foreseeable future.

#### Results and dividend

The profit for the year amounted to £9,041,000 (2005: £7,486,000). The directors recommend that no dividend be paid in respect of the year ended 31 March 2006 (2005: £nil), and that the retained profit for the year be transferred to reserves.

#### Financing Review

##### *Capital and Debt Structure*

The company is funded principally by debt. All of the called up share capital of £2 is held by the immediate parent undertaking. Beaufort Energy Limited. ScottishPower Generation Limited granted the loan facility of £159,117,000 to the company.

##### *Treasury and Interest Policy*

Treasury services are provided by Scottish Power UK plc. The risk policy within treasury and financing is designed to ensure that the company's exposure to variability of cash flows and asset values due to fluctuations in market interest rates and inflation are minimised and managed at acceptable risk levels. Further details of the treasury and interest policy for ScottishPower group and how it manages them is included in the Annual Report & Accounts of Scottish Power plc for the year ended 31 March 2006.

##### *Funding*

The loan from ScottishPower Generation Limited represents drawings under a working capital facility (refer Note 8). The principal outstanding, accrued interest and associated costs are payable on written demand. Interest is calculated at a rate of 1% above base rate and is payable quarterly in arrears.

At the end of the year the company had net debt amounting to £139,379,000 (2005: £96,520,000).

**CRE Energy Limited**  
**Directors' Report—(Continued)**

*Liquidity*

The directors confirm that the company remains a going concern on the basis of its future cash flow forecasts and that sufficient funding will be made available to the company by its ultimate parent company to continue operations and to meet liabilities as they fall due.

**Directors and their interests**

The directors who held office during the year were as follows:

Keith Anderson	(appointed 23 June 2005)
Alan Bryce	
Susan Reilly	(resigned 23 June 2005)
Roger Seshan	(appointed 19 July 2005)

Alan Bryce resigned his directorship on 16 October 2006.

None of the directors who held office at the end of the financial year had any disclosable interests in the shares of the company. The interests of the directors (other than those who are also directors of a parent company of the company) in the shares of Scottish Power plc, at the beginning of the year (or date of appointment, if later) and end of the year, were as follows:

<u>Roger Seshan</u>	<u>As at date of appointment 19 July 2005</u>	<u>Granted/ appropriated/ other net movement</u>	<u>Exercised</u>	<u>Lapsed</u>	<u>Vested</u>	<u>At 31 March 2006</u>
<b>Shares</b>						
Ordinary Shares (*) .....	604	8	—	—	—	612
ESOP Free & Matching Shares (#) .....	—	8	—	—	—	8

(\*) These shares include Partnership Shares purchased pursuant to the Inland Revenue approved ScottishPower Employee Share Ownership Plan (ESOP).

(#) All Free Shares and Matching Shares appropriated pursuant to the ScottishPower ESOP are held in Trust and are subject to forfeiture provisions during the three year period from the date of appropriation.

As permitted by Statutory Rule 1987 No 208 in the Companies (Disclosures of Directors Interests) (Exceptions) Regulations (Northern Ireland) 1987, the Register of Directors' Interests maintained pursuant to Section 325 of the Companies Act 1985 does not contain the interests of directors who are also directors of a company of which CRE Energy Limited is a wholly owned subsidiary. Accordingly, the interests of the directors in the shares of Scottish Power plc are disclosed in the Directors' Report & Accounts for the year ended 31 March 2006 of the following companies:

Keith Anderson	Beaufort Energy Limited
Alan Bryce	ScottishPower Generation Limited

**Creditor payment policy and practice**

The current policy and practice of Scottish Power plc, the company's ultimate parent, concerning the payment of its trade creditors is to follow the Better Payment Practice Code to which it is signatory. Copies of the code may be obtained from the Department of Trade and Industry or from the website [www.payontime.co.uk](http://www.payontime.co.uk).

The company's policy and practice is to settle terms of payment when agreeing the terms of the transaction, to include the terms in contracts, and to pay in accordance with its contractual and legal obligations. The company's creditor days at 31 March 2006 were 13 days.

**Directors' responsibilities**

The directors are required by company law (Northern Ireland) to prepare Accounts for each financial year which give a true and fair view of the state of affairs of the company as at the end of the financial year and of the profit or loss of the company for the year.

## CRE Energy Limited

### Directors' Report—(Continued)

The directors confirm that suitable accounting policies have been used and applied consistently and that reasonable and prudent judgements and estimates have been made in the preparation of the Accounts for the year ended 31 March 2006. The directors also confirm that applicable accounting standards have been followed and that the Accounts have been prepared on the going concern basis.

The directors are responsible for maintaining proper accounting records which disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the financial statements comply with the Companies (Northern Ireland) Order 1986. They are also responsible for maintaining sufficient internal controls to safeguard the assets of the company and to prevent and detect fraud of any other irregularities.

Each of the directors in office as at the date of this Directors' Report and Accounts confirms that:

- So far as he is aware, there is no relevant audit information of which the company's auditors are unaware; and
- he has taken all the steps that he ought to have taken as a director in order to make himself aware of any relevant audit information and to establish that the company's auditors are aware of that information.

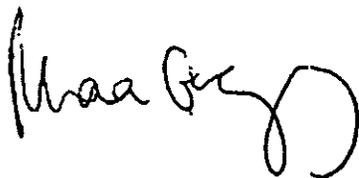

#### Auditors

The company has elected, pursuant to provisions within the Companies (Northern Ireland) Order 1986, to dispense with the following obligations:

- to lay accounts and reports before general meetings;
- to hold annual general meetings; and
- to appoint auditors annually.

During the year, ScottishPower Plc, the company's ultimate parent company, carried out a competitive tender in relation to the provision of audit services. Following the outcome of this exercise, the Board of Scottish Power plc, on recommendation of the Audit Committee of ScottishPower Plc, sought shareholder approval at the Annual General Meeting of Scottish Power plc to appoint Deloitte & Touche LLP in place of the retiring auditors, PricewaterhouseCoopers LLP. This approval was obtained and the directors of CRE Energy Limited will propose the appointment of Deloitte & Touche LLP as auditors of the company for the year ending 31 March 2007.

By Order of the Board

**Rona Gregg**  
Secretary  
8 December 2006

**CRE ENERGY Limited**  
**Accounting Policies & Definitions**

**Definitions**

***Revenue cost definitions***

***Cost of sales***

Cost of sales reflects the direct costs of the generation of electricity.

***Administrative expenses***

Administrative expenses include the indirect costs of the business and the costs of centralised services provided by Scottish Power UK plc.

***Other definitions***

***Company***

CRE Energy Limited

***Joint ventures***

Joint ventures are entities in which the company holds a long-term interest and shares control with another company.

***ScottishPower***

Scottish Power plc.

***Ultimate parent company***

Scottish Power plc.

**Accounting Policies**

***Basis of accounting***

The Accounts have been prepared under the historical cost convention, and in accordance with applicable accounting standards in the UK and comply with the requirements of the Companies (Northern Ireland) Order 1986.

***Cash flow statement***

The company is exempt from including a statement of cash flows in its Accounts as it is a wholly owned subsidiary of ScottishPower, which has included a consolidated statement of cash flows in its consolidated Accounts.

***Use of estimates***

The preparation of Accounts in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Accounts and the reported amount of revenues and expenses during the reporting year. Actual results can differ from those estimates.

***Turnover***

Turnover, which excludes Value Added Tax and trade discounts, represents the invoiced value of electricity generated, Renewable Obligation Certificates, Levy Exemption Certificates, and accrued income. Accrued income represents the sales value of energy which is yet to be invoiced and is based on the value of units supplied. Units are determined by energy volumes recorded on the windfarm meters and industry-wide trading and settlement systems.

**CRE Energy Limited**  
**Accounting Policies and Definitions—(Continued)**

***Interest***

Interest on the funding attributable to major capital projects is capitalised gross of tax relief during the period of construction and written off as part of the total cost over the operational life of the asset. All other interest payable and receivable is recognized in the profit and loss account as it is incurred.

***Taxation***

Where required, and in accordance with Financial Reporting Standard (“FRS”) 19 ‘Deferred tax’, full provision is made for deferred tax on a non-discounted basis.

***Tangible fixed assets***

Tangible fixed assets are stated at cost or valuation and are generally depreciated on the straight-line method over their estimated operational lives. Tangible fixed assets include capitalised employee, interest and other costs which are directly attributable to construction of fixed assets. Land is not depreciated. The main depreciation periods used by the company are as set out below.

	<u>Years</u>
Buildings .....	20
Plant and machinery .....	20

The carrying values of tangible fixed assets are reviewed for impairment in periods if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the year in which they are identified.

***Decommissioning costs***

Provision is made for the estimated decommissioning costs at the end of the producing lives of the company’s windfarms on a discounted basis. Capitalised decommissioning costs are depreciated over the useful lives of the related assets. The unwinding of the discount is included within net interest and similar charges.

***Leased assets***

Rentals payable under operating leases are charged to the profit and loss account on a straight-line basis over the term of the lease.

***Grants and contributions***

Capital grants and customer contributions in respect of additions to fixed assets are treated as deferred income and released to the profit and loss account on a straight-line basis over the estimated operational lives of the related assets.

***Foreign currencies***

Transactions in foreign currencies are recorded at the rate ruling at the date of transaction. At the year end, monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date or where applicable, at the hedged contracted rate. Any gain or loss arising on the restatement of such balances is taken to the profit and loss account.

**CRE Energy Limited**  
**Profit and Loss Account**  
**for the year ended 31 March 2006**

	<u>Notes</u>	<u>2006</u>	<u>2005</u>

At 31 March 2006 .....	—	29,413	29,413

**15 Forward foreign exchange contracts**

The company enters into forward foreign exchange contracts to hedge the cash flow risk relating to the value of forecast purchases which are denominated in foreign currencies. The risk being hedged relates to changes in the foreign exchange rate of the forecast purchase price. The fair value of these forward contracts at 31 March 2006 is a net asset of £120,848 (2005: net liability of £445,218).

**17 Directors' emoluments**

None of the directors received any remuneration from the company in respect of their services to the company.

**18 Related party transactions**

ScottishPower plc has ultimate control over the company. The Company has taken an exemption, as allowed by Financial Reporting Standard 8, 'Related Party Disclosures', not to disclose related party transactions with other group companies as the ultimate parent company publishes full statutory consolidated Accounts.

**19 Ultimate parent company**

The directors regard ScottishPower plc as the ultimate parent company, which is also the parent company of the largest group in which the results of the company are consolidated. The parent company of the smallest group in which the results of the company are consolidated is Scottish Power UK plc. Copies of both companies' consolidated Accounts can be obtained from The Secretary, Scottish Power plc, 1 Atlantic Quay, Glasgow, G2 8SP.

**CRE Energy Limited**  
**Independent Auditors' Report**  
**To the members of CRE Energy Limited**

We have audited the financial statements of CRE Energy Limited for the year ended 31 March 2006 which comprise the Accounting Policies and Definitions, the Profit and Loss Account, the Balance Sheet and the related notes. These financial statements have been prepared under the accounting policies set out therein.

**Respective responsibilities of directors and auditors**

As described in the Statement of Directors' Responsibilities the company's directors are responsible for the preparation of the financial statements in accordance with applicable Northern Ireland law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice).

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland). This report, including the opinion, has been prepared for and only for the company's members as a body in accordance with Article 243 of the Companies (Northern Ireland) Order 1986 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies (Northern Ireland) Order 1986. We report to you whether in our opinion the information given in the Directors' Report is consistent with the financial statements. We also report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgments made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the Company's affairs as at 31 March 2006 and of its profit for the year then ended;
- the financial statements have been properly prepared in accordance with the Companies (Northern Ireland) Order 1986; and
- the information given in the Directors' Report is consistent with the financial statements.

Independent Auditors' Report .....	F-530

**CRE Energy Limited**  
**Report of the Directors**

The directors present their report and audited Accounts for the year ended 31 March 2005.

**Activities and review**

The principal activity of CRE Energy Limited is the construction and operation of wind powered electricity generation.

**Review of business and future developments**

During the year the company continued to operate wind farm sites in Scotland, Northern Ireland and Republic of Ireland. Both the level of operations and the financial position at the year end were satisfactory, and the directors expect that the present profitable operations will be maintained for the foreseeable future.

**Results and dividend**

The profit of the company for the year amounted to £7,486,000 (2004: £3,618,000). The directors recommend that no dividend be paid in respect of the year ended 31 March 2005 (2004: £nil), and that the retained profit for the year be transferred to reserves.

The company has net current liabilities of £113,942,000 at 31 March 2005 (2004: £68,377,000), which includes a loan due to parent undertakings of £82,353,000 (2004: £64,866,000). The directors consider that sufficient funding will be made available to the company by its ultimate parent company to continue operations and to meet liabilities as they fall due.

**Directors and their interests**

The directors who held office during the year were as follows:

Alan Bryce  
Susan Reilly

Neither of the directors who held office at the end of the financial year had any disclosable interests in the shares of the company.

As permitted by Statutory Rule 1987 No 208 in the Companies (Disclosures of Directors Interests) (Exceptions) Regulations (Northern Ireland) 1987, the Register of Directors' Interests maintained pursuant to Section 325 of the Companies Act 1985 does not contain the interests of directors who are also directors of a company of which CRE Energy Limited is a wholly owned subsidiary. Accordingly, the interests of the directors in the shares of Scottish Power plc are disclosed in the Directors' Report & Accounts for the year ended 31 March 2005 of the following companies:

Alan Bryce	ScottishPower Generation Limited
Susan Reilly	Beaufort Energy Limited

Susan Reilly resigned as a director on 23 June 2005 and was subsequently replaced by Keith Anderson on the same date. Roger Seshan was appointed as a director on 19 July 2005.

**Creditor payment policy and practice**

The company's current policy and practice concerning the payment of its trade creditors is to follow the Better Payment Practice Code to which it is signatory. Copies of the code may be obtained from the Department of Trade and Industry or from the website [www.payontime.co.uk](http://www.payontime.co.uk).

The company's policy and practice is to settle terms of payment when agreeing the terms of the transaction, to include the terms in contracts, and to pay in accordance with its contractual and legal obligations. The company's creditor days at 31 March 2005 were 27 days.

## CRE Energy Limited Report of the Directors—continued

### Directors' responsibilities

The directors are required by company law (Northern Ireland) to prepare Accounts for each financial year which give a true and fair view of the state of affairs of the company as at the end of the financial year and of the profit or loss of the company for the period.

The directors confirm that suitable accounting policies have been used and applied consistently and that reasonable and prudent judgements and estimates have been made in the preparation of the Accounts for the year ended 31 March 2005. The directors also confirm that applicable accounting standards have been followed and that the Accounts have been prepared on the going concern basis.

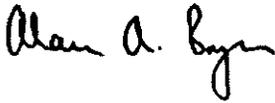

The directors are responsible for maintaining proper accounting records which disclose with reasonable accuracy at any time the financial position of the company and to enable them to ensure that the financial statements comply with the Companies (Northern Ireland) Order 1986. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud or any other irregularities.

### Auditors

The company has elected, pursuant to provisions within the Companies (Northern Ireland) Order 1986, to dispense with the following obligations:

- to lay accounts and reports before general meetings;
- to hold annual general meetings; and
- to appoint auditors annually.

### On Behalf of the Board

Alan Bryce  
Director  
28 October 2005

**CRE Energy Limited**  
**Accounting Policies and Definitions**

**Definitions**

***Turnover***

Turnover, which excludes Value Added Tax and trade discounts, represents the invoiced value of electricity generated and accrued income. Accrued income represents the sales value of energy which is yet to be invoiced and is based on the value of units supplied. Units are determined by energy volumes recorded on the windfarm meters and industry-wide trading and settlement systems.

***Cost of sales***

Cost of sales reflects the direct costs of the generation of electricity.

***Administrative expenses***

Administrative expenses include the indirect costs of the business and the costs of centralised services provided by Scottish Power UK plc.

**Accounting Policies**

***Basis of accounting***

The Accounts have been prepared on the going concern basis, under the historical cost convention, and in accordance with applicable accounting standards in the UK and the Companies (Northern Ireland) Order 1986.

***Statement of cash flows***

The company is exempt from including a statement of cash flows in its Accounts as it is a wholly owned subsidiary of Scottish Power plc, which has included a consolidated statement of cash flows in its consolidated Accounts.

***Interest***

Interest on the funding attributable to major capital projects is capitalised gross of tax relief during the period of construction and written off as part of the total cost over the operational life of the asset. All other interest payable and receivable is reflected in the profit and loss account as it arises.

***Taxation***

Where required and in accordance with the Financial Reporting Standard 19 'Deferred Tax', full provision is made for deferred tax on a non-discounted basis.

***Tangible fixed assets***

Tangible fixed assets are stated at cost and are depreciated on a straight-line basis over their estimated operational lives. Tangible fixed assets include capitalised interest and other costs which are directly attributable to construction of fixed assets. Land is not depreciated. The main depreciation periods used by the company are as set out below:

	<u>Years</u>
Buildings .....	20
Plant and Machinery .....	20

The carrying values of tangible fixed assets are reviewed for impairment if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the period in which they are identified.

**CRE Energy Limited**  
**Accounting Policies and Definitions—(Continued)**

***Decommissioning costs***

Provision is made for the estimated decommissioning costs at the end of the producing lives of the company's windfarms on a discounted basis. Capitalised decommissioning costs are depreciated over the useful lives of the related assets. The unwinding of the discount is included within net interest and similar charges.

***Foreign currencies***

Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. At the year end, monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the balance sheet date or, where applicable, at the hedged contracted rate. Any gain or loss arising on the restatement of such balances is taken to the profit and loss account.

***Grants and contributions***

Capital grants and customer contributions in respect of additions to fixed assets are treated as deferred income and released to the profit and loss account on a straight line basis over the estimated operational lives of the related assets.

**CRE Energy Limited**  
**Profit and Loss Account**  
**for the year ended 31 March 2005**

	<u>Notes</u>	<u>2005</u>	<u>2004</u>
		£'000	£'000
<b>Turnover</b> .....	1	21,783	15,051
Cost of sales .....		<u>(7,103)</u>	<u>(5,118)</u>

**16 Directors' emoluments**

None of the directors received any remuneration from the company in respect of their services to the company.

**17 Related party transactions**

Scottish Power plc has ultimate control over the company. The company has taken an exemption, as allowed by Financial Reporting Standard 8, 'Related Party Disclosures', not to disclose related party transactions with other group companies as the ultimate parent company publishes full statutory consolidated Accounts.

**18 Ultimate parent company**

The directors regard Scottish Power plc as the ultimate parent company, which is also the parent company of the largest group in which the results of the company are consolidated. The parent company of the smallest group in which the results of the company are consolidated is Scottish Power UK plc. Copies of both companies' consolidated Accounts can be obtained from The Secretary, Scottish Power plc, 1 Atlantic Quay, Glasgow, G2 8SP.

**Independent Auditors' Report  
to the members of CRE Energy Limited**

We have audited the Accounts on pages 3 to 11 which have been prepared under the historical cost convention and the accounting policies set out on pages 3 and 4.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the Directors' Report and Accounts in accordance with applicable Northern Ireland law and United Kingdom accounting standards are set out in the statement of directors' responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and United Kingdom Auditing Standards issued by the Auditing Practices Board. This report, including the opinion, has been prepared for and only for the company's members as a body in accordance with Article 243 of the Companies (Northern Ireland) Order 1986 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies (Northern Ireland) Order 1986. We also report to you if, in our opinion, the Report of Directors is not consistent with the Accounts, if the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and transactions is not disclosed.

We read the other information contained in the Directors' Report and Accounts and consider the implications for our report if we become aware of any apparent misstatements or material inconsistencies with the Accounts. The other information comprises the Report of the Directors.

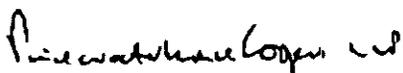

**Basis of audit opinion**

We conducted our audit in accordance with auditing standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the Accounts. It also includes an assessment of the significant estimates and judgements made by the directors in the preparation of the Accounts, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Accounts are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the Accounts.

**Opinion**

In our opinion the Accounts give a true and fair view of the state of the company's affairs at 31 March 2005 and of its profit for the year then ended and have been properly prepared in accordance with the Companies (Northern Ireland) Order 1986.

**Director's report**  
**For the year ended 31 March 2007**

The directors present their annual report and the audited financial statements of Wind Resources Limited (the 'Company') together with its subsidiaries (the 'Group') for the year ended 31 March 2007.

**Principal activity and business review**

The principal activity of the Group is to invest in electricity generation using wind power.

Wind Resources Limited owns two companies, Carland Cross Limited and Coal Clough Limited. Carland Cross Limited operates a windfarm consisting of fifteen Vestas wind turbines, near Mitchell in Cornwall. Coal Clough Limited operates a windfarm consisting of twenty four Vestas wind turbines, near Burnley in Lancashire.

**Capital investment and future developments**

The Group will continue to manage and maximize its investments in renewable energy generation.

**Profit and dividend**

The Group profit for the year before taxation amounted to £1,657,200 (2006: £1,046,400) and £1,160,200 (2006: £729,400) after taxation. The directors paid a dividend for the year of £1,410,000 (2006: £880,000).

**Directors**

The directors who served throughout the year were:

Samuel Robert James Anderson	alternate to David Neil Morrison
Stephen John Tivadar Balint	
Christopher David Sweatman	alternate to Stephen John Tivadar Balint
Tariq Masood	
David Neil Morrison	

None of the directors were materially interested in any contract of significance in relation to the Group's business.

**Statement of disclosure to auditors**

In the case of each of the persons who were directors at the time when the report is approved under Section 234A the following applies

- (a) so far as the directors are aware, there is no relevant audit information of which the Company's auditors are unaware, and
- (b) the directors have taken all the steps that they ought to have taken as director in order to make themselves aware of any relevant audit information and to establish that the company's auditors are aware of this information.

**Auditors**

In accordance with section 385 of the Companies Act 1985 a resolution for the reappointment of PKF (UK) LLP will be proposed at the forthcoming annual general meeting.

**By Order of the Board**

T Masood  
Director

5 July 2007

### **Statement of directors' responsibilities**

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The financial statements are required to give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

**Independent auditors' report  
to the members of Wind Resources Limited**

We have audited the group and parent company financial statements ('the financial statements') of Wind Resources Limited for the year ended 31 March 2007 which comprise the group profit and loss account, the group and company balance sheets, the group cash flow statement and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the annual report and the financial statements in accordance with applicable law and United Kingdom accounting standards ('United Kingdom Generally Accepted Accounting Practice') are set out in the statement of directors' responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and have been properly prepared in accordance with the Companies Act 1985. We also report to you if, in our opinion, in our opinion the information given in the directors' report is consistent with the financial statements.

In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not discounted.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards of Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the group's and company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the group's and the parent company's affairs as at 31 March 2007 and of the groups profit for the year then ended;
- the financial statements have been prepared in accordance with the Companies Act 1985; and
- the information given in the directors' report is consistent with the financial statements.

The accompanying notes are an integral part of these financial statements.

**Notes to the financial statements  
For the year ended 31 March 2007**

**1 Accounting policies**

The principal accounting policies are summarised below.

***Basis of preparation***

The financial statements have been prepared under the historical cost convention and in accordance with the Companies Act 1985 and applicable accounting standards. They have been prepared under United Kingdom Generally Accepted Accounting Practice ("UK GAAP"). Accounting policies have been applied consistently throughout the year and the preceding year except where changes have been made to previous policies on adoption of new accounting standards.

***Consolidation***

The Group financial statements consolidate the financial statements of Wind Resources Limited and its subsidiary undertakings for the year ended 31 March 2007. The consolidated financial statements have been prepared on the acquisition basis.

***Turnover***

Turnover is stated net of value added tax (see Note 2).

***Leases***

Operating lease rentals are charged to the profit and loss account in relation to the total number of units generated (see Note 21).

***Tangible fixed assets***

Tangible fixed assets are stated at cost, net of depreciation and any provision for impairment.

***Depreciation***

The charge for depreciation is calculated to write off assets over their estimated useful economic lives taking into account anticipated residual values. The lives of depreciable plant and machinery generation assets are all 20 years.

***Stock***

Stocks are valued at the lower of cost and net realisable value.

***Investments***

Fixed asset investments are shown at cost less provision for impairment.

***Taxation***

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in years different from those in which they are recognised in the financial statements.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets and liabilities are not discounted.

**2 Turnover**

Turnover represents sales of electricity products to Npower Limited under a power sales agreement. The electricity products comprise sale of energy, levy exemption certificates, triad benefits and renewable obligation certificates. The prices are agreed in advance and stated in the power sales agreement. The Climate Change Levy allows the Company to receive a proportion of the exempting benefit available to Npower Limited as a consequence of wind energy being exempt from the Levy.

From 1 April 2002, the Government introduced the Renewables Obligation. Generation of electricity from wind energy is eligible under the Renewables Obligation. Renewable Obligation certificates are obtained and sold under a power purchase agreement, yielding additional income for the Group which was not previously available. The Group operates wholly within the United Kingdom.

**3 Operating expenses**

The directors consider that the nature of the business is such that the analysis of expenses shown below is more informative than that set out in the Companies Act 1985 formats.

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Operating and maintenance costs .....	478.8	516.2
Operating lease rental-land and buildings .....	56.6	42.9
Administration .....	27.2	27.2
Depreciation .....	888.7	888.6
Rates .....	33.8	33.0
Fees .....	1.0	16.2
Audit fees .....	3.3	3.2
	<u>1,489.4</u>	<u>1,527.3</u>

**4 Directors and employees**

No director received any emoluments from the Group during the year (2006: £nil).

The Group had no employees during the current or the prior year.

**5 Interest receivable**

	<u>2007</u>	<u>2006</u>
	£'000	£'000
Bank interest receivable .....	96.4	55.8

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

**6 Tax on profit on ordinary activities**

a) Analysis of tax charge in the year

	<b>2007</b>	<b>2006</b>
	<b>£'000</b>	<b>£'000</b>
Current tax:		
UK corporation tax on profits for the year .....	726.3	534.9
Total current tax (Note 6(b)) .....	<u>726.3</u>	<u>534.9</u>
Deferred tax (Note 13):		
Origination and reversal of timing differences .....	(229.2)	(220.9)
Adjustment in respect of prior years .....	(0.1)	3.0
Total deferred tax .....	<u>(229.3)</u>	<u>(217.9)</u>
Tax on profit on ordinary activities .....	<u><u>497.0</u></u>	<u><u>317.0</u></u>

b) Factors affecting tax charge for the year

The tax assessed for the year is different to the standard rate of corporation tax in the UK(30%). The differences are explained below:

	<b>2007</b>	<b>2006</b>
	<b>£'000</b>	<b>£'000</b>
Profit on ordinary activities before tax .....	<u>1,657.2</u>	<u>1,046.4</u>
Profit on ordinary activities multiplied by the standard rate of corporation tax in the UK of 30% (2006: 30%) .....	497.1	313.9
Effects of:		
Capital allowances for the year less than depreciation .....	<u>229.2</u>	<u>220.9</u>
Current tax charge for the year (Note 6 (a)) .....	<u><u>726.3</u></u>	<u><u>534.8</u></u>

**7 Dividends**

	<b>2007</b>	<b>2006</b>
	<b>£'000</b>	<b>£'000</b>
Equity shares:		
Interim dividend paid of 36.50p (2006: 22.78p) per ordinary share .....	1,410.0	880.0

**8 Tangible fixed assets**

	<b>Plant and machinery</b>
	<b>£'000</b>
<b>Cost</b>	
At 1 April 2006 .....	17,773.3
Additions .....	<u>7.5</u>
At 31 March 2007 .....	<u><u>17,780.8</u></u>
<b>Depreciation</b>	
At 1 April 2006 .....	11,888.6
Charge for the year .....	<u>888.7</u>
At 31 March 2007 .....	<u><u>12,777.3</u></u>
<b>Net book value</b>	
At 31 March 2007 .....	<u><u>5,003.5</u></u>
At 31 March 2006 .....	<u><u>5,884.7</u></u>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

**9 Investments**

Shares in subsidiary undertakings

<u>Name</u>	<u>Holding</u>	<u>Proportion</u>	<u>Cost</u> £'000
Carland Cross Limited .....	Ordinary	100%	1,433.2
Coal Clough Limited .....	Ordinary	100%	2,420.0
At 31 March 2007 and 31 March 2006 .....			<u>3,853.2</u>

Both companies are involved in the generation of renewable energy.

**10 Stocks**

	<u>2007</u> £'000	<u>2006</u> £'000
Spare parts .....	10.1	10.1

**11 Debtors**

	<u>2007</u> £'000	<u>2006</u> £'000
Trade debtors .....	45.5	63.5
Prepayments and accrued income .....	1,252.8	877.2
Other debtors .....	78.0	60.0
	<u>1,376.3</u>	<u>1,000.7</u>

The other debtors relate to a deposit given to Burnley Council by Coal Clough Limited in line with planning conditions, and a deposit held by a bank for Carland Cross Limited in line with planning conditions. They will become repayable at the end of the planning period, which is after more than one year from the balance sheet date.

**12 Creditors**

	<u>2007</u> £'000	<u>2006</u> £'000
Corporation tax .....	461.9	252.4
Value added tax .....	113.8	109.0
Accruals and deferred income .....	152.8	201.1
	<u>728.5</u>	<u>562.5</u>

**13 Provisions for liabilities and charges—deferred tax**

	<u>2007</u> £'000	<u>2006</u> £'000
Deferred taxation provided in respect of accelerated capital allowances at 30% (2006: 30%):		
At 1 April .....	1,554.6	1,772.5
Adjustment in respect of prior years .....	(0.1)	3.0
Credit for the year .....	(229.2)	(220.9)
At 31 March .....	<u>1,325.3</u>	<u>1,554.6</u>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

**14 Called up share capital**

**Group and Company**

	2007	2006
	£'000	£'000
<b>Authorised:</b>		
4,000,000 ordinary shares of £1 each (1,800,000 'A' shares, 1,800,000 'B' shares and 400,000 'C' shares) .....	4,000.0	4,000.0
<b>Allotted, called up and fully paid:</b>		
3,863,153 ordinary shares of £1 each (1,738,419 'A' shares, 1,738,419 'B' shares and 386,315 'C' shares) .....	3,863.2	3,863.2

**15 Profit and loss account**

	Group 2007	Group 2006	Company 2007	Company 2006
	£'000	£'000	£'000	£'000
At 1 April .....	2,125.8	2,276.4	4.9	4.8

	£'000	£'000	£'000	£'000
Profit for the financial year .....	1,160.2	729.4	1,410.1	880.1
Dividends .....	(1,410.0)	(880.0)	(1,410.0)	(880.0)
Movements in equity shareholders' funds .....	(249.8)	(150.6)	0.1	0.1
Opening equity shareholders' funds .....	5,989.0	6,139.6	3,868.1	3,868.0
Closing equity shareholders' funds .....	5,739.2	5,989.0	3,868.2	3,868.1

**17 Reconciliation of operating profit to operating cash flows**

	2007	2006
	£'000	£'000
Operating profit .....	1,560.8	990.6
Depreciation .....	888.7	888.6
(Increase) in debtors .....	(375.6)	(276.9)
(Decrease)/Increase in creditors .....	(43.5)	4.6
Net cash flow from operating activities .....	2,030.4	1,606.9

**18 Analysis of returns on investments and servicing of finance**

	2007	2006
	£'000	£'000
Returns on investments and servicing of finance:		
Interest received .....	96.4	55.8
Net cash inflow from returns on investments and servicing of finance .....	96.4	55.8

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2007**

**19 Analysis of capital expenditure**

	<b>2007</b>	<b>2006</b>
	<b>£'000</b>	<b>£'000</b>
Capital expenditure:		
Purchase of tangible fixed assets .....	7.5	7.5
Net cash outflow from capital expenditure .....	7.5	7.5

**20 Analysis of net funds**

	<b>At 1 April 2006</b>	<b>Cash flow</b>	<b>At 31 March 2007</b>
	<b>£'000</b>	<b>£'000</b>	<b>£'000</b>
Cash at bank .....	1,210.6	192.5	1,403.1
Net Funds .....	1,210.6	192.5	1,403.1

**21 Lease commitments**

The subsidiary companies each have a lease on the land occupied by the wind turbines, under which they have an obligation to pay the landowners as rental on a half yearly and quarterly basis for Carland Cross Limited and Coal Clough Limited respectively, the greater of either a fixed contribution per turbine (Carland Cross Limited: £300 and Coal Clough Limited: £100) or 2% of income from total units generated. The lease for Carland Cross expires in September 2017 and lease for Coal Clough expires in July 2017.

**22 Subsequent event**

The Finance Bill 2007, which was regarded as substantially enacted on 26 June 2007, has introduced a reduction in the corporation tax rate from 30% to 28% from 1 April 2008 and the immediate withdrawal of balancing adjustments for assets where Industrial Buildings Allowances have been claimed. The effect of these changes is estimated to be a credit to the profit and loss account of £56k.

**23 Shareholders and related party transactions**

The shareholders of Wind Resources Limited at the balance sheet date were:

Avonbank Investments Limited .....	45%
Beaufort Energy Limited .....	45%
RES-Gen Limited .....	10%

Given that Wind Resources Limited is owned by a consortium, none of whose members own more than 45% of the issued share capital, the directors do not consider that there is a controlling party.

Western Power Generation Limited, an associate company of Avonbank Investments Limited, has contracts to provide management services to both Carland Cross Limited and Coal Clough Limited. During the year the Group was charged £27,200 (2006: £27,200) for management services under these contracts, and at 31 March 2007 the Group owed £6,800 to Western Power Generation Limited (2006: £6,800). Payments in future years are linked to movements in the retail price index.

Notes to the financial statements .....	F-554 – F-559

**Directors' report**  
**For the year ended 31 March 2006**

The directors present their annual report and the audited financial statements of Wind Resources Limited (the 'Company') together with its subsidiaries (the 'Group') for the year ended 31 March 2006.

**Principal activity and business review**

The principal activity of the Group is to invest in electricity generation using wind power.

Wind Resources Limited owns two companies, Carland Cross Limited and Coal Clough Limited. Carland Cross Limited operates a windfarm consisting of fifteen Vestas wind turbines, near Mitchell in Cornwall. Coal Clough Limited operates a windfarm consisting of twenty four Vestas wind turbines, near Burnley in Lancashire.

**Capital investment and future developments**

The Group will continue to manage and maximise its investments in renewable energy generation.

**Profit and dividend**

The Group profit for the year before taxation amounted to £1,046,400 (2005: £599,000) and £729,400 (2005: £424,100) after taxation. The directors paid a dividend for the year of £880,000 (2005: £1,890,000).

**Directors**

The directors who served throughout the year were:-

Samuel Robert James Anderson	alternate to David Neil Morrison
Stephen John Tivadar Balint	
Dominic Paul Keating	alternate to Stephen John Tivadar Balint (resigned 16 February 2006)
Tariq Masood	
David Neil Morrison	

On 16 February 2006 Dominic Paul Keating resigned and Chris Sweatman was appointed as alternate director to Stephen John Tivadar Balint.

At 31 March 2006 and throughout the year, no director had any interest in the shares of the Company or other group companies which required notification to the Company under Section 324 and registration by the Company under Section 325 of the Companies Act 1985.

None of the directors were materially interested in any contract of significance in relation to the Group's business.

**Statement of disclosure to auditors**

In the case of each of the persons who were directors at the time when the report is approved under Section 234A the following applies

- (a) so far as the directors are aware, there is no relevant audit information of which the Company's auditors are unaware, and
- (b) the directors have taken all the steps that they ought to have taken as director in order to make themselves aware of any relevant audit information and to establish that the company's auditors are aware of this information.

**Auditors**

In accordance with section 385 of the Companies Act 1985 a resolution for the reappointment of PKF (UK) LLP will be proposed at the forthcoming annual general meeting.

By Order of the Board

T Masood  
Director

22 January 2007

### **Statement of directors' responsibilities**

The directors are responsible for preparing the annual report and the financial statements in accordance with applicable law and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The financial statements are required to give a true and fair view of the state of affairs of the Company and of the profit or loss of the Company for that period. In preparing these financial statements the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

**Independent auditors' report  
to the members of Wind Resources Limited**

We have audited the group and parent company financial statements ('the financial statements') of Wind Resources Limited for the year ended 31 March 2006 which comprise the group profit and loss account, the group and company balance sheets, the group cash flow statement and the related notes. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the annual report and the financial statements in accordance with applicable law and United Kingdom accounting standards ('United Kingdom Generally Accepted Accounting Practice') are set out in the statement of directors' responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you if, in our opinion, the information given in the directors' report is consistent with the financial statements.

In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards of Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the group's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the group's and the parent company's affairs as at 31 March 2006 and of the groups profit for the year then ended;
- the financial statements have been prepared in accordance with the Companies Act 1985; and
- the information given in the directors' report is consistent with the financial statements.

The accompanying notes are an integral part of these financial statements.

**Notes to the financial statements  
For the year ended 31 March 2006**

**1 Accounting policies**

The principal accounting policies are summarised below.

***Basis of preparation***

The financial statements have been prepared under the historical cost convention and in accordance with the Companies Act 1985 and applicable accounting standards. They have been prepared under United Kingdom Generally Accepted Accounting Practice ("UK GAAP"). Accounting policies have been applied consistently throughout the year and the preceding year except where changes have been made to previous policies on adoption of new accounting standards.

***Consolidation***

The Group financial statements consolidate the financial statements of Wind Resources Limited and its subsidiary undertakings for the year ended 31 March 2006. The consolidated financial statements have been prepared on the acquisition basis.

***Changes in accounting policies***

The company has adopted Financial Reporting Standard ("FRS") 21 'Events after balance sheet date', FRS 25 'Financial instruments: disclosure and presentation', and FRS 28 'Corresponding amounts'. The adoption of these standards in the current year represents a change in accounting policies. This change in accounting policies has had no effect on the Company and restatement of comparative figures has not been required.

***Turnover***

Turnover is stated net of value added tax (see Note 2).

***Leases***

Operating lease rentals are charged to the profit and loss account in relation to the total number of units generated (see Note 21).

***Tangible fixed assets***

Tangible fixed assets are stated at cost, net of depreciation and any provision for impairment.

***Depreciation***

The charge for depreciation is calculated to write off assets over their estimated useful economic lives taking into account anticipated residual values. The lives of depreciable plant and machinery generation assets are all 20 years.

***Stock***

Stocks are valued at the lower of cost and net realisable value.

***Investments***

Fixed asset investments are shown at cost less provision for impairment.

***Taxation***

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2006**

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in years different from those in which they are recognised in the financial statements.

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets and liabilities are not discounted.

**2 Turnover**

Turnover represents power sales to Npower Limited and the Climate Change Levy. Power sales are derived from electricity generation based on prices set by the New Electricity Trading Arrangements. These prices fluctuate on a half hourly basis and are dependent upon factors such as national demand, plant availability and weather conditions. The Climate Change Levy allows the Group to receive a proportion of the exempting benefit available to Npower Limited as a consequence of wind energy being exempt from the Levy.

From 1 April 2002, the Government introduced the Renewables Obligation. Generation of electricity from wind energy is eligible under the Renewables Obligation. Renewable Obligation certificates are obtained and sold under a power purchase agreement, yielding additional income for the Group which was not previously available. The Group operates wholly within the United Kingdom.

**3 Operating expenses**

The directors consider that the nature of the business is such that the analysis of expenses shown below is more informative than that set out in the Companies Act 1985 formats.

	2006	2005
	£'000	£'000
Operating and maintenance costs .....	516.2	568.3
Operating lease rentals—land and buildings .....	42.9	43.3
Administration .....	27.2	26.4
Depreciation .....	888.6	924.3
Rates .....	33.0	35.6
Fees .....	16.2	9.5
Audit fees .....	3.2	2.8
	1,527.3	1,610.2

**4 Directors and employees**

No director received any emoluments from the Group during the year (2005: £nil).

The Group had no employees during the current or the prior year.

**5 Interest receivable**

	2006	2005
	£'000	£'000
Bank interest receivable .....	55.8	59.5

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2006**

**6 Tax on profit on ordinary activities**

a) Analysis of tax charge in the year

	<b>2006</b>	<b>2005</b>
	<b>£'000</b>	<b>£'000</b>
Current tax:		
UK corporation tax on profits for the year .....	534.9	399.1
Adjustment in respect of prior years .....	—	2.0
<b>Total current tax (Note 6 (b)) .....</b>	<b>534.9</b>	<b>401.1</b>
Deferred tax (Note 13):		
Origination and reversal of timing differences .....	(220.9)	(221.1)
Adjustment in respect of prior years .....	3.0	(5.1)
<b>Total deferred tax .....</b>	<b>(217.9)</b>	<b>(226.2)</b>
<b>Tax on profit on ordinary activities .....</b>	<b>317.0</b>	<b>174.9</b>

b) Factors affecting tax charge for the year

The tax assessed for the year is different to the standard rate of corporation tax in the UK (30%). The differences are explained below:

	<b>2006</b>	<b>2005</b>
	<b>£'000</b>	<b>£'000</b>
Profit on ordinary activities before tax .....	1,046.4	599.0
Profit on ordinary activities multiplied by the standard rate of corporation tax in the UK of 30% (2005: 30%) .....	314.0	179.7
Effects of:		
Capital allowances for the year less than depreciation .....	220.9	221.1
Adjustment in respect of prior years .....	—	2.0
Marginal relief .....	—	(1.7)
<b>Current tax charge for the year (Note 6 (a)) .....</b>	<b>534.9</b>	<b>401.1</b>

**7 Dividends**

	<b>2006</b>	<b>2005</b>
	<b>£'000</b>	<b>£'000</b>
Equity shares:		
Interim dividend paid of 22.78p (2005: 48.92p) per ordinary share .....	880.0	1,890.0

**8 Tangible fixed assets**

	<b>Plant and machinery</b>
	<b>£'000</b>
<b>Cost</b>	
At 1 April 2005 .....	17,772.0
Additions .....	1.3
<b>At 31 March 2006 .....</b>	<b>17,773.3</b>
<b>Depreciation</b>	
At 1 April 2005 .....	11,000.0
Charge for the year .....	888.6
<b>At 31 March 2006 .....</b>	<b>11,888.6</b>
<b>Net book value</b>	
<b>At 31 March 2006 .....</b>	<b>5,884.7</b>
<b>At 31 March 2005 .....</b>	<b>6,772.0</b>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2006**

**9 Investments**

Shares in subsidiary undertakings

<u>Name</u>	<u>Holding</u>	<u>Proportion</u>	<u>Cost</u> £'000
Carland Cross Limited .....	Ordinary	100%	1,433.2
Coal Clough Limited .....	Ordinary	100%	2,420.0
At 31 March 2006 and 31 March 2005 .....			<u>3,853.2</u>

Both companies are involved in the generation of renewable energy.

**10 Stocks**

	<u>2006</u> £'000	<u>2005</u> £'000
Spare parts .....	10.1	10.1

**11 Debtors**

	<u>2006</u> £'000	<u>2005</u> £'000
Trade debtors .....	63.5	—
Prepayments and accrued income .....	877.2	663.8
Other debtors .....	60.0	60.0
	<u>1,000.7</u>	<u>723.8</u>

The other debtors relate to a deposit given to Burnley Council by Coal Clough Limited in line with planning conditions, and a deposit held by a bank for Carland Cross Limited in line with planning conditions. They will become repayable at the end of the planning period, which is after more than one year from the balance sheet date.

**12 Creditors**

	<u>2006</u> £'000	<u>2005</u> £'000
Corporation tax .....	252.4	181.6
Value added tax .....	109.0	90.4
Accruals and deferred income .....	201.1	215.1
	<u>562.5</u>	<u>487.1</u>

**13 Provisions for liabilities and charges—deferred tax**

	<u>2006</u> £'000	<u>2005</u> £'000
Deferred taxation provided in respect of accelerated capital allowances at 30% (2005: 30%):		
At 1 April .....	1,772.5	1,998.7
Adjustment in respect of prior years .....	3.0	(5.1)
Credit for the year .....	(220.9)	(221.1)
At 31 March .....	<u>1,554.6</u>	<u>1,772.5</u>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2006**

**14 Called up share capital**

	<b>2006</b>	<b>2005</b>
	<b>£'000</b>	<b>£'000</b>
Returns on investments and servicing of finance:		
Interest received .....	<b>55.8</b>	<b>59.5</b>
Net cash inflow from returns on investments and servicing of finance .....	<b>55.8</b>	<b>59.5</b>

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2006**

**19 Analysis of capital expenditure**

	<b>2006</b>	<b>2005</b>
	<b>£'000</b>	<b>£'000</b>
Capital expenditure:		
Purchase of tangible fixed assets .....	<b>1.3</b>	<b>54.9</b>
Net cash outflow from capital expenditure .....	<b>1.3</b>	<b>54.9</b>

**20 Analysis of net funds**

	<b>At 1 April 2005</b>	<b>Cash flow</b>	<b>At 31 March 2006</b>
	<b>£'000</b>	<b>£'000</b>	<b>£'000</b>
Cash at bank .....	<b>893.3</b>	<b>317.3</b>	<b>1,210.6</b>
Net Funds .....	<b>893.3</b>	<b>317.3</b>	<b>1,210.6</b>

**21 Lease commitments**

The subsidiary companies each have a lease on the land occupied by the wind turbines, under which they have an obligation to pay the landowners as rental on a half yearly and quarterly basis for Carland Cross Limited and Coal Clough Limited respectively, the greater of either a fixed contribution per turbine (Carland Cross Limited: £300 and Coal Clough Limited: £100) or 2% of income from total units generated. The lease for Carland Cross expires in September 2017 and lease for Coal Clough expires in July 2017.

**22 Shareholders and related party transactions**

The shareholders of Wind Resources Limited at the balance sheet date were:

Avonbank Investments Limited .....	45%
Beaufort Energy Limited .....	45%
RES-Gen Limited .....	10%

Given that Wind Resources Limited is owned by a consortium, none of whose members own more than 45% of the issued share capital, the directors do not consider that there is a controlling party.

Western Power Generation Limited, an associate company of Avonbank Investments Limited, has contracts to provide management services to both Carland Cross Limited and Coal Clough Limited. During the year the Group was charged £27,200 (2005: £26,400) for management services under these contracts, and at 31 March 2006 the Group owed £6,800 to Western Power Generation Limited (2005: £6,600). Payments in future years are linked to movements in the retail price index.

**Directors' report**  
**For the year ended 31 March 2005**

The directors present their annual report and the audited financial statements of Wind Resources Limited (the 'Company') together with its subsidiaries (the 'Group') for the year ended 31 March 2005.

**Principal activity and business review**

The principal activity of the Group is to invest in electricity generation using wind power.

Wind Resources Limited owns two companies, Carland Cross Limited and Coal Clough Limited. Carland Cross Limited operates a windfarm consisting of fifteen Vestas wind turbines, near Mitchell in Cornwall. Coal Clough Limited operates a windfarm consisting of twenty four Vestas wind turbines, near Burnley in Lancashire.

**Capital investment and future developments**

The Group will continue to manage and maximise its investments in renewable energy generation.

**Profit and dividend**

The Group profit for the year before taxation amounted to £599,000 (2004: £5,697,900) and £424,100 (2004: £3,988,500) after taxation. The directors paid a dividend for the year of £1,890,000 (2004: £930,000).

The Group profit in 2004 included an impairment reversal. To make the Group profits in both years comparable, the impact of the impairment reversal in 2004 should be taken into account as detailed in note 4.

**Directors**

The directors who served throughout the year were:-

Samuel Robert James Anderson	alternate to David Neil Morrison
Stephen John Tivadar Balint	
Dominic Paul Keating	alternate to Stephen John Tivadar Balint
Tariq Masood	
David Neil Morrison	

At 31 March 2005 and throughout the year, no director had any interest in the shares of the Company or other group companies which required notification to the Company under Section 324 and registration by the Company under Section 325 of the Companies Act 1985.

None of the directors were materially interested in any contract of significance in relation to the Group's business.

**Auditors**

On 23 May 2005, PKF transferred their business to PKF (UK) LLP, a limited liability partnership. Under section 26(5) of the Companies Act 1989, the company consented to extend the audit appointment to PKF (UK) LLP from 23 May 2005. Accordingly, the audit report has been signed in the name of PKF (UK) LLP and a resolution for the reappointment of PKF (UK) LLP will be proposed at the forthcoming annual general meeting.

By Order of the Board

T Masood  
Director

20 January 2006

### **Statement of directors' responsibilities**

Company law requires the directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Company and of the Group and of the profit or loss of the Group for that year. In preparing those financial statements the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The directors confirm that they have complied with the above requirements in preparing the financial statements.

The directors are responsible for keeping proper accounting records which disclose with reasonable accuracy at any time the financial position of the Company and Group and enable them to ensure that the financial statements comply with the Companies Act 1985. They are also responsible for safeguarding the assets of the Company and Group and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The directors are responsible for ensuring that the directors' report is prepared in accordance with Company Law in the United Kingdom.

**Independent auditors' report  
to the members of Wind Resources Limited**

We have audited the financial statements of Wind Resources Limited for the year ended 31 March 2005 which comprise the Group Profit and Loss account, the Group and Company Balance Sheets, the Group Cash Flow Statement and the related notes. These financial statements have been prepared under the accounting policies set out.

This report is made solely to the Group's members, as a body, in accordance with Section 235 of the Companies Act 1985. Our audit work has been undertaken so that we might state to the Group's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Group and the Group's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the Annual Report and the financial statements in accordance with applicable law and United Kingdom Accounting Standards are set out in the statement of directors' responsibilities.

Our responsibility is to audit the financial statements in accordance with the relevant legal and regulatory requirements and United Kingdom Auditing Standards.

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies Act 1985. We also report to you if, in our opinion, the Directors' Report is not consistent with the financial statements, if the Company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and transactions with the Company is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with United Kingdom Auditing Standards issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of significant estimates and judgements made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the Company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion the financial statements give a true and fair view of the state of the Company's and Group's affairs as at 31 March 2005 and of the profit of the Group for the year then ended and have been properly prepared in accordance with the Companies Act 1985.

The accompanying notes are an integral part of these financial statements.

**Notes to the financial statements**  
**For the year ended 31 March 2005**

**1 Accounting policies**

A summary of the principal accounting policies, all of which have been consistently applied, is set out below.

***Basis of preparation***

The financial statements have been prepared under the historical cost convention and in accordance with applicable accounting standards.

***Consolidation***

The Group financial statements consolidate the financial statements of Wind Resources Limited and its subsidiary undertakings for the year ended 31 March 2005. The consolidated financial statements have been prepared on the acquisition basis.

***Turnover***

Turnover is stated net of value added tax (see Note 2).

***Leases***

Operating lease rentals are charged to the profit and loss account in relation to the total number of units generated (see Note 22).

***Tangible fixed assets***

Tangible fixed assets are stated at cost, net of depreciation and any provision for impairment.

***Depreciation***

The charge for depreciation is calculated to write off assets over their estimated useful economic lives taking into account anticipated residual values. The lives of depreciable plant and machinery generation assets are all 20 years.

***Stock***

Stocks are valued at the lower of cost and net realisable value.

***Investments***

Fixed asset investments are shown at cost less provision for impairment.

***Taxation***

Current tax is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events that result in an obligation to pay more tax in the future or a right to pay less tax in the future have occurred at the balance sheet date. Timing differences are differences between the Company's taxable profits and its results as stated in the financial statements that arise from the inclusion of gains and losses in tax assessments in years different from those in which they are recognised in the financial statements.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

A net deferred tax asset is regarded as recoverable and therefore recognised only when, on the basis of all available evidence, it can be regarded as more likely than not that there will be suitable taxable profits from which the future reversal of the underlying timing differences can be deducted.

Deferred tax is measured at the average tax rates that are expected to apply in the years in which the timing differences are expected to reverse, based on tax rates and laws that have been enacted or substantially enacted by the balance sheet date.

**2 Turnover**

Turnover represents power sales to London Electricity Group plc and the Climate Change Levy. Power sales are derived from electricity generation based on prices set by the New Electricity Trading Arrangements. These prices fluctuate on a half hourly basis and are dependent upon factors such as national demand, plant availability and weather conditions. The Climate Change Levy allows the Group to receive a proportion, of the exempting benefit available to London Electricity Group plc as a consequence of wind energy being exempt from the Levy.

From 1 April 2002, the Government introduced the Renewables Obligation. Generation of electricity from wind energy is eligible under the Renewables Obligation. Renewable Obligation certificates are obtained and sold under a power purchase agreement, yielding additional income for the Group which was not previously available.

**3 Operating expenses**

The directors consider that the nature of the business is such that the analysis of expenses shown below is more informative than that set out in the Companies Act 1985 formats.

	2005	2004
	£'000	£'000
Operating and maintenance costs .....	568.3	461.3
Operating lease rentals—land and buildings .....	43.3	44.0
Administration .....	26.4	25.8
Depreciation .....	924.3	390.3
Rates .....	35.6	39.0
Fees .....	9.5	2.2
Audit fees .....	2.8	2.2
	1,610.2	964.8

**4 Exceptional item—impairment reversal**

In 1998 and 1999 impairment reviews, which followed the provisions of Financial Reporting Standard 11 "Impairment of fixed assets and goodwill", were carried out on Carland Cross Limited and Coal Clough Limited. The result of the impairment reviews was to account for an additional £2,454,200 of depreciation in Carland Cross Limited and an additional £4,853,000 of depreciation in Coal Clough Limited. This was done in order to reduce the net book value of the windfarm assets to their then estimated recoverable amounts.

Following the introduction of the Renewables Obligation on 1 April 2002 a further impairment review was undertaken in 2004 which resulted in the revaluation of the windfarm assets to their original depreciated value. The total depreciation charged on the windfarm assets was reduced by £1,466,500 in Carland Cross Limited and £3,035,900 in Coal Clough Limited.

A provision for deferred tax was made on the impairment reversal. The provision was based on the current tax rate of 30%, increasing the total deferred tax provision by £439,950 in Carland Cross Limited and £910,770 in Coal Clough Limited.

In estimating the recoverable amount of the windfarm assets a forecast period of 9 years was used. Future output was assumed to be in line with historical trends, with sales being based on predicted power prices. General inflation was assumed to be 2.5% per annum. A discount rate of 10% was used.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

**5 Directors and employees**

No director received any emoluments from the Group during the year (2004: £nil).

The Group had no employees during the current or the prior year.

**6 Interest receivable (net)**

	<u>2005</u>	<u>2004</u>
	£'000	£'000
Bank interest receivable .....	59.5	37.1
Bank interest payable .....	—	(0.5)
Interest payable on corporation tax underpayment .....	—	(0.6)
Interest receivable (net) .....	<u>59.5</u>	<u>36.0</u>

**7 Tax on profit on ordinary activities**

a) Analysis of tax charge in the year

	<u>2005</u>	<u>2004</u>
	£'000	£'000
Current tax:		
UK corporation tax on profits for the year .....	399.1	403.3
Adjustment in respect of prior years .....	2.0	4.9
Total current tax (Note 7 (b)) .....	<u>401.1</u>	<u>408.2</u>
Deferred tax (Note 14):		
Origination and reversal of timing differences .....	(221.1)	(44.7)
Exceptional item—impairment reversal .....	—	1,350.8
Adjustment in respect of prior years .....	(5.1)	(4.9)
Total deferred tax .....	<u>(226.2)</u>	<u>1,301.2</u>
Tax on profit on ordinary activities .....	<u>174.9</u>	<u>1,709.4</u>

b) Factors affecting tax charge for the year

The tax assessed for the year is different to the standard rate of corporation tax in the UK (30%). The differences are explained below:

	<u>2005</u>	<u>2004</u>
	£'000	£'000
Profit on ordinary activities before tax .....	599.0	5,697.9
Profit on ordinary activities multiplied by the standard rate of corporation tax in the UK of 30% (2004:30%) .....	179.7	1,709.4
Effects of:		
Capital allowances for the year less than depreciation .....	221.1	44.7
Exceptional item—impairment reversal .....	—	(1,350.8)
Adjustment in respect of prior years .....	2.0	4.9
Marginal relief .....	(1.7)	—
Current tax charge for the year (Note 7 (a)) .....	<u>401.1</u>	<u>408.2</u>

**8 Dividends**

	<u>2005</u>	<u>2004</u>
	£'000	£'000
Equity shares:		
Interim dividend paid of 48.92p (2004: 24.07p) per ordinary share .....	1,890.0	930.0

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

**9 Tangible fixed assets**

	<u>Group Plant and machinery</u> £'000
<b>Cost</b>	
At 1 April 2004 .....	17,774.6
Disposals .....	(2.6)
At 31 March 2005 .....	<u>17,772.0</u>
<b>Depreciation</b>	
At 1 April 2004 .....	10,075.7
Charge for the year .....	924.3
At 31 March 2005 .....	<u>11,000.0</u>
<b>Net book value</b>	
At 31 March 2005 .....	<u>6,772.0</u>
At 31 March 2004 .....	<u>7,698.9</u>

**10 Investments**

Shares in subsidiary undertakings

<u>Name</u>	<u>Holding</u>	<u>Proportion</u>	<u>Company Cost</u> £'000
Carland Cross Limited .....	Ordinary	100%	1,433.2
Coal Clough Limited .....	Ordinary	100%	2,420.0
At 31 March 2005 and 31 March 2004 .....			<u>3,853.2</u>

Both companies are involved in the generation of renewable energy.

**11 Stocks**

	<u>2005</u> £'000	<u>2004</u> £'000
Spare parts .....	<u>10.1</u>	<u>10.1</u>

**12 Debtors**

	<u>2005</u> £'000	<u>2004</u> £'000
Trade debtors .....	—	85.9
Prepayments and accrued income .....	663.8	740.3
Other debtors .....	<u>60.0</u>	<u>60.0</u>
	<u>723.8</u>	<u>886.2</u>

The other debtors relate to a deposit given to Burnley Council by Coal Clough Limited in line with planning conditions, and a deposit held by a bank for Carland Cross Limited in line with planning conditions. They will become repayable at the end of the planning period, which is after more than one year from the balance sheet date.

**Notes to the financial statements—(Continued)**  
**For the year ended 31 March 2005**

**13 Creditors**

	<u>Group 2005</u>	<u>Group 2004</u>	<u>Company 2005</u>	<u>Company 2004</u>

	<u>1,714.7</u>	<u>1,617.6</u>

**19 Analysis of returns on investments and servicing of finance**

	<u>2005</u>	<u>2004</u>
	£'000	£'000
Returns on investments and servicing of finance:		
Interest received .....	59.5	37.1
Interest paid .....	—	(1.1)
Net cash inflow from returns on investments and servicing of finance .....	<u>59.5</u>	<u>36.0</u>

**20 Analysis of capital expenditure**

	<u>2005</u>	<u>2004</u>
	£'000	£'000
Capital expenditure:		
Purchase of tangible fixed assets .....	54.9	8.7
Net cash inflow from capital expenditure .....	<u>54.9</u>	<u>8.7</u>

**21 Analysis of net funds**

	<u>At 1 April</u>	<u>Cash</u>	<u>At 31 March</u>
	2004	flow	2005
	£'000	£'000	£'000
Cash at bank .....	70.9	822.4	893.3
Liquid resources .....	1,420.0	(1,420.0)	—
	<u>1,490.9</u>	<u>(597.6)</u>	<u>893.3</u>

Liquid resources represent deposits placed with Barclays Bank plc for fixed periods of one month or less. The cash at bank figure in the balance sheet represents the combined total of cash at bank as shown above and liquid resources.

**22 Lease commitments**

The subsidiary companies each have a lease on the land occupied by the wind turbines, under which they have an obligation to pay the landowners as rental on a half yearly and quarterly basis for Carland Cross Limited and Coal Clough Limited respectively, the greater of either a fixed contribution per turbine (Carland Cross Limited: £300 and Coal Clough Limited: £100) or 2% of income from total units generated. The lease for Carland Cross expires in September 2017 and lease for Coal Clough expires in July 2017.

Notes to the financial statements—(Continued)  
For the year ended 31 March 2005

**23 Shareholders and related party transactions**

The shareholders of Wind Resources Limited at the balance sheet date were:

Avonbank Investments Limited .....	45%
Beaufort Energy Limited .....	45%
RES-Gen Limited .....	10%

Given that Wind Resources Limited is owned by a consortium, none of whose members own more than 45% of the issued share capital, the directors do not consider that there is a controlling party.

Renewable Energy Systems Limited, an associate company of RES-Gen Limited, was the turnkey contractor for the construction of the windfarm, and held an operating and maintenance contract with Carland Cross and Coal Clough. During the year, the cost under this contract for the Group was £nil (2004: £170,127) and at 31 March 2005 the Group owed £nil to Renewable Energy Systems Limited (2004: £8,762).

Western Power Generation Limited, an associate company of Avonbank Investments Limited, has contracts to provide management services to both Carland Cross Limited and Coal Clough Limited. During the year the Group was charged £26,400 (2004: £12,876) for management services under these contracts, and at 31 March 2005 the Group owed £6,600 to Western Power Generation Limited (2004: £6,438). Payments in future years are linked to movements in the retail price index.

## Wolf Bog Wind Farm Limited

### Report of the Directors

This directors present their report and audited Accounts for the five month period ended 31 March 2007.

This directors' report has been prepared in accordance with certain special provisions relating to small sized companies under section 246(4) of the Companies Act 1985.

#### Activities and review

The principal activity of Wolf Bog Wind Farm Limited, "the company", is the development and construction of a wind farm in Northern Ireland. The company was not involved in any trading activity during the period.

#### Review of business and future developments

During the period ended 31 March 2007, £3,109,000 (year ended 31 October 2006: £79,000) of costs were incurred on the development and construction of the wind farm. These costs have been capitalised and included on the balance sheet. Funding of these activities was achieved by a loan from another group undertaking.

On 23 March 2007, Scottish Power UK Holdings Limited completed the acquisition of 100% of the issued share capital of Wolf Bog Wind Farm Limited for a cash consideration, excluding expenses of £2. The accounting reference date of the company was changed during the period from 31 October to 31 March in order to be co-terminous with the Scottish Power Limited (formerly Scottish Power plc) accounting reference date.

The company has net current liabilities of £3,188,000 at 31 March 2007 (31 October 2006: £83,000). This includes a current loan from group undertakings of £3,643,000 at 31 March 2007 (31 October 2006: £97,000). The directors consider that sufficient funding will be made available to the company to continue operations and to meet liabilities as they fall due.

On 22 May 2007, Iberdrola S.A., the company's ultimate parent company, announced plans to sell up to 20% of the shares in its renewable energy subsidiary, Iberdrola Energias Renovables (Iberenova). The board of Iberdrola also authorised a reorganisation of this business area with the goal of incorporating all renewable energy-related companies within the Iberdrola and ScottishPower groups, including Wolf Bog Wind Farm Limited, in Iberenova, prior to the sale of the Iberenova shares.

#### Results and dividend

The profit for the period amounted to £4,000 (2006: loss for the year of £4,000). The directors recommend that no dividend be paid in respect of the period (2006: £nil).

#### Directors

The directors who held office during the period were as follows:

K Anderson	(appointed 23 March 2007)
W B Hopkins	(resigned 23 March 2007)
M R O'Neill	(resigned 23 March 2007)
R Seshan	(appointed 23 March 2007)

#### Statement of directors' responsibilities

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable laws and regulations.

Company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The financial statements are required by law to give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;

- make judgements and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies (Northern Ireland) Order 1986. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

#### **Disclosure of information to auditors**

Each of the persons who is a director at the date of approval of this report confirms that:

- as far as the director is aware, there is no relevant audit information of which the company's auditors are unaware; and
- the director has taken all the steps he ought to have taken as a director in order to make himself aware of any relevant audit information and to establish the company's auditors are aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of Section 242ZA of the Companies (Northern Ireland) Order 1986.

#### **Auditors**

The company has elected, pursuant to Article 387A of the Companies (Northern Ireland) Order 1986, to dispense with the following obligations:

- to lay accounts and reports before general meetings;
- to hold annual general meetings; and
- to appoint auditors annually.

During the period, Deloitte & Touche LLP were appointed as auditors of the company for the period ended 31 March 2007.

#### **On Behalf of the Board**

**Keith Anderson**  
Director  
13 July 2007

**Wolf Bog Wind Farm Limited**  
**Accounting Policies and Definitions**

**Definitions**

***Revenue cost definitions***

***Administrative expenses***

Administrative expenses include the indirect costs of the business and the costs of centralised services provided by Scottish Power UK plc.

***Other definitions***

***Company***

Wolf Bog Wind Farm Limited

***Scottish Power***

Scottish Power Limited (formerly Scottish Power plc.)

**Accounting Policies**

***Basis of accounting***

The Accounts have been prepared under the historical cost convention, and in accordance with applicable accounting standards in the UK, and comply with the requirements of the Companies (Northern Ireland) Order 1986.

***Cash flow statement***

The company is exempt from including a statement of cash flows in its Accounts as it is a wholly owned subsidiary of Scottish Power Limited, which will include a consolidated statement of cash flows in its consolidated Accounts.

***Interest***

Interest payable and receivable is recognised in the profit and loss account as it is incurred.

***Current tax***

Current tax, comprising UK corporation tax, is provided at amounts expected to be paid (or recovered) using the tax rates and laws that have been enacted or substantively enacted by the balance sheet date.

***Tangible fixed assets***

Tangible fixed assets are stated at cost and are depreciated on the straight-line method over their estimated operational lives. Tangible fixed assets include those costs which are directly attributable to construction of fixed assets. The main depreciation periods used by the company are as set out below.

	<u>Years</u>
Plant and machinery .....	20

The carrying values of tangible fixed assets are reviewed for impairment in periods if events or changes in circumstances indicate the carrying value may not be recoverable. Impairment losses are recognised in the year in which they are identified.

***Leased assets***

***As Lessee***

Rentals payable under operating leases are charged to the profit and loss account on a straight line basis over the term of the lease.

**Wolf Bog Wind Farm Limited**  
**Profit and Loss Account**  
**for the period ended 31 March 2007**

	<u>Notes</u>	<u>Five months ended 31 March 2007</u>	<u>Year ended 31 October 2006</u>
		£'000	£'000
Interest payable .....	3	<u>4</u>	<u>(4)</u>
<b>Profit/(loss) on ordinary activities before taxation .....</b>		<b>4</b>	<b>(4)</b>
Taxation .....	4	<u>—</u>	<u>—</u>
<b>Profit/(loss) for period/year .....</b>	<b>10</b>	<b><u>4</u></b>	<b><u>(4)</u></b>

The above results relate to continuing operations.

A statement of total recognised gains and losses and a note of historical cost profits and losses are not shown as all gains and losses for the period and the prior year are recognised in the profit and loss account under the historical cost convention.

The Accounting Policies and Definitions on page 3, together with the Notes on pages 7 to 10, form part of these Accounts.

**12 Related party transactions**

Until 23 March 2007, the company was a wholly owned subsidiary of Newarthill Limited and after this date the company was a wholly owned subsidiary of Scottish Power Limited. The company has taken an exemption, as allowed by FRS 8, 'Related Party Disclosures', not to disclose related party transactions with other group companies as both of these companies publish full statutory consolidated Accounts.

**13 Ultimate parent company**

At 31 March 2007, the directors regarded Scottish Power Limited to be the ultimate parent company, which is also the parent company of the largest group in which the results of the company are consolidated. The parent company of the smallest group in which the results of the company are consolidated is Scottish Power UK Holdings Limited. Copies of both companies' consolidated Accounts can be obtained from The Secretary, Scottish Power Limited, 1 Atlantic Quay, Glasgow, G2 8SP. Subsequent to the year end, on 23 April 2007, Scottish Power Limited was acquired by Iberdrola S.A. From this date, the directors consider Iberdrola S.A. to be the ultimate parent undertaking.

**Independent Auditors' Report**  
**To the shareholder of Wolf Bog Wind Farm Limited**

We have audited the financial statements of Wolf Bog Wind Farm Limited for the 5 month period ended 31 March 2007 which comprise the Accounting Policies and Definitions, the Profit and Loss Account, the Balance Sheet, the Reconciliation of Movements in Shareholder's Funds and the related notes 1 to 13. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with Article 243 of the Companies (Northern Ireland) Order 1986. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

**Respective responsibilities of directors and auditors**

The directors' responsibilities for preparing the financial statements in accordance with applicable Northern Ireland law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice) are set out in the Statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies (Northern Ireland) Order 1986. We also report to you whether in our opinion the information given in the Directors' Report is consistent with the financial statements. In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

**Basis of audit opinion**

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgments made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

**Opinion**

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the company's affairs as at 31 March 2007 and of its profit for the 5 month period then ended;
- the financial statements have been properly prepared in accordance with the Companies (Northern Ireland) Order 1986; and
- the information given in the Directors' Report is consistent with the financial statements.

London

**WOLF BOG WIND FARM LIMITED**  
**DIRECTORS' REPORT**  
**FOR YEAR ENDED 31 OCTOBER 2006**

The directors present their annual report and the audited financial statements for the year ended 31 October 2006.

**Principal activities of the company**

The principal activity of the company is the generation and sale of wind generated electricity, however the company has not yet started generating electricity as the assets are still under construction. The completed wind farm will consist of 10 megawatts operational capacity.

**Business Review**

The company made a loss for the year of £3,666 (2005: £ Nil), which has been carried forward. The directors do not anticipate any significant events beyond their control to have an impact on the trend of earnings in the forthcoming year.

**Dividends**

The directors do not recommend payment of a dividend (2005: £ nil).

**DIRECTORS**

The directors who served during the period were as follows:

M R O'Neill	(appointed 16 November 2005)
W B Hopkins	(appointed 16 November 2005)
A Harns	(appointed 16 November 2005, resigned 19 May 2006)
R I Harvey	(appointed 16 November 2005, resigned 19 May 2006)

The company secretary who served during the period as follows:

L&B Secretarial Limited	(appointed 7 January 2005, resigned 16 November 2005)
D J Hearsh	(appointed 16 November 2005)

**DIRECTORS' INTERESTS**

The directors have no interests in the shares of the company during the year or prior year.

**AUDITORS**

Each of the persons who is a director at the date of approval of this report confirms that:

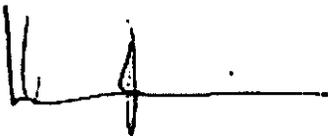

(1) so far as the directors are aware, there is no relevant audit information of which the company's auditors are unaware: and

(2) the directors have taken all the steps that they ought to have taken as a director in order to make themselves aware of any relevant audit information and to establish that the company's auditors are aware of that information.

This confirmation is given and should be interpreted in accordance with the Companies (Northern Ireland) Order 1986.

Deloitte & Touche LLP have expressed their willingness to continue in office and a resolution to reappoint them will be proposed at the forthcoming Annual General Meeting.

Approved by the Board and signed on its behalf by:

W B Hopkins  
Director

22 March 2007

**WOLF BOG WIND FARM LIMITED**  
**DIRECTORS' RESPONSIBILITIES**  
**FOR YEAR ENDED 31 OCTOBER 2006**

The directors are responsible for preparing the Annual Report and the financial statements in accordance with applicable law and regulations.

Northern Ireland company law requires the directors to prepare financial statements for each financial year. Under that law the directors have elected to prepare the financial statements in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law). The financial statements are required by law to give a true and fair view of the state of affairs of the company and of the profit or loss of the company for that period. In preparing these financial statements, the directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether applicable UK Accounting Standards have been followed; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the company will continue in business.

The directors are responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the company and enable them to ensure that the financial statements comply with the Companies (Northern Ireland) Order 1986. They are also responsible for safeguarding the assets of the company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

## WOLF BOG WIND FARM LIMITED

### INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF WOLF BOG WIND FARM LIMITED

We have audited the financial statements of Wolf Bog Wind Farm Limited for year ended 31 October 2006, which comprise the Profit and Loss Account, the Balance Sheet and the related notes 1 to 13. These financial statements have been prepared under the accounting policies set out therein.

This report is made solely to the company's members, as a body, in accordance with the Companies (Northern Ireland) Order 1986. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

#### Respective responsibilities of directors and auditors

The directors' responsibilities for preparing the financial statements in accordance with applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice) are set out in the Statement of Directors' Responsibilities.

Our responsibility is to audit the financial statements in accordance with relevant legal and regulatory requirements and International Standards on Auditing (UK and Ireland).

We report to you our opinion as to whether the financial statements give a true and fair view and are properly prepared in accordance with the Companies (Northern Ireland) Order 1986. We also report to you whether in our opinion the information given in the Directors' Report is consistent with the financial statements.

In addition we report to you if, in our opinion, the company has not kept proper accounting records, if we have not received all the information and explanations we require for our audit, or if information specified by law regarding directors' remuneration and other transactions is not disclosed.

We read the Directors' Report and consider the implications for our report if we become aware of any apparent misstatements within it.

#### Basis of audit opinion

We conducted our audit in accordance with International Standards on Auditing (UK and Ireland) issued by the Auditing Practices Board. An audit includes examination, on a test basis, of evidence relevant to the amounts and disclosures in the financial statements. It also includes an assessment of the significant estimates and judgments made by the directors in the preparation of the financial statements, and of whether the accounting policies are appropriate to the company's circumstances, consistently applied and adequately disclosed.

We planned and performed our audit so as to obtain all the information and explanations which we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or other irregularity or error. In forming our opinion we also evaluated the overall adequacy of the presentation of information in the financial statements.

#### Opinion

In our opinion:

- the financial statements give a true and fair view, in accordance with United Kingdom Generally Accepted Accounting Practice, of the state of the company's affairs as at 31 October 2006 and of its loss for the year then ended;
- the financial statements have been properly prepared in accordance with the Companies (Northern Ireland) Order 1986; and
- the information given in the Directors' Report is consistent with the financial statements.

**WOLF BOG WIND FARM LIMITED**  
**NOTES TO THE ACCOUNTS**  
**FOR THE YEAR ENDED 31 OCTOBER 2006**

**1. Accounting policy**

The principal accounting policies are summarised below. They have all been applied consistently throughout the year.

*(a) Basis of Accounting*

The financial statements are prepared under the historical cost convention and are prepared in accordance with applicable Northern Ireland company law and United Kingdom Generally Accepted Accounting Practice.

*(b) Fixed assets*

Fixed assets are stated in the balance sheet at cost less any provision for impairment in value. Where there is impairment in the value of fixed assets, this is charged through the profit and loss account of the period. Finance costs directly attributable to the construction of tangible fixed assets are not capitalised as part of those assets.

**2. Information regarding directors and employees**

None of the directors received any remuneration during the period or the prior year in respect of their services to the company. The company had no employees during the period or the prior year.

**3. Operating loss**

	2006	2005
	£	£
The operating loss is stated after charging:		
Legal costs .....	20	—
Bank Charges .....	9	—

Audit fees for the current and prior years are to be borne by the Company's parent.

**4. Interest payable and similar charges**

	2006	2005
	£	£
Interest payable to group undertakings .....	3,637	—

**5. Tax on loss on ordinary activities**

*(a) Analysis of charge in the period:*

	2006	2005
	£	£
Current tax:		
UK Corporation tax at 30% (2005: 30%) .....	—	—
Tax on loss on ordinary activities .....	—	—

*(b) Factors affecting the tax charge for the period*

	2006	2005
	£	£

## TABLE OF CONTENTS

<b>I. SUMMARY .....</b>	<b>1</b>
<b>II. RISK FACTORS.....</b>	<b>15</b>
1. RISK FACTORS SPECIFIC TO THE ISSUER OR TO ITS BUSINESS SECTOR. ....	15
2. RISK FACTORS FOR THE SECURITIES BEING OFFERED AND/OR ADMITTED TO TRADING: .....	42
<b>III. INFORMATION ON THE SECURITIES TO BE ISSUED - SHARE SECURITIES NOTE (ANNEX III OF COMMISSION REGULATION (EC) 809/2004 OF 29 APRIL 2004).....</b>	<b>46</b>
1. PERSONS RESPONSIBLE.....	46
1.1. Identification of persons responsible for the Securities Note.....	46
1.2. Statement of persons responsible for the Share Securities Note .....	46
1.3. Representations of the Global and Managing Coordinating Entities .....	46
2. RISK FACTORS.....	47
3. KEY INFORMATION .....	47
3.1. Statement regarding working capital.....	47
3.2. Capitalisation and indebtedness.....	47
3.3. Interest of natural and legal persons involved in the issue/Offer .....	48
3.4. Reasons for the Offer and use of proceeds .....	50
4. INFORMATION CONCERNING THE SECURITIES TO BE OFFERED/ADMITTED TO TRADING.....	51
4.1. A description of the type and the class of the securities being offered and/or admitted to trading, including the ISIN (International Security Identification Number) or other such security identification number .....	51
4.2. Legislation under which the securities have been created. Indication of whether the securities are in registered or bearer form and whether the securities are in certificated or book-entry form. In the latter case, name and address of the entity in charge of making the book entries.....	51
4.3. Currency of the securities issue .....	51
4.4. A description of the rights attached to the securities, including any limitations of those rights, and procedure for the exercise of those rights .....	51

4.5.	In the case of new issues, statement of the resolutions, authorisations and approvals by virtue of which the securities have been and/or will be created or issued.....	54
4.6.	In the case of new issues, the contemplated date of issue of the securities .....	54
4.7.	Description of any restrictions on the free transferability of the securities .....	55
4.8.	An indication of the existence of any mandatory takeover bids and/or squeeze-out and sell-out rules in relation to the securities .....	55
4.9.	As regards the country of origin of the issuer and the country or countries in which the offer is being made or listing will be sought:.....	55
5.	TERMS AND CONDITIONS OF THE OFFER .....	65
5.1.	Conditions, offer statistics, expected timetable and procedure for subscription of the Offer.....	65
5.1.1.	Conditions to which the Offer is subject.....	65
5.1.2.	Total amount of the issue/Offer, distinguishing between securities offered for sale and those offered for subscription; if the amount is not fixed, description of the agreements and the time the definitive amount of the Offer will be announced to the public .....	65
5.1.3.	The time period, including any amendments, during which the Offer will be open and description of the application process.....	66
5.1.4.	An indication of when, and under what circumstances, the Offer may be revoked or suspended and whether revocation can occur after dealing has begun.....	84
5.1.5.	Description of the possibility to reduce subscriptions and the manner for refunding excess amount paid by applicants .....	88
5.1.6.	Details of the minimum and/or maximum amount of application (whether in number of securities or total amount of the investment).....	88
5.1.7.	Indication of the term within which requests may be withdrawn, provided that investors are allowed to withdraw them.....	91
5.1.8.	Method and time limits for paying for the securities and for delivery thereof .....	91
5.1.9.	A full description of the manner and date in which results of the Offer are to be made public.....	94
5.1.10.	The procedure for the exercise of any right of pre-emption, the negotiability of subscription rights and the treatment of subscription rights not exercised .....	94
5.2.	Plan of distribution and allotment .....	94
5.2.1.	The various categories of potential investors to which the securities are offered. If the offer is made simultaneously on the markets of two or more countries and a tranche for specific countries has been or is to be reserved, indicate the tranche.....	94

5.2.2	To the extent known to the issuer, an indication of whether major shareholders or members of the issuer's administrative, management or supervisory bodies intend to subscribe in the Offer, or whether any person intends to subscribe more than five percent of the Offer .....	97
5.2.3	Pre-allotment disclosure.....	97
5.2.4	Process for notification to applicants of the amount allotted and indication whether dealing may begin before notification is made..	112
5.2.5.	Over-allotment and green shoe .....	112
5.3	Prices .....	113
5.3.1.	An indication of the price at which the securities will be offered. When the price is not known or there is no established and/or liquid market for the securities, indicate the method for determination of the price of the Offer, including who has set the criteria or is formally responsible for its determination. Indication of the amount of any expenses and taxes specifically charged to the subscriber or purchaser.....	113
5.3.2.	Process for disclosure of the offer price.....	115
5.3.3.	If the issuer's equity holders have pre-emptive acquisition rights and such rights are restricted or withdrawn, indication of the basis for the issue price if the issue is for cash, together with the reasons for and beneficiaries of such restriction or withdrawal.....	115
5.3.4.	Where there is or could be a material disparity between the Public Offer price and the effective cash cost to members of the administrative, management or supervisory bodies, or senior management or related persons, of securities acquired by them in transactions during the past year, or which they have the right to acquire, include a comparison of the public contribution in the proposed Public Offer and the effective cash contributions of such persons .....	115
5.4.	Placing and underwriting.....	115
5.4.1	Name and address of the co-ordinator(s) of the global offer and of single parts of the offer and, to the extent known to the issuer or to the offeror, of the distributors in the various countries where the Offer takes place.....	115
5.4.2	Name and address of any paying agent and the depository agents in each country .....	125
5.4.3	Name and address of the entities agreeing to underwrite the issue on a firm commitment basis, and name and address of the entities agreeing to place the issue without a firm commitment or under "best efforts" arrangements. Indication of the material features of the agreements, including the quotas. Where not all of the issue is underwritten, a statement of the portion not covered. Indication of the overall amount of the underwriting commission and of the placing commission.....	125
5.4.4	When the underwriting agreement has been or will be reached.....	132
6.	ADMISSION TO TRADING AND DEALING ARRANGEMENTS.....	132
6.1	An indication as to whether the securities offered are or will be the object of an application for admission to trading, with a view to their	

	distribution in a regulated market or other equivalent markets with indication of the markets in question. The circumstance must be mentioned, without creating the impression that admission to trading will necessarily be approved. If known, the earliest dates the securities will be admitted to trading must be given .....	132
6.2	All the regulated markets or equivalent markets on which, to the knowledge of the issuer, securities of the same class as the securities to be offered or admitted to trading are already admitted to trading. ....	133
6.3	If simultaneously or almost simultaneously with the creation of the securities for which admission to a regulated market is being sought securities of the same class are subscribed for or placed privately or if securities of other classes are created for public or private placing, give details of the nature of such operations and of the number and characteristics of the securities to which they relate .....	133
6.4	Details of the entities which have a firm commitment to act as intermediaries in secondary trading, providing liquidity through bid and offer orders and description of the main terms of their commitment .....	133
6.5	Stabilisation: where an issuer or a selling shareholder has granted an over-allotment option or it is contemplated that price stabilising activities may be undertaken in connection with the offer .....	133
6.5.1	The fact that stabilisation may be undertaken, that there is no guarantee that it will be undertaken, and that it may be stopped at any time;.....	134
6.5.2	Beginning and end of the term during which stabilisation may occur.....	134
6.5.3	Identity of the entity directing the stabilisation for each relevant jurisdiction, unless this is not known at the time of publication .....	134
6.5.4	The fact that the stabilisation transactions may result in a market price higher than would otherwise prevail .....	135
7	SELLING SECURITIES HOLDERS.....	135
7.1	Name and business address of the person or entity offering to sell the securities, nature of any position or other significant relationship the sellers have had within the last three years with the issuer or any of its predecessors or affiliates .....	135
7.2	Number and class of the securities being offered by each of the holders selling securities.....	135
7.3	Lock-up agreements:.....	135
8	EXPENSE OF THE ISSUE/OFFER.....	136
8.1	The total net proceeds and estimate of the total expenses of the issue/offer .....	136
9	DILUTION.....	137
9.1	The amount and percentage of immediate dilution resulting from the Offer .....	137

9.2	In the case of a subscription offer to existing equity holders, the amount and percentage of immediate dilution if they do not subscribe to the new Offer.....	137
10	ADDITIONAL INFORMATION.....	138
10.1	If advisors connected with an issue are mentioned in the securities note, a statement of the capacity in which the advisors have acted.....	138
10.2	An indication of other information in the securities note which has been audited or reviewed by statutory auditors and where auditors have produced a report. Reproduction of the report or, with permission of the competent authority, a summary of the report.....	138
10.3	Where a statement or report attributed to a person as an expert is included in the Securities Note, provide such persons' name, business address, qualifications and material interest if any in the issuer. If the report has been produced at the issuer's request a statement that such statement or report is included, and the form and context in which it is included, with the consent of the person who has authorised the contents of that part of the Securities Note.....	138
10.4	Where information has been sourced from a third party, provide a confirmation that this information has been accurately reproduced and that as far as the issuer is aware and is able to ascertain from information published by that third party, no facts have been omitted which would render the reproduced information inaccurate or misleading. In addition, identify the source(s) of the information .....	138
<b>IV)</b>	<b>INFORMATION ON THE ISSUER (ANNEX I OF COMMISSION REGULATION (EC) 809/2004 OF 29 APRIL 2004).....</b>	<b>139</b>
1.	PERSONS RESPONSIBLE.....	139
1.1.	Identification of the persons responsible for the share registration document .....	139
1.2.	Statement of the persons responsible for the share registration document .....	139
2.	STATUTORY AUDITORS.....	139
2.1.	Names and addresses of the issuer's auditors for the period covered by the historical financial information (together with their membership in a professional body).....	139
2.2.	If auditors have resigned, been removed or not been re-appointed during the period covered by the historical financial information, indicate details if material.....	139
3.	SELECTED FINANCIAL INFORMATION .....	140
3.1.	Selected historical financial information regarding the issuer, presented for each financial year for the period covered by the historical financial information, and any subsequent interim financial period, in the same currency as the financial information.....	140

3.2.	If selected financial information for interim periods is provided, comparative data from the same period in the prior financial year must also be provided, except that the requirement for comparative balance sheet information is satisfied by presenting the year end balance sheet information .....	143
4.	RISK FACTORS.....	145
5.	INFORMATION ABOUT THE ISSUER .....	146
5.1.	History and development of the issuer .....	146
5.1.1.	Legal and commercial name of the issuer .....	146
5.1.2.	Place of registration of the issuer and registration number.....	146
5.1.3.	Date of incorporation and the length of life of the issuer, except where indefinite.....	146
5.1.4.	Domicile and legal form of the issuer, the legislation under which the issuer operates, its country of incorporation, and the address and telephone number of its registered office (or principal place of business if different from its registered office).....	146
5.1.5.	Important events in the development of the issuer's business .....	184
5.2.	Investments .....	186
5.2.1.	Description (including amounts) of the issuer's principal investments in each fiscal year for the period covered by the historical financial information up to the date of the registration document.....	186
5.2.2.	A description of the issuer's principal investments that are in progress, including the geographic distribution of these investments (home and abroad) and the method of financing (internal or external).....	188
5.2.3.	Information concerning the issuer's principal future investments on which its management bodies have already made firm commitments.....	189
6.	DESCRIPTION OF THE BUSINESS.....	193
6.1.	Principal activities .....	193
6.1.1.	A description of, and key factors relating to, the nature of the issuer's operations and its principal activities, stating the main categories of products sold and/or services performed for each financial year for the period covered by the historical financial information.....	198
6.1.2.	Indication of all significant new products and/or services that have been introduced, and the extent that the development of new products or services has been publicly disclosed; give the development stage.....	235
6.2.	Principal Markets.....	235
6.3.	If the information given pursuant to items 6.1 and 6.2 has been influenced by exceptional factors, give details.....	261

6.4	If material to the issuer's business or profitability, give summary information regarding the extent to which the issuer is dependent on patents or licences, industrial, commercial or financial contracts or new manufacturing processes.....	261
6.5	The basis for any statements made by the issuer regarding its competitive position .....	262
7	ORGANISATIONAL STRUCTURE.....	262
7.1	If the issuer is part of a group, a brief description of the group and the issuer's position within the group .....	262
7.2	A list of the issuer's significant subsidiaries, including name, country of incorporation or residence, proportion of ownership interest and, if different, proportion of voting power held. ....	266
8	PROPERTY, PLANT AND EQUIPMENT.....	273
8.1	Information regarding any existing or planned material tangible fixed assets, including leased properties, and any major encumbrances thereon .....	273
8.2	Description of any environmental issues that may affect the issuer's utilisation of the tangible fixed assets.....	280
9	OPERATING AND FINANCIAL ANALYSIS.....	281
9.1	Financial position .....	281
9.2	Operating results.....	281
9.2.1.	Information regarding significant factors, including unusual or infrequent events or new developments, materially affecting the issuer's income from operations, indicating the extent to which income was so affected .....	319
9.2.2.	Where the financial statements disclose material changes in net sales or revenues, provide a narrative discussion of the reasons for such changes.....	319
9.2.3.	Information regarding any governmental, economic, fiscal, monetary or political policies or factors that have materially affected, or could materially affect, directly or indirectly, the issuer's operations .....	319
9.3	Financial information related to the segmentation of the pro forma Profit and Loss Account included in the pro forma financial statements for December 2006 and September 2007, in line with what is stipulated in section IV.20.2 of the present Prospectus .....	320
10	FINANCIAL RESOURCES.....	324
10.1	Information regarding the financial resources of the issuer (short and long term) .....	324
10.2	An explanation of the sources and amounts of and a narrative description of the issuer's cash flows.....	335

10.3	Information regarding the issuer's loan conditions and financing structure .....	336
10.4	Information regarding any restrictions on the use of capital resources that have materially affected, or could materially affect, directly or indirectly, the issuer's operations .....	336
10.5	Information regarding the anticipated sources of funds needed to fulfil commitments referred to in items 5.2.3 and 8.1. ....	336
11.	RESEARCH AND DEVELOPMENT, PATENTS AND LICENSES.....	336
12	TREND INFORMATION .....	340
12.1	The most significant recent trends in production, sales and inventory, and costs and selling prices since the end of the last financial year to the date of the registration document .....	340
12.2	Information on any known trends, uncertainties, demands, commitments or events that are reasonably likely to have a material effect on the issuer's prospects for at least the current financial year.....	340
13	PROFIT FORECASTS OR ESTIMATES.....	340
14	ADMINISTRATIVE, MANAGEMENT, AND SUPERVISORY BODIES AND SENIOR MANAGEMENT.....	340
14.1	Names, business addresses and functions in the issuer of the following persons and an indication of the principal activities performed by them outside that issuer where these are significant with respect to that issuer .....	340
14.2	Administrative, management, and supervisory bodies and senior management conflicts of interests .....	359
15	REMUNERATION AND BENEFITS.....	360
15.1	Amount of remuneration paid (including any contingent or deferred compensation), and benefits in kind granted to such persons by the issuer and its subsidiaries for services in all capacities to the issuer and its subsidiaries by any person .....	360
16	BOARD PRACTICES .....	364
16.1	Date of expiration of the current term of office, if applicable, and the period during which the members of the Board of Directors of the Issuer have served in that office .....	364
16.2	Information about contracts of members of administration, management or supervision bodies with the issuer or any of its subsidiaries providing for benefits upon termination of services, or the corresponding negative statement.....	365
16.3	Information regarding the audit committee and the compensation committee of the issuer, including names of the members of the committees and a summary of the internal rules .....	365

16.4	Statement as to whether the issuer complies with the corporate governance system or systems of its country of incorporation. In the event that the issuer does not comply with such a regime, a statement to that effect together with an explanation regarding why the issuer does not comply with such regime .....	371
17	EMPLOYEES .....	374
17.1	Either the number of employees at the end of the period or the average for each financial year for the period covered by the historical financial information up to the date of the registration document (and changes in such numbers, if material) and, if possible and material, a breakdown of persons employed by main category of activity and geographic location. If the issuer employs a significant number of temporary workers, include information regarding the number of temporary workers by average term for the most recent fiscal year.....	374
17.2	Shares and share purchase options .....	376
17.3	Description of any arrangements for involving the employees in the capital of the issuer .....	376
18.	MAJOR SHAREHOLDERS.....	380
18.1.	In so far as is known to the issuer, the name of any person other than a member of the administrative, management or supervisory bodies who, directly or indirectly, has an interest in the issuer's capital or voting rights which is notifiable under the issuer's national law, together with the amount of each such person's interest or, if there are no such persons, an appropriate negative statement.....	380
18.2	Whether the issuer's major shareholders have different voting rights, or an appropriate negative statement.....	380
18.3	To the extent known to the issuer, state whether the issuer is directly or indirectly owned or controlled and by whom and describe the nature of such control and describe the measures in place to ensure that such control is not abused.....	380
18.4	Description of any agreement known to the issuer, the application of which on a later date could result in a change in control of the issuer .....	381
19	RELATED PARTY TRANSACTIONS.....	381
19.1	Reorganisation of the IBERDROLA RENEWABLES Group .....	381

20.9.	Significant change in the issuer's financial or trading position.....	468
21	ADDITIONAL INFORMATION.....	468
21.1.	Capital.....	468
21.1.1	Amount of issued capital, for each class of capital:.....	468
21.1.2	If there are shares not representing capital, state the number and main characteristics of such shares .....	469
21.1.3	The number, book value and face value of shares in the issuer held by or on behalf of the issuer itself or by subsidiaries of the issuer .....	469
21.1.4	Amount of all convertible securities, exchangeable securities or securities subject to warrants, indicating the conditions and procedures governing conversion, exchange or subscription.....	469
21.1.5	Information about and terms of any acquisition rights and or obligations over authorised but unissued capital or an undertaking to increase the capital .....	469
21.1.6	Information on any share capital of any company belonging to the Group that is under option or on which any conditional or unconditional agreement has been reached to submit it to an option and details of any such option, including the persons in whose favour such options exist.....	469

21.1.7	A history of share capital, highlighting information about any changes, for the period covered by the historical financial information.....	472
21.2	Memorandum and Articles of Association.....	473
21.2.1	Description of the corporate purposes of the issuer and where the bylaws and formation document may be found .....	473
21.2.2	Brief description of any provision of the clauses of the bylaws or internal regulations of the Issuer regarding the members of the administration, management and supervision bodies.....	474
21.2.3	A description of the rights, preferences and restrictions attaching to each class of the existing shares.....	477
21.2.4	A description of what action is necessary to change the rights of holders of the shares, indicating where the conditions are more significant than is required by law .....	478
21.2.5	A description of the conditions governing the manner in which annual general meetings and extraordinary general meetings of shareholders are called, including the conditions for attendance.....	478
21.2.6	A brief description of any provision of the issuer's articles of association, statutes, charter or bylaws that would have an effect of delaying, deferring or preventing a change in control of the issuer .....	479
21.2.7	Indication of any provision of the bylaws or internal regulations, if any, governing the threshold of participation above which a shareholder's interest must be disclosed.....	479
21.2.8	A description of the conditions imposed by the memorandum and articles of association, statutes, charter or bylaw governing changes in the capital, where such conditions are more stringent than is required by law .....	480
22	RELEVANT CONTRACTS.....	480
23	THIRD PARTY INFORMATION AND STATEMENTS BY EXPERTS AND DECLARATIONS OF ANY INTEREST.....	480
23.1	When a statement or report attributed to a person as an expert is included in the registration document, provide the name of that person, his or her business address, his or her qualifications and, if applicable, any significant interest he/she has in the issuer. If the report has been produced at the issuer's request a statement that such statement or report is included, and the form and context in which it is included, with the consent of the person who has authorised the contents of that part of the registration document .....	480
23.2.	Where information has been sourced from a third party, provide a confirmation that this information has been accurately reproduced and that as far as the issuer is aware and is able to ascertain from information published by that third party, no facts have been omitted which would render the reproduced information inaccurate or misleading. In addition, identify the source(s) of the information .....	480
24.	DOCUMENTS ON DISPLAY .....	480
25.	INFORMATION ON HOLDINGS .....	481

## **I. SUMMARY**

This summary describes the main characteristics and essential risks associated with the issuer and the securities that are the object of this informative prospectus (the "Prospectus") which should, among others, be considered for a correct understanding the offering referred to here.

- i. This Summary must be read as an introduction to the Prospectus.
- ii. Any decision to invest in securities must be based on the investor's consideration of the Prospectus as a whole.
- iii. No civil liability may be claimed of any person solely on the basis of the Summary unless it is misleading, inaccurate or inconsistent when read together with the other parts of the Prospectus.

Nevertheless, it is hereby expressly stated that:

This Summary should be read as an introduction to the Prospectus.

## **1. DESCRIPTION OF THE OPERATION AND SCHEDULE**

The transaction consists of a Public Offer for Subscription ("the Offer") and admission to trading of the shares of IBERDROLA RENOVABLES, S.A. Unipersonal (hereinafter "IBERDROLA RENOVABLES", "the Company" or "the Issuer"). The total nominal sum, not including shares corresponding to the green shoe option is 384,005,900 euros i.e. 768,011,800 new-issue shares with a nominal value of 0.50 euros per share.

The amount of the Offer may be increased if the Global Co-ordinators exercise the green-shoe option which Iberdrola Generación, S.A. (Unipersonal) plans to grant these Institutions on 76,801,180 new shares of IBERDROLA RENOVABLES, which together have a nominal value of 38,400,590 euros. In this case the total nominal value of the Offer may be a maximum of 422,406,490 euros, made up of 844,812,980 shares in total.

The number of shares initially offered in the framework of the Offer represents 18.18% of the share capital of IBERDROLA RENOVABLES, assuming all the capital increase represented by the Offering is subscribed. It may be extended up to 20% of the share capital of the Company if the green shoe option referred to above is exercised in its entirety.

The percentage of share capital that IBERDROLA RENOVABLES is to issue in virtue of this Offer has been set at 20% of the share capital of the Company resulting from the Offer, with the aim of complying with the requirements of the US tax law to preserve the tax neutrality of the Restructuring Operation of the Company's US subsidiaries (described in Section IV.19.1 below).

In the case of the green shoe purchase option not being exercised, Iberdrola Generación, S.A. (Unipersonal) shall study the most appropriate formula to increase the number of shares in the hands of shareholders outside the Iberdrola Group through the sale by Iberdrola Generación S.A. (Unipersonal) of shares in IBERDROLA RENOVABLES of

its own property in the number needed to make this percentage reach 20% of the share capital of IBERDROLA RENOVABLES (not including in this case any possible treasury stock linked to the covering of the systems of share incentives), with the aim of giving greater dissemination to the shares of IBERDROLA RENOVABLES and increasing their liquidity. This initiative should in any case be executed within the year following the date of admission of the shares in IBERDROLA RENOVABLES to trading, although if the market conditions permit Iberdrola Generación S.A. (Unipersonal) to obtain a price that is not inferior to the Offer Price, and as long as the placing can be carried out in an orderly and timely fashion, the sale of shares in IBERDROLA RENOVABLES should take place when such conditions are in place, and six months after the date of admission to trading.

The Indicative and Non-Binding Price Range for the Company's shares covered in this Offer has been established at between 5.3 and 7.0 euros per share, which jeans allocating to the Company a stock Exchange capitalisation for all its shares between 17,910 and 23,655 million euros, approximately, prior to the rights issue carried out in the Inicial Public Offering, and between 22,388 and 29,568 million euros, approximately, after that rights issue has been carried out. Taking as a basis the pro forma financial statements for the year closing 31 December 2006, drawn up in line with IFIS (Internacional Financial Information Standards), the stock exchange capitalisation implies PER of between 70.0x and 92.4x prior to the rights issue carried out in the Inicial Public Offering and PER of between 87.5x and 115.5x after the rights issue has taken place. As indicated, the Indicative and Non-Binding Price Range and, consequently, the Offer Price could fall outside those ranges.

The Applicants for shares in the Company holding shares or *Crest Depositary Interests* in Iberdrola, S.A. at 20 November 2007 will enjoy a preferential allocation regime in the terms described in section 5.2.3.d) of the Share Note in this Prospectus.

The schedule initially planned is as follows:

Action	Date
Signature of the Protocol of Intent to Underwrite and Commitment to Place the Retail and Employee Tranche and the Spanish Tranche for Qualified Investors	21 November 2007
Registration of the Informative Prospectus with the CNMV	22 November 2007
Start of book-building period Subscription proposals	
Start of period for formulating subscription orders	23 November 2007
Start of period for revoking subscription orders	
End of period for formulating subscription orders	
Determination of maximum retail price	3 December 2007
Signature of contract for underwriting and placement of retail and employee tranche	
Public Offer for Subscription period: Start of period for binding subscription	4 December 2007

Action	Date
applications	
End of period for binding subscription applications	7 December 2007
End of period for revoking subscription orders	
End of book-building period	10 December 2007
Final allotment of shares to the retail and employee tranche	Until 11 December 2007
Prorating	
Determination of retail price	
Determination of the price of the Spanish tranche for investors qualified for the Offer	
Selection of subscription proposals	11 December 2007
Signature of contract for underwriting the Spanish tranche for qualified investors	
Start of the confirmation period for subscription proposals	
Issue of public deed of execution and closure of the share capital increase, registration in the Company Register of Madrid, and the deposit of authorised copies of the deed in Iberclear, CNMV and the Bolsa de Madrid stock exchange.	12 December 2007
Allotment of shares to investors ("Date of the Operation")	
End of the confirmation period for subscription proposals	
Allotment of shares to investors and Date of the Operation	
Admission to official trading	13 December 2007
Settlement of the Offer ("Date of Settlement")	17 December 2007
End of stabilisation period	12 January 2008

It is planned that the income obtained through the share capital increase related to the Public Offer for Subscription will initially be used to reduce the Company's debt with Iberdrola, S.A., and its ultimate aim is to finance its expansion plan. At the same time, the Company considers that the Public Offer for Subscription will help to: (i) increase the shareholder base of the Company. This will give the shareholder spread needed for admission to official trading in the Company's shares in the Madrid, Barcelona, Bilbao and Valencia stock exchanges, and its integration in the Stock-Market Interconnection System SIBE (Continuous Market); (ii) facilitate the Company's access to capital markets (including debt instruments), which could eventually help it to obtain finance in the future; and (iii) boost the prestige, transparency and brand image of the Company as a result of its status as a listed company.

The Offer is made in Spain, where the Retail and Employee Tranche and the Spanish Tranche for Qualified Investors are being placed, and the rest of the world, where the International Tranche is being placed.

Tranche	No. of shares	Initial % of the Offering
Retail and Employee	153,602,360	20.00 %
Spanish for Qualified Investors	115,201,770	15.00 %
International	499,207,670	65.00 %

Nevertheless, the initial allocation between tranches of the Offer (excluding the green shoe option) established in the table above could be redistributed by the Company, following a non-binding consultation with the Global Co-ordinators, under the conditions established in this Prospectus.

The global co-ordination of the Offer will be carried out by BBVA, Credit Suisse, JPMorgan, Merrill Lynch and Morgan Stanley. BBVA and Santander Investment are the Lead Managers of the Retail and Employee Tranche and the Spanish Tranche for Qualified Investors, and Credit Suisse, JPMorgan, Merrill Lynch and Morgan Stanley are the Lead Managers of the International Tranche.

## 2. DESCRIPTION OF THE ISSUER

IBERDROLA RENOVABLES, a wholly-owned subsidiary of Iberdrola, S.A., is a company created in 2001. Its main business is the promotion, construction, management and operation of power-generating farms or stations using renewable energy sources, as well as the sale of electrical power produced in them. The Company's activity is currently focused on land-based wind energy and micro-hydraulic energy, and to a lesser extent, photovoltaic solar energy. In addition, the Company is beginning to develop other technologies such as sea-based wind energy, thermal solar energy, biomass energy and sea wave energy. In the United States of America, the Company is also developing the storage and sale of energy and other sources of energy, as well as the generation of thermal energy.

As of 30 September 2007 the Company had 7,342 MW of installed renewable power, in pro forma terms, of which 7,000 MW were wind energy (including 606 MW owned by a third party and managed under a energy sale contract), 342 MW of micro-hydraulic energy, and 0.3 MW of photovoltaic solar energy. In addition, on the same date wind power represented, in pro-forma terms, 81.3% and 92.5% of the Company's gross margin and EBITDA respectively. The Company has a portfolio of renewable projects of 41,266 MW.

In terms of the Company's non-renewable energy business in the United States, on 30 September 2007 this represented 15.6% and 4.2% of the gross margin and EBITDA respectively in pro-forma terms.

The Company's activities are basically focused on Spain, the United States and the U.K. It has a presence in a further 16 countries through operational activities, a portfolio of projects and/or local offices, particularly in Greece, Poland and France.

### 3. MOST IMPORTANT FINANCIAL FIGURES

- **Main figures from the consolidated balance sheet as of 30 September 2007 (subject to limited revision) and 31 December 2006 (audited), 2005 (audited) and 2004 (unaudited).**

ASSETS	30/9/2007	31/12/2006	31/12/2005	31/12/2004
(thousands of euros)				
<b>NON-CURRENT ASSETS</b>

(4) Sum of the Financial Debt with credit institutions and the Financial Debt of companies in the Group, minus Cash and equivalent and derivatives.

(5) Quotient between the Financial Debt with credit institutions and the Financial Debt with companies in the Group, and the Total Liabilities and Net Worth.

(6) Quotient between the Financial Debt with companies in the Group and the Total Liabilities and Net Worth.

(7) Quotient between the Financial Debt with credit institutions and the Financial Debt with companies in the Group, minus cash and equivalent and the Total Liabilities and Net Worth and derivatives.

## **4. RISK FACTORS**

### **4.1. RISK FACTORS SPECIFIC TO THE ISSUER OR ITS SECTOR**

#### **a) Risks related to the sector of renewable energies**

##### **1. Risks related to meteorological conditions**

The main activity of the Company is the production of electrical power using renewable sources of energy, mainly wind. The Company cannot guarantee that wind conditions correspond to the hypotheses formulated, and thus cannot guarantee compliance with production levels initially forecast for its wind farms.

##### **2. Risks derived from national and international policies supporting renewable energy sources**

Support for renewable energy products from institutions has been significant over recent years. The European Union and the United States of America (markets in which the Company concentrates nearly all of its generation facilities) reaffirm from time to time their wish to maintain and reinforce this support. However, it cannot be ruled out that in the future these policies and the regulatory framework supporting the business may be changed.

##### **3. Development of activity in regulated markets**

The activity developed by the Company is carried out in regulated markets in the countries in which it operates. More restrictive or unfavourable regulations could result in changes in operating conditions which could in turn increase capital or operating costs.

##### **4. Availability of sites and issue of permits and administrative authorisations**

###### **(i) Limited availability of sites**

Wind farms require particular wind conditions which are found in determined geographical areas. They also need connection with the electricity transmission and distribution network, which limits the number of suitable sites.

###### **(ii) Growing competition to receive legal permission to occupy the sites**

An increasing number of operators, both in the wind energy sector and in that of other renewable energies, have the capacity to obtain sufficient legal permission to occupy sites.

###### **(iii) Dependency on obtaining permits and administrative authorisations**

The Company cannot guarantee that the administrative authorisations to operate in the sector will be granted or renewed when the request to do so is made. In Spain, the Company lacks municipal licences for work or activity, or the documentation proving that it is to be granted, for wind facilities with installed power of 260 MW and micro-hydraulic facilities with installed power of 206 MW.

**(iv) Other restrictions**

In addition to restrictions of fact, such as the lack of qualified staff, the Company is faced with a variety of restrictions of legal origin, among them easements or areas and sites protected by environmental legislation.

**5. Dependence on electricity transmission services**

The Company depends on the transmission and distribution networks managed by third parties that connect their generation assets with customers.

**6. Price volatility in the electricity market**

Pricing varies depending on many different factors, among them the regulations in the country in which the Company operates and the cost of raw materials.

**7. Dependence on factors beyond the control of the Company**

Some factors over which the Company has little control, such as weather conditions, changes in prices and seasonal demand for electricity, may provoke fluctuations in the Company's earnings.

**8. Risks related to technological changes**

In order to maintain and increase its competitiveness, the Company should adapt to technological advances that improve renewable energy production systems.

**9. A capital-intensive business**

Factors such as the increase in costs of components and construction work on facilities may affect the return on the major investment.

**10. Availability of technical components**

The demand for technical components for wind energy production facilities at present exceeds the suppliers' production capacity. This could affect the Company's investment plan.

**11. Risks derived from public opposition**

Renewable energy projects require compliance with a number of requirements related to environmental impact and the granting of administrative authorisations. Even so, it cannot be ruled out that groups or associations oppose the projects and make it difficult to execute them.

**b) Risks related to the sector of non-renewable energies**

### **1. High level of regulation**

The gas and thermal generation activities of the Company in the United States are highly regulated. Non-compliance with the regulations affecting these activities could result in sanctions or even the revocation of the licences needed to operate in these sectors.

### **2. Prices in the gas storage business**

The business of gas storage depends on the differentials between the current and future prices of gas being maintained, as well as the differentials between the prices in the different geographical markets in the U.S.

### **3. Dependence on numerous restrictions**

The Company has to face a number of restrictive factors, such as the small number of suitable sites, the need for a legal deed to occupy them, and the authorisations needed to install the gas storage tanks.

### **4. Dependence on transport services**

The Company may have difficulties in selling its products and providing its services if the contracts concluded with third parties managing the transport expire or are terminated.

### **5. Risks derived from public opposition**

Public opinion opposed to the Company's projects may make it difficult to obtain the administrative authorisations needed to execute the projects.

## **c) Risks associated with the integration of the companies in the Scottish Power group**

### **1. Risks related to the expansion of operations as a result of the integration of the companies in the Scottish Power group.**

The Company has recently restructured its Group integrating the companies in the Scottish Power group, which is present in the U.K. and U.S. Although the Company considers that the expansion and entry into new countries should contribute to its growth and future profitability, success cannot be guaranteed either in the countries into which it has entered or in those in which it already had a presence.

### **2. Risks associated with the rapid expansion of the business**

The capacity of the Company to properly manage the growth of the business will depend on its ability to administer both the operational and financial management resources and the integration process.

### **3. Risks related to determined tax proceedings pending in the U.S.**

The Company is involved in administrative and legal action for tax liabilities, and it has undertaken to third parties acquiring some of its subsidiaries that they will be compensated for any tax liabilities that may exist in these companies. Iberdrola, S.A. has undertaken to compensate the Company for any claim for damages which may arise in relation to these tax liabilities.

**d) Risks related to the Company's business activities**

**1. Concentration of business in certain countries**

The concentration of the business in countries in which the Company carries out most of its business (Spain, the United States and the U.K.) exposes it to any significant changes in the regulatory framework and any changes in circumstances in the market in these countries.

**2. Assumptions and hypotheses used in classifying the project portfolio**

The Company has segmented its portfolio project into a number of categories (practically sure, probable and potential), depending on the maturity and probability of the success of the business. However, the real results may in the future be different from those forecast.

**3. Dependence on qualified suppliers**

Worldwide demand for wind generators exceeds the production capacity of the small number of suppliers that exist at present. However, the Company has commitments with suppliers for approximately two-thirds of its projected needs for wind generation until 2010.

**4. Risks related to the asset exploitation model**

The computer systems controlling the exploitation of the assets are exposed to risks which may affect the provision of an efficient and uninterrupted service.

**5. Fluctuation in interest rates and currencies.**

The Company has historically generated most of its earnings in euros. Operations in dollars and sterling expose the Company to risk from fluctuating currency and interest rates. Although agreements have been concluded for cover of these risks, this cover may not be effective or losses may be greater than the risks covered.

**6. Risks related to the international character of the Company's business.**

The Company plans for its activity to expand globally. The international character of the Company's activities involves various risks such as changes in the law, the lack of favourable treaties or social, political and geographical differences.

**7. Use of derivatives**

The Company uses and in the future aims to continue using financial derivative contracts and financial instruments to cover itself and anticipate market risks and

price volatility in raw materials, as well as possible errors in calculating this coverage.

#### **8. Risks related to insurance**

The Company has subscribed insurance policies to cover risks to which it is exposed in its activity. However, most of the insurance policies do not cover losses resulting from force majeure, such as natural disasters, terrorist attacks and sabotage.

#### **9. Financial backing by IBERDROLA RENOVABLES for the Group's companies in the United States**

The Company often guarantees obligations undertaken by its subsidiaries in their activities in the United States. At the same time, the Company demands letters of credit, guarantees or cash from third parties to cover counterparty risks.

#### **10. Risks related to non-payment by customers and the execution of certain contractual provisions.**

The non-compliance with obligations assumed by customers in the energy sale agreements with the Company may have an adverse effect on the business.

#### **11. Risks related to damage to the natural environment and the general public**

Some aspects of the Company's activities involve risks which could result in damage to the environment, health, employees or third parties, who would have to be compensated. Non-compliance with the relevant regulations could involve sanctions.

#### **12. Special regulatory supervision as a result of the activities of Iberdrola, S.A.**

If the acquisition of Energy East is completed, any transaction with this company will depend on additional regulatory controls which may restrict our capacity to operate in energy markets.

#### **13. Dependence on senior management and key employees**

The future development of the Company's activity depends, among other factors, on its capacity to retain and motivate key employees and attract new qualified employees.

#### **14. Risks related to the shareholder structure of the Company**

After the shares of the Company are admitted to trading, Iberdrola S.A. will retain control, allowing it to decide any questions requiring the approval of the general shareholders' meeting. In accordance with the recommendations on corporate governance, Iberdrola S.A. and IBERDROLA RENOVABLES have concluded a framework contract covering a number of subjects including the regulation of the spheres of activity of each company and establishing mechanisms to prevent conflicts of interest.

## **15. Risks derived from intra-group operations.**

Iberdrola S.A. and IBERDROLA RENOVABLES and their respective subsidiaries maintain various industrial, commercial and financial relations. The framework contract establishes guidelines to ensure that these operations are carried out in both equitable and market conditions, including the need for approval by the IBERDROLA RENOVABLES Board of Directors, in some circumstances following a report from the Committee on Related-Party Transactions.

## **16. Framework contract with Iberdrola S.A.**

Iberdrola, S.A. reserves the first option for itself in the development, exploitation and sale of assets or companies in activities related to the business of natural gas. Iberdrola S.A. therefore has a preferential right to evaluate and act in relation to the business opportunities presented if it exercises its preferential position. Nevertheless, Iberdrola, S.A. undertakes to respect the business plan of the current gas activities of IBERDROLA RENOVABLES in the United States. In addition, IBERDROLA RENOVABLES has stated that it does not provide, and has no intention of providing in the future, any services to third parties related to engineering, consultancy and construction of civil works for electrical power generating facilities, which are at present developed within the Group by Iberdrola Ingeniería y Construcción, S.A.

## **17. Risks related to claims and legal and administrative action**

The risks associated with action undertaken against the Company which has not been resolved, in connection with its activities, cannot be assessed as most of these actions are for undetermined sums. Nevertheless, the sum involved in all the court actions underway of which the Company has knowledge is approximately 592.6 million euros, of which 490.75 million euros are covered by the indemnity agreement concluded by the Company with Iberdrola, S.A.

## **18. Obligations to dismantle facilities and withdraw turbines**

The Company assumes the costs represented by dismantling energy facilities in compliance with the legislation of determined countries. Nevertheless, the Company considers that these costs may be covered by the residual values of the dismantled equipment.

### **e) Risks related to the Financial Information included in the Prospectus**

#### **1. Difficulty in comparing financial statements**

As a result of the recent integration into the Company of the companies in the Scottish Power group, the historical financial information available for assessing the company and its forecasts for the future is limited. The financial information in the Prospectus may not represent the operating results, financial situation and cash flows of the Company.

#### **2. Unaudited pro-forma information**

The unaudited pro-forma financial information presented in this Prospectus has been provided as if the integration mentioned in the previous paragraph had taken place on 1 January 2006 and 1 January 2007 respectively. The unaudited pro-forma financial information should not be taken as an indicator of future results of the IBERDROLA RENOVABLES Group.

### **3. Unaudited financial statements**

The Company did not produce or approve yearly accounts under IFRS in 2004. The yearly accounts mentioned above were produced under IFRS for 2005 and are unaudited.

The consolidated financial statements of IBERDROLA RENOVABLES as of 30 September 2007 and 2006 (drawn up for purposes of comparison) are also unaudited.

The arithmetical aggregation of the results of the ten British companies included in the scope of consolidation of IBERDROLA RENOVABLES cannot be considered to be an accounting consolidation.

### **4. The absence of half-yearly intermediate financial statements for United States and British companies incorporated into the scope of consolidation of IBERDROLA RENOVABLES under the Restructuring Operation**

The US companies and the ten British companies incorporated into the scope of consolidation of the IBERDROLA RENOVABLES group as a result of the Restructuring Operation have not issued intermediate financial statements for the six-month period between 31 March and 30 September 2007, nor for the equivalent period the previous year, although the Prospectus does include intermediate financial information on these companies for this period to the extent that it has been used to draw up the pro-forma financial information at that date.

## **2. RISK FACTORS FOR THE SECURITIES OFFERED AND/OR ADMITTED TO TRADING**

### **a) Risk associated with later sale of shares**

The sale of a substantial number of shares in the Company on the market after the Public Offer for Subscription is made, or the appearance that this sale could take place, could negatively affect the market price of the Company's shares.

Subject to certain exceptions described in section III.7.3 of this Prospectus, the Company, Iberdrola, S.A. and Iberdrola Generación, S.A. (Unipersonal) have undertaken with the Global Coordinators not to agree the issue, nor to issue, offer, pledge, sell, enter contract to sell, pledge or in any other manner whatsoever dispose of or transfer, whether directly or indirectly, shares in the Company or securities convertible into, exercisable as, or exchangeable for shares in the Company, warrants or whatsoever other instruments which could provide a right to subscribe to or acquire such shares in the Company until one hundred and eighty days have elapsed from the date the shares of the Company are admitted to trading on the Spanish Stock Exchanges, unless they are explicitly authorised to

do so previously in writing by the Global Coordinators, which may not deny such authorisation without due justification.

**b) Lack of a previous market for trading in the shares.**

The shares of the Company have not been the object of trading in any other regulated market before their admission to trading, so that the price of the shares in the Offer set by the Company and the Global Co-ordinators, may not faithfully reflect the market price of the shares after the Offer.

**c) Risk associated with volatility in the share price.**

The price and volume of trading in the shares once they are admitted to trading may be volatile and affected by factors related to the Company or by external factors not dependent on its results and management.

**d) Policy on dividends.**

The Company cannot guarantee payment of dividends, or that dividends will increase over time, as they may be conditional on a number of factors, such as the evolution of the business, growth strategy and financing needs.

**e) Risks derived from the fact that the Company's shares are denominated in euros.**

Investors resident in companies with currencies other than the euro face additional risks related to the fluctuation of the euro.

**f) Risks related to the possibility of foreign shareholders exercising their preferred subscription rights.**

The preferred subscription rights that the Limited Companies Act establishes in a general way for all shareholders resident in Spain, who may exercise it to prevent dilution in the case of new issues of securities, may not be guaranteed to shareholders from other countries whose law does not envisage the possibility of exercising preferred rights in which this preference demands the registration of documentation or the availability of an exemption from registration.

**g) Risks associated with a revocation of the Offer.**

It is planned that the shares of the Company will be admitted to trading on 13 December 2007. If this admission has not taken place by 24:00 hours in Madrid on 14 January 2008, the Offer will be understood to be revoked, the Company shall proceed to the purchase of the shares from the shareholders who may have subscribed and paid for them or acquired them, and return the cost of purchase to the investors together with the corresponding interest applicable by law.

This Prospectus establishes that the Company may withdraw its offer, postpone it, or temporarily or indefinitely suspend it at any time before the price is established for the Company's shares set to take place on 11 December 2007, and the Company need not provide any reason for doing so

## II. RISK FACTORS

Before adopting the decision to invest in the shares subject to the Offer there should be taken into account the risks set forth below, which are associated with the Company's activity and in relation to the shares subject to the Offer, and which could have an adverse effect on the business, earnings or the financial, economic or equity situation of the Issuer or its shares. These risks are not the only ones to which the Issuer may be exposed in the future. It may occur that future risks, unknown or not considered significant at present, could have an effect on the financial, economic or equity situation of the Issuer or on its shares. It should also be borne in mind that those risks may have an adverse effect on the price of the Issuer's shares, which could lead to loss of part or all of the investment made.

### 1. RISK FACTORS SPECIFIC TO THE ISSUER OR TO ITS BUSINESS SECTOR.

#### a) Risks associated with the renewable energy industry

##### 1. Risks associated with weather conditions

The Company's principal activity is the production of electricity from renewable sources, primarily wind. The production of wind energy production accounted for 81.3% of the *pro-forma* gross margin and 92.5% of the *pro-forma* EBITDA at September 30, 2007.

Wind energy is highly dependent on climatic conditions, particularly on wind conditions. The profitability of a wind farm depends, among other factors, on the wind conditions experienced at the site, which are inherently variable. Also, inasmuch as aerogenerators only function if the wind speed attains certain specific ranges that vary depending on the type of aerogenerator and on the manufacturer, if the wind does not reach the said speeds the Company's energy output is likely to diminish.

During the development phase of wind projects, prior to construction, a wind study is conducted at each proposed site. The purpose is to evaluate the energy capacity of the site using wind measuring instruments. The principal starting assumption upon which investment decisions of the Company are based is the conclusions of this study. The Company cannot guarantee that the climatic conditions of a wind farm, particularly the wind conditions, will correspond to the assumptions made by the Company nor, therefore, can it guarantee that its wind farms will achieve the initially contemplated production levels. If wind conditions diminish at all or a part of the Company's wind farms, it could result in a reduction of operating efficiency, production of energy and profitability.

In addition, exceptional climate conditions and natural disasters, such as earthquakes, hurricanes, tornadoes and strong storms, may cause losses at the Company's wind farms and facilities, which could result in a decrease of wind energy production.

Such events, if they had a material effect on a high number of the Company's facilities, could have a material adverse effect on the Company's business, financial status or results of operations.

**2. Risks deriving from domestic and international policies in support of renewable energy sources**

Development and profitability of renewable energy projects are significantly dependent on the existence of regulatory frameworks and policies in support of such development. Some countries by regulation have provided various incentives for electricity production from renewable sources. In particular, the European Union and its principal Member States, including Spain and the United Kingdom, and the United States of America have adopted policies actively supporting renewable energy.

These policies include measures such as: (i) obligations to acquire the electricity produced from renewable energy sources, or the imposition of mandatory quotas for acquisition of renewable energy on producers or distributors, preferential rights of access to the network and the right to distribute electricity through the network, as occurs in Spain, the United Kingdom and certain states of the United States of America; (ii) tax incentives such as the Production Tax Credit ("PTC") system in the United States of America, which grants tax credits in proportion to the amount of wind energy produced and sold during each tax year or, also in the United States, the Modified Accelerated Cost Recovery System ("MACRS"); or (iii) green certificate programmes (such as the Renewable Obligation Certificates ("ROCs") in the United Kingdom and the Renewable Energy Certificates ("RECs") in certain states in the United States of America) that are negotiable on both organised and unorganised markets.

Although the support for renewable energy sources has been strong in prior years, and both the European Union and the United States of America periodically reaffirm their desire to sustain and strengthen that support, the possibility that these policies may be modified or the measures supporting renewable energy sources may be repealed in the future cannot be discarded, particularly those that may benefit the Company's wind farms.

Spain recently approved Royal Decree 661/2007 of 25 May 2007 governing the business of production of electricity under the special system. It repeals Royal Decree 436/2004. The Royal Decree introduces new elements for determination of the compensation corresponding to those producing electricity from renewable sources, although it maintains the basic principles of Royal Decree 436/2004.

In 2010 the tariffs, feed-in tariffs, complements and limits established in the new Royal Decree will be revised. The revisions of the regulated tariff and the limits will apply to facilities commissioned after 1 January 2012.

In addition, once Spain has reached the power targets provided in Royal Decree 661/2007 (with there having been set, for wind energy, a target of 20,155 MW, without prejudice to the setting of another 2,000 MW that

could be installed by means of retrofitting wind energy facilities with final registration date prior to 31 December 2001), it is possible that for those facilities that were definitively registered after the deadline set by the General Energy Secretariat the present tariffs, feed-in tariffs and complements will not be maintained on the present terms. The facilities currently in operation and those definitively registered prior to that deadline will receive the current tariffs, feed-in tariffs and complements.

In the United States of America, the renewable energy support measures are mainly based on tax credits (PTCs and MACRS) at the federal level and on the Renewable Portfolio Standards that have been implemented in many states of the United States. The current PTC system (which provides tax credits in proportion to the amount of wind energy produced) is solely applied during a period of ten years to those facilities that are operational prior to December 31, 2008. In addition, it offers the possibility of accelerated depreciation for tax purposes of capital investments in renewable energy projects) a benefit known as MACRS.

There is no assurance that the system will be renewed after 2008 or that, if it expires, the new facilities will be entitled to benefit from a retroactive application. Neither is there any certainty that the Company is going to have sufficient profits so as to use said tax benefits, nor whether the Company is going to be able to make the most of the tax incentives through investment structures with third persons, attracting investors interested in taking advantage of the PTCs and that meet the Company's credit risk requirements, or which will have a sufficient number of investors who meet these requirements.

In the United Kingdom, governmental measures supporting renewable energies include ROCs and Levy Exemption Certificates ("LECs"). The regulations require of suppliers that a percentage of their sales be from renewable sources. In order to satisfy the obligation, they must choose between acquiring an ROC and paying a substitute price. To promote the most environmentally sustainable generation and supply of energy, the consumption of electricity coming from certain renewable sources is exempted from payment of an environmental tax by virtue of the LECs. One cannot ignore the fact that these incentives may be repealed in the future or may be amended.

Abandonment or reduction of the support for renewable energy sources, in particular wind energy, by the competent authorities of the countries in which the Company conducts its business could have a material adverse effect on the Company's business, financial status or results of operations.

### **3. Conduct of the business on regulated markets**

The Company conducts its business on regulated markets. The Company, as well as its electricity production facilities (including wind farms and mini-hydro facilities) must comply with various laws and regulations in each of the countries in which the company operates. In particular, the Company and its electricity production facilities are subject to strict standards

regarding construction and operation of such facilities (including rules regarding the acquisition and use of land, the need to obtain governmental permits, rules regarding conservation of the landscape, noise regulations, environmental protection, as well as congestion in the energy transmission and distribution networks). If the Company or its facilities do not comply with these rules, the Company may face revocation of governmental permits it holds and/or the imposition of sanctions, including fines or criminal sanctions.

The regulations applicable to the generation of electricity from renewable energy sources vary from country to country and are subject to future changes that may be more restrictive and unfavourable to the Company. More restrictive or unfavourable regulation could imply changes in operating conditions that could increase the cost of capital (for example by way of the imposition of an obligation to change the configuration of existing generation facilities) or operating costs (for example by way of establishment of additional inspection and control procedures) or hinder development of the business.

The Company cannot guarantee that there will be no amendments of current regulations, whether in response to the pressure of public opinion or for other reasons. Such changes, if significant, could have a material adverse effect on the Company's business, financial status and results of operations.

**4. Availability of sites and obtaining governmental permits and authorisations**

**(i) Limited availability of appropriate sites**

Wind farms require particular wind conditions that are found only at certain geographical sites. Also, electricity production facilities, including those operated by the Company, need a connection to the electricity transmission or distribution network in order to be able to transmit or distribute the energy generated. This limits the number of appropriate sites for installation of plants.

**(ii) Increasing competition for legal rights to occupy land**

The finding and attainment by the Company of sufficient legal rights to occupy sites are subject to increasing competition with an ever larger number of operators (both in the wind sector and as regards other renewable technologies). They have sufficient financial capacity to make the necessary investments to research, locate, obtain sufficient legal rights for occupation, and obtain connection rights to connect to the network.

**(iii) Dependence on obtaining governmental permits**

In order to build and operate an electricity generation facility, the Company must obtain various governmental permits. The system for obtaining governmental permits varies by country. The different

countries may deny permits for different reasons. In addition, the process of obtaining permits may be hindered or delayed by public opposition. The Company cannot guarantee that governmental permits will be granted or renewed when it so requests.

As is set out in section IV. 6.1 of this Prospectus, whereby with respect to the operational facilities, IBERDROLA RENOVABLES has obtained the administrative permits necessary for the operation of its facilities (authorisation of the facility, approval of the undertaking project and act of start-up; entry in the Producers' Register, inclusion under the special procedure, as the case may be; environmental processing, as the case may be, etc.)

As far as the municipal permits are concerned, even when the name and classification of licences that may be demanded varies in each Autonomous Community, the following are required in general (i) the building works licence and the activity licence – classified or not - prior to the start of the building Works, and (ii) the first occupation licence and the definitive opening licence in order to check that the building Works that have already been completed were carried out in accordance with the decisions concerning such licences and to permit the definitive functioning of the installation, respectively.

Regardless of the fact that the Company has the licences that can be required for most of its facilities, in certain cases, the Company's facilities do not have all of the licences that are required. Likewise, in relation to certain Company facilities, particularly in the case of the oldest mini-hydraulic plants, the latter does not have the documentation that substantiates the fact that some of its facilities in progress have all of the municipal licences necessary for the undertaking of the activity. Nevertheless, this situation only affects installations located in Spain and it is, to a certain extent, usual in this and other sectors, insofar as priority is given to those licences that the local authorities expressly require to the detriment of those others which – being required from a strictly legal viewpoint - are not necessarily required by the respective local authorities as an essential requirement for the undertaking of the activity. In Spain, the Company lacks municipal building work or activity licences and the documentation that substantiates their obtaining, for wind power facilities with 260 MW of installed power and min-hydraulic facilities with 206 MW of installed power. . Lack of the mandatory licences may imply suspension of the activities performed by the facility in question and, even, the obligation to demolish those facilities, in which case the Company must restore the site to its original condition.

IBERDROLA RENOVABLES has initiated a process to regularise this situation, and has identified the licences that it needs to obtain with respect to each one of its facilities. The obtaining of the municipal licences is a regulated process, whose concession by the councils is not purely discretionary, but rather it is objective, and it is

conditional on compliance with the requirements that may be legally demanded.

**(iv) Other restrictions**

There are other restrictions in respect of the Company's business, such as the existence of easements (including access easements) and environmental restrictions, and restrictions related to the proximity of inhabited areas or areas or places protected by applicable regulations.

One cannot ignore the fact that the Company may have difficulty in locating, obtaining permits and sufficient legal title to ensure that it has control of a sufficient number of sites, which could prevent construction of facilities and their commissioning if not accomplished within the contemplated time periods. This could have a material adverse effect on the Company's business, financial status and results of operations.

**5. Dependence on electricity transmission services**

The Company depends on high voltage and other transmission facilities to transmit the electricity it sells. They are owned and managed by third parties.

Typically the Company is not the owner of, nor does it control, the transmission facilities except those needed to interconnect its farms to the electricity network. In this respect, the transport network is owned by and is the responsibility of the transport companies such as, for example, Red Eléctrica de España in Spain, and the distribution networks of the distributor companies. The Company is not the owner of these networks, but it needs to have these in order to be able to connect its generation assets.

Many of the Company's wind power projects (particularly in the United States of America) are in remote areas with limited transmission capacity, where there is intense competition for available capacity.

In the event of failure of the transmission facilities utilised by the Company to sell the energy it produces, apart from suffering economic losses, the Company could be liable for damages suffered by its customers, such as the cost arising from the need to acquire additional energy at market prices. Such losses and the liability for the damages caused to customers could have a material adverse effect on the Company's business, financial status and results of operations.

**6. Volatility of market price of electricity**

In addition to the regulated incentives, in certain countries the compensation received has a component tied to the market price. Market prices may be volatile and are affected by multiple factors including, inter alia: (i) the cost of the raw materials used as the primary source of energy; (ii) the demand of the end user; (iii) the average rainfall for the period and (iv) the price of greenhouse gas emission allowances.

In certain countries in which it operates, the compensation received by the Company includes a regulated component and a component tied to the market price. In such countries there exists the risk that the regulated component might not fully compensate for fluctuations in the market price and, therefore, there is the risk that the total compensation may be volatile.

It cannot be guaranteed that the market prices will be maintained at levels allowing the Company to obtain the desired profit margins and levels of recovery of investment. A reduction of prices below those levels could have a material adverse effect on the Company's business, financial status and results of operations.

**7. Dependence on factors not controlled by the Company**

The Company's revenues may fluctuate over time depending on various factors, including the variability of climate conditions, as well as changes in prices of and demand for electricity, typically with seasonal demand. Because the Company has little or no control over these factors, it cannot be guaranteed that its revenues will not fluctuate over time. Therefore, comparison of the Company's revenues between particular periods of time may not reflect the long term trends of the business and may not be a relevant indicator of the Company's future profits. Also, it cannot be guaranteed that the Company's future profits will reflect the Company's historical profits or the predictions and expectations of the investors.

**8. Risks associated with changes in technology**

The technologies applied in the renewable energy sector evolve rapidly and constantly. Also, the techniques for production of electricity from renewable energy sources constantly improve and become more complex.

To maintain and increase its competitiveness and grow its business the Company therefore must adapt to technological advances. For this purpose research and development are key factors. If the Company does not appropriately react to current and future technological advances in the sector, it could have a material adverse effect on the Company's business, financial status, results of operations or capacity to achieve established goals.

**9. Capital intensive business**

The Company must make significant investments in its business and the investments made in a power plant are only recovered long term. The investment required for development and construction of a wind farm may vary based on the cost of the fixed assets, principally the aerogenerators, which represent between 70% and 80% of the investment cost. The cost of this equipment may increase if demand therefor rises or if the prices of key components and raw materials used to build that equipment rise. There also are other factors affecting the amount of the investment, such as the price of the construction work on the facilities.

A material increase in the costs of development and construction of a wind farm could have a material adverse effect on the Company's objectives, business, financial status and results of operations.

#### **10. Availability of technical components**

The Company's business requires the supply and assembly of many technical components, such as aerogenerators, for the wind energy production facilities. Only a limited number of suppliers can provide them.

Currently, demand for aerogenerators in Europe and the United States of America exceeds production capacity. Recently this has resulted in a shortage of supply and increase of prices of aerogenerators and other technical components. One cannot discount the possibility that, in the future, the Company may have difficulty in acquiring the necessary number of aerogenerators and other technical components needed to meet its business objectives, or that certain providers may give priority to other customers that could even be competitors of the Company.

A generalised delay in performance of contractual obligations by the Company's principal suppliers, their inability to satisfy those obligations, unavailability of spare parts and equipment, or the impossibility using them to meet the Company's needs and expectations, could negatively affect achievement of the Company's objectives.

#### **11. Risks deriving from public opposition**

There are certain persons, associations and groups that may oppose wind energy projects and other electricity generation plants, using arguments such as degradation of the landscape, noise pollution, injury of birds and generalised environmental damage.

Although the development of renewable energy projects generally requires an environmental impact study and public hearing prior to grant of the corresponding governmental permits, the Company cannot guarantee that a given wind farm or other kind of facility will be accepted by the affected population. Furthermore, in those areas where wind farms or other facilities are near residential areas the opposition of the local population may result in adoption of restrictive regulations or measures regarding the farms after they become operational.

If a part of the population or any company opposes construction of a renewable energy project or brings legal action, it could make it more difficult to obtain the corresponding governmental permits. In addition, legal actions could result in adoption of preventive measures stopping construction, which could prevent commissioning of the project within the contemplated term or meeting the Company's business objectives. In this regard, some of the Company's planned wind farm projects have been met with public opposition and challenges, and such challenges will foreseeably continue in the future during the ordinary course of the Company's business.

As a result, public opposition, an increase in challenges of governmental permits or an unfavourable trend in resolution of such challenges could have a material adverse effect on the Company's business, financial status and results of operations.

**b) Risks related to the non-renewable energy sector**

**1. Regulatory risks**

The Company's activities in respect of the natural gas business in the United States are, at the federal level, subject to various regulations which gives the Federal Energy Regulatory Commission ("FERC") jurisdiction to regulate the transport and storage of natural gas, as well as certain sales of natural gas, all in interstate commerce. Purely intrastate facilities are regulated at the state level, which regulation varies from state to state. The co-generation activity carried out by the Company is subject to federal and state regulations in the United States applicable to renewable energy generation facilities, including the FERC regulations. In the United States, the Company is subject to diverse regulations relating to operations with associated parts which, in particular, affect the gas storage business of the affiliate of the Company Enstor Inc.

Violation of these rules could result in the imposition of sanctions, including fines, criminal sanctions or the revocation of its licences. Also, one cannot discount the possibility that new rules will be issued or existing rules will be amended in the future. Such changes could have a material adverse effect on the Company's business, financial status and results of operations.

**2. Dependency on gas prices**

The natural gas storage business in the United States generates revenue by taking advantage of the difference between current and future natural gas prices. Also, the Company takes advantage of local price differences by means of the possibility of transporting natural gas from low-price markets to higher price markets.

It cannot be guaranteed that there will continue to be a difference between current and future natural gas prices, or that the difference, if any, will be greater than the prices the Company charges for the gas storage service or the costs deriving from such storage. In addition, it cannot be guaranteed that the price difference in the various areas in the United States will be maintained, or that access to the gas pipelines continues to be open to all gas transport companies for transporting gas between the various regions of the United States and take advantage of the price difference in the future.

The disappearance, or a significant reduction, of these differences in the United States natural gas business, or a change in the regulations preventing the transport of natural gas between the various regions of the United States, could have a material adverse effect on the Company's business, financial status and results of operations.

**3. Dependence on numerous restrictions which could limit the growth of the gas storage business**

The Company faces various restrictions that could limit the growth of the gas storage business of the Company in the United States. The principal such restriction is the scarcity of appropriate sites, which depend on specific geological factors that generally are not common, as well as the ability to find them and obtain sufficient legal rights to occupy them.

Finding and obtaining sufficient legal rights to occupy sites are subject to increasing competition from an ever larger number of operators in the natural gas storage business. They have sufficient financial capacity to make the necessary investments to research, locate and obtain sufficient legal rights for occupation of the sites. Also, there is a limited number of qualified personnel (including geologists, engineers and other professionals) to locate and obtain control of the sites.

In addition, the process of construction and obtaining necessary permits for natural gas storage facilities is lengthy, and often complex. The Company must obtain a series of governmental permits from various authorities, which may be denied, delayed or conditioned for various reasons, including environmental matters, the proximity of the facilities to inhabited areas and public opposition.

One cannot discount the possibility that the Company may have difficulty in finding and obtaining control of appropriate sites on favourable conditions or on any conditions, hiring or retaining qualified personnel or obtaining and maintaining governmental permits for a sufficient number of sites. This could make it difficult for the Company to maintain its current projects or begin new ones which could limit the growth of Enstor Inc. which would have a material adverse effect on the Company's business, financial status and results of operations.

**4. Dependence on transport services for natural gas and for thermal generation**

The Company depends on natural gas pipelines and other facilities owned and managed by third parties for transport of the natural gas it sells on the wholesale market, to supply natural gas to its electricity production facilities, and to provide storage services to its customers.

The Company signs short and long term contracts with these third parties to assure the provision of the aforesaid services or to allow interconnection with its natural gas storage facilities. Also, the Company depends on high voltage lines and other transport facilities that are owned and managed by third parties to carry the electricity produced at its thermal generation plants. Normally, the Company neither owns nor controls the transmission facilities, except those needed to interconnect its stations with the electricity network.

If the transport or transmission lines are interrupted or if the capacity of the transport facilities is not adequate, the Company may have difficulty in selling its products and providing its services.

As a result of the foregoing, in addition to the economic losses, the Company may be liable for damages suffered by its customers, such as the cost deriving from the need to acquire additional energy at market prices. Such losses and the liability for the damages caused could have a material adverse effect on the Company's business, financial status and results of operations.

## **5. Risks deriving from public opposition**

There are certain persons, associations and groups that may oppose natural gas storage projects and thermo-electric facilities, using arguments such as degradation of the landscape and generalised environmental damage.

It is common that in the processing of public information concerning the administrative authorisation for energy and bio-fuel generation facilities, arguments are prepared by companies and private individual, which include competitor developers, and whose opposition can be based on grounds that are both formal and on merit.

Subsequently, it occurs on occasions that when the administrative authorisation for the facility is obtained, the companies or private individuals that are considered to suffer detriment can challenge the authorisation referred to in the administrative or judicial process. For further details about these types of challenges, see Section IV.20.8 of this Prospectus.

If a part of the population or any company opposed construction or functioning of a natural gas storage project or a thermo-electric facility or filed legal action, it could hinder obtaining the corresponding governmental permits, which could have a material adverse effect on the Company's business, financial status and results of operations

## **c) Risks related to the integration of the companies in the Scottish Power Group**

### **1. Risks deriving from expansion of operations such as the result of the integration of the companies of the Scottish Power Group**

As a part of the global business strategy of IBERDROLA RENOVABLES, the Company recently undertook a restructuring transaction by virtue of which the companies in the Scottish Power Group principally engaged in generation of energy from renewable sources have been integrated into the Group (the "**Restructuring Transaction**"). It thereby has strengthened its presence in the United States of America and the United Kingdom.

In accordance with the pro-forma financial information presented in this Prospectus, the integration of these companies represents 37.8% of the *pro-forma* gross margin and 33.8% of the *pro-forma* EBITDA corresponding to the financial year ending at December 31, 2006, together with 38.2% of the

*pro-forma* gross margin and 36.6% of the *pro-forma* EBITDA corresponding to the nine-month period ending at September 30, 2007.

The Restructuring Transaction also has resulted in an increase in *pro-forma* installed renewable energy power to 7,342 MW at 30 September 2007. This includes 606 MW owned by a third party, the sale of energy of which is managed by IBERDROLA RENOVABLES (through its subsidiary PPM Energy Inc. (“PPM”)) and a project portfolio of 41,266 MW. In addition, the Restructuring Transaction has resulted in the acquisition of 537 MW (including 237 MW from long-term energy sale agreements) of installed thermoelectric capacity. In addition, 0.76 billion cubic feet of natural gas operational storage capacity have been obtained. This has resulted in incorporation into the Company's business of purchase, sale and storage of natural gas.

It cannot be guaranteed that the Company will be successful in the new countries or businesses into which it has expanded its activity, or that it will continue to be successful in those where it was already present. Although the Company believes that the expansion and entrance into new countries and businesses should contribute to its future growth and profitability, the Company could have difficulties in achieving the established objectives. It cannot be guaranteed that the businesses combined by virtue of the Restructuring Transaction are capable of achieving the same level of profitability as IBERDROLA RENOVABLES and the companies within its consolidation had in the past.

## **2. Risks related to rapid expansion of business**

The Restructuring Transaction has brought with it a rapid expansion of the Company's business, which has increased the complexity of operations and could result in significant pressure on the Company's management, operating and financial resources, as well as on its control systems and procedures.

The Company's capacity to appropriately manage this growth will to a great extent depend on its ability to (i) develop an efficient and integrated system of management support; (ii) standardise the technology and operational development in all countries in which the Company operates; (iii) control costs; (iv) maintain effective control of quality and, at the same time, expand the dissemination of internal information and management and accounting systems; (v) attract, assimilate and retain qualified personnel and (vi) effectively control operations. If the Company has difficulty in implementing these measures, it could complicate the process of integrating the companies that have been included in the IBERDROLA RENOVABLES consolidation into the business structure.

In addition, the Company's management team may have to spend significant time on the integration process, which would reduce the time available for managing the Company's business. If the Company's management team has difficulty in efficiently managing the process of integration, or if any

significant business activity is interrupted as a result of the integration process, the Company's business could suffer significantly.

It cannot be guaranteed that the Company will not encounter difficulty in implementing the necessary measures efficiently and in parallel with the growth of the business, or in appropriately managing that growth, which could have a material adverse effect on the Company's business, financial status and results of operations.

**3. Risks related to certain tax proceedings pending in the United States**

The Company currently is involved in administrative and judicial proceedings related to certain tax contingencies affecting the United States companies in the Scottish Power Group consolidated in IBERDROLA RENOVABLES under the Restructuring transaction, Iberdrola S.A. has made the commitment to indemnify IBERDROLA RENOVABLES in the event of the Company being obliged to respond to said doubts in accordance with the provisions of the indemnity agreement of 20 November 2007 described in Section IV.19.4 of this Prospectus. Section IV.20.8 of this Prospectus describes the main lawsuits that the Company is involved in greater detail, including the tax procedures referred to in this risk factor.

**d) Risks associated with the business activities of the company**

**1. Concentration of the business in certain countries**

The Company currently conducts most of its business in Spain, the United States of America and the United Kingdom. According to the pro-forma financial information, 95.2% of the Company's revenues were obtained in these countries during 2006, and 92.9% during the nine-month period ended 30 September 2007.

Also in accordance with the pro-forma financial information, Spain is the principal country in which the Company operates. During 2006 and during the nine-month period ended 30 September 2007 57.4% and 54.4%, respectively, of the Company's revenues were obtained in Spain. The second country is the United States, with 29.6% and 30.2% of pro-forma revenues, followed by the United Kingdom, with 8.2% and 8.3% of pro-forma revenues, respectively.

The concentration of the business in these countries brings with it greater exposure to such significant variations as may occur in the regulatory framework, or other significant changes in market conditions (such as consumer acceptance, increases in costs or decreases in demand), which could make it significantly more difficult for the Company to obtain revenues, and have a material adverse effect on the Company's business, financial status and results of operations.

## **2. Risks deriving from the assumptions and hypotheses used by the Company in the classification of the portfolio of projects.**

The Company has set up a strict form of methodology of segmentation of its portfolio of projects in different categories (practically certain, likely and potential) based on the maturity and likelihood of success of the projects (approximately 95%, 40%-50% and 20%, respectively). The bases and assumptions utilised for the segmentation of the portfolio of Company projects have been developed internally and have not been the subject of auditing or checking by third persons. Likewise, these bases and assumptions could vary according to the country in which the project is located.

There is no methodology of segmentation of portfolios of projects that is generally accepted in the electricity generation business that is based on renewable sources. In this respect, the methodology used by the Company could differ from that used by other companies involved in the same business. In this respect, the forecast relating to power that will give rise to the portfolio of projects cannot be comparable to those which said companies carry out.

There is no certainty that the forecasts or estimates relating to the portfolio of projects of the Company correspond to the future situation, and the real results may differ, significantly, from the present expectations.

## **3. Dependence on qualified suppliers**

Of the 6,394 MW in wind power installed at the end of September 2007, excluding the 606 MW corresponding to PPAs, according to the *pro-forma* information, 83.6% corresponds to leading manufacturers.

At 30 September 2007, Gamesa had supplied to the Company aerogenerators with a total output of 3,718 MW, which represented 58.1% of the Company's pro forma installed renewable energy output, excluding the 606 MW owned by a third party. The Company's other three largest suppliers were GE Energy, Siemens and Vestas-American Wind Technology, Inc., which supplied to the company aerogenerators with a total output of 1,630 MW (25.5%), 473 MW (7.4%) and 389 MW (6.1%), respectively, of the Company's pro forma installed renewable energy output, according to the pro forma information at 30 September 2007.

The Company's principal supplier is Gamesa, which has committed to sell aerogenerators for a total of 2,700 MW to the Company by 2009, which may be extended to 2011, by virtue of an agreement signed on 19 October 2006. In addition, the Company has increased its number of suppliers, having entered into contracts with Suzlon Energy and Mitsubishi. In general, the contracts the Company enters into with its aerogenerator suppliers cover production, transport, assembly and start-up. Sometimes the contract with the supplier also covers maintenance during the warranty period, which generally has a term of two years, unless a different period has been negotiated with the supplier.

Other significant suppliers are construction companies that are hired during promotion and construction phases to undertake the civil works and electrical installation of wind farms, as well as all necessary infrastructure.

Historically, Iberdrola Ingeniería y Construcción, S.A. (“**Iberinco**”) has been the principal supplier of the Company’s engineering and construction services and, in conformity with the framework agreement signed by Iberinco in 2007, the latter has agreed to continue rendering services of this type to the Company in the future.

Although the company has increased and diversified its supplier portfolio, the loss of any of these suppliers or service providers, or difficulties in replacing them with others or acquiring aerogenerators at the prices currently offered by these suppliers or in contracting engineering and construction services at the prices currently offered by those providers, or changes in the terms of the supply and maintenance contracts, such as the increase in the prices of the maintenance services or of the spare parts, or engineering services and construction contracts could have a material adverse effect on the capacity of the Company to build and operate wind farms, and on the profitability of development of wind farms.

Likewise, in the case in which the air-generator turbines or other equipment of one or other suppliers have a useful life that is less than the one planned – between 20 and 30 years - this could have an adverse material effect on the business, the financial conditions and the operating results of the Company.

#### **4. Risks relating to the asset operation model**

The Company uses certain technologies and systems to conduct its business. Its operations depend on the efficient and uninterrupted functioning of the information systems used for remote control of the operation and maintenance activities. A failure in the Company’s network or in the data collection systems, computer viruses or hackers or other failures in the supporting systems for the asset operation model (including the Renewables Operation Centre – REOC -, the centre for remote control, management and maintenance in real-time of the electricity generating facilities, located in Toledo Spain) could hinder data processing, provision of services and the daily pursuit of the business and could lead to interruptions in the Company’s operations.

In addition, information system failures that impede connections between REOC and the local information and control systems of each renewable energy site could result in the wind farms operating at below the required optimum levels, with the attendant material adverse effect on the business, financial position and results of the Company’s operations. In the past, the Company has been forced to stop operations at some of its wind parks due to failure of its aerogenerators

## 5. Fluctuations in interest and exchange rates

The Company conducts business in Spain, the United States of America and the United Kingdom, as well as in other countries. Historically most Company revenues have been generated in euros, but after the Restructuring Transaction a greater proportion of revenues will be generated in United States dollars and pounds sterling. The Company faces risks *vis-à-vis* fluctuation of exchange rates to the extent that subsidiaries enter into contracts or incur significant costs using a currency other than the euro. It may have difficulty matching revenues with costs denominated in the same currency.

According to the pro-forma financial information for the year ended 31 December 2006, some 44.9% of operating revenues were generated and some 47% of operating expenses were done in euros. Also, in the same period 48.8% of operating revenues were generated and 45.6% of operating expenses were denominated in US dollars. Equally, in the same period, 6% of the operating revenues were generated and 6% of the operating expenses were realised in pound sterling. Lastly, in the same period, 1.4% of operating revenues were generated and 0.4% of operating expenses were denominated in foreign currency.

It cannot be guaranteed that the Company is appropriately hedged against exchange rate risks. Also, fluctuations in the exchange rate of currencies and devaluations of currencies (principally in the securities related to the euro, pound sterling and US dollar) may have a material adverse effect on the Company's results for each fiscal year.

In addition, the results of operations of the Company's subsidiaries and their financial statements are expressed in local currencies, thereafter being converted to euros at the exchange rates applicable from time to time, to be included in the consolidated financial statements of the IBERDROLA RENOVABLES Group, which are expressed in euros. The exchange rates between these currencies and the euro may undergo significant fluctuations. This risk of exchange rate fluctuation could have a material adverse effect on the Company's results of operations.

In addition, the Company's debt, because the business it conducts is capital intensive, is tied to reference interbank rates such as EURIBOR and LIBOR. Any increase in those interest rates could increase the Company's debt and adversely affect its financial status.

The Company has entered into agreements to hedge fluctuations in exchange rates and interest rates. Nevertheless, there is no assurance that these agreements will fulfil their purpose effectively and not result in additional losses. Nor is there any assurance that any other risk management procedure will function satisfactorily.

## **6. Use of derivatives**

The ownership and management of wind farms, other electricity generation plants and natural gas storage facilities expose the Company to market risks, including volatility of the prices of electricity and natural gas.

The Company uses and in the future intends to use derivative financial agreements and instruments, such as futures and options, in order to manage market risk and exposure to fluctuations in the price of electricity and natural gas, and in its derivatives trading business for purposes other than hedging.

These activities expose the Company to market risks, including the possibility of calculation errors in implementation of this hedging activity, and could also have the effect of limiting the capacity of the Company to obtain the benefits deriving from increases in energy prices. Although the Company's operations are subject to a risk control procedure, risk information systems and a risk model designed to minimise the risk related to raw materials, these procedures may not be effective to the extent expected. In addition, future market changes may not be consistent with historical data or the Company's assumptions.

If the Company has difficulty in anticipating and appropriately hedging the market risks, the volatility of energy prices could have a material adverse effect on the Company's business, financial status or operating results.

## **7. Risks associated with the international nature of the Company's business model**

Regardless of the fact that the Company's operating centre is in Spain, the Company carries on a substantial part of its business in the United States and in the United Kingdom, and it has a presence in a further 16 countries. The Company envisages that its activity will continue its expansion both in these countries and in the global sense. In this respect, the Company is facing up to a series of risks related to the undertaking of activities in diverse countries and, in particular, in countries that are not members of the European Union, which could have an adverse effect on the Company's business, financial position and operating profit.

Amongst others, these types of risks include those deriving from compliance with the regulations in force in each country relating to foreign countries, and the changes that these may undergo, the absence, loss or non-renewal of favourable treaties or similar agreements with the relevant tax authorities, economic, political or social instability.

## **8. Risks associated with insurance**

The Company's business is exposed to the risks inherent in the construction and operation of electricity plants and gas storage facilities, such as breakdowns, natural disasters, terrorist attacks and acts of sabotage. The Company also is exposed to environmental risks. Most of the Company's

insurance policies do not cover losses resulting from events of force majeure, such as natural disasters, terrorist attacks and sabotage. The Company, in line with the customary practice followed by companies in the sector in which it does business, has contracted insurance for the most significant losses, although there are others among those mentioned above that are not covered by the policies.

In addition, the Company's insurance policies are subject to annual review by the insurers. It cannot be guaranteed that the policies will be renewed or that such renewal will be on similar or favourable terms.

If the Company suffers a serious uninsured loss, or losses significantly exceeding its insurance policies, the resulting costs could have a material adverse effect on the Company's business, financial status or operating results.

Also, certain intragroup insurance contracts require that Iberdrola, S.A. be the owner of at least 50% of the share capital of IBERDROLA RENOVABLES, in order for the latter to be covered by the corresponding policy. If the interest of Iberdrola, S.A. in the Company is reduced below 50%, the Company would have to secure a new policy. It cannot be guaranteed that such policies could be secured on similar conditions.

#### **9. IBERDROLA RENOVABLES financial support of Group companies in the United States**

The Company's activities in the United States, including the supply and construction of equipment, PPAs, institutional investment structures and natural gas purchase and sale activities, often require the Company to guarantee the obligations assumed by virtue of those activities. Generally it is necessary for the Company to extend a guarantee as the parent company, or for a United States subsidiary with sufficient credit qualification to guarantee performance of the referenced obligations.

In turn, the Company also demands guarantees, letters of credit, bonds or cash from third parties to cover counterparty risks. If the United States subsidiaries do not have access to this financial support, it could make it more difficult to operate in the United States. Therefore, the Company's business, financial status and results of operations could be negatively affected.

#### **10. Risks relating to non-payment by customers and enforcement of certain contractual provisions**

The agreements for purchase and sale of energy that the Company has entered into in the jurisdictions in which such agreements are legally permissible, for example the United States or United Kingdom, for the most part are long-term agreements. The Company cannot guarantee that customers, the counterparties in the referenced agreements, will satisfy their contractual obligations to the Company, that these customers in the future will not be involved in bankruptcy or liquidation proceedings during the

terms of the agreements, or that the solvency of these customers will be sufficient to cover the Company's losses in the event of breach thereof.

Significant and generalised non-payment by customers of the Company, or the fact that they could be insolvent or in bankruptcy, could have a material adverse effect on the Company's business, financial status or operating results.

#### **11. Risks associated with harm to the natural environment and population**

The Company is subject to a series of safety and environmental protection regulations in the countries in which it operates.

Some aspects of the Company's activities entail certain risks, including the start-up and maintenance of aerogenerators and thermal generation facilities and storage of natural gas. Similarly, certain products used or generated in the Company's operations may involve various real or potential risks.

The Company is also subject to different regulations intended to control hazardous activities and land use, prevent and control pollution and protect wildlife and the environment. Such regulations require that the Company obtain administrative authorisations for construction of facilities and the implementation of environmental and health and safety programmes and risk control procedures, as well as to operate and close those sites, and could increase the costs and lengthen the time needed to start up the facilities, and aggravate the difficulties associated with the business.

The Company's facilities may be affected by breakdowns or accidents that could lead to harm to employees or third parties. In addition, the facilities and employees of the Company could be affected by circumstances outside the ordinary course of the business, such as natural disasters, serious accidents or criminal acts, such as attacks, sabotage or terrorist acts. These circumstances could cause major damage to the Company's facilities and require large-scale repairs or replacement of expensive equipment, as well as hindering the attainment of revenues from those facilities. Such circumstances could also cause important damage to natural resources or to third-party property and cause harm to individuals, all of which could give rise to claims against the Company and its subsidiaries. The coverage provided by the insurance policies contracted by the Company may not be applicable or may be insufficient to cover the losses or liabilities arising from the above risks.

Similarly, the foregoing circumstances could generate environmental or health risks, pollution or different nuisances for nearby residents. The Company could be obliged to compensate the damages caused, repair environmental harm or close the facilities in order to comply with the environmental and safety regulations to which it is subject.

The environmental regulations, in some countries where the Company operates, including the United States of America, have strict liability provisions for emissions of environmental harmful substances.

A breach of the environmental regulations could be the subject of criminal penalties in certain jurisdictions, along with a breach of certain laws protecting migratory birds and endangered species in the United States.

Although the Company currently does not make significant environmental expenditures outside the ordinary course of its businesses, the need to make such expenditure in the future cannot be ruled out. In addition, the Company may have to incur expenses outside the ordinary course of its businesses to compensate environmental harm or damages of any other type that may be caused by its facilities or to repair the damage caused by accidents or acts of sabotage, all of which could have a material adverse effect on the business, financial situation or operating results of the Company.

#### **12. Special regulatory supervision as a consequence of the activities of Iberdrola, S.A.**

In June 2007, Iberdrola, S.A. reached an agreement for the acquisition of Energy East, a company providing integrated gas and electricity services in the north-east of the United States. As a consequence of said acquisition, the Company will be bound to abide by the rules of the FERC code of conduct in relation to the Company's operations with Energy East.

These rules mean that any operations carried out with Energy East will be subject to special supervision by the FERC. Likewise, it is likely that the energy produced by Energy East is consolidated with that produced by the Company in the periodic analysis of the energy market by the FERC.

In the event of the FERC considering that the combined result of the operations entails a controlling position in the market or in any other way represents barriers to entry in the market, the FERC could restrict the Company's capacity to set market prices in certain regional markets in the United States.

#### **13. Dependence on senior managers and key employees**

The Company depends on a management team with experience in Spain, the United States of America and the United Kingdom. Loss of certain key executives or one or more of the local managers could have a negative effect on the Company's operations. The Company's managers may terminate their agreements with the Company by giving prior notice, the term for which varies depending on the jurisdiction where they work. The key leading managers in the United States and in the United Kingdom have non-competition commitments to not reach agreements with the Company's clients, suppliers or employees following the completion of their employment contracts, for specific periods of time. Nevertheless, the Company cannot guarantee that it is going to be able to demand effective compliance with said commitments in the relevant jurisdictions.

The future development of the Company's business depends, among other factors, on its ability to retain and motivate key employees and attract qualified new employees. If the Company has difficulty in attracting and retaining necessary management and technical personnel, it could limit or delay the Company's progress, which could have a material adverse effect on the Company's business, financial status or operating results.

#### **14. Risks associated with the shareholding structure of the Company**

After admission to trading of the shares of the Company, it is contemplated that the interest of the Iberdrola, S.A. group in the share capital of IBERDROLA RENOVABLES will be 81.82% or, if the green shoe option is fully exercised, 80% of share capital. Therefore, Iberdrola, S.A. will exercise control over the Company.

As a result, Iberdrola, S.A. will be in a position to decide regarding matters requiring approval of the majority of shareholders, including distribution of dividends, election of the majority of the members of the Board of Directors (the body that adopts the principal decisions regarding the Company's business and appoints the Managing Director), changes in share capital and the adoption of articles and bylaws amendments. Iberdrola, S.A. also will be in a position to cause or prevent a change in control of the Company.

In addition, the interests of Iberdrola, S.A. may differ from the interests of the Company. If the interests of Iberdrola, S.A. are not the same as the interests of the Company, the Company may be disadvantaged. In this regard, Iberdrola, S.A. and IBERDROLA RENOVABLES have signed a master agreement on November 5, 2007 that, *inter alia*, establishes rules to delimit the respective spheres of action of the two companies (see Section IV.19.3 of this Prospectus). The purpose of these rules is to prevent and attempt to resolve possible conflicts of interest between them. Nonetheless it cannot be guaranteed that the master agreement will be appropriately implemented or that possible conflicts of interest arising with Iberdrola, S.A. will be resolved in the future.

#### **15. Risks deriving from intragroup operations**

Iberdrola, S.A. and IBERDROLA RENOVABLES regularly maintain intragroup relationships, consisting of construction, sale of goods and provision of various services between them. The master agreement of the two companies generally covers these intragroup transactions.

The master agreement provides that agreements already entered into by the two companies as of the effective date of the master agreement must be adapted to the provisions thereof within a term of six months. Also, all intragroup transactions under the master agreement must be at market prices.

In addition, the master agreement requires that related party transactions between IBERDROLA RENOVABLES and Iberdrola, S.A., the amount of which exceeds certain limits, must be approved by the Company's Board of

Directors. It also provides for the creation within the Board of an IBERDROLA RENOVABLES Related Party Transactions Committee. A part of its authority is reporting in advance on such related party transactions as must be approved by the Company's Board of Directors.

The master agreement will be in effect (i) for so long as Iberdrola, S.A. is the direct or indirect owner of a majority interest or (ii) for so long as more than half of the directors of IBERDROLA RENOVABLES have been appointed on nomination by Iberdrola, S.A.

In addition, the Company benefits from the right to use the trademark "*Iberdrola*", and to use that term in its business name and logo to differentiate its services from those provided by its competitors.

In this respect, the Company has signed an agreement for the licensing, assignment and management of trademarks and domain names with Iberdrola, S.A., by virtue of which the Company is granted a nonexclusive right to use the trademarks and domain names "**Iberdrola**" y "**ScottishPower**" to identify the renewables business as well as the complementary or accessory activities of the Company, indefinitely provided that the circumstances for termination of the framework agreement are not present, without prejudice to termination as provided in the licence, assignment and trademarks and domain names management agreement.

In the event of termination of the trademark license agreement due to a breach by the Company of its obligations under the aforementioned agreement or due to the aforementioned cause for termination, the Company would be required to change the name of its business and services. This could result in a loss of recognition of the trademark and a loss of customers, and could require that the Company use significant resources for advertising and marketing a new trademark. In addition, any negative publicity affecting Iberdrola, S.A. could significantly damage the reputation of the trademark, which could have a negative effect on the Company's business.

The Company also benefits from financing extended on market conditions by Iberdrola, S.A., its principal source of financing by means of short-term current accounts. In addition, the Company has signed a loan agreement on November [20] with Iberdrola, S.A. for a maximum sum of 2,000 million Euros with maturity in 2014, which can be drawdown in Euros, United States or Pounds Sterling, with the aim of re-financing the Company's debt with Iberdrola, S.A. It is envisaged that the Company will re-finance the sums owed in the current accounts on a quarterly basis. The sums owed for principal and interest under the current account agreements are payable in the case of termination at any time with 15 days' notice. On September 30, 2007, the balance of the current accounts with Iberdrola, S.A. amounted to 2,803.4 million Euros and the sum owed for principal and interest by the affiliate of the Company, Iberdrola Energias Renovables Castilla-La Mancha, S.A.U to Iberdrola, S.A. amounted to 377.1 million Euros. It cannot be guaranteed that Iberdrola, S.A. shall not terminate the current account agreements and claim payment of the outstanding balances, interest

and other related sums. Neither can it be guaranteed that the Company is going to be able to obtain resources in order to repay said amounts, nor that it is going to be able to finance its operations in progress.

Iberdrola, S.A. could cease to extend financing on market conditions to the Company. This could result in increased debt of the Company to third parties. Some of the Company's financing agreements contain acceleration clauses, which would be applicable if Iberdrola S.A. reduced its interest in the Company's capital or if the Company changed its corporate name or if the Company will cease to pay any of its obligations with other financial entities.

Termination by Iberdrola, S.A. of this financing on market conditions or the possible reduction of its interest in the Company could have a material adverse effect on the Company's business, financial status or results of operations.

#### **16. Master Agreement with Iberdrola, S.A.**

Pursuant to the Master Agreement signed with Iberdrola, S.A. (in this respect, see sections IV.19.3 and IV.19.4 of this Prospectus); Iberdrola, S.A. has exclusive global rights over the undertaking, operation and sale both of the assets and the companies, of activities related to the natural gas business. The Company has a non-exclusive right to operate in the gas sector in the United States of America in conformity with the terms set out in the business plan of PPM Energy Inc. and in accordance with the business plan which will be prepared by the Commission of Associated Operations and approved by the Board of Directors of the Company.

On the other hand, the Company has the obligation to inform Iberdrola, S.A. of any business opportunity in the gas market identified by the Company over which Iberdrola, S.A. will have a preferential right to evaluate and act in relation to said opportunity.

Amongst other issues, in the Master Agreement IBERDROLA RENOVABLES has declared that at present it is not undertaking the provision of engineering, consultancy and civil works installation services of electrical energy generation through renewable sources, nor does it have the intention in the future of undertaking activities with third parties outside the IBERDROLA RENOVABLES Group; these activities are carried out within the IBERDROLA Group by Iberinco.

It cannot be assured that the potential conflicts of interest that could arise with Iberdrola, S.A. are going to be favourably resolved for the Company or that the Company is going to be able to act in relation to potential investment opportunities identified in the gas market, apart from the activities actively carried on.

## **17. Risks associated with judicial and administrative claims and proceedings**

As is the case of any operating company, in the conduct of its ordinary business the Company has been and in the future may continue to be sued in connection with the business it conducts. For the same reason, it also could be subject to sanctioning administrative proceedings. These complaints could include environmental lawsuits, employee claims, claims deriving from personal injury or property damage arising from construction of the facilities, or proceedings brought by regulators or the tax authorities. If significant judicial or administrative disputes (including, inter alia, judicial or administrative disputes related to application of antitrust rules) were resolved unfavourably to the Company, that could have negative financial consequences for the Company, and also could affect its reputation. Section IV.20.8 of this Prospectus describes the main lawsuits that the Company is a party to.

The economic amount of all the litigation in progress with calculable amounts that the Company has knowledge of amounts to approximately 592.6 million Euros, of which some 490.75 million Euros would be covered by the indemnity agreement signed by Iberdrola, S.A. and IBERDROLA RENOVABLES and described in section IV.19.4 of this Prospectus. Nevertheless, most of the Company's lawsuits are of an indeterminate sum. Therefore, the preceding figure cannot be considered to be indicative of the maximum theoretical risk associated with the Company litigation in the case of all of these being settled in a manner that is unfavourable to its interests.

Of the litigation identified in section IV.20.8, the Company has made provision for the procedures relating to Iberdrola Energías Renovables de Castilla-La Mancha, S.A. Unipersonal, NA General Partnership and Enstor Waha for an overall amount of 367.81 million euros (despite part of said amount being covered by Iberdrola, S.A.'s indemnity obligation under the indemnity agreement).

## **18. Obligations to dismantle facilities and remove turbines**

In some countries the Company, by regulatory provision or by contract, must dismantle the energy facility it operates and return the site upon completion of the term for operation that could entail the obligation to present guarantees in relation to the compliance with said obligations.

The Company believes that the costs of dismantling the facilities will be covered by the residual value of the dismantled equipment, but that cannot be guaranteed. Also, any significant increase in such costs could have a material adverse effect on the Company's business, financial status or results of operations.

e) **Risks associated with the Financial Information contained in the Prospectus**

**1. Difficulty of comparison of financial statements**

By virtue of the Restructuring Transaction the Company has incorporated within its consolidation the companies in the Scottish Power group that engage principally in activities of electricity generation from renewable energy sources, commencing operation as an integrated group starting on 3 October 2007.

Basically, these incorporations consist of Scottish Power Holdings Inc. (SPHI), a United States company which is a leader amongst the companies of that country, and the ten British companies that are involved with the undertaking and exploitation of wind farms in the United Kingdom and Ireland (the BRITISH WIND FARMS).

As a result of this integration, the Company, in its current configuration, has no historical financial statements. Therefore, only limited historical financial information is available for evaluation of the Company and its future prospects. Such prospects may be based on historical data (which do not include the companies included in the consolidation by virtue of the Restructuring Transaction) that are not comparable with future periods and are not indicative of the future results of operations, financial conditions and cash flows.

The historical financial information of IBERDROLA RENOVABLES contained in this Prospectus does not reflect what the operating results, financial status and cash flows of the Company would have been had the results of the companies in the Scottish Power group integrated into the IBERDROLA RENOVABLES Group during the periods affected by the financial information presented been included. As a result of this integration, the financial information presented may not be representative of the Company's operating results, financial status and cash flows.

**2. Unaudited pro-forma information**

The *pro-forma* financial information that has not been audited has been exclusively presented for informative purposes and is presented in consolidated form:

- (i) the balance sheet and income statement of IBERDROLA RENOVABLES, SPHI and the BRITISH WIND FARMS at 31 December, 2006 as if the Restructuring Transaction had taken place on 1 January 2006; and
- (ii) the balance sheet and the profit and loss account of IBERDROLA RENOVABLES, SPHI and the BRITISH WIND FARMS for the nine-month period ending at September 30, 2007 as if the Restructuring transaction had taken place on January 1, 2007.

For further details about the preparation of these *pro-forma* financial statements, see section IV 20.2 of this Prospectus.

The unaudited pro-forma financial information does not represent the real operating results of the Company or seek to carry out any projection for the Company's operating results in any future period or for the financial situation of the Company at any future date and reflects no adjustment for restructuring debts or the impact of potential synergies arising from the Restructuring Transaction.

Also, the unaudited pro-forma financial information corresponding to the year ended 31 December 2006 includes the last complete financial year of IBERDROLA RENOVABLES (the fiscal year coinciding with the calendar year) and of the companies incorporated in its consolidation by virtue of the Restructuring Transaction (which fiscal year, except in the case of the companies CeltPower Ltd and Morecambe, inactive during that period, runs from 1 April 2006 to 31 March 2007). To the extent that the financial information of these companies has not been adapted in the unaudited pro-forma financial information and that the information for the last complete fiscal year, both of IBERDROLA RENOVABLES and of the companies included in the IBERDROLA RENOVABLES scope of consolidation by virtue of the Restructuring Transaction does not cover the same period of 12 months, that information may not be indicative of the future consolidated results of the combined group, due to differences in the market, the climate and other conditions varying between the two periods of 12 months. The different financial years also limit the comparability between the current financial statements resulting from the Integration Transaction with the historical financial information of IBERDROLA RENOVABLES.

The unaudited pro-forma financial information at 30 September 2007 includes the interim nine month period between 1 January 2007 and 30 September 2007, both for IBERDROLA RENOVABLES and for the companies included in its scope of consolidation by virtue of the Restructuring Transaction. Therefore, the pro-forma financial information for the nine month period between 1 January 2007 and 30 September 2007 includes, except in the case of CeltPower Ltd., the same financial information of the companies included in the IBERDROLA RENOVABLES scope of consolidation by virtue of the Restructuring Transaction for the three month period ended 31 March 2007 as included in the unaudited pro-forma financial information for the year ended on 31 December 2006.

Also, no audit has been conducted of the balance sheet or of the income statement of IBERDROLA RENOVABLES and of the US and British companies included in its scope of consolidation by virtue of the Restructuring Transaction for the nine month period closed 30 September 2007 that was used to prepare the pro-forma financial information for that period.

Furthermore, the financial statements of the ten British companies incorporated within the IBERDROLA RENOVABLES scope of

consolidation by virtue of the Restructuring Transaction, which have been consolidated under IFRS principles when it comes to preparing the unaudited financial statements, were prepared in the past in accordance with the accounting principles of its country (UK GAAP). Likewise, the financial statements of the United States companies used for the preparation of the unaudited *pro-forma* financial statements have been prepared according to US GAAP and the pro-forma financial information includes certain IFRS adjustments and other pro-forma adjustments.

The consolidated financial information relating to the British companies and the particular financial statements of each one of these do not include certain central costs or structural costs, particularly, (i) the costs of developing the portfolio of projects and (ii) certain support service costs provided by companies from their groups and the holding companies of these firms which include financial, human resources, legal advice, computing support and office services and other administrative cost, which the Company does not consider to be material for these purposes. Therefore the Net Operating Cost entry does not include all of the costs associated with the business undertaken by British companies incorporated into the perimeter of IBERDROLA RENOVABLES by virtue of the Restructuring transaction during the periods presented and this may not be indicative of returns or results of future operations. Nevertheless, the IBERDROLA RENOVABLES Group would incur operating costs relating to said services in the future.

As a consequence of the foregoing, the unaudited pro-forma financial information should not be taken as an indicator of the future operating results of the IBERDROLA RENOVABLES Group after incorporation therein of the companies included in the consolidation by virtue of the Restructuring Transaction, and investors are apprised of this circumstance.

### **3. Unaudited financial statements**

IBERDROLA RENOVABLES was not required to and, therefore, did not prepare or approve consolidated annual financial statements for the 2004 fiscal year under IFRS, to the extent that Spanish accounting principles did not require that audited consolidated annual statements be presented because the Company was a part of the Iberdrola Group.

For their part, the figures in the consolidated balance sheet and profit and loss statement of the Company and its subsidiaries for the 2004 fiscal year, prepared in accordance with IFRS (International Financial Reporting Standards), included in the comparative column of the audited consolidated financial statements of the Company and its subsidiaries prepared in accordance with IFRS for the 2005 fiscal year have not been audited.

In addition, the IBERDROLA RENOVABLES consolidated financial statements for the nine month period closed on 30 September 2007 and the ones for the same period of 2006, prepared merely for comparative purposes, have not been audited.

**4. Non-existence of interim six-month financial statements of the US and British companies included in the IBERDROLA RENOVABLES scope of consolidation by virtue of the Restructuring Transaction**

The United States companies and the ten British companies included in the IBERDROLA RENOVABLES scope of consolidation by virtue of the Restructuring Transaction are not obliged to prepare and have therefore not prepared interim financial statements for the six months between 31 March and 30 September 2007, or for the same period of the previous year.

The interim financial information of those companies for the nine month period closed on 30 September 2007, to the extent that it has been used in preparing the pro-forma financial information for that period, is presented in section IV.20.2 of the Registration Document.

In any event, inasmuch as interim financial information has not been prepared for the previous year (that is, for the nine month period closed on 30 September 2006), it is not possible to compare those nine month periods for purposes of assessing any possible financial or operating trends of those companies.

**2. RISK FACTORS FOR THE SECURITIES BEING OFFERED AND/OR ADMITTED TO TRADING:**

**(a) Risk associated with the subsequent sale of shares**

The sale of a substantial number of shares of the Company on the market after implementation of the Public Offer, or a perception that such sale may occur, may negatively affect the market price of the Company's shares.

Subject to certain exceptions, which are described in section III.7.3 of this Prospectus, the Company, Iberdrola, S.A. and Iberdrola Generación, S.A. (Unipersonal) have committed to the Global Coordinators not to resolve to issue, issue, offer, pledge, sell, contract to sell, pledge, or in any other way dispose of or transfer, directly or indirectly, shares of the Company or securities convertible to, exercisable or exchangeable for shares of the Company, warrants or any other instruments that may give a right to subscribe or acquire shares of the Company until the passage of one hundred and eighty days after the date of admission to trading on the Spanish stock exchanges of the shares of the Company, unless they have express prior written authorisation to do so from the Global Coordinators, which may not deny such authorisation without justification.

**(b) Non-existence of a prior trading market for the shares**

Prior to their admission for trading on the stock exchanges, there has been no prior regulated market for trading of the Company's shares. The price of the shares subject to the Offer will be determined by the Company and the Global Coordinators based, inter alia, on economic and market conditions on the date the price is determined, the Company's revenues and profits, market price valuations of companies engaged in businesses similar to those

conducted by the Company, the current status of the Company's operations, its management, interest shown by potential investors and other factors deemed to be relevant. The Company cannot ensure that the Offer price will truly reflect the market price of the shares after the Offer, and cannot guarantee that an active market for trading of the Company's shares will exist or be maintained. If this market does not develop, the liquidity and market price of the Shares could be affected.

Subscribers who buy shares in the Company in the Offer may experience immediate dilution, reflecting the difference between the price per share paid in the Offer and the net book value per share resulting from the Offer. This net accounting value per share is calculated by means of the division of the particular funds of the Company into the total number of shares following the Bid and this will be less than the price per share paid by investors as the particular shareholder equity prior to the capital increase at historical cost.

By mutual agreement with the Global Coordinators, an Illustrative and Non-Binding Price Range of between 5.3 and 7.0 euros per share has been established for the shares in the Company subject to the Offer, which implies assigning to the Company a stock market capitalization for all its shares of between 17,910 and 23,655 million euros approximately, prior to the capital increase that is the purpose of the Public Offer for Subscription, and of between 22,388 and 29,568 million euros, approximately, after the said capital increase (in both cases without taking the green shoe purchase option into account). Based on the pro forma consolidated financial statements for the year ended 31 December 2006, prepared in accordance with IFRS (International Financial Reporting Standards), the Company's stock market capitalization equates to a PER of between 70.0x and 92.4x prior to the share capital increase under the Public Offer for Subscription and a PER of between 87.5x and 11.5x., following said capital increase.

For information purposes, the average PER on the Madrid Stock Exchange (IGBM) at 31 December 2006, was 15.04.

The Price Range has been established without any independent expert assuming responsibility for the valuation that this Price Range gives the shares of the Company. The said Price Range has been established using company valuation principles that are generally accepted by the market for transactions of this type and factoring in the characteristics and circumstances specific to the Company and to the current situation on the international financial markets.

**(c) Risk associated with volatility of the price of the shares**

Over recent years the stock markets in Spain and worldwide have experienced significant volatility in terms of the volume of trading and the quoted prices of securities. In many cases these were not related to the results of the companies whose shares were admitted for trading on those markets.

Economic and market conditions may adversely affect the price of the Company's shares. The price of the shares once admitted to trading may be volatile and significantly affected by various factors related to the Company, its competitors, general economic conditions or conditions specific to the market for trading in renewable energy.

In addition, the price of the shares may be affected by circumstances such as: (i) variations in the revenues and profits of the Company or its competitors over successive periods of time; (ii) news regarding competitors or companies engaging in similar activities or news regarding the renewable energy sector, including news regarding operating and financial results of these companies, or technological advances in the sector; (iii) negative publicity; (iv) news regarding changes in the shareholdings in the Company or in the Company's management team or key personnel; and (v) other external factors beyond the control of the Company.

**(d) Dividend distribution policy**

The Company proposes distributing, on the basis of the financial year starting at January 1, 2008, a dividend of between 20% and 25% of the consolidated net profit that can be attributed to the controlling company in each financial year. In any event, the future dividend distribution policy will be agreed at the Company's General Shareholders' Meeting on the proposal of the Board of Directors. The payment of dividends is subject to the a periodic review of the current performance of the IBERDROLA RENOVABLES Group, its growth strategy and the finance requirements associated with such strategy, as well as of the restrictions that may be imposed under any future finance agreements. Consequently, no guarantee can be given that the Company will pay dividends, or, if dividends are distributed, that the dividends paid will increase over time.

**(e) Risks deriving from the fact that the shares of the Company are denominated in euros.**

The shares of the Company are denominated in euros. Investors resident in countries with currencies other than the euro face additional risks related to fluctuation of the euro. The Company cannot assure those investors that its business or the price of the shares will not be affected by currency fluctuations.

**(f) Risks associated with the possibility of foreign shareholders exercising preferential subscription rights**

Under Legislative Royal Decree 1564/1989 of December 22, whereby the consolidated text of the Public Limited Companies Act (hereinafter, the "Public Limited Companies Act") was passed into law, the shareholders in the Company have a preferential subscription right in respect of the number of shares necessary for them to maintain the same percentage interest in the Company as they hold prior to any issue of new shares, except in cases of exclusion or termination of the same. However, shareholders in countries other than Spain may not have the opportunity to exercise these preferential subscription rights if they do not meet

the requirements established under Spanish Company Law or where legally permitted exemptions apply.

In particular, and unless the shares are registered under the U.S. Securities Act or an exemption to the said registration requirement exists, shareholders resident in the United States of America may not have the opportunity to exercise preferential subscription rights in respect of the shares in the Company in the future. The Company can guarantee neither that the said registration requirements will be satisfied or that exemptions to the said requirement making it possible for shareholders of the Company resident in the United States of America are available and will be applied. Should a shareholder resident in the United States of America or in another country other than Spain be unable to exercise their preferential subscription rights, their interest in the Company may be diluted.

**g) Risks associated with the revocation of the Bid**

It is envisaged that the Company shares are to be listed for trading on September 13, 2007. If the listing for official trading of the entirety of the shares of the Company on the Stock Exchanges of Madrid, Barcelona, Bilbao and Valencia and its inclusion in the Spanish Stock Exchange Interconnection System does not take place at 24.00 hours of Madrid on January 14, 2008, the Bid will be considered to be revoked, the Company will purchase the newly-issued shares from the shareholders that have subscribed and paid-out or acquired then in the Offer, undertaking the refund of the investors, along with the relevant legal interest.

This Prospectus establishes that the Company may withdraw its offer, postpone it, or temporarily or indefinitely suspend it at any time before the price is established for the Company's shares set to take place on 11 December 2007, and the Company need not provide any reason for doing so.

**III. INFORMATION ON THE SECURITIES TO BE ISSUED - SHARE SECURITIES NOTE (ANNEX III OF COMMISSION REGULATION (EC) 809/2004 OF 29 APRIL 2004)**

**1. PERSONS RESPONSIBLE**

(01) Identification of persons responsible for the Securities Note

Mr. Xabier Viteri Solaun, in her/his capacity as Chief Executive Officer, for and on behalf of IBERDROLA RENOVABLES, S.A. Unipersonal (hereinafter “**IBERDROLA RENOVABLES**”, the “**Company**” or the “**Issuer**”), using the current authorisation granted for the purpose to her/him by the Board of Directors of the Company at its meeting of November 14, 2007, in exercise of the delegation conferred by the sole shareholder of the Company, Iberdrola, S.A. on the same date, assumes responsibility for the content of this note regarding the offered shares (hereinafter the “**Share Securities Note**”), the format of which is in accordance with Annex III of Commission Regulation (EC) 809/2004 of 29 April 2004.

**Statement of persons responsible for the Share Securities Note**

Mr. Xabier Viteri Solaun as representative represents that, after applying reasonable diligence to ensure that this is so, the information contained in this Share Securities Note is, to her/his knowledge, consistent with the facts and contains no omissions that could affect its content.

**Representations of the Global and Managing Coordinating Entities**

Banco Bilbao Vizcaya Argentaria, S.A. (“**BBVA**”) (represented by Ms. Isabel Bermejo Rodríguez and Mr. Agustín Fernández Fernández, duly authorised for this purpose), in its capacity as Global Coordinator of the public offer for subscription of shares of the Company (the “**Public Offer for Subscription**” or the “**Offer**”) and Lead Manager of the Retail and Employee Tranche, as well as the Spanish Tranche for Qualified Investors;

Credit Suisse Securities (Europe) Limited (“**Credit Suisse**”) (represented by Ms. Michelle Hill, duly authorised for this purpose), in its capacity as Global Coordinator of the Offer and Lead Manager of the International Tranche;

J.P. Morgan Securities Limited (“**JPMorgan**”) (represented by Mr. Manuel Esteve Herreros, duly authorised for this purpose), in its capacity as Global Coordinator of the Offer and Lead Manager of the International Tranche;

Merrill Lynch International (“**Merrill Lynch**”) (represented by Mr. Javier Oficialdegui, duly authorised for this purpose), in its capacity as Global Coordinator of the Offer and Lead Manager of the International Tranche;

Morgan Stanley [& Co. International plc] (“**Morgan Stanley**”) (represented by Mr. Javier de Busturia, duly authorised for this purpose), in its capacity as Global Coordinator of the Offer and Lead Manager of the International Tranche;

Santander Investment, S.A. ("**Santander Investment**") (represented by Mr. Ignacio Bastarrica Escala and Mr. Andrés Campos Calvo-Sotelo, duly authorised for this purpose), in its capacity as Lead Manager of the Retail and Employee Tranche, as well as the Spanish Tranche for Qualified Investors;

state that they have made the comparisons that, in accordance with generally accepted market criteria, have been reasonably necessary to verify that the information contained in this Share Securities Note regarding the terms and conditions of the Offer and the rights and obligations of the shares subject to the Offer is not false, nor are relevant data required by applicable legislation omitted.

## **2. RISK FACTORS**

See section "1.2. Risk Factors for the Securities Offered and/or Admitted to Trading" in section II (Risk Factors) of this prospectus (the "**Prospectus**").

## **3. KEY INFORMATION**

### **(01) Statement regarding working capital**

IBERDROLA RENOVABLES believes that the working capital currently available to the Company, together with the working capital it expects to generate in the next twelve months, is sufficient to meet the Company's current obligations as they fall due over the coming twelve months. To calculate the working capital, the Company has taken into account the cash and cash equivalents on the balance sheet (including that generated in the capital increase that is the subject matter of the Offer), plus the cash flow generated by its operations.

In section IV.10.1 of the Registration Document of this Prospectus the status and history of the Company's working capital over the last three years are explained.

### **Capitalisation and indebtedness**

The table below sets forth the principal figures of consolidated capital and reserves and the indebtedness of the Company (i) at 30 of September 2007; (ii) the adjustments resulting from the capital increases agreed by the Company on October 3, 2007 and November 5, 2007, in the context of the Re-structuring Operation (see section IV.19.1 of this Prospectus) and (iii) the adjustments resulting from the capital increase agreed by the Company used for this Public Offering, assuming a price of 6.15 Euros per share as the mean point of the indicative price band described in section 5.3.1 of this Note on the Shares; and (iv) the final total following the adjustments. The following information has not been audited, nor has it been approved by the management bodies of the Company.

(in millions of Euros)	Iberdrola Renovables at September 30, 2007	Adjustments Restructuring transaction	PO capital increase adjustments (1)	Total
<b>Liquid assets</b>	- 121.7	-255.6	-5.076.2	-5.453.5
<b>Current financial indebtedness</b>	2,945.5	719.9	0	3,665.4
<i>Debt with interest with     group companies</i>	2,803.4	549.7	0	3,353.1
<i>Financial debt</i>	142.1	170.2	0	312.3
<b>Non-current financial indebtedness</b>	942.4	229.5	0	1,171.9
<i>Debt with interest with     group companies</i>	377.1	22.8	0	399.9
<i>Financial debt</i>	565.3	206.7	0	772.0
<b>Financial indebtedness</b>	3,887.9	949.4	0	4,837.3
<b>Net financial indebtedness (2)</b>	3,766.2	693.8	-5,076.2	-616.2
<b>Capital instruments with financial liability characteristics</b>	0.0	550.6	0	550.6
<b>Net Equity of the controlling Company</b>	648.4	5,976.9	5,076.2	11,701.5
<b>Minority interests</b>	76.9	28.8	-	105.7
<b>Total Net Equity</b>	725.3	6,005.7	5,076.2	11,807.2
<b>Total Capitalization</b>	4,491.5	7,250.1	0	11,741.6

(1) Income from the Offer, with reference to the mid point of the indicative price range after deducting the expenses of the Offer detailed in section 8 of the Securities Note

(2) Does not include the financial derivatives for 11 million euros, which would reduce the net financial debt to 3,755. million euros on 30/09/2007 and, therefore, to -627.3 million euros in total.

With the exception of the foregoing, at 30 September 2007 to the date of registration of this Prospectus with the CNMV, there have been no significant changes in the information contained in the foregoing table.

#### **Interest of natural and legal persons involved in the issue/Offer**

BBVA is Global Coordinator of the Offer and Lead Manager of the Retail and Employee Tranche, as well as the Spanish Tranche for Qualified Investors. The Company and certain of its subsidiaries have bank accounts with BBVA. In addition, BBVA has provided bank guarantees for some subsidiaries of the IBERDROLA RENOVABLES Group, although these are generally counterguaranteed by Iberdrola, S.A. BBVA is also a participant in loans and credits extended to certain subsidiaries of the IBERDROLA RENOVABLES Group. Interest rate swap agreements have been

concluded to hedge the interest rates on these loans and credits with BBVA as the counterparty

In addition, a Portuguese subsidiary of IBERDROLA RENOVABLES regular invests its cash surpluses with BBVA.

Credit Suisse is Global Coordinator of the Offer and Lead Manager of the International Tranche. Credit Suisse is counterparty to PPM Energy Inc. ("PPM"), a U.S. subsidiary of IBERDROLA RENOVABLES, in certain contracts for the purchase and sale of gas and electricity in bilateral agreements and on organised markets. Credit Suisse also holds preference shares in C. Rokas, S.A., a Greek subsidiary of IBERDROLA RENOVABLES, representing more than 20% of the total number of preference shares issued, as well as ordinary shares representing 0.05% of ordinary share capital.

JPMorgan is Global Coordinator of the Offer and Lead Manager of the International Tranche. In the United States of America, the holding company of JP Morgan, JPMorgan Chase & Co (or other companies of its group); (i) acts as counterparty to PPM in certain contracts for the purchase and sale of gas and electricity in bilateral agreements and on organised markets; (ii) is a participant, as a tax equity investor, in contracts with PPM (Aeolus I and II) that provide financing for the wind farms that form part of the Aeolus projects (described in more detail in section 6.1.1. below); (iii) is PPM's agent in the transactions its makes on the New York Mercantile Exchange (NYMEX) and IntercontinentalExchange (ICE); (iv) has contracted gas storage in facilities belonging to a subsidiary of PPM; (v) makes investments on behalf of PPM on the money markets and (vi) is the provider of the credit cards used by PPM and (vii) is the banking institution responsible for the cash management of the affiliate companies of PPM. In this respect, the operation covers the opening of accounts, placement of surpluses and credit line for the granting of bank warranties.

Merrill Lynch is Global Coordinator of the Offer and Lead Manager of the International Tranche. In the United States of America, Merrill Lynch acts as counterparty to PPM in certain contracts for the purchase and sale of gas and electricity in bilateral agreements and on organised markets and has contracted gas storage in facilities belonging to a subsidiary of PPM.

Morgan Stanley is Global Coordinator of the Offer and Lead Manager of the International Tranche. In the United States of America, Morgan Stanley acts as counterparty to PPM in certain contracts for the purchase and sale of gas and electricity in bilateral agreements and on organised markets and is a participant, as a tax equity investor, in contracts with PPM (Aeolus I and II) that provide financing for the wind farms that form part of the Aeolus projects (described in more detail in section 6.1.1 below). Morgan Stanley also advised the Company in relation to the disposal of PacifiCorp. The Company has also entered into currency swap agreements with Morgan Stanley. Likewise, Morgan Stanley owns ordinary shares in C. Rokas, S.A. representing more than 2% of ordinary share capital.

Santander Investment is Lead Manager of the Retail and Employee Tranche, as well as of the Spanish Tranche for Qualified Investors. The Company and some of its subsidiaries hold bank accounts with the parent company of Santander Investment, Banco Santander, S.A. In turn, Banco Santander provided bank guarantees for some subsidiaries of the IBERDROLA RENOVABLES Group, although these are generally

counterguaranteed by Iberdrola, S.A. In addition, Banco Santander, S.A. is a participant in loans and credits extended to certain subsidiaries of IBERDROLA RENOVABLES. Interest rate swap agreements have been concluded to hedge the interest rates on these loans and credits with Banco Santander, S.A. as the counterparty. In addition, both Portuguese subsidiaries of IBERDROLA RENOVABLES regularly invest their cash surpluses with Banco Santander, S.A. Furthermore, the Company is currently negotiating a line of guarantees for certain U.S. subsidiaries of IBERDROLA RENOVABLES with Banco Santander, S.A.

Bilbo Bizkaia Kutxa and Caja de Ahorros de Valencia, Castellón y Alicante, BANCAJA, both of which are the Principal Underwriting Entities for the Retail and Employee Tranche, are significant shareholders in Iberdrola, S.A. with interests of 7.747% and 6.033% in its share capital respectively, and each has proposed the appointment of an independent director to the Board of Directors of Iberdrola, S.A. Bilbo Bizkaia Kutxa also has an interest in the capital of Norbolsa, S.V., S.A., Underwriter for the Spanish Tranche for Qualified Investors.

Caja de Ahorros de Murcia, the Main Insuring Institution of the Retail Tranche and for Employees, is a shareholder of Iberdrola, S.A. the holder of a 1% stake in its share capital. Likewise, Caja de Ahorros de Murcia has a 50% stake in the capital of the company, Energías Renovables de la Región de Murcia, S.A., and the remaining 50% of the share capital is owned by IBERDROLA RENOVABLES. Mr. Carlos Egea Krauel, director of IBERDROLA RENOVABLES representing a major shareholder proposed by Iberdrola, S.A., is the Managing Director of Caja de Ahorros de Murcia and Chairman of the Board of Directors of Energías Renovables de la Región de Murcia, S.A.

Caja de Ahorros de Salamanca y Soria (Caja Duero); the Main Insuring Institution of the Retail Tranche and for Employees, is a shareholder of Iberdrola, S.A. holding a 0.8% stake in its share capital. Mr. Julio Feroso García, director of IBERDROLA RENOVABLES representing a major shareholder proposed by Iberdrola, S.A., is the Chairman of Caja de Ahorros de Salamanca y Soria (Caja Duero).

Caja de Ahorros de Castilla La Mancha, the Main Insuring Institution of the Retail Tranche and for Employees, is a shareholder of Iberdrola, S.A. being the holder of a 0.69% stake in its share capital. Mr. Juan Pedro Hernández Moltó, a director of IBERDROLA RENOVABLES, representing a major shareholder proposed by Iberdrola, S.A., is the Chairman of Caja de Ahorros de Castilla La Mancha.

Aside from the interests described above, the Company is not aware of the existence of any significant relationship or economic interest whatever between IBERDROLA RENOVABLES and the entities that have participated in a Offer and are listed in section 10.1 of this Share Securities Note, except as regards the strictly professional relationship maintained by the Company with its auditors of accounts and, as regards the Offer, the relationships it maintains with the financial and legal advisors listed in the aforesaid section 10.1.

#### **Reasons for the Offer and use of proceeds**

It is envisaged that the funds raised in the capital increase related to the Public Offer for Subscription will initially be used to reduce the Company's debt with Iberdrola, S.A.,

although the ultimate purpose of the capital increase is to fund the Company's expansion plan. The Company also envisages that the Public Offer for Subscription will help it: (i) to expand the shareholding base of the Company so that it achieves the breadth necessary for official admission to trading of the shares of the Company on the Madrid, Barcelona, Bilbao and Valencia stock exchanges and their inclusion within the Exchange Interconnection System (Continuous Market); (ii) to give the Company access to the capital markets (including debt instruments), which eventually could facilitate obtaining future financing; and (iii) to strengthen the prestige, transparency and brand image of the Company as a result of status as a listed company.

#### **4. INFORMATION CONCERNING THE SECURITIES TO BE OFFERED/ADMITTED TO TRADING**

4.1 A description of the type and the class of the securities being offered and/or admitted to trading, including the ISIN (International Security Identification Number) or other such security identification number

The securities issued are common shares of the Company of 0.50 euros par value each, of a single class and series, giving their holders full voting and dividend rights.

The ISIN Code of the shares presently in circulation is ES0147645016.

The National Agency for Numbering Securities (Agencia Nacional de Codificación de Valores Mobiliarios), an agency under the National Securities Market Commission (Comisión Nacional del Mercado de Valores) (hereinafter "CNMV"), will assign an ISIN Code to identify the shares subject to this Public Offer for Subscription at the time of registration of the Prospectus for the Offer with the CNMV. Nevertheless, the shares object of the Offer will have their ISIN Code comparable with that of the Company shares presently in circulation prior to the start of the trading on the Stock Exchanges and the Stock Exchange Interconnection System.

4.2 Legislation under which the securities have been created. Indication of whether the securities are in registered or bearer form and whether the securities are in certificated or book-entry form. In the latter case, name and address of the entity in charge of making the book entries.

It is contemplated that the shares of the Company subject to this Offer will be represented by book entries and entered in the corresponding accounting registers maintained by Sociedad de Gestión de los Sistemas de Registro, Compensación y Liquidación de Valores, S.A.U. ("Iberclear"), with domicile in Madrid, Plaza de la Lealtad número 1, and its authorised affiliated participants (hereinafter the "Affiliated Participants").

#### **Currency of the securities issue**

The shares of the Company are denominated in euros (€).

#### **A description of the rights attached to the securities, including any limitations of those rights, and procedure for the exercise of those rights**

The holders of the shares that are being issued will have the rights and obligations inherent in their status as shareholders, as set out in the Corporations Act and in the

IBERDROLA RENOVABLES articles and bylaws. Subscribers for the shares will acquire status as shareholders of the Company when those shares are registered in their names in the accounting records of Iberclear and the Affiliated Participants.

In particular it is worth noting the following rights, on the terms contemplated in the articles and bylaws:

- **Dividend right:**

- Fixed date(s) on which the right arises

The offered shares will give the right to participate in dividends that are resolved to be distributed starting on the date on which IBERDROLA RENOVABLES declares it subscribes and pays out the capital increase object of the Bid which is contemplated for 12 December, 2007.

- Time limit after which entitlement to dividend lapses and an indication of the person in whose favour the lapse operates

The income produced by the shares may be collected in the manner to be announced in each case, the statute of limitations on the right to collect being as provided in article 947 of the Commercial Code, that is five years. The beneficiary of the statute of limitations will be the Company.

- Dividend restrictions and procedures for non-resident holders

The Company is not aware of the existence of any restriction on collection of dividends by non-resident shareholders, without prejudice to the applicable withholding for Non-Resident Income Tax, as described in section III.4.5 “(a.1.1) “Investment Income” below.

- Dividend rate or method of its calculation, regularity and cumulative or non-cumulative nature of payments

The issued shares, like the other shares comprising share capital, are all common shares and therefore are not entitled to a minimum dividend. Therefore, the dividend entitlement on those shares will only arise as from the time the General Shareholders Meeting or, if applicable, the Board of Directors of the Company resolves to distribute the company's profits to the shareholders.

- **Right to share in the issuer's profits**

The shares issued in connection with the Offer that is the subject matter of this Share Securities Note confer upon their holders the right to share in the Company's profits, on the same terms as the other shares of the Company.

- **Information rights**

The IBERDROLA RENOVABLES shares confer upon their holders the right to information as specified, on a general basis, in article 48.2 d) of the Corporations Act and, in particular, in article 112 thereof. They also enjoy the rights that, as special instances of the right to information, are specified in detail in the articles

of the Corporations Act in relation to amendment of the articles and bylaws, capital increases and reductions, approval of the annual financial statements, issue of convertible or non-convertible debentures, transformation, merger and split-up, dissolution and liquidation of the Company and other corporate acts or transactions.

- **Rights of attendance, voting and challenge of corporate resolutions**

The shares issued give their subscribers the right to attend and vote at the General Shareholders Meeting and to challenge the corporate resolutions approved thereat on the same conditions as the rest of the Company's shareholders, in accordance with the general rules established in the Corporations Act, in the IBERDROLA RENOVABLES articles and bylaws and in the Company's General Shareholders Meeting Regulations.

As provided in the Company's articles and bylaws, all shareholders holding any number of shares may attend the General Shareholders Meetings, provided that their shares are registered in the corresponding book entry accounting register of any of the Affiliated Participants in IBERCLEAR, five days prior to the holding of the meeting. Those attending must have the corresponding attendance card provided by the referenced Affiliated Participants, or the document that in accordance with law shows that they are shareholders.

Each share gives the right to one vote, with no limitation on the maximum number of votes that may be exercised by each shareholder or by companies belonging to the same group, in the case of legal persons.

Each shareholder having the right to attend may be represented at the General Meeting by another person, even if not a shareholder, in the manner contemplated in the articles and bylaws and the General Meeting Regulations.

- **Pre-emptive subscription rights and free assignment of security subscription offers of the same class**

As provided in the Corporations Act, all shares of the Company give their holders the right of pre-emptive subscription in capital increases with the issue of new shares (common, preferred or otherwise) and in the issue of convertible debentures, absent exclusion of the pre-emptive subscription right pursuant to article 159 of the Corporations Act.

Also, all shares of the Company give their holders the right of free assignment recognised in the Corporations Act itself, in the event of capital increases against reserves.

- **Right to share in any surplus in the event of liquidation**

The shares of IBERDROLA RENOVABLES give their holders, in the event of liquidation of the Company, the right to participate in the corporate assets remaining after satisfaction or deposit of the amount of the Company's debts.

- **Redemption clauses**

Not applicable.

- **Conversion clauses**

Not applicable.

**In the case of new issues, statement of the resolutions, authorisations and approvals by virtue of which the securities have been and/or will be created or issued**

Iberdrola, S.A., in its capacity as sole shareholder of the Company, decided on November 14, 2007, to proceed with a capital increase of IBERDROLA RENOVABLES for the sum of 422,406,490 Euros, by means of the issue of 844,812,980 new shares (of which 768,011,800 shares constitute the initial volume of the Subscription Policy and 76,801,180 additional shares will be subscribed by Iberdrola Generación S.A. (Unipersonal) with the aim of granting the *green shoe* option) and, to that end, it authorises the Board of Directors, under the provisions of article 153.1.a) of the Corporations Act, to set the terms, conditions and other characteristics of that Public Offer for Subscription in terms of that not expressly provided for by the sole shareholder. Also, as is typical in such transactions, Iberdrola, S.A. authorised the Company's Board of Directors to provide that, in the case of incomplete subscription, share capital could be declared to have been increased by the amount of the subscriptions actually made, and to redraft the corresponding article of the articles and bylaws related to share capital. To make the Public Offer for Subscription possible, Iberdrola, S.A. has waived its pre-emptive right to subscribe the new shares subject to the capital increase.

For its part, the Board of Directors of IBERDROLA RENOVABLES, at its meeting of November 14, 2007, delegated the setting of the remaining terms and conditions of the capital increases in the initial object of the Public Offer for Subscription with the exception of the type of issue. The Delegated Executive Commission has been empowered to set this.

Likewise, Iberdrola, S.A., in its status as sole shareholder of the Company, decided on November 5, 2007, to request the listing for trading of the shares of IBERDROLA RENOVABLES on the Stock Exchanges of Madrid, Barcelona, Bilbao and Valencia and on the Stock Exchange Interconnection System (Continuous Market), with the Board of Directors of the Company being empowered for the undertaking of said decision. The Board of Directors of IBERDROLA RENOVABLES adopted an identical resolution at its meeting of the same date.

**In the case of new issues, the contemplated date of issue of the securities**

Regarding the new shares to be issued under this Offer, it is contemplated that the issue of the shares will take place not later than December 12, 2006 (the deadline when it is expected that the capital increase that is the subject matter of this Prospectus will be declared to be closed), as specified in section 5.01.8 below in this Share Securities Note.

### **Description of any restrictions on the free transferability of the securities**

There are no restrictions on the free transferability of the shares.

### **An indication of the existence of any mandatory takeover bids and/or squeeze-out and sell-out rules in relation to the securities**

There is no special regulation governing mandatory takeover bids for shares of the Company, except as deriving from the regulations regarding public offers for acquisition contained in the Securities Market Act, with the amendments introduced by Act 6/2007 of 12 April 2007 amending the system for public offers for acquisition and transparency of issuers, by virtue of which the Spanish legal system is adapted to Directive 2004/25/EC of the European Parliament and of the Council of 21 April 2004, and Royal Decree 1066/2007, of July 27, on the regime concerning takeover bids, both in effect from 13 August 2007. These regulations will affect the shares of the Company from the time they are admitted for trading on the Madrid, Barcelona, Bilbao and Valencia stock exchanges.

There has been no other Public Offer for Acquisition of the Company's shares.

### **As regards the country of origin of the issuer and the country or countries in which the offer is being made or listing will be sought:**

- **Information on taxes on the income from the securities withheld at source**

#### **SPAIN**

There follows a general description, in accordance with the prevailing Spanish legislation (including its regulatory implementation) as at the date of approval of this Share Securities Note of the tax treatment of the acquisition, ownership and, if applicable, subsequent transfer of the securities that are offered.

It must be taken into account that this analysis does not explicitly address all possible tax implications of the aforesaid operations or the tax regime applicable to all categories of shareholders, some of which (such as, for example, financial entities, collective investment entities, cooperatives, "income-allocation entities" [entidades en atribución de rentas], etc.) may be subject to special rules. Nor does this description take into account the tax regimes in force in the historic local charter territories of the Basque Country and Navarre, nor the laws approved by the various regional governments that, with respect to certain taxes, may apply to the shareholders.

Therefore, investors and potential investors are advised to consult their attorneys or tax advisors, who will be able to give them personalised advice in view of their specific circumstances. Investors and potential investors must also be mindful of such changes as may occur in the future in the legislation currently prevailing or in the interpretation of that legislation.

### **Indirect taxation on the acquisition and transfer of the securities**

The acquisition and, if applicable, later transfer of the offered securities will be exempt from Transfer Tax and Stamp Duty (Impuesto sobre Transmisiones Patrimoniales y Actos Jurídicos Documentados) and from Value Added Tax (Impuesto sobre el Valor

Añadido), on the terms contemplated in article 108 of the Securities Market Act and related provisions of the laws governing those taxes.

### **Direct taxation arising from ownership and subsequent transfer of the securities**

#### **Shareholders resident in Spain**

This section analyses the tax treatment applicable to shareholders who are the beneficial owners of the offered securities of the Company, including those who have residence in Spain as well as non-resident taxpayers subject to the Income Tax on Non-Residents (Impuesto sobre la Renta de no Residentes; hereinafter “ITnR”) who operate through a permanent establishment in Spain, and natural person shareholders with residence in other European Union Member States (except in territories classified as tax havens) and to ITnR taxpayers who opt to be taxed under the Personal Income Tax (Impuesto sobre la Renta de las Personas Físicas; hereinafter “PIT”), according to the provisions of article 46 of the consolidated text of the ITnR Act.

Status as shareholders resident in Spain is considered to be held, for these purposes, without prejudice to the provisions of the Treaties for the avoidance of Double Taxation (hereinafter “Treaties”) signed by Spain, by entities resident in Spanish territory according to article 8 of the consolidated text of the Spanish Corporate Income Tax Act (texto refundido de la Ley of the Impuesto sobre Sociedades; hereinafter “CTCITA”) approved by Royal Legislative Decree 4/2004 of 5 March 2004, and the natural persons who have their habitual residence in Spain, within the meaning of article 9.1 of Act 35/2006 of 28 November 2006, on the Personal Income Tax and partial amendment of the laws governing the Corporate Income Tax, Income Tax on Non-Residents and Wealth Tax (hereinafter la “PIT Act”), as well as residents abroad how are members of Spanish diplomatic missions, Spanish consulates and other official offices, on the terms of article 10.1 of the said law. Spanish tax residence status will likewise apply to natural person shareholders who, having discontinued their tax residence in Spain, evidence their new tax residence in a tax haven, both for the tax period in which the change of residence takes place and for the ensuing four tax periods.

In the case of natural persons who acquire their tax residence in Spain as a result of their relocation to Spanish territory, they may choose to pay PIT or ITnR during the period in which the change of residence took place and the five ensuing periods provided the requirements of article 93 of the PIT Act are satisfied.

#### **(a) INDIVIDUALS**

##### **(a.1) Personal Income Tax**

##### **(a.1.1) Investment income**

According to article 25 of the PIT Act, income from investment securities is considered to include, inter alia, dividends, general meeting attendance premiums, the income arising from the establishment or assignment of rights or powers of use or enjoyment of the securities subject to the Offer and, in general, the distributions of IBERDROLA RENOVABLES profits, as well as any other benefit received from the said company owing to one's status as shareholder.

Investment income obtained by shareholders as a result of ownership of the offered securities will be included in the net amount obtained by deducting, if applicable, the administration and custody expenses from the gross amount, in the savings tax base for the year in which such income was payable to the recipient, and will be taxed at the fixed rate of 18%, with no deduction for avoidance of double taxation.

Nevertheless, according to section y) of article 7 of the PIT Act, an exemption from PIT, subject to a limit of 1,500 euros per year, will apply to dividends, general meeting attendance premiums and shares in the Company's profits, as well as to income obtained from any type of asset, except the grant of bonus shares, which pursuant to the articles of association or to a decision by the corporate bodies entitle the shareholder to share in the Company's profits.

The indicated exemption will not apply to dividends on securities acquired within the two months prior to the date the dividends are paid if, after that date, within the same term, there is a transfer of securities of the same kind.

The shareholders, in general, will also be subject to a withholding on account of the PIT of 18% of the full amount of the profits distributed. The withholding will be deducted from the final assessment payable in respect of that tax and, if the latter is insufficient, the taxpayer will be entitled to the refunds provided for in article 103 of the PIT Act.

#### **(a.1.2) Capital gains and losses**

Changes in the net worth of PIT taxpayers that arise as a result of a change in the assets and liabilities will give rise to capital gains or losses which, in the case of transfer for valuable consideration of the issued securities, will be quantified according to the negative or positive difference, respectively, between the purchase price of the securities and their sale price, which will be determined according to (i) their official trading quotation on the date of the sale or (ii) the price agreed for the sale if higher than the official quotation.

With respect to the foregoing, the acquisition value of the shares for tax purposes and for purposes of future transfers by employees that are allotted shares as a part of the Employee Tranche will be the Retail Price of the Offer.

Both the acquisition price and the transfer price will be increased or decreased, respectively, by the expenses and taxes inherent in such transactions.

Capital gains or losses arising as a result of transfers of the shares by the shareholders will be included in their respective savings tax bases for the year in which the change in net assets takes place, taxed at the fixed rate of 18% regardless of the holding period during which the gains or losses were generated.

Lastly, certain losses arising from transfers of subscribed securities will not be computed as capital losses if securities of the same kind have been acquired during the period between two months before and two months after the date of the transfer which originated the loss.

## **(a.2) Wealth Tax**

Shareholders who are natural persons with residence in Spain according to article 9 of the PIT Act are subject to the Wealth Tax (Impuesto sobre el Patrimonio, hereinafter "WT") for the whole of their net worth as at 31 December of each year, regardless of the place where the assets are located or where the related rights may be exercised. Without prejudice to the specific regulations approved, where such is the case, by each regional government, Act 19/1991 of 6 June 1991 for these purposes establishes an exemption threshold of 108,182.18 euros for 2007 and a tax scale with marginal rates running from 0.2% to 2.5%.

The obligation to file a return will exist in respect of this tax if the taxpayer's tax base is above the exempt minimum referred to above or, even if this circumstance is not fulfilled, the value of the taxpayer's properties and rights is higher than 601,012.10 euros in 2007. In this regard, those natural persons with tax residence in Spain who acquire offered securities and are obliged to file a WT declaration must declare the shares they hold at 31 December of each year, which will be computed according to the average quotation for the fourth quarter of that year. The average quotation is published each year by the Ministry of Economy and Finance.

## **(a.3) Inheritance and Gift Tax**

Transfers of shares for valuable consideration or (by way of inheritance or gift) to natural persons with residence in Spain are subject to the Inheritance and Gift Tax (Impuesto sobre Sucesiones y Donaciones, hereinafter "IGT") on the terms set forth in Act 29/1987 of 18 December 1987. The person liable for this tax is the one who acquires the securities, without prejudice to such specific laws and regulations as may have been approved by each regional government. The tax rate applicable to the net tax base ranges between 7.65% and 34%; once the full tax charge has been determined, a series of multipliers is applied. They depend on the pre-existing net worth and the degree of kinship of the transferee. These multipliers may eventually give rise to an actual tax rate of between 0% and 81.6% of the tax base.

## **(b) TAXPAYERS UNDER THE CORPORATE INCOME TAX**

### **(b.1) Dividends**

Taxpayers liable for the Corporate Income Tax (Impuesto sobre Sociedades, hereinafter "CIT") or those who, while subject to the ITnR, operate in Spain through a permanent establishment, will include in their tax base the full amount of dividends or shares in profits received as a result of ownership of the securities they have subscribed, as well the expenses inherent in the equity interest, in the manner provided in article 10 et seq. of the CTCITA, generally paying tax at a rate of 32.5% for tax periods beginning on or after 1 January 2007, and at a rate of 30% for those beginning on or after 1 January 2008.

If none of the events of exclusion provided for in article 30 of the CTCITA applies, taxpayers liable for this tax will be entitled to a deduction of 50% of the full tax charge on the tax base comprised of the dividends or shares in profits obtained. In this regard, the tax base is considered to be the full amount of such dividends and profit shares.

The above deduction will be 100% when, provided the rest of the requirements specified in the law are fulfilled, the dividends or profit shares come from a direct or indirect equity interest of 5% or more, and provided that interest has been held on an uninterrupted basis during the year preceding the date on which the profit distribution is payable or, in default thereof, that it be maintained during the time needed to complete the year.

CIT taxpayers will be subject to a withholding on account of the said tax of 18% of the full amount of the profit distributed, unless they qualify for one of the withholding exemptions provided for in the applicable laws and regulations. Notable amongst those exemptions is the possibility of applying the deduction for double taxation of 100% of the dividends received, in which case no withholding will be applied. The withholding applied will be deductible from the CIT charge payable and, if the latter is less than the withholding, the deductions provided in article 139 of the CTCITA will apply.

#### **(b.2) Income on the transfer of the securities**

The gain or loss arising from transfer of the shares for valuable consideration or by way of gift, or from any other change in net worth relating to the shares, will be included in the tax base of CIT taxpayers, or ITnR taxpayers who operate through a permanent establishment in Spain, in the manner set forth in articles 10 et seq. of the CTCITA, generally paying tax at a rate of 32.5% for tax periods beginning on or after 1 January 2007, and at a rate of 30% for those beginning on or after 1 January 2008.

In addition, on the terms provided in article 30.5 of the CTCITA, the transfer of shares by taxpayers subject to this tax may give the transferor a right of deduction for double taxation, and, if applicable, may qualify them for the deduction for reinvestment of extraordinary profits, according to the provisions of article 42 of the CTCITA, in respect of the part of the income that did not benefit from the deduction, provided that the requirements of the article are satisfied.

Lastly, in the event of acquisition of the shares free of charge by a CIT taxpayer, the income generated for the latter will likewise be taxed according to the rules of this tax, the IGT not being applicable.

#### **Shareholders not resident in Spain**

This section analyses the tax treatment applicable to shareholders not resident in Spain who are the beneficial owners of the securities, excluding those who operate in Spain through a permanent establishment and those who opt to be taxed as residents in Spain according to the arrangements described in section (b.1) above.

Status as non-resident shareholders applies to natural persons who are not PIT taxpayers and entities not resident in Spain according to the terms of article 6 of the consolidated text of the Income Tax on Non-Residents Act (texto refundido de la Ley of the Impuesto sobre la Renta de no Residentes, hereinafter "CTITnRA") approved by Royal Legislative Decree 5/2004 of 5 March 2004.

The tax rules described below are of a general nature. Therefore, the specific circumstances of each taxpayer must be taken into account, along with the provisions that may apply under the Treaties entered into by other countries and Spain.

## **(a) INCOME TAX ON NON-RESIDENTS**

### **(a.1) Investment income**

Dividends and other income arising from an equity interest in a company obtained by natural persons or entities not resident in Spain that operate for these purposes without a permanent establishment therein will be liable for the ITnR at the general tax rate of 18% of the gross amount received. Nevertheless, an exemption applies to the dividends and profit shares mentioned in section (a.1.2) above that are obtained, without a permanent establishment in Spain, by natural persons with tax residence in the European Union or countries or territories with which there is an effective exchange of tax information, subject to a limit of 1500 euros, computable during each calendar year. That exemption will not apply to income obtained through countries or territories officially classified as tax havens.

In addition, and as a general rule, the Company will apply an 18% withholding on account of the ITnR at the time the dividend is paid.

Nevertheless if, due to the tax residence of the payee, a Treaty to which Spain is a party or an internal exemption applies, the lower tax rate, if any, specified in the Treaty or the exemption will apply to income of this kind, upon prior demonstration of the shareholder's tax residence in the manner established in the applicable laws and regulations. For these purposes, there currently is a special procedure approved by the 13 April 2000 Order of the Spanish Ministry of Economy and Finance for applying withholdings to non-resident shareholders at the rate applicable in each case, or for non-application of the withholding, if the payment process involves financial entities domiciled, resident or represented in Spain that are custodians or manage the collection of the income on those securities.

In accordance with these rules, at the time the dividend is distributed the Company will apply withholding to the gross dividend amount at the 18% rate and transfer the net amount to the custodians. Such custodians as, in turn, demonstrate in the specified manner their customers' entitlement to application of lower rates or to exemption from withholding (for which purpose the customers must give the custodian, before the 10th day of the month following the dividend distribution month, a certificate of tax residence issued by the competent tax authority of their country of residence, with an express indication, where such is the case, that the investor is a resident within the meaning of the applicable Treaty; or, in those cases in which a tax limit applies under the Treaty that is implemented via an Order establishing the use of a specific form, the said form instead of the certificate) will immediately receive, for payment to the customers, the excess amount withheld. The certificate of residence mentioned above is valid, for these purposes, for one year after its issue date.

If an exemption applies or, by virtue of a Treaty, the withholding rate is less than 18%, and the shareholder was not able to demonstrate its tax residence within the time limit given for that purpose, the shareholder may file an application with the tax administration for refund of the excess withholding subject to the procedure and using the form provided for in the Ministerial Order of 23 December 2003. Shareholders are advised to consult with their advisors as to the procedure to follow in each case in order to request the refund from the Spanish tax administration.

The procedure set forth in the Order of the Spanish Ministry of Economy and Finance of 13 April 2000 that is described above will not apply as regards dividends or profit shares that, subject to a limit of 1,500 euros, are exempt from the ITnR on the terms indicated above. In this case, the Company will apply, at the time the dividend is paid, an 18% withholding on account of the ITnR, and the shareholder, if applicable, will have the right to file a request with the tax administration for refund of any excess withholding subject to the procedure set forth in the Ministerial Order of 23 December 2003.

In all events, once the relevant ITnR withholding has been applied or the exemption has been recognised, the non-resident shareholders will not be obliged to file an ITnR return in Spain.

**(a.2) Capital gains and losses**

According to the CTITnRA, capital gains obtained by non-resident natural persons or entities without a permanent establishment in Spain on transfer of securities, or any other capital gain relating to such securities, will be subject to tax under the ITnR. In particular, capital gains arising from the transfer of shares will be taxed under the ITnR at the 18% rate, unless an internal exemption or a Treaty signed by Spain applies, in which case the provisions of the said Treaty will apply.

In addition, by application of internal Spanish law, the following capital gains will be exempt:

- (i) Those arising from sale of the shares on official Spanish secondary securities markets, obtained without a permanent establishment by natural persons or entities resident in a country with which Spain has signed a Treaty with an exchange of information clause, provided they have not been obtained through countries or territories officially classified as tax havens.
- (ii) Those arising from transfer of the shares obtained without a permanent establishment by natural persons or entities resident in a European Union Member State or by permanent establishments of those residents located in another European Union Member State, provided they have not been obtained through countries or territories officially classified as tax havens. The exemption does not extend to capital gains arising from the transfer of shares or rights of an entity if (i) the assets of the entity primarily consist, directly or indirectly, of real estate located in Spain, or (ii) at any time during the twelve months prior to the transfer the taxpayer directly or indirectly held 25% or more of the capital or net assets of the issuer company.

The capital gain or loss will be calculated and subject to tax separately for each transfer, with no setoff being allowed of gains and losses on different transfers. Their quantification will be done applying the rules of article 24 of the CTITnRA.

According to the CTITnRA, capital gains obtained by non-residents without the involvement of a permanent establishment will not be subject to withholding or advance payment on account of the ITnR.

Non-resident shareholders will be required to file a return and, if applicable, determine and pay the corresponding tax obligation. The return and payment may also be made by the shareholder's tax representative in Spain or the custodian or manager of the shares, subject to the procedure and using the form provided in the Ministerial Order of 23 December 2003.

If an exemption applies, be it under Spanish law or a Treaty, non-resident investors must demonstrate their entitlement to such exemption by submitting a certificate of tax residence issued by the competent tax authority of their country of residence (which must expressly indicate that the investor is resident within the meaning of the applicable Treaty) or the form provided for in the Order implementing the applicable Treaty. The said certificate of residence is valid, for these purposes, for one year after its issue date.

**(b) WEALTH TAX**

Without prejudice to the provisions of the Treaties signed by Spain, the WT will apply to natural persons who do not have their habitual residence in Spain as provided in article 9 of the PIT Act and who as at 31 December of each year own property located in Spain or rights that may be exercised or are to be fulfilled in Spain. Such properties and rights will be the only ones taxed in Spain under the WT, without any reduction being made to the exempt minimum as specified in section (a.2) above, and applying the general scale for the tax, with marginal rates ranging between 0.2% and 2.5% for 2007.

In any event, the position of Spanish authorities is that the shares of a Spanish company should be considered property located in Spain for tax purposes.

In the event they are subject to the WT, the securities owned by non-resident natural persons and listed for trading on an official Spanish secondary securities market are computed at the average quotation for the fourth quarter of each year. The said average quotation is published each year by the Ministry of Economy and Finance for the purposes of this tax. The tax is applied by means of the self-assessments that must be filed by the taxpayer, or by the taxpayer's tax representative in Spain or the custodian or manager of the taxpayer's shares in Spain, subject to the procedure and using the form provided in the Ministerial Order of 23 December 2003.

Non-resident shareholders are advised to consult with their attorneys or tax advisors regarding the terms upon which the WT is to be applied in each specific case.

**(c) INHERITANCE AND GIFT TAX**

Without prejudice to the provisions of the Treaties to which Spain is a party, acquisitions for valuable consideration by natural persons not resident in Spain, regardless of the residence of the transferor, will be subject to the IGT if the acquisition involves properties located in Spain or rights that may be exercised or are to be fulfilled in Spain. In any event, the position of Spanish authorities is that the shares of a Spanish company should be considered property located in Spain for tax purposes.

Companies not resident in Spain are not subject to this tax and the income they obtain by way of consideration will generally be taxed as capital gains according to the ITnR

rules described above, without prejudice to the provisions of such Treaties as may apply.

Non-resident shareholders are advised to consult with their tax advisors on the terms upon which the IGT is to be applied in each specific case.

### **UNITED KINGDOM**

The summary that follows is based on the tax legislation of the United Kingdom and on the procedures of HM Revenue and Custom in force on the date of publication of this Prospectus. This description provides general guidelines for certain types of investors and does not constitute an exhaustive analysis of all tax consequences deriving from the acquisition, ownership, and, where applicable, transfer of shares in the Company under United Kingdom Law. It is not intended to constitute, nor should be considered to constitute, tax or legal advice. Shareholders that have any doubts as to their tax position or are subject to jurisdiction in a country other than the United Kingdom should consult a personal tax advisor.

Except where otherwise indicated, this summary covers only the principal tax consequences in the United Kingdom deriving from the ownership of shares in the Company for shareholders that (a) are residents or (in the case of capital gains tax) habitual residents of (and only of) the United Kingdom for tax purposes (although it should be remembered that special regulations, which are not described here, may apply to shareholders who are not domiciled in the United Kingdom) and (b) do not have a branch, agency or permanent establishment in Spain that is connected with the ownership of shares in the Company.

Furthermore, this summary (a) only looks at the tax implications for shareholders who are the beneficial owners of the shares and own the said shares as investments, and does not look at the tax implications that could be applicable for other types of owners, including, for example, securities agents or shareholders that have (or are deemed to have) acquired their shares by virtue of their office or employment and (b) assumes that the shareholder is not a company that directly or indirectly controls a percentage interest equal to or more than ten per cent of the voting rights in the Company.

#### **(a) Capital gains tax**

The sale of shares in the Company by an individual shareholder who is a resident or habitual resident of the United Kingdom may give rise to a taxable capital gain or a loss that is deductible for the purposes of capital gains tax. Individual shareholders who cease to be a resident or habitual resident of the United Kingdom for a period of less than five years and sell their shares in the Company during this period of time may, in application of anti-abuse legislation, remain subject to capital gains tax upon their return to the United Kingdom (subject to any exemptions or tax breaks that may apply).

Legal entities that own shares in the Company (and are residents or habitual residents of the United Kingdom) may apply certain tax deductions to reduce the amount of the capital gain recorded on the sale of the shares subject to capital gains tax, provided that the entity in question has owned the shares for at least one year, in the case of assets linked to its business activity, or at least three years, in the case of assets not linked to its business activity.

The sale of shares in the Company by shareholder that is a legal entity resident in the United Kingdom may give rise to a taxable capital gain or a loss that is deductible for the purposes of capital gains tax.

Shareholders that are legal entities resident in the United Kingdom are entitled to a deduction for inflation that will reduce any capital gains obtained insofar as (in general terms) such gains have arisen as a result of inflation. This deduction for inflation may reduce the amount of the capital gain subject to capital gains tax but may not be used to create deductible losses.

**(b) Taxation of dividends**

Holders of shares in the company that are resident in the United Kingdom, or are business owners or professionals active in the United Kingdom through a branch, agency or permanent establishment and have used or acquired the shares for the purpose of their business or profession or for the said branch, agency or permanent establishment, shall, as a general rule and depending on the individual circumstances of each shareholder, be subject to United Kingdom Income Tax or Company Income Tax (as applicable), on the gross value of the dividends received from the Company as a result of their ownership of ordinary shares, without taking into account for such purposes the value of any tax withholding that may have been applied to the said dividends in Spain.

The section relating to taxation in Spain included in this section 4.10 contains more information on the tax withholding applicable in Spain to the dividends paid by the Company.

Shareholders that are legal entities resident in the United Kingdom and are subject to United Kingdom Income Tax at a rate not exceeding the basic rate of taxation shall be subject to Income Tax on income deriving from dividends at the ordinary rate of taxation for this type of income (10% in 2007 and 2008). Individual shareholders resident in the United Kingdom that are subject to United Kingdom Income Tax at the maximum rate shall be subject to Income Tax on income deriving from dividends at the maximum rate established for this type of income (32.5% in 2007 and 2008).

**(c) Stamp Duty Reserve Tax ("SDRT")**

Stamp Duty Reserve Tax will be payable neither on the issue of the shares nor on the sale of shares, provided that the deed of sale is not executed in the United Kingdom and is not related to a property located in the United Kingdom or with any other asset or transaction that is concluded or may be concluded in the United Kingdom.

SDRT will be payable neither on the issue nor on any agreement for the sale of the shares.

**(d) Inheritance Tax**

United Kingdom Inheritance Tax may be payable following the death of a shareholder or, in certain circumstances, as a result of a gift made by the said shareholder, provided that this shareholder is an individual domiciled or considered to be domiciled in the United Kingdom. For Inheritance Tax purposes, the sale of shares at below the market

price may be considered to be a gift, and special tax rates may apply to those gifts on which the giftor retains a certain profit.

- **Indication as to whether the issuer assumes responsibility for the withholding of taxes at source**

The Company, as issuer and payer of the income that may arise from ownership of the securities, accepts responsibility for making the applicable tax withholdings in Spain in accordance with the applicable laws and regulations.

## **5. TERMS AND CONDITIONS OF THE OFFER**

- (01) Conditions, offer statistics, expected timetable and procedure for subscription of the Offer

### **5.01.1. Conditions to which the Offer is subject.**

The Offer is not subject to any condition. Nevertheless, the Offer is subject to the events of withdrawal and revocation described in section 5.01.4 below.

### **5.01.2. Total amount of the issue/Offer, distinguishing between securities offered for sale and those offered for subscription; if the amount is not fixed, description of the agreements and the time the definitive amount of the Offer will be announced to the public**

The initial overall nominal amount of the Offer (without including the shares corresponding to the green shoe purchase option referred to in section 5.2.5 below), is 384,005,900 euros, divided into 768,011,800 new common shares of 0.50 euros par value each.

The overall initial nominal value of the Offer may be increased if the Global Coordinators exercise the green shoe subscription option that Iberdrola Generación, S.A. (Unipersonal) contemplates granting to them on the terms described in section 5.2.5 below, for 76,801,180 newly-issued shares, with a par value of 0.50 euros each, together representing a nominal amount of 38,400,590 euros which said entity will subscribe and pay out on December 12, 2007 in the context of the capital increase of IBERDROLA RENOVABLES object of this Offer, in which case the overall nominal amount of the Offer may reach a maximum of 422,406,490 euros, comprised of a total of 844,812,980 shares.

The number of shares comprising the initial subject matter of the Offer represents approximately 18.18% of the share capital of IBERDROLA RENOVABLES, assuming full subscription of the capital increase underlying the Offer. That may be increased up to 20% of the share capital of the Company if the green shoe purchase option referred to in section 5.2.5 below is fully exercised.

The percentage of share capital of IBERDROLA RENOVABLES to be issued by virtue of this Offer was set at 20% of the share capital of the Company resulting from the same with the aim of meeting the requirements deriving from the United States tax regulations in order to conserve the tax neutrality of the Restructuring transaction of the United States affiliates of the Company (described in section IV.19.1 hereinbelow).

If the *green shoe* subscription option is not exercised, Iberdrola Generación, S.A. (Unipersonal) will study the most suitable formula for promoting an increase in the number of shares in the hands of shareholders outside the Iberdrola Group by means of the sale by Iberdrola Generación, S.A. (Unipersonal) of shares in IBERDROLA RENOVABLES of its ownership in the number necessary so that said percentage is equivalent to 20% of the share capital of IBERDROLA RENOVABLES (excluding, where applicable, the possible treasury shares related to the coverage for share incentive schemes) for the purpose of achieving a broader distribution of the shares of IBERDROLA RENOVABLES, and so increase the liquidity of the said shares. This initiative shall be taken, at any event, within one year of the date of the admission for trading of the shares in IBERDROLA RENOVABLES, even though, in the event that market conditions allow Iberdrola Generación, S.A. (Unipersonal) to obtain a price no lower than the Offer Price, and provided that the placement could be undertaken in an orderly manner and in a prudential period, the sale of shares of IBERDROLA RENOVABLES would take place on the basis of which said conditions arise and once six months have passed from the date of listing.

**5.01.3. The time period, including any amendments, during which the Offer will be open and description of the application process**

***Procedure for distribution of the Retail Subtranche***

Distribution of the Retail Subtranche will consist of the following phases, described in greater detail below:

Action	Date
Signature of the Underwriting Intention Protocol and Distribution Commitment for the Retail and Employee Tranche	21 November 2007
Registration of the Prospectus with the CNMV	22 November 2007
Beginning of the Term for Presentation of Subscription Orders	23 November 2007
Beginning of the Term for Revocation of Subscription Orders	
End of the Term for Presentation of Subscription Orders	
Establishment of the Maximum Retail Price	3 December 2007
Signature of the Underwriting and Distribution Agreement for the Retail Subtranche	
Public Offer Term: Beginning of the Term for Binding Subscription Applications	4 December 2007
End of the Term for Binding Subscription Applications	7 December 2007
End of the Term for Revocation of Subscription Orders	

Action	Date
Final allocation of shares to the Retail and Employee Tranches	Before 11 December 2007
Performance of the proration	
Establishment of the Retail Price	11 December 2007
Issue of public deed of execution and closure of the share capital increase, registration in the Company Register of Madrid, and the deposit of authorised copies of the deed in Iberclear, CNMV and the Bolsa de Madrid stock exchange.	12 December 2007
Allotment of shares to investors (“Dated of the Operation”)	
Admission to official trading	13 December 2007
Settlement of the Offer (“Settlement Date”)	17 December 2007
End of the stabilisation period	12 January 2008

Notwithstanding the foregoing, the Term of the Offer may be reduced or increased by decision of the Company, after nonbinding consultation with the Global Coordinators, at any time until establishment, if any, of the Maximum Retail Price, which will be notified to the CNMV by material disclosure not later than the working day following the adoption of the decision. In any such case the foregoing schedule will be adjusted, advancing or delaying the various milestones contemplated therein.

▪ **Procedure for making applications**

Applications may be made:

- From 8:30 a.m. Madrid time on 23 November 2007 until 2:00 p.m. Madrid time on 3 December 2007, both inclusive (within the opening hours established by each entity) (the “**Term for Presentation of Subscription Orders**”), by presentation of Orders (“**Orders**”). Such Orders will be revocable, in whole but not in part, until 2:00 p.m. Madrid time on 7 December 2007 (within the opening hours established by each entity).
- From 8:30 a.m. Madrid time on 4 December 2007 until 2:00 p.m. Madrid time on 7 December 2007, both inclusive (within the opening hours established by each entity) (the “**Term for Binding Subscription Applications**”), by presentation of irrevocable Subscription Applications (“**Applications**”).

▪ **General rules applicable to Orders and Applications**

Both Orders and Applications will comply with the following rules:

- (i) They must be presented exclusively to one of the Underwriters of the Retail Subtranche or, if applicable, their respective Related Distributors, as listed

in section 5.4.1 below in this Share Securities Note. Any change occurring in the identity of these entities will be the subject matter of information in addition to this Share Securities Note, published in the same manner as the Prospectus was published. The investor must open a current account and a securities account with the entity to which it presents its Order or Application, if it does not hold them in advance. The opening and closing of the accounts must be free of expenses and fees for the investor. As regards the expenses deriving from maintenance of such accounts, the indicated entities may apply the fees contemplated for that purpose in their respective fee schedules.

- (ii) They must be presented in writing and signed by the interested investor (hereinafter the “**Applicant**”) on the corresponding form that the Underwriter or Related Distributors must supply. No Order or Application will be accepted unless it includes all of the Applicant's identifying information as required by applicable legislation for this kind of transaction (first and last names or corporate name, address and taxpayer identification number (N.I.F.) or, in the case of non-residents of Spain that have no taxpayer identification number, passport number and nationality). In the case of Orders or Applications made in the name of minors, the taxpayer identification number of the minor must be stated or, if the minor has none, the minor's date of birth and the taxpayer identification number of the legal representative, without implying assignment of the taxpayer identification number of the representative to the application for purposes of control of the number of Orders or Applications made on a co ownership basis, or control of the investment maximum described in this Share Securities Note.
- (iii) In the handwriting of the Applicant, they must reflect the amount in euros the Applicant wishes to invest, which amount (absent revocation, in the case of Orders) will be applied to acquisition of shares at the Retail Price set after the Term for Binding Subscription Applications. It will nonetheless be acceptable for the amount to be mechanically imprinted, provided that that is done by the investor and the investor so confirms by an additional written signature thereon.
- (iv) The Orders and Applications for the Retail Subtranche also may be sent by Internet through those Underwriters and Related Distributors that are willing to accept Orders and Applications sent in this manner, and have sufficient means of ensuring the security and confidentiality of the corresponding transactions. In this regard:
  - The Applicant will comply with the rules for access and contracting via the Internet established by the Underwriter, and the latter in turn will be responsible for the authenticity and integrity of the Orders and Applications sent by that means, and will guarantee the confidentiality and filing of such Orders and Applications.
  - The Applicant, before proceeding to contract for the shares, may access the information regarding the Offer, in particular the Prospectus, via the Internet. If the Applicant decides to access the share contracting page, the entity must assure itself in advance that the

Applicant has filled in a field that ensures that it has had access to the Prospectus and the summary including this Prospectus as Chapter I (hereinafter the “**Summary**”).

- Thereafter the Applicant will access the share contracting page of the Company, where it will enter its Order or Application, the amount of which in euros may not be less than or greater than the minimum and maximum amounts established in the Prospectus. The Applicant also will have the option to revoke the Orders it has made on the same terms as revocations of orders placed physically at the branches of the Underwriters for the Retail Subtranche (or related distributors, if applicable). Such revocations must be total and not partial. Finally, the Applicant must enter the securities account number in which it wishes to have the subscription of shares of the Company entered, and the cash account to which it wishes to have the corresponding amount charged. If the Applicant has more than one cash and/or securities account opened with the Underwriter (or related distributor, if applicable), it must choose one of them. If the Applicant does not have any of such accounts with the Underwriter (or related distributor, if applicable), it must arrange for it on the terms established by that entity. Once the order is entered in the system, the system must allow the investor to obtain a confirmation of that order, containing the date and time thereof. The confirmation must be susceptible of printing on paper.

The Underwriters that accept Orders and Applications using this means have confirmed in writing in the Underwriting Intent Protocol and Distribution Commitment for the Retail Subtranche both the sufficiency of the resources used by those entities or their Related Distributors, if applicable, to ensure the security and confidentiality of the transactions using this means, and their commitment to indemnify the Applicants for any damage they may suffer as a result of breach by such entities or their Related Distributors, if applicable, of the conditions set forth in the Underwriting Intent Protocol and Distribution Commitment for the Retail Subtranche for the processing of Orders and Applications using such means.

- As regards the foregoing, the following entities will offer the possibility of processing Orders and Applications via the Internet:
  - BBVA.
  - Banco Español de Crédito, S.A.
  - Caja de Ahorros y Monte de Piedad de Madrid.
  - Caja de Ahorros de Valencia, Castellón y Alicante, Bancaja
  - Banco Popular Español, S.A..
  - Bankinter, S.A.

- Bilbao Bizkaia Kutxa, Aurrezki Kutxa eta Bahitetxea (BBK).
- Caixa d'Estalvis i Pensions de Barcelona ("la Caixa").
- Confederación Española de Cajas de Ahorro (CECA)
- Caja de Ahorros de Castilla-La Mancha.
- Caja de España de Inversiones, C.A.M.P.
- Banco de Finanzas e Inversiones, S.A. (Fibanc Mediolanum).
- Banco Guipuzcoano, S.A.
- Banco Pastor, S.A.
- Banco Sabadell, S.A.
- Caja de Ahorros Municipal de Burgos.
- -Caja Laboral S. Coop. de Crédito.
- Caja de Ahorros y Monte de Piedad de Navarra (CAN).
- Caja de Ahorros de Vitoria y Álava-Araba Eta Gasteiz Aurrezki Kutxa (Caja Vital).
- Caja de Ahorros y Monte de Piedad de Zaragoza, Aragón y Rioja (Ibercaja).
- Gaesco Bolsa, Sociedad de Valores, S.A.
- Caja de Ahorros y Monte de Piedad de Gipuzkoa y San Sebastián-Gipuzkoa eta Donostiako Aurrezki Kutxa.
- Renta 4 S.V., S.A.
- Uno-E Bank, S.A.
- Open Bank Santander Consumer, S.A.
- Arcalia Patrimonios, A.V., S.A.
- Banco de Andalucía, S.A.
- Banco de Castilla, S.A.
- Banco de Vasconia, S.A.
- Banco de Galicia, S.A.
- Banco de Crédito Balear, S.A.

- Bancopopular-e.com, S.A.
- Caja de Ahorros de la Inmaculada de Aragón.
- Caixa d'Estalvis de Girona.
- Caixa d'Estalvis Comarcal de Manlleu.
- Caixa d'Estalvis de Terrassa.
- Caixa d'Estalvis Laietana.
- Caixa d'Estalvis de Manresa.
- Caja de Ahorros y M.P. de Ontinyent.
- Caixa d'Estalvis del Penedès.
- Caixa d'Estalvis de Sabadell.
- Caixa d'Estalvis de Tarragona.
- Caja de Ahorros de Galicia.
- Caja General de Ahorros de Canarias.
- Caja de Ahorros de Santander y Cantabria.
- Caja de Ahorros y M.P. del Círculo Católico de Obreros de Burgos.
- Caja de Ahorros de Ávila.
- M.P. y Caja General de Ahorros de Badajoz.
- Caja de Ahorros y M.P. de Extremadura.
- Caja de Ahorro Provincial de Guadalajara.
- Caja Provincial de Ahorros de Jaén.
- Caja General de Ahorros de Granada.
- Caja de Ahorros de La Rioja.
- M.P. y Caja de Ahorros San Fernando de Huelva, Jerez y Sevilla.
- Caja de Ahorros y M.P. de Segovia.
- Caja de Ahorros y M.P. de Córdoba.

- Caja de Ahorros de Asturias.
- Caja de Ahorros de Pollença.
- Caja Insular de Ahorros de Canarias.
- Caja de Ahorros y M.P. de las Baleares.
- ACA Valores, S.V., S.A.
- CAI Bolsa, S.V. S.A.
- Ahorro Corporación Financiera, S.V. S.A.
- Banco Madrid, S.A.
- Norbolsa S.V.B., S.A.
- ING Direct NV (Sucursal en España).

(v) The Orders and Applications for the Retail Subtranche also may be submitted by telephone through those Underwriters that are willing to accept Orders and Applications submitted in this manner, after having signed an agreement with the Applicant by means of which the latter accepts an identification system consisting of at least a password that allows knowing and verifying the identity of the Applicant. In this regard:

- The Applicant will comply with the rules for access and contracting by telephone established by the Underwriter or Distributor (or related distributor, if applicable), and the latter in turn will be responsible for the authenticity and integrity of the Orders and Applications placed in that way, and will guarantee the confidentiality and filing of such Orders and Applications which will be made up of the recording of the conversations with the investors
- The Applicant, before requesting shares of the Company, must have had the Prospectus and the Summary available to it. If the Applicant indicates that it has not read it, it will be advised how to obtain it, and if it does not wish to do so, the information contained therein will be discussed with the Applicant.
- Thereafter, the Applicant will respond to each of the sections contemplated in the model Order or Application in its written form. The amount of the Order or Application may not be less than or greater than the minimum and maximum limits set in this Prospectus. The Applicant also will have the option to revoke the Orders it has made on the same terms as revocations of orders placed physically at the branches of the Underwriters for the Retail Subtranche (or related distributors, if applicable). Such revocations must be total and not partial. Finally, the Applicant must specify the securities account number in which it wishes to have the subscription of shares of the

Company entered, and the cash account to which it wishes to have the corresponding amount charged. If the Applicant has more than one cash and/or securities account opened with the Underwriter (or related distributor, if applicable), it must choose one of them. If the Applicant does not have any of such accounts with the Underwriter (or related distributor, if applicable), it must arrange for it on the terms established by that entity.

- The Underwriters that accept Orders and Applications using this means have confirmed in writing in the Underwriting Intent Protocol and Distribution Commitment for the Retail Subtranche both the sufficiency of the resources used by those entities or their Related Distributors, if applicable, to ensure the security and confidentiality of the transactions using this means, and their commitment to indemnify the Applicants for any damage they may suffer as a result of breach by such entities or their Related Distributors, if applicable, of the conditions set forth in the Underwriting Intent Protocol and Distribution Commitment for the Retail Subtranche for the processing of Orders and Applications using such means.
- As regards the foregoing, the following entities will offer the possibility of processing Orders and Applications by telephone:
  - Banco Español de Crédito, S.A.
  - Caja de Ahorros y Monte de Piedad de Madrid.
  - Caja de Ahorros de Valencia, Castellón y Alicante, Bancaja.
  - Banco Popular Español, S.A.
  - Bankinter, S.A.
  - Bilbao Bizkaia Kutxa, Aurrezki Kutxa eta Bahitetxea (BBK).
  - Confederación Española de Cajas de Ahorros (CECA).

- CAI Bolsa, S.V. S.A.
- Ahorro Corporación Financiera, S.V. S.A.
- Finanduro S.V., S.A. Sdad. Unipersonal.
- Banco Madrid, S.A.
- Norbolsa S.V.B., S.A.
- ING Direct NV (Sucursal en España).

(vi) The Instructions and the Requests will likewise be processed by mobile telephone that gives Access to those Underwriters that they are willing to accept Instructions and Requests processed by this route and they have previously signed a contract with the Petitioner whereby the latter accepts at least an identification system with a password that makes it possible to know about and authenticate the identity of the Petitioner. The Insuring Entity or Associate Placement Entity will be responsible for the authenticity and integrity of the Instructions and Requests processed by said route and will guarantee the confidentiality and filing of said Instructions and Requests.

- In the event of the Petitioner deciding to access the share contracting screen on a mobile phone, the Petitioner will first have to have completed a field that guarantees that the latter has had Access to the Prospectus Summary.
- Subsequently, the Petitioner will access the shares contracting screen of IBERDROLA RENOVABLES, in which its Instruction or Request will be introduced, whose amount in Euros will not be greater or less than the minimum or maximum limits set in this Note on the Shares. Finally, the Petitioner will input the account number of shares where it wishes that purchase price of the IBERDROLA RENOVABLES shares to be paid and the cash account where it wishes the relevant amount to be debited. If it has more than one cash account and/or stocks account opened with the Underwriter or Related Distributor, it will choose one of these. If the Petitioner has not contracted any of the said accounts in the Insuring Entity or Related Distributor, it will contract this on the terms set out by said entity. Once the order has been introduced into the system, this will make it possible for the investor to obtain confirmation of said order in which the date and

time of the same appears.

- The revocation of the Instructions, as applicable, will be carried out through the Telefónica Bank, Internet or at the office, in accordance with the applicable procedure for each one of said channels described in this Prospectus.
- The Insuring Entities that accept Instructions and Requests by this route have confirmed both the sufficiency of resources of its Entity and of its Related Distributors, as applicable, in writing in the Protocol of Intent regarding Underwriting and Commitment of Placement of the Retail Tranche, so as to guarantee the security and confidentiality of the transactions by these routes, as well as its commitment to indemnify the Petitioners for any damage or harm that the latter could suffer as a consequence of the breach by said Entity or its Related Distributors, as applicable, of the conditions set out in the Protocol of Intent regarding Underwriting and Commitment of Placement of the Retail Tranche for the processing of Instructions and Request by these routes.
- In relation to the preceding provision, the following entities will offer the possibility of processing Instructions and Requests by mobile telephone:

- Bankinter, S.A.
- Confederación Española de Cajas de Ahorros (CECA).
- Gaesco Bolsa, Sociedad de Valores, S.A.
- Caja de Ahorros de la Inmaculada de Aragón.
- Caixa d'Estalvis de Girona.

- (vii) The number of shares resulting from the request for subscription based on execution of the Order or Application will be the result of dividing the indicated amount in euros by the Maximum Retail Price, rounded downward.
- (viii) All individual requests presented by a given person will be grouped for purposes of control of maximums, constituting a single request for subscription, which will be counted as such.
- (ix) The entities receiving the Orders and Applications may require that the corresponding Applicants provide the funds necessary for their execution. If as a result of proration, cancellation of the application, withdrawal of the Offer or revocation it is necessary to return all or part of the funds provided to those who were allotted the shares, the return must be made with value the working day following the date of the allotment, cancellation, withdrawal or revocation.

If for reasons attributable to the Underwriters (or related distributors, if applicable) there is any delay beyond the indicated deadline for return of the excess or full amount of the funds provided, those entities must pay default interest at the legal interest rate for money (currently set at 5%) from that date until the date of payment to the Applicant.

- (x) The Underwriters (or related distributors, if applicable) must reject such Orders or Applications as do not comply with any of the requirements established for them.
- (xi) The Underwriters must send the Agent (which will act on behalf of the Company and immediately report to it and the Global Coordinators) and the Lead Managers the lists of Orders and Applications received on the dates and pursuant to the terms established in the respective Protocols or Agreements. The Agent may refuse to receive such lists of Applications and Orders as are not delivered by the Underwriters on the terms established in the respective Protocols or Agreements. The Underwriters that have not delivered the lists on time, or have delivered lists that are defective or contain material errors or omissions, will be exclusively liable to the investors for claims for damages or for any other reason deriving from the Agent's refusal to receive the indicated lists. No kind of liability may be attributed to the Company, the Agent or the other Underwriters.

- **Special rules applicable to the Orders**

The Orders will be irrevocable from the date presented until 2:00 p.m. Madrid time on 7 December 2007. A revocation of an Order must be presented to the entity where it was made, using the form provided by it for that purpose. The revocation may only apply to the total amount of the Order, partial revocations not being permitted. All of the foregoing is without prejudice to the fact that new Orders or Applications may be presented. If more than one Order has been presented, the Order to which the revocation relates must be clearly indicated. After the indicated term, the Orders that have not been expressly revoked will become irrevocable. They will be executed by the entity to which they were presented, at the price ultimately fixed for the Retail Subtranche, unless there is an event of total automatic revocation on the terms contemplated in this Prospectus.

In the event of revocation of an Order, the entity receiving the Order, on the day following the revocation, must return the funds, if any, it received to the investor. It may not collect any kind of expense or fee for the revocation.

The investors presenting Orders will have preference in the proration in the manner established in section 5.2.3 below in this Share Securities Note.

Not later than 11 December 2007 the shares will be finally allocated among the Retail and Employee Subtranches, and the proration, if any, will take place. The allotment of shares to investors will take place on 12 December 2007, in accordance with the schedule contemplated at the beginning of this section 5.1.3.

**Procedure for distribution of the Employee Subtranche**

The rules contained in the preceding section for the Retail Subtranche will apply to the

Employee Subtranche, with the specific provisions set forth below:

- The applications for subscription must necessarily be based on an Order, made during the Term for Presentation of Orders. Thus Applications for this Subtranche may not be presented during the Term of the Public Offer.
- On a general basis, Orders must be made from 8:30 a.m. Madrid time on the 23 November 2007 to 2:00 p.m. Madrid time on the 3 December 2007 (which date coincides with the end of the Term for Presentation of Orders for Subscription in the Retail Subtranche, completing this electronically and then printing, signing and presenting to any of the Insurance Entities of the Retail and Employee Tranche or of its Related Distributors the specific form of Order for the Employee Subtranche that will be made available via the Iberdrola Group's corporate intranet for employees resident in Spain, who may not present Orders in the Employee Subtranche via the Internet or by telephone.

As an exception, the employees of the IBERDROLA RENOVABLES Group resident in countries other than Spain must present the Orders from 8:30 a.m. Madrid time on 23 November 2007 to 2:00 p.m. Madrid time on 3 December 2007, using the procedure established for that purpose jointly by the Company and by Banco Bilbao Vizcaya Argentaria, the entity responsible for processing Orders presented by employees not resident in Spain (“**BBVA**” or the “**Processing Entity of Foreign Orders**”). In this regard, employees not resident in Spain must open a single-holder cash account in euros, and a single-holder securities account with BBVA, for which purpose the corresponding documentation has been sent to them, with the rest of the requirements set out beforehand in this section being applicable. The Company, together with the foreign companies of its group, will coordinate the process of drawing up the Instructions with said entity and the Agent Entity, and it will facilitate the preparation and revocation of the same, placing the computing application cited above for the completion of the Orders at the disposal of the non-resident employees and undertaking the receipt Orders and the forwarding this to the Processing Entity of Foreign Orders.

It will not be necessary for the employees to sign for the printed amount in the Orders.

- The Orders will be revocable from 8:30 a.m. Madrid time on 23 November 2007 to 2:00 p.m. Madrid time on 7 December 2007.
- Only one Order may be made per employee. It must reflect the amount in euros the employee wishes to invest, which amount must be within the minimum and maximum limits indicated in section 5.1.6 below in this Share Securities Note, to be applied to acquisition of shares at the Employee Retail Price indicated below.
- For purposes of the allotment, the number of shares into which the application for subscription based on execution of the Order of each of the employees will be converted will be the result of dividing the referenced quantity in euros by the Maximum Retail Price. In the case of fractions, the number of shares so calculated will be rounded downward to the next preceding whole number. That is, if the figure resulting from dividing the amount contained in the Order is, for example,

42.3, the number of shares ultimately allotted to the employee making the Order would be 42 shares.

- If any employee presents more than one Order in this Tranche, all of the Orders presented will be cancelled.
- If an Order is presented in this Tranche for an amount greater than the maximum limit indicated in section 5.01.6 below in this Share Securities Note, it will be deemed to have been made for that maximum amount, discarding the excess.
- Orders must be from a single person, it not being permissible for them to contain more than one owner. The owner must be the employee himself. If an Order contains more than one owner that Order will be cancelled.
- The Insurance Entities and the Processing Entity for Foreign Orders will not verify the employee status of investors presenting Orders in this Employee Subtranche. Notwithstanding the foregoing, the Insurance Entities and the Processing Entity for Foreign Orders must verify that the Orders presented in this Subtranche satisfy the other requirements specified for their presentation, as described in the Retail Subtranche, and reject those Orders that do not comply with any such requirement.
- Not later than 3:00 p.m. Madrid time on 7 October 2007, the Company will send the Agent a computer file, in the format previously agreed upon by the two parties, which will contain a list (first and last names and tax identification numbers) of the employees of the IBERDROLA RENOVABLES Group to whom this Subtranche is addressed who have placed Orders. The Agent will reject and not execute the Orders presented to the Insurance Entities and the Processing Entity for Foreign Orders by persons not appearing in the computer file.
- The employees who wish to do so may make Orders or Applications in the Retail Subtranche, regardless of whether they present Orders in the Employee Subtranche. In the case of Subscription Orders carried out in the Retail Subtranche, they will enjoy the preference established in section 5.2.3 below when they are shareholders of Iberdrola, S.A., in accordance with the terms thereof. The amounts of Orders and Applications in the Retail Subtranche will in no event be added to the amount of the Orders in the Employee Subtranche for application of the maximum limits per Order made in the Employee Subtranche, and vice versa.
- The Price in the Employee Subtranche (hereinafter the “**Employee Retail Price**”) will be equal to the Retail Price of the Offer.

**Procedure for distribution of the Spanish Tranche for Qualified Investors**

Action	Date
Signature of the Underwriting Protocol and Distribution Commitment for the Spanish Tranche for Qualified Investors	21 November 2007
Registration of the Prospectus with the CNMV	22 November 2007

Action	Date
Beginning of the Book-Building Term during which Subscription Proposals will be made by the investors	23 November 2007
End of the Book-Building Term	10 December 2007
Fixing the Price of the Tranche for Qualified Investors of the Offer	
Selection of Subscription Proposals	
Signature of the Underwriting Agreement for the Spanish Tranche for Qualified Investors	11 December 2007
Beginning of the term for confirmation of Subscription Proposals	
End of the term for confirmation of Subscription Proposals	12 December 2007
Allotment of shares to investors and Transaction Date	
Official admission to trading	13 December 2007
Settlement of the Offer	17 December 2007

▪ **Book-Building Term**

The Book-Building Term, during which qualified investors may present proposals for subscription of shares of IBERDROLA RENOVABLES (the “**Proposals**”), will begin at 8:30 a.m. Madrid time on 23 November 2007 and will end at 6:00 p.m. Madrid time on 10 December 2007.

During this Term the Underwriters of this Tranche will engage in dissemination and promotion of the Offer, in accordance with the terms of the Underwriting Protocol for the Spanish Tranche for Qualified Investors, in order to obtain from potential addressees an indication of the number of shares and the price at which each of them would be willing to subscribe shares of IBERDROLA RENOVABLES.

The presentation, receipt and processing of the Proposals will be pursuant to the following rules:

- (a) The presentation of Proposals for subscription of shares must be undertaken by the Applicant only through any of the Underwriters listed in section 5.4.1 below or its Related Distributors.
- (b) The Proposals must include an indication of the number of shares that each investor would be interested in subscribing and, if so, the price at which each investor might be willing to do so, the objective, consistent with international practice, being to achieve a better estimate of the characteristics of demand.
- (c) The Proposals constitute only an expression of interest of the addressees in the securities offered. Proposals are not binding on those making them, or on the

Company.

- (d) The Underwriters and Related Distributors must reject such Proposals as do not comply with any of the requirements therefor set forth in this Share Securities Note or applicable legislation.
- (e) The Underwriters and Related Distributors may demand that the Applicants make an advance of funds to ensure payment of the price of the shares. In such event, those Applicants will be refunded their advances of funds, free of any and all expenses or fees, with value not later than the working day following the date on which any of the following circumstances occurs:
  - (i) Non-selection or non-confirmation of the Proposal submitted by the Applicant (in the case of partial selection or confirmation of the Proposals made, the refund of the advance of funds will only affect the part of that Proposal that was not selected or confirmed).
  - (ii) Withdrawal of the Company from continuation of the Offer, on the terms contemplated in this Prospectus.
  - (iii) Automatic total revocation of the Offer, on the terms contemplated in this Prospectus.
  - (iv) Failure to sign by the Underwriter signing the Protocol of Intent regarding Underwriting and Commitment of Placement receiving the provision of funds of the Tranche Placement and Insuring Contract.

If for reasons attributable to the Underwriters or the Related Distributors there is a delay in return of the corresponding funds provided, those Underwriters must pay default interest at the legal rate of interest on money (currently set at 5%), which will accrue from the date the return should have been made (not later than the working day following the date on which any of the aforementioned circumstances arises) until the day of payment to the Applicant.

▪ **Selection of Proposals**

On 11 December 2007, after the fixing of the Price of the Tranche for Qualified Investors and prior to commencement of the term for confirmation of Proposals, BBVA and Santander Investment, in their capacity as the entities responsible for maintaining the Book of Proposals for this Tranche, will prepare a proposal for allotment of shares that will be presented, together with the Book of Proposals for the Spanish Tranche for Qualified Investors, to IBERDROLA RENOVABLES.

On the basis of this proposal, IBERDROLA RENOVABLES, after non-binding consultation with the Global Coordinators, will proceed to evaluate the Proposals received, applying investment quality and stability criteria, verifying that the Proposals have been presented in writing, signed with an indication of the price. They may accept or reject any of the Proposals, in whole or in part, in their full discretion and without need of any reason, unless the referenced rejection results in exercise of the underwriting, seeing to it that there is no unjustified discrimination among Proposals of the same rank and characteristics.

The Lead Managers will notify each of the Underwriters of the price per share, the number of shares finally allotted to the Spanish Tranche for Qualified Investors, and the list of Proposals selected from among those received by each Underwriter, prior to commencement of the term for confirmation of Proposals.

▪ **Confirmation of Proposals**

Confirmation of the selected subscription Proposals will be governed by the following rules:

- (a) The term for confirmation of the selected Proposals will begin when the investors are notified of the selection of their Proposals and the Price of the Tranche for Qualified Investors of the Offer, and will end at 8:30 a.m. on the Transaction Date.
- (b) During the term for confirmation each of the Underwriters will notify each of the Applicants that have made Proposals to them of the selection of their Proposals and the Price of the Tranche for Qualified Investors. It will advise them that, if they wish, they may confirm the selected Proposal until 8:30 a.m. on the Transaction Date, and warn them that in any event, if the confirmation is not given, the selected subscription Proposal will have no effect.

If any of the entities that have received the Proposals has not signed the corresponding Underwriting and Distribution Agreement, the notice referred to in the preceding paragraph will be given by the entities responsible for maintaining the books of the Spanish Tranche for Qualified Investors. They will also advise the Applicants that they may confirm their selected Proposals with them.

- (c) The confirmations of the selected Proposals will be made by the Applicants to the Underwriters to which they made those Proposals. By way of exception, when the entity before which they presented those proposals does not become an Underwriter because it does not sign the corresponding Underwriting and Distribution Agreement, the confirmations may be made to the entities responsible for maintaining the books of the Spanish Tranche for Qualified Investors.
- (d) Confirmed Proposals will be converted into firm subscription orders and will be irrevocable.

▪ **Applications other than the Proposals initially selected and new Proposals**

By way of exception, during the term for confirmation of Proposals, proposals other than those initially selected or new Proposals may be accepted, but may only be allotted shares if accepted by the Company, after non-binding consultation with the Global Coordinators, provided that the confirmations of selected Proposals do not cover all of the Offer within the Spanish Tranche for Qualified Investors.

No Applicant, absent express authorisation of IBERDROLA RENOVABLES, after non-binding consultation with the Global Coordinators, may confirm Proposals for a number of shares greater than the number of shares previously selected.

▪ **Remittance of applications**

On the last day of the term for confirmation of Proposals, that is the 12 December 2007, each Underwriter that, if applicable, signed the Underwriting and Distribution Agreement, before 9:00 a.m. Madrid time will report to the entities responsible for maintaining the books of the Spanish Tranche for Qualified Investors, which in turn will report to the Company and the Agent, regarding the confirmations received, indicating the identity of each Applicant and the final amount requested by each of them.

**Procedure for distribution of the International Tranche for Qualified Investors**

The procedure for distribution of the International Tranche for Qualified Investors will be the same as that described for the Spanish Tranche for Qualified Investors, with the applicable specific provisions, if any.

**5.01.4. An indication of when, and under what circumstances, the Offer may be revoked or suspended and whether revocation can occur after dealing has begun**

**Withdrawal**

The Company expressly reserves the right to withdraw from the Offer, postpone it, defer it or suspend it, temporarily or indefinitely, at any time prior to the final establishment of the price of the Company's shares (contemplated for the 11 December 2007), and in any event prior to signature of the Underwriting Agreements for the Tranches for Qualified Investors, for any reason and with no requirement that the Company justify its decision. The withdrawal will apply to all Tranches of the Offer, and will result in cancellation of all unrevoked Orders in the Retail and Employee Tranche, all Applications for subscription for the Retail Subtranche, and all Proposals for subscription of the Tranches for Qualified Investors. Therefore the obligations assumed by the Company and Applicants deriving therefrom will be extinguished.

Except as may be provided in the Protocols and Agreements entered into within the framework of the Offer, the fact of withdrawal will not result in liability of the Company to the Global Coordinators, the Lead Managers, the Underwriters, the Related Distributors or the individuals or legal persons that have made Orders or Applications or Proposals, nor liability of the Global Coordinators, the Lead Managers, the Underwriters or the Related Distributors to such individuals or legal persons as have made Orders or Applications or Proposals, without prejudice to the agreements regarding expenses included in the Retail Underwriting Protocol and those, if any, included in the Underwriting Agreements or otherwise agreed upon by the interested parties. Therefore, without prejudice to the foregoing, they will have no right to claim payment of damages or any indemnification by reason of the mere fact that the Offer has been withdrawn.

In this case, the entities that have been provided with funds by investors must return them, free of fees and expenses and without interest, with value on the working day following the day of notice of withdrawal. If there is a delay in returning the funds for reasons attributable to those entities, they must pay default interest, accruing from the working day following the date of publication of the withdrawal to the date of actual payment, at the legal interest rate (currently set at 5%).

The Company must give notice of the withdrawal to the CNMV, to the Global Coordinators and to the Agent, the day it occurs and as quickly as possible, and thereafter publish it in at least one newspaper of national circulation, not later than the working day after the notice.

**Total automatic revocation**

All Tranches of the Offer will be automatically revoked in the following cases:

- (i) If the Offer is suspended or voided by any competent governmental or judicial authority.
- (ii) If there is no agreement of the Company and the Global Coordinators to set the prices of the Offer as referred to in section 5.3 below of this Share Securities Note.
- (iii) If the Underwriting and Distribution Agreement for the Retail Subtranche has not been signed before 03.00hrs Madrid time on 4 December 2007.
- (iv) If the Underwriting and Distribution Agreement for the Spanish Tranche for Qualified Investors has not been signed before 03.00hrs Madrid time on 12 December 2007.
- (v) If the Underwriting and Distribution Agreement for the International Tranche has not been signed before 03.00hrs Madrid time on 12 December 2007.
- (vi) If any of the Underwriting and Distribution Agreements is terminated based on the grounds contemplated therein at any time prior to 8:00 p.m. Madrid time on 12 December 2007.
- (vii) In the case in which, some or any of the entities signing the relevant Protocols of Underwriting not having been granted, or any of the entities which it is planned to sign the International Tranche Underwriting Contract, and the relevant Tranche Placement and Underwriting Contract, none of the other Underwriting Entities nor any third party financial institution approved by the Company in accordance with the Global Coordinating Entities, is interested in assuming the commitment of insurance that has been planned for the Underwriting Entity that withdraws, unless the Company, acting in mutual agreement with Global Coordinating Entities, decides to continue with the Offer. In the latter case they would inform the CNMV, by means of the recording of a Supplement to the Prospectus, and they would make this public on the day on which they take place or the next business day through the same means in which the Prospectus was made public, indicating the Entity that withdraws, the number of uninsured shares and the Tranche that said shares correspond to.

Total automatic revocation of the Offer will result in the voiding of all unrevoked Orders in the Retail and Employee Tranche, all Applications in the Retail Subtranche and all Proposals in the Tranches for Qualified Investors that have been presented, selected and confirmed, if applicable.

Therefore the Company will not be required to issue the shares, nor will the investors be required to subscribe them. Also, if the automatic revocation of the Offer occurs after

the newly-issued shares subject to the Offer have already been subscribed and paid in, the Company will proceed to revoke the resolution (and return the amount paid in by the pre-financing entity) or to purchase the newly-issued shares from the shareholders that have subscribed and paid for them, as soon as the legal requirements to that end have been satisfied. Thereafter it will reduce its share capital (by retirement of the treasury shares acquired) in an amount equal to the capital increase made within the framework of the Offer. The creditors of the Company will have no right of opposition whatever. All of the foregoing is for the purpose of returning to the shareholders the amount paid in for the subscribed shares. This reduction will be carried out by virtue of the resolution for reduction of capital subject to a condition precedent, approved for that purpose by Iberdrola, S.A., the sole shareholder of the Company, on November 14, 2007.

The purchase price that the Company will pay to the shareholders subscribing in the Offer will be paid at the time of purchase of the shares. It will be equal to the sum of the par values of the shares and their issue premium paid by the share subscribers, increased by legal interest (currently set at 5% per annum) from the date of payment for the shares by the subscribers to the date of payment of the purchase price by the Company.

For these purposes, it is noted that by presenting the Orders, Applications or Proposals in the various Tranches of the Offer the subscribers of new shares of the Company pursuant to the Offer will expressly consent to that purchase of shares subscribed within the framework of the Offer by the Company on the terms and conditions described in the resolution adopted by the sole shareholder of the Company, as will the Global Coordinators, as the pre-financing entities, in the Underwriting Agreements for the Offer.

The Underwriters for the Retail and Employee Tranche or the Tranches for Qualified Investors, or the Related Distributors and the Agent, if applicable, that have been provided with funds from investors must return those funds, free of fees and expenses, and without interest, with value on the working day following the revocation. If there is a delay in returning the funds for reasons attributable to those entities, they must pay default interest, accruing from the working day following the date of revocation to the date of actual return, at the legal interest rate (currently set at 5% per annum).

In the event of total automatic revocation, the Company will so notify the CNMV, the Global Coordinators and the Agent, as quickly as possible, and publicise it by publication in at least one newspaper of national circulation, not later than the working day following that of the referenced notice, without prejudice to complying with the provisions of article 170 of the Corporations Act.

Except as provided in the Underwriting Agreements for the Offer, the fact that the Offer is revoked will not result in liability of the Company to the Global Coordinators, the Lead Managers, the Underwriters, the Related Distributors, if any, or the individuals or legal persons that have presented Orders, Applications or Proposals, nor liability of the Global Coordinators, the Lead Managers, the Underwriters or the Related Distributors, if any, to the Company or to the individuals or legal persons that have presented Orders, Applications or Proposals, without prejudice to the agreements regarding expenses included in the Underwriting Protocol or the Processing Agreement for the Employee Subtranche and those, if any, included in the Underwriting Agreements, or otherwise agreed upon by the interested parties. Therefore, without prejudice to the foregoing,

they will have no right to claim payment of damages or any indemnification by reason of the mere fact that the Offer has been revoked.

**Revocation if the shares are not admitted to trading**

If the Company's shares are not admitted to stock market trading before midnight Madrid time on 14 January 2008, all Tranches of the Offer will be deemed to be automatically revoked.

As a result thereof, the Company will proceed to purchase the newly-issued shares from the shareholders that subscribed and paid for them, as soon as the legal requirements therefor are satisfied. Thereafter it will reduce its share capital (by redemption of the treasury shares acquired) in an amount equal to the amount of the capital increase made within the framework of the Public Offer for Subscription. The Company's creditors will have no right of opposition whatever. All of the foregoing is for the purpose of returning the amount paid for the subscribed shares to the shareholders. This reduction will be carried out by virtue of the resolution for reduction of capital subject to a condition precedent, approved for that purpose by Iberdrola, S.A., the sole shareholder of the Company, on 14 November 2007.

The purchase price that the Company will pay to the shareholders subscribing in the Public Offer for Subscription will be paid at the time of purchase of the shares. It will be equal to the sum of the par values of the shares and their issue premium paid by the share subscribers, increased by legal interest (currently set at 5% per annum) from the date of payment for the shares by the subscribers to the date of payment of the purchase price by the Company.

For these purposes it is noted that, by presenting the Orders, Applications and Proposals in the various Tranches of the Offer, the subscribers of new shares of the Company pursuant to the Offer will expressly consent to that purchase of shares subscribed within the framework of the Offer by the Company on the terms and conditions of the resolution adopted by the sole shareholder of the Company, as will the Global Coordinator(s), as the pre-financing entities, in the Underwriting Agreements for the Offer.

In the event of revocation of the Offer for this reason, the Company will so notify the CNMV, the Global Coordinator(s) and the Agent, as quickly as possible, and publicise it by publication in at least one newspaper of national circulation, not later than the working day following that of the said notice, without prejudice to complying with the provisions of article 170 of the Corporations Act.

Except as provided in the Underwriting Agreements for the Offer, the fact that the Offer is revoked will not result in liability of the Company to the Global Coordinator(s), the Lead Managers, the Underwriters, the Related Distributors, if any, or the individuals or legal persons that have presented Orders, Applications or Proposals, nor liability of the Global Coordinator(s), the Lead Managers, the Underwriters, the Related Distributors, if any, to the Company or to the individuals or legal persons that have presented Orders, Applications or Proposals, without prejudice to the agreements regarding expenses included in the Underwriting Protocol or the Processing Agreement for the Employee Tranche and those, if any, included in the Underwriting Agreements or otherwise agreed upon by the interested parties. Therefore, without prejudice to the foregoing, they will

have no right to claim payment of damages or any indemnification by reason of the mere fact that the Offer has been revoked.

**5.01.5. Description of the possibility to reduce subscriptions and the manner for refunding excess amount paid by applicants**

There is no possibility of reducing subscriptions, without prejudice to the right to revoke the Orders or not confirm the Proposals under the circumstances contemplated in this Share Securities Note.

**5.01.6. Details of the minimum and/or maximum amount of application (whether in number of securities or total amount of the investment)**

**Retail and Employee Tranche**

**Retail Subtranche**

The minimum amount for which Orders and Applications may be made in the Retail Subtranche will be 1,500 euros and the maximum amount will be 60,000 euros, whether unrevoked Orders, Applications or the sum of the two.

Therefore applications for subscription made by a single Applicant in the Retail Subtranche will not be counted to the extent they exceed that maximum limit of 60,000 euros, whether the applications are for individual or co ownership.

Control of the maximums described in this section will be performed using the tax identification number or passport number of the Applicant. In the case of a minor the birthdate will be used. If birth dates coincide, the name of each minor will be used for this purpose.

For these purposes, Orders or Applications made in the names of multiple persons will be deemed to be made by each of them in the amount reflected in the Order or Application.

For purposes of computing the maximum limit per Applicant, when each and every one of the Applicants on multiple requests (whether based on Orders or Applications) are the same, they will be combined, constituting a single subscription request.

If any Applicant exceeds the investment limits the following rules will apply:

- Preference will be given to Orders over Applications, in such manner that the amount corresponding to the Applications involved will be eliminated, so that, as a whole, the Applicant's request does not exceed the investment limit. Thus, if a single Applicant presents one or more Orders that together exceed the established limit, and also presents Applications, the Applications presented will be eliminated.
- If it is necessary to reduce requests of the same kind (whether Orders or Applications), the excess will be reduced proportionally over the various kinds of Orders or Applications involved.
- For purposes of reducing the amount of requests of the same kind, if a single

Applicant makes different requests as a co-owner, the following will apply:

- (i) Requests reflecting more than one owner will be divided into as many requests as there are owners, assigning each owner the total amount reflected in the original request.
- (ii) All of the requests obtained in the manner described in section (i) with the same owner will be combined.
- (iii) If, taken as a whole, the requests of the same kind presented by a single owner in the manner provided in sections (i) and (ii) exceed the investment limit, that excess will be attributed (for subsequent elimination in accordance with the established rules) proportionally over the requests involved, taking into account the fact that if a request is affected by more than one instance of redistribution of excesses over limits the one applied will be the one having the greatest reduction of the final amount.

**EXAMPLE OF THE APPLICATION OF RULES ON INVESTMENT LIMIT CONTROL**

Underwriter	Nature	Applicant	Amount
Bank A	Individual Order	No. 1	60,000.00 euros
Bank B	Joint Orders	No. 1 and 2	48,000.00 euros
Bank C	Joint Orders	No. 2 and 3	30,000.00 euros
Bank D	Joint Orders	No. 3 and 4	36,000.00 euros
Bank E	Joint Orders	No. 4 and 5	36,000.00 euros

For the purposes of calculating the investment limit it shall be deemed that:

- No. 1 applies for Orders amounting to 108,000.00 euros (60,000.00 + 48,000.00)
- No. 2 applies for Orders amounting to 78,000.00 euros (48,000.00 + 30,000.00)
- No. 3 applies for Orders amounting to 66,000.00 euros (30,000.00 euros in Orders and 36,000.00 euros in Applications)
- No. 4 applies for Applications amounting to 72,000.00 euros (36,000.00 + 36,000.00)
- No. 5 applies for 36,000.00 euros

Therefore the applicants that exceed the investment limit are:

- No. 1 with an excess of 48,000.00 euros (108,000.00 – 60,000.00)
- No. 2 with an excess of 18,000.00 euros ( 78,000.00 – 60,000.00)
- No. 3 with an excess of 6,000.00 euros ( 66,000.00 – 60,000.00)

Considering that he has made Orders and Applications which taken together exceed 60,000.00 euros, the excess Applications made are removed.

- No. 4 with an excess of 12,000.00 euros (72,000.00 – 60,000.00)

These above excesses must be distributed among the affected applications, for which the following procedure will be carried out:

**Bank A:**

No. 1 = 48,000.00 (excess) x 60,000.00 (amount requested in Bank A) = 26,666.67

108,000.00 (total amount requested)

**Bank B:**

No. 1 = 48,000.00 x 48,000.00 = 21,333.33

108,000.00

No. 2 = 18,000.00 x 48,000.00 = 11,076.92

78,000.00

**Bank C:**

No. 2 = 18,000.00 x 30,000.00 = 6,923.08

78,000.00

**Bank D:**

No. 3 excess of 6,000.00

No. 4 = 12,000.00 x 36,000.00 = 6,000.00

72,000.00

**Bank E:**

No. 4 = 12,000.00 x 36,000.00 = 6,000.00

72,000.00

Given that the application made to Bank B is made by means of two different excess removal transactions, the higher will be applied and the relevant excesses will thus be eliminated deducting: from the application corresponding to Bank A: 26,666.67, from the application corresponding to Bank B: 21,333.33, from the application corresponding to Bank C: 6,923.08, from the application corresponding to Bank D: 6,000.00 and from the application corresponding to Bank E: 6,000.00, whereby the applications would be as follows:

Underwriter	Nature	Applicant	Amount
Bank A	Individual Order	No. 1	33,333.33 euros
Bank B	Joint Orders	No. 1 and 2	26,666.67 euros
Bank C	Joint Orders	No. 2 and 3	23,076.92 euros
Bank D	Joint Orders	No. 3 and 4	30,000.00 euros

Bank E	Joint Orders	No. 4 and 5	30,000.00 euros
--------	--------------	-------------	-----------------

Employee Subtranche

The Orders presented in the Employee Subtranche must be in a minimum amount of 500 euros and a maximum amount of 20,000 euros

Spanish Tranche for Qualified Investors

The Proposals may not be for amounts less than 60,000 euros. In the case of entities authorised to manage third-party securities portfolios, the limit will be by reference to all Proposals made by the management entity.

Such management entities, before making Proposals on behalf of their customers, must have signed the appropriate securities portfolio management agreements with them, including the management of equities. The portfolio management entities that are allotted shares in this Offer must, in turn, allot to each of their customers on whose behalf they have acquired the shares the minimum number of shares resulting from applying the provisions of section 5.2.3 below for the minimum allotment in the Retail and Employee Tranche, provided that they have received sufficient allotments.

International Tranche

The Proposals will not be for a sum less than 60,000 Euros.

**5.01.7. Indication of the term within which requests may be withdrawn, provided that investors are allowed to withdraw them**

As provided in section 5.1.3 above in this Share Securities Note:

- Only Orders presented in the Retail Subtranche may be withdrawn, in full, until 2:00 p.m. Madrid time on 7 December 2007. After that date, Orders that have not been expressly withdrawn will be irrevocable.
- Applications presented in the Retail Subtranche will be irrevocable.
- Proposals presented in the Tranches for Qualified Investors constitute only an expression of the interest of the addressees in the securities. Their presentation is not binding on those presenting them.
- Confirmations of Proposals in the Tranches for Qualified Investors will be irrevocable.

**5.01.8. Method and time limits for paying for the securities and for delivery thereof**

Payment for the securities

Independent of such provision of funds as may be required of investors, their payment for the shares finally allotted within the framework of the Offer will be made not earlier than the Transaction Date (12 December 2007), nor later than the Settlement Date (17 December 2007).

For purely documentary and operational reasons, and to facilitate registration of the newly-issued shares with the Commercial Register, settlement of the transaction and admission to trading of the Company's shares as quickly as possible, it is contemplated that the Global Coordinators, prior to the execution and registration of the public document increasing capital, not later than 08:30 a.m. Madrid time on 12 December 2007, acting in their own names but on behalf of the Underwriters for the Retail and Employee Tranche and the Tranches for Qualified Investors (who in turn act on behalf of those finally allotted the shares), covenant to the Company (by virtue of the Underwriting and Distribution Agreements for the various Tranches of the Offer) that they, in equal parts, will advance the payment corresponding to the capital increase for issue of the shares subject to the Public Offer for Subscription, therefore proceeding to subscribe and fully pay for those newly-issued shares. The financial costs incurred by the Global Coordinators as a result of that advance or pre-financing will be reimbursed to the Global Coordinators by the Company at an interest rate of EURIBOR plus 7 basis points. The total amount corresponding to payment for the indicated newly-issued shares will be deposited in a bank account opened in the name of the Company with the Agent.

Once the capital increase has been paid in, and the certificate showing deposit of the funds corresponding to all of the newly-issued shares subject to the Public Offer for Subscription has been issued, on the same day, 12 December 2007, the capital increase will be declared to be closed, subscribed and paid in, and the corresponding public document of capital increase will be executed for subsequent registration with the Madrid Commercial Register. The registration with the Commercial Register having been made, attested copies of the deed of capital increase will be delivered to the CNMV, to Iberclear and to the Madrid stock exchange in its capacity as lead exchange.

Initially, and on a temporary basis, Iberclear will assign to the Global Coordinators the corresponding registration numbers in the amount of the capital increase which constitutes the initial volume of the Public Offer for Subscription.

Immediately after this assignment, the Global Coordinators will transfer the shares that have been subscribed and paid in on behalf of the Underwriters for the Retail and Employee Tranche and the Tranches for Qualified Investors, who in turn will act on behalf of those ultimately allotted the shares, to those ultimately allotted the shares, by execution of a special stock market transaction that will be settled on the Settlement Date (17 December 2007). Thereafter the Agent, with the cooperation of the governing body of the Madrid stock exchange, will take the steps indicated below so that the assignment of the corresponding registration numbers may be made to those ultimately allotted the shares through Iberclear. For that purpose, the Agent will notify Iberclear, through the exchanges, of the information regarding those ultimately allotted shares, in such manner that they are assigned the corresponding registration numbers, in accordance with the information received from the Underwriters for the Retail and Employee Tranche and, if applicable, for the Tranches for Qualified Investors, provided that Iberclear is not theretofore notified of automatic revocation of the Offer. The Underwriters for the Retail and Employee Tranche and, if applicable, for the Tranches for Qualified Investors will be the only ones responsible to Iberclear and, if applicable, the governing body of the Madrid stock exchange and the Company, for the information provided by them regarding the identity of those ultimately allotted shares.

The Underwriters for the Retail and Employee Tranche and the Tranches for Qualifies

Investors will charge the accounts of the investors for the amounts corresponding to the shares finally allotted to each of them, not earlier than the Transaction Date (12 December 2007 or later than the Settlement Date (17 December 2007), independent of the provision of funds that may be required of them. These entities will credit the amount paid by those awardees to the account of the Global Coordinators in their capacity as the pre-financing entities through the settlement procedures that Iberclear has established with the Agent Entity to the appropriate cash account that applies in each case.

The funds paid out by the Pre-financing Entities will be blocked in the account opened in the account opened in the name of IBERDROLA RENOVABLES in the Agent Entity, with IBERDROLA RENOVABLES being irrevocably bound not to dispose of the same until the Pre-financing Entities receive the entirety of the amount from the settlement of the Offer through Iberclear (with the exception made of the part of the disbursement made that is applicable as the case may be, to the shares made by said Pre-financing Entities in compliance with its insuring commitment) provided that the listing on the Spanish Stock Exchanges has first taken place, and that none of the cases of automatic revocation of the Offer has arisen, and this is thus communicated by IBERDROLA RENOVABLES and the Pre-financing Entities to the Agent Entity.

Under normal conditions, the delivery of the deed of capital increase to Iberclear and execution of the increase will take place on 12 December 2007. In that case, the special stock exchange transaction will be settled on 17 December 2007, with the payment for the shares by those ultimately allotted shares occurring not before 12 December 2007 or after 17 December 2007.

By way of exception, if the special stock exchange transaction cannot be executed on 12 December 2007 because it was not possible to present the public deed of capital increase duly registered with the Commercial Register to Iberclear on that date, the payment by the final investors will not be made before the day of ultimate presentation of the deed of capital increase to Iberclear, and the transaction will be executed (the date thereof being deemed to be the Transaction Date) not later than the third working day following that date.

#### **Delivery of the securities**

The final allotment of the shares in all Tranches will be made by the Agent on 12 December 2007, coinciding with the Transaction Date of the Offer.

On that same day the Agent will send the details of the final allotment of the shares to each of the Underwriters or Related Distributors for the Retail and Employee Tranche and for the Tranches for Qualified Investors, which will notify those Applicants that are allotted shares.

On the Transaction Date the Agent will commence to process, before Iberclear, the necessary assignment of the corresponding registration numbers to those allotted shares.

Perfection of the subscription, at the price and on the terms upon which the allotment is made, will be deemed to occur on the Transaction Date.

**5.1.9 A full description of the manner and date in which results of the Offer are to be made public.**

The result of the Offer will be made public by presentation to the CNMV of the corresponding additional information on the Transaction Date or the following working day.

**5.1.10 The procedure for the exercise of any right of pre-emption, the negotiability of subscription rights and the treatment of subscription rights not exercised**

There are no pre-emptive subscription rights in this Offer because, prior to registration of this Prospectus, the sole shareholder of the Company has unconditionally and irrevocably waived the pre-emptive subscription right corresponding to it as regards the shares subject to the Offer.

**5.2 Plan of distribution and allotment**

**5.2.1. The various categories of potential investors to which the securities are offered. If the offer is made simultaneously on the markets of two or more countries and a tranche for specific countries has been or is to be reserved, indicate the tranche**

This Offer initially is distributed over three Tranches, as indicated below:

**Retail and Employee Tranche**

153,602,360 shares representing 20% of the number of shares subject to the Offer (without including the *green shoe* purchase option) are initially allotted to the Retail and Employee Tranche. Nevertheless, the number of shares allotted to this Tranche may be amended based on the redistribution among Tranches contemplated in section 5.2.3 below in this Share Securities Note.

The Retail and Employee Tranche in turn will be divided into two subtranches: the Retail Subtranche and the Employee Subtranche:

**Retail Subtranche**

It is addressed to the following persons or entities:

- (i) Individuals or legal persons resident in Spain, whatever their nationality.
- (ii) Individuals or legal persons not resident in Spain that are nationals of one of the Member States of the European Union or one of the States signing the Agreement and Protocol regarding the European Economic Space (Member States of the European Union, plus Ireland and Norway) or of the Principality of Andorra. In no case may the shares subject to the Retail Subtranche be deemed to be offered in a public offering in any territory or jurisdiction other than the Kingdom of Spain.

Those Applicants that are shareholders of Iberdrola, S.A. within the terms of section 5.2.3.c) (iv) below and participate in the Retail Subtranche by presenting

Subscription Orders will benefit from the preferential allotment system for shares described in that section of this Share Securities Note.

Employee Subtranche

Under the resolutions adopted by Iberdrola, S.A. in its capacity as sole shareholder of the Company, dated November 14, 2007, it has been decided to address a subtranche of the Offer to employees of IBERDROLA RENOVABLES and of the companies in the IBERDROLA RENOVABLES Group listed below, who have an employment relationship with them of a fixed or temporary nature on 22 November 2007 and continue to be employed on 3 December 2007.

Company	Country
Iberdrola Renovables, S.A. Unipersonal	Spain
Biovent Energía, S.A.	Spain
Energías Renovables de la Región de Murcia, S.A.	Spain
Iberdrola Energías Renovables de Aragón, S.A.	Spain
Iberdrola Energías Renovables de Castilla-La Mancha, S.A.	Spain
Iberdrola Energías Renovables de Galicia, S.A.	Spain
Sistemas Energéticos La Muela, S.A.	Spain
Sistemas Energéticos Mas Garullo, S.A.	Spain
Sistemas Energéticos Torralba, S.A.	Spain
Sociedad Gestora de Parques Eólicos de Andalucía, S.A.	Spain
Iberdrola Regenerative Energien GmbH	Germany
Enerbrasil Energias Renováveis do Brasil, S.A.	Brazil
Community Energy, Inc.	United States of America
Iberdrola Renewable Energies USA, Ltd	United States of America
Iberdrola Energies Renouvelables, SAS	France
Perfect Wind, SAS	France
C.Rokas S.A.	Greece
PPC Renewables, S.A. (Dei Ananeosimes – Rokas)	Greece
Rokas Aeoliki, S.A.	Greece
Rokas Aeoliki Kriti, S.A.	Greece
Rokas Aeoliki Evia, S.A.	Greece

Iberdrola Energie Rinnovabili, S.p.A.	Italia
Iberdrola Energia Odnawialna Sp. z o.o.	Poland
Iberdrola Energias Renováveis, S.A.	Portugal
Aeolia Produção de Energia, S.A.	Portugal
Iberdrola Renewable Energies Limited	United Kingdom
ScottishPower Renewable Energy Limited	United Kingdom

No specific number of shares will initially be allotted to the Employee Subtranche. In this regard, so that all applications made by employees of the IBERDROLA RENOVABLES Group may be fulfilled, as many shares as may be necessary to reach this objective will be allotted from the Retail and Employee Tranche to the Employee Subtranche, in any case, in accordance with procedure described in section 5.1.3 of this Share Securities Note.

### **Spanish Tranche for Qualified Investors**

It is addressed to qualified investors resident in Spain, as defined in article 39 of Royal Decree 1310/2005 of 4 November 2005 on admission to trading of securities on official secondary markets, public offers for sale or subscription and the prospectus required for such purposes as well as qualified investors resident in the Principality of Andorra.

115,201,770 shares representing 15% of the number of shares subject to the Offer (without including the green shoe purchase option) are initially allotted to this Tranche. Nevertheless, the number of shares allotted to this Tranche may be amended based on the redistribution among Tranches contemplated in section 5.2.3 below in this Share Securities Note, and on the exercise of the subscription option, if applicable, established in section 5.2.5 below in this Share Securities Note.

### **International Tranche**

An offer addressed to institutional and/or qualified investors outside the territory of Spain ("**International Tranche**") to which 499,207,670 shares representing 65% of the number of shares subject to the Offer (without including the green shoe purchase option) are initially allotted. Nevertheless, the number of shares allotted to this Tranche may be amended based on the redistribution among Tranches contemplated in section 5.2.3 and on exercise of the purchase option established in section 5.2.5 below.

The shares subject to this Offer have not been and will not be registered under the United States Securities Act of 1933 and its amendments (the "**U.S. Securities Act**") or under the securities market regulations of any state of the United States of America, and will not be offered, sold, pledged or in any manner transferred without having been previously registered, or unless the Offer is exempt from registration or is not subject to the registration obligation under the U.S. Securities Act. This Prospectus has not been and will not be approved by the Securities Exchange Commission or any authority or agency of the United States of America, and does not constitute an offer of subscription or solicitation of offers of subscription of securities in the United States of America.

Therefore, the shares subject to this Offer are offered and sold outside of the United States of America in accordance with the provisions of Regulation S of the U.S. Securities Act, and within the United States of America to qualified institutional buyers (as they are defined in Rule 144A de la U.S. Securities Act) in accordance with Rule 144A.

The Company will not offer, sell or in any manner transfer the shares prior to the expiration date of the restrictions on transfer of the shares (the "Resale Restriction Termination Date", as defined in the U.S. Securities Act), which will occur 40 days after the latest of the following dates: the date of settlement of the Offer, including the green shoe purchase option and the date on which the share distribution is completed, except to: (i) the Company or any of its subsidiaries; (ii) outside of the United States of America within the context of an offshore transaction (as defined in Rule 902 under the U.S. Securities Act), which satisfies the requirements of Rule 903 and Rule 904 under the U.S. Securities Act, (iii) to a person that reasonably may be considered to be a qualified institutional buyer (as defined in Rule 144A under the U.S. Securities Act) within the context of a transaction satisfying the requirements of Rule 144A; (iv) pursuant to any other exemption from the registration obligation contained in the U.S.

Securities Act, or (v) pursuant to a statement of effective registration; in all cases in accordance with the securities market regulations of any state in the United States of America or the regulations of any other jurisdiction that may be applicable.

Any subsequent owner of the shares will be required to give notice to the one acquiring the shares from it of the restrictions on transfer shares set forth in the preceding paragraph. Also, any transfer of shares undertaken in accordance with the provisions of sections (ii), (iii) and (iv) above will be subject to the right of the Company to request a legal opinion or such information as it deems to be pertinent in order to show that the transaction effectively complies with the provisions of the referenced sections.

In this Prospectus the International Tranche and the Spanish Tranche for Qualified Investors may be jointly referred to as the “**Tranches for Qualified Investors**”.

**5.2.2 To the extent known to the issuer, an indication of whether major shareholders or members of the issuer's administrative, management or supervisory bodies intend to subscribe in the Offer, or whether any person intends to subscribe more than five percent of the Offer**

The Company has no evidence that its sole shareholder, the members of its Board of Directors or its managers have proposed to subscribe shares of the Company within the framework of the Offer, without prejudice to their possible participation in the Retail and Employee Tranche. Nor does it have evidence that any person proposes to subscribe more than five percent of the Offer. Without prejudice to the foregoing, there may be allotments of greater than five percent of the Offer.

Nevertheless, it is possible that the current sole shareholder of the Company may acquire shares in the Company after it has been admitted to trading on the Madrid, Barcelona, Bilbao and Valencia stock exchanges.

**5.2.3 Pre-allotment disclosure**

**a) Division into tranches of the offer including the institutional, retail and issuer's employee tranches and any other tranches**

The initial assignment of shares among the Tranches of the Offer (excluding the green shoe purchase option) is as follows:

<b>Tranche</b>	<b>No. of shares</b>	<b>Initial percentage of the Offer</b>
Retail (including the Employee Subtranche)	153,602,360	20.00 %
Spanish for Qualified Investors	115,201,770	15.00 %
International	499,207,670	65.00 %

**b) Conditions under which the claw-back may be used, the maximum size of such claw back and any applicable minimum percentages for individual tranches**

It is up to the Company, after non-binding consultation with the Global Coordinators, to determine the final size of each and every one of the Tranches comprising the offer, and to make all decisions for reassignment among Tranches, in accordance with the following rules:

- Prior to setting the Maximum Retail Price the number of shares initially allotted to the Retail and Employee Tranche may be freely changed.
- In no case may the Retail and Employee Tranche be reduced if the result is excess demand therein
- The Employee Subtranche will be fixed at the number of shares necessary to cover all shares corresponding to unrevoked Orders in that Subtranche, allotting the remaining shares in the Retail and Employee Subtranche to the Retail Subtranche.
- At any time after signature of the Underwriting Agreement for the Retail and Employee Tranche until final allotment of the shares corresponding to that Tranche, the number of shares allotted to the Retail and Employee Tranche may be increased, with reduction of the number of shares allotted to the Tranches for Qualified Investors, even if there is excess demand therein, up to a maximum of 76,801,180 additional shares (equivalent to the number of shares in the green shoe purchase option) or such larger number as may be necessary to allot the minimum amount of 1,500 euros to a greater number of Orders or possibly even to all unrevoked Order placed in the Retail Subtranche.
- If the Retail and Employee Tranche is not covered, the excess shares may be reallocated to the Tranches for Qualified Investors at any time prior to the final allotment. This possible reassignment to the Tranches for Qualified Investors will be made, if applicable, to meet excess demand in those Tranches.
- Shares may be freely redistributed among the Tranches for Qualified Investors, until the final assignment of shares to those Tranches.

Any reassignment of shares among Tranches will be notified to the CNMV, on the same day it occurs or the following working day.

The final number of shares allotted to the Retail Subtranche and Employee Subtranche will be determined and, if necessary, the proration in the Retail Subtranche performed, no later than 11 December 2007.

The number of shares finally allotted to the Tranches for Qualified Investors of the Offer (excluding the shares corresponding to the green shoe purchase option described in section 5.2.5 below) will be set on 12 December 2007, after conclusion of the term for confirmation of Proposals in those Tranches, and prior to the final allotment.

c) **Allotment method or methods to be used for the Retail and Employee Tranche of the issuer in the event of an over-subscription of these tranches**

**Proration in the Retail Subtranche**

For purposes of making the proration referred to in this section, subscription requests expressed in euros will be translated into subscription requests expressed in number of shares, by dividing the former by the Maximum Retail Price. In the case of fractional shares the rounding will be downward.

Because the Retail Price is not fixed until the day prior to allotment, it is necessary to use the Maximum Retail Price to timely perform the operations of proration and allotment based on an objective criterion not discriminatory among investors. If the Retail Price ultimately is less than the Maximum Retail Price, that will not affect the proration that has been made, but in this case the investment will be reduced because the price will be lower.

If the requests for subscription in the Retail Subtranche, presented within the Term for Presentation of Orders of subscription or within the Term for Applications for binding subscription, exceed the number of shares finally allotted to the Retail Subtranche, the requests for subscription will be prorated in accordance with the following principles:

- (i) Only Orders that have not been revoked or cancelled and Applications that have not been cancelled will be taken into account.
- (ii) If each and every one of the Applicants on several subscription requests based on Orders for subscription are the same, they will be combined, constituting a single subscription request. The number of shares allotted to the Order or Orders, taken as a whole, will be distributed proportionally among the affected Orders.
- (iii) Orders presented by shareholders of Iberdrola, S.A. will have the preference described in section 5.2.3.d) below. Such preference having been satisfied, Orders will have preference in allotment over Applications. Therefore, the number of shares allotted to the Retail Subtranche will first be used to cover shares requested by virtue of Orders. Only when all of the requests based on Orders have been covered will the excess shares be used to cover shares requested by virtue of Applications.
- (iv) If the requests based on Orders exceed the number of shares allotted to the Retail Subtranche, as indicated in paragraph (iii) above the requests based on Applications will not be taken into account. Therefore the first allotment, to each and every one of the Orders, will be a number of shares equal to the whole number, rounded downward, resulting from dividing 1,500 euros (minimum request in the Retail Subtranche) by the Maximum Retail Price (“**Minimum Number of Shares**”).

Nevertheless, if the demand in the Retail Subtranche is such that it is not possible to allot the Minimum Number of Shares to each Applicant, the Company, in exercise of its authority to redistribute among Tranches, may

decide to increase the number allotted to the Retail Subtranche to the extent necessary to allot the referenced Minimum Number of Shares to a greater number of Orders, or even to all unrevoked Orders presented in the Retail Subtranche.

If the number of shares allotted to the Retail Subtranche is not sufficient to allot the Minimum Number of Shares to all Offers, the allotment will be made by drawing lots, in accordance with the following rules:

- Choice of a letter, in a drawing held before a certifying public officer.
- By alphabetical order of all Orders, based on the content of the first position of the "First and Last Names or Corporate Name" field, whatever the content of the 40 positions in that field of the file in accordance with Circular 857 of the Spanish Banking Association (Asociación Española de Banca - AEB), in the format of Book 61, Annex 1 with 120 positions, sent to the Agent by the Underwriters. If there are investors the personal information of which coincides with the information that is sent, they will be ordered from the greatest to least amount of their Orders and, in the case of co-owners, the first owner appearing in the first request encountered will be used.
- Allotment of the Minimum Number of Shares to the request in the list obtained as described in the prior point, the first position in the "First and Last Names or Corporate Name" field of which coincides with the letter drawn. From this request continuing with the following ones, in the order of the list, until the shares allotted to the Retail Subtranche are exhausted. If there are not sufficient shares to allot the Minimum Number of Shares to the last Applicant to whom shares are allotted, in accordance with the alphabetical drawing that is performed, the remaining shares will not be allotted to that last Applicant. Rather the shares will be distributed among the subscription requests to which shares have been allotted by alphabetical order, in accordance with the "First and Last Names or Corporate Name" field, beginning with the same letter as the one drawn and following the same order, allotting the remaining shares to the first Applicant to the extent of its request and continuing, if necessary, in the order of the draw until complete distribution of the remainder.

- (v) If in accordance with the first paragraph of section (iv) above it has been possible to allot the Minimum Number of Shares to all of the Orders, the excess shares will be allotted in proportion to the unfilled number of shares in the Orders. For that purpose, the number of shares pending allotment will be divided by the total unsatisfied demand in the Retail Subtranche in the form of Orders.

As general rules of this proration:

- If fractions of shares are obtained, they will be rounded downward so that an exact number of shares to be allotted is obtained.
- The percentages to be used for proportional assignment will also be

rounded downward to three decimal places (that is 0.78974 will be equal to 0.789).

- No investor may be allotted a number of shares greater than deriving from the investor's request.

(vi) If after application of the proration referred to in section (v) above there are un-allotted shares as a result of the rounding, they will be distributed one by one, in order of greater to lesser number requested and, in the event of equality, in the alphabetical order of Applicants, based on the first position of the "First and Last Names or Corporate Name" field, whatever its content (if there are investors whose personal information coincides in accordance with the information remitted, they will be ordered from greater to lesser number of shares in their Orders, and if there are co-owners the first owner appearing in the first request encountered will be used, based on the letter resulting from the drawing held before the certifying public officer).

(vii) If all subscription requests based on Orders have been fulfilled, the excess shares will be allotted to the Applications (subscription requests not based on Orders) as indicated below:

- For purposes of the allotment, when each and every one of the Applicants on several Applications are the same they will be combined, constituting a single Application. The number of shares allotted to the Application or Applications, taken as a whole, will be determined proportionally over the affected Applications.

- If the Applications exceed the number of shares pending allotment, the Minimum Number of Shares will first be allotted to each and every one of those Applications.

- If the number of shares pending allotment is not sufficient to allot the Minimum Number of Shares referred to in the preceding paragraph, the Minimum Number of Shares will be allotted to the Applications by means of an allotment based on a drawing in accordance with the rules of the second paragraph of section (iv) above.

- Also, if after allotting the Minimum Number of Shares to all Applications there are still excess shares there will, if necessary, be a proration in accordance with the rules contemplated in sections (v) and (vi) above.

The proration described in this section will be performed by the Agent not later than 11 December 2007.

For purposes of illustration, an example of proration is included below. It is noted that this is merely an example, and the result does not indicate what in fact may occur because, above all, the result will depend in each case on several variables, among which the most sensitive is the actual number of requests and, in any event, the rules for application will be as indicated above.

**PRORATING EXAMPLE**  
**RETAIL SUBTRANCHE**

In a scenario in which the following were true upon completion of the Public Offer:

- A. Shares allocated to the Retail Tranche and Employees: 153,602,360
- B. Allocated to the Employee Subtranche: 3,076,923
- C. Allocated to shareholders (maximum 20%): 30,720,472
- D. Shares allocated to the remaining non shareholder applicants of the Retail Subtranche and unfilled shareholder demand: 119,804,965
- E. Maximum sale price: 6.50 Euros.
- F. Submitted and unrevoked Orders: 400,000

ORDERS			
Number of Orders	Amount per Application (Euros)	Shares per Application	Shares applied for
130,000	1,500.00	230	29,900,000
105,000	3,000.00	461	48,405,000
90,000	6,000.00	923	83,070,000
50,000	30,000.00	4,615	230,750,000
25,000	60,000.00	9,230	230,750,000
400,000			622,875,000

- G. Applications made during the Offer period: 80,000

APPLICATIONS			
Number of Orders	Amount per Application (Euros)	Shares per Application	Shares applied for
30,000	1,500.00	230	6,900,000
20,000	3,000.00	461	9,220,000
15,000	6,000.00	923	13,845,000
10,000	30,000.00	4,615	46,150,000
5,000	60,000.00	9,230	46,150,000
80,000			122,265,000

As the number of shares requested during the Term for Presentation of Subscription Orders has exceeded the number of shares allocated to this Subtranche, allocation and prorating is made only in relation to the Subscription Orders, whereas Subscription Applications made during the Public Offer Period are not taken into account.

If the number of shares allocated to this Tranche is not sufficient to allocate 93 shares to all the Purchase Orders, 230 shares per Purchase Order will be allocated as result from the letter drawn by notary.

**1. FIXED ALLOCATION (230 shares will be allocated)**

a) Shares to be awarded:	119,804,965	
b) Fixed number of awarded shares:	230	
c) Number of shares applied for:	622,875,000	
d) Total number of shares awarded:	92,000,000	(1)
e) Number of shares pending award:	27,804,965	
f) Demand not met:	530,875,000	(2)

**2. PROPORTIONAL ALLOCATION (the number of shares pending award will be allocated proportionally to the demand not met).**

a) Demand not met:	530,875,000	(2)
b) Award ratio:	5.238%	(3)
c) Total number of shares awarded:	27,725,000	(4)
d) Number of shares pending award:	79,965	
e) Demand not met:	503,150,000	(5)

**3. UNITARY ALLOCATION**

The 79,965 remaining shares pending award will be distributed by unit among the purchase orders not met.

1 further share is awarded to orders for 9,230 and 4,615 shares. The lottery will be carried out among purchase orders for 923 shares, with 1 further share corresponding to 4,095, with the remaining 85,035 corresponding to the shares that have already been awarded.

**4. SUMMARY OF THE FINAL ALLOCATION**

The final allocation for Purchase Orders would be as follows:

- a) Orders for 230 shares: 230 shares by fixed allocation.
- b) Orders for 461 shares: 230 shares by fixed allocation.  
12 shares by proportional allocation.
- c) Orders for 923 shares: 230 shares by fixed allocation.  
36 shares by proportional allocation.  
1 share by unitary allocation in certain cases.
- d) Orders for 4,615 shares: 230 shares by fixed allocation.  
229 shares by proportional allocation.  
1 share by unitary allocation.
- e) Orders for 3,841 shares: 230 shares by fixed allocation.  
471 shares by proportional allocation.  
1 share by unitary allocation.

If the number of shares applied for during the Period of Presentation of Subscription Orders does not exceed the volume allocated to the Retail Subtranche all Subscription Orders will be met. The remaining shares pending allocation will be prorated among the Subscription Applications made during the Offer Period following the same procedure described above.

(1) 92,000,000

Number of Orders	Number of Shares Allocated	Number of Shares Allocated (Total)
130,000	230	29,900,000
105,000	230	24,150,000
90,000	230	20,700,000

50,000	230	11,500,000
25,000	230	5,750,000
400,000		92,000,000

(2) 530,875,000

Number of Orders	Number of Shares Pending Allocation	Number of Shares Pending Allocation (Total)

**d) Description of any predetermined preferential treatment to be accorded to certain classes of investors or certain affinity groups (including friends and family programmes) in the allotment, the percentage of the offer reserved for such preferential treatment and the criteria for inclusion in such classes or groups**

Those Applicants that are shareholders of Iberdrola, S.A. and participate in the Retail Subtranche by presenting Subscription Orders will benefit from the preferential share allotment system described below. For these purposes shareholders of Iberdrola, S.A. are:

- (i) The Applicants whether they are private individuals or legal persons, who are legitimated in accordance with the accounting records of Iberclear at the close of the trading session corresponding to 20 November 2007, as shown by presentation by the Affiliated Participants in Iberclear to the Agent of a list of shareholders recorded in its registers in the format of Book 61 of the Consejo Superior Bancario, Annex I.
- (ii) The Applicants , whether legal persons or private individuals, resident in and with domicile in the United Kingdom which are the holders of Crest Depository Interests (“CDIs”) in Iberdrola, S.A (whether directly or indirectly through the service of trustee safekeeping provided by Equinity Limited, formerly known as Lloyds TSB Registrars Corporate Nominee Limited) at the closing of the trading session at 20 November 2007, including the beneficiary holders of CDIs registered in the name of participant entities in CREST that maintain them for their own account. The CDIs are book entries representing the new shares of Iberdrola, S.A. that were issued by CRESTco Ltd., the entity responsible for deposit, registration, clearing and settlement of the securities admitted to trading on the stock exchanges of the United Kingdom and Ireland, at the time of the integration transaction of Iberdrola, S.A. and Scottish Power plc. Ownership of the CDIs will be accredited by reference to the file that Equiniti (formerly

Lloyds TSB Registrars), will prepare with reference to the CDI records of Iberdrola, S.A. obtained by Equiniti from CREST and the particular register maintained by Equiniti Limited concerning the ownership of said CDIs of Iberdrola, S.A. deposited in its system of trustee safekeeping. Equiniti Limited will send said file to the Agent Entity before December 7, 2007, without the Agent Entity making any check on this matter. This file shall contain a list of all direct and indirect holders of CDIs of Iberdrola, S.A. that have placed Subscription Orders and shall include the following details for each of them: first name and family name, address, passport no., amount of the Subscription Order placed, name of the Underwriter for the Retail and Employee Tranches or, if applicable, name of the Related Distributor with which the Subscription Order has been placed and number of CDIs that the Applicant owns.

Holders of Iberdrola, S.A. CDIs that are interested in subscribing for shares in IBERDROLA RENOVABLES within the framework of the Offer must open an individual cash account, in euros, and an individual securities account with one of the Underwriters for the Retail and Employee Tranches or with one of their respective Related Distributors, if they do not already hold both types of account with one of the aforesaid entities.

Holders of Iberdrola, S.A. CDIs must place their Subscription Orders between 23 November 2007 and 3 December 2007, exclusively with any of the Underwriters for the Retail and Employee Tranches or with any one of their respective Related Distributors, in accordance with the rules applicable to Subscription Orders set out in section 5.1.3 of this Share Securities Note above. The value of Subscription Orders may be between a minimum of €1,500 and a maximum of €60,000.

Once the cash and securities accounts have been opened and the Subscription Orders have been placed, owners of Iberdrola, S.A. CDIs must send to Equiniti Limited no later than 14.30 hours Madrid time on 3 December 2007, by fax to the number +44 (0)20 7489 3582, a scanned copy by electronic mail ([renovablesIPO@equiniti.com](mailto:renovablesIPO@equiniti.com)) or by ordinary mail or by hand to Equiniti Limited, Princess House, 1 Suffolk Lane, London, EC4R 0AX, a copy of the subscription instruction to the banking entity, as well as the notification form Equiniti that shall include the following details: first name and family name, address, passport no., amount of the Subscription Order placed, name of the Underwriter for the Retail and Employee Tranches or, if applicable, name of the Related Distributor with which the Subscription Order has been placed and their Equiniti Limited reference number. The holders of CDIs with the right to benefit from the preferential allotment, will receive said notification form.

The maximum percentage of the Retail and Employee Subtranche of the Offer that is used for such preferential allotment is 20% of the initial size of that Tranche, that is, 30,720,472 shares.

The terms and conditions of the referenced preferential allotment system are described below:

- There is a minimum linear allotment for Applicants that are shareholders of Iberdrola, S.A. or owners of CDIs of Iberdrola, S.A. that present Orders in the Retail and Employee Tranche, which will be determined based on the shares or CDIs of Iberdrola, S.A. owned by the Applicant shareholder at the close of the trading session corresponding to 20 November 2007, and in accordance with the provisions in the following table:

<b>Number of shares of Iberdrola, S.A. in the trading session taken as a reference</b>	<b>Minimum linear allotment (1)</b>
Between 1 and 6,000	500 euros
Between 6,001 and 20,000	900 euros
More than 20,000	1500 euros

(1) The number of shares resulting from dividing the amounts set forth in the table by the maximum retail price.

- For purposes of calculating the total position of a shareholder in shares of Iberdrola, S.A., the Agent will add all positions that all Affiliated Participants in Iberclear show for that shareholder.
- Likewise, the Agent will add all positions demonstrated to the Affiliated Participants by shareholders of Iberdrola, S.A. whose interests are held on a co ownership basis, provided that they fully and accurately correspond to the various co-owners. In this case, when applying the preferential linear allotment, the Agent will verify that the co-owners of the Order fully and accurately correspond to the holders of the position or positions shown by the Affiliated Participants in Iberclear.
- If demand presented by Iberdrola shareholders in the Retail and Employee Tranche of the Offer is such that, as a result of the minimum linear allotment described above, that allotment as a whole exceeds 20% of the initial size of the Retail and Employee Tranche, the minimum linear allotment for each group of shareholders will be reduced on a proportional basis in the amount necessary so that each shareholder, within its group, is allotted the same amount. In no case regarding any group of shareholders may the linear allotment be less than 50% of the preferred allotment initially envisaged.
- In the event that, even though the minimum linear allotment has been reduced to 50% of the preferred allotment initially envisaged, that allotment as a whole exceeds 20% of the initial size of the Retail and Employee Tranche, the Orders placed by Applicants that are Iberdrola, S.A. shareholders shall be allocated using the draw-based system referred to in 5.2.3 c) (iv) above.
- It is expressly noted that that demand of Applicants that are

shareholders of Iberdrola, S.A. during the Term for Applications in the Retail and Employee Tranche of the Offer will not benefit from the preferential allotment described above, and will receive the same treatment as applications for subscription presented by Applicants that are not shareholders of Iberdrola, S.A. for purposes of the proration rules described in section 5.2.3 (c) above.

- The demand in Orders presented by Applicants that are shareholders of Iberdrola, S.A. in the Retail and Employee Tranche of the Offer, if any, that is not satisfied by the preferential allotment described above will be subject to the general proration system contemplated in referenced section 0 (c), and will receive the same treatment as the demand corresponding to the other Orders presented by Applicants that are not shareholders of Iberdrola, S.A.

Set out below is an example of prorating in the Retail Sub-Tranche taking into account the preferred allocation to shareholders described in this section.

**PRORATING SIMULATION**  
**RETAIL SUB-TRANCHE**  
**PREFERRED ALLOCATION TO SHAREHOLDERS**

In the event that the following were to arise from the Offer:

- A. Shares allocated to Retail and Employees Sub-tranche: 153,602,360
- B. Maximum number of shares that can be allocated to shareholders (Maximum established 20%): 30,720,472
- C. Maximum sale price: 6.50 Euros

**SCENARIO I FOR PREFERRED ALLOCATION TO SHAREHOLDERS**

The number of shares to be allocated to Iberdrola shareholders does not exceed 20% of the number of shares allocated to the Retail and Employee Tranche:

<b>ORDERS</b>				
<b>Number of Orders from shareholders</b>	<b>Iberdrola Shares</b>	<b>Minimum linear allocation amount</b>	<b>Minimum linear Share allocation</b>	<b>Number of Shares allocated</b>
145,000	Between 1 and 6,000	500.00	76	11,020,000
80,000	Between 6,001 and 20,000	900.00	138	11,040,000
35,000	More than 20,000	1,500.00	230	8,050,000
<b>260,000</b>				<b>30,110,000</b>

The number of shares allocated does not exceed the maximum number of shares established for the Preferred Allocation, whereby all the relevant shares are allocated, with the remainder being allocated to the Retail and Employee Tranche.

**SCENARIO II FOR PREFERRED ALLOCATION TO SHAREHOLDERS**

The number of shares to be allocated to Iberdrola shareholders exceeds 20% of the number of shares allocated to the Retail and Employee Tranche, and the reduction of the minimum linear allocation to each group of shareholders does not exceed 50%.

<b>ORDERS</b>				
<b>Number of Orders from shareholders</b>	<b>Iberdrola Shares</b>	<b>Minimum linear allocation amount</b>	<b>Minimum linear Share allocation</b>	<b>Number of Shares allocated</b>
190,000	Between 1 and 6,000	500.00	76	14,440,000
95,000	Between 6,001 and 20,000	900.00	138	13,110,000
50,000	More than 20,000	1,500.00	230	11,500,000
<b>335,000</b>				<b>39,050,000</b>

As the number of shares to be allocated exceeds the established maximum number of shares, the applicable percentage reduction is calculated as follows:

$(30,720,472 / 39,050,000 = 0.7866958259 = 78.66\%)$ . The amount of the minimum linear Allocation for each group is reduced by 21.34%.

<b>ORDERS</b>				
<b>Number of Orders from shareholders</b>	<b>Iberdrola Shares</b>	<b>Minimum linear allocation amount</b>	<b>Minimum linear Share allocation</b>	<b>Number of Shares allocated</b>
190,000	Between 1 and 6,000	393.30	60	11,400,000
95,000	Between 6,001 and 20,000	707.94	108	10,260,000
50,000	More than 20,000	1,179.90	181	9,050,000
<b>335,000</b>				<b>30,710,000</b>

All shares are allocated and the maximum number of shares established for the Preferred Allocation is not exhausted.

### **SCENARIO III FOR PREFERRED ALLOCATION TO SHAREHOLDERS**

The number of shares to be allocated to Iberdrola shareholders exceeds 20% of the number of shares allocated to the Retail and Employee Tranche, and the reduction of the minimum linear allocation to each group of shareholders exceeds 50%.

<b>ORDERS</b>				
<b>Number of Orders from shareholders</b>	<b>Iberdrola Shares</b>	<b>Minimum linear allocation amount</b>	<b>Minimum linear Share allocation</b>	<b>Number of Shares allocated</b>
115,000	Between 1 and 6,000	500.00	76	8,740,000
125,000	Between 6,001 and 20,000	900.00	138	17,250,000
160,000	More than 20,000	1,500.00	230	36,800,000
<b>400,000</b>				<b>62,790,000</b>

As the number of shares to be allocated exceeds the established maximum number of shares, the applicable percentage reduction is calculated as follows:

$(30,720,472 / 62,790,000 = 0.4892573977 = 48.92\%)$ . The amount of the minimum linear Allocation for each group is reduced by 51.08%. As the percentage reduction exceeds 50%, the maximum reduction is applied.

ORDERS				
Number of Orders from shareholders	Iberdrola Shares	Minimum linear allocation amount	Minimum linear Share allocation	Number of Shares allocated
115,000	Between 1 and 6,000	250.00	38	4,370,000
125,000	Between 6,001 and 20,000	450.00	69	8,625,000
160,000	More than 20,000	750.00	115	18,400,000
400,000				31,395,000

The number of shares to be allocated exceeds the maximum number of shares established for the Preferred Allocation. All orders entitled to the Preferred Allocation are ordered alphabetically, and allocations will begin from the letter drawn by a notary public in a lottery draw, until the shares in this allocation have been exhausted.

- e) **Whether the treatment of subscriptions or bids to subscribe in the allotment may be determined on the basis of which firm they are made through or by**

There is no difference in treatment of subscriptions based on the entity before which they are processed.

- f) **A target minimum individual allotment if any within the Retail Subtranche;**

See section c) above regarding proration in the Retail Subtranche.

- g) **The conditions for the closing of the offer as well as the date on which the offer may be closed at the earliest**

In section 5.01.3 above in this Share Securities Note the closing dates of the terms of the Offer are described.

- h) **Whether or not multiple subscriptions are admitted, and where they are not, how any multiple subscriptions will be handled**

Subscription requests made under a co ownership system are allowed only in the Retail Subtranche.

Nevertheless, a single person may not present more than two requests jointly with another/other person(s) on a co ownership basis. If the same person presents more than two requests on a co ownership basis, all will be cancelled, respecting only the request or requests presented on an individual basis.

For these purposes when each and every one of the Applicants on several subscription requests are the same, they will be combined for purposes of control of maximums, constituting a single request that will be treated as such.

Both Orders and Applications will be taken into account for purposes of the limit of two requests referenced above. Notwithstanding the foregoing, if the number of

shares corresponding to the unrevoked Orders presented during the Term for Presentation of Orders for subscription exceeds the number of shares allotted to the Retail and Employee Tranche, for purposes of the foregoing limit of two requests only the referenced Orders will be taken into account, without considering the Applications received.

The limit on the number of requests that may be presented on a co ownership basis is independent of the maximum investment limit described in section 5.1.6 above in this Share Securities Note.

**5.2.4 Process for notification to applicants of the amount allotted and indication whether dealing may begin before notification is made**

The final allotment of shares in all Tranches will be performed by the Agent, in accordance with the rules set forth above, in any event on or before the 12 December 2007, coinciding with the Transaction Date of the Offer.

On the same day, the Agent will send details of the final allotment to each of the Underwriters for the Retail and Employee Tranche and for the Tranches for Qualified Investors, who will give notice thereof to the Applicants receiving allotments.

The allotment will be performed prior to admission to trading. It is contemplated that the Underwriters for the Retail and Employee Tranche and for the Tranches for Qualified Investors will notify the Applicants receiving allotments of that assignment within the following three working days.

**5.2.5. Over-allotment and green shoe**

**a) Existence and size of any over-allotment facility and/or green shoe**

The size of the total Offer allotted to the Tranches for Qualified Investors may be increased by up to 76,801,180 shares by decision of the Global Coordinators, acting in its/their own name(s) and for and on behalf of the Underwriters of the Tranches for Qualified Investors, by exercise of the purchase option (an option internationally known as a green shoe option) on 76,801,180 shares of the Company that Iberdrola Generación S.A. (Unipersonal) contemplates granting to such Coordinators. This purchase option is granted to freely cover excess demand that may occur within these Tranches. Exercise thereof must be notified to the CNMV, to be disseminated by it, on the day of occurrence or the following working day, including the pertinent details, in particular the date of exercise and number and kind of shares in question.

The purchase option will apply to a maximum of 76,801,180 shares of the Company.

The purchase price of the shares, in the event of exercise of the green shoe, will be equal to the Price of the Tranches for Qualified Investors of the Offer.

**b) The existence period of the over-allotment facility and/or green shoe.**

The purchase option will be exercised, on one or more occasions, totally or partially, on the date of admission to trading (contemplated for the 13 December 2007), or during the thirty (30) calendar days following that date.

**c) Any conditions for the use of the over-allotment facility or exercise of the green shoe**

The purchase option possibly may be accompanied by a securities loan covering the over-allotments, if any, made by the Underwriters of the Tranches for Qualified Investors, to cover any excess demand occurring within that Tranche. If applicable, the loan would be granted by Iberdrola Generación, S.A. Unipersonal to the Global Coordinators or to the entity appointed by mutual agreement of Iberdrola, S.A. and the Global Coordinators, on behalf of the Underwriters of the Tranches for Qualified Investors. It would apply, as a maximum, to a number of shares equal to the number of shares subject to the referenced purchase option.

Securities loans generally are for a term comparable to the term of the green shoe option. The debt position in securities assumed by the Underwriters of the Tranches for Qualified Investors generally is covered by acquisition of such securities on the stock exchange (which if applicable could support the stability of the share price) or, directly, by exercise of the green shoe purchase option.

There is no condition whatever for exercise of the green shoe purchase option.

**5.3 Prices**

**5.3.1. An indication of the price at which the securities will be offered. When the price is not known or there is no established and/or liquid market for the securities, indicate the method for determination of the price of the Offer, including who has set the criteria or is formally responsible for its determination. Indication of the amount of any expenses and taxes specifically charged to the subscriber or purchaser.**

**Illustrative and Non-Binding Price Range**

For the sole purpose of giving investors a reference for making their subscription requests, the Company, by agreement with the Global Coordinators, has established an Illustrative and Non-Binding Price Range for the Company's shares subject to this Offer, between 5.3 and 7.0 euros per share.

The referenced Price Range implies assigning the Company a market capitalisation of all of its shares between 17,910 and 23,655 million euros, approximately, prior to the capital increase under the Public Offer for Subscription, and between 22,388 and 29,568 million euros, approximately, after that capital increase. Taking as a base the consolidated pro forma financial statements corresponding to the fiscal year ended 31 December 2006, prepared in accordance with the International Financial Reporting Standards, the market capitalisation assumes a PER between 70.0x and 92.4x before the capital increase under the public Offer for Subscription. and a PER of between 87.5x and 11.5x, following said capital increase.

It is expressly noted that the Price Range has been fixed by the Company by agreement with the Global Coordinators, there being no independent expert that assumes any responsibility for the valuation of the Company's shares resulting from that Price Range. This Price Range has been established using procedures for valuation of companies generally accepted by the market for this kind of transaction, taking into account the

characteristics and circumstances of the Company itself and the situation of the international financial markets.

It is noted that the final price or prices of the shares subject to the Offer may not be within the referenced Price Range.

The Company may, with agreement of the Global Coordinators, change the Illustrative and Non-Binding Price Range at any time prior to setting the Maximum Retail Price. Such change must be made known to the CNMV by publication of a material disclosure not later than the working day following the day the decision is adopted.

#### **Maximum Retail Price**

The Maximum Retail Price will be fixed on 3 December 2007, by agreement of the Company and the Global Coordinators. The Maximum Retail Price will be the amount paid by the Applicants for shares in the Retail and Employee Tranche, as a maximum, for each share allotted to them. It also will be the price taken into account for purposes of proration of this Tranche.

#### **Price of the Tranches for Qualified Investors**

The Price of the Tranches for Qualified Investors of the Offer will be set by the Company, acting by common agreement with the Global Coordinators, on 11 December 2007, after conclusion of the Public Offer Term for the Retail Tranche and the Book-Building Term for the Tranches for Qualified Investors, after evaluating the volume and quality of demand and the situation of the markets.

The Price of the Tranches for Qualified Investors will be the same for the International Tranche and the Spanish Tranche for Qualified Investors.

#### **Retail Price**

The Price of the Retail and Employee Tranche of the Offer will be the lesser of the following prices: (i) the Maximum Retail Price and (ii) the Price of the Tranche for Qualified Investors of the Offer.

#### **Indication of the amount of any expenses and taxes specifically charged to the subscriber or purchaser**

The amount to be paid by those allotted shares will be only the price thereof, provided that the subscription requests are provided only through the Underwriters for the Retail and Employee Tranche or for the Tranches for Qualified Investors, or the Related Distributors, if applicable.

Nor will expenses accrue against those allotted the shares for registration thereof in the names of those allotted shares in the accounting registers maintained by the Affiliated Participants. Nevertheless, the Affiliated Participants may establish, in accordance with the applicable laws, such administration fees and expenses that may be passed on as they freely determine for administering the securities or maintaining them in the book-entry records.

### 5.3.2. Process for disclosure of the offer price

The Price of the Retail and Employee Tranche and the Price of the Tranche for Qualified Investors of the Offer will be notified to the CNMV on 12 December 2007 or the following day by means of a reportable fact which must include a reference to the volume of demand registered in the Offer at the average price of the price range provided for in section 5.3.1 and at the price of the Offer.

### 5.3.3. If the issuer's equity holders have pre-emptive acquisition rights and such rights are restricted or withdrawn, indication of the basis for the issue price if the issue is for cash, together with the reasons for and beneficiaries of such restriction or withdrawal

Iberdrola, S.A., in its capacity as sole shareholder of the Company, has a pre-emptive subscription right within the framework of the capital increase occurring as a result of the Public Offer for Subscription. Notwithstanding the foregoing, prior to registration of this Prospectus, Iberdrola, S.A. has unconditionally and irrevocably waived that pre-emptive subscription right.

### 5.3.4. Where there is or could be a material disparity between the Public Offer price and the effective cash cost to members of the administrative, management or supervisory bodies, or senior management or related persons, of securities acquired by them in transactions during the past year, or which they have the right to acquire, include a comparison of the public contribution in the proposed Public Offer and the effective cash contributions of such persons

Does not apply.

## 5.4 Placing and underwriting

### 5.4.1 Name and address of the co-ordinator(s) of the global offer and of single parts of the offer and, to the extent known to the issuer or to the offeror, of the distributors in the various countries where the Offer takes place

**5.4.2 Name and address of any paying agent and the depository agents in each country**

The Agent for the Offer is Banco Bilbao Vizcaya Argentaria, S.A. with registered office in Bilbao (Vizcaya), plaza de San Nicolás, 4.

**5.4.3 Name and address of the entities agreeing to underwrite the issue on a firm commitment basis, and name and address of the entities agreeing to place the issue without a firm commitment or under “best efforts” arrangements. Indication of the material features of the agreements, including the quotas. Where not all of the issue is underwritten, a statement of the portion not covered. Indication of the overall amount of the underwriting commission and of the placing commission**

The Protocols of Intent regarding Underwriting and Distribution Commitment for the Retail and Employee Tranche and Spanish Tranche for Qualified Investors have been signed on 21 November 2007 (the “Underwriting Protocols”). It is contemplated that the signatories of the Underwriting Protocols will sign the Underwriting Agreements for the Retail and Employee Tranche and for the Spanish Tranche for Qualified Investors on 3 and 11 December 2007, respectively.

Indicated below are the entities that have signed the Underwriting Intent Protocols and Distribution Commitment for the Retail and Employee Tranche and the Spanish Tranche for Qualified Investors, as well as those that are contemplated to be signed at the time of the International Insurance Contract stating the illustrative and initial number of shares expected to be underwritten in each Tranche and the percentage that those shares represent of the initial number of shares offered in that Tranche. But it must be borne in mind that the final number of shares underwritten by each entity will be the one appearing in the corresponding Underwriting Agreement:

### **Retail and Employee Tranche and Spanish Tranche for Qualified Investors**

Below is a description of the principal characteristics of the Underwriting Protocols:

#### **A) Underwriting**

The Underwriters signing the Underwriting and Distribution Agreement commit, as provided therein and on a joint (but not several) basis, to distribute on the Spanish market or themselves acquire at the Underwriting Price, as defined below, the shares corresponding to the amount of the Offer assigned to the Retail and Employee Tranche or to the Spanish Tranche for Qualified Investors, as applicable, that, underwritten by each of them pursuant to that Underwriting and Distribution Agreement, have not been acquired by third parties, if during the term established for that purpose sufficient subscription requests or proposals are not presented to cover the total number of shares allotted to those Tranches. These obligations will not be enforceable in cases of automatic revocation of the Offer or withdrawal, as contemplated in this Share Securities Note.

The firm underwriting commitment of the Underwriters will only exist from the time they sign the Underwriting Agreement for the Retail and Employee Tranche or for the Spanish Tranche for Qualified Investors, and will be subject to the terms thereof.

For that purpose the Company will notify the CNMV as a material disclosure of the identity of the entities signing the corresponding Underwriting Agreements and the amount finally underwritten by those entities.

The Underwriters of each of the Tranches will have the unconditional obligation together to assume an additional 15% of the total underwriting of each of the Tranches, if any of the Underwriters that has signed the Underwriting Agreement for any of the Tranches does not meet its underwriting commitments. They will be distributed among the other Underwriters in proportion to their respective underwriting commitments assumed under the corresponding Underwriting Agreement. The fact that the entities in the underwriting syndicate have been required to enforce this additional commitment as a result of breach by any of the underwriters of its underwriting obligation will not in

and of itself constitute grounds for termination of any of the Underwriting Agreements by reason of force majeure.

In the Retail and Employee Subtranche, the underwriting commitment extends to the shares assigned thereto in accordance with the rules for redistribution among Tranches in this Share Securities Note. For these purposes the Agreement will provide for generic underwriting of such shares as may be allotted to the Retail and Employee Tranche as a result of the application of a redistribution in accordance with this Share Securities Note.

#### **B) Distribution**

The distribution of shares will be undertaken through the Underwriters and, in the Retail and Employee Tranche, also through the Related Distributors, if any. These entities will commit to acquire, for and on behalf of third parties, all shares that are finally allotted to the Applicants that presented their subscription requests (Orders, Applications or Proposals) directly or indirectly through them.

In the Retail and Employee Tranche, each Underwriter must receive and process any valid request for subscription of shares directly presented to it, in addition to those that are presented through its Related Distributors. No Distributor or Underwriter or Related Distributor, if any, is authorised to receive or process requests presented to it by investors to which the Offer is not addressed.

In the Spanish Tranche for Qualified Investors, the Underwriters thereof will obtain Proposals from qualified investors in such manner that they may be chosen by the Company. Such Underwriters must receive and process any valid Proposal for subscription of shares presented to them.

In all tranches the Underwriters and the Related Distributors, if any, have assumed the commitment not to collect any expense or fee from investors by reason of their participation in this Public Offer, including in the event of revocation of the Offer.

#### **C) Grounds for termination by reason of force majeure**

The Underwriting Agreements for the Retail and Employee Tranche and for the Spanish Tranche for Qualified Investors may be terminated by decision of the Company, after non-binding consultation with the Global Coordinators, or by joint decision of all of the Global Coordinators, after non-binding consultation with the Company, in the event of occurrence, at any time after signature and until 8:00 p.m. Madrid time on the Transaction Date, of any event of force majeure or extraordinary change in market conditions.

For these purposes, events of force majeure or extraordinary change in market conditions will include the following situations, provided that they make compliance with the Underwriting Agreements for the Retail and Employee Tranche and the Spanish Tranche for Qualified Investors by the Underwriters exceptionally burdensome or objectively unadvisable:

1. Suspension or significant limitation of trading of shares by the competent authorities of the Madrid, Barcelona, Bilbao, Valencia (including the Continuous Market), London or New York Stock Exchanges.

2. Any moratorium or the general suspension of banking activity in Spain, the United Kingdom or the United States of America declared by the competent authorities, or a substantial disruption of banking activities or of securities clearing and settlement activities in Spain, the United Kingdom or the United States of America.
3. An outbreak or escalation of hostilities or any conflict of a similar nature or a wide-reaching act of terrorism or declaration of war or national emergency, provided that it negatively and substantially affects the Spanish stock market indexes.
4. The occurrence of any other kind of calamity or crisis or substantial change in the domestic or international political, economic or financial situation or in the currency markets or an event that foreseeably may lead thereto, provided that it negatively and substantially affects the Spanish stock market indexes.
5. A substantial change in the economic, financial or equity status of the Company.
6. The amendment of the legislation of Spain or the United States of America or approval of any draft that implies foreseeable amendment of the legislation of Spain or the United States of America, which may negatively and materially affect the business of IBERDROLA RENOVABLES, the Offer, the shares of the Company or their transferability or the rights of holders of such shares.
7. The occurrence of circumstances not known at the time the prospectus is registered other than those provided for in the preceding paragraphs that could have a very negative and material effect on IBERDROLA RENOVABLES, on the Offer, on the shares of the Company or on the rights of the shareholders of the Company.

Termination for any of the reasons contemplated herein of the Underwriting Protocols or the Underwriting Agreements will result in termination of the Underwriting Protocols and the Underwriting Agreements, as applicable, and in any event automatic revocation of the Offer.

**D) Underwriting Price**

It will be the price per share at which the Underwriters commit to acquire the excess underwritten shares (the “**Underwriting Price**”).

The Underwriting Price for all Tranches will be equal to the Price of the Tranches for Qualified Investors of the Offer.

The Underwriting Price also will be determined by the Company by agreement with the Global Coordinators.

There will only be a firm underwriting commitment of the Underwriters for the Retail Subtranche and the Spanish Tranche for Qualified Investors when the Underwriters execute the respective Underwriting and Distribution Agreements.

**E) Unauthorised publicity**

By virtue of the provisions of the Underwriting Protocols, the Underwriters commit in the Underwriting and Distribution Agreements to abstain and cause their respective Related Distributors to abstain from engaging in publicity related to the Offer or their participation therein, without authorisation of the Company and the Global Coordinators.

**F) Fees**

The Underwriters will receive the following fees against the various tranches of the Offer, calculated on the result of multiplying the underwriting price (which will be equal to the price of the Tranches for Qualified Investors of the Offer) by the number of shares underwritten in each tranche, independent of the success fee described below. The breakdown of the fees will be as follows:

- *Praecipium*: fee payable to the Global Coordinators: 0.1%.
- Management: fee payable to the Lead Managers in proportion to their respective underwriting commitments (including the Global Coordinators): 0.1%.
- Underwriting: fee payable to the Underwriters in proportion to their respective underwriting commitments: 0.2%.
- Distribution: fee payable to the Underwriters (i) for the Retail and Employee Tranche, of 0.85%, in proportion to the allotments of shares, as regards the Orders and Applications for subscription of shares presented by them and, if applicable, by their Related Distributors; (ii) for the Spanish Tranche of Qualified Investors, of 0.5% in proportion to the respective underwriting commitments.

In addition, a Success Fee has been established for the Tranche for Qualified Investors, up to a maximum of 0.5% of the amount underwritten in said Tranches, in favour of the various entities that ultimately comprise the syndicate of banks participating in the same.

Regarding this Success Fee, the Company will have full discretionary authority as to: (i) whether or not it is granted; (ii) the final amount of this fee up to the indicated maximum of 0.5%; and (iii) the manner in which this amount is to be distributed among the various entities that ultimately comprise the syndicate of banks participating in the Offer.

As regards the Retail Subtranche, the Success Fee will vary from 0.25% to 0.75% of the amount resulting from multiplying the Underwriting Price of the Offer by the number of shares ultimately subject to allotment to the Retail Subtranche (“**Amount of the Retail Subtranche**”). This fee will accrue and be governed in accordance with the following rules:

- (i) When determining whether the Success Fee has been earned, the demand through each of the Underwriters for the Retail Subtranche during the Term for Presenting Orders will be taken into account. For these purposes it will be calculated as the difference between the number of shares requested by investors in the Orders

presented to the corresponding Underwriter or its Related Distributors, less the withdrawals, if any, presented and the cancellations of Orders pursuant to the rules contemplated in the Prospectus.

- (ii) If during the terms indicated below the demand through each of the Underwriters in the Retail Subtranche during the Term for Presentation of Orders, calculated as provided in the preceding paragraph, is in excess of the initial number of shares subject to underwriting by that Underwriter, it will receive the referenced Success Fee in accordance with the provisions of the following table:

Demand during the Term for Presentation of Orders by comparison with the initial number of shares to be underwritten as contemplated in the Underwriting Protocol of the Retail and Employee Tranche	Allotted shares corresponding to the Orders formulated by November 30, 2007	Shares allotted corresponding to the remainder of the Term for Presentation of Subscription Orders
More than 200%	0.75%	0.50%
Between 100% and 200%	0.50%	0.25%

The amount of the Success Fee payable to each of the Underwriters in accordance with the foregoing table will be the result of applying the percentages set forth in the table to the amount resulting from multiplying the Underwriting Price of the Offer by the number of shares allotted, respectively, during the terms indicated in the preceding table.

Exercise of the green shoe purchase option will earn the foregoing fees in full, including the success fee, if applicable.

The shares subject to distribution in the Employee Subtranche, which in principle will not exceed 1% of the offer, will earn *praecipium* and management, underwriting and distribution fees.

The underwriting fees, as well as the distribution of the Underwriting Entities that will not sign the Underwriting Contract for the Retail and Employees Tranche will be wholly used for stabilisation expenses, if necessary.

#### **G) Assignment of the fees**

The Underwriters signing the Underwriting Agreements may not assign the indicated fees in whole or in part, except in the cases contemplated in those Underwriting Agreements or when the assignment is made in favour of financial intermediaries authorised to engage in the activities described in articles 63 and 64 of the Securities Market Act, that are a part of the Underwriter's group or its representatives or agents duly registered with the CNMV or the Bank of Spain.

#### **Underwriting Agreement for the International Tranche**

As indicated above, it is contemplated that on 11 December 2007 an underwriting agreement will be signed for the International Tranche (the "Underwriting Agreement

for the International Tranche"). Under this agreement the Underwriters of the International Tranche, if any, that sign it will commit to distribute among institutional and qualified investors to which this Tranche of the Offer is addressed and, if not, to acquire or subscribe, as applicable, the shares assigned thereto.

The Underwriting Agreement for the International Tranche will be in accordance with customary practices for international underwriting agreements, in particular as regards the representations and warranties made by the Company and the grounds for termination.

The Underwriting Price will be the Price of the Tranche for Qualified Investors.

The specific fees for the International Tranche are as indicated in section 5.4.3. F) above below for the Spanish Tranche for Qualified Investors.

If the Price of the Tranche for Qualified Investors is not fixed on the terms established in this Share Securities Note, the Underwriting Agreement for the International Tranche will not be executed and the Offer as a whole will be automatically revoked.

Neither the Global Coordinators nor any other person that has been invited to sign the International Underwriting Agreement, nor the entities requesting shares in this Tranche, will be entitled to claim any indemnification for this reason.

#### **5.4.4 When the underwriting agreement has been or will be reached**

On 21 November 2007 the Underwriting Intent Protocol and Distribution Commitment for the Retail and Employee Tranche was signed, as was the Underwriting Intent Protocol and Distribution Commitment for the Spanish Tranche for Qualified Investors. It is contemplated that the Underwriting and Distribution Agreement for the Retail Subtranche will be signed on 3 December 2007.

For their part, it is contemplated that the Underwriting and Distribution Agreement for the Spanish Tranche for Qualified Investors and the Underwriting Agreement for the International Tranche will be signed on 11 December 2007.

## **6. ADMISSION TO TRADING AND DEALING ARRANGEMENTS**

### **6.1 An indication as to whether the securities offered are or will be the object of an application for admission to trading, with a view to their distribution in a regulated market or other equivalent markets with indication of the markets in question. The circumstance must be mentioned, without creating the impression that admission to trading will necessarily be approved. If known, the earliest dates the securities will be admitted to trading must be given**

Pursuant to the resolutions of the Board of Directors of the Company of November 5, 2007, adopted in execution of the decision of Iberdrola, S.A. in its capacity as sole shareholder of the Company on the same date, admission to official trading of all of the shares of the Company (including the newly-issued shares subject to this Offer) on the Madrid, Barcelona, Bilbao and Valencia stock exchanges will be requested, as has their inclusion in the Exchange Interconnection System (Continuous Market).

It is contemplated that all of the shares of the Company (including the newly-issued shares subject to this Offer) will be admitted to the trading on 13 December 2007. If the admission to trading has not occurred by 13 December 2007, the Company commits to notify the investors of the reasons for the delay by means of the appropriate notice to the CNMV.

If the shares of the Company have not been admitted to trading before midnight Madrid time on 14 January 2008, all Tranches of the Offer will be revoked and terminated, the provisions of section 5.1.4 above in this Share Securities Note then being applicable.

In this regard, the Company is aware of and agrees to submit to such rules as may exist or be issued regarding the exchange, particularly those regarding listing, continued listing and delisting.

**6.2 All the regulated markets or equivalent markets on which, to the knowledge of the issuer, securities of the same class as the securities to be offered or admitted to trading are already admitted to trading.**

The shares of the Company currently are not admitted to trading on any regulated market.

**6.3. If simultaneously or almost simultaneously with the creation of the securities for which admission to a regulated market is being sought securities of the same class are subscribed for or placed privately or if securities of other classes are created for public or private placing, give details of the nature of such operations and of the number and characteristics of the securities to which they relate**

Not applicable.

**6.4 Details of the entities which have a firm commitment to act as intermediaries in secondary trading, providing liquidity through bid and offer orders and description of the main terms of their commitment**

No entity has a firm commitment to act as an intermediary in secondary trading, providing liquidity through bid and offer orders.

**6.5 Stabilisation: where an issuer or a selling shareholder has granted an over-allotment option or it is contemplated that price stabilising activities may be undertaken in connection with the offer**

As indicated in section 5.2.5 above in this Share Securities Note, the Company contemplates giving the Underwriters of the Tranches for Qualified Investors a green shoe purchase option on the Company's shares.

In connection with this Offer, starting on the date of admission to trading of the Company's shares, including that date, and for 30 calendar days thereafter, the Global Coordinators Morgan Stanley, as Stabilisation Agent, may undertake stabilisation transactions on the Continuous Market, on behalf of the Underwriters of the Tranches for Qualified Investors, following customary international practices for such transactions for the international offer of shares.

The purpose of such stabilisation practices is to allow the market to gradually absorb the flow back of shares that typically occurs after a Public Offer, and support the market price of the shares.

For that purpose the Global Coordinators, on behalf of the Underwriters of the Tranches for Qualified Investors, may make an overallotment to the Tranches for Qualified Investors on behalf of the Underwriters of the Tranches for Qualified Investors.

According to the international practices that typically are followed, although not constituting any obligation or commitment in this regard, the Underwriters of the Tranches for Qualified Investors typically cover the excess demand by borrowing securities (or arranging for the availability of the securities in a number of ways) from shareholders, in an amount equal to the green shoe purchase option. These loans generally are for a term comparable to the term of the green shoe purchase option. The debt position in securities assumed by the Underwriters of the Tranches for Qualified Investors generally is covered by acquisition of such securities on the stock exchange (which if applicable could support the stability of the share price) or, directly, by exercise of the green shoe purchase option.

**6.5.1 The fact that stabilisation may be undertaken, that there is no guarantee that it will be undertaken, and that it may be stopped at any time;**

There is no obligation of the Global Coordinators to the Company or the investors to cover such excess demand as may occur in this Offer, nor to undertake the stabilisation practices referred to above, nor to exercise the green shoe subscription option. The description of these practices has been provided solely to illustrate international practices. The Global Coordinators are free to specify the procedure they deem to be most appropriate for the indicated purposes.

**6.5.2 Beginning and end of the term during which stabilisation may occur**

As indicated above, the stabilisation practices may be undertaken starting on the date of admission to trading of the Company's shares (contemplated for 13 December 2007), including that date, and during the following 30 calendar days.

**6.5.3 Identity of the entity directing the stabilisation for each relevant jurisdiction, unless this is not known at the time of publication**

The entity that will engage in stabilisation practices will be Morgan Stanley. Pursuant to European Commission Regulation EC 2273/2003, Morgan Stanley will notify the CNMV of the details of all stabilisation operations not later than the end of the seventh daily session of the market counted from the day following the date of undertaking such operations, and will advise the public, within a term of one week after the end of the stabilisation term, of the following:

- (a) whether or not stabilisation has been undertaken;
- (b) the beginning date of stabilisation;
- (c) the date stabilisation last occurred; and
- (d) the range of prices within which stabilisation occurred, for each of the dates

during which stabilisation operations were undertaken.

**6.5.4 The fact that the stabilisation transactions may result in a market price higher than would otherwise prevail**

The stabilisation practices may result in a market price higher than would have been the case had the stabilisation not been undertaken.

**7 SELLING SECURITIES HOLDERS**

**7.1 Name and business address of the person or entity offering to sell the securities, nature of any position or other significant relationship the sellers have had within the last three years with the issuer or any of its predecessors or affiliates**

As it is an increase of capital, the shares which constitute the initial object of the Offer are issued by the Company. Information about it appears in section 1.1 of this Share Securities Note.

With respect to the shares object of the green shoe purchase option, these are offered by Iberdrola Generación, S.A. (Unipersonal), a company belonging, in the same way as IBERDROLA RENOVABLES, to the group that Iberdrola, S.A. is the leading company of, with company registered office in Bilbao, Calle Cardenal Gardioqui, 8 and with Tax Identification Code. A95075586. The most relevant relations that Iberdrola Generación S.A. (Unipersonal) has maintained with the Company in the last three financial years and in the present year until 30 September 2007 are those that are described in sections IV.19.2 and IV.19.4 hereinbelow.

**7.2 Number and class of the securities being offered by each of the holders selling securities**

In this Offer, Iberdrola Generación, S.A. (Unipersonal) offers 76,801,180 ordinary shares of IBERDROLA RENOVABLES which it will sign on December 12, 2007 in the context of the capital increase that constitutes the subject of this Offer with the aim of placing them at the disposal of the Global Coordinating Entities by means of a loan of stocks so that they can allocate them in the Tranches for Qualified Investors of the Offer and grant the green shoe purchase option over the same.

**7.3 Lock-up agreements:**

In the Underwriting and Distribution Agreements for the Retail Subtranche and the Tranches for Qualified Investors, or as the case may be, by means of a separate document, the Company, Iberdrola, S.A. and Iberdrola Generación, S.A. (Unipersonal) commit to the Global Coordinators and the Underwriters for the Retail Subtranche and for the Tranches for Qualified Investors to:

- (i) not resolve to issue, issue, offer, pledge, sell, contract to sell, sell a purchase option or contract, purchase a sale option or contract, grant an option, right or guarantee of purchase, pledge, lend or otherwise dispose of or transfer, directly or indirectly, shares of the Company or securities convertible into, exercisable to obtain or exchangeable for shares of the Company, warrants or any other instruments that may give a right to subscribe or acquire shares of the Company

(including the transactions in financial instruments contemplated in article 2 of the Securities Market Act), nor directly or indirectly undertake any transaction that could have an effect similar to the foregoing, nor directly or indirectly undertake registration acts under the US Securities Act of 1933 regarding such securities;

- (ii) not sign swaps or other contracts or transactions by virtue of which the economic effects of ownership of shares of the Company are transferred, in whole or in part, directly or indirectly, regardless of whether the transaction described in section (i) or the swap described in section (ii) is to be settled by delivery of shares of the Company, securities convertible into, exercisable to obtain or exchangeable for shares of the Company, by payment of money or otherwise;

until one hundred and eight (180) days have passed after the date of admission to trading of the shares of the Company on the Madrid, Barcelona, Bilbao and Valencia stock exchanges, absent express advance authorisation in writing to do so from the Global Coordinators, which may not deny that authorisation without justification.

As exceptions to that commitment, the Company may (i) issue and deliver shares or grant options or other rights for acquisition of shares or tied to the value of shares within the framework of incentive plans for its executives and/or employees and (ii) issue shares within the framework of strategic operations of the Company, provided that the acquirer or acquirers assume the same commitment not to transfer the shares during the remaining term.

Also, Iberdrola, S.A. and Iberdrola Generación, S.A. (Unipersonal) may transfer shares of the Company within that term of one hundred and eighty (180) days as a result of (a) the loan of securities to be made by Iberdrola Generación, S.A. (Unipersonal) to the Global Coordinators for overallotment of shares in the Tranches for Qualified Investors of the Offer, (b) transfers of shares between entities belonging to the same group (in the sense of article 4 of the Securities Market Act), provided that the acquiring entity assumes the same commitment not to transfer the shares during the remaining term, (c) transfers of shares within any Public Offer for Acquisition of the Company and (d) transfers of shares provided that the acquirer or acquirers assume the same commitment not to transfer the shares during the remaining term. Iberdrola, S.A. and Iberdrola Generación, S.A. (Unipersonal) may also transfer shares of IBERDROLA RENOVABLES and arrange for derivative financial instruments thereon with IBERDROLA RENOVABLES itself to cover, if applicable, such incentive plans as Iberdrola, S.A. and IBERDROLA RENOVABLES may establish for their respective directors or executives.

## **8 EXPENSE OF THE ISSUE/OFFER**

### **8.1 The total net proceeds and an estimate of the total expenses of the issue/offer**

The expenses of the Offer are as indicated below, merely on an illustrative basis, given the difficulty of specifying the final amounts as at the date of preparation of this Prospectus:

Expenses	Millions of euros
----------	-------------------

Expenses	Millions of euros
<i>Praecipium</i> and management, underwriting, distribution and incentive fees <sup>(1)</sup>	45.8
Fees of Spanish exchanges	0.4
CNMV fees	0.1
Iberclear fees	0.1
Legal and miscellaneous expenses (notary, registry, legal and non-legal publicity, agency fee, legal and financial advice, audits, incidental expenses and possible variances)	21.0
Transfer Tax and Stamp Duty (on corporate transactions)	52.0
<b>TOTAL</b>	<b>119.4</b>

- (1) The fee expenses are merely estimates and have been calculated assuming that (i) all of the entities in the various syndicates distribute the number of shares that, in principle, will be underwritten by each of them and (ii) taking as a reference a price of 6.15 euros per share of IBERDROLA RENOVABLES (the average price in the Illustrative and Non-Binding Price Range).

The cost to the Company would amount to 119.4 million euros, which represents 2.5% of the effective amount of the initial Offer, taking as a reference a price per share of IBERDROLA RENOVABLES of 6.15 euros (the average price in the Illustrative and Non-Binding Price Range) and assuming full subscription of the Public Offer for Subscription.

## **9 DILUTION**

### **9.1 The amount and percentage of immediate dilution resulting from the Offer**

The capital increase resolved within the framework of the Public Offer for Subscription involves the issue and circulation of a maximum of 844,812,980 new common shares of 0.50 euros par value, which represents 20% of the share capital of the Company prior to the Offer.

### **9.2 In the case of a subscription offer to existing equity holders, the amount and percentage of immediate dilution if they do not subscribe to the new Offer**

As mentioned in section 0 above in this Share Securities Note, Iberdrola, S.A., in its capacity as sole shareholder of the Company, has waived its pre-emptive subscription right regarding the capital increase occurring within the framework of the Public Offer for Subscription. As a result, assuming that that issue is fully subscribed by third parties and the green shoe purchase option is wholly exercised, the interest of the Iberdrola Group in the Company would be diluted by 20% of the share capital resulting from the increase pursuant to the Public Offer for Subscription.

## 10 ADDITIONAL INFORMATION

### 10.1 If advisors connected with an issue are mentioned in the securities note, a statement of the capacity in which the advisors have acted

In addition to the Global Coordinators, the following entities have provided advice regarding the Offer that is the subject matter of this Prospectus:

- (a) CMS Albiñana & Suárez de Lezo, S.L. and Uría Menéndez y Cía. Abogados, S.C., firms responsible for providing Spanish legal advice to IBERDROLA RENOVABLES.
- (b) Latham & Watkins LLP, the firm responsible for providing United States legal advice to IBERDROLA RENOVABLES.
- (c) Linklaters, S.L., the firm responsible for providing United Kingdom legal advice to IBERDROLA RENOVABLES.
- (d) J&A Garrigues, S.L., the firm responsible for Spanish legal advice to the Syndicate and Underwriters for all Tranches.
- (e) Allen & Overy LLP, the firm responsible for United States legal advice to the Syndicate of Distributors and Underwriters for all Tranches.
- (f) Ernst & Young, S.L., the auditors of accounts of IBERDROLA RENOVABLES.

### 10.2 An indication of other information in the securities note which has been audited or reviewed by statutory auditors and where auditors have produced a report. Reproduction of the report or, with permission of the competent authority, a summary of the report

Not applicable.

### 10.3 Where a statement or report attributed to a person as an expert is included in the Securities Note, provide such persons' name, business address, qualifications and material interest if any in the issuer. If the report has been produced at the issuer's request a statement that such statement or report is included, and the form and context in which it is included, with the consent of the person who has authorised the contents of that part of the Securities Note

Not applicable.

### 10.4 Where information has been sourced from a third party, provide a confirmation that this information has been accurately reproduced and that as far as the issuer is aware and is able to ascertain from information published by that third party, no facts have been omitted which would render the reproduced information inaccurate or misleading. In addition, identify the source(s) of the information

Not applicable.

#### **IV INFORMATION ON THE ISSUER (ANNEX 1 OF COMMISSION REGULATION (EC) 809/2004 OF 29 APRIL 2004)**

##### **1. PERSONS RESPONSIBLE**

###### **1.1 Identification of the persons responsible for the share registration document**

Mr. Xabier Viteri Solaun in her/his capacity as Chief Executive Officer, for and on behalf of IBERDROLA RENOVABLES, S.A. Unipersonal (from hereonin "IBERDROLA RENOVABLES", the "Company" or the "Issuer"), by virtue of the current authorisation granted for that purpose to her/him by the Board of Directors of the Company at its meeting of November 14, 2007, in exercise of the delegation extended by the sole shareholder of the Company, Iberdrola, S.A. of the same date, assume responsibility for the content of this registration document (hereinafter the "Registration Document").

###### **1.2 Statement of the persons responsible for the share registration document**

Mr. Xabier Viteri Solaun, having taken reasonable care to ensure that such is the case, represents that the information about the Issuer contained in this Registration Document is, to the best of his knowledge, in accordance with the facts and does not omit anything likely to affect its content.

##### **2. STATUTORY AUDITORS**

###### **2.1 Names and addresses of the issuer's auditors for the period covered by the historical financial information (together with their membership in a professional body)**

Ernst & Young, S.L., domiciled at Plaza Pablo Ruiz Picasso, 1, Torre Picasso, 28020 Madrid, holder of C.I.F. (Codigo de Identificacion Fiscal - Taxpayer Identification Code) number B-78,970,506 and registered in the R.O.A.C. (Registro Oficial de Auditores de Cuentas - Official Register of Auditors of Accounts) with number S0530 and in the Madrid Commercial Register at volume 12,749, book 0, sheet 215, section 8, page M-23,123, entry 116, was the auditor of accounts of the Company during the years 2005 and 2006.

For its part, Deloitte, S.L., domiciled at Plaza Pablo Ruiz Picasso, 1, Torre Picasso, 28020 Madrid, holder of C.I.F. number B-79,104,469 and registered in the R.O.A.C. with number S0692 and in the Madrid Commercial Register at volume 13,650, sheet 188, section 8, page M-54,414, entry 96, was the auditor of the accounts of the Company until 2004.

###### **2.2 If auditors have resigned, been removed or not been re-appointed during the period covered by the historical financial information, indicate details if material**

Deloitte, S.L. was not reappointed as auditor at the Company upon expiration of its appointment for the 2004 fiscal year, being replaced by Ernst & Young, S.L. starting with the fiscal year beginning 1 January 2005.

### **3. SELECTED FINANCIAL INFORMATION**

#### **3.1 Selected historical financial information regarding the issuer, presented for each financial year for the period covered by the historical financial information, and any subsequent interim financial period, in the same currency as the financial information**

The selected historical financial information included in this section refers to the consolidated annual financial statements of the IBERDROLA RENOVABLES Group for the fiscal years ended 31 December 2006 and 2005, audited by Ernst & Young, S.L., and 31 December 2004, unaudited, all prepared in accordance with the provisions of the International Financial Reporting Standards (hereinafter "IFRS"), as approved by the European Union in accordance with Regulation (EC) 1606/2002 of the Parliament and of the European Council. All figures contained in this point are expressed in thousands of euros, unless otherwise stated.

#### **4. RISK FACTORS**

See section II (Risk Factors) of this Prospectus.

## **5. INFORMATION ABOUT THE ISSUER**

### **5.1. History and development of the issuer**

#### **5.1.1. Legal and commercial name of the issuer**

The complete corporate name of the Issuer is IBERDROLA RENOVABLES, S.A., as provided in the first article of its articles and bylaws.

#### **5.1.2. Place of registration of the issuer and registration number**

The Company is registered in the Madrid Commercial Register, at volume 16,731, folio 10, page M-285,710, entry 1.

#### **5.1.3 Date of incorporation and the length of life of the issuer, except where indefinite**

The Company was formed for an indefinite term by public deed of 9 July 2001, under the name IBERDROLA ENERGÍAS RENOVABLES II, S.A., executed before Madrid notary Mr. Miguel Ruiz-Gallardón García de la Rasilla, with number 4690 in his notary record. Its initial name was replaced by the name IBERDROLA ENERGÍAS RENOVABLES, S.A. by virtue of a public deed of 31 August 2006 executed before Madrid notary Mr. Miguel Ruiz-Gallardón García de la Rasilla, with number 6986 in his notary record. The Company changed its initial corporate name to the current one by virtue of a public deed of 31 July 2007 executed before Madrid notary Mr. Miguel Ruiz-Gallardón García de la Rasilla, with number 5,972 in his notary record, which was recorded in the Madrid Commercial Register on 3 August 2007.

#### **5.1.4 Domicile and legal form of the issuer, the legislation under which the issuer operates, its country of incorporation, and the address and telephone number of its registered office (or principal place of business if different from its registered office)**

##### **5.1.4.1 Registered office and legal form**

IBERDROLA RENOVABLES has its registered office in the city of Madrid at Calle Tomás Redondo, número 1. Its telephone number is (+34) 91 511 65 00.

The Company is a Spanish business company in the legal form of a sociedad anónima (corporation). Therefore it is subject to the regulations set forth in the Corporations Act and other related legislation, as well as the legislation specific to its business sector as indicated below.

##### **5.1.4.2 Regulatory framework regarding production of electricity from renewable energy sources**

## **A INTRODUCTION**

Over the last decade, global public opinion has been paying ever-increasing attention to questions related to climate change and its effect on world populations and economies.

As a result, many States on 9 May 1992 in New York adopted the United Nations Framework Convention on Climate Change. The objective of this convention was to establish concentrations of greenhouse gases at a level that would prevent human-sourced interference with the climate. The convention became effective on 21 March 1994. On 11 December 1997 the States participating in the convention adopted the Kyoto Protocol, which became effective on 16 February 2005, after ratification by Russia on 18 November 2004. The Kyoto Protocol has the same objectives as the convention, but significantly strengthens them. It introduces individual binding objectives for the parties, assigning each of them an individual objective for reduction of its greenhouse gas emissions, to achieve at least a 5% global reduction during the term from 2008 to 2012, by comparison with 1990 levels.

### **European measures regarding renewables to 2020**

The Kyoto Protocol was ratified by the European Union and its Member States on 31 May 2002. As a signatory of the convention, the European Union was assigned an objective of reducing its greenhouse gases by eight percent.

The European Union on 26 November 1997 presented the “White Paper for a Community Strategy and Action Plan”, the objective of which is to achieve a twelve percent share for renewable energy sources in gross energy consumption within the European Union by 2010, thus doubling its pre-2010 use (six percent of total consumption in 1996 to twelve percent in 2010). The overall objective set by the European Union in this notice requires strong participation of the Member States, which must stimulate expansion of renewable energy sources based on their own potential. The White Paper proposes that renewable energy sources be given fair access to markets, without excessive financial conditions. For that purpose it presents a list of priority measures, notable among them being non-discriminatory access to the electricity market and tax and financial measures.

On 27 September 2001 Directive 2001/77/EC of the European Parliament and of the Council, on the Promotion of Electricity Produced from Renewable Energy Sources in the Internal Electricity Market (the “**Renewables Directive**”) was approved. It implements the White Paper regarding renewable energy sources. Under the directive, the Member States every five years must prepare and publish a report that, for the following ten years, establishes the national objectives for future consumption of electricity from renewable energy sources, as well as the national measures adopted or contemplated in order to achieve those objectives. Article 3.4 of the Directive stipulates that the overall guideline target for 2010 is that electricity produced using renewable energy sources should account for twelve percent (12%) of *gross energy consumption* and, more specifically, twenty two percent (22.1%) of *electricity generated* in total electricity consumption in the European Union.

The status in 1997 and 2005 and the goals for electricity generated from renewable sources by comparison with gross electricity consumption in 2010 in the various countries in the European Union are as follows:

	1997 E-RES (1) (TWh) status (2) (*)	1997 E-RES (1) status (%) (3)	2005 E-RES (1) status (%) (4)	E-RES (1) Forecast 2010 (%) (5)

Community (Europe 25)	355.2	12.90	13.6	21.00

Source: Directive 2001/77 and Eurostat

- (1) E-RES: Electricity generated from renewable energy sources
- (2) The data correspond to domestic production from renewable energy sources in 1997 (data extracted from Directive 2001/77), except in the case of the Czech Republic, Estonia, Cyprus, Latvia, Lithuania, Hungary, Malta, Poland, Slovenia and Slovakia, the data for which correspond to 1999.
- (3) The percentages of electricity generated from renewable energy sources (E-RES) in 1997 (in 1999-2000 for the Czech Republic, Estonia, Cyprus, Lithuania, Latvia, Hungary, Malta, Poland, Slovenia and Slovakia) and 2010 are obtained from domestic production of E-RES divided by domestic consumption of electricity.
- (4) The data for 2005, calculated using the same methodology as in 1997 are taken from Eurostat. More information at:  
[http://epp.eurostat.ec.europa.eu/portal/page?\\_pageid=1996,39140985&\\_dad=portal&\\_schema=PORTAL&screen=detailref&language=en&product=Yearlies\\_new\\_environment\\_energy&root=Yearlies\\_new\\_environment\\_energy/H/H2/H23/en024](http://epp.eurostat.ec.europa.eu/portal/page?_pageid=1996,39140985&_dad=portal&_schema=PORTAL&screen=detailref&language=en&product=Yearlies_new_environment_energy&root=Yearlies_new_environment_energy/H/H2/H23/en024)
- (5) See Note 3.
- (\*) Terawatt hour: One billion kilowatt hours.

Bearing in mind that the percentage of electricity produced from renewable energy sources (E-RES) has been calculated on the basis of gross electricity consumption, the explanation for the percentage of E-RES

in 1997 being higher than the percentage in 2005 is the fact that increased total electricity consumption was proportionately higher than the increase in electricity generation from renewable energy sources.

In 2007, the European Commission presented the “*Renewable Energy Roadmap*” as a part of its package of measures to combat climate change as regards energy. In addition to the guideline percentage target of 21% set<sup>1</sup> for electricity generated from renewable energy sources (E-RES) in the European Union by 2010, the Commission proposes to set a mandatory objective of twenty percent (20%) for consumption of energy from renewable energy sources before 2020, and to increase the minimum objective for biofuels for 2020 to ten percent (10%). This new Roadmap gives the Directive continuity and proposes another two initiatives (twenty percent (20%) efficiency and twenty percent (20%) reduction in emissions) for the same timeframe.

**Kinds of renewable energy support structures in the countries in which IBERDROLA RENOVABLES is active**

There are various legal provisions for public support of renewable energy that bear on development of the business and products of IBERDROLA RENOVABLES. They may be grouped by reference to two criteria:

- *direct support structures*, the basic objective of which is development of the renewables, or *indirect*, which pursue another end but indirectly support renewables; and
- *basic support structures*, in the absence of which it is not possible to develop the renewables, or *complementary support structures*.

A classification of the structures based on these two categories is set forth in the following table:

Table 1: Kinds of support structures		
	Direct	Indirect
Basic	<b>Quota systems:</b> <ul style="list-style-type: none"> <li>▪ Transferable Green Certificates</li> <li>▪ Public auctions</li> </ul> <b>Regulated price system</b> <ul style="list-style-type: none"> <li>▪ Regulated tariffs</li> <li>▪ Regulated feed-in tariffs</li> </ul>	<b>Taxation of contaminating energies</b>  <b>Taxation favourable to renewable energy sources</b>
	<b>Renewable energy labelling</b>  <b>Clean Development and Joint Implementation Mechanisms (Kyoto)</b>	
Complementary		

The basic structures can be classified into two large groups, systems based on price and those based on quantities.

<sup>1</sup> The difference between this figure and the figure in the Directive (22.1%) is that the latter covers only the 15 countries of the European Union, whereas the E-RES figure (21%) covers all 25 member states.

Of the systems based on price, the most significant is direct price support, also called the feed-in tariffs system, which is operational, for example, in Spain. This system consists of:

- (i) a guarantee that all energy generated during a given period of time will be purchased from the producer by the system (either directly or through distribution or transmission companies); and
- (ii) the regulator's establishment of a fixed tariff or "feed-in tariff" in addition to the market price for each kilowatt/hour<sup>2</sup> (kWh) or megawatt/hour<sup>3</sup> (MWh, equivalent to 1,000 kWh) generated. The regulator determines the tariff or feed-in tariff in such manner that the generator obtains reasonable return on its investment.

Among the systems based on quantities, the following two are the most significant:

- (iii) Transferable green certificates or "certificates of origin" and quotas. In this system the renewable generators receive a green certificate for each MWh generated and an obligation is imposed on energy suppliers (distributors or marketers) for a part (quota) of the energy they supply to be of renewable origin. To satisfy this obligation, the suppliers must acquire green certificates in amounts equal to their quotas. If they fail to do so, they may be subject to a penalty.

Therefore, renewable generators receive revenue from two sources:

- The market price for the energy sold; and
  - The market price of the green certificates sold to suppliers that need them to satisfy their quotas.
- (iv) Public auction systems. In this system a public agency invites potential generators to present offers for construction of additional renewable energy capacity. The most economical offers in terms of €/MWh (which satisfy the technical requirements that are established) are awarded a contract for purchase of all energy produced at the price established during the auction, for a specified term.

Other systems supporting renewable energy include (i) tax structures supporting renewables. An example is the Production Tax Credit (PTC) established at the federal level in the United States, by means of which renewable producers have a tax credit against a direct tax for ten years; (ii) As a tax benefit, mention can also be made of the accelerated systems of amortization in the United States known as *Modified Accelerated Cost Recovery System* (MACRs), which is a type of benefit which is associated with the capacity of the owner of the wind farm to make the most of the accelerated amortisation in most of the assets association with the facility, (iii) advantages associated with the delivery of the energy produced by the renewable energy producers; they are given priority in Access to the distribution networks or they are exempted from the payment of the costs of interconnection to the transport or distribution networks or (iv) the option of using the modified

---

<sup>2</sup> Unit of measurement equivalent to the energy produced by one kilowatt over one hour.

<sup>3</sup> Unit of energy equivalent to one thousand kilowatts (or what is the same thing, one megawatt) for one hour.

accelerated cost recovery system (MACRS) for assets linked to facilities that generate electricity from renewable energy sources.

## **B. SPANISH REGULATORY FRAMEWORK**

### **B.1. General regulatory framework of the electricity sector**

The principal regulatory source regarding electricity is Electricity Sector Act 54/1997 of 27 November 1997, which governs “*activities directed to the supply of electricity, consisting of generation, transmission, distribution, marketing and intercommunity and international interchange, as well as economic and technical management of the electricity system*”.

The purpose of regulation of such activities is adaptation of electricity supply to the needs of consumers, and the rationalisation, efficiency and optimisation thereof, in light of the principles of natural monopoly of transmission and distribution, a single network, and operation at least cost. Activities directed to supply of electricity are exercised on a coordinated basis under the principles of objectivity, transparency and free competition.

According to article 2, “*free business initiative is recognised for exercise of activities directed to the supply of electricity regulated in this Act. These activities will be exercised in a manner ensuring the supply of electricity to all consumers requiring service within the country, and will be deemed to be an essential service*”.

The Act distinguishes between regulated and unregulated activities. Regulated activities are the economic and technical management of the system, transmission and distribution. Undertakings engaging in these kinds of activities must have corporate purposes exclusively related to the conduct thereof. They therefore may not engage in unregulated activities (production or marketing), without prejudice to the possibility of sale to consumers that are subject to the tariff applicable to distributors. Nevertheless, within a group of companies incompatible activities may be undertaken pursuant to the Act, provided that they are exercised by different companies. In this regard, the corporate purpose of a company may cover incompatible activities, provided that it is contemplated that only one of the activities will be exercised directly, and the others by ownership of shares or interests in other companies.

The Electricity Sector Act was recently amended by Act 17/2007 of 4 July 2007, to adapt Spanish law to Directive 2003/54/EC of the European Parliament and of the Council of 26 June 2003, which established new common rules for implementation of the Internal Market for electricity, and repealed Directive 96/92/EC.

### **B.2. Generation business**

#### **B.2.1. Applicable rules**

##### **B.2.1.1. State regulations**

IBERDROLA RENOVABLES conducts its business in the electricity generation market. The principal provisions regulating this market are as follows:

- Electricity Sector Act 54/1997 of 27 November 1997 (articles 21 and following). Royal Decree 661/2007 of 25 May 2007 governing the business of production of electricity under the special system.
- Royal Decree 1433/2002 of 27 December 2002 establishing the requirements for low-voltage metering of consumers and production centres under the Special System.
- Royal Decree 1955/2000 of 1 December 2000 regulating the activities of production, transmission, distribution, marketing, supply and authorisation procedures for electricity facilities.
- Royal Decree 2019/1997 of 26 December 2007 organising and governing the production market for electricity.
- Order ITC/400/2007 of 26 February 2007 regulating bilateral contracts signed by distribution companies for regulated rate supply within the peninsula.
- Order ITC/3990/2006 of 28 December 2006 regulating contracting for electricity futures by distributors during the first half of 2007.
- Ministerial Order of 17 December 1998 amending the Order of 29 December 1997 implementing certain aspects of Royal Decree 2019/1997 of 26 December 1997, organising and regulating the electricity production market
- Resolution of 24 May 2006 of the General Energy Secretariat, approving the operating rules for the daily and intra-daily electricity production market.
- Resolution of 24 May 2006 of the General Energy Secretariat, approving various operating procedures for adaptation to the new electricity rules.

#### **B.2.1.2. Regional rules**

The regional governments have issued many rules that very particularly affect procedures for authorisation of generation facilities under the special system. The most relevant matter relates to the limits that, for environmental reasons, have been established by some regional governments on the development of new wind farms. In addition the regional governments have their own registers, which act on a coordinated basis with that of the national authorities.

#### **B.2.2. Competent authorities**

The national government has authority to establish the basic regulation for generation, transmission, distribution and marketing of electricity, while the autonomous regional governments have authority for legislative and regulatory development and implementation of the basic national government rules regarding electricity.

The national government has authority to authorise electricity facilities when their exploitation affects more than one autonomous region. Article 111 of Royal Decree 1955/2000 states that the national government has authority regarding facilities having an obligation to make offers to the market operator.

For its part, article 3.3 a) gives authority to autonomous regional governments within the scope of their respective Statutes to authorise electricity facilities when their exploitation does not affect other regions. In any event the autonomous regional governments are to authorise the construction, exploitation, substantial modification, transfer and closing of electricity production facilities under the special system, without prejudice to such concessions and authorisations as may be necessary under other applicable provisions, particularly those regarding organisation of the territory and the environment. (articles 3.3 and 28.3 of the Electricity Sector Act) when the regional government has authority regarding the matter and the facilities are located only within that autonomous region, provided that the power of the facilities is not greater than 50 megawatts and they are not located at sea.

### **B.2.3. Ordinary system and special system**

The rules regarding the electricity sector distinguish two kinds of production facilities: (i) generation facilities under the ordinary system and (ii) generation facilities under the special system. Basically, IBERDROLA RENOVABLES owns special system facilities, but it also exploits mini-hydro facilities under the ordinary system.

Under article 27 of the Electricity Sector Act, generation facilities under the special system are:

- those the installed capacity of which does not exceed 50 megawatts, (i) using cogeneration or other forms of production of electricity associated with non-electricity businesses, provided that they involve a high energy yield, (ii) as primary energy using one of the non-depleteable renewable energies, biomass or any kind of biofuel, provided that the owner does not engage in production activities under the ordinary system or (iii) as primary energy using non-renewable waste.
- facilities that produce electricity from facilities for the treatment and reduction of waste from the agricultural, cattle raising and services sectors, with installed capacity not greater than 25 megawatts, when they result in high energy yield.

Both ordinary and special system facilities require governmental authorisation from the competent agency. Facilities under either of the two systems must be registered with the Governmental Register of Facilities for the Production of Electricity, maintained by the Ministry of Industry, Tourism and Trade. This register is structured in three sections. Facilities for the production of electricity under the ordinary system are registered in the first section. Facilities for production of electricity under the special system are registered in the second section. Foreign operators are registered in the third section. All of the foregoing is without prejudice to registration in the registers created by the autonomous regional governments.

The basic principle underlying organisation of the electricity market is freedom of contract for producers, marketers and consumers. Pursuant to this principle, the possibilities for participation in the production market - both for facilities operated under the ordinary system and those operated under the special system, and without prejudice to the specificities of the latter, which will be considered later in this document - are as follows:

### Bilateral contracts

Bilateral contracts are contracts entered into by electricity production sector operators. In this market of a bilateral nature, the generator as compensation receives the negotiated price.

### Daily market, technical restrictions and intra-daily market

Under Royal Decree 2019/1997 of 26 December 1997 organising and regulating the electricity production market, ordinary system producers are required to sell their production on the daily market by presenting offers of sale, or by means of bilateral contracts. The market price will be equal to the price of the last tranche of offers for sale (marginal offer) necessary to fully or partially satisfy total demand.

With the schedule resulting from matching and the information regarding the bilateral physical contracts the performance of which is contemplated for the following day, the System Operator (that is, Red Eléctrica de España, basically responsible for operating the Spanish electricity system, guaranteeing the technical conditions in order for electricity to flow on a continuous basis from the generation plants to the centres of consumption) establishes the Daily Base Operating Schedule, on the basis of which it determines the technical restrictions that may affect implementation, as well as the need for such complementary services (among others, regulation, control of voltage and reinstatement of service) as may be applicable.

The intra-daily market is intended to make such adjustments as may be necessary to the daily programme in effect by presentation of offers of sale and acquisition of electricity to the market operator.

The operating rules and procedures are specified in the Operating Rules of the Electricity Production Market and the agreement accepting those rules, approved by Resolution of 24 May 2006 of the General Energy Secretariat, approving the operating rules of the daily and intra-daily market for electricity production. The referenced rules must be subscribed by all market operators (also by the special system producers using the market) in order to participate therein.

### Primary emissions of energy

The primary emissions are organised as auctions of purchase options for energy associated with a pre-established power which is shared 50-50 basis by Endesa and Iberdrola (because, by application of the electricity sector regulations, they have been declared to be the dominant operators in the electricity market).

The options will be exercisable throughout a delivery period or will be of pre-established exercise. The energy will be delivered at a known exercise price expressed in €/MWh measured at plant bars. The second auction took place on 13 September 2007.

### Distribution auctions

Order ITC/400/2007 of 26 February 2007 governs bilateral contracting for electricity with physical delivery by the companies responsible for regulated rate supply within the peninsula, implemented by way of a decreasing price auction procedure, until reaching

balance between offer and demand for energy. The first auction took place on 19 June 2007 and the second on 18 September, 2007.

Because, by application of the regulations of the electricity sector, the Iberdrola Group has been classified as a dominant operator, only one of the companies in the group may participate in the auctions. For each group only one participant may act as representative.

### **B.3. Ordinary system**

The generation of electricity under the ordinary system is regulated in articles 21 to 26 of the Electricity Sector Act.

Some facilities, despite using technologies appropriate for the special system, are operated under the ordinary system. This is the case of the IBERDROLA RENOVABLES mini-hydro facilities subject to the system contemplated in Royal Decree 1538/1987 of 11 December 1987, which by mandate of article 23 of the Electricity Sector Act must remain under the ordinary system. Regarding the facilities using this kind of power with not more than 10 MW, article 47 of Royal Decree 661/2007 contemplates that the Ministry of Industry, Tourism and Trade may provide for the right to receive a feed-in tariff, provided that sufficient investment is made in the facility to increase the capacity for production of electricity.

### **B.4. Special system**

The core business of IBERDROLA RENOVABLES centres on operation of special system production facilities. The essential aspects of the current regulatory framework are as follows.

#### **B.4.1. Promotion of renewable energies: evolution of the Spanish regulatory framework**

The regulation of renewable energy support in Spain starts from Conservation of Energy Act 82/1980 of 30 December 1980, which in particular promoted cogeneration and small power hydroelectric plants. The support system was based on the right to sell all energy produced by the facility and receipt of an "appropriate" sale price.

Later, Royal Decree 2366/1994 of 9 December 1994 expanded the supported technologies to include wind, biomass and solar, maintaining the basic lines of the prior regulatory framework.

The Electricity Sector Act was approved in 1997. It establishes the general lines for liberalisation of the sector. As regards renewable energy, the Act provides as follows: *"So that by 2010 renewable energy sources will cover a minimum of 12% of total energy demand in Spain, a Renewable Energy Development Plan is established, the objectives of which will be taken into account when establishing the feed-in tariffs"* (thereby recognising the objective stated in the European Commission White Paper on sources of renewable energy, which in 2001 would result in the Renewables Directive). In addition the Act recognises that in order to achieve that objective a special system of support will be required for these technologies (apart from the ordinary system for conventional plants).

In compliance with the instruction set out in the Electrical Sector Act, on December 30, 1999 the Council of Ministers approved the Public Works Plan of Renewable Energies for the period 2000-2010. This contained the most relevant guidelines in the expression of the strategies necessary for the promotion, development, dissemination and innovation of renewable energies. This is converted into a basic instrument of the energy and environmental policy that is national in scope, in a context of growing liberalization aimed at a European single energy market. This Plan was replaced by the Public Works Plan of Renewable Energies for the period 2005-2010, approved by the Council of Ministers on August 26, 2005.

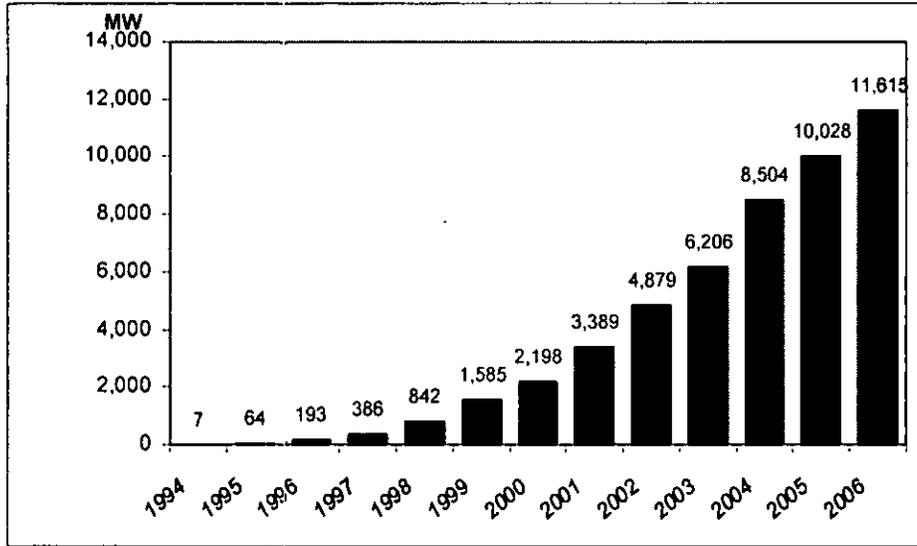

In addition, Royal Decree 2818/1998 of 23 December 1998 regulated the special system established by the Act, contemplating that the feed-in tariffs must be updated annually based on a series of parameters, to some extent discretionary.

After various later rules intended to incentivise greater participation of renewable energy in the market (Royal Decree Law 6/2000 and Royal Decree 841/2002), in March 2004 Royal Decree 436/2004 of 12 March 2004 was approved. It established the economic structure for support of production of electricity under the special system.

Royal Decree 436/2004, the purpose of which was to unify the rules implementing the Electricity Sector Act as regards production of electricity under the special system, established: (i) the methodology for updating and systematising the legal and economic system for electricity production activities under the special system; and (ii) the price system for each kind of renewable energy source.

On 25 May 2007 new Royal Decree 661/2007 (“**RD 661/2007**”) was approved. It regulates the business of production of electricity under the special system, establishing the legal and economic framework for this business. This Royal Decree replaces Royal Decree 436/2004.

The chart below shows growth in installed wind power over the years and how this growth has been affected by the changes in the regulatory framework described in the preceding sections of this document. Investment in wind energy has experienced sustained growth over the period covered by the graph, which shows the effectiveness of the regulatory framework for this technology.

The status of renewable energies, by technology, and the specified objectives, are included in the following table:

	Status at end of 2006 (MWh)	PER (1) objectives for 2010 (MWh)	Difference between PER (1) and December 2006 status (MWh)
Mini-hydro	1,811	2,199	388
Wind	11,233	20,155	8,540
Biomass	554	2,039	1,485
Photovoltaic Solar	106	400	294
Thermoelectric Solar	0	500	500
<b>Total</b>	<b>13,704</b>	<b>25,293</b>	<b>11,589</b>

Source: PER and Draft Report on planning in the gas and electricity sectors 2007-2016.

(1) PER: Plan de Energías Renovables (Renewable Energies Plan).

In accordance with the information provided in the foregoing table, wind and biomass energy, the objectives for which for 2010 are 20,155 MW and 2,039 MW, respectively, are the fundamental pillars for achieving the goals established in the Plan de Energías Renovables (PER).

In the statistical information on sales under the special system published for August 2007, the National Energy Commission reports that installed wind power in Spain that is definitively registered in the governmental register of production facilities under the special system totals 12,692 MW, which is equivalent to a sixty-three percent (63%)

level of compliance with the target for installed wind power set in 2010 in the Plan de Energías Renovables (PER).

The ninth additional provision of Royal Decree 661/2007 establishes that work to develop a new Plan de Energías Renovables (PER) will commence in 2008, taking the achievement of the indicated objectives into account in order to establish a new forecast for the period between 2011 and 2020. These new targets will be taken into account in the revision of the compensation system for the special system scheduled for the end of 2010.

With the recent commitment undertaken by the European Commission last March 2007, pursuant to which twenty percent (20%) of primary energy must be renewable in 2020, it is foreseeable that there will be an increase in Spain's objectives, which could reach forty percent (40%).

In addition, the Ministry of Tourism, Industry and Trade published a draft report for planning in the electricity and natural gas sectors from 2007 to 2016. It is dated 31 July 2007, and the public comment period ended on 15 September 2007. This draft report, which studies, analyses and establishes forecasts regarding demand for electricity and natural gas for the period from 2007 to 2016, uses illustrative figures for forecast installed capacity by technology in 2016, and therefore serves as a supplement to the current Renewable Energy Plan (Plan de Energías Renovables - PER). The forecasts contained therein for 2016 in Spain are as follows: (i) 29,000 MW of wind power; (ii) 2,450 MW of mini-hydro power; (iii) 2,000 MW of solar energy (thermoelectric solar and photovoltaic solar) and (iv) 2,770 MW of biomass power.

#### **B.4.2. Rights and obligations of producers of electricity under the special system**

The Electricity Sector Act in its articles 27 to 31 establishes the legal system for the electricity production business under the special system. The principal obligations of producers under the special system are as follows:

- To adopt the safety rules, technical and certification regulations for facilities and instruments established by the competent authorities.
- To comply with the technical rules for generation, as well as the rules for transmission and technical management of the system.
- To maintain facilities in optimum operating condition, in such manner that they cannot cause personal injury or damage third party facilities.
- To provide the authorities with information regarding production, consumption, the sale of energy and such other matters as may be established.
- To appropriately satisfy the conditions established for environmental protection.

On the other hand, their rights are as follows:

- To add their energy production at plant bars to the system, receiving the compensation determined in accordance with law.

- Priority in access to transmission and distribution networks for the energy generated, respecting the maintenance of reliability and safety in the networks.
- Parallel connection of their facilities to the network of the corresponding distribution or transmission company.
- To use, jointly or alternatively in their facilities, the energy they acquire from others involved.

The electricity production facilities will complement their economic system, if applicable, by receipt of a feed-in tariff.

**B.4.3. Royal Decree 661/2007 of 25 May 2007 governing the business of production of electricity under the special system**

The legal system for the business of energy producers under the special system is developed in RD 661/2007, which repealed Royal Decree 436/2004. Analysing it requires distinguishing among the following matters.

This Royal Decree maintains the basic principles of the prior Royal Decree, which are the most important to ensure stability and confidence of renewable investors;

- The basic regulatory principles are maintained (priority of access to the network, feed-in tariff system and guarantee of sale of energy).
- As has been the case to date, the developer may choose for a minimum term of one year between two compensation systems: (i) a single Regulated Tariff for all scheduling periods and (ii) directly on the market (or deferred or using a bilateral contract), receiving the price negotiated on the market plus a feed-in tariff.
- The tariffs, feed-in tariffs, complements and limits will be revised in 2010, based on achievement of objectives and the new objectives, ensuring a reasonable rate of return. There will be a new revision every four years.
- As provided in RD 436/2004, the new revision also will require developers of renewables to predict production and assume the costs in the event of failure to achieve that production.

Notable among innovations in the new RD 661/2007 are:

- Introduction of limits of power by technology.
- New caps and floors on the feed-in tariff in the market option.
- Significant improvement in the compensation levels for some renewable technologies (photovoltaic for plants between 100 kilowatts and 10 megawatts, biomass, thermoelectric solar)
- Annual indexing tied to the CPI with an efficiency factor.

### Power objectives by technology

One of the principal innovations of the Royal Decree is the establishment of power objectives for each of the technologies for production of renewable energy (in line with the content of the Renewable Energy Development Plan).

The power objectives for renewable energy contemplated by the Royal Decree for the year 2010 are as follows:

- Solar: for photovoltaic the objective is 371 megawatts and for thermoelectric it is 500 megawatts.
- Wind: 20,155 megawatts. In addition there is a provision for an additional 2,000 megawatts, which may be installed by retrofitting wind facilities that were definitively registered before 31 December 2001.
- Hydroelectric (power not greater than 10 megawatts): 2400 megawatts.
- Biomass and biogas: For biomass the objective would be 1317 megawatts and for biogas it would be 250 megawatts.

To allow determination of the power installed from time to time, within a maximum term of two months after publication of the Royal Decree an information system using the webpage of the National Energy Commission will be created and will maintain a constantly updated figure for power installed in each technology that is definitively registered with the governmental register of production facilities under the special system and the percentage that this figure represents of the objective by technology contemplated in the Renewable Energy Plan.. On 25 July 2007 the National Energy Commission approved the procedure regarding the information system for power under the special system with definitive registration, contemplated in articles 21 and 22 of Royal Decree 661/2007. After that date, on a monthly basis, there will be updates of the installed capacity figure for each technology with definitive registration, and the percentage of that figure by comparison with the objective contemplated for each technology. These data are included in the Statistical Information on sales of electricity under the special system published each month by the National Energy Commission<sup>4</sup>. The principal effect of establishing these objectives is that they in turn constitute a limit based upon which the facilities commissioned will not benefit from the special economic system contemplated in the Royal Decree.

In effect, once 85% of the power objective is achieved for each technology, the General Energy Secretariat (upon proposal of the National Energy Commission) will establish the maximum term during which those facilities that are registered with the governmental register of production facilities under the special system, prior to the ending date of that term, will be entitled to the feed-in tariff or, if applicable, the regulated tariff established in the Royal Decree for that technology. The term may not be less than 12 months.

---

<sup>4</sup>

[http://www.cne.es/cne/Publicaciones?id\\_nodo=143&accion=1&soloUltimo=si&stdCat=10&keyw ord=&auditoria=F](http://www.cne.es/cne/Publicaciones?id_nodo=143&accion=1&soloUltimo=si&stdCat=10&keyw ord=&auditoria=F)

Those facilities that are definitively registered with the governmental register for production under the special system after the ending date established for the relevant technology will, for the energy sold, receive: (i) if they chose sale at the regulated rate, compensation equivalent to the final hourly price on the production market, and (ii) if they chose to rely on the market, the price derived from the organised market or the price freely negotiated by the owner or representative of the facilities, complemented by such market complements as may be applicable.

Nevertheless, it was contemplated that these facilities would be taken into account when establishing the new power objectives in the 2011-2020 Renewable Energy Plan.

#### *Procedure for authorisation of facilities*

The Royal Decree develops the administrative procedure for inclusion of production facilities within the special system. For that purpose, the corresponding authorisation of the national or regional governmental authority having jurisdiction of the matter must be obtained. By way of summary, what is required is (i) the issuance of an authorisation for construction of the facilities, the approval of the execution plan for the facility, and the inclusion of the facility within the special system, and (ii) registration (preliminary and definitive) in the second section of the governmental register for electricity production facilities under the special system, maintained by the Ministry of Industry, Tourism and Trade.

Definitive registration in that register is a necessary condition for application of the special economic system governed by the Royal Decree to those facilities. For both the definitive registration of the facility and for the application of the economic regime set out in the Royal Decree to the latter, it is not a necessary requirement for the facility to have all of the municipal permits necessary for its opening

Nevertheless, as indicated earlier, the regional governments have issued rules that govern the procedures for authorisation of generation facilities under the special system.

The resolution by which the administrative authorisation for the construction of the facility is granted must specify the period of time, counting from the date of award, within which the execution plan must be approved, with the said authorisation expiring if no plan has been submitted for approval by this deadline, although, where due grounds exist, the applicant may apply for an extension of the said period. The resolution approving the execution plan must in turn specify the period of time scheduled for the execution of the facility.

Authorisations are granted for an indefinite period, but may cease to be valid (i) if the conditions and prerequisites established therein are not respected, (ii) if there is a substantial change in the hypotheses on the basis of which they were granted, and (iii) if a very serious breach of the regulations has been committed. Very serious or serious breaches will result in the revocation or temporary suspension of the authorisations.

The authorisations described above are considered to be without prejudice to those that must be obtained for environmental and infrastructure reasons, and those governmental concessions that are necessary for hydroelectric facilities.

Mechanisms for sale of energy and economic system

The owners of facilities under the special system may choose to sell energy at the regulated rate or on the production market, in any of the forms described in section B.2<sup>5</sup>. The choice remains in effect for a minimum of one year.

(i) Sale at regulated rates

The Royal Decree, as an innovation, provides that all producers that have chosen sale at the regulated rate must make their offers of sale to the market operator (directly or through a representative), will receive the price resulting from the matching, and the differences in amounts of energy will be counted for purposes of the calculation and settlement. For that purpose they will make their offers on the daily market, or if applicable on the intra-daily market, in accordance with the current market rules.

The regulated rate (different for each technology) is the same for all scheduling periods, expressed in cents on the euro per kilowatt hour. Generally there are two levels of compensation, based on the age of the facility.

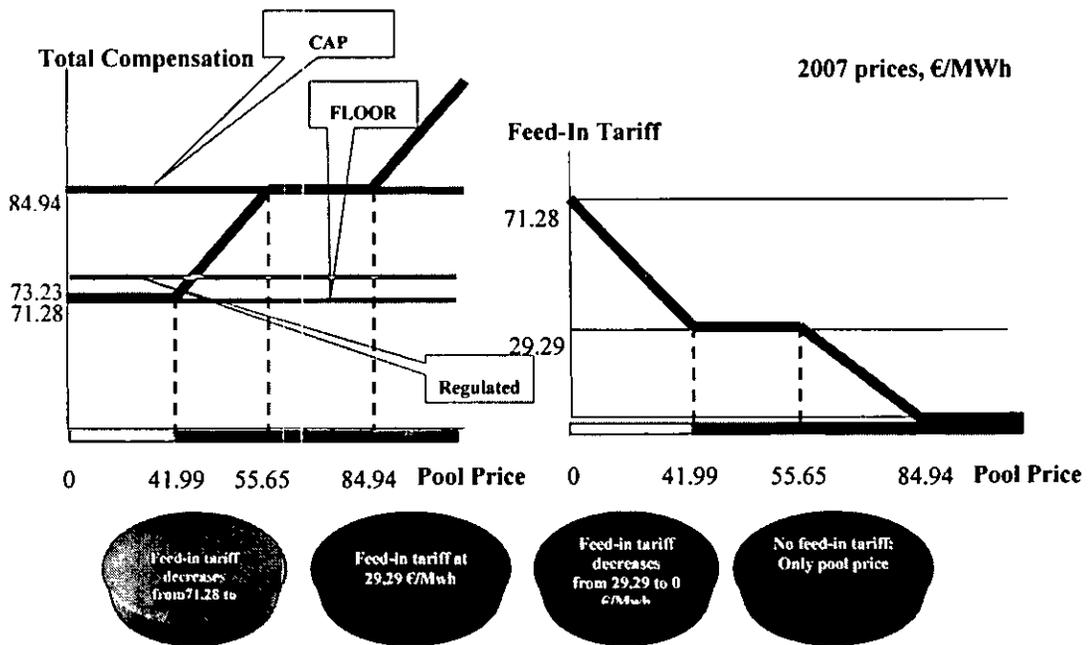

(ii) Sale on the market

In this case, the sale price of electricity is the price resulting from the organised market where the energy is sold, or the freely negotiated price. This price is supplemented, where applicable, by a feed-in tariff expressed in cents on the euro per kilowatt hour. The feed-in tariff is established by the Royal Decree for each of the various kinds of generation technologies, also distinguished on the basis of the age of the facility. This definition leaves open the possibility of participation by the facilities under the special system in the various organised markets for sale of energy, such as the spot market, distributor auctions and other markets.

This new compensation scheme is reflected in the following graph that shows the wind energy case with 2007 values (expressed in euros per MWh):

---

<sup>5</sup> The Royal Decree also allows sale of the energy using a direct line, but in this case the economic system established therein does not apply.

The feed-in tariff receivable in each hour is calculated as follows:

- i. When price levels on the reference market plus feed-in tariffs fall between the upper and the lower limits established for a certain group and subgroup, the amount of the premium receivable will be the feed-in tariff for the said group or subgroup in that hour.
- ii. When price levels on the reference market plus feed-in tariffs are lower than or equal to the lower limit, the value of the feed-in tariff receivable will be the difference between the lower limit and the hourly price on the daily market in that hour.
- iii. When price levels on the reference market plus feed-in tariffs are between the upper limit less the feed-in tariff and the upper limit, the value of the feed-in tariff receivable will be the difference between the upper limit and the price on the reference market in that hour.
- iv. When price levels on the reference market are higher than or equal to the upper limit, the value of the feed-in tariff receivable will be zero in that hour.

Ultimately, the cap and floor system means that the feed-in tariff varies based on the price of the energy on the market, in such manner that the facilities in no event are compensated at a level below the lower limit or above the upper limit established. In any event, it is appropriate to note that the owner of the facility will always receive the full market price, so if this is above the upper limit that is established the effect is that no feed-in tariff is received (but there is no obligation to return any part of the market price); that is, there are no "negative feed-in tariffs".

(iii) Complements

The Royal Decree also sets forth the conditions for receiving other amounts complementary to the tariff and the feed-in tariffs: the hourly discrimination complement, efficiency complement and reactive energy complement. Facilities having definitive registration before 1 January 2008 may receive the complement for continuity of supply in the event of voltage drops, provided that they have appropriate technical teams to contribute to continuity of supply in the event of voltage drops.

The complements are basically the following:

- The discrimination complement may be received by cogeneration, hydroelectric and biomass facilities that adopt the hourly discrimination system, and allows them to multiply the tariff they receive by 1.0462 at peak times and by 0.9670 at off-peak times.
- The efficiency complement. If their equivalent electricity output exceeds the minimum required, cogeneration facilities (they can make use of the special regime under article 2.1.a) of Royal Decree 661/2007) with power of less than 100 MW may receive an efficiency complement, applicable only on electricity sold to the system via the transmission or distribution network.
- The complement for reactive energy, pursuant to which a bonus may be obtained if the generating plants are capable of generating or absorbing reactive energy in accordance with certain hourly tables. There is active and reactive energy in the whole electrical system: active energy is that which can be utilised in order to transform it into work (e.g. movement of an engine, light energy, etc.) and reactive energy is associated with the magnetic fields of engines and transformers, which exist in all of the electricity consumer apparatus and systems, whether industrial or domestic, and that this is necessary for their proper functioning. Therefore, control of reactive energy in the generation plants contributes to the successful functioning of the electrical system. In the case of reactive energy regulation the scheme set forth in Royal Decree 436/2004 is maintained, pursuant to which a percentage over the reference value (78.44 €/MWh for 2007) is received, based on the hourly power factor and the period. In addition this new Royal Decree allows the System Operator to issue instructions to the generators, who receive a bonus or penalty based on compliance.
- The complement for capacity to support voltage drops. A voltage drop is an abrupt and very brief fall in voltage at a point in the network. If it occurs at the point of connection of the renewable energy generation plant (this basically affects wind farms) they may be instantaneously disconnected and negatively affect stability of the network. The regulator has established an incentive for producers to install the improvements necessary so that plants, without disconnection, can support voltage drops of certain characteristics, thus contributing to maintenance of stability of the network.

(iv) Divergences

A divergence or costs of divergences are concepts applied within the operation of the electricity market, not specific to renewable energy plants. They are regulated within the operating rules of the electricity market called Electricity Market and Operating Procedures Regulations (see the website of OMEL, the Operator of the Spanish Electricity Market, [www.omel.es](http://www.omel.es), and Electricity Network, and the site of Red Eléctrica de España, the System Operator [www.ree.es](http://www.ree.es)).

The operation of the market requires that each generating plant that offers its energy send, one day in advance, a supply commitment for a specific amount of hourly energy for the 24 hours of the following day: this commitment is called the "schedule". Once its offer is "matched" (accepted), this commitment is firm. If for any reason this amount is not supplied by the plant each hour, it is required to pay a specified amount for the difference between the scheduled energy and that actually supplied during that hour. This difference is known as the divergence.

Wind farms, or any plants under the Special System, that choose the option to sell energy on the market, in any form, accept – as do all other generation plants - the Market Operation and Operating Procedures Regulations, and therefore the application of the cost of divergences if they occur, like any other generation plant.

(v) Settlement

After calculation of the amount resulting from the transaction, the companies are subject to settlement by the National Energy Commission, which will pay or demand payment of the difference between the price received and the regulated tariff (in the case of producers that have chosen to sell at the regulated tariff), or will pay the feed-in tariff to those producers that have chosen the market option (if applicable taking the cap and floor system into account).

(vi) Updating of tariffs, feed-in tariffs and complements

The Royal Decree contemplates annual updating of the tariffs, feed-in tariffs and complements. For most facilities (including, inter alia, solar, wind and hydro) annual updating is contemplated with the reference being the increase in the CPI less 25 basis points until 31 December 2012, and 50 basis points thereafter.

The amounts of tariffs, feed-in tariffs, complements and upper and lower limits on the hourly market price resulting from any of the updates contemplated in the preceding point will apply to all facilities in each group, regardless of the date the facility is commissioned.

(vii) Revision of tariffs, feed-in tariffs and complements

During 2010, in light of the results of reports tracking the degree of fulfilment of the Renewable Energy Plan and the Spanish Energy Savings and Efficiency Strategy, as well as the new objectives included in the following Renewable Energy Plan for the 2011-2020 period, there will be a revision of the tariffs, feed-in tariffs, complements and upper and lower limits established in the Royal Decree, based on the costs associated with each of these technologies, the degree

of participation of the special system in covering demand and the effect on the technical and economic management of the system, always ensuring reasonable rates of return by reference to the cost of money in the capital market. Every four years thereafter there will be a new revision based on the same criteria.

The revisions of the regulated tariff and the upper and lower limits will not affect facilities commissioned before 1 January of the second year following the year the revision is made.

(viii) Transitional system

Finally, the Royal Decree establishes a transitional system, applicable to facilities already constructed.

On a general basis and except for solar photovoltaic facilities (which are subject to the new Royal Decree), facilities definitively commissioned before 1 January 2008 may:

- Remain within the transitional system, choosing to sell at the regulated tariff or on the market before 1 January 2009, with no possibility of changing the option:
  - o If they choose to sell at the regulated tariff, the tariffs regulated by the Royal Decree will not apply to them, and they will be subject to the prior system for the entire life of the facility.
  - o If they choose to sell on the market, they may maintain the values of the feed-in tariffs and incentives established in Royal Decree 436/2004 of 12 March 2004 until 31 December 2012.

The economic system under Royal Decree 436/2004 for land-based wind facilities is as follows:

In the case of facilities of no more than 5 MW of installed capacity:

- o If they choose to sell their energy at the tariff, they will receive 90% of the average or reference tariff set by the Government during the first 15 years after commissioning, and 80% thereafter.
- o If they choose to sell on the market, in addition to the market price they will receive a feed-in tariff of 40% and an additional incentive of 10% over the average or reference tariff.

For other land-based wind facilities:

- o The tariff will be 90% during the first five years after commissioning, 85% for the next 10 years, and 80% thereafter.
- o If they choose to sell on the market, added to the market price will be a feed-in tariff of 40% and an incentive of 10% on the average or reference tariff.

Applicable to any expansion of one of these facilities will be the general provisions of Royal Decree 661/2007.

- Fully accept the new Royal Decree before 1 January 2009, in which case the facilities may not return to the economic system described in the transitional provision.

The Company will elect for one regime or another depending on the particular characteristics of each one of its facilities. In each case it will evaluate the opportunity to be maintained under a temporary regime or, as appropriate, make full use of the regime contained in the new Royal Decree. As has been stated above, the Company will opt for one or other regime prior to January 1, 2009.

(ix) More than 50 megawatt facilities

Finally, the Royal Decree in implementation of article 30.5 of the Electricity Sector Act also contemplates the right of certain facilities producing electricity from renewable sources, having installed capacity greater than 50 megawatts, to receive a feed-in tariff complementing their compensation system. Such facilities in all cases will sell their energy on the market.

Special analysis of other technologies

Below, before summarising the most significant aspects of other technologies, we discuss the regulated tariff (expressed in cents on the euro per kWh), reference feed-in tariffs (where applicable), cap and floor, where applicable, of the facilities in category b) of Royal Decree 661/2007 governing facilities that as their primary energy use any of the non-consumable renewable energies, biomass, or any kind of biofuel, provided that the owner does not engage in production activities under the ordinary system.

Table 3

Group	Subgroup	Output	Term	Regulated tariff c€/kWh	Reference premium c€/kWh	Upper limit c€/kWh	Lower limit c€/kWh

- b.1 Facilities that use solar energy as the primary energy
  - b.1.1 Facilities that use only solar radiation as primary energy, by way of photovoltaic technology.
  - b.1.2 Facilities that use only thermal processes for transformation of solar energy, as the primary energy, into electricity.
- b.2 Facilities that use only wind energy as the primary energy
  - b.2.1 Land-based wind facilities.
- b.3 Facilities that as primary energy use only geothermal, wind, tidal, hot and dry rock, ocean heat and energy from marine currents.
- b.4 Hydroelectric plants the installed capacity of which is not greater than 10 MW.
- b.5 Hydroelectric plants the installed capacity of which is greater than 10 MW and not greater than 50 MW.
- b.6 Plants using biomass from energy crops, waste from agricultural or gardening activities, or waste from logging and other forestry operations in forests and green spaces as their principal fuel.
  - b.6.1 Plants using biomass from energy crops as their principal fuel.
  - b.6.2 Plants that as their principal fuel use biomass from waste of agricultural or gardening activities.
  - b.6.3 Plants that as their principal fuel use biomass from waste from logging and other forestry operations in forests and green spaces.
- b.7 Plants using biomass from manure, biofuels or biogas coming from anaerobic digestion of agricultural and cattle raising waste, biodegradable waste of industrial facilities or sludge from sewage treatment, as well as recoveries from controlled dumps as their principal fuel.
  - b.7.1 Plants that use biogas from dump sites as their principal fuel.
  - b.7.2 Facilities that as their principal fuel use biogas generated in digesters using any of the following biodegradable industrial wastes: sludge from treatment of urban or industrial sewage, solid urban waste, waste from cattle raising, agriculture and other waste to which the process of anaerobic digestion is applied, both individually and by way of co-digestion.
  - b.7.3 Facilities that as their principal fuel use manure by way of combustion and liquid biofuels.
- b.8 Plants using biomass from industrial facilities as their principal fuel.
  - b.8.1 Plants using biomass from industrial facilities in the agricultural sector as their principal fuel.
  - b.8.2 Plants using biomass from industrial facilities in the forestry sector as their principal fuel.
- b.8.3 Plants using wastewater from the paper industry as their principal fuel.
- Off-shore wind energy
 

A maximum reference feed-in tariff of 8.43 c€/KWh and a cap of 16.4 c€/MWh are established. Royal Decree 1028/2007, of 20 July, establishes the administrative procedure for the presentation of applications for licences for

electricity generating facilities at sea, stipulating that in those cases where more than one application is received for a facility in the same location, the decision as to who will be granted the licence will be made via a competitive bid process, in which case the applicants must propose a benchmark tariff, which must be within the aforementioned limits.

- Mini-hydro

The energy may be sold at the regulated tariff or on the market. For sales on the market there are two levels of compensation based on power:

- The cap and floor for plants of less than 10 MW are 8.52 c€/kWh and 6.52 c€/kWh, respectively; and
- For plants between 10 MW and 50 MW the cap and floor are 8 c€/kWh and 6.12 c€/kWh, respectively.

In the case of facilities subject to Royal Decree 1538/1987 having power less than 10 megawatts, they may receive a specific feed-in tariff for improved yield and environmental investments.

- Biomass

For purposes of compensation three classifications are established, each having three subgroups:

- (i) Plants using biomass from energy crops, waste from agricultural or gardening activities, or waste from logging and other forestry operations in forests and green spaces as their principal fuel.
- (ii) Plants using biomass from manure, biofuels or biogas coming from anaerobic digestion of agricultural and cattle raising waste, biodegradable waste of industrial facilities or sludge from sewage treatment, as well as recoveries from controlled dumps as their principal fuel.
- (iii) Plants using biomass from industrial facilities as their principal fuel.

All levels of compensation are increased for biomass, and the term for receipt of the feed-in tariff is reduced to 15 years.

- Photovoltaic Solar

A new scale by comparison with Royal Decree 436/2004 is introduced, from 100 kilowatts to 10 megawatts, the tariff being 41.75 c€/kWh for 25 years, and thereafter 33.4 c€/kWh. There is no market option for photovoltaic solar.

- Thermal solar

The rules regarding hybridisation under Royal Decree 436/2004 are maintained. Indeed the use of biomass for hybridisation is allowed. A cap of 34.4 c€/kWh and a floor of 25.4 c€/kWh are established.

## **B.5. Tax treatment of production of electricity**

The specific tax system for electricity in Spain is fundamentally based on the Electricity Excise Tax, which for legal purposes is classified as a manufacturing excise tax.

It is governed by Excise Tax Act (Ley sobre Impuestos Especiales) 38/1992 of 28 December 1992 (the "LES"); in particular by Chapter IX of Title I, headed "*Electricity Tax*", comprised of articles 64 to 64 *sexies*. The final legal provision is Royal Decree 1165/1995 of 7 July 1995 approving its implementing Regulations.

This tax is imposed on production and import of electricity classified under item NC 2716 within the community territorial scope. For purposes thereof, "production of electricity" is the manufacture or the process of obtaining the electricity from other products, including transformation. It nevertheless does not include within that concept obtaining electricity apart from electricity production facilities under the ordinary or special systems, by means of generators or groups of generators having total power of not more than 100 kilowatts.

In addition to production and importation, also subject to the tax are intra-community acquisitions of electricity from the territorial scope of the community other than the internal territorial scope. On the other hand, exempt therefrom are electricity production operations and facilities under the special system that are destined to consumption by the owners of those facilities, as well as the intra-community production, importation or acquisition thereof for self consumption.

The tax is passed on to the end user. Thus, the one ultimately bearing the tax is the one acquiring the energy, to which the tax payments are passed on by the taxpayer or by the Market Operator in the case of deliveries of energy made with its participation.

These payments are the result of applying a tax rate of 4.864 percent on an amount (taxable base) that, in turn, is the result of a mathematical operation: multiplying a factor of 1.05113 by the total amount of the taxable base of the Value Added Tax, excluding the payments of Electricity Tax, for supply of electricity for consideration within the territory for application of the Value Added Tax between unrelated persons. Such payments in any event may not be less than 0.5 euros per megawatt hour (MWh) when the electricity supplied is used for industrial purposes, or 1 euro per megawatt hour (MWh) when it is used for other purposes.

## **C.1. United States of America**

### **C.1.1. Overview of the market**

The federal government regulates the wholesale market and the business of interstate transport via the Federal Energy Regulatory Commission ("**FERC**"). Its jurisdiction derives from the Federal Power Act of 1935 (the "**FPA**"), and from other rules, as is the case of the Public Utility Regulatory Policies Act of 1978 ("**PURPA**"), the Energy Policy Act of 1992 ("**EPA**") and the Energy Policy Act of 2005 ("**EPA 2005**") which repealed and replaced the Public Utility Holding Company Act of 1935 ("**PUHCA**"). The EPA 2005 repealed the existing restrictions on ownership of public utility companies by independent energy producers, thereby facilitating competition in the wholesale electricity market.

The FERC exercises authority over all agents in the electricity sector by imposing indexes and conditions on the sale of energy at the wholesale level that must be respected by all companies, as well as over the organisation, management and financing of the companies that participate in such sales. The electricity markets in the United States are split into a number of distinct segments: (i) a generation segment, consisting of regulated electricity companies, wholesale electricity suppliers, and governmental entities; (ii) a high-voltage transmission segment, consisting of the regulated electricity companies and the governmental entities owning the transmission network and regional transmission organisations, independent system operators and the companies that control and schedule the use of the transmission network; (iii) a distribution segment, consisting of regulated electricity companies and governmental entities that transport electricity from the high-voltage network to end users, and, in some limited markets, competitive suppliers, which sell electricity to retail consumers.

Certain electrical energy production facilities which do not exceed a particular level of power (for example wind facilities of less than 80 MW of installed power) may be classified as “Qualifying Facilities”, which enables them to have certain advantages with respect to other energy producers and require the interconnection of their facilities to the distribution networks so as to be able to release the energy produced.

### **C.1.2. Sale of energy**

The electricity generated by suppliers of electricity, including wind farms, is either sold to third parties under long-term private contracts or else placed on the market. Because the market for the sale of electricity is regional, the rules and regulations applied on these markets vary according to the location of the facility selling the electricity it generates. The specific features of each of these markets can in fact be totally different depending on the state or region it covers. For example, facilities situated in the area controlled by the New York Independent System Operator (NYISO) must physically supply electricity to the NYISO and are paid for this electricity at a price based on the marginal price calculated by the NYISO for the facility in question. In contrast, market prices for facilities situated in the west of the United States are generally established using bilateral market mechanisms. The common denominator for all of them is that the rules applied on each of the US markets and any changes to them must be approved by the FERC.

### **C.1.3. Licenses and permits**

The construction and implementation of electricity generation facilities, including wind farms, generally requires various permits or licenses (which are granted for an indefinite period of time), which vary depending on the state in which the facility is located. Most states delegate all decisions regarding land use to the municipalities and counties.

Nevertheless, apart from a few limited exceptions, the regulatory agencies of each state have the authority, *inter alia*, to authorize the construction of new electricity generation facilities. Before commencing construction of an electricity generation plant, the future proprietor must obtain a Certificate of Public Convenience and Necessity (“CPCN”) or similar permit awarded by the competent agency in the state in which the plant is to be built. The process of obtaining a CPCN is a lengthy and expensive one and includes, *inter alia*, an environmental impact assessment that evaluates and, if necessary, proposes measures to offset. The likely environmental impact of the project on the area in which

it will be situated. In some states, no CPCN is required for the construction and operation of small-scale facilities with installed capacity of less than 1 MW.

Lastly, for the development of a wind farm, other types of permit and authorisation may also be necessary, depending on the kind of land on which the project is to be developed. Projects located on federal land, in wetlands or at sea may require additional approvals imposed under federal regulations.

#### **C.1.4. Renewable energy support measures**

Both the Federal Government and the Governments of the majority of individual states have introduced support measures to encourage the development of electricity generation from renewable energy sources. The two key measures adopted to support the development of wind energy in the United States are (i) the RPS (Renewable Portfolio Standards) introduced at state level, (ii) the various tax credits, such as the PTCs (Production Tax Credits), introduced at the federal level, and (iii) the MACRS (Modified Accelerated Cost Recovery System) introduced for assets associated with wind power.

##### **C.1.4.1. RPS (Renewable Portfolio Standards)**

The Governments of various States have introduced RPS programs to promote renewable energy sources. These programs generally require that a predetermined proportion of the electricity supplied to users by a given electricity company be generated from renewable sources. These percentages vary from state to state, but they usually establish targets entailing that between 10%-20% of the electricity which said company supplies in 2010 or 2015 come from renewable sources. Currently 24 states and the District of Columbia have implemented programs of this type.

Although at present this is not a federal program, there are plans for regulations at the federal level that, if approved, would require 15% of primary energy consumption in the United States to be generated from renewable sources by 2020 and, it is reasonable to assume, would therefore result in the development of new RPS programs.

Although the rules of RPS vary from state to state, such programs are generally implemented by way of RECs, or Renewable Energy Credits, which are transferable certificates that evidence that a certain amount of electricity has been generated from a renewable source. At the end of the year, electricity companies must have sufficient certificates to demonstrate that a certain percentage of their production, as established in the RPS program of the state in question, is from such renewable sources. If they do not reach their annual quotas fines or other measures may be imposed on them.

##### **C.1.4.2. PTCs (Production Tax Credits)**

Under the Energy Policy Act of 1992 (EPAAct) the United States introduced PTCs. These consist of tax credits that are awarded to owners of facilities that generate electricity from renewable sources and sell the electricity they produce to third parties. Originally, a tax exemption of \$15/MWh was awarded for electricity generated from renewable sources that was adjusted in line with inflation on a yearly basis for the duration of the PTC program. The value of the PTC in 2007 was \$20/MWh, although this amount may be reduced if the facility benefits from some other form of public

sector aid or financial assistance from any administration. The PTC is applied from the moment the facility is brought into service until the end of its first ten years in operation. PTC programs have typically been applied for periods of two to three years, which may be extended. Application of the program currently in force was extended under a 2006 Law (Tax Relief and Health Care Act of 2006) until 1 January 2009. In theory, if, when these programs' period of application expires, they are not immediately replaced by others, the regulations approving the subsequent program provide for its retrospective application, such that no facility is left outside the programs, although when such lapses do occur between one program and another, investment in facilities that generate electricity from renewable sources has tended to slow.

On August 4, 2007, the Chamber of Representatives passed an Act known as the "Renewable Energy-Energy Conservation Tax Act of 2007", which is awaiting approval by the Senate, which extends the PTC programme until 2012. Even when the PTC programme expires, benefit could be obtained from those facilities that have been made operational before the completion of the programme for a period of ten years from when they are started up.

#### **C.1.4.3. Modified Accelerated Cost Recovery System (MACRS)**

Another tax benefit designed to promote the development of facilities that use renewable energy sources is tied to the capacity of wind farm owners to use the accelerated cost recovery system for most assets linked to their facility, with the effects spread for tax purposes over a period of five years. This system allows owners of generation facilities that use renewable sources to take advantage of a new tax benefit other than those applied to the income generated by the sale of electricity produced by the facility. The tax benefits associated with the accelerated cost recovery system have been applied since 1987.

Lastly, there is another series of state and local incentives provided to producers of renewable energy, such as reductions of property taxes, state tax exemptions, and reimbursement of taxes on equipment.

#### **C.1.5. Changes in the energy policy – reference to the emission of greenhouse gases**

The growing concern about global warming and the recent decisions of the United States Supreme Court indicating that the Environmental Protection Agency of the United States has authority to regulate aspects relating to the emission of greenhouse gases have resulted in a political debate in the United States regarding the benefits deriving from the generation of electricity from renewable sources.

In the absence of a national policy to cover questions regarding climate change, various state authorities in the United States of America have attempted to fill this regulatory vacuum by filing suits and adopting the so-called "cap and trade" systems regarding emissions of greenhouse gases.

Although the federal government opposes the establishment of mandatory limits on greenhouse gas ("GHG") emissions, many observers agree that the establishment of such limits is only a matter of time, particularly in light of the recent decision of the United States Supreme Court (decision in *Massachusetts v. Environmental Protection Agency* published in April 2007).

There are two systems for reducing greenhouse gas emissions: (i) establishing a tax on the cost of the emissions; or (ii) establishing a so-called "cap and trade" system, by means of which the government imposes a cap or limit on such emissions, issues emission allowances, and allows a market for trading such emission allowances. This system establishes a maximum limit on emissions of certain pollutants over a given period of time. The maximum limit (cap) in turn is divided into partial portions or authorisations ("allowances"), the sum of them constituting the maximum allowable limit.

At the end of the reference term each operator must have sufficient partial allowances to cover its emissions during the period in question. Operators have various means of complying with the system: (i) reducing their emissions to comply with the required level; (ii) acquiring more emission rights by acquiring these partial allowances; or (iii) investing in projects designed to reduce emissions.

In addition to these initiatives, the United States faces ever-increasing pressure from foreign governments to comply with the provisions of the Kyoto Protocol.

All this points to the conclusion that initiatives to promote the use of renewable energy sources should logically increase in the years to come.

## **C.2. UNITED KINGDOM**

### **C.2.1. Legislative and regulatory framework of the electricity market in the United Kingdom**

The United Kingdom recently announced the obligation that by 2015 the percentage of electricity produced using renewable energy sources will be 15.4% and has confirmed its intention to set an objective of 20% by 2020. Scotland has been much more ambitious in its forecasts and for the same years envisages percentages of 18% and 40% respectively.

The regulatory framework for the electricity sector in the United Kingdom is made up of various acts, including the 1989 Electricity Act, the 2000 Utilities Act, the 1988 Competition Act, the 2002 Enterprise Act and, finally the 2004 Energy Act.

The 1989 Electricity Act initiated the restructure of the UK electricity system and privatized various assets related with the electricity sector. This meant that transmission and distribution remained regulated activities, while electricity generation and supply became competitive markets, with separate markets – Scotland on the one hand, and England and Wales on the other remaining in place. This separation was maintained until the New Electricity Trading Arrangement (NETA) of 2001, which unified the markets of England and Wales. The Scottish market was subsequently unified with these via the British Electricity Transmission and Trading Arrangements (BETTA) in 2005.

The 2000 Utilities Act, for its part, created the Gas and Electricity Markets Authority, which performs its functions through the Office of the Gas and Electricity Markets (OFGEM), which provides administrative support to the aforesaid Authority, and, inter alia, is responsible for granting licenses for new installations, renewing existing licenses, monitoring compliance with the conditions established in the licenses and,

where necessary, enforcing compliance with these conditions using the mechanisms contemplated in the Electricity and Natural Gas Acts.

Agents operating in the electricity sector must, for their part, comply with the distribution, safety and balance obligations of the network, providing the Authority with the information it requests, maintaining separate accounts for each activity and avoiding cross subsidies between generation activities and other activities of the license holder or companies related to it.

### **C.2.2. Licenses and permits**

Facilities with installed capacity in excess of 50MW (or 1MW in the case of those located at sea) must be licensed by the Secretary of State in accordance with the provisions of Section 36 of the 1989 Electricity Act. Before granting such licenses, which generally are granted for a term of twenty-five years, the Secretary of State must consider all aspects related to the location of the facility. The conditions to which execution of the project are subject must be expressly or implicitly set out in the resolution in which the license is granted. The construction of the facility must be completed within a maximum of three years from the date of the license, at the end of which period the license expires.

The same license is required to lay electricity cables underground, except for cables with a voltage of less than 20kV that are to be used for consumer supply.

In addition, the construction of electricity generation facilities that use renewable energy sources is subject to various environmental regulations, and all plans for the development of such facilities must undergo the corresponding environmental impact assessment.

Finally, before they can be connected to the distribution or transmission grid, such facilities are required to comply with or meet certain requirements of an industrial nature, which attest to their suitability for connection to the distribution or transmission grid.

### **C.2.3 Sale of electricity**

On 1 April 2005 the introduction of BETTA unified the wholesale electricity market in Scotland with that of England and Wales, thus creating a single wholesale electricity market for the entire territory of Great Britain. In it, suppliers, marketers and generators negotiate term agreements with physical delivery for the supply of electricity.

Agents may participate in the market by making offers of purchase and sale. The referenced mechanism also calculates and settles the mismatches between supply and demand arising from differences in the contractual positions of the parties and actual flows of energy.

As regards Ireland, the regulatory authorities of the Republic of Ireland (CER) and Northern Ireland (NIAER) have drawn up a master document with the aim of establishing a wholesale electricity market serving the entire island known as the Single Electricity Market (SEM). On the SEM all electricity generated in or imported into the island of Ireland will be sold and all electricity for consumption or export purchased. The design for the structure of the SEM was finalized in June 2005, and the regulatory

authorities and the system operators of Ireland (EirGrid) and Northern Ireland (SONI) are now working together to establish the SEM. The SEM started to operate on 1 November 2007.

#### **C.2.4. Support for renewable energy**

##### **C.2.4.1 ROCs (Renewables Obligation Certificates)**

Suppliers of electricity are required to produce a certain percentage of this electricity from renewable energy and provide evidence that they satisfy this percentage requirement. Thus, at present, for each megawatt hour generated from renewable energy, a transferable certificate called a Renewables Obligation Certificate (ROC) is issued.

This system is presently in the process of being reformed. The reform proposal envisages different exchange releases based on the technology used which would be divided into bands (2 ROCs per megawatt hour, 1 ROC per megawatt hour, etc.). The proposal suggests the granting of more ROCs to the megawatt hours from the less developed renewable energy production technologies and which, as a consequence, require less investor effort (for example, than photovoltaic solar) and fewer ROCs per megawatt than the more mature technologies (on-shore wind power energy).

The British government estimates that the introduction of this new bands system will contribute towards the growth of renewable energy, indicating that in the case of renewable energy production representing 10% of the total electrical production in 2010 and 15% in 2015, its goal for 202 will be set at 20%.

Suppliers may satisfy their obligations by (i) acquiring ROCs, (ii) paying an alternate price equivalent to £34.30/megawatt hour during the 2007/2008 period, with this value increasing annually on the basis of the retail sale price index or (iii) a combination of the two systems.

If a supplier chooses to pay the replacement price, the money collected is deposited in a specific fund that, at the end of a period of twelve (12) months, is distributed among the electricity suppliers that have presented the referenced ROCs and complied with their obligation.

The distribution fund provides more business incentives for suppliers to comply with the orders by acquiring ROCs, since only suppliers have access to distribution of the fund if they comply therewith.

Back in 2003, the fund had a 23 million pound sterling deficit as a result of many suppliers' failure to settle the sums they were required to pay because they did not have the corresponding ROCs. To counter this situation, certain measures have been implemented, notable among which are: (i) a surcharge on delayed payments, which has a deterrent effect on those who are reluctant to pay; (ii) measures for contribution to the fund by all participants in the event of significant insufficiencies in the fund.

This support mechanism will expire in 2027. At that time, if the current regulations remain in place, generators of renewable energy will continue to operate and receive the revenue coming from their production as conventional generators in the wholesale electricity market.

In April 2005 the government of the United Kingdom amended the legislation to recognise ROCs in Northern Ireland, thus creating a single market in the United Kingdom for trade in ROCs.

#### **C.2.4.2. The obligation regarding non-fossil fuels**

Prior to the introduction of the ROC system, another system was in place in Great Britain to promote the generation of electricity using renewable energy, called the non-fossil fuel obligation (“NFFO”).

Under the NFFO system, electricity producers sold the electricity generated using renewable sources to the Non-Fossil Purchasing Agency Limited (NFPA) at a fixed price, for a fixed period of time, with contracts being signed with individual generators. In this way, the NFPA helped the electricity industry by guaranteeing the payment of a fixed amount for a set period of time.

This production is sold as packages to authorised suppliers by means of an online auction. At these auctions, which are held every two years, supply contracts of six months duration prior to production are awarded. The suppliers who bid the highest price will be awarded the contract. The price paid is unrelated to the price received by the producer. If the price paid at the auction is higher than the “set price”, the excess of that amount is used for the fund of the Fossil Fuel Levy (“FFL”). If the price paid is less than the “set price”, the FFL compensates for the difference in said value. If the funds made available for the FFL are insufficient to offset the difference, then the British government is reintroducing the so-called tax on non-fossil fuels (which is presently set at zero).

#### **C.2.4.3 Tax related to climate change**

The Climate Change Levy (“CCL”) is an environmental tax for use of energy (for example electricity, natural gas and coal). This tax is paid by end users and is collected by suppliers. However, homes and most non-profit organisations do not pay CCL.

To promote the most environmentally sustainable generation and supply of energy, the consumption of electricity coming from certain renewable sources, such as onshore and offshore wind, biomass, solar, hydroelectric and tidal, is exempt from CCL. Therefore, the CCL promotes purchase by suppliers of electricity generated from renewable energy sources, because the suppliers may increase their competitiveness in the market and transfer the savings to end users, or continue passing the tax on to consumers (although they as such are exempt from the tax), thus benefiting from higher profits.

For each megawatt hour produced by a certified renewable energy generator, OFGEM issues a LEC (Levy Exemption Certificate). The value of the LEC depends on the amount of CCL avoided. The value, in the case of electricity, currently is £4.41 per MWh for the year 2007 (value updated on April 1, 2007) and £4.56 per MWh for 2008.

### **C.2.5. Changes in the energy policy of Great Britain**

Great Britain energy policy continues to emphasise the need to achieve balance between a market-based model and regulatory mechanisms to maintain the viability and security of supply of energy, at the same time controlling emissions of CO<sub>2</sub>, promoting energy savings and mitigating the impact of the cost of fuel on low income families.

In May 2007 the government published the Energy White Paper, including detailed development of the proposals for amendment of the current system. The most significant proposal regarding renewable energy is the improvement of the Renewables Obligation to increase the compensation received for offshore wind energy, which will receive 1.5 ROCs per megawatt hour instead of one. The compensation received for land-based wind energy will not change, remaining at 1 ROC per MWh. The Government also has confirmed its intention to establish an objective of 20% of electricity from renewable energy by 2020.

## **C.3. GREECE**

### **C.3.1. Regulatory framework**

In accordance with EC Directives Greece has set itself the target that, by 2010, 20.1% of electricity must be produced from renewable energy sources.

Act no 3468, which is the main source of regulation on renewable energy issues, was approved on 27 June 2007.

### **C.3.2. Licenses and permits**

Under Greek regulations, any electricity generation facility must have the permits necessary for its construction and operation, and must comply with certain environmental prerequisites. The Ministry of Development must grant the permit for the facility, which will be valid for a period of 25 years, renewable for a further 25 years. The construction permit is valid for two years and can be renewed for a further year, provided that 50% of the budgeted work for the facility has been completed.

Finally, small facilities with installed capacity of less than 20kW located in stand-alone micro-networks, with power of less than 40kWh that are located on islands and are not connected to the grid and facilities with power of less than 50KW even though they are connected to the grid do not require special permits and licenses.

Act 3468 establishes, however, that before any license can be obtained, the plans for the facility must first undergo the corresponding environmental assessments.

### **C.3.3 Sale of energy**

Producers are entitled to sign standard agreements with the electricity system operator for acquisition of energy for a term of 10 years. This agreement can be extended unilaterally by the producer by means of the corresponding written declaration for an additional period of 10 years. These agreements can be used as a guarantee for the financing of electricity generation facilities.

### **C.3.4 Promotion of renewable energies**

In Greece various measures designed to promote the generation of electricity from renewable sources have been adopted, of which the following are the most important:

- Renewable energy facilities (without limitation on capacity), small hydroelectric facilities (up to 15 MW) and non-renewable cogeneration facilities (up to 35 MW) benefit from priority access to distribution networks.
- Regulated tariff systems: the tariffs for electricity generated from wind energy were €75.82/MWh for the peninsular system and €87.42/MWh for the islands not interconnected in the year 2007 to the grid. The referenced tariffs are revised annually through weighted adjustment of the approved accounts of Public Power Corporation (PPC S.A.).
- Finally it is notable that certificates of origin were introduced by Act 3468/2006 that, as in other countries, require generators to have a certain number of certificates of origin accrediting that a given percentage of the electricity they generate is produced from renewable sources.
- Lastly, there are additional indirect support mechanisms, such as direct subsidy of investment and tax exemption for 100% of the value of new investments. As an approximation, taking into account the diversity of regions where investments may be made and the computable costs for the subsidy, it may be said that the subsidy covers between 25% and 30% of the cost of the investment.

#### **C.4. FRANCE**

Act 2000-108 of 10 February 2000 on modernisation and development of public energy services (amended by Acts 2000-108, 2004-803 and 2006-1537) ("Act 2000") is the general legislative framework for operation of wind facilities in France. The operation of wind facilities in France is also subject to the provisions of the French environmental and construction code.

Act 2000 provides that operators of wind facilities, under certain conditions contemplated in Decree 2000-1196 of 6 December 2000, may enter into long-term agreements for the purchase and sale of energy with the French National Electricity Company (EDF). For that purpose it is necessary for the generator to obtain the corresponding certificate issued by the local government.

The Order of 10 July 2006 sets the tariffs for acquisition by EDF of the electricity produced by operators of wind facilities that are beneficiaries of the agreement for acquisition of energy. The Order establishes a tariff structure comprised of three stages:

- During the first 10 years of the term of the referenced agreement for the acquisition of energy, EDF for the energy acquired will pay a fixed annual tariff, determined by reference to the date of the agreement for acquisition of energy requested by the operator from EDF. For applications made during the year 2006 the tariff established is 82.0/MWh. This tariff is amended annually based, among other factors, on the inflation index.
- During years 11 to 15 of the term of the referenced agreement for acquisition of energy, the tariffs are based on the annual average percentage of production of wind facilities during the first 10 years of operation. In this regard, (i) wind facilities

located at sites of lesser yield (less than 2400 hours per year) will receive the same level of compensation as in the first stage; (ii) for those located at sites with 2800 hours per annum, the compensation decreases to €68/MWh and (iii) for the best sites (more than 3600 hours per annum) it decreases to €28/MWh. Regarding sites with a number of hours within the indicated intervals, the compensation is established by interpolating the data indicated above. These tariffs also are updated based on the inflation index.

- Starting with year 16 of the term of the indicated agreement there is no specific support scheme. Thus the operators of wind facilities must sell the electricity they produce at market price.

## **C.5. POLAND**

The legislation applicable to renewable energies is basically contained in the Energy Act of 10 April 1997, which has been amended several times since the date of approval. Among the more important are (i) the amendments included in the Act of 24 July 2002, many of which became effective when Poland joined the EU, that is, in May 2004, and (ii) the amendments included in the Act of 2 April 2004, which became effective in January 2005, very particularly affecting the system established for promotion of renewable energies.

Since January 2005 it has been contemplated that all energy generated from renewable sources in Poland will receive a certificate of origin. The certificate is issued by the energy regulator, URE, and includes the particulars of the generating company, data regarding the source of the renewable energy used, and information regarding the amount of energy generated and the period during which it was produced. The rights deriving from the Green certificate are tradable according to the market rules of the operator of the Polish market.

The Energy Act imposes an obligation on conventional generators, distributors and marketers to acquire from renewable sources a specified percentage of the electricity they supply (administrative quota system) to end users. For that purpose they sign bilateral agreements with the renewables producers, who deliver the certificates of origin to them. The percentages are as follows: 5.1% (2007); 7.0% (2008); 8.7% (2009); 10.4% (2010); 10.4% (2011); 10.4% (2012); 10.4% (2013); and 10.4% (2014). Those conventional generators, distributors and promoters that do not satisfy these percentages could be penalised with a fine which in 2007 is set at 242.0 PLN (62.54 €/MWh).

Suppliers who do not meet their obligations regarding renewable energy will be required to pay a fine. Fine revenue is destined to the National Fund for Protection of the Environment and Economical Use of Water.

The distributors are required to purchase all of the electricity coming from renewable facilities connected to their networks. The minimum price for acquisition of the electricity is comprised of the average market price during the last calendar year, and is fixed by the Chairman of the URE before 31 March of each year. The price announced by the Chairman of the URE on 31 March 2007 is PLN 119.70 (Polish Zloty)/MWh (€30.93/MWh based on the official exchange rate on 30 March 2007: €1/PLN 3.8695. Source: National Bank of Poland).

Other support measures to promote the development of renewable energy are as follows:

- a 50% reduction in the cost of connection to the distribution network for electricity coming from renewable sources;
- the obligation of the system operator to ensure a priority in supply for electricity coming from renewable energy sources;
- exemption of companies producing electricity from renewable energy with power less than 5 MW from the requirement of paying fees for the grant of licenses or for obtaining and registering green certificates;
- certain exemptions from the tax on consumption of this kind of energy, and
- the grant of subsidies and preferential bank loans to support environmental protection through the use of renewable energies.

#### **D. REGULATORY FRAMEWORK REGARDING THE NATURAL GAS SECTOR IN THE UNITED STATES OF AMERICA**

##### **➤ General matters**

The Natural Gas Act of 1938 (hereinafter “**NGA**”) gives the U.S. Federal Energy Regulatory Commission (“**FERC**”) exclusive jurisdiction to regulate transport and storage of natural gas, as well as certain sales of natural gas, all in interstate commerce. In exercise of this authority, the FERC subjects interstate natural gas transporters and storage service providers to certain rules regarding, inter alia: (i) construction, ownership, operation and abandonment of interstate natural gas storage and transport infrastructure; (ii) provision and abandonment of interstate natural gas transport and storage services; (iii) accounting and financial reporting; (iv) rates for services, and (v) other related activities.

Initially, the NGA also gave the FERC jurisdiction to regulate the sale of natural gas in interstate commerce at the wholesale level. By means of later laws (such as the Natural Gas Policy Act of 1978, “**NGPA**”), the authority of the FERC in this area was significantly restricted, to a great extent deregulating sale of natural gas at the wholesale level. But the FERC continues to have de facto jurisdiction over such sales.

In addition, the Commodity Futures Trading Commission (“**CFTC**”) exercises certain jurisdiction over commercial activity in the deregulated natural gas market. In particular, pursuant to the provisions of the Commodity Exchange Act (hereinafter “**CEA**”) and the Commodity Futures Modernization Act (hereinafter “**CFMA**”), the CFTC has authority to enforce the anti-market manipulation provisions contained in the CEA that are intended to prevent fraudulent sales of natural gas and sales that entail manipulation of the market. To this end, the CFTC recently launched a considerable number of initiatives to enforce the anti-market manipulation provisions contained in the CEA on the market for the sale of natural gas in the United States.

##### **➤ Federal licences and administrative procedures**

Interstate providers of natural gas transmission and storage services operate on the market under the close supervision of the FERC. For example, pursuant to article 7 of the NGA, before they can begin to build and operate transmission and storage facilities, the companies must obtain a certificate of public utility and interest issued by the FERC, and also satisfy the FERC's open access tariff requirements, including the rules designed to prevent the discriminatory sale or assignment of transmission and storage services, and submit to review of tariffs under the NGA.

Article 311 of the NGPA permits interstate companies to provide natural gas transmission and storage services on the interstate market through other interstate companies without being required to submit to the prior authorisation of FERC. Interstate facilities that provide gas transmission and storage services at interstate level in this way are not as strictly regulated as those that provide services under article 7 of the NGA. Companies that operate under the system established in article 311 of the NGPA, companies benefiting from the Hinshaw exemption and the aforesaid local distribution companies nonetheless remain subject to the jurisdiction of the FERC and are required to conform to certain FERC orders, such as submitting weekly reports on their gas storage activities and to submit to the authorisation of the FERC their tariff system for the interstate services they are going to provide (based on cost of service or on market prices). Although the FERC assesses the tariff proposals submitted by these companies in accordance with the same principles it applies in regulating the prices charged by interstate companies that operate under the system established in article 7 of the NGA, the standards to which the prices of these companies are subject differ from one company to another, since the prices of companies that operate under article 311 of the NGPA, companies benefiting from the Hinshaw exemption, and local distribution companies have to be "fair and equitable" in their application of the NGPA – a stipulation differing from the "fair and reasonable" criteria enforced in application of articles 4 and 5 of the NGA.

The FERC regulates assignment of the rights to interstate transport and storage services in what is referred to as the "secondary market" for interstate capacity. Pursuant to that regulation, all assignment, temporary or permanent, of regulated capacity, must be undertaken in accordance with the regulatory and tariff provisions.

As regards prices, FERC's current policy is to support the power of the providers of this service so that they can set rates or prices based on market prices as a means to encourage capital investment in the natural gas storage market, and thus ensure sufficient storage capacity. For the purpose of evaluating an application for authorisation to provide services at market prices, the FERC requires that the applicant show, inter alia, that both it and the companies in its group either lack market power in storage and delivery capacity in the corresponding geographical area, or have mitigated it to a sufficient degree. Should they not be able to show the foregoing, the applicants must show that the granting of the authorisation is in the public interest and is necessary to increase storage capacity in the area such services, provided that customers are appropriately protected and that the tariffs are submitted for periodic review.

After granting authority to set rates based on market prices, the FERC continues monitoring to ensure that the rates the supplier charges are fair and reasonable, if under the NGA system, or fair and equitable, if covered by the NGPA system, retaining the tools necessary to ensure compliance with these standards.

➤ **Federal Safety Regulations**

The Office of Pipeline Safety (hereinafter, the “Office”), which forms part of the Department of Transportation’s Pipeline and Hazardous Materials Safety Administration (hereinafter, the “Department”), monitors pipeline safety standards pursuant to the 1968 Natural Gas Pipeline Safety Act and the 2002 Pipeline Safety Improvement Act, by virtue of which the Department established certain requirements in respect of the design, installation, testing, construction, operation, replacement and management of gas pipelines.

➤ **State licenses and administrative procedures**

Natural gas storage services may be regulated at state or federal level, or at both levels. Natural gas storage facilities are strictly state facilities, that is, they do not supply gas on the interstate market and are regulated at state level, provided that the companies in question are not companies operating under the system established in article 311 of the NGPA, companies benefiting from the Hinshaw exemption, or local distributors authorized by the FERC, as referred to in the previous section. On the other hand, natural gas storage facilities that supply gas or are intending in the future to supply gas on the interstate market, including facilities that supply gas via interconnections with interstate pipelines, are regulated at both state and federal level.

In the State of Texas, all construction and operating activities related with natural gas transmission and storage are subject to the supervision of the Texas Railroad Commission. Similarly, all construction and operating activities related with natural gas transmission and storage that are carried out in New Mexico are subject to the supervision of the New Mexico Energy, Minerals and Natural Resources Department. Where state or local regulations exist that are applicable to gas storage facilities or interstate gas pipelines, such regulations may not contradict or impede the implementation of licenses granted under the NPA, without the Federal system taking precedence.

Gas storage facilities subject to the commercial regulation of the Texas Railroad Commission are required to provide gas storage services and services related to such activity under the “open access” system whereby such services must be provided in a non-discriminatory manner.

**5.1.5 Important events in the development of the issuer's business**

Iberdrola, S.A., the sole shareholder of the Company, came into operation in 1901. At the beginning Iberdrola, S.A.'s production was totally based on hydroelectric energy. This traditional hydro experience has resulted in a permanent culture of awareness of and respect for the environment which has not been in place for more than 100 years.

This permanent environmental concern resulted in Iberdrola, S.A. concentrating, among other objectives, on adoption of environmental protection measures and a significant push for development of renewable energy, particularly in the wind sector.

Based on these premises, in July 2001 IBERDROLA RENOVABLES was formed for the purpose of combining all the activities related to the generation of renewable

energies, until that time dispersed over various companies in the Iberdrola Group. At the end of 2001 the Company had more than 1,000 MW of installed capacity.

The renewable energy generation business is one of Iberdrola's development pillars. An objective for 2006, within the Iberdrola Group Strategic Plan for the years 2002 to 2006 (announced in October 2001), is that the Group have installed renewable energy power of 3,834 MW in the year 2006. The Plan also envisages investments of €2,500 million for the years 2002-2006.

In September 2002 IBERDROLA RENOVABLES signed a master agreement with Gamesa Eólica, S.A. covering the purchase of wind farms in Spain and joint development of wind farms in France, the United Kingdom, Ireland, Holland, Belgium and Mexico. This master agreement also contemplated the purchase of aerogenerators from Gamesa, for a total of 1,100 MW, and the execution of a master agreement for the provision of operating and maintenance services. As of the date of publication of this Prospectus, the wind farms in question are fully operational.

In 2004 the Company began its international expansion with the signature in April of an agreement with Gamesa for the purchase of the Catefica wind farm in Portugal (an acquisition that was successfully concluded in 2005) and another agreement for the purchase of 245 MW of wind power in Portugal, and long-term joint cooperation in that country (an agreement also now fully implemented).

In addition in this year a 21% interest was acquired in C. Rokas, S.A. ("**Rokas**"), a listed Greek company and the largest wind energy producer in that country. By 2007 the Company had acquired a 52.7% interest in the ordinary shares of that company. At 30 September 2007 the Greek company had installed wind power of 197 MW, two wind farms under construction, and it is processing permits for facilities in Greece and Cyprus.

The 2005 fiscal year ended with a one-year advance in achieving the objectives contemplated in the Iberdrola Group Strategic Plan for the years 2002 to 2006. By 2006 it had total renewable power of 4,434 MW, and had concluded investments of €3,700 million. Also in the course of 2005, the Company began operating wind farms in France (20 MW), Portugal (18 MW) and Brazil (6 MW) for the first time.

In addition, 2006 was marked by new steps in the Company's international expansion strategy. In this regard, the United States companies Community Energy Inc. and Midwest Renewable Energy Corporation were purchased. This allowed the Company to have a project portfolio of 3,600 megawatts in that country. Also, as regards Asia, a master agreement was reached with the Municipal Government of Bayannaer (in the Inner Mongolia area of China) for the location of sites for installation of wind farms.

Also in 2006 two significant agreements were signed with Gamesa: one for the supply of aerogenerators (2,700 MW), in October, for its wind developments in Spain, the rest of Europe, the United States and Mexico, which will be implemented between 2007 and 2009, and another, in December, for purchase of wind farms from 2007 to 2009, having installed capacity of around 1,000 MW and located in various states in the United States of America.

As part of the process of preparing for the Company's stock market listing, between the months of June and November 2007 the IBERDROLA RENEWABLES Group Restructuring Transaction was implemented. As a result of this Transaction almost all of the companies in the Scottish Power group (a company acquired by Iberdrola, S.A. in April 2007) engaged principally in the generation of electricity from renewable sources, were brought within the IBERDROLA RENEWABLES consolidation. The Restructuring Transaction is described in greater detail in section 19 below.

The Restructuring Transaction entailed increases in the Company's installed wind power of 1,992 MW in the United States of America and 372 MW in the United Kingdom as of 30 September 2007. In addition, by virtue of the Operation, the Company began operations in thermal generation, gas storage and energy sale in the United States.

## **5.2 Investments**

### **5.2.1 Description (including amounts) of the issuer's principal investments in each fiscal year for the period covered by the historical financial information up to the date of the registration document**

The table below shows the breakdown, by technology used, of investments made by the IBERDROLA RENEWABLES Group in the year ended 31 December 2006, 2005, both audited, and 2004 (unaudited) and during the period ending at September 30, 2007 (unaudited).

	<b>Investment (€ 000,000)</b>				<b>New installed capacity (MW)</b>			
	<b>30/09/2007</b>	<b>2006</b>	<b>2005</b>	<b>2004 (not audited)</b>	<b>30/09/2007</b>	<b>2006</b>	<b>2005</b>	<b>2004 (not audited)</b>
Wind	827,113	823,120	612,140	790,891	534	607	603	910
Mini-hydro	3,363	14,326	14,628	47,224	9	17	1	39
Other	12,787	12,205	0	0	0.2	0.0	0.1	0.0
<b>TOTAL</b>	<b>843.263</b>	<b>849.651</b>	<b>626.768</b>	<b>838.115</b>	<b>543</b>	<b>624</b>	<b>605</b>	<b>949</b>

The following table breaks down the investments made by the Company at 31 December 2004, 2005 and 2006, and at 30 September 2007 by technology and by country of operation.

	Investment (euros '000 except for percentages)								New installed capacity (MW)			
	30/09/07	%	2006	%	2005	%	2004	%	30/09/07	2006	2005	2004
Wind	827,113	98	823.120	97	612.140	98	790.891	94	534	607	603	910
Spain	393,324	47	411.319	48	467.108	75	758.422	90	373	403	367	910
United States	102,831	12	123.388	15	0	0	0	0	28	26	0	0
United Kingdom	2,193	0	5.811	1	0	0	0	0	0	0	0	0
Rest of world	328,765	39	282.603	33	145,032	23	32.469	4	133	178	236	0
Mini-hydro	3,363	0	14.326	2	14.628	2	47.224	6	9	17	1	39
Other	12,787	2	12.205	1	0	0	0	0	0.2	0.0	0.1	0.0
<b>TOTAL</b>	<b>843,263</b>	<b>100</b>	<b>849,651</b>	<b>100</b>	<b>626,768</b>	<b>100</b>	<b>838,115</b>	<b>100</b>	<b>543</b>	<b>624</b>	<b>605</b>	<b>949</b>

(\*) The percentages shown in the preceding table correspond to percentages of the total renewable energy business.

(\*\*) The Company's annual investments do not necessarily correspond to the increase in installed capacity in that year since the actual year or period in which the investment was made may differ from the year or period in which it was concluded. Similarly, MW deemed to be installed based on funding obtained may differ from MW actually installed.

Given the lag between the annual investment made (accounting accrual figure) and the moment at which the MW were installed (physical and technical aspects, it is not possible to calculate accurately the historic investment cost per MW installed in each year by dividing the total investment made in the year by the new MW installed over the same period,). Thus the result of such a calculation would not be reliable nor representative of the real cost. Furthermore, the heterogeneity of the investments made in each year (projects at different stages of progress -from operational to under construction or at a development stage -, different aerogenerators -smaller and cheaper or more expensive and powerful -, different geographical areas -different construction costs, etc. power country-) ensures that the investment costs per MW will differ significantly each year, and the information rendered in one year will not necessarily be indicative of the investment cost per MW in others.

During the nine months ended the IBERDROLA RENOVABLES Group installed 382 MW in Spain, the majority of which correspond to wind energy facilities (373 MW), with the remainder (9 MW) corresponding to mini-hydro power. During the period mentioned, IBERDROLA RENOVABLES has continued consolidating its international presence with new power installed in Poland (48 MW), France (38 MW), USA (28 MW), Germany (26 MW), Portugal (18 MW) and Greece (4 MW). It is worth highlighting the strengthening of its position in Italy with the signing of a partnership agreement with the Api Holding S.p.A. energy group for the construction and fifty per

cent operation of approximately 350 wind power megavolts. During the nine months of 2007, a total of 843 million Euros has been invested.

During the fiscal ended 31 Decmbber 2006 IBERDROLA RENOVABLES Group installed 420 MW in Spain, the majority of which correspond to wind energy facilities (403MW) with the reminder 17 MW corresponding to mini-hydro power.

This fiscal year also saw the entrance of IBERDROLA RENOVABLES into the United States, with acquisitions of the companies Community Energy, with a project portfolio of 2,000 MW, and MREC Partners, with a project portfolio of 1,600 MW. In addition, the Company strengthened its presence in France by acquiring the company Perfect Wind, a company with a project portfolio of 600 MW, of which 11 MW are in operation. Also during 2006 expansion of the Company's business continued. It commenced operations in Germany (34 MW), Poland (41 MW) and the United States (26 MW). During the financial year 2006, 850 million euros were invested.

During the fiscal year ended 31 December 2005 the IBERDROLA RENOVABLES Group installed 368 MW in Spain, the majority of which correspond to wind energy facilities (367 MW), with the remainder (1 MW) corresponding to mini-hydro power. During this fiscal year Iberdrola Renovables also installed 0.1 MW of photovoltaic energy. In addition, during the year the Company acquired 28.9% of the capital of the Greek company C. Rokas, S.A., which commenced accounting consolidation by global integration with the Company during the last quarter of 2005. Also, the Company during 2005 for the first time had wind power in France (20 MW), Portugal (18 MW) and Brazil (6 MW). During the financial year 2005, 627 million euros were invested.

During the fiscal year ended 31 December 2004 the IBERDROLA RENOVABLES Group installed 949 MW in Spain. Of that number, 910 MW correspond to wind power and 39 MW to mini-hydro power. In Greece the Company acquired an interest equivalent to 21% of the share capital of C. Rokas, S.A., which marked the entry of IBERDROLA RENOVABLES Group into that country. During the financial year 2004, 838 million euros were invested.

**5.2.2 A description of the issuer's principal investments that are in progress, including the geographic distribution of these investments (home and abroad) and the method of financing (internal or external)**

The principal investments of the IBERDROLA RENOVABLES Group in progress are described below, based on the technology used, during the period ended 30 September 2007:

Investment in progress (thousands of euros except percentages)		
	30/09/07	%
Eolic	801,189	99
Spain	419,372	52
United States	178,274	22

<b>United Kingdom</b>	<b>6,509</b>	<b>1</b>
<b>Rest of world</b>	<b>197,033</b>	<b>24</b>
<b>Mini-hydro</b>	<b>3,869</b>	<b>0</b>
<b>Other</b>	<b>6,728</b>	<b>1</b>
<b>TOTAL</b>	<b>811,786</b>	<b>100</b>

The investment in progress detailed in the preceding table was determined in accordance with accrual accounting criteria and it is referred to IBERDROLA RENOVBLES without therefore considering the United States and British companies incorporated into the perimeter of consolidation by virtue of the Restructuring Transaction.

In turn, the United States companies that are incorporated into the perimeter of IBERDROLA RENOVBLES by virtue of the Restructuring Transaction had investments in progress at September 30, 2007 at a value of 949 million dollars. The following farms were under construction at that date: Casselamn, Dillon, Min Dakota and Klondike III.

On the other hand, the British companies incorporated into the consolidation perimeter of IBERDROLA RENOVBLES, had investments in progress at September 2007 for a value of 183 million pounds, corresponding to 170 million pounds in assets under construction and 13 million pounds in assets related to the development of wind farms. The following farms were under construction at that date: Whitelee, Greenknowes, Wether Hill, Wolf Bog and extensions of Dunlae and Hagshaw Hill.

### **5.2.3 Information concerning the issuer's principal future investments on which its management bodies have already made firm commitments.**

The Strategic Plan 2008-2010 of Iberdrola, S.A., presented on October 24, 2007, includes the goal for IBERDROLA RENOVBLES of increased installed power by 2,000 MW per year to reach 13,500 MW of installed power in 2010. This Strategic Plan also forecasts certain investments by IBERDROLA RENOVBLES for a value of 8,600 million in said period 2008-2010.

Additionally, the most significant investment commitments can be classified as:

#### **(i) Significant wind farm investments commitments**

- On 17 November 2004 an agreement was signed with Gamesa for acquisition of 250 wind megawatts in Portugal for €310 million. All these sales are still in the development stages, except for the farm in Alto de Moncao (32 MW), which has already been transferred, for an outlay of €40 million. With respect to what was initially reported to the CNMV, 270 million Euros remains to be paid out.
- On 26 July 2005 another agreement was signed with Gamesa for acquisition of 56 wind megawatts in Greece for €78 million. During 2006 17 megawatts were transferred from Gamesa to IBERDROLA RENOVBLES with the Alogorachi

farm, for an outlay of €23 million, with the remaining 39 megawatts still pending transfer. With respect to what was initially reported to the CNMV, 55 million Euros remains to be paid out.

- On 26 October 2005 an agreement was signed, also with Gamesa, to acquire a total of 700 megawatts of power installed in wind farms, currently in the development phase, in Spain and Italy, for an amount of between €850 million and €900 million. No disbursement has yet been made for said agreement.
- On 29 December 2006 an agreement was signed for the acquisition by IBERDROLA RENOVABLES from Gamesa of wind farms in the United States of America having 1,000 megawatts of power. These farms will be installed between 2007 and 2009 and will be located in the states of Pennsylvania, Texas and Illinois. This agreement contemplates, on the one hand, acquisition of wind facilities with power of around 500 megawatts that Gamesa will start up before the end of 2009. Of that amount, 300 megawatts are covered by firm commitments, while the remaining 200 megawatts would be subject to a purchase right. The other 500 megawatts correspond to projects in progress, of which purchases of two farms in Illinois have been closed, having a total capacity of 230 megawatts.

The price of this transaction is determinable based on variables of a technical nature, being between 700 and 1,100 million United States dollars, depending on the final number of MW acquired.

The following table summarises the main purchase commitments which have been already been signed with wind parks. Although these commitments have been taken into account when designing the Strategic Plan, they cannot necessarily understood to have been included in it, since the terms of execution in some cases exceed the period covered by the Strategic Plan

Relevant wind farm investment commitments (amounts in millions of Euros)				
Geographical area	Agreement date	MW	Amount paid	Amount to be paid
<b>Portugal</b>	<b>17-11-2004</b>	<b>250</b>	<b>40</b>	<b>270</b>
<b>Greece</b>	<b>26-07-2005</b>	<b>56</b>	<b>23</b>	<b>55</b>
<b>Spain and Italy</b>	<b>26-10-2005</b>	<b>700</b>	<b>0</b>	<b>850-900</b>
<b>United States</b>	<b>29-12-2006</b>	<b>1,000</b>	<b>5 (1)</b>	<b>474-,748 (1)</b>
<b>TOTAL</b>		<b>2,006</b>	<b>67.8</b>	<b>1,654-1,978</b>

(1) Guideline exchange rate: 1.46 USD/Euro

In relation to the commitments to acquire wind farms from Gamesa, it is necessary to point out that it is not possible to specify precisely the pending disbursements of wind farm investments for the following reasons:

- a) Gamesa might not deliver all the MW that the agreements set out.
- b) The delivery schedule set in the agreements is merely indicative. Hence, even though all of the power may be delivered, the time at which this will take place cannot be accurately specified. In this respect, certain agreements foresee periods of extensions of the deadlines.
- c) The price of each MW delivered and hence the amount of the investment varies on the basis of certain variables, such as the time of delivery and the hours of functioning that are substantiated (given that not all of the MW generate the same functioning hours and the sale price of the energy evolves over time).

For the reasons stated above, the Company cannot accurately specify the number of MW that will be delivered, the price of each MW delivered or the exact time at which they will be delivered. For the same reasons, the figures stated above with respect to the investments pending disbursements are estimates.

**(ii) Commitment relating to investment in wind turbines:**

- On October 19, 2006, a supply contract for wind turbines was signed with Gamesa for a sum greater than 2,300 million Euros, which will materialize between 2007 and 2009. According to the terms of said agreement IBERDROLA RENOVABLES will acquire wind turbines from Gamesa which add up to a power level of 2,700 megawatts. The machines will be used for wind power developments in Europe, the United States and Mexico.
- On 26 May 2007 a contract for the acquisition of U.S. company CPV Wind Ventures was signed. By virtue of that acquisition Iberdrola Renewable Energies USA assumed an agreement for purchase of aerogenerators from General Electric. That purchase commitment originated in May 2006 by execution of an agreement between CPV Wind Ventures and General Electric. The scope of the agreement includes supply of 150 model 1.5 SLE aerogenerators, representing a total of 225 MW. These machines are to be used in IBERDROLA RENOVABLES projects in the United States. The value of this agreement is between \$250 million and \$270 million. Under the terms of the agreement the machines will be supplied during the second half of 2008.
- It also has an agreement with Mitsubishi for the acquisition of aerogenerators in 2008 and 2009 for total capacity of up to 405 MW. Finally, it has signed an agreement with Suzlon energy for 300 MW in 2008 and 400 MW in 2009.
- In addition the Company through its subsidiaries has agreements for the purchase of aerogenerators for specific projects with other manufacturers such as Siemens, Fuhrlander, Nordex, General Electric, Repower, Ecotécnia and Acciona for a total 270 MW.
- Enstor Inc. is currently in talks to acquire a company that owns a gas storage facility in the United States of America for approximately 164 million US dollars (112.3 million

euros); if the negotiations are successful, it is possible that it will sign a purchase agreement, subject to conditions (including the obtainment of mandatory authorisations), in coming days with the aim of closing the acquisition before the end of 2007.

The following table summarises the situation of principal commitments which have already been signed for the acquisition of aerogenerators on the date of the present Prospectus. As in the case of wind park acquisition commitments, although these commitments have been taken into account when designing the Strategic Plan, they cannot necessarily be understood to have been included in it, since the terms of execution in some cases exceed the period covered by the Strategic Plan.

Situation of the principal commitments for aerogenerators							
Manufacturer <sup>(1)</sup>	MW	Agreement Date	Duration	Geographical Area	% Committed <sup>(2)</sup>	Amounts paid (million €) <sup>(3)</sup>	Amounts to be paid (million €) <sup>(3)</sup>
Gamesa Eólica	2,700	Oct. 19, 06	2007-2011	Europe, U.S. Mexico	67%	242	1,627
Suzlon	700	Apr. 24, 07	2008-2010	U.S.	100%	54	468
Mitsubishi	405	Aug. 1, 06	2008-2009	U.S.	100%	54	293
GE Energy	225	May 26, 06	2008-2009	U.S.	100%	53 (4)	132
<b>Total MW</b>	<b>4,030</b>					<b>403</b>	<b>2,985</b>

1) Additionally, there are contracts for specific parks with various manufacturers such as Siemens, Fuhrländer, Ecotécnia, RePower, Nordex, Vestas and Acciona for a total 270 MW.

(2) Order issued to the provider to guarantee the reservation of the manufacturing slots (order allocation).

(3) Guideline exchange rate of 1.46 USD/Euro.

(4) Assuming a contract value of 270 million dollars

(iii) **Other investment commitments:**

- On October 23, 2007 a strategic alliance was signed with Italian energy group Api Holding S.p.A. for the construction and operation of fifty percent of approximately 350 megawatts of wind power generation in Italy, which will involve an investment for the joint venture of around 500 million euros. The agreement involves developing seven wind power projects, to be located in the regions of Sicily and Puglia and which are currently at a very advanced stage of development. It is expected to come on-stream in 2008 and 2009. In this operation, one million euros will be paid in advance.
- In September 2007, the Company, through its US subsidiary PPM Energy Inc., signed an agreement with the city of Klamath Falls in the state of Oregon to acquire the Klamath cogeneration plant, which has a capacity of 506 MW, at an estimated price of \$290 million (equivalent to €198.5 million). PPM had been managing the commercial operation of the plant under contract since its commissioning in 2001, and had already purchased capacity of 237 MW for the supply of major clients in the North-West of the United States and the state of California. The transaction will be concluded within the next few months, as soon as the relevant licences have been obtained.

- On July 23, 2007, the Company made an offer to Ente Vasco de la Energía (the Basque Energy Agency) for the acquisition of the total number of shares held by this Agency in the company Eólicas de Euskadi, S.A. (143 MW), equivalent to 50% of the company capital (the Company holds the remaining 50%). The operation is subject to the obtaining by the Ente Vasco de la Energía of all permits and authorizations from public bodies necessary for the realization of the operation. The price to be paid, therefore, for the said 50% share of capital in Eólicas de Euskadi, amounts to 96.85 million euros.

The investments referred to in the preceding paragraphs will be financed principally with funds from the operations, financing from Iberdrola, S.A. and, in those cases in which ownership is not greater than 80-85% or where there is a country risk which the Company's risk policy does not recommend assuming, the investments will be financed with unsecured debt.

Also, for fiscal reasons in each country, the Company may have recourse to bank debt or to institutional investors, such as in the case of the United States.

With the aim of avoiding exchange rate risk, IBERDROLA RENOVABLES will seek to obtain financing in the currency in which investments are to be made.

## **6. DESCRIPTION OF THE BUSINESS**

### **(01) Principal activities**

#### **A) INTRODUCTION**

IBERDROLA RENOVABLES is a company principally engaged in the promotion, construction, management and operation of electricity produced by generating plants that use renewable energy sources, as well as in the sale of electricity produced in such plants. The main focus of the Company's business in renewable energy is on-shore wind energy and mini-hydro energy, as well as, albeit to a lesser extent, photovoltaic energy. The Company is also beginning to develop other technologies, including off-shore wind energy, thermoelectric solar energy, and energy using biomass or tidal power.

In addition to its activities in the renewable energy sector, the Company carries out activities in thermal generation, storage and buying and selling of energy in the United States.

The Company's activities are basically concentrated in Spain, the United States of America and the United Kingdom. The Company also has operating assets, project portfolios and/or local offices in another 16 countries, including Greece, Poland and France.

Regarding the technologies used for generation of electricity, the technologies used are principally those listed below.

- Wind energy: This energy is obtained using aerogenerators. They are devices that capture wind energy using a system of blades connected to an alternator. The wind blades or rotors produce mechanical energy in a shaft that drives the

alternator generating electricity. If the facility is on land it is "onshore" wind. If it is at sea it is called "offshore".

- Hydro energy: This energy is produced using the force of water driving a turbine and alternator that generates electricity. Within it, mini-hydro energy is characterised by the use of a combined turbine alternator of 50 MW or less.
- Solar energy: Within this category are several different kinds of technologies. The common factor is that they use energy coming from the sun:
  - Thermoelectric solar plants: These are plants that, by heating a fluid using solar radiation, produce water vapour used in a conventional thermodynamic cycle. The capture and concentration of solar rays may be accomplished using various systems.
  - Photovoltaic plants: They are constructed using photovoltaic panels or cells. Photovoltaic panels are comprised of semiconductor devices that, upon receiving solar radiation, activate and generate a small voltage difference at their ends. A photovoltaic plant is comprised of a larger or smaller set of interconnected photovoltaic panels.
- Energy using biomass to generate electricity: This consists of the use of various kinds of organic material (plant or animal) as fuel for a boiler from which energy is generated in a conventional thermal plant.
- Wave energy and tidal energy: Wave energy consists of the use of any device that is capable of capturing the energy present in the movement of waves, while tidal energy consists of the use of devices to capture energy coming from the rising and falling movement of tides (flow and ebb).
- There are other kinds of renewable energies for production of electricity in very preliminary stages of technological development. The Company actively monitors these developments, both from the technological point of view and from the point of view of their financial viability, with the aim of maintaining an appropriate positioning ensuring the possibilities of long-term growth.

To provide clarification of the description of the Company's business it should be noted that the references to installed capacity included in this section 6 relate to the Company's consolidated installed capacity. Consolidated installed capacity is calculated by adding together: (i) 100% of the installed capacity attributable to each subsidiary that is fully consolidated in the Company's annual financial statements; (ii) the part of the installed capacity attributable to subsidiaries jointly controlled by IBERDROLA RENOVABLES corresponding to the part of the company's results that the Company includes in its annual financial statements by the proportional integration method. All information on operating figures provided in this section 6 for the nine-month period ended on 30 September 2007 is pro-forma information.

The total renewable installed capacity of 7.342 MW includes 606 MW in the United States that is owned by a third party whose electricity is managed by IBERDROLA RENOVABLE through its subsidiary PPM.

## B) GENERAL DESCRIPTION

At the close of the nine-month period ended 30 September 2007 the Company had total renewable pro forma installed capacity of 7,342 MW and 41,266 MW in its portfolio. In addition, for the same period the total pro forma production of the Company using renewable energy sources amounted to 9,736 GWh.

The table below shows the contribution of each technology and, in the case of wind power, each region in which the Company is active, to the Company's gross margin, as a percentage of the gross margin, and of EBITDA, based on pro-forma information for 2006 and the nine-month period ended 30 September 2007.

	Gross Margin (not audited) (1)	% of total	EBITDA (not audited)	% of EBITDA	Gross Margin (not audited) (1)	% of total	EBITDA (not audited)	% of EBITDA
Wind power (2)	651.2	81.3%	522.1	92.5%	881.3	78.7%	733.8	87.1%
Spain (3)	410.3	51.2%	343.0	60.8%	601.2	53.7%	517.4	61.4%
United States (2)	117.7	14.7%	81.0	14.4%	134.9	12.0%	97.5	11.6%
United Kingdom (3)	66.8	8.4%	51.1	9.1%	92.0	8.2%	75.3	8.9%
Rest of world (3)	56.4	7.0%	47.0	8.3%	53.2	4.8%	43.6	5.2%
Mini-hydro power	25.0	3.1%	17.7	3.1%	41.2	3.7%	33.3	3.9%
Total Renewables (2)	676.2	84.4%	539.8	95.6%	922.5	82.4%	767.1	91.0%
Gas storage	28.8	3.6%	13.7	2.4%	51.4	4.6%	33.2	3.9%
Thermal	52.0	6.5%	40.8	7.2%	62.6	5.6%	50.0	5.9%
Sales of Energy	43.6	5.4%	10.3	1.8%	78.8	7.0%	36.4	4.3%
Others (4)	0.1	0%	-40.3	-7.1%	4.0	0.4%	-43.9	-5.1%
Total	800.7	100.0%	564.3	100%	1,119.3	100%	842.8	100%

(1) Gross margin corresponding to income less cost of supplies (such as natural gas in the business of gas sales in the U.S. and fuel in the business of thermal generation in the U.S).

(2) Includes exclusively on-shore wind power.

(3) Gross margin from wind power in Spain, the United Kingdom and in the Rest of the World is equal to income from wind power as there are not energy costs in these countries.

(4) "Others" includes other technologies, structure and other operating income.

By virtue of the Restructuring Transaction, the Company expanded both its business and its assets, mainly in the United States of America and United Kingdom. The Transaction entailed increases in the Company's installed wind power of 1,992 MW in

the United States of America and 372 MW in the United Kingdom as of 30 September 2007. In addition, by virtue of the Transaction, the Company began operations in thermal generation, gas storage and energy sales in the United States.

### B.1) Energy generation business from renewable sources

The Company's principal business is the generation of energy from renewable sources. On September 30, 2007, the Company had pro forma installed renewable energy of 7,342 MW.

The Company conducts its business principally in the area of wind energy, having 7,000 MW installed at 30 September 2007, representing 95.3% of its total installed renewable capacity. The IBERDROLA RENOVABLES wind business, for the nine-month period ended 30 September 2007, accounted for 81.3% of its gross margin and 92.5% of EBITDA, and 78.7% of its gross margin and 87.1% of EBITDA for the year ended 31 December 2006 (in both cases pursuant to the pro-forma financial information).

In addition, at 30 September 2007 the Company had 342 MW from mini-hydro plants located in Spain, representing 4.7% of its total installed renewable capacity. The IBERDROLA RENOVABLES mini-hydro business, for the nine-month period ended 30 September 2007, accounted for 3.1% of its gross margin and 3.1% of EBITDA, and 3.7% of its gross margin and 3.9% of EBITDA for the year ended 31 December 2006 (in both cases pursuant to the pro-forma financial information).

Also, the Company has 0.3 MW installed in photovoltaic solar technology, and is developing various projects using other technologies such as thermal solar, offshore wind energy, biomass, wave energy, etc.

The table below shows total installed renewable capacity of the Company at 30 September 2007, classified based on the technology used and, in the case of wind power, on the geographical area in which the Company operates.

	Pro-forma 30/09/2007	
	Installed renewable capacity (MW)	% of total installed renewable capacity
Wind power (1)	7.000	95.3
- Spain	4.035	55.0
- United States	2.046	27.9
- United Kingdom	372	5.1
- Rest of world	547	7.5
Mini-hydro	342	4.7
Other renewable technologies	0.3	0
Total Renewables	7.342	100

(1) On-shore wind power

The objectives set in the Company's development plan assume the addition of 2,000 MW per year if total installed capacity of 13,600 MW is to be achieved by 2010. The Company has based its plan on the size of its project portfolio and on the segmentation of the said portfolio.

In addition, at 30 September 2007, the Company had a renewables project portfolio of 41,266 MW in various countries. In the interest of obtaining greater clarity and transparency in the composition of its portfolio, IBERDROLA RENOVABLES has established a rigorous methodology based on its experience in segmenting the projects into different categories as a function of the maturity and probability of success within each category. Thus there are three project segments that, ordered from greater to lesser maturity and probability, are called: practically certain (at least 95% probability of success), probable (between 40% and 50% probability of success, at least) and potential (less than 20% probability of success).

The following table shows the Company's portfolio of projects by technology employed and in function of their maturity and probability of success.

	Total project portfolio (MW)	%	Prac. certain (MW)	% Prac. certain	Probable (MW)	% Prob.	Potential (MW)	% Pot.
Wind power	40,338	97.8	2,830	98.2	11,938	97.1	25,570	98.0
Mini-hydro	285	0.7	-	-	127	1.0	158	0.6
Other renewable technologies	643	1.6	52	1.8	233	1.9	358	1.4
Total	41,266	100	2,882	100	12,298	100	26,086	100

Under the practically certain category there are 1,375 MW under construction, of which 1,323 MW are wind projects, 50 MW correspond to the first thermosolar plant the Company is developing, and 2 MW correspond to the first plant using energy from biomass.

Considering the MW comprising the projects that form part of the Company's portfolio of projects in function of the rate of probability attributed internally to each of them, and considering the objective mentioned previously of installing some 2,000 MW of power annually, IBERDROLA RENOVABLES estimates that its current projects portfolio will allow it to continue developing its business plan over the next six or seven years.

## **B.2) Energy generation business from non-renewable sources**

In addition to the business of electricity generation from renewable sources, the Company through its subsidiaries PPM and Enstor, Inc. ("Enstor"), engages in an energy storage and purchase and sale business, as well as thermal generation, in the United States.

IBERDROLA RENOVABLES's natural gas storage business, which it is developing through Enstor, in the nine-month period ending on September 30, 2007 accounted for 3.6% of its gross margin and 2.4% of EBITDA, as well as 4.6% of gross margin and 3.9% of EBITDA in the year ending on December 31, 2006 (in both cases pursuant to the pro forma financial information). On September 30, 2007, the Company had an installed gas storage capacity of 0.76 million cubic meters ("bcm").

The IBERDROLA RENOVABLES thermal generation business, developed through PPM, accounted for 6.5 % of its gross margin and 7.2% of EBITDA in the nine months ended 30 September 2007, and 5.6% of its gross margin and 5.9% of EBITDA for the year ended 31 December 2006 (in both cases pursuant to the pro-forma financial information). At 30 September 2007, the Company had pro forma installed energy capacity of 537 MW for thermal generation including 237 MW corresponding to certain long-term Power Purchase Agreements ("PPAs"). On September 11, 2007, the Company reached an agreement with the city of Klamath Falls, in the state of Oregon, for the purchase of the Klamath co-generation plant with 506 MW of power capacity. The Klamath plant purchase contract will settle the 237 MW PPAs. The operation is subject to the necessary authorizations.

The IBERDROLA RENOVABLES energy sales and purchase business in the United States, which includes the sale, transport, management and distribution of natural gas in North America and which is developed through PPM, during the nine months ended 30 September 2007 accounted for 5.4% of its gross margin and 1.8% of EBITDA, and 7.0% of its gross margin and 4.3% of EBITDA for the year ended 31 December 2006 (in both cases pursuant to the pro-forma financial information).

**6.01.1. A description of, and key factors relating to, the nature of the issuer's operations and its principal activities, stating the main categories of products sold and/or services performed for each financial year for the period covered by the historical financial information**

**A) BUSINESS OF GENERATION OF ENERGY FROM RENEWABLE SOURCES**

**A.1) Introduction**

As regards the generation of electricity from renewable sources, as mentioned previously, the main focus of the Company's business is on-shore wind energy and to a lesser extent, mini-hydro energy and photovoltaic energy. The Company is also beginning to develop other technologies, including off-shore wind energy, thermoelectric solar energy, and energy using biomass or tidal power.

The Company is currently present in nine countries. At present, its business is centred mainly on Spain, the United States of America and the United Kingdom. It is also active in Greece, France and Poland, has assets in Germany, Portugal and Brazil, and local offices or projects under development in Bulgaria, Canada, China, Cyprus, Estonia, Guatemala, Hungary, Italy, Morocco and Mexico, and operations in other countries are under study. The Company is thus present in ten of the eleven top rated countries in

terms of renewable energy according to *Ernst & Young Renewable Energy Country Attractiveness Indices* for the second quarter of 2007.

At 30 September 2007, including the companies that have been incorporated into the IBERDROLA RENOVABLES Group due to the Restructuring Operation, the Company had installed renewable power of 7,342 MW (including 606 MW owned by FPL) and a renewable project portfolio of 41,266 MW.

The Company controls most of its wind farms and mini-hydro facilities. Its consolidated installed capacity is calculated by adding: (i) 100% of the installed capacity attributable to each of the companies fully consolidated in the Company's annual financial statements, and (ii) the part of the installed capacity attributable to affiliated companies over which IBERDROLA RENOVABLES exercises joint control, in the same proportion in which the Company includes them in its annual financial statements by the proportional integration method. Attributable energy is calculated as the sum of the products resulting from multiplying 100% of the installed capacity of each of the subsidiary or part-owned companies by IBERDROLA RENOVABLES by the percentage of the company's holding in it.

The table below shows attributable consolidated renewable energy capacity according to each technology and, in the case of wind power, according to the country in which the Company operates, including the renewable energy businesses owned by the Scottish Power Group incorporated to the perimeter of IBERDOLA

Installed Power	30/09/2007	
	(MW)	
	Consolidated	Attributable
Wind power (1)	6,394	6,154
- Spain	4,035	3,891
- United States (1)	1,440	1,440
- United Kingdom	372	369
- Rest of the world	547	454
Mini-hydro power	342	341
Other renewable technologies	0.3	0.2
<b>Total Renewables (1)</b>	<b>6,736</b>	<b>6,495</b>

(1) Does not include the 606 MW owned by a third party whose energy is managed by PPM under an electricity sales agreement.

- ***A.1.1) Promotion and construction phase***

In general the path to be followed in development and commissioning of a renewable facility is in a series of phases. They vary to a greater or lesser extent based on the technology used (wind farms, mini-hydro plants, solar plants, etc.) and the geographical area where they are located (different countries).

As mentioned above, in respect of the wind business, the first phase of the Company's business is focused on development and start-up of a wind farm. This is generally undertaken in projects that are fully internally managed from the outset. To a lesser

extent, the projects have already been partially or totally developed by third parties, the rights of which are acquired.

The following table shows the real renewable power installed in MW and the percentage of renewable projects put into practice during the period covered by the financial information attributable to opportunities detected internally and developed from the beginning by the Company (greenfield), to the acquisition of development projects to a greater or lesser degree and to the acquisition of projects which are already operative or under construction. This information is provided both to IBERDROLA RENEWABLES (prior to the Restructuring Operation), as well as the American and British companies that have been incorporated by virtue of the said Operation.

	IBERDROLA RENEWABLES		UNITED STATES (1)		GREAT BRITAIN (2)	
	31/12/2004 31/12/2006	to	31/03/2005 31/03/2007	to	31/03/2005 to 31/03/2007	
	MW	%	MW	%	MW	%
Projects in the development phase	1,769	81.2	836	100	184	84.8
Greenfield	1,312	60.2	525	62.8	184	84.8
Acquisition of projects in a lesser or greater degree of development	457	21	311	37.2	-	-
Acquisition of projects already operative or under construction	409	18.8	-	-	33	15.2
Total	2,178	100	836	100	217	100

(1) Only includes real information (not pro forma) of the American companies incorporated into the perimeter of IBERDROLA RENEWABLES by virtue of the Restructuring Operation.

(2) Only includes real information (not pro forma) of the British companies incorporated into the perimeter of IBERDROLA RENEWABLES by virtue of the Restructuring Operation.

The process of development and construction of a wind farm deriving from a business opportunity managed by the Company has an approximate average duration of five years, although the term for construction may vary significantly from one region to another. External factors (such as administrative processing, delays in construction of the farm or installation of network connections, and difficulties in achieving supply of aerogenerators) may extend the duration of the development and construction phase.

When the construction of a wind power park is finished, it has a lifespan of approximately twenty years.

The Company controls the development and construction process (selection of the site, administrative processing, as well as the design of the wind farms). Without prejudice to the foregoing, the Company generally outsources various phases of the development and construction process to third parties, among them being Iberdrola Ingeniería y Construcción, S.A. Unipersonal (a 100% owned Iberdrola,

S.A. subsidiary), always choosing the best supplier in accordance with the procedures and specifications of IBERDROLA RENOVABLE itself.

In this regard, it is possible to identify the following common phases in the development of a wind farm that, in some cases, may occur simultaneously based on the circumstances of the regulations in each of the countries in which the Company operates. These phases also are also applicable to any renewable facility other than a wind farm, without prejudice to some specific differences. These phases are as follows:

✓ Site selection and resource evaluation

The first step in every project to be developed is the search for the best location. Specifically, the process begins with a map-based search and a field study (based on a series of variables to be considered such as the topography of the area, the expected energy resource, the existing or future evacuation infrastructure, the dimensions of the site and the rights existing in respect thereof, the environmental conditions and the existing legislation). Subsequently, the site that has been located is usually visited by a specialised company. Thereafter, if the estimates obtained (resource and installable power) so advise, the corresponding measurement equipment that will be used to more precisely evaluate the available resource is installed in the selected area.

The preliminary analyses of the environmental characteristics of the site, the network connection infrastructures and the geographical and wind conditions are used by the Company to determine the basic parameters of the project and decide whether it is potentially viable from the commercial, environmental, technical and financial points of view.

✓ Administrative Processing

Once a site complying with the conditions discussed above has been found, the next step is processing the project before the corresponding authorities (local, regional and national governments). Generally this involves preparation and presentation of the documentation required by the specific regulations of each country or autonomous region, with the objective of obtaining the grant of the corresponding permits and authorisations. In most cases this includes preliminary processing, environmental permits, project approvals and construction permits. During this phase the engineering design of the park was developed in relation to the needs of the park and the specifications of the owner.

a. Preliminary processing:

In some of the countries in which the Company operates, certain authorities grant the rights for the development of wind farms to promoters based on different criteria such as competition processes, the approval of a wind power plant or the need for availability of a connection point already granted by the distribution or transport company. In other countries, the Company mainly ensures land rights via bilateral negotiation with individual owners or governmental institutions.

b. Environmental permit

In most countries in which the Company is active, including Spain and the United Kingdom, the promoter presents a basic plan and an environmental impact study to the competent authority. They are subject to a term of public review. The environmental authorisation is granted if the project is found to be environmentally viable. In the United States certain steps must be complied with in relation to evaluating the impact on the environment and obtaining authorization. The environmental authorization procedure varies enormously in the different jurisdictions, with different time periods, authorities involved and the level of centralization of the permits. The environmental authorization is generally based upon a study of the environmental impact which covers all aspects related to the potential impact of the wind power park on the environment and the community. The environmental authorization consists of approval by the different agencies of the development of the park. Compensatory measures and information about the impact are often required. This phase is the key to the development of each project.

c. Project approval

Once the environmental permit has been obtained, the Company is in a position to prepare and present a detailed plan to obtain governmental approval from a technical point of view. In Spain and, where relevant, the United States, this authorisation is generally granted without a time limit, although in others it is typical for it to be granted for a limited period of time. Usually, once the period for which the authorization was granted has terminated, in those cases in which the authorization is granted for defined periods or following the termination of the useful life of the installation, in those cases in which the authorization is granted for indefinite periods, the dismantling of the installation and the restitution of the location is required.

d. Change of land use and construction permit

Parallel with the processing of the project approval a change of land use often is necessary. That is, inclusion of use of the corresponding renewable energy among the authorised uses. In certain countries it also is necessary to obtain a construction permit to commence construction of a wind farm.

By way of illustration, it is worth noting that in some countries the project approval and construction permit are a part of the same item, for example the planning consent in the United Kingdom.

✓ Land management and supply of generators and, if necessary, signature of agreements with energy purchasers

This phase, generally occurs simultaneously with obtaining governmental permits and the importance of each milestone, varies in relation to the country concerned.

Prior to commencement of work it generally is necessary to have the authority to use the land by way of lease, concession or ownership. In some cases must carry

out adjustments in the configuration of the park as a result of the land agreements reached.

Most of agreements that IBERDROLA RENOVABLES concludes in relation to land take the form of land usage rights or usage assignment rights. These agreements have terms of between 50 and 75 years and contain automatic renewal clauses for further terms of 25 years.

Pursuant to the provisions of paragraph 8.1 of this Registration Document, the term of land lease agreements is generally between 20 and 30 years. These agreements usually contain renewal clauses of varying content but which, for the most part, allow for the extension of the agreements.

In addition, in some countries, such as the United States, it is necessary to sign contracts with energy purchasers. The Company generally signs long term contracts by virtue of which the counterparties (normally utilities) commit to purchase the energy generated by the wind farms. In other countries, particularly those in which feed-in tariff systems prevail, the sale of energy is guaranteed by participants in the system.

With regards to the supply of aerogenerators, the Company plans its requirements based on the advance installation of the facility, thereby preventing delays in the construction of wind farms.

✓ Processing, connection and connection infrastructure

At the same time as general development of the farm, it is necessary to process the connection to the local distribution and transmission networks, which is essential to evacuation of the generated energy.

This processing is in the form of: (i) application for the connection point by the developer; (ii) conduct of connection studies by the system operator or the electricity distribution company in order to determine whether it is necessary to modify the existing infrastructure so as to allow for network connection, and (iii) processing of the necessary evacuation infrastructure and subsequent construction thereof, all without prejudice to signing the contracts necessary for sale of the energy produced. Occasionally, obtaining the permits necessary to and carrying out works that affect evacuation infrastructures are carried out by the system operator, in which case, the Company would not have control over the said works and permits.

✓ Approval of budget

Once a project shows that it meets certain viability requirements, the investment budget is approved. The most significant costs deriving from construction of a wind farm are the cost of aerogenerators (approximately 70% to 80% of the total investment cost) and the connection to the networks (approximately 10%). The Company finances its wind farms through intergroup financing, or, to a lesser degree, via the *project* finance. In the United States, operating cash flow, thanks to institutional investment structures are used to pay intergroup loans.

✓ Construction

Once the land usage rights, permits and licenses, and finance are obtained, as well as the necessary financing, the Company is in a position to commence the work necessary for construction of the wind farm. The Company manages the project and is involved in construction and design of the wind farms. The Company also generally establishes various requirements in respect of the aerogenerators it orders from suppliers. The Company generally out sources installation of aerogenerators and construction of the farm itself. Construction of a wind farm lasts for approximately six to 12 months, depending on the size of the wind farm.

✓ Commissioning

After construction of the wind farm and related infrastructure the Company is in a position to commission the farm. Doing so requires obtaining a prior authorisation. During the putting into service, the final tests to confirm the correct operation of the aerogenerators are also carried out. In order to facilitate the transition until the exploitation phase the Operation and Maintenance Personnel are present in this phase.

In addition, all requirements set forth in the regulatory system of the particular country or state for sale of the energy must be satisfied. At that point electricity is being generated, thus concluding the process of development of the renewable facility. It then is considered to be an operating facility.

***A.1.2) Segmentation of the project portfolio***

The objectives set in the Company's development plan assume the addition of 2,000 MW per year if renewable installed capacity of 13,600 MW is to be achieved by 2007 including the companies that have been incorporated into the IBERDROLA RENEWABLES Group by virtue of the Restructuring Operation,. The Company believes that its project portfolio of 41,266 MW at 30 September 2007 should help ensure these targets are met:

As noted above, to achieve greater clarity and transparency in the definition of the portfolio and responding to the internal planning requirements, IBERDROLA RENEWABLES has established a rigorous methodology that segments its project portfolio according to the maturity of each. In application of this methodology, projects are segmented into three groups: practically certain, probable and potential. In addition, some projects that are in the very early stages of development are not even included in the "potential" category.

The definitions created for each of the segments have been stated in a general sense. The attempt is to combine and include projects considered to be within a similar stage of development, despite the fact that they may be located in different countries, and subject to very different regulatory frameworks and administrative proceedings. Also, these definitions are applicable not only to wind energy, but also to the other renewable technologies.

The following table shows, purely for illustrative purposes, the segmentation of the project portfolio into the three indicated categories, based on the principal milestones achieved during construction of a wind farm.

Promotion and construction phase	Practically certain	Probable	Potential
Site selection and resource evaluation	4	2	1
Administrative processing	3	2	0-1
- Preliminary Processing:	4	3-4	0-3
- Environmental permit	4	2	0
- Project approval	3-4	2	0-1
- Change of land use and construction permit	3-4	2	0
Land management and supply of aerogenerators	3-4	1-2	0-1
Processing of connection and connection infrastructure	4	2	0-1
Approval of budget	4	2	0
Construction	0-4	0	0
Commissioning	0	0	0

0: Not yet begun

1: Begun

2: Under development

3: Advanced

4: Completed

- ✓ **Practically certain:** These projects have passed the most critical phases or obtained all permits key to the success thereof. Also, the budget must have been approved and supply of the aerogenerators must have been arranged. This group also includes facilities that are under construction.

The Company believes that there is a 95% possibility of success for the projects included in this category.

**Probable:** This category is made up of projects initially considered to be viable based on objective parameters regarding processing, energy resource or engineering. This covers a project during the phase in which it is decided to commit to the project in terms of dedication of resources until the time it is known to a high degree of probability that the project will be successfully concluded. In this regard, they are projects in respect of which a measuring tower has been installed and basic design has been completed. They also must have the application for the main permits. The Company believes that there is approximately a 40 and 50% possibility of success for projects included in this category.

**Potential:** These projects have the site identified and are in an initial phase of administrative processing and engineering. The segment includes projects from the beginning until the point that it is decided to commit to them due to expected viability. In this regard, the site must have been located and one of the following milestones must have been achieved: (i) a favourable wind study; (ii) the initial configuration of the wind farm; (iii) contractual title to the land, or; (iv) in relation

to the "turn key" projects, a commitment signed with a wind farm developer. The Company believes that there is a 20% possibility of success for the projects included in this category.

## A.2) Wind energy

### A.2.1) Installed capacity

The Company conducts its business principally in the wind energy segment, having available 7,000 MW installed on 30 September 2007, representative of 95.3% of its installed total. In pro forma terms, the business segment of wind power represents 81.3% of the Company's gross margin and 92.5% of EBITDA for the nine-month period ended 30 September 2007, respectively, and 78.7% of the gross margin and 87.1% of EBITDA for the Company in the financial year closing 31 December 2006. The following table shows the wind power installed in the Company on 30 September 2007, in pro forma terms, broken down into geographical areas.

Installed wind power	30 September 2007	
	Installed wind power (MW)	% of the total installed wind power
Total Wind (1)	7,000	100%
Spain	4,035	57.6%
United States	2,046	29.2%
United Kingdom	372	5.3%
Rest of the World	547	7.8%

(1) Includes 606 MW owner of a third acquired via PPAs.

Also, at the same date, IBERDROLA RENOVABLES was the owner of approximately 6,506 aerogenerators in 216 wind farms, also managing the energy of another 624 aerogenerators owned by a third party.

Shown below is the history of installed wind capacity, annual production of wind energy and the compound annual growth rate ("CAGR") of IBERDROLA RENOVABLES, as well as the United States and British companies that have been added to the IBERDROLA RENOVABLES consolidation by virtue of the Restructuring Transaction, all prior to occurrence of that Transaction.

### *IBERDROLA RENOVABLES*

	31/12/2006	31/12/2005	31/12/2004	CAGR 2004 - 2006 (%)
Installed capacity (MW)	4,102	3,494	2,891	19.1%
Wind output (GWh)	7,329	6,471	4,846	23.0%

*United States companies added to the IBERDROLA RENOVABLES consolidated group by virtue of the Restructuring Transaction*

	31/03/2007	31/03/2006	31/03/2005	CAGR 2005 - 2007 (%)
Installed capacity (MW) (1)	1,666	1,404	830	41.7%
Wind output (GWh)	4,251	2,723	2,084	42.8%

(1) Includes 606 MW owned by a third party.

*British companies added to the IBERDROLA RENOVABLES consolidated group by virtue of the Restructuring Transaction*

	31/03/2007	31/03/2006	31/03/2005	CAGR 2005 - 2007 (%)
Installed capacity (MW)	345	271	158	47.8%
Wind output (GWh)	855	587	440	39.4%

In addition, the following table shows the wind project portfolio of the Company at 30 September 2007, including the portfolio of the companies added to the IBERDROLA RENOVABLES consolidation by virtue of the Restructuring Transaction, based on the geographical area and the portfolio segment.

(*)	30/09/2007				
	Total	Under construction	Practically certain (1) (2)	Probable (3)	Potential (4)
<i>(in MW)</i>					
Spain	5,792	405	656	1,454	3,681
United States	21,222	326	992	7,862	12,368
United Kingdom	6,080	359	563	823	4,694
Rest of the World	7,245	233	620	1,799	4,827

Total	40,338	1,323	2,830	11,938	25,570
-------	--------	-------	-------	--------	--------

(\*) includes 332 MW from the off-shore wind project portfolio (208 MW in Great Britain and 124 MW in the Rest of the World).

- (1) Projects under construction are classified as “practically certain”.
- (2) Approximately 95% probability that the project will be successfully concluded.
- (3) Between approximately 40% and 50% probability that the project will be successfully concluded.
- (4) Approximately 20% probability that the project will be successfully concluded.

### A.2.2) Spain

At the close of the nine months ended 30 September 2007 the Company had installed wind capacity in Spain of 4,035 MW, based on pro-forma information, generating wind output in the same period of 5,357 GWh.

The Company's operations in Spain in the wind energy segment accounted for 51.2% of its gross margin and 60.8% of its EBITDA for the nine-month period ended 30 September 2007 and 53.7% of its gross income and 61.4% of its EBITDA for the year ended 31 December 2006 (in both cases based on pro-forma information). On 30 September of this period, the Company's portfolio of wind projects in Spain totalled 5,792 MW.

The table below shows growth in real installed wind capacity, annual wind output and the CAGR in Spain, along with pro-forma installed wind capacity and pro-forma wind output for the nine months ended 30 September 2007.

Spain	31/12/2006	31/12/2005	31/12/2004	CAGR 2004 - 2006 (%)	Pro-forma 30/09/2007
Installed capacity (MW)	3,662	3,258	2,891	12.5	4,035
Wind output (GWh)	6,624	6,240	4,846	16.9	5,357

Also shown below is the distribution of the Company's installed capacity by autonomous region at 30 September 2007:

Autonomous Community	Installed capacity (MW)
Andalucía	306
Aragón	261
Castilla y León	804

Autonomous Community	Installed capacity (MW)
Castilla - La Mancha	1,717
Galicia	593
Murcia	68
Basque Country	72
La Rioja	213
Total	4,035

In addition, at 30 September 2007 IBERDROLA RENOVABLES had a wind project portfolio in Spain comprised of 5,792 MW (including off-shore wind energy project), of which 656 MW (11.3%) were classified as practically certain, 1,454 MW (25.1%) as probable and 3,681 MW (63.6%) as potential. Of those classified as practically certain there are 405 MW (61.7%) under construction. The wind project portfolio in Spain accounts for 14.4% of the total pro-forma wind project portfolio.

#### **A.2.3) United States of America**

At the close of the nine months ended 30 September 2007 the Company had installed wind capacity in the United States of 2,046 MW, based on pro-forma information, generating wind output in the same period of 2,588 GWh.

Almost all the transactions that the Company makes in the United States are carried out through the US subsidiaries that were consolidated within the IBERDROLA RENOVABLES Group by virtue of the Restructuring Transaction. Accordingly, unless expressly indicated otherwise, in this section the figures for real installed wind capacity relate to these companies. Prior to the Restructuring Transaction, the Company had real installed wind capacity of 54 MW at the close of 30 September 2007. As a result of the Restructuring Transaction, the Company acquired 1,992 MW installed wind capacity from the aforesaid companies.

The Company's operations in the United States in the wind energy segment accounted for 14.7% of its gross margin and 14.4% of its EBITDA for the nine-month period ended 30 September 2007 and for 12.1% of its gross income and 12.0% gross income and 11.6% of its EBITDA for the year ended 31 December 2006, (in both cases based on pro-forma information. At the close of this latter period, the Company's wind project portfolio in the United States corresponded to 21,222 MW.

The table below shows growth in real installed wind capacity, annual wind output and the CAGR of the US subsidiaries consolidated within the IBERDROLA RENOVABLES Group by virtue of the Restructuring

Transaction, along with pro-forma installed wind capacity and pro-forma wind output for the nine months ended 30 September 2007.

United States	31/03/2007 (1)	31/03/2006 (1)	31/03/2005 (1)	CAGR 2005 - 2007 (%) (1)	Pro-forma 30/09/2007
Installed capacity (MW)	1,666 (3) (4)	1,404 (3)	830 (3)	41.7%(3)	2,046 (2)
Wind output (GWh)	4,251	2,723	2,084	42.8	2,588 (3)

- (1) Real installed wind capacity and output corresponding to the United States companies included in the IBERDROLA RENOVABLES consolidated group by virtue of the Restructuring Transaction. Not included, therefore, are the figures for installed capacity in the United States that does not correspond to these companies (that is, the Locust Ridge and Top of Iowa II wind farms). Historically, the United States companies recently added to the IBERDROLA RENOVABLES consolidated group included in the calculation 100% of the installed wind capacity attributable to the subsidiaries that ScottishPower Holdings Inc. fully consolidated in its financial statements and the part of the installed capacity of companies with variable interests and joint ventures that it does not control and are carried by the equity method.
- (2) Pro-forma installed wind capacity and output data corresponding to the United States. The data therefore include information corresponding to the United States companies included in the IBERDROLA RENOVABLES consolidated group by virtue of the Restructuring Transaction and data for the Company's facilities before the aforesaid Transaction in the United States, that is, the wind farms of: (i) Locust Ridge (26MW installed wind capacity) and (ii) Top of Iowa II (28 MW installed wind capacity). In the pro-forma financial states IBERDROLA RENEWABLES has modified the accounting criteria of the shares of ScottishPower Holdings Inc. in joint ventures and participating companies, going on to incorporate the method of proportional integration; a criteria which foresees maintaining the annual accounts and future financial conditions.
- (3) Includes 606 MW owned by a third party.
- (4) Excludes 26 MW of the Locust Ridge wind park.

IBERDROLA RENOVABLES operates wind farms in [ten] states in the United States, including Colorado, California, Iowa, Minnesota, Oregon, Kansas, New York, Washington, Wyoming and Pennsylvania. In the following table the Company's operating wind farms at 30 September 2007 are described.

Company (*)	Investment structure	Localization	Consolidat ed installed Capacity (MW)	Purchaser of energy	Years for PPA expiry
Klondike I Wind Power LLC	Aeolus I	Oregón	24	Bonneville Power Administratio n	14 and a half years
Phoenix Wind Power LLC	N/A	California	2	Venta completa de la	11 years

FPL Energy Inc.	N/A	Washington, California Wyoming	606 (7)	Varios	19-21 years
<b>Total</b>			<b>2,046</b>		

- (\*) Subsidiaries of IBERDROLA RENOVABLES, except in the case of FPL Energy Inc.
- (1) Pacific Gas & Electric (PG&E): 50% (75 MW), Modesto Irrigation District (MID): 33% (50 MW), and City of Palo Alto: 16.75% (25 MW).
  - (2) Flat Rock I Windpower was constructed in two phases. The first of them came into service in January 2006 and the second in 2006. Flat Rock I and Flat Rock II operate under the names "Maple Ridge I" and "Maple Ridge II". Each company is the owner of 50% of Horizon Wind Energy LLC. PPM's interests in Flat Rock I and Flat Rock II, other than the 0.5% of Flat Rock I that is owned by a PPM subsidiary, are included in the Aeolus II and Aeolus III operations, respectively.
  - (3) 100% is owned by Colorado Wind Ventures LLC. A 100% subsidiary of PPM holds a 50% interest in Colorado Wind Ventures LLC, with Shell Wind Energy holding the remaining interest.
  - (4) The 26 MW of Locust Ridge were installed at the end of 2006 and the wind farm became commercially operational in February 2007.
  - (5) Top of Iowa II is currently under construction but is expected to have installed capacity of 80 MW. In any case, the 28 MW mentioned in the table were already in place as of 30 September 2007.
  - (6) MinnDakota is under construction and installation of a 150 MW capacity is foreseen. However, as of 30 September 2007, there a capacity of 30 MW had been installed.
  - (7) 606 MW belong to FPL Energy, Inc. The Company signed three long term energy contracts with FPL Energy, Inc. Purchasing the energy from three wind farms with a total installed

potential of 606 MW, as is described below in the present section (“Long term contract with FPL”).

A description of the structures used in the Company’s U.S. wind farms, as mentioned in the table above, is provided below.

### **Structures used in the operation of the U.S. wind farms**

For the majority of the wind farms that the Company owns in the United States, the structure that has been used is one whereby an investor becomes a shareholder in the company that operates the farm.

These structures came about mainly as a result of the sale of PacifiCorp, a former subsidiary of ScottishPower Holdings Inc., in March 2006.

Following said sale, the Company, as with majority of companies in the wind energy sector in the United States, does not have sufficient profits which are subject to tax in order to take advantage of the available tax benefits (mainly PTCs and MACRS, as are defined below).

The Company’s relationship with the investors is expressed via a management contract of a limited liability company which receives the cash flows generated by the wind farms. Percentages of said cash flow, as well as the tax benefits, are ascribed to the investors. The investors are large financial institutions which in relation to their funds have relatively low costs and significant profits, which allow them to take advantage of the tax incentives generated by the wind farms.

The company has developed five structures for investors’ investment (Aeolus I, II, III and IV and Locust Ridge). In all of these structures, the Company is the owner of a class of shares and maintains control and day to day management of the wind farms, subject to the approval by the investors of the main decisions. The main decisions which require the consent of the investors include investments above determined levels, amendment of the main contracts, competition statements, and the sale of projects. The investors do not receive a guarantee against the assets of the wind power park nor against the Company for sponsoring the project.

There are two types of structures within the aforementioned investment structures: “PAY-Go” and “PAPS”, the principle characteristics of which are described below in the present section.

#### *Aeolus I, II and III structures*

The company has signed three investment structures Pay-As-You-Go (“PAY-Go”, the Aeolus I, II and III structures, which were closed on 1 May 2006, 1 November 2006 and 1 February 2007 respectively. The structures affected certain of the company’s wind power park operations and other wind farms which were being put into operation on the date on which each of these operations were put into effect, amounting to 140 MW for Aeolus I, 516 MW for Aeolus II and 320 MW for Aeolus III, that is, 976 MW in total.

The operation of these structures began with an initial payment by the investors, which received class B shares representing the share capital of three independent limited liability companies, owners of certain wind farms. In the same manner, the investors issued promissory notes, (both fixed as well as connected to production) which they granted to the company as guarantee to the three-monthly payments for a ten-year period. The amount of the promissory note is the equivalent of a percentage of the Production Tax Credits ("PTCs") generated by each wind power park. The amount of the promissory note was established when the company was constituted in relation to the production of estimated electricity for the wind farms in the company portfolio. The amount of the promissory note linked to production is up-dated every three months in relation to the generation of energy.

In each management contract signed by the investors the "rate of expected internal profit" is established for the investor. This is based on the total profit that it is predicted that said investor shall obtain during a ten-year period derived from the operative cash flows of the project, the accelerated tax depreciation and the PTCs. The date on which this expected profit is obtained is that on which the operative cash flow and the distribution of the percentages of profit usually vary, in accordance with the table which is included below (the "Return Date"). The objective of the structure is that the Return Date transpires just after the date on which the PTC period for each of the project portfolios of the Aeolus structures ends.

The initial payment is an amount which, along with the expected payments derived from the promissory notes, allow the investor to obtain the internal rate of the expected profit at a time near to the end of the PTC period; using for this projection models of the expected results of the operation for the wind farms on the closure date.

Once the institutional investor has received its expected internal rate, they maintain a minority share in the company for as long as it is constituted.

For the twelve months following the Return Date, the Company has a purchase option on the residual interest of the investor at the market price.

Likewise, in relation to each of the Aeolus structures, the Company maintains 100% of the class A shares in each of the companies and the day to day management of each of the holding companies and the assets of the wind farms.

Meanwhile, the companies that own the wind farms have subscribed to a series of contracts with companies in the PPM Energy Inc. Group. The objective of these is the provision of management, operation, maintenance and other services.

The following table shows, as an example, an illustrative model of the operative cash flows and the distribution of tax credits related to the PAY-Go structures:

PAY-Go		
Operative cash flow	Tax Credits for PTCs(1)	Tax Credits for MACRS(1)

	Iberdrola Renewables	Investor	Iberdrola Renewables	Investor	Iberdrola Renewables	Investor
Years 1-10	20-27%	73-80%	10%	90%	6-29%	71-94%
Years 11-20	90-95%	5-10%	N/A	N/A	N/A	N/A

(1) PTCs are only generated in the first ten years of the commercial operations. The MACRS depreciation is generally terminated five years after the commercial operation.

*Aeolus IV and Locust Ridge Structures*

The company has signed two operations Pre-tax, After-tax, Partnership Structures (“PAPS”) in relation to the wind power park Locust Ridge in Pennsylvania, which was installed at the end of 2006 and began working in February 2007, and the Aeolus IV structure, which closed on 16 October 2007 (454 MW which began working after 30 September).

In each case, the Company sold the investors a class of shares of a limited liability company. In relation to Locust Ridge, this is the owner of the wind power park of the same name with an installed capacity of 26 MW. Aeolus IV is the owner of Klondike III park with an installed capacity of 219 MW, (the maximum capacity of which is predicted to increase to 224MW). Likewise, it is planned that the wind farms Top of Iowa II (the installed capacity of which is predicted to be 80 MW) and MinnDakota (150 MW) shall go to Aeolus IV, this being subject to certain suspensive conditions.

The investors acquire these shares in exchange for an initial cash payment, which is equivalent to the foreseen amount which shall allow the investor to attain the “internal rate of the expected profit” at the end of the PTC period. This is in relation to the expected profit that said investor shall receive for ten years from the operative cash flows, the depreciation derived from the Modified Accelerated Cost Recovery System (“MACRS”) and the PTCs.

Contrary to the PAY-Go structure, the total amount of the operative cash flows derived from the sale of energy shall be assigned to the Company until it recovers its investment, which is the equivalent of the result in the balance after deducting the initial payment by the investors. It is foreseen that this “cash return” shall take place approximately two years after the closing date. Following this milestone, all of the operative cash flows shall be assigned to the investors until they receive their internal rate of expected profit (the “**Date of PAPS return**”).

All of the accumulated tax benefits prior to the PAPS Return Date derived from MACRS and PTCs shall be attributed to the investors. Once the investor has received its internal expected profit rate, they shall maintain a minority share in the company.

The Company is the titleholder of a class of shares of a limited company and manages the day to day of the assets of the wind farms.

The following table shows, as an example, an illustrative model of the operative cash flows and the distribution of tax credits related to the PAPS structures:

	PAPS					
	Operative Cash Flow		Tax Credits for PTCs(1)		Tax Credits for MACRS(1)	
	Iberdrola Renewable s	Investor	Iberdrola Renewables	Investor	Iberdrola Renovables	Investor
Years 1-2	100%	0%	0%	100%	0%	100%

(1) PTC's are only generated during the first ten years of the commercial operations. The depreciation of MACRS is generally terminated five years after the commercial operation.

### ***Long term agreement with FPL***

FPL Energy, Inc. (“FPL”) is the owner of the following wind farms: Stateline, with installed capacity of 300 MW, Highwinds, with installed capacity of 162 MW, and Pleasant Valley, with installed capacity of 144 MW, located in the States of Washington, California and Wyoming, respectively. The subsidiary of IBERDROLA RENOVABLES, PPM, buys all the electricity produced by the 606 MW installed capacity of the three wind farms owned by FPL under a series of long-term Power Purchase Agreements (“PPAs”) for a period of 25 years that were signed in 2002 and 2003. The PPA for the Stateline wind farm still has 19 years to run, while the PPAs for the Highwinds and Pleasant Valley wind farms have 21 years to run. PPM sells the electricity purchased from FPL to various electricity companies in Washington, California, Oregon and Utah, along with the capacity rights and environmental charges, by virtue of long-term power purchase agreements with terms of between eight and 20 years. These contracts are substantially in accordance with the production of the 606 MW of the installed power of the three wind farms. In the event of PPM’s obligations exceeding this output, PPM acquires energy in the open market.

### ***Service contracts with guaranteed supply of energy***

PPM has entered into a series of contracts with energy suppliers which take into account the guarantee of energy quantities to be supplied, on behalf of contract holding companies owning wind farms which are subsidiaries of PPM (such as Klondike II) and of the Aeolus transactions (such as Klondike III). PPM is committed to the delivery of a pre-established quantity of energy to the buyer between the agreed dates, in such manner that in spite of production fluctuations arising from meteorological changes and other factors, corrects these differences in the marketplace with the aim of supplying a predictable quantity of energy to the buyer. The length of these contracts corresponds to the usual length of corresponding energy purchase contracts.

PPM fulfils the obligations assumed by virtue of these contracts via the purchase of energy in the market. For this reason, PPM’s results are judged in gross margin terms.

### ***Project Portfolio***

As regards the project portfolio, at 30 September 2007 IBERDROLA RENOVABLES had a wind project portfolio in the United States comprised of 21,222 MW, of which 992 MW (4.7%) were classified as practically certain, 7,862 MW (37%) as probable and 12,368 (58.3%) as potential. Of those classified as practically certain there are 326 MW (32.9%) under construction. The wind project portfolio in the United States accounts for approximately 52.6% of the total wind project portfolio at 30 September 2007.

#### ***A.2.4) United Kingdom***

All transactions that the Company makes in the United Kingdom are carried out through the UK subsidiaries that were consolidated within the IBERDROLA RENOVABLES Group by virtue of the Restructuring Transaction. Accordingly,

unless expressly indicated otherwise, in this section the figures for real installed wind capacity relate to these companies. Prior to the Restructuring Transaction, the Company only had projects under development in the United Kingdom. As a result of the Restructuring Transaction, the Company acquired 372 MW installed wind capacity from the aforesaid companies.

The Company's operations in the United Kingdom in the wind energy segment accounted for 8.3% of its gross margin and 9.0% of its EBITDA for the nine-month period ended 30 September 2007 and for 8.2% of its gross margin and 8.9% of its EBITDA for the year ended 31 December 2006 (in both cases based on pro-forma information). As at 30 September, 2007, the Company's wind project portfolio in the United Kingdom corresponded to 6,080 MW (including 208 MW of off-shore wind power).

At the close of the nine months ended 30 September 2007 the Company had installed wind capacity in the United Kingdom of 372 MW, based on pro-forma information, generating wind output in the same period of 608 GWh.

The table below shows growth in real installed wind capacity, annual wind output and the CAGR of the UK subsidiaries consolidated within the IBERDROLA RENOVABLES Group by virtue of the Restructuring Transaction, along with pro-forma installed wind capacity and pro-forma wind output for the nine months ended 30 September 2007.

United Kingdom	31/03/2007	31/03/2006	31/03/2005	CAGR 2005 - 2007 (%)	Pro-forma 30/09/2007
Installed capacity (MW)	345	271	158	47.8%	372
Wind output (GWh)	855	587	440	39.4%	608

The Company owns and operates wind farms in England, Wales, Scotland, Ireland and Northern Ireland. It is also developing offshore wind energy projects, based on the modifications the British government is proposing in the Renewable Obligation.

In addition, at 30 September 2007 IBERDROLA RENOVABLES had a wind project portfolio in the United Kingdom comprised of 6,080 MW, of which 563 MW (9.3%) were classified as practically certain, 823 MW (13.5%) as probable and 4,694 (77.2%) as potential. Of those classified as practically certain there are 359 MW (63.8%) under construction. The wind project portfolio in the United Kingdom accounts for approximately 15.1% of the total wind project portfolio at 30 September 2007.

#### **A.2.5) Rest of the World**

In addition to its activities in Spain, the United States and United Kingdom, the Company is currently present in a further 16 countries, including most prominently Greece, France and Poland, where the Company is operationally active. The Company also has operational capacity in Germany, Portugal and Brazil, and local *offices* or projects under development in Bulgaria, Canada, China, Cyprus, Estonia, Guatemala, Hungary, Italy, Morocco and Mexico. In

addition, the Company is looking into the possibility of moving into other countries. At the current time, the Company is present in nine of the ten top rated countries in terms of renewable energy in the *Ernst & Young Renewable Energy Country Attractiveness Indices*.

With regards to the wind business in the rest of the world, the focus of the Company's strategy *is* to increase installed capacity in countries where there is considerable pressure to expand and the regulatory framework is favourable to the generation of electricity from renewable energy sources.

As at 30 September 2007 the Company had 547 MW of wind power installed pro-forma in the Rest of the World, which accounted for 7.8% of the total wind power installed pro forma. As indicated above, the presence of the Company in the Rest of the World is concentrated chiefly in Greece, France and Poland, with installed wind power in each of these countries of 214 MW, 86 MW and 89 MW, respectively, at 30 September 2007 (which on an overall basis accounts for approximately 71.1% of the Company's installed wind capacity in the Rest of the World).

The Company's production of wind energy amounted to 733 GWh in the Rest of the World during the nine-month period ended 30 September 2007.

The Company's operation in the Rest of the World in terms of wind energy, in the period of nine months ended on 30 September 2007 accounted for 7.0% of gross margin and 8.3% of EBITDA, and 4.8% of gross margin and 5.2% of EBITDA in the year ended 31 December 2006 (in both cases based on pro-forma information)

The table below shows growth in real installed wind capacity and the CAGR for the Rest of the World, along with pro-forma installed wind capacity for the nine months ended 30 September 2007.

Rest of the World	31/12/2006	31/12/2005	31/12/2004	CAGR 2005 - 2006 (%)	Pro-forma 30/09/2007	
Installed capacity (MW)	414	236	0	75.4%	547	

In addition, at 30 September 2007 IBERDROLA RENOVABLES had a wind project portfolio in the Rest of the World comprised of 7,245 MW, of which 620 (8.6%) were classified as practically certain, 1,799 (24.8%) as probable and 4,827 (66.6%) as potential. Of those classified as practically certain there are 233 MW (37.6%) under construction. The wind project portfolio in the Rest of the World accounts for approximately 18% of the total wind project portfolio at 30 September 2007.

In Greece, France and Poland, at 30 September 2007 the Company had wind projects under construction of 47 MW, 75 MW and 39 MW in each country respectively.

#### **A.2.6) Suppliers**

The aerogenerators are the most important technical components of a wind farm. Their cost represents approximately 70% to 80% of the investment cost of a

given farm. As indicated in section 6.2 of this Registration Document, the number of aerogenerator suppliers is limited, and worldwide demand for these components exceeds the suppliers' production capacity.

The strategy of the Company to assure the availability of the necessary aerogenerators is based on entering into master agreements and significant relationships with the principal suppliers. At 30 September 2007 Gamesa had supplied the Company with aerogenerators with total capacity of 3,718 MW, equivalent to 58.1% of the Company's pro-forma installed renewable capacity, based on pro-forma information, excluding 606 MW owned by a third party. The Company's other three major suppliers were GE Energy, Siemens and Vestas-American Wind Technology, Inc., which between them supplied the Company with aerogenerators with total capacity of 1,630 MW (25.5%), 473 MW (7.4%) and 389 MW (6.1%), respectively, of renewable installed capacity, based on pro-forma information, excluding the 606 MW owned by a third party.

For the future development of the business, by virtue of a framework agreement signed in October 2006, which is described in section 19 of this Registration Document below, the Company's principal supplier, Gamesa, has undertaken to sell the Company aerogenerators with total capacity of 2,700 MW by 2009, although the term may be extended to 2011.

In addition, the Company has increased its number of suppliers, having entered into framework contracts with Suzlon Energy, which has undertaken to sell the Company aerogenerators with total capacity of 700 MW, Mitsubishi Power Systems, Inc., which has undertaken to sell the Company aerogenerators with total capacity of 405 MW, and GE Wind, which has undertaken to sell the Company aerogenerators with total capacity of 225 MW in 2008 and 2009. In addition, the Company has entered into commitments for specific projects which also include other manufacturers such as Siemens, Fuhrländer, Ecotècnia, Repower, Vestas, Nordex and Acciona, for a total 270 MW.

Siemens has undertaken to sell the Company aerogenerators with total capacity of 322 MW for a project in the UK (Whitelee Wind Farm).

The Company tends to contract for aerogenerators for multiple projects at the same time. Its goal is to minimise dependence on a single supplier to cover its needs for these components.

By virtue of the contracts executed, almost two thirds of the Company's development plan up to 2010 are covered by the aforementioned aerogenerator supply agreements.

In general, the contracts the Company enters into with its aerogenerator suppliers cover production, transport, assembly and start-up. Sometimes the contract with the supplier also covers maintenance during the warranty period, which generally has a term of two years unless agreed otherwise with the supplier.

Other significant suppliers are construction companies that are hired during promotion and construction phases to undertake the civil works and electrical installation of wind farms, as well as all necessary infrastructures.

### **A.3) Off-shore wind energy**

The Company maintains a team of professionals charged with the development of offshore wind farms and at 30 September 2007, the Company had a project portfolio of 332 MW which included two offshore wind farms in the United Kingdom, with 208 MW installed capacity, and 124 MW in the Rest of the World.

### **A.4) Mini-hydro energy**

At 30 September 2007 the Company had installed mini-hydro power in Spain of 342 MW, representing 4.7% of the Company's installed renewable power on that date, based on pro-forma information.

As discussed in section 8.1 of this Registration Document all of the Company's mini-hydro plants are subject to the temporary governmental concession system. 93% of the governmental concessions corresponding to the IBERDROLA RENOVABLES Group facilities expire after 2021. Of these, more than 60% expire after 2060.

As discussed in section 5.1.4 of this Registration Document, the mini-hydro facilities in Spain are governed either by the ordinary system, or by the special system, based on the date they commenced operation. At 30 September 2007 39% of the Company's mini-hydro facilities, by installed capacity, were subject to the special system, while the remaining 61% were subject to the ordinary system. In compliance with with the rules of the National Energy Commission and due to obsolescence, a number of installations are being decommissioned. Once this process has been completed, the operating capacity will be 193 MW.

The table below shows the Company's mini-hydro installed capacity and project portfolio at 30 September 2007.

	30/09/2007				
	Installed capacity (MW)	Total project portfolio (MW)	Practically Certain (MW)	Probable (MW)	Potential (MW)
Spain	342 (1)	197	-	127	70
Rest of the world	-	88	-	-	88
<b>Total</b>	<b>342</b>	<b>285</b>	<b>-</b>	<b>127</b>	<b>158</b>

(1) Once obsolete installations have been decommissioned, the operating capacity will be 193 MW.

### **A.5) Other renewable technologies**

At 30 September 2007 the Company had a project portfolio of 643 MW in renewable technologies other than wind and mini-hydro. The Company has an

active presence in the photovoltaic solar energy business, and is developing various projects in other technologies such as thermal solar, offshore wind energy, biomass and wave energy.

In addition, there are other kinds of renewable energies for production of electricity, in very preliminary stages of technological development. The Company actively monitors these developments, both from the technological point of view and from the point of view of their financial viability, with the aim of maintaining an appropriate positioning ensuring the possibilities of long-term growth in all renewable energy sources. .

The following table shows the Company's installed capacity and project portfolio in other renewable technologies at 30 September 2007.

	30/09/2007		
	Installed capacity (MW)	MW under construction	Total project portfolio (MW) (1)
Thermal solar	-	50	603
Photovoltaic solar	0.3	-	11
Biomass	-	2	25
Waves	-	-	4
<b>Total</b>	<b>0.3</b>	<b>52</b>	<b>643</b>

(1) Includes MW under construction

#### **A.6) Administrative Permits**

To build an electricity-generating installation, the Company is required to obtain various administrative permits. The system of obtaining administrative permits varies according to the country in question, given that different countries can deny a permit for different reasons.

With regard to operating facilities, IBERDROLA RENOVABLES has obtained the necessary administrative permits for the operation of its facilities (permit for the facility, approval of project execution and operating permit; registration in the Producers Registry; inclusion in the special system, where applicable; environmental certification etc.).

With regard to municipal permits, in Spain, even though the name and type of compulsory permits vary in each autonomous region, the following are generally compulsory: (i) before works begin, construction and activity licence – whether classified or not -- and (ii) in order to ascertain that the completed works have been carried out in accordance with the terms of the permits and also allow for the proper functioning of the facility, the initial use permit and the opening licence.

Notwithstanding that the Company holds the requisite permits for most of its facilities, in certain situations the Company's facilities do not have all the necessary permits. Thus in relation with certain of the Company's facilities,

particularly in the case of the older mini-hydro plants, not all the documentation is held that certifies that certain facilities hold all the necessary municipal permits for the development of activity. Nevertheless, this situation only affects facilities located in Spain, and is quite common in this and other sectors, since priority is given to those permits expressly required by local authorities over those which, being necessary only from a legal point of view, are not necessarily required by the local authorities in question as an indispensable prerequisite for the development of the business.

These facilities fall into two categories:

- Facilities which hold a building permit and a business permit or, in the cases where it is compulsory, a classified business permit or its equivalent.
- In these cases, the permits awarded certify that the generator facility project is fully compatible with local by-laws. For the awarding of pending municipal permits, which definitively authorise its activation, all that is required is a check on the part of the town council that the project has been carried out in accordance with the terms established in the building permit and the business permit.
- As a result, and leaving aside the possibility that after the aforementioned municipal inspection, the Company might be required to undertake certain modifications in the facility – in order to bring the works undertaken in line with those that were planned and authorised – it is not reasonable to assume that these requirements will affect the regular working of the plant. Working facilities in this situation account for a total capacity of 1,538 MW in Spain. (1,531 MW from wind energy and 7 MW from mini-hydro plants in the special system).
- Facilities which do not have records of the awarding of building and/or business permits (classified, if applicable).
- In the case of lacking a building permit, the planning by-laws establish that it is not possible to open a case against planning infractions (which could lead to a requirement to demolish the works) once four years have passed (the period is longer in some autonomous regions) from the conclusion of works.<sup>6</sup> If this period has not transpired, the town council may require the builder to apply for the applicable permit within a period of two months; if the permit is not sought or is denied for contravention of the applicable planning by-laws, the town council will order the demolition of the works at the defendant's cost and proceed formally to block the uses to which it has been put.

---

<sup>6</sup> The acts of building or use of land carried out without a permit or execution order on lands classified for planning purposes as green or free space do not qualify for the period of four years after works have been completed; in this case it would be necessary to apply not only for the applicable building permit but also the planning category which would allow the use of this type of land for the construction of a renewable energy plant, in this way legalising the project.

In the cases of a lack of business permit (classified or not), the town council can demand the legalisation or, if it is not possible, order the cessation of the activity, irrespective of the time which has transpired since its commencement.

The lack of a building and/or business permit affects working facilities with a total capacity of 466 MW in Spain. In the case of wind farms, all hold building licences and only 260 MW (6.9% of the total wind farm capacity at 30 September 2007) would be affected by the lack of a business permit. In the case of mini-hydro plants, the breakdown is as follows: in mini-hydro plants in special systems, 41 MW do not have a business permit, of which 6.74 MW also lack a building permit; with regard to mini-hydro plants in ordinary systems, 165 MW do not have a business permit, of which 144 MW also lack a building permit. We have included in these figures the high number of mini-hydro plants in ordinary systems – almost all of them – which were built before Law 19/1975 on Land Reform came into force; according to the Supreme Court, works already completed without permits before the Law was passed cannot be demolished.

IBERDROLA RENOVABLES has begun a process of rectification of this situation, and has identified the permits that are necessary for each of its facilities. The obtaining of municipal permits is a regulated process and their concession is not merely at the discretion of local authorities but rather objective, and is conditioned by compliance with legally-required pre-requisites.

The cost of this process of rectification will likely be low, as long as the duties charged by local authorities for the issuing of the permits are not overly high (the Law of Local Tax state that taken as a whole this amount cannot exceed the real or expected cost of the service or activity it governs, or, failing this, the value of the service received). In those mini-hydro plants that require building permits (as we have indicated, all wind farms already hold them), the Tax on Construction, Facilities and Works can be collected, though it cannot exceed 4% of the cost of carrying out the works project.

Lack of the mandatory licences may imply suspension of the activities performed by the facility in question and, even, the obligation to demolish those facilities, in which case the Company must restore the site to its original condition.

#### **A.7) Sale of energy**

The Company's main source of income is the price it obtains as the result of the sale of energy generated in its renewable energy facilities.

It should be pointed out that the electricity produced yearly by the Company's renewable energy facilities is equivalent to the annual domestic consumption of 10.5 million people in Spain. This figure has been calculated by the company based on the following formula:

11,486 GWh (1) / 1,098 kWh (2)

- (1) Electrical energy produced by the Company with renewable energy according to the pro forma information corresponding to the year ended 31 December 2006.
- (2) The daily consumption of electricity per person. In order to determine the annual consumption of a domestic user in Spain (1,098 kWh / year), the Company has divided the average demand for energy by domestic consumers (according to figures published by the National Energy Commission in 2005, which are the latest published figures) by the average household size in Spain (according to 2001 figures from the National Institute of Statistics).

Furthermore, the Company's renewable energy facilities avoid the emission into the atmosphere of more than 4.5 million tons of carbon dioxide every year. This figure has been calculated by the company based on the following formula:

11,486 GWh (1) x CO<sub>2</sub> avoided per kWh produced (2)

- (1) Electrical energy produced by the Company with renewable energy according to the pro forma information corresponding to the year ended 31 December 2006.
- (2) Based on the energy mix in Spain (the contribution of each energy source to the global structure of electricity generation) the average emission per MWh is calculated (weighted according to the production volume of each technology). Based on the methodology described and the available sources, the energy mix in Spain emits an average of 407 tons of carbon dioxide per GWh.

The energy price and the identity of the buyers of energy generated by IBERDROLA RENOVABLES depends on the regulatory framework of the different countries where the Company operates.

#### **A.7.1) Spain**

##### **Special system**

The option of selling energy, whether rate-regulated or at market rates, is a decision which the special system producer needs to take, and which has to be maintained for a period of at least one year. The Company, from its strategy of revenue optimization, makes this choice based on future price expectations and the spreading of risk.

As stated in section 5.1.4 of this Registration Document, in Spain it is guaranteed that all electrical production is sold and accepted by the System. Royal Decree 661/2007 provides that all producers who have opted to sell at the regulated rate must make their offers of sale to the Market Operator (OMEL) and will receive the price resulting from the matching. For that purpose they will make their offers on the daily market, or the intra-daily market if applicable, in accordance with the current market rules.

When selling electricity on the market, IBERDROLA RENOVABLES acts through sales agents for the energy produced by the Company. The usual practice

is that for sales of electricity made by subsidiaries in which the Company has more than 50% of the shares, the sales agent is the company Iberdrola Generación S.A. (Unipersonal), a 100% fully-owned subsidiary of Iberdrola, S.A., whereas for energy sales made by subsidiaries in which the Company has a smaller interest, the usual practice is to contract external agents. In section IV.19.4 more detailed information is given about the relationship between Iberdrola Generación S.A. Unipersonal and the Company in its capacity as sales agent for the energy it produces itself.

After calculation of the amount resulting from the transaction, the companies are subject to settlement by the National Energy Commission, which will pay or demand payment of the difference between the price received and the regulated tariff (in the case of producers that have chosen to sell at the regulated tariff), or will pay the feed-in tariff to those producers that have chosen the market option (if applicable taking the cap and floor system into account).

#### Ordinary System

Within the Company's power generation assets there are mini-hydro plants governed by the ordinary system with an output of 211 MW which sell the electricity they produce in the market following the guidelines set out in section 5.1.4.2 above.

#### A.7.2) United States of America

In the United States, the Company sells most of the energy produced in its wind farms to suppliers via long-term power purchase agreements (PPAs), which have allowed it to minimise its exposure to the risks associated with changes in market conditions in the sector. The Company's principal customers in the USA are large electrical utilities, owned by large investors.

#### A.7.3) United Kingdom

In the United Kingdom, and before the Restructuring Transaction, the companies within the Scottish Power group currently integrated into IBERDROLA RENOVABLES could opt to receive ROCs (see section 5.1.4.2 of this Registration Document) or to sell ROCs to ScottishPower Energy Retail Ltd., subsidiary of Iberdrola, S.A. Henceforth, the Company will sell its energy through long-term power purchase agreements (PPAs), to ScottishPower Energy Retail Ltd as well as third parties, in both cases with discounts to the prevailing market rates.

#### A.8) Model for use of assets

IBERDROLA RENOVABLES in the use of assets uses the same model and general management philosophy as Iberdrola, S.A. has been applying in the operation of generation plants using other technologies, taking into account the

peculiarities of the technologies used for renewables. The ultimate aim of the Company's model for use of assets is to maximise revenue, efficiency and profitability.

The key factors of this operations model are: (i) the security of staff and facilities; (ii) respect for the environment; and (iii) economic efficiency of assets, maximising the availability of resources (electricity production and asset life), optimising the integration of renewable energy into the network and successfully managing fixed and variable costs.

Upon commissioning of a wind farm, mini-hydro plant or any other facility, the commercial operating phase begins, that is the phase during which investment is recovered and returns obtained through sale of the energy produced by the facility.

Therefore, during this period, which extends for the entire useful life of the facility, the business objective is to manage the asset as efficiently as possible, for the greatest period of time possible.

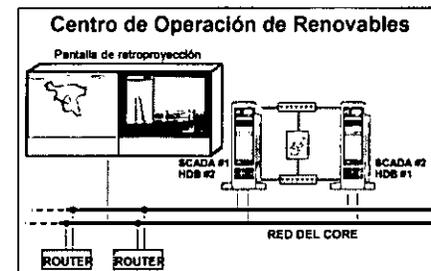

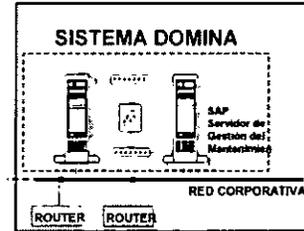

This model has contributed to maintaining a percentage of EBITDA over revenues which has remained stable at around 80% from 2004 to 2006.

The application of this model of use is based on the following key factors:

- Maximising the availability of resources, since the sources the Company uses to produce electricity (wind, water and the sun) cannot be stored or managed. In this regard, having appropriate equipment for the Company's farms (including aerogenerators) is a key factor affecting production.
- Maintaining and improving yield throughout the useful life, using maintenance optimisation. For that purpose, the Company has chosen to be aware of and appropriately manage the technology that is used, and the operating processes and maintenance specific to those technologies. This knowledge allows it to establish best practices in preventive maintenance, independent of the identity of the one performing the maintenance, to improve the reliability of the machines to minimise repairs or corrections, to control the evolution of production in order to detect decreases in yield, to manage useful life and to propose design improvements for future farms. Similarly, the Company decides which tasks to subcontract and which to undertake itself.
- To achieve the best integration of wind energy into the electricity system. The Company attempts to improve the integration of the flow of electricity generated by its facilities into the electricity system, in order to minimise the impact of the variability of electricity production from wind.

The organisation of renewable energy operations, which accounted for approximately 42% (634) of the Company's workforce at 30 September 2007, has been structured on three levels: the operating and maintenance team, the Iberdrola Renewables Operations Centre (REOC) and the technical services team. The graphical illustration below shows the structure of this organisation.

## La organización de Explotación

The operating and maintenance team is responsible for top-level supervision, exercising physical control and maintenance of the assets. There is detailed maintenance planning to minimise downtime, and therefore production. The assets are operated locally, and experience acquired during operations is collected. From analysis and systematisation of the experience obtained in an ongoing process, conclusions are obtained in order to improve and redesign, if applicable, the operations and maintenance processes, and specify the technical requirements for purchase of equipment and systems for future projects.

REOC is a pioneering centre in Spain that allows controlling and supervising IBERDROLA RENOVABLES assets not only in Spain, but also in the rest of the world, using remote 24 hour supervision, monitoring all assets in a centralised operation.

Finally, third level supervision is performed by the technical services team. It analyses results (evaluating energy not produced and other management indicators, proposing corrective measures), processes input from operating experience (identifying projects or modifications allowing improvement in efficiency, analysing significant incidents), performs overall control of production and invoicing (maximising the unit price and controlling proper functioning of the measurement equipment) and manages the operating systems (prediction, maintenance management, environmental management).

### *Support systems for the model for using assets*

The following describes internally developed systems of support for the running model

- *Renewable Energy Operations Centre (REOC)*

The REOC (Iberdrola's Renewable Energy Operations Centre) located in the town of Toledo, is a pioneering initiative in the sector, as much for the vanguard technology with which it is equipped, as for its operation and extent.

The REOC, set up in July 2003, is a real time remote controlled, management and maintenance centre for all renewable power generation installations created with the objective of optimising the technical management of installations and their financial output, improving the quality of the energy from renewables supplied to the grid.

The REOC is a 24 hour, 365 days of the year operation, to all wind farm installations and mini-hydroelectric plants of the Iberdrola Group as well as for other market instigators; these being certain companies collaborating with, but not managed by Molinos de La Rioja, S.A., Molinos del Cidacos, S.A. Desarrollo de Energías Renovables de La Rioja, S.A. and Eólicas de Euskadi, S.A., via the appropriate service contracts. In addition, the REOC lends its services to certain externally based power companies and infrastructure where IBERDROLA RENEWABLES acts as coordinator or takes responsibility for a junction in the grid where the plants of different instigators of the Spanish National Grid are evacuated, and it is paid for this service.

The purpose of this control centre is aimed at efficiency and anticipation to optimize the running of wind farms and other production centres of renewable energy sources. Each renewable energy plant is equipped with a system of control and local information that brings together the main variables for the running of machines, the corresponding power substations and facilitating maintenance tasks, remotely connecting to the renewable energy operations centre. The system receives all the information and presents it to the operators in an organised and simplified way in order that faults and electrical cuts can be detected quickly and an analysis can be carried out at long distance. From the diagnostics, the appropriate decisions will be taken for its solution. In this way, time lost in electrical cuts and faults will be reduced and the availability of the installations will be increased. Also predictions on production in order to plan the energy system and to communicate with any of the generation, distribution and/or transport offices, as well as with the System Operator in order to adequately coordinate activities.

On the one hand the REOC is the organisation responsible for negotiation with the Systems Operator Control Centre (SOCC). The SOCC is responsible for sending instructions on the operation of the production and transport system with the purpose of guaranteeing the security and quality of the electricity supply.

The REOC not only controls the wind farms of IBERDROLA RENEWABLES installed in Spain, but also those found in the rest of Europe, as well as in the United States and Brazil, and these are incorporated into centralised management

as and when they are set up, in many cases having to carry out adaptations of equipment in order to be able to send and receive communications, via a development process with manufacturers and suppliers.

On the other hand, in Spain wind energy is one of the furthest developed of the renewable energies and its management in the face of integration into the grid creates different problems, related fundamentally to variability and the capacity to predict the energy that will be produced in the hours and days to come. The REOC is a powerful tool for the minimising of these problems and to facilitate its integration into the National Grid. In fact, since October 2005, all wind power producers must have a control centre in place in order to attend, in real time, to orders that production control may send out, as established under regulatory requirements. This regulation is supported by the RD 661/2007, which establishes that non-fulfilment of this requisite is punishable by the loss of receipt of energy or of regulated tariff, depending on the case.

The wind farms in the United States operate from a centre located in Portland (Oregon). The command centre in the United States operates in a similar way as the REOC system, but with a distinct software platform.

- *DOMINA: Integrated management system for renewable energy generation installations*

DOMINA is an integrated management system, based on SAP, whose main objective is to proportion a complete solution to the management function of wind farms and mini-hydroelectric plants. It pursues the maximisation of efficiency of installations through the maximisation of reliability and the optimisation of preventative maintenance, as well as having a unique management program for all renewable energy installations.

The summary of operational data and its analysis through the DOMINA project facilitates the selection of the most reliable designs, the identification of weak points in the running of different equipment, the identification of the most probable causes of failure, the execution of the most appropriate tasks for preventative maintenance and the adoption of the appropriate maintenance logistics.

Currently the DOMINA project applies to all wind farms and mini-hydroelectric power plants of IBERDROLA RENEWABLES. The system is accessible from the installations and disposes of an interface with the REOC that allows it to obtain operational information.

- *METEOFLOW: Predictative system for energy production in wind farms*

The Company developed this system in response to the necessity to dispose of a production prediction in order to be able to participate in the *spot* energy market. This system is currently the one used to carry out the prediction of energy production in wind farms, as much for the market as for the regulated tariff, since this has been a requisite since January 1, 2006.

The basis of METEOFLOW is a system of short-term predictive modelisation of wind in the wind farms, a calculative model that relates the estimated wind with production and a model that implements a specific adjustment for each wind farm.

The Company attempts to integrate, in the most efficient manner possible, all of the assets acquired in the previously described support systems, taking into account the personal particularities of each specific case.

## **B) NON-RENEWABLE BUSINESS**

### **B.1) General Questions**

In the United States the company also develops business based on non-renewable sources of energy, like natural gas and thermal energy generation, that, according to pro-forma information, supposes a 15.5% and a 17.2% gross margin from the company for the nine month period closing 30 September, 2007 and 2006 respectively, and an 11.4% and 14.2% of the EBITDA for the same period. Prior to the Operation for Restructuring, the company did not develop these activities.

The following table shows the contribution of the company's gas and thermal energy business in total gross margins and the EBITDA of IBERDROLA RENEWABLES, according to financial information during 2006 and the nine-month period ending on 30<sup>th</sup> September 2007.

	Pro-forma for the 9 month period closing 30/09/2007				Pro-forma for the year closing 31/12/2006			
	Gross margin	% Gross margin	EBITDA	% EBITDA	Gross margin	% Gross margin	EBITDA	% EBITDA
<i>In millions of euros except for percentages</i>								
Gas	28.8	3.6%	13.7	2.4%	51.4	4.6%	33.2	4.0%
Buying and selling of Energy	43.6	5.5%	10.3	1.8%	78.8	7.0%	36.4	4.3%
Thermal energy generation	52.0	6.5%	40.8	7.2%	62.6	5.6%	50.0	5.9%
Total	124.4	15.6%	64.8	11.5%	192.8	17.2%	119.6	14.2%

### **B.2) Gas business**

Through the Enstor Operating Company, LLC and its company subsidiaries ("Enstor"), including ScottishPower Holding Inc and PPM, the company develops activities in natural gas consisting in the running and development of personal assets of storage, buying, selling, mediation of storage capacity, transport and the buying, selling and mediation (physical and financial) of natural gas in the United States of America.

#### **B.2.1) Gas Storage**

The activity of storing gas represented 3.6% of the gross margin and 2.4% of the EBITDA of the company for the nine-month period closing on 30th September,

2007 as well as 4.6% of the gross margin and 3.9% of the EBITDA of the company for 2006, according to the pro-forma information.

On 30th September, 2007 the company held 0.76 million cubic metres (“bcm”) of gas storage capacity in the United States. Enstor maintains a share in two operational installations of gas storage: (i) Enstor Katy Storage and Transportation, L.P. (or “Katy”), installation located in Katy, Texas and (2) Enstor Grama Ridge Storage and Transportation, LLC (or “Grama”), installation located in the east of New Mexico. Together Grama and Katy represent 0.76 bcm of operative gas storage.

Enstor is, as such, owner of two storage installations under development: (i) Enstor Waha Storage and Transportation, L.P. (or “Waha”), installation located in the West of Texas and (ii) Enstor Houston Hub and Storage Transportation, L.P. (or “Houston Hub”), located near Houston, Texas. Enstor also holds a series of projects in the early stages of development and is contemplating the potential acquisition of projects under development and of functioning installations.

Houston Hub is an installation under development in Texas with an initial expected capacity of 0.45 bcm, designed for a high capacity of supply and as a multi-cycle salt deposit that will service the growing demand for gas storage in the Gulf Coast of Texas. Enstor plans for Houston Hubs obtention of an authorisation for the supply to market tariffs. It is planned that the construction of the first phase of Houston Hub (0.23 bcm) will enter into production in 2009. After its completion it is planned that, assuming the current pressure ranges for the operation of gas pipelines, Houston Hub will be able to produce between 0.01 and 0.02 bcm daily.

Waha is an installation of 0.27 bcm under localised strategic development close to the largest centre for gas buying and selling in the west of Texas, with direct access to diverse gas pipelines. Waha will allow flexibility to clients in the management of daily, monthly and seasonal peaks and the need for balance with gas pipelines and operative volume demands.

The company estimates that Waha will be developed in two phases. It is planned that the first phase will conclude in 2009, with an approximated storage capacity of 0.13 bcm, and that the second phase end in 2010 with a similar storage capacity. After its completion it is planned that, assuming the status of current pressures for gas pipeline operations, Waha will be able to supply 0.02 bcm daily. Waha is subject to several legal cases in relation to some of its development activities.

Enstor is also holder of 100% of the capital of another eight limited companies that were created for the development or acquisition of gas storage installations.

The Enstor gas storage installations are connected to inter and intra-state gas pipeline networks tending to clients under short and long-term contracts. Katy and Grama are connected to both types of networks by virtue of authorisation from the FERC conformant to the American Natural Gas Policy Law. Under the present Registry Document, paragraph 5.1.4 explains these authorisations. In the case of Waha the exclusive connection to intra-state networks is anticipated (subject to

the supervision of the Texas Railroad Commission), while the Houston Hub alone will be within the interstate (subject to the supervision of the FERC, in agreement with the American Natural Gas Laws).

The income from gas storage activities consists in tariffs received by the company for the storage of gas belonging to a third party. Amongst Enstor's clients are included a diverse combination of natural gas products, financial entities, energy marketers, public supply companies, electricity generators and natural gas pipeline companies, that use the natural gas services lent for seasonal, cyclical or short term storage. During the financial year closing on 31 March, 2007, J. Aron & Company and Chevron Texaco Natural Gas, a division of Chevron U.S.A. Inc. accumulated 27% and 18%, respectively of income from Enstor over the aforesaid period. PPM assumed 14% of Enstor's income. No other client assumed a percentage higher than 10% of Enstor's income. If the operative installations are indeed situated in Texas and New Mexico, the Enstor installations lend services to clients transporting natural gas internally and externally to areas of the United States such as the North East, Middle East, Texas and the Gulf Coast.

A large part of the profitability of the storage activities owned by Enstor gas depends on the seasonal differences between the warmer and colder months, of different geographical areas and in the level of volatility of gas prices. In general, the more the volatility and the more there are differences between gas prices, the more demand there will be for gas storage services and the margins of this activity increase. The main reason is that clients normally tend to, in cases of increased price volatility, increase gas storage services in order to neutralise the supply of gas and protect themselves from the said volatility. For this reason, with lesser volatility and less differentials, less are the demands for storage services and less are the margins.

Likewise, Enstor offers storage services and lends gas also designed so that clients can manage their gas supplies.

The Enstor clients maintain ownership of the gas that Enstor stores in its installations on behalf of its clients. However, Enstor normally maintains a guarantee on the gas that it stores as a guarantee for payment of services lent. In this way, Enstor can employ the gas that it stores as a guarantee of the risk. In this way each client to which Enstor lends gas must proportion a guarantee to Enstor, whose form depends on the profile of the client risk. The Enstor risk department is independent from marketing and sales. The company considers that the previous outline minimises the credit risk for Enstor.

#### **B.2.2) Buying and selling of gas energy**

This activity consists in the buying, selling and mediation of the capacity for storage and transport and the buying, selling and mediation (physical and financial) of natural gas and energy in North America.

The activity of buying and selling of energy represents 5.4% of the gross margin and 1.8% of the EBITDA of the company for the nine month period from 30th September, 2007, as well as a 7% gross margin and 4.3% of the EBITDA of the company for 2006, according to pro-forma information.

The buying and selling activity of IBERDROLA RENEWABLES energy is developed integrally through its PPM subsidiary.

PPM uses a series of quantitative tools in order to make a follow up of its exposure to market risk resulting from business activities in the buying and selling of energy. The principal for these tools is known as “risk value” or “VaR”. The VaR is an indicator of the loss of potential value that can be caused by changes with the price of consumer goods, measured over 24 consecutive months at a confidence level of 99%.

The main part of the operations in the buying and selling of PPM gas refers to contracts that give the right to store natural gas in storage installations owned by third parties or of a subsidiary of Enstor and contracts for the buying and selling of energy and the gas pipeline capacity for the transport of natural gas. Currently, PPM hires out approximately 1.21 bcm of its contractual rights on gas storage in the United States. In the same way as with the activity of gas storage under ownership, the profitability of the buying and selling of gas depends on seasonal differentials between the warmer and colder months, the differentials between different geographical areas and the level of volatility in gas prices; the more the volatility, the more there are differences between gas prices and the more will be the increase in margins of this activity, while with less volatility and less differentials, less are the margins.

On the other hand, the activity of PPM brokerage in the capacity to transport assumes the contracting of rights to transport natural gas in the gas pipelines of third parties. In the United States, high natural gas production zones (Texas, Louisiana, New Mexico and New York) are geographically distant from the areas of high demand (California, Illinois, Michigan and New York). Thus, underground storage installations, as well as the excess of gas pipeline capacity are employed in order to maintain supply in order to cover peaks in demand in the different areas. The transport of natural gas in gas pipelines is subject to supervision by the FERC requiring the signature of tariff model gas pipeline contracts.

Lastly, PPM carries out energy buying and selling operations (natural gas and electricity) with diverse members of the market such as suppliers, producers and distributors. These types of operation are carried out normally in small quantities over a short term, at fixed or variable rates and are normally documented through model contracts for the buying and selling of energy, as in the National Association Energy Standards Board Agreement. This buying and selling can thus be structured as options for buying or selling. The activity of buying and selling energy exposes PPM to the risk of energy price volatility. PPM manages this exposure to risk through the signature of contracts covering energy prices implemented through ISDA model contracts.

### **B.3) Thermal generation**

The Company is active in the thermal generation business in the United States through the companies that were added to the IBERDROLA RENEWABLES Group by virtue of the Restructuring Transaction, and essentially through Klamath Energy LLC, a subsidiary of PPM. A traditional thermal plant is a facility that produces electricity by burning coal, fuel or gas. The fuel is placed in the plant furnace, where combustion takes place. The heat generated in the combustion process produces steam via a heat interchanger, and this steam drives the turbo-generator that produces electricity.

As of 30 September 2007, the United States companies that were added to the IBERDROLA RENOVABLES Group by virtue of the Restructuring Transaction have an installed thermal capacity of 537 MW, including 237 MW from a PPA.

As it does with wind energy, the Company sells the energy produced by its power stations through long-term Power Purchase Agreements (PPAs) that it holds with its clients.

The thermal generation business accounted for 6.5% of the Company's gross margin and 7.2% of its EBITDA for the nine-month period ended 30 September 2007, and 5.6% of its gross margin and 5.9% of EBITDA for the year ended 31 December 2006 (according to pro-forma financial information).

The subsidiaries engaged in this business segment are:

- (i) Klamath Energy LLC, owner of a 100 MW simple cycle power plant in Oregon; and
- (ii) West Valley Leasing Company LLC, which owns a 200 MW thermal plant in Utah. However, this plant has been leased to PacifiCorp, which, under the terms of the lease agreement, is responsible for operating the facility, in exchange for which West Valley receives a lease fee. Since this facility in Utah is not in a strategic location, the Company is planning to sell it.

In September 2007 the Company, through PPM, reached agreement with the city of Klamath Falls, in the state of Oregon, for the purchase of the Klamath cogeneration plant, with 506 MW of capacity, which markets the electricity it produces through long term power purchase agreements. PPM Energy had already handled by contract the commercial operation of the plant since it became operational in 2001. Also, by virtue of the 2001 contract PPM already purchased 237 MW of the capacity for supply to large customers in the Pacific Northwest and the State of California. The agreement to buy the Klamath power plant will mean the taking on of 237 MW of PPAs. The transaction is subject to the required permits.

**6.1.2 Indication of all significant new products and/or services that have been introduced, and the extent that the development of new products or services has been publicly disclosed; give the development stage.**

Not applicable.

**6.2 Principal Markets**

➤ **BACKGROUND**

Renewable energy technologies include, amongst others, wind energy, solar energy (thermoelectric and photovoltaic), mini-hydro energy, biomass, wave energy and tidal energy. In agreement with the report "World Energy Outlook 2007", produced by the International Energy Agency, the role of renewable energy in the global electricity generating business has grown notably in recent years, progressing from representing 1.4% of global electricity production in 1990 to 2.2% in 2005, growing at an annual average rate of 6% between 1990 and 2005, as opposed to the average annual growth

rate of the electricity generating business, which grew by an average rate of 2.9% a year during the same period.

The principal factors that have contributed to the growing demand for renewable energy are, amongst others:

- the growing concern of society for the environment and its appreciation of the benefits of using clean and sustainable energy, as shown by governmental support for renewable energy, evidenced by initiatives such as the Kyoto Protocol and, at European Union level, Directive 2001/77/EC of the European Parliament and of the Council of 27 September 2001, on the Promotion of Electricity Produced from Renewable Energy Sources in the Internal Electricity Market (the “**Renewables Directive**”);
- the need to decrease the energy dependence on third party countries and the geopolitical risks associated with such dependence in those countries that have a limited fossil fuel resource base;
- the need to decrease geopolitical tensions in those countries that have a high concentration of fossil fuel resources; and,
- the increasing cost and volatility of fossil fuel prices, driven by the recent increase in energy demand in countries with high growth rates, such as India and China.

➤ **WIND ENERGY**

• **WIND ENERGY AT THE GLOBAL LEVEL**

Wind energy is the renewable source that has experienced the greatest and most rapid development on a global level over recent years, due to its cost efficiency, the availability of resources and the maturity of wind technology compared to the status of technologies for other renewable energies. According to EER, installed wind capacity on a global level grew by 24.8% per annum from 2001 to 2006, so that cumulative installed capacity had increased to 74,037 installed wind MW globally at the close of the 2006 fiscal year. The 15,215 MW of installed additional total wind power in 2006 (which resulted in growth of 25.8%) constituted a record for the sector, which has been achieved despite the current lack of turbines. Some of the principal providers have increased their production capacity, which, in the judgment of EER, will allow greater growth in the future.

In accordance with its base case, EER expects wind power at the global level to increase 22.7% during the 2007 fiscal year up to reaching 90,808 MW. In this respect, it is expected that global wind power will grow at an annual average rate of 14.3% between 2007 y 2015, reaching 264,053 MW in 2015. Moreover, it is expected that global installed wind power will increase annually from approximately 17,000 MW during the 2007 fiscal year up to approximately 24,000 MW during the 2015 fiscal year.

The following table shows the forecasts of growth carried out by EER in relation to global and regional wind power for the period between 2007 and 2015:

	Cumulative Installed Capacity										CAGR <sup>(2)</sup>
	Present		Forecast <sup>(1)</sup>								Forecast
	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2007-2015
	(MW)										(%)
Europe	48,452	56,313	64,594	74,025	83,466	92,922	102,273	111,724	121,300	130,816	11.1
North America	13,106	17,552	22,998	28,407	33,627	38,966	44,667	50,447	56,552	62,957	17.3
Asia-Pacific	11,553	15,774	19,989	24,649	30,049	35,799	42,099	48,759	55,769	62,929	18.9

(1) Including offshore wind power.

(2) The CAGR, Compound Annual Growth Rate calculates the average rate of growth of an investment during a specific time period.

In 2006, 65.4% of global wind power capacity was installed in Europe. Nevertheless, according to EER, the global electricity generating business will continue to diversify geographically from Europe towards North America and the Asia-Pacific region in the coming years, regions that are expected to have the highest growth in the long term, followed by Europe.

### *Regional markets*

#### **Europe**

Europe is the primary geographical market in terms of installed capacity and it is expected that the region will experience greater growth in absolute terms, although it is anticipated that North America and Asia-Pacific will experience greater growth in relative terms. In 2006, Europe reached its highest level of growth, representing 49.4% of additional wind power installed globally in 2006 and reached a total installed capacity of 48,452 MW. Europe exceeded its own growth expectations, fundamentally due to the high levels of growth in Germany and Spain, which increased their installed capacity by 2,207 MW and 1,587 MW respectively during the said period, and the surge in other geographical areas that experienced significant growth during the same period, such as France and Portugal.

EER forecasts that total cumulative capacity in Europe will increase 16.2% during 2007, reaching 56,313 MW during this period.

Likewise, EER forecasts that installed capacity in Europe will grow at an annual average rate of 11.1% between 2007 and 2015, reaching 130,816 MW in 2015. According to EER, due to the rapid growth that will be experienced in other geographical markets, it is expected that Europe will represent 49.5% of global installed capacity in 2015, compared to 62% that is anticipated for 2007.

The following table shows the growth expectations for wind power in Europe from 2007 to 2015, according to EER:

	<u>Cumulative Installed Capacity</u>										<u>CAGR</u>
	<u>Current</u>	<u>Forecast<sup>(1)</sup></u>									<u>Forecast</u>
	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>2007-2015</u>

(1) Including offshore wind power

### North America

North America increased its installed wind power capacity by 3,238 MW during 2006, led by the USA, which added the record figure of 2,454 MW, that is, 16.1% of installed additional wind power at a global level in 2006, according to information provided by EER.

EER forecasts that the wind power capacity installed in North America will grow at a rate of 33.9% during 2007, reaching 17,552 MW in the said fiscal year. Likewise, EER forecasts that installed capacity in North America will grow at an annual average rate of 17.3% between 2007 and 2015, reaching 62,957 MW in 2015. According to EER, it is expected that North America will represent 23.8% of global installed capacity in 2015, in comparison with previous estimates, as opposed to 19.3% that is anticipated for 2007.

The following table contains the EER forecasts for wind power growth in North America from 2007 to 2015:

	Cumulative Installed Capacity										CAGR
	Current	Forecast <sup>(1)</sup>									Forecast
	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2007-2015
	(MW)										(%)
USA	11,612	5,211	19,260	22,885	26,535	30,594	34,918	39,268	43,943	48,918	15.7

(1) Including offshore wind power

### Asian Pacific

EER foresees that the wind power installed in the Asian Pacific area will grow at a 36.5% rate during 2007, reaching 15,774 MW in such exercise. THE EER also foresees that the power installed in the Asian Pacific area will grow at an average annual rate of 18.9% between 2007 and 2015, reaching 62,929 MW in 2015. According to EER, due to the continuous growth of the demand in China and the maintenance of the demand in India, it is expected that Asian Pacific represents a 23.8% of the world installed power in 2015, in comparison with previous estimations, opposite the 17.4% planned it represents in 2007. The following table contains the EER forecasts about the growth of the wind power in the Asian Pacific area from 2007 to 2015:

	Accumulated Installed Power										CAGR
	Current	Planned <sup>(1)</sup>									Foreseen
	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2007-2015
	(MW)										(%)
<b>Total Asian Pacific</b>	11,553	15,774	19,989	24,649	30,049	35,799	42,099	48,759	55,769	62,929	18,9

Source: THE EER Market Forecasts, Global Wind Energy Markets 2007-2015, Emerging Energy Research, March 2, 2007 (based upon the base case scenario) (except GAGR).

(1) Including off-shore wind power

### Comparison between the on-shore and the off-shore wind powers

The development of off-shore wind power projects has evolved more slowly than the development of the on-shore wind power projects due to the greater investment necessary and to the greater costs of performance and maintenance related to the off-shore wind power. However, the off-shore wind technology is still fully developing and, according to EER, the off-shore wind power should increase its growth in Europe from 2009 on, year when it's planned the construction and completion of some off-shore wind power projects on a large scale in Germany, Great Britain and Sweden.

Nowadays, in spite of its potential, there does not exist off-shore installed power in the United States of America. Its development will partially depend on the expansion of certain big projects that are currently being analysed.

The following table contains the EER forecasts about the off-shore wind power growth from 2007 to 2015:

	Total power installed										CAGR
	Real	Planned									
	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	
	(MW)										
Europe	904	1,139	1,409	2,514	3,564	4,644	5,744	7,144	8,744	10,444	31.9%
North America	-	-	-	-	140	374	908	1,308	1,908	2,508	N/A
Asian Pacific	-	-	25	25	25	25	125	275	575	1,025	N/A
Rest of the World	-	-	-	-	-	-	-	-	-	-	N/A
<b>Total</b>	<b>904</b>	<b>1,139</b>	<b>1,434</b>	<b>2,539</b>	<b>3,729</b>	<b>5,043</b>	<b>6,777</b>	<b>8,727</b>	<b>11,227</b>	<b>13,977</b>	<b>36.8%</b>

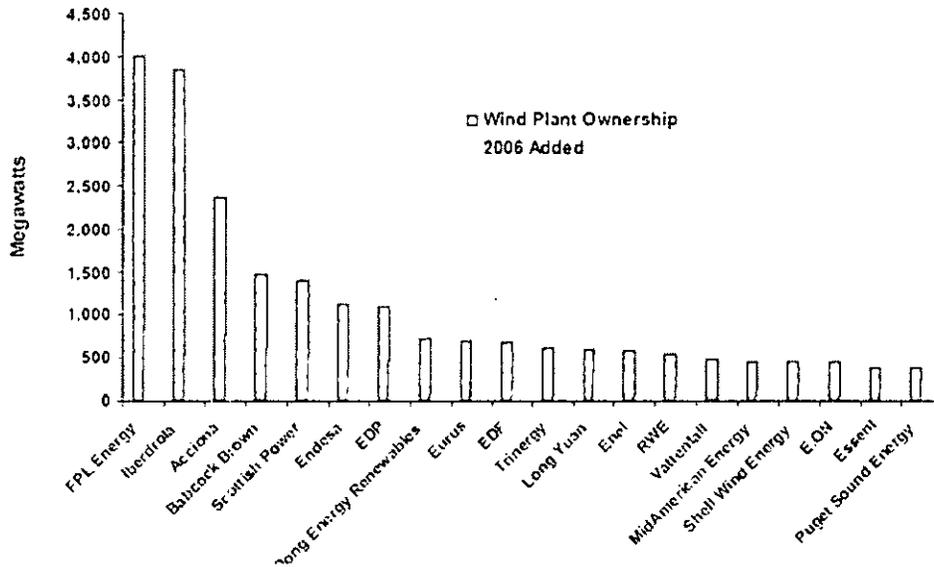

Source: : *US Wind Power Markets and Strategies, 2007-2015, Emerging Energy Research, June, 2007; European Wind Power Markets and Strategies, 2007-2015, Emerging Energy Research, June 2007 (except CAGR).*

According to EER, in 2015 the off-shore wind power should represent the 5.3% of the total installed wind power in the world, opposite the 1.3% that is planned it will represent at the end of 2007. However, in 2015, it's expected that the off-shore wind power will be distributed between Europe and North America, that will concentrate a 74.7% and a 17.9% of the total world offshore installed wind power, respectively.

#### *Main competitors and positioning of Iberdrola Renovables in the world wind power*

According to EER, before the Restructuring Operation, IBERDROLA RENOVABLES was the second major operator of world wind parks in terms of installed power, becoming the first world operator after the Restructuring Operation. In spite of the market's recent consolidation, the world wind business is scattered, with approximately 30.7% of the world total installed power controlled by the twenty major world operators, according to EER.. However, many of the big wind operators own practically the wholeness of their parks in one sole region, like Europe and North America. In this sense, the greater part of the North American competitors keep gathering in the United States, although several european competitors are entering the North American market.

The following graphic shows the installed wind capacity at the end of 2003 and the added power in 2006 of the major producers of renewable world energy before the Restructuring Operation:

Fuente: EERs, Global Wind Energy Advisory March 2007

## THE WIND POWER IN THE MOST IMPORTANT COUNTRIES AS TO THE ACTIVITY OF IBERDROLA RENOVABLES

### Spain

Spain closed 2006 holding the second position in the world ranking of installed wind power, with 11,615 MW in 2006, including an additional power of 1,587 MW installed in the mentioned exercise, according to the EER report of June 2007. EER mentions Spain as the most attractive country for the wind business development, mainly due to the stability of the regulatory incentives, the abundance of wind resources and the competitive environment. The wind business in Spain grew at an average annual rate of 32% between 2000 and 2006, according to the Wind Business Association. The current regulatory framework in Spain, that allows the wind park promoters to choose between selling the electricity at a fixed regulated rate or at market prices plus a bonus constitutes an essential factor for the growth of the wind business in Spain.

The Spanish government has promoted the growth of the wind power fixing the objective of 20,155 MW of accumulated installed wind power in 2010, as it is established in the Renewable Energies National Plan 2005-2010. This implies that the wind power will increase approximately a 73.5% in Spain in the next four years, with an annual average of 2,135 MW of new installed power. On the other hand, Spain's objective under the renewable energies guideline is to establish that in 2010 the 29.4% of the electricity produced in Spain must have been generated from renewable energy sources. This objective is being revised and could be modified to adapt it to the objectives of the future frame guideline as far as renewable energies are concerned, and that will establish the following common binding aim: the 20% of the total consumed energy in the European Union will come from renewable energy sources in 2020.

Recent research based on estimations provided by the Tourism, Industry and Commerce Ministry by means of the draft of the gas and electricity sectors planification sustainability Report 2007-2016, published on July 31 2007, (the “Planification Report”), of which term of public meeting expired on September 15 2007, estimate that Spain will have an installed wind power of 29,000 MW in 2016. According to EER, Spain will substitute Germany as the most rapidly growing country in Europe in 2008, in absolute terms, and will continue leading the growth of the wind sector in Europe until 2015. EER foresees that Spain increases its installed wind power between 2007 and 2015 at a faster rate than any other European country, with an average measure of 2,200 annual MW.

The following table shows the growth forecasts estimated by EER in the Spanish wind business between the years 2007 and 2015.

	Real					Planned					2007-2015
	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	
Wind power in Spain	MW										CAGR
Accumulated	11,614	13,414	15,464	17,764	20,119	22,419	24,669	26,869	29,019	31,069	11.1%

Source: *European Wind Power Markets and Strategies, 2007-2015, Emerging Energy Research, June, 2007 (except CAGR).*

*Main competitors and positioning of Iberdrola Renovables in the Spanish wind business.*

According to the data of the “Wind 2007” Yearbook Published by the Wind Business Association, on December 31 2006, IBERDROLA RENOVABLES was the greatest producer of wind power in Spain, with a 30.7% of the wind power generation business, in terms of installed power, followed by Acciona, with a 17.4% of the wind power generation business, and Neo Energía (Branch of Electricidade de Portugal) with an 8.43%.

**United States of America**

The wind industry in the United States experienced the greatest growth rates of world installed power during 2005 and 2006. The installed wind power in the United States of America increased in 2,454 MW in 2006, going from 9,158 MW of installed accumulated power in 2005 to 11,612 MW in 2006, making the United States the third major country in accumulated installed wind power, behind Germany and Spain. According to EER, more than fifteen States increased their installed power in 2006, with the greatest part of installed additional power in Texas (774 MW), Washington (428 MW) and New York (185 MW).

The PTC system, implemented by the federal government, constitutes a key factor in the wind business growth in the United States, granting tax benefits to the wind parks promoters on a basis of produced and sold energy for a period of 10 years. Also, the MACRS system allows the accelerated tax depreciation of certain wind parks assets. Additionally, in certain States, the wind parks promoters profit from

the regimes known as *Renewable Portfolio Standard*, that require the generation of certain electricity percentages from renewable energy sources (read, in this sense, section 5.4.1.2 of the present Record Document, about the regulatory framework concerning the production of electricity from renewable energy sources in the United States).

According to EER, the United States wind business has an important growth potential, due, among other factors, to the existence of vast pieces of land for the installation of wind machines, the abundance of wind and the definite political support to the renewable energies, including the potential extension of the PTC system until 2008. Additionally, on August 4 2007, the Chamber of Representatives of the United States approved a tax law Project which, in case of being passed by the Senate and sanctioned by the President, will extend the PTC regime until 2012 and will promote the energetic efficiency.

According to the report named "International Wind Energy Development, World Market Update 2006," as of March 2007, issued by BTM Meeting ApS ("BTM") it is expected that the accumulated installed wind power in the United States reaches 34,035 MW in 2011 and 96,000 MW in 2016, opposite the 30,594 MW and 48,918 MW expected for 2011 and 2015 respectively. EER foresees, as well, that the United States will increase its accumulated installed wind power from 11,612 MW in 2006 to 48,918 MW in 2015, which implies an annual average increase of approximately 4,150 MW during such period.

The following table shows the forecasts of accumulated power in the United States developed by EER for the period comprised between the 2007 and 2015 exercises:

	Real					Planned					2007-2015
	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	
<b>Wind power in the United States</b>	<b>MW</b>										<b>CAGR</b>
<b>Accumulated</b>	11,612	15,211	19,260	22,885	26,535	30,594	34,918	39,268	43,943	11,612	15.7%

*Source: European Wind Power, Markets and Strategies, 2007-2015, Emerging Energy Research, June, 2007 (except CAGR).*

On the other hand, EER expects that the United States will have the greatest world installed wind power by the end of 2011, with 30,594 MW of installed power or approximately an 18% of the world wind business. EER estimates as well that approximately a 23% of the wind power to be installed in the United States until the end of 2015 will be installed in Texas, while a 30% will be shared by the States of California, Minnesota, New York, Colorado and Washington.

The following diagram sums up the accumulated installed power and the forecasts of installed power in the several states of the United States in the period comprised between 2000 and 2015:

Exhibit 3-2: EER Base Case Wind Power Capacity Totals by State, 2000–2015 (MW)

Source: Emerging Energy Research

*Main competitors and positioning of Iberdrola Renovables in the United States wind business*

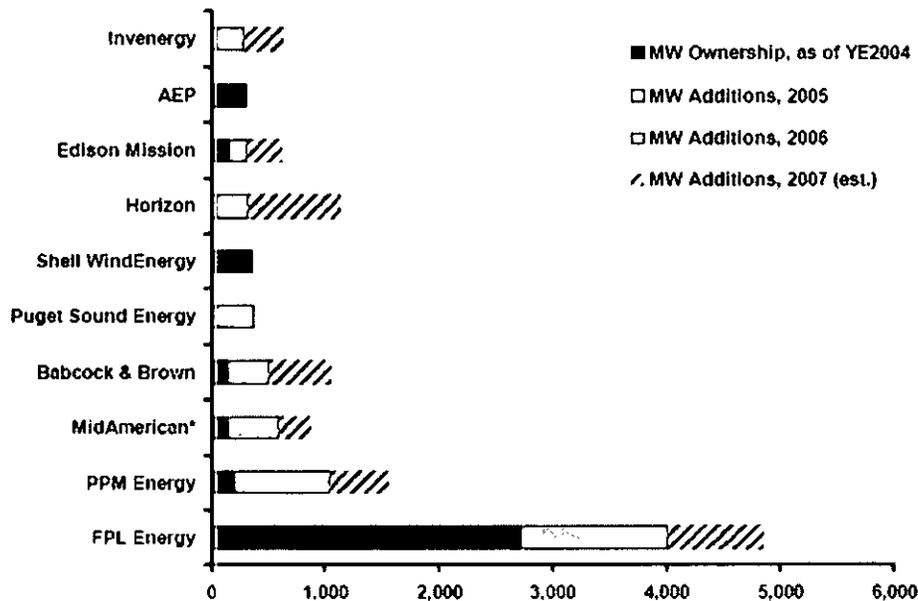

The potential of the United States wind business and the benefits of the PTCs system that started in 1992 within the frame of the Energy Policy Act of 1992 attracted the United States energy generators and promoted the entrance of foreign agents in the United States.

As a result of the Restructuring Operation and the consequent integration of the PPM Energy business in IBERDROLA RENOVABLES, the Society is the second major promoter of wind parks in the United States of America, as well as the second major operator in the United States of America, in accordance with the THE EER report of June 2007. The installed power and the whole production of the Society in the United States of America was of 2,046 MW and 2,588 GWh, respectively, in accordance with the financial proforma information belonging to the ninth-month period that expired on September 30 2007. Based on the market information provided by the U.S. Department of Energy and the Wind Energy Association, as of December 31 2006, the generated wind energy by the Society represented approximately a 15% of the wind energy generation business in the United States of America, in terms of installed power.

According to EER, Florida Power & Light Energy (“FLP Energy”) was the first producer of wind energy in the United States at the closing of the 2006 exercise, with approximately 4,000 MW installed in this country, due mainly to the fact that it was one of the pionthe EERs in this sector during the 1990s and to the later incorporation to its portfolio of about 1,300 MW since 2005. PPM Energy holds the second position in the United States and has recently been integrated to the IBERDROLA RENOVABLES Group. To PPM Energy follow, at the closing of

the 2006 exercise, in this order, MidAmerican, Babcock & Brown and Puget Sound Energy.

The following diagram represents the evolution of the installed power of the great electricity producers of the United States wind business between the years 2004 and 2007:

Source: *US Wind Power Markets and Strategies, 2007-2015, Emerging Energy Research, June 2007*

Additionally, we should point out that although some of the potential competitors didn't have at their disposal a significant installed power in 2006, many of them do have important Project portfolios and aggressive growth plans.

### Great Britain

In accordance with the information Published by THE EER, the installed power in Great Britain increased by 36.7% in 2006, from 1,439 MW of accumulated installed power in 2005 to 1,967 MW in 2006. The greatest part of the new power was installed on-shore, being installed in an off-shore wind park of 90 MW.

The regulatory framework of renewable energies, that grants what is known as Renewable Obligation Certificates ("ROCs") to the electricity producers from renewable energy sources, constitutes a main factor for the growth of the wind energy generation business in Great Britain (read, in this sense, section 5.4.1.2 of the present Registry Document, about the regulatory framework concerning the production of energy from renewable energy sources in Great Britain).

The objective of Great Britain under the renewable energies Guideline consists of 10% of the produced electricity in Great Britain being able to come from renewable energy sources in 2010 and a 15% in 2015, in accordance with the

information provided by the Department for Business Enterprises and Regulatory Reform, previously known as the Department of Trade and Industry. According to the British Wind Energy Association, as of September 2007, the renewable energy sources generated approximately a 4.5% of the electricity produced in Great Britain. Approximately a 1.5% of the electricity supply in Great Britain was generated by installations of wind energy. The 10% objective is being revised in this moment and could be modified to adapt it to the future frame Guideline objectives in terms of renewable energies, that will establish a common binding objective stating that the 20% of the whole consumed energy in the European Union will come from renewable energy sources in 2020.

EER estimations point out that the wind business in Great Britain has an enormous potential growth, due, among other factors, to the abundance of wind resources and its important potential for the promotion of off-shore wind parks due to the low depth of the sea bottom, very favourable to the installation of off-shore wind parks. It is estimated that Great Britain has the greatest wind potential of Western Europe, with approximately 114 terawatts/hour, that is, 114 million kilowatts/hour.

EER expects that the accumulated installed wind power increases from 1,967 MW in 2006 to 11,967 MW in 2015, what implies an average annual increase of 1,111 MW during this period.

The following table shows the forecasts of accumulated power in Great Britain for the period comprised between 2007 and 2015:

	Real					Planned					2007-2015	
	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015		
Wind power in Great Britain												
						MW					CAGR	
Accumulated	1,967	2,662	3,517	4,467	5,567	6,767	8,067	9,367	10,667	11,967	20.7%	

*Fuente: European Wind Power Markets and Strategies, 2007-2015, Emerging Energy Research, June, 2007 (except CAGR).*

EER expects that Great Britain will have the third major wind business in Europe, by accumulated installed wind power at the end of 2015, representing approximately 9.1% of the installed power in Europe. It is expected that certain off-shore wind projects that were postponed due to local opposition are developed in the next few years, also contributing to the increase of the installed power.

#### *Main competitors and positioning of Iberdrola Renovables in the British wind business*

As a result of the Restructuring Operation, as of October 3rd 2007, IBERDROLA RENOVABLES became the major promoter of wind parks in Great Britain, as well as the major operator in Great Britain. In this sense, based on the information provided by the British Wind Energy Association, as of December

31st 2006, the wind energy generated by the Society represented approximately 17% of the wind energy business in Great Britain, in terms of installed power.

The main competitors of IBERDROLA RENOVABLES in Great Britain are RWE, E.On, Scottish & Southern Energy and Fred Olsen.

### Greece

Greece increased its installed wind power in 180 MW in 2006 until reaching 745 MW as of December 31 2006, according to EER. In spite of the abundance of wind resources, the lack of appropriate infrastructures turns the Greek business into one of the less representative in Europe. However, the Greek government has recently improved the wind parks authorization administrative proceeding, which, according to EER, should make the installation of wind power in the future easier.

The objective of Greece under the renewable energies Guidelines is to generate 20.1% of the electricity produced in the country from renewable energy sources in 2010. EER expects that the Greek wind business will reach 3,175 MW of installed capacity in 2015.

The following table shows the accumulated power forecasts for the period between 2007 and 2015.

	Real					Planned					2007-2015	
	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015		
Wind power in Greece	MW											CAGR
Accumulated	745	945	1,165	1,405	1,665	1,945	2,245	2,555	2,865	3,175	16.4%	

Source: *European Wind Power Markets and Strategies, 2007-2015, Emerging Energy Research, June, 2007*

### France

France is the eighth European country having installed power, and it doubled its wind power in 2006, installing 770 MW between 2005 and 2006, reaching an installed wind power of 1,480 MW as of December 31 2006, the information published by EER. While the delay on the delivery of the wind machines contributed in a negative way to the growth of installed power in 2006, a faster speed in the obtaining of administrative authorizations made the installation of new wind power projects easier. The present rules limited in the past the growth of the French wind business and the expectations of a strong growth in France are based on the assumption that a new regulatory framework will promote the big wind projects.

France's objective under the renewable energies Guideline is to diversify the electricity production sources, with the aim of covering 21% of its electricity needs with renewable energy sources in 2010. It is expected that the wind business in France reaches approximately 11,760 MW of installed power in 2015.

The following table shows the accumulated power forecasts in France for the period comprised between 2007 and 2015:

	Real					Planned					2007-2015
	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	
Wind power in France	MW										CAGR
Accumulated	1,480	2,380	3,355	4,510	5,635	6,810	8,010	9,235	10,485	11,760	22.1%

Source: *European Wind Power Markets and Strategies, 2007-2015, Emerging Energy Research, June, 2007*

## Poland

In accordance with EER, the installed wind power in Poland increased in 86 MW in 2006, which doubles its previous power, until reaching 153 MW of accumulated installed power at the closing of 2006. According to the EER, the Polish wind market is currently one of the most attractive countries in Eastern Europe, due to the fact that the stable regulatory framework promotes the renewable energies, and it is also due to the abundance of wind resources.

It is expected that Poland contributes to the future growth of the wind business in Eastern Europe. In this sense, the EER estimates that the installed power in Poland could represent up to 37% of the installed wind power in the region of Eastern Europe in 2015. Also, according to the EER, Poland could reach approximately 2,653 MW of accumulated installed power in 2015.

The following table shows the installed power forecasts in Poland for the period comprised between 2007 and 2015:

	Real					Planned					2007-2015
	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	
Wind power in Poland	MW										CAGR
Accumulated	153	303	503	703	953	1,253	1,553	1,853	2,253	2,653	31.2%

Source: *European Wind Power Markets and Strategies, 2007-2015, Emerging Energy Research, June, 2007*

### ■ MINI-HYDRAULIC ENERGY

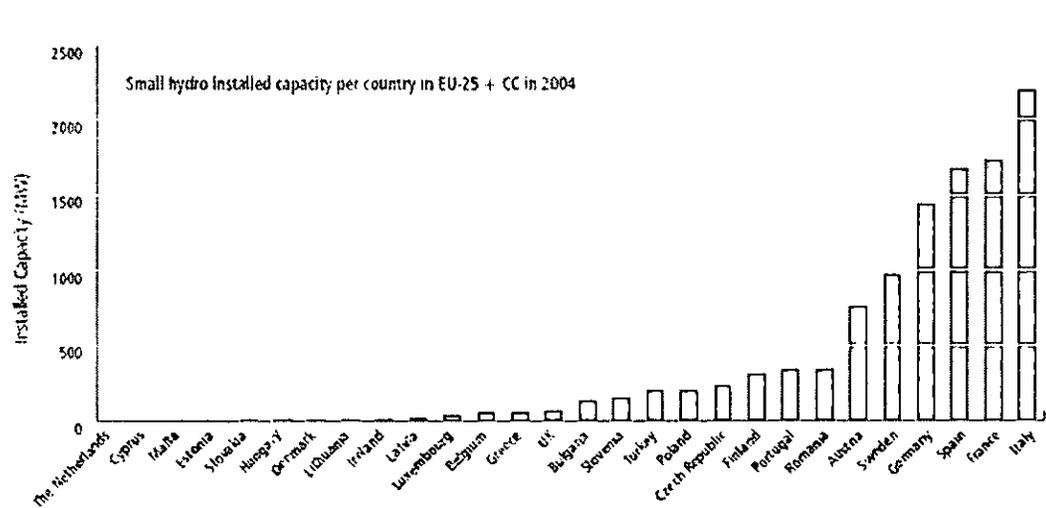

The hydraulic energy is a form of renewable energy that uses the strength of the water in motion to turn a turbine that generates electricity. The term “mini-hydraulic” is generally used to refer to the electric energy installations with a power equal or lower to 10 MW. However, in Spain, the term “mini-hydraulic” may be applied, as well, to electric energy generation installations equal or lower to 50 MW. The Spanish regulatory framework established different objectives and prices for the electricity produced by installations with powers lower than 10 MW and installations with power

between 10 MW and 50 MW. According to the Energy National Commission (Comisión Nacional de Energía), by the end of 2006 there was 1,846 MW of installed mini-hydraulic power in Spain belonging to installations with power lower to 10 MW.

The mini-hydraulic energy is very attractive, due to its technological efficiency, the installations long-life and the operation and maintenance low costs. In any case, this technology presents slower levels of growth than other mature renewable energies, to which we must add that it depends on water, a spare resource in many regions.

In Europe, in 2004, the additional installed power of the mini-hydraulic installations with powers lower to 10 MW was approximately 11,000 MW, in accordance with the data published by the European Small Hydropower Association (“ESHA”).

The following table shows the installed mini-hydraulic power as of December 31 2004 in Europe:

Source: State of the Art of Small Hydropower in EU - 25, European Small Hydropower Association, 2005

Although the big hydraulic generation is about to reach its theoretical maximum in certain developed countries, there still exists a significant potential growth in the mini-hydraulic technology. ESHA expects that the installed mini-hydraulic power in Europe will reach approximately 14,000 MW in 2015. In Spain, the Renewable Energies Plan 2005-2010 embraced by the Spanish Government establishes an objective of 2,199 MW for the same year. On the same line, the Sustainability Report draft published by the Spanish Ministry of Tourism, Industry and Commerce in July 2007, whose period of public meeting expired on September 15 2007, established an estimation of 2,450 mini-hydraulic MW for 2016.

▪ **THERMOELECTRIC SOLAR POWER**

The thermoelectric solar power is a relatively new renewable technology. For those countries with high levels of solar irradiation it lays out many advantages only comparable to other technologies related to renewable energy sources. By means of the thermoelectric solar technology the solar irradiation is gathered and concentrated in a

receiver. The receiver has a circuit through which the liquid flows, that heats up and transfers its heat to the fluid of another secondary circuit, which becomes steam. This steam, liable to great pressure, actions the turbine and its coupled generator, generating electricity. The heat produced by the solar irradiation gathered during the day may be stocked in liquid or solid form, in melted salts, pottery or concrete. During the night, this stocked heat may be extracted from the means in which it has been stocked to continue on generating electricity. The thermoelectric solar power worldwide counted on 335 MW of accumulated installed power in 2005, according to the report named *Concentrated Solar Thermal Power – Now!* (“CSTP”), produced by Greenpeace and the European Solar Thermal Industry (“ESTIA”).

In Spain, the Renewable Energies National Plan 2005-2010 establishes an objective of 500 MW in 2010, while the Sustainability Report draft, published by the Ministry of Industry, Tourism and Commerce in July 2007 and whose period of public meeting expired in September 15 2007, establishes an overall estimation for the thermoelectric solar power and the photovoltaic solar power of 2,000 MW for the year 2016. On the other hand, the CSTP, Greenpeace and ESTIA have estimated that in 2015 the accumulated installed power worldwide would be of 6,454 MW in 2015 and of 36,850 MW in 2025.

#### ▪ **PHOTOVOLTAIC SOLAR POWER**

The photovoltaic solar power is based on the photoelectric effect, that is to say, on the conversion of solar power into electric power. To carry out this conversion some devices called solar cells are used, which are integrated by semiconducting materials, generally silicon, on which a regular electric field is artificially created. These cells, when connected in a series or in a parallel way form a solar panel responsible for the voltage and current supply adjusting to the demand.

The photovoltaic solar technology worldwide counted on 6,634 MW installed in 2006, according to the European Photovoltaic Industry Association (“EPIA”). According to the National Energy Commission, at the end of 2006 there were 139 MW of photovoltaic solar power installed in Spain.

The renewable energies Guideline fixed an objective of 3,000 MW of accumulated installed power for 2010. On the other hand, the Renewable Energy Plan in Spain defines an objective of 400 MW for the year 2010, while the Sustainability Report draft, published by the Ministry of Industry, Tourism and Commerce in July 2007 and whose period of public meeting expired on September 15 2007, established an overall estimation for the photovoltaic solar power and the thermoelectric solar power of 2,000 MW for the same year.

In spite of the fact that the implementation of this energy is scarce, high levels of growth are expected for the next 20 years. There are planned, as well, strong investments by the main solar panels manufacturers which tend to the development of new technologies, like the solar technology based on the Thin Film. It is expected that the photovoltaic solar power is strongly promoted by the governments, by means of solar panels installation programs on the roofs of factories and private homes, which will reduce the installation costs and will make this technology the more attractive. EPIA foresees that, for the year 2010, the world installed power rises to 18.4 GW and to 170 GW in 2020.

In Spain, the 85% of Renewable Energy Plan 2005-2010 has recently been reached. Thus, in accordance with the Royal Decree 661/2007 of May 25, by which the electric power production activity is ruled in a special regime (“Royal Decree 661/2007”), the installations that are registered on the Special Regime Production Administrative Record during the next twelve months will be able to have recourse to the annual bonus pattern. Nowadays a draft is being revised of a new Royal Decree concerning the photovoltaic solar power that could widen the objective for this technology and change the belonging price for the future installations within the scope of its application. The 661/2007 Royal Decree Ninth Additional Law, foresees that during the year 2008 a new Renewable Energies Plan research is started, taking into account the achievement of the mentioned objectives, to establish a new project for the period comprised between the years 2011 and 2020.

### ➤ **BIOMASS**

Article 2 of the Renewable Energy Directive defines biomass as the “*biodegradable fraction of products, waste and residues from agriculture (including vegetable and animal substances), forestry and related industries, as well as the biodegradable fraction of industrial and municipal waste*”. Biomass is a renewable technology that uses organic waste as fuel for a boiler that generates energy in a conventional thermal plant. Using biomass to generate energy, particularly thermal energy, is nothing new. However, biomass applications to produce electricity have basically been developed only over the last two decades. One of the advantages of biomass is that it uses products, waste and residues that are available in abundance as fuel.

According to the Biomass Action Plan published by the Commission of the European Communities on 12 July 2006, 4% of the European Union’s energy requirements were being satisfied using biomass at the time of publication.

This action plan fixed a goal for the use of biomass of 149 million tons by 2010, of which 55 million tons are designated for the production of electricity and another 75 and 19 million tons for heat sectors and transport, respectively. The 2005-2010 Renewable Energy Plan established an objective of 2,039 MW for the same year, of which 772 MW would correspond to co-combustion and 1,317 MW to traditional biomass facilities, that is, facilities that use only biomass as fuel. Co-combustion is used in thermal coal plants and consists of replacing a percentage of the traditional coal fuel with biomass. Meanwhile, the draft Sustainability Report published by the Ministry of Tourism, Industry and Commerce in July 2007 (in respect of which the public consultation period closed on 15 September 2007) gives a forecast of 2,770 MW for 2016.

### ➤ **WAVE AND TIDAL ENERGY**

Tidal energy began to be developed in the mid 1970s, although major advances in these technologies have been achieved only in recent years. Although various types of renewable marine and ocean energy sources exist, the technologies associated with wave and tidal energy are the most developed of those currently existing. Wave energy

harnesses the movement of the water close to the surface of the sea which is generated as a result of the wind blowing over the surface. Tidal energy, on the other hand, is generated by the ebb and flow of water entering and exiting the estuaries or mouths of rivers as a consequence of the rise and fall of the tide. Also, ocean currents are harnessed through devices that extract energy through the movement of water at high tide. Wave energy converters and tidal energy generators are capable of harnessing the energy supplied by the water and converting it into electricity.

According to a report published in January 2006 by Carbon Trust, an independent institution set up by the UK Government with the remit of contributing to the reduction of greenhouse gases, entitled Future Marine Energy, between 15% and 20% of electricity demand in the United Kingdom could be covered by the sea, via the energy obtained from technologies that harness the force of the waves and the force of the ocean currents. Carbon Trust also maintains that both technologies would have the capacity to satisfy demand for electricity in many places around the world. However, because these technologies are in a state of initial development, the cost of generating marine energy is considerably greater than the cost of other renewable energies and also greater than the cost of conventional energy. According to Carbon Trust, the reduction in these costs will be possible due to development in design and economies of scale, and significant reductions will be necessary in order to permit future growth of the marine energy industry. Carbon Trust forecasts, "in an optimistic but reachable" scenario, that cumulative installed capacity in Europe for wave and tidal energy will reach 1,000 and 2,500 MW, respectively, by 2020.

#### ➤ **THE BUSINESS OF THERMAL ENERGY IN THE UNITED STATES OF AMERICA**

Figures for 2005 show that total energy generation base was 900 GW at global level, of which 350 GW was generated by non-utility generators (NUGs), that is, electric energy generators whose operation is not regulated. In the West of the United States of America that is, in administrative terms, the area of the country dependent on the Western Electricity Coordinating Council ("WECC"), the generation base was 160 GW, of which 54 GW (34%) was generated by non-utility generators. Around 55% of the electricity generated in the United States of America by non-utility generators comes from the combustion of gas and 75% of this combustion is carried out in the West. All the gas combustion electricity generation facilities owned by PPM Energy, which between them generate a total of 806 MW, are located in the West of the United States of America.

#### **Supply and demand**

The Long-Term Reliability Assessment for the United States of America for 2006-15 commissioned by the North American Electric Reliability Corporation ("NERC") in 2006 revealed a reduction in the margin of reserves for the cover of demand in most parts of the United States of America, while electricity demand was forecast to rise by 19% (141 GW) while the funds allocated to electricity generation projects was to rise at just 6% (57 GW). The resultant difference between supply and demand would be met via contracts with local producers for the operation of facilities and via new generation facilities. Gas combustion generation is expected to cover almost half of this generation.

The report on the assessment of electricity supply for 2006-2015 carried out by WECC in 2006 set out the following conclusions:

- Between the years 2006 and 2015, peak level electricity demand in summer is expected to rise by 2.2% per annum (3,000 MW more per annum).
- Available reserve to cover demand for electricity is expected to fall over the same period.
- 60% of electricity generated by new generation source would come from gas combustion installations.
- Restrictions are expected on the amount of electricity that can be transmitted from the Northern region dependent on WECC in order to satisfy summer demand in the Southern region.

### ➤ **NATURAL GAS BUSINESS IN THE UNITED STATES**

This section is based on data and forecasts obtained from the US Energy Information Administration (EIA), including the 2005 International Energy Annual, the 2007 Annual Energy Outlook and the report on the exploitation of underground natural gas in the United States of America between 1998 and 2005.

The United States of America has the largest natural gas business in the world, with consumption of 22.2 trillion cubic metres (630 billion cubic metres) in 2005, which represents approximately 21.5% of world consumption of dry gas in that year. This sector is catered for mainly by national suppliers although imports are also a growing source of supply. Supply and demand are matched up via a distribution (distribution pipelines) and storage network, as well as by physical and financial markets operating under the jurisdiction of the Federal authority and the individual states.

#### **Demand**

The principal components of demand for natural gas are residential, commercial and industrial usage and electricity generation. Commercial and residential demand together constitute the largest demand segment, accounting for 36% of demand in 2005, while demand for industrial usage and electricity generation accounted for 30% and 26% respectively. Electricity generation is the fastest growing component of demand, forecast by the EIA to grow at an annual rate of approximately 2.1% between 2005 and 2015, compared with aggregate annual growth of approximately 1.4%. Demand is highly seasonal, and in winter commercial and residential demand for electricity for heating is the dominant component. In general, consumption in the peak winter month is between 50% and 100% higher than demand in the month when consumption is lowest. Demand for electricity for heating also varies from year to year, depending on the severity of the winter. Growth in peak demand for gas in the summer months will tend to reduce the seasonal fluctuations in the business, such that the dependence of electricity demand on weather conditions will be less clear cut. The variable and seasonal nature of demand imposes significant requirements on distribution and storage operations and also influences price differentials and volatility,

#### **Supply**

Domestic output provided 83.7% of aggregate supply, with the remainder, that is, 13.7% of aggregate supply, being imported via the distribution network (primarily from Canada, with a small volume of Mexican imports). Domestic output comes from various different geological and geographical regions, including the inland and coastal areas of the Gulf of Mexico, the centre of continent, the Permian Basin and the Rocky Mountains. Growth in domestic output is expected to be modest, with production in the Rocky Mountains area offsetting a decline in output in the region of the Gulf of Mexico. The Energy Information Administration ("EIA") has forecast growth in domestic output of 0.7% for the 2005-2015 period. The greater contributor to supply growth, which the EIA has forecast at 18% per annum, is expected to be imports of liquid natural gas, which are forecast to rise from 0.57 tonnes of cubic feet (16 billion cubic metres) in 2005 to 3 tonnes of cubic feet (85 billion cubic metres) in 2015. It is also forecast that the distribution of imports will remain stable and then fall over the same period of time. This additional supply growth could be covered by the abundant reserves in the coastal areas of North Alaska, although the contribution of these reserves is not expected to continue after this period (2010-2015). Domestic output is not affected by seasonal fluctuations in demand and is relatively constant, although production is halted in the Gulf of Mexico during the hurricane season, a situation that fuels price uncertainty and instability. The cost of domestic output and the price of natural gas have both increased significantly since 2000, with the average price per thousand cubic feet reaching €4.69 between 2000 and 2006 according to the EIA, which is 2.5 times more than the average price between 1990 and 1999. This escalation in prices indicates that resources are harder to access, more expensive and more isolated, with supply and demand far tighter.

### **Infrastructures and markets**

An extensive interstate pipeline distribution network connects the remote sources of supply with the main demand markets. According to the EIA, two thirds of the United States of America, not including Alaska and Hawaii (lower 48 States), depend almost exclusively on the interstate distribution network for the supply of natural gas. In 2005, 85% of the 48 trillion cubic feet of gas was transported between the different states of the country by the main interstate distribution companies. Local and state-wide distribution companies fall under the jurisdiction of the individual states.

Storage is necessary to balance seasonal demand with the relatively constant output and to improve the efficiency of distribution activities. According to the EIA, underground gas storage capacity in 2005 was 4.01 trillion cubic feet (0.123 trillion cubic metres), which equates to an increase of 212 billion cubic feet (6.36 trillion cubic metres) since 1998. The EIA forecasts an increase storage capacity after the 2006-2008 period of 197 billion cubic feet (5.91 trillion cubic metres). Essentially, all underground natural gas storage facilities in the United States of America are owned by a combination of distribution companies operating in a single state, interstate distribution companies, local distribution companies and private storage suppliers. Private suppliers represent approximately 12% of the total natural gas storage business in the United States of America.

Liquid natural gas import plants where gas can be unloaded and stored and gasification services provided are another key element in the growth of natural gas infrastructures in the country. Four overseas terminals and one domestic terminal serve the country's markets on a continuous basis: in 2006 they supplied 5.25 billion cubic feet per day

(0.15 billion cubic metres per day). The EIA forecasts that expansion and new facilities will add capacity of 6.4 billion cubic feet by the close of 2008.

Transmission and storage infrastructures are built to meet peak seasonal demand, provide for demand growth and manage fluctuations in demand due to weather conditions. However, seasonal fluctuations, along with other factors, can cause temporary price differentials between regions, as well as price volatility. For example, seasonal demand fluctuations, or possible even surplus production, can saturate the capacity of the distribution pipelines.

Price differentials on the wholesale market reflect transmission and storage costs, and thus provide incentives to extend the relevant infrastructures and encourage companies to manage risks and optimise the infrastructures.

## ➤ **GLOBAL POSITIONING OF IBERDROLA RENEWABLES**

### **- Global leadership in renewable energy and wind energy**

At 30 September 2007, with 7,342 MW installed and a renewable energy project portfolio of 41,266 MW, IBERDROLA RENEWABLES was the world leader in renewable energy in terms of installed capacity. In addition, with 7,000 MW of installed wind capacity, IBERDROLA RENEWABLES is the leading company in the world in the development and operation of wind farms, in terms of installed power, according to the EER report published in March 2007. The majority of the Company's revenues are generated by its renewable energy business.

As indicated above, the Company is active principally in the wind energy sector, which represented 95.3% of its total renewable installed power at 30 September 2007. The Company also has installed power in mini-hydro and photovoltaic solar technologies, and is developing other renewable technologies such as offshore wind, thermoelectric solar, biomass and wave energy.

### **- Proven experience and credentials in the development of its renewables business**

The Company has proven experience and credentials in the development of its renewables business, as the following points demonstrate:

- Growth in installed capacity in the main countries in which the Company operates is driven mainly by exploiting opportunities identified and developed directly by the Company (Greenfield) or by acquiring projects at a greater or lesser stage of development from third parties, as well as, to a lesser extent, acquiring wind farms already in operation or under construction. The Company had increased its installed capacity from 1,414 MW in 2002 to (i) 4,977 MW at 30 September 2007, without taking into account the companies included within the consolidated group by virtue of the Restructuring Transaction, a rise equivalent to a CAGR of 30.3%; or (ii) 7,432 MW, taking the aforesaid companies into account).
- Maintenance of its competitive position. Thanks to uninterrupted expansion of its business since 2003, the Company had 30% of installed wind capacity in Spain, according to the 2007 report of the Asociación Empresarial Eólica. The Company

has also expanded its business to new countries, including the United States and the United Kingdom, through the integration of companies that maintain market quotas of competitions since 2003 in their respective markets.

- Expansion of its project portfolio. As indicated above, the Company has established a rigorous methodology for segmentation of the project portfolio into various categories. The project portfolio has increased from 6,846 MW at 31 December 2004 to 41,266 MW at 30 September 2007, in this last case on pro-forma terms.
- International expansion. Initially, all the Company's operations were in Spain. The Company's business has since expanded at the international level and at 30 September 2007 it was present in 19 countries. The Company believes that the current international composition of its asset portfolio, based on pro-forma figures for renewable installed capacity (60% in Spain, 28% in the United States, 5% in the United Kingdom and 7% in the Rest of the World), and project portfolio (16% in Spain, 51% in the United States of America, 15% in the United Kingdom and 18% in the Rest of the World), at 30 September 2007, enables to be flexible when it comes to making investments in the different countries, based on the different regulatory frameworks and the state of the market.
- Achieving its objectives. The company achieved the objectives contemplated in the Iberdrola Group Strategic Plan for the years 2002 to 2006 one year in advance. The Strategic Plan set an objective of increasing renewable installed capacity by more than 100%, starting from installed capacity of 1,070 MW at 31 December 2001, and making investments in the renewable energy business of €2.4 billion. At 31 December 2006 the Company had installed power of 4,434 MW without taking into account the companies added to the consolidated group by virtue of the Restructuring Transaction, exceeding the target of 3,834 MW. It has also made investments in the renewable energy business of €3.7 billion.
- Profit growth. In accordance with the consolidated financial statements prepared under IFRS, at 31 December 2004 the Company had €329.5 million in revenue, EBITDA of €34.5 million and net profits of €34.5 million, without taking the companies added to the consolidated group by virtue of the Restructuring Transaction into account. At 31 December 2006, also without taking the aforesaid companies into account, revenue, EBITDA and net profit had risen at CAGRs of 45.3%, 47.5% and 134.5%, respectively, with operating margin remaining stable at approximately 80% over this period.

- **A pioneer in the renewables business**

In the Company's opinion, its extensive experience in the renewable energy business has allowed it to carve out a competitive positioning for itself in terms of access to sites appropriate for the installation of wind farms, the experience of the management team, the confidence inspired by the "Iberdrola" name, its broad network of relationships with regulators, suppliers and customers, and its knowledge of the various regulatory frameworks.

- **Obtaining operating efficiencies**

The Company controls and manages almost all its wind farms and mini-hydro facilities. Accordingly, at 30 September 2007, total renewable installed capacity (i.e. consolidated) was 7,342MW.

The Company has implemented an asset operating model that is focused on efficiency in order to maximize the availability of resources and to achieve better integration of the generated energy into the electricity system and the optimization of the life span of the assets. The Company also supports technological and management innovation. The Company aims to apply this model to all its facilities, irrespective of where they are situated.

Because the Company controls most of its assets, and thanks to its experience in locating sites, processing and getting approval, constructing facilities and implementing its asset operating model permits, the Company has achieved operating efficiencies that, in its opinion, helped keep its EBITDA margin stable at approximately 80% between 2004 and 2006.

**- Broad international presence**

IBERDROLA RENOVABLES is currently active in 19 countries. In its opinion this reduces dependency on the regulatory framework existing in any single country, and helps stabilise its cash flows. In addition, the Company is looking to apply its experience and knowledge in new countries as it expands its business. Currently the Company's business is concentrated mainly in Spain, the United States of America and the United Kingdom, although it is present in another 16 countries, including Greece, France and Poland through functioning assets, projects and/or local offices.

**- Long-term agreements with suppliers of aerogenerators**

At 30 September 2007, IBERDROLA RENOVABLES has well-established relationships with a number of major aerogenerator suppliers and approximately two thirds of its requirements under the development plan to 2010 were covered by current contracts with these suppliers. As of 30 September 2007, the Company had concluded contracts under which it will acquire aerogenerators with total capacity of 4,300 MW from its principal suppliers (including Gamesa, Suzlon, Mitsubishi Power Systems, Inc, and GE Energy, as well as other suppliers) on market terms and conditions. In the Company's opinion, its leadership position in wind energy, in terms of installed capacity, and its negotiating power will help ensure that its future aerogenerator requirements are met and allow it to access key suppliers and technical advances, all of which will contribute to optimising operating efficiency.

**- Support from Iberdrola S.A.**

IBERDROLA RENOVABLES benefits from the support of its parent company, Iberdrola, S.A. for growth of its business. Iberdrola, S.A. is one of the largest electricity companies in Europe, with more than 100 years' experience in operating generating assets, well-established relationships with regulators and other sector participants, a solid financial position and an internationally recognised brand name. Through various contracts, including a master agreement with the Company which is described in section 19 of this Registration Document below, Iberdrola, S.A. provides financing so that the Company may develop its business and provides services that enable IBERDROLA

RENOVABLES to benefit from its experience and economies of scale. However, despite the foregoing, there is no guarantee that Iberdrola, S.A. will continue providing the aforesaid financing and services to the Company in the future.

**- Positioned for visible and competitive growth**

The Company considers its strong growth and the possibilities secured by its project portfolio to constitute the foundations of its development plan. In its opinion, this is due to its vast experience and knowledge of developing new facilities, the access it enjoys, as a result of its scale, to a multitude of business opportunities, its extensive geographical presence and the support it receives from Iberdrola, S.A., as well as the rigorous and systematic procedures it applies before new projects are added to its project portfolio.

Of the 41,266 MW comprising the Company's project portfolio at 30 September 2007, 2,882 MW are classified in the practically certain category (and 1,375 MW of these are under construction), 12,298 in the probable category and 26,086 in the potential category. Also, the project portfolio is diversified by country, with 6,621 MW (16%) in Spain, 21,222 MW (51.4%) in the United States, 6,083 MW (14.7%) in the United Kingdom and the rest (7,340 MW representing 17.8%) in other countries. Of the 41,266 MW, 40,338 MW (98%) correspond to wind projects.

The Company sees its business as centred on countries ranked at the top of Ernst & Young Renewable Energy Country Attractiveness Indices for the second quarter of 2007. In fact, the three principal countries in which the Company is active (Spain, the United States and United Kingdom) were in second, first and third place respectively, which will help secure the Company's future growth.

**- Secure and stable revenue base**

The regulatory frameworks in effect in the countries where the Company is active help ensure stability in obtaining revenue from the Company's electricity generation plants and, to a certain extent, allow for future revenue to be forecast.

-The current Spanish regulatory framework is characterised by the fact that developers may choose between two compensation systems: (i) a single Regulated Tariff for all scheduling periods and (ii) directly on the market (or deferred or using a bilateral contract), receiving the price negotiated on the market plus a feed-in tariff. Also, in Spain, renewable energy has priority access to the network and, under the current regulatory framework and market rules, the sale of such energy is guaranteed.

In the United Kingdom and the United States there also are various compensation schemes that are not tied to market prices for electricity, such as the ROCs, PTCs and MACRS. In addition, the sale of the majority of energy produced by the Company's wind farms in the United States and the United Kingdom is by way of long-term energy purchase and sale agreements, which ensures the sale of this energy and other benefits throughout the duration of the project and, according to the terms relative to prices, reduces exposure to market prices and/or revenue volatility.

**- Experienced and committed management team**

The Company has an experienced and committed management team in Spain, the United States of America and the United Kingdom, with more than 240 years of joint experience in the sector. The management team has the support of centralised systems at the group level and the support of qualified managers in each geographical area.

- **IBERDROLA RENOVABLES STRATEGY**

As stated in the prior section regarding positioning, IBERDROLA RENOVABLES is the leader in the generation of electricity from renewable sources, in terms of installed power. Its strategy is focused on maintaining this position and growing in terms of size and profitability. The Company envisages that it will remain focussed on its wind business in the short term, although it also intends to position itself in such a manner that it may benefit over the long term from growth of other renewable technologies.

The targets set under the Company's business plan assume the installation of approximately 2,000 MW a year in order to achieve total renewable installed capacity of 13,600 MW by 2010. In the Company's opinion, its project portfolio of 41,266 MW at 30 September 2007 will help it achieve these targets.

The Company contemplates achieving its objectives by using the following strategies:

**Continuing and profitable growth by taking advantage of business opportunities:**

The Company intends to maximise its growth without compromising its profitability by focusing its business on the countries and technologies in which it currently operates. The principal countries in which the Company operates, including Spain, the United States of America and the United Kingdom, benefit from stable and visible regulatory frameworks that provide significant support for renewable energy. In addition, the Company anticipates considerable growth in capacity in these countries, which will enable it to expand its operations while upholding the levels of profitability, and recover its investments.

The Company's main line of business is wind power and in the coming years it expects such power to continue to be its main source of growth by means of organic growth as a result of developing its project portfolio, which will be supplemented by possible strategic and selective acquisitions (in terms of both their geographical location and the technology used).

- **Optimising the profitability and efficiency of the projects and the useful life of the assets:** The Company seeks to optimise profitability via the operating efficiency of the various renewable technologies. In turn, it seeks to maintain and optimise levels of efficiency by optimising the availability and improving the technical yield of the installations throughout their useful lives and achieving better integration of electricity generated within the electricity system.
- **Positioning allowing long term growth:** IBERDROLA RENOVABLES seeks to adopt a positioning that allows for long-term growth by: (i) adopting a competitive position in new countries (appointing local managers with an in-depth understanding of the characteristics of the renewable energy sector in their countries that can help create favourable conditions for the development of the renewable energies); (ii) investing in other renewable technologies (studying and evaluating the viability of the various technologies and concentrating on those that prove to be

the most efficient and that can become competitive) and (iii) its continuous support for technological innovation (with the aim of optimising the operation of its farms and achieving better integration within the electricity system for energy generated).

**6.3 If the information given pursuant to items 6.1 and 6.2 has been influenced by exceptional factors, give details**

The Company's business has not been influenced by exceptional factors other than the development of the market as described in section 6.2 above.

**6.4 If material to the issuer's business or profitability, give summary information regarding the extent to which the issuer is dependent on patents or licences, industrial, commercial or financial contracts or new manufacturing processes**

In the IBERDROLA RENOVABLES business the principal agreements that may affect the achievement of future objectives are aerogenerator supply agreements. Currently the Company has the following supply agreements in effect:

- An agreement with the Gamesa group entered into in October 2006, for the acquisition from 2007 to 2009 of aerogenerators having total power of 2,700 MW for wind developments in Spain, the rest of Europe, the United States of America and Mexico. This agreement includes the assembly and start-up of the aerogenerators, as well as services for their operation and maintenance during the warranty period.
- Through CPV Wind Ventures LLC an agreement has been signed with General Electric for the acquisition of aerogenerators in 2008 for a total of 225 MW in the United States of America.
- It also has an agreement with Mitsubishi for the acquisition of aerogenerators in 2008 and 2009 for total capacity of up to 405 MW. Finally, it has signed an agreement with Suzlon Energy for 300 MW in 2008 and 400 MW in 2009.
- In addition the Company through its subsidiaries has agreements for the purchase of aerogenerators for specific projects with other manufacturers such as Siemens, Führlander, Nordex, General Electric, Repower, Ecotécnia and Acciona.

The existence of joint development agreements and purchase agreements for wind farms is also notable as regards conduct of the business of the Company and the companies in which it holds interests.

In this regard the following agreements that have been signed by the Company merit special attention. They are currently in effect or pending final performance:

- In 2005 the Company agreed with Gamesa to purchase wind farms then in the development phase during the period from 2006 to 2009 (extendable to the year 2012 in the discretion of the Issuer). Of these 600 MW are located in Spain in 100 MW in Italy.

- An agreement with the Gamesa group for the acquisition of 250 wind power megawatts in Portugal for 310 million euros, currently under development.
- An agreement with the Gamesa group to acquire 56 wind energy megawatts in Greece for 78 million euros. During 2006, 17 wind power megawatts were transferred from Gamesa to IBERDROLA RENOVABLES at the Alogorachi park, leaving the remaining 39 megawatts outstanding.
- In 2006 an agreement was signed with Gamesa to purchase wind farms in the United States between 2007 and 2009. With an installed capacity of around 1000 MW, they are located in the states of Pennsylvania, Texas and Illinois. From among them, it is contemplated that the Company will acquire, directly or through the companies in which it holds interests, wind farms that will be commissioned before the end of 2009, with approximate power of 500 MW. Of that amount, 300 MW are covered by firm commitments, while the remaining 200 MW would be subject to a purchase right. The other 500 MW would correspond to acquisition of developments in progress.

To the extent the Company deems them to be viable all of the agreements are included in the portfolio of projects described and quantified in section 6.1 of this Registration Document.

**6.5 The basis for any statements made by the issuer regarding its competitive position**

The information regarding the positioning of IBERDROLA RENOVABLES contained in this section 6 has been obtained from public databases and reports of the referenced companies, organisations and associations.

**7 ORGANISATIONAL STRUCTURE**

**7.1 If the issuer is part of a group, a brief description of the group and the issuer's position within the group**

The Company is a part of the group of companies headed by its sole shareholder as of the date of this Prospectus, Iberdrola, S.A., and is the vehicle through which this group conducts its business in the renewable energy area.

Also, IBERDROLA RENOVABLES and the Spanish companies in which it directly or indirectly holds interests of at least 75% of capital are a part of the 2/86 tax group, headed by Iberdrola, S.A. Membership in that tax group has the following effects:

- Immediate use of the tax credits generated by the companies (deductions, tax losses, etc.)
- Deferral of results of transactions among companies in the tax group until the result is realised outside the tax group.

The Spanish companies controlled by IBERDROLA RENOVABLES are included in the referenced tax group, either when formed (in the case of newly-created companies), or starting 1 January of the fiscal year following the year of their acquisition by IBERDROLA RENOVABLES (in the case of acquired companies).

For its part, IBERDROLA RENOVABLES is the parent of a group of companies located in Spain and another 19 countries, also acting as parent for the conduct of the business of operation of mini-hydro plants located in Spain under the ordinary economic system (as described in section 6 above in this Registration Document. Below is an organisation chart describing the parent companies in the IBERDROLA RENOVABLES Group :

According to the organisation chart set forth above, in **Spain** the corporate structure is organised using parent companies by autonomous region. They may be placed into categories:

- Unipersonal (single shareholder) companies wholly owned by IBERDROLA RENOVABLES. This is the case of the parent companies in **Andalusia** (Iberdrola Energías Renovables de Andalucía, S.A.U.), **Aragón** (Iberdrola Energías Renovables de Aragón, S.A.U.), the **Canary Islands** (Iberdrola Energías Renovables de Canarias, S.A.U.); **Castilla-La Mancha** (Iberdrola Energías Renovables de Castilla La Mancha, S.A.U.) and **Galicia** (Iberdrola Energías Renovables de Galicia, S.A.U.); and
- Companies owned by IBERDROLA RENOVABLES and other shareholders. This is the case of the parent companies for the autonomous regions of **Castilla y León** (Biovent Energía, S.A. and Biovent Holding, S.A.), **Catalonia** (Energía i Vent, S.A.), **Extremadura** (Electra de Sierra de San Pedro, S.A., Electra de Montanchez, S.A. and Electra de Malvana, S.A.), **La Rioja** (Iberdrola Energías Renovables de La Rioja, S.A.), **Murcia** (Energías Renovables de la Región de Murcia, S.A.) and the **Basque Country** (Energías Eólicas de Euskadi, S.A.).

In the other autonomous regions where the Company does not own a parent company, the investments in renewable energy projects through interests in other companies are undertaken through the company Iberenova Promociones, S.A.U. (of which the Company is the sole shareholder), which also undertakes the investments in the respective regions that are made apart from companies jointly owned with other shareholders.

Together with the foregoing, the Company is also the sole shareholder of the company Ciener, S.A.U., which conducts the business of operating mini-hydro plants under the special system in Spain, and also holds interests in the companies operating this kind of mini plant.

The Company also has a majority interest in the company Iberdrola Energías Marinas de Cantabria, S.A., engaged in generation of electricity from wave energy.

Similarly, in the **international area** IBERDROLA RENOVABLES conducts its business through companies domiciled in each country where it is present, being the sole shareholder of most of them. Thus:

- IBERDROLA RENOVABLES, S.A. has wholly-owned parent companies in **Germany** (Iberdrola Regenerative Energien GmbH), **Brazil** (Iberdrola Energias Renovaveis do Brasil Ltda. and Enerbrasil Ltda.), **Bulgaria** (Iberdrola Energia Ot Vazobnoviaemi Iztochnici), the **United States** (Iberdrola Renewable Energies USA Ltd.), **France** (Iberdrola Energies Renouvelables, SAS), **Greece** (Energiaki Alogorachis Anonimi Eteria), **Hungary** (Iberdrola Megújuló Energia Korlátolt Felelősségű Társaság Kft. [*Note: This company currently is named EC Energoconsult Kft, the change of its name being in process*]), **Italy** (Iberdrola Energie Rinnovabili, S.p.A), **Mexico** (Parques Ecológicos de México, S.C.V.) [*Note: Pending change of name to Iberdrola Energías Renovables de México*"],

**Poland** (Iberdrola Energia Odnawialna), **Portugal** (Iberdrola Energias Renovaveis, S.A.), and the **United Kingdom** (Iberdrola Renewable Energies Ltd.). In addition we must mention ScottishPower Renewable Energy Holdings Limited, recently formed, a 100% subsidiary of IBERDROLA RENOVABLES and the holder of practically all of the Scottish Power group companies that engage principally in businesses related to renewable energy in the United Kingdom and the United States that have been added to the IBERDROLA RENOVABLES Group by virtue of the Restructuring Transaction described in section 0 of this Registration Document, which).

- Also, in **Estonia** the Company maintains a parent company majority-owned by it (Osauhing Raisner), and in **Greece** it is the direct owner of a 52.7% interest in Rokas, which is traded on the Athens Stock Exchange. Most of the investments in renewable energies in Greece are undertaken through it.

Both domestically and internationally each parent company has interests in a significant number of companies, the proliferation of which is the result of joint investments with local partners and in many cases the formation of companies by investment project. The maintenance of companies by project in turn has various explanations, including financing structure, operations, strategy or efficient use of certain regulatory systems (in this regard the Production Tax Credits system in effect in the United States of America stands out, and is described in section 5.1.4 above).

**7.2 A list of the issuer's significant subsidiaries, including name, country of incorporation or residence, proportion of ownership interest and, if different, proportion of voting power held.**

Identified below are the companies comprising the group of which the company IBERDROLA RENOVABLES is the parent on the date of registration of this Prospectus, indicating the domicile, business and percentages of direct and indirect interests in each of the companies.

Also on the following table: (i) an asterisk (\*) is used to identify those companies that have been added to the group since the end of the 2006 fiscal year; (ii) a double asterisk (\*\*) is used to identify those companies in which, from the end of that year to the date of registration of this Prospectus, there have been significant changes in the interest held by IBERDROLA RENOVABLES, with the exception in both cases of the companies incorporated as a result of the Restructuring Transaction.

(1) Voting rights

For clarification, it is specified that Atlantic Wind LLC and Heartland Wind LLC, both 100%-owned subsidiaries of PPM, are companies that own rights to wind farm developments in respect of which the company that will execute the development has yet to be constituted.

## 8. PROPERTY, PLANT AND EQUIPMENT

8.1 Information regarding any existing or planned material tangible fixed assets, including leased properties, and any major encumbrances thereon

Changes in net tangible fixed assets over the last three fiscal years are as appear in the following tables.

The geographical evolution of IBERDROLA RENEWABLES' generation assets over the last three fiscal years is as indicated below:

Installed capacity (MW)	2006	2005	2004
Spain	3,994	3,574	3,206
France	48	20	0
Greece	210	192	0
Portugal	32	18	0
Brazil	49	6	0
Germany	34	0	0
US	26	0	0
Poland	41	0	0
<b>TOTAL</b>	<b>4,434</b>	<b>3,810</b>	<b>3,206</b>

In addition, based on the different technologies used, the evolution of IBERDROLA RENEWABLES' generation assets over the last three fiscal years was as follows:

Potencia Instalada (MW)	2006	2005	2004
Eólica	4,102	3,494	2,891
Minihidráulica	333	316	315
Fotovoltaica	0	0	0
<b>TOTAL</b>	<b>4,434</b>	<b>3,810</b>	<b>3,206</b>

Regarding operational mini-hydro power, present only in Spain, the distinction between the two systems must be borne in mind:

- Special System: It covers 122 MW of the 333 MW operational at the end of 2006, and all facilities that IBERDROLA RENEWABLES contemplates commissioning in Spain in the future.
- Ordinary System: it covers the other 211 MW operational at the end of 2006. Due to questions of obsolescence that it would not be profitable the cure, and in accordance with the regulations of the National Energy Commission in this regard, the closing of a series of facilities is being processed. Once these closings have been completed, the operational power will be 193 MW.

#### **Governmental concessions of hydroelectric production plants**

Under Act 54/1997 of November 1997, together with the consolidated text of the Water Act, approved by Royal Legislative Decree 1/2001 of 20 July 2001, all Spanish hydroelectric production plants are subject to the system of temporary governmental concession. Under the terms of these governmental concessions, upon expiration of the

established terms the facilities revert to ownership of the competent governmental agency, in good operating order, at no cost and free of liens.

The Company believes that it is not necessary to establish a reversion fund, because the maintenance programmes for the facilities ensure their ongoing good operating condition.

97% of the government concessions corresponding to facilities of the IBERDROLA RENOVABLES Group expire after 2021. Of these, more than half expire after 2060.

#### **Financial leasing agreements**

The Company classifies lease agreements in which the lessor substantially transfers all risks and benefits of ownership of the asset to the lessee as financial leases. Other leases are classified as operating leases.

Assets acquired under financial leases are accounted for in the noncurrent asset category corresponding to their nature and functionality. Each asset is amortised over the term of its useful life, since the IBERDROLA RENOVABLES Group believes there is no doubt that it will acquire ownership of those assets upon conclusion of the financial lease period. The value at which such assets are recorded is the lesser of the fair value of the leased asset and the current value of future payments deriving from the financial leasing transaction.

At 31 December 2006 assets under the financial leasing system amounted to 31.5 million euros. These are basically wind production facilities, of which 12.0 million euros correspond to France and 19.5 million euros to Greece.

#### **Land lease agreements**

Within Intangible Assets and under the heading "Concessions, patents, licenses and the like", IBERDROLA RENOVABLES includes basically the surface rights and easements for passage over land, which are valued at acquisition cost. Most of the agreements relating to land that IBERDROLA RENOVABLES concludes take the form of surface rights and usage assignment rights. Although the term is from 50 to 75 years, the Group amortises the surface rights and easements on a straight line basis based on the assets located thereon, from the time of commissioning of the corresponding wind farm. The majority of agreements that permit rights to the land connected to facilities are expected to be automatically renewed once the initial period has ended, under very varied circumstances depending on the different jurisdictions, regions and type of owners.

In addition there are land lease agreements dating from IBERDROLA RENOVABLES first wind farms relating to land upon which wind production facilities have been constructed. The term of these agreements generally varies from 20 to 30 years. These agreements usually contain renewal clauses of varying content but which, for the most part, allow for the extension of the agreements.

There are no valuation reports for the Company's wind farms drawn up by independent appraisers.

All the Company's facilities are duly insured against any all contingent risks. In addition, all facilities are unencumbered by any lien of any kind.

## **8.2 Description of any environmental issues that may affect the issuer's utilisation of the tangible fixed assets**

### **Regulatory matters**

The Company is subject to a great number of regulations related to environmental protection in the various countries in which it operates, basically in respect of the construction, operation and start-up of electricity generation facilities using renewable sources, thermal plants and natural gas storage facilities.

From the environmental point of view, the facilities established by the Company have the studies required by the legislation of each country, in such manner that the project ultimately installed complies with the established requirements, in accordance with the process for development and construction described in section 6.1 of this Registration Document.

In Spain, in order for a construction project for a facility to be approved, it is necessary to present a basic plan and environmental impact study to the competent authority. The purpose of the environmental impact study is to evaluate the direct or indirect effect that a project could have on the environment in which it is to be incorporated, including flora, fauna, climate and, in general, any ecosystem that could be affected. It also evaluates the effect that noise, vibration and emissions could have on cultural heritage and human welfare.

Based on the conclusions of an environmental impact study, the competent authorities may adopt preventive measures. Also, the autonomous regions have authority to issue regulations regarding such matters, for which reason environmental impact studies often vary from region to region.

During the construction phase of all facilities the Company plans and implements the system for environmental oversight of the work. It takes into account the matters included in the environmental impact statement, as well as those included as protective and corrective measures in the environmental impact study. This work extends over the term of operation of the facility.

As regards the United States and the United Kingdom, the applicable regulations in these countries also require studies, as well as obtaining a series of governmental permits prior to commencement of construction of facilities. Specifically in the USA, certain States require an environmental impact study to be carried out.

### **Environmental Management System of IBERDROLA RENOVABLES**

IBERDROLA RENOVABLES planned its advanced second-generation environmental management system in the year 2003. It was certified under the UNE-EN ISO 14001:2004 Standard by the Spanish Standardisation and Certification Association (Asociación Española de Normalización y Certificación - AENOR) on 27 May 2004. This international standard sets the requirements to be satisfied by an environmental management system, and establishes the elements of that system that must be satisfied

to obtain initial certification and maintain certification thereafter, after submitting to an audit of a duly accredited independent third party.

Since 13 December 2006 IBERDROLA RENOVABLES has been a part of the global environmental management system of the Iberdrola Group. It includes all business and corporate areas of that company in Spain, allowing reduction of environmental risk, improving the management of resources and optimising investments and costs. This system is consistent with the current legislation in each country in which the Company conducts business.

In the United Kingdom, during 2006 the British companies added to the Renewables consolidation by virtue of the Restructuring Transaction received the Queen's Award for Enterprise in the Sustainable Development category.

The Company is committed to environmental innovation and eco-efficiency in order to progressively reduce the environmental impact of its activities, facilities, products and services.

## **9. OPERATING AND FINANCIAL ANALYSIS**

### **9.1 Financial position**

See following sections 10 and 0 of this Prospectus.

### **9.2 Operating results**

Here follows an analysis of the evolution of the operating results for IBERDROLA RENOVABLES and its Group of Companies, not including the US and British companies that were incorporated in the scope of consolidation of the Company by reason of the Restructuring Transaction during the period of January 1<sup>st</sup> 2004 to September 30<sup>th</sup> 2007, in accordance with the audited consolidated financial results at December 31<sup>st</sup> 2005 and 2006 of IBERDROLA RENOVABLES and its Group of Companies as well as the consolidated financial results as at September 30<sup>th</sup> 2007, subject to limited review, prepared in accordance with IFRS criteria and incorporated by reference in this Prospectus.

The audited consolidated financial results for ScottishPower Holdings Inc. are available to the general public on the Company's website ([www.iberdrolarenovables.com](http://www.iberdrolarenovables.com)) as well as those of the main British Companies that were incorporated in the scope of consolidation of the Company by reason of the Restructuring Transaction, for the fiscal years ending March 31<sup>st</sup> 2005, 2006 and 2007 (except in the case of CeltPower Ltd, for which the financial results refer to the fiscal year ending December 31<sup>st</sup>, 2004, 2005 and 2006), as well as the additional unaudited financial information of these British Companies for the fiscal years ending March 31<sup>st</sup> 2005, 2006 and 2007, prepared in accordance with the accountancy procedures that are generally accepted in the United States and the United Kingdom, in US dollars and in British Pound Sterling respectively, as well as an analytical description of the operating results of ScottishPower Holdings Inc, and the set of British Companies for the period of March 31<sup>st</sup> 2006 to March 31<sup>st</sup> 2007, based on the aforementioned financial results.

The pro forma financial information at 30 September 2007 and 31 December 2007 described in section 20.2 of this Registration Document includes financial information

on IBERDROLA RENOVABLES and the US and UK companies within the Company's consolidated perimeter pursuant to the Restructuring Transaction.

**Factors that affect the historical operating results**

*Business expansion*

The Company has significantly increased its installed renewable energy capacity and its production of electricity in the past few years through the development of renewable energy projects and the acquisition of projects in different phases of development. The Company currently continues to develop wind farms and to a lesser degree acquire projects in different phases of development. All of the data relating to installed energy and the production of electricity provided in the tables included in this section refer to IBERDROLA RENOVABLES' historical consolidated data, and do not include the installed energy and electricity production of the companies of the Scottish Power Group incorporated in the scope of the Company by reason of the Restructuring Transaction.

As at December 31<sup>st</sup> 2004, 2005, 2006 and as at September 30<sup>th</sup> 2007, the Company's operating assets, excluding the value of its projects still in the development stage, amounted to a gross value of 2.840.1 million Euros, 3.774.7 million Euros, 4.389.7 million Euros and 4.856.9 million Euros respectively. The gross value of the operating assets does not correspond to the additional MW of capacity installed from one fiscal year to another.

*Installed power*

The following table shows the Company's installed capacity as at December 31<sup>st</sup> 2004, 2005 and 2006, as well as at September 30<sup>th</sup> 2006 and 2007:

	MW				
	31/12/2006	31/12/2005	31/12/2004	30/09/2007	30/09/2006
<b>Wind Energy</b>					
<b>Wind Energy- Spain</b>	<b>3,662</b>	<b>3,258</b>	<b>2,891</b>	<b>4,035</b>	<b>3,395</b>
<b>International Wind Energy</b>					
<b>United States</b>	<b>26</b>	<b>-</b>	<b>-</b>	<b>54</b>	<b>-</b>
<b>United Kingdom</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>	<b>-</b>
<b>Rest of the World</b>	<b>414</b>	<b>236</b>	<b>-</b>	<b>547</b>	<b>348</b>
<b>Total Wind Energy</b>	<b>4,102</b>	<b>3,494</b>	<b>2,891</b>	<b>4,636</b>	<b>3,743</b>
<b>Mini-hydraulic Energy</b>	<b>333</b>	<b>316</b>	<b>315</b>	<b>342</b>	<b>333</b>

	MW				
	31/12/2006	31/12/2005	31/12/2004	30/09/2007	30/09/2006
Other technologies	0 <sup>(1)</sup>	0	-	0 <sup>(1)</sup>	0
<b>Total</b>	<b>4,434</b>	<b>3,810</b>	<b>3,206</b>	<b>4,977</b>	<b>4,076</b>

(1) Includes 0.3 MW of installed photovoltaic solar energy in Spain and Greece.

Of the Company's total installed renewable energy capacity, 90.2%, 91.7% and 92.5% correspond to the power from the Company's wind farms as at December 31<sup>st</sup> 2004, 2005 and 2006. As at September 30<sup>th</sup> 2007, 91.8% of the Company's installed renewable energy capacity comes from the Company's wind farms, compared to 93.1% as at September 30<sup>th</sup> 2006.

Of the Company's total wind energy capacity, 100%, 93.2%, 89.3% and 87% was situated in Spain as at December 31<sup>st</sup> 2004, 2005, 2006 and September 30<sup>th</sup> 2007 respectively, compared to 0%, 6.8%, 10.7% and 13% in international locations on the same dates. International wind energy grew significantly in 2005 and 2006 owing to the integration of the Greek subsidiary, C. Rokas. S.A.

As at September 30<sup>th</sup> 2007, the Company had increased its installed renewable energy by 55.2% since December 31<sup>st</sup> 2006 and by 60.4% since December 31<sup>st</sup> 2004.

#### *Electricity Production*

The following table shows the historical data for the Company's electricity production as at December 31<sup>st</sup> 2004, 2005 and 2006 as well as at September 30<sup>th</sup> 2007:

	GWh				
	31/12/2006	31/12/2005	31/12/2004	30/09/2007	30/09/2006

	31/12/2006	31/12/2005	31/12/2004	30/09/2007	30/09/2006
<b>Total</b>	<b>7,867</b>	<b>7,058</b>	<b>5,413</b>	<b>6,586</b>	<b>5,608</b>

(1) Includes 0.3 MW of installed Photovoltaic Solar Energy in Spain and Greece.

Of the Company's total electricity production, 89.5%, 91.7% and 93.3% comes from the Company's wind farms as at December 31<sup>st</sup> 2004, 2005 and 2006. At as September 30<sup>th</sup> 2007, 93.2% of the Company's production of electricity was derived from the Company's wind farms, compared to 92.4% as at September 30<sup>th</sup>, 2006.

Of the Company's total wind energy production, 100%, 96.4% and 90.4% was generated in Spain as of 31<sup>st</sup> December 2004, 2005, and 2006 respectively, compared to 0%, 3.6% and 9.6% generated internationally as at the same dates. During the nine-month period ending September 30<sup>th</sup> 2006, the Company generated 90.5% of its wind production in Spain and 9.5% at an international level. On the other hand, during the nine month period ending September 30<sup>th</sup> 2007, the Company generated 87.3% of its wind energy production in Spain and 12.7% at an international level.

The Company increased its electricity production by 45.3% between December 31<sup>st</sup> 2004 and December 31<sup>st</sup> 2006, increasing its wind energy production by 51.2% during the same period.

***Regulatory framework and energy remuneration mechanisms.***

The Company's renewable energy projects depend heavily on national and international policies for the support of renewable energy development. In this way, the ability of IBERDROLA RENOVABLES to generate profitability in the different geographical markets where it operates depends directly on the national government policies and international policies that are implemented in order to promote the development of renewable energies. (For a more detailed description of the regulatory framework and policies for the support of renewable energies, please refer to section 5.1.4 of this Prospectus).

The following table shows the evolution of the average prices per MWh for each one of the businesses of the Company in the different geographical markets where it operates for the period from January 1<sup>st</sup> 2004 to September 30<sup>th</sup> 2007:

	Euros/MWh				
	31/12/2006	31/12/2005	31/12/2004	30/09/2007	30/09/2006
<b>Wind Energy</b>					
<b>Wind Energy- Spain</b>	<b>90.8</b>	<b>80.3</b>	<b>63.0</b>	<b>76.6</b>	<b>95.4</b>
<b>International Wind Energy</b>	<b>75.5</b>	<b>74.0</b>	<b>-</b>	<b>75.7</b>	<b>68.2</b>

	Euros/MWh				
	31/12/2006	31/12/2005	31/12/2004	30/09/2007	30/09/2006
United States	-	-	-	55.8	-

Other technologies	440.4	-	-	476.1	440.4
<b>Total</b>	<b>88.4</b>	<b>79.0</b>	<b>60.9</b>	<b>75.1</b>	<b>91.7</b>

In Spain, the evolution of average electricity prices depends on the variations of the market prices, the regulatory framework and the remuneration mechanism chosen by the electrical energy producer.

Market prices have evolved in the following way:

- 2004: As in other markets, average electricity prices increased progressively from 25 Euros per MWh to 40 Euros per MWh, in line with the increase in oil prices. This tendency was experienced to a greater extent in Spain due to the low hydroelectric production in 2004.
- 2005: Average electricity prices continued to increase, reaching approximately 70 Euros per MWh, as a result of growing oil prices and in particular the growth of the pricing for CO<sup>2</sup> emission rights (introduced for the first time in the European Union in 2005).
- 2006: Average market prices began to fall in the month of March reaching 50 Euros per MWh, reaching € 40 per MWh by the end of the year owing mainly to the reduction in the pricing for CO<sup>2</sup> emission rights. In Spain, the fall in market prices was emphasised by the increase in hydroelectric production in 2004.

January-September 2007: Market prices have continued to fall although to a lesser extent than in 2006, in line with the evolution of the pricing for CO<sup>2</sup> emission rights. This decrease has amounted to approximately 15.6% between December 31<sup>st</sup> 2006 and September 30<sup>th</sup> 2007.

During the period from January 1<sup>st</sup> 2004 to September 30<sup>th</sup> 2007, the Company has opted for different energy remuneration mechanisms, depending on the regulatory system in place at a given time.

- 2004: In March the Royal Decree 436/2004 of March 12<sup>th</sup> came into force, establishing the methodology for the updating and systemisation of the juridical and economical system for the activity of electrical energy production in a special system (“**Royal Decree 436/2004**”), that establishes the system of opting for a regulated tariff or the current market prices. Once the new system had come into force, the Company chose the regulated tariff option for all of its facilities, increasing its production turnover, although a part of the total electricity sold in 2004 was sold in accordance with the system previous to Royal Decree 436/2004.
- 2005: Market prices were higher in 2005, due to which the market price option provided a greater return. Therefore, since the facilities had passed the mandatory one year period, during which, in accordance with Royal Decree 436/2004, the same option must be maintained, the Company decided to sell it electricity freely in the marketplace.
- 2006: All of the Company’s facilities kept to the market price option. The premiums associated with the market prices evolved in line with the regulated tariffs. The fact that all of the Company’s facilities were covered under the market price option meant that the average price of the electricity sold in 2006 was greater than that of the electricity sold in 2005, although the prices were lower than that of in 2006.

January-September 2007: The Company’s wind farms continue to operate under the market price system and the premium levels remain the same as in 2006. Although market prices have decreased, the remuneration from selling electricity freely in the marketplace continues to be greater than that of the regulatory tariff. In May 2007, the Royal Decree 661/2007, of May 25<sup>th</sup> was passed, which regulates the activity of electrical energy production under a special system (“**Royal Decree 661/2007**”) which has not affected the Company’s electricity production remuneration during the nine-month period ending September 30<sup>th</sup> 2007. Royal Decree 661/2007 will mainly affect the remuneration of those facilities that begin operations as of January 1<sup>st</sup> 2008, as well as the those facilities that were operating previous to this date and remain under the market price option from 2012 onwards. (Refer to the previous section 5.4.1 of the Prospectus.

The following table shows the evolution of the fixed tariff and the average prices of electricity sold freely on the market in Spain for the period January 1<sup>st</sup> 2004 to September 30<sup>th</sup> 2007:

Average Prices	Euros/MWh				
	2004	2005	2006	30/09/2006	30/09/2007
Regulated Tariff	67,11	68,05	67,92	68,9	68,9
Market Price	69,20	93,78	91,96	96,98	77,00

Average Prices	Euros/MWh				
	2004	2005	2006	30/09/2006	30/09/2007
Regulated/Market Differential	3.1%	37.8%	35.4%	40.4%	11.8%

### *Exposure to interest rates*

Our electrical energy generating facilities are mainly financed through debt. As at December 31<sup>st</sup> 2004, 2005 and 2006 our net financial debts was 2,329.2 million Euros, 2,654.6 million Euros, and 3,032.7 million Euros respectively and 3,755.1 million euros as at September 30<sup>th</sup> 2007. A large part of the 2006 debt is indexed to variable interest rates, generally in reference to in EURIBOR. As at December 31<sup>st</sup> 2006 and as at September 30<sup>th</sup> 2007, 39.8% and 60% respectively of the Company's debt was indexed to variable interest rates, while 52% and 36.3% respectively consisted of fixed interest rate debt.

### *Treating Derivatives*

The Company initially accounts for derivative financial instruments at their acquisition value and after that at their market value. The differences between the acquisition value and the market value of the financial instruments are accounted for as losses or profits in the Companies results, except in those cases when the financial instrument is accounted for as an instrument to cover cash or to cover an investment which has been made as part of an operation abroad. The market value of the derivatives that are quoted in an organised market is their price at the end of a day's market session when the balance of situation is prepared. In addition, in order to value the derivatives that are not quoted in an organised market, assumptions are used based on the day's market conditions when such balance is prepared. The financial instruments of the Company as at 31<sup>st</sup> December 2004, 2005 and 2006 were valued at 78.6 million Euros, 73.5 million Euros and 2.5 million Euros respectively. As at 30<sup>th</sup> September 2006 and 2007, the financial instruments of the Company were valued at 4.4 million Euros and 0.8 million Euros respectively. In 2005 the Company had derivative instruments contracted to cover the bank financing of one of its subsidiaries in amount of 60.4 million Euros. These derivatives were contracted prior to 2004. Following that, the bank financing received by the subsidiary was substituted for financing from Iberdrola, S.A. and these coverage derivatives for the bank financing were reclassified in the Company accounts as non-coverage derivative instruments, since the Company would have incurred greater costs if it were to have had cancelled the derivatives at that moment. In 2006, the market value of the derivatives decreased, and the Company decided to cancel them, recognising a profit of 23.5 million Euros.

### Factors that affect the Company's future operating results.

#### *Restructuring Transaction*

The Company's operating results will be affected as a consequence of the integration into the Company of certain assets of the Scottish Power Group, mainly dedicated to the

renewable energy business. See parts 19.1 and 20.2 of this Prospectus for more details about the Restructuring Transaction and to examine the pro-forma financial information prepared for the Restructuring Transaction respectively.

This integration will have a significant future impact on the Company's operating results, including effects of the exchange rates, increases in depreciation and redemptions and changes in the value of the derivative financial instruments.

### ***Exchange Rates***

As a result of the Restructuring Transaction and the Company's international expansion, the Company will be exposed to increased exchange rate risks, since revenues and costs are designated in the currency of the jurisdiction in which it operates. The Company protects itself against these risks by mainly compensating costs and revenues in the same currencies.

In addition, the balances and results of the Company's subsidiaries are made in the currency of their jurisdiction. In the case when this is not the Euro, the Company must convert this currency into Euros to be able to integrate it into the Company's financial results at the exchange rate applicable at the end of the fiscal year.

Following the Restructuring Transaction, these risks will increase, and it will affect the operating results as well as the comparison of results from different periods.

### ***Depreciation and redemption of assets***

Following the Restructuring Transaction, the assets of the US companies integrated into IBERDROLA RENOVABLES will follow the Company's asset depreciation policies, applying a depreciation period of 20 years to the wind farms, which are normally depreciated using the linear method, minus the value of the wear of the asset, during the useful life of the asset.

In the same way, as a consequence of the Restructuring Transaction and the corresponding price distributions, the redemption of the Scottish Power assets is being carried out using a depreciation period of 20 years of useful life and a the increase in the reasonable value of such assets will mean a significant impact on the amortisation costs and the Company's future operating results.

### ***Value of the derivative instruments***

The assets of the US Companies incorporated in the scope of consolidation of the Company following the Restructuring Transaction, are party to a high number of derivative commodity contracts which have a significant impact on its financial revenues. These companies account for derivatives related to the buying and selling of energy using the market price valuation method. The application of the Company's policies for financial derivatives may have an significant impact on the Company's operating results.

### ***Proportional Integration Method***

The US Companies acquired as a result of the Restructuring Transaction, have non majority participations in joint ventures, all of them produce renewable energy

procedures. These companies consolidated these joint ventures by means of the equity method. Following the Restructuring Transaction, the Company, in accordance with IFRS principles, will consolidate these joint ventures using the proportional consolidation method.

### ***Investment Structures***

The US companies have underlined a series of investment structures which imply cash outlays payable to these companies which are accounted for as deferred revenue by the Company, (see section 6.1.1 of this Prospectus). The implementation of the Company's derivative accounting principles for these structures could have a significant impact on present and future investment structures. It is foreseen that in the future, the investment structures will have the following impact on the Company's results:

- The cash outlays and the promissory notes in the context of the Aeolus structures will be accounted for as "capital instruments with financial debt characteristics."
- The amounts relating to the PTCs that are received annually are accounted for as revenues for the period associated to the corresponding production of energy.
- The interests to be paid are entered into accounts as "instruments of capital with financial debt characteristics."
- The interests from the promissory notes are accounted for as interest revenues to be collected in the period from which they are derived. The value of the interests to be collected for promissory notes of the Aeolus structures amounted to 4.4 million US dollars as at 31<sup>st</sup> March 2007.
- The minority interests of the investors are accounted for in the balances on the date of the end of the operating period.
- The income from the promissory notes and from the interest from the "instruments of capital with financial debt characteristics" are accounted for as permanent differences in the determination of the corporate tax.

### **Operating results**

The following table includes the historical revenues and expenses of the Company (consolidated under IFRS) for each of the indicated periods:

(€ 000s, except for percentages)	30/09/2007	30/09/2006	%	2006	2005	%	2004	%
	(unaudited)	(unaudited)	Change			Change	(unaudited)	Change

Historically the Company has not prepared financial information based on the business segments in which it operates. Therefore, the historical consolidated financial information of the Company corresponding to the fiscal years ended 31 December 2005 and 2006, the unaudited historical consolidated financial information corresponding to the fiscal year ended 31 December 2004, included exclusively for comparative purposes, as well as the financial information corresponding to the nine month periods ended 30 September 2006 and 2007, included exclusively for comparative purposes, have not been prepared based on business segments or countries. In 2007, because of the Offer, the Company organised its activities by business sector and it intends to report its results in accordance with the referenced business sectors in the future. The criteria for segmenting the Company's business are: (i) type of business and (ii) geographic segmentation of the wind business, as described in detail below.

## ➤ BUSINESS SEGMENTS

The Company's activities are organised in three business segments: (i) wind energy, (ii) mini-hydro energy and (iii) other business. The "Other Business" section includes the revenue and expenses deriving from the Company's solar energy facilities and from other activities not directly related to the generation of electricity from renewable energy sources, such as trading of green certificates of the Company's United States subsidiary, Community Energy Inc., and the electromechanical constructions of the subsidiary located in Greece, C. Rokas, S.A.

Set forth below, as complementary information, are the following tables containing unaudited financial information for the periods indicated in each of them:

## ➤ GEOGRAPHICAL MARKETS

The Company has structured its principal business, wind energy, into the following geographical markets: (i) Spain and (ii) International. The International market, in turn, is divided into the following jurisdictions: (i) the United States of America (US), (ii) the United Kingdom and Ireland (UK) and (iii) the Rest of the World, which includes Portugal, Germany, Poland, Hungary, Estonia, France, Italy, Greece and Brazil.

The following tables contain unaudited financial information regarding the results of the wind business for each of the indicated periods:

30 September 2007 (unaudited)	% of Revenues	Total	INTERNATIONAL WIND			
			Spain	US	United Kingdom	Rest

### Comparison of nine-month periods ended 30 September 2006 and 2007, in accordance with International Financial Reporting Standards ("IFRS")

- **Revenue**

Revenue decreased by 3.9%, going from 514,417 thousand euros in September 2006 to 494,402 thousand euros in September 2007. This drop is principally due to the decrease in revenue from wind generation, which went from 480,931 thousand euros in September 2006 to 469,274 thousand euros in September 2007, as well as a fall in mini-hydro generation revenue, which went from 33,439 thousand euros to 25,027 during the periods analysed.

On the other hand, revenue from other businesses increased, going from 47 thousand euros in September 2006 to 101 thousand euros in September 2007.

- **Business sectors**

The following table shows the change in revenue obtained by the Company's principal businesses between September 2006 and 2007:

30 September

	2007 (unaudited)	2006 (unaudited)	% Change
Revenue	(in thousands of euros)		
Wind	469,274	480,931	-2.4%
Mini-hydro	25,027	33,439	-25.1%
Other Businesses	101	47	114.9%
<b>Total</b>	<b>494,402</b>	<b>514,417</b>	<b>-3.9%</b>

## Wind business

Revenue from wind generation decreased by 2.4%, going from 480,931 thousand euros in September 2006 to 469,274 thousand euros in September 2007. This drop is principally due to the decrease in revenue from wind generation in Spain, which went from 447,240 thousand euros in September 2006 to 410,317 thousand euros in September 2007. However, there was an increase in international wind revenue of 75.1%, mostly from the “rest of the world” section, going from 33,691 thousand euros in September 2006 to 56,377 thousand euros in September 2007.

### *Wind business revenue broken down by geographic markets*

The following table shows the change in revenue obtained between the period September 2006 and 2007 by the wind business broken down by the geographical markets in which the Company operates.

Wind Business Revenue	30 September		% Change
	2007 (unaudited)	2006 (unaudited)	
	(in thousands of euros)		
Spain	410,317	447,240	-8.3%
International	58,958	33,691	75.1%
US	2,581	0	-

<b>Total</b>	<b>6,136</b>	<b>5,181</b>	<b>18.4%</b>
--------------	--------------	--------------	--------------

The following table shows the evolution of the average prices of the electric energy produced by the wind business between September 2006 and 2007, broken down by the geographical markets in which the Company operates:

Average Prices	30 September		
	2007 (unaudited)	2006 (unaudited)	% change
	(in Euros/MWh)		
Spain	76.6	95.4	-19.7%
International	75.7	68.2	11.0%
US	55.8	-	-
United Kingdom	-	-	-
Rest of the World	76.9	68.2	12.7%
<b>Total</b>	<b>76.4</b>	<b>92.8</b>	<b>-17.7%</b>

*Spain.* Spain represented 93.0% and 87.4% of the total revenue generated by the wind business in the months of September 2006 and September 2007, respectively. Revenue from wind generation in Spain decreased by 8.3%, from 447,240 thousand euros in September 2006 to 410,317 thousand euros in September 2007. This evolution is mostly due to the decrease in revenue of 88,279 thousand euros which is a result of the decrease in average electricity prices in Spain, which went from 95.4 euros per MWh to 76.6 euros per MWh, a 20% drop, mainly because of the decreasing evolution of the price of CO2 emission rights.

However, on average, the market prices were 40.4% and 11.8% higher compared to the fixed rate prices in September 2006 and September 2007, respectively. As a result, 100% was sold under the market mode during the nine months from September 2006 and 2007. The impact on prices is calculated by determining the difference between the price in a given month of the current year and the price in the same month of the previous year, then multiplying the result by output in the month of the current year. This impact is calculated monthly for each wind farm until the end of the year, at which point global data for the entire year are calculated.

The drop in revenue from wind generation was partially compensated by an increase of 51,356 thousand euros in revenue in Spain, due to the impact on output. The increase in the production of wind energy is mainly due to the 19% increase in the installed wind capacity in Spain, which went from 3,395 MW in September 2006 to 4,035 MW in September 2007. The impact on output is calculated by determining the difference between the output in a given month of the current year and the same month of the previous year, then multiplying the result by the price in the month of the current year. This impact is calculated monthly for each wind farm until the end of the year, at which point global data for the entire year are calculated.

*International.* Revenue from international wind generation increased by 75.1%, from 33,691 thousand euros in September 2006 to 58,958 thousand euros in September 2007, due to the expansion of our international operations, the increase in wind energy production and the stability of international wind energy prices.

The increase in international wind revenue by 25,267 thousand euros is basically due to a 57.7% increase in the production of international wind energy, going from the 494 GWh which was produced in September 2006 to the 779 GWh which was produced in September 2007. This production increase can be explained by the increase in international installed capacity, which held 253 MW more in September 2007 versus September 2006, principally due to installed wind capacity increases in countries such as Poland, Germany, Portugal, France, the United States and Greece.

The average price of internationally generated wind electricity increased from 68.2 euros per MWh in September 2006 to 75.7 euros per MWh in September 2007, due to our entrance in new countries with new regulatory frameworks and tax regimes.

#### **Mini-hydro business**

Revenue from the mini-hydro segment decreased by 25.1%, from 33,439 thousand euros in September 2006 to 25,027 thousand euros in September 2007. This drop occurred as a result of mini-hydro prices that were lower in September 2007 (55.6 euros per MWh) than in September 2006 (78.3 euros per MWh). This decrease in average prices was due to a drop in the market prices, which affected the compensation of all facilities under the ordinary scheme, and practically all the facilities under the special regime, which had opted to sell the electricity produced at market price plus a prime margin.

Mini-hydroelectric energy production increased by 5.4%, from 427 GWh in September 2006 to 450 in September 2007 due to the increase in rainfall.

#### **Other Businesses**

The Company obtained a 114.9% increase in revenue from other businesses, going from 47 thousand euros in September 2006 to 101 thousand euros in September 2007. Most of this increase comes from the revenue from other international business, which obtained 49 thousand euros in revenue in September 2007.

- **Personnel Expenses**

Personnel expenses increased by 66.4%, going from 24,949 thousand euros in September 2006 (4.9% of the company's revenue) to 41,511 thousand euros in September 2007 (8.4% of the Company's revenue).

The following table shows the evolution in the Company's personnel costs broken down by business and the geographic markets in which it operates, as well as in the average weighted staff, during the period between September 2006 and 2007:

Personnel Costs	30 September			30 September	
	2007 (unaudited)	2006 (unaudited)	% change	2007	2006

	(in thousands of euros)			(average no. employees)	
<b>Wind</b>	17,934	11,980	49.7%	523	382
Spain	10,429	8,806	18.4%	367	270
International	7,505	3,174	136.5%	156	112
<b>Mini-hydro</b>	2,708	2,379	13.8%	66	60
<b>Other Businesses</b>	7,635	3,704	106.1%	217	204
<b>Overhead</b>	13,234	6,886	92.2%	48	40
<b>Total</b>	41,511	24,949	66.4%	854	686

Note: In the consolidated annual accounts for 2006 the figure for the arithmetic average non-weighted staff appears.

The increase in personnel expenses was caused by a 49.7% increase in wind business personnel expenses between September 2006 and 2007, principally due to the intensive hiring of new personnel in order to support the international expansion plans and the integration of new acquisitions.

In Other Business, the 3,931 thousand euro (106.1%) increase from September 2006 to September 2007 is due to the increase in payroll needed to establish the overhead for the Company's expansion in the renewable energy business.

- **Capitalisation of personnel costs**

Capitalisation of personnel costs increased by 0.79% from 6,094 thousand euros in September 2006, the equivalent of 1.2% of the Company's revenue, to 6,142 thousand euros in September 2007, which was equivalent to 1.23% of the Company's revenue. This slight increase was due to the increase in international wind projects in September 2007 versus September 2006, which enabled an increase in the capitalisation of international personnel costs.

- **Outside Services**

The following are the most significant items containing Outside Service expenses:

- Operating and Maintenance Costs: all costs related to the conservation, operation and maintenance of the Company's facilities.
- Fees: the costs generated by land occupation, not including the land where the Company's facilities are located.
- Insurance: insurance premiums paid in order to insure Company facilities against possible contingencies that could occur.
- Development Costs: includes the expenses incurred by the Company for prospecting and the development of new renewable facilities in beginning phases.

Expenses related to Outside Services saw an increase by 24.0% from 86,477 thousand euros in September 2006, the equivalent of 16.8% of the Company's revenue, to 107,273 thousand euros in September 2007, which was equivalent to 21.7% of the Company's revenue in said period. The following table represents the evolution of expenses related to outside services between September 2006 and September 2007, broken down by the Company's business and the geographical markets in which the Company operates:

<b>Outside Services</b>			
	2007 (unaudited)	2006 (unaudited)	% change
(in thousands of euros)			
<b>Wind</b>	74,032	63,840	16.0%
Spain	59,089	56,890	3.9%
International	14,943	6,950	115.0%
<b>Mini-hydro</b>	5,825	4,335	34.4%
<b>Other Businesses</b>	745	895	-16.8%
<b>Overhead</b>	26,670	17,406	53.2%
<b>Total</b>	<b>107,273</b>	<b>86,477</b>	<b>24.0%</b>

Outside service expenses in the wind generation segment increased by 16.0%, principally due to the 115.0% increase in outside services on an international level. In Spain, outside service expenses increased by 3.9%, basically due to the greater operating costs of the Company's electrical energy generation facilities (including operation and maintenance, land lease fees and insurance on the facilities). Outside service expenses related to the production of mini-hydro energy saw a 34.4% increase between September 2006 and September 2007, basically due to the expenses from the hydro fees (amounts paid to hydro basins for the exploitation of hydroelectric generation administrative concessions). Finally, overhead from outside services saw a 53.2% increase, going from 17,406 thousand euros in September 2006 to 26,670 thousand euros in September 2007, due to the increase in outside support services as a result of the business expansion.

- **Other operating revenue**

The other operating revenue item saw an 86.2% increase, going from 6,838 thousand euros in September 2006 (1.3% of the company's revenue) to 12,730 thousand euros in September 2007 (2.6% of the Company's revenue), due to an increase in revenue from other wind farm developers which needed to use the Company's substations and lines.

- **Taxes other than the Business Tax**

Taxes other than the Business Tax increased by 19.4%, going from 5,531 thousand euros in September 2006 (1.1% of the company's revenue) to 6,604 thousand euros in September 2007 (1.3% of the Company's revenue). This increase occurred as a result of

the higher local fees and taxes which were paid due to the greater number of wind farms.

- **EBITDA**

EBITDA dropped by 12.8%, going from 410,392 thousand euros in September 2006 (79.8% of the company's revenue) to 357,887 thousand euros in September 2007 (72.4% of the Company's revenue). The following table shows the Company's EBITDA evolution between 30 September 2006 and 30 September 2007, broken down by the Company's business and the geographical markets in which it operates:

	30 September				
	2007 (unaudited)		2006 (unaudited)		% change EBITDA
	EBITDA <sup>(1)</sup> (in thousands of euros)	EBITDA (margin) <sup>(2)</sup>	EBITDA <sup>(1)</sup> (in thousands of euros)	EBITDA (margin) <sup>(2)</sup>	
<b>Wind</b>	381,590	81.3%	407,168	84.7%	-6.3%
Spain	343,001	83.6%	383,292	85.7%	-10.5%
International	38,589	65.4%	23,876	70.9%	61.6%
<b>Mini-hydro</b>	17,683	70.8%	27,600	82.5%	-35.9%
<b>Other Businesses</b>	-2,533	-2.508%	-576	-1.225%	-339.8%
<b>Overhead</b>	-31,852	-	-23,800	-	-63.2%
<b>Total</b>	<b>357,887</b>	<b>72.4%</b>	<b>410,392</b>	<b>79.8%</b>	<b>-12.8%</b>

(1) EBITDA represents earnings before interest, taxes, depreciation and amortisation. The EBITDA item is included in this table because it is frequently used by investors and analysts to compare similar companies. However, since not all companies calculate EBITDA using the same parameters, EBITDA may not be comparable with the EBITDA of other similar companies. EBITDA is not an item which is recognised under International Financial Reporting Standards (IFRS) and should not be considered an alternative to operating profit, operating income or any other operating profitability indicator of a company recognised by IFRS. EBITDA should not under any circumstances be compared with operating income, net income or operating cash flows and should not be used as an indicator of future or past profitability or liquidity.

(2) EBITDA margin equals the EBITDA divided by sales.

As can be appreciated in the table above, wind generation EBITDA decreased by 6.3% from September 2006 to September 2007, mainly as a result of the drop in wind EBITDA in Spain, which fell 10.5%, going from 383,292 thousand euros in September 2006 (85.7% of the Company's revenue) to 343,001 thousand euros in September 2007 (83.6% of the Company's revenue). Moreover, mini-hydro EBITDA fell 35.9% in September 2007 (27,600 thousand euros) when compared to September 2006 (17,683). The negative overhead EBITDA is due to the increase in the overhead expenses as a

result of the greater use of outside support services which were needed for the business expansion.

- **. Depreciation and provisions**

The depreciation and provisions item increased by 14.4%, from 137,568 thousand euros in September 2006 to 157,317 thousand euros in September 2007. This increase was mainly due to the increase in the Company's wind farm operating assets that occurred in 2007.

- **Financial revenue**

Financial revenue decreased by 64.5%, going from 25,417 thousand euros in September 2006 (4.9% of the Company's revenue) to 9,033 thousand euros in September 2007 (1.8% of the Company's revenue). This was basically due to the settlement of non-hedging derivatives, which amounted to 19,762 thousand euros in September 2006 and 77 thousand euros in September 2007.

- **Financial expenses**

Financial expenses increased by 68.7%, going from 69,668 thousand euros in September 2006 (13.5% of the Company's revenue) to 117,562 thousand euros in September 2007 (23.8% of the Company's revenue), which was due to the increase in bank debt and intragroup debts need to finance the Company's increased installed capacity.

- **Business Tax**

The Business Tax expense decreased by 51.7%, from 74,406 thousand euros in September 2006 to 35,930 thousand euros in September 2007, as the tax rate was 32.6% in September 2006 and 39.3% in September 2007. The tax bill was higher in September 2007, basically because of consolidation adjustments in the amount of 7,584 thousand euros which were included in the period in order to reduce the differed tax which arose from the elimination of intragroup operations through a sale of assets. Without this correction, the tax rate in September 2007 would have been 31%.

- **Minority interests**

The minority interests item dropped by 32.9%, going from 10,120 thousand euros in September 2006 (2.0% of the revenues of the company) to 6,792 thousand euros in September 2007 (1.4% of the revenues of the company). This drop is mostly due to a decrease in the profits obtained by some companies in which we hold minority interests.

- **Net profit**

Net profit decreased by 66.2%, going from 144,024 thousand euros in September 2006 (28.0% of the Company's revenue) to 48,739 thousand euros in September 2007 (9.9% of the Company's revenue).

### **Comparison of the fiscal years which ended 31 December 2005 and 2006**

- **Revenue**

Revenue increased by 24.8%, from 557,256 thousand euros in 2005 to 695,635 thousand euros in 2006, owing principally to the increase in revenue from wind generation, both in the domestic and in the international market, by 136,216 thousand euros, going from 518,201 thousand euros in December 2005 to 654,417 in December 2006, which resulted in an increase of 26.3%, and the increase in mini-hydro generation revenue of 2,106 thousand euros, which resulted in an increase of 5.4%.

➤ **Business sectors**

The following table shows the change in revenue obtained by the Company's principal businesses between the 2005 and 2006 fiscal years:

<b>31 December</b>			
	2006	2005	% change
(in thousands of euros)			
<b>Revenue</b>			
Wind	654,417	518,201	26.3%
Mini-hydro	41,161	39,055	5.4%
Other Businesses	57	-	-
<b>Total</b>	<b>695,635</b>	<b>557,256</b>	<b>24.8%</b>

**Wind business**

The revenues from the wind business increased by 26.3%, from 518,201 thousand euros generated in 2005 to 654,417 thousand euros generated in 2006. The increase in revenue from the wind business basically resulted from the increase in revenue generated in Spain (20.0%), from 501,064 thousand euros in 2005 to 601,201 thousand euros in 2006. Revenue also saw an increase of up to 210.5% in the Rest of the World, from 17,137 thousand euros in 2005 to 53,217 thousand euros in 2006.

*Wind business revenues by geographical market*

The following table shows the change in revenue obtained by the wind business from 2005 to 2006 in the geographical markets in which the Company operates:

<b>Wind Business Revenues</b>		<b>31 December</b>	
	2006	2005	% change
(in thousands of euros)			
Spain	601,201	501,064	20.0%

Wind Business Revenues	31 December		
	2006	2005	% change
(in thousands of euros)			
<b>International</b>	53,217	17,137	210.5%
US	-	-	-
United Kingdom	-	-	-
Rest of the World	53,217	17,137	210.5%
<b>Total</b>	<b>654,417</b>	<b>518,201</b>	<b>26,3%</b>

The following table shows the change in installed capacity between fiscal years 2005 and 2006, broken down by the geographical markets in which the Company operates:

Installed Capacity	31 December		
	2006	2005	% change
(In MW)			
<b>Spain</b>	3,662	3,258	11.2%
<b>International</b>	440	236	86.4%
US	26	—	—

Rest of the World	414	236	75.4%
<b>Total</b>	<b>4,102</b>	<b>3,494</b>	<b>17.4%</b>

The following table shows the change in electric energy produced by the wind business between fiscal years 2005 and 2006, broken down by the geographical markets in which the Company operates:

Electric Energy Production	31 December		
	2006	2005	% change
(In GWh)			
<b>Spain</b>	6,624	6,240	6.2%
<b>International</b>	705	232	203.9%

US	—	—	—
United Kingdom	—	—	—
Rest of the World	705	232	203.9%
<b>Total</b>	<b>7,329</b>	<b>6,471</b>	<b>13.3%</b>

The following table shows the change in the average prices for the electricity produced by the wind business in the geographic areas in which the Company operates for the 2005 and 2006 fiscal years:

Average prices	31 December		
	2005	2006	% change
	(in €/MWh)		
<b>Spain</b>	90.8	80.3	13.1%
<b>International</b>	75.5	74.0	2.0%
U.S.	-	-	-
UK	-	-	-
Rest of World	75.5	74.0	2.0%
<b>Total</b>	<b>89.3</b>	<b>80.1</b>	<b>11,5%</b>

*Spain.* Spain represented 96.7% and 91.1% of the revenues generated by the wind business in 2005 and 2006, respectively. The revenues generated by the wind business in Spain increased by 20% from 2005 to 2006, from 501.064 thousand euros in 2005 to 601.201 thousand euros in 2006, that is an increase of €100.137 thousand, of which 65.294 thousand euros arose from the increase in average prices of electricity generated by the Company's wind facilities. The average price of the electricity generated by the Company's wind facilities in 2006 was 90.8 euros per MWh, an increase of 13% by comparison with the average price of 80.3 euros per MWh in 2005. The increase in the average price of electricity is primarily the result of the change of compensation system: those of the Company's wind farms that had in 2005 elected to use the regulated tariff system but have not opted to use market prices. Market prices were 37.8% and 35.4% higher than the regulated tariffs in 2005 and 2006, respectively. The impact on prices is calculated by determining the difference between the price in a given

month of the current year and the price in the same month of the previous year, then multiplying the result by output in the month of the current year. This impact is calculated monthly for each wind farm until the end of the year, at which point global data for the entire year are calculated.

Also, of the increase in revenues generated by the wind business in Spain, 34.842 thousand euros resulted from the 6.2% increase in production of electricity generated by the Company's wind facilities, which went from 6,240 GWh produced in 2005 to 6,624 GWh produced in 2006. The increased output of wind energy was essentially attributable to the 12.4% growth in installed wind capacity in Spain, which rose from 3,258 MW at 31 December 2005 to 3,662 MW at 31 December 2006. The impact on prices is calculated by determining the difference between the price in a given month of the current year and that of the same month of the previous year, then multiplying the result by the price in the month of the previous year. This impact is calculated monthly for each wind farm until the end of the year, at which point global data for the entire year are calculated.

*International.* The revenues generated by the Company's wind business in the international market increased by 210.5% from 2005 to 2006, from 17.137 thousand euros in 2005 to 53.217 thousand euros in 2006, as a result of increased production of electricity by the Company's wind facilities and an increase in international electricity prices, which nonetheless was less than the price increase in Spain. The increase in electricity production of the Company's wind facilities resulted from an increase in installed capacity at the international level, which increased by 204 MW (86%) from 2005 to 2006, due mainly to the consolidation for accounts purposes of Greek subsidiary C. Rokas, S.A. and to the increase in installed capacity in Germany, Brazil, the United States of America, France, Greece, Poland and Portugal.

### **Mini-hydro business**

The revenue generated by the Company's mini-hydro business increased by 5.4% from 2005 to 2006, from 39.055 thousand euros in 2005 to 41.161 thousand euros in 2006. This increase was principally due to the increase in average prices of electricity produced by the Company's mini-hydro facilities.

The average price of electricity produced by the Company's mini-hydro facilities was 66.63 euros per MWh in 2005 and 76.48 euros per MWh in 2006. This increase in average price was due in part to the combination of the price of mini-hydro electricity under the special system and the price under the ordinary system and in part to an increase in prices that affected the compensation of all facilities under the ordinary system and almost all of the Company's facilities under the special system that had opted to sell the electricity they generate under the regulated tariff system. On a parallel basis, in 2006 there was an 8.2% decrease in electricity produced by the Company's mini-hydro facilities, which decreased from 586 GWh produced in 2005 to 538 GWh produced in 2006, principally due to decreased rainfall in 2006, a year of low rainfall.

### Other Businesses

The Company had revenue of 57 thousand euros generated from its photovoltaic solar facilities, an activity the Company began to develop in 2006.

- Personnel Expenses

Personnel expenses increased by 76.4% from 2005 to 2006, from 21.651 thousand euros, equivalent to 3.9% of the Company's revenues, to 38.186 thousand euros in 2006, equivalent to 5.5% of the Company's revenues.

The following table contains the evolution of the Company's personnel costs based on the businesses and geographical markets in which it operates, as well as the average weighted staff from 2005 to 2006:

Personnel Costs	31 December		% change	31 December	
	2006	2005		2006	2005
	(€ 000,000s)			(average no, employees)	
<b>Wind</b>	17,607	9,385	87.6%	396	251
Spain	11,925	8,501	40.3%	272	213
International	5,682	884	542.8%	124	38
<b>Mini-hydro</b>	3,256	3,060	6.5%	60	59
<b>Other Businesses</b>	6,357	2,403	164.5%	207	30
<b>Overhead</b>	10,966	6,803	61.2%	48	36
<b>Total</b>	<b>38,186</b>	<b>21,651</b>	<b>76.4%</b>	<b>711</b>	<b>376</b>

Note: in the annual consolidated accounts of 2006 the figure for the arithmetic average non-weighted staff appears.

The increase in personnel expenses was the result of an 87.6% increase in personnel expenses in the wind business from 2005 to 2006, due mainly to the rapid recruitment of new staff necessary to provide cover for international expansion plans and the integration of new acquisitions. The increase also reflects the significant rise in personal costs in the international wind business market, which was 542.8% from 2005 to 2006, as a result of the greater number of wind farms operated by the Company in the international market, and the higher salaries of international personnel.

Besides, personnel costs related to the production of wind energy in Spain increased by some 3,424 thousand euros, as a result of the increase in the number of employees, in keeping with the future growth of the Company.

In Structure, the increase of €4.163 thousand, or 61.2%, results on the one hand from the incorporation of the staff of Community Energy Inc. and, on the other hand, from incorporation of 100% of the expenses of the Rokas Group, since during the 2005 fiscal year there was full consolidation starting with the final quarter.

The Company's personnel costs related to the mini-hydro business increased by 196 thousand euros from 2005 to 2006.

- Capitalisation of personnel costs

Capitalisation of personnel costs increased by 43.6% from 2005 to 2006, from 5.656 thousand euros in 2005, the equivalent of 1% of the Company's revenues, to 8.125 thousand euros in 2006, equivalent to 1.2% of the Company's revenues. The personnel costs of employees engaged in the development and construction of the Company's facilities increased as a result of increased construction of facilities in 2006.

- Outside Services

Expenses related to outside services increased by 47.5%, from 77.367 thousand euros in 2005, equivalent to 13.9% of the Company's revenues, to 114.105 thousand euros in 2006, equivalent to 16.4% of the Company's revenues in that period. The following table shows the evolution of expenses related to outside services from 2005 to 2006, based on the Company's businesses and the geographical markets in which it operates:

Outside Services	31 December		
	2006	2005	% change
	(€ .000s)		
<b>Wind</b>	81,637	61,558	32.5%
Spain	72,751	59,223	23.0%
International	8,886	2,335	280.8%
<b>Mini-hydro</b>	6,108	4,169	46.5%
<b>Other Businesses</b>	1,069	172	521.5%
<b>Overhead</b>	25,291	11,468	120.5%
<b>Total</b>	<b>114,105</b>	<b>77,367</b>	<b>47.4%</b>

The cost of outside wind services increased by 32.5% in the period from 2005 to 2006, principally due to a 23% increase in outside services in Spain during the same period

and a 280.8% increase in outside services at international level. The increase in outside services in Spain in 2006 basically was a result of the increase in operating costs of the Company's electricity generation facilities (including operating and maintenance, land lease fees and insurance for the facilities). The Other Businesses line also increased significantly, from 172 thousand euros in 2005 to €1.069 thousands in 2006, mainly as a result of the Company's international expansion. In addition, outside services related to the Company's mini-hydro facilities increased by 46.5% from 2005 to 2006. Central outside services increased by 120.5% due to an increase in the scope of services at Iberdrola, S.A. and the increase in outside support services as a result of the Company's business expansion.

- Other operating income

The other operating income line item increased by 74.8% from 2005 to 2006, increasing from 8.044 thousand euros in 2005, equivalent to 1.4% of the Company's revenue, to 14.064 thousand euros in 2006, equivalent to 2% of the Company's revenue. The increase was principally the result of payments received as a result of the assignment of usage rights to the Company's mini-hydro facilities to third parties, the integration of the metallic structure construction business of the Greek subsidiary, Rokas, S.A., which was consolidated within the IBERDROLA RENOVABLES Group from the last quarter of 2005, and the incorporation of the green certificates trading business of the United States subsidiary, Community Energy Inc., a company acquired in 2006.

- Taxes

Taxes other than Corporate Income Tax decreased by 38.1% over the period covered by the 2005 and 2006 fiscal years, from 14.302 thousand euros in 2005 to 8.848 thousand euros in 2006. The difference between the 2005 and 2006 fiscal years arises from the fact that in the 2005 fiscal year a provision was created in an amount of 8.109 thousand euros based on actions brought by the excise tax authorities regarding the Electricity Excise Tax for the 2000 and 2003 fiscal years.

- EBITDA

EBITDA increased by 21.6% from 457.636 thousand euros in 2005, equivalent to 82.1% of the Company's revenues, to 556.685 thousand euros in 2006, equivalent to 80% of the Company's revenues. The following table shows the evolution of the Company's EBITDA over the 2005 and 2006 fiscal years, based on the businesses engaged in by the Company and the geographical markets where it operates:

	31 December				
	2006		2005		% change EBITDA
	EBITDA <sup>(1)</sup> (€ 000s)	EBITDA (margin) <sup>(2)</sup>	EBITDA <sup>(1)</sup> (€ 000s)	EBITDA (margin) <sup>(2)</sup>	
<b>Wind</b>	556,876	85.1	440,672	85.0	26.4%

	31 December				
	2006		2005		
Spain	517,464	86.1	426,613	85.1	21.3%
International	39,412	74.1	14,059	82.0	N/A
Mini-hydro	33,264	80.8	34,032	87.1	(2.1%)
Other Businesses	(485)	850.9	850,9	0	(147.0%)
Overhead	(32,970)	N/A	(18,100)	0	(82.3%)
<b>Total</b>	<b>556,685</b>	<b>80.0</b>	<b>457,636</b>	<b>82.1</b>	<b>21.6%</b>

(1) EBITDA corresponds to earnings before interest, taxes, depreciation and amortisation. The EBITDA heading is included in this table because it is frequently used by investors and analysts to compare similar companies. However, since not all companies calculate EBITDA using the same parameters, EBITDA may not be comparable with the EBITDA of other similar companies. EBITDA is not a heading recognised under International Financial Reporting Standards (IFRS) and should not be considered an alternative to operating profit, operating income or any other indicator of operating profitability of a company recognised by IFRS. EBITDA should not under any circumstances be compared with operating income, net income or operating cash flows and should not be used as an indicator of future or past profitability or liquidity.

(2) EBITDA margin corresponds to EBITDA divided by sales.

The increase in EBITDA is principally due to the 26.4% increase in the EBITDA of the wind business from the 2005 fiscal year to the 2006 fiscal year and, above all, the increase in the EBITDA of the Spanish wind business, which increased by 21.3% in 2006. EBITDA generated by the Company in Spain accounted for 96.8% and 92.9% of total EBITDA generated by the wind business in the years ended 31 December 2005 and 2005 respectively.

- Depreciation and provisions

The depreciation and provisions line item increased by 21.7%, from 149.889 thousand euros at 31 December 2005 to 182.435 thousand euros at 31 December 2006. This increase was the result of the increase in the operating assets of the Company's wind farms that occurred in 2006.

- Financial income

Financial income increased by 619%, from 4.423 thousand euros in 2005 to 31.802 thousand euros in 2006. This increase basically was due to an additional 23.542 thousand euros for the settlement of non-hedging derivatives. The costs related to the line item for property, plants and equipment in use increased by 212.4% to 6.052 thousand euros in 2006, principally due to the increase in debt used to finance development and construction of new facilities in 2006. Likewise, there was a decrease of 711 thousand euros in revenue from other tradable financial instruments.

- Financial expenses

Financial expenses increased by 45.9%, from 68.780 thousand euros in 2005 to 100.374 thousand euros in 2006. At 31 December 2006, expenses associated with financial debt totalled €98.709 thousand, of which €65.893 thousand corresponded to intragroup debt and €32.816 thousand to external debt, while at 31 December 2005 expenses associated with financial debt came to €61.257 thousand, of which €38.054 thousand corresponded to intragroup debt and €23.203 thousand to external debt. This increase is basically due to the increase in intragroup debt and external debt used to finance greater installed capacity, which rose from €2,270,916 thousand to 2,565,559 thousand and from €371.560 thousand to €591.090 thousand, respectively, between 31 December 2005 and 31 December 2006.

In addition, the change in the market value of non-hedging derivatives increased financial expenses by the amount of 12.027 thousand euros in 2005, and €4.925 thousand in 2006. Likewise, the hedging of interest rates for cash flow has resulted in a lower financial expenditure in 2005 and 2006 of €5.890 thousand and €3.902 thousand respectively.

- Corporate Income Tax

The expense deriving from Corporate Income Tax increased by 17.8% from 2005 to 2006, from 90.164 thousand euros at 31 December 2005 to 106.240 thousand euros at 31 December 2006, the effective tax rate being 37% in 2005 and 34.6% in 2006. The 37% effective tax rate in 2005 resulted from correction of certain investment deductions in the amount of 5.188 thousand euros taken in prior fiscal years. Absent this correction, the effective tax rate in 2005 would have been 34.9%.

- Minority interests

The minority interest line item increased by 20.4%, from 8.875 thousand euros in 2005 to 10.684 thousand euros in 2006, principally due to consolidation of the Greek subsidiary, C. Rokas, S.A.

- Net profit

Net profit increased by 31.4%, from 144.325 thousand euros at 31 December 2005 to 189.688 thousand euros at 31 December 2006.

### **Comparison of the fiscal years ended 31 December 2004 and 2005**

- Revenues

Revenues increased by 69.2%, from 329.452 thousand euros in 2004 to 557.256 thousand euros in 2005, principally due to the increase in wind generation revenues, both in the domestic market and internationally, which increased from 305.332 thousand euros in 2004 to 518.201 thousand euros in 2005, an increase of 69.7%. In addition, revenues from mini-hydro generation increased from 24.120 thousand euros in 2004 to 39.055 thousand euros in 2005, an increase of 61.9%.

➤ Business sectors

The following table shows the change in revenues obtained by the Company's principal businesses as between the 2004 and 2005 fiscal years:

31 December				
		2005	2004	% change
<b>Revenues</b>		(€ 000s)		
Wind		518,201	305,332	69.7%
Mini-hydro		39,055	24,120	61.9%
Other Businesses		—	—	—
<b>Total</b>		<b>557,256</b>	<b>329,452</b>	<b>69.2%</b>

**Wind business**

The revenues from the wind business increased by 69.7%, from 305.332 thousand euros generated in 2004 to 518.201 thousand euros generated in 2005. The increase in revenue from the wind business basically resulted from the increase in revenue generated in Spain, from 305.332 thousand euros in 2004 to 501.064 thousand euros in 2005, an increase of 64.1%. In 2005 the Company for the first time could recognise revenue from the Rest of the World, amounting to 17.137 thousand euros.

*Wind business revenues by geographical market*

The following table contains the change in revenues obtained by the wind business based on the geographical markets in which the Company operates, from 2004 to 2005.

Wind Business Revenues	31 December
------------------------	-------------

		2005	2004	% change
		(€ 000s)		
<b>Spain</b>		501,0641	305,332	64.1%

<b>Total</b>		<b>3,494</b>	<b>2,891</b>	<b>20.9%</b>

The following table contains the evolution of average prices of electricity produced by the wind and mini-hydro business based on the geographical markets in which the Company operates, from 2004 to 2005:

<b>Electric Energy Production</b>		<b>31 December</b>		
-----------------------------------	--	--------------------	--	--

		2005	2004	% change
		(in GWh)		
<b>Spain</b>		6,240	4,846	28.8%
<b>International</b>		232	—	N/A
US		—	—	—
United Kingdom		—	—	—
Rest of the World		232	—	—
<b>Total</b>		6,471	4,846	33.5%

The following table contains the evolution of average prices of electricity produced by the wind business based on the geographical markets in which the Company operates, from 2004 to 2005:

Average prices		31 December		
		2005	2004	% change
		(In Euros/MWh)		
<b>Spain</b>		80,3	63,0	27.5
<b>International</b>		74,0	—	—
US		—	—	—
United Kingdom		—	—	—
Rest of the World		74,0	—	—
<b>Total</b>		80,1	63,0	27.1

*Spain.* Spain represented 100% and 96.7% of revenue generated by the wind business during the 2004 and 2005 fiscal years, respectively. Revenue from the wind business in Spain increased by 64.1% from the 2004 to the 2005 fiscal year, from 305.332 thousand euros in 2004 to 501.064 thousand euros in 2005, of which 83.834 thousand euros arose from the increase in the average price of electricity

generated by the Company's wind facilities in Spain. The average price of the electricity generated by the Company's wind facilities in 2005 was 80.3 euros per MWh, an increase of 27.5% by comparison with the average price of 63 euros per MWh in 2004. Market prices were 3.1% and 37.8% higher than the regulated tariffs in 2004 and 2005, respectively. The impact on prices is calculated by determining the difference between the price in a given month of the current year and the price in the same month of the previous year, then multiplying the result by output in the month of the current year. This impact is calculated monthly for each wind farm until the end of the year, at which point global data for the entire year are calculated

Also, of the increase in revenue generated by the wind business in Spain, 111.898 thousand euros were due to a 28.8% increase in production of electricity generated by the Company's wind facilities in Spain, which increased from 4,846 GWh in 2004 to 6,240 GWh in 2005. The increase in output in Spain was attributable to an increase in installed capacity in Spain of 12.7% (installed capacity rose from 2,891 MW in 2004 to 3,258 MW in 2005). The impact on prices is calculated by determining the difference between the price in a given month of the current year and in the same month of the previous year, then multiplying the result by output in the month of the current year. This impact is calculated monthly for each wind farm until the end of the year, at which point global data for the entire year are calculated

*International.* The Company generated revenue of 17.137 thousand euros in 2005, generated by the Company's wind business in Greece and Portugal, mainly due to the consolidation of Rokas from the fourth quarter of 2005. 232 GWh of electricity were produced in the international market in 2005. The Company did not obtain derivative revenue in the international market in 2004.

#### **Mini-hydro business**

The revenue generated by the Company's mini-hydro business increased by 61.9% from 2004 to 2005, from 24.120 thousand euros in 2004 to 39.055 thousand euros in 2005. This increase in average prices was principally due to an increase in market prices, which effected of electricity produced by the Company's mini-hydro facilities, which accounted for additional revenue of €12.229 thousand. The average price of the electricity generated by the Company's mini-hydro facilities in 2004 was 42.59 euros per MWh. It was 66.63 euros per MWh in 2005. This increase in average price was due in average prices is due to an increase in market prices that affected the compensation of all facilities under the ordinary system and almost all the facilities under the special system that had opted to sell the electricity they generate under the regulated tariff system. In 2005 production of electricity by the Company's mini-hydro facilities increased by 3.5%, from 566 GWh produced in 2004 to 586 GWh produced in 2005, due to the high rainfall experienced in 2005, which brought with it additional revenue of 2.706 thousand euros.

#### **Other Businesses**

The Company had no profits from other businesses in 2004 and 2005.

- Personnel Expenses

Personnel expenses increased by 63.7% from the 2004 to the 2005 fiscal year, from 13.225 thousand euros in 2004, equivalent to 4% of the Company's revenues, to 21.651 thousand euros in 2005, equivalent to 3.9% of the Company's revenues.

The following table contains the evolution of the Company's personnel costs based on the businesses and geographical markets in which it operates, from 2004 to 2005:

Personnel Costs	31 December			31 December	
	2005	2004	% change	2005	2004
	(€ 000s)			(average employees)	
Wind	9,385	6,801	38.2%	251	146
Spain	8,501	6,801	25.0%	213	146
International	884	0	N/A	38	0
Mini-hydro	3,060	3,334	(8.2)%	59	56
Other Businesses	2,403	35	6,765.7%	30	1
Structure	6,803	3,055	122.6%	36	33
<b>Total</b>	<b>21.651</b>	<b>13.225</b>	<b>63.7%</b>	<b>376</b>	<b>236</b>

The 63.7% increase in personnel expenses in 2005, by comparison with personal expenses corresponding to the 2004 fiscal year, resulted from an increase of 38.2% in personnel expenses of the wind business, which increase, in turn, resulted from the 25% increase in personnel expenses of the wind business in Spain, as a result of the greater number of wind farms operated by the Company in Spain and, therefore, the greater number of employees hired by the Company. In addition, in 2005, the Company began to incur personnel expenses at international level for the first time, following the start-up of its operations in Poland, Germany and Greece, where the personnel expenses of Greek subsidiary C. Rokas, S.A. have been consolidated. Personnel costs corresponding to the mini-hydro business decreased by 8.2% from 2004 to 2005. Lastly, the structure's personnel costs increased by 122.6% as a result of contracting new personnel in order to carry out the Company's international expansion.

- Capitalisation of personnel expenses

Personnel expenses capitalised rose by 43.5% between and 2005, from 3.941 thousand euros in 2004, equivalent to 1.2% of the Company's revenues, to 5.656 thousand euros in 2005, equivalent to 1% of the Company's revenues, principally due to the increase in the number of personnel involved in development and construction of wind farms during this period.

- Outside Services

Expenses related to outside services increased by 12.7% from 2004 to 2005, from 68.655 thousand euros in 2004, equivalent to 20.8% of the Company's revenues, to 77.367 thousand euros in 2005, equivalent to 13.9% of the Company's revenues for that period. The following table shows the evolution of expenses related to outside services from 2004 to 2005, based on the Company's businesses and the geographical markets in which it operates:

Outside Services		31 December		
		2005	2004	% change
		(€ 000s)		
Wind		61,558	55,462	11.0%
	Spain	59,223	54,597	8.4%
	International	2,335	865	170.0%
Mini-hydro		4,169	5,770	(27.6)%
Other Businesses		172	1,322	(87.0)%
Structure		11,468	6,101	88.0%
<b>Total</b>		<b>77,367</b>	<b>68,655</b>	<b>12.8%</b>

The outside wind services increased by 11% in the period from 2004 to 2005, principally due to an 8.4% increase in outside services in Spain during the same period. The increase in outside services in Spain in 2005 basically was a result of the increase in operating costs of the Company's electricity generation facilities (including operating and maintenance, land lease fees and insurance for the facilities). The increases of 33.7% in land lease fees and 49.5% in development costs in 2005, which include the expenses of researching and developing new renewable facilities in early stages of development acquired to support the Company's international expansion, are partially offset by the 21.9% decrease in expenses related to the Company's insurance policies, which decrease resulted principally from reduction of the Company's premiums as a result of renegotiation of the contracts and extension of the coverage to the entire IBERDROLA RENOVABLES Group. Outside services rose significantly in 2005 relative to 2004 due to the global consolidation of Greek subsidiary C. Rokas, S.A. in the fourth quarter of 2005. Central outside services increased by 88.0% due to an increase in the services received from Iberdrola, S.A. and the increase in outside support services as a result of the Company's business expansion.

- Other operating income

The other operating income line item decreased by 18.4% from 2004 to 2005, from 9.832 thousand euros in 2004, equivalent to 3% of the Company's revenues, to 8.044 thousand euros in 2005, equivalent to 1.4% of the Company's revenues. The decrease reflects the lower margins under other operating income related to the metallic structure

construction business of the Greek subsidiary, Rokas, S.A., which was consolidated within the IBERDROLA RENOVABLES Group from the last quarter of 2005.

- Taxes

Taxes other than the Corporate Income Tax increased by 169.8% during the period from 2004 to 2005, from 5.308 thousand euros in 2004, equivalent to 1.6% of the Company's revenues, to 14.302 thousand euros in 2005, equivalent to 2.6% of the Company's revenues. This increase arises from the fact that in the 2005 fiscal year a provision was created in an amount of 8.109 thousand euros based on actions brought by the excise tax authorities regarding the Electricity Excise Tax for the 2000 and 2003 fiscal years.

- Income from companies consolidated by the equity method

Investments in companies of the IBERDROLA RENOVABLES Group contributed a €5.019 thousand loss to the Company's consolidated income statement for the year ended 31 December 2004, compared with income of €36,000 contributed to the IBERDROLA RENOVABLES Group's consolidated income statement for the year ended 31 December 2005. This situation is attributable to the fact that the losses generated by Enerbrasil in 2004 were reported by the equity method, whereas the losses of Enerbrasil in 2005 were fully consolidated.

- EBITDA

EBITDA increased by 78.7%, from 256.038 thousand euros in 2004, equivalent to 77.7% of the Company's revenues, to 457.636 thousand euros in 2005, equivalent 82.1% of the Company's revenues. The following table shows the evolution of the Company's EBITDA from 2004 to 2005, based on the businesses engaged in by the Company and the geographical markets where it operates:

	31 December					
	2005			2004		
	EBITDA <sup>(1)</sup> (€ 000s)	EBITDA (margin) <sup>(2)</sup>	EBITDA <sup>(1)</sup> (€ 000s)	EBITDA (margin) <sup>(2)</sup>	% change EBITDA	
Wind	440,672	85.0	249,93	81.9	76.3%	
Spain	426,613	85.1	250,803	82.1	70.1%	
International	14,059	82.0	(865)	N/A	1725.31%	
Mini-hydro	34,032	87.1	16,613	68.9	104.9%	
Other Businesses	1,032	0	(1,357)	N/A	(176.0)%	
Structure	(18,100)	—0	(9,156)	—	(97.7)%	

Total		457,636	82.1	256,038	77.7	78.7%
-------	--	---------	------	---------	------	-------

- (1) EBITDA corresponds to earnings before interest, taxes, depreciation and amortization. The EBITDA heading is included in this table because it is frequently used by investors and analysts to compare similar companies. However, since not all companies calculate EBITDA using the same parameters, EBITDA may not be comparable with the EBITDA of other similar companies. EBITDA is not a heading recognised under International Financial Reporting Standards (IFRS) and should not be considered an alternative to operating profit, operating income or any other indicator of operating profitability of a company recognised by IFRS. EBITDA should not under any circumstances be compared with operating income, net income or operating cash flows and should not be used as an indicator of future or past profitability or liquidity.
- (2) EBITDA margin corresponds to EBITDA divided by sales.

EBITDA in Spain accounted for 96.8% of total EBITDA for the wind business in 2005. EBITDA margin increased by 4.4% at 31 December 2005 by comparison with 31 December 2004.

- **Depreciation and provisions**

The depreciation and provisions line item increased by 38.2%, from 108.539 million euros at 31 December 2004 to 149.889 thousand euros at 31 December 2005. This increase was the result of the increase in operating assets occurring in 2005.

- **Financial Income**

Financial income decreased by 45.9%, from 8.171 thousand euros in 2004 to 4.423 thousand euros in 2005, due mainly to a 62.9% decrease in capitalized financial expenses derived from the financing of costs related to the property, plants and equipment, which decreased from €5.216 thousand in 2004 to €1.937 thousand in 2005. The decrease in the capitalization of financial expenses was due to the decrease in financial expenses which is explained in the following paragraph.

- **Financial expenses**

Financial expenses decreased by 22.6%, from 88.834 thousand euros in 2004 to 68.780 thousand euros in 2005. At 31 December 2006, expenses associated with financial debt totalled 61.257 thousand euros, of which 38.054 thousand euros corresponded to intragroup debt and 23.203 thousand euros to external debt, while at 31 December 2005 expenses associated with financial debt came to 78.332 thousand euros, of which 27.667 thousand euros corresponded to intragroup debt and 50.665 thousand euros to external debt. This decrease results basically from the financial restructuring undertaken during the 2004 fiscal year of the debt originating in the companies acquired from Gamesa Energía during the 2003 fiscal year, during which a large part of the project finance debt

was replaced by financial debt of Iberdrola, S.A., at a lower interest rate. Although to a lesser extent, the decrease is also due to a lower financial expense 5.890 thousand euros as a result of cash flow hedge interest rate hedges. Also, the variation in the market value of the derivatives designated as non-hedging derivatives have resulted in financial expenses during the fiscal years 2004 and 2005 of 10.502 and 12.072 thousand euros, respectively.

- **Corporate Income Tax**

The expense deriving from the Corporate Income Tax increased by 284% from 2004 to 2005, from 23.482 thousand euros at 31 December 2004 to 90.164 thousand euros at 31 December 2005, the effective tax rate being 38% in 2004 and 37% in 2005. The 38% effective tax rate in 2004 was a result of an error in the amount of 4.276 thousand euros deriving from the process of adaptation to IFRS (International Financial Reporting Standards) accounting principles. Had this error not occurred, the effective tax rate would have been 31%. The 37% effective tax rate in 2005 resulted from correction of certain investment deductions in the amount of 5.188 thousand euros taken in prior fiscal years. Absent this correction, the effective tax rate in 2005 would have been 34.9%.

- **Minority interests**

The minority interest line item increased by 129.3%, from 3.871 thousand euros in 2004 to 8.875 thousand euros in 2005, principally due to adjustments in depreciation made in 2004 and prior years by the subsidiary Eólicas de la Rioja, S.A. (a company absorbed by Iberdrola Energías Renovables de La Rioja, S.A., on 24 October 2007).

- **Net profit**

Net profit increased by 318.8%, from 34.463 thousand euros at 31 December 2004 to 144.325 thousand euros at 31 December 2005.

**9.2.1 Information regarding significant factors, including unusual or infrequent events or new developments, materially affecting the issuer's income from operations, indicating the extent to which income was so affected**

The revenue of IBERDROLA RENOVABLES has not been affected by events outside the normal conduct of its business.

**9.2.2 Where the financial statements disclose material changes in net sales or revenues, provide a narrative discussion of the reasons for such changes**

There have been no important changes in sales or revenues resulting in significant changes in the financial statements.

**9.2.3 Information regarding any governmental, economic, fiscal, monetary or political policies or factors that have materially affected, or could materially affect, directly or indirectly, the issuer's operations**

The principal factors that may affect IBERDROLA RENOVABLES's prospects are those discussed in section 0 of this Prospectus (risk factors), as well as what is stated

regarding the regulatory framework applicable to the Company in section 0 of the Registration Document.

**9.3 Financial information related to the segmentation of the pro forma Profit and Loss Account included in the pro forma financial statements for December 2006 and September 2007, in line with what is stipulated in section IV.20.2 of the present Prospectus**

## 10. FINANCIAL RESOURCES

### 10.1 Information regarding the financial resources of the issuer (short and long term)

To the date of this Prospectus and since its formation, the Company has financed its business principally using:

- (i) Generation of cash from its ordinary activities
- (ii) Contributions of capital made by its sole shareholder, Iberdrola, S.A.
- (iii) Financing received from the sole shareholder and lending institutions.

#### Information regarding evolution of Net Worth of issuer

Below is an analysis of the evolution of the Assets of IBERDROLA RENOVABLES and its group of companies, without including the U.S. and British companies incorporated into the perimeter of consolidation of the Company in accordance with the Restructuring Operation, during the period covering between 1 January 2004 and 30 September 2007, in accord with the consolidated financial statements audited at 31 December 2005 and 2006 of IBERDROLA RENOVABLES and the companies of its group as well as with the consolidated financial statements at 30 September 2007, object of limited revision, all drawn up in accordance with NIIF, included for reference in the present Prospectus.

Also available to the public in the web page of the Company ([www.iberdrolarenovables.com](http://www.iberdrolarenovables.com)) are the audited consolidated financial statements of ScottishPower Holdings Inc. and of the principal British companies incorporated into the perimeter of consolidation of the Company in accordance with the Restructuring Operation, for the accounting periods closed at 31 March of 2005, 2006 and 2007 except in the case of the CeltPower Ltd. company, for which are presented the financial statements at 31 December of 2004, 2005 and 2006), as well as the attached non-audited financial information for the above mentioned British companies for the accounting periods closed at 31 March of 2005, 2006 and 2007, drawn up in accordance with principals of accounting generally accepted in the United States and in the United Kingdom, expressed in U.S. dollars and in pound sterling, respectively, as well as an analytical description of the evolution of the Net Worth of ScottishPower Holdings Inc. and of the above mentioned British companies jointly for the period covering between 31 March of 2006 and 31 March of 2007 on the basis of the above mentioned financial statements.

Additionally, in sections 20.1 and subsequent sections of this Registration Document the equity position of the Company for the fiscal years ending 31 December 2006, 2005 (audited) and 2004 (unaudited) is described.

### Financial Debt

Set forth below are details of gross, net and total financial indebtedness of the Company on 31 December, 2004, 2005, 2006 and at 30 September 2007 both to Iberdrola S.A. and to financial institutions:

(€ 000s)	30/09/2007 (unaudited)	31/12/2006	31/12/2005	31/12/2004 (unaudited)
A. Cash	51,737	68,460	61,350	27,597
B. Cash equivalents (Details)	69,922	54,328	-	-

<b>O. Net Financial Debt (J+N)</b>	<b>3,755,091</b>	<b>3,032,682</b>	<b>2,654,629</b>	<b>2,329,244</b>

(1) The section on bank debt includes the cost of the derivatives.

(2) The debt to Iberdrola S.A. included in these balance sheet line items is in Other Noncurrent Accounts Payable and Other Current Liabilities.

## Financial expenses

The financial restructuring carried out during the 2004 fiscal year resulted in a decrease in financial expenses for the 2005 fiscal year. Specifically, the project finance debt in the amount of 172 million arising from the companies acquired from Gamesa Energía during the 2003 fiscal year was replaced by financial debt of Iberdrola, S.A., with a reduction in the interest rates by more than 200 basis points. In addition, in the same year, bank debt of Energías Eólicas Europeas (currently called Iberdrola Energías Renovables de Castilla-La Mancha, S.A. Unipersonal) in the amount of 552 million was replaced by debt to Iberdrola, SA at a price 70 basis points lower.

In addition, at the end of the 2005 fiscal year and during the 2006 and 2007 fiscal years the debt to finance investments that were made increased, for which reason, together with the growing trend in interest rates in those years, the financial expense increased by 45.9% during the 2006 fiscal year in comparison with the 2005 fiscal year, and by 68.7% in September, 2007 with respect to the same month in 2006.

### Debt with Iberdrola S.A.

The Company's general policy has been to finance its expansion and ordinary conduct of the businesses mainly through financing received from its sole shareholder, Iberdrola, S.A.

The internal debt has been instrumented principally by means of a current account with Iberdrola, S.A. with interest at three month Euribor plus 15 basis points for debt balances, and 10 basis points less for credit balances, payments being made quarterly. At September 2007 the average resulting rate has been 4.19% while in the years 2006, 2005 and 2004 the resulting average rate was 3.22%, 2.32% and 1.5% respectively. (These figures take into account the average balances of both debtors and creditors).

The credit balance with Iberdrola, S.A. corresponds to the long-term maturity portion of a loan signed on 31 March 2004 in the amount of €552,968,000, the last maturity of which is in June 2012. This loan was granted to prepay the project finance loan that had been signed by the subsidiary of Iberdrola Energía Renovables de Castilla La Mancha, S.A., thus obtaining an improvement in the financial cost of the IBERDROLA RENOVABLES Group. In the "Other current liabilities" item there are €44,379,000 corresponding to the instalment payable during the year 2007. This loan accrues interest at a rate equivalent to six month Euribor plus a market margin, the average rates accruing being 2.70% in 2005, 3.50% in 2006 and 4.96% to September 2007.

Shown below is the evolution of the Company's debt to Iberdrola S.A. for the first nine months of the 2007 fiscal year and the fiscal years ending 31 December 2006, 2005 and 2004:

(€ '000s)	30/09/2007 (unaudited)	31/12/2006	31/12/2005	31/12/2004 (unaudited)
Current debt	2,803,351	2,186,697	1,849,267	1,517,435
Non-current debt	377,105	378,902	421,649	465,942
<b>Total internal debt</b>	<b>3,180,456</b>	<b>2,565,599</b>	<b>2,270,916</b>	<b>1,983,377</b>

## External Financial Debt

On a general basis, third party financing has been obtained in the case of companies not 100% owned by IBERDROLA RENOVABLES. Data regarding the loans and credits maintained by the Company with banks and other entities at 31 December 2004, 2005, 2006 and 30 September 2007 are as follows:

### (i) Current financial debt

(€ 000s, except for percentages)	Sept. 2007	2006	% Change 06/07	2005	% Change 05/06	2004 (unaudited)	% Change 04/05

The balances of loans and the like refer to the nominal amounts of debt net of debt documentation expenses.

The balances of project finance loans and other loans increased from the 2004 fiscal year until 30 September, 2007, as a result of financing the Group. The project finance has grown especially in 2006, in the available balance as well as the number of projects. The loans have increased, above all, in 2007 due to international expansion, mainly in Poland, Germany and the United States.

The financial leasing balance is basically due to the consolidation of the Rokas subgroup during the 2005 fiscal year and the Fitou project in France in 2007.

The current and non-current balances with financial entities Banco Bilbao Vizcaya Argentina (BBVA) and with Bilbao Bizkaia Kutxa (BBK), companies linked to the main company Iberdrola, S.A. have risen during the fiscal years 2006, 2005 and 2004, to 69.3 million, 50.5 million and 38.5 million euros respectively with BBVA, and 6.1 million, 11.3 million and 5.6 million euros respectively with BBK. Likewise, for the period ending on 30 September 2007, the balances for loans with BBVA and BK have risen to 64.7 million euros and 6.5 million euros respectively.

The breakdown by non-current debt maturities until 30 September, 2007 is as follows:

Year	(€ 000s)		
	Financial leasing	Loans and the like	Total
10/2008 to 09/2009	5,169	55,471	60,640
10/2009 to 09/2010	1,229	60,558	61,787
10/2010 to 09/2011	1,290	59,971	61,261
10/2011 to 09/2012	1,034	56,878	57,912
10/2012 and following	6,046	316,904	322,950
	14,768	549,782	564,550

At 30 September 2007, the company was granted unavailable credit in the amount of 257,704,000 euros respectively, with maturity between 2007 and 2016.

During the 2007 fiscal year financing was obtained in foreign currency (basically United States dollars and Polish zloti). The euro value of the balance pending payment at 30 September 2007 for these loans amounts to €127,561,000.

The amounts outstanding at 30 September 2007, 31 December 2006, 2005 (audited) and 2004 (unaudited) accrued average annual weighted interest of 4.98%, 3.86%, 3.06% and 4.12%, respectively.

The Company mitigates the interest rate risk of foreign debt by managing the debt structure as between fixed and variable, based on the situation of the markets, using new financing and interest rate derivatives, all within the approved risk limits.

The risk policy approved seeks to optimise the Group's financial results by having the centralisation of financial risk as a principle of action, transfer of the aforesaid risk to financial institutions, guarantee of the correct use of financial instrument, and documentation and control of operations, acting always within the established risk limits.

The Company has interest rate derivatives to cover the fair value of the existing debt of certain companies acquired from Gamesa at fixed interest rates higher than the market rate, for which reason a swap allowing for its conversion from fixed to a floating rate was contracted.

The Company has also contracted interest rate hedging derivatives to partially or fully offset the risk of variation in the financial expense of the companies using floating rate finance, for which reason a swap allowing for their conversion to a fixed rate has also been contracted.

The foreign debt structure at 30 September 2007, 31 December 2006, 2005 (audited) and 2004 (unaudited), considering the hedging through the contracted derivatives, is as follows:

	30/9/2007 (unaudited)	31/12/2006	31/12/2005	31/12/2004 (unaudited)
Variable interest rate	423,325	234,882	56,603	47,267
Fixed interest rate	256,597	307,119	285,830	203,730
Limited interest rate	26,675	48,470	29,127	43,848
	<b>706,597</b>	<b>590,471</b>	<b>371,560</b>	<b>294,845</b>

The breakdown of the balances at 30 September 2007, 31 December 2006, 2005 and 2004, including the value of the derivative instruments at those dates, is as follows:

### Evolution of Working Capital

To date the Company has been financing its expansion and the ordinary course of its business principally through cash flows generated from its exploitation activities, generation of working capital and the financing it receives from its sole shareholder, Iberdrola, S.A., by way of debt on the reciprocal current account the Company maintains with its sole shareholder. Iberdrola, S.A. continues providing financing to the Company, thus allowing it to appropriately conduct its business. Currently, the financing extended by Iberdrola, S.A. represents 81% of the Company's net total indebtedness.

The Company at 31 December 2004, 2005 and 2006, and at 30 September 2007, had negative working capital, basically due to the short-term classification of the reciprocal current account debt the Company maintains with Iberdrola, S.A. The Company needs significant working capital to cover the immediate financing required for investment in facilities for generation of electricity from renewable energy sources.

The following table shows the Company's balances of working capital at 31 December 2004, 2005 and 2006, as well as at 30 September 2007:

€ million	30/09/2007 (not audited)	31/12/2006	31/12/2005	31/12/2004 (not audited)
<b>CURRENT ASSETS:</b>				
Trade receivables and other current accounts receivable	132.7	145.0	293.2	205.7
Current financial assets	48.3	38.7	33.4	12.1
Public Authorities	161.9	145.0	101.4	125.0
Cash and equivalents	121.6	122.8	61.4	27.6
<b>TOTAL CURRENT ASSETS</b>	<b>464.5</b>	<b>451.5</b>	<b>489.4</b>	<b>370.4</b>
<b>CURRENT LIABILITIES:</b>				
Provisions	(1.7)	(2.3)	(8.8)	(0.2)
Financial debt	(142.1)	(109.0)	(79.1)	(24.3)
Trade accounts payable and other accounts payable	(3,402.6)	(2,724.7)	(2,371.2)	(1,978.9)
Trade creditors	(157.9)	(173.4)	(123.2)	(28.9)
Debts to Public Authorities	(52.7)	(64.0)	(76.9)	(34.8)
Group Financial Debt	(2,803.4)	(2,186.7)	(1,849.3)	(1,517.4)
Group non-financial debt	(244.5)	(217.4)	(280.0)	(366.5)

Other accounts payable	(144.1)	(83.2)	(41.8)	(31.3)
<b>TOTAL CURRENT LIABILITIES</b>	<b>(3,546.4)</b>	<b>(2,836.0)</b>	<b>(2,459.1)</b>	<b>(2,003.4)</b>
<b>WORKING CAPITAL</b>	<b>(3,081.9)</b>	<b>(2,384.5)</b>	<b>(1,969.7)</b>	<b>(1,633.0)</b>
<b>ADJUSTED WORKING CAPITAL<sup>(1)</sup></b>	<b>(256.3)</b>	<b>(209.3)</b>	<b>(93.9)</b>	<b>(118.7)</b>

(1) The adjusted working capital excludes the Group Financial Debt, Financial Debt, Provisions and Cash and other equivalent means.

At 30 September the Company had an adjusted deficit of working capital of €256.3 million greater than that at 31 December 2006 by the amount of €209.3 million and than the deficit of adjusted working capital in an amount of €93.9 million at 31 December 2005.

The increase in the deficit at September 2007 compared with that at December 2006 is mainly due to the increase in accounts payable to the Iberdrola group and machine suppliers as a consequence of the increase in investment activity.

The deficit also increased in December 2006 with respect to the year before, since on one hand the accounts with trade debtors and other accounts payable decreased in this period, going from €293.2 million at 31 December 2005 to €145 million at 31 December 2006. This fact is brought about by the reduction in billing schedule for Electricity Market Operator (OMEL) from monthly to weekly, and on the other hand an increase occurs in trade creditors from €123.2 million at 31 December 2005 to €173.4 million at 31 December 2006, and other accounts payable from €41.8 million at 31 December 2005 to €83.2 million at 31 December 2006, attributable to growth in the Company's investments in the development and construction of wind farms.

The balance of the Company's adjusted working capital was a deficit of €93.9 million at 31 December 2005, which represents a decrease of €24.8 million by comparison with the deficit of €118.7 million at 31 December 2004. This increase in working capital is primarily due to an 87.5 million euro increase of Trading receivables and other Accounts Receivable, both with companies in the Group and with third parties, and a reduction of the Group's non-financial debt, which is partially offset by an increase of Trade payables as a result of the development and construction of wind parks in Spain.

	132,652	144,977	293,184	-50.60%	205,711	42.50%

In section 0 of this Registration Document is a description of the items included under this heading. Generally these accounts receivable do not accrue interest, the maturities being established at not more than 30 days. There are no restrictions in significant amounts on their availability

### Suppliers and trade creditors

Shown below is the detail for Trade Creditors and Other current liabilities:

(€ 000s, except for percentages)	Sept. 2007	2006	2005	% Change	2004 (unaudited)	% Change
Total Trade Creditors	157,946	173,438	123,223	+40.7%	28,929	+325.9
Iberdrola, S.A.	2,803,351	2,186,697	1,849,269	+18.2%	1,517,435	+21.9%
Iberdrola Ingeniería y Construcción, S.A. Unipersonal	45,025	45,207	19,916	+127.0%	66,938	-70.2%
Iberdrola Generación	21,750	-	-	-	1,670	-100%
Iberdrola Distribución	30	-	157	-100%	409	-61.6%
Iberdrola Energía Altamira	322	-	-	-	-	-
Gamesa Eólica	177,372	172,171	259,926	-33.8%	297,439	-12.6%
Others	114,190	83,201	41,815	+98.9%	31,312	+33.5%
Total Other current liabilities	3,192,040	2,487,276	2,171,083	+14.6%	1,915,203	+13.4%

Included under the trade Creditors heading are basically the debts to suppliers of components and equipment for the facilities of the Group companies. The increase since the 2005 fiscal year is a result of the Group's growing investment activity.

Outstanding under the heading of Other current liabilities is the balance with Iberdrola Ingeniería y Construcción, S.A. Unipersonal which results principally from the debt for engineering services in development and construction of wind farms, the balance with Gamesa Eólica which principally corresponds to debt for purchase of aerogenerators and that with Iberdrola SA which corresponds to the financing received from its sole shareholder through the current account.

The average payment terms during the fiscal years 2004 to 2006 and for the first nine months of the 2007 fiscal year were as follows:

Days	2007	2006	2005	2004
Iberdrola Ingeniería y Construcción, S.A. Unipersonal	14.60	14.05	8.0	15.36
Gamesa Eólica	128.01	81.43	97.64	61.03

Other	45.81	64.99	37.30	29.79
Medium	83.29	63.07	59.65	39.37

---

Average payment terms per supplier were calculated as the average of the difference in days between the date of payment and the date of the invoice, weighted by the amounts of the invoices, classified each year according to the date of payment. The change in average payment terms is due to the progressive incorporation of companies acquired in the Iberdrola Group's cycle of acquisition, and the consequent expansion of the group. In the case of Gamesa, there was an uptick in 2005 due to the malfunction of certain installed equipment, which was resolved by agreement with the supplier in July 2005.

#### **Guarantee commitments to third parties**

At 30 September 2007, 31 December 2006, 2005 and 2004 the IBERDROLA RENOVABLES Group had granted guarantees in the amounts of 264,089, 231,407, 53,913 and 33,242 thousand euros, respectively, basically to various public agencies and financial entities. Variations in the amounts of the guarantees provided between 2005 and 2006 is due to strong business expansion.

There is an error in note 31 of the notes to the 2006 financial statements. Whereas it is stated that guarantees granted in 2006 totalled €70,170,000, it should state guarantees totalled €231,407,000.

Some of debt agreements with third parties in project finance include standard clauses relating to compliance with certain safeguards, such as compliance with a series of financial ratios, the requirement to establish a fund guaranteeing payment of an annual instalment of loan principal and interest and to fund part of the project from equity based on prefixed ratios, the commitment of the borrower to maintain the shareholding and the requirement to pledge all shares in the projects to the creditors. In addition to the basic obligation to repay the principal and pay the interest, fees and charges, a series of limitations are established in order to ensure that the viability of the project is not affected. These include the requirement not to sell the assets concerned, to adequately insure and maintain the said assets, to execute and manage the project financed in a diligent and efficient manner, not to carry out activities other than those related to the project financed, to ensure compliance with all legal obligations that may apply to the project, not to take out loans with other banks, etc. All the clauses described have been satisfied by the companies of the IBERDROLA RENOVABLES Group that have been granted such loans.

The outstanding balance of debt with third parties that includes clauses of this type totalled €480 million at 31 December 2006, and €419 million at 30 September 2007, approximately.

Of the balance of loans outstanding at 31 December 2005, €285.8 million was granted at fixed interest rates, €56.6 million at floating interest rates and €29.1 million at capped interest rates. The loans outstanding at 31 December 2006, 2005 and 2004 were accruing interest at an average annual weighted rate of 3.86%, 3.06% and 4.12%, respectively.

As of 31 September 2007, neither IBERDROLA RENOVABLES nor any of its key subsidiaries was in a situation of default on its financial obligations or any other type of obligation that could give rise to an acceleration of its financial commitments.

The breakdown by company of pledged shares is shown below.

Company	(En miles de euros)							
	30/09/2007		31/12/2006		31/12/2005		31/12/2004

For more detailed information regarding the Company's debts to Iberdrola, S.A., to banks, exchange and interest rate hedges, suppliers and trade creditors and security committed to third parties, see Note 16 in the explanatory notes to the audited financial statements of the Company for the 2004 (unaudited), 2005 and 2006 (audited) fiscal years, prepared in accordance with IFRS.

## 10.2 An explanation of the sources and amounts of and a narrative description of the issuer's cash flows

In sections 20.1.3 and following of the Registration Document see the changes in the cash position at 31 December 2006, 2005 and 2004 (under IFRS).

### **10.3 Information regarding the issuer's loan conditions and financing structure**

See section 10.1 above describing the Issuer's financial resources.

### **10.4 Information regarding any restrictions on the use of capital resources that have materially affected, or could materially affect, directly or indirectly, the issuer's operations**

There are no restrictions on use of capital resources. Notwithstanding the foregoing, the majority of debt agreements with third parties in project finance include standard clauses regarding satisfaction of certain financial ratios and the requirement to pledge all shares in the projects to the creditors. As indicated in section 10.1 above, at 30 September 2007, neither IBERDROLA RENOVABLES nor any of its key subsidiaries was in a situation of default on its financial obligations or any other type of obligations that could give rise to an acceleration of its financial commitments.

### **10.5 Information regarding the anticipated sources of funds needed to fulfil commitments referred to in items 5.2.3 and 8.1.**

An explanation of the sources of funds necessary to satisfy the investment commitments assumed by the Company is set forth in section 5.2.3 of this Registration Document.

## **11 RESEARCH AND DEVELOPMENT, PATENTS AND LICENSES**

### **➤ RESEARCH AND DEVELOPMENT**

During 2006 investment in R&D+i projects by IBERDROLA RENOVABLES, certified by external auditors as being R&D+i projects, were of a value greater than 8,000,000 euros (there are projects that are still in the evaluation phase). For its part, during 2005 the certified value of the investments amounted to 8,375,000 euros. The audit of the R&S accounts in the aforesaid years was performed at global level for the entire Iberdrola Group by external auditors.

The Company's R&D+i projects pursue one of the following two objectives: either the maximisation of the efficient management of available resources; or the development of other renewable technologies.

#### **(i) Maximising efficient asset management**

##### **- Predictive maintenance of aerogenerators**

This project seeks the design and implementation of a diagnostic system for aerogenerators that allows optimisation of operation of a wind farm by detection of incipient defects in the machines. Further, the system will be capable of estimating the time remaining until the defect worsens to the point of requiring corrective maintenance for resolution.

The development of this system will make it possible to minimise maintenance costs, as a result of reduction of failures of aerogenerators, as well as performing preventive maintenance tasks extending the useful lives of the aerogenerator components.

In addition, this project will make it possible to plan preventive maintenance work to repair incipient defects during the periods of the year when wind resources are scarce, thus allowing the wind farm to be available to produce during those periods of the year having high wind resources.

To achieve the indicated objectives, the system to be developed must be capable of detecting defects of different kinds (mechanical and electrical) with the least possible number of sensors, to optimise the cost of monitoring, making progressive implementation of the defect diagnostic system profitable.

- **Analysis of classification of sites pursuant to IEC 61400 regarding aging of components**

The carrying out of this project involves the analysis of the suitability of the site for the installed aerogenerators. This suitability is determined according to the performance, reliability and the level of wear for each aerogenerator model depending on the wind and environmental conditions at each site. This analysis has been carried out on all the aerogenerator models in the Company's wind farms on Spain.

The analysis involves a study of the wind which is carried out using wind measurement instruments at the site itself, as well as by using internal tools which enable the impact of each aerogenerator's wind behaviour to be simulated, taking into account other factors such as topographic impacts, variations in the terrain, etc. This analysis of the site according to certain conditions for each aerogenerator is compared with preliminary studies in order to check that the behaviour is as expected.

Likewise, this project enables possible cause and effect relationships to be identified between the wind conditions, the ground conditions and wear in the aerogenerator. The Company has identified certain relationships between the performance of the aerogenerators and certain wind and ground conditions.

- **Control of reactive energy of wind farms**

With the purpose of cooperating to achieve stability of the electricity system, a modification has been developed together with the supporting manufacturers, suppliers and engineering firms to incorporate reactive energy control in the design of wind farms, because initially (prior to a the year 2005) they had not been provided with capacity to regulate reactive power, because it was not a requirement of the Spanish Electricity System Operator,.

Currently practically all of the aerogenerators installed by IBERDROLA RENOVABLES are capable of regulating reactive power. This allows them to contribute to the stability of the network as regards voltage.

- **Capacity to contribute to stability of the network: voltage drops**

Transient short circuits in the grid (duly handled by the grid protection mechanisms) can cause significant local grid voltage drops which can have the consequence of disconnecting the aerogenerators, resulting in network instability.

In order to improve the integration of the wind farms in the grid and to enable wind energy to contribute greater amounts of electricity to the electrical systems, it is necessary to improve the systems for restoring low voltage drops.

Between 2005 and 2007 an electronic power component was developed which is being installed in the aerogenerators in order to achieve full capability for restoring low voltage drops and to comply with the technical standards for the grid published in October 2006. The Company has developed the first certified wind farm with a voltage drop restoration system.

- **WINDGRID:**

IBERDROLA RENOVABLES participates in a project sponsored by the European Union (Directorate-General for Energy and Transport) called "WindGrid" which seeks to promote the design, development and validation of new tools and devices to prepare the European electrical grid with a view to large scale integration of wind farms by means of work with local grid operators and the producers to improve grid planning, control and management. This integration requires that the production plants be compatible and that the distribution and transmission infrastructure efficiently and flexibly manages the supply from hundreds of large generators and thousands of small ones.

So WINDGRID is developing the Combined Management System for Wind Farms which is anticipated to improve the reliability and efficiency of wind generated electricity, increase operating security, reduce maintenance costs and improve the quality of supply.

The final objective of the project is to reduce the European Union's dependence on third party sources for energy supplies, to comply with commitments for reducing CO2 emission from the Member States and improve quality of life both within the European Union and outside.

The WINDGRID project aims to determine what the most appropriate proportion between energy is generated using renewable technologies and conventional power for each national electricity market and, based on these conclusions, to make economic and technical standard recommendations for consideration by each Member State.

- **IS-POWER: Determination of the appropriate ratios for participation of renewable energy in the insular electricity system.**

The Company participates in a project the purpose of which is development of the necessary technical and regulatory framework to improve the electricity system of insular regions (as regards reliability and assurance of supply) and facilitate integration of renewable energy and other generation systems.

The project requires cooperation of various market participants (system operators, public service companies, R&D institutions, technology and equipment suppliers, nongovernmental organisations and consumers), and, inter alia, effective integration of distributed generation components and the transmission networks.

**(ii) Development of other renewable technologies**

- **Wave energy**

The Company is involved in a project the principal purpose of which is to develop, construct and operate an electricity plant having 1.39 megawatts of power, which will use the force of waves to generate energy using a system of buoys.

In addition, the Company heads a project the purpose of which is to install four devices to generate electricity using wave energy in the Orkneys (Scotland); during the years 2008 and 2009, the largest in the world in this field ("Pelamis" technology). One of the main characteristics of this project is that, instead of absorbing all of the energy from a wave to convert it to electricity, only a part of that energy is used. In this manner, in the case of extreme conditions at sea, the device will not be damaged because of the ability to control the proportion of the energy of a wave converted into electricity.

- **Tidal energy**

The Company is working with a Norwegian company on a project based on the production of electricity from tides, to build a full-scale prototype that will be tested in United Kingdom waters.

For generation of electricity this technology uses the force of the tide, by contrast with conventional technology, which uses reservoirs. This allows generation of electricity without having to capture the water. This will have less environmental impact in those areas more sensitive to any interference, such as those near coastlines. Each unit can generate approximately 1 MW. It is hoped that it will be possible to install farms in the future with nominal total power of 50 to 100 MW.

- **Thermal solar energy DGV Project: Direct Generation of Vapour**

The Company is involved in a project the purpose of which is to design, construct and evaluate a thermoelectric solar plant with cylindrical parabolic collectors and direct generation of vapour in the solar field. The great innovation in this project is the direct generation in the solar field of the vapour required by the turbo generator group of the plant for production of electricity. This allows elimination of the heated oil currently used. In this manner not only is the initial investment required reduced by 20%. Also the overall yield of the thermoelectric solar plant is increased.

- **Energy derived from hydrogen**

The Company is involved in research on energy derived from hydrogen, including a project to determine the capability of fuel cells and electrolytes to operate with and to contribute to stabilising weak wind energy supplied by the national grid. By means of this research, the Company intends to drive the compatibility of wind energy through national grids.

- **Perseo Joint Venture**

The Company has a 70% share in Perseo Inversiones Financieras, S.L. together with Iberdrola, S.A. (30%), the objective of which is research and development and the studying of new technologies for renewable energy.

## ➤ **PATENTS AND LICENSES**

The Company's intellectual property consist primarily of its know-how. Regarding patents, IBERDROLA RENOVABLES has none. Nor does the Company hold trademarks or copyrights that are significant to its overall business. The Company has signed various software license agreements with third parties.

In addition, as discussed in section 0 of this Registration Document, the Company has signed a trademark and domain name license and management agreement with Iberdrola, S.A., pursuant to which the Company is granted a nonexclusive right to use certain trademarks and domain names to identify the renewables business.

## **12 TREND INFORMATION**

### **12.1 The most significant recent trends in production, sales and inventory, and costs and selling prices since the end of the last financial year to the date of the registration document**

The most significant trends for production, sales and inventory are those resulting from the financial information contained in sections 9 and 10 of this Registration Document.

### **12.2 Information on any known trends, uncertainties, demands, commitments or events that are reasonably likely to have a material effect on the issuer's prospects for at least the current financial year**

There is no proof of any trend, uncertainty, claim, commitment, fact or other circumstance, other than those set out in this Informative Brochure which could reasonably have a significant impact on the prospects for the Company in the current financial year.

## **13 PROFIT FORECASTS OR ESTIMATES**

Not applicable.

## **14 ADMINISTRATIVE, MANAGEMENT, AND SUPERVISORY BODIES AND SENIOR MANAGEMENT**

### **14.1 Names, business addresses and functions in the issuer of the following persons and an indication of the principal activities performed by them outside that issuer where these are significant with respect to that issuer**

#### **a) Members of the administrative, management or supervisory bodies**

### **Board of Directors**

The members of the Board of Directors of the Company on the date of this Prospectus, as well as their positions on the Board, the nature of those positions and their business addresses, are set forth below:

<b>Name</b>	<b>Position</b>	<b>Nature of the position</b>	<b>Business Address</b>
Mr. José Ignacio Sánchez Galán	Chairman	Representative director (1)	c/ Tomás Redondo, 1 28033 Madrid
Mr. Xabier Viteri Solaun	CEO	Officer	c/ Tomás Redondo, 1 28033 Madrid
Ms. María Helena Antolín Raybaud	Director	Independent	Crta. Madrid-Irún, km. 244,8, Apartado 2069, 09007 Burgos
Mr. Alberto Cortina Koplowitz	Director	Representative director (1)	Paseo de la Castellana, 28, 28046 Madrid
Mr. Luis Chicharro Ortega	Director	Independent	c/ Marqués de Villamagna, 3 28001 Madrid
Mr. Carlos Egea Krauel	Director	Representative director (1)	Gran Vía Escultor Salzillo, 23, 30005 Murcia
Mr. Julio Feroso García	Director	Representative director (1)	Plaza de Los Bandos, 15-17, 37002 Salamanca
Mr. Marcos Fernández Feroselle	Director	Representative director (1)	Rosas de Aravaca, 31 28023 Aravaca (Madrid)
Mr. Juan Pedro Hernández Moltó	Director	Representative director (1)	Parque de San Julián, 20, 16001 Cuenca
Mr. Santiago Martínez Lage	Director	Independent	c/ Claudio Coello, 37 28001 Madrid
Mr. Manuel Moreu Munaiz	Director	Independent	c/ Bolivia, 5 28016 Madrid
Mr. José Luis San Pedro Guerenbarrena	Director	Representative director (1)	c/ Tomás Redondo, 1 28033 Madrid
Mr. Javier Sánchez-Ramade Moreno	Director	Representative director (1)	Plaza de Colón. 10. 14001 Córdoba
Mr. José Sainz Armada	Director	Representative director (1)	c/ Tomás Redondo, 1 28033 Madrid
Mr. Álvaro Videgain Muro	Director	Independent	Tres Cruces, 8 01400 Llodio (Álava)
Ms. Ana Isabel Buitrago Montoro	Non-director secretary	--	c/ Tomás Redondo, 1 28033 Madrid

Name	Position	Nature of the position	Business Address
Ms. Regina Reyes Gallur	Non-director vice-secretary	--	c/ Tomás Redondo, 1 28033 Madrid

(1) Appointed on proposal of Iberdrola, S.A.

The nature of the position of each of the directors was approved by the sole shareholder of the Company as of the date of this prospectus, Iberdrola, S.A., last 5 November 2007.

### ***Activities outside the Company***

According to the information supplied to the Company, the members of the Board of Directors do not engage in activities other than their functions within the IBERDROLA RENOVABLES and/or the Group of which it is a part, that are significant to the Group's business, except: (i) those indicated under the heading "Data on relevant education and experience for management" in section 14.1 herein and (ii) those laid down in the tables which list the companies of which the people mentioned under letters a) and d) in this section have been members of administrative or supervision bodies or direct partners at any time within the last five years.

### **b) Partners with unlimited liability, in the case of a limited partnership with a share capital**

Not applicable, because IBERDROLA RENOVABLES is a corporation.

### **c) Founders, if the issuer has been established for fewer than five years**

Not applicable, because the Issuer was formed more than five years ago.

### **d) Any senior manager who is relevant to establishing that the issuer has the appropriate expertise and experience for the management of the issuer's business**

Below is a list of the persons that, together with the inside members of the board of directors referred to above, comprise the senior management team of the Company as of the date of this Prospectus:

Name	Position	Business address	Date of hire
Mr. Keith Stuart Anderson	UK managing director	Cathcart Business Park, Spean St., Glasgow G44 4BE	October 2007(*)
Ms. Ana Buitrago Montoro	Secretary and secretary to the board	c/ Tomás Redondo, 1 28033 Madrid	May 2002
Mr. Álvaro Delgado Piera	Head of corporate resources	c/ Tomás Redondo, 1 28033 Madrid	July 2004

Name	Position	Business address	Date of hire
Mr. Terry Hudgens	US managing director	1125 NW Couch Street, Suite 700, Portland, OR 97209	October 2007(**)
Mr. Rafael de Icaza de La Sota	Head of control	c/ Tomás Redondo, 1 28033 Madrid	March 2003
Mr. Estanislao Rey-Baltar Boogen	CFO	c/ Tomás Redondo, 1 28033 Madrid	September 1997
Mr. Victor Manuel Rodríguez Ruiz	Spain managing director	c/ Tomás Redondo, 1 28033 Madrid	June 2002
Ms. María Ángeles Santamaría Martín	Head of markets	c/ Tomás Redondo, 1 28033 Madrid	December 2002
Mr. José Joaquín Santamaría Tamayo	Head of operations	c/ Tomás Redondo, 1 28033 Madrid	February 2004
Mr. Jamie Wilson	Rest of world managing director	c/ Tomás Redondo, 1 28033 Madrid	October 2007

(\*) The date of hiring indicated regarding Mr Keith Stuart Anderson refers to the date of his joining the IBERDROLA RENOVBLES Group derived from the restructuring operation described in section IV-19.1. He joined the Renewables Business Unit of the Scottish Power Group in 2006 <sup>(\*)</sup>

(\*\*) The date of hiring indicated regarding Mr Terry Hudgens refers exclusively to his contract with the company. He joined PPM Energy Inc. in May 2001.

The list of persons included in the foregoing team as senior managers of the Company has been prepared based on the definition of senior manager contained in the Unified Good Governance Code approved by the Board of the CNMV on 22 May 2006 (the "Unified Good Governance Code"), all of the foregoing without prejudice to the fact that certain persons that are members of this team are related to the Company by means of an ordinary employment relationship.

**Nature of any family relationship among any of the persons referred to in the foregoing sections**

There is no family relationship whatever among the persons referred to in this section 0.

**Information regarding management expertise and experience**

Below is a brief summary of the academic backgrounds and professional careers of the persons referenced in letters a) and d) of this section 0:

***Members of The Board of Administration***

**Mr José Ignacio Sánchez Galán**

Industrial Engineer from the Higher Industrial School ICAI of the Comillas Pontifical University of Madrid, Graduate in Company Administration and Foreign Trade from ICADE, Comillas Pontifical University of Madrid and Diploma holder in General Company Administration and Foreign Trade from the Madrid School of Industrial Organization (EOI).

Mr José Ignacio Sánchez Galán has held several executive and managerial posts in the company *Sociedad Española del Acumulador Tudor, S.A.* (now Exide Group), as well as board member and Director General of Industry of Turbo Propulsores, S.A. (ITP), President of the German Eurojet consortium, Managing Director of Airtel Móvil (now Vodafone España) and member of the *Supervisory Board* of Nutreco Holding N.V.

He currently occupies the post of President and Managing Director of Iberdrola, S.A., presiding Scottish Power Limited, Iberdrola Inmobiliaria, S.A. and El Desafío Español 2007, S.A. (company handling the participation of the Spanish ship in the America's Cup). He is a Board Member of Page Ibérica and Bodegas Matarromera, and is a member, among others, of the following Trusts: Prince of Asturias Foundation, Cotec Foundation, Carolina Foundation, Bilbao Guggenheim Museum Foundation, Comillas-ICAI University Foundation, Salamanca Pontifical University Foundation, General University Foundation of Salamanca, Spain-United States Council Foundation, and forms part of the Advisory Committee of the Prince of Asturias Science and Information Technology Chair of the University of New Mexico (United States).

He belongs to the Circle of Basque Industrialists, Circle of Entrepreneurs (Madrid), the Circle of Economy and the Management Progress Association (APD), as well as the American Management Association.

#### **Mr Xabier Viteri Solaun**

Electrical Industrial Engineer from the Higher Technical School of Industrial Engineers of Bilbao and has attended the General Management Programme (PDG) at the IESE

He began his professional career in Cadem, in the industrial area from 1984 to 1988, and later carried out his work at the Basque Energy Organization (EVE) and Proindesa (currently Corporación IBV, S.A.). In 1992, he was appointed Iberdrola Project Director in the Power Unit and Activities Manager of said unit. As of 2002, he began his career in Iberdrola Energías Renovables, S.A. as Head of Business Development in the Northern Zone, Zone Director and, finally, as Renewable Energies Director.

#### **Ms. María Helena Antolín Raybaud**

Graduate in *International Business & Business Administration* from Eckerd College, St. Petersburg, Florida (United States), and MBA from Anglia University, Cambridge, United Kingdom and the Polytechnic University of Valencia.

She has held several positions in charge of quality, organization and methods, or communication within the Antolín Group. In 1996, she was appointed Managing Director of the Antolín-IPV Group, later taking up the position of Head of Development within the Antolín- Irausa Group.

She currently sits on the Board of the Antolín-Irausa Group and holds the post of Corporate Strategy Manager.

**Mr Alberto Cortina Koplowitz**

Law Graduate from the San Pablo-CEU University of Madrid and Complutensian University of Madrid, and MBA from IESE.

In 1996 he set out on his professional career in the private banking department of JP. Morgan, and in 1997 joined Banco Zaragozano, in the Treasury Department; since 1999 he has held the post of Executive Director in the Omega Capital Group.

**Mr Luis Chicharro Ortega**

Graduate in Economics from the Comillas Pontifical University, ICADE, and holder of a Law Degree from the University of Deusto.

He set out on his professional trajectory as Vice-Director of the López Quesada Bank. From 1979 to 1989 he was Vice-president of JP Morgan, moving on to become Director General of Swiss Bank Corporation España, S.A. from 1989 to 1993 and Managing Director of SBS Sociedad de Valores, SVB, S.A. He later occupied the post of Managing Director of Omnilogic Telecomunicaciones, S.A. and Managing Director of S.A. Sanpere and Sistelcom. Between 1994 and 1996 he was Vice-president and Managing Director of Swiss Bank Corporation Ibersuizas, S.A. From 1996 until the present day he has been a Founder Member and Executive Vice-president of Inversiones Ibersuizas, S.A.

**Mr Carlos Egea Krauel**

Industrial Engineer from the Higher School of Industrial Engineers of Madrid, as well as Doctor in Economics and Business Sciences from the Autonomous University of Madrid. He is also Professor on leave of absence from the Business Organization Department at the University Business Studies School of Murcia University.

He began his professional career in the industrial sector, specifically in the company Fraymon, S.A., before going on to join the financial sector through the Atlantic Bank. In 1976, he started his professional work at the Savings Bank of Murcia, where he was appointed Director General in 1983.

He is currently Director General of the Savings Bank of Murcia, President of the Enterprise Corporation CajaMurcia, SL, and Vice-president of the CajaMurcia Foundation.

**Mr Julio Feroso García**

Graduate in Medicine, specializing in Neurology, with a Nursing Diploma from the University of Valladolid and postgraduate studies in Epileptology and Clinical Neurophysiology at the University of Aix-en-Provence (Marseilles-France).

He is Professor of the Faculty of Medicine of the University of Salamanca, Researcher at the Neuroscience Institute of Castilla and Leon, and was appointed Rector of the University of Salamanca. Likewise, he is an Advisor to international organizations (UNESCO, European Union).

He was President of the Duero Business Group and, since 24<sup>th</sup> September 2003, has held the post of President of the Savings Bank of Salamanca and Soria (Caja Duero).

He is currently an Administrative Board Member of Uralita and, among others, of the Board of the Savings Banks Foundation (Funcas).

**Mr Marcos Fernández Fermoselle**

Graduate in Company Administration and Management (United States), and Master in Real Estate Management from the Polytechnic University of Madrid.

His professional career began in the companies Revlon, S.A., KaiserKraft, S.A. and Vitruvio Leo Burnett, S.A., before going on to join the Fernandez family group of companies in 1987. He was Managing Director of Parquesol Inmobiliaria y Proyectos, S.A. until 1998, and its Executive Chair until 2007, and President of Real Valladolid, S.A.D. from 1998 until 2000.

**Mr Juan Pedro Hernández Moltó**

Graduate in Economic and Business Sciences from the Complutensian University of Madrid.

He has held the post of Lecturer in Political Economics at the Complutensian University of Madrid, Secretary General of the University School of Toledo and Regional Transport and Telecommunications Minister in Castille-La Mancha, as well as Minister of Economy and Taxation in the aforementioned independent community. He later held the post of Vice-president of the Fiscal and Financial Policy Council, as well being a national member of parliament, occupying different positions as spokesman until 1999.

He has been Advisor to the Spanish Confederation of Savings Banks and President of Planes e Inversiones Castilla-La Mancha, S.A..

He is currently President of Caja Castilla-La Mancha, President of CCM Corporation S.A., President of Savings Bank Federation of Castille-La Mancha and Managing Director of Metrovacesa, S.A.

**Mr Santiago Martínez Lage**

Graduate in Law from the University of Madrid, awarded end of career prize from the Montalban and Blasco Ramirez Foundations, extending his studies at the International Civil Employees School of Madrid, the Diplomatic School, the International Law Academy of the Hague, the Amsterdam "Europe Institute" and the INSEAD of Fontainebleau.

He is a civil servant in the Diplomatic Corps (Embassy Advisor), on leave of absence.

In the educational sphere, he has given several courses, classes and conferences on Law of the European Communities and on Competition Law in the most diverse areas. He is a member of the Academic Council of the Master in European Union Law at the University Carlos III of Madrid and of the Salvador de Madariaga University Institute of European Studies of the University of A Coruña.

Since 1985 he has been running the Martinez Lage & Associates office as companies lawyer and consultant.

**Mr Manel Moreu Munaiz**

Doctor in Naval Engineering from the Higher Naval Engineering Technical School of Madrid, and Master in Ocean Engineering (Masters of Science in Ocean Engineering) from the Massachusetts Institute of Technology (MIT).

He embarked upon his professional career in 1978 as Head of the Technical Department of the Classification Company/Society Fidenavis. He subsequently went on to become Technical Director of Seaplace, S.L. where he developed several important projects up to the present day, in combination with his educational work as lecturer at the Higher Technical Engineering School of Madrid, and in the different postgraduate courses of the Higher Institute of Energy (ISE), and CSIC, concerning off-shore Engineering related matters. He is Dean of the Oceanic Naval Engineering College.

**Mr José Luis San Pedro Guerenabarrena**

Industrial Engineer, specialist in Energy Techniques, from the Higher Technical School of Industrial Engineers (ETSII) of Bilbao, and graduate in Economic and Business Sciences from the faculty of Sarriko (Bilbao) in the speciality of financing and Master in Strategic Planning from the Massachusetts Institute of Technology (MIT).

In 1971 he joined the planning and studies division of Iberduero, with responsibility for the demand and production studies section; in 1980, he was appointed Head of the Management Systems Department and in 1982 took on the post of Head of the Studies and Planning Department, as of when he has actively taken part in studies on electrical sector restructuring.

In 1984 he took over the position of Administration and Finance Director of Iberdrola, S.A., a period in which he continued to play an active role in the rearrangement process of the sector, running all financial operations; in 1991 he accepted the post of Managing Director of Economy and Finance of Iberdrola, S.A. and in 2000 became Director General of Control, Regulation and Services of Iberdrola, S.A.

**Mr Javier Sánchez-Ramade Moreno**

Mercantile Professor of Company Administration and Management, in addition to having taken a Master in Company management (International Institute of San Telmo), and Master in Budgetary Management (Complutensian University of Madrid).

In 1979, he set out on his professional activity in the Sanchez Ramade Group, taking charge of the analytical implantation of the different departments in the group. He was later appointed Head of Marketing Division of Urende, S.A. until 1990, when he was promoted to Managing Director of Urende, S.A., with responsibility for different areas in the Sanchez-Ramade Group (Automotion, Real Estate, Cinematography, Information Technology, Finance and Patrimony).

He is currently President of Urende and Vice-president of the Sanchez-Ramade Group, and Member of the Territorial Board of Banesto, S.A., Telefonica, S.A. or Corporación Mapfre, S.A.

**Mr José Sainz Armada**

Graduate in Business Administration and Law from the Comillas Pontifical University, ICADE, Madrid and MBA from INSEAD Fontainebleau (France).

In 1985, he joined JP Morgan, where he remained until 1992 when he took up the Presidency of Argentaria Bolsa; in 1996, he held the post of General Director and Financial Director of Argentaria until the year 2000, when he was appointed General Director of Corporate Value in the BBVA, and subsequently Director General of Assets Management in the BBVA. In 2002, he took over as Head of Development and Finance in Iberdrola, S.A. and subsequently became Economic-Financial Director.

**Mr Alvaro Videgain Muro**

Graduate in Business Sciences and Law from the University of Deusto.

In 1981, he joined the company Tubacex, S.A., where he successively occupied the posts of Export Director and General Assistant Director, with responsibility for the Commercial and Marketing areas. In 1992, he was appointed Managing Director of Tubacex, S.A.

He has held management and advisory positions in Tubacex Tubos Inoxidables, S.A., Acería de Álava, S.A., Schoeller Bleckmann Edelstahlrohr AG, Salen Tuben Inc., Cotubes, S.A., Tubos Mecánicos, S.A., Tubacex Taylor Accesorios, S.A., and is a Consultant Board Member of Mercapital, S.L.

*Our executives*

**Ms Ana Isabel Buitrago Montoro**

Law Graduate with Diploma in Business Sciences (E-1) from ICADE, Pontifical University of Comillas, and Master in Law (LLM) with qualification Magna Cum Laude from the Fordham University School of Law (New York).

In October 1992 she joined the legal firm Uría & Menéndez, a job that she combined with the accomplishment of doctorate courses; in May 1996 she joined the New York office of Brown & Wood (New York and London); in January of 1997 she rejoined Uría & Menéndez, specializing in Administrative Law, Stock Market and mergers and acquisitions; in May 2000 she entered Terra Network S.A. as Legal Business Director. Since 2002, she has been Legal Services Director of Iberdrola Energías Renovables, S.A.

She has published several articles in Spanish and foreign legal reviews and given classes in Mercantile Law at the Carlos III University in Madrid.

**Álvaro Delgado Piera**

Graduate in Law from the University of Salamanca and holder of a postgraduate qualification as "Human Resources Expert" from the Commercial University of Deusto.

In 1998, she set out on her career as a Solicitor, before going on to occupy the post of Head of Revenue Section of the City council of Avila. Between 1990 and 1996, in the Aristrain Corporation, she held the positions of Human Resources Manager and Head of Personnel. Later, between 1996 and 2000, she held the post of Northern Human

Resources Director in the company Sociedad Financiera y Minera, S.A., going on to become Head of Planning and Human Resources Selection in Iberdrola Redes, S.A. in 2000 and 2001. From 2002 until 2004 she was Head of the Human Resources Development Department at Iberdrola Distribución, S.A.U.

**Mr Terry Hudgens**

Civil Engineer from the University of Houston.

He has held diverse positions in Texaco Inc., working on management operations and posts, including the Vice-presidency of Business Development for Texaco Trading and Transportation, Inc. Likewise, he has held the post of President of Texaco Gas Natural-Norteamérica. He was also Texaco's Senior Representative in the Natural Gas Supply Association. For 25 years he has held several posts in the company Texaco Trading and Transportation, Inc.

Subsequently, he has held diverse positions at Pacificorp such as Senior Vice President of Energy Supply, Manager of Generation, Wholesale and Mining Business.

He is currently a Member of the Board of Administration of The Nature Conservancy and President of PPM Energy, Inc.

**Mr Rafael de Icaza de La Sota**

Graduate in Economic and Business Sciences from the Commercial University of Deusto.

In 1984 he joined ERCOSA (Empresas Reunidas de Cobre Electrolítico y Metales, S.A.), where he has held different positions in the Acquisitions Department; in 1989 he joined Iberdrola as Head of the Fixed Assets System, moving on in 1992 to carry out management control activities in Audit Control management; in 1994 he joined the Administration, Control and Regulation management team before becoming Head of International Control in 2000. Since September 2001, he has been Control Director of Iberdrola Renovables, S.A.

**Mr Estanislao Rey-Baltar Boogen**

Graduate in Economic and Business Sciences from the University of Deusto and International Executive MBA from the Business Institute.

He developed his professional career at Arthur Andersen as a Consultant until 1997, when he joined Grupo Iberdrola as Head of Financial Consolidation. He has been Director General of El Desafío Español 2007, S.A. Currently, he is the Financial Director of Iberdrola Renovables, S.A.

**Mr. Víctor Manuel Rodríguez Ruiz**

Electrical Industrial Engineer from the Higher Industrial School ICAI, Comillas Pontifical University of Madrid and Master in Marketing and Foreign Trade in Business College ESDEN. He has attended courses on several matters in Business entities at EOI, ESADE and Cámara de Comercio.

From 1975 to 1995 worked in Sociedad Española del Acumulador Tudor, S.A. as director of Export Division, Subsidiaries Manager and First Team Manager; From 1995 to 2002 occupied the post of Airtel Center Area Manager.

He has held the post of as Vicepresident of APRECAM (Asociación de Promotores de Energía Eólica de Castilla- La Mancha).

**Ms. María de los Ángeles Santamaría Martín**

Graduate in Industrial Engineering from the Comillas Pontifical University, ICAI and the General Management Program at the IESE.

From 1985 to 1994 she carries her professional work at SAC S.A., which belongs to the Duro Felguera Group. In 1995 she was appointed Commercial Director at IST, S.A. In 1996 she joined Iberdrola Ingeniería y Consultoría S.A. and in December 2002 she moved to Iberdrola Renovables, S.A. where she was in charge of Exploitation Management until 2006 when she was appointed Market and Prospective Director.

**Mr. José Joaquín Santamaría Tamayo**

Graduate in Industrial Engineering, specialized in Mechanics from the Higher Technical School of Industrial Engineers of Bilbao and holder of an MBA from the IESE.

He has worked in different posts throughout his professional career, all related with Nuclear, Thermolectric, Gas and Renewable Energy. He has also worked in electronic devices Engineering and Construction related activities.

In 1977 he joined Iberduero where he was in charge of mechanic assemblies, bootstraps and the implementation of the conventional zone of C.N. de Lemóniz. Between 1982 and 1985 he was Planning Officer, Economic and Service Control Officer and in charge of the thermal power plant of the Carrion river, Group II. From 1988 to 1993 he was assistant to the Management Director Nuclear Plant in Trillo I. From 1993 to 1995 he was Officer in charge of Purchases, Services and Storage at the aforementioned Plant. He then joined Iberdrola S.A. and worked in different posts both related to engineering and consulting and to power generation. Since 2005 he has been the Operations Director at Iberdrola Renovables S.A

**Mr Keith Stuart Anderson**

Graduate in Accountancy, MBA and accountant of the Bar Association of ICAS (Institute of Chartered Accountants of Scotland).

He embarked upon his professional career in 1986 as accountant (chartered accountant) at Arthur Young; in 1992 he became Head of Audit at the Royal Bank of Scotland and in 1997 was appointed as Head of Consultancy in Ernst & Young. In 1999 he was Head of Internal Auditing in Scottish Power, plc. In 2003 he worked as Strategy Director of the UK division of Scottish Power and finally, in 2005, he was appointed Director of Renewable Energies.

In 1992 he was appointed Head of Audit at the Royal Bank of Scotland and in 1997 Head of Consultancy in Ernst & Young; in 1999 he worked as Head of International Audit at Scottish Power plc. In 2003 he worked as Strategy Director of Scottish Power

in the UK and finally in 2005 he was appointed Director of Renewable Energies at ScottishPower.

**Mr Jamie Wilson**

He graduated in Accounting & Economics from the Institute of Chartered Accountants of Scotland, and studied an Advanced Management Programme in the Wharton Business School.

His profesional career began at Grant Thornton holding different positions between 1986 and 1997 as Investigation and Audits Supervisor, Business Planning Consultant and Senior Manager of Financial Department.

Later, in Scottish Power plc he worked as Senior Financial Analist and Corporate Strategy Director in the social strategy department between 1997 and 2002. In 2003, he began to work for the United Kingdom branch of this Company as Aquisition and New Business Director; since 2005, he has worked as Comercial Development Director in the Energy Wholesales Department.

**Names of all companies and associations of which those persons, at any time over the last five years, have been members of the administrative, management or supervision bodies, or partners, indicating whether they continue to be members of the administrative, management or supervision bodies, or partners.**

Set forth below are the companies with respect to which the persons referred to in letters a) and d) of this section 0 have been members of the administrative, management or supervision bodies, or direct partners, at any time over the last five years, with the exception of (i) companies of a merely hereditary or family nature; (ii) shareholdings in listed companies not in the nature of significant interests and (iii) any others that are of no significance to the Company's business.

**Regarding any of the persons referred to in letters a) and d) above in this section, and for the five years prior to the date of the Prospectus, it is noted that:**

In accordance with the information provided to the Company by the members of the administrative, management and supervision bodies, and by the senior managers of the Company, none of them has been convicted of a crime of fraud, or charged on an official public basis or sanctioned by legal or regulatory authorities over the last five years.

None of these persons in the exercise of his/her authority as a member of the administrative, management or supervision body, or as a senior manager, has been involved in any bankruptcy, suspension of payments or liquidation over the last five years, except as regards Mr. Rafael Icaza de La Sota, who has been the sole collecting officer of Energías Eólicas Manchegas, S.A. and Energías Eólicas de Sisante, S.A., which have already been settled.

None of these persons has been disqualified by a court by reason of his/her actions as a member of the administrative, management or supervision bodies of an issuer company, or by reason of his/her actions in the management of the affairs of an issuer company over the last five years.

#### **14.2 Administrative, management, and supervisory bodies and senior management conflicts of interests**

According to the information that has been provided to the Company, none of the persons referred to in section 0 above in this Registration Document has a conflict of interest between his/her obligations to the Company and his/her private interests, nor do they engage in activities on their own behalf or on behalf of others that are similar, analogous or complementary to those included within the corporate purpose of the Company, excepting: (i) those indicated in the heading "Information for the preparation and pertinent management experience" in section 14.1 above; and (ii) those provided for in the schedules set out by the companies where the persons mentioned in paragraphs a) and d) of the abovementioned 14.1 have been members of the administrative or supervisory bodies, or direct shareholders, at any time during the last five years. The mechanisms for detecting and handling any conflicts of interest are regulated in the Board Regulations and in the Company's Internal Regulations for Conduct on the Securities Markets, approved by the Board of Directors at its meeting of 5 November 2007. In particular, these rules establish a general duty of directors and senior managers to abstain from attending and participating in deliberation and voting regarding matters with respect to which they have a conflict of interest. In the specific case of shareholder-nominated directors, they establish a duty to abstain from voting regarding matters that may imply a conflict of interest with the shareholder nominating them and the Company.

The Company is particularly zealous in always using all caution required by the principles of good corporate governance in cases of actual or potential conflict of

interest, and sees to compliance with articles 127, 127 bis, 127 ter, 127 quater and 132 of the Corporations Act.

In particular, the Company and its sole shareholder as of the date of this Prospectus, Iberdrola, S.A., have signed a master agreement for the purpose, inter alia, of preventing any conflicts of interest between Iberdrola, S.A. and IBERDROLA RENOVABLES. In section 0.3 below in this Registration Document the principal terms and conditions of the referenced master agreement are summarised.

➤ ***Agreements with shareholders, customers, suppliers and others***

Also, it is noted that there is no kind of agreement or understanding with significant shareholders, customers, suppliers or others, by virtue of which any person mentioned in section 0 above may have been appointed as a member of the management body or as a senior manager. Without prejudice to the foregoing, as indicated in referenced section 0, the outside shareholder-nominated directors have been proposed by the sole shareholder of the Company as of the date of this Prospectus, Iberdrola, S.A.

➤ ***Restrictions on disposition of securities of the Company***

The persons mentioned in section 0 of this Registration Document have not agreed upon restrictions on disposition over a given period of time of such interests as they may hold in IBERDROLA RENOVABLES, without prejudice to the fact that as of the date of this Prospectus none of the referenced persons has any shareholding interest in the Company.

Notwithstanding the foregoing, in accordance with the provisions of the fifth article of the Company's Internal Regulations for Conduct on the Securities Markets, the members of the Board of Directors, including the Secretary and Assistant Secretary of this body and the senior managers, among others, may not engage in transactions in securities issued by the Company admitted for trading on an organised secondary market, financial instruments or agreements that give the right to acquire such securities, or the underlying assets of which are securities, instruments or agreements of this kind, or in such other securities, instruments and agreements as may be expressly specified by the Rules Compliance Unit, as defined in those Regulations: (i) when they have confidential information regarding those securities or the issuer thereof, (ii) during the seven days prior to each disclosure of results of the Company, or (iii) when so determined by the Rules Compliance Unit. Neither may they sell the affected securities that they acquire until at least fifteen calendar days have elapsed since their acquisition, excepting authorisation from the Regulations Compliance Unit.

## **15 REMUNERATION AND BENEFITS**

### **15.1 Amount of remuneration paid (including any contingent or deferred compensation), and benefits in kind granted to such persons by the issuer and its subsidiaries for services in all capacities to the issuer and its subsidiaries by any person**

#### **Compensation paid to members of the company's management body**

Prior to 5 November 2007 the Company was run by a single manager, whose job was unpaid according to the provisions of the old copy of Article Twenty-Five of the

Corporate Bylaws. On this date Iberdrola, S.A., as sole Company shareholder, adopted various decisions by virtue of which the management body adopted the form of a Board of Directors, and the job of Manager was paid.

Article Forty-Four of IBERDROLA RENOVABLE's Corporate Bylaws provides that Board Members, as Board of Directors members, will have the right to receive compensation from the Company made up of (a) a fixed allocation, and (b) per diems for attending meetings of the Board of Directors and their Commissions.

The total amount of compensation the Company will pay its group of Managers for the items stipulated in the preceding paragraph shall not exceed the sum determined by the General Shareholders Meeting for that purpose. The sum thus set by the Shareholders Meeting shall be maintained, provided it is not changed by a new General Shareholders Meeting agreement.

The setting of the exact sum to pay within the limits set by the Shareholders Meeting, its distribution among the different Managers, the criteria to consider for its distribution among the different Managers, the period of its payment, as well as in general, everything not set forth by the General Shareholders Meeting, will be determined by the Board of Directors subject to its proposal from the Commission on Appointments and Remunerations.

In addition, and independent of the compensation contemplated in the foregoing paragraphs, it is contemplated that the compensation of Managers may be by way of delivery of shares or option rights thereon, as well as compensation determined by reference to the value of the shares of the Company. The application of these systems of compensation must be resolved by the General Shareholders Meeting.

In light of what has been stated in the foregoing paragraphs, and given that until 5 November 2007 the Company has been run by a sole administrator whose position was unpaid, the current Managers of IBERDROLA RENOVABLES have not received in the 2004, 2005, and 2006 fiscal years, as well as up to 30 September 2007 any payment whatsoever for their belonging to the IBERDROLA RENOVABLES Board of Directors. Similarly, it is noted that during these periods the Board of Directors members have received no compensation whatsoever by reason of their service on the management bodies of the subsidiaries or companies in which it holds interests, nor for any other reason.

The aforementioned notwithstanding, Iberdrola, S.A., sole shareholder of IBERDROLA RENOVABLES, pursuant to Article 44 of the Corporate Bylaws and for an indefinite time, so long as the General Shareholders Meeting approves nothing other, approved on 5 November 2007 the setting of the Board of Directors compensation in the overall amount of five million euros per fiscal year, which will be updated annually according to variations of the Consumer Price Index and which, in the case of fiscal year 2007, will be prorated according to the number of days actually transpired between the Board of Directors appointment date and the last day of the fiscal year. The fixed and variable remunerations and indemnizations belonging to the Managers who carry out executive duties at the Company shall remain included for the performance of those duties and will be paid and charged against the above-stated overall amount, by virtue of the provisions of Article 44 of the Corporate Bylaws.

Thus, and pursuant to the Company Board of Directors agreement of 5 November 2007 adopted subject to the proposal of the Commission on Appointments and Remunerations, compensation for Company Managers for the remaining 2007 fiscal year has been set at the following amounts:

Item	Amount
<b>Board of Directors President</b>	
Annual Fixed Allocation	180,000
Attendance Per Diems	3,600
<b>Commission Presidents</b>	
Annual Fixed Allocation	120,000
Attendance Per Diems	3,600
<b>Manager Members of the Delegated Executive Board, for Auditing and Compliance, for Appointments and Remunerations and Associated Operations</b>	
Annual Fixed Allocation	100,000
Attendance Per Diems	1,800
<b>Other Managers</b>	
Annual Fixed Allocation	60,000
Attendance Per Diems	1,800

As a result of the application of this system, members of the Board of Directors would receive an annual remuneration, exclusively in their capacity as such, of approximately 2 million euros, assuming that they are members of the various commissions and that they attend the meetings held. Remunerations obtained as a result of the various share schemes, as indicated below, would have to be added to that figure.

Furthermore, in its position as sole shareholder of IBERDROLA RENOVABLES and pursuant to the dispositions of Article 130 in the Fourth Additional Provision of the Corporations Law, as well as Article 44 of the Corporate Bylaws, on 5 November 2007, Iberdrola, S.A., agreed on systems for compensation in Company shares for executive managers and Company managers as described in Section 17.3 of this Registration Document.

#### **Compensation paid to the company's senior managers**

The compensation of the Company's senior managers, identified above in section 14 of the Registration Document, including the compensation received by the Company Managing Director, are the following, with the amendments subsequently made:

Concept	30/09/2007	2006	2005	2004
<b>Compensations and others</b>				
Annual compensation	2,350,145.42	1,289,204.92	1,294,933.08	754,571.66
Compensation in kind	19,810.86	14,594.11	9,615.78	20,821.18
Other concepts	0	0	0	0

The compensations set forth in the previous chart include those collected in the named fiscal years by the present Company Managing Director, Mr. Xabier Viteri Solaun, in his earlier position as Director of Renewable Energy. On the other hand, they do not include those collected by Mr. Keith S. Anderson (United Kingdom Director), Mr. Terry Hudgens (United States Director) and Mr. Jamie Wilson (Remaining World Director), due to the fact that on 30 September 2007 (reference date for fiscal year 2007), the companies from which his respective compensations were collected were not a part of the IBERDROLA RENOVABLES Group, since this integration did not occur until 3 October 2007 as a result of the non-monetary capital expansion described in Section 19.1 of the Registration Document. This chart also does not include the compensation collected by Mr. Estanislao Rey-Baltar Boogen (Financial Director), since on the referenced date of 30 September 2007 his compensation was satisfied by Iberdrola, S.A.

The Company estimates that the joint compensation paid to IBERDROLA RENOVABLES upper management will reach approximately three million five hundred thousand (3,500,000) euros in the coming 2008 fiscal year, including the compensation collected by the present Company Managing Director, Mr. Xabier Viteri Solaun, formerly Director of Renewable Energy.

No senior manager has received compensation by reason of membership in administrative bodies of subsidiary or investee companies of IBERDROLA RENOVABLES. Nor have they collected any other amounts on any other basis.

## **15.2 Total amounts set aside or accrued by the issuer or its subsidiaries to provide pension, retirement or similar benefits**

### **Members of the Company Board of Directors**

During the periods between 1 January and 31 December 2004, 2005 and 2006, respectively, and the 2007 financial year, on 30 September thereof, the Company and/or its subsidiaries have not made contributions to pensions plans, and the like, nor have they paid life, accident or liability insurance premiums for the members of the Board of Directors.

During the same periods, and with the clarifications made below, (i) contributions to (ii) life and accident insurance premiums have been made to the following amounts

Item	30/09/2007	2006	2005	2004
Funds and pension plans	26,233.34	26,296.76	26,098.96	17,825.80
Life, accident and liability insurance	7,503.60	7,471.64	5,785.39	1,804.84

The figures contained in the table above show the payments made in favour of the current Managing Director of the Company, Mr. Xabier Viteri Solaun, in his former position of Director of Energías Renovables. These do not include, on the other hand, those relating to Mr. Keith S. Anderson (United Kingdom Director), Mr. Terry Hudgens (United States Director) and Mr. Jamie Wilson (Rest of World Director), due to the fact that, on 30 September 2007 (reference date for the 2007 fiscal year) the companies in receipt of their respective remunerations were not included in the IBERDROLA RENOVABLES Group, since said integration did not take place until 3 October as a result of the non-cash capital increase described in section 19.1 of this Registration Document. Nor does said table include the corresponding figures for Mr. Estanislao Rey-Baltar Boogen (Finance Director).

No member of the Board of Directors or Senior manager has received any amount of this nature from subsidiary companies.

## 16 BOARD PRACTICES

### 16.1 Date of expiration of the current term of office, if applicable, and the period during which the members of the Board of Directors of the Issuer have served in that office

The fifteen (15) members of the Board of Directors of IBERDROLA RENOVABLES listed in section 14.1 of this Registration Document were designated by virtue of the decision adopted by sole shareholder, Iberdrola, S.A. on 5 November 2007.

In accordance with the forty-third article of the articles and bylaws, the directors will serve for a term of five (5) years (that is, until 5 November 2012), provided that the General Meeting does not resolve their dismissal or removal from office and they do not resign their positions. They may be re-elected one or more times for equal terms.

As provided in article 126.3 of the Corporations Act the appointment of directors of the Company will lapse when, the term having concluded, the following General Meeting has been held or the legal term for holding the Meeting that is to resolve on approval of the accounts for the preceding fiscal year has passed.

The Secretary of the Board of Directors, Mrs. Ana Isabel Buitrago Montoro, has held the position since appointment on 5 November 2007. The Assistant Secretary of the Board of Directors, Mrs. Regina Reyes Gallur was also appointed on 5 November 2007. Both positions are of indefinite duration.

**16.2 Information about contracts of members of administration, management or supervision bodies with the issuer or any of its subsidiaries providing for benefits upon termination of services, or the corresponding negative statement**

Of the contracts underwritten between the Company or any of its Subsidiaries and the members of the Board of Directors of the Company and its top management, four include indemnity clauses for the event of termination of said contracts. Of these, three establish compensation ranging between three and five annuities of the total compensation paid in the previous fiscal year; the other contract establishes two annuities of the fixed fee paid in the previous year.

On the other hand, two of the contracts underwritten with Executive Directors and top management contain remunerated post-contractual non-competition clauses. By virtue of said agreements, the Company reserve the right to require that, once the contract is extinguished and during the validity of the agreement, the parties may not provide services, directly or indirectly, on a self-employed or employed basis, either by themselves, or through third parties, to companies with identical or similar activity to that of the Company and, in particular, in relation to generation or distribution of electrical energy in any manner. The agreement has duration of one (1) year from the end of the contract for whatever cause. In the event that the Company exercises its rights in relation to the non-competition clause, financial compensation of the amount corresponding to the half one annuity of the Gross Fixed Annual Salary will be paid.

**16.3 Information regarding the audit committee and the compensation committee of the issuer, including names of the members of the committees and a summary of the internal rules**

The articles and bylaws and the Board of Directors Regulations of the Company contemplate that the Board of Directors will form a Delegated Executive Committee, an Audit and Compliance Committee and a Nominating and Compensation Committee, which will be comprised of members of the Board of Directors. It also may create other committees of a purely internal nature, with the authority determined by the Board of Directors itself.

Below is a description of the structure and authority given to each of them, in accordance with the provisions of the articles and bylaws and the Board of Directors Regulations.

**Delegated Executive Committee**

**Formation and composition of the Delegated Executive Committee**

The articles and bylaws and the Board of Directors Regulations contemplate a Delegated Executive Committee comprised of the number of directors specified by the Board of Directors, with a minimum of three (3) Directors and a maximum of six (6). The President of the Board of Directors shall act as President of the Committee and, in his absence, the director that the Board of Directors designates from the members of the Delegated Executive Committee. The secretary of the Board of Directors will act as secretary and in his absence the Assistant Secretary of the Board of Directors. The company's board of directors at its meeting of 5 November 2007 resolved at the

proposal of the Committee of Appointments and Salaries to constitute the referenced Delegated Executive Committee comprised of 4 members, as indicated below:

<b><u>DELEGATED EXECUTIVE COMMITTEE</u></b>		
Name	Position	Nature
Don José Ignacio Sánchez Galán	Chairman	Dominical <sup>(1)</sup>
Mr. Santiago Martínez Lage	Member	Independent
Mr. José Sainz Armada	Member	Representative Director <sup>(1)</sup>
Mr. Xabier Viteri Solaun	Member	Executive
Mrs. Ana Buitrago Montoro	Non-committee secretary	=

(1) Appointed by Iberdrola, S.A.

#### Powers

The Delegated Executive Committee will handle all matters within the authority of the Board that, in the judgment of the Committee itself, must be resolved without delay, the only exceptions being the rendering of accounts, the presentation of balance sheets to the General Meeting, such authority as may be given to the Board without authorisation of delegation, and the powers of the Board of Directors that by law or pursuant to the articles and bylaws cannot be delegated.

The Delegated Executive Committee will report to the Board of Directors in the first of these meetings, regarding the matters considered and the decisions adopted.

#### Operation

The Delegated Executive Committee will meet at least once (1) per month and at such other times as deemed to be appropriate by the Chairman, who also may suspend any ordinary meeting or meetings when he/she deems it to be appropriate for reasons fully within his/her discretion. It also will meet when so requested by two (2) of the directors who are members of the committee. Resolutions of the Delegated Executive Committee will be adopted by majority of the directors comprising the committee, present or represented at the meeting. In the event of a tie, the Chairman will have a casting vote. Also applicable to it, to the extent not incompatible with its nature, will be the provisions of the Board of Directors Regulations regarding the operation thereof, in particular those regarding calls of meetings, delegation of representation to another director, sessions with the presence of all members, written votes without a meeting and approval of minutes of meetings.

### Audit and Compliance Committee

#### Formation and composition of the Audit and Compliance Committee

The Board of Directors of the Company at its meeting 5 November 2007, resolved, under the provisions of the thirty-eighth article of the articles and bylaws, at the proposal of the Appointments and Salaries Committee to create an Audit and Compliance Committee from among its members.

The Audit and Compliance Committee is comprised of a minimum of three (3) and a maximum of five (5) members, who must be outside directors, not members of the Delegated Executive Committee. The Audit and Compliance Committee will have a Chairman, who necessarily will be one of the independent directors, with sufficient capability and availability to devote greater attention to the Committee than the rest of its members, and a Secretary, who need not be a director, appointed by the Board of Directors.

The composition of the Audit and Compliance Committee is as follows:

AUDIT AND COMPLIANCE COMMITTEE		
Name	Position	Nature
Mr. Álvaro Videgain Muro	Chairman	Independent
Mr. Javier Sánchez-Ramade Moreno	Member	Representative Director (1)
Mr. José Luis San Pedro Guerenabarrena	Member - Secretary	--Representative Director (1)

(1) Appointed by Iberdrola, S.A.

#### Powers

The basic principles for action and the internal operating system of the Audit and Compliance Committee will be governed by the thirty-eighth article of the articles and bylaws and the provisions of the Board of Directors Regulations.

The Audit and Compliance Committee is an internal body of the Board of Directors of an informational and consultative character, without executive functions, with authority to report, advise and propose within its scope of authority.

The articles and bylaws and the Board of Directors Regulations provide that, in all cases, the authority of the Audit and Compliance Committee will be:

- To report to the General Shareholders Meeting regarding questions posed by shareholders that fall within the scope of its authority.
- To propose to the Board of Directors for submission to the General Meeting the appointment of the statutory auditors of the Company.

- To supervise management of the internal audit area, which functionally will be under the Chairman of the Committee.
- To be advised of the financial reporting process and the internal control systems associated with the significant risks of the Company.
- To receive information from the auditors of accounts on those issues that may jeopardise their independence, which are related to the accounting audit process and, in general, on any other matters provided in the legislation on auditing of accounts and the technical audit standards prevailing from time to time.
- To report in advance on the Company's annual corporate governance report and see to compliance with the legal requirements and requirements in Professional Conduct and Good Governance Codes adopted by the Board of Directors.
- To report in advance to the Board of Governors with regard to (i) the areas of its competence provided in Title VIII of the Board of Directors Regulations, relative to the duties of the Directors, and (ii) the financial information which, due to its position as a listed company, the Company must make public from time to time.
- To report to the Board of Directors, in advance of it adopting the corresponding decision, on the creation or acquisition of shares in special purpose companies or companies based in other countries or territories which might be classified as tax havens or operations which, due to their complexity, may prejudice the transparency of the IBERBROLA RENOVABLES Group.
- To report on proposals for amendment of the Board of Directors Regulations.
- Such other matters as may be attributed to it by the articles and bylaws, the Board of Directors Regulations or the Board of Directors itself.

### Operation

As provided in the articles and bylaws and the Board of Directors Regulations, the Audit and Compliance Committee will meet as often as necessary, in the judgment of its Chairman, for performance of its tasks, and at least once (1) per quarter, or when requested by half of its members.

The Audit and Compliance Committee may validly meet when one half plus one of its members attend the meeting, personally or through a representative. Resolutions will be adopted by majority of the members present or represented. In the case of a tie, the Chairman will have a casting vote. Likewise, the provisions of the Board of Governors Rules relating to its operation and, in particular, those relating to the convening of meetings, delegation of representation in favour of another Director, universal sessions, holding of written and out of session votes, chairing and secretary of meetings and the passing of minutes of meetings will be applicable, so long as they are not incompatible with their nature.

Within the first three months following the end of each fiscal year, the Audit and Compliance Committee will submit a report on its activities during the fiscal year for approval of the Board of Directors. It thereafter will be made available to shareholders and investors.

## Nominating and Compensation Committee

### Formation and composition of the Nominating and Compensation Committee

The Board of Directors, at its meeting of 5 November 2007, under the provisions of the thirty-ninth article of the articles and bylaws, approved the creation of a Nominating and Compensation Committee. This Nominating and Compensation Committee is of an informational and consultative character, without executive functions, with authority to report, advise and propose within its scope of authority. It is governed by the provisions of the referenced thirty-ninth article of the articles and bylaws and by the provisions of the Board of Directors Regulations.

The Nominating and Compensation Committee is comprised of a minimum of three (3) and a maximum of five (5) members, designated from among the external Directors, the majority of them must be independent. The Board of Directors also will appoint its Chairman from among the members. The Chairman must necessarily be an independent director, with sufficient capability and availability to devote greater attention to the Committee than the rest of the directors who are members thereof. The Board of Directors also will appoint its Secretary, who need not be a director, on proposal of the Nominating and Compensation Committee itself.

The composition of the Nominating and Compensation Committee is as follows:

NOMINATING AND COMPENSATION COMMITTEE		
Name	Position	Nature
Mr. Santiago Martínez Lage	Chairman	Independent
Mr. Luis Chicharro Ortega	Vocal	Independent
Mr. José Sainz Armada	Member- Secretary	Representative Director (1)

(1) Appointed on proposal of Iberdrola, S.A.

### Powers

The Nominating and Compensation Committee has authority to supervise the process of selection of directors and senior managers (the latter on proposal of the Managing Director, if any), and assist the Board of Directors in establishing and supervising the compensation policy for such persons. Likewise, within the legal limitations, the aforementioned functions shall be undertaken in relation to the main shareholder institutions and those which are part of the IBERDROLA RENOVABLES group.

In particular, the Nominating and Compensation Committee has the following authority:

- Reporting on and reviewing the criteria to be used for composition of the Board of Directors and selection of candidates.

- Providing the Board of Directors with proposals for nominating directors to be appointed by coopting or, where appropriate, to be submitted to decision of the General Shareholders Meeting.
- Proposing to the Board of Directors which of its members will be on each of the Committees.
- Examining and organising succession of the Company's Chairman and Managing Director, if any, and, if applicable, making proposals to the Board.
- Proposing to the Board of Directors the system and amount of the annual compensations for the Directors.
- Reporting to the Board of Directors, prior to the adoption by the latter of the corresponding decision on proposal of the Chairman, regarding the appointment and/or removal of the Vice Chairman or Vice Chairmen (if any), Secretary and, if applicable, Assistant Secretary of the Board of Directors.
- Reporting to the Board of Directors regarding appointment and/or removal of senior managers of the Company on proposal of the Managing Director, if any.
- Reporting to the Board of Directors regarding any compensation or indemnification that may be fixed for cases of removal of senior managers of the Company on proposal of the Managing Director, if any.
- Proposing to the Board of Directors, with the corresponding report, the proposals presented by the Delegated Director on the compensation policy for the senior management and the basic contract conditions.
- Reporting on incentive and pension plans.
- Periodically reviewing compensation programmes, evaluating their appropriateness and performance.
- Seeing to it that, where new vacancies arise or where new directors are nominated, the selection procedures do not lack implicit faults which may imply discrimination of any sort.
- Seeing to observance of the Company's compensation policy.

In addition, the committee will advise the Board of Directors regarding the most appropriate configuration of that body and its committees as regards size and balance among the various classes of directors from time to time.

#### Operation

The Nominating and Compensation Committee, pursuant to the Board Regulations and the articles and bylaws of the Company, meets as often as necessary, in the judgment of its chairman, to perform its tasks, at least once each quarter or when requested by half of the directors that are members of the Committee.

It may validly act when half plus one of its members attend, in person or by representative, adopting its resolutions by majority of the members present or represented. In the event of a tie, the Chairman has a casting vote.

**Related Party Transactions Committee**

In addition to the foregoing, the Board of Directors of IBERDROLA RENOVABLES at its meeting of 5 November 2007, at the proposal of the Nominating and Compensation Committee resolved to form a Related Party Transactions Committee, pursuant to the provisions of the master agreement signed by Iberdrola, S.A. and IBERDROLA RENOVABLES as a part of the process of exchange listing of the latter.

This Committee has been conferred informative powers in relation to party transactions of IBERDROLA RENOVABLES and its subsidiaries with Iberdrola, S.A. and the rest of the companies with the Iberdrola Group, as well as powers in relation to conflicts of interest.

The Related Party Transactions Committee is comprised as follows:

RELATED PARTY TRANSACTIONS COMMITTEE		
Name	Position	Nature
Mr. Álvaro Videgain Muro	Chairman	Independent
Mrs. Maria Helena Anrolin Raybaud	Member	Independent
Mr. Xabier Viteri Solaun	Member	Executive
Mrs. Regina Reyes Gallur	Non-director - Secretary	—

The composition and principal characteristics and powers of the Related Party Transactions Committee are described in section 19.3 of this Registration Document.

**16.4 Statement as to whether the issuer complies with the corporate governance system or systems of its country of incorporation. In the event that the issuer does not comply with such a regime, a statement to that effect together with an explanation regarding why the issuer does not comply with such regime**

The Company's governance system substantially complies with and follows the recommendations on good corporate governance included in the Unified Good Governance Code.

In this regard, in order to adapt the Company's governance to the good corporate governance requirements and practices of listed companies, the sole shareholder of the Company passed the modification on 5 November 2007 of its Articles and Byelaws and the General Shareholders Meeting Regulations. The Board of Directors at its meeting of the same date approved the Board of Directors Regulations and the Internal Regulations for Conduct on the Securities Markets.

Without prejudice to the foregoing, it is necessary to make the following clarifications regarding compliance with the recommendations contained in the Unified Code:

- IBERDROLA RENOVABLES understands that it complies, in all substantial aspects, with the recommendations of the Unified Code of Good Management.
- Based on said recommendations and with the aim of incorporating these into the Company's internal regulations, on 5 November 2007 the following has been passed:

(i) By the sole shareholder:

Various by-law modifications and a revised version of the company by-laws; and

General Shareholder Meeting Regulation.

(ii) By the Board of Directors:

Board of Governor Regulation; and

Internal Regulation of Conduct in the Stock Markets.

- Also, and with regard to the Company Board of Directors, it should be noted that:

- In accordance with article 30.1 of the company by-laws, the Company Board of Directors shall be comprised of a minimum of eight and a maximum of fifteen directors. At the same time, and by virtue of the decisions adopted by the sole shareholder of IBERDROLA RENOVABLES on 5 November 2007, the Board of Directors is made up of fifteen members. In this sense, the Company has complied with recommendation nine of the Unified Code of Good Management, which sets a minimum and maximum range of five and fifteen directors, respectively.

- It must be noted that the designation of members of the current Board of Directors of IBERDROLA RENOVABLES has not been preceded by prior proposals and reports from the Nominating and Compensations Committee forecast in recommendation twenty seven of the Unified Code of Good Management. This is due to the fact that, at the time of designation, said Committee had not yet been constituted, so, previously, the Company was administrated by a sole director. However, the Nominating and Compensation Committee was established in accordance with the Board of Directors on 5 November 2007, after which, and on the same date, a session was held through which: (i) the proposal of nominating independent directors was evaluated and ratified; and (ii) the proposal to nominate representative directors as well as the executive director was favourably evaluated and reported.

In any case, the Nominating and Compensation Committee shall verify annually the nature of the members of the Board of Directors.

- With regard to the current composition of the Board of Directors, the following must be noted:

Of the fifteen members of the current Board of Directors, fourteen are external, whereby, in accordance with recommendation ten of the Unified Code of Good Management, these constitute a vast majority, the number of executives having been reduced to the required minimum.

Equally, five of the fifteen Company directors are independent, which constitutes a third of the members of the Board of Directors, according to the provisions of recommendation thirteen of the Universal Code of Good Management.

The Company has not yet adapted to recommendation fifteen of the Universal Code of Good Management, since, among the fifteen members, there is only one woman (Mrs. María Helena Antolín Raybaud). However, the Company demonstrates, in accordance with the provisions of said recommendation, that the selection process followed in the designation of new directors is not subject to any bias which might impede the nomination of more women.

- With regard to the compensation of directors, article 44.2 of the Company By-laws provides for compensation systems consisting of the offer of shares or options on these shares, as well as compensation which takes as a reference the value of IBERDROLA RENOVABLES shares. This by-law provision is general in nature and does not differentiate between representative, independent or executive directors. Despite this, the Company feels that this provision does not imply, in itself, a breach of recommendation thirty six of the Universal Code of Good Management, which advises the limiting of this type of compensation system for executive directors. The Company only detracts from this recommendation if such compensation systems are applied, effectively, to representative or independent directors and do not consist exclusively of shares designed to be held until they cease to be directors. In this sense, it should be noted that, on 5 November 2007 Iberdrola, S.A., in its capacity as sole shareholder of IBERDROLA RENOVABLES, resolved, in accordance with the provisions of article 130 and Additional Provision Four of the Limited Companies Act as well as in the mentioned article 44 of the Company By-Laws, compensation systems of shares in IBERDROLA RENOVABLES, limited to executive directors and directors of the Company, thereby complying with the aforementioned recommendation thirty six of the Universal Code of Good Management.
- In terms of both the Audit and Compliance and the Nominating and Compensation Committees these will be comprised of external directors and presided by an independent director. In this sense, therefore, complying with the forty fourth recommendation of the Universal Code of Good Management.

It should also be noted that, in its session on 5 November 2007, the Board of Directors resolved the constitution of the Related Party Transactions Committee between Iberdrola, S.A. and the Company, referred to below, as well as in article 19.3 of this Registration Document.

- In terms of the commitment of IBERDROLA RENOVABLES to good corporate management practices, the Audit and Compliance Committee shall periodically examine the degree of compliance with the recommendations of the Universal Code of Good Management by the Company and, where appropriate, by the

companies of the Group, reviewing its results and delivering the proposals for improvement it deems necessary to the Board of Directors.

Finally, it should be noted that, in compliance with recommendation two of the Universal Code of Good Management, Iberdrola, S.A. and the Company have underwritten, on 5 November 2007, a framework contract for the purpose of establishing a transparent schedule of relations between Iberdrola, S.A. and the Company (and between the companies of the Group) wherein, following the best corporate management practices and, in particular, recommendation two of the Unified Code of Good Management, IBERDROLA RENOVABLES are of action is defined and the necessary mechanisms are regulated in order to prevent and answer possible situations of conflict of interest, as well as for the performance of related transactions.

Under the provisions of the aforementioned framework contract and the Board of Director Regulations, the Board of IBERDROLA RENOVABLES resolved, in its session of 5 November 2007, the constitution of a Related Party Transactions Committee. The Committee shall be comprised of a majority of independent directors and representative directors proposed by Iberdrola, S.A. may not be members of it. The Chairman of the Related Party Transactions Committee shall be nominated by the Board of Directors from among the members of the latter. The Related Party Transactions Committee has been granted different powers, among which are the power report subject to authorisation by the Board of Directors or, in the event of an emergency, by the Delegated Executive Committee, all party transactions for which the amount exceeds the higher between (i) 0.3% of the consolidated income of the Company in accordance with the consolidated audited annual accounts from the last full complete fiscal year on the date the transaction in question was granted, and (ii) 5 million Euros.

The content of the abovementioned framework contract, as well as the functions of the Related Party Transactions Committee are described in detail in section 19.3 of this Registration Document.

Until commencement of the process of admission of the Company's shares to trading on the stock exchanges, the Company did not have a website of its own, apart from that of its parent, Iberdrola, S.A., for the dissemination of information. But as a result of this process the Company has initiated all steps necessary to have a corporate website when the shares are admitted to trading, satisfying the requirements of the securities market rules, to cover the shareholder right of information, and to disseminate important information.

The Company has a firm commitment to follow best practices of good governance, and therefore states its intention to adapt, as quickly as possible, to the recommendations for corporate governance applicable from time to time, adjusting them based on the characteristics of the Company and its group.

## **17 EMPLOYEES**

**17.1 Either the number of employees at the end of the period or the average for each financial year for the period covered by the historical financial information up to the date of the registration document (and changes in such**

numbers, if material) and, if possible and material, a breakdown of persons employed by main category of activity and geographic location. If the issuer employs a significant number of temporary workers, include information regarding the number of temporary workers by average term for the most recent fiscal year

The table shows the evolution of employees in the period covered by the historical financial information, as well as during the nine-month period ended 30 September 2007.

	IBERDROLA RENOVABLES (1)			PRO FORMA INFORMATION (2)
	31/12/2004	31/12/2005	31/12/2006	30/09/2007

Total	294	365	738	1,494

(1) Not including companies in the Scottish Power Group that have been added to the IBERDROLA RENOVABLES Group by virtue of the Restructuring Transaction referred to in section 19 of this Registration Document.

(2) Including companies in the Scottish Power Group that have been added to the IBERDROLA RENOVABLES Group by virtue of the Restructuring Transaction.

The Group's staff has increased by more than 408.16% during the period between 31 December 2004 and 30 September 2007. This growth to a great extent is the result of the launch of the international area, where business is growing at a strong pace, the most notable events being the incorporation of the Greek company C. Rokas, S.A. and the 2006 acquisitions of the US companies Community Energy and MRC Partners. The increase in the number of employees at 30 September 2007 was 102.44% by comparison with staff at 31 December 2006, of which 77.51% is the result of incorporation of the employees in the renewables area of Scottish Power.

In the breakdown by age, sex, functions and education of the employees:

- It is notable that, currently, 75% of staff are men and 25% women, with more than 58% of employees in the age range from 31 to 50. 31% of employees are under 30 years old, which shows the youth of the workers comprising the group.
- Regarding education of staff members, 59% of employees are university graduates, the remaining percentage being within the group of office workers.
- Regarding the functions performed by staff, 42% are in operations and maintenance, 19% in project development and construction, 31% in the corporate area, with the remaining percentage being in other areas.
- At 31 December 2006 employees with indefinite term contracts represented more than 95% of total staff.

One of the basic objectives of IBERDROLA RENOVABLES is to create a "humanly sustainable" enterprise, generating high-quality employment, based on employment conditions that combine appropriate economic compensation with high standards of health and work safety.

To achieve this objective, IBERDROLA RENOVABLES throughout its history has created, implemented and strengthened a series of family-oriented policies, which are structured into the following categories: "Work Flexibility" (paid leave for marriage, paid leave for marriage of a son or daughter, etc.), "Non-Salary Benefits" (special advances, health assistance, etc.) and "Other Benefits" (sports facilities, scheduled buses, etc.).

As a result of the indicated policies, IBERDROLA RENOVABLES obtained, on 4 May 2007, certification as a "Family Oriented Company, EFR" from Fundación + Familia, a non-profit charitable organisation the purpose of which is protection, defence and promotion of the family.

This certification is intended to be the highest official European distinction recognising the responsibility of companies that wish to harmonise family life and employment, implementing EFR policies in the workplace to improve the quality of life of employees.

#### **17.2 Shares and share purchase options**

IBERDROLA RENOVABLES is on the date of this Prospectus a sole proprietorship, Iberdrola, S.A. being a sole shareholder. Therefore, none of the directors or senior managers of the Company identified in section IV.14.1 above are currently shareholders in the Company. Nor do they have, at this time, options or other rights to acquire or receive shares in IBERDROLA RENOVABLES, without prejudice to the allocations which may be made, where appropriate, in the future in their favour as a result of the IBERDROLA RENOVABLES share based compensation system described in section IV.17.3 below.

#### **17.3 Description of any arrangements for involving the employees in the capital of the issuer**

Iberdrola, S.A., in its capacity as sole shareholder in IBERDROLA RENOVABLES, resolved on 5 November 2007, in accordance with the provisions of article 130 and in Additional Provision Four of the Limited Companies Act as well as in Article 44 of the Company By-Laws, the following IBERDROLA RENOVABLES share compensations systems for the executive directors and managers of the Company and its group of companies, delegating in the Board of Directors, with express substitution powers, in order to develop its terms and conditions and to designate to its beneficiaries, although on the date of this Prospectus it has adopted no agreement in this regard:

##### **Share transfer plan**

The share transfer plan is designed to reward staff of IBERDROLA RENOVABLES who have significantly contributed in the past to the creation of value, to the management and supervision of the company and to this offer. It involves the transfer of ordinary shares of IBERDROLA RENOVABLES to the beneficiaries as part of their

variable remuneration. The transfer may be completed in one or more transactions and the only requirement is that the beneficiary continues to work within the group of which IBERDROLA RENOVABLES is the parent company.

The maximum number of shares of the company which are to be destined to the share transfer plan shall be calculated by dividing 10 million euros by the price established for IBERDROLA RENOVABLES stock in the institutional tranche of the offer (which is the value of the shares that is to be taken as a reference)

The plan is to remain in force for a period that shall not exceed three years' time from the date of approval of Iberdrola, S.A. as sole shareholder of IBERDROLA RENOVABLES (that is, 5 November 2007), without affecting the terms of anticipated settlement to be established in the rules of the share transfer plan or the power of the board of administrators to determine allocations with a shorter maturity than the aforementioned maximum.

#### Long-term incentive or strategic bonus

The strategic bonus is meant to promote the achievement of objectives that form a part of the company's strategy of creation of value over the next three years and to motivate and retain key management of IBERDROLA RENOVABLES. It is to involve the transfer of ordinary shares of IBERDROLA RENOVABLES to beneficiaries as a part of variable remuneration. In order to receive the bonus, the beneficiary must continue to work within the group of which IBERDROLA RENOVABLES is the parent company, strategic objectives must be met during the period 2008-2010, and any other established requirements must be satisfied. The transfer of said shares may involve one or more transactions within the three years following said date.

The maximum number of shares of the company which are to be destined to the strategic bonus shall be calculated by dividing 40 million euros by the price established for IBERDROLA RENOVABLES stock in the institutional tranche of the public subscription offer (which is the value of the shares that is to be taken as a reference).

The strategic bonus is to remain in force until 31 December 2013, without affecting the terms of anticipated settlement established in the rules of the strategic bonus.

#### Variable remuneration in shares

Variable remuneration in shares primarily aims to promote the creation of value in the long term and to motivate and retain key management of IBERDROLA RENOVABLES. It involves the deferred transfer of ordinary shares of said company to beneficiaries as part of their annual variable remuneration, determined by the meeting of personal or corporate objectives. The shares are to be of the same class and series as the rest of the company's shares, recorded under the book-entry method. In order to receive this incentive, beneficiaries must continue to work within the group of which Iberdrola Renovables is the parent company. The transfer of the shares may be completed in one or more transactions within the two years following the date of accrual of the variable remuneration on which they are based.

Variable remuneration in shares, the amount to be determined from time to time, is to remain in force indefinitely provided that the board of directors of Iberdrola Renovables (or the company's chosen representative) does not adopt any resolution to the contrary.

#### General provisions

The rights of the beneficiaries deriving from their participation in the share transfer plan, the strategic bonus and variable remuneration in shares are not transferable to third parties, *intervivos* or *mortis causa*, except for any special cases established to this end.

Similarly, the participation of the executive directors and management of IBERDROLA RENOVABLES in the share transfer plan, the strategic bonus and variable remuneration in shares is to be considered incompatible with the condition of beneficiary of other incentive plans of Grupo Iberdrola based on the transfer of Iberdrola, S.A. shares, except for the rights deriving from the participation in plans authorised prior to 5 November 2007, date of authorisation of the planned variable remuneration in shares of IBERDROLA RENOVABLES described in this section. In this sense, some of the aforementioned executive directors and top management are entitled to remuneration rights deriving from systems of remuneration of Iberdrola, S.A. in force as of 5 November 2007, having authorised the company the transfer of the corresponding shares of Iberdrola, S.A. in observance of the terms and conditions set forth in the rules of said plans and in resolutions that may be adopted by the board of directors of Iberdrola, S.A. or its representatives chosen to execute said plans.

#### Empowerment of board of directors

The sole shareholder chose to empower the board of directors with the substitution of the authorised executive committee and to empower one or more individuals, whether or not they may be directors, with the means to implement the accepted remuneration systems. This empowerment includes:

- (i) designation of directors and management of Iberdrola Renovables who are to benefit from the different remuneration plans;
- (ii) determination of corresponding terms and conditions and authorisation of respective rules;
- (iii) handling of any required processes or management before any authorities, organisms, entities or public or private registries, whether Spanish or foreign, in order to execute these remuneration systems;
- (iv) negotiation, preparation and signing of corresponding contracts with the banking entity or entities that are to provide some type of service to the company in relation to said remuneration systems, as well as any documents to be executed by the company and the beneficiaries.

#### Other matters

On 23 October 2007, the board of directors of Iberdrola, S.A. resolved to accept a proposed share transfer plan of IBERDROLA RENOVABLES aimed at executive directors and management of Iberdrola, S.A. (including, if applicable, appointed directors of Iberdrola, S.A. in IBERDROLA RENOVABLES who represent substantial

shareholders). Said plan is also designed to reward IBERDROLA staff who have significantly contributed in the past to the creation of value, to the management and supervision of the company and to this offer. It involves the transfer of ordinary shares of IBERDROLA RENOVABLES to the beneficiaries as part of their variable remuneration. The transfer may be completed in one or more transactions and the only requirement is that the beneficiary continues to work within the group of which IBERDROLA RENOVABLES is the parent company.

The share transfer plan of IBERDROLA RENOVABLES authorised by Iberdrola, S.A., has the same basic characteristics as those detailed hereinbefore for the remuneration system of the same name of IBERDROLA RENOVABLES. The plan involves a maximum number of shares of the company, which is to be determined by dividing 20 million euros by the price established for IBERDROLA RENOVABLES stock in the institutional tranche of the offer (which is to be the value of the shares that is taken as a reference). As of the date of this prospectus, the identities of the beneficiaries have not been authorised nor have said beneficiaries been granted any special rights.

IBERDROLA RENOVABLES and Iberdrola, S.A. are studying different alternatives for the possible hedging of the companies' liabilities deriving from the aforementioned remuneration systems, including the possibility of establishing some type of OTC financial instrument with one or more financial entities, and the possibility of buying back the shares of IBERDROLA RENOVABLES. In any case, no decision has been taken to date.

#### Remuneration plan linked to rerating of PPM Energy Inc.

As of 1 October 2007, PPM Energy Inc. adopted a rerating-linked remuneration plan for PPM Energy Inc. shares, taking as a reference the rerating of the Company's shares (the **new RVR plan**) that modifies and substitutes rerating-linked remuneration plans for around 400 employees of PPM Energy Inc. for the years 2002, 2003, 2004, 2005 and 2006 (denominated **RVR**). The new RVR plan affects only rerating-linked remuneration systems in force as of the date of its adoption, and there are no plans to adopt additional rerating-linked remuneration systems in relation to the new RVR plan. Each executed RVR determines the obligation of PPM Energy Inc. to pay the beneficiary in question within three months' of the exercise date an amount equal to the difference between the execution price and the reference prices established for each rerating-linked remuneration system granted between 2002 and 2006 (*Exercise Price*). Rights deriving from the RVR which have not yet been consolidated are to be consolidated in equal third parties on each anniversary of the date on which the respective RVR was granted, providing that the beneficiary of the RVR in question remains employed by PPM Energy Inc. on each of said dates. As an exception to this, and provided that the RVRs have not been previously consolidated, all the rights granted under the plans corresponding to the years 2002, 2003 and 2004 are to be automatically consolidated on 1 October 2007. In turn, all rights granted under the systems corresponding to the years 2005 and 2006 are to be automatically consolidated on 1 October 2008 and 1 October 2009, respectively, provided that they have not been previously consolidated. Without affecting this exception, unconsolidated RVRs may be consolidated at an earlier date under certain circumstances.

The execution price for each RVR is calculated on the basis of on the number of years that the RVR has been in effect, the price of the public offer of ordinary shares of

Iberdrola RENOVBABLES and the average price of the ordinary shares of Iberdrola RENOVBABLES in the third quarter immediately prior to the exercise price. Upon the consolidation of the rights deriving from each RVR, 75% of said rights are to be executed automatically in the year in which they have been consolidated, and the remaining 25% are to be consolidated automatically on the second anniversary of the date on which they were consolidated. The new RVR plan may be modified or waived at any time, in writing, provided that such modifications or waivers are approved by the managing director of PPM Energy Inc. As of 1 October 2007, PPM Energy paid 23.3 million US dollars corresponding to the new RVR plan. This amount is to be paid to the beneficiaries of the new RVR plan on 1 January 2008.

## **18 MAJOR SHAREHOLDERS**

**18.1 In so far as is known to the issuer, the name of any person other than a member of the administrative, management or supervisory bodies who, directly or indirectly, has an interest in the issuer's capital or voting rights which is notifiable under the issuer's national law, together with the amount of each such person's interest or, if there are no such persons, an appropriate negative statement**

As has been indicated, Iberdrola, S.A. is the sole shareholder of the Company, owning all of the shares into which the share capital of IBERDROLA RENOVBABLES is divided.

After admission to trading of the shares of the Company, if the green shoe is fully exercised, the interest of Iberdrola, S.A. would be 80% of share capital. If the green shoe is not fully exercised the interest of Iberdrola, S.A. would be 81.82% of share capital.

**18.2 Whether the issuer's major shareholders have different voting rights, or an appropriate negative statement**

All shares representing capital of the Company are shares represented by book entries, of the same class and series, and enjoy the same voting and dividend rights. Each share has the right to one vote, there being no preferred shares.

**18.3 To the extent known to the issuer, state whether the issuer is directly or indirectly owned or controlled and by whom and describe the nature of such control and describe the measures in place to ensure that such control is not abused**

As has been indicated, at the date of this Prospectus, Iberdrola, S.A. is the sole shareholder of the Company. After listing of the shares of the Company on the Spanish stock exchanges, the interest of Iberdrola, S.A. in IBERDROLA RENOVBABLES will be at least eighty (80) percent, and it will therefore exercise control over the Issuer.

In order to establish transparent relationships between Iberdrola, S.A. and IBERDROLA RENOVBABLES (and the companies in their Group), following the best practices for corporate governance and in particular the second recommendation of the Unified Good Governance Code, specify the scope of action of IBERDROLA RENOVBABLES, regulate the mechanisms necessary to foresee and respond to any

conflict of interest situations, related party transactions and the transmission by the Company of information to its parent company, Iberdrola, S.A. and the Company on 5 November 2007 signed a master agreement the principal features of which are described in section 0 below.

**18.4 Description of any agreement known to the issuer, the application of which on a later date could result in a change in control of the issuer**

The Company has no knowledge of any agreement the application of which on a later date could result in a change in its control.

**19 RELATED PARTY TRANSACTIONS**

**19.1 Reorganisation of the IBERDROLA RENEWABLES Group**

On 23 April 2007, Iberdrola, S.A. acquired all of the common share capital of the Scottish company Scottish Power Plc, a company engaged in the provision of services of generation of energy and storage of natural gas, transmission and distribution of electricity and supply of energy and natural gas. That acquisition was documented in the form of (i) payment of an amount in cash or, at the option of the Scottish Power shareholders, delivery of simple debentures of Iberdrola, S.A. or a combination of cash and debentures, and (ii) the delivery of newly-issued common shares of Iberdrola, S.A.

After the transaction integrating Scottish Power into the Iberdrola Group, Iberdrola, S.A. decided to undertake a restructuring project in which (1) it would reorganise its renewables business area in order for IBERDROLA RENEWABLES to encompass all the companies integrated into Iberdrola and Scottish Power that are chiefly dedicated to the generation of power from renewable sources and to transfer certain shareholdings in companies not involved in this line of business, and (2) it would contribute part of the debt of the companies controlled by IBERDROLA RENEWABLES with other companies of Grupo IBERDROLA to IBERDROLA RENEWABLES in order to improve and systemise the financial management of these companies in order to list the shares of the company on the stock market, to reduce the net consolidated debt of IBERDROLA RENEWABLES with third parties and to optimise its financial structure in the wake of the public subscription offer. The restructuring project is one of the processes involved in the public subscription offer and the listing of the companies' shares on the stock market.

The main lines of action of the restructuring project were the following:

Iberdrola S.A. created two Scottish companies: (1) one called ScottishPower Renewable Energy Holdings Limited, with the purpose of concentrating in this company the interests of nearly all the companies of Scottish Power that are chiefly dedicated to the activities of electricity generation from renewable energy sources and (2) another called ScottishPower Renewable Energy Limited, which is fully owned by Scottish Power in the wake of the transfer of its shares by Iberdrola S.A., which was founded as the parent company of the British firms of Scottish Power that were integrated into the consolidation scope of IBERDROLA RENEWABLES as part of the restructuring project.

The carrying out of different corporate transactions involving remuneration in kind, according to which all the companies of Scottish Power that are chiefly dedicated to the generation of electricity using renewable energy sources became direct or indirect subsidiaries of ScottishPower Renewable Energy Holdings Limited. Said transactions include the transfer to the latter company of 100% of the shares of ScottishPower Holdings Inc. (a holding company that participates, directly or indirectly, in all of the companies in the Scottish Power group that engage in generation of renewable energy and energy from thermal generation assets, purchase and sale of electricity and purchase, sale and storage of natural gas in the United States of America).

Following the actions mentioned above, on 3 October 2007 as sole shareholder in IBERDROLA RENOVABLES, Iberdrola S.A. agreed to carry out an increase in the company's capital for a nominal of 1,335,399,560 euros and a issue premium of 3,443,995,465.24 euros, totalling therefore, 4,779,395,025.24 euros. The capital increase was implemented through the issue and putting into circulation of 133,539,956 ordinary shares with a nominal value of 10 euros which were issued at their nominal value plus an issue premium of 35.79 euros a share. The equivalent value of the capital increase consisted of non money contributions of shares representing all the shares constituting the share capital of the Scottish company ScottishPower Renewable Energy Holdings Limited. The contribution came under the special system for securities exchange envisaged under chapter VIII of heading VII of the codifying legislation for the Corporation Tax Act. As independent expert appointed by the Trade Register, on 3 October 2007 KPMG Auditores S.L. issued a report on the non money contribution and concluded that (i) the criteria for valuing the shares used by Iberdrola as sole director of IBERDROLA RENOVABLES were reasonable and (ii) the valuation tallied with the number of shares, the par value and the issue premium that IBERDROLA RENOVABLES would have to issue as a counterpart.

On 5 November 2007 IBERDROLA RENOVABLES carried out a non money capital increase with a nominal value of 189,625,960 euros and an issue premium of 489,045,348.92 euros, the amount for the capital increase plus the issue premium therefore totalling 678,671,308.92 euros. This capital increase was paid out by Iberdrola S.A. via a non money contribution comprising an Iberdrola S.A. credit right in relation to ScottishPower Renewable Energy Holdings Limited, the subsidiary company of IBERDROLA RENOVABLES. The new shares were issued at the par value of the shares in IBERDROLA RENOVABLES at the time (10 euros) plus a 25.79 euros issue premium per share. As a result, the issue rate (par value plus issue premium) of each new IBERDROLA RENOVABLES share was 35.79 euros. The contribution came under the special system for securities exchange envisaged under chapter VIII of heading VII of the codifying legislation for the Corporation Tax Act. As independent expert appointed by the Trade Register, on 5 October 2007 KPMG Auditores S.L. issued an independent expert's report on the non money contribution and concluded that (i) the criteria for valuing the credit right used by Iberdrola as sole director of IBERDROLA RENOVABLES were reasonable and (ii) the valuation tallied with the number of shares, the par value and the issue premium that IBERDROLA RENOVABLES would have to issue as a counterpart.

On 3 August 2007 the company acquired from Iberdrola México S.A. de C.V. shares representing 99.99% of the Mexican company Parques Ecológicos de México, S.A. de C.V. for the sum of 23,138.2 US dollars. Parques Ecológicos de México, S.A. de C.V. is the owner of the "La Ventosa" wind-farm being developed in the state of Oaxaca

(Mexico) with installed power of 80 MW. On the same date the company acquired a credit from Iberdrola México, S.A. de C.V. in relation to Parques Ecológicos de México, S.A. de C.V. whose outstanding balance on the acquisition date was 10,297,041.22 US dollars.

On 17 October 2007 Scottish Power Renewable Energy Holdings Limited set up a company in Canada called Iberdrola Renewable Energy Canada Ltd. On 30 October 2007 the subsidiary of the company, Iberdrola Renewable Energy Canada Ltd., purchased from the company PPM Energy Canada Limited shares representing the whole of the capital of the Canadian company True North Wind Limited, belonging to the Scottish Power group, which carries out renewable energy activities in Canada for 184,696.81 Canadian dollars.

Finally, under the restructure operation, the company has transferred to Iberdrola, S.A. and Iberdrola Inmobiliaria, S.A. some minority holdings in the companies Iberdrola Re (reinsurance) and Cartera Nuevo Santa Teresa, S.L. (property).

As a result of the Restructuring Operation, the Company raised its installed capacity from 4,950 MW to 7,879 MW (an increase of 2,392 MW). The Company's installed wind capacity rose from 4,608 MW to 7,000 MW (an increase of 2,392 MW). Section 20.2 of this Registration Document presents the pro forma financial information prepared as a consequence of the Restructuring Operation.

### **19.2 Other transactions with related parties**

Described below are the transactions with related parties undertaken during the period covered by the historical financial information, consistent with the terms of Order EHA/3050/2004 of 15 September 2004 on information regarding related party transactions that must be provided by companies issuing securities admitted to trading on official secondary markets.

### **19.3 Transfers of resources and obligations between the Company and/or its Group and its sole shareholder and the companies in its group from an expense point of view**

Described below are the expenses that, during the period covered by the historical financial information, and to the date of this Prospectus, have involved a transfer of resources or obligations between the Company and its sole shareholder (Iberdrola, S.A.) and the companies in its group, related parties and significant shareholders.

(000s)	Expenses							
	30/09/2007	% of total	31/12/2006	% of total	31/12/2005	% of total	31/12/2004 (unaudited)	% of total

(\*) Significant shareholders in Iberdrola, S.A.

(\*\*) This company ceased to be a significant shareholder in Iberdrola, S.A. in February 2007 and this table only shows transactions made up to that date.

(\*\*\*) Significant shareholder in Iberdrola, S.A. from July 2007

In the annual accounts for the periods covered in the historic financial information transactions are not included with Banco Bilbao Vizcaya Argentaria, Bilbao Bizkaia Kutxa, Grupo ACS and Caja de Ahorros de Valencia, Castellón y Alicante - Bancaja.

All the transactions included in the foregoing table were on market terms.

The expenses from related party transactions with the Iberdrola Group represent 29% of operating and financial expenses at 30 September 2007 and 26%, 28% and 21%, respectively, of the total operating and financial expenses for the years ending 31 December 2006, 2005 (audited) and 2004 (no audited).

Details of the expenses deriving from related party transactions, broken down by category, for the period covered by the historical financial information were as follows:

(€ 000s)	Expenses							
	30/09/2007	% of total	31/12/2006	% of total	31/12/2005	% of total	31/12/2004 unaudited	% of total

From an expense point of view, the principal transactions entered into by the Company with Iberdrola, S.A. and its Group are as follows:

Support and infrastructure services: these cover support services for the group's infrastructure, buildings, security, IT, communications, etc. and corporate services including organisation and human resources, finance, regulation, planning and control and corporate image provided by Iberdrola, S.A. to the Company.

Operations and maintenance services: these cover services provided to the power generation facilities by Iberdrola Generación S.A. Unipersonal., Iberdrola Distribución, S.A. Unipersonal. and Gamesa Eólica, S.A..

Installation development expenses: these cover engineering work to develop future installations for renewable power generation.

Financial expenses: these cover interest paid on long- and short-term loans with Iberdrola, S.A., described in section 10.1 of this Registration Document as well as interest accruing on loans with Banco Bilbao Vizcaya Argentaria and Bilbao Bizkaia Kutxa, as mentioned in section 10.1 of this Registration Document.

*ScottishPower Holdings Inc.*

Information on the transactions carried out with related parties by the US companies included within the consolidation scope of IBERDROLA RENOVABLES under the restructure operation may be obtained from the notations to the audited consolidated financial statements of Scottish Power Holdings Inc. corresponding to years closed 31 March 2005, 2006 and 2007, which are available to the public on the Company's webpage ([www.iberdrolarenovables.com](http://www.iberdrolarenovables.com)).

**19.2.2. Transfers of resources and obligations between the Company and/or its Group and its sole shareholder and the companies in its group from a revenue point of view**

Set forth below are the revenues that, during the period covered by the historical financial information and to the date of this Prospectus, have resulted from transactions between the Company and Iberdrola, S.A. and the companies in its group, related parties and significant shareholders.

(000 euros)	Revenues							
	30/09/2007	% of total	31/12/2006	% of total	31/12/2005	% of total	31/12/2004 (unaudited)	% of total

(\*) Significant shareholders of Iberdrola, S.A.

(\*\*) This company ceased to be a significant shareholder in Iberdrola, S.A. in February 2007 and only those transactions are shown in this table which were made up to that date.

(\*\*\*) Significant shareholder in Iberdrola, S.A. from July 2007

In the annual accounts for the periods covered in the historic financial information transactions are not included with Banco Bilbao Vizcaya Argentaria, Bilbao Bizkaia Kutxa, Grupo ACS and Caja de Ahorros de Valencia, Castellón y Alicante - Bancaja.

All the transactions included in the foregoing table were on market terms.

Details of the revenue deriving from related party transactions, broken down by category, for the period covered by the historical financial information were as follows:

(€ 000s)	Revenue							
	30/09/2007	% of total	31/12/2006	% of total	31/12/2005	% of total	31/12/2004 unaudited	% of total
Revenue from energy sales	169,322	100%	422,569	100	429,911	100	242,481	99
Financial revenue	530	0%	175	0	458	0	1,655	1
<b>TOTAL</b>	<b>169,852</b>	<b>100%</b>	<b>422,744</b>	<b>100</b>	<b>430,369</b>	<b>100</b>	<b>244,136</b>	<b>100</b>
<b>% of sales</b>		<b>-</b>	<b>61%</b>	<b>-</b>	<b>77%</b>	<b>-</b>	<b>74%</b>	<b>-</b>

From a revenue point of view, the principal transactions entered into by the Company with Iberdrola, S.A. and its Group, as well as the companies included in the IBERDROLA RENOVABLES Group, are as follows:

Revenue from energy sales: these come from two sources, (i) the share of special system sales billed on market terms, including both the part sold to the Electricity Market Operator via Iberdrola Generación, S.A. Unipersonal, and the part billed to the distributor (Iberdrola Distribución, S.A. Unipersonal) and (ii) the share of ordinary system sales sold to the Electricity Market Operator, also via Iberdrola Generación, S.A. Unipersonal. See section IV.5.1.4.2 above of this prospectus.

Financial revenue: this is interest earned on the current account with Iberdrola S.A., as described in section 10.1 of this Registration Document.

*ScottishPower Holdings Inc.*

Information on the transactions carried out with related parties by the US companies included within the consolidation scope of IBERDROLA RENOVABLES under the restructure operation may be obtained from the notations to the audited consolidated financial statements of Scottish Power Holdings Inc. corresponding to years closed 31 March 2005, 2006 and 2007, which are available to the public on the Company's webpage ([www.iberdrolarenovables.com](http://www.iberdrolarenovables.com)).

**19.2.3. Transfers of resources and obligations between the Company and/or its Group and the sole shareholder and the companies of its group from the perspective of owned assets and equipment**

Below is a table containing the owned assets and equipment which, between the period covered by the historic information and until the date of this Prospectus, have been included in the transactions between the Company and Iberdrola, S.A. and the companies of its group, associated companies or significant shareholders.

<i>in thousands of euros)</i>	Owned assets and equipment							
	30/09/2007	% of total	31/12/2006	% sobre el total	31/12/2005	% of total	31/12/2004 (not audited)	% of total
Iberdrola Ingeniería y Construcción, S.A.U.	60,119	24%	238,987	75	101,953	24	117,259	23%
Gamesa Eólica, S.A.	193,349	76%	79,799	25	319,702	76	390,331	77%
<b>TOTAL</b>	<b>253,468</b>	<b>100%</b>	<b>318,786</b>	<b>100</b>	<b>421,655</b>	<b>100</b>	<b>507,590</b>	<b>100%</b>
% of gross tangible assets	4%	-	6%	-	10%	-	16%	-

All the transactions included in the table above have been carried out at arm's length.

- The transactions with Iberdrola Ingeniería y Construcción, S.A. Unipersonal relate to engineering work and the carrying out of civil works, feed in lines and substations for wind parks and mini-hydraulic power stations, as well as specific works (REOC, Meteoflow, etc.).
- Transactions with Gamesa Eólica, S.A. refer to the acquisition of aerogenerators and wind parks.

**19.2.4. Transactions entered into with directors and executives of the company**

No transactions have been made with directors and executives of the company during the period of time covered by the financial information included in this prospectus.

### **19.3 Master agreement signed by Iberdrola, S.A and IBERDROLA RENOVABLES**

On 5 November 2007 Iberdrola, S.A. and the Company signed a master agreement in order to establish a transparent framework for relationships between Iberdrola, S.A. and IBERDROLA RENOVABLES (and the companies in its Group), following the best practices for corporate governance and in particular the second recommendation of the Unified Good Governance Code, specify the scope of action of IBERDROLA RENOVABLES, regulate the mechanisms necessary to foresee and respond to any conflict of interest situations, and engage in related party transactions (the "**Master Agreement**").

The most significant terms and conditions of the Master Agreement are as follows:

#### **19.3.1 General matters**

1. The entry into force of the Master Agreement is subject to satisfaction of a condition precedent consisting of the shares of IBERDROLA RENOVABLES being admitted to trading on at least two Spanish stock exchanges, including the Madrid Stock Exchange, and included in the Exchange Interconnection System (continuous market) before 14 January 2007. If on 14 December 2007 this condition precedent has not been satisfied the Master Agreement will be automatically cancelled and of no effect.
2. The Master Agreement will be in effect (i) for so long as Iberdrola, S.A. is the direct or indirect owner of a majority interest (greater than fifty percent of capital) in IBERDROLA RENOVABLES or (ii), even if that interest is less than fifty percent of capital, for so long as more than half of the directors of IBERDROLA RENOVABLES have been Appointed on proposal by Iberdrola, S.A. Termination of the Master Agreement will not result in termination of the other agreements that have been entered into by IBERDROLA RENOVABLES and Iberdrola, S.A., or companies in their respective Groups, which will continue in effect on their own terms.

The provisions of the Master Agreement also will apply to the other companies in the Iberdrola Group and the IBERDROLA RENOVABLES Group other than Iberdrola, S.A. and the Company.

3. Agreements that are already signed at the time the Master Agreement comes into force between Iberdrola group companies and IBERDROLA RENOVABLES group companies will be amended as necessary, to comply with the terms of the Master Agreement within 6 months. The related parties transactions committee will review this process of adaptation and will pass up its report when it is finished to the board. In this respect, some of the agreements in force have already been amended as described in this paragraph.
4. The Master Agreement can only be amended by mutual agreement between the Company and Iberdrola, S.A., which, for these purposes, are obliged to follow the procedures laid down in their respective Bylaws and Board Rules.

In particular, alteration of the contract will require being subject to the report by the related parties transactions committee of IBERDROLA RENOVABLES as well as approval of this by the board of IBERDROLA RENOVABLES with the voting in favour of a two thirds majority plus one of the directors, save in the situation where, in accordance with the rules envisaged in the board regulations on the issue of conflicts of interest, IBERDROLA's proprietary partners in IBERDROLA RENOVABLES must abstain, in which case the alteration will require the agreement of the absolute majority of the remaining directors.

5. In the event that any conflict or dispute arises between the parties regarding the Master Agreement the Parties shall enter into negotiations to seek a solution by mutual consent within 30 days or any other period that they shall agree. If the conflict cannot be resolved in this fashion, the Parties have agreed to submit to legally binding arbitration in accordance with the Spanish Arbitration Law.

### **19.3.2 Institutional matters**

- i. The Master Agreement provides that the Board of Directors of the Company and the majority group of outside directors will include independent directors in a significant proportion, equivalent to at least the percentage of the floating capital of IBERDROLA RENOVABLES, allowing the independent directors to exercise the authority contemplated in the Board of Directors Regulations.
- ii. The Board of Directors of IBERDROLA RENOVABLES at its meeting of 5 November 2007 resolved to form a Related Party Transactions Committee, pursuant to the provisions of the Board Rules and the Master Agreement. The Committee will have a majority of independent directors. Directors appointed on proposal of the shareholder Iberdrola, S.A. may not be members thereof. The Chairman of the Related Party Transactions Committee will be appointed by the Board of Directors from among its members.

The Master Agreement gives the Related Party Transactions Committee various powers. Among them is that of reporting prior to authorisation by the Board of Directors or, in the event of urgency, the Delegated Executive Committee, on any related party transaction the amount of which exceeds the greater of (i) 0.3% of the consolidated revenue for IBERDROLA RENOVABLES according to the audited consolidated annual accounts for the last full corporate year ended at the date of approval for the transaction in question and (ii) five million euros. In the case of transactions in the ordinary course of corporate business that are of a customary or recurrent nature, it will be sufficient to obtain general authorisation of the Board or the Delegated Executive Committee for the type of transaction and conditions for performance thereof, and for the Transactions Committee to refer to that general authorisation. Should, for reasons of urgency, authorisation have been agreed upon by the Delegated Executive Committee, it will be submitted for subsequent ratification by the Board of Directors.

Not requiring authorisation of the Board of Directors or the Delegated Executive Committee, or the report of the Related Party Transactions Committee, are those transactions that meet all of the following three conditions: (i) they must be pursuant to contracts the conditions of which are standardised and generally applied to many customers, (ii) they must be at prices or for fees established on a

general basis by the one acting as the supplier of the goods or services and (iii) the amount may not be greater than one percent of consolidated revenues of IBERDROLA RENOVABLES in accordance with the annual audited accounts for the most recent fiscal year closed as of the date of the transaction in question.

Other responsibilities of the Related Party Transactions Committee are: (i) to report periodically on compliance with the Master Agreement, (ii) to report in advance the information included in the half-yearly report and the annual corporate governance report of IBERDROLA RENOVABLES regarding the Master Agreement and related party transactions between the Company and Iberdrola S.A., and (iii) to report on any proposed amendment to the Master Agreement.

The Related Party Transactions Committee shall meet regularly at intervals to be agreed, and not less frequently than half-yearly, as well as on whatever other occasions are required for the discharge of their duties.

### 19.3.3 Definition of the scope of action of the Company

#### - Scope of action

The scope of action belonging to IBERDROLA RENOVABLES under the Master Agreement is comprised of the activities of:

Promotion, engineering, design, construction, purchase, sale, exploitation (including production and marketing of the energy generated), operation and maintenance of facilities for the generation of electricity from renewable energy sources (excluding large-scale hydro projects), such as, inter alia, wind, mini-hydro, thermoelectric and photovoltaic solar, geothermal, wave and tide energy, and the energy generated from biomass, including such other technologies for generation of electricity from renewable energy sources as may be developed in the future, as well as the production and marketing of biofuels and their derivatives and the businesses related or complementary to the foregoing ("**Renewable Energy Businesses**"); and

Thermal generation, cogeneration and marketing of electricity and derivatives thereof, as well as natural gas activities consisting of use and development of storage assets, the purchase, sale and brokerage of storage and transport capacity, and the purchase, sale and brokerage (physical and financial) of natural gas in the United States of America (the "**Current Natural Gas Activities**").

If Iberdrola, S.A. in the future acquires companies that partially engage in Renewable Energy Businesses, Iberdrola, S.A. will offer IBERDROLA RENOVABLES, within the shortest possible time and subject to such legal, tax and other limitations as may arise, the opportunity to purchase, directly or indirectly the businesses of the acquired company involved in the Renewable Energy Businesses, on market terms. The decision to turn down the business opportunity as well as, where appropriate, to make the acquisition, will require agreement by the Board of Directors of IBERDROLA RENOVABLES or, in the

event of this being urgent, by the Delegated Executive Committee, subject to a report by the Related Party Transactions Committee.

- **General principles regarding Renewable Energy Businesses**

On the terms of the Master Agreement and without prejudice to any exceptions contemplated therein, the Renewable Energy Businesses within the Iberdrola Group generally will be performed by companies in the IBERDROLA RENOVBLES Group and not by other companies in the Iberdrola Group.

The Company directly or indirectly, without any limitation, may perform any kind of work and projects, sell any kind of goods, and render any kind of services, whether or not related to the Renewable Energy Businesses, to any companies included in its Group or in which it has direct or indirect interests, as well as to Iberdrola, S.A. and the other companies in the Iberdrola Group. This is understood to be without prejudice to the fact that IBERDROLA RENOVBLES may contract for the performance of construction and projects, the acquisition of goods or the receipt of those services by Iberdrola, S.A. or companies in its Group.

On the other hand the IBERDROLA RENOVBLES Master Agreement has stated that it currently does not, nor intends or expects to provide services to third parties outside the IBERDROLA RENOVBLES group involving engineering, consultancy work and civil building work on electrical power generation installations using renewable sources, these activities being carried out within the IBERDROLA group by Iberinco.

- General principles regarding Natural Gas Businesses

As a general principle Iberdrola, S.A., directly or through any of the companies that are from time to time a part of the Iberdrola Group, will have the exclusive right and full freedom to develop, use, purchase and sell assets or companies within the scope of action of the natural gas business on a worldwide basis (the “**Natural Gas Businesses**”).

In addition, the general principle stated above also will apply, on a general basis, in the geographical markets of the United States of America, so that Iberdrola, S.A. in the future will continue to engage in those markets in any of the activities corresponding to the Natural Gas Businesses, either directly or by formation or acquisition of companies, whether or not they overlap with the Current Natural Gas Activities of IBERDROLA RENOVBLES.

As the sole exception to the referenced general principle, IBERDROLA RENOVBLES will continue, on a nonexclusive basis, to engage in its Current Natural Gas Activities in the United States of America. The future development and expansion of the Current Natural Gas Activities of IBERDROLA RENOVBLES in those markets will be defined by its business plan in effect from time to time, which Iberdrola, S.A. will respect. The business plan will be approved by the Board of Directors of IBERDROLA RENOVBLES, after a report from the Related Party Transactions Committee.

#### - Business opportunities

When Iberdrola, S.A. identifies an investment or business opportunity included within the Renewable Energy Businesses, it will so advise the Company so that it may evaluate the potential investment or business opportunity and decide whether it will participate therein, unless special confidentiality considerations apply. If the Company notifies Iberdrola, S.A. of its wish to make the investment or take advantage of the business opportunity, Iberdrola, S.A. will abstain from undertaking it. If the Board of Directors of the Company or, in the event of urgency, the Delegated Executive Committee, rejects the business opportunity, after a report from the Related Party Transactions Committee, Iberdrola, S.A. may make the investment or participate in the proposed business in its own name or transfer it to third parties.

In addition, within the scope of the Natural Gas Businesses, Iberdrola, S.A. and IBERDROLA RENOVABLES will retain initiative in identification of business opportunities in accordance with their respective scopes of action. Nevertheless, IBERDROLA RENOVABLES will notify Iberdrola, S.A. of the opportunities of which it is aware by reason of the Current Natural Gas Activities so that Iberdrola, S.A. may evaluate the possible investment or opportunity and decide whether it will participate therein, unless special confidentiality considerations apply.

#### **19.3.4 Intragroup performance of work, sale of goods and provision of services**

Iberdrola, S.A. may, directly or indirectly, through the companies in its Group, undertake work and projects, sell goods, make loans and grant credits, as well as provide the Company with such corporate, technical, engineering, management support or any other kind of services, on a one time or recurring basis, as both companies may agree. Also, the Company may, directly or indirectly, through the companies in its Group, undertake work and projects, sell goods and provide Iberdrola, S.A. with such services related to the Renewable Energy Business or the Current Natural Gas Activities as both companies may agree.

On a general basis, absent a circumstance justifying it, the agreements by virtue of which Iberdrola, S.A. and IBERDROLA RENOVABLES arrange for the performance of construction, sale of goods or provision of services among themselves will be documented in writing in one or more contracts. The provisions of the Master Agreement will apply by way of supplement to individual agreements entered into by Iberdrola, S.A. and the Company, in the absence of an express agreement regarding the matters contemplated therein, provided that they are not contrary to the provisions of the mandatory rules, if any, applicable to those agreements, which will prevail over the provisions of the Master Agreement.

Also, all work, goods and services that either of the two companies, directly or indirectly, undertake, sell or provide to the other must be on market terms, without the service provider enjoying economic or other terms more favourable than those afforded to a third party under substantially equivalent conditions, or which may result in preferential treatment.

In these intragroup relationships, both companies will use all expertise, care and diligence expected of a company dedicated to the performance, sale and rendering of

services on market terms for work, goods and services similar to those that Iberdrola, S.A. and the Company undertake and provide among themselves.

#### **19.3.5 Information flows between the Company and Iberdrola, S.A.**

Pursuant to the Master Agreement, the Company shall provide Iberdrola, S.A. with information requested that Iberdrola S.A. needs to: (i) comply with its obligations as the controlling company of the tax and accounting group to which IBERDROLA RENOVABLES belongs, (ii) to effectively design and coordinate Iberdrola group policies and strategies and (iii) other purposes for the benefit and interests of the two companies.

Information that Iberdrola, S.A. receives under the above provision shall be used exclusively for the purposes described. The information may on occasion include reserved information which shall be subject to Iberdrola S.A.'s Internal Rules of Conduct in Securities Markets.

#### **19.4 Principal agreements between the Company and Iberdrola S.A.**

##### **19.4.1. Related party transactions with Iberdrola, S.A. and its subsidiaries**

Aside from the Master Agreement signed between the Company and Iberdrola, S.A. of 5 November 2007 that is described in section IV.19.3 of this Prospectus, the Company and Iberdrola S.A. and their respective subsidiaries have signed and implemented a number of agreements concerning different services and relationships, all of these on market terms. Described below are the essential characteristics of the principal agreements in force at the date of this Prospectus's publication that have been executed between the companies referred to:

##### *A) Corporate services*

- (i) With prior agreement from its Board of Directors subject to the report from the Related Party Transactions Committee the Company and Iberdrola, S.A. signed a licence, assignment and management of trademarks and domain names contract on 20 November 2007 in relation to the use by the Company of certain trademarks and domain names of Iberdrola S.A. (including the trademark Iberdrola), and to the assignment of other trademarks of Iberdrola, S.A. related to some of the Company's computer applications. The contract will be terminated should Iberdrola, S.A. cease to be the holder of over 50% of the company's capital save where the majority of the members of the Board of Directors have been designated at the proposal of Iberdrola, S.A.

At the beginning of each year, Iberdrola, S.A. will calculate the remuneration payable by the Company according to the relevant annual budget for corporate brand and image management services and, in particular, according to the proportion corresponding to the Iberdrola Renovables, S.A. sub-group in relation to that budget. At the end of each financial year, the necessary adjustments will be made to adjust the remuneration to the effective cost incurred by Iberdrola, SA. in rendering the corporate brand and image management services. Invoicing will be carried out at the end of each year once the relevant adjustments have been made (in December of the year of

reference) for the total annual amount. Expense and income provisions will be made throughout the year according to the initial estimate for the service

- (ii) On 2 January 2002 the Company signed a corporate services contract with Iberdrola, S.A. which has been periodically modified and whose purpose is for Iberdrola, S.A. to provide corporate services including planning, control and regulation, development and financial services, human resources, institutional relations and communications. The Contract is currently in force, subject to annual review. Subject to certain conditions, this contract will be replaced, with regards to the regulations of the provisions of services, by the financial services and treasury contract which, pursuant to the resolution from its Board of Directors following a report from the Commission of Associated Operations, was executed by the Company with Iberdrola, S.A. on 20 November 2007. That contract regulates the provision by Iberdrola, S.A. of financial and treasury service, including financial planning and risk management services. The remuneration for services rendered under this contract is set on the basis of the cost to Iberdrola of providing those services to the Company. The contract will remain in force until Iberdrola, S.A. holds over 50% of the capital of the Company or a majority of the members of the Board of Directors of the Company have been appointed on a proposal from Iberdrola, S.A.
- (iii) The subsidiary of Iberdrola, S.A., ScottishPower UK plc supplies services to SPREHL, in accordance with the contract entered into by the parties on the 2<sup>nd</sup> of November 2007, in relation to the supply of services for corporate communication, human resources, health and safety, information technology, fleets and property management, insurance, management of credit risk, fiscal, regulatory and financial management and budgeting, among others. Generally, with the exception of some of the services that can be interrupted after a given notice period, the contract will be in force until the 31<sup>st</sup> of December 2009, but it may be unilaterally rescinded by the parties in certain circumstances, for example, due to the insolvency of the parties. Additionally, ScottishPower UK plc may terminate the contract in the event of change of control of SPREHL or the Company, with 6 months advance notice, while SPREHL may render the contract ineffective at any time with 3 months advance notice.
- (iv) The affiliate of the Company, ScottishPower Holdings, Inc., entered into a contract with ScottishPower UK plc on the 1<sup>st</sup> of October 2003, under which the latter is committed to supplying certain corporate and management services in accordance with the terms of the Corporate Cost Charging Policy of the Group approved on the 28<sup>th</sup> of August 2003.
- (v) PPM Energy, Inc., affiliate of IBERDROLA RENOVABLES, signed a contract for the supply of services with PPM Energy Canada Limited, an affiliate of Iberdrola, S.A. on the 11<sup>th</sup> of October 2004, under which PPM Energy, Inc. is committed to providing coordination services for cross-border operations, attributing operational value, corporate secretariat, communications, coordination of gas management, human resources, insurance-related services, environmental aspects, health and safety, business controls, management of credit risk, finance and budgeting, accounts, and fiscal, legal and information technology management. The contract has a one-year duration, automatically renewable for

successive periods of one year unless renounced, for one or all of the services covered by the contract, with prior notice of at least 180 days.

*B) Financing and guarantees*

- (i) The Company and its subsidiaries have based the financing of the ordinary course of their business and of its expansion on reciprocal current accounts with Iberdrola, S.A.

On the 2<sup>nd</sup> of November 2007, the Company signed three new current account contracts with Iberdrola, S.A., denominated in euros, US dollars and pounds sterling, respectively, with the aim of replacing the existing ones, and structuring the new financing of the subsidiaries through Iberdrola Renovables. The contracts have a duration of one year automatically renewable for successive periods of the same duration, except if any of the parties notifies that it does not wish to renew. The balances of the accounts denominated in euros when it was opened was 2,803.3 million euros debit balance for the Company.. The amounts due under the current account contracts will accrue variable interest, which varies depending on whether the debit balance is that of the Company or of Iberdrola, S.A.

It is planned to declare on the 10<sup>th</sup> of December 2007 that these have been paid and that, as a consequence, all the amounts due to Iberdrola, S.A. under the current account mentioned in the previous paragraph will be transferred to the current accounts on the 2<sup>nd</sup> of November 2007. It is also planned that the short-term financing related to the companies from ScottishPower, currently formalised in current accounts with subsidiaries of the Scottish Power Group not included among the companies being restructured, will be channelled by means of new current account contracts between Iberdrola Renovables and ScottishPower Renewable Energy Holdings Limited, and the latter with its subsidiaries, whereby the previous contracts will be continued matured, and the balances transferred to the new current accounts.

- (ii) On the 20<sup>th</sup> of November 2007, the Company, as agreed by the Board of Directors after a report by the Related Transactions Commission, signed a long-term financing contract with Iberdrola, S.A. for a maximum amount of two million euros (or equivalent thereof in US Dollars or Pounds Sterling). The financing will accrue interest which may (at the Company's discretion) be (i) fixed (calculated on the basis of swap rates on the Reuters ICAP8 screen) or (ii) variable (calculated on the basis of the Euribor rate for Euros deposits or Libor for US Dollar or Pound Sterling deposits). In both cases, a margin of zero point nine five (0.95%) per annum will be added. The financing must be repaid in a lump sum in seven years (or earlier in the terms established in the contract). At the date of this Prospectus, the Company has not drawn down any amounts against the credit.
- (iii) On the 4<sup>th</sup> of March 2007 Energías Eólicas Europeas, S.A. ("EEE"), an affiliate of the Company, signed a long-term financing contract with Iberdrola, S.A. with a term of five (5) years, which will be in force as long as Iberdrola, S.A. is the holder, directly or indirectly, of 100% of the share capital of EEE. On the 30<sup>th</sup> of September 2007, the outstanding amounts on the said contract under the headings of capital or interest had reached 377,100,000 euros. The Company plans that this long-term financing contract will be transferred before execution of the Bid.

- (iv) Certain development costs of the wind assets being developed by ScottishPower UK plc were financed by affiliates of Scottish Power plc, and the said liabilities were subsequently acquired from ScottishPower Renewable Energy Holdings Limited by Iberdrola, S.A. When Iberdrola Renovables, S.A. acquired ScottishPower Renewable Energy Holdings Limited, these liabilities were converted into intra-group liabilities that will be consolidated in the financial statements of the Group. On the 30<sup>th</sup> of September 2007, the outstanding amount on these financing contracts had reached 22.8 million euros.
- (v) On the 6<sup>th</sup> of September 2000 ScottishPower Group Holdings Company, a subsidiary of the Company, and ScottishPower UK plc entered into a reciprocal credit contract in the amount of 1,000 million euros. On the 31<sup>st</sup> of May 2006, ScottishPower UK plc transferred to ScottishPower Limited its contractual positions under the said credit contract. On the 1<sup>st</sup> of October 2006 the amount of the said credit contract was increased to a total of 1,500 million euros. On the 5<sup>th</sup> of November 2007 ScottishPower Limited transferred its contractual position to Iberdrola, S.A. and Iberdrola, S.A. transferred its contractual position to ScottishPower Renewable Energy Holdings Limited.
- (vi) On the 5<sup>th</sup> of November 2007 ScottishPower Renewable Energy Holdings Limited and Iberdrola, S.A. entered into a loan contract for five years, for an amount of 982.6 million US dollars. On the same date, Iberdrola, S.A. contributed the said loan in an increase in capital of the Company. As a consequence of this capitalisation of the loan, the said financing was converted into an intra-group contract that will be consolidated into the financial statements of the Group. The Company made the relevant adjustments to its financial statements *pro forma* on the 30<sup>th</sup> of September 2007.
- (vii) The Company is subject to a series of fiscal risks arising from the incorporation within IBERDROLA RENOVABLES of the American companies in the Restructuring Operation, principally attributable to certain divestments, in relation to which the Company may be obliged to face certain responsibilities.

On the 20<sup>th</sup> of November 2005, Iberdrola, S.A., ScottishPower Limited and IBERDROLA RENOVABLES signed a indemnity contract, under which Iberdrola, S.A. undertakes to indemnifying the Company against any responsibilities, losses, claims or damages, real or contingent, that lead to an effective obligation to pay in relation to the activities of the group of ScottishPower Holdings Inc, subsidiary of the Company. The said indemnity obligation is limited to responsibilities related to the distinct activities currently undertaken by the said group (that is, generation of wind and thermal energy and co-generation, activities related to natural gas the sale of electricity). The responsibilities derived from the fiscal contingencies arising from the sale of PacifiCorp fall within the objective of the contract, as do any other fiscal contingencies arising from acts, omissions or other circumstances that took place prior to the 3<sup>rd</sup> of October 2007, regardless of whether the demand or claim in question began, or the damage or loss materialised, before or after the said date.

The amounts that IBERDROLA RENOVABLES recovers from third parties due to the activities of ScottishPower Holdings, Inc. before or after the 3<sup>rd</sup> of October 2007 that are not related to its current business will be compensated for, where

they reach this level, with the amounts that in this case Iberdrola, S.A. owes to the Company under the indemnity contract

The duration of the contract is indefinite and it will be terminated as soon as the potential contingencies are resolved or five years after the date on which Iberdrola, S.A. (a) has ceased to be the direct or indirect owner of more than 50% of the share capital of the Company, or (b) the date on which the majority of members of the Board of Directors of the Company have not been appointed by Iberdrola, S.A.

Part IV.20.8 of the present Registration Document describes the claims or litigation covered by this indemnity contract.

- (viii) Both Iberdrola, S.A. and some of the affiliates have issued warranties in favour of third party creditors of companies of the IBERDROLA RENOVABLES Group in relation to the payment of and fulfilment of obligations, including warranties related to the payments of the National Grid connection, construction, purchase of wind turbines, and indemnity obligations.

Likewise, the affiliate of the Company Scottish Power Finance (US), Inc., signed an agreement of guarantees with Scottish Power Ltd., an affiliate of Iberdrola, S.A., dated December 5, 2005, by virtue of which the latter guarantees obligations from Scottish Power Finance (US), Inc. including, amongst others, letters of credit, debentures and guarantees issued in favour of companies which were affiliates of Scottish Power Ltd. at that time, including PPM Energy Inc., presently an affiliate of IBERDROLA RENOVABLES. The guarantees issued by Scottish Power Finance (US), Inc. remain in effect.

On the other hand, the affiliate of the Company Scottish Power Holdings, Inc. signed an agreement of guarantees with dated November 20, 2007 with Iberdrola, S.A. with the aim of replacing the guarantees issued by Scottish Power Finance (US), Inc. that remain in effect.

- (ix) PPM Energy, Inc., an affiliate of IBERDROLA RENOVABLES, signed a reciprocal loan agreement dated July 12, 2007, with PPM Energy Canada Limited, an affiliate of Iberdrola, S.A., for the maximum sum of 150 United States dollars, subject to availability of funds. The applicable annual interest rate is LIBOR plus a margin. On September 30 2007, PPM Energy, Inc. accumulated a debtor balance of 176.5 United States dollars. In the event of non-payments, a 10% annual rate of delay interest is applied as long as the law permits this.
- (x) PPM Energy Inc., subsidiary of IBERDROLA RENOVABLES, signed with Pacificorp Holdings, Inc. a reciprocal loan agreement dated 31 March 2006 for a maximum amount of 1,900 million US dollars, subject to the availability of funds. The applicable annual interest rate is LIBOR plus a spread. At 30 September 2007, PPM Energy Inc. had accrued a debt balance of 25 million US dollars. In case of non-payment, an arrears interest rate of 10% annually is applied, subject to legal restrictions.
- (xi) PPM Energy Inc., subsidiary of IBERDROLA RENOVABLES, signed with Pacificorp Group Holdings Inc. a reciprocal loan agreement dated 31 March

2006 for a maximum amount of 1,900 million US dollars, subject to the availability of funds. The applicable annual interest rate is LIBOR plus a spread. At 30 September 2007, PPM Energy Inc. accrued a debt balance of 1,526,529,117 US dollars. In case of non-payment, an arrears interest rate of 10% annually is applied, subject to legal restrictions.

- (xii) Scottish Power Finance (US) Inc., signed with ScottishPower Group Holdings Co., both subsidiaries of IBERDROLA RENOVABLES, a registered credit line backed by receivables, on 31 March 2006, for a maximum of 65 million US dollars. The applicable annual interest rate is LIBOR plus a spread. At 30 September 2007, Scottish Power Finance (US) accrued a net debt balance of 0.1 million US dollars. In case of non-payment, an arrears interest rate of 10% annually is applied, subject to legal restrictions.
  - (xiii) Certain companies of the ScottishPower group have given third-party guarantees for the Company's payment obligations and the performance of other obligations, including guarantees for payment of the construction, purchase of wind turbines, and indemnity obligations.
  - (xiv) On 20 November 2007 Iberdrola, S.A. signed a *Guarantee & Support Agreement* with ScottishPower Holdings Inc. (a subsidiary of the Company) in which Iberdrola, S.A. secured certain financial obligations assumed by ScottishPower Holdings Inc. with third parties, as well as certain other obligations of subsidiaries of Iberdrola, S.A. secured by ScottishPower Holdings Inc. This agreement will remain in force until such a time as Iberdrola, S.A. serves termination notice sixty days (60) in advance of termination. ScottishPower Holdings Inc. shall pay an annual remuneration calculated on the basis of Iberdrola, S.A.'s exposure to the credit risk assumed in this agreement.
- C) Electricity and gas sales
- (i) Having received Board of Directors' approval, subject to the Restricted Transaction Committee report, the Company, the subsidiary ScottishPower Renewable Energy Limited ("SPREL") and members of its group and of the group Iberdrola Renewables Energy Limited which are owners of wind farms in the United Kingdom, signed a 20-year PPA with ScottishPower Energy Retail Limited on 20 November 2007, pursuant to which the latter undertakes to acquire the majority of the power generated by those wind farms, with retroactive effect as of 1 October 2007 until 31 March 2027. The PPA may be rescinded in case of failure to perform or insolvency and such rescission will give the performing party the right to receive compensation for damages, losses, and legal expenses. In case of a change of control, the agreement will remain in force, however no wind farms will be added to the agreement.
  - (ii) PPM Energy Inc., subsidiary of IBERDROLA RENOVABLES, and PPM Energy Canada Limited, subsidiary of Iberdrola S.A., plan on signing a North American Energy Standards Board model agreement for the purchase of natural gas, pursuant to which PPM Energy Canada Limited purchases natural gas on the Canadian market and transports it to the border between Canada and the United States of America, where PPM Energy Canada Limited takes

possession of the gas, taking charge of transporting it to the border through US gas pipelines to supply retail customers in the United States of America. The amount of each transaction is divided between both companies in accordance with the accounting methods established by PPM Energy Inc. as per the service contract terms illustrated below in this section and in accordance with double-taxation treaties signed between the United States and Canada.

Likewise, PPM Energy Inc. manages the position of PPM Energy Canada Limited on the New York Mercantile Exchange, the regulated commodities market in the United States of America, offsetting the exposure of both entities, it makes the necessary payments, and it reconciles any differences between the PPM Energy Inc. settlement agents and the PPM Energy Canada Limited's transaction statements.

- (iii) The Spanish affiliates of IBERDROLA RENOVABLES that operate power generation installations subject to the special regime have been selling, to the closest distributor to its installation, including, if applicable, Distribución Eléctrica, S.A.U., energy generated according to the rate sales method liquidándoles igualmente dicho distribuidor las primas y complementos of having opted for the market sales method, all in accordance with Royal Decree 436 of 12 March 2004. This invoicing system for the sale of power through the local distributor has been changed by Royal Decree 661 of 25 May 2007, such that the National Energy Commission directly pays the producers for the sale of energy according to the rate system.

D) Engineering, consulting, construction, and technical assistance

- (i) The Company has signed several engineering, administration, management, consulting, and maintenance service agreements with Iberdrola Generación, S.A. (Unipersonal), as well as other agreements for specialised service in system installations, including follow-up systems for all the Company's renewable energy installations.

On 1 January 2006, the Company signed a one-year framework agreement with Iberdrola Generación, S.A. (Unipersonal), renewable for successive one-year periods, pursuant to which Iberdrola Generación, S.A. (Unipersonal) commits to performing engineering, administrative, and management services for the Company's small hydroelectric installations.

Likewise, Iberdrola Generación, S.A. (Unipersonal) acts as the Company's agent and intermediary in the sale of electricity on the Spanish electricity market.

- (ii) The Company has signed several framework management agreements with Iberdrola Ingeniería y Construcción, S.A. for technical engineering and integrated management services in the development of certain wind farms and small hydroelectric stations, as well as a framework wind farm installation construction agreement.

The Company signed with Iberdrola Ingeniería y Construcción, S.A. a framework agreement on 5 November 2007 for an undetermined period for the

development, construction, management and operation of the Company's renewable energy plants, including (i) for wind farms, engineering (wind measurement), authorisation management, and technical supervision and assistance services for construction (all in accordance with a framework agreement of 30 September 2004 for the construction of wind farms that set the particular terms for the delivery of services and applicable prices); (ii) for the small hydroelectric stations and the supply of electro-mechanical equipment, including the construction process, and the implementation of the environmental protection and waste management plan (all in accordance with a framework agreement dated 16 July 2004 for small hydroelectric stations, pursuant to which the services are invoiced according to costs incurred plus a spread of 9.3% to 17.3%; and (iii) REOC-related services.

The contract will remain in effect for as long as Iberdrola S.A. is owner of more than 50% of the Company's capital or the majority of the members of the Company's Board of Directors have been appointed by Iberdrola S.A.

Likewise, pursuant to this framework agreement, the parties recognise each other as preferred customer and provider, respectively. As a result, the Company is deeply committed to evaluating the opportunity of awarding projects directly to Iberdrola Ingeniería y Construcción, S.A., or at least informing this entity of competitions awarding contracts so that it has the change to participate in them. This commitment does not imply exclusivity nor a commitment to minimum trading volumes by the Company. For its part, Iberdrola Ingeniería y Construcción, S.A. is committed to providing the Company with services at the best price conditions and any other conditions that apply to a customer of the Company's kind.

E) Research and development

(i) IBERDROLA RENOVABLES and Hidroeléctrica Ibérica, S.L. (a subsidiary of Iberdrola, S.A.), which have a 70% and 30% equity investment in Perseo Inversiones Financieras, S.L., respectively, and Iberdrola S.A., signed a Perseo Inversiones Financieras, S.L. shareholders' agreement on 31 October 2007.

On 30 October 2007, IBERDROLA RENOVABLES acquired 70% of the share capital in Perseo Inversiones Financieras, S.L., whose mission is the development of new technologies through the development of renewable energy projects. The objective of the shareholders' agreement is a commitment to providing funds through a planned capital increase of 3,500,000 euros that the partners are committed to contributing in proportion to their respective equity investments.

Likewise, in this agreement, Iberdrola, S.A. is committed to financing IBERDROLA RENOVABLES in its obligation to pay 80% of the amount to be paid.

19.4.2 Transactions with Gamesa Corporación Tecnológica and its subsidiaries

At the date of this Prospectus, Iberdrola, S.A. owns 18.25% of the share capital, and has proposed the appointment of nominal directors, in Gamesa Corporación Tecnológica, S.A., plus the equity investment of Corporación IBV Participaciones Empresariales, S.A. which increases its stake at the date of this Prospectus to 11.78% of the share capital in the same company and in which Iberdrola has a 50% stake. Likewise, two

members of the board of directors of Gamesa Corporación Tecnológica, S.A. have been appointed by Iberdrola S.A., so they hold a dominant position.

Gamesa Corporación Tecnológica, S.A., together with its subsidiary Gamesa Eólica, S.A., are the Company's main suppliers of wind turbines and turn-key wind farm projects. The Company has signed several agreements with the Gamesa group in the ordinary course of its wind farm development operations, it buys their wind turbines and maintenance, as well as financing and other contracts.

In relation to the contracts signed with the Gamesa group, see sections 5.1.5, 5.2.3, 6.1.1 and 6.4 of this Prospectus.

## **20 FINANCIAL INFORMATION CONCERNING THE ISSUER'S ASSETS AND LIABILITIES, FINANCIAL POSITION AND PROFITS AND LOSSES**

### **20.1 Historical financial information**

The financial information included in this point refers to the consolidated annual financial statements of the IBERDROLA RENOVABLES Group for the fiscal years ended 31 December 2006 and 2005, audited by Ernst & Young, S.L., and 31 December 2004, unaudited, all prepared in accordance with the provisions of the International Financial Reporting Standards (hereinafter "IFRS"), as approved by the European Union in accordance with Regulation (EC) 1606/2002 of the Parliament and of the European Council. All figures contained in this point are expressed in thousands of euros, unless otherwise stated.

The closing date used for the financial statements of subsidiary, multigroup and related companies is 31 December. The accounting policies of those companies are the same as or have been standardised to match those used by the IBERDROLA RENOVABLES Group in preparation of its Consolidated Annual Financial Statements.

To date IBERDROLA RENOVABLES has not been required to prepare consolidated annual financial statements for itself and its subsidiary companies, because the parent company of the Group, IBERDROLA RENOVABLES, in turn is a subsidiary of another, Iberdrola, S.A., which prepares and presents consolidated annual financial statements. Without prejudice to the foregoing, starting on the date the Company's shares are admitted for trading on the Spanish stock exchanges, IBERDROLA RENOVABLES will be required to prepare consolidated annual financial statements under the securities market rules.

The annual financial statements consolidated under IFRS (International Financial Reporting Standards) have been prepared on the basis of historical costs, except in the case of available-for-sale financial assets and derivative financial instruments, which have been valued at fair value. The recorded amounts of assets and liabilities that are subject to fair value hedges are adjusted to reflect changes in fair value deriving from the hedged risk.

For a review of the main accounting principles and standards used in preparation of the individual annual financial statements audited under the Plan General de Contabilidad (General Accounting Plan) that are necessary to proper interpretation thereof, and a review of the audit reports for the last three closed fiscal years, annual accounts and

audit reports may be found on deposit with the CNMV, the Madrid Commercial Register and at the registered address of the Company. The consolidated annual financial statements under IFRS (International Financial Reporting Standards) for the Company and its subsidiaries corresponding to the fiscal years ended 31 December 2006 and 2005, and the corresponding audit reports, may be consulted at the CNMV and the registered office of the Company.

Also included in this section are the consolidated cash flow statements corresponding to the 2006, 2005 (audited) and 2004 (unaudited) fiscal years, and the consolidated statement of changes in net equity, prepared in accordance with the provisions of IFRS.

#### Comments on significant changes in the Consolidated Balance Sheet (2006 - 2004)

**Goodwill:** The increase recorded in the 2005 fiscal year occurs as a result of the successive purchase of shareholdings in the company Rokas, a company listed on the Athens exchange in Greece, until reaching 49.9% at the end of the 2005 fiscal year. 21% of that company was previously acquired, in December 2004, giving rise to 6,183 thousand euros of goodwill which was recorded as an increase in value when the investment was consolidated in 2004 by the equity method. In 2005, when Rokas was consolidated by full consolidation, it gave rise to the above-mentioned goodwill acquired with the company 2004 and from acquisitions in 2005, for 21,603 thousand euros. As a result, at the end of 2005 goodwill from the Rokas acquisition totalled 27,785 thousand euros.

**Other intangible assets:** Included under this heading are, basically, the cost of rights to use facilities and land of third parties, and computer applications.

**Tangible Fixed Assets:** this heading includes all facilities for production and exploitation of renewable energy, basically wind farms and mini-hydro production plants, which are in operation or under construction. The high increase is the result of the growing investment activity of the Group, with an increase in gross assets (before depreciation) from 2004 to 2006 of 1,695,798,000 euros, a positive change of 52% over the indicated term.

The 2006 financial statements include an error in note 4h. This states that the value of goods acquired under financial leases in 2006 was 381 thousand euros. In fact the figure should be 31,498 thousand euros.

This significant investment effort is evident in the installed capacity of the Group, which has gone from 3,205.83 MW in 2004 to 4,434.48 MW in 2006, with annual

increases of 949.02 MW, 604.52 MW and 624.13 MW in the 2004, 2005 and 2006 fiscal years, respectively (see point 8 of the prospectus).

**Interests accounted for using the equity method:** For the 2004 fiscal year this basically included the value of the 21% interest in the capital of the Greek subsidiary company Rokas, acquired in December 2004 and consolidated into the Group using the equity method because the company was not controlled. During the 2005 fiscal year control was acquired, for which reason starting in that fiscal year it was fully consolidated in the Group.

**Other non-current financial investments:** Details regarding this heading are as follows:

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
Advances for purchases of interests in other companies	28,191	27,073	+4.1%	13,803	+96.1%
Fixed-Term Deposits	26,844	-	--	-	-
Other Credits	9,213	2,496	+269.1%	5,490	-54.5%
Other	3,051	319	+856.4%	359	
	67,299	29,888	+125.2%	19,652	+52.1%

In the 2004 and 2005 fiscal years advances were recorded for purchase of interests in other companies under agreements reached by the Company with the Gamesa Group, in amounts of €13,803,000 and €27,073,000, respectively, for purchase from that Group of interests in various companies holding future wind generation farms in Andalucia, Portugal, Greece and Italy, as well as other credits granted to third parties in amounts of 5,490,000 and 2,496,000 euros, respectively.

In the 2006 fiscal year, in addition to the indicated advances and other credits, the amounts of which were 28,191,000 and 12,264,000 euros, respectively, a balance of 26,844,000 euros is included for term deposits. These deposits are contributed to the group accounts fundamentally by the subsidiaries, consolidated in 2006 in the United States of America, in the amount of 21,441,000 euros, and 1,353,000 euros by the French subsidiaries, as a guarantee against future variable payments.

**Non-Current Public Authorities:** Details of this item are as follows:

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
<b>Non-current assets</b>					
Credit for deductions by reason of reversion	-	10,156	-100.0%	10,156	--
Credit for deductions for investment in new fixed assets		-	-	5,660	--

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
Other	-	571	-100.0%	1,964	-70.9%
	-	10,727		17,780	

Recorded in the 2005 and 2004 fiscal years, inter alia, was a tax credit for deductions by reason of reinvestment of 10,156,000 euros. This tax credit was regularised during the 2006 fiscal year because the Company concluded it was not recoverable.

**Deferred Tax Credit:** this heading includes tax credits arising from elimination of profits on intercompany transactions for construction and sale of wind farms, and tax credits based on negative taxable income. The decrease in the 2006 fiscal year results from the fact that in the 2004 and 2005 fiscal years the Company had recorded a deferred tax based on valuation of non-hedged financial instruments, the amount of which was 22,633,000 and 21,148,000 euros, respectively. In the 2006 fiscal year the non-hedged financial instruments were cancelled.

**Trade debtors and other current accounts receivable:** Details of this item are as follows:

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
Customers	73,132	53,114	+37.7%	17,756	+199.1%
Debtors	35,122	19,411	+80.9%	5,561	+249.1%
Related companies					
- Iberdrola, S.A.	-	2,327	-100.0%	140,008	-98.3%
- Iberdrola Generación, S.A.	965	163,690	-99.4%	1,157	+14,047.8%
- Iberdrola Distribución, S.A.	35,758	54,314	-34.2%	41,229	+31.7%
- Gamesa Eólica, S.A.	-	328	-100.0%		+100.0%
	144,977	293,184	-50.6%	205,711	+42.5%

**Customers:** This document mainly contains the balances to be collected by national electricity distributors (13,513 thousand euros) and the balances to be collected by international distributors (12,267 thousand euros in the case of Greece and 2,406 thousand euros in the case of other countries). Additionally, it includes the balances to be collected by other non-energy businesses in the amount of 15,560 thousand euros.

**Related companies:** The reduction of the debt to the parent company Iberdrola S.A. is a result of movements in the financing current accounts that the IBERDROLA RENOVABLES group companies have with the parent Iberdrola, S.A. (as explained in section 10.1 of this Prospectus); at the close of 2004 some group companies had debit positions in these financing current accounts, as investment rose over the following years, most of the debit balances moved into credit and therefore were considerably

reduced by close of 2005 and disappeared entirely by end-2006. The balance maintained with Iberdrola Generación in 2005 arises as a result of its acting as agent of IBERDROLA RENOVABLES in making offers of energy to the Electricity Market Operator (“OMEL”) under the ordinary and special systems. At the end of 2005, the accounts included accrued payments for several months which were paid in 2006 by OMEL. In 2006, Iberdrola Generación, S.A. (Unipersonal) ceased to act as intermediary in this way for the sale of energy under the special regime and the balance at the end of 2006 only shows one month’s outstanding billings for energy sales under the ordinary regime.

**Other current financial investments:** this item basically includes the amount of advances and credits given to related companies and other third parties.

**Current Public Authorities:** The breakdown is as follows:

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
Treasury, debtor for VAT	96,168	68,063	+41.3%	109,262	-37.7%
Treasury, creditor for withholdings	27,229	30,238	-10.0%	11,349	+166.4%
Treasury, debtor for miscellaneous items	21,615	3,098	+597.7%	4,378	-29.2%
	<b>145,012</b>	<b>101,399</b>	<b>+43.0%</b>	<b>124,989</b>	<b>-19%</b>

**Cash and equivalents:** The details are as follows:

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
Cash and Liquid Assets	68,460	61,350	+11.6%	27,597	+122.3%
Short-term deposits	54,328	-	-	-	-
	<b>122,788</b>	<b>61,350</b>	<b>+100.1%</b>	<b>27,597</b>	<b>+122.3%</b>

The increase in liquidity in the 2005 fiscal year is the result of inclusion of the Rokas subgroup in the consolidation. The deposits during the 2006 fiscal year come from reserve funds under syndicated loans obtained by the Group.

**Deferred income:** The breakdown of this heading is as follows:

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
Capital Subsidies	46,065	46,123	-0.1%	658	+6,909.6%
Other income to be distributed over several fiscal years	71,441	44,805	+59.4%	14,070	+218.4%

117,506	90,928	+29.2%	14,728	+517.4%
---------	--------	--------	--------	---------

The capital subsidies recorded in 2005 are contributed by the Greek Rokas subgroup. The most significant additions during the 2005 and 2006 fiscal years to the "Other income to be distributed over several fiscal years" item correspond to the agreement signed by the subsidiary company Iberdrola Energías Renovables de Castilla La Mancha, S.A. Unipersonal with various wind farm developers for assignment of use of certain facilities for connection to the electricity system network, allowing joint evacuation of the electricity generated.

**Other provisions:** In the 2005 fiscal year the Greek Rokas subgroup created a provision in the amount of 21,900,000 euros, related to dismantling electricity production and distribution facilities, in accordance with Greek regulations. During the 2006 fiscal year this provision was re-estimated, with a regularisation in the amount of 19,362,000 euros credited to the Property plant and equipment item in the Consolidated Balance Sheet at 31 December 2006.

The Group maintains other provisions to cover responsibilities arising from pending disputes and indemnifications, and for debentures and bank and similar guarantees.

**Current and Non-Current Financial Debt:** See section 10.1 of this Prospectus

**Other non-current accounts payable:** The composition of this item is as follows:

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
- Iberdrola, S.A.	378,902	421,647	-10.1%	465,942	-9.5%
- Gamesa Eólica, S.A.	37,730	39,549	-4.6%	40,553	-2.5%
- Others	44,331	33,995	+30.4%	1,243	+2634.9%
	460,963	495,191	-6.9%	507,738	-2.5%

The credit balance with Iberdrola, S.A. corresponds to the long-term maturity portion of a loan signed on 31 March 2004 in the amount of 552,968,000 euros, the last maturity of which is in June 2012. This loan was granted to prepay the project finance loan that had been signed by the subsidiary IBERDROLA RENOVABLES de Castilla La Mancha, S.A., thus obtaining an improvement in the financial cost of the IBERDROLA RENOVABLES Group. In the "Other current liabilities" item there are 44,379 thousand euros corresponding to the instalment payable during the year 2007. This loan accrues interest at a rate equivalent to six month Euribor plus a market margin, the average rate accruing being 3.48%.

The balance with Gamesa Eólica has its origin in the agreement reached by the Company with the Gamesa Group in the 2002 fiscal year, establishing a commitment to acquire from that group the interests in the share capital of a series of companies holding a group of wind energy generation farms. Based on this agreement, Gamesa in the 2004 fiscal year granted an advance discount for the future sales of companies. At the end of 2006 it amounted to 39,549,000 euros. By common agreement of the parties

the advance discount has been tied to the agreements signed with Gamesa in 2005 and 2006. As purchases are made, the discount granted by Gamesa is eliminated from the Company's liabilities.

**Deferred tax liabilities:** The increase in the 2005 fiscal year results mainly from inclusion of the Rokas subgroup in the consolidation for the 2005 fiscal year, for deferred tax arising from allocation as higher value of assets of a part of the surcharge paid in the combination of businesses arising from acquisition of the indicated Greek subgroup.

**Trade creditors:** under this heading are basically the debts to suppliers of components and equipment for the facilities of the Group companies. The increase since the 2005 fiscal year is a result of the Group's growing investment activity.

**Liabilities for current taxes and Public Authorities:**

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
<b>Current liabilities</b>					
Treasury, creditor for VAT	6,635	21,163	-68.6%	11,252	88.1%
Treasury, creditor for withholdings	2,825	363	+678.2%	535	-32.1%
Treasury, creditor for Corporate Income Tax	53,952	54,729	-1.4%	22,416	-144.2%
Treasury, creditor for other items	36	130	-72.3%	358	-63.9%
Creditor Social Security Agencies	558	522	+6.9%	230	-127.0%
	<b>64,006</b>	<b>76,907</b>		<b>34,791</b>	

**Other current liabilities:**

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
<b>Current Creditors</b>					
- Iberdrola, S.A.	2,186,697	1,849,267	+18.2%	1,517,435	+21.9%
Iberdrola Ingeniería y Construcción, S.A.U	45,207	19,916	+127.0%	66,938	
Gamesa Eólica	172,171	259,926	-33.8%	297,439	-12.6%
Other	83,201	41,969	+98.2%	33,391	+25.7%
	<b>2,487,276</b>	<b>2,171,083</b>	<b>+14.6%</b>	<b>1,915,203</b>	<b>+13.4%</b>

The balance with Iberdrola, S.A. basically corresponds to the balance of the current accounts maintained by various companies in the IBERDROLA RENOVABLES Group with the parent company of the Group, which accrues an interest rate of Euribor plus a

market margin for both debtor and creditor balances. The change experienced occurs by reason of greater use of the banking market for financing of the Group's investment process.

The balance with Iberdrola Ingeniería y Construcción results principally from the debt for engineering services in the development and construction of wind farms.

The balance with Gamesa Eólica corresponds to debt for purchase of aerogenerators.

### 20.1.2 Consolidated Profit and Loss Statements at 31 December 2006, 2005 (audited) and 2004 (unaudited) using IFRS criteria.

## Comments on significant changes in Consolidated Profit and Loss Statements (2006 - 2004)

**Revenue:** The sales of the IBERDROLA RENOVABLES Group amounted to 695,635,000 euros, an increase of 24.8% by comparison with sales during the 2005 fiscal year, and 111.1% by comparison with sales during the 2004 fiscal year. This increase is a result of both increased production and a higher recorded average price.

In the 2006 fiscal year the production of energy reached 7867 GWh, an increase by comparison with the 2005 and 2004 fiscal years of 11.5% and 45.3%, respectively, the production during those fiscal years being 7058 and 5413 GWh, respectively. The average price was 88.42 euros/MWh in 2006, an increase of 11.9% and 45.2% by comparison with 2005 and 2004, respectively, for which the average prices were 78.96 euros/MWh and 60.87 euros/MWh.

This production increase, a result of the increase in the average operating power of the facilities in use, together with the increase in average prices, produced the increase in Group sales for the period in question.

**Personnel expenses:** The change is a result of the increase in the Group's weighted average staff, which went from 236 employees in 2004 to 376 in 2005 and 711 in 2006, a result of the increase in the process of investment in renewable facilities and international expansion.

Due to the fact that a significant part of the facilities have been developed using internal personnel, internalisation of the cost has increased, adding to the value of the assets during the construction phase.

**Outside services:** The breakdown of this item is as follows:

(€ 000s, except for percentages)	2006	2005	% Change	2004 (unaudited)	% Change
Operation and maintenance	48,818	36,294	+34.5%	33,933	+7.0%
Fees	14,342	10,832	+32.4%	8,100	+33.7%
Insurance	6,381	5,552	+14.9%	7,109	-21.9%
Development Costs	10,062	4,387	+129.4%	2,934	+49.5%
Other expenses	34,501	20,302	+69.9%	16,579	+22.5%
	<b>114,104</b>	<b>77,367</b>	<b>+47.5%</b>	<b>68,655</b>	<b>+12.7%</b>

The increase in the main direct expenses of operation of facilities (operation and maintenance, fees and insurance) is due to the increased sales of the Group.

Development Costs, which include expenses incurred by the Group for research and development of new renewable facilities in incipient phases, considerably increased starting with the 2005 fiscal year by reason of the significant international expansion of the Group, mainly in the United States of America and Europe. Regarding Other

expenses, they also increased considerably, in large part due to the costs arising from opening new offices of companies abroad.

**Other operating income:** This line item basically includes income obtained by assignment of hydro operations and other management services to third parties, and other net income of other activities not directly related to generation of renewable energy, such as the construction of metal structures by the Greek subsidiary Rokas (during the 2005 fiscal year it was fully consolidated starting with the last quarter, and for the 2006 fiscal year it was fully consolidated) and the marketing of green certificates by the United States subsidiary Community Energy Inc. (a company acquired during the 2006 fiscal year).

**Taxes:** The increase in the 2006 fiscal year is due to the creation of a provision in the amount of 8,109,000 euros, to cover the negative effect that could result from resolution of the appeal presented by the Company against actions brought by the excise tax auditors regarding the tax on electricity for the 2000 to 2003 fiscal years, against a subsidiary company that was absorbed by the Company in 2004. The current situation is described in the litigation section.

**Depreciation and provisions:** The positive change is due to the increase in operating assets during the period in question.

**Financial income:** the most significant positive change occurred during the 2006 fiscal year, when there was income in the amount of 23,542,000 euros from settlement of non-hedged derivatives.

**Financial expense:** The financial restructuring undertaken during the 2004 fiscal year of the debt originating in the companies acquired from Gamesa Energía during the 2003 fiscal year, during which a large part of the project finance debt was replaced by financial debt of Iberdrola, S.A., resulted in decreased financial expense for the 2005 fiscal year.

In addition, at the end of the 2005 fiscal year and during the 2006 fiscal year the debt to finance investments that were made increased, for which reason the financial expense increased during the 2006 fiscal year by comparison with the 2005 fiscal year, by 45.9%.

### **20.1.3 Consolidated cash flow statement at 31 December 2006 and 2005 using IFRS criteria.**

We now present a cash flow analysis for IBERDROLA RENOVABLES and its group of companies, excluding the US and UK companies included in the Company's scope of consolidation in view of the restructuring during the period from 1 January 2004 to 30 September 2007, in accordance with the audited financial statements at 31 December 2005 and 2006 of IBERDROLA RENOVABLES and its group of companies, as well as the consolidated financial statements at 30 September 2007, subject to limited audit, all drafted in compliance with IFRS, included for reference in this Prospectus.

The Company's website ([www.iberdrolarenovables.com](http://www.iberdrolarenovables.com)) likewise contains the audited consolidated financial statements of ScottishPower Holdings, Inc. and of the main UK companies included in the Company's scope of consolidation in view of the

restructuring for the years ending 31 March 2005, 2006 and 2007 (except in the case of the company CeltPower Ltd. whose financial statements for the years ending 31 December 2004, 2005 and 2006) are included, as well as the unaudited financial information of such UK companies for the years ending 31 March 2005, 2006 and 2007, drafted in accordance with generally accepted accounting principles in the US and UK, expressed in US dollar and UK pounds, respectively, as well as a detailed statement of changes in cash flow for ScottishPower Holdings Inc. and such UK companies combined for the period from 31 March 2006 to 31 March 2007 on the basis of the financial statements cited above.

In addition, section 20.1 and following of this Prospectus contain the Company's statement of shareholders' equity for the years ending 31 December 2006, 2005 (audited) and 2004 (unaudited).

The following table summarises the cash flow statements corresponding to the periods ended 31 December 2005 and 31 December 2006. The table distinguishes among cash flows from operating activities, cash flows from investment activities and cash flows from financing activities:

(€ 000s, except for percentages)	2006	2005	% Change 2006-2005
<b>Cash flows from operating activities (I):</b>

Cash flows from financing activities (III) 2006 version	22,157 (L)

The differences in the consolidated statement of cash flow for 2005 result from the reclassification of certain line items in order to harmonize the 2006 consolidated cash flow statement with that of the parent company, Iberdrola, S.A.

Below is a narrative description of the status and changes experienced in the cash flows presented in the foregoing table:

#### Net cash flows from operating activities

Periods ended 31 December 2005 and 31 December 2006

The financing received from Iberdrola, S.A. is recorded as short-term debt on the Company’s balance sheet, and any change related to the financing provided by

Iberdrola, S.A. affects the cash flows from the Company's operating activities. Without taking into consideration, in the change in working capital, the short-term financing received from Iberdrola and the effects from changes in the method and/or scope of consolidation, the cash flow from operating activities would be as follows:

(€ 000s)	2006	2005
Cash flows from operating activities	703,462	751,750
Short-term financing from Iberdrola, S.A.	(337,428)	(331,834)
Change in working capital from changes in the method and/or scope of consolidation	238,939	(37,478)
Adjusted cash flows from operating activities:	604,973	382,438
Change in trade debtors and other accounts payable, excluding short-term financing from Iberdrola	64,347	60,456

At 31 December 2006 the Company had generated cash flows of 703.5 million euros from its operations, compared with 751.8 million euros generated at 31 December 2005, a decrease of 48.2 million euros, that is, a decrease of 6.4%. Excluding the effect of the short-term financing from the parent company, Iberdrola, S.A., and the change in working capital from changes in the method and/or scope of consolidation, the cash flow from operating activities was 605 million euros at 31 December 2006, compared with 382.5 million euros at 31 December 2005. This increase resulted basically from:

An increase in adjusted income from operating activities from 367.5 million euros in the year ended 31 December 2005 to 450.5 million euros in the year ended 31 December 2006; and

A 74.4 million positive cash flow from the accounts payable for the year ended 31 December 2006, compared to a 45 million euro negative flow as of 31 December 2005, due to a reduction in the debit balances as a consequence of the change in billing by the Electricity Market Operator (OMEL), which, from October 2006, started billing weekly (it was previously monthly), resulting in a reduction in the collection period.

The breakdown of the line item "Change in trade debtors and other accounts payable," showing the change in short-term financing from the parent company, Iberdrola, S.A., follows:

(€ 000s)	2006	2005
Change in trade debtors and other accounts payable		
External creditors	64,347	60,456
Short-term financial debt with Iberdrola, S.A.	337,428	331,834
<b>Total</b>	<b>401,775</b>	<b>392,290</b>

#### Net Cash flows from investment activity

Period ended 31 December 2006

At 31 December 2006, the Company had used 688.8 million euros in investment activities, including: (i) 644.1 million euros for acquisition of tangible fixed assets, that is machinery and facilities, related to construction and installation of wind farms in Spain, the United States of America and the rest of the world, and also related to construction and installation of mini-hydro plants in Spain; (ii) 38.3 million euros in noncurrent financial assets, basically time deposits; (iii) 8.4 million euros in acquisition of intangible assets, basically rights for use of electricity facilities and technical software; and 7.3 million euros for sale of non-financial assets, due principally to the transfer of certain facilities to the operator of the electricity network in Spain.

Period ended 31 December 2005

At 31 December 2005, the Company had used 740.2 million euros in investment activities, including: (i) 617.3 million euros for acquisition of tangible fixed assets, that is machinery and facilities, related to construction and installation of wind farms in Spain and the rest of the world, and also related to construction and installation of mini-hydro plants in Spain; (ii) 97.9 million euros in acquisition of subsidiary companies, net of cash, acquired by the subsidiary company C. Rokas S.A. in 2005; (iii) 13.3 million euros in current and noncurrent financial assets arising from payments on account of future acquisitions of companies and assets; (iv) 5.3 million euros in acquisition of intangible assets, basically rights to use electricity facilities and technical software; and (v) 11.8 million euros for sale of non-financial assets, due principally to the transfer of certain facilities to the operator of the electricity network in Spain.

#### **Net cash flows from financing activities**

This section includes, in addition to the outside financing, the cash flows from long-term financing activities among Group companies, particularly the financing from the sole shareholder of Iberdrola Renovables, Iberdrola, S.A.

Period ended 31 December 2006

At 31 December 2006, the Company had generated cash flows from financing activities of 46.8 million euros, principally due to: (i) 118.6 million euros from new loans from financial institutions obtained for construction of electricity generation plants; (ii) an entry for deferred revenue of 32.3 million euros from the payments made by several wind farm developers by virtue of the agreements between the subsidiary Iberdrola Renovables de Castilla-La Mancha, S.A.U. and said wind [farm] developers for the construction and use of electrical lines; (iii) revenue of 29.9 million euros from the change of the current financial debt, (iv) disbursement for interest payment of 98.1 million euros; and (v) disbursement for payment of dividends to Iberdrola, S.A., which amounted to 35.9 million euros.

Period ended 31 December 2005

At 31 December 2006, the Company had generated cash flows from financing activities of 22.2 million euros, principally due to: (i) 16.9 million euros from new loans obtained for construction of electricity generation plants; (ii) an entry for deferred revenue of 30.8 million euros from payments made by various wind farm developers by virtue of

the agreements between the subsidiary Iberdrola Renovables de Castilla-La Mancha, S.A.U. and said wind [farm] developers for the construction and use of electrical lines; (iii) revenue of 54.7 million euros from current financial debt; (iv) disbursement for interest payment on current debt of 65.9 million euros; and (v) disbursement for payment of 14.2 million euros in dividends to Iberdrola, S.A.

## **Discussion of significant variations in consolidated statement of changes in equity (2006 - 2004)**

**Share issuance premium:** The increase in this line item during the 2005 year is the result of the process of merger by absorption of the parent Company and the subsidiary Sistemas Energéticos de Navarra, S.A.U. and the corresponding transfer of reserves in the consolidation process.

**Reserve for unrealised revaluation of assets and liabilities:** The change in this reserve is a result of changes in derivatives designed to hedge cash flows.

**Other reserves:** The increase over the three periods in question is the result of allocation of results of companies in the consolidated group, fully or partially consolidated or consolidated using the equity method, as well as funding of the legal reserve by the parent company, IBERDROLA RENOVABLES.

**Minority interests:** The increase of 50,668 thousand euros in this line item during the 2005 year is principally due to the purchase of 28.90% of Rokas, which accounted for an increase of 43,350 thousand euros.

### **20.1.5 Audit of historical financial information at 31 December 2006 and 2005 using IFRS criteria**

See section 20.4.1 below.

## **20.2 Pro forma financial information**

### **20.2.1 Introduction**

#### **a) Description of the transaction**

On 22 May 2007, the Board of Directors of Iberdrola, S.A. (hereinafter IBERDROLA), the sole shareholder of Iberdrola Renovables, S.A.U. (hereinafter IBERDROLA RENOVABLES) agreed to initiate work with the objective of listing on the exchange, through a capital increase, up to 20% of the capital stock of IBERDROLA RENOVABLES.

Up until the purchase, on 23 April 2007, of Scottish Power, PLC (hereinafter SCOTTISH POWER) BY IBERDROLA, IBERDROLA RENOVABLES was almost exclusively carrying out the IBERDROLA Group's activity of electrical energy production through renewable sources. Since SCOTTISH POWER also had an important branch of activity related to renewable energy, the Board of Directors of IBERDROLA also approved, on the aforementioned date, a reorganization of this area with the objective of incorporating into IBERDROLA RENOVABLES all the affiliates of IBERDROLA and SCOTTISH POWER the corporate purpose of which was the production of renewable energy.

On 3 October 2007, IBERDROLA RENOVABLES acquired, through a capital increase by means of a non-monetary contribution totally subscribed by IBERDROLA, all the assets and

liabilities of SCOTTISH POWER related to renewable energy. Those assets and liabilities are basically located in two countries:

The United States: belonging to Scottish Power Holding Inc. (hereinafter SPHI), which also carries out other activities, such as gas storage, the thermal generation of electrical energy, and the trading of gas and electricity. All the assets and liabilities of SPHI have been contributed to IBERDROLA RENOVABLES in the aforementioned capital increase.

The United Kingdom, where the activity of electrical energy production based on renewable sources is being carried out through the following companies: **Beaufort Energy Limited (and subsidiaries), Celtpower Limited, Gallagheen Wind Farm Limited, Wolf Bog Wind Farm Limited and Coldham Wind Farm Limited** (hereinafter, jointly, the **BRITISH WIND FARMS**).

b) Purpose of the PRO FORMA FINANCIAL INFORMATION and the basis of its presentation.

The Pro Forma Financial Information to which these explanatory notes refer (hereinafter the PRO FORMA FINANCIAL INFORMATION) has been prepared for the purpose of illustrating the result of the contribution to IBERDROLA RENOVABLES of SPHI and the BRITISH WIND FARMS. This PRO FORMA FINANCIAL INFORMATION includes:

the pro forma balance sheet of IBERDROLA RENOVABLES, SPHI, and the BRITISH WIND FARMS at 30 September 2007,

the pro forma profit and loss statement of IBERDROLA RENOVABLES, SPHI, and the BRITISH WIND FARMS for the nine-month period ending 30 September 2007.

the pro forma balance sheet of IBERDROLA RENOVABLES, SPHI, and the BRITISH WIND FARMS at 31 December 2006.

the pro forma profit and loss statement of IBERDROLA RENOVABLES, SPHI, and the BRITISH WIND FARMS for the fiscal year ended 31 December 2006.

THE PRO FORMA FINANCIAL INFORMATION has been prepared in accordance with the criteria described in Note 2.a of the section entitled Bases and Sources of Preparation of the Information of these Explanatory Notes.

The PRO FORMA FINANCIAL INFORMATION has been prepared in accordance with the requirements of the Regulations of the European Union contained in Regulation 809/2004 and the contents of the CESR Recommendation for the consistent implementation of the cited regulation (CESR05/054b).

The PRO FORMA FINANCIAL INFORMATION is submitted for purposes of illustration only. Due to its nature, it is hypothetical and does not represent the financial position or the actual income of IBERDROLA RENOVABLES, SPHI, and/or the BRITISH WIND FARMS, nor does it intend to project income with respect to any future period.

c) Hypotheses considered

For the purpose of preparing the PRO FORMA FINANCIAL INFORMATION and with the aim of helping the reader in understanding the information:

- the pro forma balance sheet at 30 September 2007 has been prepared as if the transaction had taken place on 1 January 2007.
- the pro forma profit and loss account for the period of nine months ending 30 September 2007 has been prepared as if the transaction had taken place on 1 January 2007.
- the pro forma balance sheet at 31 December 2006 has been prepared as if the transaction had taken place on 1 January 2006.
- the pro forma profit and loss account closing on 31 December 2006 has been prepared as if the transaction had taken place on 1 January 2006.

Those dates are prior to the date on which the aforementioned non-monetary contribution occurred and, consequently, the profit and loss statement for each of the two periods includes the depreciation, from the starting date of each of the two periods, of the assignment of the price paid in the acquisition of SCOTTISH POWER (see Note 1.d) to the assets and liabilities that were the object of the non-monetary contribution.

Moreover, this information has been prepared using the following exchange rates:

For the pro forma balance sheet at 30 September 2007, the exchange rates in effect at that date are 1.4351 pounds/euros and 0.7053 U.S. dollars/euros.

For the pro forma balance sheet at 31 December 2006, the exchange rates considered were 1.4852 pounds/euros and 0.7580 U.S. dollars/euros.

For the pro forma profit and loss statement for the nine-month period ending 30 September 2007, the average exchange rates for that period [sic] were 1.4775 pounds/euros and 0.7437 U.S. dollars/euros.

For the pro forma profit and loss statement for the fiscal year ended 31 December 2006, the average exchange rates for that period [sic] were 1.4757 pounds/euros and 0.7802 U.S. dollars/euros.

Consequently, and in accordance with the procedure for consolidation of foreign companies established by the International Financial Reporting Standards, the preparation of the PRO FORMA FINANCIAL INFORMATION resulted in conversion differences which are shown under the line item "Other Reserves" in the balance sheets at 30 September 2007 and 31 December 2006.

Moreover, due to their scant significance, it has not been considered necessary to introduce, in the preparation of the PRO FORMA FINANCIAL INFORMATION, any costs derived from the non-monetary contribution described in Note 1.d or from the second monetary contribution, dated 5 November 2007, referred to in Note 2.d.

In relation to the United Kingdom companies, the central support services that were traditionally rendered by SCOTTISH POWER at no charge have not been included in the PRO FORMA FINANCIAL INFORMATION as they are considered to be of scant relevance.

d) Assignment of acquisition price and non-monetary contribution

As mentioned earlier, the acquisition of SCOTTISH POWER by IBERDROLA occurred on 23 April 2007. IBERDROLA, in accordance with IFRS 3: "Business combinations," is currently effecting, with the help of an independent expert, the assignment of the acquisition price to reflect the reasonable value of the assets and liabilities of SCOTTISH POWER at that date, including the assets and liabilities of SPHI and the BRITISH WIND FARMS. This assignment has not been finalized. According to IFRS 3, IBERDROLA has one year from the date of the business combination to finalize said assignment.

When assessing the assets and liabilities of SPHI and the BRITISH WIND FARMS in the PRO FORMA FINANCIAL INFORMATION, IBERDROLA RENOVABLES took into consideration the fact that paragraph 3 of IFRS 3 indicates that the provisions of this precept will not be applicable to business combinations of entities under common control.

Consequently, given the non-existence of applicable accounting regulations, IBERDROLA RENOVABLES has opted to assess, in the PRO FORMA FINANCIAL INFORMATION, the contributed assets and liabilities at the value shown on the consolidated books of IBERDROLA at 3 October 2007, this coinciding with the best value of said assets and liabilities available on that date, in the process of assigning the previously-described price paid for SCOTTISH POWER, once corrected for the depreciations corresponding to the 23 April – 3 October period, 3 October being the date of the non-monetary contribution.

In this respect, IBERDROLA RENOVABLES has deemed it appropriate that the accounting record of that contribution of assets and liabilities also include the part of the goodwill that was generated in the acquisition of SCOTTISH POWER and that corresponds to the cash-generating units that have been transferred to IBERDROLA RENOVABLES. The value of that goodwill has likewise been obtained from the most recent values originated in the process of assigning the price paid for SCOTTISH POWER.

In the preparation of the PRO FORMA FINANCIAL INFORMATION, this non-monetary contribution has been distributed between "Subscribed capital" and "Other reserves," according to the number of shares issued and their par value considered in the non-monetary contribution of 3 October 2007. This contribution entailed an increase of the subscribed capital of IBERDROLA RENOVABLES in the amount of 1,335.4 million euros (corresponding to 133,539,956 shares) and an issue premium of 3,444 million euros.

Moreover, it should be pointed out that part of the acquisition price of SCOTTISH POWER has been assigned to the reasonable value of wind farm projects of SPHI and the BRITISH FARMS in the development phase ("pipeline") that meet the identifiability requirement of International Accounting Standard 38 for the posting of an intangible asset, since said projects are separable and subject to being sold independently. These projects were valued on the financial statements of SCOTTISH POWER and SPHI for the costs incurred, although a fair value is much higher according to the assessment made by an independent expert, because it includes the intrinsic value of certain milestones achieved in the development of the wind

park, such as the location of ideal sites to construct the wind park, wind resource measurements made over a continuous period of one year, the obtainment of permits and authorisations from the relevant authorities to construct the wind park, among others, which the market investor would be prepared to pay. The amounts assigned at 30 September 2007 and 31 December 2006 are 3,200.1 and 3,391.8 million euros, respectively. The difference between those values is primarily due to the application of different exchange rates between the euro and the pound sterling and US dollar

For purposes of preparing this PRO FORMA FINANCIAL INFORMATION, the difference between the reasonable value and the net book value of the intangible assets and of property, plant, and equipment is depreciated in accordance with their respective useful lives, following the criteria of IBERDROLA RENOVABLES. Specifically, the wind farms are depreciated linearly over 20 years.

If that difference corresponds to projects for construction of wind farms that are not yet in service, this is not depreciated. When said projects are completed and begin operations, they will be depreciated over the aforementioned useful life of 20 years.

e) Other

The PRO FORMA FINANCIAL INFORMATION has been prepared on the basis of the consolidated financial statements of IBERDROLA RENOVABLES, SPHI, and the BRITISH WIND FARMS. Consequently, that financial information does not include any adjustment for liabilities of restructuring or for the purpose of the significant potential synergies that could result from the acquisition.

In any event, the PRO FORMA FINANCIAL INFORMATION and these explanatory notes must be read in conjunction with the historical financial information of IBERDROLA RENOVABLES, SPHI, and the BRITISH WIND FARMS.

#### 20.2.2 Bases and sources of preparation of the PRO FORMA FINANCIAL INFORMATION.

a) Bases of preparation

In accordance with Appendix II of Regulation 809/2004, the basis of preparation of the PRO FORMA FINANCIAL INFORMATION is normally the unadjusted historical information of the entities involved in the transaction.

In this case, and for the reasons explained below (including the different closing date[s] of fiscal years and the different accounting principles applied), the Board of Directors of IBERDROLA RENOVABLES has included, to the best of its knowledge, certain prior harmonizations and pro forma adjustments (described below) in the financial information described in the SPHI and BRITISH WIND FARMS columns.

b) Sources of the information

In the case of IBERDROLA RENOVABLES, the following information was used:

The unaudited consolidated balance sheet at 30 September 2007, which was subject to a limited review in accordance with ISRE 2410.

The consolidated profit and loss statement for the nine-month period ending 30 September 2007, also subject to a limited review.

The consolidated balance sheet at 31 December 2006, included in the audited consolidated annual accounts (without qualifications) for the fiscal year ended on that date.

The consolidated profit and loss statement for the year ended 31 December 2006, also included in the audited consolidated annual accounts (without qualifications).

In the case of SPHI and the BRITISH WIND FARMS, the annual accounts for which close on 31 March, the following information was used:

The balance sheet at 30 September 2007 (unaudited)

For the pro forma profit and loss statement for the nine-month period ending 30 September 2007, their respective profit and loss statements for that period (unaudited), which have been specifically prepared for the preparation of this pro forma financial information.

For the pro forma balance sheet at 31 December 2006, the balance sheet at 31 March 2007, included in their audited annual accounts (without qualifications) for the fiscal year ended on that date.

For the pro forma profit and loss statement for the fiscal year ended 31 December 2006, their respective profit and loss statements for the fiscal years ended 31 March 2007, also included in their audited annual accounts (without qualifications).

c) Application of the International Financial Reporting Standards and other pro forma adjustments

The information about IBERDROLA RENOVABLES has been prepared in accordance with the International Financial Reporting Standards (hereinafter IFRS) approved by the European Union in accordance with (EC) Regulation No. 1606/2002 of the European Parliament and Council.

Since the financial information of SPHI and the BRITISH WIND FARMS used in the preparation of the PRO FORMA FINANCIAL INFORMATION has been prepared under the accounting principles of their countries (US GAAP and UK GAAP, respectively), IBERDROLA RENOVABLES has analyzed the need to make harmonization adjustments with IFRS in the process of preparation of the PRO FORMA FINANCIAL INFORMATION, in order to ensure its consistency. This harmonization process has been reviewed by the auditor of IBERDROLA RENOVABLES.

As a consequence of this analysis, it has not been considered necessary to introduce any harmonization adjustment to the financial statements of the BRITISH WIND FARMS, and it has been considered necessary to make a series of adjustments to the financial statements of SPHI. Below are described the principal adjustments for harmonization introduced to the financial statements of SPHI (debits shown as positive numbers and credits shown with a "minus" sign):

Under the U.S. GAAP, joint ventures are integrated under the equity method. According to IFRS, joint ventures may be posted under the equity method or the proportional method. Since IBERDROLA RENOVABLES uses the latter, a harmonization adjustment has been made in this respect.

The effect of this harmonization adjustment is as follows (in millions of euros):

Account	30/09/2007	31/12/2006
Property, Plant and Equipment	221.3	258.4
Intangible Assets	13.5	-
Participations entered by the participation method.	-203.1	-223.2
Miscellaneous current assets	4.1	5.1
Cash and equivalents	16.7	18.1
Non-current liabilities-financial debt	-34.5	-40.2
Non-current liabilities-other non-current liabilities	-1.6	-0.5
Current Liabilities-financial debt	-2.8	-2.8
Current liabilities-other current liabilities	-13.6	-14.9
Amount of net turnover	-21.3	-24.8
Operating expenses	6.5	7.1
Depreciation and provisions	7.8	8.7
Earnings/Net Financial Expenses	0.9	1.3
Profit of companies by participation method	6.1	7.7

SPHI has performed various transactions including third parties as external partners in some of their wind farms, obtaining in exchange consideration basically in cash. Nevertheless, SPHI maintains control and management of these wind farms given that the rights of the external shareholders are only protective in nature, although these third parties acquire the right to some of the profits and tax credits that those installations produce during a certain period of time. Once they achieve an agreed to profitability on their initial investments the signed agreements are terminated and as a consequence the third parties lose their rights to said profits and tax credits.

The consideration received by SPHI is registered in their financial statements under US GAPP as "Revenue to be distributed over several fiscal years" and allocated to profits in a linear manner. In accordance with NIIF, during the preparation of this PRO-FORMA FINANCIAL INFORMATION said consideration has been registered as a credit in the "Capital Instruments with characteristics of financial liabilities" account in the balance. These

liabilities are initially recognized at a reasonable value and subsequently valued at depreciated costs. Likewise, in accordance with NIFF the profits and tax credits are registered in the profit and loss account as the farms produce them.

The impact of this homogenization adjustment is as follows ( in millions of euros):

Account	30/09/2007	31/12/2006
Deferred Asset Tax	6.5	-
Miscellaneous current Assets	-1.1	-
Reserves	7.6	-0.5
Minority Shareholders	21.1	-
Capital Instruments with characteristics of financial liabilities	-550.6	-595.0
Miscellaneous non-current liabilities	493.2	576.8
Net Amount of Turnover	-11.3	12.5
Net Revenue/Financial Expenses	30.6	17.8
Minority Interests	1.2	-
Corporate Tax	2.8	-11.6

By means of this homogenisation adjustment, as mentioned, the amount of the Deferred Revenues, classified as Other Non-Current Liabilities under US GAAP in SPHI will be removed, and debts with external shareholders are reflected in the section Capital Instruments with the characteristics of financial liabilities, as well as financial expenses accrued corresponding to that debt. Also reflected is the part of the minority shareholders arising from the structures in which the external shareholders remain as such on a permanent basis after the established yield has been achieved.

US GAPP and IFRS establish that all derivatives, as defined by each one of these rules, are valued at reasonable value. Both accounting rules, which in the case of the IFRS are set forth in NIC 39: "Financial Instruments: Recognition and Valuation" have a specific regulation on this requirement. The principal differences detected have been the object of the homogenization that is described below.

The IBERDROLA GROUP registers derivatives that do not meet the conditions to be considered accounting coverage and that are registered at the price of any energy raw material in the section "Net Amount of Business Turnover" in the profits and loss account while under US GAAP this classification is not so strict, thereby being able to appear in either the "Net Amount of Business Turnover" or in "Purchases"

Under US GAAP, the designation of contracts as accounting coverage are performed at the time the contract is signed while in the case of the IFRS said designation is performed in the transition balance of said rules. Therefore, there may be contracts that as considered as coverage under US GAAP and do not have this consideration under IFRS and vice versa. This difference has a negative impact on equity of approximately 61.7 and 74.4 million euros at 30 September and 31 December 2007, respectively.

Both the IFRS as well as the US GAAP contemplate that contracts for the acquisition or sale of non-financial assets are not considered financial instruments as they are designated for consumption by the company that has itself signed the contract in which case they must not be registered at their reasonable value. The requirement for considering a contract as own consumption are different under IFRS where they are set forth in paragraphs 5 to 7 of the IAR 39 than under the US GAAP. As a consequence, there are contracts registered at their reasonable value under IFRS that are not registered under US GAAP and vice versa. This difference has a positive impact on equity of approximately 29.7 million euros for the period of nine months ending on 30 September 2007, and 30.8 million euros for the 2006 financial year.

The classification of derivatives on energy in the balance, which SPHI has been applying, does not coincide with that which IBERDROLA applies. IBERDROLA classifies them as assets and financial liabilities. This reclassification does not have any impact on , and only affects the balance sheet items.

The impact of the homogenization impact in relation to IAR 39 is as follows (in millions of euros):

Account	30/09/2007	31/12/2006
Non-current financial investments	60.0	50.8
Miscellaneous non-current receivables	-107.5	-108.2
Deferred Asset Tax	52.2	29.4
Miscellaneous current assets	-21.2	-20.4
Miscellaneous reserves	61.7	74.4
Non-current Liabilities-Financial Debts	-76.5	-65.1
Non-current liabilities-other non-current liabilities	57.1	67.9
Current liabilities-Financial Debt	-103.3	-85.1
Miscellaneous current liabilities	107.2	87.1
Net amount of turnover	-100.6	-144.6
Purchases	52.1	95.3

Corporate Tax	18.8	18.5
---------------	------	------

Moreover, before its acquisition by IBERDROLA, SPHI applied a 25 year useful life to the wind farms while IBERDROLA used a 20 year useful life. Therefore, a homogenization adjustment has been registered in the pro-forma profits and losses account for 2006 in order to depreciate SCOTTISH POWERS wind parks in 20 years. It has not been necessary to perform any pro forma adjustment in the 9 month period ending on September 20, 2007 due to the fact that SPHI adopted its useful life at the beginning of it.

The impact of the homogenization effects is as follows (in millions of euros):

Account	30/09/2007	31/12/2006
Property, plant, equipment	-	-9.6
Miscellaneous non-current assets	-	3.6
Depreciation and Provisions	-	9.8
Corporate Tax	-	-3.8

IBERDROLA prepares its profit and loss account in accordance with the method of the nature of expenses while SCOTTISH POWER performs it in accordance with the method of the purpose of the expense. In light of its homogenization a pro form adjustment in the pro forma profit and loss account in the 2006 fiscal year has been performed. It has not been necessary to perform any pro forma adjustment on the pro forma profit and loss account in the nine month period ending 30 September 2007 due to the fact that SPHI has adapted its presentation to the method of the nature of expense at the beginning of that period.

The impact of the homogenization adjustment is as follows (in millions of euros):

Account	30/09/2007	31/12/2006
Net Amount of Turnover	-	149.4
Operating Expenses	-	-153.0
Depreciation and Provisions	-	7.6
Net Revenue/Financial Expense	-	-1.2
Profits (losses) in disposal of non-current assets	-	-28.1
Corporate Tax	-	25.3

d) Pro forma adjustments

Moreover, during the preparation of PRO-FORMA FINANCIAL INFORMATION a series of pro-forma adjustments have been included the objective of which is to favour its correct interpretation. These pro-forma entries are explained below.

The Internal Revenue Service ( the Tax Ministry of the United States of America) finished its audit of SPHI's 2001, 2002, and 2003 fiscal years in February 2007 and proposed adjustments arising from the fact that certain deductions applied to the corporate tax returns were considered non-deductibles, which make reference to certain financing agreements with SCOTTISH POWER and that are being discussed. SPHI considered it reasonable to establish a provision in order to cover a probable negative resolution of this matter. Given that Iberdrola, S.A. is guaranteeing IBERDROLA RENOVABLES the financial results of this matter, a pro-forma adjustment has been registered in order to offset the accounting expense by SPHI.

The impact of this pro forma adjustment is as follows (in millions of euros):

Account	30/09/2007	31/12/2006
Miscellaneous non-current receivables	201.9	217.1
Corporate Tax	-186.4	-195.5
Reserves	-15.5	-21.6

The adjustment made in the reserves section corresponds to the conversion differences due to the application of average exchange rates for the profit and loss account and closing exchange rates for the balance sheets (See Note 1.c Considered Hypotheses)

Likewise, the accounting reflection of the non-cash contribution described in section 1.3. appears included in the column "Pro-Forma Adjustments of the FINANCIAL PRO FORMA INFORMATION and has a positive impact on Other Reserves of approximately 468.7 million euros at 30 September 2007 and 441.7 million euros at 31 December 2006 as a consequence of the higher value of the contribution made in comparison to the notarised value thereof.

The impact of this pro-forma adjustment is as follows (in millions of euros):

Account	30/09/2007	31/12/2006
Property, plant and equipment	1,343.3	1,452.1
Goodwill and intangible assets	4,854.0	5,152.2
Share capital. - Rights issue	-1,335.4	-1,335.4
- Removal of subsidiary share capital	1,498.9	1,610.8
Miscellaneous Reserves - Issue Premium	-3,444.0	-3,444.0

- Conversion differences	-	-324.4
- Removal subsidiary reserves	-910.6	-1,050.0
- Higher value contribution	-468.7	-441.7
Miscellaneous non-current liabilities	-1,584.5	-1,674.4
Depreciation and provisions	73.6	88.7
Corporate Tax	-26.6	-33.9

On the other side, a new increase in share capital of IBERDROLA RENOVABLES took place by means of an issuance of 18,962,596 shares that have been completely subscribed to by IBERDROLA by means of a credit right held by IBERDROLA, S.A. with the Scottish Power Renewables Holdings Ltd, a company that has played a part in the non-cash contribution described in section 1.c. It is considered appropriate that regardless of the fact that it has taken place subsequent to 30 September 2007 the PRO-FORMA FINANCIAL INFORMATION on said date and on 31 December 2006 reflects this second capital increase, which does not have any effect on the profit and loss accounts in any of the two periods reflected in the PRO-FORMA FINANCIAL INFORMATION and that has been registered in the balance of the pro-forma situation on 30 September 2007 and 31 December 2006 in accordance with the values established in the deed of the capital increase.

The impact of this pro-forma adjustment is as follows (in millions of euros):

Account	30/09/2007	31/12/2006
Share Capital	(189.6)	(189.6)
Miscellaneous Reserves	(489.0)	(489.0)
Current Liabilities-debt with interest with group companies	678.6	678.6

### 20.3 Financial statements

See section 0 above in this Registration Document, as well as the financial statements of the issuer deposited with the CNMV, at the registered office and on the Company's website.

## **20.4 Auditing of annual historical financial information**

### **20.4.1 A statement that the historical financial information has been audited. If the audit reports of the statutory auditors of historical financial information contain adverse opinions or qualifications, limitations on the scope or withholding of opinions, the adverse opinions, qualifications, limitations on scope or withholding of opinions must be fully reproduced, explaining the reasons**

The individual financial statements of IBERDROLA RENOVABLES under Spanish accounting principles corresponding to the 2004 fiscal year were audited by Deloitte, S.L. The audit report contains no qualifications. The individual annual accounts of the Company under Spanish accounting principles for the fiscal years closed 31 December 2005 and 2006 were audited by Ernst & Young, S.L. The audit reports contain no qualifications.

The consolidated annual financial statements of IBERDROLA RENOVABLES and its subsidiaries under IFRS (International Financial Reporting Standards) corresponding to the fiscal years closed 31 December 2005 and 2006 were audited by Ernst & Young, S.L. The audit reports contain no qualifications.

IBERDROLA RENOVABLES was not required to and, therefore, did not prepare or approve consolidated annual financial statements for the 2004 fiscal year under Spanish accounting principles, because it was a part of the Iberdrola Group.

For their part, the figures in the consolidated balance sheet and profit and loss statement of the Company and its subsidiaries for the 2004 fiscal year, prepared in accordance with IFRS (International Financial Reporting Standards), included in the comparative column of the audited consolidated financial statements of the Company and its subsidiaries prepared in accordance with IFRS (International Financial Reporting Standards) for the 2005 fiscal year have not been audited.

### **20.4.2 Indication of any other information in the registration document which has been audited by the auditors**

The financial information corresponding to the nine-month period ended 30 September 2007 also includes the corresponding limited review report, also prepared by Ernst & Young, S.L.

Likewise, the pro forma financial information to which section 20.2 of this Registration Document refers has been the object of the corresponding special review report by Ernst & Young, S.L.

### **20.4.3 Where financial data in the registration document is not extracted from the issuer's audited financial statements, state the source of the data and state that the data is unaudited**

With the exception of the information taken from the consolidated financial statements and annual accounts referred to in section 0 above in this Registration Document, and the others in which the source is expressly stated, the other data and information contained in this Prospectus were taken from the internal accounting and the management information system of IBERDROLA RENOVABLES.

## 20.5 Age of latest financial information

This Prospectus includes audited financial information regarding the fiscal year closed 31 December 2006, therefore not more than 18 months prior to the date of approval thereof.

This Prospectus also includes unaudited interim financial statements for the period of nine months ended 30 September 2007 that were subject to limited review, therefore not more than 15 months prior to the date of registration of this Prospectus.

## 20.6 Interim and other financial information

**20.6.1 If the issuer has published quarterly or half yearly financial information since the date of its last audited financial statements, these must be included in the registration document. If the quarterly or half yearly financial information has been reviewed or audited, the audit or review report must also be included. If the quarterly or half yearly financial information is unaudited or has not been reviewed state that fact**

Not applicable.

**20.6.2 If the registration document is dated more than nine months after the end of the last audited financial year, it must contain interim financial information, which may be unaudited (in which case that fact must be stated) covering at least the first six months of the financial year**

Below is the financial information for IBERDROLA RENOVABLES corresponding to the nine-month period ending on 30<sup>th</sup> September 2007, which has been the object of a limited review report by Ernst & Young, S.L.

20.6.2.1. Balance sheets as of 30<sup>th</sup> September 2007 (not audited) and 31<sup>st</sup> December 2006

*Comments on significant variations of the consolidated balance sheet (September 2007 - 2006) not audited*

Goodwill: There is no variation of the goodwill of September 2007 compared with that of September 2006.

Other intangible assets: This heading basically includes the cost of the rights to use facilities and land belonging to third parties, and I.T. applications.

Tangible fixed assets: This heading includes all the renewable energy production and exploitation facilities, mainly wind plants and mini-hydraulic production plants, that are in operation and under construction. The extreme increase is due to the growing investment activity of the Group with an increase of gross assets (without amortisations) generated since September 2006 to September 2007 of 1,215,391 thousands of euros, which results in a positive variation of 27% during this period.

This important investment effort is shown in the installed capacity of the Group, which has risen from 4,076 MW in September 2006 to 4,977 MW in September 2007, with an annual increase of 901 MW produced during this period (see section 8 of this Registration Document).

The assets acquired through financial leasing as of September 2006 as well as of September 2007 amounted to 31,498 thousands of euros.

Shares accounted for by the equity method: Both September 2006 and 2007 includes the value of the share in the capital of 8% of subsidiary company Sotavento Galicia, S.A.

Other long-term financial investments: The breakdown of this heading is as follows:

(In thousands of euros except percentages)	30 <sup>th</sup> September 2007 (not audited)	30 <sup>th</sup> September 2006 (not audited)	% Var
Advance payments for purchases of shares in other companies	10,660	25,794	-58.7%
Term deposits	31,251	3,872	-
Other Credits	11,069	17,415	-36.4%
Total	52,980	47,081	+12.5%

In September 2006 and 2007 advance payments were collected to purchase shares in other companies by agreements made by the Company with the gamesa Group, for the amounts of 25,794 and 10,660 thousands of euros, respectively, to purchase from that Group the shares of several companies owning future wind generation plants in Andalusia, Portugal, Greece and Italy. The 58.7% reduction from September 2006 to September 2007 is due to some of the wind generation plants having already been acquired at the end of September 2007. The amount of other loans granted to third

parties in September 2006 and September 2007 add up to 17,415 and 11,069 thousands of euros, respectively.

In September 2006 and 2007 a balance of 3,872 and 31,251 thousands of euros is included, respectively, for term deposits. In September 2007 these deposits are contributed to the consolidated one, mainly, from the USA subsidiary for the amount of 16,068 thousands of euros and 11,139 thousands of euros from a Spanish thermosolar subsidiary.

Deferred Tax Credit: this heading includes the tax credits arising from the elimination of the margins for intercompany transactions in the construction and sale of wind plants, and the tax credits for negative taxable income.

Commercial debtors and other current accounts receivable: The breakdown of this heading is as follows:

(In thousands of euros; except percentages)	30 <sup>th</sup> September 2007 (not audited)	30 <sup>th</sup> September 2006 (not audited)	% Var.
Clients	77,490	84,773	-8.6%
Debtors	16,965	47,173	-64.0%
Linked companies			
- Iberdrola, S.A.	38	1,877	-98.0%
- Iberdrola Generación, S.A.		42,468	-100.0%
- Iberdrola Distribución, S.A.	38,159	29,891	+27.7%
- Gamesa Group	-	(1,750)	-100.0%
- Iberdrola Ingeniería y Construcción, S.A.U.	-	7	-100.0%
	132,652	204,439	-35.1%

Clients: This heading mainly contains the balances receivable from national and Greek electricity distributors.

Linked companies: The decrease in the debt with the parent company Iberdrola, S.A., is the result of the movement of the current financing account that the companies of the IBERDROLA RENOVABLES GROUP have with the parent company Iberdrola, S.A. (explained in section 10.1 and 20.1.1 of this Document). During 2006, Iberdrola Generación, S.A. (Unipersonal) has stopped carrying out the function of an agent of IBERDROLA RENOVABLES for the realisation of energy offers before the Electricity Market Operator ("OMEL") both for the special regime and the ordinary brokerage for the sale of energy under a special regime, due to which September 2007 does not include the balance of this company.

Other current financial investments: this heading basically includes the amount of advance payments and credits handed to linked entities and other third parties.

Current Public Authorities: The breakdown is as follows:

(in thousands of euros except the percentages)	30 September 2007 (not audited)	30 September 2007 (not audited)	Var %
Income Tax, VAT debt	110,858	78,790	+40.7%
Income Tax, debt from different items	51,015	55,081	-7.4%
	161,873	133,871	+20.9%

Cash and other equivalent assets: details as follows:

(in thousands of euros except the percentages)	30 September 2007 (not audited)	30 September 2007 (not audited)	Var %
Cash and liquid assets	51,737	21,937	+135.8%
Short term deposits	69,922	72,565	-3.6%
	121,659	94,502	+28.7%

The liquidity increase in September 2007 is mainly due to the increase in the international companies. The deposits originated from syndicated loan reserve funds obtained by the Group.

Deferred income: The breakdown in this section is as follows:

(in thousands of euros except the percentages)	30 September 2007 (not audited)	30 September 2007 (not audited)	Var %
Capital funding	47,262	45,181	+4.6%
Other income to distribute over various periods	73,861	63,404	+16.5%
	121,123	108,585	+11.5%

Funding for registered capital for September 2006 and 2007 are mainly provided by the Greek subgroup Rokas. The most significant additions from September 2006 to September 2007 under the heading "Other income to distribute over various periods" correspond to the income received from the agreement signed in previous years by the affiliate company Iberdrola Energías Renovables de Castilla La Mancha, S.A. Unipersonal with different wind plants for the transfer of use of specific facilities connected to the electric system network, allowing a joint evacuation of the generated electricity.

Other provisions: In the 2005 accounting period the Greek subgroup Rokas gave a provision for the amount of 21,900 thousand euros for electricity, pursuant to Greek regulations. At the end of the 2006 period, this provision was reaffirmed, having provided remuneration for the amount of 19,362 thousand euros paying under the heading of Property, plant and equipment of the Consolidated Balance Sheet of 31 December 2006.

The Group maintains other provisions to face other responsibilities originating from other current litigation and from indemnizations, as well as from obligations and different types of guarantees.

20.6.2.2. Consolidated non-audited profit and loss account from 30 September 2006 to 30 September 2007.

(in thousands of euros except the percentages)	30 September 2007 (not audited)	30 September 2007 (not audited)	Var %
Net business amount	494,402	514,417	-3.9%
Income	494,402	514,417	-3.9%
Personnel expenses	(41,511)	(24,949)	+66.4%
Activated personnel expenses	6,142	6,094	+0.8%
Outside services	(107,273)	(86,477)	+24.0%
Other operations income	12,731	6,838	+86.2%
Net operative expense	(129,911)	(98,494)	+31.9%
Taxes	(6,604)	(5,531)	+19.4%
EBITDA	357,887	410,392	-12.8%
Depreciations and allowances	(157,317)	(137,568)	+14.4%
CONSOLIDATED OPERATIONS PROFIT	200,570	272,824	-26.5%
Company results by type of participation	(581)	(23)	+2406.0%
Income	9,033	25,417	-64.5%
Expenditure	(117,562)	(69,668)	+68.7%
Non-current asset disposal profit	0	0	--
Non-current asset disposal loss	0	0	--
CONSOLIDATED BEFORE TAX PROFIT	91,460	228,550	-60.0%
Corporate tax	(35,929)	(74,406)	-51.7%
CONSOLIDATED NET PROFIT FOR THE PERIOD	55,531	154,144	-64.0%
Minority shareholders	(6,792)	(10,120)	-32.9%
PROFIT ATTRIBUTED TO THE DOMINANT COMPANY	48,739	144,024	-66.2%

*Comments on the significant variations of the consolidated non-audited profit and loss accounts (September 2007 – 2006)*

**Income:** The business turnover for Grupo IBERDROLA RENOVABLES has decreased to 494,402 thousand euros, which means a decrease of 3.9% with respect to 30 September of the previous period. This reduction is a result of a decrease in wind energy income from 480.9 million euros in September 2006 to 3 million euros in September 2007. Likewise, there was a decrease in minhydraulic income from 33.4 million euros in September 2006 to 25 million euros in the same period.

**Personnel expenses:** The change is due to the increase in the average staff of the Group, which has increased from 686 employees in September 2006 to 845 in September 2007, which is a result of the increase in the investment process in the renewable facilities and international expansion.

Given that a significant part of the facilities has been developed with in-house personnel, the activation of its cost has increased more than any other value during the construction phase.

**Exterior services:** this section is broken down as follows:

(in thousands of euros except the percentages)	30 September 2007 (not audited)	30 September 2007 (not audited)	Var %
Operations and maintenance	43,392	35,786	21.25%
Fees	10,139	10,641	-4.7%
Insurance	5,992	5,280	13.48%
Promotion costs	15,468	10,457	47.92%
Other expenses	32,282	24,314	32.77%
	107,273	86,477	24.05%

The increase in the main direct operation expenses for the facilities (operation and maintenance, fees and insurance) reflects the increase in Spain of greater operations and maintenance costs and greater volume in wind facilities, the latter of which is added because the warranty periods are almost over.

**Other operations income:** The increase of 86.2% is mainly due to the income obtained by transfer of use of national installation and due to net income from other activities not directly related to renewable energies, such as the construction of metal structures by the Greek affiliate Rokas (in the 2005 accounting period this was globally consolidated after the last quarter of the 2006 accounting period and is completely included therein) and the marketing of the affiliate Community Energy Inc. (acquired in the 2006 accounting period) green certificates.

**Taxes:** The increase is due to the greater number of facilities that must pay direct taxes and local fees.

Depreciations and allowances: the positive change reflects the operations assets during the period.

Income: the most significant negative change occurred in the 2007 accounting period, due to a decrease of 16,384 thousand euros (-64.5%) due to payments related to non-coverage.

Expenditure: increase 68.7% mainly due to an increase in debt for financing the increase in the Company facility capacity.

20.6.2.3. Statement of consolidated cash flow on 30 September 2006 and 2007, using NIIF criteria.

The following table summarises the status of cash flow for the nine month periods ending on 30 September 2006 and 2007:

(in thousands of euros except the percentages)	30 September 2007 (not audited)	30 September 2007 (not audited)	Var %
<b>Cash flow by operations activity (I)</b>			
Period income	55,531	154,144	-63.97%
Adjustments by			0.00%

10.01.1. What follows is a narrative description of the state and variations in cash flows shown in the above table as of 30 September 2006 and 30 September 2007:

10.01.2. *Net cash flows from operations*

Financing received by Iberdrola, S.A. is recorded as short-term debt on the company balance sheet and any variation in financing given by Iberdrola, S.A. affects cash flows from operational activities of the company. Without taking into account the variation in working capital, short-term financing received from Iberdrola or the effects of changes in either the method or perimeter of consolidation, cash flows from operations would be as follows:

(In thousands of euros)	30 September 2007 (unaudited)	30 September 2006 (unaudited)
Cash flows from operations	706,912	348,562
Short-term financing from Iberdrola, S.A.	(616,654)	(100,775)
Effect on working capital owing to changes in either the method or perimeter of consolidation	268,155	114,147
Adjusted cash flow from operations:	358,413	361,934
Variation in commercial payables and other payable accounts, excluding short-term financing from Iberdrola	114,610	(29,139)

As of 30 September 2007, the company had generated cash flows of 706.9 million euros from its operations, compared to 348.6 million euros generated as of 30 September 2006, which is a decrease of 358.3 million euros, that is, a decrease of 102.8%.

If we exclude the effect of short-term financing from the parent company Iberdrola, S.A. and the effect on working capital owing to variations in either the method or the perimeter of consolidation, the cash flow from operations was 358.4 million euros as of 30 September 2007, compared to 361.9 million euros as of 30 September 2006. This decrease is due mainly to the following:

An increase of 114.6 million euros in flows from commercial creditors, excluding the financing from Iberdrola as of 30 September 2007, compared with a negative flow of 29.1 million euros as of 30 September 2006, owing to an increase in debts with suppliers of proprietary equipment, machinery and tools.

A decrease in the adjusted earnings from operations from 322.0 million euros in the period of nine months ending on 30 September 2007 to 336.0 million euros in the nine-month period ending on 30 September 2006;

A decrease of 31.8 million euros resulting from a variation in commercial receivables in the period ending on 30 September 2007, compared to a positive flow of 26.8 million euros in the period ending on 30 September 2006 as a result of the reduction of receivables due to the lower business volume in 2007; and

A reduction of 28.6 million Euros from the variation in non-current creditors and other accounts receivable in the period of September 30, 2007, compared to the positive flow

of 16.4 million Euros in the period of September 30, 2006, due to a reduction in the net balances of liabilities for non-current taxes.

The breakdown of the Variation in trade creditors and other accounts payable heading, showing the variation in the short-term financing of the holding company Iberdrola, S.A., is as follows:

(In thousands of Euros)	September 30 2007 (unaudited)	September 30 2006 (unaudited)
Variation in trade creditors and other accounts payable		
External creditors	114,610	(29,139)
Short-term financial debt with Iberdrola, S.A.	616,654	100,775
<b>Total</b>	<b>731,264</b>	<b>71,636</b>

*Net cash flow by investment activities*

Period ending at September 30, 2007

At September 30, 2007, the Company has spent 616.2 million Euros on investment activities, including: (i) 609.0 million Euros for the acquisition of material fixed assets, that is to say, machinery and installations, related to the construction and installation of wind farms in Spain, the United States of America and the rest of the world, and also related to the construction and installation of mini-hydraulic plants in Spain; (ii) 11.1 million Euros in non-current financial assets, fundamentally due to an increase in term and short-term deposits; (iii) 2.5 million Euros in the acquisition of intangible assets, fundamentally rights of use of electrical installations and technical software; and 14.3 million Euros for a reduction in the advance payments made for the acquisition of companies and assets.

Period ending at September 30, 2006

At September 30, 2006 the Company had spent 407.3 million Euros on investment activities, including: (i) 375.6 million Euros for the acquisition of material fixed assets, that is to say, machinery and installations related to the construction and installation of wind farms in Spain and the rest of the world, and also related to the construction and installation of mini-hydraulic plants in Spain; (ii) 26.8 million Euros in current and non-current financial assets, fundamentally due to the increase in term and short-term deposits; and (iii) 7.0 million Euros in the acquisition of intangible assets, fundamentally rights of use of electrical lines and sub-stations.

*Net cash flows by financing activities*

In addition to external financing, this section includes the cash flows for long term financing activities amongst Group companies, particularly the financing from the sole member of Iberdrola Renovables, Iberdrola, S.A., which amounts to 377.1 million Euros at September 30, 2007.

#### Period ending 30 september 2007

As of 30 september 2007 the Company has used cash flows for financing activities in the amount of 91.8 million euros. During the period some cash flows have been produced due to (i) new loans obtained from financial entities in the amount of 83.7 million euros for the construction of electric energy generation plants (ii) positive variation of the current financial debts (iii) flows from payments of subsidies received principal from the Greek subsidiary Alogarachi, S.A. Said positive flows have been offset by some outflows of 113.4 million euros for the payment of interests and an outflow of 97.1 million euros for the payment of dividends to Iberdrola, S.A.

#### Period ending 30 September 2006

As of 30 september 2006 the Company has produced cash flows for financing activities in the amount of 91.9 million euros, due principally to (i) 199.7 million euros from new bank loans obtained for the construction of electrical energy generation plans (ii) an item of deferred revenue of 22.2 million euros from payments made by various promoters of wind farms by virtue of the agreements reached in previous years between the subsidiary Iberdrola Renovables de Castilla-La Mancha S.A.U. and said wind promoters for the construction and use of electrical lines. Said positive flows have been offset by outflows of 26.2 million euros for debt payments, an outflow of 66.1 million euros for interest payments on the debt and an outflow of 36.0 million euros for the payment of dividends to Iberdrola, S.A.

#### 20.6.2.3. Variations in Net Equito as of 30 september 2006 and 2007 under the IRFI criteria.

The variations in Net Patrimony as of 30 september 2006 and 2007 under the IRFI are set forth below:

Thousands of euros											
	Subscribed share capital	Issuance Premiums	Reserve for the revaluation of assets and liabilities not realized	Reserves in consolidated companies by global or proportional integration	Other Reserves				Total		
					Reserves in companies put in equivalence	Legal Reserves	Voluntary reserves	Conversion differences		Net Results of the period	Minority Interests

*Comments on significant variation of the consolidated state of changes in net equito  
(September 2007-September 2006)*

Reserve for the revaluation of unrealized assets and liabilities. The movement produced in this reserve adheres to the valuations of the derivatives designated as coverage of cash flows. .

As a consequence of the acquisition of an additional percentage in the dependent company C. Rokas S.A. during the first quarter of 2007 the Group has decided to register the difference between the amount paid for the purchase of that percentage of participation and the amount of minority interests as a transaction between shares, reducing said amount of Other reserves by an amount of 27,473 thousand euros.

## 20.7 Dividend policy

### 20.7.1 Amount of dividends per share for each fiscal year for the period covered by the historical financial information, adjusted to maintain comparability if the number of shares of the issuer has changed

The Company proposes to pay, as from the year beginning 1 January 2008, a dividend of between 20% and 25% of consolidated net profit attributable to the parent company in each year. Fulfilment of this aim is subject to periodic reviews of policy based on the progress of IBERDROLA RENOVABLES group's business, its growth strategy and the associated financing needs. In any event, the payment of dividends is subject to the approval of the specific dividend resolutions by the Board of Directors and the Company's shareholders at the Shareholders Meeting.

## 20.8 Legal and arbitration proceedings

There are and have been, over the 12 months preceding the publication date of this Prospectus, no governmental, legal, judicial or arbitral proceedings (including those in progress or pending resolution and those known to the Issuer that affect IBERDROLA RENOVABLES or the companies in the IBERDROLA RENOVABLES Group) that in the recent past have had or may have significant effects on the Company, its business and/or the financial status or return of the IBERDROLA RENOVABLES Group.

Without prejudice to the foregoing, some of the companies in which IBERDROLA RENOVABLES has interests are involved in certain judicial and extrajudicial disputes within the ordinary course of their businesses, which may include any disputes with suppliers, customers, administrative authorities including the tax authorities, individuals, environmental activists or employees. Among them the most significant are as briefly described in the following section:

The financial amount of all ongoing proceedings for specific value known by the Company amounts approximately to 592.6 million euros, of which approximately 490.75 million euros would be covered by the indemnity contract signed by Iberdrola, S.A. and IBERDROLA RENOVABLES, as described in section IV.19.4 of this Prospectus. However, a majority of the lawsuits involving the Company are for an

undetermined amount. Therefore, the above figure is not indicative of the theoretical maximum risk exposure associated to lawsuits involving the Company if the judgments rendered in all of them find against the Company.

- Proceedings concerning regulatory and tax matters

1. On 15 November 2004 the Regional Customs and Excise Tax Auditors of Castilla-La Mancha issued an audit report on Energías Eólicas Europeas, S.A. (currently named Iberdrola Energías Renovables de Castilla-La Mancha, S.A. Unipersonal) regarding the Electricity Excise Tax for the 2000 to 2003 periods, imposing a tax on all production of the wind farms for the term they did not have a Business and Establishment Number (Código de Actividad y Establecimiento - CAE). The audit result was 10,282,048.95 euros of tax and 1,589,045.59 euros of default interest, with no sanction being imposed for the conduct of the taxpayer. During the period of time to which the inspection refers (until 11 March 2003) the Company was owner of 66.7% of the shares representing the capital of Iberdrola Energías Renovables de Castilla-La Mancha, S.A. Unipersonal, corresponding to 66.7% of the risk of tax procedures.

The resolution of the Head of the Regional Customs and Excise Tax Office of Castilla-La Mancha dated 29 December 2004, notified on 5 January 2005, confirmed the proposed imposition of the tax. Thereafter an economic and administrative claim in a single instance was filed before the Central Administrative Economic Court, which was rejected by resolution of that court of 28 June 2006. On 25 September 2006 an appeal was filed with the National Audience, and on 27 September 2006 in separate proceedings suspension of the administrative act was requested.

On 11 December 2006 the National Audience ordered suspension of the effect of the challenged act. Currently the appeal filed with the National Audience is pending resolution. If it is rejected, it would be appropriate to file an appeal for nullity with the Supreme Court.

The tax amount increases 10,282,049 euros and the default interest accrued to date, approximately 3,000,000 euros, to the extent of the 66.7% that would have to be assumed as an expense of IBERDROLA RENOVABLES if the appeal were lost, are provisioned for accounting purposes within Iberdrola, S.A. Also, 8,109,000 euros have been reserved by Iberdrola Energías Renovables de Castilla La Mancha S.A. Unipersona to cover its tax risk.

2. In February 2002 the California Public Utilities Commission ("CPUC") in the United States of America and the California Energy Oversight Board ("CEOB") filed an action before the FERC against PPM regarding the agreement signed by PPM and the California Department of Water Resources ("CDWR") alleging that tariffs charged under these contracts were unjust and unreasonable. CPUC and CEOB filed similar actions against other persons that were parties to long-term agreements with CDWR. FERC rejected the claim against PPM on 23 July 2002 and issued similar denials of the rest of the actions.

CPUC and CEOB appealed these rulings to the United States Court of Appeals for the Ninth Circuit (the "Court"). In December 2006 the Court remanded the case to

the FERC for further proceedings. The FERC has not as yet made any further ruling. Regarding PPM the Court held that the FERC should not have rejected the action against PPM without having first considered whether the energy market continued to be dysfunctional after the FERC established maximum prices for energy in the markets in the western United States.

PPM and other electricity sellers, all of which are also concerned in the proceedings, filed for *certiorari* (a Latin term used to refer to review by a higher court of a judgment issued by a lower court) before the United States (Supreme Court), in order for the Supreme Court to establish whether the FERC was correct in rejecting the claims submitted by CPUC and CEOB and the application of the Mobile Sierra case to the effect that the prices in the agreements may only be revised by the FERC if there is a violation of the public interest.

If the FERC were to rule that the tariffs collected are unjust and unreasonable, the FERC has authority to order reimbursement of the amounts received by PPM. On 25 September 2007 the FERC granted the certiorari sought in two suits similar to that in which PPM is involved.

The Company estimates that it is not possible to quantify at this time the risk arising from the action filed by CPUC and CEOB since up to this time the FERC has not decided whether the disputed price is adjusted or not to the stand of "just and reasonable that this institution considers when determining prices and in the case of an unfavourable resolution, it is impossible to estimate at this time what will be the price that FERC will determine as "just and reasonable" and therefore what will be the amount for the Company to return to the CDWR.

3. In February 2007, the US Internal Revenue Service ("IRS") completed its review of the corporate income tax returns filed by NA General Partnership ("NAGP") - the previous owner of the shares of ScottishPower Holdings, Inc ("SPHI")- and its subsidiaries for the years 2001-2003, disallowing the deductions made for interest payments on inter-company loans within the group used to finance the acquisition of PacifiCorp by Scottish Power plc (now Scottish Power Limited) in 1999.

The federal tax associated with the deductions deemed improper by the IRS amounts to 326.1 million dollars. Up to the present time, no fines or sanctions related to this matter have been imposed.

On 2 March 2007, SPHI appealed to the IRS appeals division and a hearing regarding the matter was opened. Proceedings are expected to last for at least a year. Although SPHI considers that the IRS's view will not prevail, on 2 March 2007, SPHI made a deposit of 225,000,000 dollars. Likewise the provision made to cover the tax risk increases to 507 million dollars. Iberdrola, S.A. has undertaken to indemnify the Company for possible contingencies arising from this litigation by virtue of an indemnity contract described in section IV.19.4 of this Leaflet.

- Proceedings related to the Company's facilities

1. On 19 May 2005, PPM Energy Inc (an affiliate of IBERDROLA RENOVABLES) and its subsidiary Shiloh I Wind Project, LLC ("Shiloh")

acquired property rights for land of enXco, Inc. ("enXco") for construction of the Shiloh I wind project in the USA. The sale agreement implementing the acquisition included an explicit statement by enXco that there was a subeasement on the property.

In June 2006, Green Ridge Power LLC, a subsidiary of Florida Power & Light Company ("FPCL") and holder of the master easement sent enXco a letter alleging that the easement granted by enXco in favour of PPM and Shiloh was invalid and ordering the enXco withdraw the wind facilities and the PPM collection system (a system of pipes and other installations) from the land. In the event of these claims by FPCL being upheld, the company would be obliged to move the turbines and pipes from its Shiloh I Wind project with a rated capacity of 108 MW, to a new site where it would not be able to produce that output and would also incur considerable removal costs.

FPCL and enXco have entered negotiations, while Green Ridge Power LLC has filed no claim. In any event, PPM has presented a claim for indemnification against enXco, has taken out a 231 millin euros insurance policy and has given notice of these circumstances to its insurance company.

2. In July 2006, Ice Brothers, Inc. and Southwest Royalties, Inc. filed a claim before the Pecos county court (Texas, USA) against the indirect subsidiaries of IBERDROLA RENOVABLES, Enstor Operating Company, Enstor Waha Storage and Transportation, L.P. and Enstor, Inc. (together "Enstor Waha"). The claim accused Enstor Waha of negligence, invasion of property, causing damage and illegal appropriation of property, on the grounds that the activities of Enstor Waha's natural gas storage facilities were interfering with the output of local natural gas wells. In this case, the plaintiffs are seeking precautionary measures and an undetermined amount of compensation.

In a separate but related case, on 13 September 2006, Ice Brothers, Inc., Durango Resources Corporation y Pitts Energy Corporation filed a claim in similar terms to that above, with the Texas Railroad Commission, regarding the brine injection process sued by Enstor Waha to develop gas storage caves in the Waha project. In this case, the plaintiffs have asked the Texas Railroad Commission to revoke Enstor Waha's license to carry out brine injections.

Also, in June 2007, Durango Resources Corporation filed a complaint against Enstor Waha and PPM before a Texas court (in Reeves county) for negligence, invasion of property, causing damage, and illegal appropriation of property on similar grounds to those alleged by Ice Brothers, Inc and Southwest Royalties, Inc. In this case, the plaintiffs are seeking undetermined compensation.

The case brought by Ice Brothers, Inc. and Southwest Royalties, Inc. was voluntarily suspended pending field studies which are now under way, negotiations and the result of the Texas Railroad Commission case. Notwithstanding the above, on 10 October 2007, the plaintiffs in this case submitted an extension of their initial claim, adding, as grounds for their action, negligence per se (i.e. consideration of an act as illegal because it violates a public standard) and fraud through constructive trust. This is a form of fraud that arises when a person illegally takes possession of a good, in which case he is deemed to

be the trustee of this good on behalf of the rightful owner. As a result, based on the scope of their claims, the plaintiffs are seeking 54 million US dollars in compensation and extending their claim to include PPM as well as Waha.

The case launched by Durango Resources Corporation has not been suspended but at the date of this Prospectus little action has been taken as the parties await the outcome of negotiations and the Texas Railroad Commission case.

The amount provisioned to cover the risk arising from this case is three million dollars.

3. On 17 July 2006, Sinergia Andaluza, S.L. appealed to the High Court of Andalusia, against administrative resolutions authorizing and approving the wind farm projects "Dólar Uno", "EME Dólar Tres", "EME Ferreira" and "EME Hueneja" (owned by Iberdrola Energías Renovables de Andalucía, S.A. Unipersonal). They allege that installed capacity exceeds the permitted maximum, with the wind farm owners called as co-defendants in response to an order issued by the Council for Innovation, Science and Business of the Junta of Andalusia.

The capacity at issue is 198 MW which represents the combined capacity of each of the wind farms concerned, in accordance with the data filed for each wind farm in the Register of Generating Facilities Belonging to the Special System, kept by the Minister of Industry, Tourism and Commerce.

4. In Greece, a number of plaintiffs (including landowners' associations) have challenged the installation and construction permits granted for a 44.2 MW wind farm in the municipalities of Akarifnia and Opountii owned by Rokas Aeoliki Komito, S.A. (a company 98.96% owned by C. Rokas, S.A.). As a result of the complaint, in March 2006 the Greek Higher Administrative Court suspended construction work on this wind farm as a precautionary measure.

If the court finally rules against Rokas, the wind farm concerned could not be built under the currently granted permits. To mitigate this risk the company has begun procedures to obtain new licenses.

- Other proceedings

Currently SPHI has a dispute with MidAmerican Energy Holdings Company ("MidAmerican"), the company that acquired PacifiCorp from Scottish Power, Plc (now, Scottish Power Limited) in 2006. Various differences related to tax indemnifications have arisen under the purchase and sale agreement with PacifiCorp. The differences relate, inter alia, to calculation of deferred income, carryforwards of tax losses and the sharing of tax refunds. Notwithstanding the foregoing, no formal actions have been filed against SPHI, nor is it possible to determine either whether MidAmerica will eventually sue or for what amount. Iberdrola, S.A. has undertaken to compensate the company from the liabilities arising from this claim under indemnity contract described in section IV.19.4 of this Prospectus.

None of the actions described in Section 20.8 have been provisioned by IBERDROLA RENOVABLES except where explicitly stated otherwise.

## 20.9 Significant change in the issuer's financial or trading position

Since the closing date of the last audited fiscal year there has been no significant change in the financial or trading position of IBERDROLA RENOVABLES. Nor have there been other significant events in the life of the Company, except as described above or referenced in this Prospectus.

## 21. ADDITIONAL INFORMATION

### 21.1 Capital

#### 21.1.1 Amount of issued capital, for each class of capital:

The nominal amount of the Company's capital issued as of the date of this Prospectus amounts to one thousand six hundred and eighty-nine million, six hundred and twenty-five thousand, nine hundred and sixty (1,689,625,960) euros, represented by three thousand three hundred and sixty-nine million, two hundred and fifty-one thousand, nine hundred and twenty (3,379,251,920) shares of fifty cents (0.50) of a euro par value each, consecutively numbered from one (1) to three thousand three hundred and seventy-nine million, two hundred and fifty-one thousand, nine hundred and twenty (3,379,251,920) both inclusive, all of a single class and series, fully subscribed and paid in, represented by book entries.

#### a) number of authorised shares

As provided in sections III.4.6 and III.5.1 of the Share Securities Note, on 5 November 2007, the sole shareholder of IBERDROLA RENOVABLES, as a complementary matter necessary in the context of the application for admission to trading of the Company's shares, decided to undertake a Public Offer for Subscription of shares of the Company, to be carried out prior to admission of the Company's shares to trading on the stock exchanges, authorising the Board of Directors of the company as per article 153.1.a) of the Corporations Act, to decide on the date for increasing the Company's share capital and the other measures contained therein.

In this regard, and by virtue of that authorisation, the Company's Board of Directors at its meeting held last 14 November 2007, decided to authorise various different persons to carry out said increase in the share capital.

Without prejudice to those resolutions, the sole shareholder, by decision adopted on 5 November 2007 also resolved to delegate to the Company's Board of Directors the authority, within the limits and subject to the requirements established in the Corporations Act, to increase share capital a single time in full or in several partial steps, at any time, within a term of five years after the date of adoption of that resolution, the maximum nominal amount by which the share capital could be increased under this delegation being one half of the share capital of the Company on the date of the resolution, that is one thousand six hundred and eighty-nine million, six hundred and twenty-five thousand nine hundred and sixty (1,689,625,960) euros.

#### b) number of shares issued and fully paid in, and number of shares issued but not fully paid in

All of the issued shares are fully subscribed and paid in.

c) par value per share, or indication that the shares have no par value

All shares into which the capital of the Company is divided have a par value of fifty cents (0.50) of a euro each.

21.1.2 If there are shares not representing capital, state the number and main characteristics of such shares

There are no shares not representing capital of the Company.

21.1.3 The number, book value and face value of shares in the issuer held by or on behalf of the issuer itself or by subsidiaries of the issuer

At the date of this Prospectus, the Company does not hold treasury shares, either directly or through subsidiary companies.

21.1.4 Amount of all convertible securities, exchangeable securities or securities subject to warrants, indicating the conditions and procedures governing conversion, exchange or subscription

At the date of this Prospectus, the Company has not issued and there are no securities exchangeable for or convertible into shares or warrants.

21.1.5 Information about and terms of any acquisition rights and or obligations over authorised but unissued capital or an undertaking to increase the capital

Accept for the terms of section 21.1.1 of the Registration Document and the sections III.5.1 and III.5.2.5 of the Note on the Shares of this Prospectus with respect to the Public Offering, as at the date of this Prospectus there are no acquisition rights or obligations regarding the authorised but not issued share capital or regarding the decision to increase said share capital.

21.1.6 Information on any share capital of any company belonging to the Group that is under option or on which any conditional or unconditional agreement has been reached to submit it to an option and details of any such option, including the persons in whose favour such options exist.

At the date of this Prospectus, no member of the group has capital which is under option or agreed conditionally or unconditionally to be put under option, except as indicated below:

By virtue of the provisions of the cooperation agreement for La Rioja, executed on September 2005 among IBERDROLA RENOVABLES and the minority shareholders of Iberdrola Energías Renovables de La Rioja, S.A. ("Iberioja", a subsidiary of IBERDROLA RENOVABLES), the Company has, on the conditions contemplated in the agreement, granted an option to those minority shareholders to sell their shares in Iberioja, representing 36.45% of the total share capital of Iberioja.

In this regard, the Company has assumed a firm and irrevocable commitment to acquire or cause a third party to acquire all of the shares of Iberioja owned by the minority shareholders if they exercise the sale option before 31 December 2015. The sale option will be exercised by purchase and sale with cash payment or, at

the choice of the minority shareholders and one year from the time at which the sales are listed for trading on the stockmarkets, in shares of IBERDROLA RENOVABLES. The value of the shares of Iberioja will be agreed by the parties or, in the absence of agreement, will be set by a commercial bank of international reputation appointed by mutual agreement (or, in the absence thereof, by the senior member of the Madrid Bar Association), from among those suggested by each party. Also, in the event of an exchange, the shares of IBERDROLA RENOVABLES will be valued at the average weighted trading price in the three calendar months prior to notification by the minority shareholders of their choice to be paid in shares. At the date of preparation of this Prospectus, the sale option described above had not been exercised.

- In accordance with the provisions of the strategic agreement signed between Rokas and Dy & Sons Aeoliki Ltd. ("DS") on 6 April 2006, DS is entitled to acquire an interest not less than 5% or greater than 25% in the Rokas subsidiary for Cyprus, Rokas Aeoliki Cyprus Ltd, a company which has a project portfolio of approximately 150 MW, of which 80 MW already have generating permits, though are not yet operational. For the remaining 70 MW application for generating permits have been made. This right may be exercised by DS until the first of the following dates: (i) three years after signature of the strategic agreement and (ii) when Rokas Aeoliki Cyprus Ltd., has approved its first investment consisting of construction of a wind farm in Cyprus. As regards the price or exercise of the right to acquire the interest, the price will be set at the par value of the shares acquired. As of the date of preparation of this prospectus, the acquisition right described in this section had not been exercised.
- PPM (a company indirectly wholly-owned by IBERDROLA RENOVABLES) acquired all the shares in Deerfield Wind, L.L.C. previously owned by enXco, Inc, which, as consideration for the above, was paid an initial price for the sale. In addition, enXco, Inc, is entitled to receive a further sum when the competent authorities issue a Special Use Permit for the construction of a renewable energy project.

If, at 31 July 2008, this additional payment has not been made, enXco, Inc. can exercise a call option on the shares of Deerfield Wind, L.L.C. acquired by PPM. the term for exercise of this option runs form 31 July 2008 to 30 September 2008. The option had not been exercised as of the date of preparation of this Prospectus. The exercise price would be 250,000 US dollars plus the amount of certain expenses met by PPM. At the time of preparation of this Prospectus, these expenses amounted to 1.2 million US dollars and could increase -thereby having an impact on the exercise price- until the day the option is exercised.

- On 9 July 1999, Energías Eólicas de Cuenca, S.A. and its shareholders - which included Energías Eólicas Manchegas, S.A. and Energías Eólicas Europeas, S.A. (now Iberdrola Energías Renovables de Castilla - La Mancha, S.A. Unipersonal)- made an agreement regardign their investment in Energías Eólicas de Cuenca, S.A.

Subsequently, on 29 March 2000, Energías Eólicas Manchegas, S.A. and Energías Eólicas Europeas, S.A. (now Iberdrola Energías Renovables de Castilla-La Mancha, S.A. Unipersonal) signed an additional agreement that, among other

matters, regulated the right of each to compel the other to buy or sell their stake in the share capital of Energías Eólicas de Cuenca, S.A., a company which has 132 MW, of which 38 MW are operating, 50 MW are under construction and 44 MW under development.

If one of the parties wishes to exercise this right, it must make the other an offer to buy out its shares, indicating the price and other terms of the offer. The counterparty can then either: (i) sell the shares at the price and terms offered or (ii) oblige the bidder to sell all their shares in Energías Eólicas de Cuenca, S.A. at the same price per share as in their own offer. At the date of preparation of this Prospectus, neither Energías Eólicas Manchegas, S.A. nor Energías Eólicas Europeas, S.A. (now, Iberdrola Energías Renovables de Castilla - La Mancha, S.A. Unipersonal) had exercised the rights described in this paragraph.

- The agreement of 30 March 2007, signed between the Company and Api Holding S.p.A., for the purpose of developing a strategic alliance in Italy, contemplated that the investment of both companies would be channelled through Societa Energie Rinnovabili S.p.A., of which IBERDROLA RENOVABLES owns 49.9% through Iberdrola Energie Rinnovabili S.p.A.

In implementing this agreement, the parties agreed that, under certain circumstances -including (i) any transaction or event by which IBERDROLA RENOVABLES or Api Holding S.p.A. (which owns the other 50.1% of Societa Energie Rinnovabili S.p.A.) should lose control of Iberdrola Energie Rinnovabili S.p.A. or Api Nova Energia S.p.A. (subsidiary of Api Holding S.p.A.), respectively, (ii) a change of control of IBERDROLA RENOVABLES or Api Holding S.p.A. where the new controlling company was a competitor of the other party or (iii) a paralysation of the management body of Societa Energie Rinnovabili S.p.A. or any of its subsidiaries due to the actions of one or other of the parties- the other party would have the right to acquire from the counterparty's shares in Societa Energie Rinnovabili S.p.A. (and also in any of its subsidiaries).

The price at which this right could be exercised would be equivalent to the 50% of the fair price of Societa Energie Rinnovabili S.p.A.'s shares plus the nominal value of any loans made to the company by the shareholder obliged to sell their shares. In the event of disagreement between the parties as to the fair value of Societa Energie Rinnovabili S.p.A.'s shares, the value will be assessed by an independent appraiser.

The agreement remains in force for 20 years from 23 October 2007. At the date of preparation of this Prospectus, none of the circumstances that would allow either of the parties to exercise the rights described in this section has occurred.

Societa Energie Rinnovabili S.p.A. and Societa Energie Rinnovabili I S.p.A., both participated in by the Company at 49.9% through Iberdrola Energie Rinnovabili S.p.A., are owners of 21.15 MW and 130.05 MR under development and 112.85 MW and 84.20 MW in construction.

In accordance with the provisions of the agreement of shareholders of Coldham Windfarm Limited ("Coldham") dated 29 September 2004, signed by Coldham, Co-operative Group Limited ("CWS") and ScottishPower UK Holdings Limited, the latter

has given CWS an option to sell shares of Coldham owned by CWS. The option may be exercised by CWS at any time once three years have passed after signature of the shareholders agreement, that is, starting 29 September 2007. The transfer of the Coldham shares subject to the option will be at market value, this being as agreed by the parties. In the absence of agreement, it will be the price determined by the independent expert appointed by mutual agreement or, if applicable, the price specified by the chairman of the Institute of Chartered Accountants in England and Wales.

As a result of the transfer of Coldham shares by ScottishPower UK Holdings Limited to ScottishPower Renewable Energy Limited, a company incorporated within the scope of consolidation of IBERDROLA RENOVABLES as part of the Restructuring Operation, ScottishPower Renewable Energy Limited became party to the abovementioned shareholders' agreement, taking over Scottish Power UK Holdings Limited's part in the terms of the agreement and hence in the sale option described above. At the date of preparation of this Prospectus, the sale option described in this section had not been exercised.

Furthermore, the foregoing is without prejudice to what is stated in section 21.1.1 of the Registration Document and in sections 5.1 and 5.2.5 of the Share Securities Note in this Prospectus regarding the green shoe option.

21.1.7 A history of share capital, highlighting information about any changes, for the period covered by the historical financial information

The history of capital over the period covered by the historical financial information is as follows:

Date	Amount (€)	Premium (€)	Owners
3 October 2007	1,335,399,560	3,443,995,465.24	Iberdrola, S.A.
5 November 2007	189,625,960	489,045,348.92	Iberdrola, S.A.

Prior to 3 October 2007, the share capital of the company amounted to 164,600,440 euros.

Subsequently a capital increase was undertaken on 5 November 2007. The sole shareholder of the company agreed to reduce the par value of the shares from ten (10) euros to 50 cents (0.50) of a euro by means of splitting each of the one hundred and sixty-eight million, nine hundred and sixty-two thousand, five hundred and ninety-six (168,962,596) shares outstanding of the share capital in three thousand three hundred and seventy-nine million, two hundred and fifty-one thousand, nine hundred and twenty (3,379,251,920) new shares in apportion of twenty (20) new shares for each old share, thus not changing the amount of the share capital of the company.

In addition, as has been stated in section 21.1.1.a) of this Registration Document, the sole shareholder of the Company, IBERDROLA RENOVABLES decided on 14 November 2007 to increase the share capital of the Company by the amount of four hundred and twenty-two million four hundred and six thousand four hundred and ninety

(422,406,490) euros, by issuing and placing into circulation eight hundred and forty-four million eight hundred and twelve thousand nine hundred and eighty (844,812,980) ordinary shares of fifty cents (0.50) of a euro each, all of the foregoing, as has been stated, so that the shares can be offered to the public as a part of the Public Offer of shares of the Company.

## 21.2 Memorandum and Articles of Association

### 21.2.1 Description of the corporate purposes of the issuer and where the bylaws and formation document may be found

In anticipation of the admission of the Company' a shares to trading on the Spanish stock exchanges, and to adapt the articles and bylaws to the legal requirements and good corporate governance practices of listed companies, the sole shareholder of the Company on 5 November 2007 approved the pertinent amendments of the articles and bylaws.

The corporate purpose of the company is set forth in the second article of its articles and bylaws, which literally provides that:

#### *"Article 2. CORPORATE PURPOSE*

1. *The purpose of the Company is to engage in all kinds of activities, works and services that are a part of or related to the businesses of:*
  - a) *production and marketing of electricity by means of facilities that use renewable energy sources, by way of illustration and not limitation including therein hydro, wind, thermosolar, photovoltaic and biomass production;*
  - b) *production, processing and marketing of biofuels and derivative products; and*
  - c) *planning, engineering, development, construction, operation, maintenance and sale of the facilities covered by sections a and b above, whether owned by it or by third parties, analysis services, engineering studies or energy, environmental, technical and economic consulting related to such kinds of facilities.*
2. *The purpose of the Company also includes participation in all kinds of companies or groups of companies, in Spain and abroad, that are engaged in any kinds of activities, works and services that are a part of or related to the businesses of production or marketing of electricity, natural gas (including storage) or their derivatives, including financial derivatives.*
3. *The Company may engage in the activities, businesses, acts and agreements comprising the corporate purpose, in whole or in part, indirectly through ownership of shares or interests in companies and entities with identical or analogous purposes, both in Spain and abroad.*

4. *The company will not engage in any business for which the laws require satisfaction of specific conditions or requirements, unless it strictly complies therewith.*”

The articles and bylaws, internal regulations and formation document of IBERDROLA RENOVABLES may be found at the places indicated in section 24 below in this Registration Document.

21.2.2 Brief description of any provision of the clauses of the bylaws or internal regulations of the Issuer regarding the members of the administration, management and supervision bodies

#### Bylaws

The articles and bylaws of the Company establish the following significant provisions with respect to the members of the Company's administrative, management and supervisory bodies.

The Company will be governed by a Board of Directors comprised of a minimum of eight and a maximum of fifteen directors, the number of which will be set by the General Shareholders Meeting. The sole shareholder of the Company, on 5 November 2007 set the number of directors at fifteen (15).

The members of the Board of Directors will hold their positions for a term of five (5) years. They may be re-elected one or more times for periods of the same duration.

The articles and bylaws do not require that a director be a shareholder, but do provide that the following cannot be appointed as directors: (i) companies, domestic or foreign, competing with the Company, and their administrators or senior managers (for these purposes competitive companies do not include companies in the Company's group); (ii) persons holding positions as administrators in more than four companies the shares of which are admitted to trading on domestic or foreign stock markets; (iii) persons that, over the two years prior to appointment, held high governmental positions incompatible with the simultaneous performance of functions as a director of a listed company, in accordance with national or regional legislation, or positions of responsibility with the agencies regulating the energy sector, the securities markets or other sectors in which the Company operates; and (iv) persons affected by any other incompatibility or prohibition specified in provisions of a general nature.

The position of Director is compensated, as indicated in section 0 above in this Registration Document.

The Board of Directors may validly meet when at least one half plus one of its members are in attendance, personally or by representative.

Resolutions are adopted by absolute majority of the directors attending the meeting, in person or by representative, except when the resolutions refer to (i) permanent delegation of authority of the Board of Directors to the Delegated Executive Committee or to the Managing Director, if any, the appointment of the directors that are to occupy those positions, in which case in order to be valid they will require the favourable vote of two thirds of the directors or (ii) any amendment of the Board of Directors'

Regulations, in which case, in order to be valid, any resolution will require the favourable vote of two thirds of the directors present or represented. In the event of a tie, the Chairman of the Board will have a casting vote.

As provided in the forty-third article of the articles and bylaws, the directors must resign their positions and formalise their resignations when they become subject to any of the cases of incompatibility or prohibition contemplated by law, and in those cases contemplated in the Board of Directors Regulations as set out below.

#### Board of Directors Regulations

At its meeting held on 5 November 2007 the Board of Directors approved the Board of Directors Regulations, which were made known to the sole shareholder in exercise of the authority of the General Shareholders Meeting on 14 November 2007.

The purpose of the Board of Directors Regulations is to establish the general principles and standards for action of the Company's Board of Directors, specifically regulating its organisation and functioning and the standards for action and conduct of its members, the most important aspects being as follows:

The Board of Directors is competent to adopt resolutions on all kinds of matters that are not attributed by law or the articles and bylaws to the General Meeting. As a general rule it entrusts ordinary management of the Company to the delegated administrative bodies, and concentrates its actions on the general function of supervision and on consideration of those matters that are of particular importance to the Company.

The determination of the number of directors, within the maximum (15) and minimum (8) set by the articles and bylaws, corresponds to the General Meeting. The composition of the Board of Directors will be such that outside directors, both those appointed by shareholders and those that are independent, constitute a broad majority of the Board of Directors, and the number of inside directors is the minimum necessary, taking into account the complexity of the corporate group to which the Company belongs and the percentage of share participation represented by the shareholder-appointed directors. Within the group of outside directors, the ratio of the number of shareholder-appointed directors to independent directors must, to the extent possible, reflect the ratio of the Company's capital represented by the shareholder-appointed directors to the remainder of capital. The Board of Directors will see to it that the number of independent directors represents at least one third of all directors.

The Board of Directors and the Nominating and Compensation Committee, within the scope of their authority, will see to it that the proposals of candidates sent to the General Meeting for appointment as directors, and appointments made directly to fill vacancies in exercise of their authority to do so, are of persons of recognised solvency, competence and experience, exerting particular effort regarding those persons called to fill positions as independent directors.

The Chairman of the Board of Directors will be elected from among the directors and will be deemed to be the Chairman of the Company and all administrative bodies of which he/she is a part, which he/she will always represent. The Board, on proposal of its Chairman, after a report from the Nominating and Compensation Committee, may elect

from among its members one or more Vice Chairmen to replace the Chairman in the event of absence, illness or impossibility.

The Board of Directors on proposal of the Chairman, after a report from the Nominating and Compensation Committee, will appoint a Secretary and, if applicable, an Assistant Secretary, who may but need not be directors. The same procedure will be followed to dismiss the Secretary and, if applicable, the Assistant Secretary.

The principal obligations of the members of the Board of Directors contemplated in the Board of Directors Regulations, deriving from the duties of diligence and loyalty of directors, may be summarised as: (i) properly preparing for meetings, being required to diligently keep themselves informed of the progress of the Company; (ii) attending meetings and actively participating in deliberations; (iii) performing any specific task within their time commitments; (iv) investigating and advising the Board of any irregularity and overseeing any risk situations; (v) arranging for the call of an extraordinary meeting or including new matters on the agenda; (vi) opposing resolutions contrary to law, the articles and bylaws or the interests of the company, requesting that their opposition be noted in the minutes and challenging such resolutions; (vii) not competing with the Company, including a ban on competing for a period of two (2) years after having left the post for whatever reason; (viii) advising the Company of any shareholding, post, responsibility, activity or situation that may be relevant; (ix) not making use of the Company's assets or of his/her position in same to obtain an economic advantage; (x) not taking advantage of the Company's business opportunities; (xi) observing the rules of communication, abstention and transparency with respect to conflicts of interest that arise; (xii) being obliged to give notice and, where appropriate, obtain the relevant authorisation of the Board of Directors with respect of compromised transactions; (xiii) maintaining the secrecy of deliberations of the Board of Directors and its Committees; (xiv) abstaining from disclosing unpublished information and using it for their own benefit or that of third parties.

The Regulations establish the following as cases in which directors must present their resignations:

- (i) They reach seventy (70) years of age.
- (ii) They are affected by any of the cases of incompatibility or prohibition set forth in provisions of a general nature or in the twelfth article of the Regulations of the Board of Directors.
- (iii) When by reason of facts attributable to the director in his/her capacity as such there has been serious damage to the Company's net worth, or he/she loses the commercial and professional honour necessary to be a director of the Company.
- (iv) When they receive a serious warning from the Board of Directors for having violated their obligations as directors and the warning is approved by a two thirds majority of directors, on proposal of the Audit and Compliance Committee.
- (v) When their remaining on the Board could endanger the interests of the Company, or when the reasons based upon which they were appointed disappear and, in any event, when a shareholder-appointed director transfers his/her shareholding in the Company, or when the shareholder that proposed his/her appointment to the

Company sells all of its shareholding or reduces it to a level that requires reduction or removal of the shareholder-appointed directors.

- (vi) When an independent director becomes subject to any of the circumstances preventing his/her classification as independent, as contemplated in the tenth article of the Board of Directors Regulations.
- (vii) When a representative director breaks their connection with the shareholder that had proposed their appointment.

The Board of Directors will meet with the frequency it deems to be appropriate, but at least once per month, unless the Chairman, freely in his considered judgment, deems it appropriate to suspend any of the meetings. The Board of Directors also will meet (i) if the Chairman calls it on an extraordinary basis, (ii) when requested by one fourth of the directors, or (iii) when requested by an independent director having the authority stated in the eighteenth article of the Board of Directors Regulations to do so. In the latter two cases the meeting must be held within the 15 days following the request.

#### Internal Regulations for Conduct on the Securities Market

Also at the referenced meeting of 5 November 2007, the Board of Directors, in contemplation of the admission of the Company's shares to trading on the stock exchanges, approved the Internal Regulations for Conduct on the Securities Markets, for the purpose of ensuring compliance with the provisions of the Securities Market Act, Royal Decree 629/1993 of 3 May 1993 on rules for action on the securities markets and mandatory registrations, and Royal Decree 1333/2005 of 11 November 2005 on abuse of the market.

The Internal Regulations for Conduct on the Securities Markets establish the criteria for behaviour and action that are to be followed by those to whom it is addressed as regards the operations described therein, and as regards the processing, use and disclosure of privileged and relevant information, in order to foster transparency in conduct of the Company's businesses and appropriate information to and protection of investors. The addressees of the Internal Regulations for Conduct on the Securities Markets are the members of the Company's Board of Directors, including the Secretary and, if applicable, the Assistant Secretary of that administrative body, and the senior managers of the Company, as well as those persons that, in accordance with the regulations in effect from time to time, are specified by the Company's compliance unit based on their customary and recurrent access to information that may be considered to be privileged.

#### 21.2.3 A description of the rights, preferences and restrictions attaching to each class of the existing shares

All shares representing share capital of the Company are of the same class and series and give their holders the same rights, which are set forth in the articles and bylaws and the Corporations Act. The rights corresponding to the shares are described in section 3.4.5 of the Share Securities Note.

21.2.4 A description of what action is necessary to change the rights of holders of the shares, indicating where the conditions are more significant than is required by law

The articles and bylaws of the Company contain no requirements other than those of the Corporations Act to change the rights of holders of the shares. In accordance with these rules, changes of the rights of holders of the shares require the appropriate amendment of the articles and bylaws, resolved by the General Shareholders Meeting with the quorum and majority contemplated in article 103 of the Corporations Act, which resolution, if it affects (i) a class of shares or (ii) only a part of the shares of the same class and results in discriminatory treatment among them, must be approved by the majority of the affected shares.

21.2.5 A description of the conditions governing the manner in which annual general meetings and extraordinary general meetings of shareholders are called, including the conditions for attendance

The conditions governing the manner of calling ordinary and extraordinary general shareholders meetings, including the conditions for attendance, are set forth in the Company's articles and bylaws, and in the General Shareholders Meeting Regulations approved by the sole shareholder on 5 November 2007.

#### Call

In accordance with the referenced documents, the Meeting must be called by the Board of Directors by an announcement published in the Official Gazette of the Commercial Register, and in one of the newspapers of greatest circulation in the province where the registered office of the Company is located, with the advance notice required under the regulations in effect from time to time.

The Board of Directors must necessarily call the General Meeting in the following cases:

- (a) within the first six months of each fiscal year, the Ordinary General Meeting to review corporate management, if applicable approve the accounts for the preceding fiscal year, and resolve on application of results, without prejudice to its authority to consider and decide regarding any other matter appearing on the agenda.
- (b) If requested in the manner contemplated by law by shareholders that own at least five percent (5%) of share capital, stating the matters to be considered at the General Meeting in the request. In this case, the Board of Directors must call the General Meeting to be held within the term contemplated by law. The Board of Directors will draw up the agenda, necessarily including the matters stated in the request.

For its part, the call notice must contain all of the items required by law as applicable, and will state the date, place and time of the meeting on first call and all matters that are to be considered. The notice may also state the date, if any, on which the General Meeting will be held on second call. A copy of the notice will be sent to the CNMV and will be equally accessible via the website of the Company.

From the date of the call notice the Company website will include all the appropriate information to enable shareholders to attend the General Meeting and participate in it.

In addition, shareholders representing at least five percent (5%) of the corporate capital may request, in accordance with the terms and conditions laid down by law, that a notice complementary to the call of the General Shareholders Meeting be published, including one or more points of the agenda.

#### Right of attendance

Under the eighteenth article of the articles and bylaws and the eleventh article of the General Shareholders Meeting Regulations, all owners of shares with voting rights may attend the General Meeting and take part in its deliberations, with the right of voice and vote.

To exercise the right of attendance the shareholders must have the shares registered in their names in the corresponding book entries register five (5) days in advance of the date the General Meeting is to be held. This circumstance must be shown using the appropriate attendance card or certificate of standing issued by the entity or entities responsible for maintaining the book entries register, or in any other manner permitted by applicable legislation.

The members of the Board of Directors must attend the General Meeting. The absence of any of the members will not affect the validity of the General Meeting.

The managers, technical personnel and others having an interest in the progress of the Company's affairs may be authorised by the Chairman of the General Meeting to attend it. Also, the Chairman of the General Meeting may provide access to the said General Meeting by the press, financial analysts and any other person he/she deems to be appropriate, but the General Meeting may revoke the authorisation.

Every shareholder having a right to attend may be represented at the General Meeting by another person, even if not a shareholder, by complying with the requirements and formalities established by law, the articles and bylaws and the General Shareholders Meeting Regulations. However, representations may be revoked at any time.

21.2.6 A brief description of any provision of the issuer's articles of association, statutes, charter or bylaws that would have an effect of delaying, deferring or preventing a change in control of the issuer

There are no articles or bylaws provisions having the effect of delaying, postponing or preventing a change in control of the Company.

21.2.7 Indication of any provision of the bylaws or internal regulations, if any, governing the threshold of participation above which a shareholder's interest must be disclosed

There are no articles and bylaws or regulatory provisions that impose an obligation on shareholders to disclose their interests in capital above a certain percentage. The obligations contemplated in this regard in the rules of the securities market for significant shareholders, directors and managers are applicable.

21.2.8 A description of the conditions imposed by the memorandum and articles of association, statutes, charter or bylaw governing changes in the capital, where such conditions are more stringent than is required by law

There are no articles and bylaws or regulatory provisions imposing stricter conditions than those required by law for increase or reduction of share capital except in the event of a reduction of capital to redeem a specific ground of shares, provided said group is defined on clear, plain and non-discriminatory criteria. In such an event the measure must be approved by both a majority of the shareholders belonging to the affected group and by the majority of the rest of the shareholders of the company.

## 22 RELEVANT CONTRACTS

There is no contract relevant to the Company other than the relevant contracts that are a part of the business conducted by the Company (described in section 6.4 of this Registration Document), the Master Agreement signed between IBERDROLA RENOVABLES and Iberdrola, S.A. and other agreements in force between the Company and Iberdrola S.A. or companies of their respective groups (described in section 0 of this Registration Document), and the intragroup financing agreement described in section 10.3 above).

## 23 THIRD PARTY INFORMATION AND STATEMENTS BY EXPERTS AND DECLARATIONS OF ANY INTEREST

23.1 When a statement or report attributed to a person as an expert is included in the registration document, provide the name of that person, his or her business address, his or her qualifications and, if applicable, any significant interest he/she has in the issuer. If the report has been produced at the issuer's request a statement that such statement or report is included, and the form and context in which it is included, with the consent of the person who has authorised the contents of that part of the registration document

This Registration Document does not include any statement or report attributed to any person as an expert.

23.2 Where information has been sourced from a third party, provide a confirmation that this information has been accurately reproduced and that as far as the issuer is aware and is able to ascertain from information published by that third party, no facts have been omitted which would render the reproduced information inaccurate or misleading. In addition, identify the source(s) of the information

There is no information from third parties.

## 24 DOCUMENTS ON DISPLAY

It is expressly stated that the documents indicated in the following table may be consulted at the Company's domicile (Calle Tomás Redondo Number 1, Madrid), and at the indicated agencies:

Document	CNMV	Madrid Commercial Register
Formation document	Yes	Yes

Document	CNMV	Madrid Commercial Register
Bylaws	Yes	Yes
General Shareholders Meeting Regulations	Yes	Yes
Board of Directors Regulations	Yes	Yes
Internal Regulations for Conduct on the Securities Market	Yes	No
Individual annual statements of IBERDROLA RENOVABLES, under PGC, and audit reports for the 2004, 2005 and 2006 fiscal years	Yes	Yes
Consolidated annual statements of IBERDROLA RENOVABLES and its subsidiaries, under IFRS, and audit reports for the 2005 and 2006 fiscal years	Yes	Yes
Financial information corresponding to the nine-month period ended 30/09/2007	Yes	No
Pro forma financial information	Yes	No

After admission to trading of its shares on the Spanish stock exchanges, the Company will have its website ([www.iberdrolarenovables.com](http://www.iberdrolarenovables.com)) available to the public, adapted to the requirements established in the securities market regulations, allowing public review on it of all the content required by the applicable regulations.

## 25 INFORMATION ON HOLDINGS

In section 7.2 of the Registration Document information is included on the shareholdings of IBERDROLA RENOVABLES in the share capital of other companies. There are no shareholdings other than those described in that section that could have a significant effect on valuation of the Company.

In Madrid, on 22 November 2007.

**TITLE I**  
**GENERAL PROVISIONS**

**Article 1. CORPORATE NAME**

The Company is named "IBERDROLA ENERGÍAS RENOVABLES, S.A." and shall be governed by these By-Laws [*Estatutos Sociales*], the provisions of the current Companies Law [*Ley de Sociedades Anónimas*] and other applicable laws and regulations.

**Article 2. CORPORATE PURPOSE**

The purpose of the Company is to carry out any activities, works and services relating to the production and distribution of electricity or thermal energy and fuels through production facilities using renewable energy sources including, without limitation, hydroelectric, wind, thermal-solar, photovoltaic, biomass, biodiesel and/or bioethanol energy, and the design, construction, operation and maintenance of such facilities.

The following activities are also part of the Company's corporate purpose: generally, the provision of any services related to the engineering of production facilities using renewable energy sources. Specifically, such services include the analysis, the conduct of engineering studies, and the provision of consultancy services in such areas as energy, the environment, technical and economic in connection with facilities of such kind; the operation and maintenance of third-party's facilities. The Company may also take part in projects related to production facilities of this nature through ownership thereof or through their operation and maintenance subject to a contract.

The Company may carry out the activities, transactions, acts and contracts comprised in the corporate purpose, in whole or in part, in an indirect manner through the ownership of shares or equity interests in companies and entities with the same or a similar purpose, both in Spain and abroad.

The Company shall not carry out any activity in respect of which the law prescribes that specific conditions or requirements be satisfied so long as the Company does not fully comply therewith.

**Article 3. DURATION OF THE COMPANY**

The duration of the Company shall be indefinite, its operations having commenced on the date of formalization of its notarized articles of incorporation.

#### **Article 4. REGISTERED OFFICE AND BRANCHES**

1. The registered office of the Company shall be in the city of Madrid, at calle Tomás Redondo No. 1. The Company may establish any branches, agencies, local offices and delegations anywhere in Spain and abroad pursuant to applicable legal provisions.
2. Such registered office may be transferred to another location within the same municipal area by resolution of the Sole Director, which may also make decisions regarding the creation, elimination or transfer of the branches, agencies, local offices and delegations mentioned in the preceding paragraph.

### **TITLE II SHARE CAPITAL, SHARES**

#### **Article 5. SHARE CAPITAL**

1. The Company's share capital is one hundred and sixty four million six hundred thousand four hundred and forty four (164,600,400) Euros, divided into sixteen million four hundred sixty thousand and forty four (16,460,044) shares, having a nominal value of ten (10) euro each, belonging to a single class and series, which are fully subscribed and paid up.
2. The shares shall be represented in securities, which shall have the status of registered shares each numbered consecutively from one (1) to sixteen million four hundred sixty thousand and forty four (16,460,044), both inclusive. The shares shall bear the signature of the Sole Director and shall comply with all relevant statutory requirements. The shares shall be of one class only and shall bestow identical rights upon their holders.
3. The shares shall be recorded in a special book in which any transfers of and rights *in rem* granted upon the shares shall be recorded.
4. The Sole Director is hereby empowered to issue multiple share certificates each comprising several shares and properly numbered. Upon request, multiple share certificates shall be divided into the appropriate number of shares represented by them.

#### **Article 6. TRANSFER OF SHARES AND RIGHTS**

1. The Company's shares may be transferred to any person, who may or may not be a Spanish citizen, provided that the transfer complies with applicable legal provisions and article 6 of these By-Laws.

The purchaser must notify the purchase to the Company, indicating the price paid and the terms and conditions of the purchase, for the purposes of recording it in the book of registered shares [*libro registro de acciones nominativas*].

2. Any *inter vivos* transfer of the Company's shares or rights attached thereto, for consideration or otherwise, shall comply with the following rules:

- a) Shareholders intending to dispose of all or part of their shares must serve a notice of transfer to the Company's Sole Director (hereinafter, a "Notice of Transfer"). A Notice of Transfer shall contain the following particulars: the shareholder's intention to transfer shares, the number of shares to be transferred, the full name (or the corporate name and domicile) of the intended transferee(s), the shares' price (or the value allocated to them if transferred as a gift) and the rest of the transfer's terms and conditions.

For the purposes of exercising any pre-emptive rights a Notice of Transfer shall be deemed as a sale offer and may not be revoked until the expiry of the deadlines provided below.

Within twenty calendar days upon receipt of a Notice of Transfer the Company's Sole Director shall approve the transfer or otherwise offer the shares to the shareholders to allow exercise of the pre-emption rights provided hereunder. In case of approval the transfer shall be formalized within thirty calendar days thereafter. Otherwise a new Notice of Transfer in accordance with the first paragraph of this subsection shall be issued. If the Sole Director decides to offer the shares to the shareholders the rules provided in the paragraphs below shall apply.

- b) Within eight calendar days following his decision to offer the shares to the shareholders, the Company's Sole Director shall circulate the Notice of Transfer among them. The decision of any shareholder to exercise his (her) pre-emption right must be notified to the Company's Sole Director within twenty calendar days upon receipt of the Notice of Transfer. The shareholders shall indicate their intention to purchase the shares or rights at the price sought by the transferor or at the shares' fair value as determined under section d) below, as the case may be. The relevant notices shall be served upon the Shareholders' domicile recorded in the book of registered shares [*libro registro de acciones nominativas*].
- c) Where shareholders accept the price or value sought by the transferor, the shares or rights, as the case may be, shall be distributed among the relevant shareholders according to their respective stake in the Company. The remainder, if any, shall be allocated by lot by the Company's Sole Director and the transfer shall be formalized within eight calendar days thereafter.
- d) Any dispute in connection with the shares' fair value shall be referred to an auditor (other than the Company's auditor) appointed by the Commercial Registrar of the Company's registered office.
- e) If, on the expiry of the deadlines indicated above, none of the shareholders had exercised any pre-emption rights, the Company shall have thirty calendar days thereafter within which it may, subject to compliance with the statutory requirements, purchase the shares at the relevant price or at their fair value as determined by the auditor appointed under paragraph d) above.

Upon the expiry of the aforesaid thirty-day deadline without the Company having exercised its pre-emption rights, the transferor shall be free to transfer his (her) shares

under the terms and conditions set out in the notice of transfer, and the transferor shall formalize the transfer within thirty calendar days. Failure by the transferor to formalize the transaction in time shall result in the need to re-start the formalities prescribed under this article.

- f) The right of pre-emption recognized in this article shall also apply in case of seizure of or compulsory enforcement over the Company's shares or rights attached thereto, as the case may be, and article 64 of the Companies Law shall apply.
- g) The transfer of pre-emption rights arising from any increase of the Company's share capital shall be subject to the following provisions:
  - 1) No later than the third day of the deadline given by the Company to the Shareholders to exercise their pre-emption rights, any shareholders wishing to sell their right must serve a notice of sale (the "Notice of Sale") to the Company's Sole Director. Within two calendar days after giving a Notice of Sale the Company's Sole Director shall approve the sale so notified or otherwise offer the relevant pre-emption rights to the rest of the shareholders, and the rules set forth in this paragraph g) shall apply. The Notice of Sale shall indicate the number of rights to be transferred, the price thereof and the intended transferee(s).
  - 2) If the Company's Sole Director offers the transferor's pre-emption rights the Sale Notice shall be circulated among the shareholders within three calendar days.
  - 3) The shareholders may issue a request to purchase the transferor's pre-emption rights no later than the twentieth day of the deadline open to them to take part in the Company's increase of the share capital. Requests shall be submitted in time to the Company's Sole Director.
  - 4) Where requests exceed the number of rights offered for sale, these shall be distributed among applicants on a pro rata basis according to their respective stake in the Company. The fractions resulting from the allocation, if any, shall be allocated to the recipient of the greatest number of rights up to the amount necessary to fill the number of rights needed to subscribe one share. This method shall be repeated as many times as may be necessary.
  - 5) Between the twenty first and the twenty fifth day of the deadline open to the shareholders to take part in the share capital increase, the Sole Director shall notify the transferor the result of his (her) enquiries, and, provided that no shareholder has used his (her) pre-emption right recognized hereunder, the transferor shall be free to transfer his (her) rights to the transferee indicated in the Notice of Sale and at the price stated therein. The Company's Sole Director shall notify the transferor the exercise by any shareholders of his (her) pre-emption right.
  - 6) The price of pre-emption rights, where the price thereof is not accepted by the prospective transferee(s), shall be their fair value as determined pursuant to paragraph 2 d) of this article.

- h) Save with the transferor's express approval the purported exercise by any shareholders or the Company, as they case may be, of their pre-emption rights only with respect to part of the shares or rights transferred shall be deemed as a waiver of such rights.
  - i) The formalities prescribed hereunder shall not apply where each of the shareholders and the Company's Sole Director (acting on behalf of the Company) waive each of their rights associated to each particular transfer. Any waiver shall be made in writing and evidenced through a certificate issued by the Company's Sole Director.
  - j) Any transfer of shares (including the rights attached thereto) or pre-emption rights (howsoever made) that violates the provisions laid down in this article shall not be recognized by the Company, which shall refuse to record the purchaser's title in the book of registered shares. Consequently such shares and rights shall remain to be the property of the relevant shareholder for all corporate purposes.
3. The shareholders and, failing these, the Company shall have a real right of first refusal over the shares or rights transferred where the transfer is effected:
- a) in breach of paragraph 2 of this article, without prejudice to the provision set forth in paragraph 2 j);
  - b) in favor of a person other than the one stated in the Notice of Transfer or the Notice of Sale (paragraphs 2 a) and 2g), as the case may be;
  - c) for a lower price, or generally, under better conditions than the ones resulting from the Notice of Transfer or the Notice of Sale, as the case may be.

Rights of first refusal shall be exercised within thirty days following the date on which a Notice of Transfer or a Notice of Sale is served on the Company under paragraph 1 of this article. The Sole Director shall immediately notify the shareholders any of the circumstances listed under a), b) and c) above to allow them to exercise the right of first refusal, and the provisions laid down in paragraph 2 of this article shall apply.

For the purposes of exercising the rights of first refusal the price or the value of the shares shall result from the notice of the purchaser or, in case of dispute among the shareholders exercising the right of first refusal, the fair value as determined under paragraph 2 d) of this article.

4. The provisions laid down in paragraphs 2) and 3) above shall not apply to transfers made among affiliates of the same Group.

#### **Article 7. PAYMENT OF CAPITAL CALLS**

Capital calls must be paid within the period determined by the Sole Directors, within legal limits, if any, and in cases of arrears, the Sole Director shall adopt the resolutions it deems appropriate pursuant to applicable legal provisions.

#### **Article 8. SHAREHOLDER STATUS**

1. A share confers upon its legitimate holder the status of shareholder, and vests such holder with the rights granted by Law and by these By-Laws.
2. The shares shall be indivisible. Co-owners of one or more shares must designate a single person for the exercise of shareholder rights, and shall be jointly and severally liable to the Company for all obligations arising from their status as shareholders.
3. In the case of beneficially-owned shares [*usufructo de acciones*], the bare owner [*nudo propietario*] shall be qualified as the designated shareholder, with the beneficial owner having the right in all cases to the dividends issued by the Company during the period of beneficial ownership.

In the event of a pledge of shares, the exercise of shareholder rights belongs to the owner thereof.

4. Ownership of shares entails absolute compliance with the By-Laws and submission to duly adopted decisions made within the authority of the governance and management decision-making bodies of the Company.

#### **Article 9. INCREASE AND REDUCTION IN SHARE CAPITAL**

1. The share capital may be increased or reduced by resolution of the shareholders acting at a General Shareholders' Meeting with the requirements established for such cases by the Companies Law then in effect and in accordance with the various methods authorized thereby.
2. The shareholders acting at a General Shareholders' Meeting may, in accordance with the requirements set forth for amendment of the By-Laws and within the limits and conditions determined by Law, delegate upon the Sole Director either the power to execute an agreement regarding an increase in the share capital or the power to agree an increase in the share capital in one go or otherwise.
3. In capital increases with the issuance of new shares, whether ordinary or preferred, the existing shareholders and holders of convertible debentures may, when permitted by Law, and within the period granted to them for this purpose by the Sole Director, which shall not be less than one month from the publication of the announcement of the subscription offer for the new issuance in the Official Bulletin of the Commercial Registry, exercise the right to subscribe for a number of shares proportional to the nominal value of the shares they hold or which would correspond to the holders of convertible debentures if they exercised the power of conversion at that time.
4. The shareholders acting at a General Shareholders' Meeting may exclude pre-emptive rights under such conditions as are provided by Law.
5. Pre-emptive rights shall not apply when the capital increase is due to the conversion of debentures into shares or the absorption of another company or a portion of the split-off assets of another company.

**TITLE III  
DECISION-MAKING BODIES OF THE COMPANY**

**SECTION ONE. THE GENERAL SHAREHOLDERS' MEETING**

**Article 10. THE GENERAL SHAREHOLDERS' MEETING**

1. The shareholders, meeting at a duly called General Shareholders' Meeting, shall decide by majority on the matters that may be decided at a General Shareholders' Meeting.

2. General Shareholders' Meetings may be ordinary or extraordinary and must be called by the Sole Director.

**Article 11. POWERS OF THE SHAREHOLDERS ACTING AT A GENERAL SHAREHOLDERS' MEETING**

The shareholders at a General Shareholders' Meeting shall decide the matters assigned thereto by the Law and these By-Laws and particularly regarding the following:

- 1 Appointment and removal of the Sole Director.
- 2 Appointment and removal of Auditors.
- 3 Review of corporate management and approval, if appropriate, of the financial statements from the prior fiscal year and decision as to the allocation of the profits or losses thereof.
- 4 Increase or reduction in the Company's share capital, delegating upon the Sole Director, if appropriate, the power to set the date(s) for its implementation within the statutory time-limits. The Sole Director may make use of this power in total or partially or even refrain from using it in view of the prevailing market conditions, the Company's position, or on the basis of any other event or circumstance which, in the Sole Director's opinion, justifies such decision. The failure to exercise this power shall be reported by the Sole Director to the General Shareholders' Meeting, which shall be held upon the expiry of the deadline to execute the increase or decrease of the share capital. To delegate upon the Sole Director the power to increase the Company's share capital.
- 5 Issuance of debentures.
- 6 Amendment of the By-Laws.
- 7 Dissolution, merger, split-off, and transformation of the Company.
- 8 Decide on any other issue submitted to the General Shareholders' Meeting by the Sole Director. In the event of any significant event affecting the Company, the shareholders or the corporate bodies, the Sole Director shall promptly call a meeting of the Shareholders to deliberate and decide any issues submitted to the General Shareholders' Meeting by this article.

**Article 12. ORDINARY AND EXTRAORDINARY GENERAL SHAREHOLDERS' MEETINGS**

1. The shareholders acting at an ordinary General Shareholders' Meeting, which shall be previously called for such purpose, must meet within the first six (6) months of each fiscal year in order to review corporate management, approve financial statements from the prior fiscal year, if appropriate, and decide upon the allocation of profits or losses from such fiscal year. Resolutions may also be adopted regarding any other matter within the power of the Shareholders' Meeting under article 11 above; provided that such matter appears on the agenda and that the General Shareholders' Meeting has been convened with the required share capital in attendance.
2. Any General Shareholders' Meeting not provided for in the foregoing paragraph shall be deemed an extraordinary General Shareholders' Meeting and shall be held at any time of the year, provided that the Sole Director deems such meeting to be appropriate.
3. Also, an Extraordinary Shareholder's Meeting shall be held upon written request of a number of shareholders representing the share capital provided by Law. The request shall state the items to be discussed. In these circumstances the Company's Sole Director shall call the meeting no later than thirty days after the date on which a request has been issued by notary channels. The agenda, which shall necessarily comprise the items stated in the request, shall be drawn up by the Sole Director.

**Article 13. CALL OF THE GENERAL SHAREHOLDERS' MEETING**

1. The General Shareholders' Meeting shall be called through an announcement published in the Official Bulletin of the Commercial Registry and in one of the newspapers of wider circulation in the province of the Company's registered office by giving no less than one month's notice to the intended date of the meeting.
2. The announcement of the call to meeting must contain all statements required by Law in each case and must set forth the day, place and time of the meeting upon first call and all matters to be dealt with. The announcement may also, if appropriate, set forth the date on which the General Shareholders' Meeting shall proceed upon second call.
3. Shareholders representing at least five (5%) percent of the share capital may request the publication of a supplement to the call of the General Shareholders' Meeting including one or more items in the agenda. This right must be exercised by duly authenticated notice that must be received at the Company's registered office within five days after the publication of the call to meeting. The supplement of the call to meeting must be published within no less than fifteen days' notice of the intended date of the meeting.

Failure to publish the supplement within the statutory period shall render the meeting null and void.

4. The shareholders at the General Shareholders' Meeting may not deliberate on or decide matters that are not included in the agenda.

**Article 14. SHAREHOLDERS' RIGHT TO RECEIVE INFORMATION**

1. Up to the seventh day prior to the date provided for the meeting, the shareholders may request of the Sole Director the information and clarifications they deem necessary on the matters contained in the agenda or ask any written questions they may find appropriate. The Sole Director is required to provide information in writing up to the date on which the meeting is held.

During the holding of the General Shareholders' Meeting, the shareholders may verbally request the information or clarifications that they deem appropriate regarding the matters contained in the agenda. If the right of the shareholders may not be satisfied the Sole Director shall be required to make available such information in writing within seven days following the adjournment of the meeting.

The Sole Director shall be required to provide the information requested under the provisions of the two preceding paragraphs except in those circumstances which, in his judgment, the publication of the information requested would prejudice the interests of the Company. This exception shall not apply when the request is supported by shareholders representing at least one-fourth of the share capital.

2. The call of the ordinary General Shareholders' Meeting shall set forth the means whereby any shareholder may obtain from the Company, immediately and without charge, the documents that must be submitted for approval by the shareholders at such ordinary General Shareholders' Meeting, including the Management Report and the Auditors' Report.
3. When the shareholders are to deal with an amendment to the By-Laws, besides the statements required in each case by Law, the notice of the call must make clear the right of all shareholders to examine at the Company's registered office the complete text of the proposed amendment and the report thereon and to request that such documents be delivered or sent to them without charge.
4. In cases of capital increase or reduction, issuance of convertible debentures, merger or split-off, the Company shall make available the information statutorily required in each of these circumstances.

#### **Article 15. ESTABLISHMENT OF A QUORUM FOR THE MEETING**

1. The ordinary as well as the extraordinary General Shareholders' Meeting shall be validly established with the minimum quorum required by applicable legislation in effect from time to time, taking into account the matters appearing on the agenda.
2. Notwithstanding the foregoing, a Meeting shall be held to be validly formed to deal with any issue provided that the full paid-up share capital is present, either directly or represented by proxy, and agrees unanimously to hold the Meeting.

#### **Article 16. RIGHT TO ATTEND**

1. All holders of voting shares may attend the General Shareholders' Meeting and take part in deliberations thereof, with the right to be heard and to vote.

2. In order to exercise the right to attend, shareholders must cause the shares to be registered in their name in the corresponding book-entry registry at least five (5) days prior to the day on which the General Shareholders' Meeting is to be held.
3. All shareholders having the right to attend may be represented at the General Shareholders' Meeting by proxy through another shareholder, provided the requirements and formalities set forth in the Law are met and provided also that the Company's formula indicated in the call for meeting announcement is satisfied.

The Chairman of and the Secretary for the General Shareholders' Meeting shall have the widest powers to recognize the validity of a document evidencing representation by proxy; only those which lack the absolute minimum requirements may be deemed invalid, and only provided that the lack thereof cannot be cured.

4. The Sole Director must attend the General Shareholders' Meeting. Managers, Experts and other persons with an interest in the efficient running of the corporate affairs may be authorized to attend the General Shareholders' Meeting by the Sole Director.

#### **Article 17. CHAIRMANSHIP OF THE GENERAL SHAREHOLDERS' MEETING**

The Company's Sole Director shall act as Chairman of the General Shareholders' Meeting and the General Shareholders' Meeting shall appoint the person who is to act as Secretary thereof.

**Article 18. PRESIDING COMMITTEE [MESA PRESIDENCIAL] AND LIST OF ATTENDEES**

1. The Chairman and the Secretary shall constitute the Presiding Committee [*Mesa Presidencial*] of the General Meeting of Shareholders.
2. Once the Presiding Committee has been formed, and prior to beginning with the agenda, a list of attendees shall be prepared which sets forth the nature or representation of each attendee and the number of their own or other parties' shares present. At the end of the list, there shall be a determination of the number of shareholders present in person or by proxy at the meeting, as well as the amount of capital they own.

Pursuant to the provisions of the Regulations of the Commercial Registry, the list may be made up of an index file or be prepared in electronic form.

Once the list has been prepared, the Chairman shall declare whether or not the requirements for a valid quorum for the General Shareholders' Meeting have been met.

Any queries or claims with respect to these matters shall be resolved by the Presidential Committee.

Immediately thereafter, if appropriate, the Chairman shall declare a quorum for the General Shareholders' Meeting to validly exist.

3. The Sole Director may require that a Notary Public attend the meeting to prepare the minutes thereof. The Sole Director shall be required to do so in any of the circumstances provided by Law.

**Article 19. DELIBERATIONS AND VOTE**

1. The Chairman shall: direct the meeting ensuring that deliberations are carried out pursuant to the agenda; deal with any queries, clarifications or claims arising in connection with the list of attendees or any voting delegations or attendances by proxy; accept or reject new proposals relating to matters on the agenda; direct the deliberations, granting the floor to shareholders who so request it, and taking the floor away or refusing to grant it when the Chairman is of the opinion that a particular matter has been sufficiently debated, is not included in the agenda, or hinders the progress of the meeting; indicate the time for voting; proclaim the results thereof and, generally, exercise all powers to ensure the proper development of the General Shareholders' Meeting.
2. Votes shall be cast by the shareholders raising their hands, if appropriate. Resolutions may be also adopted by the general approval of the Meeting, subject to the statutory provisions stating that the opposition by dissenting shareholders must be recorded in the minutes.

**Article 20. APPROVAL OF RESOLUTIONS**

1. The Shareholders, acting at an ordinary or extraordinary General Shareholders' Meeting, shall adopt resolutions with the majorities of votes cast in person or by proxy required by the Companies Law.
2. Each voting share, whether its holder is present in person or by proxy at the General Shareholders' Meeting, shall grant the holder the right to one vote.

#### **Article 21. DOCUMENTATION OF RESOLUTIONS**

1. Documentation of shareholder resolutions, the conversion thereof into a public instrument and the registration thereof with the Commercial Registry shall be carried out pursuant to the provisions of Law and the Regulations of the Commercial Registry.
2. The total or partial certificates needed to evidence shareholder resolutions shall be issued and signed by the Secretary of the Sole Director.

#### **SECTION TWO. MANAGEMENT OF THE COMPANY**

#### **Article 22. STRUCTURE OF THE COMPANY'S MANAGEMENT**

The management and representation of the Company are vested upon a Sole Administrator.

#### **Article 23. SOLE DIRECTOR'S TERM OF OFFICE**

The Sole Director shall serve his (her) position for a term of five years so long as the shareholders acting at the General Shareholders' Meeting do not resolve to remove or dismiss him (her). The Sole Director may be re-elected to one or more terms of five years.

#### **Article 24. POWERS OF THE SOLE DIRECTOR**

1. The Sole Director shall be empowered with the running, management, and representation of the Company, in particular to draw-up the Company's general policy guidelines, programs and to set up targets in connection with any activities comprised within the Company's corporate purpose.
2. The Sole Director shall have powers to adopt any resolutions relating to any matters that are not attributed by Law or these By-Laws to the General Shareholders' Meeting.

#### **Article 25. REMUNERATION**

The Sole Director shall not be entitled to receive any remuneration whatsoever for his (her) duties.

### **TITLE IV FINANCIAL STATEMENTS, DISTRIBUTION OF PROFITS, DISSOLUTION AND LIQUIDATION**

#### **Article 26. FISCAL YEAR AND DRAWING-UP OF FINANCIAL STATEMENTS**

1. The fiscal year shall commence on January 1 of each year and shall end on December 31.
2. The Annual Financial Statements (consisting of the Balance Sheet, the Profit and Loss Statement and the Notes to the Financial Statements) and the Management Report shall be prepared in compliance with the structure, principles and guidelines contained in current applicable provisions.
3. Within the first three months of the year, the Sole Director shall draw up the Annual Accounts, and the Proposal for the Allocation of Profits or Losses and, if required by Law, the Management Report including, if appropriate, the Consolidated Annual Accounts and Management Report. The Annual Accounts and the Management Report must be signed by the Sole Director.

#### **Article 27. AUDITORS**

1. The Annual Accounts and the Management Report shall be reviewed by Auditors.
2. The Auditors shall be appointed by the shareholders acting at a General Shareholders' Meeting prior to the end of the fiscal year to be audited, for a fixed initial period that shall not be less than three (3) years nor greater than nine (9), to be counted from the date of commencement of the first fiscal year to be audited; the Auditors may be re-elected by the shareholders once the initial period has expired within the terms and the periods provided by Law.
3. The Auditors shall prepare a detailed report on the results of their actions pursuant to the legal provisions governing the Auditing of Annual Accounts.

#### **Article 28. ALLOCATION OF PROFITS/LOSSES**

1. The shareholders shall decide at the General Shareholders' Meeting upon the Allocation of Profits or Losses for the fiscal year in accordance with the approved Balance Sheet.
2. Once such payments as are provided for by the Law or these By-Laws have been made, dividends may only be distributed with a charge against the profits for the fiscal year or against freely distributable reserves, if the book value of net assets is not less than the share capital, or does not become so as a result of the distribution.
3. The distribution of dividends to shareholders shall be made in proportion to their paid-up capital.

#### **ARTICLE 29. GROUNDS FOR DISSOLUTION**

The Company shall be dissolved upon the occurrence of any of the events set forth under article 260 of the Companies Law.

#### **Article 30. LIQUIDATION OF THE COMPANY**

1. From the moment the Company declares itself to be in liquidation, the Sole Director shall cease to hold office and shall become liquidator of the Company.
2. During the liquidation period, the provisions of these By-Laws governing the calling and holding of General Shareholders' Meetings shall be complied with, and the shareholders shall be informed of the progress of the liquidation, so that the shareholders may adopt such resolutions as they deem appropriate.
3. All liquidating operations shall be carried out with due observance of applicable law.

**Amendment of article 1 of the Company's By-Laws on July 25, 2007**

**Article 1. CORPORATE NAME**

The Company is named "IBERDROLA RENOVABLES, S.A." and shall be governed by these By-Laws [*Estatutos Sociales*], the provisions of the current Companies Law [*Ley de Sociedades Anónimas*] and other applicable laws and regulations.

Amendment of article 2 of the Company's By-Laws on September 25, 2007

Article 2. CORPORATE PURPOSE

1. The purpose of the Company is to carry out all manner of activities, works and services inherent in or relating to the businesses of:
  - a) production and supply of electricity through facilities using renewable energy sources, including, without limitation, hydroelectric, wind, thermal-solar, photovoltaic or biomass-based production;
  - b) production, treatment and supply of biofuels and derivative products; and
  - c) design, engineering, development, construction, operation, maintenance and sale of the facilities included in sub-paragraphs a) and b) above, whether owned by the Company or third parties, services of analysis, engineering studies or consultancy in the energy, environmental, technical and economic areas in connection with facilities of that kind.
2. In addition, the purpose of the Company is to hold equity interests in all kinds of companies and groups of companies, in Spain and abroad, engaged in all manner of activities, works and services inherent in or relating to the businesses of production or supply of electricity, gas (including storage) or derivatives thereof, including financial derivatives.
3. The Company may carry out the activities, transactions, acts and contracts comprised in the corporate purpose, in whole or in part, in an indirect manner through the ownership of shares or equity interests in companies and entities with the same or a similar purpose, both in Spain and abroad.
4. The Company shall not carry out any activity in respect of which the law prescribes that specific conditions or requirements be satisfied so long as the Company does not fully comply therewith.

Amendment of article 5 of the Company's By-Laws on October 3, 2007

Article 5. SHARE CAPITAL

1. The Company's share capital is one thousand five hundred million (1,500,000,000) Euros, divided into one hundred and fifty million (150,000,000) shares, having a nominal value of ten (10) euro each, belonging to a single class and series, which are fully subscribed and paid up.
2. The shares shall be represented in securities, which shall have the status of registered shares each numbered consecutively from one (1) to one hundred and fifty million (150,000,000), both inclusive. The shares shall bear the signature of the Sole Director and shall comply with all relevant statutory requirements. The shares shall be of one class only and shall bestow identical rights upon their holders.
3. The shares shall be recorded in a special book in which any transfers of and rights *in rem* granted upon the shares shall be recorded.
4. The Sole Director is hereby empowered to issue multiple share certificates each comprising several shares and properly numbered. Upon request, multiple share certificates shall be divided into the appropriate number of shares represented by them.

Amendment of article 5 of the Company's By-Laws on November 5, 2007

**Article 5. SHARE CAPITAL**

1. The Company's share capital is one thousand six hundred and eighty nine million six hundred and twenty five thousand nine hundred and sixty (1,689,625,960) Euros, divided into one hundred and sixty eight million nine hundred and sixty two thousand five hundred and ninety six (168,962,596) shares, having a nominal value of ten (10) euro each, belonging to a single class and series, which are fully subscribed and paid up.
2. The shares shall be represented in securities, which shall have the status of registered shares each numbered consecutively from one (1) to one hundred and sixty eight million nine hundred and sixty two thousand five hundred and ninety six (168,962,596), both inclusive. The shares shall bear the signature of the Sole Director and shall comply with all relevant statutory requirements. The shares shall be of one class only and shall bestow identical rights upon their holders.
3. The shares shall be recorded in a special book in which any transfers of and rights *in rem* granted upon the shares shall be recorded.
4. The Sole Director is hereby empowered to issue multiple share certificates each comprising several shares and properly numbered. Upon request, multiple share certificates shall be divided into the appropriate number of shares represented by them.

<b>SOLE FINAL PROVISION. JURISDICTION FOR THE RESOLUTION OF DISPUTES</b>	<b>33</b>

**BY-LAWS OF**  
**IBERDROLA RENOVABLES, S.A.**

**TITLE I. GENERAL PROVISIONS**

**Article 1. CORPORATE NAME**

The Company is named "IBERDROLA RENOVABLES, S.A." and shall be governed by these By-Laws [*Estatutos Sociales*], the provisions of the current Companies Law [*Ley de Sociedades Anónimas*] and other applicable laws.

**Article 2. CORPORATE PURPOSE**

1. The purpose of the Company is to carry out all manner of activities, works and services inherent in or relating to the businesses of:
  - a) production and supply of electricity through facilities using renewable energy sources, including, without limitation, hydroelectric, wind, thermal-solar, photovoltaic or biomass-based production;
  - b) production, treatment and supply of biofuels and derivative products; and
  - c) design, engineering, development, construction, operation, maintenance and sale of the facilities included in sub-paragraphs a) and b) above, whether owned by the Company or third parties, services of analysis, engineering studies or consultancy in the energy, environmental, technical and economic areas in connection with facilities of that kind.
2. In addition, the purpose of the Company is to hold equity interests in all kinds of companies and groups of companies, in Spain and abroad, engaged in all manner of activities, works and services inherent in or relating to the businesses of production or supply of electricity, gas (including storage) or derivatives thereof, including financial derivatives.
3. The Company may carry out the activities, transactions, acts and contracts comprised in the corporate purpose, in whole or in part, in an indirect manner through the ownership of shares or equity interests in companies and entities with the same or a similar purpose, both in Spain and abroad.
4. The Company shall not carry out any activity in respect of which the law prescribes that specific conditions or requirements be satisfied so long as the Company does not fully comply therewith.

### **Article 3. DURATION OF THE COMPANY**

The duration of the Company shall be indefinite, its operations having commenced on the date of formalization of its notarized articles of incorporation.

### **Article 4. REGISTERED OFFICE AND BRANCHES**

1. The registered office of the Company shall be in the city of Madrid, at calle Tomás Redondo No. 1, and it may establish branches, agencies, local offices and delegations in Spain and abroad pursuant to applicable legal provisions.
2. Such registered office may be transferred to another location within the same municipal area by resolution of the Board of Directors, which may also make decisions regarding the creation, elimination or transfer of the branches, agencies, local offices and delegations mentioned in the preceding paragraph.

## **TITLE II. SHARE CAPITAL, SHARES AND DEBENTURES**

### **Article 5. SHARE CAPITAL**

The share capital is one billion, six hundred and eighty-nine million, six hundred and twenty-five thousand nine hundred and sixty (1,689,625,960) euros, represented by three billion, three hundred and seventy-nine million, two hundred and fifty-one thousand, nine hundred and twenty (3,379,251,920) shares having a nominal value of fifty (0.50) euro cents each, numbered consecutively from one (1) to three billion, three hundred and seventy-nine million, two hundred and fifty-one thousand, nine hundred and twenty (3,379,251,920), both inclusive, belonging to a single class and series, which are fully subscribed and paid up.

### **Article 6. REPRESENTATION OF THE SHARES**

1. The shares shall be represented in book-entry form, and as regards their nature as book entries, they shall be governed by securities market rules and regulations and other applicable legal provisions. Admission to the official listing thereof may be requested on domestic as well as foreign stock exchanges pursuant to applicable legislation.
2. The Company shall acknowledge as a shareholder any party which appears entitled thereto in the entries of the corresponding book-entry registries.
3. Modifications to features of shares represented by book entries, once formalized in accordance with the provisions of the Companies Law and the regulations of the securities market, shall be published in the Official Bulletin of the Commercial Registry [*Boletín Oficial del Registro Mercantil*] and in one of the newspapers of wider circulation in the province where the Company has its domicile.

### **Article 7. PAYMENT OF CAPITAL CALLS**

1. If shares have not been entirely paid up, this circumstance shall be reflected in the corresponding book entry.

2. Capital calls must be paid within the period fixed by the Board of Directors, within legal limits, if any, and in cases of arrears, the Board shall adopt the resolutions it deems appropriate pursuant to applicable legal provisions.
3. A shareholder who is delinquent in the payment of capital calls may not exercise the right to vote. The amount of such shareholder's shares shall be deducted from share capital for calculating a quorum. Such shareholder shall also not have the right to receive dividends or the pre-emptive right to subscribe for new shares or convertible debentures.
4. Once the amount of the capital calls and interest thereon has been paid, the shareholder may make a claim for payment of unexpired dividends, but may not make a claim for pre-emptive rights if the period for the exercise thereof has already lapsed.

#### **Article 8. SHAREHOLDER STATUS**

1. A share confers upon its legitimate holder the status of shareholder, and vests such holder with the rights granted by Law and by these By-Laws.
2. The shares shall be indivisible. Co-owners of one or more shares must designate a single person for the exercise of shareholder rights, and shall be jointly and severally liable to the Company for all obligations arising from their status as shareholders.
3. In the case of beneficially-owned shares [*usufructo de acciones*], the bare owner [*nudo propietario*] shall be qualified as the designated shareholder, with the beneficial owner having the right in all cases to the dividends issued by the Company during the period of beneficial ownership.  
  
In the event of a pledge of shares, the exercise of shareholder rights belongs to the owner thereof.
4. Ownership of shares entails absolute compliance with the By-Laws and submission to duly adopted decisions made within the authority of the governance and management decision-making bodies of the Company.

#### **Article 9. INCREASE IN SHARE CAPITAL**

1. The share capital may be increased by resolution of the shareholders acting at a General Shareholders' Meeting with the requirements established for such cases by the Companies Law then in effect and in accordance with the various methods authorized thereby.
2. The shareholders acting at a General Shareholders' Meeting may, in accordance with the requirements established for amendment of the By-Laws and within the limits and conditions fixed by Law, delegate to the Board of Directors, with powers of substitution, if any, the power to approve an increase in share capital on one or more occasions. When the shareholders delegate this power to the Board of Directors, they may also grant it the power to exclude pre-emptive rights with respect to the issuance of shares subject to the delegation, in compliance with the terms and requirements established by Law.

3. The shareholders may also delegate to the Board of Directors, with powers of substitution, if any, the power to carry out the previously-adopted resolution to increase the share capital, within the periods set forth by Law, indicating the date or dates of execution and determining the conditions for the increase in all areas not provided for by the shareholders. The Board of Directors may make use of such delegation in whole or in part, or may refrain from using it, in view of market conditions, the condition of the Company itself or any particularly relevant fact or circumstance which the Board believes justifies such decision. A report of such decision shall be made to the shareholders at the first General Shareholders' Meeting held after the end of the period granted for the use of such delegation.
4. In capital increases with the issuance of new shares, whether ordinary or preferred, the existing shareholders and holders of convertible debentures may, when permitted by Law, and within the period granted to them for this purpose by the Board of Directors, which shall not be less than the period established by law from the publication of the announcement of the subscription offer for the new issuance in the Official Bulletin of the Commercial Registry, exercise the right to subscribe for a number of shares proportional to the nominal value of the shares they hold or which would correspond to the holders of convertible debentures if they exercised the power of conversion at that time.
5. The shareholders acting at a General Shareholders' Meeting or, if applicable, the Board of Directors, may, in furtherance of the corporate interest, exclude pre-emptive rights in whole or in part in such cases and under such conditions as are provided by Law. In particular, the corporate interests may justify the exclusion of pre-emptive rights when needed to facilitate (i) the acquisition by the Company of assets (including shares or interests in companies) which are appropriate for the furtherance of the corporate purpose; (ii) the placement of new shares in foreign markets; (iii) the acquisition of funds by using techniques based on the book-building likely to maximize the issue price per share; (iv) the inclusion of industrial, technological or financial partners; (v) the implementation of loyalty and compensation programs covering Directors, managers or employees, and (vi) in general, the performance of any transaction which is advisable for the Company.
6. Pre-emptive rights shall not apply when the capital increase is due to the conversion of debentures into shares or the absorption of another company or a portion of the split-off assets of another company. Such right shall also not exist when new shares are issued for exchange in a public tender offer made by the Company.

#### **Article 10. REDUCTION IN SHARE CAPITAL**

1. In accordance with procedures provided for by law, a reduction in share capital may be carried out by means of a reduction in the nominal value of shares, a retirement or pooling thereof in order to exchange them and, in all cases, the purpose thereof may be to return contributions, cancel capital calls, create or increase reserves, re-establish equilibrium between the capital and the assets of the Company diminished due to losses, or several of such purposes simultaneously.

2. In the event of a capital reduction in order to return contributions, payment to the shareholders may be made totally or partially in kind, provided that the conditions set forth in paragraph 5 of Article 50 of these By-Laws have been met.
3. In accordance with the provisions of the Companies Law, the shareholders acting at a General Shareholders' Meeting may resolve to reduce capital in order to retire a particular group of shares, provided that such group is defined based on substantive, homogenous and non-discriminatory criteria. In such event, the measure must be approved by a majority of shares of shareholders pertaining to the affected group as well as by a majority of shares of the rest of the shareholders remaining with the Company. The amount to be paid by the Company may not be less than the arithmetic mean of the closing prices of the Company's shares on the Continuous Market of the Stock Exchanges during the month prior to the adoption of the resolution reducing capital stock.

#### **Article 11. ISSUANCE OF DEBENTURES AND OTHER SECURITIES**

1. The shareholders acting at a General Shareholders' Meeting may, as provided by law, delegate to the Board of Directors the power to issue simple or convertible and/or exchangeable debentures. The Board of Directors may make use of such delegation on one or more occasions for a maximum period of five (5) years.
2. In addition, the shareholders acting at a General Shareholders' Meeting may authorize the Board of Directors to determine the time at which the approved issuance should take place, as well as to set other conditions not provided for in the shareholders' resolution.
3. Convertible and/or exchangeable debentures may be issued with a fixed (determined or determinable) or variable exchange ratio.
4. The resolution authorizing issuance shall provide whether the power to convert or exchange belongs to the debtholder and/or the Company or, if applicable, whether the conversion will occur automatically at a particular time.
5. The Company may issue notes, warrants, preferred stock and other negotiable securities different from the ones provided for in the preceding paragraphs. The shareholders' acting at a General Shareholders' Meeting may delegate to the Board of Directors the power to issue such securities. The Board of Directors may make use of such delegation on one or more occasions for a maximum period of five (5) years. The shareholders may also authorize the Board of Directors to determine the time at which the approved issuance should be carried out, as well as to set other terms not provided for in the shareholders' resolution, in accordance with applicable legal provisions. The Company may also provide a guarantee of securities issued by its subsidiaries.

### **TITLE III. DECISION-MAKING BODIES OF THE COMPANY**

#### **SECTION ONE. THE GENERAL SHAREHOLDERS' MEETING**

##### **Article 12. THE GENERAL SHAREHOLDERS' MEETING**

1. The shareholders, meeting at a duly called General Shareholders' Meeting, shall decide by majority on the matters that may be decided at a General Shareholders' Meeting.
2. General Shareholders' Meetings may be ordinary or extraordinary and must be called by the Board of Directors.
3. Resolutions that are duly adopted at a General Shareholders' Meeting shall bind all shareholders, including shareholders who are absent, dissent, abstain from voting and who lack the right to vote, without prejudice to the rights they may have to challenge such resolutions.
4. The General Shareholders' Meeting is governed by the provisions of these By-Laws, its own Regulations and the provisions of Law.

##### **Article 13. POWERS OF THE SHAREHOLDERS ACTING AT A GENERAL SHAREHOLDERS' MEETING**

1. The shareholders at a General Shareholders' Meeting shall decide the matters assigned thereto by the Law, these By-Laws or the Regulations for the General Shareholders' Meeting, and particularly regarding the following:
  - (a) Appointment and removal of Directors, as well as approval of the appointment of Directors designated by interim appointment to fill vacancies.
  - (b) Approval, if applicable, of the establishment of systems for compensation of the Company's Directors and senior managers, consisting of the delivery of shares or of rights therein, or a compensation that takes as its reference the value of the shares.
  - (c) Appointment and removal of Auditors.
  - (d) Review of corporate management and approval, if appropriate, of the financial statements from the prior fiscal year and decision as to the allocation of the profits or losses thereof.
  - (e) Increase or reduction in share capital, as well as delegation to the Board of Directors of the power to increase share capital.
  - (f) Issuance of debentures and other negotiable securities and delegation to the Board of Directors of the power for the issuance thereof.
  - (g) Authorization to the Board of Directors for the derivative acquisition of the Company's own shares.
  - (h) Approval and amendment of the Regulations for the General Shareholders' Meeting.
  - (i) Amendment of the By-Laws.

- (j) Dissolution, merger, split-off, transformation, and overall assignment of assets and liabilities of the Company.
2. In addition, the shareholders acting at a General Shareholders' Meeting shall decide any matter submitted to them by the Board of Directors.

**Article 14. ORDINARY AND EXTRAORDINARY GENERAL SHAREHOLDERS' MEETING**

1. The shareholders acting at an ordinary General Shareholders' Meeting, which shall be previously called for such purpose, must meet within the first six (6) months of each fiscal year in order to review corporate management, approve financial statements from the prior fiscal year, if appropriate, and decide upon the allocation of profits or losses from such fiscal year. Resolutions may also be adopted at the ordinary General Shareholders' Meeting regarding any other matter within the power of the shareholders, provided that such matter appears on the agenda and that the General Shareholders' Meeting has been convened with the required share capital in attendance.
2. Any General Shareholders' Meeting not provided for in the foregoing paragraph shall be deemed an extraordinary General Shareholders' Meeting and shall be held at any time of the year, provided that the Board of Directors deems such meeting to be appropriate.

**Article 15. CALL OF THE GENERAL SHAREHOLDERS' MEETING**

1. The General Shareholders' Meeting must be called by the Board of Directors through an announcement published in the Official Bulletin of the Commercial Registry and in one of the newspapers of wider circulation in the province where the Company's registered office is located as much in advance as required by the regulations in effect at any time.
2. The Board of Directors must call a General Shareholders' Meeting in the following events:
  - (a) In the event set forth in paragraph 1 of Article 14 of these By-Laws.
  - (b) If the meeting is requested, in the manner provided for by Law, by shareholders who hold at least five (5%) percent of the share capital, which request sets forth the matters to be dealt with at the General Shareholders' Meeting. In this event, the Board of Directors shall call for the General Shareholders' Meeting to be held within the statutorily prescribed deadline. The Board of Directors must include the requested matters in the agenda.
3. The announcement of the call to meeting must contain all statements required by Law in each case and must set forth the day, place and time of the meeting upon first call and all matters to be dealt with. The announcement may also, if appropriate, set forth the date on which the General Shareholders' Meeting shall proceed upon second call.
4. Shareholders representing at least five (5%) percent of the share capital may request the publication of a supplement to the call of the General Shareholders' Meeting including one or more items in the agenda. This right must be exercised by duly authenticated

notice that must be received at the Company's registered office within the period established by law after the publication of the call to meeting. The supplement to the call to meeting must be published within the statutorily prescribed deadline.

5. The shareholders at the General Shareholders' Meeting may not deliberate on or decide matters that are not included in the agenda, unless otherwise provided by law.
6. The Board of Directors may require that a Notary Public attend the General Shareholders' Meeting and prepare the minutes thereof. In any event, the Board must require the presence of a Notary under the circumstances provided by Law.

#### **Article 16. SHAREHOLDERS' RIGHT TO RECEIVE INFORMATION**

1. From the date of publication of the call of the General Shareholders' Meeting through and including the seventh day prior to the date provided for the first call to meeting, the shareholders may request of the Board of Directors the information or clarifications that they deem are required, or ask written questions that they deem pertinent, regarding the matters contained in the agenda. In addition, upon the same prior notice and in the same manner, the shareholders may request information or clarifications or ask written questions regarding information accessible to the public which has been provided by the Company to the Spanish National Securities Market Commission [*Comisión Nacional del Mercado de Valores*] since the holding of the last General Shareholders' Meeting.
2. During the holding of the General Shareholders' Meeting, the shareholders may verbally request the information or clarifications that they deem appropriate regarding the matters contained in the agenda.
3. The Board of Directors shall be required to provide the information requested under the provisions of the two preceding paragraphs in the form and within the periods provided by these By-Laws, the Regulations for the General Shareholders' Meeting and the Law, except in cases in which it is legally improper, including, specifically, those cases in which, in the opinion of the Chairman, publication of the requested information would prejudice the interests of the Company. This last exception shall not apply when the request is supported by shareholders representing at least one-fourth of the share capital.
4. The call of the ordinary General Shareholders' Meeting shall set forth the means whereby any shareholder may obtain from the Company, without charge and on an immediate basis, the documents that must be submitted for approval by the shareholders at such ordinary General Shareholders' Meeting, as well as the Management Report and the Auditors' Report.
5. When the shareholders are to deal with an amendment to the By-Laws, besides the statements required in each case by Law, the notice of the call must make clear the right of all shareholders to examine at the Company's registered office the complete text of the proposed amendment and the report thereon and to request that such documents be delivered or sent to them without charge.
6. In all cases in which the Law so requires, such information and supplemental documentation as is mandatory shall be made available to the shareholders.

**Article 17. ESTABLISHMENT OF A QUORUM FOR THE MEETING**

1. The ordinary as well as the extraordinary General Shareholders' Meeting shall be validly established with the minimum quorum required by applicable legislation in effect from time to time, taking into account the matters appearing on the agenda.
2. The absence of shareholders occurring once a quorum for the General Shareholders' Meeting has been established shall not affect the validity of the meeting.
3. If the attendance of shareholders representing a particular percentage of share capital or the consent of specific interested shareholders is required pursuant to applicable legal or by-laws provisions in order to validly adopt a resolution regarding one or more items on the agenda of the General Shareholders' Meeting, and such percentage is not reached or such shareholders are not present in person or by proxy, the shareholders shall be limited to deliberation and decision regarding those items on the agenda which do not require such percentage of capital or the presence of such shareholders in order to be decided.

**Article 18. RIGHT TO ATTEND AND TO BE REPRESENTED AT THE MEETING**

1. All holders of voting shares may attend the General Shareholders' Meeting and take part in deliberations thereof, with the right to be heard and to vote.
2. In order to exercise the right to attend, shareholders must cause the shares to be registered in their name in the corresponding book-entry registry at least five (5) days prior to the day on which the General Shareholders' Meeting is to be held. This circumstance must be evidenced by means of the appropriate attendance card or validation certificate issued by the entity or entities in charge of book-entry registries, or in any other form allowed by applicable legislation.
3. The members of the Board of Directors must attend the General Shareholders' Meeting. The absence of any of such members shall not affect the validity of the General Shareholders' Meeting.
4. Managers, experts and other persons with an interest in the efficient running of corporate affairs may be authorized to attend the General Shareholders' Meeting by the Chairman thereof. In addition, the Chairman of the General Shareholders' Meeting may grant the press, financial analysts and any other person the Chairman deems appropriate access to such General Shareholders' Meeting, although the shareholders acting thereat may revoke such authorization.
5. All shareholders having the right to attend may be represented at the General Shareholders' Meeting by proxy through another person, even though such person is not a shareholder, if the requirements and formalities established in the Law, these By-Laws and the Regulations for the General Shareholders' Meeting are met.

6. Without prejudice to the provisions of Section 108 of the Companies Law, proxies shall be given in writing or by postal or electronic correspondence, in which case the provisions of the Regulations for the General Shareholders' Meeting shall apply.
7. The Chairman of and the Secretary for the General Shareholders' Meeting shall have the widest powers to recognize the validity of a document or media evidencing representation by proxy; only those which lack the absolute minimum requirements may be deemed invalid, and only provided that the lack thereof cannot be cured.
8. A proxy is always revocable. Personal attendance at the General Shareholders' Meeting of the shareholder granting the proxy shall have the effect of revoking the proxy.

#### **Article 19. PLACE AND TIME OF THE MEETING**

1. The General Shareholders' Meeting shall be held at the place indicated in the call to meeting in the municipality where the registered office of the Company is located.
2. If no place is indicated in the call to meeting, it shall be deemed that the meeting shall take place at the Company's registered office.
3. The General Shareholders' Meeting may be attended by going to the place where the meeting is to be held or, if applicable, to other places provided by the Company and indicated in the call to meeting, and which are connected therewith by video conference systems that allow recognition and identification of the parties attending, permanent communication among the attendees regardless of their location, and participation and voting, all in real time. The principal place of the meeting must be located in the municipal area of the Company's registered office, but supplemental locations need not be so located. For all purposes relating to the General Shareholders' Meeting, attendees at any of the sites shall be deemed attendees at the same individual meeting. The meeting shall be deemed to have been held at the principal location thereof.
4. The shareholders may agree to extend their meeting for one or more consecutive days at the proposal of the majority of the Directors in attendance or at the request of shareholders representing at least one-fourth of the share capital present. Regardless of the number of sessions, the General Shareholders' Meeting shall be deemed to be a single meeting, and a single set of minutes shall be prepared for all of the sessions. The Shareholders may also temporarily suspend the meeting under the circumstances and in the manner set forth in the Regulations for the General Shareholders' Meeting.

#### **Article 20. CHAIRMAN, SECRETARY AND PRESIDING COMMITTEE OF THE MEETING**

1. The Chairman of the Board of Directors or, in the absence thereof, the Vice-Chairman, shall act as the Chairman of the General Shareholders' Meeting; if there are several Vice-Chairmen, they shall act in the order set forth in paragraph 3 of Article 40 of these By-Laws; in the absence of the foregoing, the longest-serving Director shall serve, and in the absence of all of the above, the shareholder designated for such purpose by the shareholders themselves shall serve.

2. The Secretary of the Board of Directors and, in his absence, the Vice-Secretary of the Board of Directors, shall act as the Secretary for the General Shareholders' Meeting; in the absence of both, the Director with the least amount of time in such position shall serve and, in the absence of all of the above, the shareholder designated for such purpose by the shareholders themselves shall serve.
3. The Chairman and the Secretary, together with the other members of the Board of Directors in attendance, shall constitute the Presiding Committee [*Mesa*] of the General Shareholders' Meeting.

#### **Article 21. LIST OF ATTENDEES**

1. Once the Presiding Committee has been formed, and prior to beginning with the agenda, a list of attendees shall be prepared which sets forth the nature or representation of each attendee and the number of their own or other parties' shares present. At the end of the list, there shall be a determination of the number of shareholders present (including those voting from a distance) in person or by proxy at the meeting, as well as the amount of capital they own, with a specification as to which capital corresponds to shareholders with the right to vote. Pursuant to the provisions of the Regulations of the Commercial Registry, the list may be made up of an index file or be prepared in electronic form.
2. Once the list has been prepared, the Chairman shall declare whether or not the requirements for a valid quorum for the General Shareholders' Meeting have been met.  
Questions or claims arising with respect to these matters shall be resolved by the Chairman.  
Immediately thereafter, if appropriate, the Chairman shall declare a quorum for the General Shareholders' Meeting to validly exist.
3. If a Notary Public has been required to prepare the minutes of the meeting, the Notary Public shall ask and make clear in the minutes whether there are reservations or objections regarding the statements of the Chairman in connection with the number of shareholders in attendance and the capital which is present or represented at the meeting.

#### **Article 22. DELIBERATIONS AND VOTING**

1. The Chairman shall: direct the meeting such that deliberations are carried out pursuant to the agenda; accept or reject new proposals relating to matters on the agenda; direct the deliberations, granting the floor to shareholders who so request it, and taking the floor away or refusing to grant it when the Chairman deems that a particular matter has been sufficiently debated, is not included in the agenda or hinders the progress of the meeting; indicate the time for voting; calculate the votes, with the assistance of the Secretary for the General Shareholders' Meeting; proclaim the results thereof; temporarily suspend the General Shareholders' Meeting; close the meeting; and, in general, exercise all powers, including those of order and discipline, which are required to properly hold the General Shareholders' Meeting.
2. The Chairman, even when present at a session, may entrust management of debate to a Director the Chairman deems appropriate or to the Secretary, who shall carry out these

duties on behalf of the Chairman, and the Chairman may retake them at any time. In the event of temporary absence or supervening disability, the appropriate person pursuant to the provisions of paragraph 1 of Article 20 shall assume the duties of Chairman.

3. Resolutions shall be voted upon by the shareholders at the General Shareholders' Meeting pursuant to the provisions of the following articles and the Regulations for the General Shareholders' Meeting.

#### **Article 23. CASTING OF VOTES FROM A DISTANCE**

1. Shareholders may cast their vote regarding proposals relating to the items included in the agenda by mail or by electronic communication.
2. Mail votes shall be cast by sending to the Company a document in which such vote is recorded, accompanied by the attendance card issued by the entity or entities in charge of the book-entry registry.
3. Votes by electronic communication shall be cast using a recognized electronic signature or other type of guarantee that the Board of Directors deems best ensures the authenticity and identification of the shareholder exercising the right to vote, which shall be accompanied by a copy of the attendance and voting card in an unalterable electronic format.
4. Votes cast by either of the means set forth in the preceding paragraphs must be received by the Company before midnight on the day immediately prior to the date provided for the holding upon first call of the General Shareholders' Meeting. Otherwise, the vote shall be deemed not to have been cast.
5. The distance voting referred to in this article shall be rendered void:
  - a) By subsequent express revocation made by the same means used to cast the vote and within the period established for such voting.
  - b) By attendance at the General Shareholders' Meeting in person or by proxy of the shareholder casting the vote.
6. The Board of Directors is empowered to elaborate upon the foregoing provisions by establishing state-of-the-art rules, means and procedures in order to organize the casting of votes and grant of proxies by electronic means, following, if applicable, the rules and regulations issued for such purpose and these By-Laws.

Specifically, the Board of Directors may (i) establish rules for the use of guarantees other than electronic signatures for casting electronic votes pursuant to the provisions of paragraph 3 above, and (ii) reduce the advance period set forth in paragraph 4 above for receipt by the Company of votes cast by postal or electronic communication.

In any event, the Board of Directors shall adopt the measures needed to avoid possible deception and to ensure that the person casting a vote or granting a proxy by postal or electronic communication has the right to do so pursuant to the provisions of Article 18

of these By-Laws and the provisions of the Regulations for the General Shareholders' Meeting.

The implementing rules adopted by the Board of Directors pursuant to the provisions of this paragraph shall be published on the Company's website.

7. Shareholders who cast votes from a distance pursuant to the provisions of this article shall be deemed present for purposes of determining the establishment of a quorum for the General Shareholders' Meeting in question.
8. Remote attendance at the General Shareholders' Meeting by means of data transmission and simultaneously and distance electronic voting during the holding of the General Shareholders' Meeting may be admitted if it is so established in the Regulations for the General Shareholders' Meeting, subject to the requirements set forth therein.

#### **Article 24. APPROVAL OF RESOLUTIONS**

1. The shareholders, acting at an ordinary or extraordinary General Shareholders' Meeting, shall adopt resolutions with the majorities of votes cast in person or by proxy required by these By-Laws or by the Companies Law.

Each voting share, whether its holder is present in person or by proxy at the General Shareholders' Meeting, shall grant the holder the right to one vote.

2. The approval of a resolution shall require the favorable vote of one-half plus one of the voting shares whose holders are present in person or by proxy at the General Shareholders' Meeting. The foregoing does not affect situations in which these By-Laws or the Law require a greater majority.

#### **Article 25. DOCUMENTATION OF RESOLUTIONS**

1. Documentation of shareholder resolutions, the conversion thereof into a public instrument and the registration thereof with the Commercial Registry shall be carried out pursuant to the provisions of Law and the Regulations of the Commercial Registry.
2. The total or partial certificates needed to evidence shareholder resolutions shall be issued and signed by the Secretary of the Board of Directors or by the Vice-Secretary with the approval of the Chairman or, if applicable, of one of the Vice-Chairmen.

### **SECTION TWO. MANAGEMENT OF THE COMPANY**

#### **Article 26. STRUCTURE OF THE COMPANY'S MANAGEMENT**

1. Management of the Company is vested in a Board of Directors, an executive committee called the Executive Committee [*Comisión Ejecutiva Delegada*] and, if any and if so resolved by the Board of Directors, a Chief Executive Officer [*Consejero Delegado*].
2. Each of these bodies shall have the powers set forth in these By-Laws and in the Regulations of the Board of Directors, without prejudice to the provisions of Law.

#### **Article 27. REGULATIONS OF THE BOARD OF DIRECTORS**

1. The Board of Directors shall be governed by the provisions set forth in these By-Laws, the Regulations of the Board of Directors, and the Law.
2. The Regulations of the Board of Directors shall take into account and adapt the principles and standards contained in the most widely recognized Good Governance recommendations at all times to the specific circumstances and needs of the Company. This statement is for guidance purposes and does not imply a lessening of the self-regulatory powers and duties of the Board of Directors.

#### **Article 28. POWERS OF THE BOARD OF DIRECTORS**

1. The Board of Directors has the power to adopt resolutions regarding all matters not assigned by the Law or these By-Laws to the shareholders acting at the General Shareholders' Meeting.
2. As a general rule, the Board of Directors, which has the widest powers and authority to manage, direct, administer and represent the Company, shall entrust the day-to-day management of the Company to the representative management decision-making bodies and shall focus its activity on the general duty of supervision and on consideration of those matters which are of particular importance to the Company.

In particular, the Board of Directors, acting upon its own initiative or at the proposal of the corresponding internal decision-making body, shall deal with the matters set forth below (as an example only):

- (a) Draw up the Company's Annual Financial Statements, Management Report and Proposal for the Allocation of Profits or Losses, as well as the consolidated Financial Statements and Management Report, and prepare the financial information that the Company must periodically make public due to its status as listed company.
- (b) Designate Directors to fill vacancies by interim appointment and propose to the shareholders the appointment, approval of the interim appointment, re-election or removal of Directors.
- (c) Designate, renew and terminate internal positions within the Board of Directors and the members of and positions on the Committees established within the Board.
- (d) Set, pursuant to these By-Laws, the compensation policy, the performance assessment policy and the compensation of Directors, after a report of the Nominating and Compensation Committee.
- (e) Approve the appointment and removal of senior managers of the Company, as well as set the compensation or indemnification, if any, payable to them in the event of removal, all at the proposal of the Chief Executive Officer, if any, and with the report of the Nominating and Compensation Committee.
- (f) Approve the compensation policy and the performance assessment, as well as the basic terms and conditions of the contracts with the Company's senior managers, based on the proposal of the Chief Executive Officer, if any, which shall be

- submitted to the Board of Directors by the Nominating and Compensation Committee.
- (g) Prepare the dividend policy and submit the corresponding proposed resolutions on the allocation of profits or losses to the shareholders at the General Shareholders' Meeting, as well as decide upon the payment of interim dividends.
  - (h) Decide upon proposals submitted to it by the Executive Committee, the Chief Executive Officer or the Committees of the Board of Directors.
  - (i) Declare its position regarding all tender offers for the Company's securities.
  - (j) Submit to the shareholders acting at the General Shareholders' Meeting the proposed amendments to the Regulations for the General Shareholders' Meeting that it deems appropriate in order to improve the operation thereof and the exercise of shareholder rights.
  - (k) Approve and amend, pursuant to the provisions thereof, the Regulations of the Board of Directors governing its internal organization and operation.
  - (l) Prepare the annual corporate governance report.
  - (m) Call the General Shareholders' Meeting.
  - (n) Carry out resolutions approved by the shareholders at a General Shareholders' Meeting and perform any duties that the shareholders have assigned to it.
  - (o) Define the structure of general powers of the Company to be granted by the Board itself or by the representative management decision-making bodies mentioned in the first sub-paragraph of paragraph 2 of this article.
  - (p) Make decisions regarding any other matter within its authority which, in the judgment of the Board of Directors, is deemed to be in the interests of the Company, or which the Regulations of the Board of Directors reserve to the Board as a whole.
3. The Board of Directors, within the scope of its authority relating to the general duty of supervision, acting on its own initiative or at the proposal of the appropriate internal decision-making body, shall also deal with the matters set forth below (as an example only):
- (a) Prepare the Company's strategy and general lines of policy, draft programs and state objectives in order to carry out all business activities included in the corporate purpose, all in coordination with the parent or controlling company of Iberdrola Renovables. Specifically, the Board of Directors shall approve: (i) the annual budget; (ii) the investment and financing policy; and (iii) the policy to be adopted by the Company in connection with treasury stock and, especially, the limits thereto.
  - (b) Promote and supervise the management of the Company, as well as the fulfillment of established objectives.
  - (c) Establish the risk control and management policy, identify the principal risks to the Company and organize appropriate internal control and information systems, as well as carry out a periodic monitoring of such systems.
  - (d) Set the foundations of the corporate organization in order to ensure the greatest efficiency thereof and effective supervision by the Board of Directors.

- (e) Set policy regarding the provision of information to shareholders and to the markets in general under the standards of transparency and truthfulness of the information.

#### **Article 29. REPRESENTATION OF THE COMPANY**

1. Representation of the Company both in and out of court shall be the purview of the Board of Directors, its Chairman, the Executive Committee and, if any and if approved by the Board of Directors, a Chief Executive Officer.
2. The Board of Directors and the Executive Committee shall have the power to represent the Company when acting collectively. The Chairman, and the Chief Executive Officer, if any, shall have the power to represent the Company when acting individually.
3. The resolutions of the Board of Directors or the Executive Committee shall be carried out by its Chairman or by the Director designated in the resolution, either of whom may act individually.

#### **Article 30. COMPOSITION AND APPOINTMENT OF THE BOARD OF DIRECTORS**

1. The Board of Directors shall be composed of a minimum of eight (8) Directors and a maximum of fifteen (15), who shall be appointed at the General Shareholders' Meeting, subject to applicable legal provisions. The determination of the number of Directors shall be the purview of the shareholders acting at the General Shareholders' Meeting, for which purpose the shareholders may establish such number either by express resolution or indirectly, through the filling or non-filling of vacancies or the appointment or non-appointment of new Directors within the minimum and maximum numbers mentioned above. Notwithstanding the foregoing, the Board of Directors shall propose to the shareholders at the General Shareholders' Meeting the number of Directors that, according to the circumstances affecting the Company and taking into account the maximum and minimum numbers referred to above, best suits the Good Governance recommendations with a view to ensuring the proper representation and effective operation of the Board.

The foregoing shall be deemed to be without prejudice to the right of proportional representation to which the shareholders are entitled under the provisions of the Companies Law.

2. The following may not be appointed as Directors:
  - (a) Domestic or foreign companies competing with the Company, or the directors or senior managers thereof. In no event shall companies belonging to the same group as the Company be deemed to be competitor companies.
  - (b) Persons holding the position of director in more than four (4) companies with shares trading on domestic or foreign securities exchanges.
  - (c) Persons who, during the two (2) years prior to their appointment, have occupied high-level positions in the government which are incompatible with the simultaneous performance of the duties of a director of a listed company under national or autonomous community legislation, or positions of responsibility with

entities regulating the energy industry, the securities markets or other industries in which the Company operates.

- (d) Persons who are under any other circumstance of incompatibility or prohibition governed by provisions of a general nature.

### **Article 31. TYPES OF DIRECTORS**

#### 1. The following shall be deemed:

- Executive Directors: those who perform senior management duties or are employees of the Company or of its group. For the purposes hereof, companies that may be deemed to be subsidiaries of or controlled by Iberdrola Renovables pursuant to Section 4 of Law 24/1988, of July 28, on the Securities Market, shall be deemed to form a part of the Iberdrola Renovables group.
- External proprietary Directors (representing a major shareholder): (a) those who own a shareholding interest that is greater than or equal to the interest that is considered significant by law or who have been appointed owing to their status as shareholders, although their shareholding interest does not reach such amount; and (b) those whose appointment has been proposed by shareholders of the type described in the preceding letter (a).
- External independent Directors: those who, having been appointed because of their personal and professional qualities, may carry out their duties without being conditioned by relationships with the Company, its significant shareholders or its managers.
- Other external Directors: those external Directors that may not have status as proprietary or independent directors.

The Regulations of the Board of Directors may further elaborate upon and develop these concepts.

#### 2. The Board of Directors shall be composed such that:

- (a) External proprietary and independent Directors represent a large majority on the Board of Directors, and the number of executive directors is the minimum number required, taking into account the complexity of the group to which the Company belongs and the shareholding interest percentage represented by proprietary Directors.
- (b) Among external Directors, the relation between the number of proprietary Directors and the number of independent Directors will tend to reflect, to the extent possible, the ratio of the capital of the Company represented by proprietary Directors to the rest of the capital.

The provisions of letters (a) and (b) above shall be mandatory for the Board of Directors, which shall comply with such provisions when exercising its power to propose appointments to the shareholders at the General Shareholders' Meeting and to make interim appointments to fill vacancies, and shall merely serve as guidance for the shareholders at the General Shareholders' Meeting.

3. The status of each Director shall be explained by the Board of Directors to the shareholders at the General Shareholders' Meeting at which the appointment thereof must be made or approved, and shall be confirmed or, if applicable, revised annually in the annual corporate governance report after verification by the Nominating and Compensation Committee.

#### **Article 32. DESIGNATION OF POSITIONS**

1. The Board of Directors shall elect from among its members a Chairman and, if it so decides, one or more Vice-Chairmen, at the proposal of the Chairman and after a report of the Nominating and Compensation Committee.
2. At the proposal of the Chairman and after a report of the Nominating and Compensation Committee, the Board of Directors shall appoint a Secretary and, if applicable, a Vice-Secretary, who need not be Directors. In the absence of the Secretary and the Vice-Secretary, the Director appointed by the Board of Directors from among those attending the meeting in question shall act as such.

In addition, the Board of Directors shall appoint a Corporate Counsel [*Letrado Asesor*] to the Company's management decision-making bodies if such position is required under applicable law. The Secretary, or the Vice-Secretary, if any, may perform the duties of Corporate Counsel if they are practicing attorneys-at-law and satisfy the other requirements established by applicable law and it is so determined by the Board of Directors.

3. The Chairman, Vice-Chairmen and, if applicable, the Secretary and Vice-Secretary of the Board of Directors who are re-elected as members of the Board of Directors by the shareholders at the General Shareholders' Meeting, shall continue to perform the duties they previously carried out within the Board of Directors, without the need for a new election and without prejudice to the Board of Directors' power of revocation with respect to such positions.

#### **Article 33. MEETINGS OF THE BOARD OF DIRECTORS**

1. The Board of Directors shall meet with the frequency it deems appropriate, but at least once a month unless the Chairman, in his sole judgment, deems it appropriate to suspend any of such sessions. The Board shall also meet in the cases provided for in the Regulations of the Board of Directors. Meetings shall take place at the Company's registered office or at the place, in Spain or abroad, indicated in the call to meeting.
2. The call to meeting of the Board of Directors shall be carried out by means of letter, fax, telegram, e-mail or any other means, and shall be authorized under the signature of the Chairman, or of the Secretary or Vice-Secretary, by order of the Chairman. Notice of the call shall be given as much in advance as is necessary for the Directors to receive it no later than the third day prior to the date of the meeting, except in the case of emergency meetings. Excepted from the foregoing shall be those instances in which the Regulations of the Board of Directors prescribe that notice of specific length be given. The call to meeting shall always include, unless this requirement may be dispensed with

upon sufficient grounds, the agenda for the meeting and, if appropriate, an attachment containing any information deemed necessary.

3. Without prejudice to the foregoing, the Board of Directors shall be deemed to have validly met without the need for a call if all of the Directors present in person or by proxy unanimously agree to hold the meeting as a plenary meeting and to the items of the agenda to be dealt with.
4. Meetings of the Board of Directors may also be held in several places connected by a conference system which permits the recognition and identification of the attendees, permanent communication among the attendees regardless of their location, and participation in discussion and the casting of votes, all in real time. Attendees at any of such places shall be deemed to have attended the same meeting for all purposes relating to the Board of Directors. The meeting shall be deemed to have been held where the majority of the Directors are located and, if they are located in different places in equal numbers, where the Director chairing the meeting is located.
5. If no Director is opposed thereto, voting by the Board may occur in writing without a meeting. In this instance, the Directors may deliver to the Chairman (or to the Secretary or Vice-Secretary acting on the Chairman's behalf) their votes and the considerations they wish to appear in the minutes, using the same methods mentioned in paragraph 2 above. Resolutions adopted by this procedure shall be recorded in minutes prepared pursuant to the provisions of Law.

**Article 34. QUORUM FOR THE MEETING AND MAJORITIES REQUIRED TO ADOPT RESOLUTIONS**

1. The Board of Directors shall validly meet when at least one-half plus one of the Directors are present in person or by proxy.
2. All of the Directors may cast their vote and give their proxy in favor of another Director. The proxy granted shall be a special proxy for the Board meeting in question, and may be communicated by any of the means set forth in paragraph 2 of the preceding Article.
3. The Chairman shall organize the debate, stimulating the participation of all of the Directors in the deliberations of the Board.
4. Resolutions shall be adopted by absolute majority of the Directors present at the meeting in person or by proxy, except when the resolutions refer to a permanent delegation of powers of the Board of Directors to the Executive Committee or to the Chief Executive Officer, if any, and to the appointment of Directors to hold office as such, which shall require for validity the favorable vote of two-thirds of the Directors. In order to be valid, amendments to the Regulations of the Board of Directors shall require the favorable vote of two-thirds of the Directors present at the meeting in person or by proxy. The foregoing shall not apply in those instances in which the By-Laws or the Law provide for a greater majority. In the event of a tie, the Chairman of the Board of Directors shall have the tie-breaking vote.

**Article 35. FORMALIZATION OF RESOLUTIONS**

1. The deliberations and resolutions of the Board of Directors shall be recorded in a book of minutes, which minutes shall be signed by the Chairman and the Secretary, or by the person acting in their stead.
2. Total or partial certifications which are required to record the resolutions of the Board of Directors shall be issued and signed by the Secretary or the Vice-Secretary of the Board of Directors with the approval of the Chairman or, if applicable, of one of the Vice-Chairmen.

**Article 36. COMMITTEES OF THE BOARD OF DIRECTORS**

1. The Board of Directors must create and maintain an Executive Committee, an Audit and Compliance Committee and a Nominating and Compensation Committee.
2. The Board of Directors may also create other Committees or Commissions with such powers as are determined by the Board of Directors.

**Article 37. EXECUTIVE COMMITTEE**

1. There shall be an executive committee permanently operating as the representative of the Board of Directors, which committee shall be called the Executive Committee, and which shall have by delegation all of the powers of the Board of Directors that may be delegated pursuant to the law or the By-Laws, unless otherwise determined by the Board of Directors. The Executive Committee shall be composed of the Directors designated by favorable vote of two-thirds of the Directors, and renewals shall occur at the times, in the manner and in the number determined by the Board of Directors, which shall also establish rules for the operation thereof.
2. The Executive Committee shall be composed of the number of Directors decided by the Board of Directors, with a minimum of three (3) Directors and a maximum of six (6). The Chairman of the Board of Directors or, in the absence thereof, the Director that the Board of Directors designates from among the members of the Executive Committee, shall act as the Chairman of the Executive Committee. The Secretary of the Board of Directors or, in the absence thereof, the Vice-Secretary of the Board of Directors or, in the absence of both, the Director appointed by the Executive Committee among those who sit thereon and are in attendance at the meeting in question shall act as Secretary of the Committee.
3. The Executive Committee shall meet at least one (1) time per month and as many other times as deemed appropriate by the Chairman, who may also suspend one or more of the ordinary meetings when deemed appropriate in his sole judgment. In addition, the Executive Committee shall meet when so requested by two (2) Directors who are members thereof. The Executive Committee shall deal with all matters within the power of the Board of Directors which, in the sole judgment of the Committee, should be resolved without further delay, excepting only the drawing-up of the financial statements, the presentation of the balance sheets at the General Shareholders' Meeting, the powers which are given by the shareholders to the Board of Directors without the

power of delegation and the powers of the Board of Directors that may not be delegated pursuant to legal or by-law restrictions. Resolutions adopted by the Executive Committee shall be reported to the Board of Directors at the next meeting of the Board following the meetings of the Committee.

4. Meetings of the Executive Committee shall be validly held when at least one-half plus one of the Directors sitting thereon are present in person or by proxy.
5. Resolutions of the Executive Committee shall be adopted by majority of the Directors sitting on the Committee who are present at the meeting in person or by proxy. In the event of a tie, the Chairman shall have the tie-breaking vote.
6. The provisions of these By-Laws regarding the operation of the Board of Directors and, in particular, those governing the call to meetings, the grant of a proxy to another Director, plenary meetings, casting of votes in writing and without a meeting and approval of the minutes of the meetings, shall apply to the Executive Committee, to the extent they are not incompatible with the nature thereof.

#### **Article 38. AUDIT AND COMPLIANCE COMMITTEE**

1. The Board of Directors shall create a permanent Audit and Compliance Committee, which shall be composed of a minimum of three (3) Directors and a maximum of five (5) Directors appointed by the Board of Directors from among the external Directors who are not members of the Executive Committee. The Audit and Compliance Committee shall have a Chairman, who must be one of the independent Directors that are members of the Committee, and a Secretary, who need not be a Director, appointed by the Board of Directors.

Unless otherwise decided by the Board of Directors, the Directors sitting on the Audit and Compliance Committee shall hold their positions for so long as they remain Directors of the Company. Renewal and re-election to and removal from office of the Directors sitting on the Committee shall be governed by resolution of the Board of Directors. The position of Chairman shall be held for a maximum period of (4) years, after which period such person may not be re-elected until the passage of one year from ceasing to act as such, without prejudice to such person continuing or being re-elected as a member of the Committee.

2. In all events, the Audit and Compliance Committee shall have the power to:
  - (a) Report to the General Shareholders' Meeting with respect to matters raised therein by shareholders regarding its powers.
  - (b) Propose appointments of the Company's Auditors to the Board of Directors for submission to the General Shareholders' Meeting.
  - (c) Supervise the management of the Internal Audit Area, which will be functionally controlled by the Chairman of the Audit and Compliance Committee.
  - (d) Know the process for gathering financial information and associated internal systems for monitoring risks relevant to the Company.

- (e) Receive information from the Auditors regarding matters that might risk the independence thereof which are related to the auditing procedure and generally regarding any other information provided for in legislation regarding the auditing of financial statements and in the technical auditing regulations in effect at any time.
  - (f) Report in advance on the Company's annual corporate governance report and ensure compliance with legal requirements and those of the Codes of Professional Conduct and Good Governance adopted by the Board of Directors.
  - (g) Exercise such other powers, if any, as may be assigned to it by these By-Laws, the Regulations of the Board of Directors or the Board of Directors.
3. For purposes of the operation of the Committee, it shall meet as many times as its Chairman deems necessary for the fulfillment of its obligations, and at least four (4) times per year, or when requested by at least one-half of its members.
- Meetings of the Committee shall be validly held when one-half plus one of its members are present in person or by proxy, and shall adopt resolutions by majority of the members present in person or by proxy. In the event of a tie, the Chairman shall have the tie-breaking vote.
4. The Audit and Compliance Committee shall submit for approval of the Board of Directors a Report of its activities during the fiscal year, which shall thereafter be made available to shareholders and investors on occasion of the call of the ordinary General Shareholders' Meeting.
5. The foregoing rules shall be developed by the Board of Directors in the Regulations of the Board of Directors, always favoring independence in the operation of the Committee.

#### **Article 39. NOMINATING AND COMPENSATION COMMITTEE**

1. The Board of Directors shall create a permanent Nominating and Compensation Committee, which shall be an internal informational and consultative body without executive powers, and which shall have the information, advisory and proposal-making powers within its scope of action as set forth in paragraph 2 of this article. The Nominating and Compensation Committee shall be composed of a minimum of three (3) Directors and a maximum of five (5), appointed by the Board of Directors from among the external Directors. A majority of the Directors serving on the Committee shall be independent Directors. The Board of Directors shall also appoint the Chairman thereof from among the Directors sitting on such Committee, which Chairman must be an independent Director, as well as its Secretary, who need not be a Director.
- Unless otherwise decided by the Board of Directors, the Directors sitting on the Nominating and Compensation Committee shall hold their positions for so long as they remain Directors of the Company. Renewal and re-election to and removal from office of the Directors sitting on the Committee shall be governed by resolution of the Board of Directors.
2. The Nominating and Compensation Committee shall have the power to supervise the procedure for selecting members of the Board of Directors and senior managers of the Company (the latter at the proposal of the Chief Executive Officer, if any), as well as to

assist the Board of Directors in the determination and supervision of the compensation policy for such persons.

In particular, the Nominating and Compensation Committee shall have the power to:

- (a) Report on and review the criteria that should be followed in composing the Board of Directors and in selecting candidates, defining their duties and necessary qualifications and assessing the time and dedication required for the proper performance of their duties.
- (b) Bring independent Director designation proposals to the Board of Directors for the interim appointment thereof to fill a vacancy or, as the case may be, for submission of such proposals to a decision by the shareholders at the General Shareholders' Meeting, as well as proposals for the re-election or removal of said Directors by the shareholders at the General Shareholders' Meeting.

Report to the Board of Directors on proposals to appoint non-independent Directors on an interim basis to fill vacancies or, if applicable, for submission of such proposals to a decision by the shareholders at the General Shareholders' Meeting, as well as on proposals for the re-election or removal of said Directors by the shareholders at the General Shareholders' Meeting.

- (c) Propose to the Board of Directors the members who should make up each of the Committees.
  - (d) Propose to the Board of Directors the system and amount of annual Director compensation, as well as the individual compensation of executive Directors and other terms and conditions of their contracts, in all cases pursuant to the provisions of these By-Laws.
  - (e) Report to the Board of Directors regarding the appointment and/or removal of senior managers of the Company, as well as regarding the compensation or indemnification, if any, that may be established in the event of removal of such senior managers, all at the proposal of the Chief Executive Officer, if any.
  - (f) Submit to the Board of Directors, together with the corresponding reports, the proposals brought to it by the Chief Executive Officer, if any, regarding the compensation policy applicable to senior managers and the basic terms and conditions of their contracts.
  - (g) Report on incentive plans and pension supplements.
  - (h) Periodically review the compensation programs, evaluating the adequacy and results thereof.
  - (i) Exercise such other powers, if any, as are assigned to it by these By-Laws, the Regulations of the Board of Directors or the Board of Directors.
3. For purposes of the operation of the Committee, it shall meet as many times as needed, in the opinion of its Chairman, to fulfill its obligations, and at a minimum once each quarter or when so requested by at least one-half of the Directors sitting on the Committee.

A valid quorum shall exist when one-half plus one of the Directors sitting on the Committee are present in person or by proxy, and resolutions thereof shall be adopted by a majority of votes. In the case of a tie, the Chairman shall have the tie-breaking vote.

4. The foregoing rules shall be developed by the Board of Directors in the Regulations of the Board of Directors.

#### **Article 40. CHAIRMAN AND VICE-CHAIRMAN OR VICE-CHAIRMEN**

1. The Chairman of the Board of Directors shall be considered the President of the Company and of all of the management decision-making bodies of which the Chairman is a member, which he shall permanently represent.
2. The Chairman shall exercise the following powers in addition to the powers conferred by these By-Laws and the Law:
  - (a) To call and preside over meetings of the Board of Directors and the Executive Committee, if any, in the manner established by these By-Laws, setting the agenda for meetings and directing discussion and debate.
  - (b) To preside over the General Shareholders' Meeting and direct the discussion and debate therein.
  - (c) To bring to the Board of Directors those proposals which the Chairman deems appropriate for the efficient running of the Company, particularly those corresponding to the operation of the Board of Directors itself and other corporate decision-making bodies, as well as proposing the appointment of internal positions within the Board of Directors.
  - (d) To represent the Company before public entities and any industry or employers' bodies.
3. In the event of the absence, sickness or disability of the Chairman of the Board of Directors, the Chairman shall be replaced by the Vice-Chairman, if any; if there are several, the person replacing the Chairman shall be the Vice-Chairman that is expressly appointed by the Chairman; in default of the foregoing, the Vice-Chairman having the longest length of service and, if equal lengths of service, the oldest; and if there is no Vice-Chairman, the longest-serving Director and, in case of equal lengths of service, the oldest.

#### **Article 41. CHIEF EXECUTIVE OFFICER**

1. The Board of Directors, at the proposal of the Chairman after a report of the Nominating and Compensation Committee and with the favorable vote of two-thirds of the Directors, may appoint a Chief Executive Officer from among the Directors, with the powers it deems appropriate and which may be delegated pursuant to these By-Laws and the Law.
2. The Chief Executive Officer may propose to the Board of Directors, for its approval after a report of the Nominating and Compensation Committee, the definition and reorganization of the Company's organizational structure, the appointment and removal of senior managers, and the compensation or indemnification, if any, payable thereto in

the event of removal. In addition, the Chief Executive Officer may propose to the Nominating and Compensation Committee, for submission by it to the Board of Directors, the compensation policy as well as the basic terms and conditions of the contracts with the senior managers of the Company.

#### **Article 42. GENERAL DUTIES OF DIRECTORS**

1. In the performance of his duties, a Director shall act in good faith and with the diligence of a prudent businessman and a faithful representative, and shall comply with the duties prescribed by the By-Laws, the Regulations of the Board of Directors and the Law, acting in furtherance of the corporate interests.
2. The Regulations of the Board of Directors shall elaborate upon the specific obligations of Directors stemming from the duties of confidentiality, non-competition and faithfulness, with special focus on conflict of interest situations.

#### **Article 43. TERM OF OFFICE AND FILLING OF VACANCIES**

1. The Directors shall serve in their position for a term of five (5) years, so long as the shareholders acting at the General Shareholders' Meeting do not resolve to remove or dismiss them and they do not resign from their position. In particular, the Directors must submit their resignation from the position and formalize their withdrawal upon the occurrence of any of the instances of incompatibility or prohibition against performing the duties of director provided by Law, as well as the events in which the Regulations of the Board of Directors so provide.
2. Directors may be re-elected to one or more terms of five (5) years.
3. Vacancies which occur may be filled by the Board of Directors by making interim appointments among the shareholders pursuant to the Law until the next General Shareholders' Meeting, whereat the shareholders shall approve the appointments or elect the persons who should replace the Directors designated by interim appointment, or shall withdraw the vacant positions.

#### **Article 44. DIRECTOR COMPENSATION**

1. The Directors, in their capacity as members of the Board of Directors, shall have the right to receive compensation from the Company consisting of (a) a fixed payment; and (b) fees for attending meetings of the Board and the Committees thereof.

The total amount of compensation that the Company may pay to the members of the Board for the items set forth in the preceding paragraph shall not exceed the amount to be determined by the shareholders at the General Shareholders' Meeting for such purposes. The amount set by the shareholders at the General Shareholders' Meeting shall be maintained for so long as it is not modified by a new resolution of the shareholders at the General Shareholders' Meeting.

The setting of the exact amount to pay within the limit set by the shareholders at the General Shareholders' Meeting, the distribution thereof among the various Directors, the

standards to take into account for distribution thereof among the various Directors, the frequency of payment, and, in general, all that is not provided for by the shareholders acting at the General Shareholders Meeting, shall be the responsibility of the Board of Directors, following a proposal from the Nominating and Compensation Committee.

2. Independently of the provisions of the foregoing paragraph, and subject always to the approval of the shareholders, the compensation of Directors may also consist of the delivery of shares or options thereon, as well as a payment which takes as its reference the value of the Company's shares.
3. All rights and duties arising from membership on the Board of Directors shall be compatible with all other rights, duties and indemnification to which the Director may be entitled by reason of other employment or professional relationships, if any, that such Director may have with the Company. The fixed and variable compensation and the indemnification arising from the corresponding contracts shall be included in and paid with a charge to the by-law allocation accorded to the Board of Directors in the preceding paragraph 1.

#### **Article 45. POWERS OF INFORMATION AND INSPECTION**

1. A Director shall have the broadest powers to obtain information regarding any aspect of the Company, to examine its books, records, documents and other records of corporate transactions, to inspect its facilities, and to communicate with the senior managers of the Company.
2. The exercise of the powers of information shall first be channeled through the Chairman, the Chief Executive Officer, if any, or the Secretary of the Board of Directors.

#### **Article 46. ANNUAL CORPORATE GOVERNANCE REPORT**

1. The Board of Directors shall, on an annual basis and following a report by the Audit and Compliance Committee, annually approve a corporate governance report for the Company which shall include all specifications provided for by law and any other specifications which the Board of Directors deems appropriate to include therein.
2. The annual corporate governance report shall be approved prior to the publication of the call of the Company's ordinary General Shareholders' Meeting for the fiscal year to which such report refers, and shall be made available to the shareholders together with other documents relating to the General Shareholders' Meeting.
3. In addition, the annual corporate governance report shall be publicly disseminated as provided in the securities markets rules and regulations.

#### **Article 47. WEBSITE**

The Company shall maintain a website for shareholders' and investors' information, which shall include the documents and information provided for by Law, and at least the following:

1. The current By-Laws, as well as the amendments thereto made in the last twelve (12) months.
2. The current Regulations for the General Shareholders' Meeting.
3. The current Regulations of the Board of Directors and, if applicable, the current Regulations of the Committees of the Board of Directors.
4. The sustainability report or annual report for the last two (2) closed fiscal years, which will be published after preparation thereof for submission to the shareholders at the General Shareholders' Meeting.
5. The current Internal Regulations for Conduct in the Securities Markets.
6. The annual corporate governance report for the last closed fiscal year.
7. The information regarding the call to meeting, the agenda, the proposed resolutions, and any other relevant information that the shareholders may need in order to vote, starting upon publication of the first notice of the call to any ordinary or extraordinary General Shareholders' Meeting.
8. The information on the proceedings of the General Shareholders' Meetings held during the current and the prior fiscal years, and particularly, on the agenda, the composition of the General Shareholders' Meeting at the time when it is convened, and the resolutions adopted, with a statement of the number of votes cast and the direction of such votes on each of the proposals included in the agenda.
9. The existing channels of communication between the Company and the shareholders and, in particular, explanations pertinent to the exercise of a shareholder's right to receive information, indicating the postal and e-mail addresses to which the shareholders may direct their requests, which channels shall have been established for each General Shareholders' Meeting from the publication of the first notice of the call to meeting until the holding thereof.
10. The means and procedures for granting a proxy to attend a General Shareholders' Meeting, established for each Meeting from the moment of the call to meeting until the holding thereof.
11. The means and procedures for casting votes from a distance, including, where applicable, the forms required to evidence attendance and the casting of votes by means of data transmission at the General Shareholders' Meeting, established for each Meeting from the moment of the call to meeting until the holding thereof.
12. All significant events [*hechos relevantes*] of which notice was given to the National Securities Market Commission during the current fiscal year and the last closed fiscal year.

**TITLE IV. ANNUAL FINANCIAL STATEMENTS, DISTRIBUTION OF PROFITS,  
DISSOLUTION AND LIQUIDATION**

**Article 48. FISCAL YEAR AND DRAWING-UP OF ANNUAL FINANCIAL STATEMENTS**

1. The fiscal year shall commence on January 1 of each year and shall end on December 31.
2. The Annual Financial Statements (consisting of the Balance Sheet, the Profit and Loss Statement and the Notes to the Financial Statements) and the Management Report shall be prepared in compliance with the structure, principles and guidelines contained in current applicable provisions.
3. Within the first three (3) months of the year, the Board of Directors shall draw up the Annual Financial Statements, the Management Report and the Proposal for the Allocation of Profits or Losses and, if applicable, the consolidated Financial Statements and Management Report. The Annual Financial Statements and the Management Report must be signed by all the Directors. If the signature of any of them is missing, an indication of such circumstance shall be inserted into each of the documents where it is so missing, with express reference to the reason therefor.

**Article 49. AUDITORS**

1. The Annual Financial Statements and the Management Report of the Company, as well as the consolidated Annual Financial Statements and Management Report, must be reviewed by Auditors.
2. The Auditors shall be appointed by the shareholders acting at a General Shareholders' Meeting prior to the end of the fiscal year to be audited, for a fixed initial period that shall not be less than three (3) years nor greater than nine (9), to be counted from the date of commencement of the first fiscal year to be audited; the Auditors may be re-elected by the shareholders once the initial period has expired, upon the terms and for the periods provided by Law.
3. The Auditors shall prepare a detailed report on the results of their actions pursuant to the legal provisions governing the Auditing of Financial Statements.

**Article 50. APPROVAL OF FINANCIAL STATEMENTS AND ALLOCATION OF PROFITS/LOSSES**

1. The Annual Financial Statements of the Company and the consolidated Financial Statements shall be submitted for approval of the shareholders at the General Shareholders' Meeting.
2. The shareholders shall decide at the General Shareholders' Meeting upon the Allocation of Profits or Losses for the fiscal year in accordance with the approved Balance Sheet.

3. Once such payments as are provided for by the Law or these By-Laws have been made, dividends may only be distributed with a charge against the profits for the fiscal year or against unappropriated reserves, if the book value of net assets is not less than the share capital, or does not become so as a result of the distribution.
4. If the shareholders resolve to distribute dividends, they shall establish the time and form of payment thereof. The establishment of these standards and of any others that may be required or appropriate to carry out the resolution may be delegated to the Board of Directors.
5. The shareholders may resolve at the General Shareholders' Meeting that the dividend be paid totally or partially in kind, provided that:
  - (a) the assets or securities to be distributed are homogeneous;
  - (b) they are listed on an official exchange at the time the resolution is made effective, or the Company duly guarantees the liquidity thereof within a maximum period of one year; and
  - (c) they are not distributed for a lesser value than the value set forth for them in the Balance Sheet of the Company.
6. The distribution of dividends to shareholders shall be made in proportion to their paid-up capital.

#### **Article 51. FILING OF THE APPROVED FINANCIAL STATEMENTS**

The Board of Directors shall file the Annual Financial Statements and the Management Report of the Company, as well as the consolidated Financial Statements and Management Report, together with the corresponding Reports prepared by the Auditors and all other mandatory documents, in such manner and within such periods as are prescribed by Law.

#### **Article 52. GROUNDS FOR DISSOLUTION**

The Company shall be dissolved upon the occurrence of any of the events set forth in the Companies Law.

#### **Article 53. LIQUIDATION OF THE COMPANY**

1. From the moment the Company declares itself to be in liquidation, the Board of Directors shall cease to hold office and the Directors shall become liquidators of the Company. They shall make up a collective body which must be composed of an odd number of members. If necessary for such purpose, the Director having the least length of service since appointment shall cease to hold office.
2. During the liquidation period, the provisions of these By-Laws governing the calling and holding of General Shareholders' Meetings shall be complied with, and the shareholders shall be informed of the progress of the liquidation, so that the shareholders may adopt such resolutions as they deem appropriate.

3. All liquidating operations shall be carried out with due observance of applicable law.

#### **Article 54. SUPERVENING ASSETS AND LIABILITIES**

1. If corporate property appears after the entries relating to the Company have been cancelled, the liquidators shall assign to the former shareholders the additional share to which they may be entitled, for which purpose such property shall be first converted into cash where necessary.

After the passage of six (6) months from the date on which the liquidators were required to comply with the provisions of the foregoing, without the former shareholders having been assigned the additional share, or in the absence of liquidators, any interested party may file a petition with the Court of First Instance of the Company's last registered office for the appointment of a person to replace the liquidators in the performance of their duties.

2. The former shareholders shall be jointly and severally liable for all unpaid corporate liabilities up to the amount of what they may have received as their share in liquidation, without prejudice to the liability of the liquidators in the event of fraudulent or negligent conduct.
3. In order to comply with formal requirements relating to legal acts performed prior to the cancellation of the entries of the Company, or whenever necessary, the former liquidators may formalize legal acts in the name of the defunct Company following its cancellation in the registry. In the absence of liquidators, any interested party may file a petition for formalization by the Court of First Instance of the place where the last registered office of the Company was located.

### **TITLE V. FINAL PROVISIONS**

#### **SOLE FINAL PROVISION. JURISDICTION FOR THE RESOLUTION OF DISPUTES**

In connection with all litigious disputes that may arise between the Company and the shareholders with regard to the corporate affairs, both the Company and the shareholders waive the right to resort to their own jurisdiction and expressly submit to the jurisdiction of the courts of the place where the Company's registered office is located, except in those cases in which another jurisdiction is imposed by law.

**TO THE NATIONAL SECURITIES MARKET COMMISSION**

**ADDITIONAL INFORMATION TO THE PROSPECTUS FOR INITIAL PUBLIC OFFERING OF SHARES OF IBERDROLA RENOVABLES, S.A. UNIPERSONAL**

Iberdrola Renovables, S.A. Unipersonal ("IBERDROLA RENOVABLES" or the "Company") discloses the following information in addition to that contained in the prospectus for the initial public offering (the "Offering") of shares of IBERDROLA RENOVABLES registered with the official register of the National Securities Market Commission dated 22 November 2007:

**Maximum Retail Price of the Offering**

Today, IBERDROLA RENOVABLES and the Joint Global Coordinators of the Offering mutually agreed to set the maximum retail price of the Offering at seven (7) euros per share. This is the maximum price that investors in the Retail and Employee Tranche of the Offering will pay for each share of IBERDROLA RENOVABLES allotted to them (the "Maximum Retail Price").

The Maximum Retail Price will be used as a reference in order to perform, if appropriate, the scaling back of applications in the Retail Subtranche of the Offering, in accordance with the rules set out in section 5.2.3.(c) of the share securities note which is an integral part of the Prospectus. The Maximum Retail Price will also be used as a reference for fixing the number of shares that will be allotted to the applications submitted in the Employee Subtranche of the Offering.

The definitive price of the shares in all Tranches of the Offering will be set on 11 December 2007 and will be subject to new information in addition to that contained in the Prospectus.

**Evolution of the demand during the period of the Offering**

As of the date hereof, the demand during the period of the Offering in the Retail and Employee Tranche amounts to three point two (3.2) times the shares initially allocated to such Tranche considering the mean price of the indicative and non-binding price range established for the shares of the Company in the Offering.

Likewise, as of today, the demand during the period of the Offering in the Spanish Tranche for Qualified Investors, without taking into consideration the limits of the proposals with a limited price, amounts to three point three (3.3) times the shares initially allocated to such Tranche considering also the mean price of the indicative and non-binding price range established for the shares of the Company in the Offering.

Regarding the International Tranche, the roadshow began on 28 November 2007 and the book-building period is under way, making it premature to disclose any information regarding the evolution of the demand in this Tranche.

Madrid, 3 December 2007.

SEPARATE FINANCE

TO THE NATIONAL SECURITIES MARKET COMMISSION

**ADDITIONAL INFORMATION TO THE PROSPECTUS FOR THE INITIAL  
PUBLIC OFFERING OF SHARES OF IBERDROLA RENOVABLES, S.A.  
UNIPERSONAL**

Iberdrola Renovables, S.A. Unipersonal ("IBERDROLA RENOVABLES" or the "Company") discloses the following additional information in order to update certain information contained in section 5.2.3, sub-sections (i) and (iii) of the registration document which is an integral part of the prospectus for the initial public offering (the "Offering") of shares of IBERDROLA RENOVABLES registered with the official register of the National Securities Market Commission dated 22 November 2007:

**Acquisition of two companies to Gamesa Energía, S.A.**

According to the information contained in section 5.2.3.(i) of the share registration document, on 26 October 2005 the Company signed an agreement with Gamesa to acquire a total of 700 MW of installed capacity in wind farms currently in development in Spain and Italy.

In implementation of the agreement, the Company has acquired today 100% of the shares held by Gamesa Energía, S.A. in: (i) the company Sistemas Energéticos Tacica de Plata, S.A. Unipersonal, owner of the Tacica de Plata wind farm (26 MW of installed capacity) located in the municipal areas of Abia and Las Tres Villas (Almería) and (ii) the company Sistemas Energéticos Nacimiento, S.A. Unipersonal, owner of the Nacimiento wind farm (24 MW of installed capacity) located in Nacimiento (Almería).

The consideration of this transaction amounts in aggregate to 65.8 millions of euros.

Since both companies each have a single wind farm, the transactions will be accounted for as acquisitions of assets that are not considered as business. Therefore, the wind farms will be recorded at their market value (which is the same as their acquisition price), thus not generating goodwill.

**Acquisition of the Klamath cogeneration plant**

Regarding the agreement signed by the Company through its US subsidiary PPM Energy Inc. ("PPM") with the city of Klamath Falls (Oregon, US), and referred to in section 5.2.3.(iii) of the registration document of the prospectus, by means of which PPM agreed to acquire the Klamath cogeneration plant, which has a capacity of 506 MW, the Company reports that after obtaining the appropriate approvals the transaction closed on November 30, 2007.

The total price paid by PPM amounts to approximately \$290 million (€198.5 million).

As the transactions mentioned above, since PPM has a single cogeneration plant (Klamath cogeneration plant), the transaction will be accounted for as an acquisition of assets that are not considered as business. Therefore, the cogeneration plant will be recorded at its market value (which is the same as its acquisition price), thus not generating goodwill.

**Obtaining of permits and authorisations for the acquisition of the remaining 50% of Eólicas de Euskadi, S.A.**

Regarding the offer made by the Company to Ente Vasco de la Energía (the Basque Energy Agency) for the acquisition of the total number of shares held by the Agency in the company Eólicas de Euskadi, S.A. (143 MW of installed capacity), equivalent to 50% of the share capital of Eólicas de Euskadi, S.A. (the Company owns the remaining 50%) which was likewise described in section 5.2.3.(iii) of the registration document of the prospectus, the Company informs that on 30 November 2007 the Department of Industry, Tourism and Trade of the Basque Government informed the Company that the Basque Energy Agency had obtained the approval of the Basque Parliament to proceed with the transaction. The acquisition is expected to close during the month of January 2008. Then, the value to be allocated to assets and liabilities will be calculated.

Madrid, 5 December 2007.

Iberdrola Renovables, S.A. Unipersonal

**AUDIT REPORT**

\* \* \* \*

**IBERDROLA ENERGÍAS RENOVABLES, S.A.U.**  
**Annual Accounts and Management Report**  
**for the year ended December 31, 2006**

(Translation of a report and annual accounts originally issued in Spanish.  
In the event of discrepancy, the Spanish-language version prevails)

## AUDIT REPORT ON THE ANNUAL ACCOUNTS

Translation of a report and annual accounts originally issued in Spanish. In the event of discrepancy, the Spanish-language version prevails

To the Sole Shareholder of  
Iberdrola Energías Renovables, S.A.U.

We have audited the annual accounts of Iberdrola Energías Renovables, S.A.U., which consist of the balance sheet at December 31, 2006, the income statement and the notes thereto for the year then ended, the preparation of which is the responsibility of the Company's sole director. Our responsibility is to express an opinion on the aforementioned annual accounts taken as a whole, based upon work performed in accordance with auditing standards generally accepted in Spain, which require the examination, through the performance of selective tests, of the evidence supporting the annual accounts, and the evaluation of their presentation, of the accounting principles applied, and of the estimates made.

In compliance with Spanish mercantile law, for comparative purposes the Company's sole director has included for each of the captions presented in the balance sheet, the income statement and the statement of source and application of funds, in addition to the figures of 2006, those of 2005. Our opinion refers only to the annual accounts for 2006. On April 3, 2006 we issued our audit report on the 2005 annual accounts, in which we expressed an unqualified opinion.

In our opinion, the accompanying 2006 annual accounts give a true and fair view, in all material respects, of the net equity and financial position of Iberdrola Energías Renovables, S.A.U. at December 31, 2006, and the results of its operations and the source and application of funds for the year then ended, and contain the required information necessary for their adequate interpretation and comprehension, in conformity with accounting principles and criteria generally accepted in Spain, applied on a basis consistent with those of the preceding year.

The accompanying management report for the year ended December 31, 2006 contains such explanations as the directors consider appropriate concerning the situation of the Company, the evolution of its business and other matters, and is not an integral part of the annual accounts. We have checked that the accounting information included in the report mentioned above agrees with the annual accounts for the year ended December 31, 2006. Our work as auditors is limited to verifying the management report in accordance with the scope mentioned in this paragraph, and does not include the review of information other than that obtained from the Company's accounting records.

ERNST & YOUNG, S.L.

Signed on the original in Spanish

April 2, 2007

**IBERDROLA ENERGÍAS RENOVABLES, S.A. sole shareholder company**

**Notes to the annual accounts**

**For the year ended 31 December 2006**

**1. INCORPORATION AND COMPANY ACTIVITY**

Iberdrola Energías Renovables, S.A.U. (formerly Iberdrola Energías Renovables II, S.A.U) was incorporated on 9 July 2001. Its corporate purpose is to engage in all types of activities, projects and services related to:

- The production and marketing of electricity generated using a range of renewable energies, including but not restricted to, hydro-electric or mini-hydroelectric, wind, solar, photovoltaic, biomass and energy from waste, as well as the development, construction, operation and maintenance of these kinds of renewable energy plants.
- The start-up of all kinds of services related to the engineering of renewable energy power plants in general, and specifically research, engineering or energy consultancy studies, and environmental, technical and economic studies relating to such power plants. Also, the operation and maintenance of plants owned by third parties and participation in projects concerning such plants both as owner or as contractor for their operation, conservation and maintenance.

The Company's registered office is at Tomás Redondo street, 1, Madrid.

**2. BASIS OF PRESENTATION OF THE ANNUAL ACCOUNTS**

The accompanying annual accounts are presented in accordance with Law 19/1989, of 25 July, partially reforming and adapting Spanish corporate law to EC Directives on companies, with Royal Decree 437/1998, of 20 March, approving the rules for adapting the Spanish National Chart of Accounts for electric utilities and with the Spanish National Chart of Accounts approved by Royal Decree 1643/1990, of 20 December, and, accordingly, they give a true and fair view of the Company's net worth, financial position, results and source and application of funds.

These annual accounts were prepared by the Company's Sole Director and will be submitted for approval by its Sole Shareholder. They are expected to be approved without modification.

The Company prepares its consolidated annual accounts in accordance with international accounting standards, even though it is not obliged to do so according to the provisions of Royal Decree 1815/1991, of 20 December, as it forms part of a larger group whose parent company, Iberdrola, S.A. (see Note 10) is subject to Spanish law. The 2006 balance sheet and income statement refer solely to the individual Company and do not include any effects of applying consolidation criteria to its shareholdings (See Note 9).

The accompanying financial statements show a net working capital requirement due mainly to the classification under current liabilities of the reciprocal current accounts it has with Iberdrola, S.A. (see Note 11), and have been prepared on a going concern basis, given that it is the Sole Shareholder's intention to provide the necessary financial support to ensure the continuation of its activities.

### 3. REGULATIONS GOVERNING ELECTRICITY GENERATION

The Company's power generation business is regulated by the Spanish Electricity Industry Law 54/1997 of 27 November and subsequent implementing regulations.

On 27 March 2004, the government published Royal Decree 436/2004 of 12 March setting out the method for updating, systematizing and restructuring the legal and economic framework for electricity generation under spanish special regime, which governs renewables and combined heat and power generators. The Royal Decree allows renewables/CHP electricity generators to select one of two remuneration schemes. Under the first scheme, the generator sells electricity to the distributor at a fixed price which is defined in article 2 of Royal Decree 1432/2002 of December 27, as between 90% and 80% of the average electricity tariff over the full useful life of the plant in question. Under the second it sells electricity at the wholesale pool price plus an incentive bonus and a premium. The incentive bonus is set at 10% of the average tariff and the premium at 40%.

### 4. PROFIT DISTRIBUTION

The Sole Director plans to submit for approval by the Sole Shareholder the following proposed distribution of income for 2006:

	Thousands of euros
Distribution basis:	
2006 profit	107,942
Distribution:	
Legal reserve	10,794
Dividends	97,148
	<u>107,942</u>

## **5. ACCOUNTING POLICIES**

The main valuation methods applied in preparing the accompanying annual accounts were as follows:

### **a) Start-up expenses**

This heading of the accompanying balance sheet includes the expenses incurred by the Company in its incorporation and subsequent capital increases. Incorporation and capital increase expenses are amortized on a straight-line basis over five years, while start-up costs are amortized on a straight-line basis over four years.

### **b) Intangible assets**

Computer software is valued at cost and amortized on a straight-line basis over a period of four to five years.

### **c) Tangible fixed assets**

Tangible fixed assets are carried at acquisition or production cost.

The costs of expanding, upgrading or improving tangible assets which increase their productivity, capacity and efficiency and prolong their useful life are capitalized as an increase in the cost of the asset.

Upkeep, maintenance and repairs cost are expensed as incurred. Replacements or renewals of complete units are recorded as fixed asset additions, and the units replaced or renewed are retired from the accounts.

The cost of technical electrical energy installations includes, in addition to the acquisition cost, all expenses inherent to electrical energy (research, authorization, licenses, permits, etc.) and to their manufacture and construction until they are put into use.

The Company transfers construction in progress to operating tangible fixed assets once the plant start-up is authorized.

Operating tangible fixed assets in use are depreciated by the straight-line method at annual rates based on the following years of estimated useful life:

	<u>Year</u>
Buildings	50
Electricity technical plant in use:	
Hydro-electric installations	35 - 70
Substations	40
Other installations	35
Other installations, tools and furniture	4 - 12

**d) Equity investments**

Equity investments are valued at the lower of cost or market. Market value is defined as the underlying book value of the investees plus the tacit capital gains existing upon acquisition which continue to exist.

Equity investments acquired via non monetary contribution are valued at the contribution value, which coincides with the acquisition value of the contributing company.

The Company has recorded sufficient provisions for shareholdings whose cost exceeds the underlying book value, calculated as described above. Therefore, in 2006 the Company reversed provisions by 2,804 thousand euros and took this amount to "Variations in allowances for intangible assets, tangible fixed assets and long-term investments" in the accompanying 2006 income statement.

Deposits and guarantees, along with loans granted to Group, associated and related companies are recorded at the amounts given.

**e) Deferred charges**

"Deferred charges" includes the amount paid in 2004 to a third party as financial compensation for the latter's waiver of rights to take part in a series of wind power projects. These expenses are taken to profit and loss in line with the amortization of the wind farms which were the subject of these rights. The Company has recorded a total of 56 thousand euros for this concept in the 2006 income statement.

**f) Turnkey construction services and inventories**

The Company provides services to Group and related companies related to turnkey wind farm construction projects. These are governed by individual contracts which define all the obligations and conditions of the transaction and set the price. The contracts, which cover the turnkey supply of wind turbine generators, civil engineering and medium-voltage plant lines, specify the invoicing schedule according to a set of project milestones. The Company records the costs incurred under "Inventories" in the accompanying balance sheet until the milestones described above are reached, at which point the sale is recorded under "Net revenues – Services" in the accompanying income statement, and the related cost recorded in inventories is retired. Where losses are expected to occur under certain contracts, they are recognized as soon as they become known.

Construction work on these wind farms is sub-contracted to other Group and related companies and incurred costs are recorded under "Procurements" in the accompanying income statement.

**g) Trade accounts receivable and payable and non-trade receivables and payables**

Trade accounts receivable and payable are recognized at nominal value.

Non-trade payables are recognized at their repayment value. Non-trade payables are recognized at the amount drawn plus any accrued interest pending collection. Interest income is recorded in the year in which it is accrued.

Any relevant value adjustments required to allow for bad debts are applied when necessary to trade accounts receivable.

In the accompanying balance sheet, credits and debts which fall due in 12 months are considered short-term; those falling due more than 12 months are deemed long-term.

**h) Provisions for contingencies and expenses**

This heading includes expenses incurred by the Company from the generic risks of the business as well as its commitment to supply free electricity for retired employees. At 31 December 2006 this amount was 64 thousand euros, based on an actuarial study.

**i) Corporate income tax**

The Company files tax returns as part of the consolidated tax group headed by Iberdrola, S.A.. In consequence, taxable income, and tax relief and credits are calculated jointly.

Corporate income tax expense for the year is calculated based on the reported income before tax as adjusted upwards or downwards for permanent differences, i.e. defined as those arising between taxable income and book income before taxes that are not reversed in subsequent periods, less any tax credits and deductions. Any tax credits, loss carryforwards, deductions and rebates are recorded as a reduction in corporate income tax for the year the right to the deduction arose, regardless of when they are actually applied and provided their recovery is reasonably assured in a maximum time frame of 10 years.

**j) Financial derivatives and hedges**

The financial derivatives held by the Company relate to interest rate hedges. Hedges for debt which the Company has contracted directly are deemed "hedging derivatives". The resulting gains or losses on these hedges are allocated to income by the same method of recognition with respect to timing as that applied to the gains or losses on the underlying hedged transaction. Where they relate to debt contracted by subsidiaries, whereby the financial risk is not directly attributable to the Company, they are considered to be "non-hedge derivatives" and are recorded upon settlement, notwithstanding the provisions that must be recorded at year end if the derivatives show potential losses.

Financial derivatives held by the Company at 31 December 2006 are described in Note 11.

**k) Revenues and expenses**

Revenues and expenses are recorded according to the accruals principle, that is, at the moment the goods or services represented by them take place, regardless of when actual payment or collection occurs.

**l) Costs and expenses related to environmental protection**

Costs arising from corporate activities aimed at protecting and improving the environment are expensed as incurred.

Costs incurred on tangible assets which are aimed at minimizing their environmental impact, protecting or improving the environment are recorded as an increase in the value of the assets.

## 6. START-UP EXPENSES

The movement in the balance sheet heading in 2006 was the following:

	Thousands of euros		
	Balance at 01/01/06	Amortization	Balance at 12/31/06
Preliminary start-up expenses	40	(25)	15
	<u>    </u>	<u>    </u>	<u>    </u>

## 7. INTANGIBLE ASSETS

The movement in this heading during the year was the following:

	Thousands of euros		
	Balance at 01/01/06	Additions	Balance at 12/31/06
Computer software	4,153	3,953	8,106
Accumulated amortization	<u>( 985)</u>	<u>( 1,215)</u>	<u>( 2,200)</u>
	<u>3,168</u>	<u>2,738</u>	<u>5,906</u>

The value of fully amortized intangible assets in use at 31 December 2006 was 156 thousand euros.

## 8. TANGIBLE ASSETS

The movements in the various accounts included under this balance sheet heading in 2006 were the following:

	Thousands of euros				Balance at 12/31/06
	Balance at 01/01/2006	Additions	Decreases	Transfers	
<b>Cost:</b>					
Land and structures	577	-	(3)	-	574
Electricity technical plant in use:	187,816	-	-	3,032	190,848
Hydro-electric installations	186,086			3,017	189,103
Other installations	1,730	-	-	15	1,745
Other tools and furniture	4,602	1,341	-	1,002	6,945
Electricity technical plant in progress:	6,227	3,790	(533)	(4,034)	5,450
Hydro-electric installations	652	2,365	-	(3,017)	-
Substations	5,200	-	(533)	(1,002)	3,665
Other installations	375	1,425	-	(15)	1,785
Total cost	199,222	5,131	(536)	-	203,817
<b>Accumulated amortization:</b>					
Structures	(68)	(2)	-	-	(70)
Electricity technical plant:	(108,282)	(4,685)	-	-	(112,967)
Hydro-electric installations	(108,271)	(4,530)	-	-	(112,801)
Other installations	(11)	(155)	-	-	(166)
Other installations, tools and furniture:	(931)	(2,060)	-	-	(2,991)
Total accumulated amortization	(109,281)	(6,747)	-	-	(116,028)
<b>Total</b>	<b>89,941</b>	<b>(1,616)</b>	<b>(536)</b>	<b>-</b>	<b>87,789</b>

Fully amortized operating tangible assets at 31 December 2006 amounted to 46,533 thousand euros.

Commitments to acquire tangible fixed assets at 31 December 2006 amounted to 1,148 thousand euros.

## 9. LONG AND SHORT-TERM FINANCIAL INVESTMENTS

The movement in investments and the related allowances in 2006 were as follows:

	Thousands of euros			
	Balance at 01/01/06	Increases/ (Provisions)	Decreases	Balance at 12/31/06
Holdings in Group companies	325,618	128,079	(280)	454,802
Holdings in associated companies	40,234	442	-	40,676
Loans to Group and associated companies	68,941	4,628	(3,553)	70,016
Long-term investment securities	29,121	9,537	(2,240)	35,033
Long-term deposits and guarantees given	6	-	-	6
Long-term taxes receivable	82	-	(22)	60
Allowances	(8,245)	(2,804)	-	(11,049)
	<u>455,757</u>	<u>139,882</u>	<u>(6,095)</u>	<u>589,544</u>

The list of all Group and associated companies as well as their key financial data are included in the Appendix.

The most significant transactions in 2006 involving Iberenova's short-term financial investment were the following:

	Thousands of euros		
	Balance at 01/01/06	Additions	Decreases
Loans to Group companies	717	66,242	(147)
Investment securities	9,160	16,285	(9,162)
Deposits and guarantees given	17	-	-
	<u>9,894</u>	<u>82,527</u>	<u>(9,309)</u>
			<u>66,812</u>
			<u>16,283</u>
			<u>17</u>
			<u>83,112</u>

**a) Holdings in Group companies**

The most significant investment under this heading during 2006 was the incorporation of the US company Iberdrola Renewable Energies USA, Ltd. to develop new projects under production or construction, in line with the Company's international expansion program. The investment comprises various share contributions during the year for a total of 82,392 thousand euros for the acquisition of assets and projects from Community Energy Inc. and MREC Partners, LLC.

During the year the Company also carried out various share contributions and has undertaken capital increases at its investees, with the most significant being the 31,000 thousand euros capital increase at Iberdrola Regenerative Energien GMBH and the 3,183 thousand euros capital increase at Energia Renovaveis do Brasil, S.A..

The remaining investments during the year were aimed at incorporating and/or acquiring companies in Spain, Greece, Estonia and Germany for a total of 10,394 thousand euros.

**b) Holdings in associated companies**

Additions under this heading related to investments made in 2006 to set up Electra de Montanchez, S.A. and Electra de Malvana, S.A.

**c) Loans to Group and associated companies**

The detail of credits and loans granted to Group and associated companies at 31 December 2006 was the following:

	Thousands of euros	
	Long term	Short term
<b>To Group companies:</b>		
Biovent Energia, S.A.	42,885	-
Iberdrola Energias Renovaveis, S.A.	18,380	-
Energia Global Castellana, S.A.	-	19,207
Energiaki Alogorachis, S.A.	-	19,890
Biovent Holding, S.A.	-	25,500
Other	1	2,215
<b>To associated companies:</b>		
Eólicas de Euskadi, S.A.	8,750	-
	<u>70,016</u>	<u>66,812</u>

The receivable from Biovent Energía, S.A. relates to the syndicated loan for 270,700 thousand euros granted in 2003. The amount of this loan drawn down at 31 December 2006 was 42,885 thousand. The loan bears interest at the Euribor rate plus 0.75% and according to the contract it matures in June 2019.

The balance with Iberdrola Energias Renovaveis, S.A. refers to a loan with a maximum limit of 22,900 thousand euros which the Company has assumed. The loan bears interest at the Euribor rate plus 1.25% and matures on 1 September 2008.

The balance with Biovent Holding, S.A. comes from a capital increase carried out on 7 November 2006, but which had not been ratified by public deed at the end of the year.

In 2003, the Company granted a credit facility to Eólicas de Euskadi, S.A. which has a limit of 15,025 thousand euros and bears interest at the Euribor rate plus 0.35%. No maturity date has been set and the Company's Sole Director regards it as long-term. The outstanding amount owed by Eólicas de Euskadi, S.A. at 31 December 2006 was 8,750 thousand euros.

The balances for Energía Global Castellana, S.A. and Energiaki Alogorachis, S.A. related to loan contracts undertaken with both companies.

**d) Investment securities**

This heading includes credits and loans granted to related companies as well as advances paid for the purchase of stakes in other companies. The detail at 31 December 2006 was the following:

	Thousands of euros	
	Long term	Short term
Prepayments for acquisition of stakes in other companies	28,189	-
Indur Energía, S.L.	4,696	-
Sotavento Galicia, S.A.	61	-
Withholding of payment for acquisition of C. Rokas, S.A.	-	6,151
Fuhrländer Aktiengesellschaft	-	10,000
Other	<u>2,087</u>	<u>132</u>
	<u>35,033</u>	<u>16,283</u>

“Prepayments for acquisition of stakes in other companies” arose from the agreements reached between the Company and the Gamesa Group in 2002 and 2006 whereby the Company undertook to buy Gamesa's stakes in various companies that owned planned future wind farms in Andalusia, Portugal and Italy.

The receivable from Indur Energía, S.L., for a total of 4,696 thousand euros relates to a loan granted to this company in 2003 which pays interest at the Euribor rate plus 1.5%.

The short-term receivable from Fuhrländer Aktiengesellschaft relates to a loan granted to this company which supplies wind turbine generators to the investee Iberdrola Energía Odnawialna, Sp. z.o.o. This loan pays interest at Euribor plus 0.7% and matures in 2007.

Interest earned on these loans is recorded under “Revenues from other marketable securities and non-current loans – Other companies” in the 2006 income statement.

## 10. SHAREHOLDERS' EQUITY

The movements in this heading in 2006 were the following:

	Thousands of euros					Total
	Share capital	Share premium	Legal reserve	Voluntary reserves	Profit for the year	
<b>Balance at 1 January 2006</b>	164,600	101,979	9,992	75,650	40,457	392,678
Distribution of 2005 profit	-	-	4,046	-	(40,457)	(36,411)
Profit for the year	-	-	-	-	107,942	107,942
<b>Balance at 31 December 2006</b>	<b>164,600</b>	<b>101,979</b>	<b>14,038</b>	<b>75,650</b>	<b>107,942</b>	<b>464,209</b>

At 30 June 2006, the Company's Sole Shareholder agreed the payment of dividends totaling 36,411 thousand euros against 2005 profit.

### a) Share capital

At 31 December 2006 Iberdrola Energías Renovables, S.A.U.'s share capital comprised 16,460,044 shares, of 10 euros par value each, fully subscribed and paid with identical rights and held by Iberdrola, S.A. as Sole Shareholder.

### b) Share premium

The revised text of the Spanish Corporation Law expressly permits the use of this account balance to increase capital and does not establish any specific restriction as to its use.

**c) Legal reserve**

In accordance with the Revised Text of the Spanish Corporation Law, the Company must transfer 10% of net profit for the year to a legal reserve until this reserve reaches at least 20% of share capital. The legal reserve can be used to increase capital provided that the remaining reserve balance does not fall below 10% of the increased share capital amount. Otherwise, until the legal reserve exceeds 20% of share capital, it can only be used to offset losses, and only on condition that other sufficient reserves are not available for this purpose.

**d) Voluntary reserves**

This reserve is freely distributable.

**11. ACCOUNTS RECEIVABLE AND PAYABLE – GROUP, ASSOCIATED AND RELATED COMPANIES**

The detail of credits and loans granted to Group, associated and related companies at 31 December 2006 was the following:

	Thousands of euros	
	Receivable	Payable
Iberdrola, S.A.	-	436,421
Iberdrola Generación, S.A.U. (*)	1,916	-
Iberdrola Ingeniería y Construcción, S.A.U. (*)	-	9,699
Biovent Energía, S.A.	952	-
Ibernova Promociones, S.A.U.	2,755	-
Ciener, S.A.U.	1,192	-
Energías Renovables de la Región de Murcia, S.A.	11,156	-
Energía Global Castellana, S.A.	43,956	-
Iberdrola Energías Renovables de Castilla-La Mancha, S.A.U.	8,481	-
Energías Eólicas de Cuenca, S.A.	29,101	-
Iberdrola Energías Renovables de Galicia, S.A.U.	5,098	-
Gamesa Eólica, S.A. (*)	-	88,325
Iberdrola Regenerative Energien, GMBH	9,643	-
Iberdrola Renewable Energies Ltd.	7,724	-
Iberdrola Energies Renouvelables, S.A.S.	99,097	-
Iberdrola Energia Odnawialna Spółka z Ograniczon Odpowiedzialnošci	865	-
Perfect Wind, SAS	6,507	-
Other	7,977	245
	<u>236,420</u>	<u>534,690</u>

(\*) Iberdrola Group subsidiaries or companies related to the Iberdrola Group.

The account receivable from Iberdrola S.A. relates to the balance on the current account held with this company, which earns interest at Euribor plus a market spread for both debit and credit balances. "Financial and similar expenses – On debts to Group and related companies" in the accompanying income statement at 31 December 2006 includes 322 thousand euros relating to the costs incurred during 2006 arising from the accounts payable during the year.

The balance of "Long-term debt – Payable to Group, associated and related companies" with Gamesa Eólica, S.A. relates to an agreement signed between the Company and the Gamesa Group in 2002, under which the latter committed to buy stakes in a number of wind farm companies (Note 9). As part of this deal, in 2004 Gamesa granted Ibernova a 40,805 thousand euros discount against the future sales of these companies which, at December 31 2006, stood at 39,512 thousand euros.

The short-term debit balances with group companies include credit facilities for both national and international expansion.

The detail of transactions carried out with the Group, associated and related companies is as follows:

	Thousands of euros					
	Energy sales	Services rendered	Other operating income	Outside services	Financial expenses	Financial income
Iberdrola Generación, S.A.U. (*)	22,538	-	-	1,716	-	-

	<u>23,030</u>	<u>164,380</u>	<u>37,273</u>	<u>14,802</u>	<u>6,763</u>	<u>13,866</u>

(\*) Iberdrola Group subsidiaries or companies related to the Iberdrola Group.

“Other operating income” includes revenue for services in areas of management, administration, tax and legal advice and other corporate services from certain investees as well as revenue arising from contracts which license hydro-electric plants to investees.

“Financial income” arises from income accrued on the current account with Iberdrola, S.A. and from several interest rate derivative contracts signed in 2004 between the Company and Iberdrola, S.A. These contracts are hedging interest rate for the financial debt of several indirectly-owned investees. The Company pays the variable rate of interest, linked to the 3 or 6 month Euribor rate, while Iberdrola, S.A. pays the fixed interest rate. The amount hedged on these transactions at 31 December 2006 is 435,006 thousand euros and given that the theoretical valuation of these financial derivatives at 31 December 2004 indicates no eventual losses for the Company, no provision for this item has been recorded.

“Outside services” in the accompanying table includes the charge for services rendered by Iberdrola, S.A. in the areas of management, administration, tax and legal advice and other corporate services for approximately 7,528 thousand euros.

## 12. TAX MATTERS

The Company files a consolidated tax return, having formed part of tax group 2/86, headed by Iberdrola, S.A. since its incorporation.

The detail of short-term tax receivables and payable at 31 December 2006 was the following:

	Thousands of euros
<b>Taxes receivable</b>	
VAT refundable	15,840
Deferred tax assets	975
Corporate tax refundable	2,838
Other	<u>84</u>
	<u>19,737</u>
<b>Taxes payable</b>	
Personal income tax payable	295
Social security payables	379
Deferred tax liabilities	301
Other	<u>17</u>
	<u>992</u>

The reconciliation between income per books to the taxable income for corporate income tax purposes and the tax receivable was the following:

	Thousands of euros
Book profit (before taxes)	106,715
Permanent differences:	
Fines and penalties	7
Exemption for dividends	(1,743)
Allowances for investments	216
Temporary differences:	
Non-deductible provisions	<u>1,861</u>
Taxable income	107,056
Gross tax payable at 35%	37,470
Double taxation deduction	(35,097)
Others deductions	<u>(1,513)</u>
Net tax payable	860
Withholdings and payments on account	<u>(3,698)</u>
Corporate income tax receivable	<u>(2,838)</u>

The amount relating to corporate income tax revenue was obtained as follows:

	Thousands of euros
Preliminary taxable income	37,470
Adjustment of 2005 income tax expense	(1,435)
Deferred tax assets	(652)
Double taxation deduction and other	<u>(36,610)</u>
	<u>(1,227)</u>

In general, the Company has open for review by the tax inspection authorities the last four years for the main taxes applicable. No material liabilities are expected to arise for any inspection.

### 13. REVENUES AND EXPENSES

#### a) Net revenues

The amount appearing under "Sales" relates to income from the sale of electricity generated by the Company.

The amount recorded under "Services" in the accompanying 2006 income statement relates to invoices covering the construction of turnkey wind farms.

**b) Personnel expenses**

The detail of this heading of the accompanying 2006 income statement is the following:

	Thousands of euros
Wages and salaries	19,055
Employer social security costs	3,402
Other employee welfare expenses	<u>868</u>
	<u>23,325</u>

The average number of employees in 2006, by professional category, was the following:

	Average number of employees
University graduates	179
Associate degree graduates	36
Other	<u>186</u>
	<u>401</u>

**14. FEES FOR SERVICES PROVIDED BY AUDITORS**

Audit fees of the Company's 2006 accounts amounted to 233 thousand euros. Other professional services for the year amounted to 90 thousand euros.

**15. GUARANTEE COMMITMENTS WITH THIRD PARTIES**

At 31 December 2006, the Company had pledged a total of 101,760 thousand euros in respect of several official bodies and other third parties to cover administrative commitments incurred by the Company and its investees.

## 16. INFORMATION ON THE SOLE DIRECTOR

In 2006, the parent Company's Sole Director (natural person) earned no remuneration of any kind, and received no advances or loans.

At December 31 2006, the Group had provided no guarantees nor contracted any pension or life insurance commitments to the Sole Director (natural person).

In compliance with article 127 ter. Section 4 of the Spanish Corporation Law, introduced by Law 26/2003, of 17 July, which amends Security Market Law 24/1988, of 28 July, and the revised text of the Spanish Corporation Law, to reinforce the transparency of listed companies, it is noted that Iberdrola, S.A., Sole Director of the parent company, is head of a large group companies which mainly engage in the generation, transmission, distribution and supply of electricity and gas and holds, directly and indirectly, equity investments in companies having the same, similar or complementary activities as those of Iberdrola Energías Renovables, S.A.U., as well as the positions held in said companies:

Company	% of ownership	Position or functions
"IBERDROLA ENERGÍA, S.A.U."	100%	Representative of Sole Director, Iberdrola S.A.
"IBERDROLA GENERACIÓN, S.A.U."	100%	Representative of Sole Director, Iberdrola S.A.
"IBERDROLA DISTRIBUCIÓN, S.A.U."	100%	None
"IBERDROLA INGENIERIA Y CONSTRUCCION , S.A.U."	100%	Representative of Sole Director, Iberdrola S.A.
"AMARA, S.A.U."	100%	Representative of Sole Director, Iberdrola S.A.

The annual accounts of Iberdrola, S.A. and subsidiaries for 2006 (available on [www.iberdrola.es](http://www.iberdrola.es)) provide additional information on the companies making up the Iberdrola Group.

The following table lists the companies engaging in an activity that is identical, similar or complementary to the corporate purpose of Iberdrola Energías Renovables, S.A.U., in which the representative (natural person) of Iberdrola, S.A. and Sole Director of Iberdrola Energías Renovables, S.A.U., Julián Martínez-Simancas Sánchez owns equity interests, and of the functions, if any, that he discharges in them:

Company	Number of shares		Position held or duties performed
	Direct	Indirect	
"IBERDROLA, S.A."	1.651	-	General Secretary and Vice Secretary of the Board of Directors
"E.ON, S.A."	-	250	None
"GENERAL ELECTRIC CO."	-	1.330	None
"ELECTRICITE DE FRANCE"	-	250	None
"SIEMENS"	-	320	None
"SUNWAYS AG"	-	1.200	None
"VERBIO"	-	1.200	None
"LEGRAND"	-	800	None
"PHILIPS ELECTRONIC"	-	400	None
"GENERAL DE ALQUILER DE MAQUINARIA, S.A."	-	700	None
"FORTUM"	-	820	None
"IBERDROLA ENERGÍA, S.A.U."	-	-	Representative of Sole Director, Iberdrola S.A.

## 17. ENVIRONMENTAL ISSUES

The Company incurred environmental expenses totaling 11 thousand euros in 2006 which are recorded under "Outside services" in the accompanying income statement. It was not considered necessary to record any provision for contingencies and expenses in connection with environmental issues, nor are there any contingencies relating to environmental protection and enhancement.

## 18. EVENTS AFTER THE BALANCE SHEET DATE

The main transactions carried out by the Group after the end of the financial year were as follows:

- In February 2007, the parent company acquired a further 10% of subsidiary Biovent Holding, S.A. The price will depend on the company's performance. The amount initially paid in the first provisional settlement was 2 million euros.
- In March 2007, the Company acquired an additional 2.8% of C. Rokas, S.A., raising its stake to 52.7%. The amount paid for this new stake was 12.5 million euros. In addition, the Group acquired a package of non-voting preferred stock from the Rokas family for 26.9 million euros.

## 19. STATEMENT OF SOURCE AND APPLICATION OF FUNDS

The funds obtained and their sources and applications in fixed assets or working capital for the years ended 31 December 2006 and 2005, are the following:

	Thousands of euros	
	2006	2005
<b>Sources of funds:</b>		
Funds generated from operations	118,976	41,289
Disposal of or decrease in fixed assets:		
Tangible	536	1,143
Financial	6,095	2,529
Transfer to short-term of long-term investments	-	5,173
Long-term debt	<u>16,906</u>	<u>3,794</u>
<b>Total sources</b>	<b>142,513</b>	<b>53,928</b>
<b>Application of funds:</b>		
Acquisitions of fixed assets		
- Intangible	3,953	1,697
- Tangible	5,131	7,190
- Financial	142,686	149,883
Net incorporation due to merger	-	94,461
Dividends	36,411	14,278
Transfer of long-term liabilities to short-term	<u>-</u>	<u>5,735</u>
<b>Total funds applied</b>	<b>188,181</b>	<b>273,244</b>
<b>Decrease in working capital</b>	<b><u>( 45,668)</u></b>	<b><u>(219,316)</u></b>
<b>Working capital adjustments</b>		
Inventories	( 1,653)	2,896
Accounts receivable	226,510	(113,163)
Current liabilities	( 343,905)	(114,356)
Short-term financial investments	73,218	5,325
Cash and banks	40	(17)
Accrual accounts	<u>122</u>	<u>(1)</u>
<b>Decrease in working capital</b>	<b><u>( 45,668)</u></b>	<b><u>(219,316)</u></b>

The reconciliation of income in 2006 and 2005 to the funds obtained from operations is as follows:

	Thousands of euros	
	2006	2005
<b>Profit (loss) for the year</b>	107,942	40,457
<b>Increases:</b>		
Depreciation and amortization expense	7,987	5,422
Overprovision for liabilities and charges	188	1,082
Depreciation and amortization of deferred expenses	56	55
Variation in allowances for intangible assets, tangible fixed assets and long-term investments	2,804	-
Losses on intangible assets, tangible fixed assets and long-term investments	-	248
	<u>11,035</u>	<u>6,807</u>
<b>Decreases:</b>		
Variation in allowances for intangible assets, tangible fixed assets and long-term investments	-	(5,975)
Deferred income	(1)	-
	(1)	<u>(5,975)</u>
<b>Funds obtained from operations</b>	<u><u>118,976</u></u>	<u><u>41,289</u></u>

Date of approval of the annual accounts: 30 March 2007

## **IBERDROLA ENERGÍAS RENOVABLES, S.A. sole shareholder company**

### **Management Report**

**Year ended 31 December 2006**

#### **SIGNIFICANT EVENTS IN 2006**

##### **a) Strategic Plan and installed capacity.**

In 2006 Iberdrola raised its renewable energy generating capacity by 624 MW from 3,810 MW in 2005 to 4,434 MW in 2006 (+16.4%), with increases in both Spain (420 MW) and abroad (204 MW). Of its total installed renewable capacity, 4,102 MW is wind power and 332 MW mini-hydroelectric.

This is above the 434 MW (+11%) target set in Iberdrola's Strategic Plan for 2002-2006 and consolidate Ibernova's position as a global leader in renewable energies.

In wind power it has added 607 MW of capacity, including 204 MW from Iberdrola's foreign wind farms, located in France, Germany, Poland, Greece, Brazil, Portugal and the US. In mini-hydroelectric capacity, 17 MW have been added.

Regarding other renewable technologies, the Group has a number of solar thermal and photovoltaic power generation projects under development, as well as biomass, bioethanol and biodiesel plants.

##### **b) The international business**

In 2006, Iberdrola continued the international expansion of its renewable energy business begun in 2005.

First, the year featured its foray into the US market via a number of acquisitions (e.g. Community Energy and Midwest Renewable Energy Projects) and an agreement with Gamesa to acquire wind farms. Iberdrola ended 2006 with 26 MW of capacity in operation in the US and a project portfolio entailing more than 5,000 MW. It now has a permanent office set up in the state of Pennsylvania.

Second, the Group struck a deal to acquire Perfect Wind in France, which owns the rights to a portfolio of 600 MW of projects.

Finally, a number of construction projects increasing the installed capacity, were carried out and/or acquisitions made in other countries, such as Greece, Portugal, France, Poland, Germany, the UK, Estonia, Hungary and Brazil, while the Group also expanded its portfolio of future wind farms.

### **c) Business activity in 2006**

Energy generated from the Company's mini-hydroelectric installations in 2006 totaled 350.7 GWh, less than the figure for 2005 of 383.9 GWh due to the drought during the year. This caused a 10% decline in revenues from sales.

Income from services rendered in the construction of turnkey projects rose considerably in 2006 as a larger number of wind farms were completed.

The increase in "Other operating income" was due to an increase in management services offered to different companies.

### **BUSINESS OUTLOOK FOR 2007**

In 2007, the Ibernova Group will continue with its planned investment to roll out new projects currently under development or construction, expanding capacity in both its existing technologies of wind and mini-hydroelectric, and new technologies such as solar thermal and photovoltaic, biomass and biofuels.

### **RESEARCH AND DEVELOPMENT**

In research and development, the RD&i Committee was created with the mission of managing the business innovation process.

Meanwhile, work continued on the renewables projects initiated in 2005:

- The MULTIPLICADORAS Project: this involves researching the relationship between the useful life of wind turbine generators and the external environmental conditions regarding wind speed, turbulence and outages under different regulatory regimes.
- The OLASLUZ Project: this is the first ocean wave power project in Spain, with capacity of up to 1.25 MW in Santoña, Santander, on the Bay of Biscay.

- CORE Project: a pioneering initiative in the sector to create the Toledo Renewables Operations Center. The center will optimize technical management and financial returns in real time, 24/7, 365 days a year, for all wind farms, mini-hydroelectric plants and substations whether run by Iberdrola or other renewables operators.
- The European WINDGRID Project: seeks to integrate wind farms into the electricity system, maximizing the use of renewables while ensuring the stable and secure operation of the grid. It also seeks to create a technical base that the EU can use to draw up standards and simulate possible scenarios.
- The METEOFLOW Project: forecasting wind power generation to be able to minimize diversions in the market and enhance operational management.
- The VOLTAGE DROPS AND REACTIVE POWER Project: looking at the connections between wind farms and the grid.

#### **EVENTS AFTER THE BALANCE SHEET DATE**

The main transactions carried out by the Ibernova Group after the end of the financial year were as follows:

- In February 2007, the Ibernova parent company acquired a further 10% of subsidiary Biovent Holding, S.A. It already owned 85% of this company at year-end 2006. The price of the transaction is variable, with an initial payment of 2 million euros.
- In March 2007, Ibernova acquired an additional 2.8% of the common shares of C. Rokas, S.A., in which at year-end 2006 it owned 49.9%. This took its holding to 52.7% at the end of March 2007, the date of preparation of the consolidated annual financial statements. In addition, Ibernova acquired a package of preferred stock without voting rights from the Rokas family for 26.9 million euros.

#### **TREASURY SHARES**

Ibernova did not acquire or carry out any transactions with treasury shares in 2006.

#### **ENVIRONMENT**

The rollout of the Iberdrola Group's Global Environmental Management System was completed in 2006. This system, certified by the Spanish Association for Standardization and Certification (AENOR), approves the Environmental Guidelines which entail concrete aims and targets for the whole of the Iberdrola Group.

**AUDIT REPORT**

\* \* \* \*

**IBERDROLA ENERGÍAS RENOVABLES, S.A.U. AND SUBSIDIARIES**  
**Consolidated Annual Accounts and Consolidated Management Report**  
**for the year ended December 31, 2006**

(Translation of a report and consolidated annual accounts originally issued in Spanish.  
In the event of discrepancy, the Spanish-language version prevails)

## AUDIT REPORT ON THE CONSOLIDATED ANNUAL ACCOUNTS

Translation of a report and consolidated annual accounts originally issued in Spanish. In the event of discrepancy, the Spanish-language version prevails.

To the Sole Shareholder of  
Iberdrola Energías Renovables, S.A.U.

We have audited the consolidated annual accounts of Iberdrola Energías Renovables, S.A.U. and its subsidiaries (the Group), which comprise the consolidated balance sheet at December 31, 2006, the consolidated income statement, the consolidated statement of recognised income and expense, the consolidated cash flow statement and the notes thereto for the year then ended, the preparation of which is the responsibility of the Parent Company's sole director. Our responsibility is to express an opinion on the aforementioned consolidated annual accounts taken as a whole, based upon work performed in accordance with auditing standards generally accepted in Spain, which require the examination, through the performance of selective tests, of the evidence supporting the annual accounts, and the evaluation of their presentation, of the accounting principles applied, and of the estimates made.

In accordance with mercantile law, for comparative purposes the Parent Company's sole director has included for each of the captions included in the consolidated balance sheet, the consolidated income statement, the consolidated statement of recognized income and expense, the consolidated cash flow statement and the notes thereto, in addition to the figures of 2006, those of 2005. Our opinion refers only to the consolidated annual accounts for 2006. On April 3, 2006 we issued our audit report on the 2005 consolidated annual accounts, in which we expressed an unqualified opinion.

In our opinion, the accompanying 2006 consolidated annual accounts give a true and fair view, in all material respects of the equity and financial position of Iberdrola Energías Renovables, S.A.U. and its subsidiaries at December 31, 2006 and the consolidated results of its operations, the changes in consolidated equity contained in the consolidated statement of recognized income and expense and the consolidated cash flow for the year then ended and contain the required information necessary for their adequate interpretation and comprehension, in conformity with the international financial reporting standards adopted by the European Union which are consistent with those applied to the figures and information corresponding to the 2005 consolidated financial statements.

The accompanying consolidated management report for the year ended December 31, 2006 contains such explanations as the Parent Company's sole director considers appropriate concerning the situation of Iberdrola Energías Renovables, S.A.U. and its subsidiaries, the evolution of their business and other matters, and is not an integral part of the consolidated annual accounts. We have checked that the accounting information included in the consolidated management report mentioned above agrees with the consolidated annual accounts for the year ended December 31, 2006. Our work as auditors is limited to verifying the consolidated management report in accordance with the scope mentioned in this paragraph, and does not include the review of information other than that obtained from the accounting records of the consolidated companies.

## **IBERDROLA ENERGÍAS RENOVABLES, S.A.U. AND SUBSIDIARIES**

### **Notes to the consolidated financial statements**

**December 31, 2006**

#### **1. GROUP ACTIVITY**

Iberdrola Energías Renovables, S.A.U. (formerly Iberdrola Energías Renovables II, S.A.) was incorporated on July 9, 2001. It engages in all activities, projects and services related to:

- The production and marketing of electricity generated using a range of renewable energies, including but not restricted to, hydro-electric or mini-hydroelectric, wind, solar, photovoltaic, biomass and energy from waste, as well as the development, construction, operation and maintenance of these kinds of renewable energy plants.
- The start-up of all kinds of services related to the engineering of renewable energy power plants in general, and specifically research, engineering or energy consultancy studies, and environmental, technical and economic studies relating to such power plants. Also, the operation and maintenance of plants owned by third parties and participation in projects concerning such plants both as owner or as contractor for their operation, conservation and maintenance.

The Company's registered office is at calle Tomás Redondo, 1, Madrid.

The subsidiaries mainly engage in the generation of electricity from renewable energy sources, both in Spain and abroad. Details of these companies are presented in an appendix to the consolidated financial statements under "Information on subsidiaries, associates and investees of Iberdrola Energías Renovables, S.A.U."

#### **2. BASIS OF PRESENTATION OF THE CONSOLIDATED FINANCIAL STATEMENTS**

##### **a) Applicable policies applied**

The Iberdrola Energía Renovables Group's 2006 consolidated financial statements were prepared by the Sole Director on March 30, 2007 in accordance with International Financial Reporting Standards (IFRSs), as adopted by the European Union, in conformity with Regulation (EC) 1606/2002 of the European Parliament and of the Council.

These consolidated financial statements were drawn up voluntarily, the Iberdrola Energías Renovables group being under no obligation to present accounts as its Parent Company, Iberdrola Energías Renovables, S.A.U., is a subsidiary of another parent, Iberdrola, S.A., which prepares and presents consolidated financial statements.

These consolidated financial statements have been prepared on a historical cost basis, except for equity investments and derivative financial instruments, which have been measured at fair value. The carrying amounts of assets and liabilities hedged by fair value hedges are restated to reflect variations in their fair value as a result of the risk hedged.

The standards issued by the corresponding bodies whose application is not mandatory in 2006 would not have a material impact on these consolidated annual accounts.

IFRS allow a number of alternative treatments in their regular application, including the following:

- IFRS allow an option whereby finance costs generated by external finance allocated to assets in progress can be recognized as an increase in the cost of acquisition of the assets. The Group has opted to capitalize these finance costs.
- Investments in joint ventures can be consolidated either using the proportionate consolidation method or using the equity method provided the same criteria are applied to all the stakes in joint ventures owned by the Group. The Group consolidates all companies in which it shares control with other partners using the proportionate consolidation method.
- “Intangible assets” and “Property, plant and equipment” can be measured either at fair value or at acquisition cost, adjusted for accumulated depreciation and amortization and any impairment. The Group has opted to recognize these assets at adjusted acquisition cost.
- IFRS allow two possible treatments of government grants: deduct from the carrying amount of the asset the grant received for its acquisition or present the grants as deferred income under liabilities in the balance sheet. The Group has opted for the latter option.

#### **b) Consolidation principles**

The Iberdrola Energías Renovables Group fully consolidates subsidiaries over which it exercises control, unless they are considered insignificant to the fair presentation of the Group.

The Iberdrola Energías Renovables Group considers that it has control over a company when it has the power to govern its financial and operating policies so as to obtain benefits from its activities.

Jointly controlled entities that Iberdrola Energías Renovables manages together with other companies were consolidated using proportionate consolidation.

The associates over which the Iberdrola Energías Renovables Group does not exercise control but does have a significant influence were accounted for in the consolidated balance sheet by the equity method. For the purposes of these Consolidated Annual Accounts, it is considered that a significant influence is exercised over companies in which the Group has an ownership of over 20%, except in specific cases in which, although the Group's ownership interest is lower, the existence of a significant influence can be clearly demonstrated.

The appendix to the consolidated financial statements lists all Iberdrola Energías Renovables, S.A.U.'s subsidiaries, jointly controlled entities and associates, together with the consolidation or measurement basis used in preparing the accompanying consolidated financial statements and other related disclosures.

The closing date used for the financial statements of subsidiaries, jointly controlled entities and associates is December 31. The accounting policies applied by these companies are the same or have been conformed to those used by the Iberdrola Energías Renovables Group to prepare these consolidated annual accounts.

The financial statements of each of the foreign companies have been prepared in their respective functional currencies, defined as the currency of the economy in which each company operates and in which it generates and uses cash.

The operations of Iberdrola Energías Renovables, S.A.U. and of its consolidated subsidiaries and jointly controlled entities are consolidated in accordance with the following basic principles:

- On acquisition, the assets, liabilities and contingent liabilities of a subsidiary are recognized at fair value. Any excess of the cost of acquisition of the subsidiary over the company's interest in the fair value of the assets and liabilities is recognized as goodwill.

If the company's interest in the net fair value fair value of the acquired assets and liabilities (negative goodwill) exceeds the cost of the business combination, that excess is recognized immediately in the consolidated income statement as a gain.

Results of subsidiaries acquired or sold in the year are included in the consolidated income statement as from the effective date of acquisition or up to the effective date of sale.

- Goodwill acquired in business combinations ceases to be amortized after January 1, 2004, the IFRS transition date, but is tested for impairment.

- The result of measuring investments in associates using the equity method (after eliminating transactions between Group companies) is recognized under “Other reserves” and “Result of companies accounted for using the equity method” on the accompanying consolidated balance sheet and income statement, respectively.
- The interests of minority shareholders in the equity and results of the fully consolidated subsidiaries and proportionately consolidated joint ventures are presented under "Equity – Minority interests" on the liability side of the consolidated balance sheet and "Minority Interests" in the consolidated income statement, respectively.
- The financial statements of foreign companies have been translated into euros using the year-end exchange rate method. This method consists of translating all assets, rights and obligations into euros at the exchange rates prevailing at the date of the consolidated financial statements, translating consolidated income statement items at the average exchange rates for the year, and translating equity items at the exchange rates applying at their date of acquisition (or in the case of retained earnings at the average exchange rates for the year they were generated, provided there were no material transactions that would make this misleading).
- All accounts and transactions between fully and proportionately consolidated companies have been eliminated in consolidation.

### **3. REGULATIONS GOVERNING ELECTRICITY GENERATION UNDER THE SPECIAL REGIME IN SPAIN**

Power generation under the special regime in Spain is regulated by the Spanish Electricity Industry Law 54/1997 of November 27 and subsequent implementing regulations.

On March 27, 2004, the government published Royal Decree 436/2004 setting out the method for updating, systematizing and restructuring the legal and economic framework for electricity generation under Spain’s special regime. The Royal Decree allows renewables/CHP electricity generators to select one of two remuneration schemes. Under the first scheme, the generator sells electricity to the distributor at a fixed price which is defined in Article 2 of Royal Decree 1432/2002 as between 90% and 80% of the average electricity tariff over the full useful life of the plant in question. Under the second it sells electricity at the wholesale pool price plus an incentive bonus and a premium. The incentive bonus is set at 10% of the average tariff and the premium at 40%.

#### **4. ACCOUNTING POLICIES**

The principal accounting policies used in preparing the consolidated annual accounts were as follows:

##### **a) Revenue recognition**

Revenue from sales is measured at the fair value of the assets or rights received as consideration for the goods and services provided in the ordinary operating activities of the Group companies net of discounts and applicable taxes, and is recognized at the time that the goods and ownership have passed to the buyer.

Interest income is accrued on a time proportional basis, by reference to the principal outstanding and the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the asset to that asset's carrying amount.

Dividend income is recognized when the Iberdrola Energías Renovables Group companies' right to receive the payment is established.

##### **b) Associates**

Associates are companies over which the Group exercises significant influence but which are neither subsidiaries nor jointly controlled entities. Therefore, the Group has the power to participate in their financial and operating decisions, but not to fully or jointly control them.

In general, investments in associates are accounted for using the equity method of accounting. Under this method, investments are measured initially at acquisition cost, subsequently adjusted for changes to each company's equity, taking into consideration the percentage of ownership and any impairments.

Gains or losses on transactions with associates are eliminated in proportion to the Group's percentage ownership of the companies concerned.

##### **c) Joint ventures**

A joint venture is a company formed by several partners to carry out an activity under their joint control. Joint control means that the financial strategy and operating decisions of the company require the consent of the venturers.

Iberdrola Energías Renovables Group companies that directly undertake jointly controlled activities include in their financial statements the proportion of the assets and liabilities managed and their share of income and expenses, using proportionate consolidation.

Goodwill arising on the acquisition of interests in joint ventures is recognized in accordance with the Group's accounting policies described below.

**d) Goodwill**

Goodwill arising on Consolidation represents the difference between the price paid to acquire subsidiaries or jointly controlled entities (consolidated using either the full or the proportionate consolidation method) and the Group's percentage ownership of the fair value of the components making up the net assets of these companies at the time of acquisition. Goodwill arising from acquisitions of companies with a functional currency other than the euro is translated to euros at the exchange rates prevailing at the consolidated balance sheet date.

Goodwill acquired after January 1, 2004 is measured at acquisition cost. Goodwill acquired before this date is recognized at its net carrying amount at December 31, 2003, under Spanish GAAP and in accordance with IFRS 1: "First-time Adoption of International Financial Reporting Standards." In neither instance is goodwill amortized, although at the end of each reporting period goodwill is reviewed for impairment to its recoverable value and any impairment is written down (see Note 4.i).

**e) Other intangible assets**

Concessions, patents, licenses and similar basically comprises surface and transit rights on the Group's land holdings measured at acquisition cost. Concession periods are from 50 to 75 years, but the Group amortizes surface rights and easements on a straight-line basis in accordance with the life of the assets located on the concession, from the moment the wind farm concerned comes on stream.

Computer software includes acquisition and development costs for basic IT systems used in managing the Group.

Computer system maintenance costs are recorded with a charge to the consolidated income statement for the year in which they are incurred.

Computer software is amortized on a straight-line basis over a period of between three and five years from the time each application is put to use.

**f) Property, plant and equipment**

Property, plant and equipment is stated at cost, including, where appropriate, the following items:

- External finance costs accrued solely in the construction period.

The Group determines the amount of capitalizable finance costs according to the following procedure:

- a) The interest on specific-purpose sources of financing used to build certain of the companies' assets is capitalized in full.

- b) Interest on general sources of finance, capitalized by applying the average effective interest rate to the average accumulated amount of capitalizable investment less investment financed with specific sources, provided this does not exceed the total finance costs accrued in the year.

The average capitalization rates used to determine the interest expense capitalized in 2006 and 2005 were 4.2% and 3.6%, respectively.

In 2006 and 2005, the Group used the process explained above to capitalize finance costs of 6,052 thousand euros and 1,937 thousand euros, respectively, under "Property, plant and equipment," recognized as "Finance income" on the accompanying consolidated income statements.

- Staff costs relating directly or indirectly to construction in progress.

In 2006 and 2005, 8,125 thousand euros and 5,656 thousand euros, respectively, were capitalized for this concept.

- Under the specific legislation applying to subsidiaries in Greece, France and the US, the asset values include all futures costs for the dismantling of their production plants. The amount of these costs is recognized at fair value at the time the plants come on stream under "Provisions – Other provisions" in the accompanying consolidated balance sheet.

These companies review the estimates of these future costs annually and increase or reduce the carrying amounts of the assets accordingly.

The Group transfers work in progress to property, plant and equipment in use once the plant start-up is authorized.

The costs of expansion of or improvements to property, plant and equipment leading to increased productivity or capacity or to a lengthening of the useful lives of the assets are capitalized.

When the Iberdrola Energías Renovables Group acquires a group of assets or of net assets that do not constitute a business, the cost is allocated across the asset group's individually identifiable assets and liabilities, using fair values at the acquisition date.

Replacement or renewal of complete units is recognized as an addition to property, plant and equipment, and the units replaced or renewed are derecognized.

Gains or losses on the disposal of property, plant and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the asset.

At December 31, 2006 and 2005, the Group has no asset classified as investment property.

**g) Depreciation of property, plant and equipment in use**

The cost of property, plant and equipment in use is depreciated on a straight-line basis at annual rates based on the following years of estimated useful life:

	<u>Average years of estimated useful life</u>
Buildings	50
Wind farms	15 – 20
Hydro-electric plants:	
- Civil engineering	35 – 70
- Electromechanical equipment	35
Distribution facilities	40
Meters and measuring devices	15 – 27
Dispatching centers and other facilities	4 – 12

**h) Leases**

The Group classifies as finance leases all arrangements under which the lessor transfers to the lessee substantially all the risks and rewards incidental to ownership of the asset. All other leases are classified as operating leases.

Assets acquired under finance leases are recognized as non-current assets in accordance with their nature and function. Each asset is depreciated over its useful life as the Group considers there to be no doubt that ownership of the assets will be transferred at the end of the lease term. Assets are measured at the lower of the fair value of the leased asset and the present value of the future lease payments.

At December 31, 2006 and 2005, the amounts of "Property, plant and equipment" in the consolidated balance sheet corresponding to assets under finance leases were 381 thousand euros and 292 thousand euros, respectively.

The expenses arising on operating leases are charged to the consolidated income statement over the term of the lease on an accrual basis.

**i) Impairment of assets**

The Group assesses at each balance sheet date whether there is an indication that a non-current asset may be impaired. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of any impairment loss. In the case of identifiable assets that do not themselves generate any independent cash flows, the Group estimates the recoverable value of the cash flow generating unit to which the asset belongs.

In the case of goodwill and other intangible assets with an indefinite useful life or which have not yet come into use, the Group systematically assesses their recoverable value at each balance sheet date.

The recoverable amount is the higher of the asset's fair value less costs to sell and its value in use, measured as the present value of its estimated future cash flows. In calculating value in use, the assumptions used in the estimate include discount rates, growth rates and expected changes in selling prices and direct costs. Pre-tax discount rates include the time value of money and the risks specific to the cash-generating unit. Growth rates and changes in prices and direct costs are based on sector estimates and the Group's experience and forecasts, respectively.

The Group uses discount rates ranging from 4.8% to 14.2% (2005: between 5.74% and 16%) in accordance with the risks specific to each unit.

If the recoverable amount of an asset is less than its carrying amount, an impairment loss is recognized for the difference with a charge to "Depreciation and amortization charge and allowances" in the consolidated income statement. Impairment losses recognized for an asset are with a credit to the aforementioned heading when there is a change in the estimates concerning the recoverable amount of the asset, increasing the carrying amount of the asset, but so the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized, except in the case of the impairment of goodwill, which is not reversible.

The consolidated income statements for 2006 and 2005 contained no amounts under this heading.

## j) **Financial instruments**

### Financial assets

The Group classifies all financial assets, current and non-current, as follows:

- Financial assets at fair value through profit or loss: assets that meet the following criteria:
  1. The asset has been classified as held-for-trading financial assets and the Group expects to derive profits from fluctuations in its price.
  2. The asset has been included in this classification upon initial recognition.

Assets in this class are shown on the balance sheet at fair value, and changes in this fair value are recognized in "Finance costs" and "Finance income" on the income statement, as appropriate.

The Group includes in this category derivative financial instruments that, while providing an effective hedge according to the risk management policies, do not meet the criteria for hedge accounting in IAS 39 - Financial Instruments (see Note 17).

- Loans and receivables: these are initially recognized in the balance sheet at fair value and are subsequently measured at amortized cost using the effective interest rate method.

The Group records the related provisions for the difference between the amount of the receivables considered recoverable and their carrying amount.

- Held-to-maturity investments: those that the Group has the intention and ability to hold to maturity, and which are carried at amortized cost. At the balance sheet date 2006 and 2005 the Group had classified no investments in this category.
- Available-for-sale financial assets: all assets that are not classified in any of the preceding categories.

The Group determines the most appropriate classification of its financial assets after acquisition and reevaluates this designation at each financial year end.

All regular way purchases and sales of financial assets are recognized on the trade date.

### Cash and cash equivalents

This heading in the consolidated balance sheet includes cash, sight accounts and other highly liquid short-term investments that can be realized in cash quickly and are not subject to a risk of change in value.

### Bank borrowings-loans and other financial liabilities

Loans and similar items are recorded initially at the amount received less transaction costs. After initial recognition, these financial liabilities are measured at amortized cost using the effective interest rate method, except for hedged transactions, which are measured using the method described in the paragraph on “Derivative financial instruments and hedges” below. Also, obligations under finance leases (see Note 4.h) are recognized at the present value of the lease payments under “Bank borrowings loans” in the consolidated balance sheet.

### Trade and other payables

Trade payables are initially recognized at fair value and are subsequently measured at amortized cost using the effective interest rate method.

### Other non-current payables and other current liabilities

These headings in the consolidated balance sheet mainly reflect balances in favor of the sole shareholder, Iberdrola, S.A. and its subsidiaries and related parties.

Financial transactions carried out with these are recognized in the same way as interest bearing loans and borrowings and trade receivables and payables; i.e. initially at fair value and after initial recognition at amortized cost using the effective interest rate method.

### Derivative financial instruments and hedges

Derivative financial instruments are initially recognized in the consolidated balance sheet at acquisition cost and subsequently remeasured at fair value as necessary. Any gains or losses arising from such changes in value are recognized in the income statement unless the derivative has been designated as a cash flow hedge.

For accounting purposes, hedges are classified as follows:

- Fair value hedges: where the risk hedge is a change in the fair value of an asset or liability recognised on the consolidated balance sheet or a firm commitment (with the exception of exchange rate hedges in the latter instance).
- Cash-flow hedges: when the risk hedged in the variation in cash flows attributable to a specific risk associated with a recorded asset or liability or a forecast transaction, or to exchange rate risk in a firm commitment.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to the Group wishes to apply hedge accounting. This documentation includes identification of the hedging instrument, the hedged item, the nature of the risk being hedged and how the entity will assess the hedging instrument’s effectiveness. In addition, hedges are reviewed periodically to ensure they are highly effective (between 80% and 125%).

Hedges which meet the strict criteria for hedge accounting are accounted for as follows:

- In the case of fair value hedges, both changes in the fair value of financial derivatives classified as hedges and changes in the fair value of the hedged item attributable to the risk hedged are recognized as a charge or credit in the consolidated income statement, as appropriate. The net amount of gains or losses accrued by the hedged item and hedging instrument taken together are recognized under "Finance income" and "Finance costs."
- In cash flow hedges and hedges of a net investment in a foreign operation, changes in the fair value of the hedging derivative are recognized, in respect of the ineffective portion of the hedges, in the consolidated income statement, while the effective portion is recognized under "Unrealized assets and liability revaluation reserve" and "Translation differences", respectively, in the accompanying consolidated balance sheet. The cumulative gain or loss recognized in these headings is transferred to the relevant heading of the consolidated income statement as the hedged item affects net profit or loss or in the year in which the item is disposed of.
- If a hedge of a forecasted transaction results in the recognition of a non-financial asset or liability, this balance is used to determine the initial carrying amount of the asset or liability. If the hedged transaction did not give rise to an asset or liability, the amounts debited or credited to "Unrealized assets and liability revaluation reserve" in the consolidated balance sheet are recognized in the income statement in the same year as the hedged item.
- If a hedge of a forecasted transaction results in the recognition of a financial asset or liability, this balance is recognized in "Unrealized assets and liability revaluation reserve" until the hedged item affects net profit or loss.

- Upon derecognition of the hedge, the cumulative gain or loss recognized in “Unrealized assets and liability revaluation reserve” remains under this heading until the hedge is carried out, at which time the gain or loss is adjusted. If the forecast transaction is no longer expected to occur, the amounts previously recognized in this heading are transferred to the income statement.

The embedded derivatives are separated from the host contract when the characteristics and risks are not closely related to those of the host contract, provided the entire instrument is not measured at fair value with changes in fair value recognized in the income statement.

Fair value of the various financial instruments is calculated as follows:

- For derivatives traded in organized financial markets, the price at the close of business on the balance sheet date.
- For derivatives not traded in organized financial markets, the Group uses assumptions based on market conditions at the balance sheet date. Specifically, the fair value of interest rate swaps is measured as the value of rate swap spreads discounted to present value at the market interest rate. Exchange rate futures contracts are measured by discounting to present value future cash flows from the contracts based on forward exchange rates at year-end.

#### Derecognition of financial assets and liabilities

A financial asset is derecognized when:

- the rights to receive cash flows from the asset have expired.
- the Group retains the rights to receive cash flows from the asset, but has assumed an obligation to pay them in full to a third party, or has transferred substantially all the risks and rewards of the asset or has not retained them substantially.
- The Group has transferred its rights to receive cash flows from the asset and either a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all risks and rewards of the asset, but has transferred control of the asset.

Financial liabilities are derecognized when the obligation under the liability is discharged or cancelled, or expires.

**k) Deferred income**

“Deferred income” basically comprises any non-repayable grant to finance property, plant and equipment. The grant is taken to the Consolidated Income Statement as the assets financed with the grant are depreciated.

“Other deferred income” includes amounts received from third-parties but not attributed to profit at the balance sheet date, for rights to use connection facilities to the electricity grid and other assets owned by the Group for a fixed period. These amounts are recognized on a straight-line basis under “Other operating income” in the accompanying consolidated income statement over the period for which the rights are granted.

**l) Provisions for pensions and other provisions**

The Group does not operate pension plans for its employees. These commitments are covered in the case of Spanish-based companies by the state Social Security System, except for certain employees of Iberdrola, S.A. entitled to pensions. The cost of these is passed on from Iberdrola, S.A. to Iberdrola Energías Renovables, S.A.U. In 2006 and 2005, this cost amounted to 563 and 372 thousand euros, respectively, recognized under “Staff costs” in the consolidated income statement. The Iberdrola Energías Renovables Group does not assume any risk for this commitment.

In addition, subsidiary C. Rokas, S.A. has a commitment pursuant to Greek legislation to pay a bonus to employees upon retirement. This bonus varies in accordance with the employee’s professional category and term of service. Its externalization is not mandatory. The estimate is made each year based on an actuarial calculation.

The Group also recognizes provisions to cover present obligations (legal or constructive) as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. A provision is recognized when the liability or obligation arises, with a charge to the relevant heading in the consolidated income statement depending upon the nature of the obligation, for the present value of the provision when the effect of discounting the value of the obligation to present value is material. The change in the provision due to its discounting each year is recognized under “Finance costs” in the consolidated income statement.

**m) Transactions in currencies other than the euro**

Transactions in currencies other than the functional currencies of Group companies are recognized in the corresponding functional currency at the exchange rate prevailing at the time of the transaction. During the year, the differences arising between the exchange rates at which the transactions were recorded and those in force at the date on which the related collections or payments are made are debited or credited, as appropriate, to profit or loss.

Also, fixed-income securities and receivables and payables outstanding at December 31 denominated in currencies other than the functional currencies of Group companies are translated at the year-end exchange rate each year. The resulting differences are charged to "Finance costs" or credited to "Finance income" in the consolidated income statement, as appropriate.

Transactions carried out in foreign currencies where the Group has opted to use financial derivatives or other hedging instruments to mitigate the exchange risk are described in Note 4.j.

**n) Current/non-current classification**

Payables are classified according to the outstanding time to maturity at the balance sheet date. Debts falling due in less than twelve months are classified as current and those with longer maturities as non-current.

**o) Income tax**

Most of the companies in Iberdrola Energías Renovables Group file tax returns as part of the consolidated tax group headed by the sole shareholder Iberdrola, S.A. In consequence, taxable income, and tax relief and credits are calculated jointly.

Income tax expense is accounted for using the liability method based on the general balance. This determines deferred tax assets and liabilities on the basis of the carrying amounts of assets and liabilities and their tax base, using the tax rates that can objectively be expected to be in force when the assets or liabilities are realized or settled. Deferred tax assets and liabilities arising from a charge or credit directly to equity are also recognized through a charge or credit to equity.

The Group recognizes deferred tax assets whenever future taxable profits are expected against which these assets can be recovered.

Tax relief for double taxation and other reasons as well as tax credits earned as a result of financial events in the year are deducted from accrued income tax expense, unless there are doubts as to whether they can be claimed.

**p) Service concession arrangements for hydro-electric power plants**

In accordance with Law 29/1985, of August 2, partially amended by Law 46/1999, of December 13, all Spanish hydro-electric power plants are subject to temporary service concession arrangements. According to the terms of these arrangements, upon expiration of the arrangement ownership of the plants, in full working condition, is transferred back to the government. The Group's service concession arrangements expire between 2000 and 2067. Those plants whose arrangement has expired as of December 31, 2006, account for a negligible amount of installed capacity. As a result, they have been fully depreciated at December 31, 2006, but are still operated by the Group.

The Group considers that there is no need to set up a reversion fund as the plants' maintenance programs ensure that they will continue to operate correctly.

**q) Discontinued operations**

A discontinued operation is a line of business that it has been decided to abandon and/or sell whose assets, liabilities and net profit or loss can be distinguished physically, operationally and for financial reporting purposes.

Income and expenses of discontinued operations are presented separately in the income statement.

No business or segment was discontinued in either 2006 or 2005.

**r) Environmental issues**

Costs arising from corporate activities aimed at protecting and improving the environment are recognized in the year incurred.

Expenses incurred on elements of property, plant and equipment aimed at minimizing the environmental impact, protecting or improving the environment are recorded as an increase in the value of the assets.

**s) Consolidated Cash Flow Statements**

The following terms are used in the consolidated cash flow statements, which were prepared using the indirect method, with the meanings indicated below:

- Cash flows: inflows and outflows of cash and cash equivalents, which are short-term, highly liquid investments that are subject to an insignificant risk of changes in value.
- Operating activities: the principal revenue-producing activities of Group companies and other activities that are neither investing nor financing activities.
- Investing activities: the acquisition and disposal of long-term assets and other investments not included in cash and cash equivalents.

- Financing activities: activities that result in changes in the size and composition of the equity and borrowings of the Company that are not operating activities.

## **5. FINANCIAL RISK MANAGEMENT POLICY**

Iberdrola Energías Renovables Group applies the General Risk Policy, which was approved in November 2004 by the Board of Directors of the sole shareholder Iberdrola S.A. Under this policy the Group undertakes to use its capabilities to the full in order to ensure that all the significant risks of all kinds are adequately identified, measured, managed and controlled, applying the following “basic action guidelines”:

- Incorporation of the risk-opportunity approach into the Group’s management.
- Separation, at operating level, of functions between the risk-taking areas and the areas responsible for analyzing, controlling and supervising the risks.
- Assurance of short and long-term business and financial stability, maintaining an appropriate balance between risk, value and benefit.
- Correct use of financial risk hedging instruments and their recognition in accordance with the applicable accounting and financial standards.
- Transparency in reporting on the Group’s risks and the functioning of the systems developed to control them.
- Development of a risk-opportunity control and management culture within the Group.
- Coordination with general policy of all the specific risk-related policies that have to be implemented.
- Compliance with current regulations and legislation in relation to risk control, management and oversight.
- Continuous improvement on the basis of international best practices in Transparency and Good Corporate Governance in relation to risk control, management and supervision.

In order to implement this policy and respect these principles, the sole shareholder Iberdrola, S.A. has developed an Integral Risk Control and Management System based on a suitable definition, separation and assignment of functions and responsibilities, and of the required procedures, methodologies and support tools.

The system, which in November 2005 received quality certification from AENOR under the ISO 9001:2000 standard, is based on three fundamental cornerstones:

- A risk policy and limit structure, developed in 2005, that guarantees controlled management of the risks by the businesses.

- Monitoring and control of the risks in the income statement.
- Analysis and control of risks related to new investments.

Certain of Iberdrola, S.A.'s risk policies and limits on interest rates, exchange rates, liquidity and credit, which have been approved by the Operating Committee, apply to the Iberdrola Energías Renovables Group, mainly as regards interest rate risk. Several items in the Group's balance sheet and the associated financial derivatives bear interest at fixed rates and are therefore exposed to the risk of fluctuations in fair value as a result of changes in market interest rates. Also, the Group is exposed to fluctuation in interest rates affecting cash flows in respect of items in the balance sheet and derivatives that bear interest at floating rates.

The Group mitigates this risk by managing the ratio of fixed to floating rate debt in the light of market circumstances, by refinancing and making use of interest rate derivatives, while remaining within its approved risk limits.

The debt structure at December 31, 2006 and 2005, after taking into account hedges via derivatives, was the following:

	<i>Thousands of euros</i>	
	<i>Balance at 12/31/06</i>	<i>Balance at 12/31/05</i>
Floating rate	234,882	69,616
Fixed rate	307,119	285,830
Capped rate	48,470	29,127
	<u>590,471</u>	<u>384,573</u>

For further information on the Group's borrowings see Notes 16 and 17.

Floating rate debt is chiefly benchmarked to the Euribor.

With respect to foreign currency risk, fluctuations in the value of the currencies in which borrowings are instrumented and purchases and sales are made with respect to the presentation currency may have an adverse effect on the finance costs and profit for the year.

The following items could be affected by foreign currency risk:

- Debt denominated in currencies other than the local or functional currency of the Group companies.
- Collections and payments for supplies, services or investments in currencies other than the functional currency.
- Income and expenses of certain foreign subsidiaries indexed to currencies other than the functional currency.
- Taxes derived from the accounting for tax purposes in local currencies other than the functional currency.
- Profit or loss on consolidation of the foreign subsidiaries.
- Consolidated carrying amount of investments in foreign subsidiaries.

The Group reduces this risk by ensuring that all its economic flows are denominated in the presentation currency of each Group company, provided that this is possible and economically practicable. The resulting open positions are integrated and managed through the use of derivatives, within the approved limits.

## **6. USE OF ESTIMATES AND SOURCES OF UNCERTAINTY**

### **a) Accounting estimates**

Certain assumptions and estimates were made by the Group in the preparation of these consolidated financial statements. The estimate with the most significant impact on the accompanying consolidated financial statements relates to the costs of closure and dismantling of electricity generation and distribution facilities.

Accordingly, each year the Group revises its estimates of any costs that it may incur for the dismantling and final closure of its power plants. As a result, at December 31, 2006, the Group companies in Greece, France and the US had made a provision for such costs (see Note 15), as under local legislation in these countries, the operation concessions have a limited term.

Although this estimate is based on the best information available at the balance sheet date, events may occur in the future that require adjustments (upwards or downwards) to be made prospectively in subsequent years. The effects of changes in estimates are recognized in the financial statements of the years in which they are made.

## **b) Sources of uncertainty**

The main source of uncertainty relates to the revision of Spain's regulatory regime for renewable energy, as set out in Royal Decree 436/2004, of March 12, scheduled for 2006. At the balance sheet date, this revision had yet to be approved. Until the amendments are passed, two factors tend to mitigate this uncertainty:

- The Royal Decree in question says in its statement of intent that it guarantees the owners of renewable plants reasonable returns on their investments.
- The current renewable energy plan raised Spain's target for renewable energy from 13,000 MW to 20,000 MW by 2010.

## **7. INFORMATION BY GEOGRAPHICAL AND BUSINESS SEGMENTS**

IAS 14 requires companies whose equity or debt securities are publicly traded to provide information by segment. This obligation therefore applies only to the Iberdrola Energías Renovables Group's parent company, IBERDROLA, S.A. For this reason the Iberdrola Energías Renovables Group has decided not to voluntarily report financial information by segment.

## **8. INTANGIBLE ASSETS**

The detail of the movement in the cost and accumulated amortization in 2006 and 2005 in the various items under this heading is as follows:

	<i>Thousands of euros</i>			
	<i>Goodwill</i>	<i>Concessions, patents, licenses, trademark and other</i>	<i>Computer software</i>	<i>Total</i>
Cost at January 1, 2006	30,850	9,971	4,377	45,198
Changes in the consolidation method and/or scope	-	826	-	826
Increases	2,171	2,285	3,966	8,422
Decreases	(2,058)	(1,410)	(9)	(3,477)
<b>At December 31, 2006</b>	<b>30,963</b>	<b>11,672</b>	<b>8,334</b>	<b>50,969</b>
Accumulated amortization at January 1, 2006	-	(1,708)	(1,085)	(2,793)
Changes in the consolidation method and/or scope	-	(297)	-	(297)
Amortization charge for the year	-	(2,288)	(1,279)	(3,567)
Decreases	-	-	4	4
<b>At December 31, 2006</b>	<b>-</b>	<b>(4,293)</b>	<b>(2,360)</b>	<b>(6,653)</b>
<b>Net carrying amount</b>	<b>30,963</b>	<b>7,379</b>	<b>5,974</b>	<b>44,316</b>

	<i>Thousands of euros</i>			
	<i>Goodwill</i>	<i>Concessions, patents, licenses, trademarks and other</i>	<i>Computer software</i>	<i>Total</i>
Cost at January 1, 2005	2,877	10,117	2,563	15,557
Changes in the consolidation method and/or scope	27,786	-	-	27,786
Increases	187	3,237	1,814	5,238
Decreases	-	(3,383)	-	(3,383)
<b>At December 31, 2005</b>	<b>30,850</b>	<b>9,971</b>	<b>4,377</b>	<b>45,198</b>
Accumulated amortization at January 1, 2005	-	(1,716)	(373)	(2,089)
Amortization charge for the year	-	(2,531)	(699)	(3,230)
Decreases	-	2,526	-	2,526
Transfers	-	13	(13)	-
<b>At December 31, 2005</b>	<b>-</b>	<b>(1,708)</b>	<b>(1,085)</b>	<b>(2,793)</b>
<b>Net carrying amount</b>	<b>30,850</b>	<b>8,263</b>	<b>3,292</b>	<b>42,405</b>

The detail of goodwill by company is as follows:

	<i>Thousands of euros</i>	
	<i>2006</i>	<i>2005</i>
C. Rokas, S.A.	25,468	27,786
Other	5,495	3,064
	<b>30,963</b>	<b>30,850</b>

At December 31, 2006 and 2005, there were no significant restrictions on the ownership of intangible assets.

Research and development costs recognized with a charge to the consolidated income statement by the Group in 2006 and 2005 were not material.

Apart from goodwill, the Group does not own any intangible assets with indefinite useful lives.

## **9. PROPERTY, PLANT AND EQUIPMENT**

The detail of movements in 2006 and 2005 in the various items under this heading, both in terms of costs and accumulated depreciation and provisions, is as follows:

	Thousands of euros				
	Balance at 01/01/06	Changes in the consolidation method and/or scope	Additions and charges to provisions	Disposals, write-offs and write-downs	Balance at 12/31/06
<b>December 31, 2006</b>					
<b>Property, plant and equipment in use</b>					
Cost					
Land and buildings	33,231	3,102	2,583	(80)	38,006
Electricity technical plant in use	3,723,412	144,530	15,459	(19,506)	4,295,336
Hydro-electric plants	300,402	-	-	-	311,348
Other alternative plants	498	-	-	(6)	492
Wind farms	3,053,710	149,208	15,312	(19,328)	3,530,336
Distribution facilities	358,824	(4,924)	-	(171)	353,729
Meters and measuring devices	1,624	-	147	-	95,349

The value of fully depreciated property, plant and equipment in use at December 31, 2006 and 2005 was 47,691 thousand euros and 43,508 thousand euros, respectively. The detail is as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
<b>Property, plant and equipment in use</b>		
<b>Electricity technical plant in use</b>	<b>45,494</b>	<b>43,227</b>
Hydro-electric plants	45,494	43,227
<b>Other items of property, plant and equipment in use</b>	<b>2,197</b>	<b>281</b>
	<u><b>47,691</b></u>	<u><b>43,508</b></u>

Investment commitments at December 31, 2006 amount to 107,649 thousand euros.

At December 31, 2006 and 2005, the amount of property, plant and equipment securing certain bank loans was not material.

## 10. FINANCIAL ASSETS

### a) Investments accounted for using the equity method

The changes in 2006 and 2005 in the carrying amounts of investments of the Group companies accounted for using the equity method (see appendix) were as follows:

	Thousands of euros						
	Balance at 01/01/05	Changes in the consolidation method and/or scope	Profit for the year	Balance at 12/31/05	Changes in the consolidation method and/or scope	Profit for the year	Balance at 12/31/06
Sotavento Galicia, S.A.	107	-	36	143	-	-	143
Energias Renováveis do Brasil, Ltda.	1,414	(1,414)	-	-	-	-	-
C. Rokas, S.A.(Note 28)	32,469	(32,469)	-	-	-	-	-
	<u>33,990</u>	<u>(33,883)</u>	<u>36</u>	<u>143</u>	<u>-</u>	<u>-</u>	<u>143</u>

**b) Other financial investments**

**b-1) Other non-current financial investments**

The detail of this heading in the accompanying consolidated balance sheet at December 31, 2006 and 2005 is as follows:

	<i>Thousands of euros</i>	
	<u>Balance at 12/31/06</u>	<u>Balance at 12/31/05</u>
Prepayments	28,191	27,073
Term deposits	26,844	-
Other loans	9,213	2,496
Other	3,051	319
	<u>67,299</u>	<u>29,888</u>

**b-2) Other current financial investments.**

This heading mainly relates to prepayments and loans to related and third parties.

**11. CURRENT TRADE AND OTHER RECEIVABLES**

The detail of this heading in the accompanying consolidated balance sheet at 31 December 2006 and 2005 is as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
Trade receivables	73,132	53,114
Other receivables	35,122	19,411
Related parties (Note 33)	36,723	220,659
	<u>144,977</u>	<u>293,184</u>

These receivables do not generally carry interest. They fall due in a period of up to 30 days. Restrictions, if any, on monetizing these receivables, are not material.

## 12. CASH AND CASH EQUIVALENTS

The detail of this heading in the accompanying consolidated balance sheet at 31 December 2006 and 2005 is as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
Cash	68,460	61,350
Short-term deposits	54,328	-
	<u>122,788</u>	<u>61,350</u>

As a general rule, cash deposited with banks earns interest at rates similar to market rates on daily deposits. Short-term deposits mature within a period of less than three months and earn market rates. There are no restrictions on cash withdrawals for significant amounts.

### 13. EQUITY

The detail of "Equity" at December 31, 2006 and 2005 is as follows:

	Thousands of euros										
	Share Capital	Share premium	Unrealized assets and liabilities revaluation reserve	Reserves in companies consolidated using the full or proportionate consolidation methods	Reserves in companies accounted for using the equity method	Legal reserve	Voluntary reserves	Translation differences	Net Profit for the year	Minority interests	Total
<b>Balance at January 1, 2005</b>	164,600	60,342	(9,070)	85,782	73	8,406	78,475	2,206	34,463	15,871	441,148
Appropriation of 2004 profit -	-	-	-	18,614	(18)	1,587	-	-	(34,463)	-	(14,280)

Changes in consolidation method and other	-	-	-	-	-	-	-	-	-	41,793	41,793
<b>Balance at December 31, 2005</b>	<b>164,600</b>	<b>101,979</b>	<b>(8,643)</b>	<b>64,879</b>	<b>55</b>	<b>9,993</b>	<b>78,475</b>	<b>2,159</b>	<b>144,325</b>	<b>66,539</b>	<b>624,361</b>
Appropriation of 2005 profit -	-	-	-	34,773	36	4,046	69,557	-	(144,325)	-	(35,913)
Dividends	-	-	-	-	-	-	-	-	-	-	-
Income and expense recognized directly in reserves net of tax	-	-	9,413	-	-	-	-	-	-	-	9,413
Transfers	-	-	-	(37,928)	-	-	37,928	-	-	-	-
Translation differences	-	-	-	-	-	-	-	(2,074)	-	-	(2,074)
Profit for the year attributable to equity holders of the parent	-	-	-	-	-	-	-	-	189,688	-	189,688
Profit for the year attributable to minority interests	-	-	-	-	-	-	-	-	-	10,684	10,684
Changes in consolidation method and other	-	-	-	-	-	-	(45)	-	-	(1,457)	(1,502)
<b>Balance at December 31, 2006</b>	<b>164,600</b>	<b>101,979</b>	<b>770</b>	<b>61,724</b>	<b>91</b>	<b>14,039</b>	<b>185,915</b>	<b>85</b>	<b>189,688</b>	<b>75,766</b>	<b>794,657</b>

### Share capital

The share capital of the parent company Iberdrola Energías Renovables, S.A.U. consists of 16,460,044 shares with a nominal value of 10 euros each, fully subscribed and paid with identical rights and held by Iberdrola, S.A. as Sole Shareholder at December 31, 2006.

### Legal reserve

According to the revised text of the Spanish Corporation Law, companies must transfer 10% of profits for the year to a legal reserve until this reserve reaches the equivalent of at least 20% of share capital. The legal reserve can be used to increase capital provided that the remaining reserve balance does not fall below 10% of the increased share capital amount. Otherwise, until the legal reserve exceeds 20% of share capital, it can only be used to offset losses, and only on condition that sufficient other reserves are not available for this purpose.

### Share premium

The revised text of the Spanish Corporations Law expressly permits the use of the share premium account balance to increase capital and does not establish any restrictions as to its use.

The increase in this heading in 2005 reflects the merger with Energéticos de Navarra, S.A.U. and the corresponding transfer of reserves on consolidation.

### Unrealized assets and liabilities revaluation reserve

Movements in this reserve due to changes in the value of derivatives classified as cash-flow hedges were as follows:

	<i>Thousands of euros</i>				
	<i>Balance at 01/01/2005</i>	<i>Change in fair value</i>	<i>Balance at 12/31/2005</i>	<i>Change in fair value</i>	<i>Balance at 12/31/2006</i>
<b>Cash flow hedges</b>					
Interest rate collars and swaps	(13,954)	657	(13,297)	13,220	(77)
Exchange rate swaps	-	-	-	1,262	1,262
<b>Deferred tax on unrealized assets and liabilities revaluation</b>	4,884	(230)	4,654	(5,069)	(415)
	<u>(9,070)</u>	<u>427</u>	<u>(8,643)</u>	<u>9,413</u>	<u>770</u>

#### 14. DEFERRED INCOME

The movement in this heading in 2006 and 2005 was as follows:

	<i>Thousands of euros</i>		
	<i>Capital grants</i>	<i>Other deferred income</i>	<i>Total</i>
<b>Balance at January 1, 2005</b>	<b>658</b>	<b>14,070</b>	<b>14,728</b>
Changes in the consolidation method and/or scope	47,567	-	47,567
Translation differences	-	1	1
Increases	9	31,066	31,075
Decreases	-	(229)	(229)
Transfers to profit and loss	(2,111)	(103)	(2,214)
<b>Balance at December 31, 2005</b>	<b>46,123</b>	<b>44,805</b>	<b>90,928</b>
Increases	4,884	27,543	32,427
Decreases	(134)	-	(134)
Transfers to profit and loss	(4,808)	(907)	(5,715)
<b>Balance at December 31, 2006</b>	<b>46,065</b>	<b>71,441</b>	<b>117,506</b>

Increases to "Other deferred income" in 2006 relate to the agreement between subsidiary Iberdrola Energías Renovables de Castilla La Mancha, S.A.U. and various wind farm developers regarding the licensing of certain facilities for connection to the grid allowing for joint dispatch of the power generated.

## 15. PROVISIONS

The detail of movements in this heading in 2006 and 2005 are as follows:

	<i>Thousands of euros</i>				<i>Total</i>
	<i>Provisions for pensions and similar obligations</i>		<i>Other provisions</i>		
	<i>Provision for pension commitments (Note 4.1)</i>	<i>Provision for employee electricity discounts</i>	<i>Provision for plant closure</i>	<i>Other provisions for contingencies and expenses</i>	
<b>Balance at January 1, 2005</b>	-	(18)	-	1,649	1,631
Changes in the consolidation method and/or scope	433	-	21,864	2,142	24,439
Increases	-	171	36	1,201	1,408
Decreases	-	-	-	(42)	(42)
Payments made	(61)	-	-	-	(61)
<b>Balance at December 31, 2005</b>	<b>372</b>	<b>153</b>	<b>21,900</b>	<b>4,950</b>	<b>27,375</b>
Changes in the consolidation method and/or scope	-	-	277	68	345
Increases	128	-	-	8,646	8,774
Decreases	-	(89)	(19,362)	(1,700)	(21,151)
<b>Balance at December 31, 2006</b>	<b>500</b>	<b>64</b>	<b>2,815</b>	<b>11,964</b>	<b>15,343</b>

As a result of changes to the method used to consolidate C. Rokas, S.A., the following provisions were recognized in the consolidated balance sheet at December 31, 2006:

- C. Rokas, S.A. has a commitment to pay employees a bonus upon retirement, the amount of which at December 31, 2006 and 2005 was 372 and 500 thousand euros, respectively.
- In addition, the company recorded a 21,900 thousand euro provision for the dismantling of electricity generation and distribution plants in accordance with Greek regulations. In 2006, the company re-evaluated this position, taking a 19,362 thousand euro write-down recognized under "Property, plant and equipment" in the consolidated balance sheet at December 31, 2006.

The Group records provisions for liabilities arising from ongoing litigation and from indemnity payments, as well as obligations, collateral and other similar guarantees.

The Group estimates that these obligations will fall due as follows:

	<u>Thousands of euros</u>
2008	3,390
2009 and beyond	11,953
	<u>15,343</u>

## 16. BANK BORROWINGS-LOANS

The detail of outstanding loans is as follow:

	<u>Thousands of euros</u>			
	<u>Balance at 12/31/05</u>	<u>Balance at 12/31/06</u>	<u>Current</u>	<u>Non-current</u>
<b>Bank borrowings loans</b>				
Loans and similar	356,256	578,819	102,508	476,311
Finance leases	13,071	10,035	4,152	5,883
Interest payable	2,233	2,235	2,235	-
	<u>371,560</u>	<u>591,089</u>	<u>108,895</u>	<u>482,194</u>

Loans and similar liabilities are shown at the nominal amount of the debt less arrangement costs.

At December 31, 2006 and 2005, the Group was fully up to date on all its outstanding financial debt obligations. None of the amounts in the table above matured prior to 31 December 2006.

Most of the debt contracted with third parties includes covenants with respect to key financial ratios and the obligation to pledge all the shares of the projects to creditors. Outstanding third-party debt containing these kinds of covenants amounted to approximately 480 thousand euros at December 31, 2006.

At the date of preparation of these consolidated annual accounts, neither Iberdrola Energias Renovables, S.A. nor any of its material subsidiaries were in breach of their financial commitments or any kinds of obligation that could trigger their early redemption.

The loans and credits payable in foreign currency (basically US dollars and Brazilian reais) are stated in euros at the year-end exchange rates calculated at the rates prevailing at that time. The outstanding balances of these loans in euros at December 31, 2006 and 2005 were 54,199 thousand and 0 euros, respectively.

At December 31, 2006 and 2005, the outstanding loans were bearing weighted average annual interest at 3.86% and 3.06%, respectively.

The detail by maturity of the long-term balances is as follows:

	<i>Thousands of euros</i>		
	<i>Finance leases</i>	<i>Loans and similar</i>	<i>Total</i>
2008	3,856	32,526	36,382
2009	2,027	72,427	74,454
2010	-	55,420	55,420
2011	-	50,654	50,654
2012 and beyond	-	265,284	265,284
	<u>5,883</u>	<u>476,311</u>	<u>482,194</u>

At December 31, 2006 and 2005, the Iberdrola Energías Renovables Group had 433,334 and 398,382 thousand euros, respectively, of undrawn lines of credit facilities maturing between 2006 and 2016. Of these amounts, 50,962 and 150,860 thousand euros, respectively, related to credit lines denominated in Brazilian reais to fund investments in Brazil.

## 17. DERIVATE FINANCIAL INSTRUMENTS

The detail of the headings reflecting the value of derivative instruments at December 31, 2006 and 2005, is as follows:

	<i>Thousands of euros</i>					
	<i>Assets 2006</i>		<i>Liabilities 2006</i>		<i>Liabilities 2005</i>	
	<i>Current</i>	<i>Non-current</i>	<i>Current</i>	<i>Non-current</i>	<i>Current</i>	<i>Non-current</i>
<b>INTEREST RATE HEDGES:</b>						
<b>Cash flow hedges</b>						
- Interest rate swap	-	1,829	(69)	(2,190)	(862)	(11,085)
- Collar	-	-	-	(149)	-	(1,350)
<b>FOREIGN EXCHANGE HEDGES:</b>						
<b>Fair value hedges</b>						
- Currency swap	-	-	-	-	219	-
- Foreign exchange hedge (USD)	1,318	-	(56)	-	-	-
<b>NON-HEDGING DERIVATIVES:</b>						
<b>Interest rate derivatives</b>						
- Interest rate swap	-	600	-	(65)	-	(60,425)
	<u>1,318</u>	<u>2,429</u>	<u>(125)</u>	<u>(2,404)</u>	<u>(643)</u>	<u>(72,860)</u>

The detail by maturity of the notional value of the hedging transactions in effect at December 31, 2006 is as follows:

	<i>Thousands of euros</i>					<i>Total</i>
	<i>2007</i>	<i>2008</i>	<i>2009</i>	<i>2010</i>	<i>2011 and beyond</i>	
<b>INTEREST RATE HEDGES:</b>						
<b>Cash flow hedges</b>						
- Interest rate swap	5,813	1,885	-	-	252,103	259,801
- Collar	-	-	24,438	2,286	8,583	35,307
<b>FOREIGN EXCHANGE HEDGES</b>						
<b>Fair value hedge</b>						
- Foreign exchange hedge (USD)	48,475	-	-	-	-	48,475
<b>NON-HEDGING DERIVATIVES</b>						
<b>Interest rate derivatives</b>						
- Interest rate swap	-	12,240	6,396	16,200	3,667	38,503
	<u>54,288</u>	<u>14,125</u>	<u>30,834</u>	<u>18,486</u>	<u>264,353</u>	<u>382,086</u>

The change in the fair value of derivatives classified as non-hedging derivatives gave rise to charges under "Financial costs" in 2006 and 2005 of 4,925 thousand and 12,072 thousand, respectively (see Note 26). Also, cash-flow hedges of interest rate risk reduced "Finance costs" by 3,902 and 5,890 thousand euros in 2006 and 2005, respectively (see Note 26).

## 18. OTHER NON CURRENT LIABILITIES

The detail of this heading at December 31, 2006 and 2005 is as follows:

	<i>Thousands of euros</i>	
	<i>Balance at 12/31/06</i>	<i>Balance at 12/31/05</i>
Iberdrola, S.A. (Note 33)	378,902	421,647
Related parties (Note 33)	37,730	39,549
Other	44,331	33,995
	<u>460,963</u>	<u>495,191</u>

The borrowings from Iberdrola, S.A. bore average interest rates of 1.81% and 1.87% in 2006 and 2005, respectively.

The figure for related companies derives from an agreement by Iberdrola Energías Renovables, S.A.U. to acquire stakes in a number of wind farm companies from the Gamesa Group in 2002. As part of this deal, in 2004 Gamesa granted Ibernova a 40,805 thousand euro discount against the future sales of these companies which, at December 31, 2006 and 2005, stood at 37,740 and 39,549 thousand euros, respectively.

Details of the balances and transactions with Group and related companies are given in Note 33.

## **19. DEFERRED TAX AND INCOME TAX**

The Parent Company Iberdrola Energías Renovables, S.A. files a consolidated tax return, having formed part of the tax group 2/86 headed by Iberdrola, S.A. since its incorporation.

Without prejudice to this special tax regime in Spain, which applies to the Parent and certain of its consolidated Spanish subsidiaries, other Spanish and foreign subsidiaries file individual income tax returns, in accordance with the laws applicable to them.

The differences between the tax charge allocated to 2006 and 2005 and the tax payable for those years, recorded under “Deferred tax assets” and “Deferred tax liabilities”, as appropriate, in the consolidated balance sheets at December 31, 2006 and 2005, arose as a result of the temporary differences relating to the difference between the carrying amount of certain assets and liabilities and their tax bases. The main differences are the following:

- Temporary differences arising from the measurement of assets and liabilities related to derivatives and assets that were measured at their market value in business combinations for which the difference between the tax base and carrying amount is not deductible for tax purposes.
- Temporary differences arising from changes in the value of investment securities whose carrying amount is not fully deductible for tax purposes.

The detail of current and deferred "Income tax" is as follows:

	<i>Thousands of euros</i>	
	<i>Balance at</i>	<i>Balance at</i>
	<i>12/31/06</i>	<i>12/31/05</i>
Current tax	86,199	82,197
Deferred tax	20,041	7,967
	<b>106,240</b>	<b>90,164</b>

Following the amendments to applicable tax legislation passed in November 2006, the carrying amounts of deferred tax assets and liabilities recognized and pending reversal at December 31, 2006 were modified to reflect the tax rate now expected to be in force when said reversal takes place.

Income tax expense on consolidated companies for 2006 and 2005 was calculated as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
<b>Profit before tax</b>	<b>306,612</b>	<b>243,364</b>
Non-deductible expenses and non-computable income from consolidation adjustments	(446)	1,038
Share of profit/(loss) of associates	-	36
<b>Adjusted consolidated accounting profit</b>	<b>306,166</b>	<b>244,438</b>
Gross tax calculated at the tax rate in force in each country	107,159	85,553
Tax relief	( 2,341)	(577)
Restatement of tax credits	<u>1,422</u>	<u>5,188</u>
<b>Income tax</b>	<b><u>106,240</u></b>	<b><u>90,164</u></b>

## 20. CURRENT TAX LIABILITIES AND OTHER TAX PAYABLES

The detail of "Tax receivables" and "Current tax liabilities and other tax payables" on the asset and liability sides, respectively, of the accompanying consolidated balance sheets at December 31, 2006 and 2005, is as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
<b>Non-current assets</b>		
Credit for tax relief on reinvested assets	-	10,156
Other	-	571
	<u>-</u>	<u>10,727</u>
<b>Current assets</b>		
VAT receivable	96,168	68,063
Tax withholdings and prepayments	27,229	30,238
Sundry tax receivables	<u>21,615</u>	<u>3,098</u>
	<b><u>145,012</u></b>	<b><u>101,399</u></b>
<b>Current liabilities</b>		
VAT payable	6,635	21,163
Tax withholdings payable	2,825	363
Income tax payable	53,952	54,729
Other tax payables	36	130
Social security payables	<u>558</u>	<u>522</u>
	<b><u>64,006</u></b>	<b><u>76,907</u></b>

In general, Group companies have all years since 2003 open for review by the tax inspection authorities for the main taxes applicable to them, except corporate income tax, for which all years since 2002 are open for review. However, this period may differ in the case of the Group companies taxed in different tax jurisdictions.

## 21. REVENUE

The detail of this heading in 2006 and 2005 is as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
<b>Electricity sales under ordinary regime</b>		
Other sales	22,537	21,537
<b>Electricity sales under special regime</b>		
Sales to pool	333,157	10,505
Sales to other distributors	<u>339,941</u>	<u>525,214</u>
	<u><b>695,635</b></u>	<u><b>557,256</b></u>

## 22. STAFF COSTS

The detail of this heading in 2006 and 2005 is as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
Wages and salaries	31,206	17,371
Social Security contributions	6,841	3,587
Charge to provision for employee electricity discounts	-	171
Other social charges	<u>139</u>	<u>522</u>
	<u><b>38,186</b></u>	<u><b>21,651</b></u>
 Capitalised staff costs		
Property, plant and equipment	<u><b>(8,125)</b></u>	<u><b>(5,656)</b></u>

The average number of employees in 2006 and 2005 was 671 and 431, respectively. The detail by professional category is as follows:

	<u>2006</u>	<u>2005</u>
University graduates and similar	317	150
Technicians	164	97
Clerical staff	33	8
Skilled workers	155	133
Auxiliary staff	2	43
	<u>671</u>	<u>431</u>

The average number of employees in the consolidated Group is calculated based on the percentage ownership of the parent company in the joint ventures consolidated using proportionate consolidation and the total number of employees of fully-consolidated subsidiaries.

### 23. OUTSIDE SERVICES

The detail of this heading in 2006 and 2005 is as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
Operation and maintenance	48,818	36,294
Operating leases	14,342	10,832
Insurance	6,381	5,552
Other	44,563	24,689
	<u>114,104</u>	<u>77,367</u>

The estimate of future minimum payments under non-cancelable operating leases outstanding at December 31, 2006 is as follows:

	<i>Thousands of euros</i>
2007	12,007
2008 – 2010	35,871
2011 and beyond	353,751
	<u>401,629</u>

The amount of estimated minimum future payments under non-cancelable operating leases outstanding at December 31, 2005 is as follows:

	<i>Thousands of euros</i>
2006	11,127
2007 – 2009	32,341
2010 and beyond	305,868
	<u>349,336</u>

These estimates assume each lease has a 30-year life, which is the case for most of the leases outstanding. That said, most also have clauses allowing for renewal on expiry.

#### 24. DEPRECIATION AND AMORTIZATION CHARGE AND ALLOWANCES

The detail of this heading in 2006 and 2005 is as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
Property, plant and equipment depreciation charge	183,676	148,770
Amortization of intangible assets	3,567	3,230
Capital grants transferred to profit or loss	(4,808)	(2,111)
	<u>182,435</u>	<u>149,889</u>

#### 25. FINANCE INCOME

The detail of this heading in 2006 and 2005 is as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
Income from other marketable securities	-	711
Finance income from loans or similar		
- From Group companies and associates	175	458
- From companies consolidated using the equity method	6	6
- Other finance income	1,019	1,293
Settlement of non-hedging derivatives	23,542	-
Exchange gains	1,008	18
Capitalized finance costs		
Property, plant and equipment (Note 9)	6,052	1,937
	<u>31,802</u>	<u>4,423</u>

## 26. FINANCE COSTS

The detail of this heading in 2006 and 2005 is as follows:

	<i>Thousands of euros</i>	
	<u>2006</u>	<u>2005</u>
Finance costs and similar expenses:		
- From loans from third parties	31,717	21,962
- From loans from Group companies	65,893	38,054
- From loans from companies consolidated using the equity method	394	-
Decrease in finance costs from interest rate hedges of cash flow (Note 17)	(3,902)	(5,890)
Other finance costs	248	1,341
Valuation adjustment of non-hedging derivatives (Note 17)	4,925	12,072
Finance costs from valuation of debt at amortized cost	1,099	1,241
	<u>100,374</u>	<u>68,780</u>

## 27. SWAPS

The Iberdrola Energías Renovables Group engaged in no material transactions in 2006 and 2005 entailing the delivery of cash.

## 28. BUSINESS COMBINATIONS

### a) 2006

In 2006 the Iberdrola Energías Renovables Group did not undertake any significant business combinations.

### b) 2005

The main business combinations completed in 2005 were:

- In accordance with agreements reached in 2005 with the main shareholders of C. Rokas, S.A. (hereinafter "Rokas"), the Iberdrola Energías Renovables Group acquired successive packages of shares representing 28.9% of Rokas' share capital for 58,219 thousand euros. Since in 2005 the Group had joint control over Rokas, it was proportionately consolidated until December, when the parent company's percentage of ownership increased to 49.9%. Since then it has been fully consolidated because the Group exercises effective control over this investee.

The acquisition of these share packages in 2005 meant the early execution of the aforementioned agreements which initially envisaged that the shares would be acquired over a period between 2005 and 2008.

The detail of the net assets acquired and of the allocation of the price paid in excess of fair value is as follows:

	Thousands of euros		
	<i>Carrying amount of the subsidiary before the business combination</i>	<i>Fair value adjustments</i>	<i>Fair value</i>
Net assets acquired:			
- Property, plant and equipment	48,427	18,654	67,081
- Deferred tax asset	2,616	-	2,616
- Inventories	1,958	-	1,958
- Receivables	5,584	-	5,584
- Cash and cash equivalents	8,730	-	8,730
- Financial liabilities	(24,868)	-	(24,868)
- Provisions and other payables	(17,724)	-	(17,724)
- Deferred tax liability	(792)	(5,969)	(6,761)
	<u>23,931</u>	<u>12,685</u>	<u>36,616</u>

The cost of acquisition of the various packages of shares acquired in 2005 amounted to 58,219 thousand euros, giving rise to goodwill of 21,603 thousand euros. The transaction gave rise to a net cash outflow of 49,489 thousand euros.

The impact that the business combinations described above would have had on “Net profit for the year” and “Revenue” in the 2005 consolidated income statement had the aforementioned combinations taken place on 1 January 2005 is not material in relation to these consolidated annual accounts.

## 29. CONTINGENT LIABILITIES

The Iberdrola Energías Renovables Group’s contingent liabilities, mainly litigation and other legal issues, are not material.

### **30. INTERESTS IN JOINT VENTURES**

The detail of the main items relating to Iberdrola Energías Renovables Group's transactions and percentage ownership in joint ventures (jointly controlled entities consolidated using proportionate consolidation) in 2006 and 2005 are as follows:

Thousands of euros

	Energías Renovables de la Región de Murcia, S.A.	Eólicas de Euskadi, S.A.	Eólica de Campollano, S.A.	Desarrollo de Energías Renovables de La Rioja, S.A.	Molinos del Cidacos, S.A.	Molinos de La Rioja, S.A.	Iberdrola Energías Renovables de La Rioja, S.A.	Other

### 31. GUARANTEE COMMITMENTS TO THIRD PARTIES

At December 31, 2006 and 2005, the Iberdrola Energías Renovables Group had provided guarantees of 70,170 thousand and 53,915 thousand euros, respectively, basically to various public bodies and financial institutions.

The Group considers that any additional liabilities that could arise from the guarantees provided at December 31, 2006 and 2005 would not be material.

Also, the Iberdrola Energías Renovables Group, in compliance with the contractual obligations related to loans received from banks, had pledged all or part of their shares at December 31, 2006 and 2005. The detail by company of pledged shares is as follows:

Company	<i>Thousands of euros</i>			
	<i>December 31, 2006</i>		<i>December 31, 2005</i>	
	<i>Number of shares pledged by percentage Group ownership</i>	<i>Carrying amount by percentage Group ownership</i>	<i>Number of shares pledged by percentage Group ownership</i>	<i>Carrying amount by percentage Group ownership</i>
Desarrollo de Energías Renovables de La Rioja, S.A.	668,415	9,480	598,125	7,990

### 32. INFORMATION ON THE SOLE DIRECTOR

In 2006 and 2005, the Sole Director of the parent Company and its representative (natural person) earned no remuneration of any kind, and received no advances or loans.

At December 31, 2006 and 2005, the Group had provided no guarantees nor contracted any pension or life insurance commitments to the Sole Director or its representative (natural person).

In compliance with article 127 ter. Section 4 of the Spanish Corporation Law, enacted by Law 26/2003, dated 17 July, which modifies Security Market Law 24/1988, dated 28 July, and the revised text of the Spanish Corporation Law, to reinforce the transparency of listed companies, it is noted that Iberdrola, S.A., Sole Director of the parent company, is head of a large group companies which mainly engage in the generation, transmission, distribution and supply of electricity and gas and holds, directly and indirectly, equity investments in companies having the same, similar or complementary activities as those of Iberdrola Energías Renovables II, S.A.U., as well as the positions held in said companies:

Company	% of ownership	Position or functions
"IBERDROLA ENERGÍA, S.A.U."	100%	Representative of Sole Director, Iberdrola S.A.
"IBERDROLA GENERACIÓN, S.A.U."	100%	Representative of Sole Director, Iberdrola S.A.
"IBERDROLA DISTRIBUCIÓN, S.A.U."	100%	None
"IBERDROLA INGENIERIA Y CONSTRUCCION, S.A.U."	100%	Representative of Sole Director, Iberdrola S.A.
"AMARA, S.A.U."	100%	Representative of Sole Director, Iberdrola S.A.

The annual accounts of Iberdrola, S.A. and subsidiaries for 2006 (available on [www.iberdrola.es](http://www.iberdrola.es)) provide additional information on the companies making up the Iberdrola Group.

The following table lists the companies engaging in an activity that is identical, similar or complementary to the corporate purpose of Iberdrola Energías Renovables, S.A.U., in which the representative (natural person) of Iberdrola, S.A., Sole Director of Iberdrola Energías Renovables, S.A.U., Julián Martínez-Simancas Sánchez owns equity interests, and of the functions, if any, that he discharges in them:

Company	Number of shares		Position held or duties performed
	Direct	Indirect	
"IBERDROLA, S.A."	1,651	-	General Secretary and Vice Secretary of the Board of Directors
"E.ON, S.A."	-	250	None
"GENERAL ELECTRIC CO."	-	1,330	None
"ELECTRICITE DE FRANCE"	-	250	None
"SIEMENS"	-	320	None
"SUNWAYS AG"	-	1,200	None
"VERBIO"	-	1,200	None
"LEGRAND"	-	800	None
"PHILIPS ELECTRONIC"	-	400	None
"GENERAL DE ALQUILER DE MAQUINARIA, S.A."	-	700	None
"FORTUM"	-	820	None
"IBERDROLA ENERGÍA, S.A.U."	-	-	Representative of Sole Director, Iberdrola S.A.

### 33. BALANCES AND TRANSACTIONS WITH OTHER IBERDROLA GROUP COMPANIES

The table below shows the detail of balances and transactions with Iberdrola Group companies and related parties, defined as those companies that are considered as such by Iberdrola, S.A. (Sole Shareholder of Iberdrola Energias Renovables, S.A.U.) at December 31, 2006 and 2005:

	Thousands of euros						
	At December 31, 2006		Year ended December 31, 2006				
	Current receivables	Current payables	Non-current payables	Revenue	Services received	Finance income	Finance costs
<b>Group</b>

				<u>422,569</u>	<u>20,500</u>	<u>175</u>	<u>64,837</u>
<b>Related parties</b>							
Gamesa Eólica, S.A.	-	172,171	37,730	-	-	-	-
	<u>36,723</u>	<u>2,404,075</u>	<u>416,632</u>				
	Thousands of euros						
	At December 31, 2005		Year ended December 31, 2005				
	Current receivables	Current payables	Non-current payables	Revenue	Services received	Finance income	Finance costs
<b>Group</b>							
Iberdrola, S.A.	2,327	1,849,269	421,647	-	8,560	458	37,773
Iberdrola Generación, S.A.U.	163,690	-	-	184,322	3,591	-	-
Iberdrola Distribución, S.A.U.	54,314	157	-	245,589	587	-	-
Iberdrola Ingeniería y Construcción, S.A.U.	-	19,916	-	-	4,220	-	-
				<u>429,911</u>	<u>16,958</u>	<u>458</u>	<u>37,773</u>
<b>Related parties</b>							
Gamesa Eólica, S.A.	328	259,926	39,549	-	-	-	-
	<u>220,659</u>	<u>2,129,268</u>	<u>461,196</u>				

In 2006, the Group reached an agreement with Gamesa Eólica, S.A. for the supply of wind turbines by which the Gamesa Group will supply the Group wind turbines with total capacity of 2,700 MW valued at over 2,300 million euros between 2007 and 2009 for installation in Spain, the rest of Europe, Mexico and the US. The contract extends to assembly and start-up, as well as operating and maintenance services during the guarantee period.

Also during the year, the Group committed to buying from Gamesa Energía (a subsidiary of Gamesa Corporación Tecnológica, S.A.) approximately 1,000 MW of wind capacity in the US, worth between 700 and 1,100 million US dollars, depending on the total capacity actually acquired and output.

In October 2005, Iberdrola Energías Renovables Group agreed to buy from Gamesa Energía, S.A. (a subsidiary of Gamesa Corporación Tecnológica, S.A.) certain wind farms with a combined installed capacity of 700 MW. These acquisitions will take place between 2006 and 2009 at a price of approximately 900,000 thousand euros, extendible to 2012.

#### **34. REMUNERATION OF SENIOR MANAGEMENT**

Staff costs (wages and salaries, bonuses, compensation in kind, social security costs, pension plans, etc.) relating to senior executives amounted to 4,434 thousand and 4,059 thousand in 2006 and 2005, respectively. These sums are recognized under "Staff Costs" in the accompanying 2006 and 2005 consolidated income statements.

#### **35. FINANCIAL POSITION**

The consolidated financial statements for 2006 and 2005 show a net working capital requirement, mainly due to the classification as current borrowings of the reciprocal current account debts that various Group companies have with Iberdrola, S.A. (see Note 33). It is the intention of Iberdrola, S.A. as the Group's Sole Shareholder, to provide all finance necessary to allow the Group to adequately carry on its business activities.

### **36. FEES FOR SERVICES PROVIDED BY AUDITORS**

Fees paid to the statutory auditor and related parties by Iberdrola Energías Renovables Group companies for the audit of their financial statements in 2006 and 2005 were 729 thousand and 380 thousand euros, respectively. Auditors' fees paid to other auditors who contributed to the audit of Iberdrola Energías Renovables Group companies in 2006 and 2005 were 35 thousand and 104 thousand, respectively.

The statutory auditor and related companies provided other professional services to Group companies in 2006 and 2005 amount to 90 thousand and 0 euros, respectively, while those for the same services by other auditors participating in the audit of Group companies came to 0 and 81 thousand euros, respectively.

### **37. ENVIRONMENTAL INFORMATION**

The Group incurred environmental expenses for insignificant amounts in 2006. It was not considered necessary to record any provision for liabilities and charges in connection with environmental issues, nor are there any contingencies relating to environmental protection and enhancement.

### **38. EVENTS AFTER DECEMBER 31, 2006**

The main transactions carried out by the Group after the end of the financial year were as follows:

- In February 2007, the parent company acquired a further 10% of subsidiary Biovent Holding, S.A. The price will depend on the company's performance. The amount initially paid in the first provisional settlement was 2 million euros.
- In February 2007, subsidiary Iberdrola Energias Renovaveis, S.A. acquired 100% of Portuguese company Eonergi Energía Eólica, S.A., which has 32 MW of capacity in operation, for an investment of approximately 36 million euros.
- On February 15, 2007, subsidiary Biovent Holding, S.A. acquired an additional 40% share of Energía Global Castellana, S.A. At December 2006, its ownership interest in the company stood at 60%. The estimated amount of the transaction was 27,478 thousand euros. The final amount will depend on the capacity ultimately installed. A provisional first payment of 13,595 thousand euros was made.
- In March 2007, subsidiary Iberdrola Energías Renovables de Castilla La Mancha, S.A.U. set up, together with another partner, the company Iberdrola Energía Solar de Puertollano, S.A., with a capital contribution of 36 million euros.

Also that month, the Iberdrola Energías Renovables, S.A.U. parent company acquired an additional 2.8% capital stake in subsidiary C. Rokas, S.A., raising its total ownership interest to 52.7%. The amount paid for this new stake was 12.5 million euros. In addition, the Group acquired a package of preferred stock without voting rights from the Rokas family for 26.9 million euros.

### **39. PREPARATION OF THE FINANCIAL STATEMENTS**

The consolidated financial statements for the year ended December 31, 2006 were prepared by the Sole Director on March 30, 2007.

## APPENDIX

### INFORMATION ON SUBSIDIARIES, ASSOCIATES AND INVESTEEES

The tables below give details of the percentage ownership held either directly or indirectly by Iberdrola Energías Renovables, S.A.U. in its subsidiaries. The percentage of voting rights in the corporate bodies of these companies controlled by Iberdrola basically corresponds to the percentage of ownership.

#### A. COMPANIES MAJORITY OWNED OR CONTROLLED AND FULLY CONSOLIDATED IN 2006 AND 2005

Company	Location	Activity	Direct or indirect percentage ownership		Auditor
			12/31/06	12/31/05

## **IBERDROLA ENERGÍAS RENOVABLES, S.A.U. AND SUBSIDIARIES**

### **Consolidated Management Report for the year ended December 31, 2006**

#### **SIGNIFICANT EVENTS IN 2006**

##### **a) Strategic Plan and installed capacity**

In 2006 Iberdrola raised its renewable energy generating capacity from 3,810 MW to 4,434 MW. The additional 624 MW (+16.4%) came in both Spain (420 MW) and abroad (204 MW). Of its total installed renewable capacity, 4,102 MW is wind power and 332 MW mini-hydroelectric.

This is above the 434 MW (+11%) target set in Iberdrola's Strategic Plan for 2002-2006 and cements Ibernova's position as a global leader in renewable energies.

In wind power it has added 607 MW of capacity, including 204 MW from Iberdrola's foreign wind farms, located in France, Germany, Poland, Greece, Brazil, Portugal and the US. In mini-hydroelectric capacity, 17 MW have been added.

Regarding other renewable technologies, the Group has a number of solar thermal and photovoltaic power generation projects under development, as well as biomass, bioethanol and biodiesel plants.

All this activity in 2006 required an investment of approximately 850 million euros.

##### **b) The international business**

In 2006, Iberdrola continued the international expansion of its renewable energy business begun in 2005.

First, the year featured its foray into the US market via a number of acquisitions (e.g. Community Energy and Midwest Renewable Energy Projects) and an agreement with Gamesa to acquire wind farms. Iberdrola ended 2006 with 26 MW of capacity in operation in the US and a project portfolio entailing more than 5,000 MW. It now has a permanent office set up in the state of Pennsylvania.

Second, the Group struck a deal to acquire Perfect Wind in France, which owns the rights to a portfolio of 600 MW of projects.

Finally, a number of construction projects were carried out and/or acquisitions made in other countries, such as Greece, Portugal, France, Poland, Germany, the UK, Estonia, Hungary and Brazil, while the Group also expanded its portfolio of future wind farms.

##### **c) Income statement highlights**

In 2006, Ibernova posted a 24.8% increase in revenue to 695,635 thousand euros, driven by growth output and higher average prices. The Group generated a total 7,867

GWh of electricity in the year, 11.5% more than in 2005. This was sold for an average price of 88.42 euros/MWh, an increase of 12% on the year before.

Operating profit increased, with EBITDA rising by 21.6% to 556,685 thousand euros and EBIT up 21.6% to 374,250 thousand euros.

Net profit for the year totaled 189.6 million euros, up from 144.3 million euros in 2005. This 31.4% increase was fuelled by higher average operating capacity, greater generation and higher average prices.

#### **BUSINESS OUTLOOK FOR 2007**

In 2007, the Iberenova Group will continue with its planned investment to roll out new projects currently under development or construction, expanding capacity in both its existing technologies of wind and mini-hydroelectric, and new technologies such as solar thermal and photovoltaic, biomass and biofuels.

In relation to the regulatory environment in Spain, the Company bills power generated in conformity with RD 436/2004 of March 12. In this statement of intent, this Royal Decree guarantees the owners of plants operating under the special regime reasonable returns on investment and sets a target of highly efficient and renewable energies accounting for nearly one-third of electricity consumption by 2010.

Article 40 of Royal Decree 436/2004 states that depending on the degree of completion of the Renewable Energies Development Plan, the tariffs, premiums, incentives and other would come into force and be applicable from January 1, 2008, but not retrospectively to past tariffs and premiums. This review was not carried out in 2006 and at the date of preparation of this report new legislation to this effect had yet to be enacted in 2007.

## **RESEARCH AND DEVELOPMENT**

In research and development, the RD&i Committee was created with the mission of managing the business innovation process.

Meanwhile, work continued on the renewables projects initiated in 2005:

- The MULTIPLICADORAS Project: this involves researching the relationship between the useful life of wind turbine generators and the external environmental conditions regarding wind speed, turbulence and outages under different regulatory regimes.
- The OLASLUZ Project: this is the first ocean wave power project in Spain, with capacity of up to 1.25 MW in Santoña, Santander, on the Bay of Biscay.
- CORE Project: a pioneering initiative in the sector to create the Toledo Renewables Operations Center. The center will optimize technical management and financial returns in real time, 24/7, 365 days a year, for all wind farms, mini-hydroelectric plants and substations whether run by Iberdrola or other renewables operators.
- The European WINDGRID Project: seeks to integrate wind farms into the electricity system, maximizing the use of renewables while ensuring the stable and secure operation of the grid. It also seeks to create a technical base that the EU can use to draw up standards and simulate possible scenarios.
- The METEOFLOW Project: forecasting wind power generation to be able to minimize diversions in the market and enhance operational management.
- The VOLTAGE DROPS AND REACTIVE POWER Project: looking at the connections between wind farms and the grid.

## **EVENTS AFTER THE BALANCE SHEET DATE**

The main transactions carried out by the Ibernova Group after the end of the financial year were as follows:

- In February 2007, the Ibernova parent company acquired a further 10% of subsidiary Biovent Holding, S.A. It already owned 85% of this company at year-end 2006. The price of the transaction is variable, with an initial payment of 2 million euros.
- In February 2007, subsidiary Iberdrola Energias Renovaveis, S.A. acquired 100% of Portuguese company Eoenergi Energía Eólica, S.A., which has 32 MW of capacity in operation, for an investment of approximately 36 million euros.
- In February 2007, an agreement was reached whereby the Group company Biovent Holding, S.A. would acquire the 40% it did not already own in Energía Global Castellana. It already owned 60% of this company at year-end 2006. The purchase price is variable, but is initially estimated at around 27.4 million euros, with an initial payment of 13.5 million euros.
- In March 2007, Ibernova acquired an additional 2.8% of the common shares of C. Rokas, S.A., in which at year-end 2006 it owned 49.9%. This took its holding to 52.7% at the end of March 2007, the date of preparation of the consolidated annual financial statements. In addition, Ibernova acquired a package of preferred stock without voting rights from the Rokas family for 26.9 million euros.
- Also, in the first quarter of the year a number of contributions of insignificant amounts were made to increase the Group's equity investments in subsidiaries.

## **TREASURY SHARES**

Ibernova did not acquire or carry out any transactions with treasury shares in 2006.

## **ENVIRONMENT**

The rollout of the Iberdrola Group's Global Environmental Management System was completed in 2006. This system, certified by the Spanish Association for Standardization and Certification (AENOR), approves the Environmental Guidelines which entail concrete aims and targets for the whole of the Iberdrola Group.

**PRELIMINARY TITLE. ABOUT THE REGULATIONS  
FOR THE GENERAL SHAREHOLDERS' MEETING**

**Article 1. Purpose of the Regulations.**

1. These Regulations are intended to (i) determine the basic rules for the preparation, call, quorum, conduct, adoption of resolutions at, conclusion, and documentation of the General Shareholders' Meeting of Iberdrola Renovables, S.A. (hereinafter, "Iberdrola Renovables" or the "Company"), and (ii) to determine the basic rules for the exercise for such purpose of the voting and related rights belonging to the Company's shareholders.
2. These Regulations are also intended to facilitate the effective exercise by the shareholders of their powers at a General Shareholders' Meeting, pursuant to the provisions of the By-Laws and the Law.

**Article 2. Scope of Application of the Regulations.**

These Regulations shall apply to all General Shareholders' Meetings of the Company, whether ordinary or extraordinary.

**Article 3. Duration.**

These Regulations shall have an indefinite duration and shall become effective upon the first General Shareholders' Meeting to be called after the approval thereof, without prejudice to the rights previously accorded to the shareholders under legal and by-law provisions. The same principles shall apply to any amendment of these Regulations approved by the shareholders at a General Shareholders' Meeting.

**Article 4. Dissemination of the Regulations.**

These Regulations shall be communicated to the National Securities Market Commission [*Comisión Nacional del Mercado de Valores*] and recorded in the Commercial Registry [*Registro Mercantil*] pursuant to applicable rules and regulations. The current text of these Regulations shall also be made available on the website of the Company.

**Article 5. Order of Priority.**

These Regulations further elaborate upon and supplement the legal and by-law provisions applicable to the General Shareholders' Meeting, which provisions shall prevail in the event of a conflict with the provisions of these Regulations.

**Article 6. Amendment of the Regulations.**

The Board of Directors and shareholders who individually or collectively hold interests equal to or greater than five (5%) percent of the share capital of the Company shall have the right to propose amendments to these Regulations. In addition, the amendments to these Regulations shall be subject to the dissemination provisions set forth in Article 4

above.

**TITLE I. DEFINITION AND TYPES OF, AND POWERS OF THE  
SHAREHOLDERS ACTING AT, GENERAL SHAREHOLDERS' MEETINGS**

**Article 7. Definition and Types of General Shareholders' Meetings.**

1. The group of all duly convened shareholders meeting at a General Shareholders' Meeting to debate and decide by the required majorities those matters within their power, or to be informed of those other matters that the Board of Directors deems appropriate, constitutes the sovereign decision-making body of the Company.

Resolutions duly adopted by the shareholders at a General Shareholders' Meeting shall be binding upon all shareholders, including those who are absent, dissent, abstain from voting, and who lack the right to vote, without prejudice to the rights such shareholders may have to challenge such decisions.

2. A General Shareholders' Meeting may be ordinary or extraordinary.

The shareholders acting at an ordinary General Shareholders' Meeting, which shall be previously called for such purpose, must meet within the first six (6) months of each fiscal year in order to review corporate management, approve financial statements from the prior fiscal year, if appropriate, and decide upon the allocation of the profits or losses from such fiscal year. Resolutions may also be adopted regarding any other matter within the power of the shareholders, provided that such matters appear on the agenda and that shareholders with the required capital are in attendance at the General Shareholders' Meeting.

Any General Shareholders' Meeting not provided for in the foregoing paragraph shall be deemed an extraordinary General Shareholders' Meeting and shall meet at any time of the year, provided that the Board of Directors deems such a meeting to be appropriate or in the event of the circumstances described in letter b) of paragraph 2 of Article 9.

**Article 8. Powers of the Shareholders Acting at a General Shareholders' Meeting.**

1. The shareholders at a General Shareholders' Meeting shall decide the matters assigned thereto by the Law, the By-Laws, or these Regulations, and particularly regarding the following matters:
  - a) Appointment and removal of Directors, as well as ratification of Directors designated by interim appointment to fill vacancies.
  - b) Approval, if applicable, of the establishment of systems for compensation of the Company's Directors and senior managers, consisting of the delivery of shares or of rights thereto, or compensation systems indexed to the value of the shares.
  - c) Appointment and removal of the Auditors.

- d) Review of corporate management and approval, if appropriate, of the financial statements for the prior fiscal year and the proposed allocation of the profits or losses thereof.
  - e) Increase or reduction in share capital, as well as the delegation to the Board of Directors of the power to increase capital.
  - f) Issuance of debentures and other negotiable securities, and delegation to the Board of Directors of the power for the issuance thereof.
  - g) Authorization for the derivative acquisition of the Company's own shares.
  - h) Approval and amendment of these Regulations.
  - i) Amendment of the By-Laws.
  - j) Merger, split-off, transformation of the Company; dissolution and overall assignment of assets and liabilities.
2. In addition, the shareholders acting at a General Shareholders' Meeting shall decide on any matter submitted thereto by the Board of Directors.

## **TITLE II. ORGANIZATION OF THE GENERAL SHAREHOLDERS' MEETING**

### **Article 9. Call of the General Shareholders' Meeting.**

1. Pursuant to the provisions of the By-Laws, the General Shareholders' Meeting must be formally convened by the Board of Directors through an announcement published in the Official Bulletin [*Boletín Oficial*] of the Commercial Registry and in one of the newspapers widely circulated in the province in which its registered office is located, as much in advance as required by the regulations in effect from time to time.
2. The Board of Directors must call a General Shareholders' Meeting in the following events:
  - a) In the event set forth in paragraph 2 of Article 7 above.
  - b) If the meeting is requested, in the manner provided for by Law, by shareholders who hold or represent at least five (5%) percent of the share capital, which request sets forth the matters to be addressed. In this event, the Board of Directors shall call for the General Shareholders' Meeting to be held within the statutorily prescribed time period. The Board of Directors must include the requested matters in the agenda.
3. The announcement of the call to meeting must contain all statements required by Law under such circumstances and must set forth the day, place, and time of the meeting upon first call and all matters to be dealt with. The announcement may also, if appropriate, set forth the date on which the General Shareholders' Meeting shall proceed upon second call.

4. The Company shall deliver a copy of the announcement of the call to the National Securities Market Commission. The text of the announcement shall also be accessible through the Company's website.
5. Beginning on the date of the announcement of the call, such information as is deemed appropriate to facilitate the attendance of the shareholders at the General Shareholders' Meeting and their participation therein shall be placed on the Company's website, including at least the following:
  - a) The documents relating to the General Shareholders' Meeting that are required by Law, with information regarding the agenda, resolutions proposed by the Board of Directors, and any other relevant information that the shareholders might need in order to cast their vote. In the event that the shareholders acting at the General Shareholders' Meeting must deliberate on the appointment, re-election, or ratification of Directors, the corresponding proposed resolution shall be accompanied by the following information: (i) professional profile and biographical data of the Director; (ii) other boards of directors, of listed or unlisted companies, of which the Director is a member; (iii) indication of the class of Director to which the Director belongs, as applicable, with mention, in the case of proprietary Directors, of the shareholder that proposes or proposed his appointment, or with which the Director has ties; (iv) the date of the Director's first and subsequent appointments as a Director of the Company, and (v) shares of the Company, and the derivative financial instruments having shares of the Company as underlying assets, of which such Director is the holder.
  - b) The existing channels of communication between the Company and the shareholders and, in particular, explanations pertinent to the exercise of a shareholder's right to information, indicating the postal and e-mail addresses to which the shareholders may direct their requests.
  - c) The means and procedures for granting a proxy to attend the General Shareholders' Meeting.
  - d) The means and procedures for distance voting, including, where applicable, the forms required to evidence attendance and the casting of votes by means of data transmission at the General Shareholders' Meeting.
6. The Company shall use its best efforts to include in its website, starting as soon as possible after the date of the call to meeting, an English version of the information and the principal documents related to the General Shareholders' Meeting, in order to facilitate shareholders' attendance and participation therein. In the event that such inclusion of website contents is carried out, the Spanish version of the aforementioned documents shall prevail in all cases.
7. Shareholders representing at least five (5%) percent of the share capital may request the publication of a supplement to the call of the General Shareholders' Meeting that includes one or more items in the agenda.
8. The shareholders' rights mentioned in paragraph 2, letter b), and in paragraph 7 above must be exercised by duly authenticated notice that must be received at the Company's registered office within five (5) days after the publication of the call to

meeting. The supplement to the call to meeting mentioned in such preceding paragraphs must be published within the statutorily prescribed time period.

9. The shareholders at the General Shareholders' Meeting may not deliberate on or decide matters that are not included in the agenda, unless otherwise provided by law.
10. The Board of Directors may require that a Notary attend the General Shareholders' Meeting and prepare the minutes thereof. In any event, the Board must require the presence of a Notary under the circumstances provided by Law.

**Article 10. Right of the Shareholders to Receive Information Prior to the Holding of the General Shareholders' Meeting.**

1. From the first date of publication of the call to the General Shareholders' Meeting through and including the seventh day prior to the date provided for the meeting to be held upon first call, the shareholders may request in writing such reports or clarifications as they deem are required, or ask questions in writing that they deem pertinent, regarding the matters contained in the agenda. In addition, upon the same advance notice and in the same manner, the shareholders may request information or clarifications or ask questions in writing regarding information accessible to the public that has been provided by the Company to the National Securities Market Commission since the holding of the last General Shareholders' Meeting.

All such requests for information may be made by delivery of the request to the Company's registered office, or by delivery to the Company via mail or other means of electronic or long-distance data communication sent to the address specified in the announcement of the meeting or, in the absence of such specification, to the Office of the Shareholder [*Oficina del Accionista*]. Requests shall be allowed in which the electronic document pursuant to which the information is requested includes a recognized electronic signature used by the requesting party or other mechanisms that, pursuant to a resolution previously adopted for such purpose, the Board of Directors deems sufficient to ensure authenticity and the identity of the shareholder exercising such right to receive information.

Whatever the means used to issue the requests for information, the request of the shareholder must include the shareholder's first and last names, with evidence of the shares owned, in order for this information to be checked against the list of shareholders and the number of shares held in the shareholder's name provided by *Sociedad de Gestión de los Sistemas de Registro, Compensación y Liquidación de Valores, S.A.* (Iberclear) for the General Shareholders' Meeting in question. The shareholder shall be responsible for maintaining proof of delivery of the request to the Company as and when due. The Company's website shall provide detailed explanations regarding the exercise of the shareholder's right to receive information, in compliance with the provisions of applicable rules and regulations.

2. The Board of Directors shall be required to provide the information requested pursuant to the preceding paragraphs in the form and within the periods provided by the By-Laws, these Regulations, and the Law, except in cases in which (i) it is

requested by shareholders representing less than twenty-five (25%) percent of the share capital and publication thereof may, in the opinion of the Chairman, prejudice the interests of the Company; (ii) the request for information or clarification does not refer to matters included in the agenda or to information accessible to the public that has been provided by the Company to the National Securities Market Commission since the holding of the last General Shareholders' Meeting; (iii) the requested information or clarification is unnecessary to form an opinion regarding the matters submitted to shareholders, or is deemed abusive for any reason; or (iv) legal or regulatory provisions provide otherwise.

3. The Board of Directors may authorize any of its members to respond on behalf of the Board of Directors to shareholder requests for information.
4. The call to the General Shareholders' Meeting shall indicate the means whereby any shareholder may obtain from the Company, immediately and without charge, the documents that must be submitted for approval by the shareholders, as well as the Management Report and the Auditors' Report.
5. When the shareholders are required to deal with an amendment to the By-Laws, besides the statements required in each case by Law, the notice of the call must make clear the right of all shareholders to examine, at the Company's registered office, the complete text of the proposed amendment and the report thereon and to request that such documents be delivered or sent to them without charge.
6. In the cases in which the Law so requires, such information and supplemental documentation as is mandatory shall be made available to the shareholders.
7. The Company shall comply with the legally established obligations to provide information to the shareholders through its website, without prejudice to the ability to utilize any other means for this purpose, and without detriment to the shareholders' right to request said information in written form, pursuant to the provisions of applicable legislation.

### **TITLE III. RIGHT TO ATTEND AND PROXY REPRESENTATION**

#### **Article 11. Right to Attend.**

1. All holders of voting shares may attend the General Shareholders' Meeting, with the right to be heard and to vote.
2. In order to exercise the right to attend, shareholders must have the shares registered in their name in the corresponding book-entry registry at least five (5) days prior to the day on which the General Shareholders' Meeting is to be held. This circumstance must be evidenced by means of the appropriate attendance card or validation certificate issued by the entity or entities in charge of the book-entry registry, or in any other form allowed by applicable legislation.

## Article 12. Right of Proxy Representation.

1. All shareholders having the right to attend may be represented at the General Shareholders' Meeting by another person, even if that person is not a shareholder, if the requirements and formalities established in the Law, the By-Laws, and these Regulations are met. Proxies granted to a person who cannot act as a representative in accordance with Law shall be invalid and ineffective.
2. Without prejudice to the provisions of the Companies Law [*Ley de Sociedades Anónimas*], proxy representation must be granted in writing or by mail or e-mail. When granted by means of mail or e-mail, only those proxies that are granted in the following manner shall be deemed valid:
  - a) by postal correspondence, delivering to the Company an instrument indicating the proxy granted and accompanied by the attendance card issued by the entity or entities in charge of the book-entry registry.
  - b) by electronic correspondence, through notice to the Company setting forth the details of the proxy being granted and the identity of the shareholder being represented, and using a recognized electronic signature of the shareholder or with another type of guarantee that the Board of Directors deems best ensures authenticity and the identification of the shareholder granting the proxy, and which shall be accompanied by an unalterable electronic copy of the attendance and voting card.

A proxy granted by either of the above-mentioned means of long-distance communication must be received by the Company before midnight on the day immediately prior to the day set for the holding of the General Shareholders' Meeting upon first call. Otherwise, the proxy shall be deemed not to have been granted.
3. The Board of Directors has the power to further elaborate upon the foregoing provisions by establishing rules, means, and procedures adjusted to the current state of the art, in order to organize the grant of proxies by electronic means, in accordance with the rules and regulations, if any, issued for such purpose.

Specifically, the Board of Directors may (i) establish rules for the use of guarantees other than electronic signatures for the granting of proxies by electronic correspondence, and (ii) reduce the advance period for receipt by the Company of proxies granted by postal or electronic correspondence.
4. The Chairman of and the Secretary for the General Shareholders' Meeting shall have the widest powers to recognize the validity of a document or media evidencing representation by proxy; only those that fail to meet the minimum legal requirements may be deemed invalid, and only provided that such failure cannot be cured.
5. A proxy is always revocable. Personal attendance at the General Shareholders' Meeting by the shareholder granting the proxy shall have the effect of revoking the proxy.

6. In cases where the Directors of the Company make a public solicitation for proxies, the rules contained in the Companies Law, the Securities Market Law, and rules and regulations further elaborating upon the provisions thereof shall apply. In particular, the document evidencing the proxy must contain or have the agenda attached thereto, as well as the solicitation of instructions for the exercise of voting rights and the way in which the proxy-holder will vote in the event that specific instructions are not given, subject in all cases to the provisions of Law. The delegation may also include those matters which the Law allows to be dealt with at the General Shareholders' Meeting, even when not provided for in the agenda.
7. If the proxy has been validly granted pursuant to the Law and these Regulations but does not include voting instructions or questions arise as to the intended proxy-holder or the scope of the representation, it shall be deemed that the proxy (i) is granted in favor of the Chairman of the Board of Directors, (ii) refers to all of the proposals included in the agenda for the General Shareholders' Meeting, (iii) contains the instruction to vote favorably thereon, and (iv) also extends to matters that may be raised outside of the agenda, in respect of which the proxy-holder shall cast his vote in the direction he deems most favorable to the interests of the shareholder granting the proxy.
8. Unless otherwise indicated by the shareholder granting the proxy, in the event that the proxy-holder is subject to a conflict of interest, it shall be deemed that the shareholder granting the proxy has also appointed as proxy-holders, jointly and severally and successively, the Chairman of the General Shareholders' Meeting and, if such Chairman is also subject to a conflict of interest, the Secretary for the General Shareholders' Meeting.

#### **Article 13. Attendance Cards.**

1. Entities participating in the *Sociedad de Gestión de Sistemas de Registro, Compensación y Liquidación de Valores, S.A. (Iberclear)* may be authorized to issue cards for attendance at the General Shareholders' Meeting in favor of their respective depositing shareholders, which cards may also be issued by the Company itself in exchange for the deposit of documents evidencing ownership of the shares.
2. For such purpose, the Company may propose to such entities the format of the attendance card to be issued to the shareholders, in order for the cards issued by such entities to be uniform and to include a bar code or other system that allows for the electronic reading thereof in order to facilitate the computerized calculation of attendees. The Company may also propose the formula to be recited in such document in order to delegate proxy representation at the meeting in favor of another person, which should also set forth the way in which the proxy-holder will vote on each of the resolutions proposed by the Board of Directors for each item on the agenda in the absence of specific instructions of the shareholder being represented. The attendance card may specify the identity of the proxy-holder in the absence of express appointment by the shareholder being represented.

**Article 14. Other Attendees.**

1. The members of the Board of Directors must attend the General Shareholders' Meeting. The absence of any of such members shall not affect the valid formation of a quorum for the General Shareholders' Meeting.
2. Managers, technical experts, and other persons interested in the efficient conduct of corporate affairs may be authorized to attend the General Shareholders' Meeting by the Chairman thereof. In addition, the Chairman of the General Shareholders' Meeting may grant the press, financial analysts, and any other person the Chairman deems appropriate, access to such General Shareholders' Meeting, provided, however, that the shareholders acting thereat may revoke such authorization.

**TITLE IV. INFRASTRUCTURE AND EQUIPMENT**

**Article 15. Place of the Meeting.**

1. The General Shareholders' Meeting shall be held at the place indicated in the call to meeting within the municipality where the Company's registered office is located. If no place is indicated in the call, it shall be deemed that the meeting will take place at the registered office.
2. The General Shareholders' Meeting may be attended by going to the place where the meeting is to be held or, if applicable, to other places provided by the Company and indicated in the call to meeting, and which are connected therewith by video conference systems that allow recognition and identification of the parties attending, permanent communication among the attendees regardless of their location, and participation and voting, all in real time. The principal place of the meeting must be located in the municipal area of the Company's registered office, but supplemental locations need not be so located. For all purposes relating to the General Shareholders' Meeting, attendees at any of the sites shall be deemed attendees at the same individual meeting. The meeting shall be deemed to be held at the principal location thereof.

**Article 16. Infrastructure, Equipment, and Services Available at the Premises.**

1. The premises to be used to hold the General Shareholders' Meeting shall have the personnel, equipment, infrastructure, technical equipment, and the safety, assistance, and emergency measures necessary for the meeting, in a manner consistent with the features and location of the property and the importance of the event. In addition, the premises for holding the General Shareholders' Meeting shall have the emergency and evacuation facilities and measures required by law, as well as other measures deemed appropriate in light of the circumstances.
2. Appropriate safety controls and surveillance and protection measures, as well as systems for controlling access to the meeting, shall be established in order to ensure the safety of the attendees and the orderly conduct of the General Shareholders' Meeting.

3. At the entrance to the premises where the meeting is held, the attendees shall be delivered a copy of the full text of the resolutions proposed by the Board of Directors for submission to the shareholders regarding each item on the agenda. Excepted from the foregoing are those proposals that have been prepared immediately prior to the holding of the General Shareholders' Meeting and that for such reason cannot be delivered in written form to all of the attendees. In addition, there shall be made available to the attendees copies of the management reports and other documentation that, pursuant to legal or by-law provisions, must be made available to the shareholders with respect to such proposed resolutions.
4. The entire proceedings of the General Shareholders' Meeting may be the subject of audiovisual recording, if so determined by the Chairman thereof. The attendees may not use photographic, video, image and/or sound recording equipment or other similar equipment in the room where the General Shareholders' Meeting is taking place, except to the extent allowed by the Chairman. Equipment allowing for the simultaneous interpretation of debate may also be made available, when deemed appropriate for any reason.

**Article 17. Computer System for the Recording of Proxies and Voting Instructions, Preparation of the List of Attendees, and Calculation of Voting Results.**

1. Sufficiently in advance of the day specified for the holding of the General Shareholders' Meeting, the Company shall provide the personnel and technical equipment required to perform computer monitoring and calculation of the proxies (with the corresponding voting instructions, if any) received by the members of the Company's Board of Directors.
2. In addition, on the day of the General Shareholders' Meeting, the premises indicated for the meeting shall be supplied with the above-mentioned computer personnel and technical equipment for the purpose of recording the entry of shareholders and shareholder representatives attending the meeting in order to calculate the provisional and final quorum for the General Shareholders' Meeting and the preparation of the list of shareholders present in person and by proxy, which shall be electronically recorded in duplicate and sealed, and the cover of which shall show the appropriate identification procedure signed by the Secretary with the approval of the Chairman, and the procedure, if any, followed by the Notary Public, which shall be attached to the minutes of the General Shareholders' Meeting. Such personnel and equipment shall also be provided in order to calculate the voting.
3. In order to undertake such activity, the Company shall, pursuant to applicable rules and regulations, ask the *Sociedad de Gestión de los Sistemas de Registro, Compensación y Liquidación de Valores, S.A.* (Iberclear) to provide, in electronic form and within the time periods established for such purpose, the list of the Company's shareholders and the number of shares appearing in the name of each shareholder.

**Article 18. Office of the Shareholder.**

The Company shall set up an Office of the Shareholder in a visible place at the stated premises of the General Shareholders' Meeting, for the purpose of (i) answering questions regarding the proceedings raised by the shareholders prior to the commencement of the session, without prejudice to the shareholders' rights established by law and the By-Laws to take the floor, make proposals, and vote; and (ii) assisting and informing attendees and shareholders who wish to take the floor, preparing for such purpose a list of those who previously state their desire to participate, as well as collecting the text of their statements, if such statements are available in writing.

**TITLE V. CONDUCT OF THE GENERAL SHAREHOLDERS' MEETING**

**Article 19. Opening of the Premises and Controlling Access Thereto.**

1. In the place and on the day provided, whether on first or second call, for the holding of the General Shareholders' Meeting, and beginning one hour prior to the time announced for the commencement of the meeting (unless otherwise specified in the notice of the call), the shareholders or their valid representatives may present their respective attendance cards, proxies and, if applicable, the documents evidencing their status as legal representatives, to the staff of the Office of the Shareholder. The registration of shareholders attending the meeting in person and by proxy shall be carried out through optical scanning or other similar technical equipment, pursuant to the provisions of Article 17 above.
2. In the event that the General Shareholders' Meeting is held on second call due to the failure to attend of the number of shares legally required to hold the General Shareholders' Meeting on first call, such circumstance shall be properly recorded in the minutes of the General Shareholders' Meeting.

**Article 20. Chairman, Secretary, and Presiding Committee of the General Shareholders' Meeting.**

1. The Presiding Committee [*Mesa*] of the General Shareholders' Meeting shall be formed at the time stated in the call for the General Shareholders' Meeting to take place.
2. The Chairman of the Board of Directors or, in the absence thereof, the Vice-Chairman, shall act as the Chairman of the General Shareholders' Meeting; if there are several Vice-Chairmen, they shall act in the order set forth in the By-Laws; in the absence of the foregoing, the longest-serving Director shall serve, and in the absence of all of the above, the shareholder designated by the shareholders themselves shall serve.
3. The Secretary of the Board of Directors and, in the absence thereof, the Vice-Secretary of the Board of Directors, shall act as the Secretary for the General Shareholders' Meeting; in the absence of both, the Director with the least amount of time in such position shall serve; and in the absence of all of the above, the shareholder designated for such purpose by the shareholders themselves shall serve.

The Chairman may also, if so desired, obtain the assistance of any expert the Chairman deems appropriate.

4. The Chairman and the Secretary, along with the remaining members of the Board of Directors in attendance, shall constitute the Presiding Committee of the General Shareholders' Meeting.

**Article 21. Powers of the Chairman of the General Shareholders' Meeting.**

1. The Chairman of the General Shareholders' Meeting, who is responsible for presiding over the meeting, shall generally have the broadest powers needed for the best progress of the General Shareholders' Meeting, including the following:
  - a) To call the meeting to order.
  - b) To verify that there is a valid quorum for the General Shareholders' Meeting and, if applicable, to declare it to be validly in session.
  - c) To recognize the request, if any, made by the Board of Directors for the presence of a Notary Public to take the minutes of the General Shareholders' Meeting.
  - d) Together with the Secretary for the General Shareholders' Meeting, to make decisions regarding questions, requests for clarification or claims raised with respect to the list of attendees and delegated powers or proxies.
  - e) To direct presentations, such that debate adheres to the agenda.
  - f) To direct the deliberations by granting the floor to shareholders who so request, and taking the floor away or refusing to grant it when the Chairman deems that a matter has been sufficiently debated, is not on the agenda, or hinders the progress of the meeting.
  - g) To accept or reject new proposals with respect to matters included in the agenda.
  - h) To indicate the time for voting.
  - i) To organize the voting and, with the assistance of the Secretary, to perform the calculation thereof.
  - j) To announce the results of the voting.
  - k) To temporarily suspend the General Shareholders' Meeting.
  - l) To adjourn the meeting.
  - m) And, in general, to exercise all other powers, including those of order and discipline, that are required to properly hold the General Shareholders' Meeting.
2. The Chairman, even when present at the meeting, may entrust management of debate to a Director the Chairman deems appropriate, or to the Secretary, who shall carry out these duties on behalf of the Chairman, who may re-take them at any time.

3. If the Chairman of the General Shareholders' Meeting is absent for any reason during the holding of the meeting, the replacement thereof in the exercise of his duties shall be carried out in accordance with the provisions of paragraph 2 of Article 20 above, and in accordance with the provisions of the By-Laws.

**Article 22. Powers of the Secretary for the General Shareholders' Meeting.**

1. The Secretary shall have the following powers:
  - a) To declare the Presiding Committee to be formed, and to announce the members thereof.
  - b) To inform the shareholders, by delegation from the Chairman, of the provisional and final quorum of shareholders attending the General Shareholders' Meeting, indicating the number of shareholders represented in person and by proxy, as well as the number of shares represented in person and by proxy, and the percentage of share capital represented thereby, and also indicating the total number of shares represented at the General Shareholders' Meeting as well as the percentage such number represents of the total share capital of the Company, for which purpose the Company's treasury shares shall not be counted as being present.
  - c) To read, if applicable, or to make a summary report of the essential terms of the call to meeting, the text of the resolutions proposed by the Board of Directors; the Company's Annual Financial Statements (Balance Sheet, Profit and Loss Statement, and Notes to the Financial Statements) and, if applicable, the Consolidated Annual Financial Statements, the Company's Management Report and, if applicable, the consolidated Management Report; and the Proposal for the Allocation of Profits or Losses and the Auditors' Report(s).
  - d) Together with the Chairman, to make decisions regarding questions, requests for clarification, or claims raised with respect to the list of attendees and delegated powers or proxies.
  - e) If applicable, to draw up the minutes of the General Shareholders' Meeting.
2. If the Secretary for the General Shareholders' Meeting is absent for any reason during the holding of the meeting, the replacement thereof in the exercise of the Secretary's duties shall be carried out in accordance with the provisions of paragraph 3 of Article 20 above, and in accordance with the provisions of the By-Laws.

**Article 23. Establishment of a Quorum for the General Shareholders' Meeting.**

1. The General Shareholders' Meeting, whether ordinary or extraordinary, shall be validly established with the minimum quorum required by applicable legislation, in light of the matters appearing on the agenda.
2. The absence of shareholders occurring once a quorum for the General Shareholders' Meeting has been established shall not affect the validity of the meeting.

3. If the attendance of shareholders representing a certain percentage of the share capital or the consent of specific interested shareholders is required pursuant to the applicable legal or By-Law provisions in order to validly adopt a resolution regarding one or more items on the agenda of the General Shareholders' Meeting, and such percentage is not reached or such shareholders are not present in person or by proxy, the shareholders shall be limited to deliberating and deciding upon those items on the agenda that do not require the presence of such percentage of capital or such shareholders in order to be decided.

**Article 24. List of Attendees.**

1. Once the Presiding Committee has been formed, and prior to beginning with the agenda, a list of attendees shall be prepared that sets forth the nature or representation of each attendee and the number of their own or other parties' shares present. At the end of the list, there shall be a determination of the number of shareholders present in person or by proxy, as well as the amount of capital they own, with a specification as to which capital corresponds to shareholders with the right to vote. The list of attendees shall include as present those shareholders who have cast their votes from a distance pursuant to the provisions of the By-Laws and these Regulations.
2. The list of attendees shall appear at the beginning of the minutes of the General Shareholders' Meeting, or shall be attached thereto in the form of an appendix signed by the Secretary and approved by the Chairman. The list of attendees may also be drawn up through the use of a file, or may be placed on electronic media. In such cases the sealed cover of the file or the medium shall show the appropriate identification signed by the Secretary for the General Shareholders' Meeting with the approval of the Chairman.
3. The Secretary has the power, exercised by delegation from the Chairman, to prepare the list of attendees. The Secretary shall be provided with the equipment and systems determined by the Chairman for preparation of the list and, if applicable, for the counting of votes.

**Article 25. Opening of the Session.**

1. Prior to the commencement of the General Shareholders' Meeting, the Chairman, or by delegation therefrom, the Secretary, shall announce the provisional information relating to the number of shareholders with the right to vote attending the session in person, including those who voted from a distance, or by proxy, with an indication of their interest in the share capital. In view of such information, the Chairman shall, if appropriate, provisionally declare the existence of a quorum for the General Shareholders' Meeting and shall open the session.
2. If appropriate, the Chairman shall announce the presence of a Notary Public at the meeting, shall identify such Notary Public, and shall disclose the request made of the Notary Public to prepare the minutes of the General Shareholders' Meeting.
3. If a Notary Public has been required to prepare the minutes of the meeting, the Notary Public shall ask the shareholders and make clear in the minutes whether

there are reservations or objections regarding the statements of the Chairman regarding the number of shareholders in attendance or the capital that is present.

**Article 26. Shareholder Requests to Address the General Shareholders' Meeting.**

1. Once the Chairman has declared the General Shareholders' Meeting to have commenced, those shareholders who desire to address the meeting and, if applicable, to request information or clarifications regarding the items on the agenda or to make proposals, shall identify themselves to the Notary Public or to the persons assisting him, or, in the absence thereof, to the Secretary or assistants thereto provided for such purpose or, if so indicated, to the Office of the Shareholder, and state their first and last names, the number of shares they own and the number that they represent. If one of the presenting shareholders requests that their presentation appear verbatim in the minutes of the General Shareholders' Meeting, the shareholder must at such time deliver it in writing to the Notary Public (or, in the absence thereof, to the Secretary), in order for the latter to be able to compare it to the shareholder's presentation.
2. In addition, regarding the right of participation in order to take the floor, the Chairman shall inform the attendees that, in order to speed up the progress of the General Shareholders' Meeting, those shareholders who wish to speak must provide the Office of the Shareholder with their name and the number of shares they hold, as well as the text of their presentation, if they have it in writing, in order to make a copy to facilitate the preparation of the minutes of the General Shareholders' Meeting.

**Article 27. Reports.**

1. While the shareholders who desire to take the floor are identified pursuant to the provisions of the foregoing article, the Secretary, at the direction of the Chairman, shall inform the shareholders of the various publications of the pertinent notice of the call to meeting, and shall proceed to a reading thereof, unless the shareholders resolve that such publications shall be deemed to have been read.
2. Thereafter, the General Shareholders' Meeting shall continue, with the presentation of reports by the Chairman and the reports, if any, of the members of the Board of Directors or persons designated for such purpose.
3. Thereafter, and in any event prior to voting on the business included in the agenda, the Chairman shall commence the period for presentations by the shareholders.

**Article 28. Shareholder Presentation Period.**

1. Presentations by the shareholders shall occur in the order in which they are called by the Presiding Committee, after the setting of the periods for such presentations by the Chairman. No shareholder may make a presentation dealing with business not included in the agenda or without being granted the floor by the Chairman of the General Shareholders' Meeting.

2. The shareholders shall initially have a maximum of five (5) minutes for each presentation, without prejudice to the Chairman's power to extend such period. Notwithstanding the foregoing, when the number of presentations requested or other circumstances so require, the Chairman may set a maximum period of less than five (5) minutes for each presentation, giving due regard in each case to the equal treatment of presenting shareholders and the principle of non-discrimination.
3. In the exercise of the Chairman's powers to preside over the General Shareholders' Meeting, and without prejudice to other action that may be taken, the Chairman:
  - a) may extend the time initially allotted to each shareholder, when the Chairman so deems appropriate;
  - b) may decide the order in which answers will be provided to the shareholders and whether such answers will be given following each presentation period or as a collective response after the last presentation;
  - c) may request that the presenting parties clarify issues that have not been understood or that have not been sufficiently explained during the presentation;
  - d) may call the presenting shareholders to order, so that they limit their presentation to business properly before the General Shareholders' Meeting, and to refrain from making improper statements or exercising their right in an abusive or obstructionist manner;
  - e) may announce to the presenting parties that the time for their presentations will soon be ending, so that they may adjust their discourse and, when the time granted for their presentation has ended, or if they persist in the conduct described in the preceding paragraph, may withdraw the floor from them; and, if the Chairman believes that their presentation might alter the proper order and normal conduct of the meeting, the Chairman may cause the presenting parties to leave the premises and, if applicable, may adopt appropriate measures in order to comply with this provision; and
  - f) may deny the floor when the Chairman believes that a particular matter has been sufficiently debated, is not included in the agenda, or hinders the progress of the meeting.

The Chairman shall endeavor to maintain order in the room in order to allow the presenting parties to make their presentations without undue interruption.

4. During their presentations, the shareholders may make proposals regarding any matter on the agenda, except in those cases in which the Law provides that they must be made available to the shareholders at the Company's registered office at the time the call to meeting is published. They may also propose the adoption of resolutions on those matters that may be debated and decided at the General Shareholders' Meeting without such matters appearing on the agenda for the meeting, and may also exercise their right to receive information as described in the next article.
5. When several shareholders ask to make a presentation regarding the same matter, any of them may withdraw their presentation and yield their time to the others.

6. If one of the shareholders desires to make a new presentation, such shareholder shall so request the Chairman of the General Shareholders' Meeting, who may grant the floor again to such shareholder if the Chairman deems it appropriate, based on the progress of the meeting.

**Article 29. Right to Receive Information During the General Shareholders' Meeting.**

1. During the presentation period, all shareholders may verbally request information or clarifications that they deem are necessary regarding the matters contained in the agenda. The shareholders must have previously identified themselves for this purpose in accordance with the provisions of Article 26 above.

The Directors shall be required to provide the information requested pursuant to the preceding paragraph in the form and within the time periods provided by Law, except in those cases in which (i) it has been requested by shareholders representing less than twenty-five (25%) percent of the share capital, and the Chairman believes that publication may prejudice the interests of the Company; (ii) the request for information or clarification does not refer to matters included in the agenda; (iii) the requested information or clarification is not needed to form an opinion regarding the matters submitted to the shareholders, or is deemed abusive for any reason; or (iv) legal or regulatory provisions provide otherwise.

2. The requested information or clarification shall be provided by the Chairman or, if applicable and if directed by such Chairman, by the Chairman of the Audit and Compliance Committee, the Secretary, a Director or, if appropriate, any employee of the Company or expert on the matter. The Chairman shall decide the manner in which an answer shall be provided to the shareholder who has made a request or requested a clarification in such shareholder's presentation. In particular, the decision may be made to provide a collective response to the shareholder presentations at the end of the presentation period.

In the event that, for any reason, it is not possible to satisfy the shareholder's right to receive information during the proceedings of the General Shareholders' Meeting, the Directors shall provide the requested information in writing to the interested shareholder within seven (7) days of the close of the General Shareholders' Meeting.

**Article 30. Establishment of a Final Quorum for the General Shareholders' Meeting.**

1. The list of attendees shall be finalized no later than the end of the presentations, and the Chairman or, by delegation therefrom, the Secretary, shall read the overall information contained in the list of attendees, detailing the number of shareholders with the right to vote who are present at the meeting in person or by proxy (including those who have exercised their right to vote from a distance pursuant to the provisions of these Regulations), the number of shares corresponding thereto and the percentage of share capital they represent.

2. Once this information has been announced by the Chairman or the Secretary, the Chairman shall, if appropriate, declare the existence of a proper and sufficient quorum at the General Shareholders' Meeting on first or second call, as the case may be, and shall decide if the shareholders can debate and adopt resolutions regarding all matters contained in the agenda, or if, on the contrary, debate must be limited to only some of them, based on attendance at the General Shareholders' Meeting in accordance with the list of attendees.
3. Once the definitive establishment of a quorum for the General Shareholders' Meeting has been declared, and if the minutes are being prepared by a Notary Public, the attending shareholders may state to the Notary Public any reservation or objection they may have regarding the existence of a valid quorum for the General Shareholders' Meeting or regarding the information from the list of attendees as to the number of shareholders attending and the capital that is present which was previously read aloud, in order to duly record such reservation or objection in the minutes of the General Shareholders' Meeting.

**Article 31. Temporary Suspension.**

1. In exceptional cases, when there are disturbances that materially hinder the order of the meeting or any other extraordinary circumstance that temporarily prevents the normal progress of the General Shareholders' Meeting, the Chairman may resolve to suspend the session for the time that the Chairman deems appropriate (but not for more than two (2) hours) in order to reestablish the conditions needed for the continuation thereof. The Chairman of the General Shareholders' Meeting may adopt such additional measures as the Chairman deems appropriate to ensure the safety of those present and to avoid the repetition of circumstances that might again affect the proper conduct of the meeting.
2. Once the session has resumed, if the situation that gave rise to the suspension persists, the Chairman shall consult with the Presiding Committee in order for the shareholders to resolve to continue the session on the next day. In the event the continuation is not approved for any reason, the Chairman shall immediately adjourn the meeting.

**Article 32. Continuation.**

1. At the proposal of a majority of the Directors in attendance or at the request of shareholders representing at least one-fourth of the capital present at the General Shareholders' Meeting, the shareholders acting at the General Shareholders' Meeting may decide a continuation of their sessions over one or more consecutive days. Regardless of the number of sessions, the General Shareholders' Meeting shall be deemed to be a single meeting, and a single set of minutes shall be prepared for all of the sessions.
2. Once the General Shareholders' Meeting has been continued, there shall be no need to repeat compliance with the provisions of the By-Laws or the Law in subsequent sessions for them to be validly held. Without prejudice to the provisions of paragraph 3 of Article 35, if any shareholder included in the list of attendees prepared at the beginning of the meeting does not thereafter attend the subsequent

meetings, the majorities needed to adopt resolutions shall continue to be those determined based on the results of such list.

**Article 33. Casting of Votes from a Distance.**

1. Shareholders may cast their vote regarding proposals relating to the items included in the agenda by mail or electronic communication.
2. Mail votes shall be cast by sending to the Company a document in which such vote is recorded, accompanied by the attendance card issued by the entity or entities in charge of the book-entry registry.
3. Votes by electronic communication shall be cast using a recognized electronic signature or other type of guarantee that the Board of Directors deems best ensures authenticity and the identification of the shareholder exercising the right to vote, and to which there shall be attached an unalterable electronic copy of the attendance and voting card.
4. Votes cast by either of the means set forth in the preceding paragraphs must be received by the Company before midnight on the day immediately prior to the date specified for the holding of the General Shareholders' Meeting upon first call. Otherwise, the vote shall be deemed not to have been cast.
5. The distance voting referred to in this article shall be rendered void:
  - a) By subsequent express revocation made by the same means used to cast the vote and within the period established for such voting.
  - b) By attendance at the meeting in person or by proxy of the shareholder casting the vote.
6. The Board of Directors is empowered to elaborate upon the foregoing provisions by establishing rules, means and procedures adjusted to the current state of the art in order to organize the casting of votes and the grant of proxies by electronic means, following the rules and regulations issued for such purpose and the By-Laws, if applicable.

Specifically, the Board of Directors may (i) establish rules for the use of guarantees other than electronic signatures for casting electronic votes pursuant to the provisions of paragraph 3 above, and (ii) reduce the advance period set forth in paragraph 4 above for receipt by the Company of votes cast by postal or electronic communication.

In any event, the Board of Directors shall adopt the measures needed to avoid possible deception and to ensure that the person casting a vote or granting a proxy by postal or electronic communication has the right to do so, pursuant to the provisions of the By-Laws and these Regulations.

The implementing rules adopted by the Board of Directors under the provisions of this sub-section shall be published on the Company's website.

7. Shareholders who cast votes from a distance pursuant to the provisions of this article shall be deemed present for purposes of determining the establishment of a quorum for the General Shareholders' Meeting in question.

#### **Article 34. Voting on Proposed Resolutions.**

1. Once the shareholder presentations have ended and responses have been made to requests for information pursuant to the provisions of these Regulations, the proposed resolutions regarding matters included in the agenda, or regarding other matters that are not legally required to be set forth therein, including proposals, if any, made by the shareholders during the meeting, shall be submitted to a vote.

The Board of Directors shall propose separate resolutions in connection with matters that are substantially independent of one another, such that the shareholders may separately express their voting preferences. This rule shall specifically apply: (i) to the appointment, re-election, or ratification of Directors, such that a separate proposal shall be made for each Director whose appointment, re-election, or ratification is proposed to the shareholders at the General Shareholders' Meeting, and (ii) in the case of amendments of the By-Laws, to each article or group of articles that is substantially independent of one another.

The adoption of resolutions shall proceed following the agenda set forth in the call to meeting. Resolutions proposed by the Board of Directors shall be first submitted to a vote and then, if appropriate, resolutions proposed by others shall be voted upon following their priority in time. In any event, once a proposed resolution has been adopted, all others relating to the same matter and that are incompatible therewith shall be withdrawn and therefore need not be voted upon.

If proposals have been made regarding matters that may be approved at the General Shareholders' Meeting without having appeared in the agenda, the Chairman shall decide the order in which they shall be submitted to a vote.

It shall not be necessary for the Secretary to previously read aloud the complete text of resolutions proposed by the Board of Directors if such text has already been published on the Company's website since the date of publication of the announcement of the call to the General Shareholders' Meeting. In this case, the reading of a summary or excerpts may be sufficient, except when otherwise deemed appropriate by the Chairman for some or all of the proposals. In any event, the attendees shall be told to which item on the agenda the proposed resolution being submitted to a vote refers.

2. As a general rule, and without prejudice to the use of other alternative systems, at the election of the Chairman –when the circumstances so require– for purposes of voting on the proposed resolutions, the direction of the votes cast by the shareholders shall be determined as follows:
  - i) In the case of proposed resolutions relating to matters included in the agenda, votes corresponding to all shares present in person and by proxy, less the votes corresponding to (a) shares whose holders or representatives state that they vote

against, in blank, or abstain, by communicating or expressing their vote or abstention to the Secretary or, if applicable, to the Notary Public, for note thereof to be recorded in the minutes; (b) shares whose holders have voted against, in blank, or have expressly stated that they abstain, through the means of communication referred to in these Regulations, and (c) shares whose holders or representatives have left the meeting prior to the voting on the proposed resolution in question and who have left evidence with the Secretary or, if applicable, with the Notary Public, of their departure from the meeting, shall be deemed to be favorable votes.

- ii) In the case of proposed resolutions relating to matters not included in the agenda, votes corresponding to all shares present in person and by proxy, less the votes corresponding to (a) shares whose holders or representatives state that they vote in favor, in blank, or abstain, by communicating or expressing their vote or abstention to the Secretary or, if applicable, to the Notary Public, for note thereof to be recorded in the minutes; (b) shares whose holders have voted in favor, in blank, or have expressly stated that they abstain, through the means of communication referred to in these Regulations, and (c) shares whose holders or representatives have left the meeting prior to voting on the proposed resolution in question and who left evidence with the Secretary or, if applicable, with the Notary Public, of their departure from the meeting, shall be deemed to be votes in the negative.
3. Furthermore, so long as it is legally permissible and the required guarantees of transparency and certainty are provided, in the opinion of the Board of Directors, a vote may be divided in order for financial intermediaries who are recorded as having shareholder status but act for the account of different clients to be able to divide their votes in accordance with the instructions given by such clients.

#### **Article 35. Adoption of Resolutions and Announcement of Voting Results.**

1. The shareholders, whether acting at an ordinary or extraordinary General Shareholders' Meeting, shall adopt resolutions with the majorities of votes cast in person or by proxy required by the By-Laws or the Companies Law. Each voting share, whether present or represented at the General Shareholders' Meeting, shall grant the holder the right to one vote.
2. The approval of resolutions shall require the favorable vote of one-half plus one of the shares with voting rights that are present or represented at the General Shareholders' Meeting. The foregoing provisions shall not apply to situations in which the By-Laws or the Law requires a greater majority.
3. For purposes of determining the number of shares upon which the majority needed to adopt the various resolutions shall be calculated, all shares appearing on the list of attendees shall be deemed to be in attendance, present, and represented at the meeting, less: (i) shares whose owners or representatives have left the meeting prior to the voting on the proposed resolution or resolutions in question, and recorded their departure with the Notary Public or, in the absence thereof, with the Secretary or assistants thereto; and (ii) shares that, under the provisions of the applicable rules and regulations, are totally or partially deprived of the right to vote in general or regarding the particular resolution in question.

4. Once the Chairman has evidence of sufficient favorable votes, the Chairman shall declare the resolutions to be adopted, without prejudice to the statements that the attending shareholders (or their representatives) may make to the Secretary or, if applicable, to the Notary Public, regarding the direction of their vote.

**Article 36. Closure of the General Shareholders' Meeting.**

Once the voting on the proposed resolutions has been completed and the Chairman has announced the approval thereof, if applicable, the General Shareholders' Meeting shall end and the Chairman shall bring the meeting to a close, adjourning the session.

**Article 37. Minutes of the General Shareholders' Meeting.**

1. The minutes of the General Shareholders' Meeting may be approved by the shareholders at the end of the meeting, and otherwise within a period of fifteen (15) days by the Chairman and two Inspectors, one on behalf of the majority and the other on behalf of the minority.
2. Once the minutes are approved, they shall be signed by the Secretary for the General Shareholders' Meeting or the particular session thereof, with the approval of the person acting therein as the Chairman. In the event the above-mentioned persons are unable to do so for any reason, they shall be replaced by the persons established by the By-Laws or the Law.
3. In the event that a Notary Public takes part in the General Shareholders' Meeting, the notarial minutes shall be deemed the minutes of the General Shareholders' Meeting, and shall not require approval.

**Article 38. Publication of Resolutions.**

Without prejudice to registration with the Commercial Registry of recordable resolutions or to applicable legal provisions regarding the publication of corporate resolutions, the Company shall communicate to the National Securities Market Commission the literal text or a summary of the contents of the approved resolutions by means of a timely notice of a significant event [*hecho relevante*]. The text of the resolutions shall also be accessible through the website of the Company. In addition, at the request of any shareholder or their representative at the General Shareholders' Meeting, the Secretary shall issue a certification of the resolutions or of the minutes, including the notarial minutes, if any.

## **TITLE VI. INTERPRETATION**

**Article 39. Interpretation of the Regulations.**

The Chairman of the General Shareholders' Meeting shall have the power to decide any questions or disputes raised during the meeting regarding the application or interpretation of these Regulations, without prejudice to subsequent consideration thereof by the Board of Directors, which shall, if applicable, propose to the shareholders

at a General Shareholders' Meeting such amendments to the text of these Regulations as it deems appropriate.

## PRELIMINARY TITLE

### Article 1.- Purpose.

The purpose of these Regulations is to establish the principles that are to govern all action taken by the Board of Directors of Iberdrola Renovables, S.A. (hereinafter, "Iberdrola Renovables" or the "Company"), the basic rules for the organization and operation thereof, and the rules of conduct to be observed by its members, in order to achieve the greatest degree of transparency, effectiveness and dynamism, supervision and control of its management duties and representation of the Company's interests.

### Article 2.- Scope.

1. These Regulations shall apply directly to the Board of Directors, the representative decision-making bodies thereof -whether collective or single-person- and its internal Committees or Commissions, as well as to all members thereof who, in the performance of their duties, decide the direction thereof.
2. The persons to whom these Regulations apply shall have the duty to be apprised of them, to comply with them and to enforce them, for which purpose the Secretary of the Board of Directors of the Company shall provide them with a copy, the delivery of which such persons shall acknowledge by means of a signed receipt.
3. For purposes of these Regulations, the Iberdrola Group shall be deemed to consist of Iberdrola, S.A. and of those companies which are, in respect of Iberdrola, S.A., in any of the situations contemplated in Section 4 of Law 24/1988, of July 28, on the Securities Market.
4. For purposes of these Regulations, the Iberdrola Renovables Group shall be deemed to consist of Iberdrola Renovables, as the controlling company, and of those companies that, pursuant to Section 4 of Law 24/1988 of July 28, on the Securities Market, may be considered subsidiaries of Iberdrola Renovables or controlled by it, without prejudice to their status as subsidiaries of or companies controlled by Iberdrola, S.A., in its capacity as the controlling company of Iberdrola Renovables.

### Article 3.- Dissemination.

These Regulations shall be reported to the Spanish National Securities Market Commission [*Comisión Nacional del Mercado de Valores*] and filed with the Commercial Registry, pursuant to applicable rules and regulations. Furthermore, the current text of these Regulations shall be available on the Company's website.

### Article 4.- Priority of Provisions.

1. In drawing up these Regulations, the Board of Directors has taken into account the principles and standards contained in the most widely recognized Good Governance recommendations, especially the recommendations and definitions set forth in the Uniform Good Governance Code (attached as Exhibit 1 to the Report of the Special Working Group on Good Governance of Listed Companies of May 19, 2006) prepared

at the behest of regulatory entities, without prejudice to the adaptation thereof to the specific characteristics of the Company and its environment under the principle "comply or explain."

2. These Regulations further elaborate upon and supplement the legal and by-law provisions applicable to the Board of Directors of the Company, which provisions shall prevail in the event of conflict with the provisions of these Regulations.

**Article 5.- Amendment.**

1. The Board of Directors may amend these Regulations upon the proposal of its Chairman, of one-third of the Directors, or of the Audit and Compliance Committee, with the proposal to be accompanied by a description of the reasons for and the scope of the amendment sought. In all cases, the Audit and Compliance Committee shall prepare a report on the proposed amendment for submission thereof to the Board of Directors of the Company.
2. Notice of the Board of Directors meeting called to decide upon the above-mentioned proposal shall be given not less than fifteen (15) days in advance of such meeting, and shall be accompanied by the entire text of the proposed amendment, a description of the reasons for the amendment, and the report of the Audit and Compliance Committee.
3. In order to be valid, an amendment to these Regulations must be approved by a two-thirds majority of the Directors present at the meeting in person or by proxy.
4. The Board of Directors shall give notice to the shareholders of any amendment to these Regulations approved thereby at the next General Shareholders' Meeting. In addition, amendments to these Regulations shall be subject to the dissemination provisions set forth in Article 3 above.

**TITLE I. STRUCTURE OF THE COMPANY'S MANAGEMENT AND MISSION OF THE BOARD**

**Article 6.- Structure of the Board of Directors.**

Management of the Company is vested in a Board of Directors, an Executive Committee called the Executive Committee [*Comisión Ejecutiva Delegada*], and, if any and if agreed to by the Board of Directors, a Chief Executive Officer [*Consejero Delegado*].

**Article 7.- Powers of the Board of Directors.**

1. The Board of Directors has the power to adopt resolutions regarding all matters not assigned by Law or the By-Laws to the shareholders.
2. As a general rule, the Board of Directors, which has the widest powers and authority to manage, direct, administer and represent the Company, shall entrust the day-to-day management of the Company to its representative decision-making bodies and shall

focus its activity on the general duty of supervision and on consideration of those matters which are of particular importance to the Company.

3. Those powers reserved by law or the By-Laws for direct exercise by the Board of Directors may not be delegated.
4. Without prejudice to the legal powers, if any, of delegation and proxy-granting for the implementation of any particular resolutions adopted, the Board of Directors shall directly exercise the following powers, which are listed by way of example, acting upon its own initiative or at the proposal of the corresponding internal decision-making body;
  - a) Draw up the Company's Annual Financial Statements, Management Report and Proposal for the Allocation of Profits or Losses, as well as the consolidated Annual Financial Statements and Management Report, if any, and the financial information that the Company must periodically make public due to its status as listed company, ensuring that such documents provide a true and fair view of the assets and liabilities, the financial condition and the operating income of the Company, pursuant to applicable legal provisions.
  - b) Designate Directors to fill vacancies by interim appointment and propose to the shareholders the appointment, approval of interim appointment, re-election or removal of Directors.
  - c) Designate, renew and remove internal positions within the Board of Directors and the members of and positions on the Committees established within the Board.
  - d) Set, pursuant to the By-Laws and within the limits established therein, the compensation policy, performance assessment and the compensation of the Directors, after a report of the Nominating and Compensation Committee. In the case of executive Directors, the Board of Directors shall fix the additional compensation for their executive duties and other terms and conditions to which their contracts must be subject.
  - e) Approve the appointment and removal of senior managers of the Company, as well as set the compensation or indemnification, if any, payable to them in the event of removal, all at the proposal of the Chief Executive Officer, if any, and with the report of the Nominating and Compensation Committee. For such purposes, senior managers shall be the managers that report directly to the Board of Directors or to the Chief Executive Officer of the Company and, in all cases, the Director of the Internal Audit Area.
  - f) Approve the compensation and performance assessment policy, as well as the basic terms and conditions of the contracts with the Company's senior managers, based on the proposal of the Chief Executive Officer, if any, which shall be submitted to the Board by the Nominating and Compensation Committee.
  - g) Prepare the dividend policy and submit to the shareholders at the General Shareholders' Meeting the corresponding proposed resolutions regarding the allocation of profits or losses, as well as decide upon the payment of interim dividends.
  - h) Enter into strategic alliances with domestic or foreign industrial, commercial or financial groups.

- i) Approve the disposition of substantial assets of the Company and, in general, all kinds of investments or transactions which are strategic in nature due to the large amount or special characteristics thereof, including industrial, commercial or financial transactions which are particularly significant or risky to the Company, establishing, if applicable, the Company's position with respect to the companies that are members of the Iberdrola Renovables Group regarding the aforementioned matters and transactions, without prejudice to the powers of the shareholders at the General Shareholders' Meeting.
  - j) Approve mergers, consolidations, split-offs or concentrations affecting any of the relevant companies which are members of the Iberdrola Renovables Group.
  - k) Adopt resolutions regarding the creation or acquisition of interests in special purpose entities or entities registered in countries or territories regarded as tax havens, as well as any other transactions or operations of a similar nature that, due to the complexity thereof, might detract from the transparency of the Iberdrola Renovables Group.
  - l) Decide upon proposals submitted to it by the Executive Committee, the Chief Executive Officer or the Committees of the Board of Directors.
  - m) Declare its position regarding the submission of all tender offers for the Company's securities.
  - n) Propose to the shareholders the amendments of the Regulations for the General Shareholders' Meeting it deems appropriate in order to enhance the operation thereof and the exercise of shareholder rights.
  - o) Approve and amend, pursuant to the provisions thereof, the Regulations of the Board of Directors governing its internal organization and operation.
  - p) Prepare the annual corporate governance report of the Company, as well as the sustainability or annual report.
  - q) Call the General Shareholders' Meeting.
  - r) Carry out resolutions approved by the shareholders at the General Shareholders' Meeting and perform any duties that the shareholders have assigned to it.
  - s) Define the structure of general powers of the Company to be granted by the Board itself or by the representative management decision-making bodies mentioned in the paragraph 2 of this article
  - t) Make decisions regarding any other matter within its authority which, in the judgment of the Board of Directors, is deemed to be in the interests of the Company or which these Regulations reserve to the Board as a whole.
5. The Board of Directors shall submit the following transactions to a decision by the shareholders at the General Shareholders' Meeting:
- a) The transformation of the Company into a holding company, through "subsidiarization" or the assignment to dependent entities of core activities theretofore carried out by the Company itself, even though the Company retains full control of such entities.

- b) Transactions for the acquisition or disposition of essential operating assets when they entail an actual modification of the corporate purpose
  - c) Transactions the effect of which is tantamount to liquidating the Company.
6. The Board of Directors, within the scope of its authority relating to the general duty of supervision, acting on its own initiative or at the proposal of the appropriate internal decision-making body, shall also deal with the matters set forth below (as an example only):
- a) Prepare the Company's strategy and general lines of policy, draft programs and state objectives in order to carry out all business activities included in the corporate purpose. Specifically, the Board of Directors shall approve: (i) the annual budget; (ii) the investment and financing policy; (iii) the definition of the structure of the Iberdrola Renovables Group and the coordination, within legal limits, of the overall strategy of such Group in the interests of the Company and of the companies belonging thereto; (iv) the corporate governance policy; (v) the corporate social responsibility policy and (vi) the policy to be adopted by the Company in connection with treasury stock and, especially, the limits thereto
  - b) Promote and supervise the management of the Company, as well as the fulfillment of established objectives.
  - c) Establish the risk control and management policy, identify the principal risks to the Company and organize appropriate internal monitoring and information systems, as well as carry out a periodic monitoring of such systems.
  - d) Set the foundations of the corporate organization in order to ensure the greatest efficiency thereof and effective supervision by the Board of Directors.
  - e) Set policy regarding the provision of information to shareholders and to the markets in general under the standards of transparency and truthfulness of the information.
  - f) Authorize the Company or the companies included within the Iberdrola Renovables Group to enter into any transaction with Directors, with shareholders holding equity interests equal to or greater than those legally deemed to be significant or who are represented on the Board of Directors of the Company, or with Related Parties, upon the terms set forth in Article 46 of these Regulations.
7. In connection with such matters mentioned in this article as it may be appropriate, the Board of Directors shall act in coordination with the companies forming part of the Iberdrola Renovables Group, acting for the common benefit and in the common interest of the Company and of the companies forming part of its Group.

**Article 8.- Corporate Interests.**

1. The Board of Directors shall perform its duties with a unity of purpose and independent judgment, affording equal treatment to all shareholders in furtherance of the corporate interests, which shall be understood to mean the common interests of all the shareholders and which shall not prevent consideration of other lawful public or private interests that converge in the development of any business activity, particularly those of the employees. In this context, regard shall be paid to the optimization, in a sustained fashion, of the financial value of the Company as an interest common to all the

shareholders, and therefore, as a standard that is to govern at all times the action taken by the Board of Directors and its representative decision-making bodies. In addition, the Board of Directors shall ensure that in its relations with other stakeholders, the Company abides by laws and regulations, fulfills in good faith its obligations and contracts, observes the usage and good practices of the industries and territories in which it carries out its business and complies with any other social responsibility standards to which it has voluntarily adhered.

2. By way of application of the above-mentioned standard, the Board shall formulate and review the business and financial strategies of the Company, and shall establish a reasonable balance between the proposals selected and the risks assumed.
3. In the area of corporate organization, the Board shall take such measures as are required to ensure:
  - a) That both the Executive Committee and the Chief Executive Officer of the Company pursue the creation of value for the shareholders and have appropriate means to do so.
  - b) That both the Executive Committee and the Chief Executive Officer remain under the effective supervision of the Board.
  - c) That no person or small group of persons enjoys decision-making power which is not subject to checks and balances.
  - d) That the strategies for the coordination of relations between the Company and the companies which are members of the Iberdrola Renovables Group are established and reviewed on an ongoing basis in order to obtain the greatest possible advantage for the benefit of both the Company and such companies.

## **TITLE II. COMPOSITION OF THE BOARD**

### **Article 9.- Number of Directors.**

1. The Board of Directors shall be composed of a minimum of eight (8) Directors and a maximum of fifteen (15), who shall be appointed at the General Shareholders' Meeting, subject to applicable legal and by-law provisions.
2. The determination of the number of Directors shall be the purview of the shareholders acting at the General Shareholders' Meeting, for which purpose the shareholders may establish such number either by express resolution or indirectly, through the filling or non-filling of vacancies or the appointment or non-appointment of new Directors within the minimum and maximum numbers mentioned in the paragraph above. Notwithstanding the foregoing, the Board of Directors shall submit a proposal at the General Shareholders' Meeting setting forth the number of Directors that, in view of the circumstances affecting the Company and taking into account the maximum and minimum numbers established in the paragraph above, best suits the Good Governance recommendations with a view to ensuring a proper degree of representation and the effective operation of the Board.

The foregoing shall be deemed to be without prejudice to the right of proportional representation to which the shareholders are entitled under the provisions of the Companies Law

**Article 10.- Types of Directors.**

1. The following shall be deemed:

- Executive Directors: those Directors who perform senior management duties or are employees of the Company or of the Iberdrola Renovables Group.
- External Proprietary Directors (representing a major shareholder): (a) those Directors who own a shareholding interest that is greater than or equal to that considered by law as significant, or who have been appointed owing to their status as shareholders, although their shareholding interest does not reach such amount; and (b) those whose appointment has been proposed by shareholders of the type described in the preceding letter (a).
- For purposes of the definition above, it shall be deemed that a Director has been proposed by a shareholder when: (a) the Director has been appointed through the exercise of the right to representation; (b) the Director is a director, senior manager or employee of, or a non-sporadic provider of services to, such shareholder or companies forming part of its own group, (c) the corporate documents show that the shareholder accepts that the Director has been appointed by it or represents it; (d) the Director is the spouse of, a person related by a like relationship of affection to, or a relative up to the second degree of kinship of, a significant shareholder.
- External Independent Directors: those Directors who, having been appointed because of their personal and professional qualities, may carry out their duties without being conditioned by relationships with the Company, its significant shareholders or its managers.
- Other External Directors: those external Directors who cannot be deemed to be proprietary or independent Directors.

2. The following persons may not be appointed as independent Directors:

- a) Those who have been employees or executive directors of companies that are members of the group, unless three (3) or five (5) years, respectively, have passed since the end of such relationship.
- b) Those who receive from the Company, or from its group, any amount or benefit other than as Director compensation, unless such amount or benefit is not significant.

For purposes of this paragraph, the dividends or pension supplements received by the Director because of his prior professional or employment relationship shall not be taken into account, so long as such supplements are unconditional in nature and therefore the company paying them may not suspend, modify or revoke the accrual thereof at its discretion other than on the grounds of noncompliance with obligations.

- c) Those who are, or have been during the last three (3) years, partners of the external auditor or responsible for the auditor's report, whether in connection with the audit of the Company or of any other company within its group during such period.
- d) Executive directors or senior managers of another company in which an executive Director or senior manager of the Company is an external Director.
- e) Those who hold, or have held during the last year, a significant business relationship with the Company or with any company within its group, whether in their own name or as a significant shareholder, director or senior manager of an entity that holds or has held such relationship.

The relationship entailed by the provision of goods or services, including those of a financial nature, and advisory or consultancy relationships shall be deemed to be business relationships.

- f) Significant shareholders, executive directors or senior managers of an entity that receives, or has received during the last three (3) years, significant donations from the Company or its group.

Those who are mere trustees of a foundation receiving donations shall not be deemed included in the provisions of this letter.

- g) The spouse of, persons related by a like relationship of affection to, or relatives up to the second degree of kinship of, an executive Director or senior manager of the Company
- h) Those who have not been proposed, whether for appointment or renewal, by the Nominating and Compensation Committee.
- i) Those who, with respect to a significant shareholder or a shareholder represented on the Board, are subject to any of the circumstances mentioned in letters a), e), f) or g) of this paragraph. In the case of the kinship relationship mentioned in letter g), the limitation shall apply not only to the shareholder but also to its proprietary directors in the affiliated company.

Proprietary Directors who cease to have such status as a result of the shareholder which proposed their appointment selling its interest may only be re-elected as independent Directors when the shareholder which has proposed their appointment has sold all of its shares in the Company.

A Director who has a shareholding interest in the Company may have the status of independent Director provided that he satisfies all of the conditions established in this paragraph and, in addition, his interest is not significant

3. The Board of Directors shall be composed such that:

- (a) External proprietary and independent Directors represent a large majority of the Board of Directors, and the number of executive Directors is the minimum number necessary, taking into account the complexity of the corporate group to which the Company belongs and the shareholding percentage represented by proprietary Directors.

- (b) Among external Directors, the relation between the number of proprietary Directors and the number of independent Directors shall tend to reflect, to the extent practicable, the ratio of the capital of the Company represented by proprietary Directors to the rest of the share capital.

The provisions of letters (a) and (b) above shall be mandatory for the Board of Directors, which shall comply with such provisions when exercising its power to propose appointments to the shareholders at the General Shareholders' Meeting and of interim appointment to fill vacancies, and shall merely serve as guidance for the shareholders at the General Shareholders' Meeting.

4. The Board of Directors shall seek to ensure that the number of independent Directors represents at least one-third of the total number of Directors.
5. The Board of Directors shall take into account the guidelines established in the foregoing paragraphs in the exercise of its powers to propose the appointment or re-election of Directors to the shareholders and to designate Directors by interim appointment to fill vacancies.
6. The status of each Director shall be explained by the Board to the shareholders at the General Shareholders' Meeting at which the appointment thereof must be made or approved, and shall be confirmed or, if appropriate, reviewed every year in the annual corporate governance report, following verification by the Nominating and Compensation Committee.

For purposes of this article, the term "group" (in lower case) shall be deemed to refer to the Iberdrola Group, to which the Company belongs.

### **TITLE III. APPOINTMENT AND WITHDRAWAL OF DIRECTORS**

#### **Article 11.- Appointment of Directors.**

1. The Directors shall be appointed by the shareholders acting at the General Shareholders' Meeting pursuant to the provisions of the By-Laws and the Companies Law.
2. The proposals for appointment or re-election of Directors that the Board of Directors submits to a decision by the shareholders acting at a General Shareholders' Meeting, and the appointment decisions made by the Board in the exercise of the legally-assigned power to make interim appointments to fill vacancies, shall be preceded by:
  - a) the corresponding proposal of the Nominating and Compensation Committee in the case of independent Directors;
  - b) the prior report of the Nominating and Compensation Committee in the case of other Directors; the new Director must belong to one of the categories provided for in these Regulations.
3. When the Board deviates from the proposals or reports of the Nominating and Compensation Committee, it shall give reasons for so acting and shall record such reasons in the minutes.

4. The Company shall provide the required support for new Directors to become rapidly and adequately acquainted with the Company and the corporate governance rules thereof, for which purpose it may establish guidance programs. In addition, the Company may establish, when the circumstances make it advisable, update training programs aimed at the Directors.

**Article 12.- Incompatibilities.**

The following may not be appointed as Directors:

- a) Domestic or foreign companies competing with the Company, or the directors or senior managers thereof. In no event shall companies belonging to the same group as the Company be deemed to be competitor companies.
- b) Persons serving as directors in more than four (4) companies with shares trading on domestic or foreign securities exchanges.
- c) Persons who, during the two (2) years prior to their appointment, have occupied high-level positions in the government which are incompatible with the simultaneous performance of the duties of a director of a listed company under national or autonomous community legislation, or positions of responsibility with entities regulating the energy industry, the securities markets or other industries in which the Company operates.
- d) Persons who are under any other circumstance of incompatibility or prohibition governed by provisions of a general nature.

**Article 13.- Designation of Directors.**

The Board of Directors (and the Nominating and Compensation Committee within its area of authority) shall endeavor to ensure that the candidates proposed to the shareholders at the General Shareholders' Meeting for their appointment as Directors, and the Directors directly appointed by the Board to fill vacancies in the exercise of its power to make interim appointments, shall be persons widely recognized for their expertise, competence and experience, and shall be particularly rigorous in connection with the selection of those persons who are to hold office as independent Directors.

For such purposes, in the case of a Director that is a legal entity, the individual representing it in the performance of the duties inherent in the position of Director shall be subject to the requirements of expertise, competence and experience mentioned in this article and shall be personally bound by the duties of a Director set forth in these Regulations.

**Article 14.- Term of Office.**

1. The Directors shall serve in their positions for a term of five (5) years, so long as the shareholders acting at a General Shareholders' Meeting do not resolve to remove or dismiss them and they do not resign from their position.

2. Directors may be re-elected to one or more terms of five (5) years.
3. Vacancies which occur may, pursuant to Law, be filled by the Board of Directors from among the shareholders on an interim basis until the next General Shareholders' Meeting, whereat the shareholders shall approve the appointments or elect the persons who should replace the interim Directors, or it shall withdraw the vacant positions.

**Article 15.- Re-election of Directors.**

1. The proposals for re-election of Directors that the Board of Directors resolves to submit to the decision of the shareholders at the General Shareholders' Meeting shall be subject to a formal process of elaboration, which shall include a proposal issued by the Nominating and Compensation Committee, in the case of independent Directors, or a prior report of such Committee, in the case of the other Directors, containing an analysis of the quality of the work performed and the dedication to the position shown by the proposed Directors during the preceding term of office.
2. The Directors sitting on the Nominating and Compensation Committee shall be evaluated by the Committee itself for such purpose, and each of them shall abstain from participating in the debate and voting that may affect them.
3. The Chairman, Vice-Chairmen and, if applicable, the Secretary and Vice-Secretary of the Board of Directors who are re-elected as members of the Board by the shareholders acting at a General Shareholders' Meeting shall continue to perform the duties they previously held within the Board, without the need for a new election and without prejudice to the Board of Directors' power of revocation with respect to such positions.

**Article 16.- Resignation and Withdrawal of Directors.**

1. The Directors shall cease to hold office upon the expiration of the term of office for which they have been appointed and when it is so resolved by the shareholders at a General Shareholders' Meeting in the exercise of the powers granted to them by law or the By-Laws.
2. The Directors shall tender their resignation to the Board of Directors and formally resign from their position in the following cases:
  - a) When they reach the age of seventy (70). The resignation of the Director and resulting discontinuation thereof in office shall occur at the first meeting of the Board of Directors that is held following the General Shareholders' Meeting at which the shareholders approve the financial statements for the fiscal year during which the Director reaches the above-mentioned age.

The content of this paragraph shall be communicated to all individuals or legal entities who are designated as Directors, and the express and formal acceptance thereof by any person who is to be proposed as a Director or to fill any position on the Board shall be a condition precedent for the Board itself to propose the appointment of such person. In the event that legal entities are to be designated, the terms of this paragraph shall be deemed accepted by the individuals that are designated as their representatives.

- b) When they are involved in any circumstance of incompatibility or prohibition governed by provisions of a general nature or set forth in Article 12 of these Regulations of the Board of Directors.
- c) When, as a result of any acts attributable to the Director in his capacity as such, serious damage is caused to the value of the Company or the Director ceases to deserve the commercial and professional respect required to be a Director of the Company.
- d) When they are seriously reprimanded by the Board of Directors because they have breached their duties as Directors and such reprimand is approved by a two-thirds majority of the Directors at the proposal of the Audit and Compliance Committee.
- e) When their continuance in office on the Board may jeopardize the interests of the Company or when the reasons why the Director was appointed cease to exist and, in any case, when a proprietary Director transfers his shareholding in the Company or when the shareholder which proposed his appointment to the Company sells its entire shareholding interest or reduces it to a level that requires the reduction or removal of its proprietary Directors.
- f) When an independent Director is affected, at any time following his appointment as such, by any of the prohibitions to hold office provided for in paragraph 2 of Article 10 of these Regulations.
- g) When a proprietary Director severs his relationship with the shareholder that proposed his appointment.

The cases of resignation described under letters e) and f) above shall not apply when the Board of Directors considers there are reasons that justify the Director continuing to hold office, without prejudice to the effect that the new circumstances may have on his classification.

- 3. In the event that an individual representing a Director who is a legal entity falls within any of the circumstances described in paragraph 2, such individual shall be barred from acting as such representative.
- 4. The Board of Directors may only propose the withdrawal of an independent Director prior to expiration of the term of office set in the By-Laws when there is just cause, determined by the Board following a report from the Nominating and Compensation Committee, especially breach of the duties inherent in his position or having become comprised in any of the prohibitions described in paragraph 2 of Article 10 of these Regulations at any time following his appointment. Such withdrawal may also be proposed as a result of tender offers, mergers or similar corporate transactions entailing a significant change in the capital structure of the Company.

**Article 17.- Debate and Voting.**

The Directors affected by proposals for appointment or re-election to or dismissal from office shall abstain from participating in the debate and voting on such matters.

## **TITLE IV. INTERNAL POSITIONS OF THE BOARD OF DIRECTORS**

### **Article 18.- Chairman of the Board of Directors.**

1. The Chairman of the Board of Directors shall be appointed from among the Directors and shall be considered the President of the Company and of all of the management decision-making bodies thereof of which the Chairman is a member, which he shall permanently represent.
2. The Chairman shall exercise the following powers in addition to the powers conferred by the By-Laws and the Law:
  - a) To call and preside over meetings of the Board of Directors and the Executive Committee, setting the agenda for the meetings and directing the discussion and debate.
  - b) To preside over the General Shareholders' Meeting and direct the discussion and debate therein.
  - c) To bring to the Board those proposals which the Chairman deems appropriate for the efficient running of the Company, particularly those corresponding to the operation of the Board itself and other corporate decision-making bodies, as well as to propose the designation of positions within the Board of Directors.
  - d) To represent the Company before public entities and any industry or employers' bodies.
3. In the event that the Chairman of the Board is also the Chief Executive Officer of the Company, the Board of Directors shall authorize one of the independent directors to coordinate and express the concerns of the external Directors and to request that the Chairman call a meeting of the Board of Directors when he deems it appropriate. In the event that one of the independent Directors is Vice-Chairman of the Board of Directors, he shall be authorized to perform the duties described in this paragraph.

### **Article 19.- Vice-Chairman or Vice-Chairmen.**

1. The Board of Directors may, acting upon a proposal of the Chairman and following a report of the Nominating and Compensation Committee, appoint one or more Vice-Chairmen from among the Directors to replace the Chairman in the event of absence, sickness or inability to act.
2. If there is more than one Vice-Chairmen, the person replacing the Chairman shall be the Vice-Chairman that is expressly appointed by the Chairman; in default of the foregoing, the Vice-Chairman having the longest length of service and, if equal lengths of service, the oldest.

**Article 20.- Chief Executive Officer.**

1. The Board of Directors may, acting upon a proposal of the Chairman and following a report of the Nominating and Compensation Committee, and with the favorable vote of two-thirds of the Directors, appoint a Chief Executive Officer [*Consejero Delegado*] from among the Directors, with the powers it deems appropriate and which may be delegated pursuant to the provisions of the By-Laws and the Law, with due regard being paid to the standard set forth in paragraph 2 of Article 7 hereof.
2. The Chief Executive Officer may propose to the Board of Directors, for its approval after a report of the Nominating and Compensation Committee, the definition and reorganization of the Company's management structure, the appointment and removal of senior managers, as well as the compensation or indemnification, if any, payable thereto in the event of removal. Moreover, the Chief Executive Officer may propose to the Nominating and Compensation Committee, for submission thereby to the Board of Directors, the compensation policy as well as the basic terms and conditions of the contracts with the senior managers of the Company.
3. The position of Chief Executive Officer entails the power to represent the Company in court and out of court, acting individually.
4. In the event of a vacancy in the office or sickness or disability of the Chief Executive Officer, the Chairman shall immediately call the Board to hold a meeting in order to deliberate and resolve upon the appointment, if appropriate, of a new Chief Executive Officer. In the event that the same person holds office as Chairman and Chief Executive Officer, the replacement provisions set forth in Article 19 above shall apply.
5. The Chief Executive Officer must cease to hold office as such upon reaching the age of seventy (70).
6. In the exercise of his duties, the Chief Executive Officer shall have the power to collect and obtain (directly or through the senior management of the Company) the information he deems appropriate to ensure that the Company is at all times exercising effective management of the Iberdrola Renovables Group. The information so obtained may only be used to exercise the effective management of the Iberdrola Renovables Group, and shall be subject to the general rules and regulations governing the use and communication of non-public information. For the purposes hereof, the information obtained shall be deemed as if it were information regarding the Company itself.
7. If so requested by whoever has similar executive powers at Iberdrola, S.A. (the company exercising effective management of the group in which the Company is included), the Chief Executive Officer may provide (directly or through the senior management of the Company) the information regarding the Company that is requested of him. In all cases, the remittance of such information shall be carried out for purposes of:
  - a) Facilitating compliance by Iberdrola, S.A. with its legal obligations, such as: (i) the preparation of its financial statements, both individual and consolidated; (ii) compliance with its obligations to provide periodic information to the National

Securities Market Commission and other competent authorities, and (iii) the performance of analyses and monitoring of tax issues, for purposes of tax consolidation.

- b) Designing the policy of the Iberdrola Group and the exercise of its unitary management; and
- c) Meeting any other purposes that are appropriate to the corporate interest of Iberdrola Renovables and of Iberdrola, S.A., such as, among other things, obtaining and renewing credit ratings.

In addition, it shall be stated for the record in all events that the addressees of the information shall be subject to the same duties of secrecy and limitations on use that apply to the sender.

**Article 21.- Secretary and Vice-Secretary of the Board and Corporate Counsel of the Company.**

1. At the proposal of the Chairman, and after a report of the Nominating and Compensation Committee, the Board of Directors shall appoint a Secretary and, if appropriate, a Vice-Secretary, who need not be Directors. The same procedure shall be used to decide the withdrawal of the Secretary and, if applicable, the Vice-Secretary.
2. If there is a Vice-Secretary, such person shall, in the absence of the Secretary, attend the meetings of the management decision-making bodies. In the absence of the Secretary and the Vice-Secretary, the Director appointed by the Board from among those attending the meeting in question shall act as such.
3. The Secretary of the Board of Directors shall have the following duties in addition to those assigned thereto by the By-Laws and the Law:
  - a) Keep custody of the corporate documents, duly record the proceedings of meetings in the minute books, and attest to the resolutions adopted by the collective management decision-making bodies.
  - b) Ensure the formal and substantive legality of all action taken by the Board of Directors and compliance with regulations and by-law provisions, and ensure observance of the principles or standards of corporate governance of the Company and the provisions of these Regulations of the Board of Directors.
  - c) Verify compliance with orders of regulatory entities, and that the recommendations thereof, if any, are taken into consideration.
  - d) Generally act as a channel in relations between the Company and the Directors in connection with all matters relating to the operation of the Board of Directors, in compliance with the Chairman's instructions.
  - e) Process all requests from the Directors regarding the information and documentation of those matters that fall within the purview of the Board of Directors.
  - f) Act as Secretary of the Executive Committee.
  - g) Act as Secretary for the General Shareholders' Meeting.

4. The Board of Directors shall appoint a Corporate Counsel to the management decision-making bodies if such position is required under applicable law. The Secretary or the Vice-Secretary, if any, may perform the duties of Corporate Counsel if they are practicing attorneys-at-law and satisfy the other requirements established by applicable law and it is so determined by the Board of Directors.

## **TITLE V. COMMITTEES OF THE BOARD OF DIRECTORS**

### **Section 1. Committees of the Board of Directors**

#### **Article 22. Committees of the Board of Directors.**

1. The Board of Directors shall create and maintain, on a permanent basis, an Executive Committee, an Audit and Compliance Committee, a Nominating and Compensation Committee, and a Related-Party Transactions Committee. These Committees shall be composed in such manner and shall have such duties as are described in the following articles.
2. The Board of Directors may also create other Committees or Commissions of purely internal scope, with such powers as determined by the Board of Directors. The Chairman, the Secretary and the remaining members of such Committees and Commissions shall be appointed by a simple majority of the Directors.
3. The Chairman of each Committee shall inform the Board of Directors of the activities performed and the resolutions adopted by it, and the Board may make any and all suggestions or recommendations that it deems advisable.
4. The Committees shall be governed by their own specific rules and regulations approved by the Board of Directors, supplemented by the operating rules set forth in these Regulations as applicable to the Board of Directors, insofar as they are compatible with the nature and duties of each Committee.

### **Section 2. Executive Committee**

#### **Article 23.- Executive Committee.**

1. There shall be an executive committee permanently operating as the representative of the Board of Directors, which committee shall be called the Executive Committee [*Comisión Ejecutiva Delegada*], and to which all of the powers of the Board of Directors shall be delegated, unless otherwise determined by the Board of Directors and except for those powers that may not be delegated pursuant to Law or the By-Laws. The Executive Committee shall be composed of the Directors designated by the Board of Directors by favorable vote of two-thirds of the Directors, and renewals shall occur at the times, in the manner and in the number determined by the Board of Directors, which shall also establish rules for the operation thereof.
2. The Executive Committee shall be composed of the number of Directors decided by the Board of Directors, with a minimum of three (3) Directors and a maximum of six (6).

The Company shall endeavor to ensure that, to the extent practicable, the structure of participation of the various categories of Directors in the Executive Committee, excluding the executive Directors, is similar to that of the Board of Directors, and shall also endeavor to ensure that the Chairman of the Board of Directors, the Vice-Chairman or Vice-Chairmen, and the Chief Executive Officer, if any, form part of the Executive Committee. The Chairman of the Board of Directors or, in the absence thereof, the Director designated by the Board of Directors from among the members of the Executive Committee, shall act as the Chairman of the Executive Committee. The Secretary of the Board of Directors or, in the absence thereof, the Vice-Secretary of the Board of Directors, and in the absence of both, the Director appointed by the Executive Committee from among those who sit thereon and are in attendance at the meeting in question, shall act as Secretary of the Executive Committee.

3. The Directors sitting on the Executive Committee shall continue to hold office for so long as they remain Directors, and their renewal as Directors sitting on such Executive Committee shall occur at the same time as their re-election as Directors and without prejudice to the Board of Directors' power of revocation.
4. The Executive Committee shall meet at least one (1) time per month and as many other times as deemed appropriate by the Chairman, who may also suspend one or more of the ordinary meetings when deemed appropriate in the sole judgment of the Chairman. In addition, it shall meet when so requested by two (2) of the Directors sitting on the Committee. The Executive Committee shall deal with all matters within the power of the Board which, in the sole judgment of the Committee, should be resolved without further delay, excepting only the preparation of the financial statements, the presentation of the balance sheets at the General Shareholders' Meeting and those powers which are given by the shareholders to the Board without the power of delegation, as well as the powers of the Board of Directors which are non-delegable under the Law or the By-Laws.
5. Meetings of the Executive Committee shall be validly held with the attendance, in person or by proxy, of one-half plus one of the Directors sitting on the Committee.
6. Resolutions of the Executive Committee shall be adopted by majority of the Directors sitting on the Committee who are present at the meeting in person or by proxy. In the event of a tie in voting, the Chairman shall have the tie-breaking vote.
7. The Executive Committee shall inform the Board of Directors, at the next meeting thereof following the meetings of the Committee, of the matters dealt with and the resolutions adopted by it during its meetings.
8. The provisions of these Regulations regarding the operation of the Board of Directors, especially those relating to notice of meetings, proxy-granting, plenary meetings, voting in writing without a meeting and approval of minutes of meetings, shall apply to the Executive Committee to the extent that they are not incompatible with the nature thereof.

### **Section 3. Audit and Compliance Committee**

#### **Article 24. Composition of and Positions within the Audit and Compliance Committee.**

1. The Board of Directors shall create a permanent Audit and Compliance Committee, which shall be composed of a minimum of three (3) Directors and a maximum of five (5) Directors appointed by the Board of Directors from among the external Directors who are not members of the Executive Committee. The Audit and Compliance Committee shall have a Chairman, who shall necessarily be one of the independent Directors sitting on the Committee, with sufficient capacity and availability to provide greater dedication to the Committee than the other Directors sitting thereon, and a Secretary, who need not be a Director, appointed by the Board of Directors.

The Board of Directors shall endeavor to ensure that the Directors who are members of the Audit and Compliance Committee, and especially the Chairman thereof, have such background knowledge and experience in accounting, audit or risk management matters as is required by the duties they are called upon to perform, provided, however, that they need not be experts in these fields.

2. The Directors who are members of the Audit and Compliance Committee shall carry out their duties as long as their appointment as Directors of the Company remains in effect, unless the Board of Directors otherwise resolves, and provided they maintain their status as external Directors and are not members of the Executive Committee. The renewal, re-election and withdrawal of the Directors sitting on the Committee shall be governed by the resolutions of the Board of Directors. The office of Chairman shall be held for a maximum period of (4) years, after which period such person may not be re-elected until the passage of one year from ceasing to act as such, without prejudice to such person continuing or being re-elected as a member of the Committee.

#### **Article 25. Powers and Functions of the Audit and Compliance Committee.**

1. The activities of the Committee shall cover Iberdrola Renovables and the companies forming part of the Iberdrola Renovables Group.
2. In all events, the Audit and Compliance Committee shall have the power to:
  - a) Report to the General Shareholders' Meeting with respect to matters raised therein by shareholders regarding its powers.
  - b) Propose appointments of the Company's Auditors to the Board of Directors for submission to the General Shareholders' Meeting.
  - c) Supervise the management of the Internal Audit Area, which shall be functionally controlled by the Chairman of the Audit and Compliance Committee.
  - d) Know the process for gathering financial information and associated systems for monitoring risks relevant to the Company.
  - e) Receive information from the Auditors regarding matters that might jeopardize the independence thereof which are related to the auditing procedure and generally

regarding any other information provided for in legislation regarding the auditing of financial statements and in the technical auditing regulations in effect at any time.

- f) Report in advance on the Company's annual corporate governance report and ensure compliance with legal requirements and those of the Codes of Ethics or Professional Conduct and Good Governance adopted by the Board of Directors.
  - g) Inform the Board of Directors in advance regarding (i) all matters within its area of authority provided for in Title VIII of these Regulations and (ii) the financial information that the Company must periodically make public due to its status as listed company. In this regard, the Committee shall make sure that the interim financial statements are prepared in accordance with the same accounting standards as the annual financial statements and, for such purpose, it shall consider the suitability of a limited review by the external Auditor.
  - h) Report to the Board of Directors, prior to the adoption by it of the corresponding decision, regarding the creation or acquisition of interests in special purpose entities or entities registered in countries or territories regarded as tax havens, as well as any other transactions or operations of a similar nature that, due to the complexity thereof, might detract from the transparency of the Iberdrola Renovables Group.
  - i) Report on the proposed amendments to the Regulations of the Board of Directors.
  - j) Exercise such other powers, if any, as may be assigned to it by the By-Laws, these Regulations or the Board of Directors.
3. The following shall be the main functions of the Committee regarding Internal Audit:
- a) See to the independence and effectiveness of Internal Audit.
  - b) Approve the direction and plans of the Internal Audit Area and ensure that its activities focus primarily on the significant risks of Iberdrola Renovables and of the Iberdrola Renovables Group, and receive periodic information on the activities carried out by Internal Audit.
  - c) Verify that senior management takes into account the conclusions and recommendations made in its reports.
  - d) Ensure that Internal Audit has sufficient resources and suitably-qualified professionals for the successful performance of its function.
4. The following shall be the main functions of the Committee in connection with internal monitoring and risk management systems:
- a) Periodically review internal monitoring and risk management systems to ensure that the main risks are identified, managed and properly disseminated.
  - b) Ensure that the risk control and management policy identifies, at a minimum:
    - i. The various kinds of risk (operational, technological, financial, legal, reputational, etc.) facing the Company, including, under financial or economic risks, contingent liabilities and other off-balance sheet risks.
    - ii. The determination of the level of risk that the company considers acceptable.

- iii. The measures provided for to mitigate the impact of the risks identified, should they materialize.
  - iv. The reporting and internal monitoring systems to be used to control and manage the above-mentioned risks, including contingent liabilities or off-balance sheet risks.
5. The following shall be the main functions of the Committee in connection with the auditing of financial statements:
- a) Give guidance on and propose to the Board of Directors of Iberdrola Renovables the selection, appointment, re-election or replacement of the Auditors of Iberdrola Renovables and of the Iberdrola Renovables Group for approval thereof by the shareholders acting at the General Shareholders' Meeting.
  - b) Approve the Iberdrola Renovables Group's policy on hiring Auditors, proposing to the Board of Directors the terms on which Auditors are to be hired and ensuring that such terms are complied with.
  - c) Ensure the independence of the Auditors and, for such purpose:
    - i) ensure that the Company notifies the National Securities Market Commission of the change of Auditor as a significant event [*hecho relevante*];
    - ii) ensure that the Company and the Auditor observe current rules and regulations on the provision of services other than audit services, the limitations on the concentration of business of the Auditor and, generally, other rules and regulations established to ensure the independence of the Auditors.
    - iii) in the event of resignation of the Auditor, examine the circumstances that caused such resignation.
  - d) Review the content of the Audit Reports prior to issuance thereof, in order to prevent the making of comments and qualifications, the content and scope of which, if any, shall be clearly explained to the shareholders by the Chairman of the Committee.
  - e) Assess the results of each audit and supervise the responses of senior management to its recommendations.
  - f) Favor the Auditor of the Iberdrola Renovables Group taking responsibility for the audits of the companies belonging to such group.
  - g) Act as a channel of communication between the Board of Directors and the Auditors.
6. The following shall be the main functions of the Committee in connection with the preparation of financial information:
- a) Supervise the process of preparation and the integrity of the financial information relating to the Company, ensuring in this regard that the interim financial statements

are prepared in accordance with the same accounting standards as the annual financial statements and, for such purpose, it shall consider the suitability of a limited review by the Auditor.

- b) Monitor compliance with legal requirements, the proper delimitation of the scope of consolidation and the correct application of generally accepted accounting standards and international financial reporting standards applicable to the Financial Statements and the Management Report of Iberdrola Renovables and the Iberdrola Renovables Group.
  - c) Evaluate any proposed changes in accounting policies and practices suggested by senior management.
7. The following shall be the main functions of the Committee in connection with the annual corporate governance report and compliance with legal requirements and Good Governance recommendations:
- a) Report to the Board of Directors on the annual corporate governance report prior to submission thereof to the Board for approval.
  - b) Ensure compliance with laws, internal regulations and regulatory provisions governing the activities of Iberdrola Renovables and of the Iberdrola Renovables Group.
  - c) Review the degree of compliance with Good Governance recommendations by Iberdrola Renovables and by the companies belonging to the Iberdrola Renovables Group, if applicable, reviewing the results thereof from time to time and submitting the proposals for improvement that it deems appropriate to the Board of Directors.
  - d) Establish and supervise a mechanism to allow employees to report on a confidential and, if deemed appropriate, anonymous basis, potentially important irregularities, particularly of a financial and accounting nature, observed in the company, complying in all cases with the rules and regulations regarding the protection of personal information and the fundamental rights of the parties involved.
  - e) Provide specific investigation in the event of third-party claims against the Company or of irregular or anomalous conduct, in accordance with the provisions of letter d) above.
  - f) Inform the Board of Directors, prior to the adoption thereby of the respective decisions, of the creation or acquisition of interests in special purpose entities or entities registered in countries or territories regarded as tax havens, as well as any other transactions or operations of a similar nature that, due to the complexity thereof, might detract from the transparency of the Iberdrola Renovables Group.
  - g) Report to the Board of Directors on all matters within its area of authority pursuant to the Regulations of the Board and, generally, on any other matters required by the Board of Directors.
8. Furthermore, it shall fall upon the Committee to report in advance to the Board of Directors in all cases expressly provided for in other articles of these Regulations of the Board of Directors.

**Article 26. Meetings of and Adoption of Resolutions by the Audit and Compliance Committee.**

1. For purposes of the operation of the Committee, it shall meet as many times as its Chairman deems necessary for the fulfillment of its obligations, and at least one (1) time per quarter, or when requested by at least one-half of its members.

The Chairman of the Board of Directors and the Chief Executive Officer, if any, may request informational meetings with the Committee, on an exceptional basis.

2. The provisions of these Regulations regarding the operation of the Board of Directors and, especially, those regarding notice of meetings, the granting of a proxy to another Director, plenary meetings, voting in writing without a meeting, the chairman and the secretary of the meetings and approval of minutes of meetings shall apply to the Audit and Compliance Committee, to the extent that they are not incompatible with the nature thereof.
3. Meetings of the Committee shall be validly held when one-half plus one of its members are present in person or by proxy.

At the request of the Committee, any member of the Board of Directors, manager or employee of the Group, as well as any member of the decision-making bodies of the companies forming part of the Iberdrola Renovables Group whose appointment was proposed by the Company may attend the meetings of the Committee at its request. The Committee may also require that the Auditor attend its meetings.

4. The resolutions of the Committee shall be adopted by a majority of votes of the members present thereat in person or by proxy. In the event of a tie, the Chairman shall have the tie-breaking vote.
5. Within three months following the end of each fiscal year, the Audit and Compliance Committee shall submit to the Board of Directors for its approval a Report on its activities during the previous fiscal year, which shall subsequently be made available to the shareholders and investors for purposes of the call to the ordinary General Shareholders' Meeting. In addition, at the first meeting of the Board of Directors that is held following the meetings of the Committee, the Chairman of the Audit and Compliance committee shall report to the Board on the resolutions and significant events, if any, that occurred at Committee meetings.
6. Minutes of the meetings of the Audit and Compliance Committee shall be prepared by the Secretary, and shall be approved at the same meeting or at the one held immediately thereafter.

**Section 4. Nominating and Compensation Committee**

**Article 27. Composition of and Positions on the Nominating and Compensation Committee.**

1. The Board of Directors shall create a permanent Nominating and Compensation Committee, which shall be an internal informational and consultative body without executive powers, and which shall have the informational, advisory and proposal-making powers within its scope of action set forth in Article 28 below.
2. The Nominating and Compensation Committee shall be composed of a minimum of three (3) Directors and a maximum of five (5), appointed by the Board of Directors from among the external Directors, and the majority of the Directors sitting on the Committee shall be independent Directors. The Board of Directors shall also appoint the Chairman thereof from among the members of such Committee, who shall necessarily be one of the independent Directors, with sufficient capacity and availability to provide greater dedication to the Committee than the other Directors sitting thereon, as well as its Secretary, who need not be a Director, at the proposal of the Nominating and Compensation Committee.
3. The Board of Directors shall endeavor to ensure that the Directors sitting on the Nominating and Compensation Committee have the capacity, skills and experience required by the duties they are called upon to perform.

The Directors sitting on the Committee shall meet the following conditions:

- (a) have, in the opinion of the Board of Directors, proven experience as Directors or in the performance of other important responsibilities in the business field;
  - (b) not have performed executive duties at the Company or the companies of the Iberdrola Renovables Group, unless the Board of Directors, on an exceptional basis and considering the time that has passed since the Director stopped performing such duties, as well as the qualities of the Director, resolves to waive the application of this requirement.
4. The Directors sitting on the Nominating and Compensation Committee shall hold office for so long as they continue to be Directors of the Company and for so long as they retain the status of external Directors, unless the Board of Directors resolves otherwise. The renewal, re-election and withdrawal of the Directors sitting on the Committee shall be governed by the provisions established by the Board of Directors.

Directors sitting on the Committee who are re-elected as Directors of the Company by resolution of the shareholders acting at a General Shareholders' Meeting shall continue to hold their positions within the Committee, without the need for a new election, unless the Board of Directors otherwise resolves.

#### **Article 28. Powers of the Nominating and Compensation Committee.**

1. The Nominating and Compensation Committee shall have the power to supervise the procedure for selecting the members of the Board of Directors and senior managers of the Company (the latter at the proposal of the Chief Executive Officer, if any), as well as to assist the Board of Directors in the determination and supervision of the compensation policy for such persons. In addition, within the legal limits and within the framework of coordination in the best interests of the Company and the affiliated companies forming part of the Iberdrola Renovables Group, the Committee shall be apprised of, and, if

appropriate, report to the Board of Directors on the selection, appointment and compensation policy for Directors and Senior Managers of the main affiliated companies.

2. Without prejudice to the foregoing and, specifically, the Nominating and Compensation Committee shall have the power to:

a) Report on and review the criteria that should be followed in composing the Board of Directors and in selecting candidates, defining their duties and required qualifications and assessing the time and dedication required for the proper performance of their duties. In the exercise of this power, the Committee shall take into account, regarding external Directors, the relation between the number of proprietary Directors and the number of independent Directors, such that this relation reflects, as far as possible, the ratio of the Company's capital represented by proprietary Directors to the rest of the capital.

b) Bring independent Director designation proposals to the Board of Directors for the interim appointment thereof to fill a vacancy or, as the case may be, for submission of such proposals to a decision of the shareholders at the General Shareholders' Meeting, as well as proposals for the re-election or removal of such Directors by the shareholders at the General Shareholders' Meeting.

Report to the Board of Directors on the proposals for the appointment of non-independent Directors on an interim basis to fill a vacancy or, if appropriate, for submission to the decision of the shareholders at the General Shareholders' Meeting, as well as on the proposals for the re-election or removal of such Directors by the shareholders at the General Shareholders' Meeting.

c) Propose to the Board of Directors the members who should make up each of the Committees.

d) Examine or organize, in such manner as is deemed appropriate, the succession of the Chairman and of the Chief Executive Officer, if any, of the Company and, if applicable, make proposals to the Board for such succession to occur in an orderly and well-planned fashion.

e) Propose to the Board of Directors the system and amount of the annual compensation of members of the Board, as well as the individual compensation of executive Directors and other terms and conditions of their contracts, in all cases pursuant to the provisions of the By-Laws.

f) Report to the Board of Directors, prior to the adoption thereby of the corresponding decision at the proposal of the Chairman, regarding the appointment and/or removal of the Vice-Chairman or Vice-Chairmen, if any, of the Board of Directors.

g) Report to the Board of Directors, prior to the adoption thereby of the corresponding decision at the proposal of the Chairman, regarding the appointment and/or removal of the Secretary and of the Vice-Secretary, if any, of the Board of Directors.

h) Provide information to the Board of Directors regarding the appointment and/or removal of senior managers of the Company, as well as regarding the compensation or indemnification, if any, that may be established in the event of removal of such senior managers, all at the proposal of the Chief Executive Officer, if any.

- i) Submit to the Board of Directors, together with the corresponding reports, the proposals submitted thereto by the Chief Executive Officer, if any, regarding the compensation policy applicable to senior managers and the basic terms and conditions of their contracts.
  - j) Provide information regarding incentive plans and pension supplements.
  - k) Periodically review the compensation programs, evaluating the adequacy and results thereof.
  - l) Ensure compliance with the compensation policy of the Company.
  - m) Ensure that when new vacancies are filled or new Directors are appointed to the Board, the selection procedures are free from any implied bias entailing any kind of discrimination.
  - n) Exercise such other powers, if any, as are assigned to it by the By-Laws, these Regulations or the Board of Directors.
3. The Committee shall have unrestricted access to any kind of information or documents in the possession of the Company and that it deems necessary for the performance of its duties.
  4. The Committee may, through its Chairman, request the cooperation of any Director and, through the Chief Executive Officer, if any, and in the absence thereof, through the Chairman of the Committee, the cooperation of any manager or employee of the Company and its Group for the better performance of its duties.

Furthermore, the Committee may also request the cooperation or advice of external professionals, who shall address their reports directly to the Chairman of the Committee.

**Article 29. Meetings of and Adoption of Resolutions by the Nominating and Compensation Committee.**

1. For purposes of the operation of the Committee, it shall meet as often as required for the performance of its duties, in the opinion of its Chairman, and at least once every quarter or when requested by at least one-half of the Directors sitting on the Committee.  
The Chairman of the Board of Directors and the Chief Executive Officer, if any, may request informational meetings with the Committee, on an exceptional basis.
2. The provisions of these Regulations regarding the operation of the Board of Directors and, especially, those regarding notice of meetings, the granting of a proxy to another Director, plenary meetings, voting in writing without a meeting, chairman and secretary of the meetings and approval of the minutes of meetings shall apply to the Nominating and Compensation Committee, to the extent that they are not incompatible with the nature thereof.
3. Meetings of the Committee shall be validly held when one-half plus one of the Directors sitting on the Committee are present in person or by proxy.

4. The resolutions of the Committee shall be adopted by a majority of the Directors sitting on the Committee who are present thereat in person or by proxy. In the event of a tie, the Chairman shall have the tie-breaking vote.
5. Within three months following the end of each fiscal year, the Nominating and Compensation Committee shall submit to the Board of Directors for its approval a Report on its activities during the previous fiscal year. In addition, at the first meeting of the Board of Directors that is held following the meetings of the Committee, the Chairman of the Nominating and Compensation Committee shall report to the Board on the resolutions and significant events, if any, that occurred at Committee meetings.
6. Minutes of the meetings of the Nominating and Compensation Committee shall be prepared by the Secretary, and shall be approved at the same meeting or at the one held immediately thereafter.

### **Section 5. Related-Party Transactions Committee**

#### **Article 30. Composition of and Positions on the Related-Party Transactions Committee.**

1. Pursuant to the provisions of the Framework Agreement executed by the Company and Iberdrola, S.A. on November 5, 2007 (hereinafter, the "Framework Agreement"), the Board of Directors shall create a Related-Party Transactions Committee, which shall be an informational and consultative body without executive powers, and which shall have the informational, advisory and proposal-making powers within its scope of action set forth in Article 31 below.
2. The Related-Party Transactions Committee shall be composed of a minimum of three (3) Directors and a maximum of five (5), appointed by the Board of Directors from among the non-proprietary Directors, and the majority of the Directors sitting on the Committee shall be independent Directors. The Board of Directors shall also appoint from among its members the Chairman thereof, who shall necessarily be one of the independent Directors, as well as its Secretary, who need not be a Director.
3. The Directors sitting on the Related-Party Transactions Committee shall continue to hold office for so long as they remain Directors of the Company and for so long as they retain the status of non-proprietary Directors, unless the Board of Directors resolves otherwise. Renewal and re-election to and withdrawal from office of the Directors sitting on the Committee shall be governed by resolution of the Board of Directors.

Directors sitting on the Committee who are re-elected as Directors of the Company by resolution of the shareholders adopted at a General Shareholders' Meeting shall continue to hold their positions within the Committee, without the need for a new election, unless the Board of Directors otherwise resolves.

#### **Article 31. Powers of the Related-Party Transactions Committee.**

1. The Related-Party Transactions Committee shall have the power to:

- (a) Report in advance on the essential elements (price, term and purpose) of related-party transactions between the Company and Iberdrola S.A. or among any of the companies of their respective Groups that require the approval of the Board of Directors or, in urgent cases, of the Executive Committee, pursuant to the Framework Agreement. As regards transactions within the ordinary course of business that are of a customary or recurring nature, it shall be sufficient for the report to refer to generic authorization by the Board of the line of transactions and of the conditions for performance thereof.
  - (b) Report in advance on semi-annual information and information included in the Company's annual corporate governance report with respect to the Framework Agreement and related-party transactions between Iberdrola, S.A. and the Company, or among any of the companies of their respective Groups.
  - (c) Report in advance on the decision of the Company and the companies belonging to its Group to relinquish the business opportunities mentioned in the Framework Agreement.
  - (d) Report periodically on compliance with the Framework Agreement.
  - (e) Report in advance on any proposed amendment to the Framework Agreement, as well as possible proposed settlements intended to resolve disputes that may arise between the parties on the basis of the Framework Agreement.
  - (f) Make recommendations and proposals for improvement on the matters within its purview.
2. The period allowed the Related-Party Transactions Committee to report on the matters described under a) and b) above shall be ten days as from the date of receipt of the respective notice. Such period may be extended by way of exception.
  3. The reports issued and recommendations made by the Related-Party Transactions Committee shall not be binding upon the management decision-making bodies that are to adopt the resolutions or decisions to which such reports or recommendations refer, but the above-mentioned bodies shall, in every case, state the reasons why they did not follow the opinion expressed in the reports or the recommendations of the Related-Party Transactions Committee.
  4. In the exercise of its powers, the Related-Party Transactions Committee may make verifications and request any relevant information.

**Article 32. Meetings of and Adoption of Resolutions by the Related-Party Transactions Committee.**

1. The Related-Party Transactions Committee shall meet with the frequency required for the performance of its duties, and at least semi-annually.  
The Chairman of the Board of Directors and the Chief Executive Officer, if any, may request exceptional meetings with the Committee for the provision of information.
2. The provisions of these Regulations regarding the operation of the Board of Directors, and especially those regarding notice of meetings, the granting of a proxy to another Director, plenary meetings, voting in writing without a meeting, chairman and secretary

of the meetings and approval of minutes thereof shall apply to the Related-Party Transactions Committee to the extent that they are not incompatible with the nature thereof.

3. Meetings of the Related-Party Transactions Committee shall be validly held when one-half plus one of the Directors sitting on the Committee are present in person or by proxy.
4. Resolutions of the Related-Party Transactions Committee shall be adopted by a majority of the Directors sitting on the Committee who are present thereat in person or by proxy. In the event of a tie, the Chairman shall have the tie-breaking vote.
5. The Committee may request the assistance or the attendance at its meetings of any Director, manager or employee of the Company or of the Iberdrola Renovables Group.
6. At the first meeting of the Board of Directors that is held following the meetings of the Committee, the Chairman of the Related-Party Transactions Committee shall report to the Board of Directors on the resolutions and significant events, if any, that occurred at Committee meetings, and shall promptly notify the appropriate bodies of the prior reports issued by the Committee in connection with Related-Party Transactions and with the decision to relinquish business opportunities.
7. Minutes of the meetings of the Related-Party Transactions Committee shall be prepared by the Secretary, and shall be approved at the same meeting or at the one held immediately thereafter.

## **TITLE V. OPERATION OF THE BOARD**

### **Article 33.- Meetings of the Board of Directors.**

1. The Board of Directors shall meet with the frequency it deems appropriate, but at least once a month unless the Chairman, in his sole judgment, deems it appropriate to suspend any of such sessions. The Board of Directors shall evaluate, on an annual basis, (i) its operation and the quality of its work, (ii) the performance of his duties by the Chairman of the Board and, if applicable, by the Chief Executive Officer of the Company, based on the report submitted thereto by the Nominating and Compensation Committee, and (iii) the operation of its Committees, based on the report submitted thereto by such Committees. For such purpose, the Chairman of the Board of Directors shall organize and coordinate with the Chairmen of the Committees the evaluation by the Board.
2. Prior to the commencement of each fiscal year, the Board of Directors shall set a schedule for its ordinary meetings. Such schedule may be modified by a resolution adopted by the Board of Directors or upon a decision made by the Chairman, who shall report the modification to the Directors not less than five (5) days in advance of the date originally set for the meeting or of the new date set in lieu thereof, if the latter date occurs earlier.
3. The Board of Directors shall also meet when the Chairman resolves to call an extraordinary meeting thereof, when such extraordinary meeting is requested of it by

one-fourth of the Directors, or when so requested of it by the Independent Director entitled thereto pursuant to the provisions of Article 18 above. In the latter two cases, the meeting shall be held within fifteen (15) days of the request.

4. The call to meeting of the Board of Directors shall be carried out by letter, fax, telegram, e-mail or any other means, and shall be authorized under the signature of the Chairman, or under the signature of the Secretary or Vice-Secretary by order of the Chairman. Notice of the call shall be given as much in advance as is necessary for the Directors to receive it not later than the third day prior to the date of the meeting, except in the case of emergency meetings. Excepted from the foregoing provision shall be those instances in which these Regulations prescribe that greater notice be given. The call shall always include the place, date and time of the meeting, the agenda for the meeting and, if appropriate, an attachment containing any information deemed necessary.
5. Without prejudice to the foregoing, extraordinary meetings of the Board of Directors may be called when the Chairman deems it justified in the circumstances, by telephone, fax, telegram, e-mail or any other means, in which case the requirements and formalities for a call to meeting mentioned in the foregoing paragraphs of this article shall not apply.
6. The Chairman shall decide on the agenda for the meeting. The Directors may submit a request to the Chairman for the inclusion of matters in the agenda, and the Chairman shall be required to include them when such request has been made not less than five (5) days in advance of the date set for the meeting.
7. Without prejudice to the foregoing, the Board of Directors shall be deemed to have validly met without the need for a call if all of the Directors are present in person or by proxy and unanimously agree to hold the meeting as a plenary meeting and to the items of the agenda to be dealt with.
8. If no Director is opposed thereto, voting by the Board may occur in writing without a meeting. In this instance, the Directors may deliver to the Chairman (or to the Secretary or Vice-Secretary acting on the Chairman's behalf) their votes and the considerations they wish to appear in the minutes, using the same methods mentioned in paragraph 4 above. Resolutions adopted by this procedure shall be recorded in minutes prepared pursuant to the provisions of the Law.
9. Technical experts, whether they be the Company's own in-house experts or external, may attend Board meetings as invitees in order to provide assistance to the Directors when so deemed necessary by the Chairman of the Board of Directors.

**Article 34.- Place of Meetings.**

1. Meetings of the Board of Directors shall be held at the registered office of the Company, or at such other place, either in Spain or abroad, as is designated in the call to the meeting.
2. Meetings of the Board of Directors may also be held in several places connected by a conference system which permits the recognition and identification of the attendees,

permanent communication among the attendees regardless of their location, and participation in discussion and the casting of votes, all in real time. Attendees at any of such places shall be deemed to have attended the same meeting for all purposes relating to the Board of Directors. The meeting shall be deemed to have been held where the majority of the Directors are located and, if they are located in different places in equal numbers, where the Director chairing the meeting is located.

**Article 35.- Conduct of the Meetings.**

1. A quorum of the Board of Directors shall validly exist with the attendance, in person or by proxy, of at least one-half plus one of the Directors.
2. The Directors shall use their best efforts to attend the meetings of the Board and, when unable to attend in person, they shall endeavor to give a proxy to another Director, to whom they shall give any appropriate instructions. The proxy granted shall be a special proxy for the Board meeting in question, and may be communicated by any of the means set forth in paragraph 4 of Article 33 above in connection with notice of the call to meetings.
3. The Chairman shall organize the debate, stimulating the participation of all of the Directors in the deliberations of the Board.
4. In addition, the Chairman may, when so required by the circumstances, adopt any measures necessary to ensure the confidentiality of the deliberations and of the resolutions adopted during the meetings of the Board of Directors.
5. Resolutions shall be adopted by absolute majority of the Directors attending the meeting in person or by proxy, except in the following cases:
  - a) Permanent delegation of powers of the Board of Directors to the Executive Committee or to the Chief Executive Officer, if any, and the appointment of Directors who must occupy such positions, which shall require the favorable vote of two-thirds of the Directors in order to be valid.
  - b) Amendments to the Regulations of the Board of Directors, which shall require the favorable vote of two-thirds of the Directors present at the meeting in person or by proxy in order to be valid.
6. In the event of a tie, the Chairman of the Board of Directors shall have the tie-breaking vote.

**TITLE VI. COMPENSATION OF THE MEMBERS OF THE BOARD OF DIRECTORS**

**Article 36.- Compensation of the Directors.**

1. The Directors shall be entitled to the compensation provided for in the By-Laws.

2. Within the limits established in Article 44 of the By-Laws, the Board of Directors shall ensure that the compensation payable to the Directors is commensurate with the compensation paid at similarly-sized companies carrying on similar business in the market and with the same dedication to the Company.
3. The Board of Directors shall formulate a compensation policy that will include fixed compensation, variable compensation items (indicating the parameters thereof and the hypotheses or objectives taken as a reference), pension systems and the principal terms and conditions to be contained in the contracts with executive Directors.

Compensation tied to the results of the Company shall take into account possible qualifications contained in the report of the external auditors that reduce such results.

In the case of variable compensation, the compensation policy shall include the technical precautions needed to ensure that such compensation bears a relation to the professional performance of the beneficiaries thereof and does not derive simply from general changes in the markets or the Company's industry or other similar circumstances.

The Board of Directors shall prepare, on an annual basis, a report on the compensation policy for the current fiscal year and the application of the compensation policy in effect in the previous fiscal year, which shall be made available to the shareholders, in such manner as the Board deems fit, on occasion of the call to the ordinary General Shareholders' Meeting.

4. The Board shall ensure the transparency of the Directors' compensation, and for such purpose, it shall include in the Company's report an itemized and detailed account of all compensation received by the Directors, whether in their capacity as such or in their capacity as managers, as the case may be, or in any other capacity, and whether it has been paid by the Company or by the other companies of the Iberdrola Renovables Group in accordance with the good governance recommendations that are in effect from time to time.
5. In addition, the Board of Directors shall ensure that the amount of the compensation of external Directors is such that it provides incentives to their dedication while not jeopardizing their independence.

## **TITLE VII. INFORMATION TO DIRECTORS**

### **Article 37.- Powers of Information and Inspection.**

1. A Director shall have the broadest powers to obtain information regarding any aspect of the Company, to examine its books, records, documents and other records of corporate transactions, to inspect its facilities, and to communicate with the senior managers of the Company.
2. The exercise of the powers of information shall first be channeled through the Chairman, the Chief Executive Officer, if any, or the Secretary of the Board of Directors.

**Article 38.- Assistance of Experts.**

1. In order to be assisted in the performance of his duties, any Director may request the hiring of legal, accounting, technical, financial, commercial or other expert advisors, whose services shall be paid for by the Company.

The assignment must deal with specific issues of certain significance and complexity arising during the performance of the Director's duties.

2. The request for an expert to be hired shall be channeled through the Chairman or the Secretary of the Board of Directors, who may subject it to the prior approval of the Board of Directors; such approval may be denied in well-founded instances, including the following circumstances:
  - a) That it is not necessary for the proper performance of the duties entrusted to the Directors.
  - b) That the cost thereof is not reasonable in light of the significance of the issues and the assets and income of the Company.
  - c) That the technical assistance sought may be adequately provided by the Company's own experts and technical personnel.
  - d) That it may entail a risk to the confidentiality of the information that must be made available to the expert.

**TITLE VIII. DUTIES OF DIRECTORS**

**Article 39.- General Duties of Directors.**

1. In the performance of his duties, a Director shall act in good faith and with the diligence of a prudent businessman and a faithful representative, and shall comply with the duties prescribed by the By-Laws, these Regulations and the Law, acting in furtherance of the corporate interests.
2. Without prejudice to such other duties as may be set forth in these Regulations, a Director is specifically required to:
  - a) Properly prepare the meetings of the Board and, if applicable, the meetings of the Executive Committee or of the Committees of which the Director is a member, for which purposes the Director must diligently inform himself of the running of the Company and the matters to be discussed at such meetings.
  - b) Attend the meetings of the Decision-Making Bodies and Committees of which the Director is a member and actively participate in the deliberations in order that the Director's opinion may be an effective contribution to decision-making. In the event that, due to well-founded reasons, the Director is unable to attend a meeting of which notice has been given, the Director shall give instructions to the Director who is to represent him.

- c) Fulfill any specific obligation which is entrusted to the Director by the Board of Directors, by the Chairman of the Board or by the Chief Executive Officer, if any, and which reasonably falls within the Director's scope of dedication.
  - d) Inquire into and give notice to the Board of any irregularities in the management of the Company of which the Director may have had notice, and monitor any situation of risk.
  - e) Propose a call to an extraordinary meeting of the Board or the inclusion of new matters in the agenda of the next meeting to be held, in order that deliberations may be conducted on such issues as the Director deems advisable.
  - f) Oppose resolutions which are contrary to the By-Laws, the Law or the corporate interests, request that such opposition be recorded in the minutes, and seek the invalidation of such resolutions. Independent Directors and other Directors who are not affected by a potential conflict of interest shall ensure that the Company's interests prevail in such situations, provided that this does not result in any unlawful damage to any shareholder or third party affected thereby.
3. The Secretary, and the Vice-Secretary, if any, of the Board shall have the duties entrusted to Directors in these Regulations which, because of their nature, are applicable thereto.

**Article 40.- Director's Duty of Confidentiality.**

1. A Director shall keep confidential the deliberations of the Board of Directors, of the Executive Committee or of the Committees of which the Director might be a member and, in general, not disclose any information, data, reports or background information to which the Director may have had access while in office, and not use any of the foregoing for the Director's own benefit or for the benefit of third parties, without prejudice to the duties of transparency and information imposed by applicable law.

The foregoing obligation shall not prevent the communication of confidential information to third parties when such communication takes place during the ordinary exercise of his duties and the duty of secrecy of the addressee of the information is adequately assured. In particular, it shall be deemed that the Directors are acting in the ordinary course of their duties when they provide information:

- (i) To the managers and employees of the Company in appropriate furtherance of their tasks and responsibilities;
- (ii) To the administrative and management decision-making bodies of Iberdrola, S.A., as the parent company of Iberdrola Renovables, to the extent that the information is supplied for the purpose of:
  - a) Facilitating compliance with its legal obligations, such as: (i) the preparation of its financial statements, both individual and consolidated; (ii) compliance with its obligations to provide periodic information to the National Securities Market Commission and other competent authorities, and (iii) the performance of analyses and monitoring of tax issues, for purposes of tax consolidation.

- b) Designing the policy of the Iberdrola Group and the exercise of its unitary management; and
  - c) Meeting any other purposes that are appropriate to the corporate interest of Iberdrola Renovables and of Iberdrola, S.A., such as, among other things, obtaining and renewing credit ratings.
- (iii) To the external advisors of the Company (auditors, attorneys, investment banks, etc.) for due compliance with the mandate that they have been given.
2. The Director's duty of confidentiality shall survive even after the Director has ceased to hold such position.

**Article 41.- Duty Not to Compete.**

1. A Director may not be a director or manager of, or provide services to, another company whose corporate purpose is totally or partially analogous to the corporate purpose of the Company or which is a competitor of the Company. Excepted from the foregoing restriction are the duties that may be performed and the offices that may be held (i) in companies belonging to the Iberdrola Group, (ii) in companies in which the Director acts as a representative of the interests of the Iberdrola Group, (iii) in companies in which any of the companies belonging to the Iberdrola Group has an interest and in which the Director does not act as a representative of the interests of the Iberdrola Group, unless the Board of Directors, following a report of the Audit and Compliance Committee, believes that the Company's interests are jeopardized; and (iv) in those other instances in which the Board of Directors, following a report of the Audit and Compliance Committee, relieves the Director from observing such restriction based on the belief that the interests of the Company are not at risk.
2. A Director who ends his term of office or who, for any other reason, ceases to act as such, may not be a director or manager of, or provide services to, any other entity whose corporate purpose is totally or partially analogous to that of the Company or which is a competitor of the Company, for a term of two (2) years. The Board of Directors may, if it deems it appropriate, relieve the outgoing Director from this restriction or reduce it to a lesser period.

**Article 42.- Conflicts of Interest.**

1. A conflict of interest shall be deemed to exist in those cases in which there is a conflict, whether direct or indirect, between the interests of the Company or of the companies forming part of the Iberdrola Renovables Group and the personal interest of the Director. A personal interest of the Director shall be deemed to exist when a matter affects the Director or a Related Person.

For purposes of these Regulations, the following shall be deemed Related Persons:

- a) The Director's spouse or other persons related to the Director by a like relationship of affection.

- b) The ascendants, descendants or siblings of the Director or of the Director's spouse (or another person related to the Director by a like relationship of affection).
- c) The spouses of the Director's ascendants, descendants and siblings.
- d) The companies in which the Director, acting personally or through a third party, falls within any of the cases provided for in Section 4 of Law 24/1988, of July 28, on the Securities Market.

In the case of a legal entity acting as Director, the following shall be deemed to be Related Persons:

- a) The shareholders who, in respect of the legal entity acting as Director, fall within any of the cases provided for in Section 4 of Law 24/1988, of July 28, on the Securities Market.
  - b) The companies that form part of the same group, as such is defined in Section 4 of Law 24/1988, of July 28, on the Securities Market, and the shareholders thereof.
  - c) The individual acting as a representative, the directors (in fact or in law), and the liquidators of, and the representatives holding general powers of attorney granted by, the legal entity acting as Director.
  - d) Those persons who, in respect of the representative of the legal entity acting as Director, are deemed related persons pursuant to the provisions of the preceding paragraph applicable to individuals acting as Directors.
2. Conflicts of interest shall be governed by the following rules:
- a) Communication: the Director must give notice to the Board of Directors, in the person of the Chairman or the Secretary, of any conflict of interest in which the Director is involved.
  - b) Abstention: the Director shall not attend or participate in the deliberation and voting on those matters in which the Director is affected by a conflict of interest, and such Director shall not be counted as an attendee at the meeting for purposes of determining the number of Directors to be used to calculate the majority required for approval of the resolution in respect of which the Director is in a situation of conflict. Proprietary Directors must abstain from voting on matters that may entail a conflict of interest between the shareholders who have proposed their appointment and the Company. The provisions of this paragraph shall apply to meetings of the Board of Directors and of all Committees created within the Board.
  - c) Transparency: in the annual corporate governance report, the Company shall report any cases of conflict of interest involving the Directors and of which the Company is aware by reason of notice given thereto by the Director affected by such conflict or by any other means.
3. The provisions of this article may be further developed into corresponding rules that may be made by the Board of Directors of the Company.

**Article 43.- Use of Corporate Assets.**

1. A Director may not use the Company's assets or profit from the Director's position in the Company in order to obtain any financial benefit, unless adequate consideration has been paid.
2. On an exceptional basis, the Director may be relieved from the obligation to provide such consideration, but in any such case, the financial benefit shall be deemed indirect compensation and shall be approved by the Board of Directors following a report of the Audit and Compliance Committee.

**Article 44.- Non-Public Information.**

1. The Director may use non-public information of the Company for private purposes only if the following conditions are satisfied:
  - a) That such information is not applied in connection with transactions for the purchase or sale of securities or financial instruments of the issuer to which the information directly or indirectly refers.
  - b) That it does not place the Director in a position of advantage vis-à-vis other suppliers and clients.
  - c) That the use thereof does not cause any harm to the Company.
  - d) That the Company does not own proprietary rights in, or is not in a similar legal position with respect to, the information that the Director wishes to use.
2. Additionally, the Director shall observe the rules of conduct established in the legal provisions governing the securities market and, in particular, those contained in the Company's "Internal Regulations for Conduct in the Securities Markets" [*"Reglamento Interno de Conducia en los Mercados de Valores"*].

**Article 45.- Business Opportunities.**

1. A Director may not take a business opportunity of the Company, either for the Director's own benefit or for the benefit of Related Persons, unless the investment or transaction has previously been offered to the Company, the Company has chosen not to take advantage of it without any pressure from the Director, and the Director has been authorized by the Board to profit from the transaction, following a report of the Audit and Compliance Committee.
2. For purposes of the preceding paragraph, a business opportunity shall be deemed to be any possibility of making an investment or a business transaction that has arisen or has been discovered in connection with the Director's performance of duties as such, or through the use of means and information belonging to the Company, or in circumstances such that it is reasonable to believe that the third party's offer was in fact addressed to the Company.
3. Likewise, the Director shall not use the Company's name and shall not invoke his position as Director of the Company in order to carry out transactions for the Director's own account or for the account of Related Persons.

**Article 46.- Transactions by the Company with Directors and Shareholders.**

1. Any transaction by the Company or the companies forming part of its Group with Directors, with shareholders that own a shareholding interest that is greater than or equal to that considered by law to be significant or who are represented on the Board of the Directors of the Company, or with the respective Related Persons, shall be subject to the approval of the Board of Directors, or in urgent cases, of the Executive Committee, upon a prior report of the Audit and Compliance Committee. In the event that authorization is granted by the Executive Committee on an emergency basis, it shall be submitted for subsequent ratification by the Board of Directors.
2. The Board of Directors, through the Audit and Compliance Committee, shall ensure that transactions between the Company or the companies forming part of the Iberdrola Renovables Group and the Directors, the shareholders mentioned in the preceding paragraph or the respective Related Persons, are carried out under arm's length conditions and with due observance of the principle of equal treatment of shareholders.
3. In the case of transactions within the ordinary course of business that are customary or recurring, it shall be sufficient to give a generic approval of the line of transactions and of the conditions for performance thereof.
4. However, no authorization of the Board shall be required in connection with transactions that simultaneously satisfy the following three conditions: (i) that they are conducted under contracts whose terms and conditions are standardized and apply en masse to a large number of clients; (ii) that they are conducted at prices or rates established generally by the party acting as supplier of the goods or services in question, and (iii) that the amount thereof does not exceed one (1%) percent of the consolidated annual income of the Company, based on the audited annual financial statements for the last fiscal year ending prior to the date of the transaction in question.
5. The Company shall report the transactions mentioned in this article in the periodical financial information to be provided on a semi-annual basis, in those cases and with the scope provided for by Law. Likewise, the Company shall include in the notes accompanying the annual financial statements information regarding the transactions by the Company or by the companies that form part of the Iberdrola Renovables Group with the Directors and those persons who act for the account of the latter when such transactions are conducted other than in the ordinary course of the Company's business or other than under arm's length conditions.
6. The provisions of this article may be further developed into corresponding rules that may be made by the Board of Directors of the Company.
7. Excluded from the provisions of this article are the related-party transactions made between the Company and Iberdrola S.A., or between any of the companies belonging to their respective Groups, which shall be governed by the provisions of the Framework Agreement and in respect of which the competent body to report thereon shall be the Related-Party Transactions Committee.

**Article 47.- Director's Duty of Information.**

1. A Director shall disclose to the Company any interest that the Director may hold in the capital of any company pursuing a business that is the same as or similar or complementary to the business which the corporate purpose of the Company consists of, as well as any offices held or duties performed therein and the conduct, for the Director's own account or for the account of another, of any kind of business that is complementary to the business that the corporate purpose of the Company consists of. Such information shall be included in the notes to the annual financial statements and in the annual corporate governance report, in compliance with legal requirements.
2. A Director must also disclose to the Company:
  - a) All positions the Director holds in and services the Director provides to other companies or entities, as well as his other professional commitments. In particular, before accepting office as Director or manager in another company or entity, the Director shall give notice thereof to the Audit and Compliance Committee.
  - b) Any substantial change in the Director's professional status that may affect the condition or capacity by virtue of which the Director may have been appointed as Director.
  - c) Any judicial, administrative or other proceedings instituted against the Director which, because of their significance or characteristics, may seriously reflect upon the reputation of the Company. In particular, in the event that a Director becomes subject to an order for further criminal prosecution upon indictment or an order for the commencement of an oral trial is issued against him for the commission of any of the crimes contemplated in Section 124 of the Companies Law, such Director shall give notice thereof to the Company, in the person of its Chairman. In such instance, the Board shall review the case as soon as practicable and shall adopt the decisions it deems fit taking into account the interests of the Company.
  - d) In general, any fact or event that may be relevant to the holding of office as a Director of the Company.
3. Directors shall provide the Company with an e-mail address as well as a mobile telephone number such that meetings of the Board of Directors may be called by those means, if so desired, and the corresponding information, if any, may so be provided to them.

**Article 48.- Extension of Director's Obligations.**

The duties prescribed in this Title of these Regulations in connection with the relations between the Directors and the Company shall also be deemed applicable by analogy to their potential relations with companies forming part of the Iberdrola Renovables Group.

**TITULAR IX. POLICY REGARDING THE PROVISION OF INFORMATION AND  
THE RELATIONSHIPS ESTABLISHED BY THE BOARD**

**Section 1. Policy regarding the Provision of Information**

**Article 49. Annual Corporate Governance Report.**

1. The Board of Directors shall, on an annual basis and following a report by the Audit and Compliance Committee, annually approve a corporate governance report for the Company which shall include all specifications provided for by law and any others which the Board of Directors deems appropriate to include therein.
2. The annual corporate governance report shall be approved prior to the publication of the call of the Company's ordinary General Shareholders' Meeting for the fiscal year to which such report refers, and shall be made available to the shareholders together with other documents relating to the General Shareholders' Meeting.
3. In addition, public notice shall be given of the annual corporate governance report as provided in the securities market rules and regulations.

**Article 50. Website.**

1. The Company shall maintain a website for shareholders' and investors' information, which shall include the documents and information provided for by Law, and at least the following:
  - a) The current By-Laws, as well as the amendments thereto made in the last twelve (12) months.
  - b) The current Regulations for the General Shareholders' Meeting.
  - c) The current Regulations of the Board of Directors and, if applicable, the current Regulations of the Committees of the Board of Directors.
  - d) The sustainability report or annual report for the last two (2) closed fiscal years, which shall be published after preparation thereof for submission to the shareholders at the General Shareholders' Meeting.
  - e) The current Internal Regulations for Conduct in the Securities Markets.
  - f) The annual corporate governance report for the last closed fiscal year.
  - g) The information regarding the call to meeting, the agenda, the proposed resolutions, and any other relevant information that the shareholders may need in order to vote, starting upon publication of the first notice of the call to any ordinary or extraordinary General Shareholders' Meeting.
  - h) The information on the proceedings of the General Shareholders' Meetings held during the current and the prior fiscal years, and particularly, on the agenda, the composition of the General Shareholders' Meeting at the time when it is convened, and the resolutions adopted, with a statement of the number of votes cast and the direction of such votes on each of the proposals included in the agenda.

- i) The existing channels of communication between the Company and the shareholders and, in particular, explanations pertinent to the exercise of the shareholders' right to receive information, indicating the postal and e-mail addresses to which the shareholders may direct their requests, which channels shall have been established for each General Shareholders' Meeting from the publication of the first notice of the call to meeting until the holding thereof.
  - j) The means and procedures for granting a proxy to attend a General Shareholders' Meeting, established for each Meeting from the moment of the call to meeting until the holding thereof.
  - k) The means and procedures for casting votes from a distance, including, where applicable, the forms required to evidence attendance and the casting of votes by means of data transmission at the General Shareholders' Meeting, established for each Meeting from the moment of the call to meeting until the holding thereof.
  - l) All significant events of which notice was given to the National Securities Market Commission during the current fiscal year and the last closed fiscal year.
  - m) The following information regarding each Director: (i) professional profile and biographical data of the Director; (ii) other boards of directors on which he holds office, at listed companies or otherwise; (iii) indication of the type of Director he is in each case, with mention, in the case of proprietary Directors, of the shareholder he represents or with which he has ties; (iv) date of his first and subsequent appointments as Director of the Company, and (v) shares of the Company, options thereon, and derivative financial instruments whose underlying assets are shares of the Company, of which such Director is the holder.
2. The Board of Directors must determine the information for shareholders and investors that must be included in the Company's website in compliance with the duties established in the securities markets regulations, and shall be responsible for the update thereof pursuant to the provisions of applicable law.

## **Section 2. Policy regarding the Relationships Established by the Board of Directors**

### **Article 51.- Relationships with the Shareholders.**

1. The Board of Directors shall establish any appropriate channels to hear proposals that the shareholders may make in connection with the management of the Company.
2. The Board of Directors, assisted by such members of the senior management as it deems appropriate, may organize meetings for the provision of information on the progress of the Company and of the Iberdrola Renovables Group or other matters of interest to the shareholders residing in locations with the most relevant financial markets in Spain and abroad. The Board of Directors shall guarantee equality of treatment in its relationships with the shareholders.
3. Likewise, the Board of Directors shall establish appropriate mechanisms for the regular exchange of information with those investors that are holders of a significant financial interest in the share capital of the Company and are not represented on the Board;

provided, however, that in no event may such mechanisms imply the provision to the above-mentioned investors of any information that places them in a privileged or advantageous position vis-à-vis the other shareholders.

4. All public requests for delegation of voting powers made in favor of any Director shall disclose, where applicable, the existence of a conflict of interest, and shall provide detailed reasons for the direction in which the representative shall vote in the event that no instructions are given by the shareholder, subject always to the provisions of Law.
5. The Board of Directors shall encourage the informed participation of the shareholders at the General Shareholders' Meeting, and shall take all such measures as may be appropriate to make it easier for the shareholders acting at a General Shareholders' Meeting to effectively exercise the powers conferred upon them by the By-Laws and the Law, with due observance of the provisions set out in the Regulations for the General Shareholders' Meeting.

#### **Article 52.- Relationships with the Securities Markets.**

1. The Board of Directors shall immediately inform the public regarding:
  - a) All significant events that might materially influence the stock exchange prices of securities issued by the Company.
  - b) All changes in the Company's ownership structure, such as fluctuations in significant direct or indirect interests, voting trusts and other forms of coalition of which the Board has had notice.
  - c) All substantial amendments to the Company's governance rules and regulations.
  - d) The policies, if any, in the area of treasury stock that the Company intends to pursue on the basis of any approvals granted by the shareholders at the General Shareholders' Meeting.
  - e) All changes to the composition and to the rules of organization and operation of the Board and the Committees thereof, or to the duties and positions of each Director in the Company, as well as any other modification relevant to the corporate governance system.
2. The Board of Directors shall adopt appropriate measures to ensure that the semi-annual, quarterly and any other financial information that it may be prudent to make available to the Securities Markets is prepared in accordance with the same principles, standards and professional practices used to prepare the annual financial statements and is as reliable as such financial statements. For this latter purpose, such information shall be reviewed by the Audit and Compliance Committee.
3. The Board of Directors shall prevent its conduct from influencing the free formation of the price of the Company shares and, if applicable, of the shares of the companies forming part of the Iberdrola Group as well as, specifically, of the Iberdrola Renovables Group.

**Article 53.- Relationships with the External Auditor.**

1. The Board of Directors shall establish an objective, professional and ongoing relationship with the Company's External Auditor, and shall have the utmost respect for its independence.
2. The relationship referred to in the foregoing paragraph shall be channeled, as a rule, through the Audit and Compliance Committee provided for in these Regulations.
3. The Audit and Compliance Committee shall not submit a proposal to the Board of Directors, and the Board of Directors shall not submit a proposal to the shareholders at the General Shareholders' Meeting, for appointment as the Company's Auditor of an audit firm when it has evidence that (i) such firm is affected by any circumstance of incompatibility pursuant to the legal provisions governing audits, or (ii) the fees that the Company intends to pay it for any and all services are greater than five (5%) percent of its total income in the domestic field during the last fiscal year.
4. The Board of Directors shall make public the fees that the Company has paid the audit firm, both in consideration for audit services and for services other than auditing, by specifying the fees paid to the Auditors and those paid to any company forming part of the same group of companies to which the Auditor belongs or to any other company to which the Auditor is related under a relationship of joint ownership, management or control.
5. The Board of Directors shall use its best efforts to definitively prepare the financial statements such that there is no room for reservations or qualifications by the Auditor. However, when the Board believes that its opinion must prevail, it shall provide a public explanation of the content and scope of the discrepancy.

**Article 54.- Relationships with Senior Managers of the Company.**

Relations between the Board of Directors and the Company's senior managers, as provided in these Regulations, must be channeled through the Chief Executive Officer or, in the absence thereof, through the Chairman of the Board of Directors or the Secretary of the Board.

**TITLE X. INTERPRETATION**

**Article 55.- Interpretation of these Regulations.**

1. These Regulations shall be interpreted in accordance with the priority of provisions and the principles and standards contained in the most widely recognized Good Governance recommendations, especially the recommendations set forth in the Uniform Good Governance Code prepared at the behest of regulatory entities, without prejudice to the adaptation thereof to the specific characteristics of the Company and its environment under the principle "comply or explain."
2. The full Board of Iberdrola shall resolve any questions or discrepancies that may arise in connection with the application or the interpretation of these Regulations, following a

report of the Audit and Compliance Committee and an opinion issued by Counsel to the Board of Directors.

## **PREAMBLE**

On November 5, 2007, in compliance with the provisions of Section 78 of Law 24/1988, of July 28, on the Securities Market [*Ley del Mercado de Valores*] (hereinafter, the "LMV") and related provisions, the Board of Directors of Iberdrola Renovables, S.A. (hereinafter, "Iberdrola Renovables" or the "Company") approved these Internal Regulations for Conduct in the Securities Markets, to come into force on the day the shares of the Company are admitted for trading on the Spanish Stock Exchanges (hereinafter, the "Regulations").

These Regulations are issued for application thereof to Iberdrola Renovables and the companies that are part of the Iberdrola Renovables Group, as such term is defined below, in order to protect investors by promoting transparency rules aimed at avoiding wrongdoing, yet encouraging and facilitating shareholding by its directors and employees in strict compliance with applicable law.

In compliance with the provisions of Additional Provision Four of Law 44/2002, of November 22, on Measures to Reform the Financial System [*Medidas de Reforma del Sistema Financiero*], attached as Annex I to these Regulations is the text of the written commitment assumed by Iberdrola Renovables to ensure that these Regulations are updated, as well as to carry out the action necessary to ensure the knowledge, understanding and acceptance of the content thereof by Affected Persons, as they are defined in Article 1 hereof.

## **PRELIMINARY TITLE. DEFINITIONS**

### **Article 1. Definitions**

For purposes of these Regulations, the following terms shall have the meaning set forth below:

1. **Senior Managers:** All those managers who report directly to the Board of Directors or to the Chief Executive Officer of the Company, if any, and in every case, the Director of the Internal Audit Area.
2. **Confidential Documents:** Documents, whatever the format thereof, that contain Non-Public Information.
3. **Iberdrola Group:** Means Iberdrola and all subsidiaries and affiliated entities which are, with respect to the Company, in the situation contemplated in Section 4 of the LMV.  
Iberdrola Renovables forms a part of the Iberdrola Group.
4. **Iberdrola Renovables Group:** Means Iberdrola Renovables, as the controlling company, and all subsidiaries and affiliated entities which are, with respect to Iberdrola Renovables, in the situation contemplated in Section 4 of the LMV.
5. **Iberdrola Renovables / the Company:** Means Iberdrola Renovables, S.A., a company domiciled in Madrid, at Tomás Redondo, 1, with Tax ID Code A-83028035.
6. **Non-Public Information:** All information of a specific nature directly or indirectly referring to Affected Securities issued by Companies belonging to the Iberdrola Renovables Group (or if applicable, to derivative financial instruments related thereto), or to the Company or to any of the companies of the Iberdrola Renovables Group, that has not been made public and that, if it is made or has been made public, could appreciably influence or could have

appreciably influenced the price of Affected Securities on a market or organized trading system.

The information shall be deemed to be of a specific nature if it indicates a series of circumstances which occur, or may reasonably be expected to occur, or an event that has taken place, or may reasonably be expected to take place, when such information is specific enough to allow for inferring the possible effect that such series of circumstances or events can have on the prices of Affected Securities or, as applicable, of the derivative financial instruments related thereto.

In addition, it shall be deemed that information can appreciably influence prices when such information is the kind of information that could be used by a reasonable investor as part of the basis for its investment decisions.

In connection with financial instruments on commodities, Non-Public Information shall be deemed to be all information of a specific nature, which has not been made public and directly or indirectly refers to one or more of such derivative financial instruments, which the users in the markets where such products are traded would expect to receive in accordance with market practices accepted in such markets.

In any event, it shall be deemed that users in the markets mentioned in the preceding paragraph would expect to receive information directly or indirectly related to one or more derivative financial instruments when the information (i) is regularly made available to the users in such markets or (ii) is mandatorily required to be disclosed by legal or regulatory provisions, market rules, contracts or customs of the underlying commodities market or the market for derivative instruments on commodities in question.

The provisions contained in this definition shall apply to negotiable securities or financial instruments in respect of which an application for trading has been filed with a market or organized trading system.

7. **Significant Information:** All information relating to facts, decisions, agreements or contracts the knowledge of which may reasonably affect an investor's decision to acquire or transfer Affected Securities and therefore may have a material influence on the listing price thereof on organized secondary markets, and which must be made public pursuant to securities market regulations.
8. **Insiders:** Persons who are included in a Registry of Insiders under the provisions of Article 3 below.
9. **Affected Persons:** Persons to whom the Regulations apply and who are specified in the paragraph 1 of Article 2 below.
10. **Persons Subject to Conflict of Interest Rules:** Persons to whom Article 11 applies and who are specified in paragraph 1 of such Article.
11. **Registries of Insiders:** Registries governed by the provisions of Article 3 below.
12. **Registry of Affected Persons:** Registry governed by the provisions of paragraph 2 of Article 2 below.

13. Regulations: The Internal Regulations for Conduct in the Securities Markets of Iberdrola Renovables, approved by the Board of Directors of the Company on November 5, 2007, in its wording in force at any time.
14. Unit: Means the Regulatory Compliance Unit, which is the internal body of the Company entrusted with the duty, among others, of ensuring compliance with the Regulations. The composition and duties thereof are set forth in Article 13 below.
15. Affected Securities: (i) negotiable securities issued by the Company and/or entities within the Iberdrola Renovables Group which have been admitted to trading on an organized secondary market; (ii) financial instruments and contracts granting the right to acquire such securities; (iii) financial instruments and contracts whose underlying assets consist of the above-mentioned securities, instruments or contracts; and (iv) securities, instruments and contracts of entities other than the Company and entities within the Iberdrola Renovables Group when expressly determined by the Unit, in order to best comply with these Regulations.

## **TITLE I. SUBJECTIVE SCOPE OF APPLICATION AND INCLUSION IN THE REGISTRY OF INSIDERS**

### **Article 2. Subjective Scope of Application**

1. These Regulations shall apply to the following persons:
  - a) The members of the Board of Directors of the Company, including the Secretary and the Vice-Secretary, if any, of the Board, and the Senior Managers of the Company.
  - b) Those persons who, pursuant to applicable regulations, are designated by the Unit owing to their habitual and recurring access to information that may be deemed Non-Public Information for purposes of the provisions of these Regulations.
2. Affected Persons shall be included in the corresponding Registry of Affected Persons, which the Unit shall be responsible for preparing and updating. Such Registry shall include the following information: (i) identity of the Affected Persons; (ii) reason why such persons have been included in the Registry of Affected Persons, and (iii) dates of creation and update of such Registry.

The Registry of Affected Persons shall be updated immediately in the following cases: (i) when there is a change in the reasons why a person is included in the Registry; (ii) when it is necessary to add a new person to the Registry, and (iii) when a person included in the Registry ceases to have access to Non-Public Information, in which case, the date on which such circumstance occurs shall be noted.

The data contained in the Registry of Affected Persons shall be kept for at least five (5) years following the inclusion or last update thereof.
3. The Unit shall inform Affected Persons of their inclusion in the Registry of Affected Persons and of the other circumstances provided for in Organic Law 15/1999, of December 13, on the Protection of Personal Data. In addition, the Unit shall inform Affected Persons of the fact that they are subject to the Regulations, of the non-public nature of the

information, of their duty of confidentiality with respect to such information, of the prohibition against using it, and of the violations and penalties that, if applicable, may arise from the improper use of Non-Public Information. The Unit shall also provide Affected Persons with a copy of these Regulations.

No later than fifteen (15) days after receiving a copy of these Regulations, Affected Persons must deliver to the Unit a duly signed consent statement, which is attached as Annex II hereto, wherein they shall also indicate the number and identity of Affected Securities held by them, pursuant to the provisions of Article 4 of these Regulations.

4. The Unit shall maintain a copy of the Registry of Affected Persons in electronic format, which shall be made available to the supervisory authorities.

### **Article 3. Inclusion in the Registry of Insiders**

1. The Division or Area that specifically assumes the responsibility of leading a transaction in which Non-Public Information may be generated for purposes of these Regulations shall designate a person responsible for creating and keeping up-to-date a Registry of Insiders, which shall contain the following information: (i) the identity of all persons who have specific or habitual access to such information; (ii) the reason why such persons have been included in the Registry of Insiders, and (iii) the dates of creation and update of such Registry. The person responsible for any Registry of Insiders shall provide the Unit with a copy thereof.

Registries of Insiders shall be updated in the same cases as the Registry of Affected Persons. In addition, the data contained in a Registry of Insiders shall be kept for the same amount of time as those included in the Registry of Affected Persons, provided, however, that any Registry of Insiders may cease to be such at the time that the Non-Public Information that gave rise to its creation is disclosed to the market.

2. The person responsible for a Registry of Insiders shall inform the persons who are included in any Registry of Insiders of the circumstances mentioned in paragraph 3 of Article 2 above. In addition, the person responsible for a Registry of Insiders shall inform the persons who are included therein of their obligation to inform him/her of the identity of any other persons to whom Non-Public Information is provided in the ordinary course of their work, profession or position, in order for such persons to be included in the Registry of Insiders.
3. The Unit shall maintain a copy of the Registry of Insiders in electronic format, which shall be made available to the supervisory authorities.
4. A Registry of Insiders need not be prepared with respect to those transactions or processes of a recurring nature (such as the preparation of the annual financial statements and regulated financial information) that only involve Affected Persons that are included in the Registry referred to in the preceding article.

## **TITLE II. TRANSACTIONS IN AFFECTED SECURITIES**

### **Article 4. Meaning of Transactions in Affected Securities**

1. Transactions in Affected Securities shall be deemed to include those transactions which are carried out by Affected Persons regarding Affected Securities.

For purposes of the preceding paragraph, transactions shall mean any contracts whereby Affected Securities are acquired or transferred on the spot or on a forward or futures basis or whereby rights to acquire or transfer (including call and put options) such Securities are created, whether on a provisional or final basis, under limited or full ownership terms.

2. For purposes of the provisions of Article 6 of these Regulations, Transactions in Affected Securities shall be deemed to have been effected by Affected Persons not only when they are carried out by such persons directly but also when carried out by any of the following persons: (i) the spouses of Affected Persons or any other person with whom such persons have a relationship analogous to marriage pursuant to national legislation; (ii) their dependent children; (iii) relatives who have been living with them or have been in their care for at least one year before the date when the Transaction is conducted; (iv) any legal entity or trust which is directly or indirectly controlled by Affected Persons; or which has been created for their benefit; or whose financial interests are to a large extent equivalent to those of Affected Persons; or (v) nominees, which is understood to mean persons who carry out transactions in Affected Securities in their own name and on behalf of Affected Persons. Such capacity shall be presumed in the case of those persons whom the Affected Person provides total or partial coverage against the risks inherent in the transactions carried out.

3. For purposes of these Regulations, the signing of a portfolio management contract is a transaction in Affected Securities. Therefore, the following rules shall apply to contracts signed by the Affected Person or by any of the persons mentioned in the preceding paragraph:

- a) Information to the manager: The manager shall be informed that the person is subject to these Regulations and of the contents thereof.
- b) Contracts: Discretionary portfolio management contracts shall contain clauses providing for any of the following conditions: (i) the express prohibition against the manager carrying out investment transactions in the Affected Securities that are prohibited by these Regulations, and (ii) an absolute and irrevocable warranty to the effect that the transactions will be carried out without the Affected Persons' participation, and therefore, exclusively using the portfolio manager's professional judgment and in accordance with the criteria generally applied to customers with similar financial and investment profiles.
- c) Authorization: Persons wishing to formalize a discretionary portfolio management contract must request prior authorization from the Unit, which shall verify that they comply with the provisions of the preceding paragraph or, as the case may be, the application of the specific regulations. A denial shall be duly substantiated.
- d) Prior contracts: Contracts formalized prior to the effectiveness of the Regulations shall be adapted to the provisions set forth herein. Until such adaptation is carried out, Affected Persons shall direct the manager not to carry out any transaction in the Affected Securities.

#### **Article 5. Limitations on Transactions in Affected Securities**

1. Affected Persons may not conduct Transactions in Affected Securities:

- a) When they have Non-Public Information concerning the Affected Securities or the issuer of such Affected Securities pursuant to the provisions of Article 7 of these Regulations.
  - b) When expressly determined by the Unit in order to best comply with these Regulations.
2. When Affected Persons have any questions regarding Transactions in Affected Securities, they shall submit them to the Secretary of the Board of Directors, who may forward them to the Unit. Affected Persons shall refrain from taking any action until they have received an answer to their inquiry from the Secretary of the Board of Directors.
  3. Transactions in Affected Securities shall be suspended for the seven (7) days preceding each presentation of profits or losses, which date shall be previously communicated by the Unit to the Affected Persons. The Unit may provide that the aforementioned period be greater and also apply the rules on suspension of Transactions in Affected Securities to other cases in which, because of their nature, such suspension is advisable, of which it shall notify the Affected Persons and inform the Audit and Compliance Committee at the next meeting held by it.
  4. The Unit may resolve that the conduct of any Transactions in Affected Securities or of Transactions in Affected Securities whose amount exceeds a certain threshold be submitted for prior authorization, of which it shall notify the Affected Persons.
  5. Affected Persons may not sell the Affected Securities acquired by them until the passage of 15 calendar days from the acquisition thereof without the prior, express and written authorization of the Unit.

#### **Article 6. Notification of Transactions in Affected Securities**

1. Within five (5) business days of carrying out any Transactions in Affected Securities, Affected Persons shall deliver to the Unit a report indicating the date, the holder, the type, the volume, the price of the transaction, the number and identity of the Affected Securities, the market on which the transaction has been carried out, the name of the Affected Person or, where applicable, the name of any of the persons mentioned in the paragraph 2 of Article 4 above, as well as the broker through which the transaction was effected.
2. Affected Persons shall report to the Secretary of the Board of Directors any portfolio management contracts executed by them within five (5) business days of the date of execution, and shall provide the above-mentioned body, on a semi-annual basis, with a copy of the information sent to them by the portfolio manager in relation to the Affected Securities, including the date, number, price and type of transactions conducted.
3. The provisions of the foregoing paragraphs shall be deemed to be without prejudice to the obligations binding upon Directors and managers to report [information] to the National Securities Market Commission [*Comisión Nacional del Mercado de Valores*] (hereinafter, the "CNMV") and/or to the Stock Exchanges. For purposes of the provisions of this article, manager shall mean any senior-level officer who has habitual access to Non-Public Information that is directly or indirectly related to the issuer and who, in addition, has the

power to adopt management decisions affecting the future development and the business prospects of the issuer.

The Unit shall inform each of the persons to whom this paragraph applies of the obligation to comply with it.

### **TITLE III. TREATMENT OF NON-PUBLIC INFORMATION AND OF SIGNIFICANT INFORMATION**

#### **Article 7. Non-Public Information**

1. The heads of the various Divisions and/or persons in charge of financial or legal transactions under study or negotiation who receive or generate information that may qualify as Non-Public Information must report any such circumstance to the Unit on a case-by-case basis as soon as any such circumstance occurs, by a means which adequately ensures the confidentiality of such information. The Unit may or may not determine the information to be Non-Public Information.
2. All Affected Persons, as well as Insiders, are required to be aware of and comply with the regulations and internal procedures established regarding the confidentiality of Non-Public Information. In addition, Affected Persons and Insiders shall at all times ensure that the Non-Public Information to which they have had access by reason of their duties is adequately safeguarded.
3. With respect to Non-Public Information, it shall be required to:
  - a) Limit knowledge thereof strictly to persons inside or outside the Iberdrola Renovables Group on a need-to-know basis only.
  - b) Keep a Registry of Insiders for each transaction, in accordance with the provisions of Article 3 of these Regulations.
  - c) Establish security measures for the custody, filing, reproduction and distribution of, and access to, the Non-Public Information.
  - d) Monitor the changes in the market for the Affected Securities and the news reported by professional broadcasters of financial information and media regarding the Affected Securities.
  - e) Immediately report to the Unit on the status of a transaction that is currently under way, or provide a preview thereof, in case of unusual changes in trading volumes or prices of the Affected Securities and reasonable signs exist that such changes are the result of the early, partial or distorted disclosure of the transaction.
  - f) Subject transactions in the company's stock or financial instruments based thereon to measures aimed at preventing investment or divestment decisions from being affected by the knowledge of Non-Public Information.
4. All persons in possession of Non-Public Information are required to refrain from engaging, whether for themselves or on behalf of others, directly or indirectly, in the following conduct:

- a) Preparing or carrying out any kind of transaction regarding the Affected Securities to which any such Non-Public Information may refer. This excludes preparing and carrying out transactions whose existence itself constitutes the Non-Public Information, as well as transactions effected pursuant to a past-due obligation to acquire or transfer negotiable securities or financial instruments when such an obligation is contemplated in an agreement entered into before the person in question has come into possession of the Non-Public Information, or other transactions effected pursuant to applicable regulations.
- b) Disclosing such information to third parties, other than in the ordinary course of work, business or duty, provided that those to whom the disclosure is made in the ordinary course of their work, business or duty are legally or contractually subject to a duty of confidentiality.
- c) Recommending a third party to acquire or transfer the Affected Securities or to have someone acquire or transfer the Affected Securities based on such information.

For purposes of the provisions of this paragraph 4, it shall be deemed that persons acting in the ordinary course of their work are those persons that communicate information:

- (i) To the managers and employees of the Company in appropriate furtherance of their tasks and responsibilities;
- (ii) To the administrative and management decision-making bodies of Iberdrola, S.A., as the parent company of Iberdrola Renovables, to the extent that the information is supplied for the purpose of:
  - a) Facilitating compliance with its legal obligations, such as: (i) the preparation of its financial statements, both individual and consolidated; (ii) compliance with its obligations to provide periodic information to the CNMV and other competent authorities, and (iii) the performance of analyses and monitoring of tax issues, for purposes of tax consolidation.
  - b) Designing the policy of the Iberdrola Group and the exercise of its unitary management; and
  - c) Meeting any other purposes that are appropriate to the corporate interest of Iberdrola Renovables and of Iberdrola, S.A., such as, among other things, obtaining and renewing credit ratings.
- (iii) To the external advisors of the Company (auditors, attorneys, investment banks, etc.) for due compliance with the mandate that they have been given.

#### **Article 8. Confidential Documents**

1. Affected Persons and Insiders in possession of Confidential Documents shall act diligently in the use and handling thereof and shall be responsible for their custody and preservation and for keeping them confidential.
2. Specifically, and without prejudice to any additional measures that may be established by the Unit, Confidential Documents shall be subject to the following rules regarding the use, handling and processing thereof:

- a) The persons in charge of the custody thereof shall be indicated. Such persons shall be those entrusted with coordination of the work to which the Non-Public Information refers.

In the case of electronic formats, adequate security mechanisms shall be established to limit access only to the persons in charge.

- b) They shall be marked "confidential," with an indication that the use thereof is restricted. In the case of electronic formats, the confidential nature shall be indicated before the information can be accessed.
  - c) They shall be kept in places set aside for such purposes, and designated rooms, cabinets, or electronic formats shall be determined for filing purposes and fitted or equipped with special protective measures.
  - d) The reproduction of Confidential Documents shall require the authorization of the Director of the Area in charge of maintaining custody thereof. Recipients of reproductions or copies shall be advised of the prohibition against obtaining second copies and using the information for purposes other than those for which it was disclosed.
  - e) The distribution of Confidential Documents shall preferably be by means of hand delivery when they are in hard-copy format. If this is not possible, protective measures shall be maximized, and the persons in charge of keeping custody of the Confidential Documents shall be responsible for any such distribution. If the distribution is in electronic format, exclusive access by the recipient of the Confidential Documents shall be ensured.
  - f) The disposal of Confidential Documents shall be handled in such a way as to ensure the complete destruction thereof.
3. Divisions that handle Non-Public Information and any others determined by the Unit shall not allow access to their records, files and computer systems to any person who is not a member thereof, unless authorized by the Director in the customary decision-making processes previously established by Company Management.

#### **Article 9. Significant Information**

1. All Significant Information shall be immediately reported to the CNMV as soon as the fact becomes known, the decision has been adopted or the agreement or contract has been signed, prior to the disclosure thereof by any other means. In addition, any significant change that has occurred in the Significant Information reported shall be disclosed to the market immediately by the same means. The content of the report shall be truthful, clear, complete and, when so required by the nature of the information, quantified so as not to lead to confusion or deception. Once reported to the CNMV, the Significant Information shall be disclosed on the Company's website.
2. Significant Information shall be reported to the CNMV by the Secretary of the Board of Directors or, in the absence thereof, by the Vice-Secretary of the Board or such person as is designated by any of the former. Notice shall be given to the Unit within the deadlines and in accordance with the formalities established in applicable regulations.
3. This duty of information shall not apply, provided that due confidentiality safeguards are maintained, to acts of analysis, preparation or negotiation prior to the adoption of decisions

regarded as significant. In particular: (i) ongoing negotiations, or circumstances related thereto, when the outcome or normal progress of such negotiations may be affected by the public dissemination of the information, as well as (ii) the decisions adopted or the agreements entered into by the Company's management decision-making body which require the approval of another body of the Company or of the Iberdrola Group to become effective, whenever the public dissemination of the information prior to such approval may jeopardize the correct assessment of the information by the market.

Notwithstanding the foregoing, the Company shall immediately disseminate the information if it cannot guarantee the confidentiality thereof.

4. The Company shall not combine, in a manner that may be deceptive, the disclosure of Significant Information to the market with the commercialization of its activities.
5. Meetings of a general nature with analysts, investors or the media shall be planned in advance so as to ensure that persons participating in any such meetings do not disclose Significant Information that has not been previously disclosed to the market as indicated in this article.

#### **Article 10. Manipulation of Market Prices**

1. Affected Persons and Insiders shall refrain from preparing or engaging in any type of practice that distorts the free formation of prices on securities markets.
2. Such transactions or orders include:
  - a) Transactions or orders that provide or may provide false or misleading signs regarding the supply, demand, or price of negotiable securities or financial instruments.
  - b) Transactions or orders that assure, through the concerted action of one or more persons, the price of one or more financial instruments at abnormal or artificial levels, unless the person who has engaged in the transactions or issued the orders can show legitimate reasons which are consistent with accepted market practices in the regulated market in question.
  - c) Transactions or orders that use fictitious devices or any other form of deception or scheming.
  - d) Transactions or orders that involve the disclosure of information through the media, including the Internet, or through any other medium, providing or which may provide false or misleading signs concerning financial instruments, including the spreading of rumors and false or misleading news, when the person disclosing them knows or should have known that the information was false or misleading.
3. The following acts shall also be deemed to amount to practices that distort the free formation of prices:
  - a) The acts of a person or of several persons acting in concert directed at ensuring for themselves a dominant position on the supply of or demand for a security financial instrument, resulting in the direct or indirect establishment of purchase or sale prices or other non-equitable trading conditions.

- b) The sale or purchase of a security or financial instrument at the close of the market with the effect of misleading investors who act on the basis of closing prices.
- c) Taking advantage of the occasional or periodic access to traditional or electronic media by expressing an opinion regarding a security or financial instrument or, indirectly, the issuer thereof, after having taken positions on such security or financial instrument and having thus benefited from the repercussions of the opinion expressed on the price of such security or financial instrument, without having simultaneously disclosed such conflict of interest to the public opinion in an adequate and effective fashion.

#### **TITLE IV. CONFLICTS OF INTEREST**

##### **Article 11. Conflicts of Interest**

1. The provisions of this article shall apply to Persons Subject to Conflict of Interest Rules, which term includes both Directors of the Company and Senior Managers and those persons designated by the Unit in view of the possibility that they be subject to potential conflicts of interest by reason of the position they hold at the Company or in its Group. The Unit shall inform such persons of their status as Persons Subject to Conflict of Interest Rules.
2. A conflict of interest shall be deemed to be any situation in which the interests of the Company or of the companies forming part of the Iberdrola Renovables Group directly or indirectly clash with the personal interest of the Person Subject to Conflict of Interest Rules. A personal interest of the Person Subject to Conflict of Interest Rules shall be deemed to exist when the matter affects such person or another person related thereto.
3. Directors of the Company shall be governed in this field by the provisions of the Regulations of the Board of Directors and the rules that the Board of Directors may have made by way of implementation of such Regulations of the Board of Directors.
4. Persons Subject to Conflict of Interest Rules other than the Directors of the Company shall comply with the following general operating principles:
  - a) Independence: Persons Subject to Conflict of Interest Rules must at all times act with independent judgment, with loyalty towards the Company and its shareholders and regardless of their own or third parties' interests. Accordingly, they must refrain from giving priority to their own interests at the expense of those of the Company.
  - b) Abstention: Persons Subject to Conflict of Interest Rules must refrain from participating in or influencing the making of decisions that may affect the persons or entities with which a conflict exists and from accessing confidential information affecting such conflict.
  - c) Communication: Persons Subject to Conflict of Interest Rules must notify the Secretary of the Board of Directors of the Company of the conflicts of interest to which they are subject.

The provisions of this article may be further elaborated upon by corresponding rules approved by the Board of Directors of the Company.

#### **Article 12. Transactions with Persons Subject to Conflict of Interest Rules**

Transactions between the Company or the companies of the Iberdrola Renovables Group and any of the Persons Subject to Conflict of Interest Rules shall be carried out under arm's length conditions and in compliance with such other rules as may be made by the Board of Directors of the Company by way of elaboration upon the provisions of this article.

#### **TITLE V. TREASURY STOCK TRANSACTIONS**

#### **Article 13. Treasury Transactions Regarding Shares of the Company**

1. For purposes of these Regulations, treasury transactions shall be deemed to be those transactions carried out by the Company or companies making up the Iberdrola Renovables Group, either directly or indirectly, covering shares of the Company, as well as financial instruments or contracts of any kind that give the right to the acquisition of, or the underlying assets of which are, shares of the Company, provided that such financial instruments or contracts are listed on a Stock Exchange or other organized market.
2. Treasury transactions shall be directed toward providing investors sufficient liquidity and depth in the trading of shares of the Company, implementing programs for the purchase of the Company's shares approved by the Board of Directors or by resolutions of the shareholders acting at a General Shareholders' Meeting, or to comply with legitimate previously-agreed commitments. In no event may treasury stock transactions be used to intervene in the free formation of prices. In particular, any conduct referred to in Sections 83.ter.1 of the LMV and 2 of Royal Decree 1333/2005 and Article 10 of these Regulations shall be avoided.
3. Transactions by the Iberdrola Renovables Group in treasury stock shall in no event be carried out on the basis of non-public information, understood as such by reference to Sections 81 of the LMV and 1 of Royal Decree 1333/2005 and Article 1 of these Regulations.
4. The management of treasury stock shall be implemented with complete transparency in relations with the supervisors and governing entities of the markets.
5. The Internal Audit Area shall be systematically informed of the treasury stock transactions carried out by the Economic and Financial Division within the risk limit approved by the Executive Committee and in accordance with the planning of the Board of Directors.
6. The Economic and Financial Division, as the division responsible for performing treasury stock transactions, shall perform the following functions:
  - a) Manage treasury stock in accordance with the provisions of this article.
  - b) Monitor developments in the markets for the Company's stock, informing the Regulatory Compliance Unit of any significant change in the listing price thereof.
  - c) Maintain a file of all treasury stock transactions that have been ordered and carried out.

- d) Periodically report to the Regulatory Compliance Unit regarding treasury stock transactions that have been carried out, which Unit shall inform the CNMV, if applicable.
7. The personnel of the Economic and Financial Division shall make a special commitment to maintain confidentiality with respect to treasury stock transactions.
8. The Internal Audit Area shall perform its duties regarding compliance with this article and shall periodically report to the Audit and Compliance Committee regarding treasury stock transactions.
9. In treasury stock transactions, the Iberdrola Renovables Group shall observe whatsoever obligations and requirements that may arise from laws and regulations that are applicable thereto at any time, in addition to the provisions of this article.

## **TITLE VI. REGULATORY COMPLIANCE UNIT**

### **Article 14. Regulatory Compliance Unit**

1. The Unit, a collective body reporting to the Secretary of the Board of Directors, shall consist of the following members: the Director of Regulatory Compliance, who shall be the Director of the Unit and shall be appointed by the Secretary of the Board of Directors of the Company, to whom he shall report, and at least one representative of each of the following Divisions or Departments of the Company: (i) the Investments Unit; (ii) the Economic and Financial Division; (iii) the Corporate Resources Division; and (iv) the Monitoring Division, or such bodies of the Company as may in future assume the duties of such Divisions or Departments. The appointment or removal of the Director of the Unit shall be reported to the Audit and Compliance Committee. In addition, a Secretary of the Unit shall be appointed, who need not be any of the persons mentioned in this paragraph, whose duties shall include, among others, preparing the minutes of the meetings of the Unit.
2. The Director of the Unit may call other managers of the Company to attend the meetings of the Unit or seek their opinion at any time.
3. The Unit shall ensure that these Regulations are observed, and its functions shall include:
  - a) Promoting the awareness by Affected Persons and by the Iberdrola Renovables Group of these Regulations and other rules governing conduct with respect to the Securities Markets.
  - b) Answering any questions or queries that may arise in connection with the content, interpretation, application or fulfillment of these Regulations that may be raised by the Office of the Secretary of the Board of Directors, without prejudice to the possibility of submitting any questions to the Board of Directors.
  - c) Determining the persons who are to be considered Affected Persons for purposes of these Regulations pursuant to the provisions of Article 2.
  - d) Preparing and updating the Registry of Affected Persons as provided in Article 2 above.

- e) Informing the Affected Persons of their inclusion in the Registry of Affected Persons and of the other circumstances referred to in paragraph 3 of Article 2 above.
  - f) Keeping a copy of the Registry of Affected Persons and of the Registries of Insiders in electronic format available to the supervising authorities, as provided in Articles 2 and 3 above.
  - g) Determining the securities, instruments and contracts which are to be considered Affected Securities for purposes of these Regulations pursuant to the provisions of paragraph 14 of Article 1.
  - h) Determining the Transactions in Affected Securities deemed to be prohibited pursuant to the provisions of letter b) of paragraph 1 of Article 5.
  - i) Determining the information to be considered as Non-Public Information for purposes of these Regulations pursuant to the provisions of Article 7.
  - j) Establishing and modifying criteria, definitions and procedures in connection with the duties and obligations prescribed in these Regulations when deemed necessary for a correct interpretation and implementation hereof.
  - k) Determining the restricted-access records, files and electronic systems for the purpose of using, processing and handling Non-Public Information pursuant to the provisions of letter c) of paragraph 2 of Article 8.
  - l) Identifying those persons, other than Directors of the Company and Senior Managers, who must be included in the concept of Persons Subject to Conflict of Interest Rules pursuant to paragraph 1 of Article 11 above.
  - m) Filing and safeguarding all communications sent thereto in compliance with these Regulations.
  - n) Developing the procedures and rules deemed appropriate for the application of these Regulations.
  - o) Other functions of a one-time or continuous nature that the Board of Directors of the Company may assign thereto.
4. The Unit may ask any Division of Iberdrola for such data and information as it deems necessary for the performance of its duties.
  5. The Unit shall inform the Audit and Compliance Committee of the measures taken to promote knowledge of and ensure compliance with these Regulations and the applicable rules and regulations concerning the Securities Market at least on a quarterly basis, and whenever it may see fit or be required to do so.
  6. In addition, the Unit shall notify the Office of the Secretary of the Board of Directors of the conclusions and resolutions adopted by it in the performance of its duties.
  7. The Unit may include in the Company's Intranet a website to which all Affected Persons and the persons included in a Registry of Insiders will have access and which shall contain at least the following documents:
    - a) The Regulations.
    - b) The rules implementing the Regulations.

- c) A description of the interpretations of aspects of the Regulations that have given rise to questions.
- d) The forms required to seek authorizations or make any mandatory communications.

## TITLE VII. BREACH OF THE REGULATIONS

### Article 15. Breach

Failure to comply with the provisions of these Regulations shall have the consequences provided for by applicable legislation.

**ANNEX I**

**INTERNAL REGULATIONS FOR CONDUCT IN THE SECURITIES MARKETS OF  
IBERDROLA RENOVABLES, S.A.**

**Commitment to update the Regulations**

**To the National Securities Market Commission**

Madrid, ..... , 2007

**RE: Commitment to update the Internal Regulations for Conduct in the Securities  
Markets of Iberdrola Renovables, S.A.**

Dear Sirs:

In accordance with the Fourth Additional Provision of Law 44/2002, of November 22, on Measures to Reform the Financial System, we hereby inform you that the Board of Directors of Iberdrola Renovables, S.A., at a meeting held on ..... , 2007, has assumed the commitment to guarantee the updating of the Internal Regulations for Conduct in the Securities Markets of this Company, as well as to perform the acts needed to achieve the knowledge, comprehension and acceptance of the content thereof by Affected Persons, as such persons are defined in Article 1 of the aforementioned Regulations.

Sincerely,

Signed: .....

**ANNEX II**

**INTERNAL REGULATIONS FOR CONDUCT IN THE SECURITIES MARKETS OF  
IBERDROLA RENOVABLES, S.A.**

**Consent Statement**

To the Regulatory Compliance Unit

The undersigned, ....., hereby declares that he/she has received a copy of the Internal Regulations for Conduct in the Securities Markets of Iberdrola Renovables, S.A. (hereinafter, the "Regulations") and expressly states that he/she is in agreement with the rules contained therein.

Moreover, the undersigned declares that he/she directly or indirectly holds the following Affected Securities (as such term is defined in the Regulations):

Type of Security	Issuer	Direct Securities	Indirect Securities (*)

(\*) Through:

Direct holder of the Security	Number

In addition, the undersigned declares that he/she has been informed:

- (i) That the improper use of the non-public information to which he/she may have access might amount to a very serious infringement provided for in Section 99 o) of Law 24/1998, of July 28, on the Securities Markets (hereinafter, the "LMV"), a serious infringement contemplated in Section 100 x) of such Law, or the crime of abuse of non-public information in the stock exchange market contemplated in Section 285 of Organic Law 10/1995, of November 23, approving the Criminal Code.
- (ii) That the improper use of non-public information may be punished in the manner provided by Sections 102 and 103 of the LMV and by Section 285 of Organic Law 10/1995, of November 23, approving the Criminal Code, with fines, public reprimands, removal from office and imprisonment.

Finally, pursuant to the provisions of Organic Law 15/1999, of December 13, on the Protection of Personal Data, the undersigned has been informed that his/her data of a personal nature contained in this statement and on occasion of the notifications made in compliance with the

Regulations shall be included in a computer file of \_\_\_\_\_, who is responsible for such file, domiciled at \_\_\_\_\_, in order to comply with the provisions of the Regulations.

In addition, the undersigned declares that he/she has been informed that he/she may exercise the rights of access, rectification, deletion or opposition, based on the provisions of applicable law in connection therewith, by contacting in writing the person responsible for the file.

As regards the information, if any, that has been provided with respect to other natural persons, it is hereby stated that they have been previously informed that such information will be subject to processing by \_\_\_\_\_, and of their corresponding rights, upon the terms set forth above.

In \_\_\_\_\_, on this \_\_\_\_\_ day of \_\_\_\_\_, 2.....

Signed: .....

**IBERDROLA RENOVABLES, S.A. (Unipersonal)**  
**2007 EMPLOYEE EQUITY PURCHASE PLAN**

The Board of Directors (the "Board") of Iberdrola Renovables, S.A.U., a corporation organized under the laws of Spain (the "Company"), hereby adopts, effective as of November 20, 2007, the Iberdrola Renovables, S.A. (Unipersonal) 2007 Employee Equity Purchase Plan (the "Plan") in order to further the growth, development and financial success of the Company by allowing certain key employees of the Company and its subsidiaries who reside in the United States to purchase shares of the Company's ordinary shares (the "Shares"), and thereby motivate such persons by means of growth-related compensation incentives to achieve the Company's long range goals and better align the interests of such persons with those of the Company and its shareholders.

1. Subject to adjustment as set forth in Section 10, the aggregate number of Shares that may be awarded under the Plan shall not exceed the quotient resulting from dividing 2,040,000 € (i.e., 2,998,804 \$ at the euro dollar rate of November 16, 2007) by the Retail Offer Price.

2. The Board or a committee or subcommittee of the Board or (to the extent consistent with applicable law) a committee or subcommittee of officers or other employees of the Company appointed by the Board to administer the Plan (the "Administrator") shall administer the Plan and have full discretion to interpret the Plan.

3. The Administrator shall have full discretion to make awards under the Plan to such employees of the Company (each, a "Participant") and its subsidiaries as the Administrator may designate. The Administrator shall specify the purchase price per Share in its sole discretion at the time such shares are purchased. The initial Participants approved by the Administrator and the value of Shares which such Participants elect to purchase pursuant to the Plan shall be set forth on Exhibit A hereto. The Administrator shall amend Exhibit A from time to time to reflect any additional Shares purchased hereunder.

4. The terms, conditions and limitations of each award made under the Plan shall be set forth in a Subscription Agreement, in a form approved by the Administrator, consistent, however, with the terms of the Plan.

5. The terms and conditions of this Plan are set forth herein and in Exhibit B.

6. The Administrator in its sole discretion may amend or terminate the Plan at any time; provided that no amendment shall alter or impair any rights or obligations under any award previously granted to a Participant under the Plan without the consent of such Participant. No awards may be granted hereunder after termination of the Plan, and in no event may any award be granted hereunder after the expiration of ten years from the date the Plan is adopted by the Board; provided that any awards granted hereunder prior to such termination or expiration shall remain outstanding in accordance with the terms and conditions of the applicable award agreement.

7. The Administrator's authorization of the sale of shares hereunder to a Participant shall not constitute an offer to sell such shares and the Administrator reserves the right in its sole discretion to revoke its authorization for any or all Participants to purchase any Shares pursuant to the Plan at any time and for any reason prior to the issuance of such shares by the Company. Unless otherwise determined by the Administrator, Participants shall not be, and shall not have any of the rights or privileges of, shareholders of the Company in respect of any Shares purchasable or otherwise acquired in connection with any award under the Plan unless and until certificates representing any such Shares have been issued by the Company to such Participants; provided, however, that no delay in the issuance of certificates due to be issued hereunder representing any such Shares shall operate to impair or prejudice any Participant's rights to participate in a corporate transaction providing for the disposition of, or to receive any dividends or distributions with respect to, such Shares.

8. The offering and sale of Shares to the Participants hereunder is intended to be exempt from registration under the Securities Act of 1933 by virtue of Section 4(2) of the Securities Act of 1933, as amended, and/or Regulation D and/or Rule 701 promulgated thereunder by the Securities and Exchange Commission. The Company is not under any obligation to register any Shares issued pursuant to this Plan on behalf of any of the Participants or to assist any of the Participants in complying with any exemption from registration.

9. The sale of Shares to Participants hereunder shall be for consideration consisting of cash only.

10. In the event of any change in the outstanding Shares (including an exchange for cash) by reason of a share split, reverse share split, spin-off, share dividend, share combination or reclassification, recapitalization, reorganization, consolidation, merger, change of control, or similar event, the Board (or, to the extent permitted by applicable law, its delegate) may adjust appropriately the number and kind of shares subject to the Plan and available for or covered by outstanding awards and prices related to outstanding awards, and make such other revisions to outstanding awards as it deems are equitably required.

11. Nothing contained herein shall affect any right of the Company or any of its subsidiaries to terminate any Participant's employment at any time or for any reason. Absent express provisions to the contrary, no award under this Plan shall be deemed "compensation" for purposes of computing benefits or contributions under any retirement plan of the Company or of its subsidiaries or shall affect any benefits under any other benefit plan of any kind now or subsequently in effect under which the availability or amount of benefits is related to level of compensation. This Plan is not a "pension plan" or "welfare plan" under the U.S. Employee Retirement Income Security Act of 1974, as amended.

12. The Company shall be entitled to require payment in cash or deduction from other compensation payable to a participant of any sums required by federal, state or local tax law to be withheld with respect to the issuance, vesting, or payment of any award. It shall be a condition to the obligation of the Company to deliver Shares that the Participant pay to the Company such amount as may be requested by the Company for the purpose of satisfying any liability for such withholding taxes.

13. Awards granted under this Plan may not be transferred in any manner otherwise than by will or by the laws of descent or distribution and may be exercised during the lifetime of a Participant only by him or her. The terms of awards granted or otherwise made available to any Participant under this Plan shall be binding upon the executors, administrators, heirs, successors and assigns of such Participant.

14. This Plan and any awards and agreements hereunder shall be interpreted and construed in accordance with the laws of the State of Delaware, without giving effect to the choice of laws principles thereunder.

\*\*\*\*\*

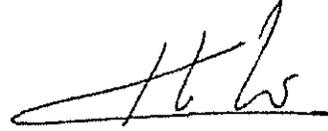

*[Signature page follows]*

I hereby certify that the Plan was duly adopted by the Board of Directors of Iberdrola Renovables, S.A. (Unipersonal), on November 20, 2007.

Executed as of November 20, 2007.

CONSEJERO DELEGADO

*[Iberdrola Renovables, S.A.U. 2007 Employee Equity Purchase Plan]*

**Exhibit A**  
**Iberdrola Ownership Summary**

MA13474.1

A-1

**Exhibit B**

**Terms and Conditions of the Plan contained in the Spanish Prospectus**

1. The Application Orders for the Employee Sub-tranche must be in a minimum amount of 500 euros and a maximum amount of 20,000 euros.
2. The Application Orders may be made from 8:30 a.m. Madrid time on 23 November 2007 until 2:00 p.m. Madrid time on 3 December 2007, both inclusive. This term shall be the same as the application "Term for Presentation of Subscription Orders of the Retail Sub-Tranche".
3. Iberdrola's Renovables employees who are not resident in Spain, shall made their application from 8:30 a.m. Madrid time on 23 November 2007 until 2:00 p.m. Madrid time on 3 December 2007, both inclusive, trough the special procedure agreed between Iberdrola Renovables and Banco Bilbao Vizcaya Argentaria ("BBVA"). BBVA shall be the entity in charge of processing the Application Orders for the employees who are not resident in Spain. Those employees shall open a Euro cash account and a stock account in BBVA in order to process their application orders. Relevant documentation related to these accounts shall be at disposal of the relevant employees in advance.
4. From 8:30 a.m. Madrid time on 23 November 2007 until 2:00 p.m. Madrid time on 7 December 2007, both inclusive, the application orders shall be revocable.
5. Each employee shall make no more than one application order.
6. Each application order shall contain the maximum amount to be invested ("Maximum Invested Amount") by the relevant employee. This Maximum Invested shall be expressed in Euros. This application shall be made within the limits established in number (1).
7. In order to make the allocation of shares for each of the employees, the Maximum Invested Amount shall be divided by the Retail Sub-tranche Price. The number of shares thereof obtained shall be rounded downwards, that is should the number of shares obtained is 42.3, the shares finally allocated shall be 42.
8. Application orders made in the names of multiple persons shall not be allowed.
9. The Employee Sub-tranche Price shall be the same as the Retail Sub-tranche Price.
10. The Maximum Retail Sub-tranche Price shall be determined on 3 December 2007.
11. The Retail Sub-tranche Price shall be determined on 11 December 2007.
