World Leader in Intimate Healthcare

Coloplast develops products and services to make life easier for people with deeply personal and private medical conditions.

These conditions are often associated with trauma and taboo.

The more intimate the condition, the greater the requirement to come closer to customers, understand their world, and develop solutions that are sensitive to their special needs.

Announcement No. 3/2008
19 February 2008

Interim financial report, Q1 2007/08

(1 October 2007 – 31 December 2007)

Coloplast generated 11% organic growth in the first quarter, reinforcing its position as the world's leading supplier of intimate healthcare products. The company retains the full-year earnings forecast, but lowers its forecast for organic growth exclusively because of weaker revenue flows in the German healthcare business HSC. In DKK-terms, both revenue and earnings will be affected by exchange rate developments.

"We've achieved good Q1 results: 11% organic growth and a 16% EBIT margin. Even though we have lowered our full-year forecast due to HSC, we maintain our long-term goal of double-digit growth and an EBIT margin of 18%-20%. Our targets are unchanged," said Coloplast CEO Sten Scheibye.

- In DKK-terms, revenue was up by 10% to DKK 2,113m. Organic growth was 11%, while exchange rate developments took 3% off revenue growth. Recognising contract production in the wound care business produced a technical 2% increase in revenue (see Announcement No. 2/2008).
- Organic growth rates by business area: Ostomy Care 12%, Urology and Continence 10%, Wound and Skin Care 8%. The recent 12 months of growing ostomy care sales have propelled Coloplast to the position as the global No. 1 in Ostomy Care. The company is also the market leader in Urology and Continence Care, while there is still work to do to improve the current global ranking as number four in the Wound and Skin Care segment.
- The increases from 13% to 16% in the reported operating margin and in the reported EBIT of 33% to DKK 340m were mainly the result of non-recurring costs and a gain from the sale of a property in Denmark. The underlying operating margin of 16% was in line with last year's rate. Going forward, Coloplast is focused on lifting profitability through the ongoing relocation of production facilities and by constantly optimising SG&A processes.
- HSC, Coloplast's German homecare company, has seen its number of employees reduced by about 50% (see Announcement No. 20/2007). HSC's sales organisation is being restructured with a view to creating profitable growth under the competitive tendering system being introduced in the German homecare market.
- In December 2007, the shareholders in general meeting authorised Coloplast to establish a new share buy-back programme of up to DKK 1bn. The new programme will be launched in Q2.

Outlook for 2007/2008

- **Organic revenue growth of about 8%, EBIT margin of 16%–17% at constant exchange rates**
Exclusive of HSC, organic growth is expected to remain unchanged at 10%. The guidance for the full-year organic sales growth is reduced from about 10% to about 8% due to the DKK 150-250m revenue decline anticipated in the German homecare business. The EBIT margin forecast is unchanged at 16%-17% at constant exchange rates.
- **Contract production of Compeed products** A new contract for the production of Compeed products has led to a change in accounting treatment. Compeed products will not be recognised as organic growth, but will lift revenue by 2 percentage points and reduce the EBIT margin by 0.3 percentage point relative to the 2006/07 financial year (see Announcement No. 2/2008).
- **Exchange rate exposure** Applying the exchange rate levels prevailing at the end of January, we expect DKK-denominated revenue to drop by 3 percentage points and the EBIT margin to fall by 1 percentage point relative to the forecast measures at constant exchange rates.

Overall, the guidance implies 7% revenue growth in DKK-terms and a reported EBIT margin of 15%-16%, also in DKK-terms.

Sales performance

Revenue that was previously classified as "Other" will now be distributed on the basis of its affiliation with one of our three business areas, Ostomy Care, Urology and Continence Care or Wound and Skin Care. See Announcement No. 1/2008. While the change will not affect consolidated revenue, it will improve sales performance transparency.

In DKK-terms, revenue was up by 10% to DKK 2,113m. Organic growth was 11% and contract production being recognised in the Wound Care business lifted revenue by 2%. See Announcement No. 2/2008. Developments in foreign exchange rates took 3% off growth.

Sales performance by business area

Unaudited	Q1 2007/08 DKKm	Q1 2006/07 DKKm	Organic growth	Exchange rates	Recognition of consumer products	Reported growth
Ostomy care	908	823	12%	-2%	-	10%
Urology and Continence	858	801	10%	-3%	-	7%
Wound and Skin care	347	300	8%	-3%	11%	16%
Total revenue	2,113	1,924	11%	-3%	2%	10%

Ostomy Care

Revenue from ostomy care products improved by 12% to DKK 908m in the first quarter compared to a relatively weak benchmark of 6% organic growth in Q1 2006/07.

The launch of SenSura, the new generation of ostomy bags, was the main driver of growth in the Ostomy Care business. SenSura has now been launched in 20 markets, and the product is expected to contribute to a growth rate in ostomy care products outperforming the market rate.

The recent 12 months of growing ostomy care sales have propelled Coloplast to the position as the global No. 1. The company has its largest market shares in Europe, and Coloplast continues to win market share in the USA and the rest of the World.

Urology and Continence Care

Q1 revenue from urology and continence care products improved organically by 10% to DKK 858m, expanding from the 8% organic growth rate in Q4 2006/07.

The Urology and Continence Care business generated decent Q1 growth. Catheter sales was the principal contributor, with SpeediCath Compact enjoying particularly good growth momentum. Sales of penis implants on the North American market also improved well.

Wound and Skin Care

Revenue from wound and skin care products grew organically by 8% to DKK 347m, expanding from last year's Q1 organic growth rate of 6% and the FY 2006/07 average of 6%.

Main contributors in this business area were Coloplast's advanced Biatain-Ibu foam dressing for chronic wounds and skin care products. There is a good momentum in sales of Biatain Ibu, albeit from a low level.

Developments in HSC, the German homecare company

The German homecare market is undergoing profound change. In the future, contracts will increasingly be put out to competitive tendering in order to reduce costs per patient. That will require a more efficient distribution structure in the German homecare market. For this reason, significant structural changes are occurring in the market and, as a result, one specific competitor applying quite unconventional methods has recruited about half of the employees of HSC, Coloplast's German homecare business. This situation is expected to cause a drop in homecare revenue of DKK 150–250m in the 2007/08 financial year. Overall, HSC generated revenue of DKK 500m in the German homecare market last year. The bulk of this revenue derives from ostomy care products from Coloplast and other suppliers.

Due to the changed market conditions and the greater proportion of sales to be generated through competitive tendering, Coloplast does not intend to fill all the vacant positions in HSC. Instead, we have merged HSC with our German sales subsidiary, Coloplast GmbH, in order to create a more efficient cost structure.

This more cost-effective business model will position Coloplast more strongly for future competitive tenders. Over the long term, therefore, we expect to win back the market share in the German homecare market.

Growth in ostomy care revenue is expected to lose momentum exclusively because of HSC.

Sales performance by region

Unaudited	Q1 2007/08 DKKm	Q1 2006/07 DKKm	Organic growth	Exchange rates	Recognition of consumer products	Reported growth
Europe	1,681	1,542	9%	-1%	1%	9%
Americas	285	255	18%	-10%	4%	12%
Rest of the World	147	127	14%	-7%	9%	16%
Total revenue	2,113	1,924	11%	-3%	2%	10%

Organic growth in Europe was 9%, driven by ostomy care and continence care products. Revenue from the European market was up by 9% to DKK 1,681m.

In the Americas, organic growth was 18%, while revenue rose by 12% to 285m. The US operations reported a satisfactory revenue performance from ostomy care products and a fair growth rate for urology and continence care products.

In the rest of the World, organic growth was 14%, while revenue rose by 16% to 147m.

Costs and EBIT

EBIT for the first quarter was DKK 340m for an EBIT margin of 16%. This 33% increase derived mainly from a DKK 53m improvement in non-recurring items. Adjusted for non-recurring items, EBIT improved by 10% to DKK 339m.

Non-recurring items

DKKm	Q1 2007/08	Q1 2006/07
Unaudited		
Sale of property in Kokkedal, Denmark	+31	
Cost of closing factories in relation to relocation	-10	
Integration costs, Mentor	-20	-40
Relocation in the USA		-12
Total non-recurring items	+1	-52

The costs of integrating Mentor are falling as the process nears completion, dropping from DKK 40m in Q1 2006/07 to DKK 20m in Q1 2007/08. As indicated in Announcement No. 20/2007, Coloplast expects to spend about DKK 30m on integrating Mentor during the 2007/08 financial year.

Costs related to closing down factories in Denmark in connection with the relocation of production from Denmark to Hungary and China are expected to amount to DKK 50m in the 2007/08 financial year (see Announcement No. 20/2007), DKK 10m of which amount was expensed in the first quarter.

The costs of integrating and closing factories were partially offset by non-recurring income of DKK 31m from the sale of a property in Kokkedal, Denmark.

Impact on profit of non-recurring items

Unaudited DKKm	Q1 2007/08			Q1 2006/07			Growth
	Reported	Non-recurring	Adjusted	Reported	Non-recurring	Adjusted	Adjusted
Revenue	2,113		2,113	1,924		1,924	10%
Cost of sales	-829	-10	-819	-776	-14	-762	7%
Gross profit	1,284		1,294	1,148		1,162	11%
Gross margin(%)	61%		61%	60%		60%	
Distribution costs	-660	-20	-640	-608	-26	-582	10%
Administrative expenses	-235		-235	-237	-12	-225	4%
R&D costs	-78		-78	-60		-60	30%
Other operating income	35	31	4	12		12	
Other operating expenses	-6		-6	0		0	
Special items	0		0	0		0	
EBIT	340	+1	339	255	-52	307	10%
EBIT margin (%)	16%		16%	13%		16%	

Coloplast's decision to accelerate the development of new products has caused a 30% increase in R&D costs. Increases in production costs (+7%) and administrative expenses (+4%) were all less than the sales growth, while distribution costs (+10%) were in line with the sales growth.

As part of the efforts to lift the EBIT margin, Coloplast streamlined a number of business processes in the US sales subsidiary in January 2008, eliminating about 50 job positions. The goal is for the Group's SG&A-costs to grow at a slower rate than revenue growth.

Profitability in the Wound and Skin Care business has improved after the sales efforts were refocused

on large markets rather than on generating sales in all national markets. Generating double-digit profitable growth remains the target for the Wound and Skin Care business.

EBITDA

EBITDA rose by 19% to DKK 470m. At DKK 130m, depreciation charges were slightly below last year's figure of DKK 140m due to assets divested (at Kokkedal, Denmark) and lower Danish kroner exchange rates.

Financial items and tax

Financial Items

Financial items amounted to a net expense of DKK 8m, against DKK 54m in Q1 of last year. The main component of the DKK 46m improvement was a fair value adjustment of options (+ DKK 59m) resulting from a 13% drop in the Coloplast share price to DKK 442 per share at the end of the first quarter. These value adjustments will gradually diminish as the cash-settled option programmes expire during the period to 2013. Effective from 2005, Coloplast's option programmes have been equity-settled with the costs being expensed evenly in order to avoid value adjustments during the period.

Financial Items

Unaudited	Q1 2007/08			Q1 2006/07		
	Income	Expenses	Net	Income	Expenses	Net
DKK m						
Interest	+9	-39	-30	+9	-47	-38
Fair value adjustment of options	+25		+25		-34	-34
Exchange adjustments				+19		+19
Other financial items	+2	-5	-3		-1	-1
Total financial items	+36	-44	-8	+28	-82	-54

The drop in interest expenses was due to the average net interest-bearing debt of the reporting period being slightly lower than last year. The year-end statement of the net interest-bearing debt did in fact show a 6% increase, but that was due mainly to the dividend payments made at the end of December.

Tax

The effective tax rate was 28% for a tax expense of DKK 93m, as compared with 27% and DKK 55m last year.

Cash flow and investments

Cash flows from operating activities

Cash flows from operating activities rose from DKK 94m to DKK 200m. The improvement was due to an increase in EBITDA (+ DKK 75m), a fall in interest expenses (+ DKK 34m) and a drop in tax paid (+91m), but it also included a negative impact of DKK 104m working capital increase.

The DKK 104m increase in working capital was mainly due to a planned, temporary increase of inventories relating to the relocation of production to Hungary and China.

The DKK 34m drop in interest expenses was due to the lower average net interest-bearing debt during the period and timing differences in interest payments.

The DKK 91m in lower taxes arose because Coloplast received DKK 62m in prior-year excess tax payments.

Investments

The DKK 141m investment in property, plant and equipment during the first quarter related mainly to the factories at Nyirbator, Hungary and Zhuhai, China. Construction of the US headquarters is scheduled to commence this year. The project is still expected to require an investment of approximately DKK 150m this year and of a further DKK 50m next year.

The sale of the property at Kokkedal, Denmark was finalised at the end of December, and an income of DKK 31m is recognised in the financial statements, but payment was only received in the second quarter.

Free cash flows

Net of total gross investment of DKK 144m and the sale of property, plant and equipment of DKK 6m, the free cash flow was an inflow of DKK 62m compared to an outflow of DKK 6m in Q1 2006/07.

Balance sheet and equity

Balance sheet

Total assets rose by DKK 36m during the quarter to DKK 7,786m. Non-current assets fell by DKK 95m to DKK 4,542m, mainly as a result lower Danish kroner exchange rates. Current assets increased by DKK 131m to DKK 3,244m, because inventory levels have been increased with a view to securing supply while production is being relocated from Denmark.

Shareholders' equity

Equity fell by DKK 143m during the reporting period and is derived from the profit for the reporting period (+ DKK 239m) and dividend paid (DKK (396m)). Other factors are gains from the sale of shares to employees in Denmark (gross of tax payment) (+ DKK 23m) and effects of exchange adjustments and exchange hedging (DKK (9)m).

Capital structure and share buy-back

Capital structure

Coloplast's Board of Directors and Executive Management review the company's capital structure and the application of excess liquidity on a regular basis. Our target is to have a ratio of net interest-bearing debt to EBITDA of 2.0–3.5.

Share buyback

In December 2007, the shareholders in general meeting authorised Coloplast to establish another share buy-back programme of up to DKK 1bn during 2008 and 2009. Given the current ratio of net interest-bearing debt to EBITDA, the share buy-back programme will commence already in the second quarter instead of as previously announced in the second half of the financial year.

Treasury shares and cancellation of shares

The holding of treasury shares fell by 49,285 during the first quarter to stand at 3,930,987 B shares at 31 December 2007. In December 2007, the shareholders in general meeting resolved to cancel 2,000,000 B shares from Coloplast's holding of treasury shares. This process has commenced and is expected to be completed in March 2008.

Outlook

Organic revenue growth of about 8%, EBIT margin of 16%–17% at constant exchange rates

The loss of employees in HSC is expected to impact sales to the homecare segment in Germany for the rest of the current financial year. Coloplast estimates the overall revenue setback at DKK 150–

250m and it will predominantly affect the Ostomy Care business area. Against that background, Coloplast anticipates organic revenue growth of about 8%, down from the previous guidance of about 10%.

Management believes that the events in HSC will impact the EBIT margin no more than what can be off-set by improvements elsewhere in the group.

Contract production of wound care products

The recognition of approximately DKK 160m in revenue from the contract production of Compeed products will have a technical effect on this year's financial statements without a corresponding increase in EBIT (see Announcement No. 2/2008). The change will technically lift revenue by 2 percentage points and dilute the EBIT margin by 0.3 percentage point.

Exchange rate exposure

Coloplast's revenue is particularly exposed to developments in USD and GBP. Due to Coloplast's production in the USA, changes in the DKK/USD exchange rate only have a slight effect on EBIT, while changes in the DKK/GBP exchange rate feed through to EBIT. The relocation of a large part of the production activities to Hungary means that costs will be affected by fluctuations in the DKK/HUF exchange rate.

Coloplast's full-year exchange rate exposure on a 10% depreciation of USD, GBP and HUF against Danish kroner

DKKm	Revenue	EBIT
USD	-110	0
GBP	-160	-90
HUF	-	+30

Measured in Danish kroner, at the exchange rate levels prevailing at the end of January, the reported full-year revenue would be reduced by 3 percentage points and the EBIT margin would be reduced by 1 percentage point.

In the current financial year, Coloplast has entered into currency hedging contracts that, applying exchange rates prevailing at 31 January, would produce currency hedging income of DKK 40m, which amount is recognised under financial items.

Healthcare reform in Britain

On 28 December 2007, Britain's Department of Health concluded a consultation round on a health reform. See the investor service announcement of 19 October 2007.

A new reform is not expected to be implemented until six months, at the earliest, after the results of the hearing have been announced. As there has been no new information to date, Coloplast expects that the potential effects of a British healthcare reform will not impact the company until in the 2008/09 financial year at the earliest.

Investments and tax

The previous guidance of full-year gross investments in property, plant and equipment of DKK 700–800m is unchanged.

The effective tax rate forecast is unchanged at about 28%.

Long-term goals

Coloplast maintains its long-term goals:

- to double economic profit at least every five years
- to have an EBIT margin of 18%-20%
- to generate organic revenue growth of around 10% per year

Management Statement

The Board of Directors and the Executive Management have today considered and approved the interim financial statements of Coloplast A/S for the three months to 31 December 2007.

The interim financial statements were prepared in accordance with International Financial Reporting Standards as adopted by the EU and additional Danish disclosure requirements for interim reports of listed companies.

In our opinion, the interim financial statements give a true and fair view of the Group's assets, liabilities and financial position and financial results of the reporting period.
