Skanska to expand refinery in Brazil for USD 150 M, about SEK 960 M

Skanska has secured a contract to build a hydrodesulphurization (HDS) unit at a refinery in Brazil. Skanska's contract amount totals USD 150 M, about SEK 960 M, which is included in order bookings for the first quarter.

The customer is Refap, a consortium comprising the state-owned Brazilian oil company Petrobras and privately owned Spanish-Argentine Repsol YPF. This is Skanska's third project for Refap in the past four years.

The contract covers construction of a hydrodesulphurization (HDS) unit at Alberto Pasqualini refinery (Refap) in Rio Grande do Sul. The facility will have a capacity to process 5,000 cubic meters per day. The scope of the contract includes detail engineering, purchasing, construction, electromechanical installations and assistance with commissioning and start-up of the plant.

The project is part of a nationwide environmental program to reduce sulphur contaminants in petroleum products.

Work begins in April and is scheduled for completion within 30 months.

Skanska Latin America is one of the continent's leading construction companies and one of Skanska's most profitable units. Operations focus primarily on construction, operations and services for the international energy industry. In 2007, the company had some 12,000 employees and sales of about SEK 4.3 billion.

Skanska to build highway in Czech Republic for CZK 1 billion, about SEK 365 M

Skanska has secured a contract to build a stretch of highway in the Czech Republic. Skanska's contract amount totals CZK 1 billion, about SEK 365 M, which is included in order bookings for the first quarter. The customer is the Czech national highway administration. The project is being financed through the national Czech infrastructure fund.

The contract involves an approximately 6-kilometer stretch of four-lane highway on the D47 route from Bohumin in the eastern Czech Republic to the Polish border. When this section is completed in 2011, the highway is fully built out between Ostrava and the Polish border, where the D47 will link with the A1 highway in Poland. Skanska has previously built many stages of the D47.

The assignment includes 21 bridges, of which the longest is the 175-meter span over the Olse River. Work begins immediately and the road is planned for completion in 2011.

The project is being carried out in a consortium in which Skanska holds 34 percent, ODS Dopravni 35 percent, ALPINE CZ 19 percent and OHL Zs 12 percent of the total contract amount of CZK 3 billion.

Skanska Czech Republic, which is the largest construction company in the country, had sales of about SEK 11 billion in 2006. The company has about 7,000 employees.
