## NOTES TO INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

30 June 2008

### 1. GROUP RESTRUCTURING AND CORPORATE INFORMATION

The Company was incorporated in the PRC on 5 November 2007 as a joint stock company with limited liability pursuant to a group restructuring (the “Restructuring”) of China Railway Construction Corporation (“CRCCG”), a state-owned enterprise in the PRC, in preparation for the listing of the Company’s shares on The Stock Exchange of Hong Kong Limited (“The Hong Kong Stock Exchange”) and The Shanghai Stock Exchange.

In consideration for CRCCG transferring the Core Operations (as defined below) to the Company and the injection of certain prepaid land lease payments in an aggregate amount of approximately RMB3,075 million upon its incorporation on 5 November 2007, the Company issued 8,000 million ordinary shares to CRCCG. The ordinary shares issued to CRCCG have a par value of RMB1.00 each and represented the entire registered and issued share capital of the Company upon its incorporation. CRCCG is the ultimate holding company of the Company.

The registered office of the Company is located at East, No. 40 Fuxing Road, Haidian District, Beijing, the PRC.

Prior to the incorporation of the Company, the construction operations, survey, design and consultancy operations, manufacturing operations and other business operations (collectively, the “Predecessor Operations”) were carried out by various companies owned or controlled by CRCCG. Pursuant to the Restructuring, the Core Operations were transferred to the Company upon its incorporation.

## **Core Operations**

In connection with the Restructuring, the principal operations and businesses of CRCCG (the “Core Operations”) were transferred to the Company which include:

- (a) all of the core assets and liabilities relating to the construction operations;
- (b) all of the core assets and liabilities relating to the survey, design and consultancy operations;
- (c) all of the core assets and liabilities relating to the large track maintenance machinery and railway track components manufacturing;
- (d) other businesses, including certain real estate development and logistics operations;
- (e) contractual rights and obligations relating to the businesses, assets and liabilities transferred to the Company;
- (f) employees associated with the businesses transferred to the Company;
- (g) qualifications, licenses and approvals related to the businesses transferred to the Company; and
- (h) business and financial records, books and data and technological data and know-how related to the businesses transferred to the Company.

## **Retained Operations**

In connection with the Restructuring, the following assets and liabilities (the “Retained Operations”) were not transferred to the Company upon its incorporation and were retained by CRCCG:

- (a) certain operating assets and liabilities historically associated with the Predecessor Operations, which include certain buildings and prepaid land lease payments that do not have perfected titles and ownership certificates, and the supplementary defined benefits of retirees which were integral to the Predecessor Operations;
- (b) equity interests in certain companies not strategically complementary to the Group’s businesses;
- (c) equity interests in certain companies engaging in Build-Operate-Transfer (“BOT”) projects (the “Retained BOT Projects”); and
- (d) ancillary facilities including hospitals, nurseries, etc.

- (a) As discussed in note 1 to the interim condensed consolidated financial statements, prior to the incorporation of the Company, all the Core Operations were controlled and owned by CRCCG. Upon the incorporation of the Company on 5 November 2007, all the Core Operations were transferred to the Company. As there was no change in the ultimate controlling shareholder of the Core Operations, the Restructuring has been accounted for as a reorganisation of business under common control in a manner similar to a pooling-of-interests. Accordingly, the assets and liabilities of the Core Operations transferred to the Company have been stated at CRCCG's historical carrying amounts in the preparation of the interim condensed consolidated financial statements of the Group, which have been prepared as if the Company and its current corporate structure had been in existence at all dates and during the periods presented.

These interim condensed consolidated financial statements include the operating results and financial position of the Retained Operations that were historically associated with the Predecessor Operations but exclude those that were not strategically complementary to the Group's businesses and the companies engaging in the Retained BOT Projects. Although the Retained Operations were not transferred to the Company, those associated with the Predecessor Operations have been included in these interim condensed consolidated financial statements according to the details set out in the agreement for the Restructuring entered into by the Company with CRCCG (the "Restructuring Agreement") because the directors of the Company (the "Directors") considered that the historical financial information of the Group should reflect all of the Group's costs of doing businesses, and include all relevant activities that have been part of the history of the Group's businesses and operations. Pursuant to the Restructuring, these operating assets and liabilities historically associated with the Predecessor Operations as mentioned above were retained by CRCCG by way of distributions to CRCCG. Accordingly, these operating assets and liabilities were not injected into the Company upon its incorporation on 5 November 2007.

- (b) The interim condensed consolidated financial statements for the six months ended 30 June 2008 have been prepared in accordance with IAS 34 *Interim Financial Reporting* and the disclosure requirements of the Rules Governing the Listing of Securities on The Hong Kong Stock Exchange. The interim condensed consolidated financial statements do not include all the information and disclosures required in the audited annual financial statements, and therefore should be read in conjunction with the Group's annual financial statements as at 31 December 2007.

The interim condensed consolidated financial statements have been prepared under the historical cost convention, except for certain financial assets, which have been measured at fair value. In addition, the interim condensed consolidated financial statements are presented in Renminbi ("RMB") and all values are rounded to the nearest thousand, except when otherwise indicated.

(c) The accounting policies adopted in the preparation of the interim condensed consolidated financial statements are consistent with those followed in the preparation of the Group's annual financial statements for the year ended 31 December 2007, except for the adoption of the new Standards and Interpretations, noted below:

IFRIC 11	IFRS 2 — Group and Treasury Share Transactions
IFRIC 14	IAS 19 — The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction

IFRIC 11 requires arrangements whereby an employee is granted rights to an entity's equity instruments, to be accounted for as an equity-settled scheme, even if the entity buys the instruments from another party, or the shareholders provide the equity instruments needed. The adoption of this Interpretation did not have any effect on the financial position or performance of the Group.

IFRIC 14 provides guidance on how to assess the limit on the amount of surplus in a defined benefit scheme that can be recognised as an asset under IAS 19 *Employee Benefits*. As the Group's defined benefit schemes are currently in deficit, this Interpretation had no impact on the financial position or performance of the Group.

### 3. SEGMENT INFORMATION

Segment information is presented by way of two segment formats: (i) on a primary segment reporting basis, by business segment; and (ii) on a secondary segment reporting basis, by geographical segment.

The Group's operating businesses are structured and managed separately, according to the nature of their operations and the products and services they provide. Each of the Group's business segments represents a strategic business unit that offers different services and products which are subject to risks and returns that are different from those of the other business segments. Summary details of the business segments are as follows:

- (i) the construction operations segment engages in the construction of infrastructures such as railways, highways, bridges, tunnels, metropolitan railways, airports and ports, water conservancy and hydropower facilities, real estate and municipal projects;
- (ii) the survey, design and consultancy operations segment engages in the provision of survey, design and consultancy services, as well as technology and equipment research and development services, for the construction of railways, highways, metropolitan railways, bridges, tunnels, municipal and power projects, high-rise buildings, airports and ports;
- (iii) the manufacturing operations segment engages in the design, research and development, production and sale of large track maintenance machinery as well as the manufacturing of components for railway construction; and

(iv) the other business operations segment mainly comprises real estate development and logistics businesses.

The profit before tax of a segment represents revenue less expenses directly attributable to a segment and the relevant portion of enterprise revenue less expenses that can be allocated on a reasonable basis to a segment, whether from external transactions or from transactions with other segments of the Group.

Segment assets and liabilities mainly comprise operating assets and liabilities that are directly attributable to the segment or can be allocated to the segment on a reasonable basis.

In determining the Group's geographical segments, revenues are attributed to the segments based on the location of the customers, and assets are attributed to the segments based on the location of the assets.

Intersegment sales and transfers are transacted with reference to the selling prices used for sales made to third parties at the then prevailing market prices.

The Group's major customers are the PRC government agencies and other state-owned enterprises. The majority of the Group's revenues are generated through construction projects and settlement is made in accordance with the terms specified in the contracts governing the relevant transactions. The Group does not have a standardised and universal credit period granted to the construction service customers. The credit period of individual construction service customers is considered on a case-by-case basis and set out in the construction contracts, as appropriate. For the sale of products, a credit period ranging from 30 to 90 days may be granted to large or long-established customers with good repayment history. Revenues from small, new or short term customers are normally expected to be settled shortly after the provision of services or delivery of goods. No credit period is set by the Group for small, new or short term customers. For retention money receivables in respect of construction work carried out by the Group, the due dates usually range from one to six years after the completion of the construction work. Trade and bills receivables are non-interest-bearing.

The Group does not hold any collateral or other credit enhancements over these balances.

Movements in the provision for impairment of trade receivables are as follows:

The individually impaired trade receivables relate to customers that were in financial difficulties or customers that were in default or delinquency in payments and only a portion of the receivables is expected to be recovered. The Group does not hold any collateral or other credit enhancements over these balances.

During the six months ended 30 June 2008, the Group had transactions with State-owned Enterprises including, but not limited to, the provision of infrastructure construction services and purchases of services. The Directors consider that the transactions with these State-owned Enterprises are activities in the ordinary course of the Group’s business and that the dealings of the Group have not been significantly or unduly affected by the fact that the Group and these State-owned Enterprises are ultimately controlled or owned by the PRC government. The Group has also established pricing policies for its services and products, and such pricing policies do not depend on whether or not the customers are State-owned Enterprises. Having due regard to the substance of the relationships, the Directors are of the opinion that none of these transactions are material related party transactions that require separate disclosure.

## BUSINESS REVIEW

The first half of 2008 saw steady growth of CRCC. Despite such complicated economic situation in the world as to China, and serious natural disasters, the Company firmly grabbed the opportunity of overseas and domestic listings to launch a series of initiatives. Through strengthened operating and project management, the Company steadily pushed forward the major six business sectors to sustain the sound momentum of domestic operations. Thanks to years' deployment in overseas business, overseas revenue of the Company recorded considerable increase in the first half of 2008. In 2008, the Group's ranking among the Fortune Global 500 companies ascended to No. 356 from No. 384 in 2007, with the ranking among ENR Top 225 Global Contractors advancing to 5th from 6th in 2007.

In the first half of 2008, the Company weathered the natural disasters including blizzard in south China, and especially the Sichuan Wenchuan earthquake, while bearing the pressures from tight monetary policy as well as price hike of energy and raw materials. The Company further explored domestic and overseas markets, expedited the expansion of six business segments and pressed ahead project responsibility cost management. Meanwhile, by enhancing internal control and warding off various risks, the Company achieved admirable operating results. The new contract value, revenue from operations and net profit attributable to equity holders amounted to RMB137,615.7 million, RMB79,777.5 million and RMB1,524.8 million, representing year-on-year increase of 117.0%, 12.5% and 275.5% respectively.

As at 30 June 2008, the Group's revenue from construction operations before inter-segment elimination recorded RMB74,716.4 million, representing a year-on-year increase of 11.5%. Being one of the largest contractors of railway construction in China, the Group's new contract value amounted to RMB127,367.9 million, including new contracts of railway project reaching RMB80.4 billion, which accounted for 63% of the total value of new contracts. Furthermore, taking advantages of scale merit and effective cost control, the gross profit margin of such segment increased from 5.8% during the six months ended 30 June 2007 to 6.5% while its operating margin increased from 1.96% in the corresponding period last year to 1.97%.

CRCC is a leading and highly proficient provider of survey, design and consultancy services in the domestic infrastructure construction industry. Leveraging on its solid strengths, CRCC further expanded its business scale. In the first half of 2008, revenue of such segment before inter-segment elimination was RMB1,883.2 million, representing a growth of 17.3% as compared to the corresponding period last year. The segment's new contract value amounted to RMB1,690.9 million and its gross profit margin increased slightly from 21.8% in the same period last year to 22.3%. Operating margin of such segment recorded a year-on-year increase of 8.7% from 5.6%.

In respect of the manufacturing operations, the Group is the largest manufacturer of large track maintenance machinery in Asia and being the second in the world. The Group has achieved a revenue of RMB1,402.0 million in such segment before inter-segment elimination during the reporting period, representing a significant growth of 58.1% as compared to the same period last year. In such segments, its new contract value amounted to RMB882.3 million. Gross profit margin slightly decreased from 18.8% as at 30 June 2007 to 17.1% while operating margin increased from 5.2% in the corresponding period last year to 10.8%.

Meanwhile, the Group took the initiative to launch business in other arenas such as real estate development, capital operation and logistics. Thus far the Group is the largest railway construction logistic service provider in China and the second largest railway material supplier in the world, and "Zhong Tie Di Chan" (「中鐵地產」) has also become one of the brands with predominant influence in China. In the first half of 2008, the revenue before inter-segment elimination was RMB3,074.5 million, representing a year-on-year growth of 38.9% and the new contract value was RMB7,674.5 million.

Looking ahead, domestic infrastructure construction, especially railway, will remain its leapfrog development momentum. Meanwhile, the international construction market still has huge growth potentials and is expected to keep its rapid and steady growth. Therefore, CRCC is facing unique opportunities arising from domestic and overseas markets. The Board of the Company believes that, in the second half of the year and a certain period in future, with further adjustment in industry structure, the construction operation of the Company will be enhanced accordingly. The profitable segments including survey and design, real estate development, manufacturing operations, and logistics and trade will release their contributions progressively. While securing its dominance in domestic construction industry, the cutting-edge of the Company in international construction field will emerge gradually. The Company is expected to meet its economic goals for the year.

## **1. OVERVIEW**

The Group faced complicated international and domestic economic situation during the first half of 2008. Rising inflation rate, stricter macro control policies implemented by China government and the continuing impact from the U.S. sub-prime crisis are all posing challenges to the industry's external environment in which the Company operates.

Despite such complicated economic situation and the country's serious natural disasters, the Company firmly grabbed the opportunity of overseas and domestic listings to launch a series of initiatives. Through strengthened operation and project management, the Company steadily pushed forward the major six business segments, streamlined principal business, optimized product structure and upgraded technology to maintain a sound momentum in domestic business.
