We are pleased to present our 2007 annual report. During this past year, IGT achieved financial records and continued progress on the road to the open network gaming floor of the future. Our success and progress toward that vision is testament to the dedication and talents of our employees worldwide who once again proved that they, more than anything, are the Company's most valuable asset.

The industry is on the cusp of an important evolution in gaming technology, and IGT is well prepared to offer these advances to our customers.

We remain committed to product innovation, which is reflected in our significant investment in research and development. Meanwhile, the expansion of gaming continues at a brisk pace with a new wave of growth expected to come online worldwide over the next few years.

At the Global Gaming Expo this past November, we demonstrated IGT's latest products in a booth themed "The Right Vision. Right now & for the future." Our goal was to show how IGT is focused not only on the future of gaming, but also on the present with a complete product line to maximize return on investment for our customers right now. The same focus is applied to our business as a whole: Making continuing investments in the future while remaining focused on executing our strategy to be the best in the industry today.

2007 Highlights:

- Record consolidated revenues up 4% to \$2.6 billion.
- Record gaming operations installed base of 59,200 machines.
- Record non-machine revenues of \$384 million, or 30% of consolidated product sales.
- Record consolidated gross profits of \$1.5 billion, with gross margin at 56%.

Our businesses continued on a path to greater financial efficiency during 2007. Our gaming operations installed base noted above reflects a 19% increase over last year. Our record non-machine revenues include systems, game conversions, and intellectual property. This past year offered a glimpse into what we believe will be IGT's future business model – more significant contributions from higher-margin revenues as gaming floors begin the migration to system-based game delivery and applications.

Our International business contributions to the Company's bottom line reached new, record levels in 2007. International operating income was \$160 million or 20% of IGT's total operating income, up from just \$25 million five years ago. We expect the rate of growth in international gaming markets to continue to outpace growth in North American markets, with Asia and Latin America leading the way. IGT is poised to participate in these opportunities with our extensive, worldwide distribution and sales network.

Due to improved financial efficiency leading to increased cash flows, we raised the amount of capital returned to our shareholders. In 2007, IGT completed \$1.1 billion of share repurchases and distributed \$174 million in cash dividends. IGT maintains an excellent credit rating and has the resources to continue delivering returns to our shareholders while taking advantage of strategic opportunities.

In the pages that follow, you will find more on IGT's worldwide success during 2007. On behalf of our more than 5,400 employees we would like to thank you, our shareholders, for your ongoing support as we continue delivering the best products in the industry, both now and in the future.

Sincerely,

TJ Matthews
Chairman and Chief Executive Officer

JACKPOTS

*The right math.
The right themes.
The right player experience.
It's all part of the
Right Vision.*

Jean Vermeulen
Senior Vice President
Product Development

The Right Vision

Our industry is constantly changing. The evolution that we'll see in the next few years will be significant, as our customers open larger and more luxurious properties, expand into new markets and offer players entertainment options on a scale never seen before.

We're driven to be innovative – developing and delivering the products and technology to take our customers wherever they want to go, right now and for the future. We remain committed to our shareholders, our customers and our employees to provide excellence, quality and service in everything we do – as we continue to fulfill the right vision.

Fiscal 2007 In Review

The past fiscal year was both successful and challenging. IGT answered these challenges with strong financial performance and impressive operational results. While competition remained strong, we integrated new business acquisitions and developed partnerships, and we streamlined our product development processes.

Companywide highlights for fiscal 2007 include record gaming operations revenue of \$1.4 billion; an all-time-high installed base of 59,200 recurring revenue machines, up 9,600 units from 2006; and \$202 million invested in research and development with nearly 1,000 games designed.

Internationally, we achieved record operating profit with a 44% increase over 2006. Successes were most significant in Mexico's gaming operations and Japan's and Asia's

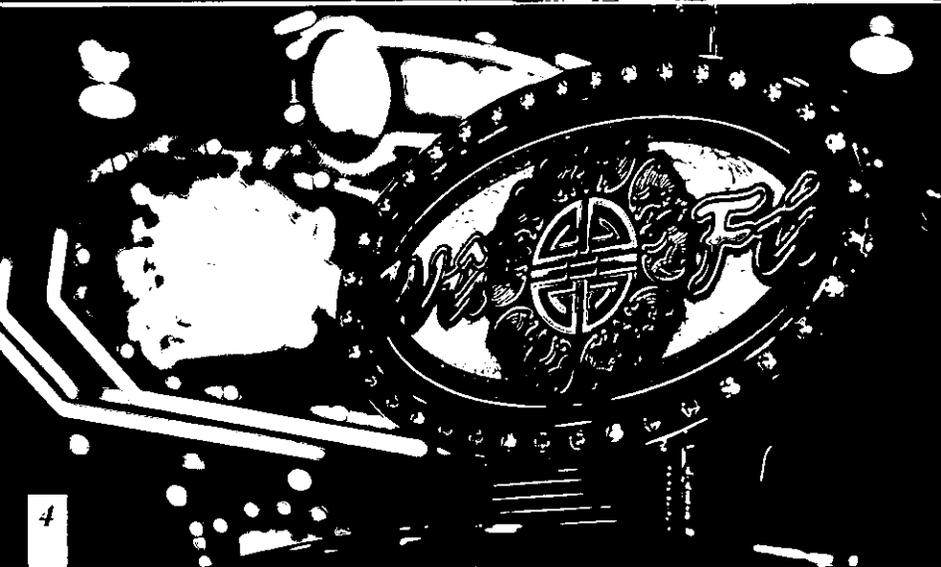

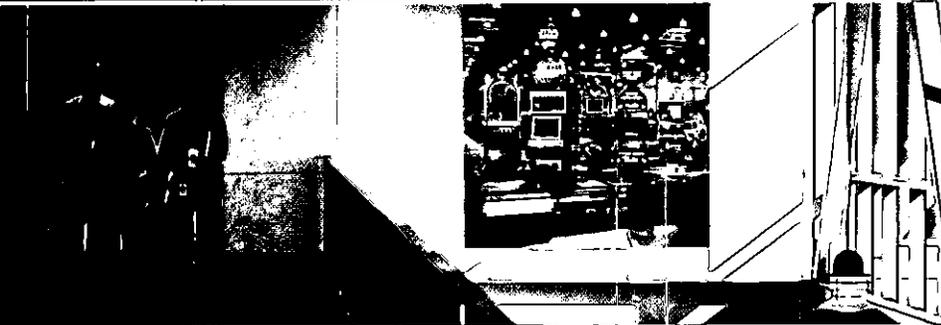

product sales. IGT also established a new office in China.

Let's review more of what happened in the past fiscal year. In October 2006, IGT announced two important intellectual property arrangements. The first was multi-player technology acquired from the Austrian-based gaming company, Novomatic, for use in IGT's *M-P Series*™ multi-player products. The second was an agreement with PureDepth, Inc. for 3-D multi-layer display (MLD) technology that IGT has already applied to the *Indiana Jones*™ and the *Last Crusade*™ Multi-Level Progressives.

In November, the Company announced its 400th installation of the *EZ Pay*® ticket-in, ticket-out system at the Gold Strike Casino Resort in Tunica, Mississippi. IGT also unveiled its *IGT sb*™ casino vision, *M-P Series*™ multi-player product and *AVP*® widescreen cabinet at the annual Global Gaming Expo (G2E) in Las Vegas.

December 2006 was a busy month, as IGT announced the closing of its private placement of \$900 million in Convertible Debentures due 2036, as well as a quarterly cash dividend of 13 cents per share. IGT also finalized the acquisition of VCAT, which became Mariposa Software, Inc. and then resulted in the *IGT Mariposa*™ product line. This software focuses on predictive modeling, business intelligence, and data visualization which we believe will become critical in the server-based world.

To round out the month, IGT marked the 100th installation of the

Wheel of Fortune® Super Spin™ product at the Cherokee Casino in Oklahoma.

The new calendar year of 2007 began with the world's largest penny slot jackpot – \$18.7 million – being hit on a *Penny Megabucks®* game at the Pahrump Nugget Hotel & Casino in rural Southern Nevada. In March, IGT announced additional quarterly dividends, which occurred again in June and September.

In April, IGT entered into a financing agreement with Casino Club in Argentina for casino development, the purchase of 7,000 IGT machines over a 5-year period and installation of the *IGT Advantage®* System. The IGT Board of Directors increased our share repurchase authorization by 50 million shares, and *USA Today* (April 24, 2007) listed IGT as

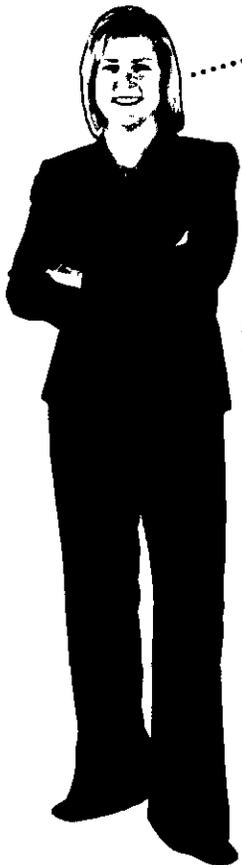

Number 6 in the top-performing public company stocks of the past 25 years.

To gain a foothold in the emerging Chinese lottery market, in May IGT announced a strategic alliance with China LotSynergy Holdings Limited. The Hong Kong-based company is principally involved in investment, project development, and technologies, equipment and consultant services for the China Lottery. A strategic agreement with *Microsoft®* was also announced in May, which will allow IGT to use the new Surface Computing technology in its *M-P Series™* products. The new technology transforms an ordinary tabletop into a translucent, interactive façade that can recognize cell phones, digital cameras, and other physical objects.

June 2007 brought an IGT investment in DigiDeal Corporation, a gaming technology company based in the state of Washington whose patented electronic table game platform will be integrated into the electronic table solutions product line.

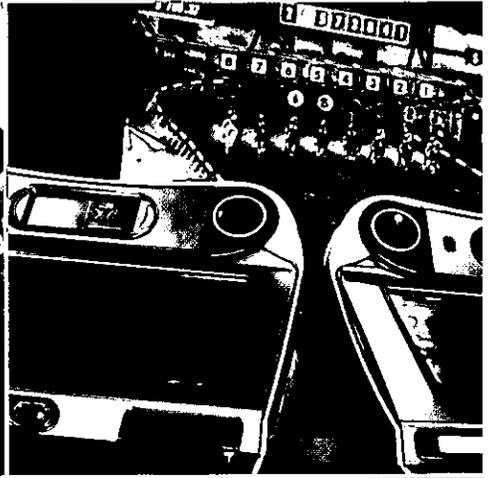

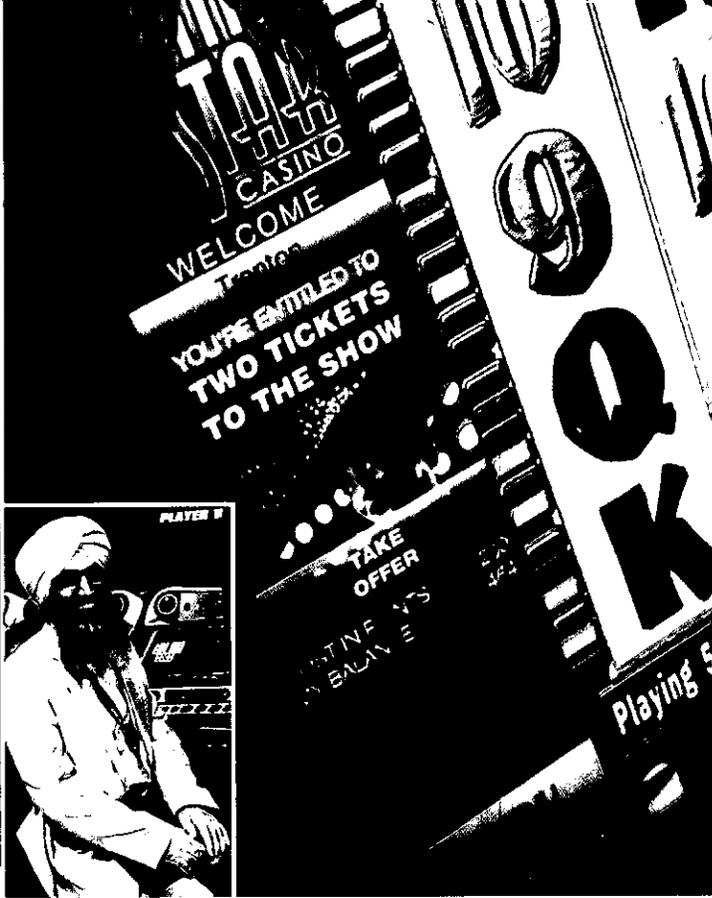

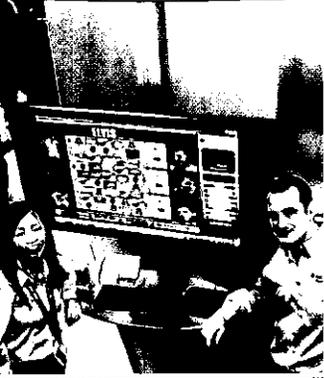

IGT products were honored with 15 of 20 possible awards – including all first-place awards – at “Best of Gaming 2007” in Las Vegas.

Also in June, C2E Asia took place in Macau. IGT displayed 95 machines, showcasing *Emperor's Choice™*, an Asian-specific Multi-Level Progressives game, and the *M-P Series™ Roulette Revolution™* and *Golden Baccarat™* multi-player games. IGT also began moving into its new 618,000-square-foot facility

“ I think the Right Vision
is all about our commitment to
give back to our shareholders.”

in Las Vegas, consolidating several leased properties into one central campus. The final relocations will be completed during fiscal 2008.

We strengthened our organization in June with several key promotions. Steve Morro was promoted to Chief Operating Officer, expanding on his previous role as President, Gaming Division. Danny Siciliano was appointed Chief Accounting Officer and Treasurer, as well as our interim Principal Financial Officer. Eric Vetter was promoted to Senior Vice President of Finance, and Pat Cavanaugh was promoted to Vice President of Corporate Finance and Investor Relations.

In the area of tribal gaming, ICT was named Vendor of the Year in August by the Oklahoma Indian Gaming Association. We

were honored by the National Indian Gaming Association for the Company's commitment to Indian Country and Native American gaming.

The fiscal year ended on several high notes, with the second Network Systems Users Conference staged in Las Vegas and the debut of *Guaranteed Play*™ Poker at Ameristar Casino in Kansas City, Missouri, and at nine Station Casinos properties throughout the Las Vegas area. The Company also increased quarterly cash dividends to 14 cents per share, up from 13 cents per share.

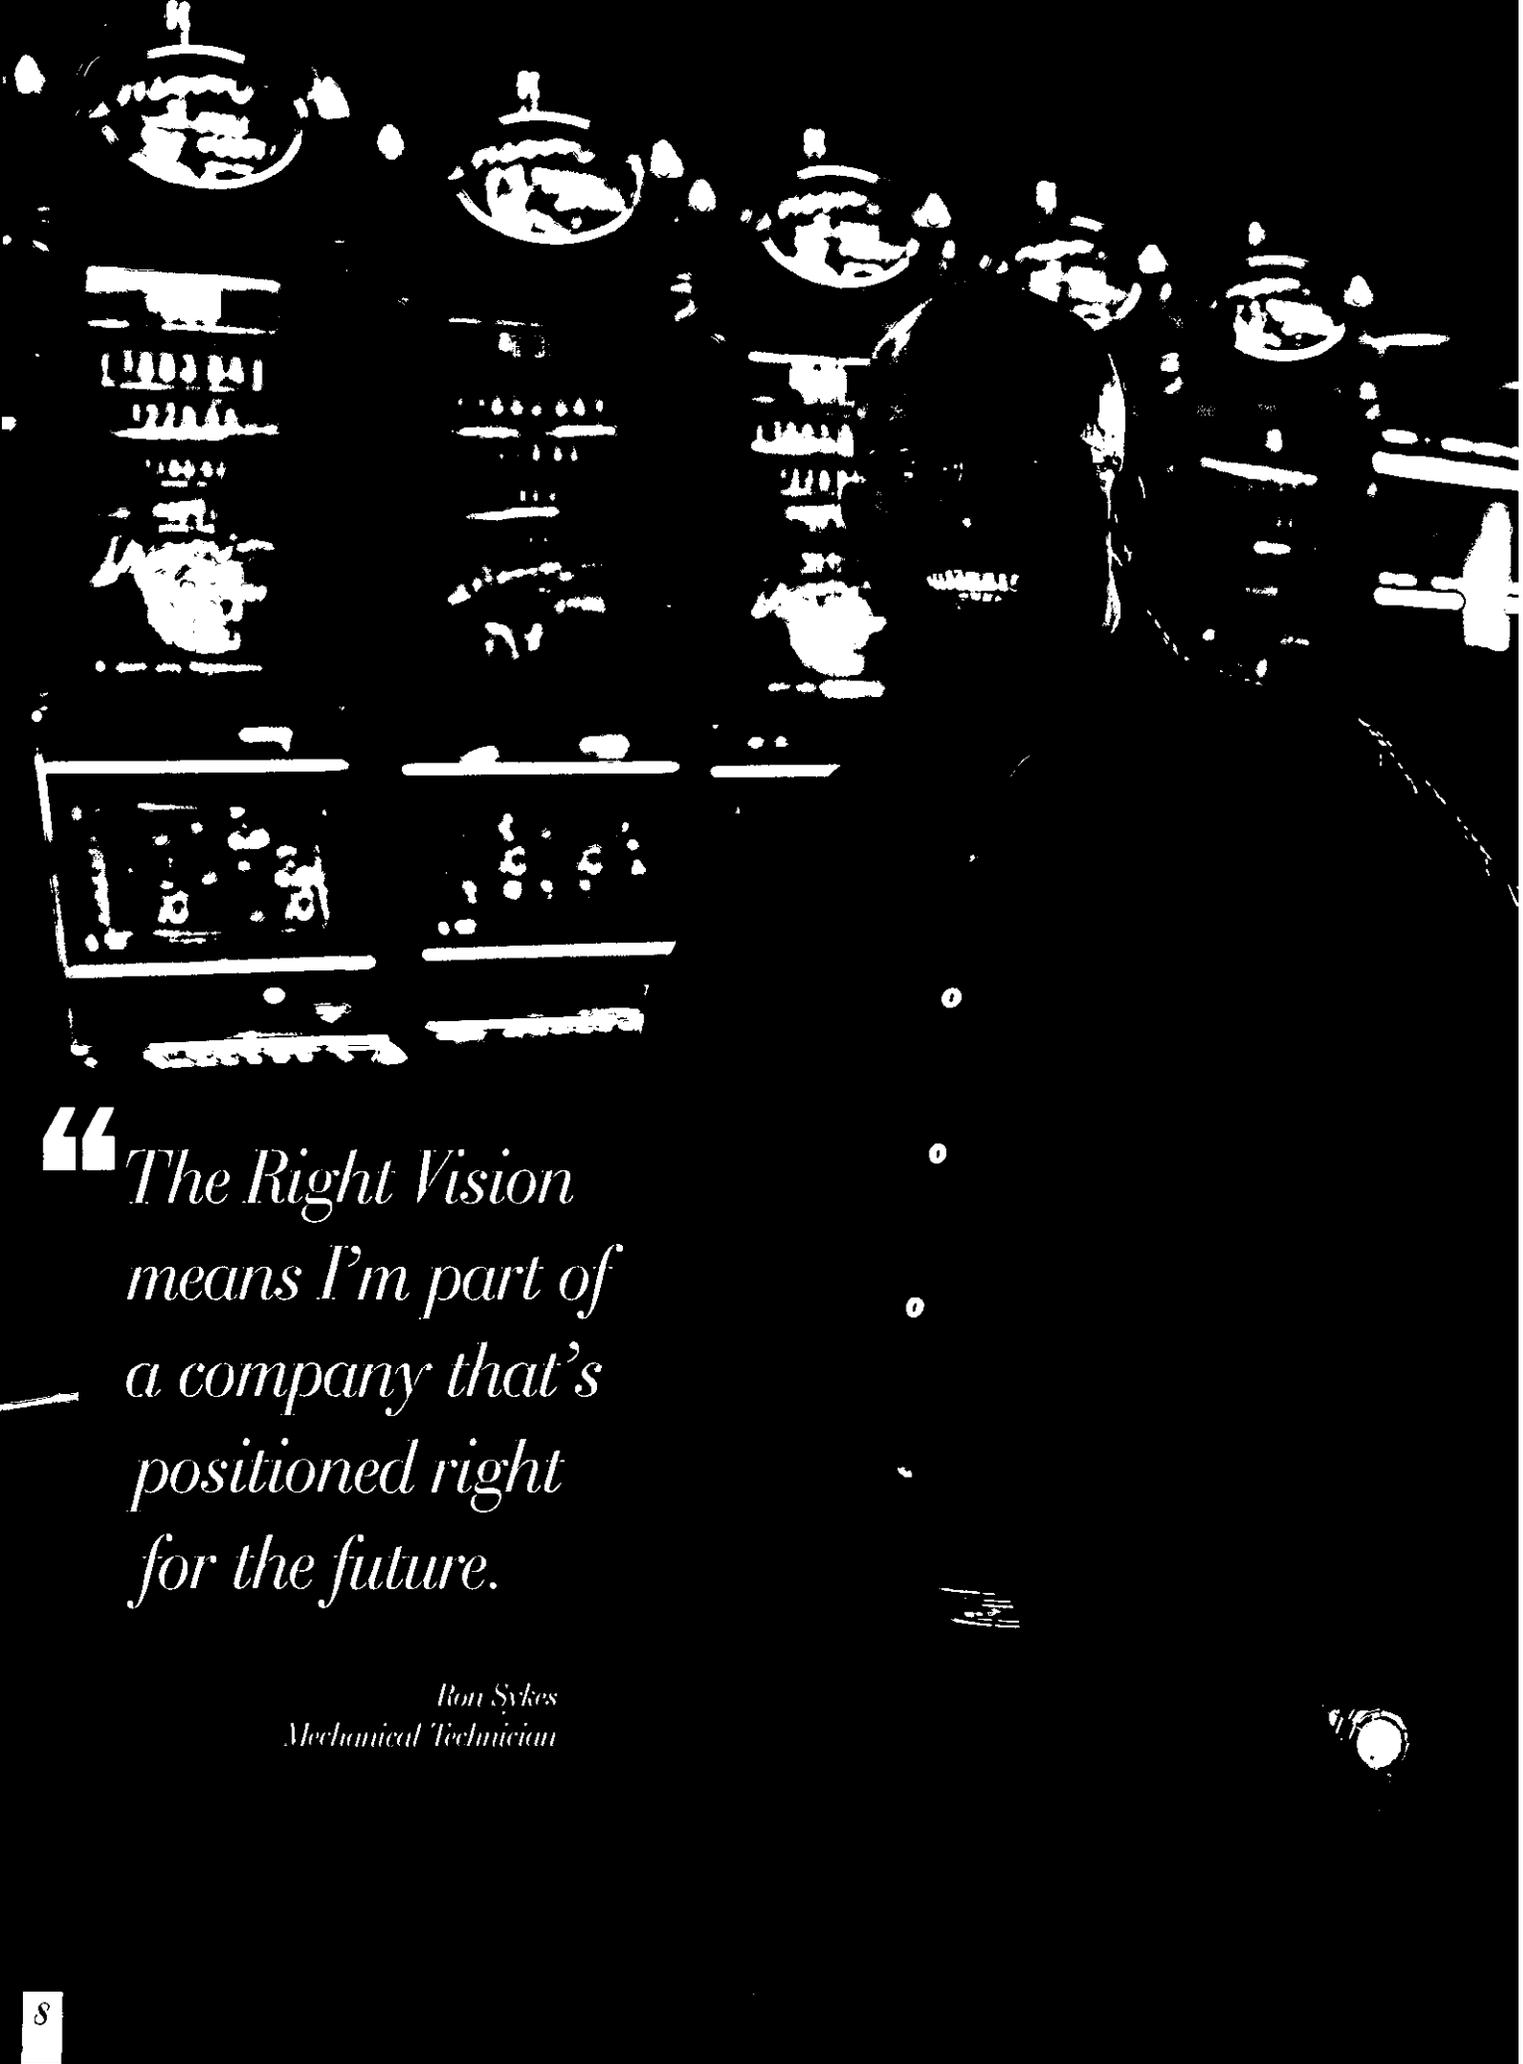

Talk About Innovation

We celebrated a number of important game introductions, demonstrating our commitment to innovation. We delivered the first *ATP*® widescreen game, *Wheel of Fortune*® Multi-Level Progressives, to strong player acceptance. Our first true group gaming concept, *Ancient Chinese Secret*®, and our first multi-line, multi-coin slant-top

“*The Right Vision means doing the right thing, for the right reason, wherever we do business.*”

*Steve Morro
Chief Operating Officer*

“*The Right Vision
means I’m part of
a company that’s
positioned right
for the future.*”

*Ron Sykes
Mechanical Technician*

spinning reel slot machine were also introduced. There were a number of significant product successes in the last year. They included our first spinning-reel Multi-Level Progressive Slots, *Red Hot Jackpots*[™]; another new Multi-Level Progressives product based on *Wheel of Fortune*[®]; several themes on 4- and 5-reel platforms, and *Wolf Run*[®] Video Slots, whose popular math model is being adapted to a catalog of new themes.

ICT was first with several new game play features including a 5-reel, 40-payline configuration, 2-for-1 wagering, a buy-a-pay concept and a *MultiWay*[®] spinning reel game. *Red Hottie*[®], developed for our *Bareest USA*[™] product line, is the first of its kind that lets players “bet up” to bypass the base game and go straight into the bonus.

We developed a new product performance testing process, whereby our games are matched against competitor games and our own games on casino floors across the country, for up to six months. New games have to earn a minimum performance score, based on play over a certain period of time, to be released. In addition, we created what we call a “fast clone” process that gets successful game math models into the market sooner. This process included the release of four new themes based on the popularity of the *Wolf Run*[®] game.

WagerWorks[®] completed the development of the *WagerWorks rgs*[™] (Remote Game Server) product, which will significantly expand our ability to distribute game content. We also formed a Thin Client

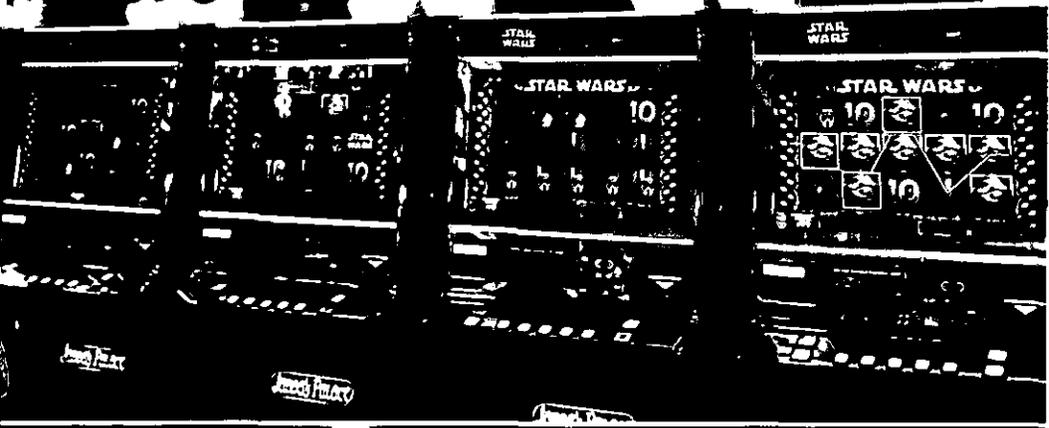

System Group to further integrate *WagerWorks*[®] development, testing and network operations groups within ICT’s existing organization.

We made significant progress on our server-based technology initiatives. Results gathered from field trials conducted at a number of sites across the country led to improvements and advancements in the planned architecture and functionality for the ICT *sb*[™] future – all designed to enhance the player experience and increase operator profit.

We also introduced our award-winning ICT *sb*[™] Service Window technology, a revolutionary advancement in player communications that lets a casino engage and interact with players while they play. For the first time, a casino brand can be delivered directly into the game space. Through the Service Window, the player can view points, comps, offers, branded promotions and services through a touch screen menu located directly in the game space. And the Service Window is interoperable with multiple platforms: legacy games, new games, table games, thin-client applications and even other manufacturers’ machines.

Global Gaming Expo 2007

“The Right Vision. Right now & for the future” was ICT’s theme at the 2007 G2E, and it is the basis of our vision for 2008 and beyond. Our theme reflected the Company’s confidence in our product and technology strategies, and the power and importance of the open

network – all of which will change the casino industry in profound ways.

IGT's unmatched breadth of products – slots, video slots, poker, Class II, *MegaJackpots*[®], central determination systems, network systems, table solutions and Internet gaming – covered an area the length of two football fields. G2E showed that IGT has the resources, the technology, the network, the innovation and the people to bring about the evolution of gaming.

As the gaming industry moves toward an “open” network environment based on Gaming Standards Association (GSA) protocols for product interoperability and flexibility, IGT will continue to

focus on how we can maximize our customers' return on investment right now, and remain a key strategic partner for the future.

IGT bolstered its technology edge by introducing an unprecedented series of five new machine models for our *AVP*[®] product line.

New product introductions included three trailblazing *MegaJackpots*[®] games: the *Indiana Jones*[™] and the *Last Crusade*[™] Slots featuring MLD technology, the *Star Wars*[™] Multi-Level Progressive Video Slots, and the larger-than-life group play *eBay*[®] Video Slots. The *MegaJackpots*[®] product line also introduced *Diamond Jackpots*[™] Multi-Level Progressives and *World Poker Tour*[®] Multi-Level Progressives, *Wheel of Fortune*[®] *Super Spin*[™] *Five-Station*[™] Video Slots, *Multi-Strike*[®] *Triple Diamond*[®] Video Slots, and two new themes – New York and Hawaii – on the *Wheel of Fortune*[®] Multi-Level Progressives System. IGT remains the leader in “must play” games in any casino.

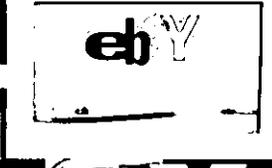

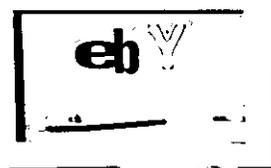

IGT's *M-P Series*[™] multi-player games rolled out with *Roulette Revolution*[™], *Golden Baccarat*[™] and the *Triple Towers*[™] horse racing game, while DigiDeal[™] electronic table technology introduced *Digital 21*[™], *DragonBacc*[™] and *Texas Hold 'Em Bonus*[™]. These table game solutions are a new venture into an emerging market, providing solutions where live table games are not legal, as well as a fun alternative to players who may be intimidated by traditional table games.

“To me, the Right Vision is knowing what our customers will need before they do.”

New IGT video slot themes at G2E included *Golden Tiger Eternal Dragon™* and *Fame & Fortune™*, both two-level progressives; Golden Gate Free Ways, featuring the industry's first horizontal expanding-wild symbol feature; *Lion Dance™*, *Desert Spirit™*, *Lil' Lady™* and *Mayan Riches™*. IGT is poised to bring a whole new library of video slots to market in 2008, meeting both customer requests and player demand.

New spinning-reel themes included several multi-progressives: 5-reel, 30-line *Sizzling 7s®* and 4-reel *Silver Fire 7s™* and *Thunderbird 7s™*, as well as *Double Fire Opal™ MultiWay®* and *Triple Jackpot™ MultiWay®*. Our spinning reel products remain player favorites, especially with our first-to-market new game-play features including 4-reel, 20-line games and 3-reel, 9-line, 9-coin games.

IGT continues to lead in video poker, with innovations from third-party developers providing fresh concepts for this product line. New video poker themes are *Ultimate 4-of-a-Kind™*, *Multi-Strike Poker Deluxe™*, and four new multi-hand themes: *Random Rewards Poker™*, *Friday Night Poker™*, *Good Times Pay Poker™*, and *Quick Quads Poker™*.

New *Barcrest USA™* games included *Ringmaster™*, *Top Dollar Deluxe®* and *Blue Blazes™*. *Barcrest USA™* has been a growing segment of our slot products, as players seek out these unique themes with elaborate top box bonus games.

IGT also featured new additions for Class II gaming, Video

Red Hot Jackpots™ for Central Determination Systems markets, and other new games for lottery jurisdictions.

Guaranteed Play™, the first product of the Walker Digital/IGT collaboration, is now making the transition from video poker to video slots and table games. The concept for play tickets and property marketing packages featuring *Guaranteed Play™* were introduced and are designed to help casinos grow revenues throughout the property by promoting a variety of casino amenities – from hotel, to restaurant, to live entertainment.

New Market Update

In Native America, five California compact amendments and one compact were signed by the Governor in 2007, allowing for 22,000 new machines in the state. The compact and amendments were approved by the legislature, and legislative ratification was to take effect in January 2008. However, four of the five amendments have been put on the February ballot by voter initiative.

The state of Washington and 27 tribes agreed to new compact terms that allow for approximately 9,100 additional Class III gaming machines.

The state of Florida and the Seminole Tribe have been negotiating terms of a compact for tribal operation of Class III games there, and the Mashpee Wampanoag Tribe in Massachusetts was federally recognized and is planning a large-scale casino to be built somewhere in the state, depending on where their trust land is established.

*The right place.
The right time.
It's all coming together
for the Right Vision.*

and Lesley Bicuceme, Game Design*

Opportunities for IGT are expected through the growth in California, New York, Pennsylvania, Kansas, Florida and Oklahoma. In November of 2008, voters in Maryland will be voting on a proposal to legalize up to five casinos with a combined total of up to 15,000 gaming machines. We also look for legislative and regulatory progress in Massachusetts, New Hampshire and Kentucky. Internationally, we anticipate expansion in Mexico, Argentina and Asia, specifically in Japan, Macau, Singapore, the Philippines and China.

What's Next

New technologies will emerge in fiscal 2008 that include continued progress for server-based gaming and the release of the entire lineup of new IGT cabinet designs. As previewed at G2E, IGT has created five new machine cabinet designs that build upon the *AIP*[®] TrimLine machine technology. They are the *AIP*[®] Widescreen Video Machine, the *AIP*[®] Slot, the *AIP*[®] Slot with MLD technology, the *AIP*[®] Widescreen Slant-Top Video Machine, and the *AIP*[®] Bar Top Video Machine. These new machine models will be the most expansive in the history of IGT, all developed and designed to provide our customers and players with better products and new, fresh thinking.

Across all product lines, we are transitioning to our strong, PC-based *AIP*[®] platform, for the future of IGT *sb*[™] products and the open network. *AIP*[®] provides the ability to download games, system and applications via an Ethernet connection, as well as Service Window functionality, cashless support,

high-performance graphics, sound capabilities and complex game play.

To back up our commitment to bring the power of an open network to the gaming industry, we are sponsoring the IGT Global Technology & Interoperability Center for use by other gaming machine manufacturers, customers and manufacturers of third-party products.

This \$10 million, 6,500-square-foot facility is located near IGT's Reno, Nevada campus. The center's collaborative approach will ensure that rigorous testing is conducted in a true-to-life environment that simulates a customer site, so there are no surprises when products are brought to market.

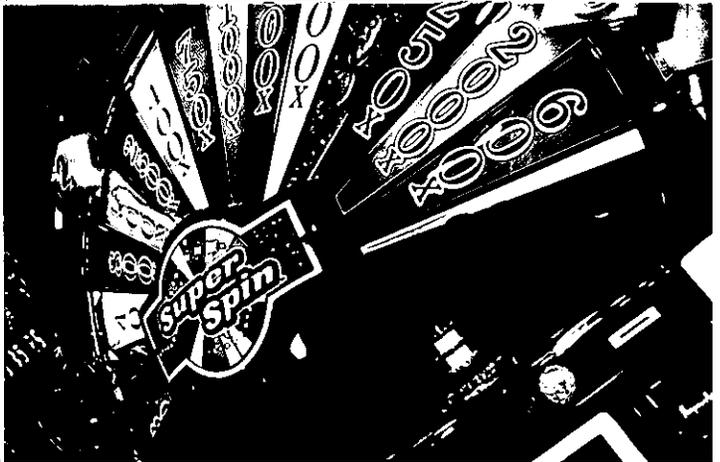

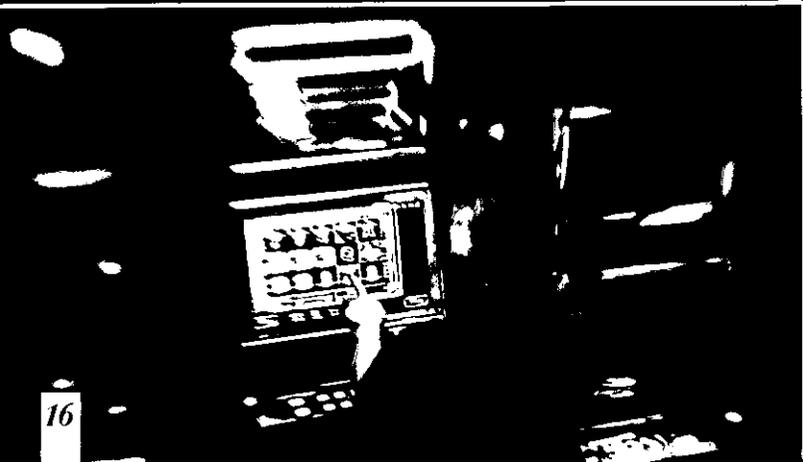

The purpose of the center is to increase customer satisfaction by facilitating cooperation among manufacturers for the creation of products that evolve with emerging technology.

We remain committed to the design, development and production of the most player-demanded games – whether in our video, spinning reel, poker, *Barcrest USA*[™], *MegaJackpots*[®] or table games products. We're proud that our games, systems and platforms remain the best in the industry.

IGT expects to invest over \$1 billion in R&D efforts during the next five years to research, develop and bring the latest technology to market. This technology will be designed to revolutionize the industry and further server-based games – all part of our quest to further the right vision.

FORWARD LOOKING STATEMENTS

This report contains statements that do not relate to historical or current facts, but are "forward looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements relate to analyses and other information based on forecasts of future results and estimates of amounts not yet determinable. These statements may also relate to future events or trends, our future prospects and proposed new products, services, developments or business strategies, among other things. These statements can generally (although not always) be identified by their use of terms and phrases such as anticipate, believe, could, would, estimate, expect, intend, may, plan, predict, project, pursue, will, continue, and other similar terms and phrases, as well as the use of the future tense.

Examples of forward looking statements in this report include, but are not limited to, the following categories of expectations about:

- ♣ our ability to introduce new products and stimulate replacement demand
- ♣ the timing, features, benefits, and expected success of new product introductions
- ♣ the timing of the introduction of and revenues from server-based systems
- ♣ benefits from research and development efforts
- ♣ results of our collaboration with the Gaming Standards Association
- ♣ our ability to acquire, develop or protect intellectual property
- ♣ our market share, competitive advantage, and leadership position
- ♣ the advantages offered to customers by our products and product features
- ♣ gaming growth, expansion, and new market opportunities
- ♣ our ability to benefit from and effectively integrate and utilize acquired businesses and assets
- ♣ investments in other entities and improved position in related markets
- ♣ factors impacting future gross margins and tax rates
- ♣ increasing growth or contributions from certain non-machine products and services
- ♣ increasing machine sales or placements
- ♣ legislative or regulatory developments and related market opportunities
- ♣ available capital resources to fund future operating requirements, capital expenditures, payment obligations, and share repurchases
- ♣ timing and amount of future share repurchases and dividends
- ♣ expectations regarding losses from off-balance sheet arrangements

Actual results could differ materially from those expressed or implied in our forward looking statements. Our future financial condition and results of operations, as well as any forward looking statements, are subject to change and to inherent known and unknown risks and uncertainties. See Item 1A, Risk Factors, in this report for a discussion of these and other risks and uncertainties. You should not assume at any point in the future that the forward looking statements in this report are still valid. We do not intend, and undertake no obligation, to update our forward looking statements to reflect future events or circumstances.

Item 1. Business

GENERAL

International Game Technology is a global company specializing in the design, manufacture, and marketing of computerized gaming equipment, network systems, licensing and services. We are a preeminent supplier of gaming products to the world, maintaining a wide array of entertainment inspired gaming product lines and targeting gaming markets in all legal jurisdictions worldwide. We are committed to providing quality gaming products at competitive prices, designed to increase the potential for operator profits by serving players better.

International Game Technology was incorporated in Nevada in December 1980 to acquire the gaming licensee and operating entity, IGT, and to facilitate our initial public offering. Principally serving the United States (US) gaming markets when founded, we expanded into jurisdictions outside the US in 1986. In addition to our main US production facilities in Nevada, we manufacture gaming products in the United Kingdom (UK) and through a third party manufacturer in Japan. We currently maintain sales offices in various gaming jurisdictions around the world.

In addition to our 100% ownership of IGT, International Game Technology has the following directly or indirectly wholly-owned or controlled and consolidated operating subsidiaries:

- ▲ Acres Gaming Incorporated
- ▲ Digideal Corporation
- ▲ I.G.T. - Argentina S.A.
- ▲ I.G.T. (Australia) Pty. Limited
- ▲ International Game Technology (NZ) Limited
- ▲ IGT Asia, Lda.
- ▲ IGT do Brasil LTDA.
- ▲ IGT - Canada Inc.
- ▲ IGT - China, Inc.
- ▲ IGT - Europe B.V.
- ▲ IGT - Iceland Ltd.
- ▲ IGT - Hong Kong Limited
- ▲ IGT - Japan, K.K.
- ▲ IGT - Latvia SIA
- ▲ IGT - Maine, Inc.
- ▲ IGT - Mexicana de Juegos, S. de R.L. de C.V.
- ▲ IGT - UK Holdings Limited (Barcrest)
- ▲ International Game Technology - Africa (Pty) Ltd.
- ▲ Mariposa Software, Inc.
- ▲ WagerWorks, Inc.

Unless the context indicates otherwise, references to "International Game Technology," "IGT," "we," "our," or "the Company" includes International Game Technology and its consolidated subsidiaries and variable interest entities (VIEs). Italicized text in this document with an attached superscript trademark or copyright notation indicates trademarks of IGT or its licensors. For more information about our trademark and copyright ownership information, please visit our website, www.IGT.com.

IGT's principal corporate executive offices are located at:
9295 Prototype Drive
Reno, Nevada 89521
Telephone: (775) IGT-7777

Through the Investor Relations link on our website, we make available free of charge, as soon as reasonably practical after such information has been filed or furnished to the Securities and Exchange Commission (SEC), our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act and proxy statements on Schedule 14A. Our corporate governance guidelines and charters for our Audit, Compensation, and Nominating and Corporate Governance Committees are also available on our website. This information will be mailed in print form free of charge to any shareholder upon request.

BUSINESS SEGMENTS

We derive our revenues from the distribution of electronic gaming equipment and network systems, related services and licensing of intellectual property (IP). Operating results reviewed by our chief decision maker encompass all revenue sources within each geographical customer region. We currently view our business in two operating segments, each incorporating all types of revenues.

- ◆ North America consists of our operations in the US and Canada, comprising 77% of consolidated revenues in fiscal 2007 and 79% in 2006 and 2005.
- ◆ International encompasses all other IGT operations worldwide, comprising 23% of consolidated revenues in fiscal 2007 and 21% in 2006 and 2005.

Additionally, certain income and expenses related to company-wide initiatives are managed at the corporate level and not allocated to an operating segment. Other segment and financial information contained in BUSINESS SEGMENT RESULTS of our management discussion and analysis (MDA) and Note 18 of our Consolidated Financial Statements is incorporated here by this reference.

PRODUCTS

We provide a broad range of electronic gaming equipment and network systems, as well as related services, parts, game theme conversions, and IP licensing.

- ◆ Traditional casino-style slot machines determine the game play outcome at the machine, encompassing:
 - ◆ classic physical reel slots
 - ◆ video poker slots
 - ◆ video reel slots
 - ◆ Class III, a regulatory classification for a traditional casino-style slot machine used in tribal jurisdictions
- ◆ Wide area progressive (WAP) jackpot systems link machines across several casinos within a designated jurisdiction
- ◆ Central determination system (CDS) machines are connected to a central server which determines the game outcome, including:
 - ◆ video lottery terminals (VLT) for government sponsored applications
 - ◆ electronic or video bingo machines
 - ◆ Class II, a regulatory classification for electronic bingo systems used in tribal jurisdictions
- ◆ Amusement With Prize (AWP) games, popular in Europe, incorporate limited payouts with features that allow players to exercise an element of skill and strategy
- ◆ Pachisuro machines or pachislots distributed in Japan are a smaller, simpler variation of American slots, featuring low payouts
- ◆ The *IGT Advantage™* Casino System is a suite of fully integrated casino management solutions for:
 - ◆ machine accounting
 - ◆ patron management
 - ◆ cage and table accounting
 - ◆ ticket in/ticket out
 - ◆ bonusing (jackpots and promotions)
 - ◆ table game automation
- ◆ *IGT Mariposa™* integrated casino customer relationship management (CRM) solutions feature fully integrated marketing and business intelligence systems which provide analytical, predictive, and management tools to maximize casino operational effectiveness
- ◆ *MP Series™* Multi-Player suite provides community-style gaming on a common display, especially useful in jurisdictions where live table games, such as roulette or baccarat, are not allowed
- ◆ *Digideal™* electronic table games include live dealer hosted configurations with digital cards and live chips or virtual chips/electronic credits, as well as a fully virtual platform that can be approved as a slot game, providing table-like gaming for slot only or limited table jurisdictions

We supply our gaming products directly to the customer or through distributors in certain jurisdictions. We also offer equipment contract financing for qualified customers and development financing loans to select customers for new or expanding gaming facilities.

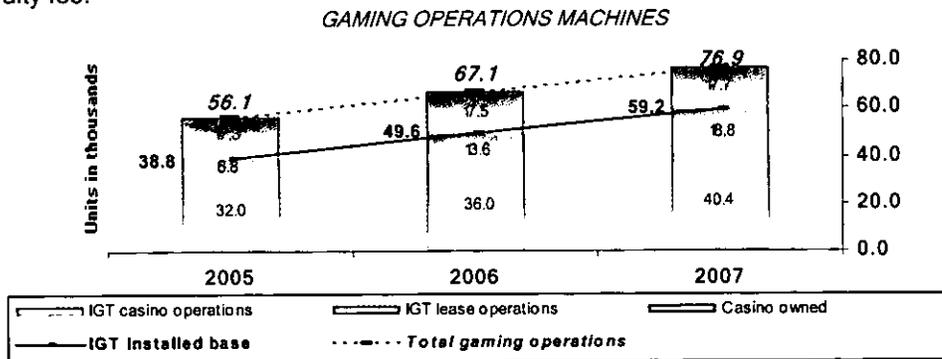

REVENUE STREAMS

We have two revenue streams -- gaming operations and product sales.

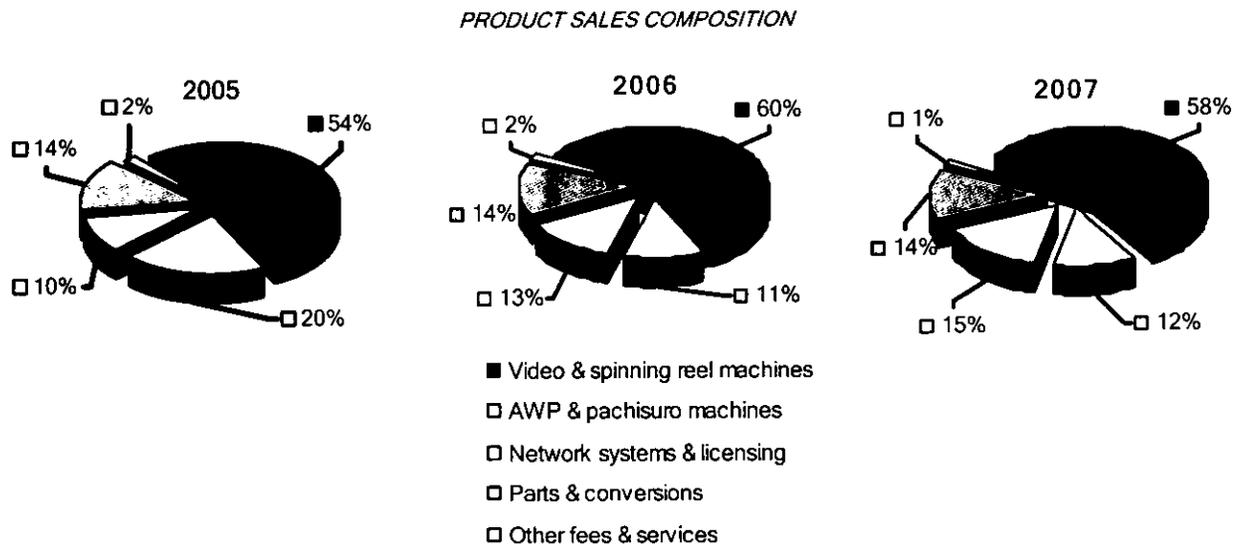

Gaming operations generate recurring revenues by providing customers with our proprietary gaming products, services or IP under a variety of participation or fixed daily/monthly fee billing arrangements. Gaming operations comprised 52% of consolidated revenues in fiscal 2007 and 50% in 2006 and 2005. See Note 1 of our Consolidated Financial Statements for additional information regarding pricing arrangements and revenue recognition.

A number of factors influence gaming operations revenues and gross margins, including the number and type of machines in service, levels of play (which are somewhat dependent on casino seasonal trends), and variations in pricing arrangements. Gross margins also include the cost of funding progressive jackpot payments to winners, which is subject to interest rate volatility. We monitor the productive life cycle of our proprietary games and systematically replace units experiencing declining play levels with newer games.

We place games under recurring revenue arrangements in over 100 gaming jurisdictions worldwide. The IGT installed base of gaming machines recorded on our balance sheet as part of property, plant and equipment includes casino operations and lease operations units. IGT casino operations units are comprised of traditional casino, Class III, Class II, and other higher yielding gaming machines. IGT lease operations units consist of VLT and other lower yielding gaming machines. Casino owned units are machines sold that also provide a recurring royalty fee.

Product Sales include the sale of gaming machines, network systems, parts, game theme conversion kits, related equipment, services, and IP licensing. Product sales comprised 48% of consolidated revenues in 2007 and 50% in 2006 and 2005. As our gaming products become more systems-centric in nature, we anticipate a growing portion of sales from non-machine products. Non-machine revenues (including network systems with related licensing fees, parts and conversions, as well as other miscellaneous royalty fees and services) collectively comprised 30% of product sales in fiscal 2007, 29% in 2006, and 26% in 2005.

PRODUCT DEMAND

A number of factors drive demand for our gaming products.

We believe customer strategies to upgrade casino floors with newer games and technologies that combine higher yields with cost savings, convenience, and other benefits drive replacement sales. New or emerging technology that provides operators with a favorable return on investment has the ability to accelerate a machine replacement cycle. This technology may come in the form of new gaming machine cabinets with more processing power or new features having a positive impact on player appeal and/or operator profits.

Casino expansion or new casino openings generate new product demand and stimulate replacement demand at neighboring casinos, which upgrade in order to remain competitive. New jurisdictions establishing legalized gaming also create product demand, contributing to significant growth in the installed base of gaming machines during the past few decades. Finally, a gaming equipment supplier's reputation for consistently delivering and supporting quality products will encourage operators to select them over others.

STRATEGIC ACQUISITIONS

As part of our ongoing efforts to create shareholder value, we complement our internal resources through strategic alliances and business acquisitions that:

- ▲ offer opportunities to diversify our geographic reach
- ▲ expand our product lines and customer base
- ▲ leverage our technological and manufacturing infrastructure to increase our rates of return

Our significant business acquisitions include:

<u>Company Acquired</u>	<u>Date</u>	<u>Cost</u>
<i>(In millions)</i>		
Digideal Corporation	June 2007	\$ 31.2
Venture Catalyst Incorporated (VCAT)	December 2006	21.9
WagerWorks, Inc.	August 2005	89.1
Acres Gaming Incorporated	October 2003	134.0
Anchor Gaming	December 2001	1,323.9

Additional information about current year acquisitions is contained in Note 5 of our Consolidated Financial Statements. WagerWorks provided additional opportunities to expand the distribution of content across new channels and mediums. Acres Gaming further positioned us as a leading global provider of casino gaming systems. Anchor Gaming helped to grow our business presence by allowing us to consolidate all activities of the Spin For Cash Joint Venture and afforded us opportunities to further integrate complementary resources, most significantly the *Wheel of Fortune®* brand and patents.

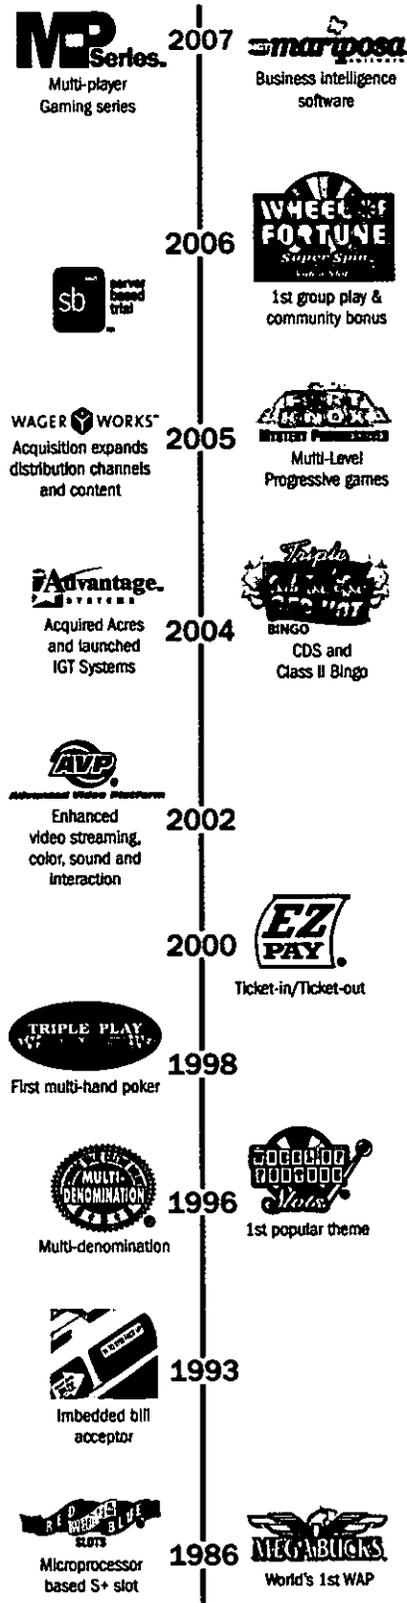

PRODUCT DEVELOPMENT

The vision behind IGT product development is to serve players better by utilizing the power of networked gaming, information technology, game design, and services to maximize the potential for operator profitability. The foundation of our business model is built on the creation and delivery of game content through integrated casino systems solutions to machine platforms. Our product innovation reflects the anticipation of consumer needs, as well as customer feedback and market trends.

We support our product development efforts through a considerable emphasis and investment in research and development (R&D) of future technology, which we believe enables IGT to maintain a leadership position in the industry. We dedicate over 1,500 employees worldwide to product development in various disciplines from hardware, software and firmware engineering to game design, video, multimedia, graphics and sound. Our investment in R&D totaled \$202.2 million in fiscal 2007, \$188.5 million in 2006, and \$138.4 million in 2005.

Our primary development facilities are located in Nevada, and we have several design centers strategically located worldwide, allowing us to quickly respond to unique market needs and local player preferences. IGT global design centers provide local community presence, customized products, and regional production where beneficial or required. Our UK facility designs and configures AWP and casino games. Our Japan team designs IGT pachisuro games in conjunction with a third party manufacturer. Two teams in Australia design club and casino products. In addition, our corporate R&D group, IGT Labs, is also dedicated to establishing strategic partnerships with key technology providers.

During fiscal 2007, we began a World Game Platform initiative to unify and standardize our technology, design, and development across all global markets. We anticipate reducing time and cost to market by having standardized development worldwide enabling content delivery through uniform technologies. We believe this initiative will facilitate development and deployment of games into any combination of gaming markets, including both thick (processing at the machine) and thin (processing at the server) client-server environments.

Games

We combine the elements of math, play mechanics, sound, art and technological advancements with our library of entertainment licenses and patented IP to provide gaming products with a high degree of player appeal. We continue to expand our game libraries, emphasizing development of game content to address changing consumer preferences and other market trends. Our objective is to develop games that incorporate exciting winning combinations, and appealing graphics and sound.

We actively develop new themes for video reel and video poker, as well as enhance our classic spinning reel products with popular multi-line, multi-coin configurations. We make ongoing efforts to upgrade and optimize our proprietary flagship theme games, such as *Wheel of Fortune®*, *Megabucks®*, and *Star Wars™*, with theme refreshers and innovative features to enhance play. Our games are invented primarily by employee designers and artists. Although not materially dependent on third party developers, we find they can provide added sources of creative ideas and game content.

Using our Product Performance Testing system, we evaluate and forecast the acceptance of new products to quickly identify the more popular gaming concepts. A central computer monitors the performance of games placed in several key casino locations that provide a representative sampling. This system results in a quicker release of higher performing games incorporating market-tested concepts.

Fiscal 2007 highlights

Through our global design facilities, we developed just under 1,000 game themes, including those for traditional gaming environments and unique versions customized for video lottery, CDS, Class II, and international markets. We remain a leader in spinning reel and video poker games in North America, but competition is intense in all categories. We are vigorously competing in video game development and continue designing innovative spinning reel and poker games.

We launched additional group play products offering community rounds where multiple players can participate in the same bonus for added player interaction and high-stakes player attraction. Group player offerings introduced in fiscal 2007 include *Indiana Jones™* and *Ancient Chinese Secret™*. In fiscal 2008, we plan to introduce *Wheel of Fortune® Super Spin™ Five-Station™*, a smaller version of our popular *Wheel of Fortune® Super Spin™*, *eBay™* and *The Price is Right® Multi-Station™*.

We continued the expansion of our winning multi-level progressive (MLP) games that provide more frequent lower level progressive jackpots. The recent introduction of our 5-reel *Wheel of Fortune®* MLP in Nevada and Native America jurisdictions has been well received. This game allows players to buy-up to different bonus levels, a feature designed to increase the average wager. We plan to continue developing future MLP products, adding WAP features and group play options.

We further developed our *MP Series™* of interactive, multi-player station gaming products. The *MP Series™* product is comprised of several individual stations connected to a central control device and is available in numerous modular configurations based on operator preferences. We also expanded the *MP Series™* product suite this year with the addition of *Digideal™* electronic table games. We expect multi-player and electronic table games will become increasingly important, especially in jurisdictions that do not allow live versions of table games. We plan to introduce Baccarat and Roulette themes in the *MP Series™* during the first half of fiscal 2008 and anticipate other game themes to follow in the future.

Under arrangements to facilitate development of Walker Digital casino innovations, we initiated our first product collaboration with *Guaranteed Play™*, a creative new method of wagering game play. Instead of one wager at a time, *Guaranteed Play™* patrons have the option of purchasing multiple hands of poker or spins of slot play at a fixed price in advance. We introduced *Guaranteed Play™* Poker in limited markets during the latter half of fiscal 2007 and expect a wider release to follow in early fiscal 2008. We anticipate future product offerings will integrate *Guaranteed Play™* through our server-based network (*sb™*) to give operators the ability to package slot play with other promotional offerings.

Network Systems

Games and network systems continue to converge as markets increasingly require this synergy for regulatory purposes, and operators rely more and more on systems to manage game performance and player preferences. As we develop and integrate gaming systems, we recognize networks have the power to dramatically change the appearance and improve the usefulness of gaming systems. Limited gaming networks currently include *IGT Advantage™* casino management systems, *EZ Pay@*ticket systems, CDS, and WAP systems.

Focusing on a more comprehensive enterprise-wide network systems solution, our ongoing server-based gaming (*sb™*) development is designed to provide IGT customers with tools to more efficiently manage the casino floors and deliver exciting new gaming experiences to players. We believe widespread adoption of *sb™* will require implementation of an open architecture that allows distribution of features and applications across multiple gaming manufacturers' platforms and devices. We are committed to leading the networked gaming transformation through collaboration with the Gaming Standards Association (GSA) to support and implement industry standard protocols enabling a seamless interface with a variety of platforms. In January 2008, we plan to open the IGT Global Technology Center and Interoperability Center, a facility open to manufacturers, strategic partners, and system integrators for compatibility and performance testing of their GSA protocol products, with an emphasis on third-party interface integration assessments.

At the same time, we are focusing significant development efforts on network applications and features providing an enhanced player experience at the machine. Our customers indicate it is important for *sb™* to have features beyond operational efficiencies and game download functionality. We believe the acceptance of server-based gaming also depends on its ability to change the player's experience on the casino floor and offer new ways for casinos to market to their players. In our view, applications that help casinos retain players and create additional revenue opportunities will motivate the operator to implement *sb™* enterprise-wide. We are engineering these features now, and expect to demonstrate for operators and regulators the security, efficiency and revolutionary player and casino marketing features this technology can provide.

Our business partners at *sb™* pilot properties are testing the initial operational aspects of IGT's *sb™* system and providing valuable feedback to ensure we design products that meet their business needs and regulatory requirements. Five commercial field trials of our server-based system are currently underway in California, Nevada, Michigan and Missouri. The information gathered in the past year from these pilots has enabled IGT to identify issues associated with integration of different machine platforms, slot accounting and player tracking systems. During the first half of fiscal 2008, we plan to upgrade our field trials to the next phase with GSA protocols.

We will continue combining the power of the network with server-based applications, casino transactional systems, and business intelligence software, and unique new gaming products. Toward these efforts, we acquired the Mariposa software, which provides IGT with data mining technology and predictive modeling. This tool is designed to enable the casino to improve profitability by managing and targeting its activities according to projected customer behaviors.

Additionally, we continue supporting and enhancing our *IGT Advantage™* Casino System, a suite of traditional casino management software providing operators with real-time information in the areas of slot machine performance, patron management, table game reporting and analysis, along with cage and credit data. This system suite features *EZ Pay@* Ticketing, as well as direct player marketing systems such as *Bonusing™* and *NexGen@* interactive multi-media displays.

We continually adapt game content for video lottery CDS. Our CDS features include cross property bingo draws, game software downloading, remote game configuration, full accounting and performance reports, virtual private networks and ticket-in/ticket-out (TITO) compatibility.

Platforms

Platforms are the means by which players interact with the games, and we support several in order to maximize our game distribution reach. The challenge of platform development is in determining how to effectively use a wide range of technologies to satisfy global markets with the right features, cost points, and delivery dates. The ultimate goal is ensuring that our content can be deployed through a number of different channels, including traditional gaming platforms, as well as wireless networks, and the internet.

We serve evolving gaming markets with strength and flexibility. Multi-line, multi-coin video games are currently among the most popular games on the casino floor. In response to this trend, our products employ advanced

technology enhancing entertainment and communication features, while retaining many of the familiar and popular features of legacy games.

Our *Advanced Video Platform®* or *AVP®* is designed to support the next generation of video games. This platform provides improved graphic capabilities such as:

- ♣ full screen live streaming videos
- ♣ animations with vivid colors
- ♣ enhanced stereo and surround sound
- ♣ expanded storage capacity, allowing for complex bonus features

To facilitate future server-based gaming applications, our *AVP®* is capable of supporting GSA communication standards necessary for the integration of open, casino wide networks in addition to video capabilities required to support a service window. We are further diversifying the *AVP®* cabinet library in fiscal 2008 with liquid crystal display widescreens and a consistent full featured set of products available in all major configurations. Additionally, we expect to introduce an innovative new multi-layered display providing a crisp 3-D representation of spinning reels, appealing to video and reel players alike.

Our library of games continues to grow with *AVP®* as our standard development platform. We also continue to support traditional platforms, including our:

- ♣ *Game King®* video platform using the 80960 processor, offering a single or multi-game format, a touch screen monitor, and interactive video slot games with animated graphics and secondary bonus features
- ♣ *S2000®* and *Reel Touch®* 80960 spinning reel platform, which combines one of our broadest game libraries with upgraded processor boards and an enhanced sound package
- ♣ *VLC 8800™* platform widely used in government sponsored jurisdictions, with the ability to connect with most major North America video lottery control systems
- ♣ Blue Chip platform used in Australia and New Zealand
- ♣ Barcrest MPU5 AWP platform produced in the UK
- ♣ Pachisuro platform used in Japan

We continue leveraging our collective design facilities worldwide in developing game content for delivery through third party platforms, interactive digital TV, cell phones, the internet, and other mobile gaming outlets, as well as networking technology for remote game management and downloading. Our fiscal 2007 efforts to bring premium branded games to the internet casino platform resulted in the development and certification of an online version of IGT *Megabucks®* expected to release in fiscal 2008. Internet versions of other popular *Megajackpots®* themes are expected to follow. Additionally, we created *rgs™* or remote game server, which will facilitate deployment of our games to various platforms. During fiscal 2007, we also developed a new Barcrest Triple-7 video cabinet for European personal computer game content.

Intellectual Property

Our patents, trademarks, copyrights and other IP rights are significant assets. We seek to protect our investment in R&D and the unique, distinctive features of our products by perfecting and maintaining our IP rights. We obtain patent protection covering many of our products and have a significant number of US and foreign patent applications pending. Our portfolio contains a significant number of domestic and foreign patents related to a variety of video and electronic gaming equipment and systems, including game designs, bonus and secondary game features, and gaming device components.

We market most of our products under trademarks and copyrights that provide product recognition and promote widespread acceptance. Our products may also contain other content licensed from third parties, such as trademarks, fictional characters, or storylines. We seek protection for our copyrights and trademarks in the US and various foreign countries, where applicable.

Others may infringe upon or develop products in violation of our IP rights, and the issue of patents under pending applications is not a certainty. We are subject to general litigation risk related to our ability to enforce and maintain patents, copyrights, trademarks and other IP rights. Seeking enforcement of or declaring our IP rights often results in other parties asserting that our rights are invalid or alleging rights of their own against us. We describe certain IP litigation in Note 16 of our Consolidated Financial Statements.

MARKET REGIONS

We market our gaming products in legalized gaming jurisdictions around the world. While our most significant markets are in North America, we continue to pursue expanding international markets. Opportunities, challenges and our successes vary across these jurisdictions. In the following, we describe various regional development expectations about market size, timing, and government actions. We cannot be certain these expectations will be realized or the extent to which IGT will benefit if they are realized.

North America

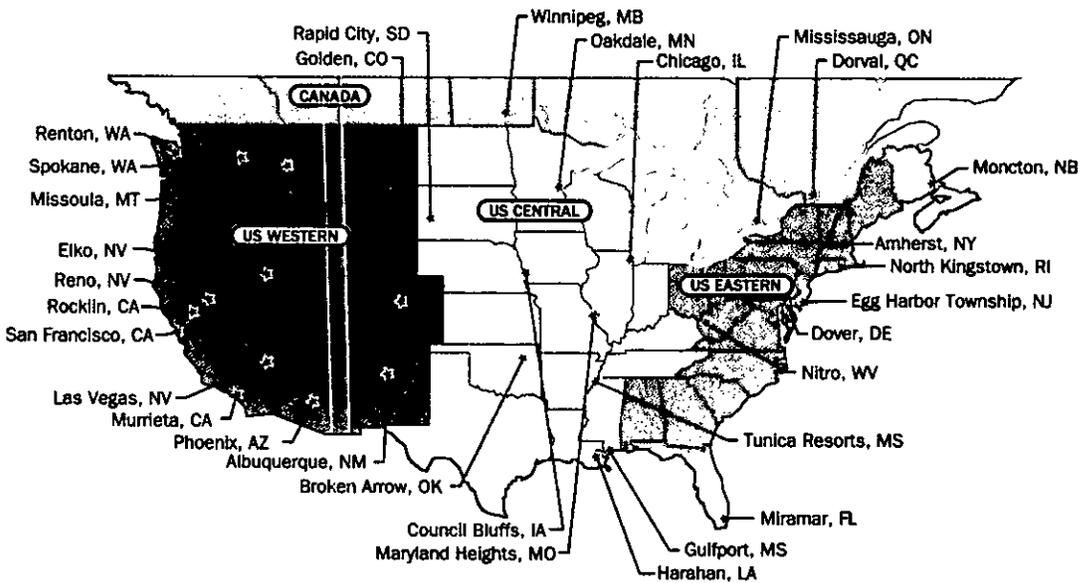

As an industry leader, we have participated in the growth of North America gaming, beginning in the early 1990s with Midwest riverboats, through the spread of tribal casinos, and into non-traditional venues such as racetracks (also known as racinos) and bingo parlors. We estimate the base of gaming machines installed in North America has increased from 184,000 machines in 1991 to 889,000 machines in 2007. Our estimate of the installed base of gaming machines in North America below is based on internal data and information provided by various gaming agencies.

September 30,	Estimated Market Base	
	2007	2006
Traditional	219,000	224,000
Native America Tribal	123,000	114,000
Racino/Lottery	<u>36,000</u>	<u>33,000</u>
US Western	378,000	371,000
Traditional	125,000	112,000
Native America Tribal	117,000	103,000
Racino/Lottery	<u>22,000</u>	<u>22,000</u>
US Central	264,000	237,000
Traditional	59,000	62,000
Native America Tribal	38,000	36,000
Racino/Lottery	<u>60,000</u>	<u>41,000</u>
US Eastern	157,000	139,000
Traditional	52,000	51,000
Racino/Lottery	<u>38,000</u>	<u>38,000</u>
Canadian	90,000	89,000
Total North America	<u>889,000</u>	<u>836,000</u>

Gaming continues to grow in popularity as a leisure activity in North America. This growth is facilitated by the development of newer, more innovative gaming devices, as well as by the legalization of gambling in jurisdictions where governments are looking for new ways to support public operations. We expect to benefit from further expansion of legalized gambling jurisdictions in fiscal 2008. Legislative actions and the passage of voter referendums are providing new and expanding opportunities in Florida, Pennsylvania, Kansas, Indiana, Washington and California. We continue monitoring gaming legislation in several other states, including Maryland, Massachusetts, Illinois, and Texas. With our leadership position in traditional and Class III gaming products and our growing presence in CDS and Class II products, we believe we are well positioned to be a supplier of choice in any new or expanding jurisdictions.

Sales and Service Regions

Our North America offices are organized into four regions to better respond to customer needs.

US Western

Legalized gaming established in 10 of the 11 western states represents approximately 43% of gaming devices in North America, including:

- ♣ Traditional casinos in Nevada and Colorado
- ♣ Class II and Class III casinos in California, Arizona, Colorado, Idaho, Oregon, Wyoming and New Mexico
- ♣ CDS facilities in Washington
- ♣ VLT facilities in Oregon, Montana and New Mexico

Nevada holds the largest share of traditional gaming machines in this region with approximately 202,000 machines in more than 280 casinos statewide, with Las Vegas having the highest concentration and continuing to grow. Current casino projects approved or under construction will provide further growth opportunities over the next three years.

California Native America properties have the second largest number of machines and the highest concentration of Class II gaming within the region. The California legislature approved five new tribal compacts in June 2007, allowing for an incremental 22,500 machines in the state. Opponents of four compacts have gathered signatures for a referendum to disallow the compacts and the addition of 17,000 of the approved incremental machines. Although the number and timing of incremental machines remains uncertain, we anticipate opportunities will develop over the course of the next few years.

We continue to increase our share of machines in Washington State through competitive pricing and a steady supply of CDS game titles. We expect future opportunities in Arizona, Colorado, New Mexico and Idaho will provide both replacement and expansion growth.

US Central

Spanning 18 states and approximately 30% of North America gaming devices, the central region encompasses:

- ♣ riverboats in Illinois, Indiana, Iowa, Louisiana, Mississippi and Missouri
- ♣ land based casinos in Michigan and Louisiana
- ♣ Class III casinos in Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, North Dakota, South Dakota, and Wisconsin
- ♣ Class II and Class III properties in Oklahoma
- ♣ racinos in Arkansas
- ♣ VLT facilities in Louisiana and South Dakota

The largest concentration of gaming devices in this region is in the riverboat jurisdictions and land-based casinos with approximately 125,000 machines in 96 locations. Tribal properties in Iowa, Kansas, Louisiana, Michigan, Minnesota, Mississippi, North Dakota, South Dakota, and Wisconsin include 125 casinos having approximately 73,000 Class III gaming devices, with continuing opportunities for TITO conversions and legacy product replacements.

Oklahoma currently contains approximately 42,000 gaming machines. We initiated Class III game installations in the state during fiscal 2005, and our installed base continues to grow. Oklahoma also became the 19th state to join the IGT Native American Progressive Systems links in 2006.

Kansas legislation passed in March 2007 permits four destination casinos and slots at two racetracks. The casinos will be owned by the state lottery and managed by private companies. Indiana also passed legislation allowing slots at two racetracks during fiscal 2007, and we anticipate Louisiana and South Dakota VLT replacements in the near term.

US Eastern

Comprising approximately 17% of the North America installed base, the eastern region includes:

- ◆ traditional casinos in Atlantic City, New Jersey and cruise ships
- ◆ Class III tribal casinos in Connecticut, New York, and North Carolina
- ◆ centrally monitored facilities in Delaware, Florida, Maine, New York, Pennsylvania, Rhode Island, and West Virginia
- ◆ Class II and/or CDS facilities in Alabama and Florida

Atlantic City has the largest number of machines in the region with approximately 36,000 machines. Pennsylvania slot parlor openings in 2007 are adding new competitive pressures to this region, along with mergers concentrating casino ownership, which may have some impact on growth. However, we anticipate openings of new Atlantic City casinos in 2011 will provide additional gaming expansion opportunities.

New York and Connecticut casinos continue expanding their Class III facilities. Connecticut tribes announced two new hotel casinos, and at least one New York tribe announced a new hotel/casino expansion during fiscal 2007.

Delaware, New York, and Rhode Island are centrally monitored states with games distributed under long-term revenue sharing arrangements. We continue growing our share of machines installed at existing facilities through the reallocation process based on the quality of game performance.

Pennsylvania opened five gaming properties in fiscal 2007 with 10,000 machines. Two more facilities are expected to open in fiscal 2008 with up to 14 total properties open by the end of 2010. We are limited by regulation to 50% of each casino floor for 30 months following each casino opening.

Alabama CDS facilities plan future expansions in at least two locations. We provide machines and systems to this jurisdiction through revenue sharing arrangements, installing their first *IGT Advantage* system in 2007.

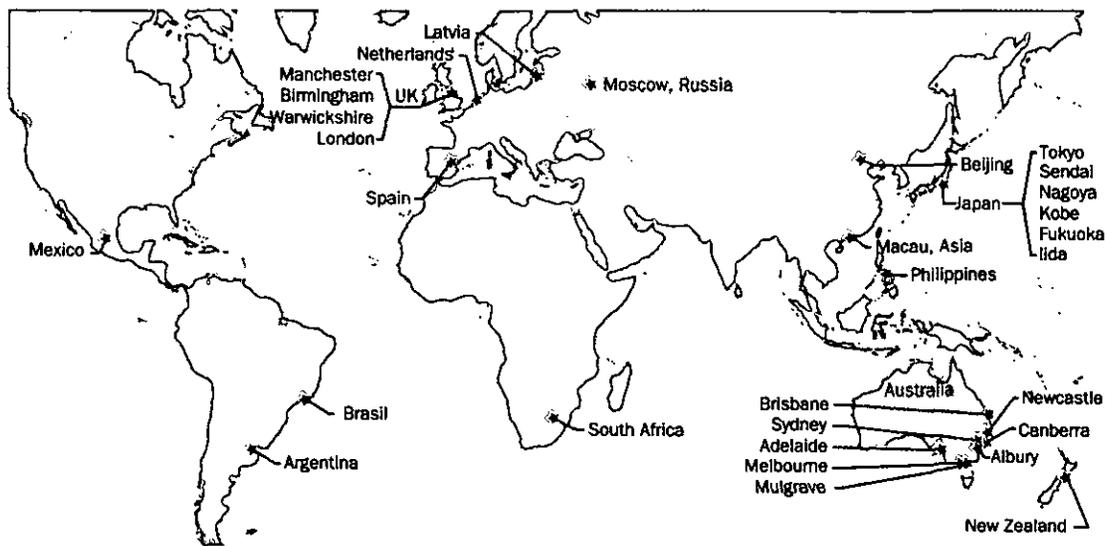

Florida's tribal compact negotiations are ongoing to determine when Class III machines will be allowed in the state. We anticipate this action could increase the Florida tribal machine count by as many as 15,000 units, gradually replacing Class II machines altogether. Additionally, three Florida racinos opened in Broward County during 2007. A Miami-Dade County local option vote is scheduled for January 2008, which if passed, will allow for the installation of up to 2,000 gaming machines at each of the three eligible pari-mutuel facilities in the county.

Canada

Every Canadian province has some form of gaming, which we service with four facilities in Canada providing sales and technical support. Casinos, racinos and public gaming in Canada make up 10% of the North America installed base. Government corporations in Alberta, Manitoba, Quebec, Saskatchewan, and the four Atlantic provinces operate video lottery programs. While demand in Canada has stabilized, replacements and expansions provide steady machine, parts, and game software sales.

International

IGT offices are located internationally to better serve customer needs and address local regulatory issues.

Our pursuit of international growth opportunities outside of North America began in 1986. Our international strategy capitalizes on our North America experience, while customizing products for unique local and regulatory environments. International headquarters located in the Netherlands oversees operations servicing:

- ▲ casinos in Asia, Europe, Latin America, Russia and South Africa
- ▲ clubs and casinos in Australia and New Zealand
- ▲ AWP facilities and casinos in the UK and continental Europe
- ▲ pachisuro parlors in Japan
- ▲ US military bases overseas

The outlook for international market expansion continues to improve as support increases for legalized casinos as a means of promoting tourism revenue. We anticipate increasing financial contributions from our international operations as these markets continue growing.

Europe

Our Netherlands office opened in 1992 to service casino markets in continental Europe, the Middle East and North Africa. Casinos and slot halls in these regions compete with non-casino environments such as pubs and arcades. We anticipate moderate growth in Europe's installed base of gaming machines, and cashless solutions continue driving replacement units.

Latin America

With offices in Argentina, Mexico, and Brazil, we market gaming equipment in several legalized gaming jurisdictions in Latin America. In fiscal 2005 we established an office and began placing CDS Video Bingo units in Mexico. Mexico growth continues, with an installed base of approximately 7,500 units at September 30, 2007. We also anticipate further CDS development in other Latin America jurisdictions.

South Africa

Our office in Midrand, Gauteng services the gaming markets located in Africa, Sub-Saharan Africa and the Indian Ocean Islands. Casino gaming in South Africa is governed under its 1996 National Gambling Act, allowing for the allocation of up to 40 casino licenses in nine provinces. We introduced WAP games in South Africa during fiscal 2006. Limited-payout machines are also providing new expansion opportunities in this jurisdiction.

Asia

Our Macau office began servicing the Asia region in fiscal 2005. We expect continuing growth in Macau and the surrounding region, as countries such as Singapore, Vietnam, Taiwan, South Korea and Cambodia consider and implement further gaming expansion and development. During fiscal 2007, we established a sales office in the Philippines and a representative office in Beijing to pursue opportunities in China.

Australia and New Zealand

Australia is one of the largest and most established markets for video gaming products outside of North America. Our offices in Australia and New Zealand provide sales and customer service for casino, club, and hotel gaming. New South Wales, Australia's largest jurisdiction, recently approved TITO cashless technology.

Although "harm minimization" continues to be an important political issue in this region, most of the more restrictive gaming measures are fully implemented, and our experience indicates operator confidence is returning to the market. Major Australian operators are expanding their gaming operations outside Australia providing additional expansion opportunities.

United Kingdom

We established full-scale operations in Manchester with the acquisition of Barcrest Limited in March 1998. Facilities were added in the Midlands region during fiscal 2002 for casino gaming implementations under the UK Gambling Act. Barcrest is a leading manufacturer of AWP games and top box products, servicing customers in the UK and continental Europe. AWP games generally provide lower yields and have shorter product life cycles. Demand in UK markets is primarily replacement driven, dominated by pubs, licensed betting offices (LBO), bingo halls and arcades that expect frequent new releases. The UK installed base is approximately 240,000 units.

Barcrest efforts encompass three design centers focusing on UK products and one design center focused on products for continental Europe. In addition to AWP games, Barcrest is increasingly focused on video content, systems, and remote gaming products. During fiscal 2007, video game content supply agreements were secured with major UK LBO chains and *Kerchingcasino.com*, an online casino, was launched.

Japan

We have served the gaming market in Japan since 1990 with engineering, development, sales, and administration from our head office in Tokyo and a logistics office in Nagano. Our third-party manufacturing relationship with Sega Sammy is helping us be a more competitive and consistent performer in the pachisuro marketplace.

Japan began transitioning from Regulation-4 (Reg-4) to Regulation-5 (Reg-5) games during 2006, and the removal of all Reg-4 units was required by September 30, 2007. Reg-5 games are restrictive in nature and less appealing to players. As customers are taking time to adjust to this transition, the overall installed base contracted during fiscal 2007 to a current estimate of 1.2 million units.

Internet

We provide online casino services from Alderney in the British Channel Islands. We provide internet gaming services only in jurisdictions where online gaming is legal.

COMPETITION

The market for gaming machines and network systems is highly competitive, constantly evolving and subject to rapid technological change. Competition is a significant driver of new product development. Principal competitive factors include:

- ♣ product functionality and features
- ♣ product architecture and technological innovations
- ♣ availability and quality of support
- ♣ ease and speed of product implementation
- ♣ vendor and product reputation
- ♣ knowledge of gaming industry practices
- ♣ customer acceptance and player preference

We believe IGT has a global competitive advantage as a result of:

- ♣ broad alliances and a long history with customers
- ♣ the breadth of our gaming products
- ♣ a dynamic and diverse library of innovative and strong performing games
- ♣ the development of systems that enhance operator profitability
- ♣ an extensive collection of intellectual properties
- ♣ high levels of customer service and support
- ♣ the financial strength to aggressively invest in R&D
- ♣ an extensive, well established infrastructure of sales and manufacturing
- ♣ worldwide recognition and geographic diversity

Our competitors include, but are not limited to, the following manufacturers that have developed casino-style gaming products and are either authorized to sell products or are in the licensing process in many US and foreign gaming jurisdictions:

- | | |
|--|---|
| ♣ Ainsworth Gaming Technology | ♣ Novomatic Industries |
| ♣ Aristocrat Leisure Limited | ♣ Progressive Gaming International Corporation
(formerly Mikohn) |
| ♣ Aruze (formerly known as Universal) | ♣ Rocket Gaming Systems |
| ♣ Bally Technologies, Inc. (formerly Alliance) | ♣ Scientific Games Corporation |
| ♣ Franco Gaming, Ltd. (a division of Recreativos Franco) | ♣ Shuffle Master, Inc. |
| ♣ Gauselmann Group (Atronic) | ♣ Unidesa (part of the Cirsá Group) |
| ♣ Konami Co. Ltd. | ♣ Video Game Technologies |
| ♣ Lottomatica S.p.A. (acquired GTech in 2006) | ♣ WMS Industries, Inc. |
| ♣ Multimedia Gaming Inc. | |

OPERATIONAL OVERVIEW

Manufacturing and Suppliers

In addition to our main production facility in Reno, Nevada, we manufacture AWP and UK casino products in the UK and pachisuro machines through a third party manufacturer in Japan. International casino and club gaming machines are fabricated, whole or in kit form, at our Reno facility. Our manufacturing operations primarily involve the configuration and assembly of electronic components, cables, harnesses, video monitors and prefabricated parts purchased from outside sources. We also operate facilities for cabinet manufacturing, silkscreen, and digital design. We have a broad base of material suppliers and utilize multi-sourcing practices to ensure component availability.

Our Reno facility currently devotes more than 850,000 square feet to product development, manufacturing, warehousing, shipping and receiving. During the current year, we consolidated several Las Vegas leased facilities into our newly constructed 37-acre central campus to be completed in fiscal 2008. Maintaining our commitment to quality during fiscal 2007, we renewed our ISO 9001:2000 industry certification at all of our manufacturing facilities. ISO standards represent an international consensus with respect to the design and use of practices intended to ensure ongoing customer satisfaction with consistent delivery of products and services.

We generally carry a significant amount of inventory related to the breadth of our product lines. We reasonably expect to fill our order backlog within the next fiscal year, totaling approximately \$327.6 million at October 31, 2007 and \$353.9 million at October 31, 2006.

Sales and Distribution

We provide products and services to private and governmental gaming operators. We promote our products through a worldwide network of sales associates. We use third party distributors and agents in certain markets under arrangements that generally do not specify minimum purchases and provide for termination if certain performance standards are not maintained.

Customer Service

We consider customer service an important aspect of our overall marketing strategy and a key factor differentiating us from our competitors. We provide product delivery and services for installation, warranty, after-market technical support, new product training and support, supplemental equipment and spare parts, product retrofit and game conversions, as well as WAP jackpot network systems and internet casino operations. We employ trained personnel in over 50 customer service centers worldwide.

IGT provides access to product information and customer service 24 hours a day, seven days a week. We also offer customers a variety of classes through the IGT Training University to ensure their employees can successfully use our products to their full potential. We provide 24-hour customer support through our website (www.IGT.com) and a fully staffed Global Support Center telephone hotline, with access to a full range of field support engineering resources to resolve technical issues.

Regulatory Compliance

IGT is dedicated to regulatory compliance worldwide in order to ensure that our products meet requirements in each gaming jurisdiction and that we obtain the necessary approvals and licenses. We conduct business in most jurisdictions where gaming is legal and hold licenses where required. We submitted over 51,000 products for regulatory approval during fiscal 2007.

Employees

As of September 30, 2007, we employed approximately 5,400 individuals worldwide, including 4,400 in North America and 1,000 internationally. We believe we have favorable relationships with our employees. IGT is committed to providing employees a stable and rewarding work environment, with opportunities to grow their talents and share in company successes, which they make possible. See Note 4 of our Consolidated Financial Statements about our employee benefit plans.

GOVERNMENT GAMING REGULATION

We operate in most legal casino gaming jurisdictions worldwide, as well as in a significant number of legalized lottery jurisdictions. The manufacture and distribution of gaming equipment, systems, and services, as well as the operation of casinos, is subject to regulation by a variety of local and federal agencies, with the majority of oversight provided by individual state gaming control boards. While the regulatory requirements vary from jurisdiction to jurisdiction, most require:

- ▲ licenses and/or permits
- ▲ findings of suitability for the company, as well as individual officers, directors, major stockholders and key employees
- ▲ documentation of qualification, including evidence of financial stability
- ▲ specific approvals for gaming equipment manufacturers and distributors

Our operating entities and key personnel have obtained or applied for all required government licenses, permits, registrations, findings of suitability and approvals necessary to manufacture and distribute gaming products in all jurisdictions where we do business. Although many regulations at each level are similar or overlapping, we must satisfy all conditions individually for each jurisdiction.

Laws of the various gaming regulatory agencies serve to protect the public and ensure that gaming related activity is conducted honestly, competitively, and free of corruption. Regulatory oversight additionally ensures that the local authorities receive the appropriate amount of gaming tax revenues. As such, our financial systems and reporting functions must demonstrate high levels of detail and integrity.

Certain regulators not only govern the activities within their jurisdiction, but also oversee activities that occur in other jurisdictions to ensure that we comply with local standards on a worldwide basis. As a Nevada corporation, state regulatory authorities require us to maintain Nevada standards for all operations worldwide. Violations of laws in one jurisdiction could result in disciplinary action in other jurisdictions. A more detailed description of the regulations to which we are subject is provided in Exhibit 99 of this Annual Report on Form 10-K, incorporated herein by reference.

The nature of the industry and our worldwide operations make this process very time consuming and require extensive resources. We employ additional community staff members and legal resources familiar with local customs in certain jurisdictions to assist in keeping us compliant with applicable regulations worldwide. Through this process, we seek to assure both regulators and investors that all our operations maintain the highest levels of integrity and avoid any appearance of impropriety. We have never been denied a gaming related license, nor have our licenses ever been suspended or revoked.

Responsible Gaming

Fiscal 2007 marks the 10th anniversary of the IGT Responsible Gaming (RG) Program. Corporate social responsibility has taken on a new dimension since the inception of our program ten years ago. Gaming jurisdictions can suffer negative public backlash due to lack of attention to the issue of problem gambling. As our markets expand internationally, so must our understanding of social protections and responsible gaming in different cultures. IGT works closely with new gaming jurisdictions to develop sound responsible gaming policies and guidelines to help ensure programs remain viable over the long term.

As a technology provider to the gaming industry, our approach to responsible gaming differs only slightly from that of the gaming operator, and the objectives are the same:

- ▲ raise awareness of the issue
- ▲ collaborate with customers and public policy makers in developing RG practices and programs
- ▲ educate our employees
- ▲ support research and treatment

Our experience has taught us that corporate social responsibility must be a cornerstone of any sound gaming program and is vital to sustaining our industry. We support our commitment to RG with funding for numerous federal, state and local organizations, conferences and events, including:

- ▲ National Center for Responsible Gaming (NCRG)
- ▲ National Council on Problem Gambling (NCPG)
- ▲ National Problem Gambling Helpline
- ▲ Problem Gambling Center
- ▲ Responsible Gaming Education Week
- ▲ Problem Gambling Awareness Week

Item 1A. Risk Factors

Our ability to operate in our existing markets or expand into new jurisdictions could be adversely affected by changing regulations or problems with obtaining needed licenses or approvals.

We operate only in jurisdictions where gaming is legal. The gaming industry is subject to extensive governmental regulation by US federal, state and local governments, as well as tribal officials or organizations and foreign governments. While the regulatory requirements vary by jurisdiction, most require:

- ◆ licenses and/or permits
- ◆ findings of suitability
- ◆ documentation of qualifications, including evidence of financial stability
- ◆ other required approvals for companies who manufacture or distribute gaming equipment and services
- ◆ individual suitability of officers, directors, major stockholders and key employees

Any delays in obtaining regulatory approvals needed for expansion within existing markets or into new jurisdictions can negatively affect our opportunities for growth. Further, changes in existing gaming regulations may hinder or prevent us from continuing to operate in those jurisdictions where we currently do business, which would harm our operating results. In particular, the enactment of unfavorable legislation or government efforts affecting or directed at manufacturers or gaming operators, such as referendums to increase gaming taxes or requirements to use local distributors, would likely have a negative impact on our operations.

Slow growth in the number of new casinos or the rate of replacement of existing gaming machines could limit or reduce our future profits.

Demand for our products is driven substantially by the replacement of existing gaming machines, the establishment of new gaming jurisdictions, and the addition of new casinos or expansion of existing casinos within existing gaming jurisdictions. The establishment or expansion of gaming in any jurisdiction typically requires a public referendum or other legislative action. As a result, gaming continues to be the subject of public debate, and there are numerous active organizations that oppose gaming. Opposition to gaming could result in restrictions on or even prohibitions of gaming operations in any jurisdiction. In addition, the rate of growth in the North American marketplace has diminished. A continued reduction in growth or in the number of gaming jurisdictions or delays in the opening of new or expanded casinos could reduce the demand for our products.

Demand for our products could be adversely affected by changes in player and operator preferences.

As a supplier of gaming machines, we must offer themes and products that appeal to gaming operators and players. If we are unable to anticipate or timely react to any significant changes in player preferences, such as a negative change in the trend of acceptance of our newest systems innovations or jackpot fatigue (declining play levels on smaller jackpots), the demand for our gaming products could decline. Further, our products could suffer a loss of floor space to table games and operators may reduce revenue sharing arrangements, each of which would harm our sales and financial results. In addition, general changes in consumer behavior, such as reduced travel activity and redirection of entertainment dollars to other venues, could result in reduced demand for our products.

Our business is vulnerable to changing economic conditions.

Unfavorable changes in general economic conditions including recession, economic slowdown, or higher fuel or other transportation costs, may reduce disposable income of casino patrons or result in fewer patrons visiting casinos. Such a decline in the relative health of the gaming industry would likely result in a decline in the amount of resources our customers have to purchase our products and services. This may also result in reduced play levels, which could cause our cash flows and revenues from revenue sharing products to decline. Our operating results may be negatively impacted by a decrease in interest rates causing an increase in jackpot expense and a reduction of investment income.

Our success in the competitive gaming industry depends in large part on our ability to develop and manage frequent introductions of innovative products.

The gaming industry is intensely competitive, and many of our competitors have substantial resources and specialize in the development and marketing of their products. Because the gaming industry is characterized by dynamic customer demand and rapid technological advances, we must continually introduce and successfully market new themes and technologies in order to remain competitive and effectively stimulate customer demand. Our customers will accept a new product only if it is likely to increase operator profits more than competitors' products. There is no guarantee that our new products will attain this market acceptance or that our competitors will not more effectively anticipate or respond to changing customer preferences. In

addition, any delays by us in introducing new products on schedule could negatively impact our operating results by providing an opportunity for our competitors to introduce new products and gain market share ahead of us.

Failure to attract, retain and motivate key employees may adversely affect our ability to compete.

Our success depends largely on recruiting and retaining talented employees. The market for qualified executives and highly skilled, technical workers is intensely competitive. The loss of key employees or an inability to hire a sufficient number of technical staff could limit our ability to develop successful products and cause delays in getting new products to market.

We may be unable to protect our IP.

A significant portion of our revenues is generated from products using certain IP rights, and our operating results would be negatively impacted if we were unsuccessful in protecting these rights from infringement. In addition, some of our most popular games and features are based on trademarks, patents and other IP licensed from third parties. The continued success of these games may depend upon our ability to retain or expand these licenses with reasonable terms. We also depend on trade secret law to protect certain proprietary knowledge and have entered into confidentiality agreements with those of our employees who have access to this information. However, there can be no guarantees that our employees will not breach these agreements, and if these agreements are breached it is unlikely that the remedies available to us will be sufficient to compensate us for the damages suffered.

We may be subject to claims of IP infringement or invalidity.

Periodically we receive notification from others claiming that we are infringing their patent, trademark or other IP rights. Regardless of their merit, such claims may cause us to incur significant costs. Responding to these claims could also require us to stop selling or to redesign our products, to pay significant amounts in damages or enter into agreements to pay significant licensing fees or royalties. Additionally, if any of these claims prove successful, it could limit our ability to bring new products to market in the future.

Our gaming machines and online operations may experience losses due to fraudulent activities.

We incorporate security features into the design of our gaming machines and other systems, including those responsible for our online operations, designed to prevent us and our patrons from being defrauded. However, there can be no guarantee that such security features will continue to be effective in the future. If our security systems fail to prevent fraud, our operating results could be adversely affected. Additionally, if third parties breach our security systems and defraud our patrons, the public may lose confidence in our gaming machines and operations.

Our outstanding Senior Convertible Debentures subject us to additional risks.

Our 2.6% Debentures issued in December 2006 contain a net settlement feature. This feature entitles holders of Debentures to receive cash up to \$1,000 and shares for any excess conversion value determined in a manner in the indenture governing the Debentures. Consequently, if a significant number of Debentures are converted or redeemed, we would be required to make significant cash payments to the holders who convert their Debentures.

Our outstanding credit facility subjects us to additional risks.

Our Senior Credit Facility subjects us to a number of financial covenants, which could result in an event of default if not complied with. The Senior Credit Facility also includes restrictions that may limit our flexibility in planning for, or reacting to, changes in our business and the industry.

Investments and development financing loans could adversely impact liquidity.

We invest in and/or provide financing for expansion or construction of gaming locations and other business purposes. Such financing subjects us to increased credit risk in certain regions, as well as other inherent risks such as political or economic instability in related markets. Our liquidity or financial position may be negatively impacted if we are unable to collect on these loans or benefit from these investments.

Current environmental laws and regulations, or those enacted in the future, could result in additional liabilities and costs.

Manufacturing of our products may require the use of materials that are subject to a variety of environmental, health and safety laws and regulations. Compliance with these laws could increase our costs and impact the availability of components required to manufacture our product. Violation of these laws may subject us to significant fines, penalties or disposal costs, which could negatively impact our results of operations, financial position or cash flows.

The risks related to operations outside of traditional US law could negatively affect our results.

We operate in many countries outside of the US and tribal jurisdictions with sovereign immunity which subjects us to certain inherent risks including:

- ▲ political or economic instability
- ▲ additional costs of compliance
- ▲ tariffs and other trade barriers
- ▲ fluctuations in foreign exchange rates outside the US
- ▲ adverse changes in the creditworthiness of parties with whom we have significant receivables or forward currency exchange contracts

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

We expect our current properties will be adequate for our near-term business needs.

North America

Our largest manufacturing facility and corporate offices are located in Reno, Nevada, where we own a 1.2 million square foot facility that houses our manufacturing, cabinet production, silkscreen, engineering, sales and corporate administrative functions. This facility supports production for all of North America and all international markets, except Japan and the UK. We also lease 147,000 square feet of additional warehousing facilities in Reno under agreements expiring through June 2008.

We expect to complete construction in fiscal 2008 of our new 618,000 square foot Las Vegas campus consolidating several leased facilities. This new facility will house our largest sales and service force as well as warehousing and administrative functions. At September 30, 2007, we lease approximately 292,000 square feet of warehousing, sales and administration facilities in Las Vegas under agreements expiring between December 2007 and June 2008. Additionally, we lease approximately 366,000 square feet of warehousing, sales and service facilities throughout the US and Canada supporting local market needs under leases expiring between December 2007 and January 2016.

International

We own 149,000 square feet and lease 30,000 square feet under leases expiring through September 2010, which support manufacturing, sales and administrative functions in the UK. We own 12,000 square feet in New Zealand and lease 121,000 square feet in Australia under leases expiring through December 2011, for subassembly, sales and administration. All other international facilities total 227,000 square feet under leases expiring through April 2012.

Item 3. Legal Proceedings

IGT has been named in and has brought lawsuits in the normal course of business. We do not expect the outcome of these suits to have a material adverse effect on our financial position or results of operations. A description of certain of these matters is contained in Note 16 of our Consolidated Financial Statements and is incorporated herein by this reference.

Item 4. Submission of Matters to a Vote of Security Holders

None

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is listed on the New York Stock Exchange (NYSE) under the symbol "IGT." The following table presents the high and low prices of our common stock as traded on the NYSE and quarterly cash dividends declared for the last two fiscal years.

	Stock Price High	Stock Price Low	Dividends Declared
Fiscal 2007			
First Quarter	\$46.76	\$40.49	\$0.130
Second Quarter	48.79	37.89	0.130
Third Quarter	42.00	36.80	0.130
Fourth Quarter	43.34	33.57	0.140
Fiscal 2006			
First Quarter	\$31.29	\$25.44	\$0.125
Second Quarter	37.18	30.12	0.125
Third Quarter	39.39	34.71	0.125
Fourth Quarter	42.34	35.48	0.130

There were approximately 2,900 record holders of IGT's common stock and the closing price was \$41.13 as of November 26, 2007.

IGT's transfer agent and registrar is: Wells Fargo Shareowner Services
 Manager of Account Administration
 161 North Concord Exchange
 South St. Paul, MN 55075-1139
 (800) 689-8788

Share Repurchases

The purpose of our 1990 common stock repurchase authorization, as amended, is to return value to our shareholders and reduce the number of shares outstanding. We may repurchase shares in the open market, in privately negotiated transactions, or under Rule 10b5-1 trading plans, depending on market conditions and other factors. The authorization does not specify an expiration date.

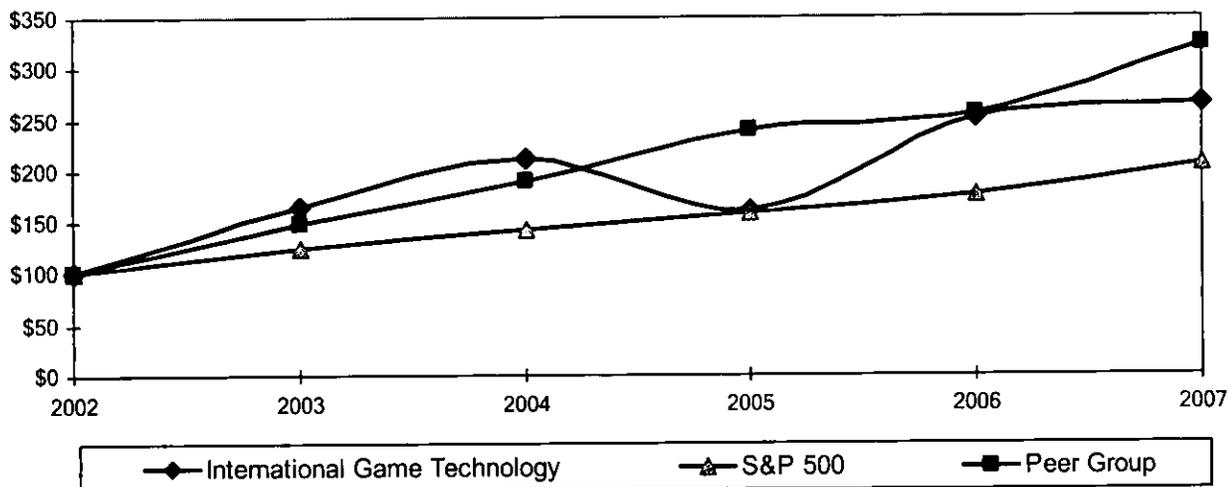

Our fourth quarter repurchases and remaining authorization are summarized below. Shares purchased exclude treasury shares acquired in non-cash transactions related to forfeited stock awards, shares exchanged for options exercised, and shares withheld to satisfy employee tax obligations. We repurchased 2.3 million additional shares between September 30, 2007 and November 26, 2007.

Periods	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as part of a Publicly Announced Plan	Maximum Number of Shares Still Available for Purchase Under the Plan
<i>(In millions, except per share amounts)</i>				
July 1 - July 28, 2007	2.7	\$ 36.77	2.7	44.0
July 29 - August 25, 2007	5.6	34.89	5.6	38.4
August 26 - September 29, 2007	5.2	40.62	5.2	33.2
Total	13.5	\$ 37.47	13.5	

Performance Graph

The following graph reflects the cumulative total return (change in stock price plus reinvested dividends) of a \$100 investment in our common stock for the five-year period for our fiscal years ended September 30, 2002 through 2007 in comparison to the Standard and Poor's 500 Composite Index and our peer group. Our peer group consists of Bally Technologies, Inc., Progressive Gaming International Corporation, Scientific Games Corp., Shuffle Master, Inc. and WMS Industries, Inc. The comparisons are not intended to forecast or be indicative of possible future performance of our common stock.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN
Among International Game Technology, The S&P 500 Index and A Peer Group

	2002	2003	2004	2005	2006	2007
International Game Technology	\$100.00	\$163.89	\$210.99	\$160.97	\$251.38	\$264.37
S&P 500	100.00	124.40	141.65	159.01	176.17	205.13
Peer Group	100.00	149.13	189.47	239.34	254.54	321.79

Item 6. Selected Financial Data

The following should be read in conjunction with Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, and Item 8, Financial Statements and Supplementary Data.

FINANCIAL HIGHLIGHTS

As of and for Years ended September 30, <i>(In millions, except per share amounts)</i>	2007	2006	2005	2004	2003

Stockholders' equity	1,452.7	2,042.0	1,905.7	1,976.6	1,687.5

⁽¹⁾ Fiscal 2004 includes \$127.9 million pretax (\$81.4 million after tax or \$0.22 per diluted share) for losses on early debt redemption.

⁽²⁾ Certain discontinued Anchor operations were reclassified and sold subsequent to acquisition. Fiscal 2004 includes related gain on sale of \$56.7 million after tax.

⁽³⁾ Fiscal 2004 includes \$969.6 million of principal debt reduction. Fiscal 2003 includes proceeds of \$575.0 million from debentures issued.

⁽⁴⁾ Capital spending increases relate to additional investments in gaming operations equipment, as well as spending for our new Las Vegas campus construction and Reno facilities expansion in fiscal 2005, 2006 and 2007.

⁽⁵⁾ Jackpot liabilities increased in fiscal 2007 and 2004 due to VIE consolidations and decreased in fiscal 2006 due to VIE deconsolidations.

⁽⁶⁾ Cash and investment securities include restricted amounts.

⁽⁷⁾ Fiscal 2006 includes \$611.1 million of convertible debentures classified in current liabilities because our common stock met the conversion price threshold. Fiscal 2005 includes \$602.2 million of debentures classified as current due to holders' redemption rights.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

The following MDA is intended to enhance the reader's understanding of our company operations and current business environment. MDA is provided as a supplement to and should be read in conjunction with our Item 1, Business, and Item 8, Financial Statements and Supplementary Data.

International Game Technology is a global company specializing in the design, manufacture, and marketing of computerized gaming equipment, network systems, licensing and services. We are a leading supplier of gaming products to the world, providing a well-diversified offering of quality products and services at competitive prices that are designed to increase the potential for operator profits by serving players better.

In fiscal 2007 we achieved the highest annual revenues in company history at \$2.6 billion, largely attributable to growth in our gaming operations installed base reaching a record 59,200 machines in service at September 30, 2007. We operate in two segments, North America and International, with certain unallocated company-wide income and expenses managed at the corporate level. International operations continue to be a growing contributor with operating income up 44% in fiscal 2007. See the BUSINESS SEGMENT RESULTS below and Note 18 of our Consolidated Financial Statements for additional segment information and financial results.

We are dedicated to generating financial growth by continuing to focus on the three cornerstones of our success: product development, market development and capital deployment. We invest more in product development than any of our principal competitors and believe this helps us deliver the broadest gaming product lines across the most markets. Our current development efforts reflect our forward thinking and will support the near term evolution of the gaming floor. This includes the expansion of our business model beyond machine sales toward a more systems-centric, networked gaming environment. Our new World Game Platform initiative, started in fiscal 2007, will unify and standardize our development efforts worldwide. We believe our *sb™* applications will be commercially available beginning in 2009 and will further differentiate IGT gaming products by offering operators new ways to engage and interact with players, as well as the ability to market cross-functional products and player conveniences.

We are dependent, in part, on new market opportunities to generate growth. Some of these opportunities may come from political action as governments look to gaming to provide tax revenues in support of public programs and view gaming as a key driver for tourism. We continue to expand our footprint globally, especially in emerging markets in Asia and Latin America. Our ongoing initiatives to enhance growth in new areas of gaming include financing customer construction or expansion. In April 2007 we agreed to provide \$80.0 million in development financing and \$40.0 million in equipment financing over the next five years to gaming operators in Argentina.

We are able to return value to our shareholders and reinvest in our business because of our ability to generate substantial operating cash flows, the highest ever in fiscal 2007 at \$821.5 million. During fiscal 2007 we returned \$1.3 billion to our shareholders through dividends and share repurchases. We consider strategic business combinations, investments, and alliances to expand our geographic reach, product lines and customer base. During fiscal 2007, we invested \$105.6 million in China LotSynergy Holdings, Ltd. (CLS) for developing opportunities in the China lottery, \$31.2 million in electronic table games with Digideal and \$21.9 million in VCAT for the Mariposa CRM software. See Notes 2 and 5 of our Consolidated Financial Statements for additional information about these investments.

While domestic replacement sales are expected to remain at historically low levels in the upcoming year, we anticipate benefiting from growth in new or expanding domestic markets beginning in the second half of fiscal 2008. We also anticipate revenues will be driven by our growing gaming operations installed base, network systems sales, and machine sales as casino operators begin to upgrade platforms to capitalize on networked functionality and new features. We also expect to benefit from further gaming expansion outside of North America and new content distribution channels enabled by network systems and table gaming initiatives. We will continue server-based gaming development, working with our competitors and customers to ensure the future is powered by an open network that enables products from multiple suppliers to work together without the need for additional programming or interfaces.

RECENTLY ISSUED ACCOUNTING STANDARDS

In August 2007, the Financial Accounting Standards Board (FASB) proposed FASB Staff Position (FSP) APB 14-a, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)*. If approved, FSP APB 14-a will require IGT, as an issuer of convertible debt that may be wholly or partially settled in cash, to separately account for the liability and equity components of the convertible debt instrument and recognize additional interest expense at our nonconvertible debt borrowing rate. If the FSP is issued as drafted, it will be effective for IGT's fiscal 2009 and will require retrospective application. We are currently evaluating the proposed FSP and it may result in higher interest expense related to our Debentures for all periods presented.

We adopted Statement of Financial Accounting Standards (SFAS) 123R, *Share-Based Payment*, in fiscal 2006 and recognized share-based compensation in our financial statements. See CONSOLIDATED OPERATING RESULTS below for a discussion of the impact to operating results in fiscal 2006, as well as Notes 1 and 4 of our Consolidated Financial Statements for additional information regarding our share-based compensation.

See Note 1 of our Consolidated Financial Statements for information regarding recently issued accounting standards that may impact IGT upon adoption.

CRITICAL ACCOUNTING ESTIMATES

Our consolidated financial statements were prepared in conformity with accounting principles generally accepted in the US. Accordingly, we are required to make estimates incorporating judgments and assumptions we believe are reasonable based on our historical experience, contract terms, observance of known trends in our company and the industry as a whole, as well as information available from other outside sources. Our estimates affect amounts recorded in the financial statements and actual results may differ from initial estimates.

We consider the following accounting estimates to be the most critical to fully understanding and evaluating our reported financial results. They require us to make subjective or complex judgments about matters that are inherently uncertain or variable. Senior management discussed the development, selection and disclosure of the following accounting estimates, considered most sensitive to changes from external factors, with the Audit Committee of our Board of Directors.

Goodwill, Other Intangible Assets, and Royalties

We measure and test goodwill for impairment using the two-step approach under SFAS 142, *Goodwill and Other Intangible Assets*, at least annually or more often if there are indicators of impairment. If the carrying amount of goodwill exceeds its implied fair value, an impairment loss is recognized equal to that excess. Our goodwill totaled \$1.1 billion at September 30, 2007 and September 30, 2006. The last three annual goodwill impairment tests indicate the fair value of each reporting unit is substantially in excess of its carrying value.

In determining the fair value of our reporting units, we apply the income approach using the discounted cash flow (DCF) method. We then compare the implied valuation multiples of a group of comparable competitor gaming companies under the market approach to test the reasonableness of our DCF results. The DCF analysis is based on the present value of two components: the sum of our five year projected cash flows and a terminal value assuming a long-term growth rate. The cash flow estimates are prepared based on our business plans for each reporting unit, considering historical results and anticipated future performance based on our expectations regarding product introductions and market opportunities. The discount rates used to determine the present value of future cash flows are derived from the weighted average cost of capital of a set of comparable gaming companies, considering the size and specific risks of each reporting unit.

Our portfolio of other intangibles substantially consists of finite-lived patents, contracts, trademarks, developed technology, and customer relationships. We regularly monitor events or changes in circumstances that indicate the carrying value of these intangibles may not be recoverable or require a revision to the estimated remaining useful life in accordance with SFAS 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. Our other intangibles totaled \$245.5 million at September 30, 2007 and \$257.0 million at September 30, 2006.

If an event or change occurs, we estimate cash flows directly associated with the use of the intangible to test recoverability and remaining useful lives based on the forecasted utilization of the asset and expected product revenues. In developing estimated cash flows, we incorporate assumptions regarding changes in legal factors, related industry climate, regulatory actions, contractual factors, operational performance and the company's strategic business plans, as well as the effects of obsolescence, demand, competition, and other market

conditions. When the carrying amount exceeds the undiscounted cash flows expected to result from the use and eventual disposition of a finite-lived intangible asset or asset group, we then compare the carrying amount to its current fair value. We estimate the fair value using prices for similar assets, if available, or more typically using a DCF model. We recognize an impairment loss if the carrying amount is not recoverable and exceeds its fair value.

We also regularly evaluate the estimated future benefit of prepaid and deferred royalties to determine amounts unlikely to be realized from forecasted sales or placements of our games. The carrying value of our prepaid and deferred royalties totaled \$104.6 million at September 30, 2007 and \$136.5 million at September 30, 2006.

Impairment testing for goodwill, other intangibles, and royalties requires judgment, including the identification of reporting units, allocation of related goodwill, assignment of corporate shared assets and liabilities to reporting units, estimated cash flows, and determinations of fair value. While we believe our estimates of future revenues and cash flows are reasonable, different assumptions could materially affect the assessment of useful lives, recoverability and fair value. If actual cash flows fall below initial forecasts, we may need to record additional amortization and/or impairment charges.

Jackpot Liabilities and Expenses

Only a portion of our recurring revenue arrangements incorporate an IGT paid WAP jackpot for which we recognize corresponding jackpot liabilities and expense. Changes in our estimated amounts for jackpot liabilities and associated jackpot expense are attributable to regular analysis and evaluation of the following factors:

- ◆ variations in slot play (i.e. jackpot life cycles and slot play patterns)
- ◆ volume (i.e. number of WAP units in service and coin-in per unit)
- ◆ interest rate movements
- ◆ the size of base jackpots (i.e. initial amount of the progressive jackpots displayed to players)

Interest rates applicable to jackpot funding vary by jurisdiction and are impacted by market forces, as well as winner elections to receive a lump sum payment in lieu of periodic annual payments. Current and non-current portions of jackpot liabilities, as well as jackpot expense, may also be impacted by changes in our estimates and assumptions regarding the expected number of future winners who may elect a lump sum payout.

Our jackpot liabilities increased to \$643.1 million at September 30, 2007 compared to \$546.7 million at September 30, 2006 primarily due to trust consolidations (see Note 2 of our Consolidated Financial Statements for additional information about the trusts). Jackpot expense totaled \$164.7 million for fiscal 2007, \$184.9 million for fiscal 2006 and \$258.5 million in fiscal 2005. Fluctuations in fiscal 2007 and 2006 resulted from variations in slot play, fewer WAP units in service and interest rate movements. Additionally, jackpot expense declined significantly during fiscal 2006 due the implementation of lower base jackpot systems as discussed in BUSINESS SEGMENT RESULTS later. See Note 1 of our Consolidated Financial Statements for additional accounting policies related to jackpot liabilities and expense.

Inventory and Gaming Operations Equipment

The determination of obsolete or excess inventory requires us to estimate the future demand for our products within specific time horizons, generally one year or less. If we experience a significant unexpected decrease in demand for our products or a higher occurrence of inventory obsolescence because of changes in technology or customer requirements, we could be required to increase our inventory provisions. Inventory management remains an area of focus as we balance the need to maintain strategic inventory levels to ensure competitive lead times versus the risk of inventory obsolescence because of rapidly changing technology and customer requirements. Our inventories totaled \$144.8 million at September 30, 2007 and \$162.1 million at September 30, 2006.

We are also required to estimate salvage values and useful lives for our gaming operations equipment. Trends in market demand and technological obsolescence may require us to record additional asset charges, which would have a negative impact on gross profit. In fiscal 2005, our assessment of estimated salvage values resulted in technological obsolescence charges of \$41.6 million in cost of gaming operations due to expected future releases of more advanced cabinet and game designs.

Share-based Compensation

We account for share-based compensation in accordance with SFAS 123R. Under the fair value recognition provisions, we estimate share-based compensation at the award grant date and recognize expense over the

service period. Option valuation models require the input of highly subjective assumptions, and changes in the assumptions used can materially affect the fair value estimate. Judgment is required in estimating stock price volatility, forfeiture rates, expected dividends, and expected terms that options remain outstanding. See Notes 1 and 4 of our Consolidated Financial Statements for additional information regarding these assumptions.

Income Taxes

Determination of the appropriate amount and classification of income taxes depends on several factors, including estimates of the timing and probability of realization of deferred income taxes, as well as income tax payment timing. We adjust deferred taxes based on changes in the difference between the book and tax basis of our assets and liabilities, measured by future tax rates we estimate will apply when these differences are expected to reverse. This process involves estimating our current tax position in each federal, state, and foreign jurisdiction, as well as making judgments as to whether our taxable income in future periods will be sufficient to fully recover any deferred tax assets. We reduce deferred tax assets by a valuation allowance when it is more likely than not that some or all of the deferred tax assets will not be realized based on our estimation of future taxable income in each jurisdiction. Changes in tax laws, enacted tax rates, geographic mix or estimated annual taxable income could change our valuation of deferred tax assets and liabilities, which in turn impacts our tax provision.

The calculation of our tax liabilities also involves dealing with uncertainties in the application of complex tax regulations. We accrue reserves for potential tax contingencies quarterly based on a comprehensive review of our global tax positions. These reserves are adjusted as necessary and released after matters are resolved with certain tax authorities or upon the closure of tax years subject to tax audit. Reserves for these tax matters are included on our balance sheet as a component of accrued income taxes. If payment of these amounts proves to be unnecessary, the reversal of liabilities could result in the recognition of a future tax benefit. If our tax liabilities are understated, a charge to our tax provision would result.

Additionally, we are currently evaluating the impact of the guidance issued in June 2006 under FASB Interpretation 48, *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109*, effective for IGT at the beginning of fiscal year 2008.

Net deferred tax assets totaled \$208.8 million at September 30, 2007 and \$136.6 million at September 30, 2006 and accrued income taxes totaled \$49.5 million at September 30, 2007 and \$36.1 million at September 30, 2006.

CONSOLIDATED OPERATING RESULTS - A Year Over Year Comparative Analysis

Fiscal 2007 vs Fiscal 2006

Consolidated total revenue and gross profit improvements over the prior year are predominantly due to continuing growth in gaming operations. Total gross profit also benefited from a more favorable product sales mix. Total gross margin increases are the combined result of a greater mix of gaming operations, as well as margin improvements in gaming operations and product sales discussed below. Additionally, earnings per share (EPS) was positively impacted by share repurchases.

Significant items affecting comparability include:

- ▲ current year gains of \$17.0 million from our Gulf Coast hurricane insurance settlement and \$5.8 million from the sale of a company airplane
- ▲ prior year R&D charges of \$11.3 million related to the buyout of a third party development contract

Consolidated Gaming Operations

Improved revenues and gross profit are primarily the result of growth in our installed base of recurring revenue machines. Year-over-year lease operations units grew primarily in Mexico and New York, while casino operations placements grew most significantly in Florida, Oklahoma and California.

Gross margin improvements are mainly due to shifts in the composition of our installed base toward a lesser share of WAP units, reduced jackpot expense due to variations in slot play and a growing population of stand-alone lease and CDS units. Stand-alone units generate lower revenues and gross profit per unit with no jackpot expense, typically resulting in higher margins. Gaming operations margins may also vary with changes in interest rates affecting jackpot expense. (See BUSINESS SEGMENT RESULTS below).

Consolidated Product Sales

Total product sales revenues are comparable to the prior year with North America declines offset by international sales growth, primarily in Japan. Gross profit and margin improvement is due to a greater mix of higher margin non-machine revenues, mostly from machine systems sales which increased 14% over the prior year. During fiscal 2007, IGT systems installations increased by approximately 100, with over 720 systems worldwide. Product sales margins fluctuate depending on the geographical mix and types of products sold.

Fiscal 2006 vs Fiscal 2005

Fiscal 2006 consolidated operating results improvement was primarily due to growth in gaming operations installed base and a more favorable product sales mix.

In addition to the development contract buyout charges in fiscal 2006 noted above, comparability is affected by the following fiscal 2005 items:

- ▲ salvage value and asset obsolescence charges of \$41.6 million
- ▲ Gulf Coast hurricane charges of \$5.5 million and estimated lost earnings of \$9.4 million
- ▲ income of \$10.2 million realized on early loan payoff
- ▲ reorganization severance costs of \$10.0 million

Consolidated Gaming Operations

Revenue improvement was attributable to installed base growth, with substantial increases in the CDS and Class II markets of Mexico, Oklahoma, California, Alabama, Florida and New York. Overall performance was also strengthened by the success of our low-denomination and MLP games, as well as the introduction of community play with installations of *Wheel of Fortune® Super Spin™*. Gross profit and margin increases were primarily due to lower jackpot expense and prior year obsolescence charges.

Consolidated Product Sales

Revenues and gross profits grew as a result of an improved mix of premium priced products and increased non-machine sales including a 47% increase in gaming systems. Gross margin improvement was due to fewer lower margin pachisuro machine sales.

Operating Expenses

	2007	2006	2005	Favorable (Unfavorable)			
				07 vs 06		06 vs 05	
<i>(In millions)</i>							
Selling, general and administrative	\$ 397.9	\$ 375.5	\$ 318.7	\$ (22.4)	-6%	\$ (56.8)	-18%
Research and development	202.2	188.5	138.4	(13.7)	-7%	(50.1)	-36%
Depreciation and amortization	80.4	82.6	69.9	2.2	3%	(12.7)	-18%
Total	<u>\$ 680.5</u>	<u>\$ 646.6</u>	<u>\$ 527.0</u>	<u>\$ (33.9)</u>	-5%	<u>\$(119.6)</u>	-23%
Percent of revenues	26%	26%	22%				

Fiscal 2007 selling, general and administrative (SG&A) increases were attributable to additional staffing costs of \$32.8 million in support of business growth initiatives and higher professional fees of \$15.0 million, largely related to IP protection and regulatory compliance.

These increases in SG&A were offset by:

- ▲ Gulf Coast hurricane business interruption insurance gains of \$12.0 million
- ▲ favorable bad debt provisions of \$6.0 million due to improving trends in receivables quality and collections
- ▲ a \$5.8 million gain on the sale of a company airplane

R&D increased in fiscal 2007 primarily due to additional staffing costs of \$19.0 million and higher costs for licensing and parts related to our continuing development of new technology and products. Fiscal 2006 included a charge of \$11.3 million related to the buyout of a development contract, which partially offset the 2007 increases.

The increase in operating expenses in fiscal 2006 over fiscal 2005 was principally the result of:

- ▲ SG&A increases of \$17.0 million for legal and compliance costs primarily related to obtaining and protecting IP
- ▲ additional investment in R&D to support next generation technologies, including \$11.3 million related to the buyout of a third party development contract
- ▲ SFAS 123R share-based compensation of \$35.3 million
- ▲ additional WagerWorks operating expenses of \$25.0 million, including amortization of acquired intangibles

Other Income (Expense) and Taxes

	2007	2006	2005	Favorable (Unfavorable)			
				07 vs 06		06 vs 05	
<i>(In millions; * = not meaningful)</i>							
Interest income	\$ 82.0	\$ 65.4	\$ 77.9	\$ 16.6	25%	\$ (12.5)	-16%
Interest expense	(77.6)	(50.8)	(58.1)	(26.8)	-53%	7.3	13%
Other	0.1	7.2	(2.3)	(7.1)	*	9.5	*
Total other income (expense)	\$ 4.5	\$ 21.8	\$ 17.5	\$ (17.3)	*	\$ 4.3	*
Income tax provisions	\$ 296.6	\$ 273.3	\$ 244.7	\$ (23.3)		\$ (28.6)	
Tax rate	36.9%	36.6%	35.9%	(0.3) pp		(0.7) pp	

The fiscal 2007 decrease in other income was primarily attributable to higher interest costs on our 2.6% Debentures issued in December 2006 and increased line of credit borrowings, partially offset by higher interest income on receivables and investments. Interest income in fiscal 2006 was down from the prior year due to \$10.2 million from financing fees realized on an early loan payoff in fiscal 2005.

Our New Jersey (NJ) WAP VIE trusts also contributed to fluctuations in interest income and interest expense, causing increases in fiscal 2007 due to reconsolidation following the deconsolidation in fiscal 2006. Note 2 of our Consolidated Financial Statements provides further information on these trusts.

Fluctuations in our tax rate are mainly due to changes in the geographical mix of annual taxable income.

BUSINESS SEGMENT RESULTS - A Year Over Year Comparative Analysis

Operating income for each division reflects applicable operating expenses. See Note 18 of our Consolidated Financial Statements for additional business segment information.

Fiscal 2007 vs Fiscal 2006

Improved operating results in North America for the current year were mainly attributable to the continued growth in our installed base of recurring revenue games, offsetting fewer machine sales.

North America Gaming Operations

Improvements in North America gaming operations revenues and gross profit were primarily the result of growth in our installed base. Significant incremental placements include:

- ▲ casino operations Class II units in Florida and California, as well as Class III Instant Bingo and poker machines in Oklahoma
- ▲ lease operations games in New York and Rhode Island

Gaming operations gross margins in North America also improved due to lower WAP jackpot expense and changes in the installed base mix toward more non-WAP units. These non-WAP units typically provide lower revenues and gross profit per unit with no jackpot expense resulting in higher margins. Jackpot expense decreased \$20.2 million due to a decline of \$23.9 million in slot play variations and to a lesser extent fewer WAP units. These decreases were partially offset by interest rate movements. Gross profit and margin during fiscal 2007 also benefited from a \$5.0 million hurricane property insurance gain.

North America Product Sales

Product sales declined in fiscal 2007 as a result of fewer unit sales, but were partially offset by higher pricing, including for our new *AVP®* machines, and a greater mix of higher margin non-machine sales. The product mix included higher contributions from our *AVP®* model, as well as increased gaming systems and license fees. Declining unit sales are reflective of reduced demand following the cashless replacement cycle coupled with the anticipation of new technology offerings related to server-based gaming. The timing of market expansion opportunities also affects machine shipments. Current year replacement units totaled 22,500 units versus 36,200 units last year, and 20,500 new units in fiscal 2007 compared to 14,900 in the prior year.

Fiscal 2006 vs Fiscal 2005

North America operating results in fiscal 2006 improved over fiscal 2005 due to the combined performance of product sales and gaming operations.

North America Gaming Operations

Growth in our installed base, as well as game play performance, drove improved gaming operations gross profit in fiscal 2006. Gross margin improvements were primarily attributable to:

- ▲ lower jackpot expenses
- ▲ technological obsolescence charges in fiscal 2005 related to demand transitioning toward newer platform games
- ▲ increased contribution from higher margin MLP, CDS, and lease operations games

Jackpot expense in fiscal 2006 declined \$73.6 million most significantly due to \$26.8 million from lower base jackpots and \$17.6 million related to variations in slot play. To a lesser extent, fewer WAP units in service and interest rate movements also contributed to the decrease in jackpot expense.

Fiscal 2006 growth in our installed base was primarily from placements of:

- ▲ Instant Bingo and poker products in Oklahoma
- ▲ CDS and Class II units in California, Alabama, and Florida
- ▲ lease operations games in New York and Delaware

North America Product Sales

A more favorable mix of premium priced products was the primary driver of improvements in all product sales measures in fiscal 2006. Growing non-machine sales including additional *IGT Advantage™* systems installations, game theme conversions and IP fees also contributed to overall product sales improvements.

Fiscal 2007 vs Fiscal 2006

International division improvements during the current year were due to growth in gaming operations, as well as product sales.

Improving gaming operations revenues and gross profit were the result of a growing international installed base of recurring revenue games. Year-over-year placement increases were most significant in Mexico, reaching an installed base of 7,500 CDS units at September 30, 2007 compared to 5,100 at September 30, 2006.

Growth in fiscal 2007 product sales revenues and gross profit was primarily due to additional machines sold in Japan and Asia, as well as increased systems sales and conversions, partially offset by fewer UK machine sales. We sold an additional 16,000 machines in Japan related to the market transition to Reg-5 gaming required by September 30, 2007. Gross profit also improved due to reduced costs, most significantly in Europe.

Product sales gross margin during fiscal 2007 improved because of increased contributions from higher yielding markets, mostly Europe, offsetting lower margin sales in Japan. International product sales margins fluctuate depending on geographic and product mix, especially related to the contribution from lower priced, lower margin pachisuro games in Japan.

Fiscal 2006 vs Fiscal 2005

Overall, international improvements in fiscal 2006 were substantially due to growth in gaming operations. Stronger operating results achieved most notably in Australia, Latin America and the UK offset a difficult year in Japan due to regulatory transitions and additional operating costs from WagerWorks.

The increase in gaming operations revenues and gross profit was primarily the result of increased CDS placements in Mexico, as well as the addition of WagerWorks acquired in August 2005. The decline in gaming operations gross margin compared to fiscal 2005 related to the additional mix of lower margin CDS machines.

International product sales were down in fiscal 2006 due to Japan's market transition from Reg-4 to Reg-5 games. Gross margin improvement was attributable to fewer lower margin pachisuro games, as well as greater contributions from premium products and non-machine revenues.

LIQUIDITY AND CAPITAL RESOURCES

Capital Resources

Our principal source of liquidity is cash generated from operations, which allows us to reinvest in our business. Other sources of capital include, but are not limited to, the issuance of public or private placement debt, bank credit facilities and the issuance of equity securities. We expect available capital resources will be sufficient to fund all operating requirements, capital expenditures, payment obligations, and share repurchases.

Working capital increased to \$595.5 million at September 30, 2007 from \$129.1 million at September 30, 2006 primarily due to our 1.75% Debentures classified as current liabilities that were subsequently redeemed in January 2007 (See Credit Facilities discussed below). On a trailing twelve-month basis, average days sales outstanding at September 30, 2007 increased to 79 days versus 74 days last year, and inventory turns increased to 4.2 versus 3.8 at September 30, 2006.

Cash Flows Summary

	2007	2006	2005	Favorable (Unfavorable)	
				07 vs 06	06 vs 05
<i>(In millions)</i>					
Operations	\$ 821.5	\$ 624.1	\$ 726.4	\$ 197.4	\$ (102.3)
Investing	(296.7)	(234.0)	(215.8)	(62.7)	(18.2)
Financing	(556.5)	(386.9)	(525.6)	(169.6)	138.7
Effects of exchange rates	(1.6)	2.5	(3.1)	(4.1)	5.6
Net Change	\$ (33.3)	\$ 5.7	\$ (18.1)	\$ (39.0)	\$ 23.8

Operations

Operating cash flows improvement in fiscal 2007 was primarily due to lower pre-payments for licensing rights and reduced inventory levels, as well as improved net income.

Decreased cash flows from operations in fiscal 2006 compared to fiscal 2005 were mainly attributable to increased receivables consistent with growth in product sales and additional prepayments to secure long-term licensing rights. The adoption of SFAS 123R also contributed to lower cash from operations in fiscal 2006 compared to fiscal 2005 with excess tax benefits from employee stock plans classified as financing cash flows as a result of the accounting change.

Cash flows related to jackpot liabilities fluctuate based on the timing of winner payments and a number of variables described above under CRITICAL ACCOUNTING ESTIMATES.

Investing

Higher investing cash used in the current year was primarily due to investments in CLS of \$105.6 million, as well as the business acquisitions of Digideal for \$31.2 million and VCAT for \$21.9 million, partially offset by increased net proceeds from short term securities. The prior year included an equity investment of \$56.0 million in Walker Digital Gaming, LLC (WDG). Additionally, current year capital expenditures were up \$33.8 million and development financing advances were higher by \$33.6 million. Current year investments in property, plant and equipment include ongoing construction of our new Las Vegas campus and the purchase of a corporate airplane.

Increases in cash used for investing in fiscal 2006 versus 2005 resulted from additional capital expenditures related to the construction of our new Las Vegas campus and gaming operations equipment additions and the equity investment in WDG, partially offset by net investment securities proceeds and the purchase of WagerWorks in fiscal 2005.

Capital Expenditures	2007	2006	2005	Increase (Decrease)	
				07 vs 06	06 vs 05
<i>(In millions)</i>					
Property, plant and equipment	\$ 134.1	\$ 83.1	\$ 48.5	\$ 51.0	\$ 34.6
Gaming operations equipment	194.4	202.9	170.8	(8.5)	32.1
Intellectual property	15.8	24.5	19.3	(8.7)	5.2
Total capital expenditures	\$ 344.3	\$ 310.5	\$ 238.6	\$ 33.8	\$ 71.9

Financing

Increased net cash used for financing activities in fiscal 2007 was primarily due to additional share repurchases. Fiscal 2006 included proceeds from the cash settlement of a structured share repurchase (SSR) prepaid in fiscal 2005. Net proceeds from our convertible debt refinancing and senior credit facility borrowings partially offset additional share repurchases in fiscal 2007.

Improvement in net financing cash flows in fiscal 2006 versus 2005 was primarily the result of share repurchase activity, including SSRs and proceeds from employee stock plans, including excess tax benefits realized. See Notes 1 and 15 of our Consolidated Financial Statements for additional details of our negotiated share repurchase transactions, including the underlying terms.

Share Repurchases

We repurchase IGT common stock to return value to shareholders and reduce outstanding share dilution. We use open market or privately negotiated transactions, such as accelerated share repurchases (ASRs) and SSRs, depending on market conditions and other factors, to achieve our timing, cost and volume objectives.

Common Stock Repurchases	2007	2006	2005
<i>(In millions)</i>			
Shares	28.2	11.7	12.8
Aggregate cost	\$ 1,118.5	\$ 426.7	\$ 354.7

In September 2007, we bought 4.2 million shares through an ASR for an aggregate cost of \$175.0 million or \$41.28 per share. In September 2006, we bought 3.7 million shares through an ASR for an aggregate cost of \$150.0 million or \$40.97 per share.

Additional repurchases between September 30, 2007 and November 26, 2007 totaled 2.3 million shares in open market transactions for an aggregate cost of \$99.6 million. Our remaining repurchase authorization totaled 30.9 million shares as of November 26, 2007.

Credit Facilities and Indebtedness (See Note 11 of our Consolidated Financial Statements)

During the fourth quarter, we drew an additional \$400.0 million on our revolving line of credit, largely for the purpose of repurchasing IGT common stock. This draw increased the total borrowings under our Senior Credit Facility to \$600.0 million.

On December 20, 2006, we issued \$900.0 million principal amount of 2.6% Convertible Debentures due 2036 in a private placement. Our registration statement on Form S-3 related to the resale of these Debentures became effective with the SEC on March 9, 2007. Under certain circumstances, the Debentures are convertible into cash up to the outstanding principal amount and shares for any excess conversion value. The initial conversion rate is 16.1875 shares per \$1,000 principal, for a conversion price of \$61.78 per share. The debentures pay interest semi-annually in June and December.

On December 26, 2006, we called our outstanding 1.75% Debentures for redemption. The call gave holders the right to convert their Debentures before January 10, 2007 and receive aggregate consideration comprised of shares and cash under the terms of the applicable indentures. In conjunction with the redemption and related conversions, we paid holders \$612.7 million and issued 7.3 million shares in fiscal 2007.

FINANCIAL CONDITION

September 30,	2007	2006	Increase (Decrease)	
<i>(In millions)</i>				
Total assets	\$ 4,167.5	\$ 3,902.7	\$ 264.8	7%
Total liabilities	2,714.8	1,860.7	854.1	46%
Total stockholders' equity	1,452.7	2,042.0	(589.3)	-29%

Current year fluctuations in total assets are primarily due to:

- ▲ our collective investment of \$158.7 million in CLS, Digideal and VCAT
- ▲ net property, plant and equipment, up \$97.6 million due to increased capital spending as discussed above
- ▲ deferred tax assets, up \$72.2 million largely due to the adjustment of deferred tax liabilities to equity for the 1.75% Debenture conversions
- ▲ receivables, up \$56.8 million with additional current period sales
- ▲ reductions in cash and short-term investments

The reconsolidation of the NJ VIE's beginning in November 2006 increased assets and liabilities by \$111.5 million related to past jackpot winners at September 30, 2007. See Note 2 of our Consolidated Financial Statements for additional information on the reconsolidation of the NJ trusts.

An increase of \$688.9 million in liabilities is related to the net effect of issuing new convertible debentures in December 2006 and increased borrowings under our Senior Credit Facility. See Note 11 of our Consolidated Financial Statements for additional information about our debt.

Stockholders' equity decreased during fiscal 2007 due to share repurchases and dividends paid, partially offset by current year earnings and additional paid-in capital increases for employee stock plans and debenture conversions.

Contractual Obligations and Commercial Commitments

The following table summarizes our minimum contractual obligations and commercial commitments as of September 30, 2007 with the expected effect on our future liquidity and cash flows.

	Payments due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
<i>(In millions)</i>					
Senior credit facility ⁽¹⁾	\$ 600.0	\$ -	\$ -	\$ 600.0	\$ -

Totals	\$ 2,837.6	\$ 489.6	\$ 1,187.4	\$ 743.3	\$ 417.3

⁽¹⁾ Our credit facility represents the principal amount due at maturity. Credit facility interest resets periodically and is estimated using current rates. Our letters of credit are issued under our credit facility line of credit to insure our payment to certain vendors and governmental agencies. Holders of our Debentures have the right to require IGT to redeem the Debentures for cash at 100% of their principal amount plus accrued and unpaid interest, if any, on December 15, 2009, 2011, 2016, 2021, 2026 and 2031. Additional interest expense on the Debentures could total \$632.7 million if held to full maturity. The installment purchase contract includes principal and interest. See Note 11 of our Consolidated Financial Statements for additional information related to long-term debt.

- (2) Winner payments represent amounts payable to jackpot winners. The timing and amount of expected future winner payments are estimated based on historical patterns of winners' lump sum payment elections. We maintain cash and investments at sufficient levels to fund our jackpot liabilities and winner payments. See Notes 1 and 13 of our Consolidated Financial Statements for additional information related to jackpot liabilities.
- (3) Unconditional amounts payable for licenses, royalties, IP, and community reinvestments were recorded as liabilities at September 30, 2007. Royalties contingent on future game sales or placements are not included in the table above. Construction commitments relate to construction projects for Las Vegas. See Note 12 of our Consolidated Financial Statements for additional information regarding operating leases.
- (4) IGT Synergy Holding Ltd., represents our unconditional commitment to contribute capital in our investment in the unconsolidated affiliate. See Note 2 of our Consolidated Financial Statements for additional information related to our joint venture with CLS.
- (5) Unfunded loans represent amounts available under development financing arrangements with select customers to finance new or expanding gaming facilities. See Note 1 and 9 of our Consolidated Financial Statements for additional information regarding facility notes.

Arrangements With Off-Balance Sheet Risks

In the normal course of business, we are a party to financial instruments with off-balance sheet risk, such as performance bonds and other guarantees not reflected in our balance sheet. We may provide indemnifications of varying scope and terms to customers, vendors, lessors, business partners and other parties with respect to certain matters, including but not limited to, losses arising:

- ▲ out of our breach of agreements with those parties
- ▲ from services to be provided by us
- ▲ from IP infringement claims made by third parties

Additionally, we have agreements with our directors and certain officers that require us, among other things, to indemnify them against certain liabilities that may arise by reason of their status or service as directors or officers. We have also agreed to indemnify certain former officers and directors of acquired companies. We maintain director and officer insurance, which may cover our liabilities arising from these indemnification obligations in certain circumstances.

It is not possible to determine the maximum potential obligations under these indemnification undertakings due to the limited history of prior indemnification claims and the unique facts and circumstances involved in each particular agreement. Such indemnification undertakings may not be subject to maximum loss clauses. Historically, we have not incurred material costs related to indemnification obligations.

We do not expect any material losses from, nor are we dependent on off-balance sheet arrangements to fund our operations. We describe additional off-balance sheet arrangements in Note 16 of our Consolidated Financial Statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We use derivative financial instruments to minimize our market risk exposure resulting from fluctuations in foreign exchange rates and interest rates. The primary business objective of our hedging program, as defined in our corporate risk management policy, is to minimize the impact of transaction, remeasurement, and specified economic exposures to our net income and earnings per share. The counter parties to these instruments are major commercial banks and we believe that losses related to credit risk are remote. We are not party to leveraged derivatives and do not hold or issue financial instruments for speculative purposes.

Foreign Currency Risk

We routinely use forward exchange contracts to hedge our net exposures, by currency, related to our monetary assets and liabilities denominated in nonfunctional foreign currencies. In addition, from time to time, we may enter into forward exchange contracts to establish with certainty the US dollar amount of future firm commitments denominated in a foreign currency.

Hedging

Excluding our investment in CLS discussed below, our net foreign currency exposure related to our monetary assets and liabilities denominated in nonfunctional currency totaled \$73.9 million at September 30, 2007 and \$151.0 million at September 30, 2006. The notional amount of foreign currency contracts hedging this exposure totaled \$63.6 million at September 30, 2007 and \$149.2 million at September 30, 2006.

Given our foreign exchange position, a 10% adverse change in foreign exchange rates upon which these foreign exchange contracts are based would result in exchange gains and losses. In all material aspects, these exchange gains and losses would be offset by exchange gains and losses on the underlying net monetary exposures for which the contracts are designated as hedges. We do not expect material exchange rate gains or losses from unhedged foreign currency exposures.

Translation

As currency rates change, translation of our foreign currency functional businesses into US dollars affects year-over-year comparability of equity. We do not generally hedge translation risks because cash flows from our international operations are generally reinvested locally. Changes in the currency exchange rates that would have the largest impact on translating our international net assets include the British pound, Australian dollar, Japanese yen, Euro, South African Rand, and Canadian dollar. We estimate that a 10% change in foreign exchange rates would have impacted reported equity by approximately \$21.3 million at September 30, 2007 versus \$10.0 million at September 30, 2006. This increase is consistent with our international growth. This sensitivity analysis disregards the possibility that rates can move in opposite directions and that gains from one area may or may not be offset by losses from another area.

Interest Rate Risk

We define interest rate risk as the potential change in earnings resulting from a hypothetical 100 basis points (bps) adverse change in applicable interest rates.

Costs to fund jackpot liabilities

Fluctuations in prime, treasury and agency rates due to changes in market and other economic conditions directly impact our costs to fund jackpots, and therefore our gross profit in gaming operations. If interest rates decline, our costs increase, and correspondingly our gross profit declines. We estimate that a hypothetical decline of 100 bps in interest rates would have reduced our gross profit by approximately \$15.0 million in fiscal 2007 and \$14.5 million in fiscal 2006. We do not currently manage this exposure with derivative financial instruments.

Senior Credit Facility

Fluctuations in LIBOR due to changes in market and other economic conditions directly impact our interest expense on our senior credit facility. We estimate that a hypothetical increase of 100 bps in interest rates would have increased our interest expense by approximately \$6.0 million in fiscal 2007 and \$2.0 million in fiscal 2006. We do not currently manage this exposure with derivative financial instruments. See Note 11 of our Consolidated Financial Statements for additional information about our senior credit facility.

Convertible Debentures

The fair value of our Debentures is affected by changes in the price of IGT stock and changes in interest rates. Typically the fair value of our Debentures increases and decreases directionally with like movements in our stock price. In general, the fair value of an investment in a fixed interest rate debt instrument increases as interest rates fall and decreases as interest rates rise. The stock price and interest rate changes impact the fair value of our Debentures, however these changes currently have no material affect on our financial position, cash flows or results of operations.

We estimate the fair value of our 2.6% Debentures at September 30, 2007 totaled \$895.5 million versus \$887.6 million at issuance in December 2006. See Note 11 of our Consolidated Financial Statements for additional information about our 2.6% Debentures and the redemption of our 1.75% Debentures.

Investment in CLS

The value of our CLS investments are affected by changes in foreign currency exchange rates of the Hong Kong dollar and the trading price of CLS stock. The estimated market value of our equity investment in CLS stock was approximately \$43.4 million at September 30, 2007 versus \$32.9 million for our initial investments during fiscal 2007.

Additionally, our investment in the CLS 4% convertible note is subject to interest rate risk and volatility in CLS stock prices. Generally, the fair value of fixed-rate instruments increases as interest rates fall and decreases as interest rates rise. The fair value of convertible notes increases as stock price volatility increases. The CLS note had an estimated fair value of \$78.0 million at September 30, 2007 versus our initial investment of \$70.3 million in May 2007. We are using 5-year forward contracts with an aggregate notional amount of \$49.9 million at September 30, 2007 to mitigate foreign currency risk on approximately 70% of the note. See Note 2 of our Consolidated Financial Statements for additional information about our CLS investments.

Item 8. Financial Statements and Supplementary Data

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stockholders and Board of Directors
International Game Technology
Reno, Nevada:

We have audited the accompanying consolidated balance sheets of International Game Technology and subsidiaries (the "Company") as of September 30, 2007 and 2006, and the related consolidated statements of income, cash flows, and stockholders' equity and comprehensive income for each of the three years in the period ended September 30, 2007. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of International Game Technology and subsidiaries as of September 30, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended September 30, 2007, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Notes 1 and 4 to the consolidated financial statements, on October 1, 2005, the Company adopted SFAS 123R, *Share-Based Payment*, which changed its method of accounting for share-based compensation.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of September 30, 2007, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated November 27, 2007 expressed an unqualified opinion on the Company's internal control over financial reporting.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Basis of Presentation and Consolidation

Our consolidated financial statements are prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) and include all adjustments of a normal recurring nature that are necessary to fairly present our consolidated results of operations, financial position, and cash flows for each period presented.

Our consolidated financial statements include the accounts of International Game Technology and all majority-owned or controlled subsidiaries and variable interest entities (VIEs) of which we are the primary beneficiary. All appropriate inter-company accounts and transactions are eliminated.

Our fiscal year is reported on a 52/53-week period that ends on the Saturday nearest to September 30 each year. Similarly, our quarters end on the Saturday nearest to the last day of the quarter end month. For simplicity, all fiscal periods are presented as ending on the calendar month end. Accordingly, this report presents the following periods:

Fiscal Year End	
Actual	Presented as
September 29, 2007	September 30, 2007
September 30, 2006	September 30, 2006
October 1, 2005	September 30, 2005

Use of Estimates

Our consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States (US). Accordingly, we are required to make estimates, judgments and assumptions that we believe are reasonable based on our historical experience, contract terms, observance of known trends in our company and the industry as a whole, and information available from other outside sources. Our estimates affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On a regular basis, we evaluate our estimates, including those related to customer programs and incentives, revenue recognition, product returns, long-lived assets, prepaid and deferred royalties, jackpot liabilities, inventory obsolescence, share-based compensation, income taxes, bad debts, investments, warranty obligations, long-term contracts, contingencies and litigation. Actual results may differ from initial estimates.

Revenue Recognition

We recognize revenue when all of the following have been satisfied:

- ◆ persuasive evidence of an arrangement exists
- ◆ the price to the customer is fixed and determinable
- ◆ delivery has occurred and any acceptance terms have been fulfilled
- ◆ no significant contractual obligations remain
- ◆ collection is reasonably assured

Gaming Operations

Gaming operations revenues are generated from providing customers with our proprietary gaming products, services, and/or intellectual property (IP) under a variety of recurring revenue arrangements, including:

- ◆ wide area progressive (WAP) systems
- ◆ central determination systems (CDS)
- ◆ stand alone participation and flat fee
- ◆ equipment leasing and rental
- ◆ online gaming solutions

WAP systems entail a configuration of numerous electronically linked slot machines located in multiple casino properties, connecting to an IGT central computer system via a network of communications equipment. WAP systems games differ from stand alone units in that they build a progressive jackpot with every wager until a player hits the top award winning combination. WAP contribution revenues are recognized based on a percentage of coin-in generated by the game. Participating casinos pay a percentage of the coin-in either

directly to IGT or a trust for services related to the design, assembly, installation, operation, maintenance, and marketing of the WAP systems and to administer the progressive jackpot funding.

Unlike WAP systems where the game outcome is determined within the slot machine itself, CDS determine and deliver game outcomes to the linked machines. CDS, stand alone, and other equipment leasing or rentals are recognized based on our participation percentage of the net win or on a flat fee basis with the passage of time.

Online gaming solutions encompass online casino gaming software and content licensing, as well as back office operational support services. All online gaming solutions are provided under revenue sharing arrangements based on net gaming revenues.

Product Sales

Our product sales revenues are generated from the sale of gaming machines, systems, parts, conversion kits, content fees, equipment, services, IP royalty and license fees. Revenues are reported net of incentive rebates, discounts, sales taxes and other taxes of a similar nature. Revenues relating to customized research and development (R&D) contracts are recognized as the related work is delivered. We recognize license fee revenues from business affiliates over the term of the associated agreement unless the fee is in exchange for products delivered or services performed that represent the culmination of a separate earnings process. Amounts received prior to completing the earnings process are deferred until revenue recognition criteria are met.

Our sales credit terms are predominately 90 days or less. We also grant extended payment terms under contracts of sale secured by the related equipment sold.

For sales arrangements with multiple deliverables, we apply the guidance from Statement of Position (SOP) 97-2, *Software Revenue Recognition*, as amended, and Emerging Issues Task Force (EITF) 00-21, *Revenue Arrangements with Multiple Deliverables*. Deliverables are divided into separate units of accounting if:

- ◆ each item has value to the customer on a stand alone basis
- ◆ we have objective and reliable evidence of the fair value of the undelivered items as evidenced by vendor-specific objective evidence or third-party evidence of the price at which the undelivered item is regularly sold on a standalone basis
- ◆ delivery of any undelivered item is considered probable and substantially in our control

The majority of our multiple element contracts are for some combination of machines, systems software, license fees, maintenance, training, and other services. The contracts separately state pricing for each deliverable based on our standard price list (the price charged for the deliverable when it is sold separately) less a specified discount. The terms of performance, cancellation, termination, or refund provisions in our multiple element contracts are similar to those in a contract or sales order for an individual stand alone deliverable. Each deliverable is accompanied by a fully executed sales order signed by the customer and revenues are recognized when delivery and/or customer acceptance has occurred.

For multiple element contracts considered a single unit of accounting, (where all of the criteria for separation have not been met), we recognize revenues based on the method appropriate for the last delivered item.

Our services for initial installation, as well as standard warranty and technical support, are not separately priced components of our sales arrangements and are included in our revenues when the product is delivered. If the installation of the product is not considered inconsequential and perfunctory, then we defer revenue recognition until the installation is complete.

License and/or warranty maintenance agreements with customer support terms that extend beyond the standard period included in the sale of the product are recognized ratably over the term of the service period. Revenues generated for additional training and education classes are recognized when the services are performed. When software systems require significant customization specific to the individual customer, we defer recognition of revenues until the system is successfully installed, fully operational, and accepted by the customer.

Share-based Compensation

On October 1, 2005, IGT adopted the provisions of Statement of Financial Accounting Standards (SFAS) 123R and Staff Accounting Bulletin (SAB) 107, collectively *Share-Based Payment*, requiring the measurement and recognition of all share-based compensation under the fair value method. We implemented SFAS 123R using the modified prospective transition method and adjusted previously recorded deferred compensation back to additional paid-in capital. We have elected not to use the alternate method for establishing and accounting for

the additional paid-in capital (APIC) pool provided for in Financial Accounting Standards Board Staff Position (FSP) FAS 123R-3, *Transition Election Related to Accounting for Tax Effects of Share-Based Payment Awards*.

For the year ended September 30, 2006, we recognized compensation expense for all current award grants and for the unvested portion of previous award grants based on grant date fair values. Prior to fiscal 2006, we accounted for share-based awards under the Accounting Principles Board (APB) 25 intrinsic value method, which resulted in compensation expense recorded only for restricted share awards and the modification or acquisition of outstanding unvested options. Prior period financial statements have not been adjusted to reflect fair value share-based compensation under SFAS 123R.

With the adoption of SFAS 123R, we changed our method of expense attribution for fair value share-based compensation from the accelerated approach to the straight-line approach for future service based awards granted. We anticipate the straight-line method will provide a more meaningful measure of costs incurred for service based awards. We use the accelerated method to expense our outstanding performance-based awards, as defined in SFAS 123R. Compensation for share-based awards granted prior to the beginning of fiscal 2006 will continue to be recognized under the accelerated method.

We use historical data and projections to estimate expected employee behaviors related to option exercises and forfeitures. SFAS 123R requires that forfeitures be included as part of the grant date estimate. The cumulative effect of forfeitures related to previous SFAS 123 pro forma expense was not material. Prior to adopting SFAS 123R, we reduced share-based compensation expense when forfeitures occurred.

The fair value of restricted share awards is based on the grant date market price of IGT stock. We estimate the fair value of each stock option award on the grant date using the Black-Scholes valuation model. Option valuation models require the input of highly subjective assumptions, and changes in assumptions used can materially affect the fair value estimate. Expected volatility and dividends are based on implied and historical IGT stock factors. Expected term represents the estimated weighted average time between grant and employee exercise. Risk free rate is based on US Treasury rates appropriate for the expected term. See Note 4 for more information on our share-based compensation plans.

Advertising Costs

IGT expenses advertising costs as incurred, except long term outdoor billboards that are capitalized and amortized over the contract life. Advertising expense totaled \$19.9 million in fiscal 2007, \$17.5 million in fiscal 2006 and \$19.5 million in fiscal 2005.

Research and Development

Our products reach technological feasibility shortly before the products are released and therefore R&D costs are expensed as incurred. Employee related costs associated with product development are included in R&D costs. R&D performed for specific customers is charged to cost of product sales when the related sale is recorded.

Income Taxes

We recognize deferred income tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Deferred income taxes reflect the net tax effects of (a) temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes, and (b) operating loss and tax credit carry forwards. We determine the net current and non-current deferred tax assets or liabilities separately for federal, state, and foreign jurisdictions.

Accrued income taxes are reduced by the tax benefits from employee stock options exercised. We receive an income tax benefit on the difference between the market price of the stock issued at the time of exercise and the option price. Our provision for income taxes includes interest, penalties and reserves for uncertain tax positions.

Earnings Per Share

We compute earnings per share (EPS) using the weighted average number of common and potential shares outstanding. See Note 15.

Cash and Equivalents

Cash and equivalents consist primarily of deposits held at major banks, commercial paper, and other marketable securities with original maturities of 90 days or less.

Restricted Cash and Investments

We are required by gaming regulations to maintain sufficient reserves in restricted accounts to be used for the purpose of funding payments to progressive jackpot winners. Restricted amounts are based primarily on the jackpot meters displayed to slot players and vary by jurisdiction. Compliance with restricted cash and investments requirements is reported to the gaming authorities in various jurisdictions.

Investment Securities

Our portfolio of short-term investment securities is available-for-sale and stated at market value. Unrealized gains and losses after tax are recorded in accumulated other comprehensive income. Market value is based on the trading price at the end of the period and realized gains or losses are determined on the specific identification cost method.

Auction rate securities (ARS) comprise a significant portion of our portfolio, which we buy and sell regularly as a means of effective cash management. ARS have an underlying long-term maturity, but we consider our ARS of a short-term duration because we trade and reset interest rates through the modified Dutch auction process at predetermined short-term intervals, usually 7, 28, or 35 days.

Receivables

The carrying amount reflected in our consolidated balance sheet for receivables approximates fair value.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts on our trade, notes and contracts receivable that we have deemed to have a high risk of collectibility. We analyze historical collection trends, customer concentrations, customer creditworthiness, current economic trends and changes in our customer payment terms when evaluating the adequacy of our allowance for doubtful accounts. We also evaluate specifically reserved notes for placement on non-interest-accrual status.

Equipment Financing Contracts

IGT grants extended payment terms to qualifying customers under contracts of sale. These contracts are generally for terms of one to four years, with interest recognized at prevailing rates, and secured by the related equipment sold.

Facility Notes

IGT provides development financing loans to select customers for new or expanding gaming facilities, generally under terms of one to seven years with interest at prevailing rates. Certain agreements may also include provisions for the facility to reserve a percentage of its floor space for the placement of IGT proprietary games, which may be reduced if the machines do not meet certain performance standards. These agreements may call for IGT to receive a portion of the net win on these proprietary games as repayment for some or all of the amounts financed.

Inventories

Inventories are stated at the lower of cost (first-in, first-out method) or market value. We regularly assess inventory quantities for excess and obsolescence primarily based on forecasted product demand.

Jackpot Annuity Investments

These investments represent discounted qualifying US treasury or agency securities purchased and held to maturity to fund annual jackpot payments due previous winners. We have both the intent and ability to hold these investments to maturity. Accordingly, these investments are stated at cost, plus interest accreted over the term of the security. Certain jurisdictions require regulatory approval for liquidation of these annuity investments.

Property, Plant and Equipment

We depreciate our property, plant and equipment down to salvage value using the straight-line method. Maintenance and repairs are expensed as incurred and improvements are capitalized. Asset charges related to gaming operations equipment are recorded to cost of gaming operations.

Goodwill and Other Intangible Assets

We amortize our finite lived intangible assets to reflect the pattern in which the economic benefits of the assets will be consumed based on projected usage and revenues over one to 17 years. We determine amortization periods generally reflecting useful lives and the cash flow streams associated with them. When the pattern of economic benefit is undeterminable, we amortize using the straight-line method. We consider certain factors when assigning useful lives such as legal, regulatory and contractual provisions, as well as the effects of obsolescence, demand, competition, and other economic factors.

We measure and test goodwill and other intangible assets not subject to amortization for impairment at least annually or more often if there are indicators of impairment. We regularly evaluate our portfolio of finite-lived intangibles to determine if changes or circumstances indicate the carrying values may not be recoverable. Indicators that could trigger an impairment review include legal and regulatory factors, market conditions, and operational performance. Impairment is measured as the difference between the carrying amount and the fair value of the assets, and is recognized as a component of income from operations.

Other Assets

Other assets are primarily comprised of investments in unconsolidated affiliates (see Note 2), prepaid or deferred expenses and deposits.

Royalties

We pay royalty and license fees for the use of third party trade names, celebrity likenesses, content, and other IP rights. We classify prepaid and deferred fees as current and non-current assets and amortize costs based on the estimated period of expected consumption related to forecasted distribution schedules. If a pattern cannot be reliably determined, we use the straight-line method over the contract life. We also contract with certain parties for IP rights where future payments are contingent upon revenues generated.

Prepaid fees deemed unrealizable after the related product is released for distribution are charged to cost of product sales or gaming operations. Prepaid fees deemed unlikely to be realized before the related product is released are charged to R&D.

Investments in Unconsolidated Affiliates

We apply the equity method of accounting for investments in unconsolidated affiliates when we exercise significant influence, but do not control the financial and operating decisions. Equity earnings of our unconsolidated affiliates are included in operating income because they are integral to our business operations. Equity method earnings not material to our financial statements are presented as a component of SG&A.

Investment securities in strategic unconsolidated affiliates are presented separately from investment securities held for a return. Equity investments in unconsolidated affiliates not accounted for under the equity method and restricted for more than one year are recorded under the cost method. All other investments in unconsolidated affiliates not accounted for under the equity method are available-for-sale securities carried at fair value. Unrealized holding gains or losses are recorded in other comprehensive income, except those hedged with FAS 133 foreign currency derivatives which are recognized in other income (expense).

Derivatives

We recognize all derivatives as either assets or liabilities at the fair value of the instruments based on current market rates. Accounting for changes in the fair value of derivatives depends on the intended use and resulting designation. We use derivative financial instruments to minimize our market risk exposure resulting from fluctuations in foreign exchange rates and interest rates. The primary business objective of our economic hedging program is to minimize the impact to our earnings resulting from foreign exchange rate changes. Counter parties to our agreements are major commercial banks, thus our exposure to credit risk is remote. We are not a party to leveraged derivatives and do not hold or issue financial instruments for speculative purposes.

Foreign Currency Hedging

Subsidiary Operations

We routinely use derivative financial instruments to hedge our net exposure, by currency, related to our monetary assets and liabilities denominated in non-functional foreign currency. These hedging instruments are subject to fluctuations in value that are generally offset by the value of the underlying exposures being hedged. These forward exchange contracts are generally not designated as SFAS 133 hedges and resulting gains or losses are recognized in other income (expense).

Investment in Unconsolidated Affiliates

Additionally, we hedge significant investments denominated in foreign currency with forward exchange contracts to protect the US dollar value of our investment. These forward exchange contracts are designated as SFAS 133 fair value hedges and related gains or losses are recorded as a component of the hedged transaction in other income (expense) together with the offsetting gains or losses on the change in the investment's fair value attributable to foreign exchange rates. Time value is excluded from effectiveness testing.

Negotiated Share Repurchase Transactions

As part of our capital deployment activities, we conduct share repurchases to return capital to our shareholders and to reduce outstanding share count dilution. We use open market and negotiated share repurchases to achieve our timing, cost and volume objectives. Our negotiated share repurchase transactions may consist of accelerated share repurchases (ASR) or structured share repurchases (SSR) that permit us to repurchase a large number of shares at certain prices or price ranges.

Our ASR is a transaction that allows us to purchase a targeted number of shares immediately with the final purchase price of those shares determined by their average market price over a fixed measurement period. It is intended to combine the immediate share retirement benefits of a tender offer with the market impact and pricing benefits of a disciplined daily open market share repurchase program. An ASR also guarantees repurchase of a large number of shares while limiting our price risk through the use of a floor and cap feature. The result of this transaction is reflected in the treasury stock component of shareholders equity.

Our SSR transaction requires that we prepay a specified amount of cash in exchange for the right to receive shares at a discount to the current market price or cash with an above market return, depending on the closing share price on a specified date in the future. The form of this transaction allows us to either meet our cost objectives regarding share repurchases or earn an above market yield on the cash investment. The prepayment amount is recorded as a reduction to APIC with final settlement recorded as either an increase to APIC if we receive cash or an increase in treasury stock if shares are delivered, depending on the closing share price on the specified date.

In accordance with EITF 99-7, *Accounting for an Accelerated Share Repurchase Program*, ASR transactions are accounted for as an immediate reduction of outstanding shares for basic and diluted earnings per share. Additionally, our ASR and SSR contracts qualify for equity classification in accordance with EITF 00-19, *Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock*, and EITF 01-6, *The Meaning of Indexed to a Company's Own Stock*, as settlement is based on our stock price and we are not required to deliver additional shares or pay additional cash upon settlement.

Jackpot Liabilities and Expense

WAP systems jackpots are generally payable in equal installments over a 20 to 26 year period or immediately in the case of our instant win progressive jackpots. Winners may elect to receive a lump sum payment for the present value of the jackpot discounted at applicable interest rates in lieu of periodic annual installments. Discount rates eligible for use in the lump sum payment calculation vary by jurisdiction and are impacted by market forces and other economic conditions.

Jackpot liabilities are comprised of payments due previous winners, as well as amounts due future winners of progressive jackpots not yet won. Previous winner liabilities for periodic payments are carried at the amortized cost of jackpot annuity investments in qualifying US government or agency securities used to fund future periodic payments. Liabilities due future winners are carried at the present value of the amount carried on progressive jackpot meters for jackpots not yet won. Jackpot expense represents the estimated cost to fund jackpots and is subject to changes in the discount or interest rate used to present value progressive jackpot liabilities due future winners.

We estimate the present value of progressive jackpot liabilities due future winners using current market prime, treasury, or agency rates weighted with historical lump sum payout election ratios. The most recent historical patterns indicate that approximately 85% of winners will elect the lump sum payment option. Additionally, we

estimate current liabilities for jackpots not yet won based on historical experience with winner payment elections, in conjunction with the theoretical projected number of jackpots expected to hit within one year.

WAP Systems Interest

Interest income accretion on jackpot annuity investments used to fund periodic payments is offset by interest expense accretion on related jackpot liabilities for payments due previous winners. The interest income and expense accrete at approximately the same rate and vary depending on the amount of jackpots won and the number of winners electing periodic payments. WAP systems annuity interest accretion totaled \$31.3 million in fiscal 2007, \$23.2 million in fiscal 2006 and \$31.3 million in fiscal 2005.

We also hold a significant amount of cash and short-term investments related to our WAP operations on which we earn interest income.

Other Liabilities

Other liabilities are primarily comprised of customer deposits, accrued expenses, deferred compensation, deferred revenue, and minority interest.

Foreign Currency Translation

The functional currency of certain IGT international subsidiaries is the local currency. For those subsidiaries, we translate assets and liabilities at exchange rates in effect at the balance sheet date, and income and expense accounts at average exchange rates during the year. Resulting currency translation adjustments are recorded directly to accumulated other comprehensive income within stockholders' equity. Gains and losses resulting from transactions in non-functional currencies are recorded in income. For subsidiaries whose functional currency is the US dollar, gains and losses on non-US dollar denominated assets and liabilities are recorded in income.

Hurricane Damage Insurance Recoveries

In March 2007, we negotiated a final insurance settlement of \$18.0 million related to 2005 US Gulf Coast hurricane damages which destroyed or temporarily shut down our gaming operations machines. We recorded \$5.5 million of hurricane related losses in September 2005. We received a final payment of \$13.0 million, net of \$5.0 million advanced in fiscal 2006. We recorded insurance gains of \$5.0 million, net of \$1.0 million previously accrued, for property damages in cost of gaming operations, and \$12.0 million for business interruption in selling, general and administrative (SG&A).

Recently Issued Accounting Standards

SFAS 159

In February 2007, the Financial Accounting Standards Board (FASB) issued SFAS 159, *The Fair Value Option for Financial Assets and Financial Liabilities*, permitting entities to elect fair value measurement for many financial instruments and certain other items. Unrealized gains and losses on designated items will be recognized in earnings at each subsequent period. SFAS 159 also establishes presentation and disclosure requirements for similar types of assets and liabilities measured at fair value. We are required to adopt this statement in October 2008 and we continue evaluating the potential impact to our future results of operations, financial position or cash flows, which will depend on the extent we elect fair value measurement for eligible items.

SFAS 157

In September 2006, the FASB issued SFAS 157, *Fair Value Measurements*, which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, but provides guidance on how to measure fair value by providing a fair value hierarchy used to classify the source of the information. We are required to adopt this statement in October 2008 and we continue evaluating to what extent it will impact our future results of operations, financial position or cash flows.

FASB Interpretation (FIN) 48

In June 2006, the FASB issued FIN 48, *Accounting for Uncertainty in Income Taxes-an interpretation of FASB Statement No. 109*. FIN 48 clarifies the accounting for uncertainty in income taxes by defining criteria that a tax position on an individual matter must meet before that position is recognized in the financial statements. Additionally, FIN 48 provides guidance on measurement, derecognition, classification, interest and penalties, interim period accounting, disclosures and transition. This interpretation is effective for us beginning in the first quarter of 2008, and we continue evaluating the potential impact of adopting this interpretation on our future results of operations, financial position or cash flows.

2. Variable Interest Entities and Investments in Unconsolidated Affiliates

Variable Interest Entities

Consolidated WAP Trusts

We initially consolidated the WAP trusts in Iowa and New Jersey (NJ) beginning June 30, 2004 under FIN 46 (revised December 2003), *Consolidation of Variable Interest Entities*. Consolidated trust assets and equivalent liabilities relate primarily to jackpot funding. These VIE trust consolidations increase gaming operations revenues and costs by approximately the same amount, resulting in no material impact to gross profit or net income.

In November 2005, IGT assumed direct responsibility for current and future NJ WAP jackpot system operations previously under the control of a third party trust administrator. At that time, IGT was relieved of its contractual guarantee obligation related to the third party administration of past winner payments. Accordingly, we ceased to consolidate approximately \$139.2 million of NJ VIE assets and equivalent liabilities related to past winners during the first quarter of fiscal 2006.

In November 2006, IGT executed an agreement with casino trustees to assume responsibility for and administration of the NJ past winner payments formerly under the control of a third party administrator. The resulting reconsolidation of these VIE past winner trusts initially added assets and equivalent liabilities of \$122.8 million. Consolidated Iowa and NJ VIE trust assets and equivalent liabilities totaled \$116.5 million at September 30, 2007 and \$4.1 million at September 30, 2006. Consolidated VIE trusts comprised less than 0.1% of total revenues for the years ended September 30, 2007 and 2006, and less than 2% in 2005.

Investments in Unconsolidated Affiliates

Walker Digital Gaming, LLC (WDG)

In February 2006, IGT paid \$56.0 million for a 10% equity interest in WDG (formerly known as Casino IP Holdings, LLC), a VIE formed to hold, develop, and license WDG IP identified for gambling use. This relationship facilitates the development, introduction, and integration of certain WDG innovations into IGT product lines. We are not the primary beneficiary of WDG and apply the equity method of accounting. Our net investment of \$47.5 million at September 30, 2007 represents our maximum exposure to loss. We recognized losses of \$5.3 million in fiscal 2007 and \$3.2 million in fiscal 2006, primarily comprised of intangibles amortization.

China LotSynergy Holdings, Ltd. (CLS)

In May 2007, we entered into strategic business arrangements with China LotSynergy Holdings, Ltd., a company involved in the development of the China lottery market and other related activities. As of September 30, 2007, our investment totaled \$33.6 million, including transaction costs, in 5% of the outstanding ordinary shares of CLS, a public company listed on the Growth Enterprise Market of the Hong Kong Exchange. Our investment includes the purchase of additional shares of CLS to maintain our 5% ownership position. We record this equity investment under the cost method and recognize our portion of net accumulated earnings in CLS only to the extent distributed through dividends. The estimated market value of our CLS stock was approximately \$43.4 million at September 30, 2007.

In May 2007, we also invested \$72.0 million, including transaction costs, in a 4% zero-coupon unsecured convertible note of CLS due May 31, 2015, which becomes partially or wholly convertible after three years at an initial conversion price of HK\$3.82 per share or HK\$0.96 per share split-adjusted. CLS may call the note for redemption in full at accreted value under certain circumstances on or after May 31, 2012. IGT may require CLS to repay some or all of the note at accreted value on May 31, 2012.

The convertible note is available-for-sale and carried at its estimated market value of \$78.0 million at September 30, 2007. Unrealized holding gains totaled \$6.4 million at September 30, 2007. Our evaluation of the convertible note terms determined that no feature met the SFAS 133 definition of a derivative requiring bifurcation at September 30, 2007.

Additionally, IGT entered into a Technical Cooperation Agreement (TCA) to provide technical support, assistance and consulting services to CLS and exclusively explore opportunities for providing products and services in connection with the China welfare lottery. IGT is restricted from selling or transferring any of its shares in CLS or the convertible note for three years, after which either party may terminate the exclusivity provision in the TCA allowing IGT to sell or transfer its shares in CLS or the convertible note. In September 2007, we established a 50/50 joint venture, IGT Synergy Holding Ltd., to explore opportunities in connection with the China welfare lottery. We accrued \$14.5 million at September 30, 2007, for our unconditional

commitment to contribute capital in installments over the next two years. We will apply the equity method of accounting for our investment in IGT Synergy.

All CLS related investments above are presented as a component of other non-current assets.

3. Balance Sheet Components

Inventories

September 30, <i>(In millions)</i>	2007	2006
Raw materials	\$ 78.4	\$ 79.9
Work-in-process	4.5	4.6
Finished goods	<u>61.9</u>	<u>77.6</u>
Total inventories	<u>\$ 144.8</u>	<u>\$ 162.1</u>

Property, Plant and Equipment

September 30, <i>(In millions)</i>	2007	2006	Useful lives in years
Land	\$ 58.0	\$ 35.4	
Buildings	139.7	104.6	30-40
Leasehold improvements	13.1	14.0	lease term
Machinery, furniture and equipment	242.6	194.1	2-15
Gaming operations equipment	737.8	608.8	1-3
Construction in process	<u>80.3</u>	<u>82.6</u>	
Total	1,271.5	1,039.5	
Less accumulated depreciation	<u>(704.1)</u>	<u>(569.7)</u>	
Property, plant and equipment, net	<u>\$ 567.4</u>	<u>\$ 469.8</u>	

Construction in process includes \$64.0 million at September 30, 2007 and \$57.7 million at September 30, 2006 related to our new facilities under construction in Las Vegas. Interest capitalized during fiscal 2007 totaled \$2.3 million and \$1.3 million during fiscal 2006. During the year ended September 30, 2007, we reclassified \$59.6 million related to the Las Vegas facilities from construction in process to land, buildings and equipment as it was placed in service.

In March 2007, IGT sold a company airplane for \$7.8 million to a limited liability company owned by Chuck Mathewson, a former director and executive officer of IGT, and the father of Robert Mathewson, a current IGT director. Robert Mathewson has no interest in the limited liability company or in the airplane itself. IGT recognized \$5.8 million in gain on the sale.

Other Assets

September 30, <i>(In millions)</i>	2007	2006
Investments in unconsolidated affiliates	\$ 175.3	\$ 53.0
Prepaid or deferred expenses	91.8	105.7
Miscellaneous	<u>28.2</u>	<u>26.2</u>
Total other assets	<u>\$ 295.3</u>	<u>\$ 184.9</u>

See Note 2 for additional information about investments in unconsolidated affiliates.

4. Employee Benefit Plans

We have established a variety of employee benefit programs to attract, retain and motivate our employees.

Cash Incentives

Our profit sharing and 401(k) plan was adopted for US employees. IGT matches 100% of an employee's contributions up to \$750 per year. Participants immediately vest in their contributions and IGT's matching contributions. Additionally, IGT contributes a portion of profits to eligible employees, which vest over a six-year period. Cash sharing is distributed semi-annually to all eligible employees and management bonuses are paid annually to selected employees.

Our non-qualified deferred compensation plan, implemented in September 1999, provides an unfunded incentive compensation arrangement for eligible management and highly compensated employees. Participants may elect to defer up to 50% of their annual earnings with a minimum deferral of \$2,000. Distributions can be paid out as short-term payments or at retirement. Retirement benefits can be paid out as a lump sum or in annual installments over a term of up to 15 years.

Total annual contributions from operating profits for these plans totaled \$93.6 million in fiscal 2007, \$88.4 million in fiscal 2006 and \$66.7 million in fiscal 2005.

Share-based Compensation

The amount, frequency, and terms of share-based awards may vary based on competitive practices, company operating results, and government regulations. New IGT shares are issued upon option exercises or restricted share grants. IGT restricted or performance share awards (referred to in SFAS 123R as non-vested share awards) are earned over the employee's service (vesting) period, and hold no further restrictions upon vesting. Unrecognized costs related to all share-based awards outstanding at September 30, 2007 total \$83.5 million and are expected to be recognized over a weighted average period of 2.0 years.

Stock Incentive Plan

Under the IGT Stock Incentive Plan (SIP), our eligible employees and non-employee directors may be granted non-qualified and incentive stock options, restricted shares or stock appreciation rights. SIP grants may vest over time of service or based on performance. We generally grant stock options at an exercise price equal to the market price at the date of grant, with a 10-year contractual term. SIP grants in fiscal 2007 began vesting ratably over four years of continuous service. At September 30, 2007, 9.5 million shares remain available for grant under the IGT SIP. Each restricted share granted counts as four shares against this allowance.

Current year stock options activity as of and for the year ended September 30, 2007

Options	Shares <i>(thousands)</i>	Weighted Average		Aggregate Intrinsic Value <i>(millions)</i>
		Exercise Price <i>(per share)</i>	Remaining Contractual Term <i>(years)</i>

Expected to vest	<u>1,510</u>	<u>\$ 35.64</u>	<u>3.1</u>	<u>\$ 65.1</u>

Employee Stock Purchase Plan

Under the IGT qualified employee stock purchase plan, eligible employees are granted an option with a 12-month term to purchase a limited number of shares, exercisable the last day in February each year. Eligible employees may participate in this plan through payroll deductions up to certain limits. The option price is equal to 85% of the market price of our stock on the grant date or exercise date, whichever is less. Approximately 226,000 shares were issued in February 2007 under this plan. Based on enrollment through September 30, 2007, we expect to issue approximately 234,000 shares in February 2008 under this plan. At September 30, 2007, 2.8 million shares were available for future grants.

Additionally, eligible United Kingdom (UK) employees may enroll annually in the Barcrest Savings Related Share Option Scheme established in January 1999. Employees must elect to vest over three, five, or seven years and the option price is equal to 80% of the market price of our stock on the grant date. Approximately 14,000 shares were issued during fiscal 2007 under this plan and approximately 668,000 shares were available for grant at September 30, 2007. Based on enrollment through September 2007, we expect to issue approximately 65,000 shares under this plan over the next seven years.

Tax benefit realized for tax return deductions	26.9	50.8	26.6

5. Acquisitions

Pro forma financial information is not provided, as these acquisitions are not material to our consolidated financial statements.

Digideal

In June 2007, we invested \$31.2 million in voting convertible preferred and common stock of Digideal, a Spokane, Washington gaming technology firm. Acquiring a 58% controlling interest, Digideal's results are consolidated in our financial statements beginning June 22, 2007. We gain access to the Digideal IP portfolio and plan to work jointly in expanding game content and electronic table game products. Additional five-year agreements provide IGT exclusive manufacturing and distribution rights, as well as a fixed-price option to purchase all remaining outstanding shares.

With the business valuation not yet complete at September 30, 2007, we preliminarily allocated the purchase price to:

- ◆ tangible assets of \$14.9 million, including cash of \$12.4 million
- ◆ identifiable intangibles of \$13.8 million
- ◆ in-process R&D of \$0.5 million with no future alternative use, immediately charged to R&D
- ◆ goodwill of \$6.3 million, not deductible for tax purposes
- ◆ liabilities of \$4.3 million

Venture Catalyst Incorporated (VCAT)

In December 2006, we purchased VCAT, renamed Mariposa Software Inc., for \$21.9 million. We anticipate the Mariposa casino systems applications for customer relationship management will enhance our server-based initiatives. At September 30, 2007, the business valuation is not yet complete, and we preliminarily allocated the purchase price to:

- ◆ tangible assets of \$6.8 million, including cash of \$3.5 million
- ◆ identifiable intangibles of \$8.2 million
- ◆ in-process R&D of \$0.1 million with no future alternative use, immediately charged to R&D
- ◆ goodwill of \$11.1 million, not deductible for tax purposes
- ◆ liabilities of \$4.3 million

WagerWorks

In August 2005, we completed the acquisition of WagerWorks, a provider of internet gaming technology, content and services. We anticipate this business combination will facilitate the distribution of our game content across remote channels and mediums, including the internet and interactive television. We allocated the aggregate purchase price of \$89.1 million to:

- ◆ tangible assets of \$5.6 million, including cash of \$1.4 million
- ◆ identifiable intangibles of \$31.1 million
- ◆ in-process R&D of \$1.8 million with no future alternative use, immediately charged to R&D
- ◆ goodwill of \$58.0 million, not deductible for tax purposes
- ◆ liabilities of \$7.4 million

6. Investment Securities

Our portfolio of investment securities is available for sale and includes restricted ARS of \$57.4 million at September 30, 2007 and \$64.8 million at September 30, 2006. We realized no gains or losses during the last three fiscal years.

September 30, <i>(In millions)</i>	Net Cost	Gross Unrealized		Market Value
		Gains	Losses	
2007				
ARS	\$ 103.3	\$ -	\$ -	\$ 103.3
Equity securities	5.1	-	(0.1)	5.0
Mutual funds	0.4	-	-	0.4
Total	<u>\$ 108.8</u>	<u>\$ -</u>	<u>\$ (0.1)</u>	<u>\$ 108.7</u>
2006				
ARS	<u>\$ 256.5</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 256.5</u>

7. Jackpot Annuity Investments

September 30, <i>(In millions)</i>	Book Value	Gross Unrealized		Market Value

2007	<u>\$ 508.0</u>	<u>\$ 34.6</u>	<u>\$ (5.4)</u>	<u>\$ 537.2</u>
2006	<u>\$ 387.4</u>	<u>\$ 26.2</u>	<u>\$ (3.6)</u>	<u>\$ 410.0</u>

Future maturities of these securities through 2032, including the accreted interest at maturity, totaled:

September 30, <i>(In millions)</i>	Within 1 year	2-5 years	6-10 years	Thereafter	Total
2007	<u>\$ 66.5</u>	<u>\$ 253.1</u>	<u>\$ 208.2</u>	<u>\$ 184.8</u>	<u>\$ 712.6</u>

8. Receivables

Our notes and contracts receivable are presented net of unearned interest income and deferred loan fees totaling \$2.3 million at September 30, 2007 and \$3.3 million at September 30, 2006, and net of allowances for doubtful accounts below.

September 30, <i>(In millions)</i>	2007	2006	2005
Allowance for doubtful accounts:			
Beginning balance	\$ 18.2	\$ 20.4	\$ 26.1
Provisions	4.0	3.1	(0.7)
Write-offs net of recoveries	<u>(1.3)</u>	<u>(5.3)</u>	<u>(5.0)</u>
Ending balance	<u>\$ 20.9</u>	<u>\$ 18.2</u>	<u>\$ 20.4</u>
Allowance for doubtful notes and contracts:			
Beginning balance	\$ 39.0	\$ 42.8	\$ 42.4
Provisions	(10.0)	(3.6)	0.7
Write-offs net of recoveries	<u>(3.9)</u>	<u>(0.2)</u>	<u>(0.3)</u>
Ending balance	<u>\$ 25.1</u>	<u>\$ 39.0</u>	<u>\$ 42.8</u>
Current	\$ 12.5	\$ 21.5	\$ 27.6
Non-current	\$ 12.6	\$ 17.5	\$ 15.2

Estimated future collections below, as of September 30, 2007 are net of allowances for notes of \$4.2 million and contracts of \$20.9 million:

<i>(In millions)</i>	2008	2009	2010	2011	2012	Thereafter	Total
Notes	\$ 31.7	\$ 26.8	\$ 9.1	\$ 1.2	\$ -	\$ -	\$ 68.8
Contracts	<u>59.3</u>	<u>21.2</u>	<u>4.0</u>	<u>0.5</u>	<u>0.3</u>	<u>0.5</u>	<u>85.8</u>
	<u>\$ 91.0</u>	<u>\$ 48.0</u>	<u>\$ 13.1</u>	<u>\$ 1.7</u>	<u>\$ 0.3</u>	<u>\$ 0.5</u>	<u>\$ 154.6</u>

9. Concentrations of Credit Risk

Financial instruments that potentially subject us to concentrations of credit risk consist principally of cash and equivalents, investments, and receivables. We place short-term investments in high credit quality financial institutions or in short-duration high-quality securities, most significantly in ARS. With the exception of US Government and Agency securities, our short-term investment policy limits the amount of credit exposure in any one financial institution, industry group or type of investment. Cash on deposit may be in excess of Federal Deposit Insurance Corporation limits.

Our receivables are concentrated in the following legalized gaming regions at September 30, 2007:

North America		International	
Nevada	15 %	UK	6 %
Mississippi	7	Europe	5
Oklahoma	7	Other (less than 5% individually)	<u>15</u>
California	6		<u>26 %</u>
Pennsylvania	5		
New Jersey	5		
Other (less than 5% individually)	<u>29</u>		
	<u>74 %</u>		

In April 2007, IGT agreed to provide up to \$120.0 million in equipment and development financing to Argentina gaming operators, Casino Club South America (CCSA) and Hipodromo Argentina De Palermo South America (HAPSA), and their new joint venture, Compania Inversiones de Entretenimiento (CIESA). The agreement consists of a fully collateralized development credit facility of \$80.0 million to CIESA and the remaining \$40.0

million for the acquisition of gaming equipment by CIESA and CCSA. CIESA is a VIE created for the improvement, expansion, and new construction of casino facilities on behalf of CCSA and HAPSA. IGT is not the primary beneficiary of CIESA and our maximum exposure to loss will be the amounts financed, when funded, and interest accrued on outstanding advances. As of September 30, 2007, IGT has not funded any amounts under the agreements.

Unfunded development financing loans totaled \$88.0 million at of September 30, 2007.

10. Goodwill and Other Intangibles

Goodwill

In accordance with EITF 00-23, *Issues Related to the Accounting for Stock Compensation under APB 25 and FIN 44*, goodwill was adjusted for the tax benefit of Anchor options exercised subsequent to acquisition.

Senior Credit Facility

On December 20, 2005, we entered into an amended and restated unsecured \$2.5 billion credit facility with a syndicate of banks. The five-year credit facility provides a \$2.5 billion revolving line of credit, of which up to \$100.0 million is available for letters of credit and up to \$50.0 million is available for swingline (same day funds) borrowing. Borrowings outstanding totaled \$600.0 million at September 30, 2007, with a weighted average interest rate of 5.7%, and \$4.1 million reserved for letters of credit.

Interest rates and facility fees applicable to the credit facility may fluctuate based on our public credit ratings and/or debt to capitalization ratio. At September 30, 2007, the facility fee was 12.5 basis points (bps) and the interest rate was LIBOR (London Inter-Bank Offering Rate) plus 37.5 bps. At our discretion we can borrow for 1, 2, 3, or 6 month durations.

Financial covenants (as defined in the facility agreement) include a minimum ratio of EBITDA to interest expense minus interest on jackpot liabilities and a maximum ratio of Debt to EBITDA. Absence of compliance with required covenants causes an event of default that, if not cured, could cause the entire outstanding borrowings under the credit facility to become immediately due and payable.

The senior credit facility agreement also includes certain restrictions on our ability to:

- ♣ incur additional debt, guarantee debt, or enter into swap agreements
- ♣ incur liens
- ♣ enter into business combinations, liquidate, or dissolve
- ♣ sell, transfer, lease or dispose of substantially all assets
- ♣ change the nature of the business

Foreign Credit Facilities

Our available foreign credit facilities totaled \$130.4 million with a weighted average interest rate of 1.9% at September 30, 2007. Of this amount, \$5.2 million was drawn with a weighted average interest rate of 1.5%. Renewals on these facilities occur annually. The parent company, International Game Technology, guarantees all foreign credit facilities executed by its subsidiaries.

2.6% Senior Convertible Debentures

On December 20, 2006, we issued \$900.0 million principal amount of 2.6% Senior Convertible Debentures due December 15, 2036 in a private placement. Interest on the Debentures is paid semiannually on June 15 and December 15 of each year.

We may also pay contingent interest for the period commencing December 20, 2009 through June 14, 2010 and any six-month period thereafter, if the average trading price (as defined in the indenture) per \$1,000 Debenture for the five trading day measurement period ending on the third trading day immediately preceding the first day of the interest period equals 120% or more of an equal principal amount of Debentures. The amount of contingent interest will equal 0.25% per annum of the average trading price per \$1,000 Debenture during the five trading day measurement period used to determine whether contingent interest must be paid.

Under certain circumstances, each \$1,000 Debenture will initially be convertible into 16.1875 shares of IGT Common Stock, representing a stock price of \$61.78 or a 35% conversion premium over the market price at issuance. Upon conversion, for each \$1,000 Debenture, a holder will receive cash up to \$1,000, plus accrued and unpaid interest, if any, and shares for any excess conversion value determined in a manner set forth in the indenture. We will adjust the conversion rate upon the occurrence of certain events as defined in the indenture.

The Debentures are convertible under any of the following circumstances:

- ♣ during any fiscal quarter ending after March 31, 2007 if the closing price of our common stock is more than 130% of the conversion price during the measurement period of the preceding fiscal quarter
- ♣ if the Debentures are called for redemption
- ♣ if specified corporate transactions occur
- ♣ during the last three months prior to maturity

IGT may redeem some or all of the Debentures for cash on or after December 20, 2009, at 100% of their principal amount plus accrued and unpaid interest, if any, up to the redemption date. If IGT redeems the Debentures, holders will be notified at least 15 days, but not more than 60 days, prior to the redemption date. Holders have the right to require IGT to redeem the Debentures for cash at 100% of their principal amount plus accrued and unpaid interest, if any, on December 15, 2009, 2011, 2016, 2021, 2026 and 2031.

Under the Debenture Registration Rights Agreement, we agreed to file and keep effective a shelf registration statement covering the resale of the Debentures and underlying common stock issuable upon conversion for specified periods. Our registration statement on Form S-3 became effective on March 9, 2007. If we fail to maintain an effective registration statement for the time periods specified, subject to permitted exceptions, we will be required to pay additional interest as liquidated damages ranging from 0.25% to 0.50% of the principal amount to Debenture holders until any default under the Registration Rights Agreement is cured.

In evaluating all features of our 2.6% Debentures for SFAS 133 embedded derivatives, we determined the contingent interest feature represents an embedded derivative requiring bifurcation. The value of this derivative was nominal at issuance and at September 30, 2007, and no related derivative liability is recorded. Any future derivative value will be recorded as a liability and adjusted through interest expense for changes in fair value.

Redeemed 1.75% Zero-Coupon Senior Convertible Debentures

On December 26, 2006, all of our outstanding 1.75% Debentures were called for redemption. The call of the Debentures gave holders the right to convert their Debentures before January 10, 2007, and receive aggregate consideration comprised of shares and cash under the terms of the applicable indentures. In conjunction with the redemption and related conversions, we paid holders \$612.7 million. This redemption resulted in non-cash increases to APIC of \$1.2 million for 7.3 million shares issued and \$47.5 million for related deferred tax liability.

12. Commitments

We lease certain of our facilities and equipment under various agreements for periods through January 2016. The following table shows future minimum payments required under these leases that have initial or remaining non-cancelable lease terms as of September 30, 2007. Certain facility leases provide that we pay utilities, maintenance, property taxes, and certain other operating expenses applicable to the leased property, including liability and property damage insurance. For leased properties no longer in use, we have accrued lease payments, net of anticipated sublease receipts.

	2008	2009	2010	2011	2012	Thereafter	Total
<i>(In millions)</i>							
Operating leases	\$12.5	\$8.6	\$6.8	\$5.0	\$1.9	\$1.7	\$36.5

Rental expense totaled \$14.7 million for fiscal 2007, \$14.3 million for fiscal 2006, and \$12.7 million for fiscal 2005.

13. Jackpot Liabilities

September 30,	2007	2006
<i>(In millions)</i>		
Payments due previous winners	\$ 715.3	\$ 567.2
Payments due future winners	138.2	161.4
Unamortized discounts	(210.4)	(181.9)
Total jackpot liabilities	<u>\$ 643.1</u>	<u>\$ 546.7</u>
Estimated fair value	\$ 669.7	\$ 569.0

Future jackpot payments due	2008	2009	2010	2011	2012	Thereafter	Total
<i>(In millions)</i>							
Previous winners	\$ 69.4	\$ 66.4	\$ 64.6	\$ 62.2	\$ 59.9	\$ 392.8	\$ 715.3
Future winners	101.3	10.8	1.4	1.4	1.4	21.9	138.2

14. Foreign Currency Derivatives

Subsidiary Operations

Net foreign currency exposure related to monetary assets and liabilities denominated in nonfunctional currency decreased to \$73.9 million at September 30, 2007 from \$151.0 million at September 30, 2006, primarily due to reduced inter-company loans. The notional amount of foreign currency contracts hedging this exposure totaled \$63.6 per million at September 30, 2007 and \$149.2 million at September 30, 2006. At September 30, 2007, these forward contracts were recorded as a fair value liability of \$3.3 million. At September 30, 2006, the fair value of these contracts was recorded as a \$1.7 million asset and a \$1.2 million liability.

Investment in CLS

Additionally, during the third quarter of fiscal 2007 we executed 5-year forward contracts designated as FAS 133 foreign currency fair value hedges to protect 70% of the US dollar value of our Hong Kong dollar investment in the CLS convertible note (See Note 2). The notional amount of foreign currency contracts hedging this exposure totaled \$49.9 million at September 30, 2007, recorded at a fair value asset of \$0.2 million. There was no significant ineffectiveness for fiscal 2007.

15. Earnings Per Share

Years Ended September 30, <i>(In millions, except per share amounts)</i>	2007	2006	2005
Net income	\$ 508.2	\$ 473.6	\$ 436.5
After-tax interest expense on 1.75% Debentures	-	4.3	9.5
Diluted EPS Numerator	<u>\$ 508.2</u>	<u>\$ 477.9</u>	<u>\$ 446.0</u>
Weighted average common shares outstanding:			
Basic	330.1	336.8	343.7
Dilutive effect of stock awards	4.1	4.4	6.0
Dilutive effect of 1.75% Debentures	1.9	14.6	20.5
Diluted EPS Denominator	<u>336.1</u>	<u>355.8</u>	<u>370.2</u>
Basic earnings per share	\$1.54	\$1.41	\$1.27
Diluted earnings per share	\$1.51	\$1.34	\$1.20
Weighted average antidilutive stock award shares excluded from diluted EPS	3.2	7.1	8.9

We repurchased 2.3 million shares between September 30, 2007 and November 26, 2007.

Negotiated Share Repurchase Transactions

On September 6, 2007, we acquired 4.2 million shares through an ASR for an aggregate cost of \$175.0 million or \$41.28 per share subject to a future purchase price adjustment based on our weighted average stock price through October 3, 2007, subject to a specified collar. On September 7, 2006, we acquired 3.7 million shares through a similar ASR for an initial payment of \$150.0 million or \$40.97 per share, subject to a future purchase price adjustment based on our weighted average stock price through November 3, 2006, subject to a specified collar. We settled both transactions with no additional cash or shares delivered by either party because our weighted average stock price was above the initial cap price.

On June 6, 2006, we prepaid \$100.0 million in a SSR designed to settle in cash or IGT shares based on the closing stock price on June 29, 2006. We received cash of \$101.1 million upon settlement in July 2006 because our stock price was above the predetermined threshold price of \$35.50 per share. In September 2005, we prepaid \$74.0 million in a similar SSR, and received \$77.8 million in cash because our stock price was above the predetermined threshold price of \$27.40 per share on November 15, 2005. No shares were acquired in either SSR transaction because they settled in cash.

16. Contingencies

Litigation

IGT has been named in and has brought lawsuits in the normal course of business. We do not expect the outcome of these suits, including the lawsuits described below, to have a material adverse effect on our financial position or results of future operations.

Bally

On December 7, 2004, IGT filed a complaint in US District Court for the District of Nevada, alleging that defendants Alliance Gaming Corp., Bally Gaming Int'l, Inc., and Bally Gaming, Inc. infringed six US patents held by IGT, US Patent numbers 6,827,646; 5,848,932; 5,788,573; 5,722,891; 6,712,698 and 6,722,985. On January 21, 2005, defendants filed an answer denying the allegations in the complaint and raising various affirmative defenses to IGT's asserted claims. Defendants also asserted fourteen counterclaims against IGT, including counterclaims for a declaratory judgment of non-infringement, invalidity and unenforceability of the asserted patents, and for antitrust violations and intentional interference with prospective business advantage. IGT has successfully moved for partial summary judgment on defendants' counterclaims for intentional interference with prospective business advantage and defendants' antitrust allegations related to the gaming machine market. IGT denies the remaining allegations. On May 9, 2007, the Court issued an order construing disputed terms of the asserted patent claims. Discovery is closed and trial is scheduled for May 2008.

On April 28, 2006, IGT filed a complaint in US District Court for the District of Delaware, alleging that defendants Bally Technologies, Inc., Bally Gaming Int'l, Inc., and Bally Gaming, Inc. infringed nine US patents held by IGT, US Patent numbers RE 38,812; RE 37,885; 6,832,958; 6,319,125; 6,244,958; 6,431,983; 6,607,441; 6,565,434; and 6,620,046. The complaint alleges that the "BALLY POWER BONUSING™"

technology infringes one or more of the claims of the asserted IGT patents. The lawsuit seeks monetary damages and an injunction. On June 30, 2006, defendants filed an answer denying the allegations in the complaint and raising various affirmative defenses to IGT's asserted claims. Defendants also asserted twelve counterclaims against IGT, including counterclaims for a declaratory judgment of non-infringement, invalidity, unenforceability of the asserted patents, antitrust violations, unfair competition, and intentional interference with prospective business advantage. IGT denies these allegations, and discovery is ongoing. Trial is scheduled for November 2008.

On September 5, 2006, Bally Gaming, Inc. filed a complaint in US District Court for the District of Nevada alleging that IGT is infringing US Patent No. 7,100,916, entitled "Indicator Wheel System." The products named in the complaint are IGT's gaming machines with "wheel" features, including, without limitation, *Wheel of Fortune*®, *Wheel of Gold*™, *The Addams Family*™, *American Bandstand*™, *The Apprentice*™, *Dilbert Wheelbert*™, *Drew Carey Great Balls of Cash*™, *Elvira*®, *I Dream of Jeannie*®, *I Love Lucy*®, *Indiana Jones*™, *Raiders of the Lost Ark*™, *M*A*S*H*™, *Megabucks*® with *Morgan Fairchild*, *Regis On the Town*™, *Sinatra*™ and *The Twilight Zone*® gaming machines. The lawsuit seeks unspecified monetary damages and an injunction. On October 6, 2006, IGT filed an answer and counterclaims denying infringement and seeking a declaration that the patent is invalid and non-infringed. IGT intends to vigorously defend this lawsuit. Discovery is ongoing.

Aristocrat

On June 30, 2005, Aristocrat Technologies Australia PTY Ltd. filed a patent infringement lawsuit against IGT. The complaint was served on IGT on December 13, 2005. Aristocrat alleged that IGT willfully infringed US Patent No. 6,093,102. Aristocrat alleged that the patent covered its Reel Power® video slot technology and IGT's *Multway*® video slot games. The lawsuit sought unspecified damages and an injunction. On January 13, 2006, Aristocrat filed a First Amended Complaint adding Aristocrat Technologies, Inc. as a plaintiff. On April 20, 2007, the US District Court for the District of Nevada issued an order granting summary judgment in favor of IGT declaring the Aristocrat patent invalid. Summary judgment was entered in favor of IGT on April 23, 2007. Aristocrat appealed the decision to the US Court of Appeals for the Federal Circuit and the parties completed their appellate briefing on October 15, 2007.

On June 12, 2006, Aristocrat Technologies Australia PTY Ltd. and Aristocrat Technologies, Inc. filed a patent infringement lawsuit against IGT. Aristocrat alleged that IGT willfully infringed US Patent No. 7,056,215, which issued on June 6, 2006. On December 15, 2006, Aristocrat filed an amended complaint, adding allegations that IGT willfully infringed US Patent No. 7,108,603, which issued on September 19, 2006. The IGT products named in the original and amended complaints were the *Fort Knox*® mystery progressive slot machines. On June 13, 2007, the US District Court for the Northern District of California entered an order granting summary judgment in favor of IGT declaring both patents invalid. Aristocrat filed its notice of appeal to the U.S. Court of Appeals for the Federal Circuit.

Brochu v. Loto Quebec

Loto Quebec commenced an action in warranty against VLC, Inc., a wholly-owned subsidiary of IGT, and another manufacturer of video lottery machines in October 2003, in the Superior Court of the Province of Quebec, District of Quebec, seeking indemnification for any damages that may be awarded against Loto Quebec in a class action suit, also filed in the Superior Court of the Province of Quebec. The class action claim against Loto Quebec, to which neither IGT nor any of its affiliates are parties, was filed by Jean Brochu on behalf of himself and a class of other persons who allegedly developed pathological behaviors through the play of video lottery machines made available by Loto Quebec in taverns and other public locations. In this action, plaintiff seeks to recover on behalf of the class damages of approximately \$578.7 million Canadian dollars (CAD), representing CAD\$4,863 per class member, and CAD\$119.0 million in punitive damages. Loto Quebec filed its Plea in Defense in the main action in February 2006. The Superior Court has adjourned the trial date scheduled for late 2007 pending a decision by the Court of Appeals of the Superior Court's ruling regarding the class action time period.

Environmental Matters

Colorado Central Station Casino (CCSC), a casino operation sold by IGT in April 2003, is located in an area that has been designated by the Environmental Protection Agency (EPA) as an active superfund site because of contamination from historic mining activity in the area. In order for Anchor Coin, an entity we acquired in December 2001, to develop the CCSC site, it voluntarily entered into an administrative order of consent with the EPA to conduct soil removal and analysis (a requirement imposed on similarly situated property developers within the region) in conjunction with re-routing mine drainage. The work and obligations contemplated by the agreement were completed by Anchor in June 1998, and the EPA subsequently issued a termination of the order.

The EPA, together with other property developers excluding CCSC, continues remediation activities at the site. While we believe our remediation obligations are complete, it is possible that additional contamination may be identified and we could be obligated to participate in remediation efforts. Under the guidance in Statement of Position 96-1, *Environmental Remediation Liabilities*, we determined the incurrence of additional remediation costs is neither probable nor reasonably estimable and no liability is recorded at this time.

Miller

In June 2003, a class action lawsuit was filed in Clark County, Nevada, District Court against Acres and its directors, entitled Paul Miller v. Acres Gaming Incorporated, et al. The complaint alleged that Acres directors breached their fiduciary duties to their stockholders in connection with the approval of the merger transaction between Acres and IGT and sought to enjoin and/or void the merger agreement among other forms of relief. On September 19, 2003, the Court denied plaintiff's motion for a temporary restraining order to prevent Acres stockholders from voting on the merger. On September 24, 2003, plaintiff petitioned the Nevada Supreme Court to vacate the denial of the temporary restraining order and to enjoin Acres from holding its stockholder vote on the merger. The Nevada Supreme Court denied the petition on September 25, 2003.

On November 5, 2003, the plaintiff amended his complaint to recover damages. On December 23, 2003, defendants filed a motion to dismiss plaintiff's second amended complaint for failure to state a claim on which relief may be granted. On May 7, 2004, the Court issued an order denying defendants' motion to dismiss.

Pursuant to stipulation of the parties, plaintiff filed a third amended complaint on September 9, 2004. Defendants filed a motion to dismiss the third amended complaint on September 14, 2004. On March 15, 2006, the Court issued an order denying defendants' motion to dismiss the third complaint. On April 7, 2006, defendant filed a Notice of Removal to United States District Court, D. Nev. (Las Vegas). Plaintiff filed a motion to remand the action to state court, which was granted by order dated August 15, 2006. On November 30, 2006, the case was transferred to business court and discovery continues.

OSHA / Wrongful Termination Matter

On July 8, 2004, two former employees filed a complaint with the US Department of Labor, Occupational Safety and Health Administration (OSHA), alleging retaliatory termination in violation of the Sarbanes-Oxley Act of 2002. The former employees allege that they were terminated in retaliation for questioning whether Anchor and its executives failed to properly disclose information allegedly affecting the value of Anchor's patents in connection with IGT's acquisition of Anchor in December 2001. The former employees also allege that the acquired patents are overvalued on the financial statements of IGT. Outside counsel, retained by an independent committee of our Board of Directors, reviewed the allegations and found them to be entirely without merit.

On November 10, 2004, the employees withdrew their complaint filed with OSHA and filed a notice of intent to file a complaint in federal court. On December 1, 2004, a complaint was filed under seal in the US District Court for Nevada, based on the same facts set forth above regarding their OSHA complaint. IGT filed a motion for summary judgment as to all claims in plaintiffs' complaint. On June 14, 2007, the US District Court for the District of Nevada entered an order granting summary judgment in favor of IGT as to plaintiffs' Sarbanes-Oxley whistle-blower claims and dismissed their state law claims without prejudice. Plaintiffs' motion for reconsideration of the District Court's decision was denied. Plaintiffs filed a notice of appeal to the US Court of Appeals for the Ninth Circuit.

Related to the Anchor acquisition purchase price allocation as of December 31, 2001, IGT used the relief of royalty valuation methodology to estimate the fair value of the patents at \$164.4 million. The carrying value of the patents at September 30, 2007 totaled \$81.4 million, with a remaining life of approximately 9 years.

Arrangements with Off-Balance Sheet Risks

In the normal course of business, we are party to financial instruments with off-balance sheet risk, such as performance bonds, guarantees and product warranties not reflected in our balance sheet. We do not expect any material losses to result from these arrangements, and we are not dependent on off-balance sheet financing arrangements to fund our operations.

Performance Bonds

Performance bonds outstanding related to gaming operations totaled \$28.7 million at September 30, 2007. We are liable to reimburse the bond issuer in the event of exercise due to nonperformance.

Letters of Credit

Outstanding letters of credit issued under our line of credit to ensure payment to certain vendors and governmental agencies totaled \$4.1 million at September 30, 2007.

IGT Licensor Arrangements

Our sales agreements that include software and IP licensing arrangements may provide a clause whereby IGT indemnifies the third party licensee against liability and damages (including legal defense costs) arising from any claims of patent, copyright, trademark or trade secret infringement. Should such a claim occur, we could be required to make payments to the licensee for any liabilities or damages incurred. Historically, we have not incurred any significant costs due to infringement claims. As we consider the likelihood of incurring future costs to be remote, no liability has been recorded.

Product Warranties

Our warranty costs in the table below are accrued based on historical trends in product failure rates and expected costs to provide warranty services. The majority of our products are generally covered by a warranty for periods ranging from 90 days to one year.

Years ended September 30, <i>(In millions)</i>	2007	2006	2005
Balance at beginning of year	\$ 8.3	\$ 6.0	\$ 6.9
Reduction for payments made	(8.9)	(7.9)	(4.3)
Accrual for new warranties issued	10.6	10.4	5.7
Adjustments for pre-existing warranties	<u>(1.3)</u>	<u>(0.2)</u>	<u>(2.3)</u>
Balance at end of period	<u>\$ 8.7</u>	<u>\$ 8.3</u>	<u>\$ 6.0</u>

Self-Insurance

We are self-insured for various levels of workers' compensation, directors' and officers' liability, and electronic errors and omissions liability, as well as employee medical, dental, prescription drug, and disability coverage. We purchase stop loss coverage to protect against unexpected claims. Accrued insurance claims and reserves include estimated settlements for known claims, and actuarial estimates of claims incurred but not reported.

State and Federal Taxes

We are subject to sales, use, income and other tax audits and administrative proceedings in various federal, state, and local jurisdictions. While we believe we have properly reported our tax liabilities in each jurisdiction, we can give no assurance that taxing authorities will not propose adjustments that increase our tax liabilities.

17. Income Taxes

Net deferred income tax asset	\$ 208.8	\$ 136.6
Current	\$ 58.2	\$ 19.7
Non-current	\$ 150.6	\$ 116.9

Our US net operating loss carry forwards totaled \$56.0 million at September 30, 2007 and will expire in tax years 2020 through 2027. At September 30, 2007, our valuation allowance of \$1.6 million related to business acquisitions. Our valuation allowance at September 30, 2006 totaled \$9.1 million related to net operating losses and net deferred income tax assets of our Australia operations and was fully released in fiscal 2007.

We have not provided for US deferred income taxes or foreign withholding taxes on \$100.5 million in unrecognized temporary differences related to the basis of our investments in foreign subsidiaries as of September 30, 2007, which we expect to be permanently reinvested in operations outside the US.

We accrue reserves for potential tax contingencies quarterly based on a comprehensive review of our global tax positions. These reserves are adjusted as necessary and released after matters are resolved with certain tax authorities or upon the closure of tax years subject to tax audit. Reserves for these tax matters are included on our balance sheet as a component of accrued income taxes.

18. Business Segments

We view our business in two operating segments, each incorporating all types of revenues:

- ▲ North America includes our operations in the US and Canada
- ▲ International encompasses our efforts in all other jurisdictions worldwide

North America includes revenues from Canada that totaled \$101.1 million in fiscal 2007, \$127.5 million in 2006 and \$84.0 million in 2005. Certain income and expenses related to company-wide initiatives are managed at the corporate level and not allocated to any operating segment. We do not recognize inter-company revenues or expenses upon the transfer of gaming products between operating segments. Segment accounting policies are consistent with those of our consolidated financial statements and segment profit reflects income before tax.

Our business segments are designed to allocate resources within a framework of management responsibility. Operating costs from one segment may benefit other segments. We continually evaluate the alignment of our business development and administrative functions for reporting purposes, which may result in changes to segment allocations. Prior year amounts are reclassified to conform to the current management view and presentation.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in our periodic reports filed under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer (CEO) and Principal Financial Officer (PFO), as appropriate, to allow for timely decisions regarding required disclosure. We recognize that any controls and procedures, no matter how well designed and operated, can only provide reasonable assurance of achieving desired control objectives. Judgment is required when designing and evaluating the cost-benefit relationship of potential controls and procedures.

As of the end of the period covered by this report, with the supervision and participation of management, including our CEO and PFO, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures. Based on this evaluation, our CEO and PFO have concluded that, as of the end of such period, our disclosure controls and procedures were effective at the reasonable assurance level.

Internal Control over Financial Reporting

Management's Report on Internal Control Over Financial Reporting

Internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) refers to the process designed by, or under the supervision of, our CEO and PFO, and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Management is responsible for establishing and maintaining adequate internal control over our financial reporting.

We have evaluated the effectiveness of our internal control over financial reporting as of September 30, 2007. This evaluation was performed using the *Internal Control - Integrated Framework* developed by the Committee of Sponsoring Organizations of the Treadway Commission. Based on such evaluation, management has concluded that, as of such date, our internal control over financial reporting was effective. The attestation report issued by Deloitte & Touche LLP on our internal control over financial reporting follows below Item 9A.

Changes in Internal Control Over Financial Reporting

As a part of our normal operations, we update our internal controls as necessary to accommodate any modifications to our business processes or accounting procedures. No change occurred during the most recent fiscal quarter that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Stockholders and Board of Directors
International Game Technology
Reno, Nevada:

We have audited the internal control over financial reporting of International Game Technology and subsidiaries (the "Company") as of September 30, 2007, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2007, based on the criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended September 30, 2007 of the Company and our report dated November 27, 2007 expressed an unqualified opinion on those financial statements.

/s/DELOITTE & TOUCHE LLP

Los Angeles, California
November 27, 2007

Item 9B. Other Information

None

PART III

The information required by Items 10, 11, 12, 13 and 14, except as provided below, is incorporated by reference from the Proxy Statement to be filed with the SEC within 120 days of the end of the fiscal year covered by this report.

Item 10. Directors, Executive Officers and Corporate Governance

We have adopted the "Code of Ethics for Principal Executive Officer and Senior Financial Officers of International Game Technology" (Finance Code of Ethics), a code of ethics that applies to our Principal Executive Officer, Principal Financial Officer, Principal Accounting Officer or Controller, or any persons performing similar functions (together, the "Covered Officers"). The Finance Code of Ethics is publicly available on our website at www.IGT.com. If we make any substantive amendments to the Finance Code of Ethics or grant any waiver, including any implicit waiver, from a provision of the code to any of the Covered Officers, we will disclose the nature of such amendment or waiver on our website.

Item 11. Executive Compensation

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Equity compensation plans approved and not approved by shareholders as of September 30, 2007:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted average exercise price of outstanding options warrants and rights	Number of securities remaining available for future issuance under equity compensation plans
<i>(In millions, except per share amounts)</i>			
Equity compensation plans approved by shareholders ⁽¹⁾	19.0	\$27.60	12.3
Equity compensation plans not approved by shareholders ⁽²⁾	0.1	\$32.30	0.7
Total	19.1	\$27.62	13.0

⁽¹⁾ Includes shares under the International Game Technology Stock Incentive Plan and Qualified Employee Stock Purchase Plan. ESPP shares are not included in securities to be issued until exercised each year in February.

⁽²⁾ Includes shares available under the Barcrest Savings Related Share Option Scheme, a broad-based UK employee stock purchase program established in January 1999 to satisfy certain UK tax requirements. This program is generally intended to provide UK employees the same benefits available under the US Employee Stock Purchase Plan. Shareholder approval was not required for this plan.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Item 14. Principal Accountant Fees and Services

PART IV

Item 15. Exhibits and Financial Statement Schedules

**CERTIFICATION PURSUANT TO RULE 13a - 14(a) OF THE EXCHANGE ACT
As Adopted Pursuant To Section 302 of the Sarbanes-Oxley Act of 2002**

I, Thomas J. Matthews, certify that:

1. I have reviewed this annual report on Form 10-K of International Game Technology;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)), for the registrant and have:
 - a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. evaluated the effectiveness of the registrant's disclosure controls and procedures presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Thomas J. Matthews
Chief Executive Officer
International Game Technology

This certification accompanies the above described Report on Form 10-K pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and shall not, except to the extent required by such Act, be deemed filed by the Company for purposes of Section 18 of the Securities Exchange Act of 1934, as amended.

Exhibit 32.2

**CERTIFICATION PURSUANT TO 18 U.S.C. SECTION 1350
As Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002**

In connection with the Annual Report of International Game Technology (the "Company") on Form 10-K for the period ended September 30, 2007 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Daniel R. Siciliano, Principal Financial Officer of the Company, certify, pursuant to 18 U.S.C. section 1350, as adopted pursuant to section 906 of the Sarbanes-Oxley Act of 2002, that to my knowledge:

- (i) the Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
- (ii) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Date: November 28, 2007

/s/ Daniel R. Siciliano
Daniel R. Siciliano
Principal Financial Officer
International Game Technology

This certification accompanies the above described Report on Form 10-K pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 and shall not, except to the extent required by such Act, be deemed filed by the Company for purposes of Section 18 of the Securities Exchange Act of 1934, as amended.

GAMING REGULATIONS

Nevada

The manufacture, sale and distribution of gaming devices in Nevada or for use outside Nevada are subject to extensive state and local laws, regulations and ordinances of the Nevada Gaming Commission, the State Gaming Control Board, and various county and municipal regulatory authorities (collectively referred to as the Nevada gaming authorities). These laws, regulations and ordinances primarily cover the responsibility, financial stability and character of gaming equipment manufacturers, distributors and operators, as well as persons financially interested or involved in gaming operations.

The manufacture, distribution and operation of gaming devices require separate licenses. The laws, regulations and supervisory procedures of the Nevada gaming authorities seek to:

- (i) prevent unsavory or unsuitable persons from having a direct or indirect involvement with gaming at any time or in any capacity
- (ii) establish and maintain responsible accounting practices and procedures
- (iii) maintain effective control over the financial practices of licensees, including establishing minimum procedures for internal fiscal affairs and the safeguarding of assets and revenues, providing reliable record keeping and requiring the filing of periodic reports with the Nevada gaming authorities
- (iv) prevent cheating and fraudulent practices, and
- (v) provide a source of state and local revenues through taxation and licensing fees.

Changes in these laws, regulations, procedures, and judicial or regulatory interpretations could have an adverse effect on our gaming operations.

Our subsidiaries conducting the manufacture, sale, and distribution of gaming devices in Nevada or for use outside Nevada, as well as the operation of slot machine routes and other gaming activities in Nevada, are each required to be licensed by the Nevada gaming authorities. Our licenses must be renewed periodically and the Nevada gaming authorities have broad discretion regarding such renewals. Licenses are not transferable. Each type of machine we sell in Nevada must first be approved by the Commission and may require subsequent machine modification. Our gaming subsidiaries licensed in Nevada must also report substantially all loans, leases, and sales of securities and similar financing transactions of a material nature to the GCB and/or have them approved by the Commission. We believe we have obtained all required licenses and/or approvals necessary to carry on our business in Nevada.

The Company is registered with the Commission as a publicly traded corporation and is required periodically to submit detailed financial and operating reports to the Commission and to furnish any other information that the Commission may require. No person may become a stockholder of or receive any percentage of profits from our licensed gaming subsidiaries, without first obtaining licenses and approvals from the Nevada gaming authorities.

Our officers, directors and key employees who are actively engaged in the administration or supervision of gaming and/or directly involved in gaming activities of our licensed gaming subsidiaries may be required to file applications with the Nevada gaming authorities and may be required to be licensed or found suitable by them. Officers, directors, and certain key employees of our licensed gaming subsidiaries must file applications with the Nevada gaming authorities and may be required by them to be licensed or found suitable.

In addition, anyone having a material relationship or involvement with us or any of our licensed gaming subsidiaries may be required to be found suitable or licensed and to pay to the GCB all of its investigation costs and fees. The Commission may deny an application for licensure or finding of suitability for any cause deemed reasonable. A finding of suitability is comparable to licensing and both require submission of detailed personal and financial information followed by a thorough background investigation. We must report changes in licensed positions to the Commission. The Commission may disapprove any change in position by one of our officers, directors, or key employees, or require us to suspend or dismiss officers, directors or other key employees and sever relationships with other persons who refuse to file appropriate applications, or whom the Nevada gaming authorities find unsuitable to act in such capacities. Determinations of suitability or of questions pertaining to licensing are not subject to judicial review in Nevada.

We are required to submit detailed financial and operating reports to the Commission. If the Commission determines that we are in violation of any gaming laws, our gaming licenses can be limited, conditioned, suspended or revoked. In addition, the Company, our licensed gaming subsidiaries and any persons involved may be subject to substantial fines for each separate violation of the gaming laws at the discretion of the

Commission. The Commission also has the power to appoint a supervisor to operate our gaming properties and, under certain circumstances, earnings generated during the supervisor's appointment could be forfeited to the State of Nevada. The limitation, conditioning or suspension of our gaming licenses or the appointment of a supervisor could (and revocation of our gaming licenses would) materially and adversely affect our gaming operations.

The Commission may require any beneficial holder of our voting securities, regardless of the number of shares owned, to file an application, be investigated, and be found suitable, in which case the applicant would be required to pay the costs and fees of the GCB investigation. If the beneficial holder of voting securities who must be found suitable is a corporation, partnership, or trust, it must submit detailed business and financial information including a list of beneficial owners. Any person who acquires more than 5% of the Company's voting securities must report this to the Commission. Any person who becomes a beneficial owner of more than 10% of our voting securities must apply for a finding of suitability within 30 days after the Chairman of the GCB mails the written notice requiring this finding of suitability.

Under certain circumstances, an institutional investor, as this term is defined in the Nevada gaming regulations, acquiring more than 10% but not more than 15% of our voting securities, may apply to the Commission for a waiver of these finding of suitability requirements, provided the institutional investor holds the voting securities for investment purposes only. An institutional investor will not be deemed to hold voting securities for investment purposes unless the voting securities were acquired and are held in the ordinary course of its business.

Our voting securities must not be acquired for the purpose of causing, directly or indirectly,

- (i) the election of a majority of our board of directors,
- (ii) any change in our corporate charter, bylaws, management, policies or operations, or
- (iii) any other action the Commission finds to be inconsistent with holding our voting securities for investment purposes only.

The Commission considers voting on all matters voted on by stockholders and the making of financial and other informational inquiries of the type normally made by securities analysts, to be consistent with investment intent.

The Commission has the power to investigate any person who holds our debt or equity securities. The Clark County Liquor and Gaming Licensing Board, with jurisdiction over gaming in the Las Vegas area, may similarly require a finding of suitability of a security holder. The applicant stockholder is required to pay all costs of such investigation. Our bylaws provide for us to pay these costs that are related to our officers, directors or employees. Any person who fails or refuses to apply for a finding of suitability or a license within 30 days after being ordered to do so by the Commission or the Chairman of the GCB may be found unsuitable. The same restrictions apply to a record owner who fails to identify the beneficial owner, if requested to do so. Any stockholder found unsuitable and who holds, directly or indirectly, any beneficial ownership of our common stock beyond such period of time as may be prescribed by the Commission may be guilty of a criminal offense.

We are subject to disciplinary action and possible loss of our approvals if, after we receive notice that a person is unsuitable to be a stockholder or to have any other relationship with us or any of our licensed gaming subsidiaries, we:

- (i) pay that person any dividend or interest upon our voting securities,
- (ii) allow that person to exercise, directly or indirectly, any voting right conferred through securities held by that person,
- (iii) give remuneration in any form to that person, for services rendered or otherwise, or
- (iv) fail to pursue all lawful efforts to require such unsuitable person to relinquish his voting securities for cash at fair market value.

Additionally, the Clark County authorities have taken the position that they have the authority to approve all persons owning or controlling the stock of any corporation controlling a gaming licensee.

The Commission may, in its discretion, require the holder of our debt securities to file an application, be investigated and be found suitable to own any of our debt securities. If the Commission determines that a person is unsuitable to own any of these securities, then pursuant to the Nevada gaming laws, we can be sanctioned, including the loss of our approvals, if without prior Commission approval, we:

- (i) pay to the unsuitable person any dividend, interest, or any distribution whatsoever;
- (ii) recognize any voting right by such unsuitable person in connection with such securities;
- (iii) pay the unsuitable person remuneration in any form; or
- (iv) make any payment to the unsuitable person by way of principal, redemption, conversion, exchange, liquidation, or similar transaction.

We are required to maintain a current stock ledger in Nevada, subject to examination by the Commission at any time. If any of our securities are held in trust by an agent or by a nominee, the record holder may be required to disclose the identity of the beneficial owner to the Commission. A failure to make such disclosure may be grounds for finding the record holder unsuitable. We are also required to render maximum assistance in determining the identity of the beneficial owner. The Commission has the power at any time to require our stock certificates to bear a legend indicating that the securities are subject to the Nevada gaming laws and the regulations of the Commission. To date, the Commission has not imposed this requirement on us.

We may not make a public offering of our securities without the prior approval of the Commission if the securities or their proceeds are intended to be used to construct, acquire or finance gaming facilities in Nevada, or retire or extend obligations incurred for such purposes. Such approval, if given, does not constitute a finding, recommendation, or approval by the Commission or the GCB as to the accuracy or adequacy of the prospectus or the investment merits of the securities. Any representation to the contrary is unlawful.

In July 2007, the Commission granted us prior approval to make public offerings for a period of two years, subject to certain conditions (referred to as a shelf approval). The chairman of the GCB may rescind the shelf approval for good cause without prior notice upon the issuance of an interlocutory stop order. The shelf approval does not constitute a finding, recommendation, or approval by the Commission or the GCB as to the accuracy or adequacy of the prospectus or the investment merits of the securities offered. Any representation to the contrary is unlawful.

Changes in control of the Company through merger, consolidation, acquisition of assets or stock, management or consulting agreements or any form of takeover cannot occur without the prior investigation of the GCB and approval of the Commission. Entities seeking to acquire control of us must satisfy the GCB and the Commission in a variety of stringent standards prior to assuming control. The Commission may also require controlling stockholders, officers, directors and other persons having a material relationship or involvement with the entity proposing to acquire control, to be investigated and licensed as part of the approval process relating to the transaction.

The Nevada legislature has declared that some corporate acquisitions opposed by management, repurchases of voting securities and other corporate defense tactics that affect Nevada gaming licensees, and publicly traded corporations that are affiliated with those operations, may be injurious to stable and productive corporate gaming. The Commission has established a regulatory scheme to guard against the potentially adverse effects of these business practices upon Nevada's gaming industry and to further Nevada's policy to:

- (i) assure the financial stability of corporate gaming operators and their affiliates
- (ii) preserve the beneficial aspects of conducting business in the corporate form; and
- (iii) promote a neutral environment for the orderly governance of corporate affairs.

Approvals are, in certain circumstances, required from the Commission before we can make exceptional repurchases of voting securities above their current market price and before a corporate acquisition opposed by management, can be consummated. Nevada's gaming laws and regulations also require prior approval by the Commission if we were to adopt a plan of recapitalization proposed by our board of directors in opposition to a tender offer made directly to our stockholders for the purpose of acquiring control of us.

License fees and taxes are imposed by the Nevada gaming authorities and are payable either quarterly or annually. The fees and taxes are computed in various ways depending on the type of activity involved by our subsidiaries and the cities and counties where our subsidiaries conduct operations. Annual fees are payable to the GCB to renew our licenses as a manufacturer, distributor, and operator of a slot machine route. Nevada law also requires persons providing gaming machines in Nevada to casino customers on a revenue participation basis to pay their proportionate share of the taxes imposed on gaming revenues generated by the participation gaming machines.

Any person who is licensed, required to be licensed, registered, required to be registered, or is under common control with such persons (collectively referred to as licensees), and who proposes to participate in the conduct of gaming operations outside of Nevada is required to deposit with the GCB, and thereafter maintain, a revolving fund in the amount of \$10,000 to pay the expenses of investigation by the GCB of the licensee's participation in foreign gaming. This revolving fund is subject to increase or decrease at the discretion of the Commission. As a licensee, we are required to comply with certain reporting requirements imposed by the Nevada laws. We are also subject to disciplinary action by the Commission if we knowingly violate any laws of the foreign jurisdiction pertaining to our foreign gaming operation, fail to conduct our foreign gaming operations in accordance with the standards of honesty and integrity required of Nevada gaming operations, engage in activities that are harmful to the State of Nevada or its ability to collect gaming taxes and fees, or employ a person in the foreign operation who has been denied a license or finding of suitability in Nevada on the grounds of personal unsuitability.

Federal Registration

The Gambling Devices Act of 1962 makes it unlawful for a person to manufacture, transport, or receive gaming machines, gaming devices or components across interstate lines unless that person has first registered with the Attorney General of the US Department of Justice. This act also imposes gambling device identification and record keeping requirements. Violation of this act may result in seizure and forfeiture of the equipment, as well as other penalties. As an entity involved in the manufacture and transportation of gaming devices, IGT is required to register annually.

Native America

Federal law, tribal-state compacts, and tribal gaming regulations govern gaming on Native American lands. The Indian Gaming Regulatory Act of 1988 provides the framework for federal and state control over all gaming on Native American lands and is administered by the National Indian Gaming Commission and the Secretary of the US Department of the Interior. The commission has authority to issue regulations governing tribal gaming activities, approve tribal ordinances for regulating gaming, approve management agreements for gaming facilities, conduct investigations and monitor tribal gaming generally. The act is subject to interpretation by the commission and may be subject to judicial and legislative clarification or amendment.

The act requires that the tribe and the state enter into a written agreement, a tribal-state compact, which governs the terms of the gaming activities. Tribal-state compacts vary from state-to-state and in many cases require equipment manufacturers and/or distributors to meet ongoing registration and licensing requirements. In addition, many Native American tribes, to regulate gaming-related activity on Indian lands, have established tribal gaming commissions. Indian tribes are sovereign in their own government systems, with primary regulatory authority over gaming on land within the tribes' jurisdictions.

International

Certain foreign countries permit the importation, sale and operation of gaming equipment in casino and non-casino environments. Some countries prohibit or restrict the payout feature of the traditional slot machine or limit the operation and the number of slot machines to a controlled number of casinos or casino-like locations. Each gaming machine must comply with the individual country's regulations. Certain jurisdictions do not require the licensing of gaming machine operators and manufacturers.

Internet

With the acquisition of WagerWorks in August 2005, we provide online gaming content and services for certain jurisdictions. We provide online casino software and services from Alderney in the British Channel Islands, which has a substantial regulatory structure for internet based wagering under the Alderney Gaming Control Commission. Recognizing the legal uncertainties and legislative initiatives regarding online gaming in the US, we do not accept wagers from US citizens. We have extensive operational control structures for regulatory compliance encompassing software and game development, computer operations, consumer cash handling, and identity checking.

Board of Directors

Thomas J. Matthews **Chairman**

Thomas J. Matthews, 42, was appointed to our board of directors in December 2001 and was named Chairman in March 2005. Mr. Matthews holds a BS in Finance from the University of Southern California. Positions held with IGT include:

- President and Chief Executive Officer, 2003 – present
- Chief Operating Officer 2001-2007

Mr. Matthews held a number of key positions at Anchor Gaming from 1994 until it was acquired by IGT in December 2001, including President, Chief Executive Officer and Chairman of the Board. He previously served as President of Global Gaming Distributors, Inc. until it was acquired by Anchor Gaming in 1994.

Robert A. Bittman

Robert A. Bittman, 53, has served on our board of directors since May 2000. Mr. Bittman majored in Systems Analysis at New York University, and Psychology at Queens College and the University of Nevada, Reno. Positions held with IGT include:

- Executive Vice President, Product Strategy, 2003 – present
- Executive Vice President, Product Development, 1996 – 2003
- Vice President of Marketing, 1988 – 1995
- Director of Marketing, 1985 – 1988
- Marketing Research Analyst, 1985

Previous to his tenure with IGT, from 1980 – 1985, Mr. Bittman worked for Caesars Tahoe in all phases of slot operations management, including two years as Director of Slot Operations.

Richard R. Burt

Richard R. Burt, 60, has served on our board of directors since December 2001, when we acquired Anchor Gaming, and is a member of the Audit and Nominating and Corporate Governance Committees. Mr. Burt holds a BA in Government from Cornell University and a MA in International Relations from Tufts University. Mr. Burt also currently serves as:

- Senior Advisor, Kissinger McLarty Associates in Washington, D.C.
- Founder and Chairman of IEP Advisors, Inc. in Washington, D.C.
- Director of UBS Mutual Funds
- Trustee of Deutsche Bank's Closed-End Germany Funds Group
- Director of EADS North America
- Member of Alfa Asset Management (Moscow International Advisory Council)

Positions held previously include:

- Chairman of Diligence Inc., Washington, D.C., December 2001 – March 2007
- Director of the Protective Group, Miami Lakes, FL., January 2006 – October 2006
- Member of the Textron Corporation's International Advisory Council, 2000 – 2006
- Trustee of Deutsche Scudder (New York) Mutual Funds, 1998 – January 2006
- Director of Hollinger International Inc., 1996 – January 2006
- Director of Archer Daniels Midland (ADM), 1995 – 2000
- Chairman of the Board of Weirton Steel, Inc., 1994 – 2003
- Director and Vice Chairman of Anchor Gaming, 1999 – 2001
- Director and Chairman of Powerhouse Technologies, Inc., 1994 – 1999
- At various times 1981 – 1994:
 - Partner in McKinsey & Co.
 - Chief Negotiator in Strategic Arms Reduction Talks (START) with the former Soviet Union
 - U.S. Ambassador to the Federal Republic of Germany
 - Assistant Secretary of State for European and Canadian Affairs
 - Director of Politico-Military Affairs

**Patti S. Hart**

Patti S. Hart, 51, was appointed to our board of directors in June 2006 and is a member of the Audit and Compensation committees. Ms. Hart holds a BS in Marketing and Economics from Illinois State University. Ms. Hart also currently serves as:

- Director, Korn/Ferry International, Inc.
- Director, Spansion LLC
- Director, Lin TV Corp.

Positions held previously include:

- Chairman and Chief Executive Officer of Pinnacle Systems, Inc., 2004 – 2005
- Chairman and Chief Executive Officer of Excite@Home, Inc., 2001 – 2002
- Chairman and Chief Executive Officer of Telocity, Inc., 1999 – 2001
- President & COO, Long Distance Division, Sprint Corporation, 1997 – 1999
- President, Sprint Business Services Group, Sprint Corporation, 1994 – 1997
- President, Sales & Marketing, Sprint Business Services Group, Sprint Corporation, 1993 – 1994
- Vice President, Sprint Business Services Group, 1990 – 1993
- Area Vice President and General Manager, National & Major Accounts, Sprint, Inc., 1986 – 1990
- Director, Alternate Distribution, Strategic Planning, InteCom, Inc., 1983 – 1986
- Consultant, United Technologies Corporation, 1982 – 1983

Former Board Affiliations:

- Director, EarthLink, Inc.
- Director, Excite@Home, Inc.
- Director, Mariner Networks
- Director, Pinnacle Systems, Inc.
- Director, Plantronics, Inc.
- Director, Telocity, Inc.
- Director, Vantive Corporation
- Director, Pharmaceutical Product Development

**Leslie S. Heisz**

Leslie S. Heisz, 46, has served on our board of directors since June 2003 and is a member of the Audit and Nominating and Corporate Governance Committees. Ms. Heisz holds a BS degree from the University of California at Los Angeles (UCLA) and an MBA from the UCLA Anderson School of Management. Positions held include:

- Managing Director of Lazard Frères & Co. LLC since January 2004
- Member of the board of directors of Eldorado Resorts LLC since June 1996
- Senior Advisor of Lazard Frères & Co. LLC, 2003 – 2004
- Managing Director and Director of Dresdner Kleinwort Wasserstein (and its predecessor, Wasserstein Perella & Co.), 1995 – 2002
- Vice President and Associate with Salomon Brothers Inc., 1987 – 1995
- Senior Consultant and Consultant at Price Waterhouse, 1982 – 1986

**Robert A. Mathewson**

Robert A. Mathewson, 43, has served on our board of directors since December 2003 and is a member of the Compliance Committee. Mr. Mathewson holds a BA in Economics and a MBA from the University of California at Berkeley and a Juris Doctorate from University of California Hastings College of the Law.

Positions held include:

- President of RGC, Inc., a private investment company
- Member of the board of directors of FelCor Lodging Trust, since 2002
- Vice President of Business Development for Televoke, Inc., an Internet application service provider focusing on web, wireless and telephone integration, 1999 – 2000
- International Manager for IGT in 1989

Robert Miller

Robert Miller, 62, has served on our board of directors since January 2000 and is a member of the Compensation and Compliance Committees. Since July 2005, he has been a principal of Dutko Worldwide, a multi-disciplinary government affairs and strategy management firm. Mr. Miller holds a Juris Doctorate from Loyola Law School, Los Angeles. Mr. Miller is also a member of the boards of directors for:

- Newmont Mining Corporation
- Zenith National Insurance Corp.
- Wynn Resorts, Ltd.

Positions held previously include:

- Partner, Jones Vargas law firm, 1999 – 2005
- Governor of the State of Nevada, 1989 – 1999
- Lieutenant Governor of the State of Nevada, 1987 – 1989
- Clark County District Attorney, 1979 – 1986
- Las Vegas Township Justice of the Peace, 1975 – 1978
- First legal advisor for the Las Vegas Metropolitan Police Department, 1973 – 1975
- Clark County Deputy District Attorney, 1971 – 1973
- Uniformed Commissioned Officer for the Clark County Sheriff's Department in Clark County and the Los Angeles County Sheriff's Department, prior to 1973

Frederick B. Rentschler

Frederick B. Rentschler, 68, has served on our board of directors since May 1992 and is a member of the Compensation and the Nominating and Corporate Governance Committees. Mr. Rentschler received his undergraduate degree from Vanderbilt University and an MBA from Harvard University. He was also awarded a Doctor of Laws, *causa honoris*, from the University of Wyoming.

Mr. Rentschler also currently serves as:

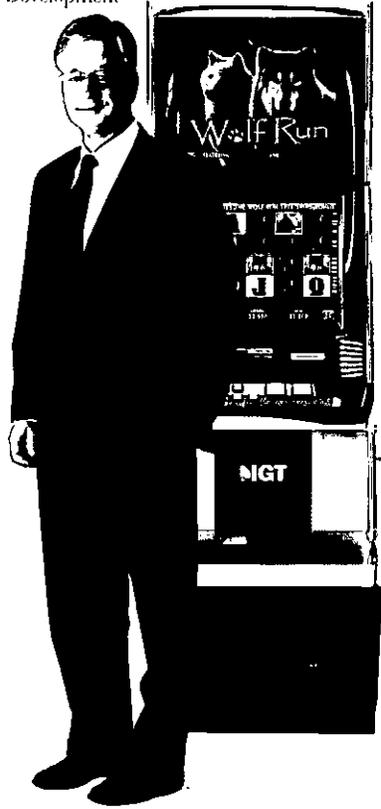

- Member of the Board of Trustees for Vanderbilt University, Nashville, Tennessee
- Emeritus trustee of the Salk Institute in La Jolla, California
- Emeritus trustee of the Scottsdale Health Care Systems in Arizona

Positions previously held include:

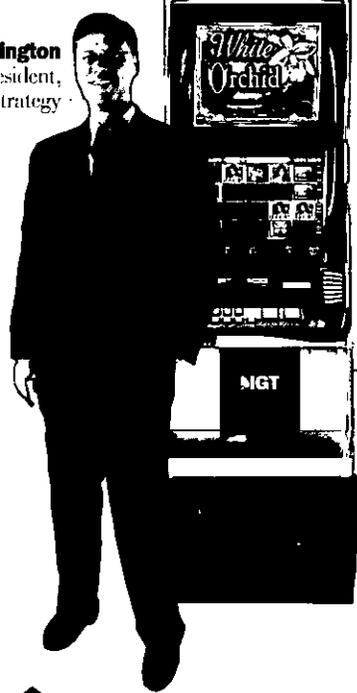

- President and Chief Executive Officer of Northwest Airlines in 1991
- President and Chief Executive Officer of Beatrice Company, 1987 – 1989
- President and Chief Executive Officer of Beatrice U.S. Foods, 1985 – 1987
- President and Chief Executive Officer of Hunt Wesson, Inc., 1980 – 1984
- President of Armour Dial, 1977 – 1980

IGT Corporate Responsibility

Community Activism

IGT takes seriously its role as a responsible global citizen in the countries and communities where it does business. IGT's community responsibility takes various forms, from monetary gifts and in-kind donations like donated services, computers and used equipment to employee volunteer time, service on agency boards and use of the Company's facilities for public events and meetings. IGT's community involvement embraces a breadth of needs including education, health and human services, and the arts with special emphasis on "active" involvement.

Employee Diversity

Diversity is a strong component of IGT's success, and the Company is committed to developing a culture of inclusion which involves recruiting, talent development, and overall building of a diverse workforce. IGT's diversity council is a cross-functional representation of the Company that stewards and champions many diversity initiatives. Our diversity management takes the lead in developing and implementing a breadth of efforts that involve both internal activities and external alliances.

Supplier Diversity

IGT is continually seeking out and expanding its local and national base of suppliers, especially those owned by minorities, women, the physically and mentally challenged, and service-disabled veterans. We encourage our suppliers and contractors to involve these types of businesses through partnerships, joint ventures and subcontracts.

Responsible Gaming

IGT acknowledges problem gambling as an issue that cannot and must not be ignored. IGT promotes responsible gaming to its employees, customers and the public, and supports agencies and programs committed to researching, preventing and treating problem gambling. IGT believes that all stakeholders in the gaming industry must take a pro-active approach to problem and underage gambling.

IGT is a major supporter and member of the two largest U.S. organizations dedicated to reducing problem and underage gambling: the National Council on Problem Gambling (NCPG) and the National Center for Responsible Gaming (NCRG). We work closely with the NCPG and its 34 state affiliates to promote awareness and education, and provide funding for the nationwide problem gambling "Helpline." IGT senior executives serve on the Boards of both organizations. IGT recently renewed its commitment of \$1 million to the NCRG for support of peer reviewed scientific research into pathological gambling and to provide scientifically based responsible gaming education.

IGT is the only gaming equipment manufacturer in the world to have a full-time Director of Responsible Gaming, charged with implementing the Company's Responsible Gaming Program.

'Green' Initiatives

IGT is also proactive in its recycling and energy saving efforts. IGT facilities annually recycle millions of pieces of cardboard, metal, paper and glass, as well as aluminum cans, plastic bottles, printer cartridges, wire harnesses, pallets and fluorescent light bulbs. While IGT does not generate a large amount of hazardous waste, small quantities of inks and solvents are recycled by an outside disposal company.

The Company has steadily reduced the amount of energy consumed in its daily operations. A major example was a recent lighting retrofit that replaced more than 5,000 antiquated light fixtures and reduced energy consumption by 3.4 megawatt hours a year. Energy savings have also been realized through installation of lighting occupancy sensors and "as needed" use of service and electrical equipment instead of around-the-clock operation.

In compliance with the European Union (EU) Restriction of Hazardous Substances (RoHS) Directive of 2006, IGT began manufacturing RoHS-compliant machines for European distribution. Although not required to do so, IGT now includes many of the parts that meet or exceed the RoHS standards in machines manufactured for the US and countries outside the EU.
