Company Profile

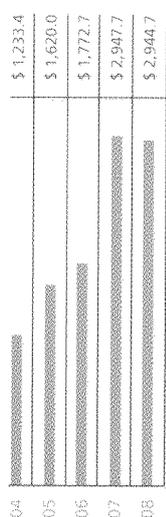

Greeneville, Tennessee-based Green Bankshares, Inc., with total assets of approximately \$2.945 billion, is the holding company for GreenBank. GreenBank, which traces its origin to 1890, has 63 branches across East and Middle Tennessee, and one branch each in Bristol, Virginia, and Hot Springs, North Carolina. It also provides wealth management services through its GreenWealth Division and residential mortgage lending through its Mortgage Division. In addition, GreenBank conducts separate businesses through three wholly owned subsidiaries: Superior Financial Services, Inc., a consumer finance company; GCB Acceptance Corporation, a consumer finance company specializing in automobile lending; and Fairway Title Co., a title insurance company.

Chairman's Letter

Fundamental Strength

Throughout the past year, we continued to confront a very challenging operating environment, one shaped by continued weakness in residential real estate markets and widening job losses. As our economy struggles with the recessionary conditions, these pressures have had far-reaching effects on business in general and the banking industry in particular, more so than almost anyone could have imagined just a year ago. For most companies, this translated into significantly lower revenues and earnings – and even losses – in 2008.

That too was the case for Green Bankshares in 2008, where the economic downturn resulted in a significant increase in net charge-offs and non-performing assets. Together, these forces led to a net loss for the year of \$5,452,000 or \$0.42 per diluted common share versus net income of \$24,374,000 or \$2.07 per diluted common share for 2007.

Clearly, we are greatly disappointed by the Company's performance in 2008, knowing the markets we serve are inherently vibrant. In down cycles, we naturally would expect to see higher credit losses, but the reach of this recession clearly is unprecedented.

During these uncertain times, we believe it is paramount to build even stronger capital levels and loan loss reserves, and we took several

decisive steps during 2008 to reinforce this view. The most significant of these was our decision in the fourth quarter to participate in the U.S. Treasury Department's Capital Purchase Program, which is part of the government's effort to restore confidence in the nation's financial system by providing capital to healthy financial institutions. Following action by shareholders in December 2008 to amend our by-laws to approve the issuance of preferred stock, we sold new Series A preferred equity stock to the Treasury under this program. This generated net proceeds of \$72,278,000, which will allow us to grow customer relationships and expand our banking franchise.

Strengthened by this new capital, we were positioned to address the issues that surround non-performing assets, which totaled \$76,806,000 or 2.61% of total assets at December 31, 2008, up from \$36,937,000 or 1.25% of total assets at December 31, 2007. For 2008, our provision for loan losses was \$52,810,000 versus \$14,483,000 for 2007, and net charge-offs totaled \$38,110,000 or 1.63% of average total loans compared with \$11,696,000 or 0.57% for 2007. The effect of the higher provision in 2008 increased our allowance for loan losses to \$48,811,000 or 2.20% of total loans from \$34,111,000 or 1.45% of total loans in 2007.

During these uncertain times, we believe it is **paramount** to build even stronger capital levels and loan loss reserves.

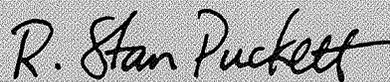

Despite the impact of these difficult challenges, we ended 2008 with a very strong capital position, one that supports our objectives for future growth as well as our customers' interests in safety and soundness. At year-end 2008, we were classified as a "well-capitalized" bank, the highest capital regulatory rating a financial institution can achieve. GreenBank's total risk-based capital ratio was 14.60%, significantly exceeding the required minimum of 10% to be deemed well capitalized.

Despite strong economic headwinds, our core banking business remained fundamentally sound in 2008, as reflected in our net interest income and fee income. At December 31, 2008, our total assets amounted to \$2,944,671,000, down slightly from \$2,947,741,000 at December 31, 2007, as net loans declined to \$2,223,390,000 from \$2,356,376,000 at December 31, 2007. Deposits at December 31, 2008, increased to \$2,184,147,000 from \$1,986,793,000 at December 31, 2007. Contributing to a 22% increase in non-interest income for the year was the ongoing positive impact of our High Performance Checking product, under which we opened 7,919 net new accounts in 2008.

As we turn our focus toward the future, we know that the tough times we experienced in

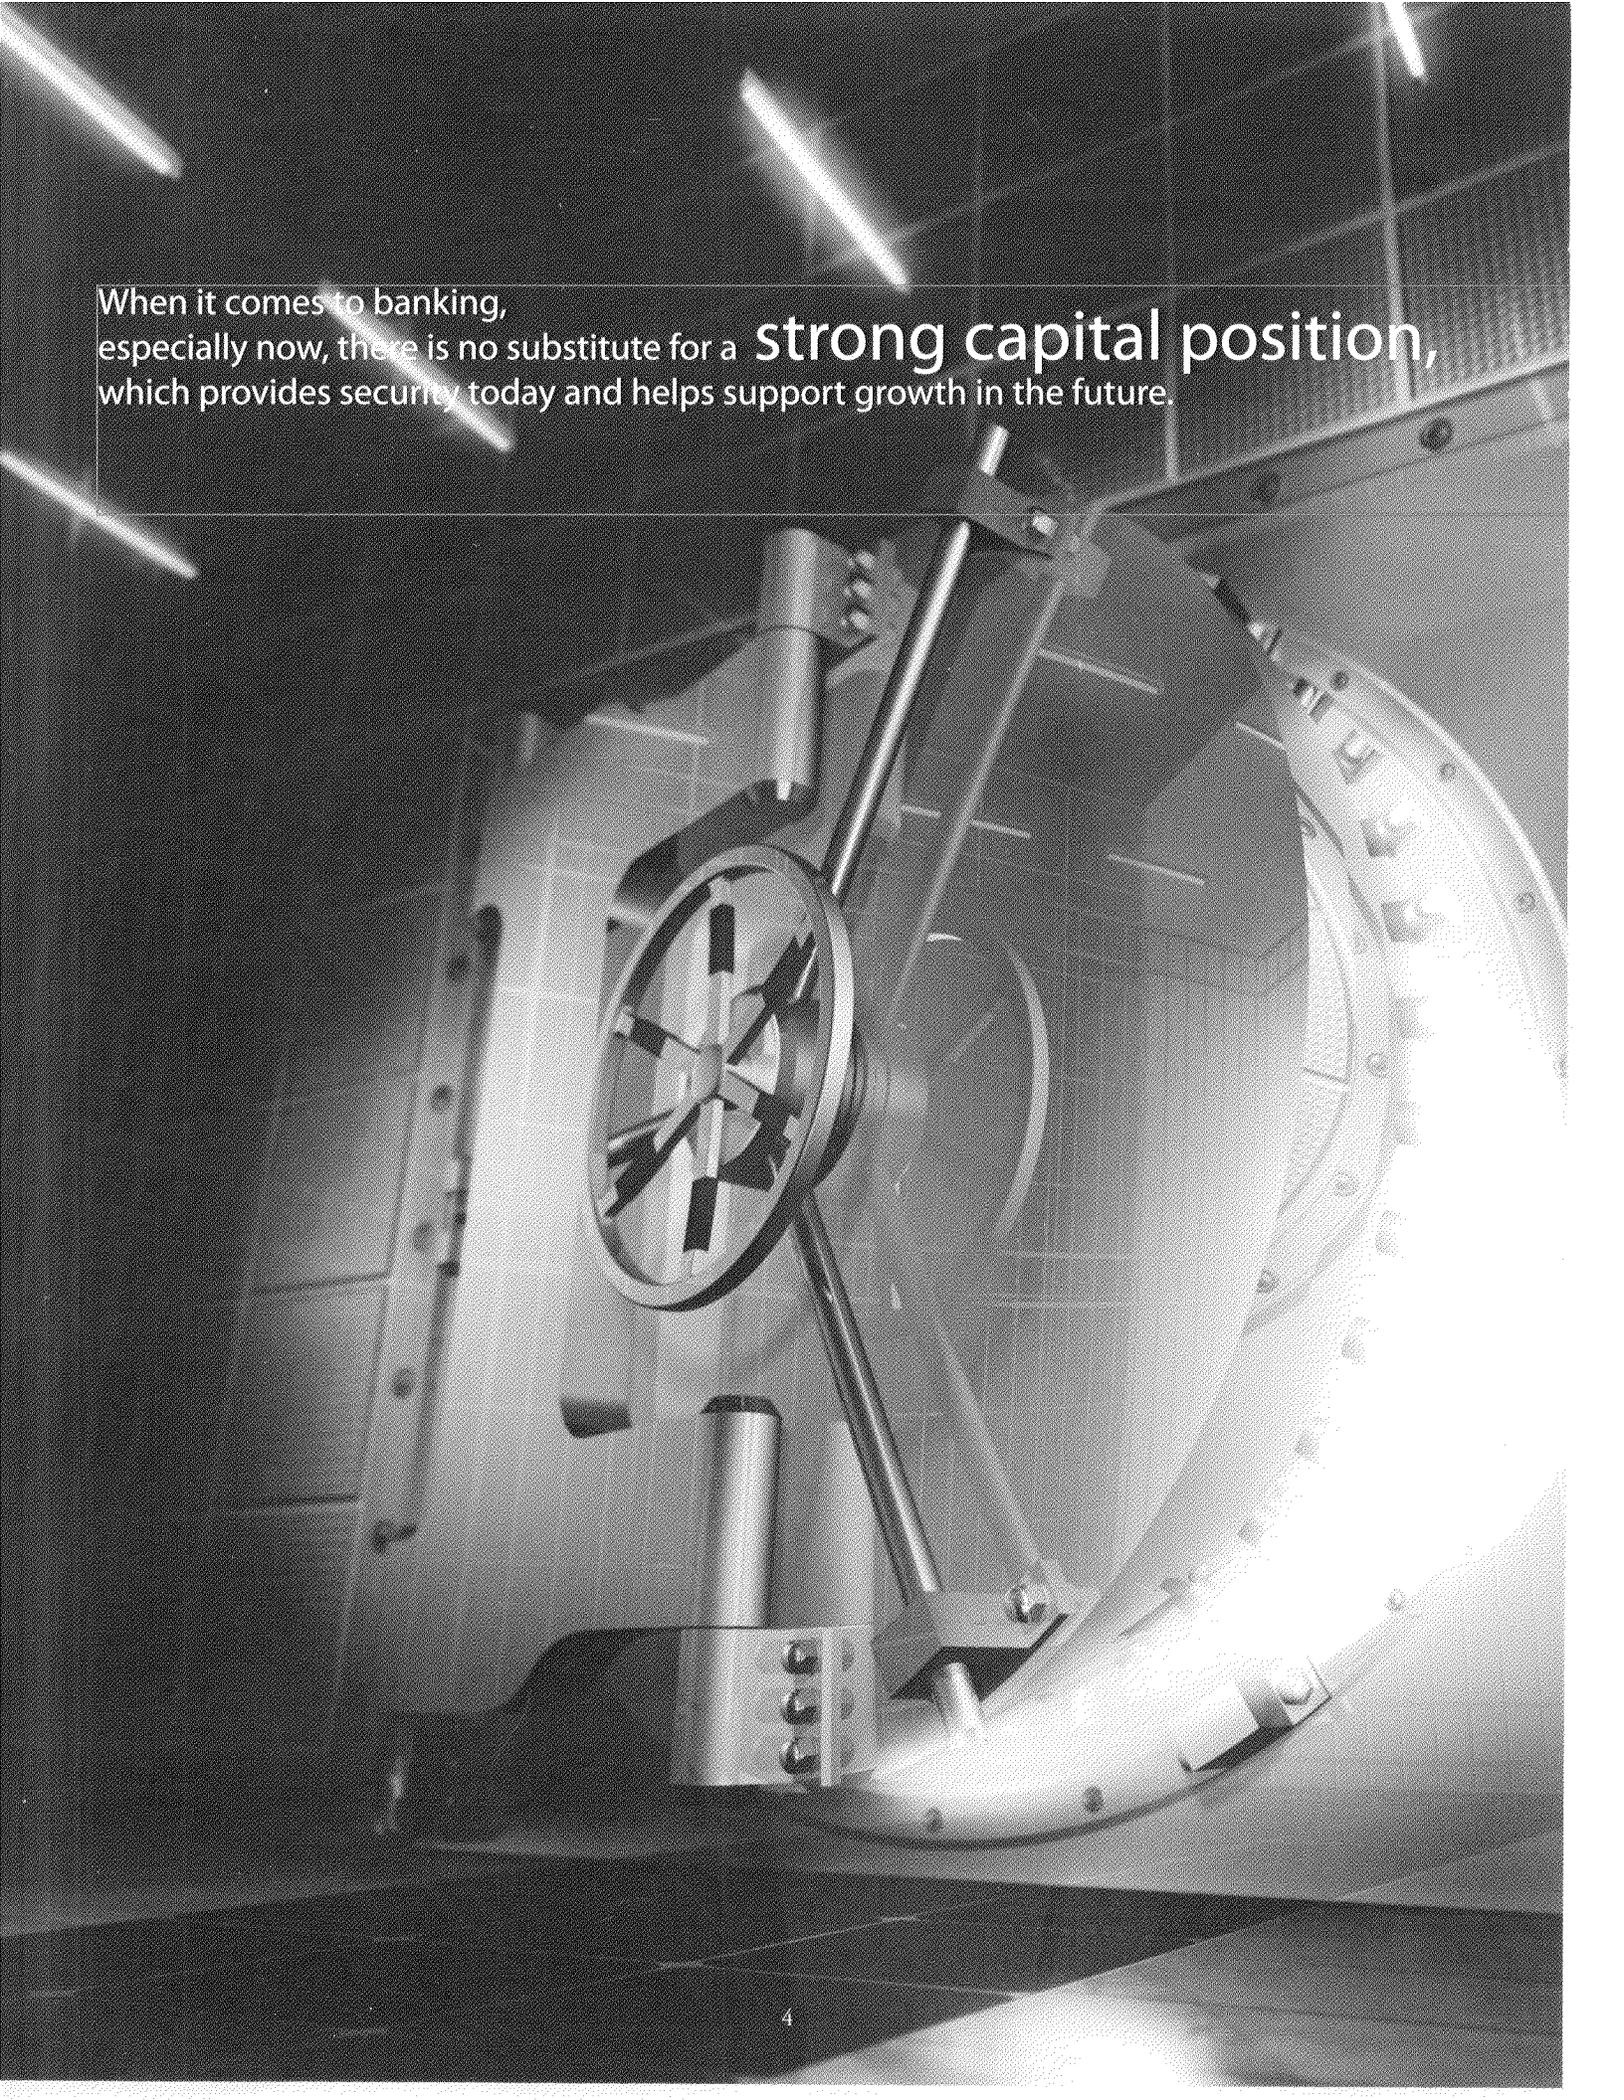

2008 will not soon subside. We recognize the likelihood that an ongoing recession will keep defaults and losses in our loan portfolio at an elevated level. Yet major questions remain: Where are we in this economic cycle, and how soon and how fast does the economy emerge in some sort of meaningful recovery? We have no crystal ball with which to answer these questions, and we will not attempt to make predictions.

What we are willing to predict is the long-term potential of our footprint spanning three major areas of Tennessee, and the hardworking, capable and dedicated team of associates located in resilient communities across the state. As Tennessee's Most Convenient Bank, bolstered by strong capital levels, we continue to believe our brand of convenience and attentive, personal service will give us an advantage over the long haul. We appreciate your continuing support and interest in Green Bankshares.

Stan Puckett
Chairman and Chief Executive Officer

When it comes to banking,
especially now, there is no substitute for a **strong capital position,**
which provides security today and helps support growth in the future.

14.60%

Despite struggles with a severe real estate downturn, which all banks faced during 2008, GreenBank ended the year with a strong capital position. The Bank's total capital represented 14.60% of risk-based assets, up from 11.1% in 2007 and was well ahead of the 10% regulatory threshold required to be considered well capitalized.

Building on a Strong Base

Not so long ago, the questions most frequently asked of banks related to interest rates paid on certificates of deposit, the location of the nearest branch, the kinds of checking accounts offered, or things of that nature. Banks were more or less viewed as a place for deposits and loans, and notions of financial strength generally were taken for granted. Things have changed. Times have changed. Capital strength matters. During 2008, we continued to make hard choices in the face of a challenging economy and a broad downturn in real estate values to recognize and address credit quality issues by setting aside more reserves for loan losses. These were painful, but necessary measures to maintain a sound balance sheet now, ensure the Company's stronger performance in the future, and position us for growth when an economic recovery arrives. In step with these efforts, Green Bankshares also sought and received permission in 2008 to participate in the Treasury Department's Capital Purchase Program, part of the government's effort to restore confidence in the nation's financial system by providing capital to healthy financial institutions. As a result, we ended 2008 with the strongest capital position in years.

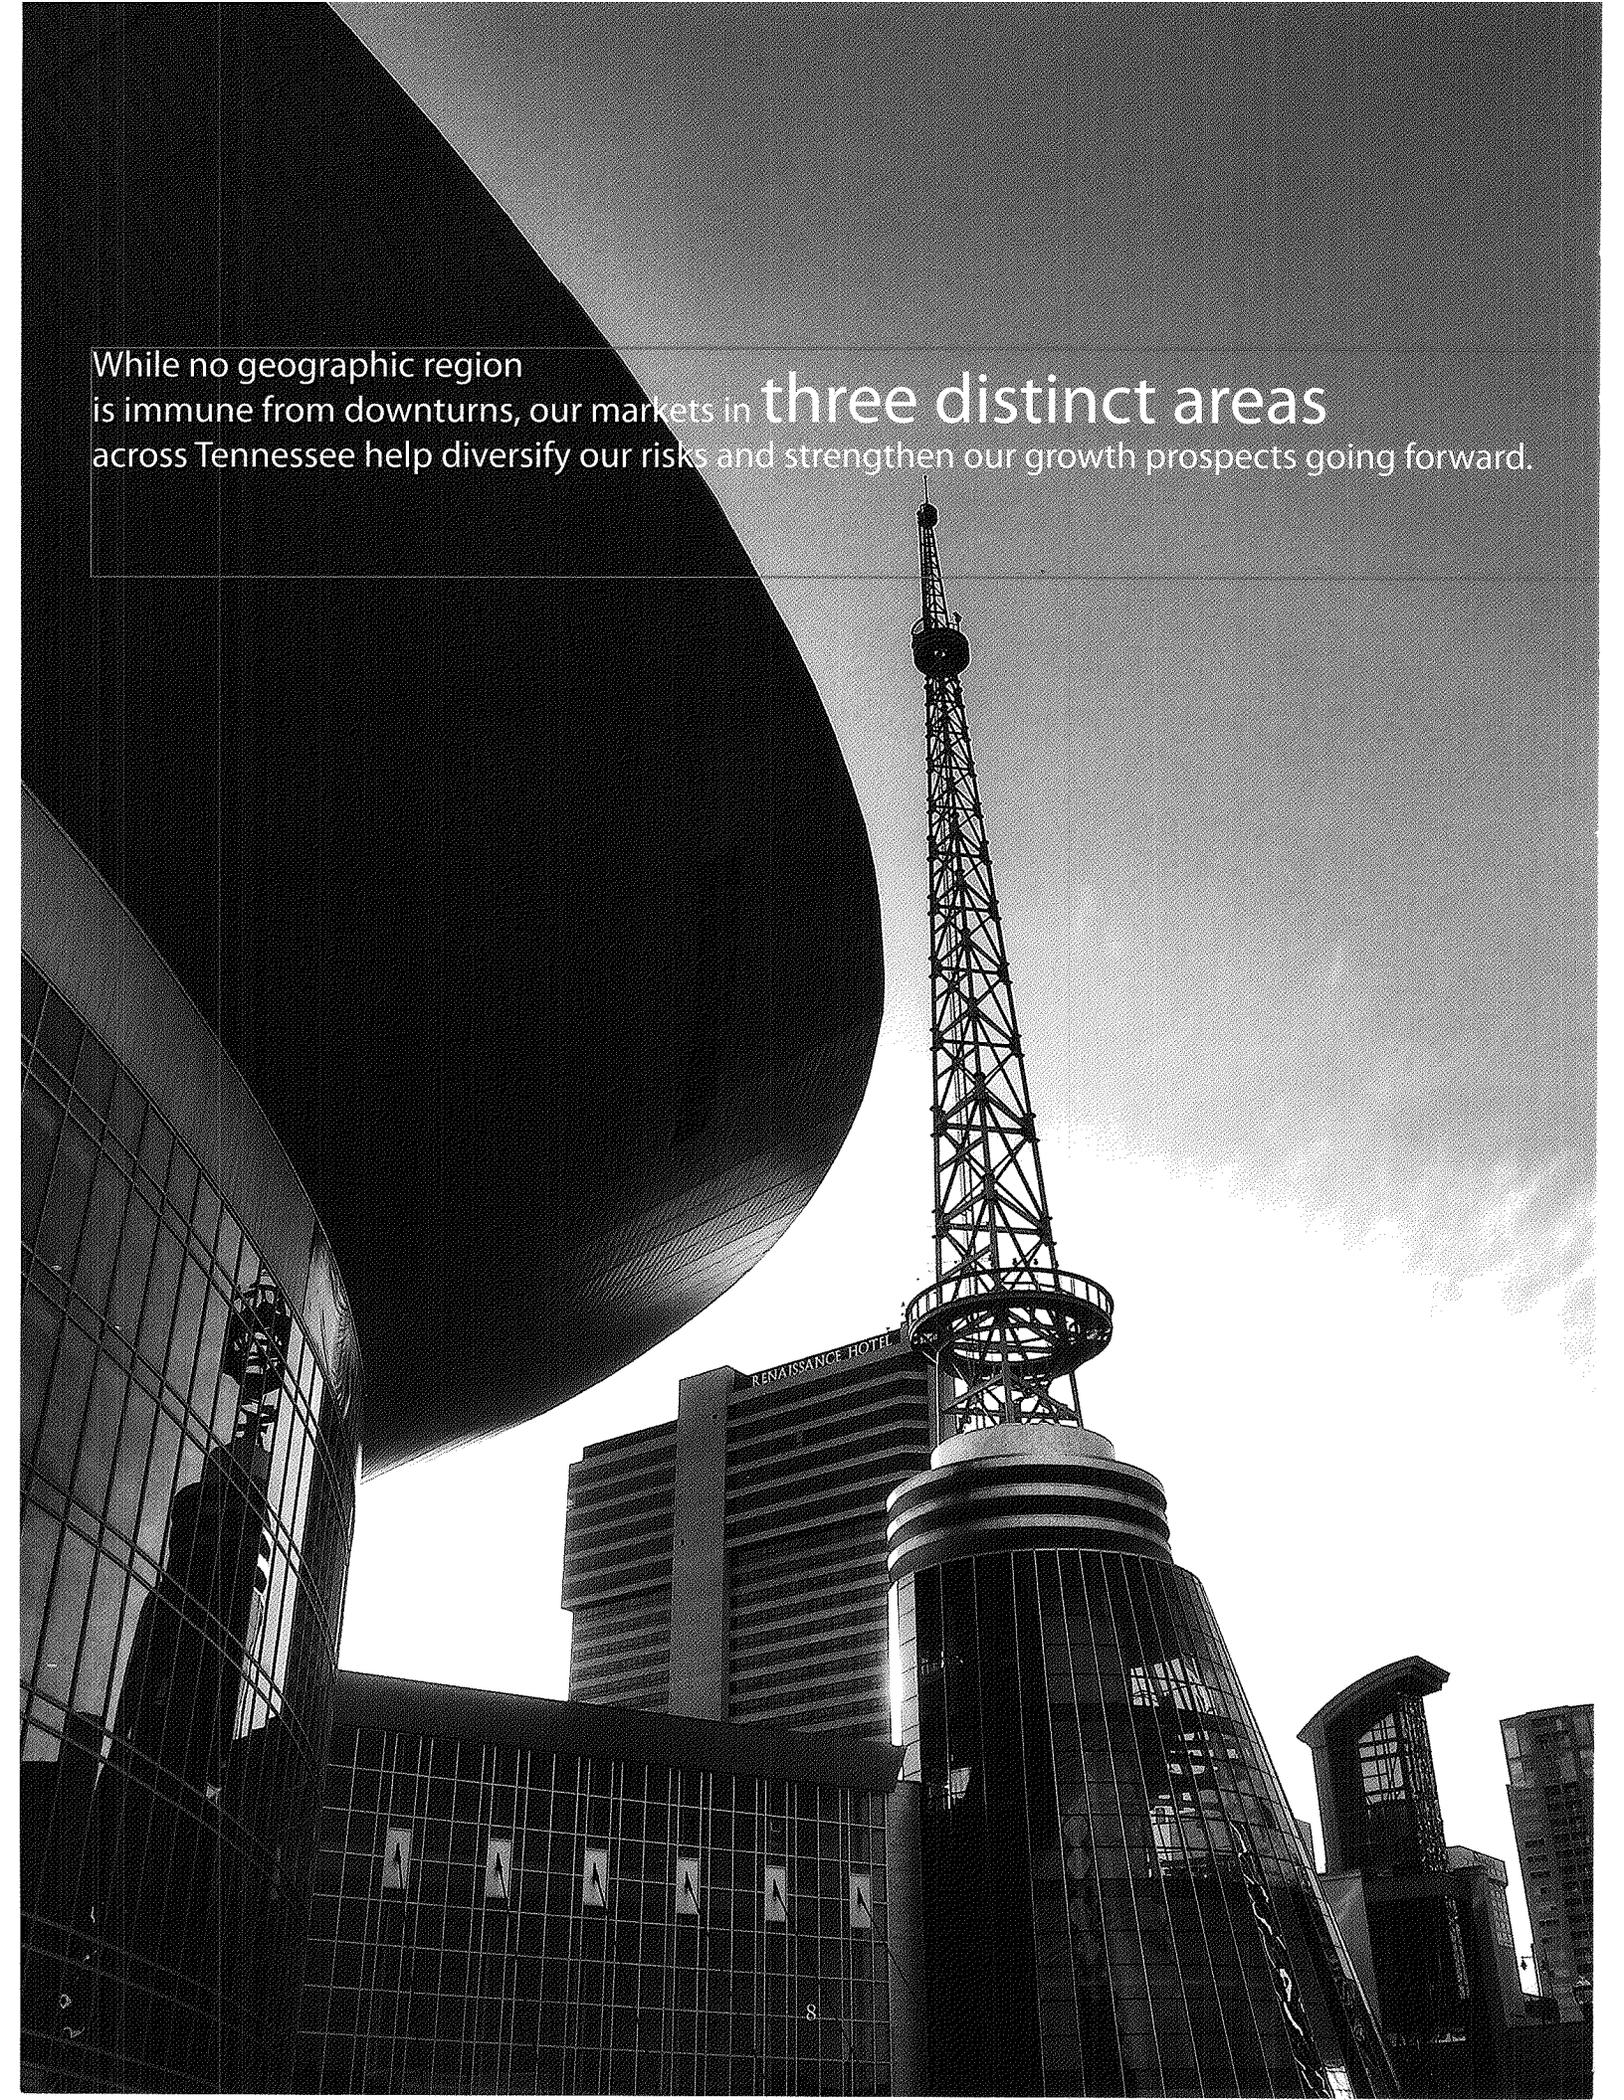

College

Times may be tough, but our customers can still turn **dreams into reality**
by taking advantage of an array of savings programs and other financial services we offer.

While no geographic region is immune from downturns, our markets in **three distinct areas** across Tennessee help diversify our risks and strengthen our growth prospects going forward.

diverse footprint

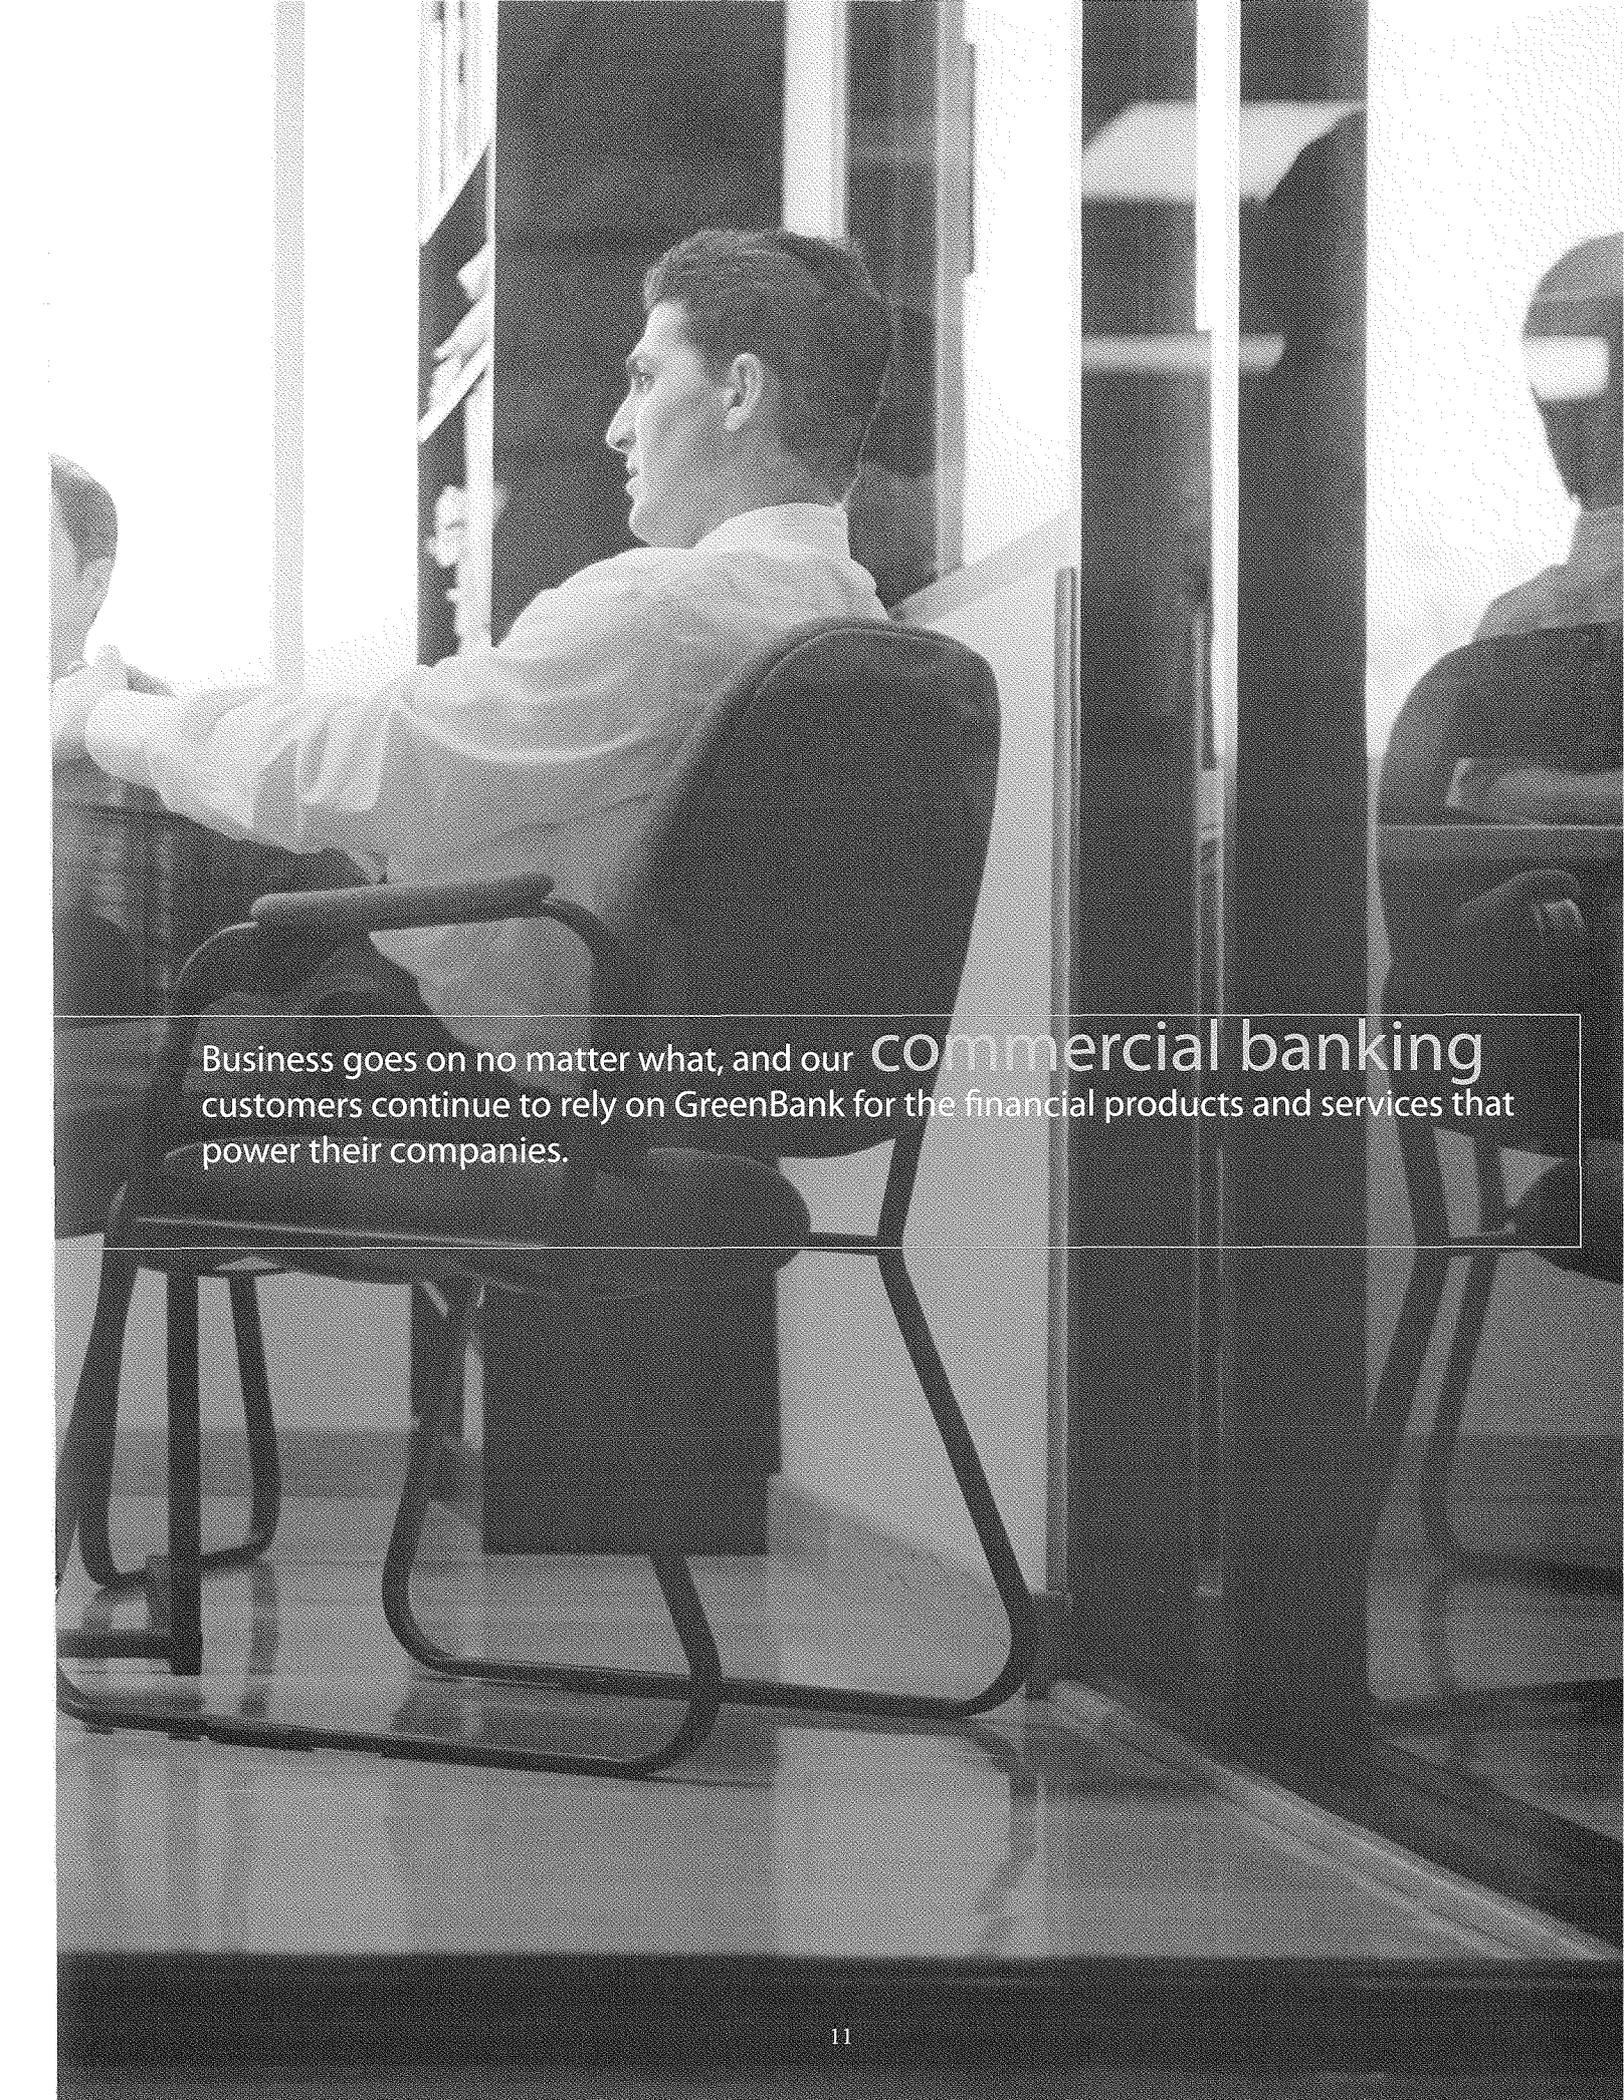

Over a period of many years, we have steadily expanded our reach to new markets, extending westward from our original markets in Northeast Tennessee across the state to Middle Tennessee. With each step of this journey, building a presence in markets that span 300 miles, we not only have introduced new customers of every kind to GreenBank's style of community banking, we also have continued to add balance to our business.

Long-Run Opportunities

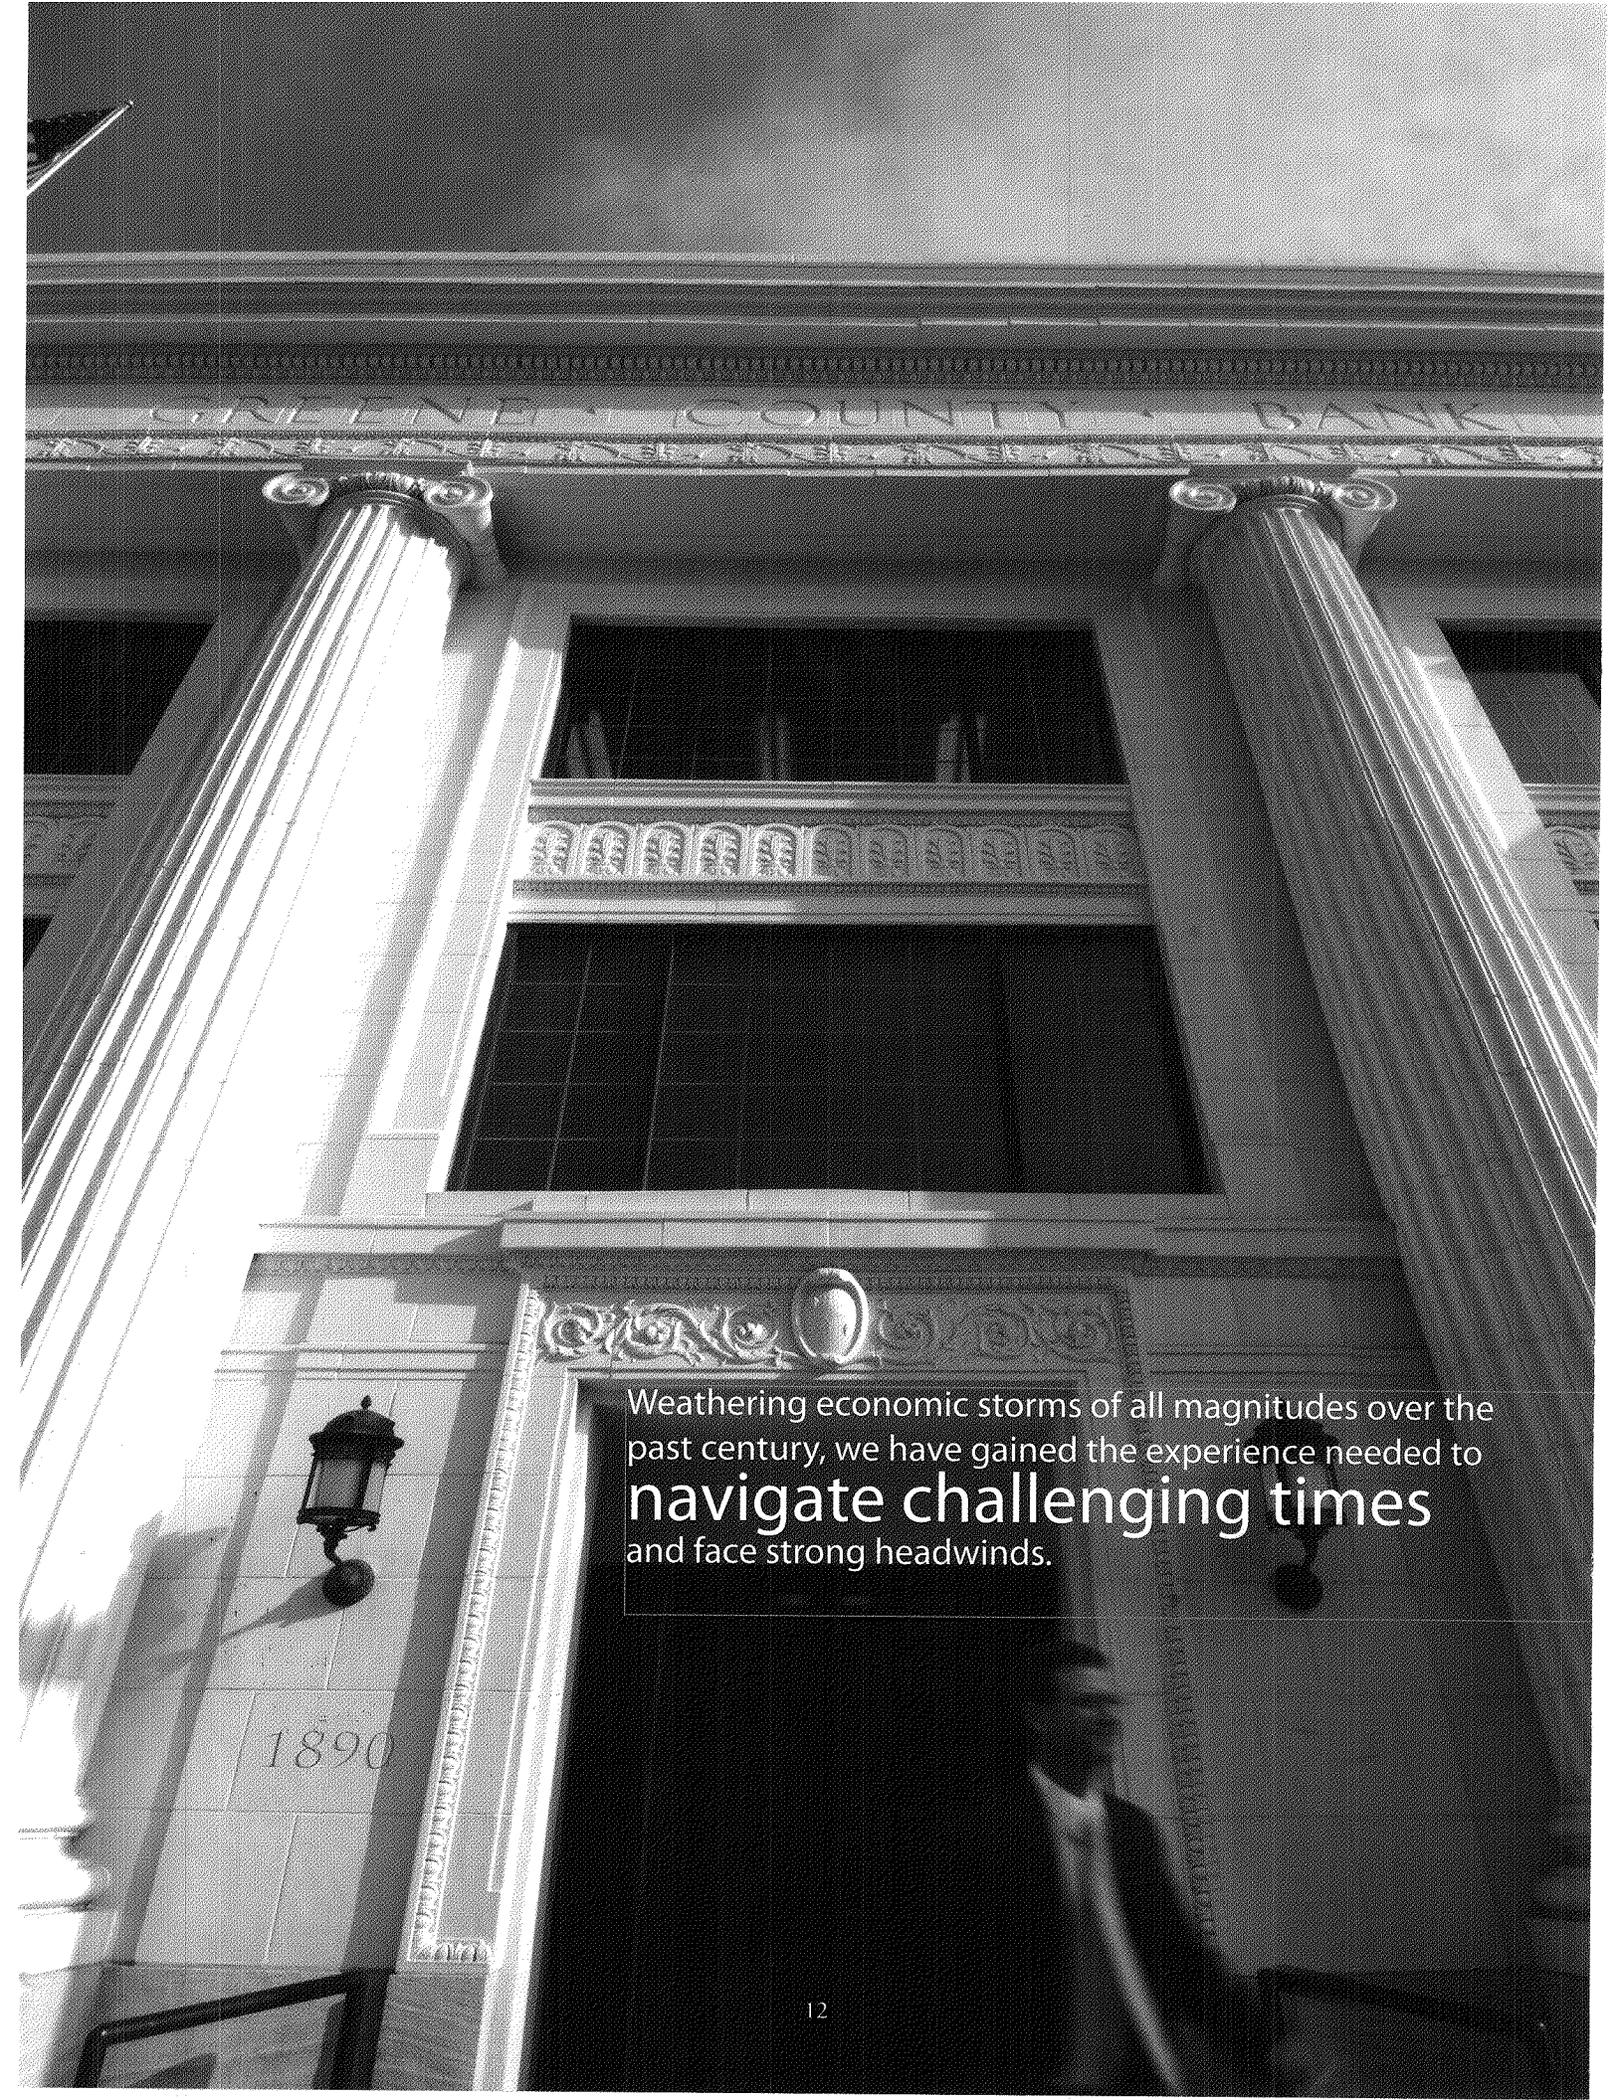

When it comes to investing, diversification is one of the key strategies to limit risk and enhance returns over time. In times like these, when the overriding concern is on the former, the differing characteristics of three resilient markets in Tennessee add diversity to GreenBank's loan portfolio. Each provides counterbalance in terms of business environment, demographics, concentration of risk, and growth traits. This diversification, of course, can neither prevent the kind of market turmoil we are witnessing today nor fully blunt its impact on our near-term results. From a longer-term perspective, however, we believe the diversification of our business over Northeast, East and Middle Tennessee will contribute to improved performance. Beyond the need to mitigate risk, this balance also enhances our future prospects by presenting various opportunities that are somewhat independent of the others. Our legacy markets in upper East Tennessee are characterized by slow but steady growth, while our more recent expansion in and around Knoxville has positioned us in markets with younger demographics – shaped by the heavy technological and educational influence of the University of Tennessee. In Middle Tennessee, growth is driven by the seat of state government in Nashville as well as robust health care, entertainment and manufacturing industries, all taking place in communities that are among the fastest growing in the state. Our presence across these three areas helps form a solid foundation for balanced growth in the future as economic expansion resumes.

A black and white photograph of a meeting room. The scene is viewed through a window frame with dark vertical bars. Several people are seated at a long table. In the foreground on the left, a man in a light-colored shirt is seen from the side, looking towards the right. In the background, other people are seated at the table, some with their hands on the table. The lighting is bright, suggesting a window looking out onto a bright area. The overall mood is professional and focused.

Commitment

Business goes on no matter what, and our **commercial banking** customers continue to rely on GreenBank for the financial products and services that power their companies.

Weathering economic storms of all magnitudes over the past century, we have gained the experience needed to **navigate challenging times** and face strong headwinds.

**Experience
Shaped by History**

Being in the banking business, loan losses are inevitable no matter what the economic environment is like, but in periods of downturn, losses understandably increase. Most of us, however, have never witnessed a recession like the one in which we currently find ourselves. We now realize that it began more than a year ago, but we know little else about it – whether we are on the climb back or still in the downturn. Baseball seems to offer a favorite analogy for the pundits: some say it's still early in the game, some think we are in the seventh inning, others say the game may go to the eleventh or twelfth. We just don't know, except we know this one is different. So considering the uncertainties, it's impossible, even futile, to call the bottom, which infers some special wisdom accruing from the four recessions that have occurred since 1980, or from earlier events and times. Still, we think there is something to be said about experience and history, especially over the span of many decades or a century. It reveals a pattern of organizational response to adversity, the real and differing challenges that test the mettle of a company and, in their overcoming, establishes a track record for successfully meeting difficult market conditions head on, setting the stage for future growth. At Green Bankshares, our 119 years of service to a growing number of communities in Tennessee, Virginia and North Carolina are a testament to this belief.

more than a century of trust

When confronted with new challenges or unknown situations, our natural instinct is to rely on experience. History is the best teacher, after all, and at Green Bankshares, our history stretches back to 1890. This provides us with a perspective on the current downturn that is unmatched by many other banks, and it gives us the confidence of knowing that we have surmounted similar challenges before.

MARKET AND DIVIDEND INFORMATION

The Company's shares trade on the NASDAQ Global Select Market under the symbol GRNB. As of March 20, 2009, the Company estimates that it had approximately 5,500 shareholders, including approximately 2,900 beneficial owners holding shares in nominee or "street" name. The following table sets forth the high and low bid price information for the Company's common stock in 2008 and 2007, along with the amount of cash dividends payments per share during those years.

	High	Low	Dividends Paid Per Share
2008:			
Fourth quarter	\$ 24.61	\$ 13.20	\$ 0.29*
Third quarter	25.17	11.85	0.13
Second quarter	21.98	13.89	0.13
First quarter	22.36	15.18	0.13
			<u>\$ 0.68</u>
2007:			
Fourth quarter	\$ 37.49	\$ 16.76	\$ 0.29
Third quarter	38.63	29.84	0.13
Second quarter	35.86	31.19	0.13
First quarter	40.50	32.83	0.13
			<u>\$ 0.68</u>

* Includes special year-end stock dividend of 0.9254 shares of common stock, equivalent to \$0.16 per common share.

For information regarding restrictions on the payment of dividends by the Bank to the Company, see "Management's Discussion and Analysis of Financial Condition and Results of Operation – Liquidity and Capital Resources" in the Form 10-K included with this annual report. See also Note 11 of Notes to Consolidated Financial Statements.

The following graph shows the cumulative total return on the common stock of the Company over the last five years, compared with the Russell 3000 Index and the NASDAQ Bank Index. Cumulative total return on the stock or the index equals the total increase in value since December 31, 2003, assuming reinvestment of all dividends paid into the stock or the index, respectively. The graph was prepared assuming that \$100 was invested in the common stock on December 31, 2003, and also in the securities included in the indices used for comparison purposes. The shareholder returns shown on the performance graph are not necessarily indicative of the future performance of the common stock of the Company or particular index.

PART I

Forward-Looking Statements

The information contained herein contains forward-looking statements that involve a number of risks and uncertainties. A number of factors, including those discussed herein, could cause results to differ materially from those anticipated by such forward-looking statements which are within the meaning of that term in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. In addition, such forward-looking statements are necessarily dependent upon assumptions, estimates and data that may be incorrect or imprecise. Accordingly, any forward-looking statements included herein do not purport to be predictions of future events or circumstances and may not be realized. Forward-looking statements can be identified by, among other things, the use of forward-looking terminology such as “intends,” “believes,” “expects,” “may,” “will,” “should,” “seeks,” “pro forma” or “anticipates,” or the negatives thereof, or other variations thereon of comparable terminology, or by discussions of strategy or intentions. Such statements may include, but are not limited to, projections of income or loss, expenditures, acquisitions, plans for future operations, financing needs or plans relating to services of the Company, as well as assumptions relating to the foregoing. The Company’s actual results may differ materially from the results anticipated in forward-looking statements due to a variety of factors, including, but not limited to those identified in “Item 1A. Risk Factors” in this Form 10-K and (1) unanticipated deterioration in the financial condition of borrowers resulting in significant increases in loan losses and provisions for those losses; (2) continued deterioration in the residential real estate market; (3) lack of sustained growth in the economy in the markets that the Bank serves; (4) increased competition with other financial institutions in the markets that the Bank serves; (5) changes in the legislative and regulatory environment; (6) the Company’s failure to successfully implement its growth strategy; and (7) the loss of key personnel. All forward-looking statements herein are based on information available to us as of the date this Annual Report on Form 10-K was filed with the Securities and Exchange Commission (“SEC”).

ITEM 1. BUSINESS.

Presentation of Amounts

All dollar amounts set forth below, other than per-share amounts, are in thousands unless otherwise noted. Unless this Form 10-K indicates otherwise or the context otherwise requires, the terms “we,” “our,” “us,” “the Company” or “Green Bancshares” as used herein refer to Green Bankshares, Inc. and its subsidiaries, including GreenBank, which we sometimes refer to as “GreenBank,” “the Bank” or “our Bank”.

Green Bankshares, Inc

We are the third-largest bank holding company headquartered in Tennessee, with \$2.9 billion in assets as of December 31, 2008. Incorporated in 1985, Green Bankshares (the “Company”) is the parent of GreenBank (the “Bank”) and owns 100% of the capital stock of the Bank. The primary business of the Company is operating the Bank.

As a bank holding company, we are subject to regulation by the Board of Governors of the Federal Reserve System, or the Federal Reserve Board (the “FRB”). We are required to file reports with the FRB and are subject to regular examinations by that agency. Shares of our common stock are traded on the NASDAQ Global Select Market under the trading symbol “GRNB.”

On December 23, 2008, we entered into a Letter Agreement and a Securities Purchase Agreement – Standard Terms with the U.S. Department of Treasury (“U.S. Treasury”), pursuant to which we agreed to issue and sell, and the Treasury agreed to purchase, (i) 72,278 shares of our Fixed Rate Cumulative Perpetual Preferred Stock, Series A, having a liquidation preference of \$1,000 per share, and (ii) a ten year warrant to purchase up to 635,504 shares of our common stock, \$2.00 par value, at an initial exercise price of \$17.06 per share. The warrant was immediately exercisable upon its issuance and will expire on December 23, 2018.

At December 31, 2008, the Company maintained a main office in Greeneville, Tennessee and 64 full-service bank branches (of which eleven are in leased operating premises), a location for mortgage banking and nine separate locations operated by the Bank's subsidiaries.

The Company's assets consist primarily of its investment in the Bank and liquid investments. Its primary activities are conducted through the Bank. At December 31, 2008, the Company's consolidated total assets were \$2,944,671, its consolidated net loans were \$2,223,390, its total deposits were \$2,184,147 and its total shareholders' equity was \$381,231.

The Company's net income is dependent primarily on its net interest income, which is the difference between the interest income earned on its loans and other interest-earning assets and the interest paid on deposits and other interest-bearing liabilities. Also favorably influencing the Company's net income is its noninterest income, derived principally from service charges and fees. Offsetting these positive factors contributing to net income are the levels of the Company's loan loss provision expense and other non-interest expenses such as salaries and employee benefits.

Lending Activities:

General: The Bank's lending activities reflect its community banking philosophy, emphasizing secured loans to individuals and businesses in its primary market areas.

Consumer Lending: The Bank makes consumer loans for personal, family or household purposes, such as home purchases, debt consolidation, financing of home improvements, automobiles, vacations and education.

The Bank's consumer lending origination activity primarily consists of home equity real estate secured lending. It also includes originating loans secured by personal property and to a limited extent, unsecured personal loans. Consumer loans may be made on a revolving line of credit or fixed-term basis.

Commercial Real Estate Lending: Commercial real estate loans are loans originated by the Bank that are secured by commercial real estate and includes commercial real estate construction loans to developers, mainly to borrowers based in its primary markets.

Commercial Business Lending: Commercial business loans are loans originated by the Bank that are generally secured by various types of business assets including inventory, receivables, equipment, financial instruments and commercial real estate. In limited cases, loans may be made on an unsecured basis. Commercial business loans are used for a variety of purposes including working capital and financing the purchase of equipment.

The Bank concentrates on originating commercial business loans to middle-market companies with borrowing requirements of less than \$25 million. Substantially all of the Bank's commercial business loans outstanding at December 31, 2008, were to borrowers based in its primary markets.

Investment Activities:

The Bank has authority to invest in various types of liquid assets, including U.S. Treasury obligations and securities of various federal agencies and U.S. Government sponsored enterprises, deposits of insured banks and federal funds. The Bank's investments do not include commercial paper, asset-backed commercial paper, asset-backed securities secured by credit cards or car loans or preferred stock of Fannie Mae or Freddie Mac. The Bank also does not participate in structured investment vehicles. Liquidity may increase or decrease depending upon the availability of funds and comparative yields on investments in relation to the returns on loans and leases. The Bank must also meet reserve requirements of the Federal Reserve Board, which are imposed based on amounts on deposit in various deposit categories.

Sources of Funds:

Deposits: Deposits are the primary source of the Bank's funds for use in lending and for other general business purposes. Deposit inflows and outflows are significantly influenced by economic and competitive conditions, interest rates, money market conditions and other factors. Consumer, small business and commercial deposits are attracted principally from within the Bank's primary market areas through the offering of a broad selection of

deposit instruments including consumer, small business and commercial demand deposit accounts, interest-bearing checking accounts, money market accounts, regular savings accounts, certificates of deposit and retirement savings plans.

The Bank's marketing strategy emphasizes attracting core deposits held in checking, savings, money-market and certificate of deposit accounts. These accounts are a source of low-interest cost funds and in some cases, provide significant fee income. The composition of the Bank's deposits has a significant impact on the overall cost of funds. At December 31, 2008, interest-bearing deposits comprised 92% of total deposits, as compared with 90% at December 31, 2007.

Borrowings: Borrowings may be used to compensate for reductions in deposit inflows or net deposit outflows, or to support expanded lending activities. These borrowings include Federal Home Loan Bank ("FHLB") advances, repurchase agreements, federal funds and other borrowings.

The Bank, as a member of the FHLB system, is required to own a minimum level of FHLB stock and is authorized to apply for advances on the security of such stock, mortgage-backed securities, loans secured by real estate and other assets (principally securities which are obligations of, or guaranteed by, the United States Government), provided certain standards related to creditworthiness have been met. FHLB advances are made pursuant to several different credit programs. Each credit program has its own interest rates and range of maturities. The FHLB prescribes the acceptable uses to which the advances pursuant to each program may be made as well as limitations on the size of advances. In addition to the program limitations, the amounts of advances for which an institution may be eligible are generally based on the FHLB's assessment of the institution's creditworthiness.

As an additional source of funds, the Bank may sell securities subject to its obligation to repurchase these securities (repurchase agreements) with major customers utilizing government securities or mortgage-backed securities as collateral. Generally, securities with a value in excess of the amount borrowed are required to be maintained as collateral to a repurchase agreement.

Information concerning the Bank's FHLB advances, repurchase agreements, subordinated notes, junior subordinated notes (trust preferred) and other borrowings is set forth in "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources" and in Note 8 of Notes to Consolidated Financial Statements.

We are significantly affected by prevailing economic conditions, competition and the monetary, fiscal and regulatory policies of governmental agencies. Lending activities are influenced by the general credit needs of individuals and small and medium-sized businesses in the Company's market areas, competition among lenders, the level of interest rates and the availability of funds. Deposit flows and costs of funds are influenced by prevailing market rates of interest, primarily the rates paid on competing funding alternatives, account maturities and the levels of personal income and savings in the Company's market areas.

Our principal executive offices are located at 100 North Main Street, Greenville, Tennessee 37743-4992 and our telephone number at these offices is (423) 639-5111. Our internet address is www.greenbankusa.com. Please note that our website is provided as an inactive textual reference and the information on our website is not incorporated by reference.

GreenBank and its Subsidiaries

Our Bank is a Tennessee-chartered commercial bank established in 1890 which has its principal executive offices in Greeneville, Tennessee. The principal business of the Bank consists of attracting deposits from the general public and investing those funds, together with funds generated from operations and from principal and interest payments on loans, primarily in commercial and residential real estate loans, commercial loans and installment consumer loans. At December 31, 2008, the Bank had 63 Tennessee based full-service banking offices located in Greene, Blount, Cocke, Hamblen, Hawkins, Knox, Loudon, McMinn, Monroe, Sullivan, and Washington Counties in East Tennessee and in Davidson, Lawrence, Macon, Montgomery, Rutherford, Smith, Sumner and Williamson Counties in Middle Tennessee. The Bank also operates two other full service branches—one located in nearby Madison County, North Carolina and the other in nearby Bristol, Virginia. Further, the Bank operates a mortgage banking operation in Knox County, Tennessee.

Our Bank also offers other financial services through three wholly-owned subsidiaries. Through Superior Financial Services, Inc. ("Superior Financial"), the Bank operates eight consumer finance company offices located in Greene, Blount, Hamblen, Washington, Sullivan, Sevier, Knox and Bradley Counties, Tennessee. Through GCB Acceptance Corporation ("GCB Acceptance"), the Bank operates a sub-prime automobile lending company with a sole office in Johnson City, Tennessee. Through Fairway Title Co., the Bank operates a title company headquartered in Knox County, Tennessee. At December 31, 2008, these three subsidiaries had total combined assets of \$39,846 and total combined loans, net of unearned interest and loan loss reserve, of \$37,305.

Deposits of our Bank are insured by the Bank Insurance Fund ("BIF") of the Federal Deposit Insurance Corporation ("FDIC"). Our bank is subject to comprehensive regulation, examination and supervision by the Tennessee Department of Financial Institutions, the Board of Governors of the Federal Reserve System and the FDIC.

On October 7, 2005, our Company purchased five bank branches in Montgomery County, Tennessee. This purchase also added to the Bank's presence in Middle Tennessee.

On May 18, 2007, our Company completed its acquisition of Franklin, Tennessee-based Civitas BankGroup, Inc. ("CVBG"). Our Company was the surviving corporation of the merger with CVBG. CVBG was the bank holding company for Cumberland Bank which had 12 offices in the Nashville Metropolitan Statistical Area ("MSA"). Cumberland Bank was subsequently merged into our Bank, with our Bank as the surviving entity. The aggregate purchase price was \$164,268, including \$45,793 in cash and 3,091,495 shares of the Company's common stock.

Growth and Business Strategy

The Company expects that over the short term, given the current economic environment, there will be little to no growth until this recessionary environment stabilizes and the economy begins to improve. Over the intermediate term, its growth from mergers and acquisitions, including acquisitions of both entire financial institutions and selected branches of financial institutions, is expected to continue. De novo branching is also expected to be a method of growth, particularly in high-growth and other demographically-desirable markets.

The Company's strategic plan outlines geographic expansion within a 300-mile radius of its headquarters in Greene County, Tennessee. This could result in the Company expanding westward and eastward up to and including Nashville, Tennessee and Roanoke, Virginia, respectively, east/southeast up to and including the Piedmont area of North Carolina and western North Carolina, southward to northern Georgia and northward into eastern and central Kentucky. In particular, the Company believes the markets in and around Knoxville, Nashville and Chattanooga, Tennessee are highly desirable areas with respect to expansion and growth plans.

The Bank had historically operated under a single bank charter while conducting business under 18 bank brands with a distinct community-based brand in almost every market. On March 31, 2007 the Bank announced that it had changed all brand names to GreenBank throughout all the communities it serves to better enhance recognition and customer convenience. The Bank continues to offer local decision making through the presence of its regional executives in each of its markets, while maintaining a cost effective organizational structure in its back office and support areas.

The Bank focuses its lending efforts predominately on individuals and small to medium-sized businesses while it generates deposits primarily from individuals in its local communities. To aid in deposit generation efforts, the Bank offers its customers extended hours of operation during the week as well as Saturday and Sunday banking. The Bank also offers free online banking along with its High Performance Checking Program which since its inception has generated a significant number of core transaction accounts.

In addition to the Company's business model, which is summarized in the paragraphs above entitled "Green Bankshares, Inc." and "GreenBank and its Subsidiaries", the Company is continuously investigating and analyzing other lines and areas of business. Conversely, the Company frequently evaluates and analyzes the profitability, risk factors and viability of its various business lines and segments and, depending upon the results of these evaluations and analyses, may conclude to exit certain segments and/or business lines. Further, in conjunction with these ongoing evaluations and analyses, the Company may decide to sell, merge or close certain branch facilities.

Lending Activities

General. The loan portfolio of the Company is comprised of commercial real estate, residential real estate, commercial and consumer loans. Such loans are primarily originated within the Company's market areas of East and Middle Tennessee and are generally secured by residential or commercial real estate or business or personal property located in its market footprint.

Loan Composition. The following table sets forth the composition of the Company's loans at December 31 for each of the periods indicated:

	2008	2007	2006	2005	2004
Commercial real estate.....	\$ 1,430,225	\$ 1,549,457	\$ 921,190	\$ 729,254	\$ 484,088
Residential real estate	397,922	398,779	281,629	319,797	319,713
Commercial.....	315,099	320,264	258,998	245,285	165,975
Consumer.....	89,733	97,635	87,111	90,682	82,532
Other.....	4,656	3,871	2,203	3,476	4,989
Unearned interest.....	<u>(14,245)</u>	<u>(13,630)</u>	<u>(11,502)</u>	<u>(9,852)</u>	<u>(10,430)</u>
Loans, net of unearned interest	<u>\$ 2,223,390</u>	<u>\$ 2,356,376</u>	<u>\$ 1,539,629</u>	<u>\$ 1,378,642</u>	<u>\$ 1,046,867</u>
Allowance for loan losses	<u>\$ (48,811)</u>	<u>\$ (34,111)</u>	<u>\$ (22,302)</u>	<u>\$ (19,739)</u>	<u>\$ (15,721)</u>

Loan Maturities. The following table reflects at December 31, 2008 the dollar amount of loans maturing based on their contractual terms to maturity. Demand loans, loans having no stated schedule of repayments and loans having no stated maturity are reported as due in one year or less.

	Due in One Year or Less	Due After One Year Through Five Years	Due After Five Years	Total
Commercial real estate.....	\$ 756,134	\$ 624,142	\$ 49,949	\$ 1,430,225
Residential real estate ⁽¹⁾	63,299	107,994	220,703	391,996
Commercial.....	197,727	106,019	11,353	315,099
Consumer ⁽¹⁾	23,691	54,214	3,509	81,414
Other.....	4,303	253	100	4,656
Total.....	<u>\$ 1,045,154</u>	<u>\$ 892,622</u>	<u>\$ 285,614</u>	<u>\$ 2,223,390</u>

⁽¹⁾ Net of unearned interest

The following table sets forth the dollar amount of the loans maturing subsequent to the year ending December 31, 2009 distinguished between those with predetermined interest rates and those with floating, or variable, interest rates.

	Fixed Rate	Variable Rate	Total
Commercial real estate.....	\$ 482,450	\$ 191,641	\$ 674,091
Residential real estate	154,260	174,437	328,697
Commercial.....	79,149	38,223	117,372
Consumer.....	57,042	681	57,723
Other.....	256	97	353
Total.....	<u>\$ 773,157</u>	<u>\$ 405,079</u>	<u>\$ 1,178,236</u>

Commercial Real Estate Loans. The Company originates commercial loans, including residential real estate construction and development loans, generally to existing business customers, secured by real estate located in the Company's market area. At December 31, 2008, commercial real estate loans totaled \$1,430,225, or 64%, of the Company's net loan portfolio. Commercial real estate loans are generally underwritten by addressing cash flow (debt service coverage), primary and secondary source of repayment, financial strength of any guarantor, strength of the tenant (if any), liquidity, leverage, management experience, ownership structure, economic conditions and industry specific trends and collateral. Generally, the Company will loan up to 80-85% of the value of improved property, 65% of the value of raw land and 75% of the value of land to be acquired and developed. A first lien on the property and assignment of lease is required if the collateral is rental property, with second lien positions considered on a case-by-case basis.

Residential Real Estate. The Company also originates one-to-four family, owner-occupied residential mortgage loans secured by property located in the Company's primary market areas. The majority of the Company's residential mortgage loans consists of loans secured by owner-occupied, single-family residences. At December 31, 2008, the Company had \$397,922, or 18%, of its net loan portfolio in residential real estate loans. Residential real estate loans generally have a loan-to-value ratio of 85% or less. These loans are underwritten by giving consideration to the ability to pay, stability of employment, source of income, credit history and loan-to-value ratio. Home equity loans make up approximately 36% of residential real estate loans. Home equity loans may have higher loan-to-value ratios when the borrower's repayment capacity and credit history conform to underwriting standards. Superior Financial extends sub-prime mortgages to borrowers who generally have a higher risk of default than mortgages extended by the Bank. Sub-prime mortgages totaled \$15,988, or 4%, of the Company's residential real estate loans at December 31, 2008.

The Company sells most of its one-to-four family mortgage loans in the secondary market to Freddie Mac and other mortgage investors through the Bank's mortgage banking operation. Sales of such loans to Freddie Mac and other mortgage investors totaled \$51,962 and \$84,282 during 2008 and 2007, respectively, and the related mortgage servicing rights were sold together with the loans.

Commercial Loans. Commercial loans are made for a variety of business purposes, including working capital, inventory and equipment and capital expansion. At December 31, 2008, commercial loans outstanding totaled \$315,099, or 14%, of the Company's net loan portfolio. Such loans are usually amortized over one to seven years and generally mature within five years. Commercial loan applications must be supported by current financial information on the borrower and, where appropriate, by adequate collateral. Commercial loans are generally underwritten by addressing cash flow (debt service coverage), primary and secondary sources of repayment, financial strength of any guarantor, liquidity, leverage, management experience, ownership structure, economic conditions and industry-specific trends and collateral. The loan to value ratio depends on the type of collateral. Generally speaking, accounts receivable are financed between 70% and 80% of accounts receivable less than 90 days past due. If other collateral is taken to support the loan, the loan to value of accounts receivable may approach 85%. Inventory financing will range between 50% and 60% depending on the borrower and nature of the inventory. The Company requires a first lien position for such loans. These types of loans are generally considered to be a higher credit risk than other loans originated by the Company.

Consumer Loans. At December 31, 2008, the Company's consumer loan portfolio totaled \$89,733, or 4%, of the Company's total net loan portfolio. The Company's consumer loan portfolio is composed of secured and unsecured loans originated by the Bank, Superior Financial and GCB Acceptance. The consumer loans of the Bank have a higher risk of default than other loans originated by the Bank. Further, consumer loans originated by Superior Financial and GCB Acceptance, which are finance companies rather than banks, generally have a greater risk of default than such loans originated by commercial banks and, accordingly, carry a higher interest rate. Superior Financial and GCB Acceptance consumer loans totaled approximately \$38,801, or 43%, of the Company's installment consumer loans at December 31, 2008. The performance of consumer loans will be affected by the local and regional economy as well as the rates of personal bankruptcies, job loss, divorce and other individual-specific characteristics.

Past Due, Special Mention, Classified and Nonaccrual Loans. The Company classifies its problem loans into three categories: past due loans, special mention loans and classified loans (both accruing and non-accruing interest).

When management determines that a loan is no longer performing and that collection of interest appears doubtful, the loan is placed on nonaccrual status. All loans that are 90 days past due are considered nonaccrual unless they are adequately secured and there is reasonable assurance of full collection of principal and interest. Management closely monitors all loans that are contractually 90 days past due, treated as "special mention" or otherwise classified or on nonaccrual status. Nonaccrual loans that are 120 days past due without assurance of repayment are charged off against the allowance for loan losses.

The following table sets forth information with respect to the Company's nonperforming assets at the dates indicated. At these dates, the Company did not have any troubled debt restructurings.

	At December 31,				
	2008	2007	2006	2005	2004
Loans accounted for on a non-accrual basis	\$ 30,926	\$ 32,060	\$ 3,479	\$ 5,915	\$ 6,242
Accruing loans which are contractually past due 90 days or more as to interest or principal payments	509	18	28	809	664
Total non-performing loans	31,435	32,078	3,507	6,724	6,906
Real estate owned:					
Foreclosures	44,964	4,401	1,445	2,920	1,353
Other real estate held and repossessed assets	407	458	243	823	213
Total non-performing assets	<u>\$ 76,806</u>	<u>\$ 36,937</u>	<u>\$ 5,195</u>	<u>\$ 10,467</u>	<u>\$ 8,472</u>

Total non-performing assets increased by \$39,869 from December 31, 2007 to December 31, 2008. This increase was principally a function of the rapid deterioration in the Company's residential real estate construction and development portfolio that began in the fourth quarter of 2007 and escalated throughout 2008 in the Company's urban markets, primarily Nashville and Knoxville, and the aggressive action taken to identify and appropriately classify these assets. The Company's continuing efforts to resolve nonperforming loans include foreclosures, which result in the Company's ownership of the real estate underlying the mortgage. If nonaccrual loans at December 31, 2008 had been current according to their original terms and had been outstanding throughout 2008, or since origination if originated during the year, interest income on these loans would have been approximately \$2,754. Interest actually recognized on these loans during 2008 was \$2,134.

Foreclosed real estate increased \$40,563 to \$44,964 at December 31, 2008 from \$4,401 at December 31, 2007. The real estate consists of 89 properties, of which 50 are single family residential properties with a carrying value of \$6,680, four are development residential properties with a carrying value of \$21,778, seven are multi-acre vacant land with carrying value of \$710, 23 are vacant residential lots with a carrying value of \$10,850, four are commercial buildings with a carrying value of \$977 and one is a multi-family unit with a carrying value of \$3,969. Management has recorded these properties at fair value less estimated selling costs. Other repossessed assets decreased \$51 to \$407 at December 31, 2008 from \$458 at December 31, 2007. The decrease is due primarily to the disposition of repossessed automobiles at one of the Company's subsidiaries.

Total impaired loans, defined under Statement of Accounting Standards ("SFAS") No. 114 "Accounting by Creditors for Impairment of a Loan—an amendment of FASB Statements No. 5 and 15" as loans which, based upon current information and events, it is considered probable that the Company will be unable to collect all amounts of contractual interest and principal as scheduled in the loan agreement, increased by \$10,948 from \$36,267 at December 31, 2007 to \$47,215 at December 31, 2008. Under SFAS No. 114, the impairment is probable if the future events indicate that the Bank will not collect principal and interest in accordance with contractual terms. Impaired loans may, or may not, be included in non-performing loans. This increase is primarily attributable to the rapid deterioration during the fourth quarter of 2007 and escalating deterioration throughout 2008 in residential real estate construction loans located in its urban markets.

At December 31, 2008, the Company had approximately \$15,576 in loans that are not currently classified as nonaccrual or 90 days past due or otherwise restructured but which known information about possible credit problems of borrowers caused management to have concerns as to the ability of the borrowers to comply with present loan repayment terms. Such loans were considered classified by the Company and were composed primarily of various commercial, commercial real estate and consumer loans. The Company believes that these loans are adequately secured and management currently does not expect any material loss.

Allowance for Loan Losses. The allowance for loan losses is maintained at a level which management believes is adequate to absorb all probable losses on loans then present in the loan portfolio. The amount of the allowance is affected by: (1) loan charge-offs, which decrease the allowance; (2) recoveries on loans previously charged-off, which increase the allowance; and (3) the provision for possible loan losses charged against income, which increases the allowance. In determining the provision for possible loan losses, it is necessary for management to monitor fluctuations in the allowance resulting from actual charge-offs and recoveries, and to periodically review the size and composition of the loan portfolio in light of current and anticipated economic conditions in an effort to evaluate portfolio risks. If actual losses exceed the amount of the allowance for loan losses, earnings of the Company could be adversely affected. The amount of the provision is based on management's judgment of those risks. During the year ended December 31, 2008, the Company's provision for loan losses increased by \$38,327 to \$52,810 from \$14,483 for the year ended December 31, 2007, while the allowance for loan losses increased by \$14,700 to \$48,811 at December 31, 2008 from \$34,111 at December 31, 2007. The increase in the provision for loan losses was attributable primarily to weakened economic conditions experienced in the Company's urban markets, principally in the Nashville and Knoxville markets, beginning in the fourth quarter of 2007 and escalating throughout 2008 accompanied by deteriorating credit quality associated primarily with residential real estate construction and development loans in those markets.

The increase in the allowance for loan losses was attributable primarily to weakened economic conditions experienced in the Company's urban markets, principally the Nashville and Knoxville markets, beginning in the fourth quarter of 2007 and escalating throughout 2008, accompanied by deteriorating credit quality associated primarily with residential real estate construction and development loans in these markets. After recognizing net charge-offs of \$38,110 for the year, the Company reviewed loan concentrations in the residential real estate construction category along with continued economic weaknesses in its urban markets and provided an additional \$14,700 to cover estimated losses inherent in the portfolio. The allowance for loan losses as a percentage of total loans was 2.20% at the end of 2008 versus 1.45% at December 31, 2007. The loan loss reserves reflected the higher level of non-performing banking assets, and losses inherent in this segment of the Company's business, as noted in Note 17 of Notes to Consolidated Financial Statements. Although Management believes that the allowance for loan losses is adequate to cover estimated losses inherent in the portfolio, there can be no assurances that additional reserves may not be required in the future.

The following is a summary of activity in the allowance for loan losses for the periods indicated:

	Year Ended December 31,				
	2008	2007	2006	2005	2004
Balance at beginning of year.....	\$ 34,111	\$ 22,302	\$ 19,739	\$ 15,721	\$ 14,564

Investment Activities

General. The Company maintains a portfolio of investments to cover minimum pledging requirements for municipal deposits and borrowings.

Securities by Category. The following table sets forth the carrying value of the securities, by major categories, held by the Company at December 31, 2008, 2007 and 2006:

	At December 31,		
	2008	2007	2006
Securities Held to Maturity:			
Obligations of state and political subdivisions	\$ 404	\$ 1,049	\$ 1,794
Corporate Securities	<u>253</u>	<u>254</u>	<u>751</u>
Total	<u>\$ 657</u>	<u>\$ 1,303</u>	<u>\$ 2,545</u>
Securities Available for Sale:			
U.S. Government, corporations and agencies	\$ 169,265	\$ 197,908	\$ 33,814
Obligations of state and political subdivisions	31,804	34,388	1,702
Trust Preferred Securities	<u>2,493</u>	<u>2,977</u>	<u>2,224</u>
Total	<u>\$ 203,562</u>	<u>\$ 235,273</u>	<u>\$ 37,740</u>

Maturity Distributions of Securities. The following table sets forth the distributions of maturities of securities at amortized cost as of December 31, 2008:

	Due in One Year or Less	Due After One Year through Five Years	Due After Five Years through 10 Years	Due After 10 Years	Total
U.S. Government agency obligations – available for sale	\$ —	\$ 930	\$ 43,763	\$ 124,365	\$ 169,058
Obligations of state and political subdivisions – available for sale	155	2,623	17,760	12,103	32,641
Obligations of state and political subdivisions – held to maturity	—	404	—	—	404
Other securities – available for sale	—	—	—	2,954	2,954
Other securities – held to maturity	<u>—</u>	<u>253</u>	<u>—</u>	<u>—</u>	<u>253</u>
Subtotal	\$ 155	\$ 4,210	\$ 61,523	\$ 139,422	\$ 205,310
Market value adjustment on available for sale securities	<u>1</u>	<u>25</u>	<u>217</u>	<u>(1,335)</u>	<u>(1,092)</u>
Total	<u>\$ 156</u>	<u>\$ 4,235</u>	<u>\$ 61,740</u>	<u>\$ 138,087</u>	<u>\$ 204,218</u>
Weighted average yield (a)	<u>5.43%</u>	<u>6.60%</u>	<u>5.81%</u>	<u>5.56%</u>	<u>5.66%</u>

(a) Weighted average yields on tax-exempt obligations have been computed on a fully taxable-equivalent basis using a tax rate of 35%.

Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Deposits

Deposits are the primary source of funds for the Company. Such deposits consist of noninterest bearing and interest-bearing demand deposit accounts, regular savings deposits, Money Market accounts and market rate Certificates of Deposit. Deposits are attracted from individuals, partnerships and corporations in the Company's market areas. In addition, the Company obtains deposits from state and local entities and, to a lesser extent, U.S. Government and other depository institutions. The Company's Asset/Liability Management Policy permits the acceptance of limited amounts of brokered deposits.

The following table sets forth the average balances and average interest rates based on daily balances for deposits for the periods indicated:

	Year Ended December 31,					
	2008		2007		2006	
	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid
Types of deposits (all in domestic offices):						
Noninterest bearing demand deposits	\$ 187,058	—	\$ 184,529	—	\$ 147,947	—
Interest-bearing demand deposits	577,024	1.57%	581,340	2.78%	420,041	2.38%
Savings deposits	68,612	.77%	73,355	.75%	72,978	.70%
Time deposits	<u>1,317,362</u>	3.68%	<u>951,455</u>	4.70%	<u>641,672</u>	3.98%
Total deposits	<u>\$2,150,056</u>		<u>\$1,790,679</u>		<u>\$1,282,638</u>	

The following table indicates the amount of the Company's certificates of deposit of \$100 or more by time remaining until maturity as of December 31, 2008:

Maturity Period	Certificates of Deposits
Three months or less	\$ 363,137
Over three through six months.....	154,442
Over six through twelve months.....	165,903
Over twelve months.....	<u>83,758</u>
Total.....	<u>\$767,240</u>

Competition

To compete effectively, the Company relies substantially on local commercial activity; personal contacts by its directors, officers, other employees and shareholders; personalized services; and its reputation in the communities it serves.

According to data as of June 30, 2008 published by SNL Financial LC and using information from the FDIC, the Bank ranked as the largest independent commercial bank headquartered in East Tennessee, and its major market areas include Greene, Blount, Davidson, Hamblen, Hawkins, Knox, Lawrence, Loudon, Macon, McMinn, Montgomery, Rutherford, Smith, Sullivan, Sumner, Washington and Williamson Counties, Tennessee and portions of Cocke, Monroe and Jefferson Counties, Tennessee. In Greene County, in which the Company enjoyed its largest deposit share as of June 30, 2008, there were seven commercial banks and one savings bank, operating 26 branches and holding an aggregate of approximately \$1.3 billion in deposits as of June 30, 2008. The following table sets forth the Bank's deposit share, excluding credit unions, in each county in which it has a full-service branch(s) as of June 30, 2008, according to data published by the FDIC:

<u>County</u>	<u>Deposit Share</u>
Greene, TN	49.53%
Hawkins, TN	18.66%
Lawrence, TN	14.81%
Smith, TN	12.08%
Sumner, TN	12.04%
Blount, TN	9.94%
Montgomery, TN	8.74%
Macon, TN	8.64%
Hamblen, TN	8.33%
Cocke, TN	8.10%
Washington, TN	5.45%
Madison, NC	5.32%
McMinn, TN	5.23%
Loudon, TN	4.44%
Williamson, TN	3.84%
Bristol, VA ¹	3.63%
Rutherford, TN	2.55%
Sullivan, TN	2.17%
Monroe, TN	1.28%
Davidson, TN	0.64%
Knox, TN	0.50%

¹ Bristol, VA is deemed a city.

Employees

As of December 31, 2008 the Company employed 737 full-time equivalent employees. None of the Company's employees are presently represented by a union or covered under a collective bargaining agreement. Management considers relations with employees to be good.

Regulation, Supervision and Governmental Policy

The following is a brief summary of certain statutes, rules and regulations affecting the Company and the Bank. A number of other statutes and regulations have an impact on their operations. The following summary of applicable statutes and regulations does not purport to be complete and is qualified in its entirety by reference to such statutes and regulations.

Bank Holding Company Regulation. The Company is registered as a bank holding company under the Bank Holding Company Act (the "Holding Company Act") and, as such, is subject to supervision, regulation and examination by the Board of Governors of the FRB.

Acquisitions and Mergers. Under the Holding Company Act, a bank holding company must obtain the prior approval of the FRB before (1) acquiring direct or indirect ownership or control of any voting shares of any bank or bank holding company if, after such acquisition, the bank holding company would directly or indirectly own or control more than 5% of such shares; (2) acquiring all or substantially all of the assets of another bank or bank holding company; or (3) merging or consolidating with another bank holding company. Also, any company must obtain approval of the FRB prior to acquiring control of the Company or the Bank. For purposes of the Holding Company Act, "control" is defined as ownership of more than 25% of any class of voting securities of the Company or the Bank, the ability to control the election of a majority of the directors, or the exercise of a controlling influence over management or policies of the Company or the Bank.

The Change in Bank Control Act and the related regulations of the FRB require any person or persons acting in concert (except for companies required to make application under the Holding Company Act), to file a written notice with the FRB before such person or persons may acquire control of the Company or the Bank. The Change in Bank Control Act defines "control" as the power, directly or indirectly, to vote 25% or more of any voting securities or to direct the management or policies of a bank holding company or an insured bank.

Bank holding companies like the Company are currently prohibited from engaging in activities other than banking and activities so closely related to banking or managing or controlling banks as to be a proper incident thereto. The FRB's regulations contain a list of permissible nonbanking activities that are closely related to banking or managing or controlling banks. A bank holding company must file an application or notice with the FRB prior to acquiring more than 5% of the voting shares of a company engaged in such activities. The Gramm-Leach-Bliley Act of 1999 (the "GLB Act"), however, greatly broadened the scope of activities permissible for bank holding companies. The GLB Act permits bank holding companies, upon election and classification as financial holding companies, to engage in a broad variety of activities "financial" in nature. The Company has not filed an election with the FRB to be a financial holding company, but may chose to do so in the future.

Capital Requirements. The Company is also subject to FRB guidelines that require bank holding companies to maintain specified minimum ratios of capital to total assets and capital to risk-weighted assets. See "Capital Requirements."

Dividends. The FRB has the power to prohibit dividends by bank holding companies if their actions constitute unsafe or unsound practices. The FRB has issued a policy statement expressing its view that a bank holding company should pay cash dividends only to the extent that the company's net income for the past year is sufficient to cover both the cash dividends and a rate of earnings retention that is consistent with the company's capital needs, asset quality, and overall financial condition. The Company does not believe compliance with this policy statement will limit the Company's ability to maintain its dividend payment rate.

The Company is a legal entity separate and distinct from the Bank. Over time, the principal source of the Company's cash flow, including cash flow to pay dividends to its holders of trust preferred securities, holders of the Series A preferred stock the Company issued to the U.S. Treasury in connection with the Capital Purchase Program ("CPP") and to the Company's common stock shareholders, will be dividends that the Bank pays to the Company as its sole shareholder. Under Tennessee law, the Company is not permitted to pay dividends if, after giving effect to such payment, the Company would not be able to pay its debts as they become due in the normal course of business or the Company's total assets would be less than the sum of its total liabilities plus any amounts needed to satisfy any preferential rights if the Company were dissolving. In addition, in deciding whether or not to declare a dividend of any particular size, the Company's board of directors must consider the Company's current and prospective capital, liquidity, and other needs.

In addition to the limitations on the Company's ability to pay dividends under Tennessee law, the Company's ability to pay dividends on its common stock is also limited by the Company's participation in the CPP and by certain statutory or regulatory limitations. Prior to December 23, 2011, unless the Company has redeemed the Series A preferred stock issued to the U.S. Treasury in the CPP or the U.S. Treasury has transferred the Series A preferred stock to a third party, the consent of the U.S. Treasury must be received before the Company can declare or pay any dividend or make any distribution on the Company's common stock in excess of \$0.13 per quarter. Furthermore, if the Company is not current in the payment of quarterly dividends on the Series A preferred stock, it can not pay dividends on its common stock.

Statutory and regulatory limitations also apply to the Bank's payment of dividends to the Company. Under Tennessee law, the Bank can only pay dividends to the Company in an amount equal to or less than the total or less than the total amount of its net income for that year combined with retained net income for the preceding two years. Payment of dividends in excess of this amount requires the consent of the Commissioner of the Tennessee Department of Financial Institutions.

The payment of dividends by the Bank and the Company may also be affected by other factors, such as the requirement to maintain adequate capital above regulatory guidelines. The federal banking agencies have indicated that paying dividends that deplete a depository institution's capital base to an inadequate level would be an unsafe and unsound banking practice. Under the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), a depository institution may not pay any dividend if payment would cause it to become undercapitalized or if it already is undercapitalized. Moreover, the federal agencies have issued policy statements that provide that bank holding companies and insured banks should generally only pay dividends out of current operating earnings.

Support of Banking Subsidiaries. Under FRB policy, the Company is expected to act as a source of financial strength to its banking subsidiaries and, where required, to commit resources to support each of such subsidiaries. Further, if the Bank's capital levels were to fall below minimum regulatory guidelines, the Bank would need to develop a capital plan to increase its capital levels and the Company would be required to guarantee the Bank's compliance with the capital plan in order for such plan to be accepted by the federal regulatory authority.

Under the "cross guarantee" provisions of the Federal Deposit Insurance Act (the "FDI Act"), any FDIC-insured subsidiary of the Company such as the Bank could be liable for any loss incurred by, or reasonably expected to be incurred by, the FDIC in connection with (i) the default of any other FDIC-insured subsidiary also controlled by the Company or (ii) any assistance provided by the FDIC to any FDIC-insured subsidiary of the Company in danger of default.

Transactions with Affiliates. The Federal Reserve Act, as amended by Regulation W, imposes legal restrictions on the quality and amount of credit that a bank holding company or its non-bank subsidiaries ("affiliates") may obtain from bank subsidiaries of the holding company. For instance, these restrictions generally require that any such extensions of credit by a bank to its affiliates be on non-preferential terms and be secured by designated amounts of specified collateral. Further, a bank's ability to lend to its affiliates is limited to 10% per affiliate (20% in the aggregate to all affiliates) of the bank's capital and surplus.

Bank Regulation. As a Tennessee banking institution, the Bank is subject to regulation, supervision and regular examination by the Tennessee Department of Financial Institutions. Tennessee and federal banking laws and regulations control, among other things, required reserves, investments, loans, mergers and consolidations, issuance of securities, payment of dividends, and establishment of branches and other aspects of the Bank's operations. Supervision, regulation and examination of the Company and the Bank by the bank regulatory agencies are intended primarily for the protection of depositors rather than for holders of the Common Stock of the Company.

Extensions of Credit. Under joint regulations of the federal banking agencies, including the FDIC, banks must adopt and maintain written policies that establish appropriate limits and standards for extensions of credit that are secured by liens or interests in real estate or are made for the purpose of financing permanent improvements to real estate. These policies must establish loan portfolio diversification standards, prudent underwriting standards, including loan-to-value limits that are clear and measurable, loan administration procedures and documentation, approval and reporting requirements. A bank's real estate lending policy must reflect consideration of the Interagency Guidelines for Real Estate Lending Policies (the "Interagency Guidelines") that have been adopted by the federal banking regulators. The Interagency Guidelines, among other things, call upon depository institutions to establish internal loan-to-value limits for real estate loans that are not in excess of the loan-to-value limits specified in the Guidelines for the various types of real estate loans. The Interagency Guidelines state that it may be appropriate in individual cases to originate or purchase loans with loan-to-value ratios in excess of the supervisory loan-to-value limits. The aggregate amount of loans in excess of the supervisory loan-to-value limits, however, should not exceed 100% of total capital, and the total of such loans secured by commercial, agricultural, multifamily and other non-one-to-four family residential properties should not exceed 30% of total capital.

Federal Deposit Insurance. The deposits of the Bank are insured by the FDIC to the maximum extent provided by law, and the Bank is subject to FDIC deposit insurance assessments. The FDIC has adopted a risk-based assessment system for insured depository institutions that takes into account the risks attributable to different categories and concentrations of assets and liabilities. In early 2006, Congress passed the Federal Deposit Insurance Reform Act of 2005, which made certain changes to the Federal deposit insurance program. These changes included merging the Bank Insurance Fund and the Savings Association Insurance Fund, increasing retirement account coverage to \$250,000 and providing for inflationary adjustments to general coverage beginning in 2010, providing the FDIC with authority to set the fund's reserve ratio within a specified range, and requiring dividends to banks if the reserve ratio exceeds certain levels. The new statute grants banks an assessment credit based on their share of the assessment base on December 31, 1996, and the amount of the credit can be used to reduce assessments in any year subject to certain limitations.

The Emergency Economic Stabilization Act of 2008 ("EESA") provides for a temporary increase in the basic limit on federal deposit insurance coverage from \$100,000 to \$250,000 per depositor. This legislation provides that the basic deposit insurance limit will return to \$100,000 on December 31, 2009. In addition, on October 14, 2008, the FDIC instituted a Temporary Liquidity Guarantee Program that provided for FDIC guarantees of unsecured debt of depository institutions and certain holding companies and for temporary unlimited FDIC coverage of non-interest bearing deposit transaction accounts. Institutions were automatically covered, without cost, under these programs for 30 days (later extended until December 5, 2008); however, after the specified deadline (December 5, 2008), institutions were required to opt-out of these programs if they did not wish to participate and incur fees thereunder. The Company has elected to participate in the transaction account guarantee program, which expires on December 31, 2009. Under the transaction account guarantee program, an institution can provide full coverage on non-interest bearing transaction accounts for an annual assessment of 10 basis points of any deposit amounts exceeding the \$250,000 deposit insurance limit, in addition to the normal risk-based assessment.

Safety and Soundness Standards. The FDICIA required the federal bank regulatory agencies to prescribe, by regulation, non-capital safety and soundness standards for all insured depository institutions and depository institution holding companies. The FDIC and the other federal banking agencies have adopted guidelines prescribing safety and soundness standards pursuant to FDICIA. The safety and soundness guidelines establish general standards relating to internal controls and information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, and compensation, fees and benefits. Among other things, the guidelines require banks to maintain appropriate systems and practices to identify and manage risks and exposures identified in the guidelines.

Participation in the Capital Purchase Program of the Troubled Asset Relief Program. On October 3, 2008, the EESA became law. Under the Troubled Asset Relief Program ("TARP") authorized by EESA, the U.S. Department of the Treasury established a CPP providing for the purchase of senior preferred shares of qualifying U.S. controlled banks, savings associations and certain bank and savings and loan holding companies. On December 23, 2008, the Company sold 72,278 shares of Series A preferred stock and warrants to acquire 635,504 shares of common stock to the U.S. Treasury pursuant to the CPP for aggregate consideration of \$83 million. As a result of the Company's participation in the CPP, the Company has agreed to certain limitations on executive compensation. For as long as the U.S. Treasury owns any debt or equity securities of the Company issued in connection with the TARP capital purchase program, the Company will be required to take all necessary action to ensure that its benefit plans with respect to its senior executive officers comply in all respects with Section 111(b) of the Emergency Economic Stabilization Act of 2008, and the regulations issued and in effect thereunder as of the closing date of the sale of the preferred shares to the United States Treasury. This means that, among other things, while the U.S. Treasury owns debt or equity securities issued by the Company in connection with the TARP capital purchase program, the Company must:

- Ensure that the incentive compensation programs for its senior executive officers do not encourage unnecessary and excessive risks that threaten the value of the Company;
- Implement a required clawback of any bonus or incentive compensation paid to the Company's senior executive officers based on statements of earnings, gains, or other criteria that are later proven to be materially inaccurate;
- Not make any "golden parachute payment" (as defined in the Internal Revenue Code) to any of the Company's senior executive officers; and
- Agree not to deduct for tax purposes executive compensation in excess of \$500,000 in any one fiscal year for each of the Company's senior executive officers.

On February 17, 2009 President Obama signed into law The American Recovery and Reinvestment Act of 2009 (“ARRA”), more commonly known as the economic stimulus or economic recovery package. ARRA includes a wide variety of programs intended to stimulate the economy and provide for extensive infrastructure, energy, health, and education needs. In addition, ARRA imposes certain new executive compensation and corporate expenditure limits on all current and future TARP recipients, including the Company, that are in addition to those previously announced by the U.S. Treasury, until the institution has repaid the U.S. Treasury, which is now permitted under ARRA without penalty and without the need to raise new capital, subject to the U.S. Treasury’s consultation with the recipient’s appropriate regulatory agency.

As of March 13, 2009, it is unclear how these executive compensation standards imposed under ARRA will relate to the similar standards announced by the U.S. Treasury in its guidelines on February 4, 2009, or whether the standards will be considered effective immediately or only after implementing regulations are issued by the U.S. Treasury. The new standards include (but are not limited to) (i) prohibitions on bonuses, retention awards and other incentive compensation, other than restricted stock grants which do not fully vest during the TARP period and which do not exceed one-third of an employee’s total annual compensation, (ii) prohibitions on any payments to senior executives (other than payments for services performed or benefits accrued) for departure for any reason from a company, (iii) an expanded clawback of bonuses, retention awards, and incentive compensation if payment is based on materially inaccurate statements of earnings, revenues, gains or other criteria, (iv) prohibition on compensation plans that encourage manipulation of reported earnings, (v) retroactive review of bonuses, retention awards and other compensation previously provided by TARP recipients if found by the Treasury to be inconsistent with the purposes of TARP or otherwise contrary to public interest, (vi) required establishment of a company-wide policy regarding “excessive or luxury expenditures,” and (vii) inclusion in a participant’s proxy statements for annual shareholder meetings of a nonbinding “Say on Pay” shareholder vote on the compensation of executives. The Company is reviewing these legislative and regulatory matters to determine what impact, if any, they will have on the Company’s executive compensation program for 2009 and beyond.

Capital Requirements. The FRB has established guidelines with respect to the maintenance of appropriate levels of capital by registered bank holding companies, and the FDIC has established similar guidelines for state-chartered banks, such as the Bank, that are not members of the FRB. The regulations of the FRB and FDIC impose two sets of capital adequacy requirements: minimum leverage rules, which require the maintenance of a specified minimum ratio of capital to total assets, and risk-based capital rules, which require the maintenance of specified minimum ratios of capital to “risk-weighted” assets. At December 31, 2008, the Company and the Bank exceeded the minimum required regulatory capital requirements necessary to be well capitalized. See Note 12 of Notes to Consolidated Financial Statements.

The FDIC has issued final regulations that classify insured depository institutions by capital levels and require the appropriate federal banking regulator to take prompt action to resolve the problems of any insured institution that fails to satisfy the capital standards. Under such regulations, a “well-capitalized” bank is one that is not subject to any regulatory order or directive to meet any specific capital level and that has or exceeds the following capital levels: a total risk-based capital ratio of 10%, a Tier 1 risk-based capital ratio of 6%, and a leverage ratio of 5%. As of December 31, 2008, the Bank was “well-capitalized” as defined by the regulations. See Note 12 of Notes to Consolidated Financial Statements for further information.

Legislative, Legal and Regulatory Developments: The banking industry is generally subject to extensive regulatory oversight. The Company, as a publicly held bank holding company, and the Bank, as a state-chartered bank with deposits insured by the FDIC, are subject to a number of laws and regulations. Many of these laws and regulations have undergone significant change in recent years. These laws and regulations impose restrictions on activities, minimum capital requirements, lending and deposit restrictions and numerous other requirements. Future changes to these laws and regulations, and other new financial services laws and regulations, are likely and cannot be predicted with certainty. Future legislative or regulatory change, or changes in enforcement practices or court rulings, may have a dramatic and potentially adverse impact on the Company and the Bank and other subsidiaries.

USA Patriot Act. The President of the United States signed the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act (the “Patriot Act”), into law on October 26, 2001. The Patriot Act establishes a wide variety of new and enhanced ways of combating international terrorism. The provisions that affect banks (and other financial institutions) most directly are

contained in Title III of the act. In general, Title III amended existing law - primarily the Bank Secrecy Act - to provide the Secretary of Treasury (the "Treasury") and other departments and agencies of the federal government with enhanced authority to identify, deter, and punish international money laundering and other crimes.

Among other things, the Patriot Act prohibits financial institutions from doing business with foreign "shell" banks and requires increased due diligence for private banking transactions and correspondent accounts for foreign banks. In addition, financial institutions will have to follow new minimum verification of identity standards for all new accounts and will be permitted to share information with law enforcement authorities under circumstances that were not previously permitted. These and other provisions of the Patriot Act became effective at varying times and the Treasury and various federal banking agencies are responsible for issuing regulations to implement the new law.

Additional Information

The Company maintains a website at www.greenbankusa.com and is not including the information contained on this website as a part of, or incorporating it by reference into, this Annual Report on Form 10-K. The Company makes available free of charge (other than an investor's own internet access charges) through its website its Annual Report on Form 10-K, quarterly reports on Form 10-Q, and current reports on Form 8-K, and amendments to these reports, as soon as reasonably practicable after the Company electronically files such material with, or furnishes such material to, the SEC.

ITEM 1A. RISK FACTORS.

We could sustain losses if our asset quality declines further.

Our earnings are affected by our ability to properly originate, underwrite and service loans. We could sustain losses if we incorrectly assess the creditworthiness of our borrowers or fail to detect or respond to deterioration in asset quality in a timely manner. Recent problems with asset quality have caused, and could continue to cause, our interest income and net interest margin to decrease and our provisions for loan losses to increase, which could adversely affect our results of operations and financial condition. Further increases in non-performing loans would reduce net interest income below levels that would exist if such loans were performing.

Recent negative developments in the financial services industry and U.S. and global credit markets may adversely impact our operations and results.

Negative developments in the latter half of 2007 and throughout 2008 in the capital markets have resulted in uncertainty in the financial markets in general with the expectation of the general economic downturn continuing throughout 2009. Loan portfolio performances have deteriorated at many institutions resulting from, amongst other factors, a weak economy and a decline in the value of the collateral supporting their loans. The competition for our deposits has increased significantly due to liquidity concerns at many of these same institutions. Stock prices of bank holding companies, like us, have been negatively affected by the current condition of the financial markets, as has our ability, if needed, to raise capital or borrow in the debt markets compared to recent years. As a result, there is a potential for new federal or state laws and regulations regarding lending and funding practices and liquidity standards, and financial institution regulatory agencies are expected to be very aggressive in responding to concerns and trends identified in examinations, including the expected issuance of many formal enforcement actions. Negative developments in the financial services industry and the impact of new legislation in response to those developments could negatively impact our operations by restricting our business operations, including our ability to originate or sell loans, and adversely impact our financial performance. In addition, industry, legislative or regulatory developments may cause us to materially change our existing strategic direction, capital strategies, compensation or operating plans.

The enactment of Emergency Economic Stabilization Act of 2008 and the American Recovery and Reinvestment Act of 2009 may not be able to stabilize the U.S. financial system or the economy and may significantly affect the Company's financial condition, results of operation or liquidity.

On October 3, 2008, President Bush signed into law the EESA. The legislation was the result of a proposal by Treasury Secretary Henry Paulson to the U.S. Congress on September 20, 2008 in response to the financial crises affecting the banking system and financial markets and going concern threats to investment banks and other financial institutions. On February 17, 2009, President Obama signed the ARRA in an effort to

stimulate the economy and provide for broad infrastructure, energy, health, and education needs. The U.S. Treasury and banking regulators are implementing a number of programs under this legislation to address capital and liquidity issues in the banking system. There can be no assurance, however, as to the actual impact that the EESA or ARRA will have on the financial markets, including the extreme levels of volatility and limited credit availability currently being experienced. The failure of the EESA or ARRA to help stabilize the financial markets and a continuation or worsening of current financial market conditions could materially affect the registrant's business, financial condition, results of operations, access to credit or the trading price of the registrant's common stock.

There have been numerous actions undertaken in connection with or following EESA and ARRA by the FRB, Congress, the Treasury, the FDIC, the SEC and others in efforts to address the current liquidity and credit crisis in the financial industry that followed the sub-prime mortgage market meltdown which began in late 2007. These measures include homeowner relief that encourages loan restructuring and modification; the establishment of significant liquidity and credit facilities for financial institutions and investment banks; the lowering of the federal funds rate; emergency temporary action against short selling practices; a temporary guaranty program for money market funds; the establishment of a commercial paper funding facility to provide back-stop liquidity to commercial paper issuers; and coordinated international efforts to address illiquidity and other weaknesses in the banking sector. The purpose of these legislative and regulatory actions is to help stabilize the U.S. banking system. EESA, ARRA and the other regulatory initiatives described above may not have their desired effects. If the volatility in the markets continues and economic conditions fail to improve or worsen, the Company's business, financial condition and results of operations could be materially and adversely affected.

Our business is subject to the success of the local economies where we operate.

Our success significantly depends upon the growth in population, income levels, deposits, residential real estate stability and housing starts in our market areas. If the communities in which we operate do not grow or if prevailing economic conditions locally or nationally continue to deteriorate or remain unfavorable, our business may not succeed. Adverse economic conditions in our specific market areas could reduce our growth rate, affect the ability of our customers to repay their loans to us and generally affect our financial condition and results of operations. Moreover, we cannot give any assurance that we will benefit from any market growth or favorable economic conditions in our primary market areas if they do occur.

Continued adverse market or economic conditions in the state of Tennessee may increase the risk that our borrowers will be unable to timely make their loan payments. In addition, the market value of the real estate securing loans as collateral has been and may continue to be adversely affected by continued unfavorable changes in market and economic conditions. As of December 31, 2008, approximately 70% of our loans held for investment were secured by real estate. Of this amount, approximately 54% were commercial real estate loans of which 19% were construction and development loans. The remaining 16% were residential real estate loans. We experienced increased payment delinquencies with respect to these loans throughout 2008 which negatively impacted our results of operations and a sustained period of increased payment delinquencies, foreclosures or losses caused by continuing adverse market or economic conditions in the state of Tennessee could adversely affect the value of our assets, revenues, results of operations and financial condition.

Continued deterioration in residential real estate construction and development markets could adversely affect our loan portfolio quality and our results of operations.

We have a loan concentration to residential real estate contractors and developers. During adverse general economic conditions, such as we believe are now being experienced in residential real estate construction nationwide, borrowers involved in the residential real estate construction and development business may suffer above normal financial strain. As the residential real estate development and construction market in our markets has deteriorated, our borrowers in this segment have begun to experience difficulty repaying their obligations to us. As a result, our loans to these borrowers have deteriorated and may deteriorate further and may result in additional charge-offs negatively impacting our results of operations.

An inadequate allowance for loan losses would reduce our earnings.

The risk of credit losses on loans varies with, among other things, general economic conditions, the type of loan being made, the creditworthiness of the borrower over the term of the loan and, in the case of a collateralized loan, the value and marketability of the collateral for the loan. Management maintains an

allowance for loan losses based upon, among other things, historical experience, an evaluation of economic conditions and regular reviews of delinquencies and loan portfolio quality. Based upon such factors, management makes various assumptions and judgments about the ultimate collectibility of the loan portfolio and provides an allowance for loan losses based upon a percentage of the outstanding balances and takes a charge against earnings with respect to specific loans when their ultimate collectibility is considered questionable. If management's assumptions and judgments prove to be incorrect and the allowance for loan losses is inadequate to absorb losses, or if the bank regulatory authorities require the bank to increase the allowance for loan losses as a part of their examination process, our earnings and capital could be significantly and adversely affected.

Liquidity needs could adversely affect our results of operations and financial condition.

We rely on dividends from the Bank as our primary source of funds. The primary source of funds of the Bank are customer deposits and loan repayments. While scheduled loan repayments are a relatively stable source of funds, they are subject to the ability of borrowers to repay the loans which may be more difficult in economically challenging environments like those currently being experienced. The ability of borrowers to repay loans can be adversely affected by a number of factors, including changes in economic conditions, adverse trends or events affecting business industry groups, reductions in real estate values or markets, business closings or lay-offs, inclement weather, natural disasters and international instability. Additionally, deposit levels may be affected by a number of factors, including rates paid by competitors, general interest rate levels, returns available to customers on alternative investments and general economic conditions. Accordingly, we may be required from time to time to rely on secondary sources of liquidity to meet withdrawal demands or otherwise fund operations. Such sources include FHLB advances and federal funds lines of credit from correspondent banks. While we believe that these sources are currently adequate, there can be no assurance they will be sufficient to meet future liquidity demands. We may be required to slow or discontinue loan growth, capital expenditures or other investments or liquidate assets should such sources not be adequate.

Changes in interest rates could adversely affect our results of operations and financial condition.

Changes in interest rates may affect our level of interest income, the primary component of our gross revenue, as well as the level of our interest expense. Interest rates are highly sensitive to many factors that are beyond our control, including general economic conditions and the policies of various governmental and regulatory authorities. Accordingly, changes in interest rates could decrease our net interest income. Changes in the level of interest rates also may negatively affect our ability to originate real estate loans, the value of our assets and our ability to realize gains from the sale of our assets, all of which ultimately affects our earnings.

Competition from financial institutions and other financial service providers may adversely affect our profitability.

The banking business is highly competitive and we experience competition in each of our markets from many other financial institutions. We compete with commercial banks, credit unions, savings and loan associations, mortgage banking firms, consumer finance companies, securities brokerage firms, insurance companies, money market funds, and other mutual funds, as well as other community banks and super-regional and national financial institutions that operate offices in our primary market areas and elsewhere.

Additionally, we face competition from de novo community banks, including those with senior management who were previously affiliated with other local or regional banks or those controlled by investor groups with strong local business and community ties. These de novo community banks may offer higher deposit rates or lower cost loans in an effort to attract our customers, and may attempt to hire our management and employees.

We compete with these other financial institutions both in attracting deposits and in making loans. In addition, we have to attract our customer base from other existing financial institutions and from new residents. We expect competition to increase in the future as a result of legislative, regulatory and technological changes and the continuing trend of consolidation in the financial services industry. Our profitability depends upon our continued ability to successfully compete with an array of financial institutions in our market areas.

If we continue to experience losses at levels that we experienced during the fourth quarter of 2008 we may need to raise additional capital in the future, but that capital may not be available when it is needed.

We are required by federal and state regulatory authorities to maintain adequate levels of capital to support our operations. While we believe our capital resources will satisfy our capital requirements for the foreseeable future, we may at some point, if we continue to experience losses, need to raise additional capital to support or strengthen our capital position.

Our ability to raise additional capital, if needed, will depend on conditions in the capital markets at that time, which are outside our control, and on our financial performance. Accordingly, we cannot assure our shareholders that we will be able to raise additional capital if needed on terms acceptable to us. If we cannot raise additional capital when needed, we may be subject to increased regulatory restrictions, including restrictions on our ability to expand our operations.

We rely heavily on the services of key personnel.

We depend substantially on the strategies and management services of R. Stan Puckett, our Chairman of the Board and Chief Executive Officer. Although we have entered into an employment agreement with him, the loss of the services of Mr. Puckett could have a material adverse effect on our business, results of operations and financial condition. We are also dependent on certain other key officers who have important customer relationships or are instrumental to our operations. Changes in key personnel and their responsibilities may be disruptive to our business and could have a material adverse effect on our business, financial condition and results of operations.

We believe that our future results will also depend in part upon our attracting and retaining highly skilled and qualified management and sales and marketing personnel, particularly in those areas where we may open new branches.

Competition for such personnel is intense, and we cannot assure you that we will be successful in attracting or retaining such personnel.

We are subject to extensive regulation that could limit or restrict our activities.

We operate in a highly regulated industry and are subject to examination, supervision, and comprehensive regulation by various federal and state agencies including the Federal Reserve Board, the FDIC and the Tennessee Department of Financial Institutions. Our regulatory compliance is costly and restricts certain of our activities, including payment of dividends, mergers and acquisitions, investments, loans and interest rates charged, interest rates paid on deposits and locations of offices. We are also subject to capitalization guidelines established by our regulators, which require us to maintain adequate capital to support our growth.

The laws and regulations applicable to the banking industry could change at any time, and we cannot predict the effects of these changes on our business and profitability. Because government regulation greatly affects the business and financial results of all commercial banks and bank holding companies, our cost of compliance could adversely affect our ability to operate profitably.

The Sarbanes-Oxley Act of 2002, and the related rules and regulations promulgated by the Securities and Exchange Commission and Nasdaq that are applicable to us, have increased the scope, complexity and cost of corporate governance, reporting and disclosure practices. As a result, we have experienced, and may continue to experience, greater compliance costs.

The amount of common stock owned by, and other compensation arrangements with, our officers and directors may make it more difficult to obtain shareholder approval of potential takeovers that they oppose.

As of March 12, 2009, directors and executive officers beneficially owned approximately 10.85% of our common stock. Agreements with selected members of our senior management also provide for certain payments under various circumstances following a change in control. These compensation arrangements, together with the common stock and option ownership of our board of directors and management, could make it difficult or expensive to obtain majority support for shareholder proposals or potential acquisition proposals.

Our long-term business strategy includes the continuation of growth plans, and our financial condition and results of operations could be affected if our long-term business strategies are not effectively executed.

Although our primary focus in the near term will be on strengthening our asset quality and organically growing our balance sheet, we intend, over the longer term, to continue pursuing a growth strategy for our business through acquisitions and de novo branching. Our prospects must be considered in light of the risks, expenses and difficulties occasionally encountered by financial services companies in growth stages, which may include the following:

- Maintaining loan quality;
- Maintaining adequate management personnel and information systems to oversee such growth; and,
- Maintaining adequate control and compliance functions.

Operating Results: There is no assurance that existing offices or future offices will maintain or achieve deposit levels, loan balances or other operating results necessary to avoid losses or produce profits. Our growth and de novo branching strategy necessarily entails growth in overhead expenses as it routinely adds new offices and staff. Our historical results may not be indicative of future results or results that may be achieved as we continue to increase the number and concentration of our branch offices.

Development of Offices: There are considerable costs involved in opening branches, and new branches generally do not generate sufficient revenues to offset their costs until they have been in operation for at least a year or more. Accordingly, our de novo branches may be expected to negatively impact our earnings during this period of time until the branches reach certain economies of scale.

Expansion into New Markets: Much of our growth over the last three years has been focused in the highly competitive Nashville, Knoxville and Clarksville metropolitan markets. The customer demographics and financial services offerings in these markets are unlike those found in the East Tennessee markets that we have historically served. In the Nashville, Knoxville and Clarksville markets, we face competition from a wide array of financial institutions. Our expansion into these new markets may be impacted if we are unable to meet customer demands or compete effectively with the financial institutions operating in these markets.

Regulatory and Economic Factors: Our growth and expansion plans may be adversely affected by a number of regulatory and economic developments or other events. Failure to obtain required regulatory approvals, changes in laws and regulations or other regulatory developments and changes in prevailing economic conditions or other unanticipated events may prevent or adversely affect our continued growth and expansion.

Failure to successfully address the issues identified above could have a material adverse effect on our business, future prospects, financial condition or results of operations, and could adversely affect our ability to successfully implement our longer term business strategy.

We may face risks with respect to future expansion.

From time to time we may engage in additional de novo branch expansion as well as the acquisition of other financial institutions or parts of those institutions. We may also consider and enter into new lines of business or offer new products or services. Acquisitions and mergers involve a number of risks, including:

- the time and costs associated with identifying and evaluating potential acquisitions and merger partners;
- inaccuracies in the estimates and judgments used to evaluate credit, operations, management and market risks with respect to the target institution;
- the time and costs of evaluating new markets, hiring experienced local management and opening new offices, and the time lags between these activities and the generation of sufficient assets and deposits to support the costs of the expansion;
- our ability to finance an acquisition and possible dilution to our existing shareholders;
- the diversion of our management's attention to the negotiation of a transaction, and the integration of the operations and personnel of the combining businesses;
- entry into new markets where we lack experience;
- the introduction of new products and services into our business;
- the incurrence and possible impairment of goodwill associated with an acquisition and possible adverse short-term effects on our results of operations; and
- the risk of loss of key employees and customers.

We may incur substantial costs to expand. There can be no assurance that integration efforts for any future mergers or acquisitions will be successful. Also, we may issue equity securities, including common stock and securities convertible into shares of our common stock in connection with future acquisitions, which could cause ownership and economic dilution to our shareholders. There is no assurance that, following any future mergers or acquisitions, our integration efforts will be successful or we, after giving effect to the acquisition, will achieve profits comparable to or better than our historical experience.

We are subject to Tennessee anti-takeover statutes and certain charter provisions which could decrease our chances of being acquired even if the acquisition is in our shareholders' best interests.

As a Tennessee corporation, we are subject to various legislative acts which impose restrictions on and require compliance with procedures designed to protect shareholders against unfair or coercive mergers and acquisitions. These statutes may delay or prevent offers to acquire us and increase the difficulty of consummating any such offers, even if the acquisition of us would be in our shareholders' best interests. Our amended and restated charter also contains provisions which may make it difficult for another entity to acquire us without the approval of a majority of the disinterested directors on our board of directors.

The success and growth of our business will depend on our ability to adapt to technological changes.

The banking industry and the ability to deliver financial services is becoming more dependent on technological advancement, such as the ability to process loan applications over the Internet, accept electronic signatures, provide process status updates instantly and on-line banking capabilities and other customer expected conveniences that are cost efficient to our business processes. As these technologies are improved in the future, we may, in order to remain competitive, be required to make significant capital expenditures.

Even though our common stock is currently traded on The Nasdaq Global Select Market, the trading volume in our common stock has been thin and the sale of substantial amounts of our common stock in the public market could depress the price of our common stock.

We cannot say with any certainty when a more active and liquid trading market for our common stock will develop or be sustained. Because of this, our shareholders may not be able to sell their shares at the volumes, prices, or times that they desire.

We cannot predict the effect, if any, that future sales of our common stock in the market, or availability of shares of our common stock for sale in the market, will have on the market price of our common stock. We, therefore, can give no assurance that sales of substantial amounts of our common stock in the market, or the potential for large amounts of sales in the market, would not cause the price of our common stock to decline or impair our ability to raise capital through sales of our common stock.

The market price of our common stock may fluctuate in the future, and these fluctuations may be unrelated to our performance. General market price declines or overall market volatility in the future could adversely affect the price of our common stock, and the current market price may not be indicative of future market prices.

If our stock price continues to trade at a level below book value of the organization, we would evaluate our goodwill balances for impairment, and if the value of our business has declined, we could recognize an impairment charge for our goodwill.

We performed an annual goodwill impairment assessment as of December 31, 2008. Based on our analyses, we concluded that the fair value of our reporting unit exceeded our current book value. It is possible that our assumptions and conclusions regarding the valuation of our business could change adversely, which could result in the recognition of impairment for our goodwill. Although any non-cash charges associated with goodwill impairment would impact reported earnings, there would be no impact on the risk based capital ratios of the Company.

We may issue additional common stock or other equity securities in the future which could dilute the ownership interest of existing common shareholders.

In order to maintain our capital at desired levels or required regulatory levels, or to fund future growth, our board of directors may decide from time to time to issue additional shares of common stock, preferred stock

or securities convertible into, exchangeable for or representing rights to acquire shares of our common stock. The sale of these shares may significantly dilute our shareholders ownership interest as a shareholder and the per share book value of our common stock. New investors in the future may also have rights, preferences and privileges senior to our current shareholders which may adversely impact our current shareholders.

Our ability to declare and pay dividends is limited by law and by the terms of the Series A preferred stock and we may be unable to pay future dividends.

We derive our income solely from dividends on the shares of common stock of the Bank. The Bank's ability to declare and pay dividends is limited by its obligations to maintain sufficient capital and by other general restrictions on its dividends that are applicable to banks that are regulated by the FDIC and the Tennessee Department of Financial Institutions. In addition, the FRB and the terms of the Series A preferred stock may impose restrictions on our ability to pay dividends on our common stock. As a result, we cannot assure our shareholders that we will declare or pay dividends on shares of our common stock in the future.

Holders of our junior subordinated debentures have rights that are senior to those of our common and Series A preferred shareholders.

We have supported our continued growth through the issuance of trust preferred securities from special purpose trusts and accompanying junior subordinated debentures. At December 31, 2008, we had outstanding trust preferred securities and accompanying junior subordinated debentures totaling \$88.7 million. Payments of the principal and interest on the trust preferred securities of these trusts are conditionally guaranteed by us. Further, the accompanying junior subordinated debentures we issued to the trusts are senior to our shares of common stock and the Series A preferred stock. As a result, we must make payments on the junior subordinated debentures before any dividends can be paid on our common stock or the Series A preferred stock and, in the event of our bankruptcy, dissolution or liquidation, the holders of the junior subordinated debentures must be satisfied before any distributions can be made on our common stock or Series A preferred stock. We have the right to defer distributions on our junior subordinated debentures (and the related trust preferred securities) for up to five years, during which time no dividends may be paid on our common stock or our Series A preferred stock.

The Series A preferred stock impacts net income available to our common shareholders and our earnings per share.

As long as shares of our Series A preferred stock are outstanding, no dividends may be paid on our common stock unless all dividends on the Series A preferred stock have been paid in full. Additionally, for so long as the U.S. Treasury owns shares of the Series A preferred stock, we are not permitted to pay cash dividends on our common stock in excess of \$0.13 per quarter without the U.S. Treasury's consent. The dividends declared on shares of our Series A preferred stock will reduce the net income available to common shareholders and our earnings per common share. Additionally, warrants to purchase our common stock issued to the U.S. Treasury, in conjunction with the issuance of the Series A preferred stock, may be dilutive to our earnings per share. The shares of our Series A preferred stock will also receive preferential treatment in the event of our liquidation, dissolution or winding up.

Holders of the Series A preferred stock have rights that are senior to those of our common shareholders.

The Series A preferred stock that we have issued to the U.S. Treasury is senior to our shares of common stock, and holders of the Series A preferred stock have certain rights and preferences that are senior to holders of our common stock. The Series A preferred stock will rank senior to our common stock and all other equity securities of ours designated as ranking junior to the Series A preferred stock. So long as any shares of the Series A preferred stock remain outstanding, unless all accrued and unpaid dividends on shares of the Series A preferred stock for all prior dividend periods have been paid or are contemporaneously declared and paid in full, no dividend whatsoever shall be paid or declared on our common stock or other junior stock, other than a dividend payable solely in common stock. We and our subsidiaries also may not purchase, redeem or otherwise acquire for consideration any shares of our common stock or other junior stock unless we have paid in full all accrued dividends on the Series A preferred stock for all prior dividend periods, other than in certain circumstances. Furthermore, the Series A preferred stock is entitled to a liquidation preference over shares of our common stock in the event of our liquidation, dissolution or winding up.

Holders of the Series A preferred stock may, under certain circumstances, have the right to elect two directors to our board of directors.

In the event that we fail to pay dividends on the Series A preferred stock for an aggregate of six quarterly dividend periods or more (whether or not consecutive), the authorized number of directors then constituting our board of directors will be increased by two. Holders of the Series A preferred stock, together with the holders of any outstanding parity stock with like voting rights, referred to as voting parity stock, voting as a single class, will be entitled to elect the two additional members of our board of directors, referred to as the preferred stock directors, at the next annual meeting (or at a special meeting called for the purpose of electing the preferred stock directors prior to the next annual meeting) and at each subsequent annual meeting until all accrued and unpaid dividends for all past dividend periods have been paid in full.

Holders of the Series A preferred stock have limited voting rights.

Except as otherwise required by law and in connection with the election of directors to our board of directors in the event that we fail to pay dividends on the Series A preferred stock for an aggregate of at least six quarterly dividend periods (whether or not consecutive), holders of the Series A preferred stock have limited voting rights. So long as shares of the Series A preferred stock are outstanding, in addition to any other vote or consent of shareholders required by law or our amended and restated charter, the vote or consent of holders owning at least 66 2/3% of the shares of Series A preferred stock outstanding is required for (1) any authorization or issuance of shares ranking senior to the Series A preferred stock; (2) any amendment to the rights of the Series A preferred stock so as to adversely affect the rights, preferences, privileges or voting power of the Series A preferred stock; or (3) consummation of any merger, share exchange or similar transaction unless the shares of Series A preferred stock remain outstanding, or if we are not the surviving entity in such transaction, are converted into or exchanged for preference securities of the surviving entity and the shares of Series A preferred stock remaining outstanding or such preference securities have such rights, preferences, privileges and voting power as are not materially less favorable to the holders than the rights, preferences, privileges and voting power of the shares of Series A preferred stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

At December 31, 2008, the Company maintained a main office in Greeneville, Tennessee in a building it owns, 65 full-service bank branches (of which 54 are owned premises and 11 are leased premises) and a building for mortgage lending operations which it owns. In addition, the Bank's subsidiaries operate from nine separate locations, all of which are leased.

ITEM 3. LEGAL PROCEEDINGS.

The Company and its subsidiaries are subject to claims and suits arising in the ordinary course of business. In the opinion of management, the ultimate resolution of these pending claims and legal proceedings will not have a material adverse effect on the Company's results of operations.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

- (a) A special meeting of shareholders (the "Special Meeting") of the Company was held on December 19, 2008. The meeting was held to amend the charter of the Company to authorize a class of blank check preferred stock, consisting of one million (1,000,000) authorized shares.
- (c) The following sets forth the results of voting on each matter at the Special Meeting:

Proposal 1 – Amendment to Charter

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

On March 12, 2009, Green Bankshares had 13,176,681 shares of common stock outstanding. The Company's shares are traded on The Nasdaq Global Select Market, under the symbol "GRNB". As of March 12, 2009, the Company estimates that it had approximately 5,500 shareholders, including approximately 2,600 shareholders of record and approximately 2,900 beneficial owners holding shares in nominee or "street" name.

The following table shows the high and low sales price and closing price for the Company's common stock as reported by The Nasdaq Global Select Market for 2008 and 2007. The table also sets forth the dividends per share paid each quarter during 2008 and 2007.

	High/Low Sales Price <u>During Quarter</u>	Closing <u>Price</u>	Dividends Paid <u>Per Share</u>
2008:			
First quarter	\$22.36 / 15.18	\$17.53	\$0.13
Second quarter	21.98 / 13.89	13.89	0.13
Third quarter	25.17 / 11.85	23.29	0.13
Fourth quarter	24.61 / 13.20	13.54	<u>0.13</u>
			<u>\$0.52</u>
2007:			
First quarter	\$40.50 / 32.83	\$33.91	\$0.13
Second quarter	35.86 / 31.19	31.26	0.13
Third quarter	38.63 / 29.84	36.45	0.13
Fourth quarter	37.49 / 16.76	19.20	<u>0.29</u>
			<u>\$0.68</u>

Holders of the Company's common stock are entitled to receive dividends when, as and if declared by the Company's board of directors out of funds legally available for dividends. Historically, the Company has paid quarterly cash dividends on its common stock, and its board of directors presently intends to continue to pay regular quarterly cash dividends. The Company's ability to pay dividends to its shareholders in the future will depend on its earnings and financial condition, liquidity and capital requirements, the general economic and regulatory climate, the Company's ability to service any equity or debt obligations senior to its common stock, including its outstanding trust preferred securities and accompanying junior subordinated debentures, and other factors deemed relevant by the Company's board of directors. In order to pay dividends to shareholders, the Company must receive cash dividends from the Bank. As a result, the Company's ability to pay future dividends will depend upon the earnings of the Bank, its financial condition and its need for funds.

Moreover, there are a number of federal and state banking policies and regulations that restrict the Bank's ability to pay dividends to the Company and the Company's ability to pay dividends to its shareholders. In particular, because the Bank is a depository institution and its deposits are insured by the FDIC, it may not pay dividends or distribute capital assets if it is in default on any assessment due to the FDIC. In addition, the Tennessee Banking Act prohibits the Bank from declaring dividends in excess of net income for the calendar year in which the dividend is declared plus retained net income for the preceding two years without the approval of the Commissioner of the Tennessee Department of Financial Institutions. Also, the Bank is subject to regulations which impose certain minimum regulatory capital and minimum state law earnings requirements that affect the amount of cash available for distribution to the Company. In addition, as long as shares of Series A preferred stock are outstanding, no dividends may be paid on our common stock unless all dividends on the Series A preferred stock have been paid in full and in no event may dividends on our common stock exceed \$0.13 per quarter without the consent of the U.S. Treasury for the first three years following our sale of Series A preferred stock to the U.S. Treasury. Lastly, under Federal Reserve policy, the Company is required to maintain adequate regulatory capital, is expected to serve as a source of financial strength to the Bank and to commit resources to support the Bank. These policies and regulations may have the effect of reducing or eliminating the amount of dividends that the Company can declare and pay to its shareholders in the future. For information regarding restrictions on the payment of dividends by the Bank to the Company, see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources" in this Annual Report. See also Note 12 of Notes to Consolidated Financial Statements.

The Company made no repurchases of its common stock during the quarter ended December 31, 2008.

¹ Information for the 2007 fiscal year includes the operations of CVBG, with which the Company merged on May 18, 2007.

² Common shareholders' equity is shareholders' equity less preferred stock and common stock warrants.

³ Tangible common shareholders' equity is shareholders' equity less goodwill, intangible assets and preferred stock and common stock warrants.

⁴ Tangible shareholders' equity is shareholders' equity less goodwill and intangible assets.

⁵ Tangible assets is total assets less goodwill and intangible assets.

⁶ Net interest margin is the net yield on interest earning assets and is the difference between the Fully Taxable Equivalent yield earned on interest-earning assets less the effective cost of supporting liabilities.

GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures

Certain financial information included in the selected financial data is determined by methods other than in accordance with accounting principles generally accepted within the United States (“GAAP”). These non-GAAP financial measures are “tangible book value per share,” “tangible common shareholders’ equity,” and “return on average common tangible equity.” The Company’s management, the entire financial services sector, bank stock analysts, and bank regulators use these non-GAAP measures in their analysis of the Company’s performance.

- “Tangible book value per share” is defined as total equity reduced by recorded goodwill, other intangible assets, preferred stock and common stock warrants divided by total common shares outstanding. This measure discloses changes from period-to-period in book value per share exclusive of changes in intangible assets and preferred stock. Goodwill, an intangible asset that is recorded in a purchase business combination, has the effect of increasing total book value while not increasing the tangible assets of a company. For companies such as the Company that have engaged in business combinations, purchase accounting can result in the recording of significant amounts of goodwill related to such transactions.
- “Tangible common shareholders’ equity” is shareholders’ equity less goodwill, other intangible assets, preferred stock and common stock warrants.
- “Return on average common tangible equity” is defined as earnings for the period divided by average equity reduced by average goodwill, other intangible assets, preferred stock and common stock warrants.

These disclosures should not be viewed as a substitute for results determined in accordance with GAAP, and are not necessarily comparable to non-GAAP performance measures which may be presented by other companies. The following reconciliation table provides a more detailed analysis of these non-GAAP performance measures:

	At and for the Fiscal Years Ended December 31,				
	2008	2007	2006	2005	2004
Common book value per share.....	\$ 23.56	\$ 24.94	\$18.80	\$17.20	\$14.22
Effect of intangible assets.....	\$ (11.86)	\$(12.21)	\$(3.93)	\$(4.05)	\$(3.10)
Tangible book value per share.....	\$ 11.70	\$ 12.73	\$14.87	\$13.15	\$11.12
Return on average common equity.....	(1.65%)	8.96%	11.91%	11.09%	11.23%
Effect of intangible assets.....	(1.49%)	6.45%	3.34%	2.95%	2.72%
Return on average common tangible equity.....	(3.14%)	15.41%	15.25%	14.04%	13.95%

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

The Company reported a net loss available to common shareholders of \$5,452 for the full year 2008 compared with net income of \$24,374 for the same period last year. The loss for the year 2008 was primarily attributable to the significant weaknesses in the economy surfacing during the fourth quarter of 2007 and escalating throughout 2008, which were manifested primarily in the Company's residential real estate construction and development portfolio. As a result, the Company's provision for loan losses for the full year 2008 amounted to \$52,810 compared with a loan loss provision of \$14,483 in 2007. Additionally, Other Real Estate Owned charges totaled \$7,028 for 2008 compared with a net recovery of \$76 in 2007. Net loan charge-offs rose to \$38,110 in 2008 from \$11,696 in 2007. On a diluted per share basis, the net loss was \$0.42 for 2008 compared with earnings of \$2.07 for the same period a year ago.

Net interest income for 2008 totaled \$95,025 including the impact of interest reversals of 2,024, a modest improvement over the same period a year ago. The increase in net interest income was due to the impact of an increase in average earning assets, primarily loans and investment securities, stemming from the CVBG acquisition in the second quarter of 2007. The Company experienced a contraction throughout 2008 in the net interest margin moving from 4.25% in 2007 to 3.70% in 2008. This contraction was principally a result of the actions undertaken by the Federal Open Market Committee ("FOMC") during the year to significantly reduce market interest rates to historically low levels. Noninterest income grew by \$6,012, or 22%, and totaled \$33,614 for 2008. Included in non-interest income during 2008 were net securities gains of \$2,661 versus net securities losses of \$41 for 2007. The continued success of a deposit account gathering program also contributed approximately \$4,007 to this improvement. Noninterest expenses totaled \$85,837 for the year, up \$16,585 from the prior year driven principally by higher losses on Other Real Estate Owned as the recession's impact was realized through increased foreclosures plus the normal incremental operating costs associated with the CVBG acquisition completed in May 2007.

Critical Accounting Policies and Estimates

The Company's consolidated financial statements and accompanying notes have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported periods.

Management continually evaluates the Company's accounting policies and estimates it uses to prepare the consolidated financial statements. In general, management's estimates are based on current and projected economic conditions, historical experience, information from regulators and third party professionals and various assumptions that are believed to be reasonable under the then existing set of facts and circumstances. Actual results could differ from those estimates made by management.

The Company believes its critical accounting policies and estimates include the valuation of the allowance for loan losses and the fair value of financial instruments and other accounts. Based on management's calculation, an allowance of \$48,811, or 2.20%, of total loans, net of unearned interest was an adequate estimate of losses inherent in the loan portfolio as of December 31, 2008. This estimate resulted in a provision for loan losses on the income statement of \$52,810 during 2008. If the mix and amount of future charge-off percentages differ significantly from those assumptions used by management in making its determination, the allowance for loan losses and provision for loan losses on the income statement could be materially affected. For further discussion of the allowance for loan losses and a detailed description of the methodology management uses in determining the adequacy of the allowance, see "ITEM 1. Business – Lending Activities – Allowance for Loan Losses" located above, and "Changes in Results of Operations – Provision for Loan Losses" located below.

The consolidated financial statements include certain accounting and disclosures that require management to make estimates about fair values. Estimates of fair value are used in the accounting for securities available for sale, loans held for sale, goodwill, other intangible assets, and acquisition purchase accounting adjustments. Estimates of fair values are used in disclosures regarding securities held to maturity, stock

compensation, commitments, and the fair values of financial instruments. Fair values are estimated using relevant market information and other assumptions such as interest rates, credit risk, prepayments and other factors. The fair values of financial instruments are subject to change as influenced by market conditions.

In conjunction with significant acquisitions, the Company engages a third party to assist in the valuation of financial assets acquired and liabilities assumed. Annually thereafter, the goodwill and intangible assets are evaluated for impairment. An impairment loss is recognized to the extent that the carrying value exceeds the asset's fair value. The impairment analysis is a two step process. First, a comparison of the reporting unit's estimated fair value is compared to its carrying value, including goodwill and if the estimated fair value of the reporting unit exceeds its carrying value, goodwill is deemed to be non-impaired. If the first step is not successfully achieved, a second step involving the calculation of an implied fair value, as determined in a manner similar to the amount of the goodwill calculated in a business combination is conducted. This second step process involves the measurement of the excess of the estimated fair value over the aggregate estimated fair value as if the reporting unit was being acquired in a business combination. Historically, the stock price of the Company has exceeded the Company's book value. However, the sharp downturn in general economic conditions and its effect on the housing industry coupled with the unusual short sale trading activity and share price volatility in the Company's stock price negatively impacted the Company's stock price throughout 2008. This activity culminated with the short sale activity, as reported by NASDAQ, registering 24% at year-end 2008 of our total share volume outstanding. The closing market value of our stock, as reported on NASDAQ, was \$13.54 per share compared with our book value per share of \$23.56. We engaged two independent third parties to assist management in its analysis of potential impairment of goodwill, given the differences between the market value per share and the book value per share. Management provided what it felt like were conservative assumptions in regards to short-term earning asset growth and return on average assets. These assumptions projected contraction of earning assets through 2009 with moderate growth beginning in mid 2010. Growth projections for 2011 forward were increased but still remained below historical average growth levels. Return on average assets assumptions did not have the Company reaching the bottom of the historical earnings range until 2014. The assumptions used also assumed that dividends would be held constant with 2008 levels throughout the projection period and that TARP funds would be repaid at the end of 2013. Both independent third parties reported, after completing their various analyses, that the implied value of the enterprise exceeded the book value of the enterprise. Management reviewed each separate report and also concluded that no indications of impairment were present at December 31, 2008.

Changes in Results of Operations

Net income/loss. The net loss available to common shareholders' for 2008 was \$5,452 compared to record net income of \$24,374 for 2007. The net loss is primarily attributable to an increase in provision for loan losses of \$38,327 to \$52,810 in 2008 from \$14,483 in 2007 from continued deteriorating economic conditions throughout 2008 impacting residential real estate construction lending. Also negatively impacting net income was an increase in noninterest expense of \$16,585 to \$85,837 in 2008 from \$69,252 in 2007. The increase in noninterest expense resulted primarily from a full year of normal operating expenses throughout 2008 associated with the CVBG acquisition in May of 2007 and increased levels of expenses associated with the repossession of assets and losses on the sale of repossessed assets totaling \$7,028. Offsetting, in part, these negative effects on net income was an increase in total noninterest income of \$6,012 to \$33,614 in 2008 from \$27,602 in 2007. The increase in noninterest income can be primarily attributed to higher fee income associated with the continued development of the Company's High Performance Checking Account product as well as gains on sale of securities.

Net income for 2007 was \$24,374, an increase of \$3,112, or 15%, compared to net income of \$21,262 for 2006. The increase is primarily attributable to an increase in net interest income of \$22,696, or 32%, to \$94,653 in 2007 from \$71,957 in 2006 and resulted principally from higher average balances of loans from the CVBG acquisition in the second quarter of 2007 and continued organic loan growth during 2007. In addition, total noninterest income increased by \$6,900, or 33%, to \$27,678 in 2007 from \$20,778 in 2006. The increase in noninterest income can be primarily attributed to higher fee income associated with further development of the Company's High Performance Checking Account product. Offsetting, in part, these positive effects on net income was an increase in the loan loss provision of \$8,976 over 2006 levels due to deteriorating economic conditions impacting residential real estate construction lending during the fourth quarter of 2007 and an increase in noninterest expense of \$16,552, or 31%, to \$69,328 in 2007 from \$52,776 in 2006. The increase in noninterest expense resulted primarily from the Company's CVBG acquisition in the second quarter of 2007.

Net Interest Income. The largest source of earnings for the Company is net interest income, which is the difference between interest income on earning assets and interest paid on deposits and other interest-bearing liabilities. The primary factors that affect net interest income are changes in volumes and rates on earning assets and interest-bearing liabilities, which are affected in part by management's anticipatory responses to changes in interest rates through asset/liability management. During 2008, net interest income was \$95,025 as compared to \$94,653 in 2007. The Company experienced growth in average balances of interest-earning assets, with average total interest-earning assets increasing by \$350,743, or 16%, to \$2,590,189 in 2008 from \$2,239,446 in 2007. Most of the growth occurred in loans, with average loan balances increasing by \$239,186, or 12%, to \$2,298,905 in 2008 from \$2,059,719 in 2007. Average investment securities also increased \$94,670, or 53%, to \$273,343 in 2008 from \$178,673 in 2007. Both of these increases are principally attributable to the CVBG acquisition that took place in the second quarter of 2007. Average balances of total interest-bearing liabilities also increased in 2008 from 2007, with average total interest-bearing deposit balances increasing by \$356,847, or 22%, to \$1,962,998 in 2008 from \$1,606,151 in 2007, average securities sold under repurchase agreements and short-term borrowings, subordinated debentures and FHLB advances and notes payable increased by \$45,673, or 11%, to \$449,125 in 2008 from \$403,452 in 2007. These increases are primarily related the Company's CVBG acquisition which closed May 18, 2007 and in which the Company acquired approximately \$631,000 in loans, \$200,000 in investment securities, \$699,000 in deposits and \$145,000 in securities sold under repurchase agreements and short-term borrowings, subordinated debentures and FHLB advances and notes payable. These balances had a full year effect on average balances of interest-earning assets and interest-bearing liabilities for 2008.

During 2007, net interest income was \$94,653 as compared to \$71,957 in 2006, an increase of 32%. The Company experienced solid growth in average balances of interest-earning assets, with average total interest-earning assets increasing by \$730,979, or 48%, to \$2,239,446 in 2007 from \$1,508,467 in 2006. Most of the growth occurred in loans, with average loan balances increasing by \$609,203, or 42%, to \$2,059,719 in 2007 from \$1,450,516 in 2006. Average investment securities also increased \$123,521, or 224%, to \$178,673 in 2007 from \$55,152 in 2006. Both of these increases are attributable to the CVBG acquisition that took place in the second quarter of 2007. Average balances of total interest-bearing liabilities also increased in 2007 from 2006, with average total interest-bearing deposit balances increasing by \$471,460, or 42%, to \$1,606,151 in 2007 from \$1,134,691 in 2006, average securities sold under repurchase agreements and short-term borrowings, subordinated debentures and FHLB advances and notes payable increased by \$226,810, or 128%, to \$403,452 in 2007 from \$176,642 in 2006. These increases are primarily related the Company's CVBG acquisition which closed May 18, 2007 and in which the Company acquired approximately \$631,000 in loans, \$200,000 in investment securities, \$699,000 in deposits and \$145,000 in securities sold under repurchase agreements and short-term borrowings, subordinated debentures and FHLB advances and notes payable. These balances had approximately a seven and one-half month effect on full year average balances of interest-earning assets and interest-bearing liabilities.

Average Balances, Interest Rates and Yields. Net interest income is affected by (i) the difference between yields earned on interest-earning assets and rates paid on interest-bearing liabilities ("interest rate spread") and (ii) the relative amounts of interest-earning assets and interest-bearing liabilities. The Company's interest rate spread is affected by regulatory, economic and competitive factors that influence interest rates, loan demand and deposit flows. When the total of interest-earning assets approximates or exceeds the total of interest-bearing liabilities, any positive interest rate spread will generate net interest income. An indication of the effectiveness of an institution's net interest income management is its "net yield on interest-earning assets," which is net interest income on a fully taxable equivalent basis divided by average interest-earning assets.

The following table sets forth certain information relating to the Company's consolidated average interest-earning assets and interest-bearing liabilities and reflects the average fully taxable equivalent yield on assets and average cost of liabilities for the periods indicated. Such yields and costs are derived by dividing income or expense by the average daily balance of assets or liabilities, respectively, for the periods presented.

¹ 2008 average loan balances exclude nonaccrual loans. 2007 and 2006 average loan balances include nonaccrual loans, as they were not material. Interest income collected on nonaccrual loans has been included.

² Installment loans are stated net of unearned income.

³ The average balance of and the related yield associated with securities available for sale are based on the cost of such securities.

⁴ Fully Taxable Equivalent ("FTE") at the rate of 35%. The FTE basis adjusts for the tax benefits of income on certain tax-exempt loans and investments using the federal statutory rate of 35% for each period presented. The Company believes this measure to be the preferred industry measurement of net interest income and provides relevant comparison between taxable and non-taxable amounts.

Rate/Volume Analysis. The following table analyzes net interest income in terms of changes in the volume of interest-earning assets and interest-bearing liabilities and changes in yields and rates. The table reflects the extent to which changes in the interest income and interest expense are attributable to changes in volume (changes in volume multiplied by prior year rate) and changes in rate (changes in rate multiplied by prior year volume). Changes attributable to the combined impact of volume and rate have been separately identified.

	2008 vs. 2007				2007 vs. 2006

At December 31, 2008, loans outstanding, net of unearned income, were \$2,223,390 compared to 2,356,376 at 2007 year end. The decrease is primarily due to the down turn in economic conditions throughout 2008 that resulted in lower loan demand, a higher level of repossessed assets and increased loan charge-offs. Average outstanding loans, net of unearned interest, for 2008 were \$2,298,905 an increase of 12% from the 2007 average of \$2,059,719. Average outstanding loans for 2006 were \$1,450,516. The growth in average loans over the past three years can be attributed to the Company's continued market expansion through the organic growth resulting from the increased number of branch locations accompanied by the acquisition of branches in the Clarksville, Tennessee market along with the CVBG acquisition.

Average investment securities for 2008 were \$273,343 compared to \$178,673 in 2007 and \$55,152 in 2006. The increase of \$94,670, or 53%, from 2007 to 2008 primarily reflects the full year effect in 2008 of the investment securities acquired in the Company's CVBG acquisition and the impact of reduced loan demand in 2008 compared to 2007. The increase of \$123,521, or 224%, from 2006 to 2007 primarily reflects the investment securities acquired in the CVBG acquisition. In 2008, the average yield on investments was 5.64%, a decrease from the 5.80% yield in 2007 and an increase from the 5.05% yield in 2006. The decrease in investment yield in 2008 compared to 2007 primarily reflects the lower market rate environment as maturing securities were re-invested in lower yielding securities. Fully taxable equivalent income provided by the investment portfolio in 2008 was \$15,412 as compared to \$10,366 in 2007 and \$2,784 in 2006.

Provision for Loan Losses. Management assesses the adequacy of the allowance for loan losses by considering a combination of regulatory and credit risk criteria. The entire loan portfolio is graded and potential loss factors are assigned accordingly. The potential loss factors for impaired loans are assigned based on independent valuations of underlying collateral and management's judgment. The potential loss factors associated with unimpaired loans are based on a combination of both internal and industry net loss experience, as well as management's review of trends within the portfolio and related industries.

Generally, commercial real estate, residential real estate and commercial loans are assigned a level of risk at inception. Thereafter, these loans are reviewed on an ongoing basis. The review includes loan payment and collateral status, borrowers' financial data and borrowers' internal operating factors such as cash flows, operating income, liquidity, leverage and loan documentation, and any significant change can result in an increase or decrease in the loan's assigned risk grade. Aggregate dollar volume by risk grade is monitored on an ongoing basis. The establishment of and any changes to risk grades for consumer loans are generally based upon payment performance.

The Bank's loan loss allowance is increased or decreased based on management's assessment of the overall risk of its loan portfolio. Occasionally, a portion of the allowance may be allocated to a specific loan to reflect unusual circumstances associated with that loan.

Management reviews certain key loan quality indicators on a monthly basis, including current economic conditions, historical charge-offs, delinquency trends and ratios, portfolio mix changes and other information management deems necessary. This review process provides a degree of objective measurement that is used in conjunction with periodic internal evaluations. To the extent that this process yields differences between estimated and actual observed losses, adjustments are made to provisions and/or the level of the allowance for loan losses.

Increases and decreases in the allowance for loan losses due to changes in the measurement of impaired loans are reflected in the provision for loan losses. Loans continue to be classified as impaired unless payments are brought fully current and satisfactory performance is observed for a period of at least six months and management further considers the collection of scheduled interest and principal to be probable.

The Company's provision for loan losses increased \$38,327 to \$52,810 in 2008 from \$14,483 in 2007. During 2008 the loss experience increased due to rapidly deteriorating economic conditions during this recessionary period and resulting credit quality concerns in residential real estate construction and development loans primarily located in the Nashville and Knoxville markets. In 2008, net charge-offs in the Bank, Superior Financial and GCB Acceptance were \$35,563, \$631 and \$1,916, respectively, totaling \$38,110. In 2007, these net charge-offs were \$10,193, \$172 and \$1,331, respectively, totaling \$11,696. Management attributes the increase in net charge-offs to continued enforcement of underwriting policies and management controls in a recessionary economy. These controls, along with the loan review process, identified weakness developing in the residential real estate construction portfolio during the year and led to actions taken to identify charge-offs and further potential weaknesses. Management continually evaluates the existing portfolio in light of loan concentrations, current general economic conditions and economic trends. Management believes these evaluations strongly suggest an economic slowdown in the Company's markets occurred throughout 2008 and most likely will continue throughout 2009. Based on its evaluation of the allowance for loan loss calculation and review of the loan portfolio, management believes the allowance for loan losses is adequate at December 31, 2008. However, the provision for loan losses could further increase throughout 2009 if the general economic conditions continue to weaken or the residential real estate markets in Nashville or Knoxville or the financial conditions of borrowers deteriorate beyond management's current expectations.

The ratio of nonperforming assets to total assets was 2.61% at December 31, 2008 and 1.25% at December 31, 2007 reflecting the economic downturn in 2008. The ratio of the Company's allowance for loan losses to nonperforming loans increased in 2008 to 155.28% from 106.34% in 2007. Total nonperforming loans decreased \$643 to \$31,435 at December 31, 2008 from \$32,078 at December 31, 2007 reflecting the increase in loan charge-offs and Other Real Estate Owned ("OREO"). Nonaccrual loans, included in non-performing loans, decreased \$1,134 to \$30,926 at December 31, 2008 from \$32,060 at December 31, 2007. Further reflecting the economic downturn, OREO and repossessed assets increased from \$4,859 at the end of 2007 to \$45,371 at year-end 2008. Management believes that these assets are adequately secured and does not anticipate any material losses, based on current economic conditions. Total impaired loans, which include substandard loans as well as nonaccrual loans, increased by \$10,948 from \$36,267 at December 31, 2007 to \$47,215 at December 31, 2008. The Company records a risk allocation allowance for loan losses on all loans in this category; further, the

Company specifically records additional allowance amounts for individual loans when the circumstances so warrant. For further discussion of nonperforming assets as it relates to foreclosed real estate and impaired loans, see "ITEM 1. Business – Lending Activities – Past Due, Special Mention, Classified and Nonaccrual Loans" located above.

To further manage its credit risk on loans, the Company maintains a "watch list" of loans that, although currently performing, have characteristics that require closer supervision by management. At December 31, 2008, the Company had indentified, due to current deteriorating economic conditions in its markets, approximately \$182,984 in loans that were placed on its "watch list" compared to \$91,832 as of December 31, 2007. If, and when, conditions are identified that would require additional loan loss reserves to be established due to potential losses inherent in these loans, action would then be taken.

Noninterest Income. The generation of noninterest income, which is income that is not related to interest-earning assets and consists primarily of service charges, commissions and fees, has become more important as increases in levels of interest-bearing deposits and other liabilities continually challenge interest rate spreads.

Total noninterest income for 2008 increased to \$33,614 as compared to \$27,602 in 2007 and \$20,710 in 2006. The largest components of noninterest income are service charges on deposit accounts, which totaled \$23,176 in 2008, \$19,169 in 2007 and \$13,217 in 2006. The increase in 2008 primarily reflects net securities gains of \$2,661 and the additional fees of \$4,007 generated from the higher volume of deposit-related products, especially fees associated with the continued success of the Bank's High Performance Checking Program. From the inception of this new product during the first quarter of 2005, the company experienced "net" new checking account growth of 7,665 in 2005, net new account growth of 12,465 and 14,510 in 2006 and 2007, respectively, and 7,919 in 2008.

Noninterest Expense. Control of noninterest expense also is an important aspect in managing net income. Noninterest expense includes, among other expenses, personnel, occupancy, write downs and net losses from the sales on OREO and expenses such as data processing, printing and supplies, legal and professional fees, postage and FDIC assessments. Total noninterest expense was \$85,837 in 2008 compared to \$69,252 in 2007 and \$52,708 in 2006. The increase of \$16,585, or 24%, in 2008 as compared to 2007 principally reflects increases in all functional expense categories primarily as a result of a full year of the normal ongoing operating cost associated with the CVBG acquisition during the second quarter of 2007, as well as increased expenses of \$7,028 associated with loss of sale of OREO and repossessed assets. FDIC assessments increased to \$1,631 in 2008, up from \$213 in 2007, and the Company expects that its FDIC assessments for 2009 will increase significantly over 2008 levels. In addition, on February 27, 2009, the FDIC proposed amendments to the restoration plan for the Deposit Insurance Fund. This amendment proposes the imposition of a 20 basis point emergency special assessment on insured depository institutions as of June 30, 2009. The assessment is proposed to be collected on September 30, 2009. As of our filing date for this document, March 13, 2009, there were still discussions as to what the final rate will be. This special assessment if implemented as proposed will have a significant impact on the results of operations of the Company for 2009.

Employee compensation and employee benefit costs are the primary element of the Company's noninterest expenses. For the years ended December 31, 2008 and 2007, compensation and benefits represented \$38,403, or 45%, and \$35,491, or 51%, respectively, of total noninterest expense. This was an increase of \$2,912, or 8% in 2008. Including Bank branches and non-Bank office locations, the Company had 75 locations at December 31, 2008 compared to 76 at December 31, 2007, and the number of full-time equivalent employees decreased 7% from 789 at December 31, 2007 to 737 at December 31, 2008. This increase in personnel cost is primarily the result of a full year of personnel cost associated with the CVBG acquisition.

Income Taxes. The Company's effective income tax rate (benefit) was (46.4%) in 2008 compared to 36.7% in 2007 and 38.3% in 2006. The unusual tax benefit rate in the current year as compared to the tax rate in prior years is due primarily to the effect on the rate of tax exempt income on municipal securities and bank owned life insurance on top of the book loss of the Company.

Changes in Financial Condition

Total assets at December 31, 2008 were \$2,944,671, a decrease of \$3,070 from total assets of \$2,947,741 at December 31, 2007. Major changes in the balance sheet categories reflect a decline in loan balances of \$132,986 from the prior year comprised of loan charge-offs of \$38,110 and transfers to foreclosures of \$40,512 accompanied with the normal decline in lending associated with recessionary conditions in the economy. An increase of \$132,641 in cash and cash equivalents from year-end 2007 was driven principally by the issuance of \$72,278 of Series A preferred stock to the

U. S. Treasury on December 23, 2008 and the disposition of \$123,701 of securities during the fourth quarter of the year. Average assets for 2008 also increased to \$2,956,280, an increase of \$460,926, or 18%, from the average asset balance of \$2,495,354 for 2007. This increase in average assets was also due primarily to the CVBG acquisition in the second quarter of 2007. The Company's return on average assets was (0.18%) in 2008 and 0.98% in 2007 principally as a result of significantly higher credit costs in 2008 versus 2007.

Total assets at December 31, 2007 were \$2,947,741, an increase of \$1,175,087, or 66%, over total assets of \$1,772,654 at December 31, 2006. This increase reflects an increase in loans, net of unearned interest, of \$816,747, or 53%, to \$2,356,376 at December 31, 2007 from \$1,539,629 at December 31, 2006 and an increase in investment securities available for sale of \$197,533 to \$235,273 at December 31, 2007 from \$37,740 at December 31, 2006. The increase in loans and securities available for sale can be attributed to the Company's CVBG acquisition that took place in the second quarter of 2007. Average assets for 2007 also increased to \$2,495,354, an increase of \$838,576, or 51%, from the average asset balance of \$1,656,778 for 2007. This increase in average assets was also due primarily to the CVBG acquisition in the second quarter of 2007. The Company's return on average assets decreased in 2007 to 0.98% from 1.28% in 2006 as a result of significantly higher loan loss provision in 2007 versus 2006.

Earning assets consist of loans, investment securities and short-term investments that earn interest. Average earning assets during 2008 were \$2,590,189, an increase of 16% from an average of \$2,239,446 in 2007. The increase in average earnings assets is due primarily to the full year effect in 2008 for the CVBG acquisition that took place in the second quarter of 2007.

Nonperforming loans include nonaccrual loans and loans past due 90 days and still on accrual. The Company has a policy of placing loans 90 days delinquent in nonaccrual status and charging them off at 120 days past due. Other loans past due that are well secured and in the process of collection continue to be carried on the Company's balance sheet. For further information, see Note 1 of the Notes to Consolidated Financial Statements. The Company has aggressive collection practices in which senior management is significantly and directly involved.

Principally as a result of the Company's high loan to deposit ratio, the Company maintains an investment portfolio to primarily cover pledging requirements for deposits and borrowings and secondarily as a source of liquidity while modestly adding to earnings. Investments at December 31, 2008 had an amortized cost of \$205,310 and a market value of \$204,163 as compared to an amortized cost of \$234,098 and market value of \$236,553 at December 31, 2007. The decrease in available for sale securities from December 31, 2007 to December 31, 2008 is attributable to the sales of the Company's Mortgage Backed Securities portfolio in the fourth quarter of 2008 due to the risk assessment that this segment of the portfolio exposed the Company to a high level of potential default in 2009. The Company realized a \$2,661 net gain on this transaction. The Company invests principally in callable federal agency securities. These callable federal securities will provide a higher yield than non-callable securities with similar maturities. The primary risk involved in callable securities is that they may be called prior to maturity and the call proceeds received would be re-invested at lower yields. In 2008, the Company purchased \$100,583 of callable federal agency securities, which have a high likelihood of being called on the first call date, purchased \$55,175 of collateralized mortgage obligations, purchased \$4,712 of mortgage-backed securities and purchased \$20,156 of U.S. Treasury bills. Also in 2008, the Company received \$22,506 from the pay down of SBA and mortgage-backed securities, received \$63,842 on the maturity of various U.S. agency securities, received \$2,413 from the maturity or call of municipal securities held to maturity and received \$110 from the call of trust preferred securities. The Company sold \$120,565 of mortgage-backed securities in 2008.

The Company's deposits totaled \$2,184,147 at December 31, 2008, which represents an increase of \$197,354, or 10%, from \$1,986,793 at December 31, 2007. Noninterest bearing demand deposit balances decreased 12% to \$176,685 at December 31, 2008 from \$201,289 at December 31, 2007. Average interest-bearing deposits increased \$356,847, or 22%, to \$1,962,998 in 2008 from \$1,606,151 in 2007. The increase in average deposits is due primarily to the full year effect in 2008 of the CVBG acquisition in the second quarter of 2007 and the continued success of the Bank's High Performance Checking Program. In 2007, average interest-bearing deposits increased \$471,460, or 42%, over 2006. The 2007 increase in average deposits is due primarily to the effect of the CVBG acquisition in the second quarter of 2007 and the continued success of the Bank's High Performance Checking Program

Interest paid on deposits in 2008 totaled \$58,090, reflecting a 2.96% cost for average interest-bearing deposits of \$1,962,998. In 2007, interest of \$61,372 was paid at a cost of 3.82% on average deposits of \$1,606,151. In 2006, interest of \$36,090 was paid at a cost of 3.18% on average deposits of \$1,134,691.

Liquidity and Capital Resources

Liquidity. Liquidity refers to the ability or the financial flexibility to manage future cash flows to meet the needs of depositors and borrowers and fund operations. Maintaining appropriate levels of liquidity allows the Company to have sufficient funds available for reserve requirements, customer demand for loans, withdrawal of deposit balances and maturities of deposits and other liabilities. The Company's primary source of liquidity is dividends paid by the Bank. Applicable Tennessee statutes and regulations impose restrictions on the amount of dividends that may be declared by the Bank. Further, any dividend payments are subject to the continuing ability of the Bank to maintain compliance with minimum federal regulatory capital requirements and to retain its characterization under federal regulations as a "well-capitalized" institution. In addition, the Company maintains borrowing availability with the Federal Home Loan Bank of Cincinnati ("FHLB") approximating \$308 at December 31, 2008. The Company also maintains federal funds lines of credit totaling \$131,000 at seven correspondent banks of which \$131,000 was available at December 31, 2008. The Company believes it has sufficient liquidity to satisfy its current operating needs.

In 2008, operating activities of the Company provided \$44,642 of cash flows. Cash flows from operating activities were positively affected by various non-cash items, including (i) \$52,810 in provision for loan losses, (ii) \$7,030 of depreciation and amortization, and (iii) a \$7,028 net loss on OREO and repossessed assets. The increase in accrued interest payable and other liabilities relates to the CVBG acquisition. This was offset in part by (i) a net loss of \$5,360, (ii) a decrease of \$10,875 in accrued interest payable and other liabilities and (iii) a decrease of \$4,374 in deferred tax benefit. In addition, cash flows from operating activities were increased by the proceeds from the sale of held-for-sale loans of \$51,962, offset by cash used to originate held-for-sale loans of \$49,501.

Investing activities, including lending, provided \$73,595 of the Company's cash flows in 2008, a change of \$304,251 from \$230,656 used in 2007. Cash flows from investing activities increased from (i) the sale of OREO in the amount of \$20,654, (ii) from the excess of maturities and sale of securities available for sale over the purchases of securities in the amount of \$32,431, and (iii) the net decrease in loans of \$27,754. Investments in premises and equipment of \$5,814 were also undertaken in 2008 and reduced cash provided from investing activities.

Net additional cash flows of \$14,404 were provided by financing activities, a decrease of \$156,961 from \$171,365 in 2007. The financing cash flow activity in 2008 with respect to notes payable reflected a net repayment of funds in the amount of \$89,342 and during 2007 reflected a net source of funds of \$109,120. The Company elected to repay FHLB advances with the raising of funds through deposits. In addition, federal funds purchased and repurchase agreements were reduced by \$159,223 during 2008. Cash flow was positively increased by the issuance \$72,278 in preferred stock with the TARP program. Cash flows provided by the net change in total deposits were positive at \$197,354. As in prior years, the Company's cash flow from financing activities was decreased by the Company's dividend payments during 2008 of \$6,779 on common stock.

Capital Resources. The Company's strong capital position is reflected in its shareholders' equity, subject to certain adjustments for regulatory purposes. Shareholders' equity, or capital, is a measure of the Company's net worth, soundness and viability. The Company's capital continued to exceed regulatory requirements at December 31, 2008. Management believes the capital base of the Company allows it to take advantage of business opportunities while maintaining the level of resources deemed appropriate by management of the Company to address business risks inherent in the Company's daily operations.

On September 25, 2003, the Company issued \$10,310 of subordinated debentures, as part of a privately placed pool of trust preferred securities. The securities, due in 2033, bear interest at a floating rate of 2.85% above the three-month LIBOR rate, reset quarterly, and are callable in five years without penalty. The Company used the proceeds of the offering to support its acquisition of Independent Bankshares Corporation, and the capital raised from the offering qualified as Tier I capital for regulatory purposes.

On June 28, 2005, the Company issued an additional \$3,093 of subordinated debentures, as part of a privately placed pool of trust preferred securities. The securities, due in 2035, bear interest at a floating rate of 1.68% above the three-month LIBOR rate, reset quarterly, and are callable in five years from the date of issuance without penalty. The Company used the proceeds to augment its capital position in connection with its significant asset growth, and the capital raised from the offering qualifies as Tier I capital for regulatory purposes.

On May 16, 2007, the Company issued \$57,732 of subordinated debentures, as part of a privately placed pool of trust preferred securities. The securities, due in 2037, bear interest at a floating rate of 1.65% above the three-month LIBOR rate, reset quarterly, and are callable in five years without penalty. The Company used the proceeds of the offering to support its acquisition of CVBG, and the capital raised from the offering qualified as Tier I capital for regulatory purposes.

On May 18, 2007 the Company assumed the obligations of the following two trusts in the CVBG acquisition.

- On December 28, 2005, CVBG issued \$13,403 of subordinated debentures, as part of a privately placed pool of trust preferred securities. The securities, due in 2036, bear interest at a floating rate of 1.54% above the three-month LIBOR rate, reset quarterly, and are callable in five years without penalty.
- On July 31, 2001, CVBG issued \$4,124 of subordinated debentures, as part of a privately placed pool of trust preferred securities. The securities, due in 2031, bear interest at a floating rate of 3.58% above the three-month LIBOR rate, reset quarterly, and are callable in five years without penalty.

During 2007 the FRB issued regulations which allow continued inclusion of outstanding and prospective issuances of trust preferred securities as Tier 1 capital subject to stricter quantitative and qualitative limits than allowed under prior regulations. The new limits will phase in over a five-year transition period and would permit the Company's trust preferred securities, including those obligations assumed in the CVBG acquisition, to continue to be treated as Tier 1 capital.

The Company's ability to repurchase the trust preferred securities or pay dividends on the trust preferred securities, may be limited as a result of the Company's participation in the CPP, as described above.

Shareholders' equity on December 31, 2008 was \$381,231, an increase of \$58,754, or 18%, from \$322,477 on December 31, 2007. The increase in shareholders' equity arises primarily from the issuance of 72,278 shares of Series A preferred stock for \$72,278 to the U.S. Treasury. This increase was offset in part by the net loss available to common shareholders for 2008 of \$5,452 ((\$0.42) per share, assuming dilution) and dividend payments during 2008 that totaled \$6,779 (\$0.52 per share).

On December 23, 2008 the Company entered into a definitive agreement with the U.S. Treasury. Pursuant to the Agreement, we sold to the U.S. Treasury 72,280 shares of Series A preferred stock, having a liquidation amount equal to \$1,000 per share, with an attached warrant (the "Warrant") to purchase 635,504 shares of our common stock, par value \$2.00 per share, for \$17.06 per share.

The preferred stock qualifies as Tier 1 capital and will pay cumulative dividends at a rate of 5% per year, for the first five years, and 9% per year thereafter. Under the original terms of the CPP, the preferred stock could be redeemed with the approval of the Federal Reserve in the first three years with the proceeds from the issuance of certain qualifying Tier 1 capital (a "Qualified Offering") or after three years at par value plus accrued and unpaid dividends.

The Warrant has a 10-year term with 50% vesting immediately upon issuance and the remaining 50% vesting on January 1, 2010 if the Company does not redeem all of the Series A preferred stock with the proceeds of a Qualified Offering. The Warrant has an exercise price, subject to anti-dilution adjustments, equal to \$17.06 per share of common stock.

Under the provisions of the ARRA, the Company is now permitted to redeem the Series A preferred stock at any time, including within the first three years after issuance, without penalty and without the need to raise new Tier 1 capital pursuant to a Qualified Offering, subject to the U.S. Treasury's consultation with the Company's appropriate regulatory agency.

Risk-based capital regulations adopted by the FRB and the FDIC require both bank holding companies and banks to achieve and maintain specified ratios of capital to risk-weighted assets. The risk-based capital rules are designed to measure "Tier 1" capital (consisting of stockholders' equity, less goodwill) and total capital in relation to the credit risk of both on- and off-balance sheet items. Under the guidelines, one of four risk weights is applied to the different on-balance sheet items. Off-balance sheet items, such as loan commitments, are also subject to risk weighting after conversion to balance sheet equivalent amounts. All bank holding companies and banks must maintain a minimum total capital to total risk-weighted assets ratio of 8.00%, at least half of which must be in the form of core, or Tier 1, capital. At December 31, 2008, the Company and the Bank each satisfied their respective minimum regulatory capital requirements, and the Bank was "well-capitalized" within the meaning of federal regulatory requirements. Actual capital levels and minimum levels (in millions) were:

	<u>Actual</u>		<u>Minimum Required for Capital Adequacy Purposes</u>		<u>Minimum Amounts to be Well Capitalized Under Prompt Corrective Action Provisions</u>	
	<u>Actual</u>	<u>Ratio (%)</u>	<u>Actual</u>	<u>Ratio (%)</u>	<u>Actual</u>	<u>Ratio (%)</u>
<u>2008</u>						
Total Capital (to Risk Weighted Assets)						
Consolidated	\$ 344.0	14.9	\$ 184.8	8.0	\$ 231.1	10.0

Bank	240.1	8.7	111.0	4.0	138.8	5.0

Off-Balance Sheet Arrangements

At December 31, 2008, the Company had outstanding unused lines of credit and standby letters of credit totaling \$403,179 and unfunded loan commitments outstanding of \$18,648. Because these commitments generally have fixed expiration dates and many will expire without being drawn upon, the total commitment level does not necessarily represent future cash requirements. If needed to fund these outstanding commitments, the Company has the ability to liquidate federal funds sold or securities available-for-sale or, on a short-term basis, to borrow from the FHLB and/or purchase federal funds from other financial institutions. At December 31, 2008, the Company had accommodations with upstream correspondent banks for unsecured federal funds lines. These accommodations have various covenants related to their term and availability, and in most cases must be repaid within less than a month. The following table presents additional information about the Company's commitments as of December 31, 2008, which by their terms have contractual maturity dates subsequent to December 31, 2008:

	<u>Less than 1 Year</u>	<u>1-3 Years</u>	<u>3-5 Years</u>	<u>More than 5 Years</u>	<u>Total</u>
Commitments to make loans – fixed	\$ 9,221	\$ -	\$ -	\$ -	\$ 9,221
Commitments to make loans – variable	9,427	-	-	-	9,427
Unused lines of credit	194,772	60,051	17,289	84,528	356,640
Letters of credit	29,573	2,679	7,393	6,894	46,539
Total	<u>\$ 242,993</u>	<u>\$ 62,730</u>	<u>\$ 24,682</u>	<u>\$ 91,422</u>	<u>\$ 421,827</u>

Asset/Liability Management

The Company's Asset/Liability Committee ("ALCO") actively measures and manages interest rate risk using a process developed by the Bank. The ALCO is also responsible for approving the Company's asset/liability management policies, overseeing the formulation and implementation of strategies to improve balance sheet positioning and earnings, and reviewing the Company's interest rate sensitivity position.

The primary tool that management uses to measure short-term interest rate risk is a net interest income simulation model prepared by an independent national consulting firm and reviewed by another separate and independent national consulting firm. These simulations estimate the impact that various changes in the overall level of interest rates over one- and two-year time horizons would have on net interest income. The results help the Company develop strategies for managing exposure to interest rate risk.

Like any forecasting technique, interest rate simulation modeling is based on a large number of assumptions. In this case, the assumptions relate primarily to loan and deposit growth, asset and liability prepayments, interest rates and balance sheet management strategies. Management believes that both individually and in the aggregate the assumptions are reasonable. Nevertheless, the simulation modeling process produces only a sophisticated estimate, not a precise calculation of exposure.

The Company's current guidelines for risk management call for preventive measures if a gradual 200 basis point increase or decrease in short-term rates over the next 12 months would affect net interest income over the same period by more than 18.5%. The Company exceeded the upper guideline for a 200 basis point increase in rates by 0.93%, but remained well within the stated guideline for a 200 basis point decrease in rates. The Company contends that the reasons for the upper guideline breach is to strategically maximize net interest income potential for the moment interest rates start to increase. As of December 31, 2008 and 2007, based on the results of the independent consulting firm's simulation model, the Company could expect net interest income to increase by approximately 19.43% and 11.15%, respectively, if short-term interest rates immediately increase by 200 basis points. Conversely, if short-term interest rates immediately decrease by 200 basis points, net interest income could be expected to decrease by approximately 14.42% and 1.52%, respectively. The primary reason for less exposure in a declining rate environment is attributable to variable rate loan floors being reached in the loan portfolio. Furthermore, the reason the 200 basis point down scenario increased significantly from the prior year was the result of the modeled assumption that time deposit rates would reprice more aggressively than the environment allowed in 2008 as a result of the credit crisis, and the Bank elected to adjust the repricing assumptions of time deposits to match closer to what the Bank experienced in 2008.

The scenario described above, in which net interest income increases when interest rates increase and decreases when interest rates decline, is typically referred to as being "asset sensitive" because interest-earning assets exceed interest-bearing liabilities. At December 31, 2008, approximately 50% of the Company's gross loans had adjustable rates. While management believes, based on its asset/liability modeling, that the Company is liability sensitive as measured over the one year time horizon, it also believes that a rapid, significant and prolonged increase or decrease in rates could have a substantial adverse impact on the Company's net interest margin.

The Company's net interest income simulation model incorporates certain assumptions with respect to interest rate floors on certain deposits and other liabilities. Further, given the relatively low interest rates on some deposit products, a 200 basis point downward shock could very well reduce the costs on some liabilities below zero. In these cases, the Company's model incorporates constraints which prevent such a shock from simulating liability costs to zero.

The Company also uses an economic value of equity model, prepared and reviewed by the same independent national consulting firm, to complement its short-term interest rate risk analysis. The benefit of this model is that it measures exposure to interest rate changes over time frames longer than the two-year net interest income simulation. The economic value of the Company's equity is determined by calculating the net present value of projected future cash flows for current asset and liability positions based on the current yield curve.

Economic value analysis has several limitations. For example, the economic values of asset and liability balance sheet positions do not represent the true fair values of the positions, since economic values reflect an analysis at one particular point in time and do not consider the value of the Company's franchise. In addition, we must estimate cash flow for assets and liabilities with indeterminate maturities. Moreover, the model's present value calculations do not take into consideration future changes in the balance sheet that will likely result from

ongoing loan and deposit activities conducted by the Company's core business. Finally, the analysis requires assumptions about events which span several years. Despite its limitations, the economic value of equity model is a relatively sophisticated tool for evaluating the longer-term effect of possible interest rate movements.

The Company's current guidelines for risk management call for preventive measures if an immediate 200 basis point increase or decrease in interest rates would reduce the economic value of equity by more than 23%. The Company has been operating well within these guidelines. As of December 31, 2008 and 2007, based on the results of an independent national consulting firm's simulation model and reviewed by a separate independent national consulting firm, the Company could expect its economic value of equity to increase by approximately 3.63% and 5.29%, respectively, if short-term interest rates immediately increased by 200 basis points. Conversely, if short-term interest rates immediately decrease by 200 basis points, economic value of equity could be expected to decrease by approximately 12.13% and 12.78%, at December 31, 2008 and 2007, respectively. The lower percentage changes in economic value of equity as of December 31, 2008, compared to December 31, 2007, are primarily related to an increase in variable rate loans meeting floors, as well shorter liability durations.

Disclosure of Contractual Obligations

In the ordinary course of operations, the Company enters into certain contractual obligations. Such obligations include the funding of operations through debt issuances as well as leases for premises and equipment. The following table summarizes the Company's significant fixed and determinable contractual obligations as of December 31, 2008:

	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years	Total
Certificate of deposits.....	\$ 1,283,669	\$ 121,834	\$ 3,812	\$ 3,934	\$ 1,413,249
Federal funds purchased.....	-	-	-	-	-
Repurchase agreements.....	35,302	-	-	-	35,302
FHLB advances and notes payable.....	29,928	52,845	65,918	80,658	229,349
Subordinated debentures.....	-	-	-	88,662	88,662
Operating lease obligations.....	1,300	1,887	1,361	1,483	6,031
Deferred compensation.....	1,919	-	-	2,026	3,945
Purchase obligations.....	203	-	-	-	203
Total.....	<u>\$ 1,352,321</u>	<u>\$ 176,566</u>	<u>\$ 71,091</u>	<u>\$ 176,763</u>	<u>\$ 1,776,741</u>

Additionally, the Company routinely enters into contracts for services. These contracts may require payment for services to be provided in the future and may also contain penalty clauses for early termination of the contract. Management is not aware of any additional commitments or contingent liabilities which may have a material adverse impact on the liquidity or capital resources of the Company.

Inflation

The effect of inflation on financial institutions differs from its impact on other types of businesses. Since assets and liabilities of banks are primarily monetary in nature, they are more affected by changes in interest rates than by the rate of inflation.

Inflation generates increased credit demand and fluctuation in interest rates. Although credit demand and interest rates are not directly tied to inflation, each can significantly impact net interest income. As in any business or industry, expenses such as salaries, equipment, occupancy, and other operating expenses also are subject to the upward pressures created by inflation.

Since the rate of inflation has been stable during the last several years, the impact of inflation on the earnings of the Company has been insignificant.

Effect of New Accounting Standards

In November 2007, the SEC issued Staff Accounting Bulletin No. 109, "Written Loan Commitments Recorded at Fair Value Through Earnings" ("SAB 109"). SAB 109 expresses the current view of the staff that the expected net future cash flows related to the associated servicing of the loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. SEC

registrants are expected to apply the views in Question 1 of SAB 109 on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The implementation of this guidance did not have a material impact on the Company's consolidated financial statements.

In December 2007, the Financial Accounting Standards Board ("FASB") issued SFAS No. 141(R), "Business Combinations" and SFAS No. 160, "Accounting and Reporting of Noncontrolling Interest in Consolidated Financial Statements, an amendment of ARB No. 51". These new standards will significantly change the accounting for and reporting of business combination transactions and noncontrolling (minority) interests in consolidated financial statements. SFAS Nos. 141(R) and 160 are required to be adopted simultaneously and are effective for the first annual reporting period beginning on or after December 15, 2008. Earlier adoption is prohibited. We are currently evaluating the impact of adopting SFAS Nos. 141(R) and 160 on our consolidated financial statements.

In December 2007, the FASB issued SFAS No. 133 "Accounting for Derivative Instruments and Hedging Activities", Implementation Issue No. E23, "Hedging – General: Issues Involving the Application of the Shortcut Method under Paragraph 68" ("Issue E23"). Issue E23 amends SFAS No. 133 to explicitly permit use of the shortcut method for hedging relationships in which interest rate swaps have nonzero fair value at the inception of the hedging relationship, provided certain conditions are met. Issue E23 was effective for hedging relationships designated on or after January 1, 2008. The implementation of this guidance did not have a material impact on our consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities – an amendment of FASB Statement No. 133". SFAS No. 161 expands quarterly disclosure requirements in SFAS No. 133 about an entity's derivative instruments and hedging activities. SFAS No. 161 is effective for fiscal years beginning after November 15, 2008. The Company is currently assessing the impact of SFAS No. 161 on its consolidated financial position and results of operations.

In April 2008, the FASB issued FSP No. FAS 142-3, "Determination of the Useful Life of Intangible Assets." This FSP amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, "Goodwill and Other Intangible Assets". The objective of this FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS No. 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS No. 141(R), and other U.S. Generally Accepted Accounting Principles. This FSP applies to all intangible assets, whether acquired in a business combination or otherwise and shall be effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years and applied prospectively to intangible assets acquired after the effective date. Early adoption is prohibited. We have evaluated the new statement and have determined that it will not have a significant impact on the determination or reporting of our financial results.

In September 2008, the FASB issued SFAS No. 162, "The Hierarchy of Generally Accepted Accounting Principles." SFAS No. 162 identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with Generally Accepted Accounting Principles ("GAAP") in the United States (the GAAP hierarchy). The hierarchical guidance provided by SFAS No. 162 did not have a significant impact on our consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information set forth on pages 41 through 43 of Item 7, "MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS – Asset/Liability Management" is incorporated herein by reference.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Management's Annual Report on Internal Control Over Financial Reporting

Management of Green Bankshares, Inc. and subsidiaries (the "Company") is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Under the supervision and with the participation of management, including the principal executive officer and principal financial officer, the Company conducted an evaluation of the effectiveness of internal control over financial reporting based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation under the framework in Internal Control – Integrated Framework, management of the Company has concluded the Company maintained effective internal control over financial reporting as of December 31, 2008.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting can also be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting.

Dixon Hughes PLLC, an independent, registered public accounting firm, has audited the Company's consolidated financial statements as of and for the year ended December 31, 2008, and has issued an attestation report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2008, which is included herein on page 45.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

THE BOARD OF DIRECTORS
GREEN BANKSHARES, INC.

We have audited Green Bankshares, Inc. and subsidiaries' (the "Company") internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Green Bankshares, Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of Green Bankshares, Inc. and subsidiaries as of December 31, 2008 and 2007 and for each of the years in the three-year period ended December 31, 2008, and our report dated March 13, 2009, expressed an unqualified opinion on those consolidated financial statements. Our report on the consolidated financial statements referred to above refers to the adoption of Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* in 2007.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

BOARD OF DIRECTORS AND SHAREHOLDERS
GREEN BANKSHARES, INC.

We have audited the accompanying consolidated balance sheets of Green Bankshares, Inc. and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of income, changes in shareholders' equity and cash flows for each of the years in the three year period ended December 31, 2008. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by Management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Green Bankshares, Inc. and subsidiaries as of December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the years in the three year period ended December 31, 2008, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 10 to the consolidated financial statements, effective January 1, 2007, Green Bankshares, Inc. adopted Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Green Bankshares, Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 13, 2009 expressed an unqualified opinion thereon.

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation: The consolidated financial statements include the accounts of Green Bankshares, Inc. (the "Company") and its wholly owned subsidiary, GreenBank (the "Bank"), and the Bank's wholly owned subsidiaries, Superior Financial Services, Inc., GCB Acceptance Corp., Inc., and Fairway Title Company, Inc. All significant inter-company balances and transactions have been eliminated in consolidation.

Nature of Operations: The Company primarily provides financial services through its offices in Eastern, Middle and Southeastern Tennessee, Western North Carolina and Southwestern Virginia. Its primary deposit products are checking, savings, and term certificate accounts, and its primary lending products are residential mortgage, commercial, and installment loans. Substantially all loans are secured by specific items of collateral including business assets, consumer assets and real estate. Commercial loans are expected to be repaid from cash flow from operations of businesses. Real estate loans are secured by both residential and commercial real estate.

Use of Estimates: To prepare financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions based on available information. These estimates and assumptions affect the amounts reported in the financial statements and the disclosures provided, and future results could differ. The allowance for loan losses and fair values of financial instruments are particularly subject to change.

Cash Flows: Cash and cash equivalents, includes cash, deposits with other financial institutions under 90 days, and federal funds sold. Net cash flows are reported for loan, deposit and other borrowing transactions.

Securities: Securities are classified as held to maturity and carried at amortized cost when management has the positive intent and ability to hold them to maturity. Securities are classified as available for sale when they might be sold before maturity. Securities available for sale are carried at fair value, with unrealized holding gains and losses reported in accumulated other comprehensive income.

Interest income includes amortization of purchase premium or discount and is recognized based upon the straight-line method. Gains and losses on sales are based on the amortized cost of the security sold. Securities are written down to fair value when a decline in fair value is other than temporary.

Investments in Equity Securities Carried at Cost: Investment in Federal Home Loan Bank ("FHLB") stock, which is carried at cost because it can only be redeemed at par, is a required investment based on the Bank's amount of borrowing. The Bank also carries certain other equity investments at cost, which approximates fair value.

Loans: Loans are reported at the principal balance outstanding, net of unearned interest, deferred loan fees and costs.

Interest income is reported on the interest method over the loan term. Interest income on mortgage and commercial loans is discontinued at the time the loan is 90 days delinquent unless the loan is well secured and in process of collection. Most consumer loans are charged off no later than 120 days past due. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal and interest is doubtful. Interest accrued but not collected is reversed against interest income when a loan is placed on nonaccrual status.

(Continued)

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Interest received is recognized on the cash basis or cost recovery method until qualifying for return to accrual status. Accrual is resumed when all contractually due payments are brought current and future payments are reasonably assured.

Allowance for Loan Losses: The allowance for loan losses is a valuation allowance for probable incurred credit losses, increased by the provision for loan losses and decreased by charge-offs less recoveries. Management estimates the allowance balance required using past loan loss experience, known and inherent risks in the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions, and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off. Loan losses are charged against the allowance when management believes the uncollectibility of a loan is confirmed.

The Bank uses several factors in determining if a loan is impaired. The internal asset classification procedures include a thorough review of significant loans and lending relationships and include the accumulation of related data. This data includes loan payment and collateral status, borrowers' financial data and borrowers' operating factors such as cash flows, operating income, liquidity, leverage and loan documentation, and any significant changes. A loan is considered impaired, based on current information and events, if it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Uncollateralized loans are measured for impairment based on the present value of expected future cash flows discounted at the historical effective interest rate, while all collateral-dependent loans are measured for impairment based on the fair value of the collateral. Larger groups of smaller balance, homogeneous loans, such as consumer and residential real estate loans, are collectively evaluated for impairment, and accordingly, they are not separately identified for impairment disclosures.

Foreclosed Assets: Assets acquired through or instead of loan foreclosure are initially recorded at the lower of cost or market less estimated cost to sell when acquired, establishing a new cost basis. If fair value declines, a valuation allowance is recorded through expense. Costs after acquisition are expensed.

Premises and Equipment: Premises and equipment are stated at cost less accumulated depreciation. Depreciation is computed over the asset useful lives on a straight-line basis. Buildings and related components have useful lives ranging from 10 to 40 years, while furniture, fixtures and equipment have useful lives ranging from 3 to 10 years. Leasehold improvements are amortized over the lesser of the life of the asset or lease term.

Mortgage Banking Activities: Mortgage loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or market value. The Company controls its interest rate risk with respect to mortgage loans held for sale and loan commitments expected to close by usually entering into agreements to sell loans. The Company records loan commitments related to the origination of mortgage loans held for sale as derivative instruments. The Company's commitments are for fixed rate mortgage loans, generally last 60 to 90 days and are at market rates when initiated. The Company had \$3,511 in outstanding loan commitment derivatives at December 31, 2008. The aggregate market value of mortgage loans held for sale takes into account the sales prices of such agreements. The Company also provides currently for any losses on uncovered commitments to lend or sell. The Company sells mortgage loans servicing released.

Bank Owned Life Insurance: The Company has purchased life insurance policies on certain key executives. Company owned life insurance is recorded at its cash surrender value or the amount that can be realized.

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Goodwill, Core Deposit Intangibles and Other Intangible Assets: Goodwill results from prior business acquisitions and represents the excess of the purchase price over the fair value of acquired tangible assets and liabilities and identifiable intangible assets. Goodwill is assessed at least annually for impairment and any such impairment will be recognized in the period identified.

Core deposit intangibles assets arise from whole bank and branch acquisitions. They are initially measured at fair value and then are amortized on a straight line method over their estimated useful lives, which range from seven to 15 years and are determined by an independent consulting firm. Core deposit intangible assets will be assessed at least annually for impairment and any such impairment will be recognized in the period identified.

Other intangible assets consist of mortgage servicing rights ("MSR's"). MSR's represent the cost of acquiring the rights to service mortgage loans and the Company does not intend to further pursue this line of business. MSR's are amortized based on the principal reduction of the underlying loans. The Company is obligated to service the unpaid principal balances of these loans, which was approximately \$55 million as of December 31, 2008. The Company pays a third party subcontractor to perform servicing and escrow functions with respect to loans sold with retained servicing. MSR's will be assessed at least annually for impairment.

Long-term Assets: Premises and equipment and other long-term assets are reviewed for impairment when events indicate their carrying amount may not be recoverable from future undiscounted cash flows. If impaired, the assets are recorded at fair value.

Repurchase Agreements: All repurchase agreement liabilities represent secured borrowings from existing Bank customers and are not covered by federal deposit insurance.

Benefit Plans: Retirement plan expense is the amount contributed to the plan as determined by Board decision. Deferred compensation expense is recognized during the year the benefit is earned.

Stock Compensation: Compensation cost for stock-based payments is measured based on the fair value of the award, which most commonly includes restricted stock (i.e., unvested common stock) and stock options, at the grant date and is recognized in the consolidated financial statements on a straight-line basis over the requisite service period for service-based awards. The fair value of restricted stock is determined based on the price of GreenBank's common stock on the date of grant. The fair value of stock options is estimated at the date of grant using a Black-Scholes option pricing model and related assumptions.

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Income Taxes: Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance, if needed, reduces deferred tax assets to the amount expected to be realized.

Loan Commitments and Related Financial Instruments: Financial instruments include credit instruments, such as commitments to make loans and standby letters of credit, issued to meet customer financing needs. The face amount for these items represents the exposure to loss before considering customer collateral or ability to repay. Such financial instruments are recorded when they are funded. Instruments such as standby letters of credit are considered financial guarantees in accordance with Financial Accounting Standards Board ("FASB") Interpretation No. 45. The fair value of these financial guarantees is not material.

Earnings Per Common Share: Basic earnings per common share are net income divided by the weighted average number of common shares outstanding during the period. Diluted earnings available to common shareholders per common share includes the dilutive effect of additional potential common shares issuable under stock options, unvested restricted stock awards and stock warrants associated with the U.S. Treasury Capital Purchase Program.

Comprehensive Income: Comprehensive income consists of net income and other comprehensive income. Other comprehensive income includes unrealized gains and losses on securities available for sale which are also recognized as a separate component of equity. Comprehensive income is presented in the consolidated statements of changes in shareholders' equity.

Recent Accounting Pronouncements: In November 2007, the Securities and Exchange Commission ("SEC") issued Staff Accounting Bulletin No. 109, "Written Loan Commitments Recorded at Fair Value Through Earnings" ("SAB 109"). SAB 109 expresses the current view of the staff that the expected net future cash flows related to the associated servicing of the loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. SEC registrants are expected to apply the views in Question 1 of SAB 109 on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The implementation of this guidance did not have a material impact on the Company's consolidated financial statements.

In December 2007, the Financial Accounting Standards Board ("FASB") issued SFAS No. 141(R), "*Business Combinations*" and SFAS No. 160, "Accounting and Reporting of Noncontrolling Interest in Consolidated Financial Statements, an amendment of ARB No. 51". These new standards will significantly change the accounting for and reporting of business combination transactions and noncontrolling (minority) interests in consolidated financial statements. SFAS Nos. 141(R) and 160 are required to be adopted simultaneously and are effective for the first annual reporting period beginning on or after December 15, 2008. Earlier adoption is prohibited. We are currently evaluating the impact of adopting SFAS Nos. 141(R) and 160 on our consolidated financial statements.

In December 2007, the FASB issued SFAS No. 133 "Accounting for Derivative Instruments and Hedging Activities", Implementation Issue No. E23, "Hedging – General: Issues Involving the Application of the Shortcut Method under Paragraph 68" ("Issue E23"). Issue E23 amends SFAS No. 133 to explicitly permit use of the shortcut method for hedging relationships in which interest rate swaps have nonzero fair value at the inception of the hedging relationship, provided certain conditions are met. Issue E23 was effective for hedging relationships designated on or after January 1, 2008. The implementation of this guidance did not have a material impact on our consolidated financial statements.

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

In March 2008, the FASB issued SFAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities – an amendment of FASB Statement No. 133". SFAS No. 161 expands quarterly disclosure requirements in SFAS No. 133 about an entity's derivative instruments and hedging activities. SFAS No. 161 is effective for fiscal years beginning after November 15, 2008. The Company is currently assessing the impact of SFAS No. 161 on its consolidated financial position and results of operations.

In April 2008, the FASB issued FSP No. FAS 142-3, "Determination of the Useful Life of Intangible Assets." This FSP amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, "Goodwill and Other Intangible Assets". The objective of this FSP is to improve the consistency between the useful life of a recognized intangible asset under SFAS No. 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS No. 141(R), and other U.S. Generally Accepted Accounting Principles ("GAAP"). This FSP applies to all intangible assets, whether acquired in a business combination or otherwise and shall be effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years and applied prospectively to intangible assets acquired after the effective date. Early adoption is prohibited. We have evaluated the new statement and have determined that it will not have a significant impact on the determination or reporting of our financial results.

Loss Contingencies: Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. Management does not believe there are any such matters that will have a material effect on the financial statements.

Restrictions on Cash: Cash on hand or on deposit with the Federal Reserve Bank of \$17,762 and \$25,632 was required to meet regulatory reserve and clearing requirements at year-end 2008 and 2007. These balances do not earn interest.

Segments: Internal financial reporting is primarily reported and aggregated in five lines of business: banking, mortgage banking, consumer finance, subprime automobile lending, and title insurance. Banking accounts for 95.2% of revenues for 2008.

Fair Value of Financial Instruments: Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in a separate note. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments, and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates.

Reclassifications: Certain items in prior year financial statements have been reclassified to conform to the 2008 presentation. These reclassifications had no effect on net income or shareholders' equity as previously reported.

NOTE 2 - SECURITIES (Continued)

Contractual maturities of securities at year-end 2008 are shown below. Securities not due at a single maturity date, collateralized mortgage obligations and mortgage-backed securities are shown separately.

	<u>Available for Sale</u>		<u>Held to Maturity</u>	
	<u>Fair Value</u>		<u>Carrying Amount</u>	<u>Fair Value</u>
Due in one year or less	\$ 156		\$ -	\$ -
Due after one year through five years	2,625		657	601
Due after five years through ten years	57,951		-	-
Due after ten years	72,372		-	-
Collateralized mortgage obligations	68,372		-	-
Mortgage-backed securities	<u>2,086</u>		<u>-</u>	<u>-</u>
Total maturities	<u>\$ 203,562</u>		<u>\$ 657</u>	<u>\$ 601</u>

Gross gains and (losses) of \$2,661, (\$41) and (\$8) were recognized in 2008, 2007 and 2006, respectively, from proceeds of \$123,701, \$2,726 and \$1,979, respectively, on the sale of securities available for sale and held to maturity.

Securities with a carrying value of \$181,683 and \$212,633 at year-end 2008 and 2007 were pledged for public deposits and securities sold under agreements to repurchase and to the Federal Reserve Bank.

Securities with unrealized losses at year-end 2008 and 2007 not recognized in income are as follows:

	<u>Less than 12 months</u>		<u>12 months or more</u>		<u>Total</u>	
	<u>Fair Value</u>	<u>Unrealized Loss</u>	<u>Fair Value</u>	<u>Unrealized Loss</u>	<u>Fair Value</u>	<u>Unrealized Loss</u>
<u>2008</u>						
U. S. government agencies	\$ 977	\$ (22)	\$ -	\$ -	\$ 977	\$ (22)
Obligations of states and political subdivisions	18,445	(838)	643	(139)	19,088	(977)
Other securities	1,210	(14)	1,474	(509)	2,684	(523)
Collateralized mortgage obligations	8,721	(1,310)	-	-	8,721	(1,310)
Mortgage-backed securities	<u>640</u>	<u>(24)</u>	<u>1,446</u>	<u>(67)</u>	<u>2,086</u>	<u>(91)</u>
Total temporarily impaired	<u>\$ 29,993</u>	<u>\$ (2,208)</u>	<u>\$ 3,563</u>	<u>\$ (715)</u>	<u>\$ 33,556</u>	<u>\$ (2,923)</u>
<u>2007</u>						
U. S. government agencies	\$ -	\$ -	\$ 497	\$ (3)	\$ 497	\$ (3)
Obligations of states and political subdivisions	3,042	(66)	899	(7)	3,941	(73)
Other securities	2,998	(117)	224	(30)	3,222	(147)
Collateralized mortgage obligations	4,246	(43)	-	-	4,246	(43)
Mortgage-backed securities	<u>1,262</u>	<u>(2)</u>	<u>5,513</u>	<u>(92)</u>	<u>6,775</u>	<u>(94)</u>
Total temporarily impaired	<u>\$ 11,548</u>	<u>\$ (228)</u>	<u>\$ 7,133</u>	<u>\$ (132)</u>	<u>\$ 18,681</u>	<u>\$ (360)</u>

Securities in a loss position are evaluated for other-than-temporary impairment, considering such factors as the length of time and the extent to which the market value has been below cost, the credit standing of the issuer, and the Company's ability and intent to hold the security until its market value recovers. Management does not believe any individual unrealized loss represented other-than-temporary impairment as of December 31, 2008 or 2007. During 2008 the Company recognized a write-down of \$174, representing other-than-temporary impairment, related to an equity security held by the Bank.

NOTE 3 - LOANS

Loans at year-end were as follows:

	<u>2008</u>	<u>2007</u>
Commercial real estate	\$ 1,430,225	\$ 1,549,457
Residential real estate	397,922	398,779
Commercial	315,099	320,264
Consumer	89,733	97,635
Other	4,656	3,871
Unearned interest	<u>(14,245)</u>	<u>(13,630)</u>
Loans, net of unearned interest	<u>\$ 2,223,390</u>	<u>\$ 2,356,376</u>
Allowance for loan losses	<u>\$ (48,811)</u>	<u>\$ (34,111)</u>

Activity in the allowance for loan losses is as follows:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Beginning balance	\$ 34,111	\$ 22,302	\$ 19,739
Reserve acquired in acquisition	-	9,022	-
Provision for loan losses	52,810	14,483	5,507
Loans charged off	(41,269)	(13,471)	(4,357)
Recoveries of loans charged off	<u>3,159</u>	<u>1,775</u>	<u>1,413</u>
Balance, end of year	<u>\$ 48,811</u>	<u>\$ 34,111</u>	<u>\$ 22,302</u>

Impaired loans were as follows:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Loans with no allowance allocated	\$ 29,602	\$ -	\$ -
Loans with allowance allocated	\$ 17,613	\$ 36,267	\$ 5,067
Amount of allowance allocated	2,651	5,440	760
Average impaired loan balance during the year	48,347	16,276	6,897
Interest income not recognized during impairment	619	237	207

Interest income actually recognized on these loans during 2008 and 2007 was \$2,135 and \$1,977, respectively, and this interest income was not significant during 2006.

(Continued)

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 3 - LOANS (Continued)

Nonperforming loans were as follows:

	<u>2008</u>	<u>2007</u>
Loans past due 90 days still on accrual	\$ 509	\$ 18
Nonaccrual loans	<u>30,926</u>	<u>32,060</u>
 Total	 <u>\$ 31,435</u>	 <u>\$ 32,078</u>

Nonperforming loans and impaired loans are defined differently. Nonperforming loans are loans that are 90 days past due and still accruing interest and nonaccrual loans. Impaired loans are loans that based upon current information and events it is considered probable that the Company will be unable to collect all amounts of contractual interest and principal as scheduled in the loan agreement. Some loans may be included in both categories, whereas other loans may only be included in one category.

The aggregate amount of loans to executive officers and directors of the Company and their related interests was approximately \$18,355 and \$15,502 at year-end 2008 and 2007, respectively. During 2008 and 2007, new loans aggregating approximately \$30,560 and \$27,087, respectively, and amounts collected of approximately \$27,707 and \$22,714, respectively, were transacted with such parties.

NOTE 4 – FAIR VALUE DISCLOSURES

Effective January 1, 2008, the Company adopted Statement of Financial Accounting Standards (“SFAS”) No. 157, “Fair Value Measurements” and SFAS No. 159 “The Fair Value Option for Financial Assets and Liabilities”. SFAS No. 157, which was issued in September 2006, establishes a framework for using fair value. It defines fair value rules as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS No. 159, which was issued in February 2007, generally permits the measurement of selected eligible financial instruments at fair value at specified election dates. Upon adoption of SFAS No. 159, the Company did not elect to adopt the fair value option for any financial instruments.

SFAS No. 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS No. 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1

Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as certain U.S. Treasury, other U.S. Government and agency mortgage-backed debt securities that are highly liquid and are actively traded in over-the-counter markets.

Level 2

Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes certain U.S.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 4 – FAIR VALUE DISCLOSURES (Continued)

Government and agency mortgage-backed debt securities, corporate debt securities, derivative contracts and residential mortgage loans held-for-sale.

Level 3

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category generally includes certain private equity investments, retained residual interests in securitizations, residential mortgage servicing rights, and highly structured or long-term derivative contracts.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value.

Investment Securities Available-for-Sale

Investment securities available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices of like or similar securities, if available and these securities are classified as Level 1 or Level 2. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions and are classified as Level 3.

Loans Held for Sale

Loans held for sale are carried at the lower of cost or market value. The fair value of loans held for sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, the Company classifies loans held for sale subjected to nonrecurring fair value adjustments as Level 2.

Impaired Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment in accordance with SFAS No. 114, "Accounting by Creditors for Impairment of a Loan" ("SFAS 114"). The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At December 31, 2008, substantially all of the total impaired loans were evaluated based on either the fair value of the collateral or its liquidation value. In accordance with SFAS No. 157, impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the impaired loan as nonrecurring Level 3.

Loan Servicing Rights

Loan servicing rights are subject to impairment testing. A valuation model, which utilizes a discounted cash flow analysis using interest rates and prepayment speed assumptions currently quoted for comparable instruments and a discount rate determined by management, is used in the completion of impairment testing. If the valuation model reflects a value less than the carrying value, loan servicing rights are adjusted to fair value through a valuation allowance as determined by the model. As such, the Company classifies loan servicing rights subjected to nonrecurring fair value adjustments as Level 3.

NOTE 4 – FAIR VALUE DISCLOSURES (Continued)

Assets and Liabilities Recorded at Fair Value on a Recurring Basis

Below is a table that presents information about certain assets and liabilities measured at fair value:

Description	December 31, 2008			Total Carrying Amount in Statement of Financial Position	Assets/Liabilities Measured at Fair Value
	Fair Value Measurement Using				
	Level 1	Level 2	Level 3		
Securities available for sale	\$ -	\$ 203,652	\$ -	\$ 203,652	\$ 203,652

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The Company may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with GAAP. These include assets that are measured at the lower of cost or market that were recognized at fair value below cost at the end of the period. Assets measured at fair value on a nonrecurring basis are included in the table below.

Description	December 31, 2008			Total Carrying Amount in Statement of Financial Position	Assets/Liabilities Measured at Fair Value
	Fair Value Measurement Using				
	Level 1	Level 2	Level 3		
Impaired Loans	\$ -	\$ -	\$ 43,364	\$ 43,364	\$ 43,364

(Continued)

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 4 – FAIR VALUE DISCLOSURES (Continued)

The carrying value and estimated fair value of the Company's financial instruments are as follows at year-end 2008 and 2007.

	<u>2008</u>		<u>2007</u>	
	<u>Carrying</u> <u>Value</u>	<u>Fair</u> <u>Value</u>	<u>Carrying</u> <u>Value</u>	<u>Fair</u> <u>Value</u>
Financial assets:				
Cash and cash equivalents	\$ 198,358	\$ 198,358	\$ 65,717	\$ 65,717
Securities available for sale	203,562	203,562	235,273	235,273
Securities held to maturity	657	601	1,303	1,280
Loans held for sale	442	445	2,331	2,355
Loans, net	2,174,579	2,135,732	2,322,265	2,304,194
FHLB, Bankers Bank and other stock	13,030	13,030	12,322	12,322
Cash surrender value of life insurance	29,539	29,539	28,466	28,466
Accrued interest receivable	10,808	10,808	13,532	13,532
Financial liabilities:				
Deposit accounts	\$ 2,184,147	\$ 2,195,459	\$ 1,986,793	\$ 1,985,482
Federal funds purchased and repurchase agreements	35,302	35,302	194,525	194,525
FHLB Advances and notes payable	229,349	232,731	318,690	320,661
Subordinated debentures	88,662	74,570	88,662	87,599
Accrued interest payable	6,828	6,828	9,098	9,098

The following methods and assumptions were used to estimate the fair values for financial instruments that are not disclosed under SFAS No. 157. The carrying amount is considered to estimate fair value for cash and short-term instruments, demand deposits, liabilities for repurchase agreements, variable rate loans or deposits that reprice frequently and fully, and accrued interest receivable and payable. For fixed rate loans or deposits and for variable rate loans or deposits with infrequent repricing or repricing limits, the fair value is estimated by discounted cash flow analysis using current market rates for the estimated life and credit risk. Liabilities for FHLB advances and notes payable are estimated using rates of debt with similar terms and remaining maturities. The fair value of off-balance sheet items is based on the current fees or costs that would be charged to enter into or terminate such arrangements, which is not material. The fair value of commitments to sell loans is based on the difference between the interest rates committed to sell at and the quoted secondary market price for similar loans, which is not material.

NOTE 6 – GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill

The change in the amount of goodwill is as follows:

	<u>2008</u>	<u>2007</u>
Beginning of year	\$ 143,140	\$ 31,327
Goodwill from acquisition during year	-	111,813
Adjustment to Goodwill ¹	<u>249</u>	<u>-</u>
End of year	<u>\$ 143,389</u>	<u>\$ 143,140</u>

¹Goodwill was adjusted for a correction of a deferred tax asset associated with the CVBG acquisition in 2007.

Goodwill was no longer amortized starting in 2002; however, it is evaluated annually for impairment and no impairment was recognized in 2008, 2007, or 2006.

In conjunction with significant acquisitions, the Company engages a third party to assist management in the valuation of financial assets acquired and liabilities assumed. Annually thereafter, the goodwill and intangible assets are evaluated for impairment. An impairment loss is recognized to the extent that the carrying value is determined to exceed the asset's fair value. The impairment analysis is a two step process. First, a comparison of the reporting unit's estimated fair value is compared to its carrying value, including goodwill, and if the estimated fair value of the reporting unit exceeds its carrying value, goodwill is deemed to be non-impaired. If the first step is not successfully achieved, a second step involving the calculation of an implied fair value, as determined in a manner similar to the amount of the goodwill calculated in a business combination is conducted. This second step process involves the measurement of the excess of the estimated fair value over the aggregate estimated fair value as if the reporting unit was being acquired in a business combination. Based on the results and analysis of the step one assessment, management determined that as of December 31, 2008 there was no implied impairment of goodwill.

Core deposit and other intangible

The change in core deposit and other intangible is as follows:

	<u>2008</u>	<u>2007</u>
<u>Core deposit intangibles</u>		
Beginning of year	\$ 13,991	\$ 7,213
Core deposit intangibles from acquisition during year	-	8,740
Accumulated amortization, beginning of year	(5,805)	(3,843)
Amortization	<u>(2,499)</u>	<u>(1,962)</u>
Accumulated amortization, end of year	<u>(8,304)</u>	<u>(5,805)</u>
End of year	<u>\$ 11,492</u>	<u>\$ 13,991</u>

NOTE 6 – GOODWILL AND OTHER INTANGIBLE ASSETS (Continued)

<u>Other intangibles</u>	<u>2008</u>	<u>2007</u>
Beginning of year	\$ 696	\$ -
Mortgage servicing rights from acquisition during year	-	745
Accumulated amortization, beginning of year	(49)	-
Amortization	<u>(103)</u>	<u>(49)</u>
Accumulated amortization, end of year	<u>(152)</u>	<u>(49)</u>
End of year	<u>\$ 593</u>	<u>\$ 696</u>

Estimated amortization expense for each of the next five years is as follows:

2009	\$ 2,599
2010	2,595
2011	2,541
2012	2,411
2013	<u>1,728</u>
Total	<u>\$ 11,874</u>

NOTE 7 – DEPOSITS

Deposits at year-end were as follows:

	<u>2008</u>	<u>2007</u>
Noninterest-bearing demand deposits	\$ 176,685	\$ 201,289
Interest-bearing demand deposits	531,983	598,984
Savings deposits	62,230	72,277
Time deposits	<u>1,413,249</u>	<u>1,114,243</u>
Total deposits	<u>\$ 2,184,147</u>	<u>\$ 1,986,793</u>

Time deposits of \$100 or more were \$767,240 and \$552,963 at year-end 2008 and 2007, respectively.

Scheduled maturities of all time deposits for the next five years and thereafter were as follows:

2009	\$ 1,283,669
2010	102,165
2011	19,669
2012	2,511
2013	1,301
Thereafter	3,934

The aggregate amount of deposits of executive officers and directors of the Company and their related interests was approximately \$3,480 and \$5,018 at year-end 2008 and 2007, respectively.

December 31, 2008, 2007 and 2006

NOTE 8 - BORROWINGS

Federal funds purchased, securities sold under agreements to repurchase and treasury tax and loan deposits are financing arrangements. Securities involved with the agreements are recorded as assets and are held by a safekeeping agent and the obligations to repurchase the securities are reflected as liabilities. Securities sold under agreements to repurchase consist of short-term excess funds and overnight liabilities to deposit customers arising from a cash management program.

Information concerning securities sold under agreements to repurchase at year-end 2008, 2007 and 2006 is as follows:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Average balance during the year	\$ 74,881	\$ 70,601	\$ 22,424
Average interest rate during the year	1.57%	4.06%	4.13%
Maximum month-end balance during the year	\$ 98,925	\$ 114,045	\$ 26,753
Weighted average interest rate at year-end	0.10%	3.25%	4.08%

FHLB advances and notes payable consist of the following at year-end:

	<u>2008</u>	<u>2007</u>
<u>Short-term borrowings</u>		
Fixed rate FHLB advance, 4.04% Maturing December 2009	\$ 10,000	\$ -
Variable rate FHLB advances at 5.49% to 5.76% Maturing November 2009 and December 2009	19,500	10,000
Fixed rate FHLB advances, 3.90% to 6.10% Matured January 2008 and July 2008	-	99,409
Total short-term borrowings	<u>29,500</u>	<u>109,409</u>
<u>Long-term borrowings</u>		
Fixed rate FHLB advances, from 1.50% to 6.35%, Various maturities through July 2023	162,849	152,781
Variable rate FHLB advances, from 5.00% to 5.75%, Maturities from January 2010 to December 2010	<u>37,000</u>	<u>56,500</u>
Total long-term borrowings	<u>199,849</u>	<u>209,281</u>
Total borrowings	<u>\$ 229,349</u>	<u>\$ 318,690</u>

Each advance is payable at its maturity date; however, prepayment penalties are required if paid before maturity. The fixed rate advances include \$155,000 of advances that are callable by the FHLB under certain circumstances. The variable rate advances are convertible to a 3-month LIBOR rate at the discretion of the FHLB. The advances are collateralized by a required blanket pledge of qualifying mortgage, commercial, agricultural and home equity lines of credit loans and securities totaling \$566,297 and \$621,428 at year-end 2008 and 2007, respectively.

NOTE 8 - BORROWINGS (Continued)

Scheduled maturities of FHLB advances and notes payable over the next five years and thereafter are as follows:

	<u>Total</u>
2009	\$ 29,928
2010	37,413
2011	15,432
2012	65,451
2013	467
Thereafter	<u>80,658</u>
	<u>\$229,349</u>

At year-end 2008, the Company had approximately \$131,000 of federal funds lines of credit available from correspondent institutions, \$308 in unused lines of credit with the FHLB, and \$45,250 of letters of credit with the FHLB.

In September 2003, the Company formed Greene County Capital Trust I ("GC Trust I"). GC Trust I issued \$10,000 of variable rate trust preferred securities as part of a pooled offering of such securities. The Company issued \$10,310 subordinated debentures to the GC Trust I in exchange for the proceeds of the offering, which debentures represent the sole asset of GC Trust I. The debentures pay interest quarterly at the three-month LIBOR plus 2.85% adjusted quarterly (7.67% and 8.09% at year-end 2008 and 2007, respectively). Subject to the limitations on repurchases resulting from the Company's participation in the CPP, the Company may redeem the subordinated debentures, in whole or in part, beginning October 2008 at a price of 100% of face value. The subordinated debentures must be redeemed no later than 2033.

In June 2005, the Company formed Greene County Capital Trust II ("GC Trust II"). GC Trust II issued \$3,000 of variable rate trust preferred securities as part of a pooled offering of such securities. The Company issued \$3,093 subordinated debentures to the GC Trust II in exchange for the proceeds of the offering, which debentures represent the sole asset of GC Trust II. The debentures pay interest quarterly at the three-month LIBOR plus 1.68% adjusted quarterly (3.68% and 6.67% at year-end 2008 and 2007, respectively). Subject to the limitations on repurchases resulting from the Company's participation in the CPP, the Company may redeem the subordinated debentures, in whole or in part, beginning September 2010 at a price of 100% of face value. The subordinated debentures must be redeemed no later than 2035.

In May 2007, the Company formed GreenBank Capital Trust I ("GB Trust I"). GB Trust I issued \$56,000 of variable rate trust preferred securities as part of a pooled offering of such securities. The Company issued \$57,732 subordinated debentures to the GB Trust I in exchange for the proceeds of the offering, which debentures represent the sole asset of GB Trust I. The debentures pay interest quarterly at the three-month LIBOR plus 1.65% adjusted quarterly (3.65% and 6.64% at year-end 2008 and 2007). Subject to the limitations on repurchases resulting from the Company's participation in the CPP, the Company may redeem the subordinated debentures, in whole or in part, beginning June 2012 at a price of 100% of face value. The subordinated debentures must be redeemed no later than 2037.

Also in May 2007 the Company assumed the liability for two trusts affiliated with the acquisition of Franklin, Tennessee-based Civitas Bankgroup, Inc. ("CVBG") that the Company acquired on May 18, 2007, Civitas Statutory Trust I ("CS Trust I") and Cumberland Capital Statutory Trust II ("CCS Trust II").

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 8 - BORROWINGS (Continued)

In December 2005 CS Trust I issued \$13,000 of variable rate trust preferred securities as part of a pooled offering of such securities. CVBG issued \$13,403 subordinated debentures to the CS Trust I in exchange for the proceeds of the offering, which debentures represent the sole asset of CS Trust I. The debentures pay interest quarterly at the three-month LIBOR plus 1.54% adjusted quarterly (3.54% and 6.53% at year-end 2008 and 2007). Subject to the limitations on repurchases resulting from the Company's participation in the CPP, the Company may redeem the subordinated debentures, in whole or in part, beginning March 2011 at a price of 100% of face value. The subordinated debentures must be redeemed no later than March 2036.

In July 2001 CCS Trust II issued \$4,000 of variable rate trust preferred securities as part of a pooled offering of such securities. CVBG issued \$4,124 subordinated debentures to the CCS Trust II in exchange for the proceeds of the offering, which debentures represent the sole asset of CCS Trust II. The debentures pay interest quarterly at the three-month LIBOR plus 3.58% adjusted quarterly (7.00% and 8.54% at year-end 2008 and 2007). Subject to the limitations on repurchases resulting from the Company's participation in the CPP, as of July 2007 the Company may redeem the subordinated debentures, in whole or in part at a price of 100% of face value. The subordinated debentures must be redeemed no later than July 2031.

In accordance with FASB Interpretation No. 46R, GC Trust I, GC Trust II, GB Trust I, CS Trust I and CCS Trust II are not consolidated with the Company. Accordingly, the Company does not report the securities issued by GC Trust I, GC Trust II, GB Trust I, CS Trust I and CCS Trust II as liabilities, and instead reports as liabilities the subordinated debentures issued by the Company and held by each Trust. However, the Company has fully and unconditionally guaranteed the repayment of the variable rate trust preferred securities. These trust preferred securities currently qualify as Tier 1 capital for regulatory capital requirements of the Company.

NOTE 9 - BENEFIT PLANS

The Company has a profit sharing plan which allows employees to contribute from 1% to 20% of their compensation. The Company contributes an additional amount at a discretionary rate established annually by the Board of Directors. Company contributions to the Plan were \$1,535, \$1,320 and \$999 for 2008, 2007 and 2006, respectively.

Directors have deferred some of their fees for future payment, including interest. The amount accrued for deferred compensation was \$2,847 and \$2,823 at year-end 2008 and 2007. Amounts expensed under the Plan were \$207, \$330 and \$350 during 2008, 2007, and 2006, respectively. The Company uses a formula which provides an annual earnings crediting rate based on 75% of the annual return on average stockholders' equity, for the year then ended, on balances in the Plan until the director experiences a separation from service, and, thereafter, at an earnings crediting rate of 56.25% of the Company's return on average stockholders' equity for the year then ending. The return on annual shareholders' equity was negative in 2008 and no earnings were credited for 2008. Also certain officers of the Company are participants under a Supplemental Executive Retirement Plan. The amount accrued for future payments under this Plan was \$1,098 and \$815 at year-end 2008 and 2007, respectively. Amounts expensed under the Plan were \$283, \$253 and \$236 during 2008, 2007 and 2006, respectively. Related to these plans, the Company purchased single premium life insurance contracts on the lives of the related participants. The cash surrender value of these contracts is recorded as an asset of the Company.

NOTE 10 - INCOME TAXES

Income tax expense is summarized as follows:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Current – federal	\$ (221)	\$ 13,161	\$ 11,424
Current – state	(53)	2,096	2,265
Deferred – federal	(3,649)	(927)	(416)
Deferred – state	<u>(725)</u>	<u>(184)</u>	<u>(83)</u>
	<u>\$ (4,648)</u>	<u>\$ 14,146</u>	<u>\$ 13,190</u>

Deferred income taxes reflect the effect of “temporary differences” between values recorded for assets and liabilities for financial reporting purposes and values utilized for measurement in accordance with tax laws. The tax effects of the primary temporary differences giving rise to the Company’s net deferred tax assets and liabilities are as follows:

	<u>2008</u>		<u>2007</u>	
	<u>Assets</u>	<u>Liabilities</u>	<u>Assets</u>	<u>Liabilities</u>
Allowance for loan losses	\$ 19,146	\$ -	\$ 13,380	\$ -
Deferred compensation	1,962	-	1,653	-
Purchase accounting adjustments	815	-	1,219	-
Depreciation	-	(2,059)	-	(1,771)
FHLB dividends	-	(1,717)	-	(1,476)
Core deposit intangible	-	(5,371)	-	(6,102)
Unrealized (gain) loss on securities	428	-	-	(972)
Other	<u>-</u>	<u>(708)</u>	<u>868</u>	<u>-</u>
Total deferred income taxes	<u>\$ 22,351</u>	<u>\$ (9,855)</u>	<u>\$ 17,120</u>	<u>\$ (10,321)</u>

No valuation allowances were required relating to deferred tax assets at December 31, 2008 and 2007.

A reconciliation of expected income tax expense at the statutory federal income tax rate of 35% with the actual effective income tax rates is as follows:

	<u>2008</u>	<u>2007</u>	<u>2006</u>
Statutory federal tax rate	(35.0%)	35.0%	35.0%
State income tax, net of federal benefit	(5.2)	3.2	4.1
Tax exempt income	(8.0)	(2.7)	(0.7)
Other	<u>1.8</u>	<u>1.2</u>	<u>(0.1)</u>
	<u>(46.4%)</u>	<u>36.7%</u>	<u>38.3%</u>

Effective January 1, 2007, the Company adopted Financial Accounting Standards Board (“FASB”) Interpretation No. 48, “Accounting for Uncertainty in Income Taxes” (“FIN 48”), an interpretation of FASB statement No. 109 (the “Interpretation”). This Interpretation provides guidance on financial statement recognition and measurement of tax positions taken, or expected to be taken, in tax returns. As a result of the implementation of FIN 48, the Company recognized an approximately \$800 decrease in the liability for unrecognized tax benefits which was accounted for as an increase to the January 1, 2007, balance of retained earnings.

(Continued)

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 10 – INCOME TAXES (Continued)

A reconciliation of the beginning and ending amount of unrecognized income tax benefits for 2007 follows:

	<u>2007</u>
Unrecognized tax benefits at the beginning of the year	\$ 475
Additional based on tax positions related to current year	-
Additional based on tax positions related to prior years	-
Reduction based on lapse of statute	(400)
Settlements	<u>(75)</u>
Unrecognized tax benefits at the end of the year	<u>\$ -</u>

The Company had no unrecognized tax benefits related to Federal or State income tax matters as of December 31, 2008.

The Company recognizes accrued interest and penalties related to uncertain tax positions in tax expense. At the date of adoption of FIN 48, the Company had recognized approximately \$150 for the payment of interest and penalties.

A federal net operating loss of \$2.3 million remains in connection with the CVBG acquisition. The carryforward loss will expire in 2026.

The Company's Federal returns are open and subject to examination for the years of 2005, 2006 and 2007. The Company's State returns are open and subject to examination for the years of 2005, 2006 and 2007.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 11 - COMMITMENTS AND FINANCIAL INSTRUMENTS WITH OFF-BALANCE-SHEET RISK

Some financial instruments, such as loan commitments, credit lines, letters of credit, and overdraft protection, are issued to meet customer-financing needs. These are agreements to provide credit or to support the credit of others, as long as conditions established in the contract are met, and usually have expiration dates. Commitments may expire without being used. Off-balance-sheet risk to credit loss exists up to the face amount of these instruments, although material losses are not anticipated. The same credit policies are used to make such commitments as are used for loans, including obtaining collateral at exercise of the commitment.

Financial instruments with off-balance-sheet risk were as follows at year-end:

	<u>2008</u>	<u>2007</u>
Commitments to make loans – fixed	\$ 9,221	\$ 7,837
Commitments to make loans – variable	9,427	23,843
Unused lines of credit	356,640	704,729
Letters of credit	46,539	58,615

The fixed rate loan commitments have interest rates ranging from 5.00% to 9.79% and maturities ranging from one-month to fifteen years. Letters of credit are considered financial guarantees under FASB Interpretation No. 45. These instruments are carried at fair value, which was immaterial at year-end 2008 and 2007.

NOTE 12 - CAPITAL REQUIREMENTS AND RESTRICTIONS ON RETAINED EARNINGS

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet capital requirements can initiate regulatory action.

Prompt corrective action regulations provide five classifications: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and capital restoration plans are required.

NOTE 12- CAPITAL REQUIREMENTS AND RESTRICTIONS ON RETAINED EARNINGS (continued)

Based on the most recent notifications from its regulators, the Bank is well capitalized under the regulatory framework for prompt corrective action. Management believes that as of December 31, 2008, the Company and the Bank met all capital adequacy requirements to which they are subject and was not aware of any conditions or events that would affect the Bank's well capitalized status. Actual capital levels and minimum required levels (in millions) were as follows:

	<u>Actual</u>		<u>Minimum Required for Capital Adequacy Purposes</u>		<u>Minimum Amounts to be Well Capitalized Under Prompt Corrective Action Provisions</u>	
	<u>Actual</u>	<u>Ratio (%)</u>	<u>Actual</u>	<u>Ratio (%)</u>	<u>Actual</u>	<u>Ratio (%)</u>
<u>2008</u>

Bank	240.1	8.7	111.0	4.0	138.8	5.0

The Company's primary source of funds to pay dividends to shareholders is the dividends it receives from the Bank. Applicable state laws and the regulations of the Federal Reserve Bank and the Federal Deposit Insurance Corporation regulate the payment of dividends. Under the state regulations, the amount of dividends that may be paid by the Bank to the Company without prior approval of the Commissioner of the Tennessee Department of Financial Institutions is limited in any one year to an amount equal to the net income in the calendar year of declaration plus retained net income for the preceding two years; however, future dividends will be dependent on the level of earnings, capital and liquidity requirements and considerations of the Bank and Company.

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 12- CAPITAL REQUIREMENTS AND RESTRICTIONS ON RETAINED EARNINGS (continued)

On December 23, 2008, the Company entered into a definitive agreement (the "Agreement") with the U.S. Treasury to participate in the Capital Purchase Program ("CPP"). Due to the Company's participation in the CPP, we may not repurchase common shares or trust preferred securities or increase our dividend on our common stock for three years from the date of the Agreement, without the U.S. Treasury's consent, unless the preferred shares sold to the U.S. Treasury have been redeemed in whole or transferred to a third party which is not an affiliate of the U.S. Treasury.

Pursuant to the Agreement, we sold to the U.S. Treasury 72,280 shares of Series A preferred stock, having a liquidation amount equal to \$1,000 per share, with an attached warrant (the "Warrant") to purchase 635,504 shares of our common stock, par value \$2.00 per share, for \$17.06 per share.

The preferred stock qualifies as Tier 1 capital and will pay cumulative dividends at a rate of 5% per year, for the first five years, and 9% per year thereafter. Under the original terms of the CPP, the preferred stock could be redeemed with the approval of the Federal Reserve in the first three years with the proceeds from the issuance of certain qualifying Tier 1 capital (a "Qualified Offering") or after three years at par value plus accrued and unpaid dividends.

The Warrant has a 10-year term with 50% vesting immediately upon issuance and the remaining 50% vesting on January 1, 2010 if the Company does not redeem all of the Series A preferred stock with the proceeds of a Qualified Offering. The Warrant has an exercise price, subject to anti-dilution adjustments, equal to \$17.06 per share of common stock.

Under the provisions of the American Reinvestment and Recovery Act of 2009 ("ARRA"), the Company is now permitted to redeem the Series A preferred stock at any time, including within the first three years after issuance, without penalty and without the need to raise new Tier 1 capital pursuant to a Qualified Offering, subject to the U.S. Treasury's consultation with the Company's appropriate regulatory agency.

In general, the Bank may not declare or pay a dividend to the Company in excess of 100% of its net retained profits for the current year combined with its net retained profits for the preceding two calendar years without prior approval of our Regulators. The Bank's ability to make capital distributions in the future may require regulatory approval and may be restricted by its regulatory authorities. The Bank's ability to make any such distributions will also depend on its earnings and ability to meet minimum regulatory capital requirements in effect during future periods. These capital adequacy standards may be higher in the future than existing minimum regulatory capital requirements. The FDIC also has the authority to prohibit the payment of dividends by a bank when it determines such payments would constitute an unsafe and unsound banking practice. In addition, income tax considerations may limit the ability of the Bank to make dividend payments in excess of its current and accumulated tax "earnings and profits" ("E&P"). Annual dividend distributions in excess of E&P could result in a tax liability based on the amount of excess earnings distributed and current tax rates.

NOTE 13 – STOCK-BASED COMPENSATION

The Company maintains a 2004 Long-Term Incentive Plan, as amended (the “Plan”), whereby a maximum of 500,000 shares of common stock may be issued to directors and employees of the Company and the Bank. The Plan provides for the issuance of awards in the form of stock options, stock appreciation rights, restricted shares, restricted share units, deferred share units and performance awards. Stock options granted under the Plan are typically granted at exercise prices equal to the fair market value of the Company's common stock on the date of grant and typically have terms of ten years and vest at an annual rate of 20%. Shares of restricted stock awarded under the Plan have restrictions that expire within the vesting period of the award which range from 12 months to 60 months. At December 31, 2008, 219,729 shares remained available for future grant. The compensation cost related to options that has been charged against income for the Plan was approximately \$456, \$472 and \$354 for the years ended December 31, 2008, 2007 and 2006, respectively. The compensation cost related to restricted stock that has been charged against income for the Plan was approximately \$303 for the year ended December 31, 2008. No restricted stock was issued during 2007 or 2006. As of December 31, 2008, there was \$905 of total unrecognized compensation cost related to non-vested share-based compensation arrangements, which is expected to be recognized over a weighted-average period of 1.8 years.

Stock Options

The fair market value of each option award is estimated on the date of grant using the Black-Scholes option pricing model. The Company did not grant any incentive stock options for 2008. The Company granted 75,473 stock options during the year ended December 31, 2007, with a fair value of \$11.85 for each option.

The risk-free interest rate is based upon a U.S. Treasury instrument with a life that is similar to the expected life of the option grant. Expected volatility is based upon the historical volatility of the Company’s common stock based upon prior year’s trading history. The expected term of the options is based upon the average life of previously issued stock options. The expected dividend yield is based upon current yield on the date of grant. No post-vesting restrictions exist for these options.

The following table illustrates the assumptions for the Black-Scholes model used in determining the fair value of options granted to employees in the quarter ended March 31, 2007. No options were granted during the other quarters for the year ended December 31, 2007.

	<u>2007</u>
Risk-free interest rate	4.58%
Volatility	26.92%
Expected life	8 years
Dividend yield	1.80%

NOTE 13 – STOCK-BASED COMPENSATION (Continued)

A summary of stock option activity under the Plan for the three years ended December 31, 2008, 2007 and 2006 is presented below:

	Stock Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at January 1, 2006	396,910	\$ 21.65		
Granted	90,261	28.90		
Exercised	(49,264)	18.28		
Forfeited	<u>(12,150)</u>	26.79		
Outstanding at December 31, 2006	425,757	\$ 23.43		
Granted	75,473	35.89		
Exercised	(38,530)	19.22		
Forfeited	<u>(10,623)</u>	29.80		
Outstanding at December 31, 2007	452,077	\$ 25.72		
Granted	-	-		
Exercised	(9,759)	12.63		
Forfeited	(1,565)	30.65		
Expired	<u>(16,310)</u>	23.00		
Outstanding at December 31, 2008	<u>424,443</u>	\$ 26.10	5.3 years	\$ 18
Options exercisable at December 31, 2008	<u>288,643</u>	\$ 23.73	4.4 years	\$ 18

The total aggregate intrinsic value of stock options (which is the amount by which the stock price exceeded the exercise price of the stock options) exercised during the years ended December 31, 2008 and 2007, was \$16 and \$550, respectively. The total fair value of stock options vesting during the years ended December 31, 2008 and 2007 was \$480 and \$322, respectively.

During the year-ended December 31, 2008, the amount of cash received from the exercise of stock options was \$111.

December 31, 2008, 2007 and 2006

NOTE 13 – STOCK-BASED COMPENSATION (Continued)

Cash Settled Stock Appreciation Rights

During the year ended December 31, 2008 the Company granted cash-settled stock appreciation rights (“SAR’s”) awards to non-employee Directors, executive officers and select employees. During the year ended December 31, 2007 only select employees received SAR’s. Each award, when granted, provides the participant with the right to receive payment in cash, upon exercise of each SAR, for the difference between the appreciation in market value of a specified number of shares of the Company’s Common Stock over the award’s exercise price. The SAR’s vest over the same period as the stock option awards issued and the restricted stock grants and can only be exercised in tandem with the stock option awards or vesting of the restricted stock grants. The per-share exercise price of a SAR is equal to the closing market price of a share of the Company’s Common Stock on the date of grant. For the year ended December 31, 2008, the Company recognized expense of \$39 related to outstanding awarded SAR’s. As of December 31, 2008, there was an estimated \$76 of unrecognized compensation cost related to SAR’s. The cost, measured at each reporting period until the award is settled, is expected to be recognized over a weighted average period of 2.0 years. As of December 31, 2008, no cash settled SAR’s had been exercised and as such, no share-based liabilities were paid.

A summary of the SAR activity during years ended December 31, 2007 and 2008 is presented below. No SAR activity occurred for the year ended December 31, 2006.

	SAR’s	Weighted Average Price Per Share
Balance at January 1, 2007	-	\$ -
Granted:		
Executive officers	19,000	34.63
Balance at December 31, 2007	19,000	34.63
Granted:

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 13 – STOCK-BASED COMPENSATION (Continued)

The following table illustrates the assumptions for the Black-Scholes model used in determining the fair value of the SAR's at the time of grant for the periods ending December 31.

	<u>2008</u>	<u>2007</u>
Risk-free interest rate	3.81% – 3.85%	4.58%
Volatility	29.46% - 32.81%	26.92%
Expected life	1 - 5 years	8 years
Dividend yield	3.54%	1.80%

Cash-settled SARs awarded in stock-based payment transactions are accounted for under SFAS 123(R) which classifies these awards as liabilities. Accordingly, the Company records these awards as a component of other non-current liabilities on the balance sheet. For liability awards, the fair value of the award, which determines the measurement of the liability on the balance sheet, is remeasured at each reporting period until the award is settled. Fluctuations in the fair value of the liability award are recorded as increases or decreases in compensation cost, either immediately or over the remaining service period, depending on the vested status of the award.

The risk-free interest rate is based upon a U.S. Treasury instrument with a life that is similar to the expected life of the SAR. Expected volatility is based upon the historical volatility of the Company's common stock based upon prior year's trading history. The expected term of the SAR is based upon the average life of previously issued stock options and restricted stock grants. The expected dividend yield is based upon current yield on the date of grant. These SAR's can only be exercised in tandem with stock options being exercised or vesting of restricted stock.

NOTE 14 - EARNINGS PER SHARE

A reconciliation of the numerators and denominators of the earnings per common share and earnings per common share assuming dilution computations are presented below.

	<u>2008</u>	<u>2007</u>	<u>2006</u>
<u>Basic Earnings Per Share</u>			
Net income (loss)	\$ (5,360)	\$ 24,374	\$ 21,262
Less: preferred stock dividends and accretion of discount on warrants	<u>92</u>	<u>-</u>	<u>-</u>
Net income (loss) available to common shareholders	<u>\$ (5,452)</u>	<u>\$ 24,374</u>	<u>\$ 21,262</u>
Weighted average common shares outstanding	<u>12,932,576</u>	<u>11,756,699</u>	<u>9,788,004</u>
Basic earnings (loss) per share	<u>\$ (0.42)</u>	<u>\$ 2.07</u>	<u>\$ 2.17</u>
<u>Diluted Earnings Per Share</u>			
Net income (loss)	\$ (5,360)	\$ 24,374	\$ 21,262
Less: preferred stock dividends and accretion of discount on warrants	<u>92</u>	<u>-</u>	<u>-</u>
Net income (loss) available to common shareholders	<u>\$ (5,452)</u>	<u>\$ 24,374</u>	<u>\$ 21,262</u>
Weighted average common shares outstanding	12,932,576	11,756,699	9,788,004
Add: Dilutive effects of assumed conversions of restricted stock and exercises of stock options	<u>58,214</u>	<u>42,443</u>	<u>145,274</u>
Weighted average common and dilutive potential common shares outstanding	<u>12,990,790</u>	<u>11,799,142</u>	<u>9,933,278</u>
Diluted earnings (loss) per share	<u>\$ (0.42)</u>	<u>\$ 2.07</u>	<u>\$ 2.14</u>

Stock options of 387,121 and 114,115 were excluded from the 2008 and 2007 diluted earnings per share because their impact was antidilutive. No stock options were excluded from the earnings per share calculation for 2006.

NOTE 17 - SEGMENT INFORMATION

The Company's operating segments include banking, mortgage banking, consumer finance, subprime automobile lending and title insurance. The reportable segments are determined by the products and services offered, and internal reporting. Loans, mortgage banking, investments, and deposits provide the revenues in the banking operation, loans and fees provide the revenues in consumer finance and subprime lending and insurance commissions provide revenues for the title insurance company. Consumer finance, subprime automobile lending and title insurance do not meet the quantitative threshold for disclosure on an individual basis, and are therefore shown below in "other". All operations are domestic.

The accounting policies used are the same as those described in the summary of significant accounting policies. Segment performance is evaluated using net interest income and noninterest income. Income taxes are allocated based on income before income taxes and indirect expenses (includes management fees) are allocated based on time spent for each segment. Transactions among segments are made at fair value. Information reported internally for performance assessment follows.

	<u>Banking</u>	<u>Other Segments</u>	<u>Holding Company</u>	<u>Eliminations</u>	<u>Total Segments</u>

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2008, 2007 and 2006

NOTE 19 – BUSINESS COMBINATION

On May 18, 2007, the Company acquired CVBG, parent of Cumberland Bank. CVBG, headquartered in Franklin, Tennessee, which operated 12 full-service branches in the middle Tennessee area. The primary reason for the acquisition of CVBG, and the premium paid, was to provide accelerated entry for the Company in the Middle Tennessee area in some of the fastest growing areas in the Nashville MSA. Operating results of CVBG are included in the consolidated financial statements since the date of the acquisition.

The acquisition was accounted for under the purchase method of accounting, and accordingly, the purchase price has been allocated to the tangible and identified intangible assets purchased and the liabilities assumed based upon preliminary estimated fair values at the date of acquisition. The aggregate purchase price was \$164,268, including \$45,793 paid in cash and 3,091,495 shares of the Company's common stock. The allocation of the purchase price is subject to changes in the estimated fair values of assets acquired and liabilities assumed. Identified intangible assets and purchase accounting fair value adjustments are being amortized under various methods over the expected lives of the corresponding assets and liabilities. Goodwill will not be amortized and is not deductible for tax purposes, but will be reviewed for impairment on an annual basis. Currently, identified intangible assets from the acquisition subject to amortization are \$9,485 and total goodwill from the acquisition is \$112,062.

The following table summarizes the fair value of assets acquired and liabilities assumed at the date of acquisition.

Cash and due from banks	\$ 21,182
Securities	200,081
FHLB stock	2,863
Bankers Bank stock	100
Loans held for sale	8,642
Loans, net of unearned income	631,496
Allowance for loan losses	(9,022)
Premises and equipment	18,332
Goodwill	112,062
Core deposit intangible	8,740
Mortgage servicing rights	745
Other assets	<u>16,369</u>
Total assets acquired	1,011,590
Deposits	(699,089)
Federal funds purchased	(52,500)
Repurchase agreements	(42,790)
FHLB advances	(32,000)
Subordinated debentures	(17,527)
Other liabilities	<u>(3,416)</u>
Total liabilities assumed	(847,322)
Net assets acquired	<u>\$ 164,268</u>

The Company also incurred \$761 in direct costs that were capitalized into goodwill associated with the merger for legal, advisory and conversion costs.

December 31, 2008, 2007 and 2006

NOTE 19 – BUSINESS COMBINATION (Continued)

The following table presents pro forma information as if the acquisition had occurred at the beginning of 2007 and 2006 for the years ended December 31. The pro forma information includes adjustments for interest income on loans and securities acquired, amortization of intangibles arising from the acquisition, depreciation expense on property acquired, interest expense on deposits assumed, and the related income tax effects. The pro forma financial information is not indicative of the results of operations as they would have been had the acquisition been effected on the assumed dates.

	Year ended December 31,	
	<u>2007</u>	<u>2006</u>
Net interest income	\$ 104,634	\$ 97,508
Net income	<u>\$ 27,371</u>	<u>\$ 27,352</u>
Basic earnings per share	<u>\$ 2.12</u>	<u>\$ 2.12</u>
Diluted earnings per share	<u>\$ 2.11</u>	<u>\$ 2.10</u>

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures, as defined in Rule 13a-15(e) and Rule 15d-15(e) promulgated under the Securities Exchange Act of 1934 (the "Exchange Act"), that are designed to ensure that information required to be disclosed by it in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. The Company carried out an evaluation, under the supervision and with the participation of its management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures as of the end of the period covered by this report. Based on the evaluation of these disclosure controls and procedures, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective for the purpose set forth in the definition thereof in Exchange Act Rule 13a-15(e).

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting during the Company's fiscal quarter ended December 31, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting (as defined in Exchange Act Rule 13a-15f).

Management Report on Internal Control Over Financial Reporting

The report of the Company's management on the effectiveness of the Company's internal control over financial reporting is set forth on page 44 of this Annual Report on Form 10-K. The attestation of the Company's registered public accounting firm related to the Company's internal control over financial reporting is set forth on page 45 of this Annual Report on Form 10-K.

ITEM 9B. OTHER INFORMATION.

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE.

The information required by this item is incorporated herein by reference to the sections captioned “Proposal 1 – Election of Directors”; “Corporate Governance – Section 16(a) Beneficial Ownership Reporting Compliance”; “Corporate Governance – Code of Conduct”; “Corporate Governance – Meetings and Committees of the Board”; and “Executive Officers of Green Bankshares” in the Company’s definitive Proxy Statement for the 2009 Annual Meeting of Shareholders (“Proxy Statement”).

ITEM 11. EXECUTIVE COMPENSATION.

The information required by this item is incorporated herein by reference to the section captioned “Executive Compensation” of the Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

(a) Security Ownership of Certain Beneficial Owners

Information required by this item is incorporated herein by reference to the section captioned “Security Ownership of Certain Beneficial Owners and Management” in the Proxy Statement.

(b) Security Ownership of Management

Information required by this item is incorporated herein by reference to the section captioned “Security Ownership of Certain Beneficial Owners and Management” in the Proxy Statement.

(c) Changes in Control

Management of the Company knows of no arrangements, including any pledge by any person of securities of the Company, the operation of which may at a subsequent date result in a change in control of the registrant.

(d) Equity Compensation Plan Information

The following table sets forth certain information with respect to securities to be issued under the Company’s equity compensation plans as of December 31, 2008.

Plan Category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	379,443	\$ 27.33	219,729
Equity compensation plans not approved by security holders	45,000	\$ 15.75	*
Total	424,443	\$ 26.10	219,729

*R. Stan Puckett, was the sole participant under this plan, which was a part of Mr. Puckett’s employment agreement. This employment agreement was amended during 2005 to provide that future option grants to the key executive would be made at no less than fair market value on the date of grant in order to comply with Section 409A of the Internal Revenue Code of 1986, as amended.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE.

The information required by this item is incorporated herein by reference to the sections captioned “Proposal 1 – Election of Directors” and “Corporate Governance – Certain Transactions” in the Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

The responses to this Item are incorporated herein by reference to the section captioned "Independent Registered Public Accounting Firm" in the Proxy Statement.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES.

(a)(1) The following consolidated financial statements of the Company included in the Company's 2008 Annual Report to the Shareholders (the "Annual Report") are incorporated herein by reference from Item 8 of this Form 10-K. The remaining information appearing in the Annual Report is not deemed to be filed as part of this Form 10-K, except as expressly provided herein.

1. Report of Independent Registered Public Accounting Firm.
2. Consolidated Balance Sheets – December 31, 2008 and 2007.
3. Consolidated Statements of Income for the Years Ended December 31, 2008, 2007 and 2006.
4. Consolidated Statements of Changes in Shareholders' Equity for the Years Ended December 31, 2008, 2007 and 2006.
5. Consolidated Statements of Cash Flows for the Years Ended December 31, 2008, 2007 and 2006.
6. Notes to Consolidated Financial Statements.

(a)(2) All schedules for which provision is made in the applicable accounting regulations of the Securities and Exchange Commission are not required under the related instructions or are inapplicable and therefore have been omitted.

(a)(3) The following exhibits either are filed as part of this Report or are incorporated herein by reference:

- 32.2 Chief Financial Officer Certification Pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

* Management contract or compensatory plan.

The Company is a party to certain agreements entered into in connection with the offering by Greene County Capital Trust I, Greene County Capital Trust II, GreenBank Capital Trust I, Civitas Statutory Trust I and Cumberland Capital Statutory Trust II of an aggregate of \$86 million of variable rate trust preferred securities, as more fully described in this Annual Report on Form 10-K. In accordance with Item 601(b)(4)(iii) of Regulation S-K, and because the total amount of the trust preferred securities is not in excess of 10% of the Company's total assets, the Company has not filed the various documents and agreements associated with certain of these trust preferred securities herewith. The Company has, however, agreed to furnish copies the various documents and agreements associated with the trust preferred securities to the SEC upon request.

- (b) Exhibits. The exhibits required by Item 601 of Regulation S-K are either filed as part of this Annual Report on Form 10-K or incorporated herein by reference.
- (c) Financial Statements and Financial Statement Schedules Excluded From Annual Report. There are no financial statements and financial statement schedules which were excluded from the Annual Report pursuant to Rule 14a-3(b)(1) which are required to be included herein.
