LOW COST PRODUCER

Eagle Materials Annual Report 2009

2009

D

LETTER TO THE SHAREHOLDERS

In last year's shareholders letter we told you that the construction industry was facing extremely difficult times: "falling real estate values induced a financial markets crisis which tightened credit and subsequently reduced funds generally available for all types of construction." Unfortunately, this was just the beginning of a much broader and especially vicious cycle of weaker housing leading to weaker bank balance sheets, which further tightened credit triggering a very severe global economic recession.

We reacted immediately when conditions worsened. We swiftly, but methodically modified our business plans to emphasize cash flow generation and pay down debt. We worked even harder to enhance our position as the nation's lowest delivered cost provider of building materials and construction products, but we did so without compromising our promise to deliver quality products supported by exceptional customer service. Our performance in fiscal 2009 completely and thoroughly erased any lingering doubts about Eagle's lowest-cost, highest-margin position. Eagle Materials' employees truly distinguished themselves as the best operators and engineers in the industry by digging deeper to reduce costs and raise operational efficiencies to new heights in all aspects of our businesses, including safety, quality, customer service, energy efficiency, waste and delay. Our operations performed extremely well financially relative to our competitors, but when compared to past performances, Eagle's financial results this year were weak.

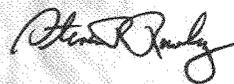

In the last two years demand for cement has declined by 25% and for the first time in well over a decade U.S. cement production capacity exceeded demand. The difficulties in the marketplace were compounded by new cement capacity starting up at the worst possible economic time. Unfortunately, Eagle's string of 22 consecutive "sold out" years of cement production was broken. In spite of these difficult economic conditions, our cement operations achieved operating earnings of \$82 million—the third highest performance on record. Our ability to maintain earnings at a respectable level is a testament to the dedication of our employees, who worked harder and smarter than ever in these toughest of times. It is anticipated that demand for cement will

continue to decline during the first half of our fiscal 2010 before the positive impact of the American Recovery and Reinvestment Act (stimulus package) generates infrastructure spending that will increase cement demand.

The complete collapse of the housing industry last year, combined with record high energy and transportation costs at the beginning of fiscal 2009 and significant new capacity coming on stream, severely impacted the profitability of our Wallboard and Paperboard companies. Operating earnings declined from \$63 million in fiscal 2008 to slightly less than \$18 million last year. Without a doubt, we are just as proud of the performance of our people last year as when we earned a record \$217 million in fiscal 2007. The continued anemic pace of new residential construction coupled with the continued downturn in repair and remodel and commercial construction will further reduce demand for gypsum wallboard and gypsum paperboard making fiscal 2010 another challenging year for our Wallboard and Paperboard companies.

In the near term, the path forward will not be easy and we will continue to watch our pennies closely. Sales opportunities will continue to decline, albeit at a slower rate, creating a marketplace ripe for fierce competition. Eagle Materials will meet this challenge head-on by focusing relentlessly on operations—lowering the cost of production, improving the sales experience, reducing logistics costs, while remaining financially conservative. These are the elements of success that we firmly control and our people positively influence. It is because of OUR EMPLOYEE'S exceptional intellect, hard work, and strength of character, that we look forward to this upcoming year with confidence that we will expand our leading position in the building materials and construction products industry.

Sincerely,

Steven R. Rowley
President and
Chief Executive Officer

Laurence E. Hirsch
Chairman

ITEM 1. BUSINESS

OVERVIEW

Eagle Materials Inc. (the “Company” or “EXP” which may be referred to as “we”, “our” or “us”) is a manufacturer of basic building materials including gypsum wallboard, cement, gypsum and non-gypsum recycled paperboard and concrete and aggregates. We were founded in 1963 as a building materials subsidiary of Centex Corporation (“Centex”) and we operated as a public company under the name Centex Construction Products, Inc. from April 1994 to January 30, 2004, at which time Centex completed a tax free distribution of its shares to its shareholders (the “Spin-off”). Since the date of the Spin-off, we are no longer affiliated with Centex. Today, our primary businesses are the manufacture and distribution of gypsum wallboard and the manufacture and sale of cement. Gypsum wallboard is distributed throughout the U.S. with particular emphasis in the geographic markets nearest to our production facilities. We sell cement in four regional markets, including northern Nevada and California, the greater Chicago area, the Rocky Mountain region and central Texas. At March 31, 2009 we operated five gypsum wallboard plants (six board lines), four cement plants (six kilns, one of which belongs to our joint venture company), one recycled paperboard plant, nine concrete batching plants and two aggregates facilities.

We operate in cyclical commodity businesses that are directly related to the overall economic environment, particularly the residential and commercial construction industries. Our operations, depending on each business segment, range from local in nature to national businesses. We have operations in a variety of geographic markets, which subject us to the economic conditions in each such geographic market as well as the national market. General economic downturns or localized downturns in the regions where we have operations could have a material adverse effect on our business, financial condition and results of operations. Our Wallboard and Paperboard operations are more national in scope and shipments are made throughout the continental U.S, except for the northeast. Our cement companies are located in geographic areas west of the Mississippi river and the Chicago, Illinois metropolitan area. Due to the low value-to-weight ratio of cement, cement is usually shipped within a 150 mile radius of the plants by truck and up to 300 miles by rail; though changes in the price of diesel fuel may impact the truck shipping radius. Concrete and aggregates are even more regional as those operations serve the areas immediately surrounding Austin, Texas and north of Sacramento, California. Cement, concrete and aggregates demand may fluctuate more widely because local and regional markets and economies may be more sensitive to changes than the national markets.

Each of our segments has been impacted by the current economic downturn differently. Gypsum Wallboard, which is a national business, has been negatively impacted by the decrease in new home starts throughout the United States, as well as the decline in commercial construction. Utilization of our Gypsum Wallboard division was approximately 60% during fiscal year 2009. We do not expect residential housing starts to improve materially during fiscal 2010, especially given the current supply of unsold homes and the unwillingness of credit markets to support speculative new home construction. Our Recycled Paperboard division earnings remained consistent year-over-year, primarily due to decreases in the cost of recycled fiber and certain improvements to our manufacturing process that reduced our operating costs, namely natural gas. We expect the price of recycled fiber to remain at lower levels during fiscal 2010; however, we also expect our sales of gypsum paper to continue to decline as the gypsum industry reduces sales and production.

Certain markets in our Cement division have been impacted more severely than others, due to the disparate impact of the slowdown on the west coast and mid-west as compared to the mountain and Texas areas. Cement consumption in the United States declined to 106.4 million short tons in calendar 2008 as compared to 126.2 million short tons in calendar 2007, while imports declined to 12% of total cement consumption in calendar 2008 as compared to 21% calendar 2007. The American Recovery and Reinvestment Act, a stimulus package passed by the United States Congress, is expected to provide increased demand for cement; however, the majority of the demand created by government stimulus is expected to be consumed next year.

We continue to be committed to our goal of being a low cost producer in each of the markets in which we compete through exceptional operation of our complicated manufacturing plants and disciplined investment in proven technology. We will also continue to focus on expansion through acquisition or expansion of existing facilities that provide increased profitability for our shareholders.

INDUSTRY SEGMENT INFORMATION

For management and financial reporting purposes, our businesses are separated into four segments: Gypsum Wallboard; Cement; Recycled Paperboard; and Concrete and Aggregates. A description of these business segments can be found on pages 3-13.

The following table presents revenues and earnings before interest and income taxes contributed by each of our industry segments during the periods indicated. We conduct one of our four cement plant operations through a joint venture, Texas Lehigh Cement Company LP, which is located in Buda, Texas. We own a 50% interest in the joint venture and account for our interest using the equity method of accounting. However, for segment reporting purposes, we proportionately consolidate our 50% share of the cement joint venture's revenues and operating earnings, which is consistent with the way management organizes the segments within the Company for making operating decisions and assessing performance. Identifiable assets, depreciation, depletion and amortization, and capital expenditures by segment are presented in Note (G) of the Notes to the Consolidated Financial Statements on pages 52-55.

	For the Fiscal Years Ended March 31,		
	2009	2008	2007
Revenues:	(dollars in millions)		
Gypsum Wallboard	\$ 279.3	\$ 342.6	\$ 511.6
Cement	289.5	345.2	321.9
Paperboard	116.4	133.4	127.5
Concrete and Aggregates	66.2	87.6	97.3
Other, net	3.6	1.5	4.5
Sub-total	755.0	910.3	1,062.8
Less: Intersegment Revenues	(57.1)	(63.6)	(63.9)
Less: Joint Ventures Revenues	(95.7)	(97.1)	(76.5)
Total Net Revenues	<u>\$ 602.2</u>	<u>\$ 749.6</u>	<u>\$ 922.4</u>
Operating Earnings:			
Gypsum Wallboard	\$ 1.2	\$ 46.0	\$ 198.1
Cement	82.0	106.6	92.2
Paperboard	16.6	17.0	19.0
Concrete and Aggregates	4.6	13.1	16.2
Other, net	3.6	1.5	4.5
Sub-total	108.0	184.2	330.0
Corporate Overhead	(16.9)	(18.8)	(20.3)
Earnings Before Interest and Income Taxes	<u>\$ 91.1</u>	<u>\$ 165.4</u>	<u>\$ 309.7</u>

Net revenues (net of joint venture and intersegment revenue, see Note (G) in the Notes to the Consolidated Financial Statements) for the past three years from each of our business segments, expressed as a percentage of total net revenues, were as follows:

	For the Fiscal Years Ended March 31,		
	2009	2008	2007
Percentage of Total Net Revenues:			
Gypsum Wallboard	46.4 %	45.7 %	55.5 %
Cement	31.0	31.9	25.6
Paperboard	11.1	10.7	8.1
Concrete and Aggregates:			
Readymix Concrete	7.4	8.0	6.7
Aggregates	3.4	3.5	3.6
Sub-total	10.8	11.5	10.3
Other, net	0.7	0.2	0.5
Total Net Revenues	100.0 %	100.0 %	100.0 %

GYPSUM WALLBOARD OPERATIONS

Company Operations. We currently own and operate five gypsum wallboard manufacturing facilities, comprising six board lines. There are four primary steps in the manufacturing process: (1) gypsum is mined and extracted from the ground (or, in the case of synthetic gypsum, received from a power generation company); (2) the gypsum is then calcined and converted into plaster; (3) the plaster is mixed with various other materials and water to produce a mixture known as slurry, which is extruded between two continuous sheets of recycled paperboard on a high-speed production line and allowed to harden; and (4) the sheets of gypsum wallboard are then cut to appropriate lengths, dried and bundled for sale. Gypsum wallboard is used to finish the interior walls and ceilings in residential, commercial and industrial construction.

The following table sets forth certain information regarding our plants:

Location	Annual Gypsum Wallboard Capacity (MMSF) ⁽¹⁾	Estimated Minimum Gypsum Rock Reserves (years)	Estimated Gypsum Reserves (million tons)
Albuquerque, New Mexico	425	50+ ⁽²⁾⁽³⁾	38 ⁽²⁾
Bernalillo, New Mexico	475	50+ ⁽²⁾⁽³⁾	38 ⁽²⁾
Gypsum, Colorado	700	25 ⁽⁴⁾	16
Duke, Oklahoma	1,250	21 ⁽⁴⁾⁽⁵⁾	19
Georgetown, South Carolina	750	59 ⁽⁶⁾	— ⁽⁶⁾
Total	3,600		

⁽¹⁾ Million Square Feet ("MMSF"), subject to anticipated product mix.

⁽²⁾ The same reserves serve both New Mexico plants.

⁽³⁾ Includes mining claims and leased reserves.

⁽⁴⁾ Includes both owned and leased reserves.

⁽⁵⁾ We anticipate that additional reserves would be available on satisfactory terms, if required.

⁽⁶⁾ We have a sixty year supply agreement with Santee Cooper for synthetic gypsum.

Our gypsum wallboard production totaled 2,149 MMSF in fiscal 2009 and 2,427 MMSF in fiscal 2008. Total gypsum wallboard sales were 2,102 MMSF in fiscal 2009 and 2,395 MMSF in fiscal 2008. Total wallboard production as a percentage of current rated capacity was approximately 60% in fiscal 2009 and 80% in fiscal 2008. The Company's operating rates were consistent with industry average capacity utilization in both fiscal 2009 and fiscal 2008.

Raw Materials and Fuel Supplies. We mine and extract natural gypsum rock, the principal raw material used in the manufacture of gypsum wallboard, from mines and quarries owned, leased or subject to mining claims owned by the Company and located near our plants. We also use synthetic gypsum at our Georgetown, South Carolina plant that we obtain through a supply agreement with Santee Cooper, a South Carolina utility company. Two leases cover the New Mexico reserves; one with the Pueblo of Zia and the second with the State of New Mexico. The term of the Zia lease continues for so long as gypsum is produced in paying quantities, as defined in the agreement. The term of the State lease continues for so long as annual lease payments are made. We do not anticipate any problems in continuing to extend the term of these leases for the foreseeable future. Gypsum ore reserves at the Gypsum, Colorado plant are contained within a total of 115 placer claims encompassing 2,300 acres. We also hold mineral rights on an additional 108 unpatented mining claims where mineral rights can be developed upon completion of permitting requirements. We currently own land with over 14 million tons of gypsum in the area of Duke, Oklahoma, with an additional 5 million tons controlled through a lease agreement. Other gypsum deposits are located near the plant in Duke, which we believe may be obtained at reasonable cost when needed. We are currently in the second year of a sixty year supply agreement (original twenty year term with two twenty year extension options) with a public utility in South Carolina for our synthetic gypsum. Based on the size of the power plant, it is anticipated that the power plant will produce adequate gypsum for the foreseeable future to satisfy our operating needs. If the utility is unable to provide the agreed-upon amount of gypsum, it is responsible for providing gypsum from a third party to fulfill its obligations.

Through our modern low cost paperboard mill we manufacture sufficient quantities of paper necessary for our gypsum wallboard production. Paper is a significant cost component in the manufacture of gypsum wallboard, currently representing approximately one-third of our cost of production.

Our gypsum wallboard manufacturing operations use large quantities of natural gas and electrical power. A significant portion of the Company's natural gas requirements for our gypsum wallboard plants are currently provided by four gas producers under gas supply agreements expiring in March 2010 for Colorado, May 2010 for New Mexico, October 2009 for Oklahoma and January 2010 for South Carolina. If the agreements are not renewed, we expect to be able to obtain our gas supplies from other suppliers at competitive prices. Electrical power is supplied to our New Mexico plants at standard industrial rates by a local utility. Our Albuquerque plant utilizes an interruptible power supply agreement, which may expose it to some production interruptions during periods of power curtailment. Power for our Gypsum, Colorado facility is generated at the facility by a cogeneration power plant. Currently, the cogeneration power facility supplies power and waste hot gases for drying to the gypsum wallboard plant. We do not sell any power to third parties. Gas costs represent approximately 25% of our production costs.

Sales and Distribution. The principal sources of demand for gypsum wallboard are (i) residential construction, (ii) repair and remodeling, (iii) non-residential construction, and (iv) other markets such as exports and manufactured housing, which we estimate accounted for approximately 38%, 35%, 26% and 1%, respectively, of calendar 2008 industry sales. The gypsum wallboard industry remains highly cyclical; and closely follows construction industry cycles, particularly housing construction. Also, demand for wallboard can be seasonal and is generally greater from spring through the middle of autumn.

We sell gypsum wallboard to numerous building materials dealers, gypsum wallboard specialty distributors, lumber yards, home center chains and other customers located throughout the United States. Gypsum wallboard is sold on a delivered basis, mostly by truck. We generally utilize third-party common carriers for deliveries. Two customers with multiple shipping locations accounted for approximately 28% of our total gypsum wallboard sales during fiscal 2009. The loss of these customers could have a material adverse effect on the financial results of the gypsum wallboard segment.

Although gypsum wallboard is distributed principally in regional areas, certain industry producers (including the Company) have the ability to ship gypsum wallboard by rail outside their usual regional distribution areas to regions where demand is strong. We own or lease 140 railcars for transporting gypsum wallboard. In addition, in order to facilitate distribution in certain strategic areas, we maintain a distribution center in Albuquerque, New Mexico and two reload yards in California. Our rail distribution capabilities

permit us to service customers in markets on both the east and west coasts. During fiscal 2009, approximately 5% of our sales volume of gypsum wallboard was transported by rail. Equipment availability for both rail and truck shipments is expected to remain consistent during fiscal 2009.

Competition. There are eight manufacturers of gypsum wallboard in the U.S. operating a total of approximately 65 plants. We estimate that the three largest producers - USG Corporation, National Gypsum Company and Koch Industries - account for approximately 60% of gypsum wallboard sales in the U.S. In general, a number of our competitors in the gypsum wallboard industry have greater financial, manufacturing, marketing and distribution resources than we do. Furthermore, certain of our competitors operate vertically integrated gypsum wallboard distribution centers, which may provide them with certain marketing advantages over us.

Due to the commodity nature of the product, competition is based principally on price, which is highly sensitive to changes in supply and demand. Product quality and customer service are also important to the customer.

Currently, wallboard production capacity in the United States is estimated at approximately 36 billion square feet per year, which is consistent with production capacity in 2005. Since 2005, approximately 6 billion feet of new manufacturing capacity has been added to the market, which has been offset by the closing of older production facilities. No new capacity is expected to be added during calendar year 2009. The Gypsum Association, an industry trade group, estimates that total calendar 2008 gypsum wallboard shipments by U.S. manufacturers were approximately 25.0 billion square feet, resulting in average industry capacity utilization in calendar 2008 of approximately 65%; however, currently the industry's capacity utilization is at approximately 50%.

Environmental Matters. The gypsum wallboard industry is subject to numerous federal, state and local laws and regulations pertaining to health, safety and the environment. Some of these laws, such as the federal Clean Air Act and the federal Clean Water Act (and analogous state laws), impose environmental permitting requirements and govern the nature and amount of emissions that may be generated when conducting particular operations. Some laws, such as the federal Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA") (and analogous state laws), impose obligations to clean up or remediate spills of hazardous materials into the environment. Other laws require us to reclaim certain land upon completion of extraction and mining operations in our quarries. None of our gypsum wallboard operations are at present the subject of any local, state or federal environmental proceedings or inquiries. We do not, and have not, used asbestos in any of our gypsum wallboard products.

Our gypsum wallboard manufacturing process combusts a significant amount of fuel, especially natural gas, and our operations could therefore be subject to future regulation of greenhouse gas emissions. For a more detailed discussion of the potential climate change regulation (including federal, state and regional), see the "Environmental Matters" section of our cement business description on pages 8-10.

Although our gypsum wallboard operations could be adversely affected by federal, regional or state climate change initiatives, at this time, it is not possible to accurately estimate how future laws or regulations addressing greenhouse gas emissions would impact our business. Any imposition of raw materials or production limitations, fuel-use or carbon taxes or emission limitations or reductions could have a significant impact on the gypsum wallboard manufacturing industry and a material adverse effect on the financial results of our operations.

Capital Expenditures. We had no capital expenditures related to compliance with environmental regulations applicable to our gypsum wallboard operations during fiscal 2009, and we do not expect any material capital expenditures during fiscal 2010.

CEMENT OPERATIONS

Company Operations. Our cement production facilities are located in or near Buda, Texas; LaSalle, Illinois; Laramie, Wyoming; and Fernley, Nevada. The LaSalle, Illinois, Laramie, Wyoming and Fernley, Nevada facilities are wholly-owned. The Buda, Texas plant is owned by Texas Lehigh Cement Company LP, a limited partnership joint venture owned 50% by us and 50% by Lehigh Cement Company, a subsidiary of Heidelberg Cement AG. Our LaSalle, Illinois plant operates under the name of Illinois Cement Company, the Laramie, Wyoming plant operates under the name of Mountain Cement Company and the Fernley, Nevada plant under the name of Nevada Cement Company.

Cement is the basic binding agent for concrete, a primary construction material. Our modern cement plants utilize dry process technology and at present approximately 85% of our clinker capacity is from preheater or preheater/pre-calciner kilns. The following table sets forth certain information regarding these plants:

Location	Rated Annual Clinker Capacity (M short tons) ⁽¹⁾	Manufacturing Process	Number of Kilns	Kiln Dedication Date	Estimated Minimum Limestone Reserves (Years)
Buda, TX ⁽²⁾	1,300	Dry – 4 Stage Preheater/ Pre-calciner	1	1983	50+ ⁽⁵⁾
LaSalle, IL	1,000	Dry – 5 Stage Preheater/ Pre-calciner	1	2006	35 ⁽⁵⁾
Laramie, WY	650	Dry – 2 Stage Preheater	1	1988	29 ⁽⁶⁾
Fernley, NV	505	Dry – Long Dry Kiln	1	1996	50+ ⁽⁶⁾
		Dry – Long Dry Kiln	1	1964	
		Dry – 1 Stage Preheater	1	1969	
Total–Gross ⁽³⁾	3,455				
Total–Net ⁽³⁾⁽⁴⁾	2,805				

⁽¹⁾ One short ton equals 2,000 pounds.

⁽²⁾ The amount shown represents 100% of plant capacity and production. This plant is owned by a separate limited partnership in which the Company has a 50% interest.

⁽³⁾ Generally, a plant's cement grinding production capacity is greater than its clinker production capacity.

⁽⁴⁾ Net of partner's 50% interest in the Buda, Texas plant.

⁽⁵⁾ Owned reserves.

⁽⁶⁾ Includes both owned and leased reserves.

Our net cement production, including our 50% share of the cement Joint Venture production, and conversion of purchased clinker, totaled 2.3 million tons in fiscal 2009 and 2.8 million tons fiscal 2008. Total net cement sales, including our 50% share of cement sales from the Joint Venture, were 2.9 million tons in fiscal 2009 and 3.4 million tons in fiscal 2008. During the past two years, we imported and purchased cement from others to be resold. Purchased cement sales typically occur at lower gross profit margins. In fiscal 2009, 16% of the cement sold by us was acquired from outside sources, compared to 19% in fiscal 2008. Texas Lehigh Cement Company, our 50% joint venture, owns a minority interest in an import terminal in Houston, Texas. Texas Lehigh can purchase up to 495,000 short tons annually from the cement terminal.

Cement production is capital-intensive and involves high initial fixed costs. We previously announced plans to modernize and expand our Nevada Cement and Mountain Cement facilities, which are our oldest and least efficient plants. Due to the current conditions in the Mountain and Nevada markets, we do not expect to begin significant construction activity on these plants during 2009. Once significant construction is begun, we expect it will take between 18 and 24 months to complete.

Raw Materials and Fuel Supplies. The principal raw material used in the production of portland cement is calcium carbonate in the form of limestone. Limestone is obtained principally through mining and extraction operations conducted at quarries that we own or lease and are located in close proximity to our plants. We believe that the estimated recoverable limestone reserves owned or leased by us will permit each of our plants to operate at our present production capacity for at least 30 years. Other raw materials used in substantially smaller quantities than limestone are sand, clay, iron ore and gypsum. These materials are readily available and can either be obtained from Company-owned or leased reserves or purchased from outside suppliers.

Our cement plants use coal and petroleum coke as their primary fuel, but are equipped to burn natural gas as an alternative. The cost of delivered coal and petroleum coke rose in fiscal 2009 and may rise again in fiscal 2010. We have not used hazardous waste-derived fuels in any of our plants. Our plants in LaSalle, Illinois and Buda, Texas are permitted to burn scrap tires as a substitute fuel. Electric power is also a major cost component in our manufacturing process and we have sought to diminish overall power costs by adopting interruptible power supply agreements. These agreements may expose us to some production interruptions during periods of power curtailment.

Sales and Distribution. Demand for cement can be cyclical, because demand for concrete products is derived from demand for construction, with public works contracts comprising over 50% of total demand. Construction spending and cement consumption declined throughout calendar 2008, and have continued to soften during the first three months of calendar 2009. The construction sector is also affected by the general condition of the economy as well as regional economic influences. Regional cement markets experience peaks and valleys correlated with regional construction cycles. Additionally, demand for cement is seasonal, particularly in northern states where inclement winter weather often affects construction activity. Cement sales are generally greater from spring through the middle of autumn than during the remainder of the year. The impact to our business of regional construction cycles may be mitigated to some degree by our geographic diversification.

The following table sets forth certain information regarding the geographic area served by each of our cement plants and the location of our distribution terminals in each area. We have a total of 11 cement storage and distribution terminals that are strategically located to extend the sales areas of our plants.

<u>Plant Location</u>	<u>Principal Geographic Areas</u>	<u>Distribution Terminals</u>
Buda, Texas	Texas and western Louisiana	Corpus Christi, Texas Houston, Texas Orange, Texas Roanoke (Ft. Worth), Texas Waco, Texas Houston Cement Company (Joint Venture), Houston, Texas
LaSalle, Illinois	Illinois and southern Wisconsin	Hartland, Wisconsin
Laramie, Wyoming	Wyoming, Utah, Colorado and western Nebraska	Salt Lake City, Utah Denver, Colorado North Platte, Nebraska
Fernley, Nevada	Northern Nevada and northern California	Sacramento, California

Cement is distributed directly to our customers mostly through customer pickups or by common carriers from plants or distribution terminals. We transport cement principally by rail to our storage and distribution terminals. No single customer accounted for 10% or more of our cement segment sales during fiscal 2009. Sales are made on the basis of competitive prices in each market. As is customary in the industry, we do not typically enter into long-term sales contracts.

Competition. The cement industry is extremely competitive as a result of multiple domestic suppliers and the importation of foreign cement through various terminal operations. Approximately 85% of the U.S. cement industry is owned by foreign international companies. Competition among producers and suppliers of cement is based primarily on price, with consistency of quality and service to customers being important but of lesser significance. Price competition among individual producers and suppliers of cement within a geographic area is intense because of the fungible nature of the product. Because of cement's low value-to-weight ratio, the relative cost of transporting cement on land is high and limits the geographic area in which each company can market its products profitably; therefore, the U.S. cement industry is fragmented into regional geographic areas rather than a single national selling area. No single cement company has a distribution of plants extensive enough to serve all geographic areas, so profitability is sensitive to shifts in the balance between regional supply and demand.

Cement imports into the U.S. occur primarily to supplement domestic cement production. Cement is typically imported into deep water ports or transported on the Mississippi River system near major population centers to take advantage of lower waterborne freight costs versus higher truck and rail transportation costs that U.S. based manufacturers incur to deliver into the same areas.

The Portland Cement Association estimates that imports represented approximately 12% of cement used in the U.S. during calendar 2008 as compared with approximately 21% in 2007 and 29% in 2006.

Environmental Matters. Our cement operations are subject to numerous federal, state and local laws and regulations pertaining to health, safety and the environment. Some of these laws, such as the federal Clean Air Act and the federal Clean Water Act (and analogous state laws) impose environmental permitting requirements and govern the nature and amount of emissions that may be generated when conducting particular operations. Some laws, such as the federal CERCLA (and analogous state laws) impose obligations to clean up or remediate spills of hazardous materials into the environment. Other laws require us to reclaim certain land upon completion of extraction and mining operations in our quarries. We believe that we have obtained all the material environmental permits that are necessary to conduct our operations. We further believe that we are conducting our operations in substantial compliance with these permits. In addition, none of our sites are listed as a CERCLA "Superfund" site.

Four environmental issues involving the cement manufacturing industry deserve special mention. The first issue involves cement kiln dust or CKD. The federal Environmental Protection Agency, or EPA, has been evaluating the regulatory status of CKD under the federal Resource Conservation and Recovery Act ("RCRA") for a number of years. In 1999, the EPA proposed a rule that would allow states to regulate properly-managed CKD as a non-hazardous waste under state laws and regulations governing solid waste. In contrast, CKD that was not properly managed would be treated as a hazardous waste under RCRA. In 2002, the EPA confirmed its intention to exempt properly-managed CKD from the hazardous waste requirements of RCRA. The agency announced that it would collect additional data over the next three to five years to determine if the states' regulation of CKD is effective, which may lead the EPA to withdraw its 1999 proposal to treat any CKD as a hazardous waste. In May 2008, the EPA indicated that it continues to consider an approach whereby it would finalize its 1999 proposal to exempt properly-managed CKD wastes and establish protective CKD management standards; however, as of May 2009 the EPA has reported that it continues to consider comments received and is uncertain when its proposal will be finalized.

Currently, substantially all CKD produced in connection with our ongoing operations is recycled, and therefore such CKD is not viewed as a waste under RCRA. However, CKD was historically collected and stored on-site at our Illinois, Nevada and Wyoming cement plants and at a former plant site in Corpus Christi, Texas, which is no longer in operation. If either the EPA or the states decide to impose management standards on this CKD at some point in the future, we could incur additional costs to comply with those requirements with respect to our historically collected CKD. CKD that comes in contact with water might produce a leachate with an alkalinity high enough to be classified as hazardous and might also leach certain hazardous trace metals therein.

A second industry environmental issue involves the historical disposal of refractory brick containing chromium. Such refractory brick was formerly used widely in the cement industry to line cement kilns. We currently do not use refractory brick containing chromium, and we crush spent refractory brick which is then used as raw feed in the kiln.

A third industry environmental issue involves the potential regulation of our emission of “greenhouse gases,” including carbon dioxide. Many scientists and others believe that greenhouse gases contribute to the warming of the Earth’s atmosphere resulting in global climate change. The consequences of greenhouse gas emission reduction regulations for our cement operations will likely be significant because (1) the cement manufacturing process requires the combustion of large amounts of fuel to generate very high kiln temperatures, and (2) the production of carbon dioxide is a byproduct of the calcination process, whereby carbon dioxide is removed from calcium carbonate to produce calcium oxide.

Potential regulation of greenhouse gas emissions may originate from several sources that are currently considering the global climate change issue. On the federal level, Democratic leaders of the House Energy and Commerce Committee, Representatives Henry Waxman (D-CA) and Ed Markey (D-MA), introduced an energy and climate bill, “The American Clean Energy and Security Act of 2009,” or H.R. 2454, on March 31, 2009. This legislation would require the reduction of greenhouse gas emissions in phases, starting in 2012 and achieving an 83% reduction below 2005 levels by 2050. The Waxman-Markey bill would regulate and reduce greenhouse gas emissions through a “cap-and-trade” program, which would entail the government’s issuance of a set amount of tradable emission permits or allowances. The Waxman-Markey bill has garnered bipartisan support and many key Congressional Members believe its passage is likely by the end of 2009.

In April 2007, the U.S. Supreme Court decided *Massachusetts v. EPA*, which related to the regulation of carbon dioxide emissions from motor vehicles under the Clean Air Act. The Court held that greenhouse gases, including carbon dioxide, fall under the federal Clean Air Act’s definition of “air pollutant.” The *Massachusetts* decision may eventually result in regulation of carbon dioxide and other greenhouse gas emissions from stationary sources (such as manufacturing facilities) under certain Clean Air Act programs. In response to the *Massachusetts* decision, in July 2008 the EPA issued an advance notice of proposed rulemaking and is currently considering public comments made regarding greenhouse gas effects and regulations under the Clean Air Act. Furthermore, the EPA recently issued proposed regulations that would require the economy-wide monitoring and reporting of greenhouse gas emissions on an annual basis, including extensive greenhouse gas monitoring and reporting requirements applicable to our industries. The EPA has also recently proposed findings (in response to the *Massachusetts* decision) that greenhouse gases in the atmosphere endanger public health and welfare, and that emissions from mobile sources cause or contribute to greenhouse gases in the atmosphere. These proposed findings, if finalized as proposed, would not immediately affect our operations, but standards eventually promulgated pursuant to these findings could affect our operations and our ability to obtain air permits for new or modified facilities. Therefore, it appears likely that there will be federal regulation of greenhouse gas emissions by the EPA under the Clean Air Act if Congress does not adopt new legislation specifically addressing emissions of greenhouse gases.

Several states have also taken measures to reduce emissions of greenhouse gases, primarily through the planned development of greenhouse gas emission inventories or registries and/or regional greenhouse gas “cap and trade” programs. For example, California Governor Arnold Schwarzenegger signed AB 32 into law in late 2006, calling for a cap on greenhouse gas emissions throughout California and a statewide reduction to 1990 levels by 2020. In December 2008, the California Air Resource Board approved a plan for implementing AB 32. The plan contemplates a cap-and-trade program, beginning in 2012. Many states have also joined together to form regional initiatives, which include the Regional Greenhouse Gas Initiative in the northeast, the Western Regional Climate Action Initiative and the Midwestern Greenhouse Gas Accord.

Although our cement operations are not currently adversely affected by federal, regional or state climate change initiatives it is not possible, at this time to accurately estimate how future laws or regulations addressing greenhouse gas emissions would impact our business. Any imposition of raw materials or production limitations, fuel-use or carbon taxes or emission limitations or reductions could have a significant impact on the cement manufacturing industry and a material adverse effect on us and our results of operations.

The fourth industry environmental issue is that the EPA in 1999 promulgated regulations for certain toxic air pollutants, including standards for portland cement manufacturing. The maximum attainable control technology standards require cement plants to test for certain pollutants and meet certain emission and operating standards. We have no reason to believe, however, that these standards have placed us at a competitive disadvantage. Recently, the EPA has proposed to significantly reduce these emission standards for certain air pollutants from Portland cement kilns. The proposal would set limits on mercury emissions from existing Portland cement kilns and would increase the stringency of emission limits for new kilns. The proposal would also set emission limits for total hydrocarbons, particulate matter, and sulfur dioxide from cement kilns of all sizes, and would reduce hydrochloric acid emissions from kilns that are large emitters. It is not possible to accurately estimate how these rules (if adopted) would impact our business once they become fully implemented in 2013; however, they could materially increase our cost of production. As with the 1999 regulations, we do not believe we would be placed at a competitive disadvantage by such rules.

We believe that our current procedures and practices in our operations, including those for handling and managing hazardous materials, are consistent with industry standards and are in substantial compliance with applicable environmental laws and regulations. Nevertheless, because of the complexity of our operations and the environmental laws to which we are subject, there can be no assurance that past or future operations will not result in violations, remediation costs or other liabilities or claims. Moreover, we cannot predict what environmental laws will be enacted or adopted in the future or how such future environmental laws or regulations will be administered or interpreted. Compliance with more stringent environmental laws, or stricter interpretation of existing environmental laws, could necessitate significant capital outlays.

Capital Expenditures. We had capital expenditures related to compliance with environmental regulations applicable to our cement operations of \$3.3 million during fiscal 2009 and expect to spend an additional \$2.1 million during fiscal 2010. The majority of the expenditures in fiscal 2009 related to upgrades to the baghouse compartments at Illinois Cement Company.

RECYCLED PAPERBOARD OPERATIONS

Company Operations. Our recycled paperboard manufacturing operation, acquired in November 2000, is located in Lawton, Oklahoma. The paperboard company, which we refer to as Republic, operates a state-of-the-art paper mill producing high-quality, low-basis weight gypsum liner paper for the wallboard industry from 100% recycled fiber. Manufacturing capabilities at Republic, aside from the gypsum liner products, include recycled containerboard grades (linerboard and medium) and lightweight recycled paper for paper bags. In addition, recycled industrial paperboard grades (tube/core stock and protective angle board) are produced to maximize manufacturing efficiencies.

The Mill. Our paperboard operation has a highly technologically advanced paper machine designed primarily for gypsum liner production, although the machine is capable of producing other containerboard products. The paper's uniform cross-directional strength and finish characteristics facilitate the efficiencies of new high-speed wallboard manufacturing lines.

The paperboard operation manufactures high-strength gypsum liner that is approximately 10% lighter in basis weight than generally available in the U.S. The low-basis weight product utilizes less recycled fiber to produce paper that, in turn, absorbs less moisture during the gypsum wallboard manufacturing process resulting in reduced drying and energy (natural gas) usage. The low-basis weight paper also reduces the overall finished board weight, providing wallboard operations with more competitive transportation costs – both the inbound and outbound segments.

Raw Materials. The principal raw materials are recycled paper fiber (recovered waste paper), water and specialty paper chemicals. The largest waste paper source used by the operation is old cardboard containers (known as OCC). A blend of high grades (white papers consisting of ink-free papers such as news blank and unprinted papers) is used in the facing paper to produce a white product with customer-desired properties.

We believe that an adequate supply of OCC recycled fiber will continue to be available from generators and brokers located within a 600 mile radius of the paper mill. The majority of the recycled fiber purchased is delivered via truck, with a limited amount (5%) delivered by rail. Prices are subject to market fluctuations based on generation of material (supply), demand and the presence of the export market. The current outlook for fiscal year 2010 is for waste paper prices to remain flat for the first half of fiscal 2010 and, largely due to weakening demand for consumer goods shrinking the demand for cardboard packaging, increase moderately thereafter. Current customer contracts include price escalators that partially offset/compensate for changes in raw material fiber prices.

The chemicals used in the paper making operation, including size, retention aids, dry strengths additives, biocides and bacteria controls, are readily available from several manufacturers at competitive prices. We are under a contractual agreement with our current supplier through December 2010.

The manufacture of recycled paperboard involves the use of large volumes of water in the production process. The mill uses water provided under an agreement with the City of Lawton, Oklahoma municipal services. The agreement, which commenced in calendar year 1999, is for a fifteen year term with two automatic five-year extensions, unless we notify the City in writing at least six months prior to the expiration of the term or extended term. Although adequate sources of water have historically been available, an extended period of general water shortages, legal curtailment of any paper mill's current water sources or uses, or deterioration of the current quality of water could adversely affect the operations, thereby limiting our production capacity.

Electricity, natural gas and other utilities rates are available to us at either contracted rates or standard industrial rates in adequate supplies. These utilities are subject to standard industrial curtailment provisions. In the event that a natural gas curtailment or unfavorable pricing condition should occur, the Lawton mill is equipped to use fuel oil as an alternative fuel in the No.1 boiler.

Paperboard operations are generally large consumers of energy, primarily natural gas and electricity. During fiscal 2009, natural gas pricing increased during the first half of the year, but moderated over the last half of the year. If natural gas prices were to increase, they would negatively impact fiscal 2010 production costs and operating earnings. The paper mill is subject to an electricity supply agreement with Public Service of Oklahoma (PSO); however, this power company has a large dependency on natural gas, which impacts our electricity rates.

Sales and Distribution. Our manufactured recycled paperboard products are sold primarily to gypsum wallboard manufacturers. During fiscal 2009, approximately 42% of the recycled paperboard sold by the paper mill was consumed by the Company's gypsum wallboard manufacturing operations, approximately 27% was sold to CertainTeed, pursuant to a paper supply contract (the "CertainTeed Agreement"), and the remainder was shipped to containerboard and other manufacturers. The existing CertainTeed Agreement was originally entered into by Republic Paperboard and James Hardie Gypsum, Inc. in 1999; however, the James Hardie North American gypsum wallboard operations were acquired by BPB Gypsum, whose operations were then purchased during fiscal 2006 by St. Gobain. St. Gobain's North American operations conduct business under the CertainTeed trade name. The loss of CertainTeed as a customer or a termination or reduction of CertainTeed's production of gypsum wallboard, unless replaced by a commercially similar arrangement, could have a material adverse effect on the Company.

Environmental Matters. Prior to November 2000, our now closed Commerce City, Colorado paper mill (the "Commerce City Mill") had investigated the presence of subsurface petroleum hydrocarbons at the mill site and had retained an environmental consultant who concluded that fuel oil, jet fuel, and gasoline additives had migrated in the subsurface of the property from an adjacent property. As a result of an additional subsequent investigation by the Commerce City Mill, new environmental conditions were uncovered that appear to stem from underground storage tank use on the mill site. The Commerce City Mill and a former owner of the Commerce City Mill have entered into a participation agreement with the Division of Oil and Public Safety of the Colorado Department of Labor and Employment (the "Oil Division") to respond to those

conditions that appear to stem from historic underground storage tank use. Under the participation agreement, the Commerce City mill will pay 25% (with the former owner paying 75%) of the costs associated with the investigation and remediation efforts approved by both parties. The former owner and we have each approved and submitted to the Colorado Oil Division a Corrective Action Plan (the "CAP") for the removal of the subsurface petroleum hydrocarbon at the Commerce City Mill. The CAP was approved by the Colorado Oil Division in calendar 2002. All remediation has been completed and we are awaiting final approval by the State of Colorado.

CONCRETE AND AGGREGATES OPERATIONS

Company Operations. Readymix concrete is a versatile, low-cost building material used in almost all construction. The production of readymix concrete involves the mixing of cement, sand, gravel, or crushed stone and water to form concrete, which is then sold and distributed to numerous construction contractors. Concrete is produced in batch plants and transported to the customer's job site in mixer trucks.

The construction aggregates business consists of the mining, extraction, production and sale of crushed stone, sand, gravel and lightweight aggregates such as expanded clays and shales. Construction aggregates of suitable characteristics are employed in virtually all types of construction, including the production of portland cement concrete and asphaltic mixes in highway construction and maintenance.

We produce and distribute readymix concrete from company-owned sites north of Sacramento, California and in Austin, Texas. The following table sets forth certain information regarding these operations:

<u>Location</u>	<u>Number of Plants</u>	<u>Number of Trucks</u>
Northern California	3	41
Austin, Texas	<u>6</u>	<u>85</u>
Total	<u>9</u>	<u>126</u>

We conduct aggregate operations near our concrete facilities in northern California and Austin, Texas. Aggregates are obtained principally by mining and extracting from quarries owned or leased by the Company. The following table sets forth certain information regarding these operations:

<u>Location</u>	<u>Types of Aggregates</u>	<u>Estimated Annual Production Capacity (Thousand tons)</u>	<u>Estimated Minimum Reserves (Years)</u>
Northern California	Sand and Gravel	4,000	100+ ⁽¹⁾
Austin, Texas	Limestone	<u>3,000</u>	50+ ⁽²⁾
Total		<u>7,000</u>	

⁽¹⁾ Owned reserves through various subsidiaries.

⁽²⁾ Leased reserves.

Our total net aggregate sales were 3.5 million tons in fiscal 2009 and 3.8 million tons in fiscal 2008. Total aggregates production was 3.4 million tons for fiscal 2009 and 5.1 million for fiscal 2008. A portion of our total aggregates production is used internally by our readymix concrete operations.

Raw Materials. We supply from our manufactured cement facilities approximately 100% and 0% of the cement requirements for our Austin and northern California concrete operations, respectively. We supply approximately 45% and 63%, respectively, of our aggregates requirements for our Austin and northern California concrete operations. We obtain the balance of our cement and aggregates requirements from multiple sources in each of these areas.

We mine and extract limestone, sand and gravel, the principal raw materials used in the production of aggregates, from quarries owned or leased by us and located near our plants. The northern California quarry is estimated to contain over one billion tons of sand and gravel reserves. The Austin, Texas quarry is covered by a lease which expires in 2060. Based on its current production capacity, we estimate our northern California and Austin, Texas quarries contain over 100 years and approximately 50 years of reserves, respectively.

Sales and Distribution. Demand for readymix concrete and aggregates largely depends on local levels of construction activity. Construction activity is also subject to weather conditions, the availability of financing at reasonable rates and overall fluctuations in local economies, and therefore tends to be cyclical. We sell readymix concrete to numerous contractors and other customers in each plant's selling area. Our batch plants in Austin and northern California are strategically located to serve each selling area. Concrete is delivered from the batch plants by company owned trucks.

We sell aggregates to building contractors and other customers engaged in a wide variety of construction activities. Aggregates are delivered from our aggregate plants by common carriers and customer pick-up. One customer accounted for approximately 10% of our segment revenues in fiscal 2009. We are continuing our efforts to secure a rail link from our principal aggregates deposit north of Sacramento, California to supply extended markets in northern California.

Competition. Both the concrete and aggregates industries are highly fragmented, with numerous participants operating in each local area. Because the cost of transporting concrete and aggregates is very high relative to product values, producers of concrete and aggregates typically can profitably sell their products only in areas within 50 miles of their production facilities. Barriers to entry in each industry are low, except with respect to environmental permitting requirements for new aggregate production facilities and zoning of land to permit mining and extraction of aggregates.

Environmental Matters. The concrete and aggregates industry is subject to environmental regulations similar to those governing our cement operations. None of our concrete or aggregates operations are presently the subject of any material local, state or federal environmental proceeding or inquiries.

EMPLOYEES

As of March 31, 2009, we had approximately 1,600 employees.

As of March 31, 2009, we had approximately 400 employees employed under collective bargaining agreements and various supplemental agreements with local unions.

WHERE YOU CAN FIND MORE INFORMATION

We make our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to these reports available free of charge through the investor relations page of our website, located at www.eaglematerials.com as soon as reasonably practicable after they are filed with or furnished to the SEC. This reference to our website is merely intended to suggest where additional information may be obtained by investors, and the materials and other information presented on our website are not incorporated in and should not otherwise be considered part of this Report. Alternatively, you may contact our investor relations department directly at (214) 432-2000 or by writing to Eagle Materials Inc., Investor Relations, 3811 Turtle Creek Blvd., Suite 1100, Dallas, Texas 75219.

ITEM 1A. RISK FACTORS

The foregoing discussion of our business and operations should be read together with the risk factors set forth below. They describe various risks and uncertainties to which we are or may become subject, many of which are outside of our control. These risks and uncertainties, together with other factors described elsewhere in this Report, have affected, or may in the future affect, our business, operations, financial condition and results of operations in a material and adverse manner.

We are affected by the level of demand in the construction industry, which is currently experiencing a significant downturn.

Demand for our products is directly related to the level of activity in the construction industry, which includes residential, commercial and infrastructure construction. In particular, the downturn in residential construction has impacted, and will likely continue to adversely impact, our wallboard business. The residential construction industry is currently undergoing a significant downturn, which commenced in 2006 and has become more pronounced in recent periods. The effects of this downturn have been exacerbated by market disruptions resulting from the subprime mortgage crisis, which began in the second half of 2007, and the ensuing financial crisis affecting the banking system and financial markets, which became evident in the third quarter of 2008. In 2008, similar trends have emerged in commercial construction. Furthermore, activity in the infrastructure construction business is directly related to the amount of government funding available for such projects. Any decrease in the amount of government funds available for such projects or any decrease in construction activity in general (including a continued decrease in residential construction or a weakening of commercial construction) could have a material adverse effect on our business, financial condition and results of operations.

Our customers participate in cyclical industries, which are subject to industry downturns.

A majority of our revenues are from customers who are in industries and businesses that are cyclical in nature and subject to changes in general economic conditions. In addition, since our operations are in a variety of geographic markets, our businesses are subject to the economic conditions in each such geographic market. General economic downturns or localized downturns in the regions where we have operations, including the current and any future downturns in the residential or commercial construction industries, have the potential of adversely affecting demand for our products. Furthermore, additions to the production capacity of industry participants, particularly in the gypsum wallboard industry, have the potential of creating an imbalance between supply and demand, which could adversely affect the prices at which we sell our products and adversely affect the collectability of our receivable. In general, any further downturns in the industries to which we sell our products or any further increases in capacity in the gypsum wallboard, paperboard and cement industries could have a material adverse effect on our business, financial condition and results of operations.

Volatility and disruption of financial markets could negatively impact our customers and therefore our results of operations.

Volatility and disruption of financial markets could limit customers' ability to obtain adequate financing to maintain operations and result in a decrease in sales volume or default on amounts owed to us that could have a negative impact on our results of operations.

Volatility and disruption of financial markets could affect access to credit.

The current difficult economic market environment is causing contraction in the availability and an increase in the cost of credit in the marketplace. This could potentially reduce the sources of liquidity for the Company.

The value of investments are influenced by economic and market conditions.

The current economic environment could negatively impact the fair value of pension assets, which could increase future funding requirements of the pension trusts.

Our business is seasonal in nature, and this causes our quarterly results to vary significantly.

A majority of our business is seasonal with peak revenues and profits occurring primarily in the months of April through November when the weather in our markets is more favorable to construction activity. Quarterly results have varied significantly in the past and are likely to vary significantly from quarter to quarter in the future. Such variations could have a negative impact on the price of our common stock.

Our operations and our customers are subject to extensive governmental regulation, which can be costly and burdensome.

Our operations and those of our customers are subject to and affected by federal, state and local laws and regulations with respect to such matters as land usage, street and highway usage, noise level and health and safety and environmental matters. In many instances, various certificates, permits or licenses are required in order for us or our customers to conduct business or for construction and related operations. Although we believe that we are in compliance in all material respects with regulatory requirements, there can be no assurance that we will not incur material costs or liabilities in connection with regulatory requirements or that demand for our products will not be adversely affected by regulatory issues affecting our customers. In addition, future developments, such as the discovery of new facts or conditions, new or stricter laws or regulations (including without limitation, climate change legislation described below), or stricter interpretations of existing laws or regulations, may impose new liabilities on us, require additional investment by us or prevent us from opening or expanding plants or facilities, any of which could have a material adverse effect on our financial condition or results of operations.

Legislative and regulatory measures to address greenhouse gas emissions are in various phases of discussions or implementation at national, regional and state levels. The potential consequences of greenhouse gas emission reduction measures for our operations are potentially significant because (1) the cement manufacturing process requires the combustion of large amounts of fuel, (2) in our cement manufacturing process, the production of carbon dioxide is a byproduct of the calcination process, whereby carbon dioxide is removed from calcium carbonate to produce calcium oxide, and (3) our gypsum wallboard manufacturing process combusts a significant amount of fuel, especially natural gas. At this time, it is not possible to accurately estimate how laws or regulations addressing greenhouse gas emissions would impact our business. Any imposition of raw materials or production limitations, fuel-use or carbon taxes or emission limitations or reductions could have a significant impact on the cement manufacturing industry and the gypsum wallboard manufacturing industry and a material adverse effect on us and our results of operations.

Furthermore, the EPA recently issued proposed regulations that would require the economy-wide monitoring and reporting of greenhouse gas emissions on an annual basis, including extensive greenhouse gas monitoring and reporting requirements applicable to our industries. The EPA has also recently proposed findings (in response to the *Massachusetts* decision) that greenhouse gases in the atmosphere endanger public health and welfare, and that emissions from mobile sources cause or contribute to greenhouse gases in the atmosphere. These proposed findings, if finalized as proposed, would not immediately affect our operations, but standards eventually promulgated pursuant to these findings could affect our operations and our ability to obtain air permits for new or modified facilities.

Our products are commodities, which are subject to significant changes in supply and demand and price fluctuations.

The products sold by us are commodities and competition among manufacturers is based largely on price. Prices are often subject to material changes in response to relatively minor fluctuations in supply and demand, general economic conditions and other market conditions beyond our control. Increases in the industry's production capacity for products such as gypsum wallboard or cement or increases in cement imports may create an oversupply of such products and negatively impact product prices. There can be no assurance that prices for products sold by us will not decline in the future or that such declines will not have a material adverse effect on our business, financial condition and results of operations.

We are subject to the risk of unfavorable weather conditions during peak construction periods and other unexpected operational difficulties.

Because a majority of our business is seasonal, unfavorable weather conditions and other unexpected operational difficulties during peak construction periods could adversely affect operating income and cash flow and could have a disproportionate impact on our results of operations for the full year.

Our results of operations are subject to significant changes in the cost and availability of fuel, energy and other raw materials.

Major cost components in each of our businesses are the cost of fuel, energy and raw materials. Significant increases in the cost of fuel, energy or raw materials or substantial decreases in their availability could materially and adversely affect our sales and operating profits. Prices for fuel, energy or raw materials used in connection with our businesses could change significantly in a short period of time for reasons outside our control. Prices for fuel and electrical power, which are significant components of the costs associated with our gypsum wallboard and cement businesses, have fluctuated significantly in recent years and are expected to increase in the future. In the event of large or rapid increases in prices, we may not be able to pass the increases through to our customers in full, which would reduce our operating margin.

We may become subject to significant clean-up, remediation and other liabilities under applicable environmental laws.

Our operations are subject to state, federal and local environmental laws and regulations, which impose liability for cleanup or remediation of environmental pollution and hazardous waste arising from past acts. These laws and regulations also require pollution control and prevention, site restoration and operating permits and/or approvals to conduct certain of our operations. Certain of our operations may from time-to-time involve the use of substances that are classified as toxic or hazardous substances within the meaning of these laws and regulations. Additionally, any future laws or regulations addressing greenhouse gas emissions would likely have a negative impact on our business or results of operations, either through the imposition of raw material or production limitations, fuel-use or carbon taxes or emission limitations or reductions. We are unable to accurately estimate the impact on our business or results of operations of any such law or regulation at this time. Risk of environmental liability (including the incurrence of fines, penalties or other sanctions or litigation liability) is inherent in the operation of our businesses. As a result, it is possible that environmental liabilities and compliance with environmental regulations could have a material adverse effect on our operations in the future.

Our debt agreements contain restrictive covenants and require us to meet certain financial ratios and tests, which limit our flexibility and could give rise to a default if we are unable to remain in compliance.

Our amended and restated credit agreement and the note purchase agreements governing our senior notes contain, among other things, covenants that limit our ability to finance future operations or capital needs or to engage in other business activities, including our ability to:

- Incur additional indebtedness;
- Sell assets or make other fundamental changes;
- Engage in mergers and acquisitions;
- Pay dividends and make other restricted payments;
- Make investments, loans, advances or guarantees;
- Encumber the assets of the Company and its restricted subsidiaries;
- Enter into transactions with our affiliates.

In addition, these agreements require us to meet and maintain certain financial ratios and tests, which may require that we take action to reduce our debt or to act in a manner contrary to our business objectives. Events beyond our control, including industry downturns and changes in general business and economic conditions may impair our ability to comply with these covenants or meet those financial ratios and tests. A breach of any of these covenants or failure to maintain the required ratios and meet the required tests may result in an event of default under those agreements. This may allow the lenders under those agreements to declare all amounts outstanding thereunder to be immediately due and payable, terminate any commitments to extend further credit to us and pursue other remedies available to them under the applicable agreements. If this occurs, our indebtedness may be accelerated and we may not be able to refinance the accelerated indebtedness on favorable terms, or at all, or repay the accelerated indebtedness.

Increases in interest rates could adversely affect demand for our products, which would have an adverse effect on our results of operations.

Our business is significantly affected by the movement of interest rates. Interest rates have a direct impact on the level of residential, commercial and infrastructure construction activity. Higher interest rates could result in decreased demand for our products, which would have a material adverse effect on our business and results of operations. In addition, increases in interest rates could result in higher interest expense related to borrowings under our credit facilities.

Our production facilities may experience unexpected equipment failures, catastrophic events and scheduled maintenance.

Interruptions in our production capabilities may cause our productivity and results of operations to decline significantly during the affected period. Our manufacturing processes are dependent upon critical pieces of equipment. Such equipment may, on occasion, be out of service as a result of unanticipated events such as fires, explosions, violent weather conditions or unexpected operational difficulties. We also have periodic scheduled shut-downs to perform maintenance on our facilities. Any significant interruption in production capability may require us to make significant capital expenditures to remedy problems or damage as well as cause us to lose revenue due to lost production time, which could have a material adverse effect on our results of operations and financial condition.

Significant changes in the cost and availability of transportation could adversely affect our business, financial condition and results of operations.

Some of the raw materials used in our manufacturing processes, such as coal or coke, are transported to our facilities by truck or rail. In addition, the transportation costs associated with the delivery of our wallboard products are a significant portion of the variable cost of our gypsum wallboard segment. Significant increases in the cost of fuel or energy can result in material increases in the cost of transportation which could materially and adversely affect our operating profits. In addition, reductions in the availability of certain modes of transportation such as rail or trucking could limit our ability to deliver product and therefore materially and adversely affect our operating profits.

This report includes various forward-looking statements, which are not facts or guarantees of future performance and which are subject to significant risks and uncertainties.

This report and other materials we have filed or will file with the SEC, as well as information included in oral statements or other written statements made or to be made by us, contain or may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Exchange Act of 1934 and the Private Securities Litigation Reform Act of 1995. You can identify these statements by the fact that they do not relate to matters of a strictly factual or historical nature and generally discuss or relate to forecasts, estimates or other expectations regarding future events. Generally, the words “believe,” “expect,” “intend,” “estimate,” “anticipate,” “project,” “may,” “can,” “could,” “might,” “will” and similar expressions identify forward-looking statements, including statements related to expected operating and performing results, planned transactions, plans and objectives of management, future developments or conditions in the industries in which we participate, including future prices for our products, audits and legal proceedings to which we are a party and other trends, developments and uncertainties that may affect our business in the future.

Forward-looking statements are not historical facts or guarantees of future performance but instead represent only our beliefs at the time the statements were made regarding future events, which are subject to significant risks, uncertainties, and other factors, many of which are outside of our control. Any or all of the forward-looking statements made by us may turn out to be materially inaccurate. This can occur as a result of incorrect assumptions, changes in facts and circumstances or the effects of known risks and uncertainties. Many of the risks and uncertainties mentioned in this report or other reports filed by us with the SEC, including those discussed in the risk factor section of this, will be important in determining whether these forward-looking statements prove to be accurate. Consequently, neither our stockholders nor any other person should place undue reliance on our forward-looking statements and should recognize that actual results may differ materially from those that may be anticipated by us.

All forward-looking statements made in this report are made as of the date hereof, and the risk that actual results will differ materially from expectations expressed in this report will increase with the passage of time. We undertake no obligation, and disclaim any duty, to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changes in our expectations or otherwise.

ITEM 1B. UNRESOLVED STAFF COMMENTS

There are no unresolved Staff comments.

ITEM 2. PROPERTIES

We operate cement plants, quarries and related facilities at Buda, Texas; LaSalle, Illinois; Fernley, Nevada and Laramie, Wyoming. The Buda plant is owned by a partnership in which we have a 50% interest. Our principal aggregate plants and quarries are located in the Austin, Texas area and Marysville, California. In addition, we operate gypsum wallboard plants in Albuquerque and nearby Bernalillo, New Mexico; Gypsum, Colorado; Duke, Oklahoma; and in Georgetown, South Carolina. We produce recycled paperboard at Lawton, Oklahoma. None of our facilities are pledged as security for any debts.

See "Item 1. Business" on pages 1-13 of this Report for additional information relating to the Company's properties.

ITEM 3. LEGAL PROCEEDINGS

We are a party to certain ordinary legal proceedings incidental to our business. In general, although the outcome of litigation is inherently uncertain, we believe that all of the pending litigation proceedings in which the Company or any subsidiary are currently involved are likely to be resolved without having a material adverse effect on our consolidated financial condition or operations.

As previously reported, in connection with the audit of our federal income tax returns for the fiscal years ended March 31, 2001, 2002, and 2003, the Internal Revenue Service ("IRS") issued an Exam Report and Notice of Proposed Adjustment on November 9, 2007, in which it proposes to deny certain depreciation deductions claimed by us with respect to assets acquired by us from Republic Group LLC in a transaction completed in November 2000. In November 2007, we paid the IRS approximately \$45.8 million to avoid the imposition of large corporate tax underpayment interest. On December 7, 2007, we filed an administrative appeal of the IRS's proposed adjustments. On December 17, 2008, our initial appeals hearing with the IRS was held. Our appeal is currently still in progress. We intend to vigorously pursue the appeal and, if necessary, resort to the courts for a final determination. See Note (H) of the Notes to the Consolidated Financial Statements for more information.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

STOCK PRICES AND DIVIDENDS

As of May 18, 2009, there were approximately 2,600 holders of record of our Common Stock which trades on the New York Stock Exchange under the symbol EXP.

The following table sets forth the high and low closing prices for our Common Stock as reported on the New York Stock Exchange for the periods indicated, as well as dividends declared during these periods:

Quarter ended:	Fiscal Year Ended March 31, 2009			Fiscal Year Ended March 31, 2008		
	High	Low	Dividends	High	Low	Dividends
June 30	\$ 37.86	\$ 25.33	\$ 0.20	\$ 50.74	\$ 44.15	\$ 0.20
September 30	\$ 30.74	\$ 20.72	\$ 0.20	\$ 50.95	\$ 35.67	\$ 0.20
December 31	\$ 21.68	\$ 14.41	\$ 0.10	\$ 40.71	\$ 33.95	\$ 0.20
March 31	\$ 24.90	\$ 16.79	\$ 0.10	\$ 38.25	\$ 29.05	\$ 0.20

The "Dividends" section of Item 7 "Management's Discussion and Analysis of Financial Condition" is hereby incorporated by reference into this Part II, Item 5.

SHARE REPURCHASES

Our Board of Directors has approved the repurchase of a cumulative total of 31,610,605 shares of our Common Stock since we became publicly held in April 1994. On November 7, 2006, the Board of Directors authorized us to repurchase up to an additional 5,156,800 shares, for a total authorization, as of that date, of 6,000,000 shares, of which 717,300 remain eligible for purchase at March 31, 2009. We did not repurchase any shares during the fiscal year ended March 31, 2009. We repurchased 4,778,500 shares and 2,706,791 shares of Common Stock at a cost of \$176.9 million and \$100.4 million during the fiscal years ended March 31, 2008 and 2007, respectively.

Share repurchases may be made from time-to-time in the open market or in privately negotiated transactions. The timing and amount of any repurchases of shares may be determined by our management, based on its evaluation of market and economic conditions and other factors. Repurchases may also be effected pursuant to plans or instructions that meet the requirements of Rule 10b5-1 under the Securities Exchange Act of 1934.

During fiscal 2009, we reacquired shares of stock from an employee upon the vesting of restricted stock that was granted under our Incentive Plan. These shares were forfeited by the employee and reacquired by us to satisfy the employee's minimum statutory tax withholding, which is required on restricted stock once they become vested and are shown in the following table:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
January 1 through January 31, 2009	-	-	-	
February 1 through February 28, 2009	-	-	-	
March 1 through March 31, 2009	5,158	\$24.25	-	
Quarter 4 Totals	5,158	\$24.25	-	717,300

The equity compensation plan information set forth in Part III, Item 12 of this Form 10-K is hereby incorporated by reference into this Part II, Item 5.

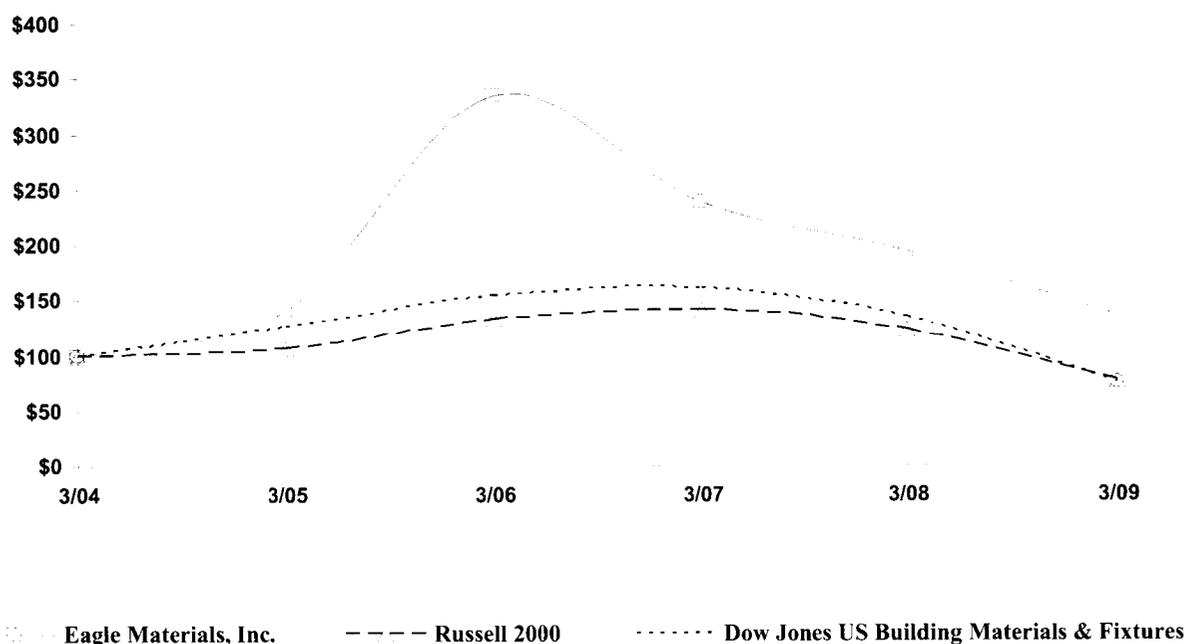

PERFORMANCE GRAPH

The following performance graph and related information shall not be deemed "soliciting material" or to be "filed" with the Securities and Exchange Commission, nor shall such information be incorporated by reference into any future filing under the Securities Act of 1933 or the Securities Exchange Act of 1934, each as amended, except to the extent that the Company specifically incorporates it by reference into such filing.

The graph below compares the cumulative 5-year total return to holders of our common stock with the cumulative total returns of the Russell 2000 index and the Dow Jones US Building Materials & Fixtures index. The graph assumes that the value of the investment in the company's common stock and in each of the indexes (including reinvestment of dividends) was \$100 on March 31, 2004 and tracks it through March 31, 2009.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Among Eagle Materials, Inc. Common Stock, The Russell 2000 Index
And The Dow Jones US Building Materials & Fixtures Index

*\$100 invested on March 31, 2004 in stock or index, including reinvestment of dividends.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

EXECUTIVE SUMMARY

Eagle Materials Inc. is a diversified producer of basic building materials and construction products used in residential, industrial, commercial and infrastructure construction. We operate in four business segments: Gypsum Wallboard, Cement, Recycled Paperboard, and Concrete and Aggregates, with Gypsum Wallboard and Cement being our principal lines of business. These operations are conducted in the U.S. and include the mining of gypsum and the manufacture and sale of gypsum wallboard, the mining of limestone and the manufacture, production, distribution and sale of Portland cement (a basic construction material which is the essential binding ingredient in concrete), the manufacture and sale of recycled paperboard to the gypsum wallboard industry and other paperboard converters, the sale of readymix concrete and the mining and sale of aggregates (crushed stone, sand and gravel). These products are used primarily in commercial and residential construction, public construction projects and projects to build, expand and repair roads and highways. Certain information for each of Concrete and Aggregates is broken out separately in the segment discussions.

We conduct one of our cement operations through a joint venture, Texas Lehigh Cement Company LP, which is located in Buda, Texas (the "Joint Venture"). We own a 50% interest in the joint venture and accounts for its interest under the equity method of accounting. However, for purposes of the Cement segment information presented, we proportionately consolidate our 50% share of the Joint Venture's revenues and operating earnings, which is the way management organizes the segments within the Company for making operating decisions and assessing performance. See Note (G) of the Notes to the Consolidated Financial Statements for additional segment information.

RESULTS OF OPERATIONS

Fiscal Year 2009 Compared to Fiscal Year 2008

	For the Years Ended March 31,		Change
	2009	2008	
	(in thousands, except per share)		
Revenues ⁽¹⁾	\$ 754,928	\$ 910,338	(17%)
Operating Costs ⁽¹⁾	<u>646,924</u>	<u>726,124</u>	(11%)
Operating Profit	108,004	184,214	(41%)
Corporate General and Administrative	16,901	18,756	(10%)
Interest Expense, net	<u>28,920</u>	<u>21,074</u>	37%
Earnings Before Income Taxes	62,183	144,384	(57%)
Income Taxes	<u>20,419</u>	<u>46,616</u>	(57%)
Net Earnings	<u>\$ 41,764</u>	<u>\$ 97,768</u>	(57%)
Diluted Earnings per Share	<u>\$ 0.95</u>	<u>\$ 2.12</u>	(55%)

⁽¹⁾ Includes intersegment revenues and our proportionate share of our Joint Venture. See Footnote (G) to the Consolidated Financial Statements for more information.

Net Revenues. Consolidated net revenues for fiscal 2009 were down 17% from fiscal 2008 primarily due to lower sales volumes in all four of our operating segments. The decline in sales volumes was due primarily to the downturn in the residential and commercial sectors, which continued to be adversely impacted by the decline in the overall economic environment in the United States. Additionally, the decline in sales volumes adversely impacted the average net sales prices in our Gypsum Wallboard and Concrete and Aggregates segments.

Other Income, net. Included in net revenues are other income, which consists of a variety of items that are non-segment operating in nature and includes income from sales of clinker, non-inventoried aggregates income, gypsum wallboard distribution center income, asset sales and other miscellaneous income and cost items. Net other income totaled \$3.6 million for fiscal 2009 as compared to \$1.5 million for fiscal 2008. The increase in other income during fiscal 2009 is due primarily to the \$2.6 million gain on sale of railcars by our gypsum wallboard division.

Operating Costs. Operating costs decreased during fiscal 2009, as compared to 2008, principally due to lower production in our gypsum wallboard and cement divisions. Additionally, certain operating costs declined, both in total as well as on a per unit basis, namely fiber in our recycled paperboard division, natural gas in our recycled paperboard and gypsum wallboard divisions, and transportation in our gypsum wallboard division.

Operating Profit. Operating profit declined by 41% during fiscal 2009, as compared to fiscal 2008, primarily due to lower net revenues, as described above. The decline in net revenues was offset partially by the reduction in operating expenses.

Corporate General and Administrative. Corporate general and administrative expenses for fiscal 2009 were \$16.9 million compared to \$18.8 million for last fiscal year. Corporate general and administrative expense in 2009 includes approximately \$4.0 million related to fiscal 2009 stock options awards, all of which were substantially expensed in fiscal 2009, offset by a gain on the early retirement of debt of approximately \$4.4 million. The decrease in corporate general and administrative expense in fiscal 2009, as compared to fiscal 2008, was primarily the result of decreased incentive compensation and benefit costs due to lower operating earnings.

Interest Expense, Net. Net interest expense of \$28.9 million for fiscal 2009 increased from the \$21.1 million incurred in fiscal 2008. The increase in expense is related to increased borrowings during the period, primarily in connection with the \$200 million private placement, which closed in October 2007, offset slightly by the early repayment of \$100 million of private placement debt in February 2009. Interest expense in fiscal 2008 was positively impacted by the capitalization of interest related to the construction of our Georgetown, S.C. plant. This plant was completed in December 2007, at which time we ceased capitalizing interest.

Income Taxes. The effective tax rate for fiscal 2009 was 32.8%, which was relatively consistent with the tax rate of 32.3% during fiscal 2008.

Net Earnings and Diluted Earnings per Share. As a result of the foregoing, pre-tax earnings of \$62.2 million in fiscal 2009 were 57% below fiscal 2008 pre-tax earnings of \$144.4 million. Fiscal 2009 net earnings of \$41.8 million decreased 57% from net earnings of \$97.8 million in fiscal 2007. Diluted earnings per share in fiscal 2009 of \$0.95 were 55% lower than the \$2.12 for fiscal 2008.

The following table highlights certain operating information related to our four business segments:

	For the Years Ended March 31		Percentage Change
	2009	2008	
	(in thousands, except net sales prices)		
Revenues ⁽¹⁾			
Gypsum Wallboard	\$ 279,306	\$ 342,550	(19%)
Cement ⁽²⁾	289,436	345,223	(16%)

(1) Gross revenue, before freight and delivery costs.

(2) Includes proportionate share of our Joint Venture.

(3) Net of freight and delivery costs.

Gypsum Wallboard Operations. The decrease in revenues during fiscal 2009, as compared to fiscal 2008, is due to lower sales volume and sales prices. Although the average net sales price for fiscal 2009 declined from the prior year, the average net sales price for fiscal 2009 exceeded the fiscal 2008 average net sales price during the second quarter of fiscal 2009 and stayed at this level for the remainder of the fiscal year. This increase in average net sales price was more than offset by the decline in sales volume as demand in the residential and commercial sectors continued to be impacted by the economic downturn. Wallboard operating margins decreased during fiscal 2009, as compared to fiscal 2008, primarily due to lower sales volumes and higher unit costs. The increase in unit costs during fiscal 2009, as compared to fiscal 2008, was primarily attributable to increased raw material and natural gas costs. In addition, the operating margins were impacted by a full year of costs at our Georgetown, South Carolina plant versus a partial year for fiscal 2008.

Cement Operations. The decrease in revenues during fiscal 2009, as compared to fiscal 2008, is due primarily to the 18% decline in sales volume. The decline in sales volume adversely impacted average sales prices in certain of our markets, although our average sales price was flat during fiscal 2009, as compared to fiscal 2008. The decline in average sales price and sales volume was more severe in our Illinois and Nevada markets, which were more significantly impacted by the economic slowdown experienced during fiscal 2009. The decline in revenues was the primary reason operating earnings declined by 16% in fiscal 2009, as compared to fiscal 2008. Operating costs remained relatively flat during fiscal 2009, as compared to fiscal 2008, with only slight increases in the cost of fuel and power. Purchased cement costs also increased slightly;

however, the percentage of purchased cement sold decreased to 16% of total cement sold in fiscal 2009 from 19% of total cement sold in fiscal 2008, with the majority of the purchased cement being sold by our joint venture.

Recycled Paperboard Operations. Net revenues and sales volume decreased 14% during fiscal 2009, as compared to 2008, due to lower gypsum paper sales. During fiscal 2009, sales of gypsum paper declined to 62% of total paperboard sales from 73% during fiscal 2008. The increase in the average selling price per ton during fiscal 2009, as compared to 2008, is primarily due to the price escalators contained in our long-term sales agreement. Operating margins per ton increased 14% during fiscal 2009, as compared to 2008, due to the decline in unit costs combined with an increase in the average net selling price per ton. The decrease in unit costs during fiscal 2009 is primarily due to a 16% decrease in fiber costs as compared to fiscal 2008, offset by a 22% increase in electrical costs during fiscal 2009. The 3% decline in operating earnings during fiscal 2009, as compared to 2008, is due to lower gypsum paper sales, partially offset by the increased operating margin per ton. The decline in gypsum paper sales is due to the decline in the demand for gypsum wallboard, which resulted in increased production and sales of lower margin non-gypsum paperboard.

Concrete and Aggregates Operations. The decline in sales volumes during fiscal 2009, as compared to fiscal 2008, was the primary reason for the decline in revenues of the concrete and aggregates division. The decline in sales volumes also negatively impacted the net average sales prices, resulting in declines of 5% and 6% for the concrete and aggregates divisions, respectively, in fiscal 2009, as compared to fiscal 2008. The decrease in revenues negatively impacted operating earnings during fiscal 2009, as did a change in the sales mix of aggregates to lower margin road base, which comprise 55% of the total product sold in fiscal 2009 as compared to approximately 45% in fiscal 2008.

GENERAL OUTLOOK

The United States government has recently taken several steps to assist the country in recovering from the recession that began in December 2007. The U.S. has passed the Troubled Asset Relief Program (“TARP”), aimed at shoring up the country’s financial institutions from the credit crisis that began during the latter half of calendar 2008. In addition, during the first quarter of calendar 2009, Congress passed The American Recovery and Reinvestment Act of 2009, a stimulus package with spending of up to \$787 billion. A portion of the stimulus package is for infrastructure projects; however, most of the impact of the stimulus bill on the construction industry is not expected to be realized until calendar 2010. While the TARP program is continuing to provide liquidity to the country’s banks, there still is significant concern with the capitalization level of many of the largest banks. Although we expect the current administration to continue to proactively address the current financial crisis throughout the remainder of calendar 2009 there can be no assurance as to the actual impact that these legislative initiatives, or any other similar governmental programs, will have on our business, financial condition or results of operations.

The continued downturn in the residential and commercial construction markets, coupled with the contraction of credit from the marketplace, is expected to continue to negatively impact the entire U.S. wallboard industry by reducing the demand for gypsum wallboard nationwide. The reduction in demand has caused industry capacity utilization to decline to approximately 65%, negatively impacting sales prices. Wallboard consumption during the first quarter of calendar 2009, as reported by the Gypsum Association, decreased approximately 29% from calendar year 2008, and the annualized consumption number for calendar 2009 is expected to be 29% below total consumption for calendar 2008. Based on the estimated annualized consumption for calendar 2009, average industry capacity utilization is estimated to be below 55% for calendar 2009.

Cement consumption in the US declined approximately 16% in calendar 2008 to approximately 106.0 million short tons, as compared to consumption of approximately 126.0 million short tons during calendar 2007. The U.S. cement industry continues to reduce imports of foreign cement with imports declining to 12% of total consumption during calendar 2008, as compared to 21% of total consumption in calendar 2007. Cement demand in most U.S. regions continues to be impacted by decreasing residential housing construction, the softening commercial construction market and state budget deficits, which will hinder cement consumption

during the remainder of calendar 2009. The U.S. Government has included increased infrastructure spending as part of the stimulus package passed during the first quarter of calendar 2009; however, the effects of these expenditures are not expected to begin until calendar 2010. The Portland Cement Association estimates that cement consumption for calendar 2009 will decrease approximately 18% to approximately 88.0 million short tons before any positive impact from the recently announced stimulus bill occurs. We expect the contraction in cement consumption to impact all of the markets served by our cement plants throughout the remainder of calendar 2009.

Sales of gypsum paper as a percentage of total paper sold continue to decline as low wallboard demand is expected to continue throughout the remainder of fiscal 2010. Sales of gypsum paper comprised approximately 62% of total paper sales during fiscal 2009, as compared to approximately 73% during fiscal 2008; however, the addition of our Georgetown, South Carolina wallboard plant has kept paperboard sales to our gypsum wallboard division steady at approximately 35% of total tons sold. Lower total sales volumes of gypsum paper are expected to continue during fiscal 2010, but we continue to seek opportunities for sales in new markets as well as supplying product to the high performance containerboard market. Our major operating costs, such as fiber and natural gas declined during fiscal 2009. Due to the worldwide recession, we do not expect significant increases in the cost of fiber during the first half of calendar 2009. We continue to closely monitor the price and consumption of fiber, electricity and natural gas as these costs comprise a significant portion of our total production costs.

We expect aggregate and concrete sales volumes to be depressed throughout the remainder of calendar 2009 in both of our markets as both residential and infrastructure spending remain soft, and any impact from stimulus bill most likely will not be realized until calendar 2010.

Fiscal Year 2008 Compared to Fiscal Year 2007

	For the Years Ended March 31,		Change
	2008	2007

Diluted Earnings per Share	\$ 2.12	\$ 4.07	(48%)

⁽¹⁾ Includes intersegment revenues and our proportionate share of our Joint Venture. See Footnote (G) to the Consolidated Financial Statements for more information.

Consolidated Results. Consolidated net revenues for fiscal 2008 were down 14% from fiscal 2007 primarily due to lower sales prices and sales volumes in the Gypsum Wallboard segment. Fiscal 2008 operating earnings of \$184.2 million decreased 44% from our record setting amount of \$330.1 million last fiscal year mainly due to decreased Gypsum Wallboard operating earnings.

Corporate Overhead. Corporate general and administrative expenses for fiscal 2008 were \$18.8 million compared to \$20.3 million for last fiscal year. The decrease was primarily the result of decreased incentive compensation and benefit costs due to lower operating earnings.

Other Income. Other income consists of a variety of items that are non-segment operating in nature and includes clinker sales income, non-inventoried aggregates income, gypsum wallboard distribution center income, asset sales and other miscellaneous income and cost items.

Net Interest Expense. Net interest expense of \$21.1 million for fiscal 2008 was \$15.7 million more than the \$5.4 million incurred in fiscal 2007. The increase in expense is related primarily to the increased borrowings in connection with the \$200 million private placement, which closed in October 2007 and the accrual of interest expense on our unrecognized tax benefits that are in dispute pending our tax audit.

Income Taxes. The effective tax rate for fiscal 2008 decreased to 32.3% from 33.4% primarily due to the increased impact of depletion on lower earnings.

Net Income. As a result of the foregoing, pre-tax earnings of \$144.4 million in fiscal 2008 were 53% below fiscal 2007 pre-tax earnings of \$304.3 million. Fiscal 2008 net earnings of \$97.8 million decreased 52% from net earnings of \$202.7 million in fiscal 2007. Diluted earnings per share in fiscal 2007 of \$2.12 were 48% lower than the \$4.07 for fiscal 2007.

The following table highlights certain operating information related to our four business segments:

	For the Years Ended March 31		Percentage Change
	2008	2007	
	(in thousands, except net sales prices)

- (1) Gross revenue, before freight and delivery costs.
(2) Includes proportionate share of our Joint Venture.
(3) Net of freight and delivery costs.

Gypsum Wallboard Operations. The decrease in revenues during fiscal 2008 as compared to fiscal 2007 is due to lower sales volume and sales prices. Sales prices decreased throughout fiscal 2008 as demand, particularly in residential homebuilding and repair and remodel activities, declined sharply. This decline in demand, along with additions to capacity in the gypsum wallboard industry, resulted in decreased utilization and pricing. Wallboard operating margins decreased during fiscal 2008 as compared to fiscal 2007 primarily due to lower sales prices and higher unit costs. The increase in unit costs during fiscal 2008 as compared to fiscal 2007 was primarily attributable to increased raw material costs and costs associated with the start up of production at our Georgetown, South Carolina plant during the fourth quarter of fiscal 2008.

Cement Operations. Revenues increased during fiscal 2008 as compared to fiscal 2007, primarily due to increased sales volumes. Sales prices also increased during fiscal 2008 as compared to fiscal 2007, primarily due to price increases implemented in most of our markets during April 2007. Operating earnings and operating margins increased during fiscal 2008 as compared to fiscal 2007 primarily due to increased sales prices, coupled with increased sales volumes, offset slightly by higher purchased cement costs. Additionally, our sales mix was positively impacted by the increased production at Illinois Cement Company in fiscal 2008 as compared to fiscal 2007, which reduced our percentage of sales of low margin purchased cement to 19% in fiscal 2008 as compared to 26% in fiscal 2007.

Recycled Paperboard Operations. Net revenues increased by 5% during fiscal 2008 as compared to 2007 primarily due to increases in the average selling price per ton. The increase in the average selling price per ton during fiscal 2008 as compared to fiscal 2007 is due primarily to price escalators contained in our long-term sales agreement. Operating margins declined during fiscal 2008 as compared to fiscal 2007 primarily due to the increase in unit costs, which was offset slightly by an increase in average sales price per ton. The increase in unit costs during fiscal 2008 is primarily due to a 28% increase in fiber costs and an 11% increase in natural gas costs during fiscal 2008 as compared to fiscal 2007. Also, a change in the mix of products sold during fiscal 2008 negatively impacted operating margins. During fiscal 2008, sales of higher margin gypsum paper declined to 73% of total paperboard production from 79% during fiscal 2007. This decline is due primarily to the decline in demand for gypsum wallboard, and resulted in increased production and sales of lower margin linerboard.

Concrete and Aggregates Operations. Declining sales volumes during fiscal year 2008 are the primary reason for the decline in revenues for both concrete and aggregates during fiscal 2008 as compared to fiscal 2007. Declines in concrete revenues were partially offset by increased sales price per yard in fiscal 2008, while the average net sales price of aggregates was relatively flat. Concrete operating margins increased slightly during fiscal 2008, despite increased unit costs during the year. The increase in average sales price per yard in fiscal 2008 was partially offset by the increase in unit costs during fiscal 2008 as compared to fiscal 2007. The increase in unit costs is due primarily to the increase in the price of cement and delivery costs during fiscal 2008. Aggregates operating margins declined during fiscal 2008 as compared to fiscal 2007 due to increased crushing and plant costs, partially offset by increased sales prices.

CRITICAL ACCOUNTING POLICIES

Certain of our critical accounting policies require the use of judgment in their application or require estimates of inherently uncertain matters. Although our accounting policies are in compliance with generally accepted accounting principles, a change in the facts and circumstances of the underlying transactions could significantly change the application of the accounting policies and the resulting financial statement impact. Listed below are those policies that we believe are critical and require the use of complex judgment in their application.

Impairment of Long-Lived Assets. We assess long-lived assets in accordance with the provisions of Statement of Financial Accounting Standards No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." SFAS No. 144 requires that long-lived assets be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets is measured by comparing the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. These evaluations for impairment are significantly impacted by

estimates of revenues, costs and expenses and other factors. If these assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets.

Goodwill. Pursuant to SFAS No. 142 “Goodwill and Other Intangible Assets,” goodwill is no longer subject to amortization. Rather, goodwill is subject to at least an annual assessment for impairment by applying a fair-value-based test. We have elected to test for goodwill impairment in the first quarter of each calendar year. The goodwill impairment test is a two-step process, which requires management to make judgments in determining what assumptions to use in the calculation. The first step of the process consists of estimating the fair value of each reporting unit based on a discounted cash flow model using revenues and profit forecasts and comparing those estimated fair values with the carrying value; a second step is performed, if necessary, to compute the amount of the impairment by determining an “implied fair value” of goodwill. Similar to the review for impairment of other long-lived assets, evaluations for impairment are significantly impacted by estimates of future prices for our products, capital needs, economic trends and other factors.

Environmental Liabilities. Our operations are subject to state, federal and local environmental laws and regulations, which impose liability for clean up or remediation of environmental pollution and hazardous waste arising from past acts and require pollution control and prevention, site restoration and operating permits and/or approvals to conduct certain of its operations. We record environmental accruals when it is probable that a reasonably estimable liability has been incurred. Environmental remediation accruals are based on internal studies and estimates, including shared financial liability with third parties. Environmental expenditures that extend the life, increase the capacity, improve the safety or efficiency of assets or mitigate or prevent future environmental contamination may be capitalized. Other environmental costs are expensed when incurred.

Estimation of Reserves and Valuation Allowances. We evaluate the collectibility of accounts receivable based on a combination of factors. In circumstances when we are aware of a specific customer’s inability to meet its financial obligation to the Company, the balance in the reserve for doubtful accounts is evaluated, and if it is determined to be deficient, a specific amount will be added to the reserve. For all other customers, the reserve for doubtful accounts is determined by the length of time the receivables are past due or the customer’s financial condition.

Income Taxes. In determining net income for financial statement purposes, we must make certain estimates and judgments in the calculation of tax provisions and the resultant tax liabilities, and in the recoverability of deferred tax assets that arise from temporary differences between the tax and financial statement recognition of revenue and expense.

In the ordinary course of business, there may be many transactions and calculations where the ultimate tax outcome is uncertain. The calculation of tax liabilities involves dealing with uncertainties in the application of complex tax laws. We recognize potential liabilities for anticipated tax audit issues in both the U.S. and state tax jurisdictions based on an estimate of the ultimate resolution of whether, and the extent to which, additional taxes will be due. Although we believe the estimates are reasonable, no assurance can be given that the final outcome of these matters will not be different than what is reflected in the historical income tax provisions and accruals.

As part of our process for preparing financial statements, we must assess the likelihood that our deferred tax assets can be recovered. If recovery is not likely, the provision for taxes must be increased by recording a reserve in the form of a valuation allowance for the deferred tax assets that are estimated not to be ultimately recoverable. In this process, certain relevant criteria are evaluated including the existence of deferred tax liabilities that can be used to absorb deferred tax assets, the taxable income in prior years that can be used to absorb net operating losses and credit carrybacks, and taxable income in future years. Our judgment regarding future taxable income may change due to market conditions, changes in U.S. tax laws and other factors. These changes, if any, may require material adjustments to the deferred tax assets and an accompanying reduction or increase in net income in the period when such determinations are made.

LIQUIDITY AND CAPITAL RESOURCES

Cash Flow.

The following table provides a summary of our cash flows:

	<u>For the Fiscal Years Ended March 31,</u>	
	<u>2009</u>	<u>2008</u>
	(dollars in thousands)	
Net Cash Provided by Operating Activities:	\$ 79,385	\$ 104,752
Investing Activities:		
Proceeds from Sale of Assets	3,996	-
Capital Expenditures and Other Investing Activities, net	<u>(16,078)</u>	<u>(96,857)</u>
Net Cash Used in Investing Activities	(12,082)	(96,857)
Financing Activities:		
Excess Tax Benefits – Share Based Payments	655	2,848
Increase in Notes Payable	55,000	-
Addition to Long-term Debt, net	-	200,000
Repayment of Long-term Debt	(95,000)	-
Retirement of Common Stock	-	(176,895)
Dividends Paid	(30,441)	(35,600)
Proceeds from Stock Option Exercises	<u>1,321</u>	<u>3,497</u>
Net Cash Used in Financing Activities	<u>(68,465)</u>	<u>(6,150)</u>
Net Increase (Decrease) in Cash	<u>\$ (1,162)</u>	<u>\$ 1,745</u>

Cash flows from operating activities declined by \$25.4 million during fiscal 2009 from fiscal 2008. This decrease was largely attributable to decreased net earnings, which declined by approximately \$56.0 million. This decrease was partially offset by our \$21.2 million decrease in operating assets and liabilities as compared to the \$46.2 million decrease in fiscal 2008. Decreases in operating assets and liabilities in fiscal 2009 are due primarily to decreased accounts payable, due to lower purchased cement and fiber costs. Decreases in operating assets and liabilities in fiscal 2008 are due primarily to the payment of \$45.8 million to the Internal Revenue Service (“IRS”) in relation an audit of our fiscal 2001, 2002 and 2003 tax years.

The IRS issued its Exam Report and Notice of Proposed Adjustment to the Company in November 2007 that proposes to disallow a portion of the depreciation deductions claimed by the Company during fiscal years ended March 31, 2001, 2002 and 2003. The adjustment proposed by the IRS, if sustained, would result in additional federal income taxes of approximately \$27.6 million, plus penalties of \$5.7 million and applicable interest, and would result in additional state income taxes, including applicable interest and penalties. The Company is pursuing an administrative appeal and, if necessary, will resort to the courts for a final determination. The Company paid the IRS approximately \$45.8 million during November 2007, including \$27.6 million in federal income taxes, the \$5.7 million for penalties and \$12.5 million of interest, to avoid additional imposition of the large corporate tax underpayment interest rates. See Notes (F) and (H) of the Notes to the Consolidated Financial Statements for additional information.

Net cash used in investing activities decreased to \$12.1 million in fiscal 2009 as compared to \$96.8 million in fiscal 2008. This decline is primarily due to the completion of our Georgetown, South Carolina wallboard plant during fiscal 2008. Amounts spent during fiscal 2009 were primarily related to maintenance capital.

Net cash used in financing activities increased to \$68.5 million during fiscal 2009, primarily due to borrowings associated with the early retirement of a portion of our senior notes. As a result of the early retirement, we recorded a net gain of approximately \$4.4 million. During fiscal 2008, we had positive

financing cash flows from the issuance of \$200 million in Series 2007A Senior Notes, offset by \$176.9 million of share repurchases. Our debt-to-capitalization ratio and net-debt-to-capitalization ratio were 45.3% and 44.1%, respectively, at March 31, 2009 as compared to 49.6% and 48.4%, respectively, at March 31, 2008.

Working capital at March 31, 2009, was \$111.0 million compared to \$83.9 million at March 31, 2008, primarily due to decreases in accounts payable and accrued liabilities, offset slightly by a decrease in accounts and notes receivable. We do not have any material contractual obligations related to long-term capital projects at March 31, 2009. We were in compliance at March 31, 2009 with all the terms and covenants of our credit agreements.

Debt Financing Activities.

We entered into a \$350.0 million credit facility on December 16, 2004. On June 30, 2006, we amended the Bank Credit Facility (the "Bank Credit Facility") to extend the expiration date from December 2009 to June 2011, and to reduce the borrowing rates and commitment fees. Borrowings under the Bank Credit Facility are guaranteed by all major operating subsidiaries of the Company. Outstanding principal amounts on the Bank Credit Facility bear interest at a variable rate equal to LIBOR, plus an agreed margin (ranging from 55 to 150 basis points), which is to be established quarterly based upon the Company's ratio of consolidated EBITDA, which is defined as earnings before interest, taxes, depreciation and amortization, to its consolidated indebtedness. Interest payments are payable monthly or at the end of the LIBOR advance periods, which can be up to a period of six months at the option of the Company. Under the Bank Credit Facility, we are required to adhere to certain financial and other covenants, including covenants relating to the Company's interest coverage ratio and consolidated funded indebtedness ratio. At March 31, 2009, the Company had \$288.0 million of borrowings available under the Bank Credit Facility.

We entered into a Note Purchase Agreement on November 15, 2005 (the "2005 Note Purchase Agreement") related to our sale of \$200 million of senior, unsecured notes, designated as Series 2005A Senior Notes (the "Series 2005A Senior Notes") in a private placement transaction. The Series 2005A Senior Notes, which are guaranteed by substantially all of our subsidiaries, were sold at par and issued in three tranches on November 15, 2005. On February 5, 2009, we repurchased \$7.0 million in principal of the Series 2005A Senior Notes for \$6.7 million, leaving \$193.0 million outstanding. Following the repurchase, the amounts outstanding for each of the three tranches are as follows:

	<u>Principal</u>	<u>Maturity Date</u>	<u>Interest Rate</u>
Tranche A	\$ 38.6 million	November 15, 2012	5.25%
Tranche B	\$ 77.2 million	November 15, 2015	5.38%
Tranche C	\$ 77.2 million	November 15, 2017	5.48%

Interest for each tranche of Notes is payable semi-annually on May 15 and November 15 of each year until all principal is paid for the respective tranche.

We entered into an additional Note Purchase Agreement on October 2, 2007 (the "2007 Note Purchase Agreement") related to our sale of \$200 million of senior, unsecured notes, designated as Series 2007A Senior Notes (the "Series 2007A Senior Notes") in a private placement transaction. The Series 2007A Senior Notes, which are guaranteed by substantially all of our subsidiaries, were sold at par and issued in four tranches on October 2, 2007. On February 5, 2009, we repurchased \$93.0 million in principal of the Series 2007A Senior Notes for \$88.3 million, leaving \$107.0 million outstanding. Following the repurchase, the amounts outstanding for each of the four tranches are as follows:

	<u>Principal</u>	<u>Maturity Date</u>	<u>Interest Rate</u>
Tranche A	\$ 9.5 million	October 2, 2014	6.08%
Tranche B	\$ 11.0 million	October 2, 2016	6.27%
Tranche C	\$ 50.0 million	October 2, 2017	6.36%
Tranche D	\$ 36.5 million	October 2, 2019	6.48%

Interest for each tranche of Notes is payable semi-annually on April 2 and October 2 of each year until all principal is paid for the respective tranche.

Our obligations under the 2005 Note Purchase Agreement and the 2007 Note Purchase Agreement (collectively referred to as the “Note Purchase Agreements”) and the Series 2005A Senior Notes and the Series 2007A Senior Notes (collectively referred to as “the Senior Notes”) are equal in right of payment with all other senior, unsecured debt of the Company, including our debt under the Bank Credit Facility. The Note Purchase Agreements contain customary restrictive covenants, including covenants that place limits on our ability to encumber our assets, to incur additional debt, to sell assets, or to merge or consolidate with third parties, as well as certain cross covenants with the Bank Credit Facility.

Other than the Bank Credit Facility, we have no other source of committed external financing in place. In the event the Bank Credit Facility was terminated, no assurance can be given as to our ability to secure a new source of financing. Consequently, if a balance was outstanding on the Bank Credit Facility at the time of termination, and an alternative source of financing cannot be secured, it would have a material adverse impact on us. None of our debt is rated by the rating agencies.

We do not have any off balance sheet debt except for operating leases. Also, we have no outstanding debt guarantees. We have available under the Bank Credit Facility a \$25 million Letter of Credit Facility. At March 31, 2009, we had \$7.0 million of letters of credit outstanding that renew annually. We are contingently liable for performance under \$8.7 million in performance bonds relating primarily to our mining operations.

We believe that our cash flow from operations and available borrowings under our Bank Credit Facility should be sufficient to meet our currently anticipated operating needs, capital expenditures and dividend and debt service requirements for at least the next twelve months. However, our future liquidity and capital requirements may vary depending on a number of factors, including market conditions in the construction industry, our ability to maintain compliance with covenants in our Bank Credit Facility, the level of competition and general and economic factors beyond our control. These and other developments could reduce our cash flow or require that we seek additional sources of funding. We cannot predict what effect these factors will have on our future liquidity. For additional information on factors impacting our liquidity and capital resources, please refer to Part I, Item 1A, “Risk Factors” above.

Cash Used for Share Repurchases and Stock Repurchase Program.

See table under Item 5. “Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities” on page 20 for additional information.

On November 7, 2006, we announced that our Board of Directors authorized the repurchase of an additional 5,156,800 shares of common stock, raising our repurchase authorization to approximately 6,000,000 shares, of which 717,300 remained available at March 31, 2009. Share repurchases may be made from time-to-time in the open market or in privately negotiated transactions. The timing and amount of any repurchases of shares will be determined by the Company’s management, based on its evaluation of market and economic conditions and other factors. Repurchases may also be effected pursuant to plans or instructions that meet the requirements of Rule 10b5-1 under the Securities Exchange Act of 1934. We did not repurchase any shares during the fiscal year ended March 31, 2009. We repurchased 4,778,500 shares and 2,706,791 shares of Common Stock at a cost of \$176.9 million and \$100.4 million during the fiscal years ended March 31, 2008 and 2007, respectively.

Dividends.

Dividends paid in fiscal years 2009 and 2008 were \$30.4 million and \$34.7 million, respectively. During November 2008, we announced a decrease in our annual dividend from \$0.80 to \$0.40 per share, beginning with the February 2009 dividend payment. Each quarterly dividend payment is subject to review and approval by our Board of Directors, and we will continue to evaluate our dividend payment amount on an ongoing basis.

Capital Expenditures.

The following table compares capital expenditures:

	For the Fiscal Years Ended March 31,	
	2009	2008
	(dollars in thousands)	
Land and Quarries	\$ 366	\$ 658
Plants	11,909	90,398
Buildings, Machinery and Equipment	3,803	5,801
Total Capital Expenditures	<u>\$ 16,078</u>	<u>\$ 96,857</u>

Historically, we have financed such expenditures with cash from operations and borrowings under our revolving credit facility. Capital expenditures in fiscal 2009 were primarily for maintenance, while the majority of our capital expenditures during fiscal 2008 related to the completion of our construction of a gypsum wallboard plant in Georgetown, South Carolina. The wallboard plant was completed in December 2007 and was fully operational at March 31, 2008. We expect capital expenditures during fiscal 2010 to be consistent with the amount spent in fiscal 2009.

Contractual and Other Obligations.

The Company has certain contractual obligations arising from indebtedness, operating leases and purchase obligations. Future payments due, aggregated by type of contractual obligation are set forth as follows:

	Payments Due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
	(dollars in thousands)				
Contractual Obligations:					
Long-term Debt/Notes Payable	\$ 355,000	\$ -	\$ 55,000	\$ 38,600	\$ 261,400
Operating Leases	12,532	1,338	1,350	886	8,958
Purchase Obligations	74,850	5,313	12,337	10,725	46,475
Total	<u>\$ 442,382</u>	<u>\$ 6,651</u>	<u>\$ 68,687</u>	<u>\$ 50,211</u>	<u>\$ 316,833</u>

Purchase obligations are non-cancelable agreements to purchase coal, natural gas and synthetic gypsum, to pay royalty amounts and capital expenditure commitments. Additionally, we are subject to potential tax liabilities of approximately \$83.9 million which may be payable in a 1 to 3 year period. See Notes (D) and (H) of the Notes to the Consolidated Financial Statements.

Based on our current actuarial estimates, we anticipate making contributions of approximately \$1.0 to \$1.5 million to our defined benefit plans for fiscal year 2010.

Inflation and Changing Prices.

The Consumer Price Index rose approximately 0.1% in calendar 2008, 4.1% in 2007, and 2.5% in 2006. Prices of materials and services, with the exception of power, natural gas, coal, petroleum coke, and transportation freight, have remained relatively stable over the three year period. During fiscal 2009, the Consumer Price Index for energy and transportation declined approximately 23% and 13% respectively. Strict cost control and improved productivity in our cement and paperboard segments in fiscal 2009 has minimized the impact of inflation on our operations, while our other segments remain more exposed to inflationary changes. The ability to increase sales prices to cover future increases varies with the level of activity in the construction industry, the number, size, and strength of competitors and the availability of products to supply a local market.

GENERAL OUTLOOK

See “General Outlook” within Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations on pages 26- 27.

RECENT ACCOUNTING PRONOUNCEMENTS

See Note (A) to the Notes to the Consolidated Financial Statements on pages 41-46.

FORWARD-LOOKING STATEMENTS

Certain information included in this report or in other materials we have filed or will file with the SEC, as well as information included in oral statements or other written statements made or to be made by us, contains or may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, Section 21E of the Securities Exchange Act of 1934 and the Private Litigation Reform Act of 1995. Forward-looking statements may be identified by the context of the statement and generally arise when we are discussing our beliefs, estimates or expectations. From time to time, forward-looking statements also are included in our other periodic reports on Forms 10-K, 10-Q and 8-K, press releases and presentations, on our web site and in other material released to the public. We specifically disclaim any duty to update any of the information set forth in this report, including any forward-looking statements. Forward-looking statements are made based on management’s current expectations and beliefs concerning future events and, therefore, involve a number of risks and uncertainties. Management cautions that forward-looking statements are not guarantees, and our actual results could differ materially from those expressed or implied in the forward looking statements. See Item 1A for a more detailed discussion of specific risks and uncertainties.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risks related to fluctuations in interest rates on our Bank Credit Facility. From time-to-time we have utilized derivative instruments, including interest rate swaps, in conjunction with our overall strategy to manage the debt outstanding that is subject to changes in interest rates. At March 31, 2009 outstanding borrowings under the Bank Credit Facility totaled \$55.0 million. At present, we do not utilize derivative financial instruments.

The Company is subject to commodity risk with respect to price changes principally in coal, coke, natural gas and power. We attempt to limit our exposure to changes in commodity prices by entering into contracts or increasing use of alternative fuels.

Eagle Materials Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)

(A) Significant Accounting Policies

Basis of Presentation –

The consolidated financial statements include the accounts of Eagle Materials Inc. and its majority-owned subsidiaries ("EXP" or the "Company"), which may be referred to as "our", "we", or "us". All intercompany balances and transactions have been eliminated. EXP is a holding company whose assets consist of its investments in its subsidiaries, joint venture, intercompany balances and holdings of cash and cash equivalents. The businesses of the consolidated group are conducted through EXP's subsidiaries. The Company conducts one of its cement plant operations through a joint venture, Texas Lehigh Cement Company L.P., which is located in Buda, Texas (the "Joint Venture"). Investments in the Joint Venture and affiliated companies owned 50% or less are accounted for using the equity method of accounting. The Equity in Earnings of Unconsolidated Joint Venture has been included for the same period as our March 31 year end.

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents –

Cash equivalents include short-term, highly liquid investments with original maturities of three months or less and are recorded at cost, which approximates market value.

Accounts and Notes Receivable –

Accounts and notes receivable have been shown net of the allowance for doubtful accounts of \$3.7 million at both March 31, 2009 and 2008. We perform ongoing credit evaluations of our customers' financial condition and generally require no collateral from our customers. The allowance for non-collection of receivables is based upon analysis of economic trends in the construction industry, detailed analysis of the expected collectibility of accounts receivable that are past due and the expected collectibility of overall receivables. We have no significant credit risk concentration among our diversified customer base.

The majority of notes receivable at March 31, 2009 bears interest at the prime rate plus 0.5%, and are payable in quarterly installments of \$0.2 million, with any unpaid amounts, plus accrued interest, due on October 17, 2011. The notes are collateralized by certain assets of the borrower, namely property and equipment. The current portion of notes receivable was \$1.1 million at both March 31, 2009 and 2008. The weighted-average interest rate at March 31, 2009 and 2008 was 3.9% and 5.8%, respectively.

Inventories –

Inventories are stated at the lower of average cost (including applicable material, labor, depreciation, and plant overhead) or market. Inventories consist of the following:

	March 31,	
	2009	2008
	(dollars in thousands)	
Raw Materials and Materials-in-Progress	\$ 32,580	\$ 27,212
Gypsum Wallboard	9,622	6,823
Finished Cement	11,303	11,894
Aggregates	11,684	11,229
Paperboard	4,142	5,677
Repair Parts and Supplies	36,429	32,233
Fuel and Coal	1,303	3,649
	<u>\$ 107,063</u>	<u>\$ 98,717</u>

Property, Plant and Equipment –

Property, plant and equipment are stated at cost. Major renewals and improvements are capitalized and depreciated. Repairs and maintenance are expensed as incurred. Depreciation is provided on a straight-line basis over the estimated useful lives of depreciable assets and totaled \$50.0 million, \$43.6 million and \$38.8 million for the years ended March 31, 2009, 2008 and 2007, respectively. Raw material deposits are depleted as such deposits are extracted for production utilizing the units-of-production method. Costs and accumulated depreciation applicable to assets retired or sold are eliminated from the accounts and any resulting gains or losses are recognized at such time. The estimated lives of the related assets are as follows:

Plants	20 to 30 years
Buildings	20 to 40 years
Machinery and Equipment	3 to 25 years

We periodically evaluate whether current events or circumstances indicate that the carrying value of our depreciable assets may not be recoverable. At March 31, 2009 and 2008, management believes no events or circumstances indicate that the carrying value may not be recoverable.

Impairment or Disposal of Long-Lived Assets –

We evaluate the recoverability of our long-lived assets and certain identifiable intangibles, such as permits and customer contracts, for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets, such as plants, buildings and machinery and equipment, is measured by comparing the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. Such evaluations for impairment are significantly impacted by estimates of future prices for our products, capital needs, economic trends in the construction sector and other factors. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds their fair value. Assets to be disposed of by sale are reflected at the lower of their carrying amount or fair value less cost to sell.

Goodwill and Intangible Assets –

Goodwill. Goodwill is subject to at least an annual assessment for impairment by applying a fair-value-based test. We have elected to test for goodwill impairment in the first quarter of each calendar year. The goodwill impairment test is a two-step process, which requires us to make judgments in determining what assumptions to use in the calculation. The first step of the process consists of estimating the fair value of each reporting unit based on a discounted cash flow model using revenues and profit forecasts and comparing those estimated fair values with the carrying value; a second step is performed, if necessary, to compute the amount of the impairment by determining an “implied fair value” of goodwill. Similar to the review for impairment of other long-lived assets, evaluations for impairment are significantly impacted by estimates of future prices for our products, capital needs, economic trends and other factors. Given the relative weakness in gypsum wallboard pricing, coupled with the slowdown in residential housing, we expect to perform impairment tests at the end of each quarter on our gypsum wallboard assets and related goodwill during fiscal 2010, unless we determine that impairment loss is not reasonably likely to occur.

March 31, 2009				
Intangible Assets Subject to Amortization:	Amortization Period	Cost	Accumulated Amortization	Net
(dollars in thousands)				
Customer contracts	15 years	\$ 1,300	\$ (723)	\$ 577
Permits	40 years	22,000	(2,280)	19,720
Goodwill		132,515	-	132,515
Total intangible assets and goodwill		<u>\$ 155,815</u>	<u>\$ (3,003)</u>	<u>\$ 152,812</u>

March 31, 2008				
Intangible Assets Subject to Amortization:	Amortization Period	Cost	Accumulated Amortization	Net
(dollars in thousands)				
Customer contracts	15 years	\$ 1,300	\$ (636)	\$ 664
Permits	40 years	22,000	(1,730)	20,270
Goodwill		132,515	-	132,515
Total intangible assets and goodwill		<u>\$ 155,815</u>	<u>\$ (2,366)</u>	<u>\$ 153,449</u>

Amortization expense of intangibles was \$0.6 million for each of the years ended March 31, 2009, 2008 and 2007.

Other Assets –

Other assets are primarily composed of loan fees and financing costs, deferred expenses, and deposits.

Stock Repurchases –

Our Board of Directors has approved the repurchase of a cumulative total of 31,610,605 shares, of which approximately 717,300 shares remain available for repurchase at March 31, 2009. We did not repurchase any shares during the year ended March 31, 2009. We repurchased and retired 4,778,500 and 2,706,791 shares of Common Stock at a cost of \$176.9 million and \$100.4 million during the years ended March 31, 2008 and 2007, respectively.

Income Taxes –

We provide for deferred taxes on the differences between the financial reporting basis and tax basis of assets and liabilities using existing tax laws and rates. We also recognize future tax benefits such as operating loss carry forwards, as applicable, to the extent that realization of such benefits is more likely than not.

In July 2006, the FASB issued FASB Interpretation No. 48, “Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109” (“FIN 48”). FIN 48 provides guidance on the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 requires that we recognize in the financial statements, the impact of a tax position, if that position is more likely than not of being sustained on audit, based on the technical merits of the position. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures, and transition provisions. The transition adjustment recognized on the date of adoption is recorded as an adjustment to retained earnings as of the beginning of the adoption period. We adopted FIN 48 on April 1, 2007. See Note (F) for a discussion of the impact of FIN 48.

Revenue Recognition –

Revenue from the sale of cement, gypsum wallboard, paperboard, concrete and aggregates is recognized when title and ownership are transferred upon shipment to the customer. Fees for shipping and handling are recorded as revenue, while costs incurred for shipping and handling are recorded as expenses.

We classify our freight revenue as sales and freight costs as cost of goods sold, respectively. Approximately \$82.6 million, \$101.7 million and \$105.5 million were classified as cost of goods sold in the years ended March 31, 2009, 2008 and 2007, respectively.

Other net revenues include lease and rental income, asset sale income, non-inventoried aggregates sales income, distribution center income and trucking income as well as other miscellaneous revenue items and costs which have not been allocated to a business segment.

Comprehensive Income/Losses –

A summary of comprehensive income for the fiscal years ended March 31, 2009, 2008 and 2007 is presented below:

	For the Years Ended March 31,		
	2009	2008	2007
	(dollars in thousands)		
Net Earnings	\$ 41,764	\$ 97,768	\$ 202,664
Other Comprehensive Income, net of tax:			
Pension Plan Actuarial Loss, net of tax	(4,672)	(518)	-
Minimum Pension Liability Adjustments	-	-	142
Comprehensive Income	<u>\$ 37,092</u>	<u>\$ 97,250</u>	<u>\$ 202,806</u>

As of March 31, 2009, we have an accumulated other comprehensive loss of \$6.0 million, which is net of income taxes of \$3.3 million, in connection with recognizing the difference between the fair value of the pension assets and the projected benefit obligation.

Statements of Consolidated Earnings – Supplemental Disclosures –

Selling, general and administrative expenses of the operating units are included in costs and expenses of each segment. Corporate general and administrative (“G&A”) expenses include administration, financial, legal, employee benefits and other corporate activities and are shown separately in the consolidated statements of earnings. Corporate G&A also includes stock compensation expense. See Note (J) for more information. During fiscal 2009, we had a gain on purchase of long-term debt that has been recorded as a reduction of Corporate G&A on the Consolidated Statement of Earnings. See Note (D) for more information.

Total selling, general and administrative expenses for each of the periods are summarized as follows:

	For the Years Ended March 31,		
	2009	2008	2007
	(dollars in thousands)		
Operating Units Selling, G&A	\$ 30,493	\$ 37,143	\$ 38,936
Corporate G&A	21,304	18,756	20,344
Net Gain on Purchase of Long-term Debt	(4,403)	-	-
	<u>\$ 47,394</u>	<u>\$ 55,899</u>	<u>\$ 59,280</u>

Maintenance and repair expenses are included in each segment's costs and expenses. The Company incurred \$49.5 million, \$58.2 million and \$63.7 million in the years ended March 31, 2009, 2008 and 2007, respectively.

Consolidated Cash Flows – Supplemental Disclosures –

Interest payments made during the years ended March 31, 2009, 2008 and 2007 were \$26.9 million, \$15.6 million and \$11.5 million, respectively.

We made net payments of \$12.8 million, \$73.5 million and \$97.0 million for federal and state income taxes in the years ended March 31, 2009, 2008 and 2007, respectively.

Earnings Per Share –

	For the Years Ended March 31,		
	2009	2008	2007
Weighted-Average Shares of Common Stock Outstanding	43,486,728	45,557,094	49,090,010
Common Equivalent Shares:			
Assumed Exercise of Outstanding Dilutive Options	846,935	1,341,693	1,492,045
Less Shares Repurchased from Proceeds of Assumed Exercised Options ⁽¹⁾	(559,663)	(820,276)	(866,624)
Restricted Stock Units	105,416	66,708	71,682
Weighted-Average Common and Common Equivalent Shares Outstanding	<u>43,879,416</u>	<u>46,145,219</u>	<u>49,787,113</u>

⁽¹⁾ Includes unearned compensation related to outstanding stock options.

There were 2,865,700, 1,631,037 and 144,807 stock options at an average exercise price of \$38.70, \$47.11 and \$49.73 that were excluded from the computation of diluted earnings per share for the years ended March 31, 2009, 2008 and 2007, respectively, because such inclusion would have been anti-dilutive.

New Accounting Standards –

In September 2006, the FASB issued Statement of Financial Accounting Standards (“SFAS”) No. 157, “Fair Value Measurements” (“SFAS 157”). SFAS 157 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles, and expands disclosures about fair value measurements that are required or permitted under other accounting pronouncements. In April 2008, the FASB issued FASB Staff Position FAS157-2 “Effective Date of FASB Statement 157” (“FSP FAS 157-2”), which delays the effective date of SFAS 157 for all nonrecurring fair value measurements of non-financial assets and liabilities until fiscal years beginning after November 15, 2008. We adopted SFAS 157 effective April 1, 2008, including the adoption of the deferral provisions of FSP FAS 157-2, and this adoption did not have a material effect on our results of operations or financial condition.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities – Including an Amendment of FASB Statement 115” (“SFAS 159”). SFAS 159 permits entities to choose to measure certain financial instruments and other eligible items at fair value that do not currently require fair value measurement. SFAS 159 is effective for fiscal years beginning after November 15, 2007. We elected not to fair value financial instruments and certain other items under SFAS 159 upon adoption on April 1, 2008; therefore, there was no impact on our results of operations or financial condition.

In April 2009, the FASB issued FASB Staff Position FAS107-1, “Interim Disclosures about Fair Value of Financial Instruments” (“FSP FAS 107-1”), which requires disclosures about the fair value of financial instruments whenever summarized financial information for interim reporting periods is issued. This disclosure should include the methods and significant assumptions used to estimate the fair value of the financial instruments, as well as describe changes in such methods and significant assumptions, if applicable. FSP FAS 107-1 will be effective for interim reporting periods ending after June 15, 2009.

Reclassifications –

Certain prior year balances, primarily prepaid expenses and deferred taxes, have been reclassified to be consistent with the current year presentation.

(B) Property, Plant and Equipment

Cost by major category and accumulated depreciation are summarized as follows:

	March 31,	
	2009	2008
	(dollars in thousands)	
Land and Quarries	\$ 62,782	\$ 62,940
Plants	949,635	928,175
Buildings, Machinery and Equipment	77,193	74,591
Construction in Progress	-	14,036
	<u>1,089,610</u>	<u>1,079,742</u>
Accumulated Depreciation	<u>(419,669)</u>	<u>(374,186)</u>
	<u>\$ 669,941</u>	<u>\$ 705,556</u>

Construction in progress relates primarily to our construction of the gypsum wallboard facility in Georgetown, South Carolina which began during May 2006 and was completed during December 2007.

(C) Accrued Expenses

Accrued expenses at March 31, 2009 and 2008 consist of the following:

	March 31,	
	2009	2008
	(dollars in thousands)	
Payroll and Incentive Compensation	\$ 10,813	\$ 15,372
Benefits	9,152	8,874
Interest	7,310	10,391
Insurance	5,665	5,673
Other	11,664	13,900
	<u>\$ 44,604</u>	<u>\$ 54,210</u>

(D) Indebtedness

Long-term Debt is set forth below:

	March 31,	
	2009	2008
	(dollars in thousands)	
Senior Notes	\$ 300,000	\$ 400,000
Bank Credit Facility	55,000	-
Less Current Maturities	-	-
Total Long-term Debt	<u>\$ 355,000</u>	<u>\$ 400,000</u>

The weighted-average interest rate of Senior Notes during fiscal 2009 and 2008 was 5.9% and 5.7%, respectively. The weighted average interest rate of Senior Notes at March 31, 2009 and 2008 was 5.7% and 5.9%, respectively.

The weighted-average interest rate of bank debt borrowings during fiscal 2009, 2008 and 2007 was 2.4%, 6.9% and 0%, respectively. The interest rate on the bank debt was 1.7% and 0% at March 31, 2009 and 2008, respectively.

Maturities of long-term debt during the next five fiscal years are as follows:

Fiscal Year	Amount
2010	\$ -
2011	-
2012	55,000
2013	38,600
2014	-
Thereafter	261,400
Total	<u>\$ 355,000</u>

Senior Notes -

We entered into a Note Purchase Agreement on November 15, 2005 (the "2005 Note Purchase Agreement") related to our sale of \$200 million of senior, unsecured notes, designated as Series 2005A Senior Notes (the "Series 2005A Senior Notes") in a private placement transaction. The Series 2005A Senior Notes, which are guaranteed by substantially all of our subsidiaries, were sold at par and issued in three tranches on November 15, 2005. On February 5, 2009, we repurchased \$7.0 million in principal of the Series 2005A Senior Notes for \$6.7 million, leaving \$193.0 million outstanding. Following the repurchase, the amounts outstanding for each of the three tranches are as follows:

	<u>Principal</u>	<u>Maturity Date</u>	<u>Interest Rate</u>
Tranche A	\$ 38.6 million	November 15, 2012	5.25%
Tranche B	\$ 77.2 million	November 15, 2015	5.38%
Tranche C	\$ 77.2 million	November 15, 2017	5.48%

Interest for each tranche of Notes is payable semi-annually on the 15th day of May and the 15th day of November of each year until all principal is paid for the respective tranche.

We entered into an additional Note Purchase Agreement on October 2, 2007 (the "2007 Note Purchase Agreement") related to our sale of \$200 million of senior, unsecured notes, designated as Series 2007A Senior Notes (the "Series 2007A Senior Notes") in a private placement transaction. The Series 2007A Senior Notes, which are guaranteed by substantially all of our subsidiaries, were sold at par and issued in four tranches on October 2, 2007. On February 5, 2009, we repurchased \$93.0 million in principal of the Series 2007A Senior Notes for \$88.3 million, leaving \$107.0 million outstanding. Following the repurchase, the amounts outstanding for each of the four tranches are as follows:

	<u>Principal</u>	<u>Maturity Date</u>	<u>Interest Rate</u>
Tranche A	\$ 9.5 million	October 2, 2014	6.08%
Tranche B	\$ 11.0 million	October 2, 2016	6.27%
Tranche C	\$ 50.0 million	October 2, 2017	6.36%
Tranche D	\$ 36.5 million	October 2, 2019	6.48%

Interest for each tranche of Notes is payable semi-annually on the second day of April and the second day of October of each year until all principal is paid for the respective tranche.

Our obligations under the 2005 Note Purchase Agreement and the 2007 Note Purchase Agreement (collectively referred to as the "Note Purchase Agreements") and the Series 2005A Senior Notes and the Series 2007A Senior Notes (collectively referred to as "the Senior Notes") are equal in right of payment with all other senior, unsecured debt of the Company, including our debt under the Bank Credit Facility. The Note Purchase Agreements contain customary restrictive covenants, including covenants that place limits on our ability to encumber our assets, to incur additional debt, to sell assets, or to merge or consolidate with third parties, as well as certain cross covenants with the Bank Credit Facility. We were in compliance with all financial ratios and tests at March 31, 2009 and throughout the fiscal year.

Pursuant to a Subsidiary Guaranty Agreement, substantially all of our subsidiaries have guaranteed the punctual payment of all principal, interest, and Make-Whole Amounts (as defined in the Note Purchase Agreements) on the Senior Notes and the other payment and performance obligations of the Company contained in the Senior Notes and in the Note Purchase Agreements. We are permitted, at our option and without penalty, to prepay from time to time at least 10% of the original aggregate principal amount of the Senior Notes at 100% of the principal amount to be prepaid, together with interest accrued on such amount to be prepaid to the date of payment, plus a Make-Whole Amount. The Make-Whole Amount is computed by

discounting the remaining scheduled payments of interest and principal of the Senior Notes being prepaid at a discount rate equal to the sum of 50 basis points and the yield to maturity of U.S. treasury securities having a maturity equal to the remaining average life of the Senior Notes being prepaid.

Bank Debt -

We entered into a \$350.0 million credit facility on December 16, 2004. On June 30, 2006, we amended the Bank Credit Facility (the "Bank Credit Facility") to extend the expiration date from December 2009 to June 2011, and to reduce the borrowing rates and commitment fees. Borrowings under the Bank Credit Facility are guaranteed by all major operating subsidiaries of the Company. Outstanding principal amounts on the Bank Credit Facility bear interest at a variable rate equal to LIBOR, plus an agreed margin (ranging from 55 to 150 basis points), which is to be established quarterly based upon the Company's ratio of consolidated EBITDA, which is defined as earnings before interest, taxes, depreciation and amortization, to its consolidated indebtedness. Interest payments are payable monthly or at the end of the LIBOR advance periods, which can be up to a period of six months at the option of the Company. Under the Bank Credit Facility, we are required to adhere to certain financial and other covenants, including covenants relating to the Company's interest coverage ratio and consolidated funded indebtedness ratio. At March 31, 2009 the Company had \$288.0 million of borrowings available under the Bank Credit Facility.

The Bank Credit Facility has a \$25 million letter of credit facility. Under the letter of credit facility, the Company pays a fee at a per annum rate equal to the applicable margin for Eurodollar loans in effect from time to time plus a one-time letter of credit fee in an amount equal to 0.125% of the initial stated amount. At March 31, 2009, we had \$7.0 million of letters of credit outstanding.

(E) Fair Value of Financial Instruments

The fair value of our long-term debt has been estimated based upon our current incremental borrowing rates for similar types of borrowing arrangements. The fair value of our Senior Notes at March 31, 2009 is as follows:

	<u>Fair Value</u> (dollars in thousands)
Series 2005A Tranche A	\$ 35,975
Series 2005A Tranche B	64,500
Series 2005A Tranche C	60,331
Series 2007A Tranche A	8,480
Series 2007A Tranche B	9,405
Series 2007A Tranche C	41,375
Series 2007A Tranche D	28,815

All assets and liabilities which are not considered financial instruments have been valued using historical cost accounting. The carrying values of cash and cash equivalents, accounts and notes receivable, accounts payable and accrued liabilities approximate their fair values due to the short-term maturities of these assets and liabilities. The fair value of our Bank Credit Facility also approximates its carrying value at March 31, 2009.

(F) Income Taxes

The provision for income taxes includes the following components:

	For the Years Ended March 31,		
	2009	2008	2007
	(dollars in thousands)		
Current Provision -			
Federal	\$ 13,262	\$ 39,468	\$ 96,686
State	1,388	5,734	7,375
	<u>14,650</u>	<u>45,202</u>	<u>104,061</u>
Deferred Provision -			
Federal	5,373	(4,081)	(3,769)
State	396	5,495	1,332
	<u>5,769</u>	<u>1,414</u>	<u>(2,437)</u>
Provision for Income Taxes	<u>\$ 20,419</u>	<u>\$ 46,616</u>	<u>\$ 101,624</u>

The effective tax rates vary from the federal statutory rates due to the following items:

	For the Years Ended March 31,		
	2009	2008	2007
	(dollars in thousands)		
Earnings Before Income Taxes	<u>\$ 62,183</u>	<u>\$ 144,384</u>	<u>\$ 304,288</u>
Income Taxes at Statutory Rate	\$ 21,764	\$ 50,534	\$ 106,501
Increases (Decreases) in Tax Resulting from -			
State Income Taxes, net	1,160	7,299	5,316
Statutory Depletion in Excess of Cost	(2,636)	(9,420)	(8,338)
Domestic Production Activities Deduction	(720)	(2,558)	(2,799)
Other	851	761	944
Provision for Income Taxes	<u>\$ 20,419</u>	<u>\$ 46,616</u>	<u>\$ 101,624</u>
Effective Tax Rate	33%	32%	33%

The deferred income tax provision results from the following temporary differences in the recognition of revenues and expenses for tax and financial reporting purposes:

	For the Years Ended March 31,		
	2009	2008	2007
	(dollars in thousands)		
Excess Tax Depreciation and Amortization	\$ 6,981	\$ 6,088	\$ 1,696
Bad Debts	825	(288)	174
Uniform Capitalization	90	(464)	177
Accrual Changes	(1,522)	(1,849)	(2,211)
Other	(605)	(2,073)	(2,273)
	<u>\$ 5,769</u>	<u>\$ 1,414</u>	<u>\$ (2,437)</u>

Components of deferred income taxes are as follows:

	March 31,	
	2009	2008
	(dollars in thousands)	
Items Giving Rise to Deferred Tax Liabilities -		
Excess Tax Depreciation and Amortization	\$ 148,431	\$ 140,475
Items Giving Rise to Deferred Tax Assets -		
Accrual Changes	(20,922)	(19,400)
Bad Debts	(1,409)	(2,233)
Uniform Capitalization	(806)	(896)
Other	(4,365)	(404)
Total Deferred Tax Assets	(27,502)	(22,933)

Deferred income taxes are classified in the consolidated balance sheet as follows:

	March 31,	
	2009	2008
	(dollars in thousands)	
Prepaid and Other Assets	\$ 1,559	\$ 2,874
Deferred Income Taxes	\$ 122,488	\$ 120,416

Uncertain tax positions –

We are subject to audit examinations at federal, state and local levels by tax authorities in those jurisdictions who may challenge the treatment or reporting of any return item. The tax matters challenged by the tax authorities are typically complex; therefore, the ultimate outcome of these challenges is subject to uncertainty.

Through March 31, 2007, in accordance with prior standards, we assessed the ultimate resolution of uncertain tax matters as they arose and established reserves for tax contingencies when we believed an unfavorable outcome was probable and the liability could be reasonably estimated.

Effective April 1, 2007, we adopted the provisions of FIN 48, which differs from the prior standards in that it requires companies to determine that it is “more likely than not” that a tax position will be sustained by the appropriate taxing authorities before any benefit can be recorded in the financial statements.

As a result of adopting FIN 48, we increased the tax reserves by \$84.8 million, from \$3.6 million to \$88.4 million as of April 1, 2007, with the corresponding offset representing an increase in goodwill. As a result of the \$84.8 million increase in the liability for uncertain tax positions, we recorded a \$37.1 million increase in the amount of accrued interest expense as of April 1, 2007, of which \$18.2 million was recorded in Accrued Liabilities and the remaining amount of \$18.9 million was recorded in Other Long-term Liabilities. Our policy is to recognize accrued interest related to uncertain tax positions as a component of interest expense, and to recognize penalties as a component of income tax expense.

The increase in accrued interest expense resulted in a decrease to the April 1, 2007, balance of retained earnings.

The following table summarizes the changes in the total amounts of uncertain tax positions for 2009 (dollars in thousands):

Balance at April 1, 2008	\$ 83,868
Additions based on tax positions related to the current year	-
Reductions for tax positions of prior years	-
Balance at March 31, 2009	<u>\$ 83,868</u>
Accrued interest recognized during the year ended March 31, 2009	<u>\$ 4,934</u>
Accrued penalties recognized during the year ended March 31, 2009	<u>\$ 821</u>

None of the \$83.9 million liability for uncertain tax positions as of March 31, 2009, if recognized, would impact the effective tax rate. If these tax positions were recognized, other long-term liabilities would be reduced by \$56.2 million, and we would receive a refund of \$27.6 million related to taxes paid during fiscal 2008 (see Note (H) for more information). Additionally, we would reduce other long-term liabilities by \$32.3 million for accrued interest and penalties on the uncertain tax positions. Since tax penalties are recognized as a component of income tax expense, future penalty accruals and resolution of uncertain tax positions will impact our effective tax rate.

As of March 31, 2009, we may be assessed additional federal and state income taxes, interest and penalties for tax years 2001 through 2008. We have filed an administrative appeal with the IRS for the 2001 through 2003 examination years. Returns for the years 2004 through 2006 are currently under audit by the IRS. The appeal proceeding and audit field work should be completed within the next twelve months.

We currently are unable to estimate the range of possible increase or decrease in uncertain tax positions that may occur within the next twelve months from the eventual outcome of the years currently under audit or appeal, and therefore cannot anticipate whether such outcome will result in a material change to our financial position or results of operations.

(G) Business Segments

Operating segments are defined as components of an enterprise that engage in business activities that earn revenues, incur expenses and prepare separate financial information that is evaluated regularly by our chief operating decision maker in order to allocate resources and assess performance.

We operate in four business segments: Gypsum Wallboard, Cement, Recycled Paperboard, and Concrete and Aggregates, with Gypsum Wallboard and Cement being our principal lines of business. These operations are conducted in the U.S. and include the mining of gypsum and the manufacture and sale of gypsum wallboard, the mining of limestone and the manufacture, production, distribution and sale of Portland cement (a basic construction material which is the essential binding ingredient in concrete), the manufacture and sale of recycled paperboard to the gypsum wallboard industry and other paperboard converters, the sale of readymix concrete and the mining and sale of aggregates (crushed stone, sand and gravel). These products are used primarily in commercial and residential construction, public construction projects and projects to build, expand and repair roads and highways.

As further discussed below, we operate five gypsum wallboard plants, a gypsum wallboard distribution center, four cement plants, eleven cement distribution terminals, a recycled paperboard mill, nine readymix concrete batch plant locations and two aggregates processing plant locations. The principal markets for our cement products are Texas, northern Illinois (including Chicago), the Rocky Mountains, northern Nevada, and northern California. Gypsum wallboard and recycled paperboard are distributed throughout the continental U.S. Concrete and aggregates are sold to local readymix producers and paving contractors in the Austin, Texas area and northern California.

We conduct one of our four cement plant operations, Texas Lehigh Cement Company LP in Buda, Texas, through a Joint Venture. For segment reporting purposes only, we proportionately consolidate our 50% share of the Joint Venture's revenues and operating earnings, which is consistent with the way management reports the segments within the Company for making operating decisions and assessing performance.

The Company accounts for intersegment sales at market prices. The following table sets forth certain financial information relating to the Company's operations by segment:

	For the Years Ended March 31,		
	2009	2008	2007
Revenues -		(dollars in thousands)	
Gypsum Wallboard	\$ 279,306	\$ 342,550	\$ 511,615

Concrete and Aggregates	4,033	4,021	3,345
Other, net	903	808	858
	\$ 51,232	\$ 44,850	\$ 40,040

⁽¹⁾ Basis conforms with equity method accounting.

Segment operating earnings, including the proportionately consolidated 50% interest in the revenues and expenses of the Joint Venture, represent revenues less direct operating expenses, segment depreciation, and segment selling, general and administrative expenses. We account for intersegment sales at market prices. Corporate assets consist primarily of cash and cash equivalents, general office assets and miscellaneous other assets.

The segment breakdown of goodwill at March 31, 2009 and 2008 is as follows:

	<u>For the Years Ended March 31,</u>	
	<u>2009</u>	<u>2008</u>
	(dollars in thousands)	
Cement	\$ 8,359	\$ 8,359
Gypsum Wallboard	116,618	116,618
Paperboard	<u>7,538</u>	<u>7,538</u>
	<u>\$ 132,515</u>	<u>\$ 132,515</u>

(H) Commitments and Contingencies

We have various litigation, commitments and contingencies in the ordinary course of business. Management believes that none of the litigation in which it or any subsidiary is currently involved is likely to have a material adverse effect on our consolidated financial condition or results of operations.

Our operations and properties are subject to extensive and changing federal, state and local laws, regulations and ordinances governing the protection of the environment, as well as laws relating to worker health and workplace safety. We carefully consider the requirements mandated by such laws and regulations and have procedures in place at all of our operating units to monitor compliance. Any matters which are identified as potential exposures under these laws and regulations are carefully reviewed by management to determine our potential liability. Although management is not aware of any exposures which would require an accrual under generally accepted accounting principles, there can be no assurance that prior or future operations will not ultimately result in violations, claims or other liabilities associated with these regulations.

The Internal Revenue Service (the "IRS") completed the examination of our federal income tax returns for the fiscal years ended March 31, 2001, 2002, and 2003. The IRS issued an Exam Report and Notice of Proposed Adjustment on November 9, 2007, in which it proposes to deny certain depreciation deductions claimed by us with respect to assets acquired by us from Republic Group LLC in November 2000 (the "Republic Assets").

If sustained, the adjustment proposed by the IRS would result in additional federal income taxes owed by us of approximately \$27.6 million, plus penalties of \$5.7 million and applicable interest. Moreover, for taxable years subsequent to fiscal 2003, we also claimed depreciation deductions with respect to the Republic Assets, as originally recorded. If challenged on the same basis as set forth in the Notice of Proposed Adjustment, additional federal income taxes of approximately \$39.6 million, plus applicable interest and possible civil penalties, could be asserted by the IRS for those periods. Also, additional state income taxes, interest, and civil penalties of approximately \$9.3 million would be owed by us for the fiscal years under exam and subsequent taxable years if the IRS' position is sustained. The IRS examination of federal income tax returns for fiscal years ended March 31, 2004, 2005 and 2006 is currently in process. See Note (F) for more information on the potential impact of open tax years.

On December 7, 2007, we filed an administrative appeal of the IRS's proposed adjustments. On December 17, 2008 our initial appeals hearing with the IRS was held. Our appeal is currently still in process. The Company intends to vigorously pursue the appeal and, if necessary, resort to the courts for a final determination.

We paid the IRS approximately \$45.8 million during November 2007, which is comprised of \$27.6 million in federal income taxes, \$5.7 million for penalties and \$12.5 million for interest, to avoid additional imposition of the large corporate tax underpayment interest rates. In the event we reach a settlement with the IRS through the appeals process or in the courts, we will reverse any accrued interest and penalties in excess of the negotiated settlement through the consolidated Statement of Earnings. In the event we are unable to reach a settlement, we believe we have a substantial basis for our tax position, and intend to vigorously contest the proposed adjustment in court. At this time, we are unable to predict with certainty the ultimate outcome or how much of the amounts paid for tax, interest, and penalties to the IRS and state taxing authorities will be recovered, if any.

We have certain deductible limits under our workers' compensation and liability insurance policies for which reserves are established based on the undiscounted estimated costs of known and anticipated claims. We have entered into standby letter of credit agreements to secure funding obligation on retentions relating to workers' compensation and auto and general liability self-insurance. At March 31, 2009, we had contingent liabilities under these outstanding letters of credit of approximately \$7.0 million.

The following table compares insurance accruals and payments for our operations:

	For the Years Ended March 31,	
	2009	2008
	(dollars in thousands)	
Accrual Balances at Beginning of Period	\$ 5,673	\$ 5,582
Insurance Expense Accrued	3,852	3,407
Payments	(3,860)	(3,316)
Accrual Balance at End of Period	<u>\$ 5,665</u>	<u>\$ 5,673</u>

We are currently contingently liable for performance under \$8.7 million in performance bonds required by certain states and municipalities, and their related agencies. The bonds are principally for certain reclamation obligations and mining permits. We have indemnified the underwriting insurance company against any exposure under the performance bonds. In our past experience, no material claims have been made against these financial instruments.

In the ordinary course of business, we execute contracts involving indemnifications that are standard in the industry and indemnifications specific to a transaction such as the sale of a business. These indemnifications might include claims relating to any of the following: environmental and tax matters; intellectual property rights; governmental regulations and employment-related matters; customer, supplier, construction contractor and other commercial contractual relationships; and financial matters. While the maximum amount to which we may be exposed under such agreements cannot be estimated, it is the opinion of management that these indemnifications are not expected to have a material adverse effect on the Company's consolidated financial position or results of operations. We currently have no outstanding guarantees of third party debt.

Our paperboard operation, Republic Paperboard Company LLC (“Republic”), is a party to a long-term paper supply agreement with St. Gobain pursuant to which Republic is obligated to sell to St. Gobain 95% of the gypsum-grade recycled paperboard requirements for three of St. Gobain’s wallboard plants. This comprises approximately 25% to 30% of Republic’s current annual output of gypsum-grade recycled paperboard.

We have certain forward purchase contracts, primarily for natural gas, that expire during calendar 2009. The contracts are for approximately 40% of our expected natural gas usage.

We have certain operating leases covering manufacturing, transportation and certain other facilities and equipment. Rental expense for fiscal years 2009, 2008 and 2007 totaled \$1.9 million, \$2.2 million and \$2.2 million, respectively. Minimum annual rental commitments as of March 31, 2009, under noncancellable leases are set forth as follows (dollars in thousands):

<u>Fiscal Year</u>	<u>Amount</u>
2010	\$ 1,338
2011	\$ 1,034
2012	\$ 201
2013	\$ 116
2014	\$ 84
Thereafter	\$ 9,760

(I) Pension and Profit Sharing Plans

We have several defined benefit and defined contribution retirement plans which together cover substantially all of our employees. We are not a party to any multi-employer pension plan. Benefits paid under the defined benefit plans covering certain hourly employees are based on years of service and the employee’s qualifying compensation over the last few years of employment. Our funding policy is to generally contribute amounts that are deductible for income tax purposes.

The annual measurement date is March 31 for the benefit obligations, fair value of plan assets and the funded status of the defined benefit plans.

The following table provides a reconciliation of the obligations and fair values of plan assets for all of our defined benefit plans over the two year period ended March 31, 2009 and a statement of the funded status as of March 31, 2009 and 2008:

	<u>For the Years Ended March 31,</u>	
	<u>2009</u>	<u>2008</u>
	(dollars in thousands)	
Reconciliation of Benefit Obligations -		
Benefit Obligation at April 1,	\$ 16,187	\$ 15,089
Service Cost - Benefits Earned During the Period	558	533
Interest Cost on Projected Benefit Obligation	1,003	898
Plan Amendments	-	-
Actuarial Loss	828	137
Benefits Paid	(485)	(470)
Benefit Obligation at March 31,	<u>\$ 18,091</u>	<u>\$ 16,187</u>

Reconciliation of Fair Value of Plan Assets -

Fair Value of Plan Assets at April 1,	\$ 14,082	\$ 13,781
Actual Return on Plan Assets	(3,786)	(523)
Employer Contributions	508	1,294
Benefits Paid	(485)	(470)
Fair Value of Plans at March 31,	<u>10,319</u>	<u>14,082</u>
Funded Status -		
Funded Status at March 31,	<u>\$ (7,772)</u>	<u>\$ (2,105)</u>
Amounts Recognized in the Balance Sheet Consist of -		
Accrued Benefit Liability	\$ (7,772)	\$ (2,105)
Accumulated Other Comprehensive Income	7,772	2,105
Net Amount Recognized	<u>\$ -</u>	<u>\$ -</u>

Information for pension plans with an accumulated benefit obligation in excess of plan assets:

	March 31,	
	2009	2008
	(dollars in thousands)	
Projected Benefit Obligation	\$ 18,091	\$ 16,187
Accumulated Benefit Obligation	\$ 17,945	\$ 15,961
Fair Value of Plan Assets	\$ 10,319	\$ 14,082

Net periodic pension cost for the fiscal years ended March 31, 2009, 2008 and 2007, included the following components:

	For the Years Ended March 31,		
	2009	2008	2007
	(dollars in thousands)		
Service Cost - Benefits Earned During the Period	\$ 558	\$ 533	\$ 515
Interest Cost of Projected Benefit Obligation	1,003	898	836
Expected Return on Plan Assets	(1,118)	(1,120)	(979)
Recognized Net Actuarial Loss	306	130	155
Amortization of Prior-Service Cost	143	147	150
Net Periodic Pension Cost	<u>\$ 892</u>	<u>\$ 588</u>	<u>\$ 677</u>

Expected benefit payments over the next five years, and the following five years under the pension plans are expected to be as follows:

<u>Fiscal Years</u>	<u>Total</u>
2010	\$ 651
2011	\$ 691
2012	\$ 711
2013	\$ 777
2014	\$ 893
2015-2019	\$ 5,630

The following table sets forth the assumptions used in the actuarial calculations of the present value of net periodic benefit cost and benefit obligations:

	March 31,		
	2009	2008	2007
Net Periodic Benefit Costs -			
Discount Rate	6.0%	6.0%	6.0%
Expected Return on Plan Assets	8.0%	8.0%	8.0%
Rate of Compensation Increase	3.5%	3.5%	3.5%

	March 31,	
	2009	2008
Benefit Obligations -		
Discount Rate	6.0%	6.0%
Rate of Compensation Increase	3.5%	3.5%

The expected long-term rate of return on plan assets is an assumption reflecting the anticipated weighted-average rate of earnings on the portfolio over the long-term. To arrive at this rate, we developed estimates of the key components underlying capital asset returns including: market-based estimates of inflation, real risk-free rates of return, yield curve structure, credit risk premiums and equity risk premiums. As appropriate, these components were used to develop benchmark estimates of the expected long-term management approach employed by us, and a return premium was added to the weighted-average benchmark portfolio return.

The pension plans' weighted-average asset allocation at March 31, 2009 and 2008 and the range of target allocation are as follows:

Asset Category -	Range of Target Allocation	Percentage of Plan Assets at March 31,	
		2009	2008
Equity Securities	40 – 60%	70%	70%
Debt Securities	35 – 60%	30%	30%
Other	0 – 5%	-	-
Total		<u>100%</u>	<u>100%</u>

Our pension investment strategies have been developed as part of a comprehensive asset/liability management process that considers the interaction between both the assets and liabilities of the plan. These strategies consider not only the expected risk and returns on plan assets, but also the detailed actuarial projections of liabilities as well as plan-level objectives such as projected contributions, expense and funded status.

The principal pension investment strategies include asset allocation and active asset management. The range of target asset allocations have been determined after giving consideration to the expected returns of each asset class, the expected variability or volatility of the asset class returns over time, and the complementary nature or correlation of the asset classes within the portfolio. We also employ an active management approach for the portfolio. Each asset class is managed by one or more external money managers with the objective of generating returns, net of management fees that exceed market-based benchmarks. None of the plans hold any EXP stock.

Based on our current actuarial estimates, we anticipate making contributions of approximately \$1.0 to \$1.5 million to our defined benefit plans for fiscal year 2010.

We also provide a profit sharing plan, which covers substantially all salaried and certain hourly employees. The profit sharing plan is a defined contribution plan funded by employer discretionary contributions and also allows employees to contribute on an after-tax basis up to 10% of their base annual salary. Employees are fully vested to the extent of their contributions at all times. Employees become fully vested in our contributions over a seven year period for contributions made prior to 2007, and over a six year period for contributions made beginning in 2007. Costs relating to the employer discretionary contributions for the Company's defined contribution plan totaled \$3.3 million, \$3.0 million and \$3.1 million in fiscal years 2009, 2008 and 2007, respectively.

Employees who became employed by us as a result of a previous transaction are provided benefits substantially comparable to those provided under the seller's welfare plans. These welfare plans included the seller's 401(k) plan which included employer matching percentages. As a result, the Company made matching contributions to its 401(k) plan totaling \$0.1 million for these employees during each of the fiscal years 2009, 2008 and 2007.

(J) Stock Option Plans

The Company accounts for its stock option plans under FAS 123(R) and the associated interpretations.

On January 8, 2004, the Company's stockholders approved a new incentive plan (the "Plan") that is a combined amendment and restatement of the two existing stock option plans discussed above. The number of shares available for issuance under the Plan has not increased from, and is the same as, the total combined number of shares available for issuance under the two stock plans listed above.

Long-Term Compensation Plans –

Options. We granted a target number of stock options during June 2007 to certain individuals (the "Fiscal 2008 Stock Option Grant") that may be earned, in whole or in part, if certain performance conditions are satisfied. The Fiscal 2008 Stock Option Grant will vest over a seven year period depending upon the achievement of specified levels of earnings per share and operating earnings. Options are vested as they are earned, and any options not earned at the end of the seven year period will be forfeited. These stock options were valued at the grant date using the Black-Scholes option pricing model. Certain other employees that were not included in the original grant were granted options under the Fiscal 2008 Stock Option Grant during the first quarter of fiscal 2009. These awards vest identically to the original grant, and expire on the same day as the original grants. The weighted-average assumptions used in the Black-Scholes model to value the option awards in fiscal 2009 are as follows: annual dividend rate of 2.0%, expected volatility of 36%, risk free interest rate of 3.3% and expected life of 6.0 years. We are expensing the fair value of the options granted in fiscal 2009 over a five year period, as adjusted for expected forfeitures.

In early August 2008, we granted options to members of the Board of Directors (the "Fiscal 2009 Board of Directors Grant"). Options granted under the Fiscal 2009 Board of Directors Grant vested immediately, and can be exercised from the date of grant until their expiration at the end of seven years. In late August 2008, the Compensation Committee of the Board of Directors approved an incentive equity award to certain individuals that may be earned, in whole or in part, if certain performance conditions are satisfied (the "Fiscal 2009 Stock Option Grant"). The Fiscal 2009 Stock Option Grant was structured to provide short-term incentives to address the changed circumstances in the economy and our business since the issuance of the Fiscal 2008 Stock Option Grant. The performance and vesting criteria for the Fiscal 2009 Stock Option Grant

was based on the achievement of specified levels of earnings before interest, taxes, depreciation and amortization, as well as achievement of certain safety metrics for the nine month period ending March 31, 2009. Under the terms of the option grant, all of the stock options were earned at March 31, 2009. The options have a term of seven years, and became vested when earned. These stock options were valued at the grant date using the Black-Scholes option pricing model. The weighted-average assumptions used in the Black-Scholes model to value the option awards granted in fiscal 2009 are as follows: annual dividend rate of 2.0%, expected volatility of 36%, risk free interest rate of 3.4% and expected life of 6.0 years. We expensed the fair value of the Fiscal 2009 Stock Option Grant over the nine month period ended March 31, 2009, as adjusted for actual forfeitures.

All stock options issued during fiscal 2009 and 2008 were valued at the grant date using the Black-Scholes option pricing model. The weighted-average assumptions used in the Black-Scholes model to value the option awards in fiscal 2009 and 2008 are as follows:

	2009	2008
Dividend Yield	2.0%	2.0%
Expected Volatility	36.0%	32.0%
Risk Free Interest Rate	3.4%	4.7%
Expected Life	6.0 years	5.5 years

For the years ended March 31, 2009, 2008 and 2007, we expensed approximately \$7.1 million, \$5.4 million and \$3.9 million, respectively. At March 31, 2009, there was approximately \$5.3 million of unrecognized compensation cost related to outstanding stock options which is expected to be recognized over a weighted-average period of 5.0 years.

The following table represents stock option activity for the years presented:

	For the Years Ended March 31,					
	2009		2008		2007	
	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price
Outstanding Options at Beginning of Year	2,787,047	\$ 34.26	1,636,852	\$ 19.07	1,816,865	\$ 15.74
Granted	912,910	\$ 27.84	1,457,148	\$ 47.12	150,364	\$ 49.16
Exercised	(121,228)	\$ 11.01	(281,033)	\$ 12.44	(263,489)	\$ 11.55
Cancelled	(10,298)	\$ 62.83	(25,920)	\$ 34.11	(66,888)	\$ 25.78
Outstanding Options at End of Year	3,568,431	\$ 33.32	2,787,047	\$ 34.26	1,636,852	\$ 19.07
Options Exercisable at End of Year	1,995,631		1,325,176		1,366,744	
Weighted Average Fair Value of Options Granted during the Year		\$ 9.07		\$ 14.38		\$ 21.88

The following table summarizes information about stock options outstanding at March 31, 2009:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number of Shares Outstanding	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number of Shares Outstanding	Weighted Average Exercise Price
\$6.80 - \$8.15	237,215	1.74	\$ 7.57	237,215	\$ 7.57
\$9.57 - \$13.43	394,537	3.71	\$ 12.09	394,537	\$ 12.09
\$21.52 - \$29.08	1,103,970	5.76	\$ 26.08	1,100,970	\$ 26.09
\$34.09 - \$40.78	416,670	4.40	\$ 37.06	209,870	\$ 38.50
\$47.53 - \$62.83	1,416,039	5.32	\$ 48.10	53,039	\$ 62.10
	<u>3,568,431</u>	4.93	\$ 33.32	<u>1,995,631</u>	\$ 23.37

As of March 31, 2009 there was no aggregate intrinsic value of stock options outstanding for non-exercisable options. Aggregate intrinsic value for exercisable stock options on March 31, 2009 totaled \$1.9 million.

During the year ended March 31, 2009, the total intrinsic value of options exercised was approximately \$1.8 million.

Restricted Stock Units. As part of the Fiscal 2009 Stock Option Grant, the same employees receiving options also received 100,750 restricted stock units (“RSUs”). The vesting criteria for the RSUs are the same as the criteria for the Fiscal 2009 Stock Option Grant and, accordingly, all of the RSUs were earned and will become vested on August 21, 2009. The RSUs earned are being expensed over a one year period. The value of RSUs granted in previous years is being amortized over a three year period for grants to employees and a period not to exceed ten years for grants to directors. Expense related to RSUs was approximately \$1.9 million, \$0.5 million and \$1.4 million in fiscal years ended March 31, 2009, 2008 and 2007, respectively. At March 31, 2009 there was approximately \$1.4 million of unrecognized compensation cost from restricted stock units that will be recognized over a weighted-average period of 2.2 years.

Restricted Stock. We granted 15,000 shares of restricted stock to an employee on June 10, 2008. The restricted stock was valued at approximately \$0.5 million, based on the closing price of the stock on the date of the grant. The restrictions lapse in annual increments over a seven year period, with the expense recognized ratably over a seven year period.

Shares available for future stock option and restricted stock unit grants were 299,687 at March 31, 2009.

(K) Hedging Activities

We do not use derivative financial instruments for trading purposes, but have utilized them in the past to convert a portion of our variable-rate debt to fixed-rate debt and to manage our fixed to variable-rate debt ratio. All derivatives, whether designated in hedging relationships or not, are required to be recorded on the balance sheet at fair value. If the derivative is designated as a cash flow hedge, the effective portions of changes in the fair value of the derivative are recorded in other comprehensive income (loss) and are recognized in the statement of earnings when the hedged item affects earnings. Ineffective portions of changes in the fair value of cash flow hedges are immediately recognized in earnings.

(L) Net Interest Expense

The following components are included in interest expense, net:

	For the Years Ended March 31,		
	2009	2008	2007
	(dollars in thousands)		
Interest Income	\$ (447)	\$ (1,075)	\$ (2,282)
Interest Expense	23,937	20,070	11,278
Interest Expense – IRS	4,934	6,407	-
Interest Capitalized	-	(4,788)	(3,998)
Other Expenses	496	460	431
Interest Expense, net	<u>\$ 28,920</u>	<u>\$ 21,074</u>	<u>\$ 5,429</u>

Interest income includes interest on investments of excess cash and interest on notes receivable. Components of interest expense primarily include interest associated with the Bank Credit Facility, the Senior Notes, commitment fees based on the unused portion of Bank Credit Facility and the unrecognized tax benefits in accordance with FIN 48. Other expenses include amortization of debt issue costs and costs associated with the Bank Credit Facility and the Senior Notes. Capitalized interest relates to the modernization of our Illinois Cement facility during fiscal year 2007 and our construction of a gypsum wallboard facility in Georgetown, South Carolina during fiscal years 2007 and 2008 and was calculated by applying our average borrowing rate to the average balance of our construction in progress account. We ceased capitalizing interest upon the start-up of the plants.

(M) Stockholders' Equity

On January 8, 2004, our stockholders approved an amendment to our certificate of incorporation to increase the authorized number of shares of capital stock that we may issue from 50,000,000 shares of common stock and 2,000,000 shares of preferred stock to 100,000,000 shares of common stock and 5,000,000 shares of preferred stock. The amendment to the Certificate of Incorporation became effective on January 30, 2004. Our Board of Directors designated 40,000 shares of preferred stock for use in connection with the Rights Agreement discussed below.

Effective February 2, 2004, we entered into a Rights Agreement as amended and restated on April 11, 2006 (as amended and restated, "Rights Agreement") that was approved by stockholders at the Special Meeting of Stockholders held on January 8, 2004. In connection with the Rights Agreement, the Board authorized and declared a dividend of one right per share of common stock (the "Common Stock"). The Rights entitle our stockholders to purchase Common Stock (the "Rights") in the event certain efforts are made to acquire control of the Company. There are no separate certificates or market for the Rights.

The Rights are represented by and trade with our Common Stock. The Rights will separate from the Common Stock upon the earlier of: (1) a public announcement that a person has acquired beneficial ownership of shares of Common Stock representing in the aggregate 15% or more of the total number of votes entitled to be cast generally by the holders of Common Stock then outstanding, or (2) the commencement of a tender or exchange offer that would result in a person beneficially owning shares of Common Stock representing in the aggregate 15% or more of the total number of votes entitled to be cast generally by the holders of Common Stock then outstanding. Should either of these conditions be met and the Rights become exercisable, each Right will entitle the holder to buy 1/1,000th of a share of our Preferred Stock at an exercise price of \$140.00. Each 1/1,000th of a share of the Preferred Stock will essentially be the economic equivalent of three shares of Common Stock.

Under certain circumstances, the Rights entitle the holders to buy our stock or shares of the acquirer's stock at a 50% discount. The Rights may be redeemed by us for \$0.001 per Right at any time prior to the first public announcement of the acquisition of beneficial ownership of shares of Common Stock representing 15% or more of the total number of votes entitled to be cast generally by the holders of Common Stock then outstanding. If not redeemed, the Rights will expire on January 7, 2014.

(N) Quarterly Results (unaudited)

	For the Years Ended March 31,	
	2009	2008
	(dollars in thousands, except per share data)	
First Quarter -

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of
Eagle Materials Inc.:

We have audited the accompanying consolidated balance sheets of Eagle Materials Inc. and subsidiaries (the "Company") as of March 31, 2009 and 2008, and the related consolidated statements of earnings, cash flows and stockholders' equity, for each of the three years in the period ended March 31, 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Eagle Materials Inc. and subsidiaries at March 31, 2009 and 2008, and the consolidated results of their operations and their cash flows for each of the three years in the period ended March 31, 2009, in conformity with U.S. generally accepted accounting principles.

As discussed in Note A to the consolidated financial statements, the Company changed its method for income tax uncertainties effective April 1, 2007.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of March 31, 2009, based on criteria established in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated May 26, 2009 expressed an unqualified opinion thereon.

Texas-Lehigh Cement Company LP
Notes to Financial Statements

(A) Organization

Texas Lehigh Cement Company ("Texas Lehigh"), a Texas general partnership, was formed June 27, 1986 to operate a cement plant near Austin, Texas. Texas Lehigh was a fifty-fifty joint venture between Texas Cement Company (TCC), a wholly owned subsidiary of Eagle Materials, Inc. (EXP, formerly known as Centex Construction Products, Inc.), and Lehigh Portland Cement Company (Lehigh). On October 1, 2000, the existing Texas general partnership was converted to a Texas limited partnership. Subsequent to the limited partnership formation, TCC and Lehigh each contributed a 0.1% interest to a general partner, TLCC GP LLC and Lehigh Portland Holdings, LLC, and a 49.9% interest to a limited partner, TLCC LP LLC and Lehigh Portland Investments, LLC. The conversion and subsequent contributions were done to afford the former partners additional liability protection. Texas Lehigh Cement Company LP continues to do business as "Texas Lehigh Cement Company."

TCC's initial capital contribution consisted of a cement plant and related real property located in Buda, Texas; four distribution terminals; various operating agreements, licenses, and excavation rights; and net working capital as specified in the joint venture agreement. Lehigh's initial capital contribution consisted of a distribution terminal and related operating agreements, licenses, inventory, and cash.

In September 2006, Texas Lehigh paid \$24.5 million for a 15% interest in Houston Cement Company ("HCC"), a joint venture. HCC operates two terminals in Houston, Texas. Under the terms of the joint venture agreement, Texas Lehigh is entitled to sell up to 495,000 tons from the terminals each year.

Due to a number of factors, namely the shared risks and rights under the joint venture agreement, Texas Lehigh accounts for its investment in HCC using the equity method.

The financial statements and footnote information for the year ended December 31, 2006 are included for comparative purposes and have not been audited.

(B) Significant Accounting Policies

Cash and Cash Equivalents-

Cash and cash equivalents include investments with original maturities of three months or less. The carrying amount approximates fair value due to the short maturity of those investments.

Inventories-

Inventories are valued at the lower of average cost or market. Cement and materials-in-process include materials, labor, and manufacturing overhead.

Concentration of Risk -

One customer accounted for 17.5%, 12.8% and 10.5% of cement sales for 2008, 2007 and 2006, respectively, and 16.8% and 12.0% of accounts receivable at December 31, 2008 and 2007, respectively.

Notes Receivable -

The note receivable to Texas Lehigh is secured by liens on various pieces of equipment and bears interest at LIBOR plus 3%, which was approximately 6.58% and 8.47% at December 31, 2008 and 2007, respectively. The note is scheduled to mature in August 2011.

Texas-Lehigh Cement Company LP
Notes to Financial Statements

Property, Plant, and Equipment -

Property, plant, and equipment are stated at cost. Texas Lehigh's policy is to capitalize renewals and betterments and to expense repairs and maintenance when incurred. The cost and related accumulated depreciation of assets sold or retired are removed from the financial statements, and any gain or loss is recorded in interest and other income on the statement of operations. Texas Lehigh periodically evaluates whether current events or circumstances indicate that the carrying value of its depreciable assets may not be recoverable. At December 31, 2008 and 2007, management believes no events or circumstances indicate that the carrying value may not be recoverable.

Depreciation and Depletion-

Depreciation is computed on a straight-line basis over the estimated useful lives of the related assets, which are as follows:

Cement plant	5 to 30 years
Mobile equipment and other	2 to 10 years

Raw material deposits are depleted as such deposits are extracted for production utilizing the units-of-production method.

Revenue Recognition -

Revenue from the sale of cement is recognized when title and ownership are transferred upon shipment to the customer.

Federal Income Taxes -

No federal income taxes are payable by Texas Lehigh, and none have been provided for in the accompanying financial statements. The partners are to include their respective share of Company income or loss in their individual tax returns. Texas Lehigh is subject to Texas margin tax on its income earned in Texas.

Texas Lehigh's tax return and the amount of allocable Company income or losses are subject to examination by federal and state taxing authorities. If such examinations result in changes to Company income or losses, the tax liability of the partners could be changed accordingly. No such examinations are presently in process.

Shipping and Handling Fees and Costs -

In accordance with Emerging Issues Task Force (EITF) Issue No. 00-10, *Accounting for Shipping and Handling Fees and Costs*, Texas Lehigh classifies its freight revenue as sales and freight cost as cost of goods sold, respectively. Approximately \$9,983,446, \$8,834,655 and \$7,228,898 were classified as cost of goods sold in 2008, 2007 and 2006, respectively.

Texas-Lehigh Cement Company LP
Notes to Financial Statements

Comprehensive Income -

A summary of comprehensive income for the years ended December 31, 2008, 2007 and 2006 is presented below:

	Year ended December 31,		
	2008	2007	2006
			(unaudited)
Net income	\$ 68,199,008	\$ 66,948,952	\$ 66,100,006
Other comprehensive income:			
Actuarial changes	(1,270,966)	(18,042)	-
Minimum pension liability adjustments	-	-	92,150
Comprehensive income	\$ 66,928,042	\$ 66,930,910	\$ 66,192,156

As of December 31, 2008, Texas Lehigh has another accumulated comprehensive loss of \$1,565,227 in connection with recognizing the difference between the fair value of the pension assets and the projected benefit obligation. This amount is excluded from earnings and reported in a separate component of partners' capital as "Other Comprehensive Loss". Texas Lehigh adopted SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)", effective December 31, 2006.

Use of Estimates-

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

(C) Accrued Expenses

Accrued expenses at December 31, 2008 and 2007 consist of the following:

	Year ended December 31,	
	2008	2007
Payroll and incentive compensation	\$ 3,597,988	\$ 3,297,981
Benefits and insurance	1,649,817	1,545,908
Property taxes	1,501,250	1,454,843
Other	2,439,872	937,452
Comprehensive income	\$ 9,188,927	\$ 7,236,184

(D) Purchased Cement

Texas Lehigh purchases cement for resale primarily in the Houston, Texas market. Sales of purchased cement were approximately \$61,587,087, \$52,865,877 and \$20,458,494, and cost of sales was approximately \$56,773,370, \$47,450,765 and \$17,247,245 for 2008, 2007 and 2006, respectively.

Texas-Lehigh Cement Company LP
Notes to Financial Statements

(E) Pension and Profit Sharing Plans

Texas Lehigh provides a profit sharing plan, a defined contribution plan (“401(k) plan”) and a noncontributory defined benefit pension plan, which together covers substantially all employees and provides specified benefits to qualified employees. Texas Lehigh is not a party to any multi-employer pension plan. Benefits paid under the defined benefit plan cover hourly employees and are based on years of service and the employee’s qualifying compensation over the last few years of employment. Texas Lehigh’s funding policy is to generally contribute amounts that are deductible for income tax purposes.

The annual measurement date is December 31 for the benefit obligations, fair value of plan assets and the funded status of the defined benefit plan.

The following table provides a reconciliation of the defined benefit pension plan obligations and fair value of plan assets over the two-year period ended December 31, 2008 and a statement of the funded status as of December 31, 2008 and 2007:

	Year ended December 31,	
	2008	2007
Reconciliation of Benefit Obligations		
Benefit obligation at January 1	\$ 3,680,372	\$ 3,418,157
Service cost	138,718	133,683
Interest cost on projected benefit obligation	216,770	202,793
Actuarial gain (loss)	146,116	(1,296)
Benefits paid	(74,875)	(72,965)
Benefit obligation at December 31	4,107,101	3,680,372
Reconciliation of Fair Value of Plan Assets		
Fair value of plan assets at January 1	3,533,066	3,233,920
Actual return on plan assets	(916,317)	164,800
Employer contributions	0	207,311
Benefits paid	(74,875)	(72,965)
Fair value of plan assets at December 31	\$ 2,541,874	\$ 3,533,066
Funded status at December 31	\$ (1,565,227)	\$ (147,306)
December 31,		
	2008	2007
Amounts Recognized in the Balance Sheet Consist of		
Accrued Benefit Liability	\$ (1,565,227)	\$ (147,306)
Accumulated Other Comprehensive Loss	1,565,227	147,306
Net Amount Recognized	\$ -	\$ -

Texas-Lehigh Cement Company LP
Notes to Financial Statements

Information for pension plans with an accumulated benefit obligation in excess of plan assets:

	Year ended December 31,	
	2008	2007
Projected Benefit Obligation	\$ 4,107,101	\$ 3,680,372
Accumulated Benefit Obligation	\$ 4,082,404	\$ 3,642,882
Fair Value of Plan Assets	\$ 2,541,874	\$ 3,533,066

Net periodic pension cost for the fiscal years ended December 31, 2008, 2007 and 2006 included the following components:

	Year ended December 31,		
	2008	2007	2006 (unaudited)
Service cost – benefits earned during the period	\$ 138,718	\$ 133,683	\$ 133,382
Interest cost of projected benefit obligation	216,770	202,793	191,967
Expected return on plan assets	(279,726)	(255,770)	(215,022)
Recognized net actuarial loss	49,404	49,844	86,488
Amortization of prior-service cost	21,788	21,788	21,788
Net periodic pension cost	<u>\$ 146,954</u>	<u>\$ 152,338</u>	<u>\$ 218,603</u>

Expected benefit payments over the next five years, and the following five years under the pension plan are expected to be as follows:

2009	\$ 77,981
2010	86,190
2011	89,720
2012	92,956
2013	104,790
2014 – 2018	\$ 771,981

The following table sets forth the rates used in the actuarial calculations of the present value of benefit obligations and the rate of return on plan assets:

	Year ended December 31,		
	2008	2007	2006 (unaudited)
Assumptions used to determine benefit obligations at the annual measurement date were:			
Obligation discount rate	5.75%	6.00%	6.00%
Compensation increase rate	4.00%	4.00%	4.00%
Assumptions used to determine net periodic benefit costs were:			
Obligation discount rate	6.00%	6.00%	5.75%
Long-term rate of return on plan assets	8.00%	8.00%	8.00%
Compensation increase rate	4.00%	4.00%	4.00%

Texas-Lehigh Cement Company LP
Notes to Financial Statements

The expected long-term rate of return on plan assets is an assumption reflecting the anticipated weighted average rate of earnings on the portfolio over the long-term. To arrive at this rate, Texas Lehigh developed estimates of the key components underlying capital asset returns including: market-based estimates of inflation, real risk-free rates of return, yield curve structure, credit risk premiums and equity risk premiums. As appropriate, these components were used to develop benchmark estimates of expected long-term rates of return for each asset class, which were portfolio weighted.

The pension plan weighted-average asset allocation at year-end 2008 and 2007 and the range of target follows:

Asset category:	Range of Target Allocation	Percentage of Plan Assets at Year-End	
		2008	2007
Equity securities	40-60%	61%	60%
Debt securities	35-60%	37%	37%
Other	0-5%	2%	3%
Total		100%	100%

Texas Lehigh's pension investment strategies have been developed as part of a comprehensive asset/liability management process that considers the interaction between both the assets and liabilities of the plan. These strategies consider not only the expected risks and returns on plan assets, but also the detailed actuarial projections of liabilities as well as plan-level objectives such as projected contributions, expense and funded status.

The principal pension investment strategies include asset allocation and active asset management. The range of target asset allocations have been determined after giving consideration to the expected returns of each asset class, the expected variability or volatility of the asset class returns over time, and the complementary nature or correlation of the asset classes within the portfolio. Texas Lehigh also employs an active management approach for the portfolio. Each asset class is managed by one or more external money managers with the objective of generating returns, net of management fees that exceed market-based benchmarks.

Although Texas Lehigh does expect to contribute to its defined benefit plan during 2009, the contribution amount is yet undetermined.

Texas Lehigh also provides a profit sharing plan, which covers substantially all salaried employees and a 401(k) plan which covers substantially all employees. Texas Lehigh matches employees' 401(k) contributions up to 4% of employees' salaries. Texas Lehigh's contributions to the profit sharing and 401(k) plans were approximately \$570,683, \$548,870 and \$553,384 in 2008, 2007 and 2006, respectively.

Texas-Lehigh Cement Company LP
Notes to Financial Statements

(F) Related-Party Transactions

Texas Lehigh had sales to affiliates of \$26,767,216, \$33,713,492 and \$12,534,734 in 2008, 2007 and 2006, respectively, of which approximately \$2,963,356 and \$2,968,558 is included in trade accounts receivable at December 31, 2008 and 2007. Texas Lehigh purchased \$2,519,675, \$855,067 and \$938,157 of cement from Lehigh in 2008, 2007 and 2006, respectively, and also purchased \$20,819,610, \$32,454,516 and \$3,014,158 of cement from HCC in 2008, 2007 and 2006, respectively. Texas Lehigh accrued \$1,247,135 and \$2,887,199 for purchased cement received from these affiliates but not paid for at December 31, 2008 and 2007, respectively.

Texas Lehigh reimburses EXP for certain expenses paid by EXP on Texas Lehigh's behalf. Total payments made to EXP for reimbursement of expenses were \$1,755,854, \$2,147,865 and \$2,156,458 during 2008, 2007 and 2006. At December 31, 2008 and 2007, Texas Lehigh had accrued liabilities of \$133,728 and \$120,292, respectively, for the reimbursement of expenses paid by EXP.

(G) Commitments and Contingencies

Texas Lehigh is involved in certain legal actions arising in the ordinary course of its business. Management is of the opinion that all outstanding litigation will be resolved without material effect to the financial position or results of operations of Texas Lehigh.

Report of Independent Auditors

The Management Committee
Texas Lehigh Cement Company LP

We have audited the accompanying balance sheet of Texas Lehigh Cement Company LP (a Texas limited partnership) as of December 31, 2008 and 2007, and the related statements of operations, changes in partners' capital, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Texas Lehigh Cement Company LP at December 31, 2008 and 2007, and the results of its operations and its cash flows for the year then ended in conformity with U.S generally accepted accounting principles.

The accompanying financial statements as of and for the year ended December 31, 2006 were not audited by us and, accordingly, we do not express an opinion on them.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

We have established a system of disclosure controls and procedures that are designed to ensure that material information relating to the Company, which is required to be disclosed by us in the reports that we file or submit under the Securities Exchange Act of 1934 (“Exchange Act”), is recorded, processed, summarized and reported within the time periods specified by the SEC’s rules and forms, and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, in a timely fashion. An evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) was performed as of the end of the period covered by this annual report. This evaluation was performed under the supervision and with the participation of management, including our CEO and CFO. Based upon that evaluation, our CEO and CFO have concluded that these disclosure controls and procedures were effective.

During the Company’s fourth quarter, there were no significant changes in internal control over financial reporting that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

MANAGEMENT REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Eagle Materials Inc. (the “Company”) is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The Company’s internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The Company’s internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- provide reasonable assurance that the transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company’s assets that could have a material effect on the financial statements.

Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of March 31, 2009. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control – Integrated Framework*.

Based on its assessment using the COSO criteria, management believes that the Company maintained, in all material respects, effective internal control over financial reporting, as of March 31, 2009.

The Company's independent registered public accounting firm has issued an attestation report on management's assessment of the Company's internal control over financial reporting, which immediately follows this report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders of
Eagle Materials Inc.

We have audited Eagle Materials Inc. and subsidiaries' internal control over financial reporting as of March 31, 2009, based on criteria established in *Internal Control -- Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Eagle Materials Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Eagle Materials Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of March 31, 2009, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Eagle Materials Inc. and subsidiaries as of March 31, 2009 and 2008, and the related consolidated statements of earnings, cash flows, and stockholders' equity for each of the three years in the period ended March 31, 2009 of Eagle Materials Inc. and our report dated May 26, 2009 expressed an unqualified opinion thereon.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Except for the information below regarding our code of ethics, the information called for by Items 10, 11, 12, 13 and 14 is incorporated herein by reference to the information included and referenced under the following captions in the Company's Proxy Statement for the Company's August 6, 2009 Annual Meeting of Stockholders (the "2009 EXP Proxy Statement"):

<u>Items</u>	<u>Caption in the 2009 EXP Proxy Statement</u>
10	Executive Officers who are not Directors
10	Election of Directors and Related Matters
10	Stock Ownership-Section 16(a) Beneficial Ownership Reporting Compliance
10	Stock Ownership – Code of Conduct
11	Executive Compensation
11	Compensation Discussion and Analysis
11	Potential Payments Upon Termination or Change of Control
12	Stock Ownership
12	Approval of Amendment to Increase the Number of Shares Available Under our Incentive Plan – Equity Compensation Plan Information
13	Stock Ownership – Related Party Transactions
13	Election of Directors and Related Matters
14	Relationship with Independent Public Accountants

Code of Ethics. The policies comprising the Company's code of ethics ("*Eagle Ethics - A Guide to Decision - Making on Business Conduct Issues*") will represent both the code of ethics for the principal executive officer, principal financial officer, and principal accounting officer under SEC rules, and the code of business conduct and ethics for directors, officers, and employees under NYSE listing standards. The code of ethics is published on the corporate governance section of the Company's website at www.eaglematerials.com.

Although the Company does not envision that any waivers of the code of ethics will be granted, should a waiver occur for the principal executive officer, principal financial officer, the principal accounting officer or controller, it will be promptly disclosed on our internet site. Also, any amendments of the code will be promptly posted on our internet site.

ITEM 11. EXECUTIVE COMPENSATION

See Item 10 above.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS

See Item 10 above.

EQUITY COMPENSATION PLANS

See Item 10 above.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

See Item 10 above.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

See Item 10 above.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

a) The following documents are filed as part of this Report:

(1) Financial Statements

Reference is made to the Index to Financial Statements under Item 8 in Part II hereof, where these documents are listed.

(2) Schedules

Schedules are omitted because they are not applicable or not required or the information required to be set forth therein is included in the consolidated financial statements referenced above in section (a) (1) of this Item 15.

(3) Exhibits

The information on exhibits required by this Item 15 is set forth in the Eagle Materials Inc. Index to Exhibits appearing on pages 84-87 of this Report.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this Form 10-K to be signed on its behalf by the undersigned, thereunto duly authorized.
