This offering statement shall only be qualified upon order of the Commission, unless a subsequent amendment is filed indicating the intention to become qualified by operation of the terms of Regulation A.

- (b) The securities will be offered by the officers of Agri-Labs who will receive no additional compensation for their sales activities. The offer of Class B shares will be offered only to employees or outside directors of Agri-Labs or its Class A shareholders. The offer of Class C shares will be limited to licensed and practicing veterinarians or business entities comprised of veterinarians who purchase on an annual basis a specified level of product from Agri-Labs. Agri-Labs currently intends to offer the securities in the following state's jurisdictions: Alabama, Arkansas, California, Colorado, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Missouri, Montana, Nebraska, New Mexico, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee, Texas and Wisconsin.

ITEM 5. Unregistered Securities Issued or Sold Within One Year

(a) As to any unregistered securities issued by the issuer or any of its predecessors or affiliated issuers within one year prior to the filing of this Amended Form 1-A, state:

(1) Name of such issuer. Agri-Laboratories, Ltd.

(2) The title and amount of securities issued. Within one year prior to filing this Amended Form 1-A, no shares of Class A or Class C stock of Agri-Laboratories, Ltd. were issued; 390 shares of Class B stock of Agri-Laboratories, Ltd. were issued.

(3) Offering price. Within one year prior to filing of this Amended Form 1-A, Class B shares were sold for book value adjusted on a monthly basis. During this period the book value of Class B shares ranged from \$23.90 to \$24.03 per share. A total of 350 shares of Class B stock were issued for cash consideration in the aggregate amount of \$8,220.50.

(4) Persons to whom the securities were issued. The names and identities of persons to whom Class B shares were issued within one year prior to the filing of this Amended Form 1-A are as follows:

Rosemary Dorsey	Ed Spencer
Erin Evans	Susan Howell
Terry Christie	Robert Keegan, II

(b) Sales for accounts of others. No securities sold by the issuer or any of its predecessors or affiliated issuers within one year prior to the filing of this Amended Form 1-A were for the account of any person who at the time was a director, officer, promoter or principal security holder of the issuer, or who was an underwriter of any securities of such issuer.

PART I— NOTIFICATION

ITEM 1. Significant Parties.

a) Issuer's Directors:

ITEM 2. Application of Rule 262

None of the persons identified in response to Item 1 are subject to any disqualification pursuant to Rule 262.

ITEM 3. Affiliate Sales

Not applicable.

ITEM 4. Jurisdictions in Which Securities Are to be Offered

(a) Not applicable.

(c) Basis for exemption. The sale of Class B and Class C shares within one year prior to filing this Amended Form 1-A was done pursuant to an offering under an exemption qualified under Regulation A (File No. 333-134078) as qualified on December 23, 2008. The amount of securities sold within twelve months prior to commencing this Regulation A Offering was 350 B shares for aggregate offering proceeds of \$8,220.50.

ITEM 6. Other Present or Proposed Offerings

Not applicable.

ITEM 7. Marketing Arrangements

(a) The Class B and Class C shares to be issued under this Amended Form 1-A offering are subject to restrictions on transfer imposed by Agri-Labs' Bylaws. These shares may not be sold or transferred by the holder without the consent of Agri-Labs. Upon notice of intent to transfer the shares, Agri-Labs has an option or right of refusal to purchase the shares at book value.

(b) Not applicable.

ITEM 8. Relationship with Issuer of Experts Named in Offering Statement.

Not applicable.

ITEM 9. Use of a Solicitation of Interest Document

Not applicable.

OFFERING CIRCULAR
ORIGINAL EFFECTIVE DATE: December 23, 2008

AMENDMENT NO. 1
FILE NO. 333-134078
(Filed _____, 2009)

AGRI-LABORATORIES, LTD.
A Delaware Corporation
20927 State Route K
St. Joseph, Missouri 64505
Phone: (816) 223-9533
Fax: (816) 233-9546

Class B Common Stock – 100,000 shares
Price \$24.53 share

Class C Common Stock – 100,000 shares
Price \$24.53 per share

MAXIMUM AGGREGATE OFFERING AMOUNT

Class B Common Stock - \$2,453,000.00
Class C Stock - \$2,453,000.00
Total Maximum Offering Amount - \$4,906,000.00

Price per share \$24.53 as of October 1, 2009 valid through October 31, 2009

	Price to Public	Underwriting Discounts and Commissions	Proceeds to Issuer
Class B Per Share	24.53	-0-	24.53
Total Class B Shares	2,453,000.00	-0-	2,453,000.00
Class C Per Share	24.53	-0-	24.53
Total Class C Shares	2,453,000.00	-0-	2,453,000.00
Total Class B and Class C Shares	4,906,000.00	-0-	4,906,000.00

Agri-Laboratories, Ltd. (“Agri-Labs”), a Delaware corporation, is offering up to 100,000 shares of its Class B common and up to 100,000 shares of its Class C common stock. The shares are being offered at the book value per share, which is the net worth (assets less total liabilities) divided by the total number of outstanding common shares (initially Class A, B and C shares). The current book value is \$24.53 per share. After qualification, the offering price will be adjusted after each fiscal month to reflect the current net book value (divided by the total number of outstanding Class A, B and C shares), which is the current net worth (assets less total liabilities divided by the total number of outstanding common shares (initially Class A, B and C shares)). Class B and C shareholders who have purchased pursuant to this Offering and who have received a current offering circular will receive a written notice of each monthly adjustment. In no event will this adjustment result in the aggregate offering amount exceeding \$4,963,486.04

(\$5million less \$36,513.96, aggregate offering proceeds for all securities sold within twelve months before the start of the initial offering qualified December 23, 2008, in reliance on Regulation A). Ownership of the Class B common stock is limited to employees of Agri-Labs or employees of Class A shareholders of Agri-Labs or outside directors. Class A shareholders are all retail distributors of Agri-Labs products. Ownership of the Class C common stock is limited to licensed, practicing veterinarians or businesses comprised of veterinarians. Class B shares must be purchased in minimum increments of 50 shares. Class C shares must be purchased in minimum increments of 1,000 shares. The offering price is determined by reference to the existing book value of Class A, B and C shares. The Offering is being made on a "best efforts" basis directly to purchasers by Agri-Labs on a continuing basis for two years from the date the Offering is first qualified. This Offering will terminate on December 23, 2010. The Offering is not contingent upon sales of a minimum offering amount and there is no minimum number of shares which must be sold in order for Agri-Labs to have access to offering proceeds. Therefore, the proceeds will be deposited directly into Agri-Labs operating accounts. See "Use of Proceeds."

See "Risk Factors" beginning on page 6 for a discussion of certain risks that should be considered by prospective purchasers of the Shares offered hereunder.

THE UNITED STATES' SECURITIES AND EXCHANGE COMMISSION DOES NOT PASS UPON THE MERITS OF OR GIVE ITS APPROVAL TO ANY SECURITIES OFFERED OR THE TERMS OF THE OFFERING, NOR DOES IT PASS UPON THE ACCURACY OR COMPLETENESS OF ANY OFFERING CIRCULAR OR OTHER SELLING LITERATURE. THESE SECURITIES ARE OFFERED PURSUANT TO AN EXEMPTION FROM REGISTRATION WITH THE COMMISSION; HOWEVER, THE COMMISSION HAS NOT MADE AN INDEPENDENT DETERMINATION THAT THE SECURITIES OFFERED HEREUNDER ARE EXEMPT FROM REGISTRATION.

OFFERING SUMMARY

This summary highlights selected information from this document and may not contain all the information that is important to you. To understand the Offering fully, you should carefully read the entire document.

Agri-Laboratories, Ltd. ("Agri-Labs") is a Delaware corporation formed in August of 1984. It is a wholesale distributor of pesticides, insecticides, pharmaceuticals and biologicals in the global animal health market. It purchases these products from over 50 manufacturers and resells them at mark up over its cost to animal health product distributors (its Class A shareholders). These distributors in turn sell the product to veterinarians, retail stores, livestock producers and other consumers. Title to the goods passes to the distributors when sold, and Agri-Labs recognizes revenues on an accrual basis when the goods are sold.

Agri-Labs' current capital structure consists of Class A common stock, Class B and Class C common stock. Class A shares are voting shares with each Class A stockholder entitled to one (1) vote for each Class A share held. Class A shareholders are entitled to vote on any matter which shareholders are entitled to vote on pursuant to the Bylaws of Agri-Labs. The Company was initially organized with 15 Class A shareholders each purchasing 10,000 shares followed by a second purchase of 5,000 shares for a total of 15,000 Class A shares at \$1 per share, amounting to an initial capitalization of \$225,000. There are currently 16 Class A shareholders, with each owning 15,000 shares. The most recent purchase of 15,000 Class A shares occurred in 2006 for a price of \$21.17 per share for an aggregate purchase price of \$325,500. Class A shareholders are all retail distributors of products distributed by Agri-Labs.

Class B and Class C shares are non-voting shares which only entitle Class B and Class C shareholders to dividends. Class B shares are only offered to employees of Class A shareholders, employees of Agri-Labs, or outside directors. Class C shares are only offered to veterinarians and/or veterinarian clinics who purchase product from Agri-Labs. Class B shares are offered to create an incentive within the Agri-Labs distributor network for sales people to market Agri-Labs' products. This ownership stake of the distributor network allows the marketing force to participate, through dividends, in the overall profitability of the Company. Class C shares are offered to create an incentive within the veterinarian channel of trade to recommend Agri-Labs products for use by customers of the veterinarians.

Class B shares historically have been purchased at book value, as adjusted on a monthly basis by the Company. Initially, in 1986, a limited number of Class B shares were issued. Since 1991, Agri-Labs has offered ownership of Class B shares on a continuing basis to its distribution network of sales representatives and staff. Agri-Labs has declared an annual dividend on Class B shares every year since 1987. From 1993 through 2006 that annual dividend has been either \$1.00 or \$1.10 per share. In 2007 the dividend increased to \$1.15 per share, then decreased to \$1.00 per share in 2008. For the period from 2000 through 2002 dividends on Class B shares were prorated to reflect the length of ownership of the shares during the calendar year for which the dividend was declared.

The Class B shares have been a key factor in Agri-Labs developing one of the most successful distribution networks in the United States. Ownership by its distributor shareholders, with its attendant participation and loyalty, has been a primary ingredient in this success. In addition to continuing its Class B shares incentive program for its distributors on a larger scale, Agri-Labs proposes to build on this success in developing other market areas through the issuance of Class C shares.

Class C shares historically have been purchased at book value, as adjusted on a monthly basis by the Company. Class C shares were first issued in 2004, and Agri-Labs has offered ownership of Class C shares on a continuing basis to its distribution network of veterinarians since that time. Agri-Labs has declared an annual dividend on Class C shares every year since 2004. In the year 2004 the dividend declared was \$0.50. For the years 2005 & 2006 the dividend was \$1.10; for the year 2007, the dividend was \$1.15; and for the year 2008 the dividend was \$1.00

In October of 1998, under a unique manufacturer/distributor agreement, Agri-Labs helped develop and launch a new line of MLV cattle vaccines, marketed under the trade names of TITANIUM® and MASTER GUARD®. Agri-Labs has the exclusive right to distribute these vaccines. It primarily grows the market for the vaccines through distribution to consulting veterinarians who control large numbers of cattle by servicing feedlots, dairies and ranchers who control large numbers of cattle. The target market for these efforts are in Arkansas, Georgia, Illinois, Indiana, Kansas, Kentucky, Michigan, Missouri, Montana, Nebraska, New York, California, Oklahoma, Texas, South Dakota, Idaho, New Mexico, Wisconsin, Minnesota and Iowa, Pennsylvania.

Agri-Labs implemented a program which emulates the successful features of its Class B shares with its Class C shares which creates an incentive for veterinarians to distribute Agri-Labs vaccines. This program involves the issuance of Class C stock, which is only available to licensed practicing veterinarians or business entities comprised of veterinarians. The Shares are purchased for cash consideration at the equivalent price of Class A and B shares. The Class C shares must be purchased in 1,000 share increments. The Class C shareholder is required to maintain sales of \$50,000 annually in the sale of Agri-Labs' products or the shares will be subject to redemption by Agri-Labs at the then current book value. The Class C shares can also be redeemed at book value in the event of death, disability, retirement, loss of license to practice veterinary medicine, dissolution, merger or withdrawal from the practice of veterinary medicine for any reason.

The declaration of dividends is subject to the discretion of the Board of Directors. The Board is not obligated to declare dividends equally across all classes of shares. Historically, the Board has declared dividends with respect to Class B shares for each calendar year since 1987 through 2008. The first dividend for Class B shares was \$0.25 per share in 1987. The dividend has been a \$1.10 per Class B share for the years 1998 through 2006, increasing to \$1.15 for the year 2007, then decreasing to \$1.00 for 2008. For the years 2000 to 2002 the Class B dividend was prorated to reflect the length of ownership of the shares. A dividend in the amount of \$0.50 per share was declared for 2004, the dividend was \$1.10 per Class C share for the years 2005 and

2006, \$1.15 for the year 2007, and \$1.00 for 2008. Agri-Labs has never declared a dividend on Class A shares.

Investors who desire to subscribe to either Class B or Class C shares must complete and sign the appropriate Subscription Agreement. All purchasers of shares will be subject to substantial restrictions on transfer of the Shares provided in the Bylaws of Agri-Labs and in the Subscription Agreement. These shares may not be sold or transferred by the holder without the consent of Agri-Labs. Upon notice of intent to transfer the shares, Agri-Labs has an option or right of first refusal to purchase the shares at book value. See the "Description of Securities" section of this Offering Circular.

Price Per Share	\$24.53 per Class B shares ¹ \$24.53 per Class C shares ²
Total Shares Issued and Outstanding After Offering	164,013 shares Class B stock 119,000 shares Class C stock
Total Proceeds	\$2,453,000.00 – Class B shares \$2,453,000.00 – Class C shares \$4,906,000.00 total Class B and C shares
Dilution	N/A
Subscription	An investor wishing to purchase either Class B or Class C shares must complete and deliver to Agri-Labs a Subscription Agreement.
Risk Factors	An investor considering purchase of the share should review the risk factor associated with such an investment. See "Risk Factors" section.

RISK FACTORS

Before you invest in our Class B or Class C common stock, you should be aware that there are various risks, including those described below. You should carefully consider these risk factors, together with all the other information included in this Prospectus.

This Is A Best Efforts Offering Without A Minimum Sales Amount Or Escrow. This Offering is being made on a best effort basis, directly by Agri-Labs, and there is no minimum offering amount that must be reached before Agri-Labs can access the funds. No escrow account has been established and all subscription funds will be paid directly to the Company.

¹ The shares are being offered at the book value per share, which is the net worth (assets less total liabilities) divided by the total number of outstanding common shares (Class A, B and C shares). The current book value is \$24.53 per share. The offering price will be adjusted after each month to reflect the current book value (net worth divided by the total number of outstanding Class A, B and C shares). In no event will this adjustment exceed a price per share which would result in the aggregate offering price exceeding \$4,963,486.04.

² See Footnote 1

Subscriptions are irrevocable. A shareholder will not be entitled to a return of his or her purchase price based on the failure of Agri-Labs to achieve any minimum level of sales in this Offering. If a shareholder wishes to rescind the purchase, that request will be subject to Agri-Labs ability to redeem the shares, as provided in its Bylaws. Also, it is possible that the issuer would only sell a nominal amount of shares and might not have sufficient proceeds to further the goals of this Offering.

There Are Substantial Restrictions On Transfer Of The Shares. The Class B and C Shares purchased in this Offering are subject to strict restrictions on transfers contained in the Bylaws of Agri-Labs. The Shares may not be sold or transferred without the consent of Agri-Labs, and Agri-Labs has an option of right of first refusal for 60 days from written notice of the proposed transfer to exercise its option to purchase the Shares at the book value of the Shares as determined by the Company's accountants at the end of the month preceding the date Agri-Labs notifies the shareholder it is exercising its option.

Historically, 65 Class B shareholders have requested approval to transfer 34,841 Class B shares to third parties. Agri-Labs has always allowed the transfer when the shareholder has proposed to transfer Class B shares and has not been required to redeem any of the shares in these transactions. No Class C shareholders have requested a transfer of their Class C shares.

No Obligation To Repurchase The Shares. Even though Agri-Labs has the option of right of first refusal to purchase the Shares of any shareholder proposing to transfer the Shares, it is not obligated to do so. Further, depending on the number of shareholders proposing to transfer at any point in time, Agri-Labs may not have the financial resources to do so.

There Is No Trading Market For The Shares. There will be no active secondary trading market in the Class B and C shares purchased in this Offering. The Shares will not be eligible for listing on any stock exchange or for quotation on NASDAQ, and Agri-Labs does not intend to obtain such a listing or approval. Investors may not be able to liquidate their investment in the event Agri-Labs elects not to or is unable to redeem the shares.

Issues Related to Compliance With Prior Regulation A Offering. The Company has filed and obtained qualification of three (3) Regulation A offerings, File No. 24-10056 (qualified June 24, 2004), File No. 24-10147 (qualified June 29, 2006), and File No. 333-134078 to which this Amendment applies, qualified December 23, 2008. All of these offerings were continuous offerings which terminated two years after qualification. With respect to the first two (2) offerings, the Company failed to update the information provided in the Offering Circulars as required by Rule 253(e)(1) and (2), and failed to timely file the Form 2-A filing as required by Rule 257. The requirement to file Form 2A's under Rule 257 is not a condition to the exemption. The failure to comply with Rule 253 could subject the Company to a claim that the Offering was not exempt under Regulation A and/or that the Offering failed to disclose material facts. However, Rule 260 provides that a failure to comply with a condition or requirement of Regulation A will not result in loss of the exemption if the failure to comply was not intended to protect a particular investor, was insignificant with respect to the Offering as a whole and a good faith and reasonable attempt was made to comply with the requirements of Regulation A. The Company believes it has met the conditions of Rule 260. However, there is no assurance that

others will not take exception to this view. This lack of compliance could subject the Company to legal claims by regulators or investors seeking to rescind their investment which could cause a financial strain on the Company. Going forward, Company has input the deadlines for such filings in its docket system, and such filings will be made on a timely basis.

Ownership Of Class B Shares Can Be Terminated At The Option Of Agri-Labs If The Shareholder's Employment Or Affiliation With The Company Or A Class A Shareholder Is Terminated. Under the terms of the Bylaws and terms of the Subscription Agreement, in order to purchase Class B shares, a purchaser must be employed by Agri-Labs, be an outside director of AgriLabs, or be a Class A Shareholder of Agri-Labs or employee thereof. If the shareholder's employment or affiliation with that Class A Shareholder or with Agri-Labs is terminated for any reason (including death or retirement), or if the Class A shareholder shall no longer be a Class A shareholder or a retail distributor of Agri-Labs for any reason, under the Bylaws and terms of the Subscription Agreement Agri-Labs has the option to repurchase the Shares at book value, as determined by the Company's accountants at the end of the month preceding written notice of the Company's intent to exercise this option.

Historically, when a Class B shareholder has terminated employment, has died, is no longer an Outside Director of the company, or when that shareholder's employer has terminated a Class A shareholder distribution agreement with Agri-Labs or has been terminated by a Class A shareholder, the Class B shares have either been redeemed or a transfer to a qualified third party has been approved. In total 129 Class B shareholders holding 90,670 Class B shares have been subject to redemption or transfer of shares because of termination of qualified status. Of these, 93 Class B shareholders holding 67,869 shares have had their shares redeemed by Agri-Labs. The remainder have been allowed to transfer their shares to qualified third parties.

Ownership Of Class C Shares Can Be Terminated At The Option Of Agri-Labs If The Shareholder Ceases To Practice Veterinary Medicine Or Fails To Maintain Minimum Product Purchase Requirements. In order to purchase Class C shares, a purchaser must be a licensed, practicing veterinarian or a business comprised of veterinarians. Further, the purchasers must generate on an annual basis \$50,000 of Agri-Labs' product sales. Subsequent to the purchase of Class C shares, if the shareholder ceases to be engaged in the practice of veterinary medicine, or fails to meet the minimum annual sales requirements of \$50,000 of general products, Agri-Labs has the option to repurchase the shares at book value, as determined by the Company's accountants at the end of the month preceding the written notice of the Company's intent to exercise this option.

Forward-Looking Statements May Be Inaccurate. This Offering Circular contains financial projections and forward-looking statements that are based on management's beliefs and assumptions as determined by current information available. When used in this Offering Circular words such as "anticipate," "believe," "estimate," and depending on the context "may," and similar expressions are intended to identify forward-looking statements. However, such statements only reflect management's current view with respect to future events, and are subject to risk of uncertainty and the risk that the underlying assumptions may prove inaccurate. Agri-Labs' actual performance may fall materially short of the financial projections and actual results may vary from those anticipated or estimated.

Agri-Labs' Ability To Pay Dividends On Class B and Class C Shares In The Future Can Not Be Guaranteed.

Agri-Labs has declared a dividend on Class B shares for each calendar year from 1987 through 2008. The first dividend declared by Agri-Labs in 1987 on Class B shares was for \$0.25 per share. The dividend has been \$1.10 per share between 1998 and 2006. The dividend increased to \$1.15 per share for the year 2007, but then decreased to \$1.10 per share for 2008. For the years 2000 to 2002 those dividends were prorated to reflect the length of ownership of the Class B shares during the year for which the dividend was declared. Class C dividends have been paid since the issuance of Class C shares in 2004 with a \$.50 per shares dividend declared for 2004, a \$1.10 dividend declared for the years 2005 and 2006, a \$1.15 dividend declared for the year 2007, and a \$1.10 dividend declared for the year 2008. Though the Company historically has been able to pay dividends on Class B and Class C shares, there is no guarantee that Agri-Labs' profitability and ability to pay dividends on Class B or Class C shares in the future will continue.

The declaration of dividends is subject to the discretion of the Board of Directors. The Board is not obligated to declare dividends equally across all classes of shares and it may act preferentially with respect to one or more classes of shares. Historically, the Board has declared dividends on Class B and Class C shares, but not Class A shares. Going forward it intends to declare dividends on Class B and Class C shares equally, but not on Class A shares. However, the ultimate decision on declaring dividends in the future is subject to the unrestricted discretion of the Board of Directors.

Changes In The Animal Health Biologicals And Pharmaceuticals Industry Could Adversely Affect Our Business.

The wholesale distribution industry for pesticides, insecticides, pharmaceuticals and biologicals in the global animal health market is subject to changing political, economic and regulatory influences. Both state and federal government agencies regulate the distribution of certain animal health products. All pharmaceutical products Agri-Labs sells are regulated by the Food and Drug Administration ("FDA"). Biological products are registered by the United States Department of Agriculture ("USDA"). Insecticides are regulated by the Environmental Protection Agency ("EPA"). Also, Agri-Labs is subject to regulation by the Drug Enforcement Administration ("DEA"). Each of these regulatory agencies have significant rules and regulations that must be adhered to in order to remain in compliance. An adverse finding regarding the compliance of Agri-Labs with these regulations could negatively impact sales and profits of the Company. Furthermore, the regulatory stance these agencies take can be affected by who is in control of the executive and legislative branches of government. Our suppliers are subject to regulation by the Department of Agriculture and rely, in part, on farm and agricultural subsidy programs. If funding for such programs is reduced, there is a risk our product supply would diminish, which would lead to decreased sales. These factors affect our purchasing practices and the operation of our business.

There is a trend within this industry toward consolidation to create integrated delivery systems with greater market presence. As this industry consolidates, competition for customers will become more intense and the importance of acquiring each customer will become greater.

Loss Of Agri-Labs' Relationship With Key Distributors Could Materially Affect Its Business. Agri-Labs' customer base is comprised of several retail distributors of its animal health products. Eighty Nine percent (89%) of its annual revenues are generated by its 16 Class A shareholders. Agri-Labs top five (5) distributors in 2008 represented approximately Sixty Seven and One-Quarter Percent (67.25)% of its total revenues. The U.S. animal health market over the last 12 years has experienced consolidation of manufacturers and distributors. It is predicted that this trend will continue and consolidation of distributors could have a negative impact on Agri-Labs' customer base. A change in ownership of its top five (5) distributors has the potential to adversely impact future revenue for Agri-Labs if new owners determine to discontinue doing business with Agri-Labs.

Loss Of Agri-Labs' Relationship With Key Suppliers Could Materially Affect Its Business. It is typical for many animal health products produced in the United States, especially generic drugs, to rely on raw ingredients from international sources. Some of the raw materials used for Abbreviated New Animal Drug Applications ("ANADA") products owned by Agri-Labs are sourced from raw ingredient suppliers outside the United States in such countries as China, India and Ireland. Adverse conditions related to trade relations, international affairs or other political factors could limit the supply of key products marketed to and/or sold by Agri-Labs. This could result in a supply shortage for its customer base, which could affect its revenue and profit potential.

The Introduction Of New Products Into The Cattle Vaccine Market To Compete With TITANIUM® And/Or MASTER GUARD® Vaccines Could Materially Affect Agri-Labs' Business. In the event new product vaccines are developed that compete with Agri-Labs cattle vaccines, the company's annual revenues could be affected, which may materially adversely affect its revenues.

USE OF PROCEEDS

The primary business purpose in issuing Class B and Class C shares is not to raise capital for business needs, although the funds raised will provide working capital for the general needs of Agri-Labs to fund future growth and the redemption of Class A, B and C shares as needed. The primary reason for issuance of the shares is to create an incentive within the distribution network of Agri-Labs to market Agri-Labs' products. This ownership stake provides an economic incentive for salesmen to market and veterinarians to use and prescribe Agri-Labs' products. It builds and promotes brand loyalty within the distribution network and key veterinary clinics. The proceeds from the Offering will be reflected on Agri-Labs' balance sheet as contributed capital, and will be retained as working capital and applied by Agri-Labs for its general business needs to maintain current levels of capital as industry consolidation occurs.

The anticipated uses of the proceeds from this Offering are contained in the following table:

Gross aggregate proceeds	\$4,906,000.00
less offering expenses	<u>\$0.00³</u>
net proceeds after offering expenses	<u>\$4,906,000.00</u>

Principal Purposes	25% Proceeds		50% Proceeds		75% Proceeds		100% Proceeds	
	(.00)		(.00)		(.00)		(.00)	
R & D Investments	\$1,226,500.00	100%	\$1,226,500.00	50%	\$1,839,750.00	50%	\$2,453,000.00	50%
Product Acquisition			\$981,200.00	40%	\$ 1,103,850.00	30%	1,471,800.00	30%
Infrastructure			\$245,300.00	10%	\$367,950.00	10%	\$490,600.00	10%
Marketing					\$367,950.00	10%	\$ 490,600.00	10%
Total	\$1,226,500.00	100%	\$2,453,000.00	100%	\$3,679,500.00	100%	\$4,906,000.00	100%

The research and development (R & D Investments) use of proceeds described above will fund the development of extensions to current product lines involving cattle biologicals, and the development of new biologicals, generic pharmaceuticals and new animal pharmaceuticals. The Product Acquisition category would potentially fund the cost of acquiring biological and pharmaceutical products from other animal health manufacturers currently marketing such products who are divesting themselves of the products. Infrastructure expenditures would involve the cost to fund additional equipment and personnel as the Company grows. Finally, anticipated use of proceeds for marketing would involve supporting strategies to grow and enhance products and markets such as advertising, customer education, industry promotional events and customer purchase incentives.

DESCRIPTION OF BUSINESS

Agri-Labs is a Delaware corporation formed in August of 1984. It is engaged in business as a wholesale distributor of pesticides, insecticides, pharmaceuticals and biologicals in the global animal health market.

History

³ Offering expenses estimated at \$30,000 which include printing, accounting and legal services, are paid directly by the Company from revenue sources other than the Offering Proceeds.

August 1984-Agri-Laboratories, Ltd. established as a buying group with 25 distributor/members and founding management team.

September 1984-Agri-Labs® label introduced for a line of large animal biological, pharmaceuticals and insecticides.

January 1985-First Performer® brand products for companion animals launched.

November 1985-Prolabs® label prescription products introduced.

July 1987-Distributors/shareholders consolidate outstanding stock, making Agri-Labs 100% distributor employee owned. New corporate sales, marketing and distribution headquarters are dedicated in St. Joseph, Missouri.

June 1989-EquiLabs® line of products for horses launched.

January 1991-Generic Drug Law ("GDL") goes into effect.

June 1992-Agri-Labs receives first Abbreviated New Drug Application ("ANADA") approval under the GDL: Di-Methox® Soluble powder.

May 1995-Agri-Labs introduces new management team.

April 1996-Company increases commitment to the small animal market with a new line of companion animal vaccines: Champion Protector®.

September 1997-Under an innovative marketing agreement, Agri-Labs launches the first private label ivermectin products (products that control worms in animals): TOP LINE® for cattle and DOUBLE IMPACT® for cattle and swine.

October 1998-Under a unique manufacturer/distributor agreement, Agri-Labs helps develop and launch TITANIUM® and MASTER GUARD®, a new line of MLV cattle vaccines.

Agri-Labs is a leader in distribution, marketing and sales in the United States.

Agri-Labs is a marketing and sales company with a history of successful product introductions in all animal health species. Agri-Labs is owned by its distributor shareholders. The combined sales of all distributor shareholders represent over \$2 billion in product sales or 53% of the total animal health products sold in the United States. In an era when manufacturers are cutting back on direct sales forces and relying more on outside distributors with marketing capabilities, Agri-Labs stands apart. Agri-Labs functions as an active marketing partner exploring markets and developing products with its animal health product suppliers.

Agri-Labs' mission goes beyond providing quality animal health products to the industry. Agri-Labs believes it is critical to strengthen the partnerships with its customers, its distribution

network and the manufacturers with which it works. These professional partnerships will enable Agri-Labs to better serve its mutual customers.

Agri-Labs represents the interests of the manufacturers in the industry. The Company's distribution network allows animal health product providers to maintain and increase production volume while introducing and supporting products in new market territories. In an effort to expand animal health sales both domestically and internationally, Agri-Labs has entered into joint ventures with manufacturers which have helped develop and market new products, and reintroduced and extended the market life of existing, older products.

Agri-Labs facilitates the development and marketing of new animal health products by serving as an intermediary between researchers and research & development firms/manufacturers. It actively seeks out researchers who are developing solutions to meet the need for new products and arranges a relationship between researchers who originate the product concept and research & development/manufacturing firms who can provide the resources to obtain government approval and bring the product to market. In exchange for its services, Agri-Labs attempts to position itself to obtain the exclusive right to market the resulting product. It is currently engaged in such projects with at least five manufacturers/research & development entities.

Distribution and Sales.

The heart and soul of Agri-Labs is its distributor network. Since its founding, every distributor of the Company has been in an ownership position with the Company. Currently, elected representatives of shareholders serve on the Board of Directors and participate actively in policy making. This management/distributor relationship gives Agri-Labs a unique perspective on the market. A direct result of shareholder input is the Company's marketing approach. Agri-Labs does not market its products based on individual animal species market demand. Rather, it bundles its products across multiple species markets, e.g., bovine, equine and swine market demand. This offers end-users virtually all products needed for any operation whether they be pharmaceuticals, biologicals, insecticides or accessories. This 'bundling' makes product decisions simpler and provides a springboard for driving sales across multiple species market opportunities. Agri-Labs distribution network consists of 510 outside sales representatives of Class A shareholders who market the products by traveling to and personal contact with potential purchasers. It also utilizes a staff of 300 inside sales representatives who are engaged in on-site telemarketing from Class A shareholder's office locations. In addition, Agri-Labs has field-based sales representatives and a field technical service staff to support our products. Agri-Labs distribution through its Class A shareholders has 120 locations throughout the United States to reach customers in all specie segments. These distribution locations are retail stores or branch stores of Class A shareholders which are retail sales outlets for products distributed by Agri-Labs. Agri-Labs provides comprehensive training, up-to-the-minute technical data and complete product information. The Company's approach to marketing is also seen in its sales training seminars and incentive programs. Agri-Labs markets, distributes and sells products through our warehouse and shipping facility based in St. Joseph, Missouri. Agri-Labs' experienced and knowledgeable sales and marketing team can provide manufacturers a strong partner to bring products to the marketplace.

Support

Aside from the efficiency of the distribution/sales network, the biggest advantage manufacturers derive from a partnership with Agri-Labs is the marketing support. The Agri-Labs management team represents over 150 years of marketing and sales experience. This wide-ranging experience has allowed management to develop and initiate a marketing program that has proven success.

Agri-Labs' Purpose.

Agri-Labs' fundamental purpose is to be the most reliable, honest and innovative animal health company by providing more value and service to its customers.

Agri-Labs targets all marketing efforts toward making purchasing decisions easy. The distinctive and attractive labeling on all of the Company's product lines is designed to achieve maximum brand awareness and encourage brand loyalty and cross-purchasing. Product catalogs are directed at individual market segments. Veterinarians, beef/dairy, swine and poultry producers can find all their pharmaceutical, biological, insecticide and sundry needs in one place, as can pet owners and horse owners.

The Company engages in extensive advertising efforts on national and regional levels while providing distributors, veterinarians and retailers with promotional materials and powerful incentive programs. The sales force is provided with technical information, product comparisons and sales oriented consumer aids. To increase market demand and resulting sales, the Company frequently employs direct mailings to targeted market groups. Agri-Labs can respond rapidly to the market and most requests and inquiries can be handled immediately on the local level.

Innovation.

The establishment of Agri-Labs in 1984 was an innovation in itself. Since then the Company has continued to break new ground in the industry.

Agri-Labs was one of the first agri-marketing distributors to apply for, and be granted, an Abbreviated New Animal Drug Application (ANADA) under the Generic Drug Law. To date the Company has been awarded twelve (12) ANADAs and continues to be active in ANADA and New Animal Drug Application (NADA) development and acquisition. Currently, the Company currently owns twelve (12) ANADAs and no NADAs.

The Generic Animal Drug and Patent Term Restoration Act (GADPTRA) was enacted into law in 1988. Essentially it established a mechanism for obtaining approval of generic copies of pioneer NADAs with reduced testing requirements since the products had already been proven safe and effective. This created the Abbreviated New Animal Drug Application or ANADA. It also has a provision to restore a certain amount of patent protection to the pioneer company to compensate for protection lost during FDA regulatory review. The regulatory approval process

requires demonstration of either chemical equivalency or actual bioequivalency depending on the dosage form in question. All true solution dosage forms or products that are constituted into a solution prior to administration (soluble powders) qualify for a waiver from conducting bioequivalency testing and only require demonstration that the product formulation is the same or nearly the same as the pioneer and is stable. Other dosage forms (pastes, tablets, suspensions) generally require bioequivalency testing versus the pioneer product. This usually is in the form of a blood level bioequivalency study but can be a clinical bioequivalency study if measurable blood levels of the product in question are not attainable. These studies along with other data are submitted to the Center for Veterinary Medicine (CVM) as an ANADA. CVM is a division of the Food and Drug Administration (FDA). If all data submitted is determined by CVM to be satisfactory and the manufacturer of the finished product is considered to be in compliance with Current Good Manufacturing Practices (CGMPs), the CVM will issue an approval letter to the sponsor of the application. The product can then be legally marketed.

The significance of owning ANADAs is providing a proprietary product and position to remain competitive and elicit a greater return to our shareholders than simply buying and selling product owned by manufacturers or suppliers. It also affords Agri-Labs greater control and flexibility in managing and growing our business.

Agri-Labs has also been recognized by the industry for its marketing support. Throughout the years the Company has been an active and enthusiastic supporter of the programs and events of the National Cattlemen's Beef Association ("NCBA") as well as the National Pork Producers Council ("NPPC").

The company took another innovative step in 1998. To expedite product development, conduct first hand product research and provide technical assistance, the Company hired a Doctor of Veterinary Medicine to head up its Tech Services Team. Today, the Company has a full team of experts to provide technical support to its customers. Additionally, veterinarian distribution was added in 1997 and currently represents approximately 45% of annual revenue.

Since 1997 Agri-Labs has entered into exclusive business arrangements and technology transfer agreements which have allowed the Company to introduce TOP LINE® and DOUBLE IMPACT® ivermectin, insecticides and launch a line of MLV cattle vaccines: TITANIUM® and MASTERGUARD®.

In 1984, the founders of Agri-Laboratories, Ltd. took a look at the animal health industry and decided that things could be done in a different, better way. They recognized that a well managed network of diversified, independent distributors could get more manufacturers' products into the hands of more producers, more efficiently. Innovation is a way of life at Agri-Labs. Every day the Company continues to look into opportunities and possibilities for improvement upon how it does business.

Agri-Labs currently markets more than 750 products through its branded product lines of Agri-Labs®, ProLabs®, and Tradewinds®. Through these multiple brands it can reach the United States' market in each marketing channel for its customers.

Number of Employees

During the 2008 calendar year Agri-Labs had fifty (50) full time employees and no part time employees. In 2007 it had fifty three (53) full time employees and no part time employees.

Short-Term Liquidity and Capital Resources

The Company's amount of accounts receivable vary from month to month and can reach relatively high levels. However, this is not indicative of any cash flow problems or difficulty with collections. Rather, it is largely a consequence of extended payment terms offered to its customers. This is a common practice in the animal health industry utilized to move inventory because of the dating or relatively limited shelf life of the products. Extended payment terms are frequently provided by Agri-Labs' suppliers and are passed through to customers. Also, these terms are utilized as a marketing and promotional tool to move product out of the Company's warehouse to our customers. To the extent Agri-Labs can load up its customers' inventory, it lessens the opportunities for competitors to make inroads in selling their products to our customers. The extended payment terms can vary from 60 to 120 days, or longer, depending on the profitability of the product and how critical the sale of the product is to current business needs. Notwithstanding the occasional spike in the level of these receivables, the Company has never experienced significant collection problems. Historically, less than one percent (1%) of accounts receivable have become past due. The Company has a solid record for customer collections. Consequently it does not believe any allowance for doubtful accounts is warranted in its financial statements.

The Company does have short-term working capital requirements to carry these receivables, purchase inventory and meet its operating needs. However, these needs are effectively provided for by adequate credit limits and payment terms provided by the Company's suppliers and through outside bank financing. The Company has a \$10 million line of credit through UMB Bank, N.A., the Company's lender since September, 2009, at 3½%. The Company is in compliance with the covenants of the loan agreement and engages in periodic discussion with bank officers on the Company's direction and needs. Agri-Labs believes an increase in this line of credit could be obtained if needed. The Company's short-term working capital requirements is not one of the reasons for this Offering.

Competitive Conditions

Manufacturers of biologicals and pharmaceuticals products have the option of selling their products directly to livestock producers, veterinarians and dealers or using independent distributors, private label companies and marketing companies. Agri-Labs is positioned in the industry as a private label company and marketing company with no proprietary manufacturing capacity. It works with manufacturers to produce the Company's private label and proprietary products. Agri-Labs aligns itself with manufacturers who need sales and marketing expertise and a distribution network to bring products to the veterinary and retail livestock and consumer

markets in the most economical manner. Agri-Labs competes with manufacturers of products with similar label indications that sell their products directly to veterinarians and these retail markets.

Agri-Labs has successfully competed in this market since 1984 by providing an outlet for manufacturers of animal health at a competitive price. By utilizing the volume purchasing opportunities of its distribution networks, it is able to provide animal health products to its distribution customers and their customers at competitive prices. Its competitive advantage is gained from having less infrastructure and overhead expense than its competitors such as manufacturers who directly market their products and who must maintain the overhead and staff to support manufacturing operations. Agri-Labs supports its competitive pricing with marketing and sales support for its distribution network.

Agri-Labs' ownership of generic drugs and its development of proprietary biologicals has provided Agri-Labs an additional opportunity to compete with major manufacturers in product categories that are more profitable and have a longer product life cycle than comparable products.

The animal health industry continues to experience consolidation of the livestock industry that includes beef and dairy cattle, swine and poultry. This consolidation has given rise to pricing pressures on commonly used animal health products. The need of manufacturers to move products through production to maintain large inventories has provided pressure to discount the price of products. Also, significant FDA regulations have inhibited suppliers to Agri-Labs from introducing new products and maintaining a consistent supply of current products to distribute. These factors combine to limit supplies and therefore sales opportunities.

The Business of Tradewinds, Inc., a Wholly Owned Subsidiary

Tradewinds, Inc. ("Tradewinds") is a wholly owned subsidiary of Agri-Labs. The officers of Tradewinds are all officers of Agri-Labs: Steve Schram is President, Terry Christie is Secretary and Helen Taylor is Treasurer. The business of Tradewinds consists of selling selected animal health products of Agri-Labs under the brand name of Tradewinds to distributors who are not Class A shareholders of Agri-Labs. This allows Agri-Labs to reach a broader market with these selected products. The focus of these products is the over-the-counter, companion animal, pharmaceutical and biological products.

Principal Customers of Agri-Labs

The following table represents the principal customers of Agri-Labs and the percentage of sales attributable to these customers for the last two fiscal years:

	2007 % of Sales	2008 % of Sales
Members - Class A Shareholders		
Professional Vet Products	19.49%	18.67%
Vet Pharm* (shares redeemed in 2008)	14.12%	8.16%
Walco/Hi Pro	9.31%	8.75%
MWI Vet Supply	14.15%	17.69%

West Plains Vet	3.15%	2.54%
Valley Vet Supply	2.37%	2.65%
Robert J. Matthews, Co.	4.60%	5.01%
Animal Medic	1.93%	2.03%
Vet & Poultry	3.00%	2.73%
Fuller Supply Co., Inc.	1.53%	1.11%
Jeffers, Inc.	1.49%	1.38%
Northwest Veterinary Supply	1.65%	1.74%
Southern Livestock	2.91%	1.84%
Michigan Vet Supply	0.51%	0.57%
United Pharmcal Co., Inc.	0.59%	0.60%
National Animal Health (shares redeemed October, 2008)	0.11%	0.08%
IVESCO	10.47%	9.05%
Lextron, Inc.	4.77%	4.93%
Non Members	3.85%	10.45%
Totals	100.00%	100.00%

Research and Development/Technical Trials

Agri-Labs in the regular course of its business enters into joint development agreements with manufacturers. Pursuant to these agreements Agri-Labs obtains exclusive marketing rights for the resulting products and/or royalty payments or a share of profits in exchange for funding part of the research and development costs. Agri-Labs is constantly looking for ANADA and NADA products to develop and acquire. It routinely funds technical trials, veterinary tests and research and development costs to insure there is a market for these products.

Terry Christie, Vice President of Research and Development of Agri-Labs, serves as the leader of a Product Review Team ("PRT") whose function is to review and approve all biological and pharmaceutical research projects. Once a project is approved by the PRT and Agri-Labs' Board of Directors, the PRT assigns responsibility for each project and monitors the progress on a monthly basis. Mr. Christie leads and coordinates any pharmaceutical project if developmental work is required. This work typically requires finding and developing an active ingredient source, finding and reaching an agreement with a finished product manufacturer, developing a finished product, coordinating all testing and compilation of data necessary to file an ANADA. Mr. Christie prepares the ANADA application if Agri-Labs is going to be the sponsor of the application and does all of the regulatory follow up with the CVM until the application is approved. He also does all post-approval regulatory work.

Agri-Labs is involved in research and development activities to obtain a proprietary interest in products. This leads to higher risk, but also creates the opportunity for higher profitability and return to shareholders than simply buying and selling product. To date, the Company has been successful in these endeavors and returns have outweighed the risk. Of course, there is no guarantee this trend will continue.

During the 2008 calendar year Agri-Labs had negative spending of \$73,578.00 on research and development due to the adjustment of certain accrual accounts. In 2007, the Company spent \$439,567.00 on research and development.

Characteristics Of Agri-Labs' Operations And Industry Which May Have An Impact Upon Future Financial Performance.

Agri-Labs currently has the exclusive right to market certain products. Investors should review the RISK FACTORS section of this Offering Circular with respect to the risk that Agri-Labs could lose the exclusive right to market these products.

Agri-Labs has entered into an agreement with Diamond Animal Health, Inc. for the exclusive right to market certain bovine vaccines. These products are known by the trade names TITANIUM® and MASTERGUARD®. Agri-Labs was given the exclusive right to market these products in exchange for its agreement to meet certain escalating levels of product distribution. The Second Amendment to the Amended and Restated Bovine Vaccine Distribution Agreement is dated December 10, 2004 and extends through December 15, 2009. The Third Amendment to the Agreement dated May 26, 2006, revises the 3rd and 4th quarter 2006 purchase orders, and revises the terms of the loan between Agri-Labs and Diamond. The loan has since been paid in full. The Fourth Amendment dated November 16, 2007, removes the exclusive right to market the products in Canada, and states that the distribution rights become non-exclusive after Contract Year 2009, or as of December 15, 2009, through the remainder of the term of the Agreement. Pursuant to the Fourth Amendment, AgriLabs right to distribute the products is currently non-exclusive. However, Agri-Labs owns the exclusive rights to the trade names and other potential future distributors of these vaccines cannot use these trade names.

Investors should also review the RISK FACTORS section of this Offering Circular with respect to the risk that Agri-Labs' business could be materially adversely affected by the loss of its relationship with key distributors and suppliers.

The wholesale distribution industry for pesticides, insecticides, pharmaceuticals and biologicals in the global animal health market is subject to changing political, economic and regulatory influences. Both state and federal government agencies regulate the distribution of certain animal health products. All pharmaceutical products Agri-Labs sells are regulated by the Food and Drug Administration ("FDA"). Biological products are registered by the United States Department of Agriculture ("USDA"). Insecticides are regulated by the Environmental Protection Agency ("EPA"). Also, Agri-Labs is subject to regulation by the Drug Enforcement Administration ("DEA"). Each of these regulatory agencies has significant rules and regulations that must be adhered to in order to remain in compliance. An adverse finding regarding the compliance of Agri-Labs with these regulations could negatively impact sales and profits of the Company. Furthermore, the regulatory stance these agencies take can be affected by who is in control of the executive and legislative branches of government. Our suppliers are subject to regulation by the Department of Agriculture and rely, in part, on farm and agricultural subsidy programs. If funding for such programs is reduced, there is a risk our product supply would diminish, which would lead to decreased sales. These factors affect our purchasing practices and the operation of our business.

Agri-Labs is directly affected by regulation by the FDA and the CVM, a division of the FDA. The CVM reviews all applications Agri-Labs submits for ANADAs and either denies or approves those applications. Furthermore, the FDA has authority to inspect Agri-Labs' physical facility with regard to storage and handling of pharmaceuticals. The FDA also has authority to remove from distribution products which Agri-Labs distributes.

Agri-Labs is only indirectly affected by regulation by the USDA, EPA and DEA. Agri-Labs does not directly interact with the USDA. It does not submit applications to the USDA for biologicals. However, it could be affected if the USDA took any adverse action with respect to the license for TITANIUM® and MASTERGUARD® held by Diamond Animal Health since Agri-Labs currently holds the exclusive rights to market these products. Also, the USDA and EPA have authority to remove from distribution products which Agri-Labs distributes. Agri-Labs has no direct interaction with the DEA. It does not distribute drugs which fall under the jurisdiction of the DEA, and therefore would not be affected by DEA action to remove products it regulates from distribution.

There is a trend within this industry toward consolidation to create integrated delivery systems with greater market presence. As this industry consolidates, competition for customers will become more intense and the importance of acquiring each customer will become greater.

DESCRIPTION OF PROPERTY

Agri-Labs currently leases its physical plant from K-Highway, a Missouri general limited partnership. The terms of the lease are triple net with the first term expiring December 31, 2005 and two 5 year options thereafter. The first five year renewal option was exercised by Agri-Labs and the current term ends December 31, 2010. A "triple net" lease or net-net-net lease is a lease whereby the lessee is responsible for maintaining insurance, taxes and maintenance on the leased premises. The Plant lease agreement currently requires a monthly rent of \$31,335. The facility consists of 21 offices totaling 8,000 square feet and a warehouse with storage representing 46,000 square feet. This facility is located at 20927 State Route K, St. Joseph, MO 64505. This is the sole warehouse and executive offices of Agri-Labs. K-Highway is an entity owned by certain Class A shareholders and certain employees of Agri-Laboratories, Ltd. as follows:

Southern Livestock Supply Co., Inc.
Michigan Veterinary Farm Supply
Robert and/or Velma Lohmann
Double E Investments
William Fuller
Lakeland Vet, Inc.
Robert J. Matthews Co.
Keith & Dorothy Jeffers
Larry Gladfelter
Dr. Arnold Nagely and Dr. Raymond L. Shultz as joint tenants
Helen Taylor
Terry Christie
Edward Bradford, Trustee of the Edward Bradford Trust
Cary Becker and Barbara J. Becker, Trustees of the Becker Family Revocable Trust
Lowe and Wilcox Enterprises, LLC
Herman O. Haenert and Judith A. Haenert, Trustees under the Haenert Living Trust

The general partner of K-Highway is K-Highway General Partner, Inc., a Missouri corporation solely owned by the CEO and Chairman of the Board of Agri-Labs, Steve Schram.

DIRECTORS, OFFICERS AND SIGNIFICANT EMPLOYEES

Directors

Name	Company	Mo/Year Nominated	Term Expires
Steve Price, Age 50	Professional Veterinary Products	March 2009	March 2012
Mo Jackson, Age 53	Michigan Vet Farm	March 2009	March 2012
Chuck VanderPloeg, Age 54	Lextron, Inc.	March 2008	March 2011
Dr. Robert Matthews, Age 68	R.J. Matthews Co.	March 2008	March 2011
Greg Lowe, Age 51	West Plains	March 2007	March 2010
Bill Fuller, Age 72	Fuller Supply	March 2007	March 2010
Steve Schram, Age 48	Agri-Labs	N/A	Upon termination of employment as CEO

Outside Directors

Name	Mo/Year Nominated	Term Expires
Lou Pascarella, Age 47	March 2005	March 2010
Frank Carter, Age 56	March 2008	March 2011

Directors

Mr. Price is the President and CEO of Professional Veterinary Products, Ltd. Mr. Price has more than 25 years of experience in all aspects of animal health distribution, including sales, operational capabilities, and fiscal responsibilities. He began his tenure with PVP in 2002 as General Manager for ProConn Animal Health Solutions, a division of PVP, was promoted to the position of Vice President of Sales and Marketing for PVP in 2005, was named Chief Operating Officer in 2006 and named President in 2008. Mr. Price is responsible for all operations of PVP and its affiliated companies.

Mr. Jackson is the owner and President of Michigan Veterinary Farm Supply Co., Inc., located in Vermontville, Michigan. Mr. Jackson joined the company in 1978 after graduating from Purdue University with a degree in Business Management. Michigan Vet has been in the animal health and veterinary supply business since 1974, and Mr. Jackson has owned the company since 1988, taking over from his father, Marvin K. Jackson.

Mr. VanderPloeg is the President & CEO of Vet Pharm, Inc., a fully-owned subsidiary of Lextron, Inc. Mr. VanderPloeg has worked with Vet Pharm for over 25 years. Vet Pharm is a full service animal health products distributor providing services to veterinarians across the United States since 1983 having locations in Sioux Center, Iowa, Sioux Falls, South Dakota, and Jerome, Idaho.

Dr. Matthews is the Vice President of Robert J. Matthews Co., an animal health and related products distributor out of Massillon, Ohio. Dr. Matthews has been with the company that was founded by his father, Robert J. Matthews, since August, 1969. Prior to that time, he was in private practice after receiving a DVM degree from The Ohio State University in 1966.

Mr. Lowe is the owner of West Plains Vet Supply in West Plains, Missouri. West Plains Vet Supply has been in the animal health and veterinary supply business since 1962, when the company was founded by Bill Lowe. Mr. Lowe has been with the company since 1981.

Mr. Fuller is the President and CEO of Fuller Supply Company, Inc., located in Birmingham, Alabama. Fuller Supply has been in the animal health and veterinary supply business since 1935 when the company was founded by William Fuller, Sr., Mr. Fuller's father. Mr. Fuller took over as President and CEO of the company in 1967.

Mr. Pascarella resides in Athens Tennessee where he is the managing partner with the firm Pascarella & Miller, Certified Public Accountants and consultants. He also has served as an adjunct professor in the school of business at Tennessee Wesleyan College. He holds a Masters in Business Administration from the University of Tennessee.

Mr. Carter has been employed with Systems Material Handling Co. (SMH) since June of 2000 and is currently Vice President & General Manager. Mr. Carter's areas of specific responsibility include Distribution Operations, Accounting & Finance, and Information Systems. SMH is a distributor of after-market, replacement parts for the forklift industry. Mr. Carter joined SMH in advance of the sale of the company to its current Belgium-based ownership and worked with the owner to ready the company for sale by changing the accounting, banking and insurance representation to entities more aligned with SMH's needs. From 2000 through 2007, SMH has grown from a revenue size of \$50MM to its current size of over \$200MM.

Executive Officers

Steve Schram serves as Chief Executive Officer and Chairman of the Board of Directors of Agri-Labs. He is 48 years of age. He was born and raised in Iowa. He graduated from Anthon Oto High School in 1979. He graduated from Iowa State University with a B.S. in Animal Science in 1983. He began his career in the animal health industry with Syntex Animal Health in 1983 and held the following positions with Syntex:

- Sales Representative 1983-1986
- Regional Manager 1986-1988
- Product Manager 1988-1989
- National Sales Manager 1990-1992
- Business Unit Manager 1992-1995

He joined Agri-Labs as Director of Sales and Marketing in 1995. In 1997 Schram was elected President of Agri-Labs. He established a wholly owned subsidiary of Agri-Labs, Tradewinds,

Inc. He currently serves as President, CEO and Chairman of the Board of Directors of Agri-Labs.

Terry Christie serves as Vice President of Research & Development for Agri-Labs. He is 58 years of age. He was born and raised in Missouri. He graduated from South Harrison High School in 1969. He attended Northwest Missouri State, Maryville, Missouri from 1969 to 1971 and Missouri Western State College, St. Joseph, Missouri from 1972 to 1974 where he graduated with a B.S. in Biology and a Minor in Chemistry. Prior to joining Agri-Labs his professional background is as follows:

- Assistant Mgr. Parenteral Dept. Medico, Elwood, KS 1974-1980.
- Director of Quality Assurance, Tech America, Elwood, KS (formerly Medico), 1980-1986
- Superintendent of Production, Fermenta Animal Health (formerly Tech America) 1987-1989

Mr. Christie was hired in his present position with Agri-Labs on October 30, 1989. As Vice President of Research and Development, Mr. Christie is responsible for pharmaceutical animal drug development. All such projects are decided upon through the Product Review Team (PRT). Once a project is established, Mr. Christie is responsible for outsourcing the active ingredient and finished product manufacturing, and coordinating the project through the development and filing of the animal drug application (either ANADA or NADA) with the Center for Veterinary Medicine. Once a product is approved, Mr. Christie coordinates contract manufacturers and Agri-Labs sales and marketing personnel for production of the finished product.

Helen Taylor is the Chief Financial Officer for Agri-Labs. She was born and raised in Missouri. She graduated from Savannah High School in 1974. She attended Northwest Missouri State College in St. Joseph, Missouri and graduated with a B.S. degree in Accounting in July of 1977. She was a staff accountant with the public accounting firm of Melvin P. Ketter, CPA from 1977 to 1978. She passed her CPA exams and was licensed in November of 1978. She then served as a staff accountant with the public accounting firm of Bill Blanchard, CPA from 1978 to 1984. She obtained a Masters of Business Administration from NW Missouri State University in 1983. She established her own accounting firm in 1984 and was actively engaged in that business from 1984 through 1996. She was also a full time instructor at Missouri Western State College from 1985 through 1996. She served as Director of Finance for Agri-Labs from April, 1997 to 2001. She has been Chief Financial Officer of Agri-Labs since January, 2002. Her age is 53.

Edward S. Sloan, Secretary – Serves as national legal counsel for Agri-Labs. His employment is with Waldeck, Matteuzzi & Sloan, P.C. in Leawood, Kansas. He also serves as recording secretary for all Shareholder and Board of Director meetings. He is one of the founding shareholders in Waldeck, Matteuzzi & Sloan, P.C. Mr. Sloan is in charge of the business section of the firm. He serves as counsel to a multitude of clients handling transactional work, the formation of business entities, financial affairs and operational issues for his clients. He is 48 years old.

Cary Becker serves as Vice President of Sales. He was hired in this position on May 1, 1999. He is 49 years of age. He was born in Yankton, South Dakota and raised in Hartington, Nebraska. He graduated from Hartington Cedar Catholic High School. He attended and graduated from Kearney State College in Kearney, Nebraska in 1984 with a BS degree in Business Marketing & Finance, and a minor in Ag Economics and Biology. His professional background prior to joining Agri-Labs is as follows:

- 1984-1989 Ralston Purina Company/Purina Mills, Inc. Territory & District Sales Manager
- 1989-1995 Syntex Animal Health, division of Syntex Laboratories. Started as Territory Sales Manager, promoted to Regional Sales Manager in 1991.
- 1995-1999 Fort Dodge Animal Health, division of American Home Products. Regional Sales Manager.

RENUMERATION OF DIRECTORS AND OFFICERS

Title	Total Annual Compensation
Chief Executive Officer, President & Chairman of the Board	\$477,878.00
Vice President of Research and Development	\$294,028.00
Executive Vice President	\$287,934.00
All Officers and Directors as a Group (Note: This consists of 5 Officers and 2 Directors who were compensated)	\$1,414,607.00

There is one (1) stock plan approved by the Board of Directors as follows:

1. Executive Share Appreciation Plan. Agri-Labs has established a Restated Executive Share Appreciation Plan ("Plan") under which any employee who is recommended by the CEO and approved by the Board of Directors may be granted Share Units, which is a unit of future incentive compensation tied with the book value of a share of Agri-Labs' stock at the time the units are granted. The Share Units granted vest 20% per year over a five-year period. The holder of the Share Unit may convert the units to shares, but is not obligated to do so. Upon termination of employment the employee holding the units is entitled to receive as deferred compensation the full appreciation in the book value of the shares underlying the units at the time of termination over the original book value at the time the units were granted. The CEO Steve Schram has 15,000 Class A Share Units, all of which are fully vested. The book value of the Class A shares at the time Class A Share Units were granted and the strike price for conversion of the units is \$8.56 per share. The Units were granted on January 1, 1997.

INTEREST OF MANAGEMENT AND OTHERS IN CERTAIN TRANSACTIONS

Each of the 16 Shareholders of Agri-Labs currently has in place a Distribution Agreement for Agri-Labs' products. This Distribution Agreement runs for a twelve (12) month period and is renewed annually. The Distribution Agreement between the Class A Shareholder and Agri-Labs allows for the distribution of Agri-Labs' products through the retail operation of the Class A distributor Shareholders.

Under the agreement Agri-Labs authorizes the distributor to sell its products and the distributor agrees to use its best efforts to sell these products. The sales prices are set in an exhibit to the agreement, and Agri-Labs has the unilateral right to revise these prices at its discretion. Payment for purchases by the distributor is due 30 days after invoice. Unpaid balances accrue interest at the rate of 1 ½%. Credit limits for distributors are set forth in an exhibit to the agreement. Payments due under the agreement are secured by a pledge of the distributor's Class A shares. Under the agreement the distributor agrees to keep confidential certain matters including customer lists, marketing information, proprietary product information, prices and financial information. Agri-Labs has the ability to terminate the agreement on the occurrence of certain events defined in the agreement.

The amounts of accounts receivable owed by Class A Shareholders as of December 31, 2008 and the aging report with respect to these accounts is contained in the following table:

Members	12/31/2008	%
	A/R Balance	of A/R
Professional Vet Products	\$1,457,594.28	21.64%
Vet Pharm (shares redeemed in 2008)	\$1,175,662.92	17.46%
Walco	\$812,749.30	12.07%
MWI Vet Supply	\$812,656.37	12.07%
West Plains Vet	\$411,933.02	6.12%
Valley Vet	\$406,171.34	6.03%
Robert J. Matthews, Co	\$394,927.38	5.86%
Animal Medic	\$282,411.74	4.19%
Vet & Poultry	\$245,395.14	3.64%
Fuller Supply Co., Inc	\$221,238.18	3.28%
Jeffers, Inc	\$152,430.03	2.26%
Northwest Veterinary Supply	\$137,164.63	2.04%
IVESCO	\$83,145.63	1.23%
Southern Livestock	\$60,334.46	0.90%
Michigan Vet Supply	\$47,439.54	0.70%
United Pharmacal Co., Inc	\$14,585.10	0.22%
Lextron, Inc.	\$12,071.53	0.18%
Non Members	\$6,991.04	0.10%

Totals	\$6,734,901.63	100.00%
---------------	----------------	---------

The aging of the Accounts Receivable is as follows:

Current	85.20%
30-60 Days	14.65 %
Over 60 Days	0.15 %
	<u>100.00%</u>

In addition to the Distribution Agreement between the Class A Shareholders and Agri-Labs, certain of the Class A Shareholders are owners of the Missouri General Partnership which owns the physical facility in which Agri-Labs maintains its corporate headquarters. K-Highway Limited Partnership is a Missouri Limited Partnership in which the only asset is the real estate and improvements located at 20927 State Route K in St. Joseph, Missouri. The General Partner of the Partnership is K-Highway General Partner, Inc., a Missouri Corporation, which is wholly owned by Steve Schram, the CEO and Chairman of the Board of Directors of Agri-Labs. Agri-Labs leases its physical facilities, a warehouse and executive offices from the Partnership. Under the terms of the Plant Lease Agreement, Agri-Labs is currently obligated to pay a monthly rent of \$31,335.00.

PRINCIPAL STOCKHOLDERS

The following table reflects the beneficial ownership of voting securities of Agri-Labs, Class A shares, for each person who is a director:

Director	Company through which Stock Owned	Shares Owned	Percentage of Outstanding Class A Shares
Steve Price 10077 S. 134th Street Omaha, NE 68138	PVP	15,000	6.25%
Mo Jackson 7415 Lawrence Highway Vermontville, MI 49096	Michigan Vet Farm	15,000	6.25%
Bill Fuller 3500 Messer Airport Hwy Birmingham, AL 35222	Fuller Supply Co.	15,000	6.25%
Dr. Robert K. Matthews 2850 Nave Road SE Massilon, OH 44646	Robert J. Matthews Co.	15,000	6.25%
Greg Lowe 614 North Washington P.O. Box 328 Springfield, MO 85801	West Plains Veterinary Supply of Springfield, Inc.	15,000	6.25%
Chuck Vander Ploeg 620 "O" Street Greeley, CO 80632	Lextron, Inc.	15,000	6.25%

Steve Schram CEO & Chairman of the Board 20927 State Route K St. Joseph, MO 64505		15,000 Share Units convertible to shares at \$8.56 share	%
Officers and Directors as a Group:		90,000 shares 15,000 Share Units	37.50%

The following table reflects the ownership of Class B shares, non-voting securities of Agri-Labs for each of the three highest paid persons who are officers or directors, and for all officers and directors as a group:

Name	No. of Shares	Percentage of Outstanding Class B Shares Before Offering	Percentage of Class B Shares After the Offering - Maximum
Steve Schram CEO & Chairman of the Board of Directors 20927 State Route K St. Joseph, MO 64505	4600	7.38%	2.83%
Helen Taylor, CFO 20927 State Route K St. Joseph, MO 64505	4,505	7.23%	2.78%
Terry Christie VP of Research and Development 20927 State Route K St. Joseph, MO 64505	2,020	3.24%	1.24%
All Officers and Directors as a Group	14,766	23.69%	9.10%

The following table reflects the ownership of over 10% of non-voting securities of Agri-Labs for any class of stock:

Class C Stock

Name	No. of Shares	Percentage of Outstanding Class C Shares Before Offering	Percentage of Class C Shares After the Offering - Maximum

Wishek Vet Clinic c/o Dan Shuler, DVM 8370 Hwy 3 SE Wishek, ND 58495	2,000	10.53%	1.68%

DESCRIPTION OF SECURITIES

Agri-Labs' Articles of Incorporation and Amendments thereto authorize the issuance of 800,000 shares, consisting of authority to issue 400,000 shares of Class A common stock, 200,000 shares of Class B common stock, and 200,000 shares of Class C common stock. There are currently 240,000 shares of Class A common stock outstanding. Prior to this amended Offering, the Company has issued 160,870 shares of Class B common stock and has redeemed 98,567 shares of Class B common stock. There are currently 62,303 shares of Class B common stock outstanding. Prior to this Offering it has issued 19,000 shares of Class C common stock and it has redeemed none. There are currently 19,000 shares of Class C common stock outstanding.

Holders of Class A common stock are entitled to one vote per each Class A share held. Class A shareholders are entitled to vote on any matter for which shareholders are entitled to vote pursuant to the Bylaws of Agri-Labs. The voting rights of the holders of Class A shares are non-cumulative, which means that more than 50% of the Shares voting for the election of directors can elect all of the directors if they so choose. Class A shareholders are all entities that are retail distributors of Agri-Labs' products.

Class B and Class C shares are non-voting shares which only entitle Class B and Class C shareholders to dividends, if declared. The declaration of dividends is discretionary with the Board of Directors. The Board is not obligated to declare dividends equally across all classes of shares and it may act preferentially with respect to one or more classes of shares. Historically, the Board has declared dividends with respect to Class B shares every calendar year from 1987 through 2008. The Board has never declared dividends on Class A shares. The first dividend on Class B shares was \$0.25 per share in 1987. The dividend has been \$1.10 per share for the years 1998 through 2006, \$1.15 per share for the year 2007, and \$1.00 per share for the year 2008. For the years 2000 to 2002 those dividends have been prorated to reflect the length of ownership of the shares. Class C dividends have been paid since the issuance of Class C shares in 2004 with a \$.50 per share dividend declared for 2004, a \$1.10 dividend per share declared for 2005 and 2006, a \$1.15 per share dividend for 2007, and a dividend of \$1.10 per share in 2008. Going forward, it is the intention of the Board to declare dividends on Class B and C shares equally, but not Class A shares.

Class B shares may only be purchased by employees or outside directors of Agri-Labs or Class A shareholders or their employees, and must be purchased in 50 share increments. Class B shares are offered to create an incentive within Agri-Labs distributor network for sales people to market Agri-Labs' products. This ownership stake of the distributor network promotes brand loyalty and allows the marketing force to participate, through dividends, in the overall profitability of the Company.

Class C shares are only offered to licensed and practicing veterinarians or business entities comprised of veterinarians who qualify by purchasing minimum levels of Agri-Labs' products. The Class C shares must be purchased in 1,000 share increments. If the Class C shareholder does not maintain certain minimum levels of participation in distributing Agri-Labs' product in years subsequent to purchase (\$50,000 in annual general product sales) Agri-Labs has

the option to redeem the Shares at the then current book value as determined by the Company's accountants at the end of the month preceding the written notice of the Company's intent to exercise this option.

The Class B and C shares when duly issued and sold pursuant to this Offering will be fully paid and non-assessable. Class A, B and C shares have equal rights with respect to any preference on liquidation.

None of the shares have any preemption rights or conversion rights. All of the shares (Class A, B and C) are subject to redemption rights contained in the Bylaws of Agri-Labs.

Class C shares are only offered to licensed and practicing veterinarians or business entities comprised of veterinarians. Purchasers must qualify by generating minimum levels of Agri-Labs' product sales. If the Class C shareholder does not maintain certain minimum levels of participation in distributing Agri-Labs' products in the years subsequent to purchase (\$50,000 of annual sales of general products) Agri-Labs has the option to redeem the Shares at their then current book values, as determined pursuant to the corporation's Bylaws.

Pursuant to Agri-Labs' Bylaws certain other acts or events will be deemed a "transfer" which will trigger the option of Agri-Labs to redeem the Class A, B or C Shares at book value and terminate the shareholder's ownership of the Shares. These acts include the breach of any contract by the shareholder existing between the shareholder and Agri-Labs, including but not limited to a breach of any confidentiality agreement, distribution agreement, license agreement or consignment agreement. Further, it includes termination of employment with Agri-Labs or a Class A shareholder, termination of the current Distribution Agreement between Agri-Labs and the Class A shareholder, or acquiring an equity ownership interest in a competitor of Agri-Labs within the animal biologicals or pharmaceuticals business. Also, if an individual Class C shareholder ceases to be engaged in the practice of veterinarian medicine, (by death, retirement or for any other reason), or if a business or entity comprised of a group shall be dissolved, merged or discontinue the active practice of veterinary medicine Agri-Labs has the option to repurchase the Class C shares at the then current at book value as determined by the Company's accountants at the end of the month preceding the written notice of the Company's intent to exercise this option.

Indemnification Of Officers, Directors and Employees. As authorized by the Delaware Code, the Bylaws of Agri-Labs provide that every person who is a director, officer or employee of the corporation shall be indemnified by Agri-Labs to the fullest extent permitted by the General Corporation Law of the State of Delaware. Further, Agri-Labs, if authorized by the Board of Directors, may purchase and maintain insurance on behalf of any such person to the fullest extent permitted by the General Corporation Law of the State of Delaware.

Limited Transferability And Lack Of Market Ability. The Class B and C shares purchased in this Offering are being offered in reliance on an exemption under Section 3(b) of the '33 Act and Regulation A. These Shares, as well as the Class A shares, are also subject to substantial further restrictions on transfer as contained in the Bylaws of Agri-Labs. Pursuant to these restrictions, the Shares may not be sold or otherwise transferred by the holder without the consent of Agri-

Labs. Upon notice of intent to transfer the Shares, Agri-Labs has an option or right of first refusal to purchase the Shares at book value. This option must be exercised by written notice within 60 days of the next regularly scheduled Board of Directors meeting following the Company's receipt of written notice of the proposed transfer. The purchase price is the book value determined by the Company's accountants at the end of the month preceding the date Agri-Labs provides written notice of its intent to exercise its option, and the closing on the purchase must occur within 30 days after the aforesaid 60 day period. If Agri-Labs does not purchase the Shares, the Shares may be transferred subject only to the requirement the Shares have been registered or confirmation that the transaction is exempt from registration under the '33 Act.

There is no public market for the Shares and there can be no assurance that a market will develop. The Shares will not be traded on any established market. The Shares will not be eligible for listing on any stock exchange or for quotation on NASDAQ, and Agri-Labs does not intend to obtain such a listing or approval. Investors may not be able to liquidate their investment should they choose to do so. The Shares should be purchased for long-term investment purposes only.

TERMS OF THE OFFERING

All purchasers will be required to execute a written Subscription Agreement to purchase either Class B or Class C shares. This Offering is being undertaken directly by Agri-Labs without an underwriter. Under the terms of the Offering, Agri-Labs is proposing to offer up to 100,000 shares of Class B stock and up to 100,000 shares of Class C stock. The shares are being offered at the book value per share, which is the net worth (assets less total liabilities) divided by the total number of outstanding Class A, B and C common shares. The current book value is \$24.53 per share. After qualification, the offering price will be adjusted monthly to reflect the current book value. Class B and C shareholders who have purchased pursuant to this Offering and who have received a current offering circular will receive a written notice of each monthly adjustment. In no event will this adjustment exceed a price per share which would result in the aggregate offering price exceeding \$4,963,486.04, (\$5,000,000 less \$36,513.96, the amount of securities sold under Regulation A within one (1) year prior to the qualification of the initial offering qualified December 23, 2008 - since June 30, 2007). At the time of making any adjustment, the aggregate offering amount will be recalculated considering the shares already sold under the Offering and the shares to be sold at the new adjusted price. If the recalculated new aggregate offering amount would exceed \$4,963,486.04 the Company will lower the aggregate number of shares it will issue under this Offering. It will be mathematically impossible to exceed \$4,963,486.04 under any future adjustment based on terms disclosed in any supplemental Offering Circular. Class B shares must be purchased in minimum increments of 50 shares. Class C shares must be purchased in minimum increments of 1,000 shares. Class B and C shares are non-voting shares which will only entitle Class B and C shareholders to dividends, if declared. For the period 2000 to 2002, Agri-Labs pro-rated Class B dividends to reflect the length of time the Class B shares have been held during the year for which the dividend was declared.

Plan of Distribution

The Class B and C shares will be offered directly by Agri-Labs management. The individuals who will participate in the offer and distribution of the shares will be Steve Schram, the Chief Executive Officer of the Company, Cary Becker, Vice President of Sales and Helen Taylor, the Chief Financial Officer. None of these individuals are subject to statutory disqualifications as defined in Section 3(a)(39) of the Securities and Exchange Act of 1934 ("1934 Act"), nor will any of them be compensated in connection with their participation in the offering by commission or other transaction-based compensation. Further, none of these individuals are associated persons of a broker-dealer, and all of them meet the conditions stated in Rule 3a4-1.(a)(4)(ii) under the 1934 Act. None of these individuals will be deemed a broker by virtue of compliance with Rule 3a4-1.

Class B shares may only be purchased by employees or outside directors of Agri-Labs or Class A shareholders or their employees. Ownership of Class A shares is limited to entities that have a current Distribution Agreement for Agri-Labs' products. Class B shares are offered to create an economic incentive within Agri-Labs' distribution networks for the sales force to market Agri-Labs' products. This ownership stake of the distribution network promotes brand loyalty and allows the marketing force to participate in the profitability of the Company.

Class C shares are only offered to licensed and practicing veterinarians or business entities comprised of veterinarians. Purchasers must qualify by generating minimum levels of Agri-Labs' product sales. If the Class C shareholder does not maintain certain minimum levels of participation in distributing Agri-Labs' products in the years subsequent to purchase (\$50,000 of annual sales of general products) Agri-Labs has the option to redeem the Shares at their then current book value, as determined pursuant to the corporation's Bylaws.

Pursuant to Agri-Labs' Bylaws certain other acts or events will be deemed a "transfer" which will trigger the option of Agri-Labs to redeem the Shares at book value and terminate the shareholder's ownership of the Shares. These acts include the breach of any contract by the shareholder existing between the shareholder and Agri-Labs, including but not limited to a breach of any confidentiality agreement, distribution agreement, license agreement or consignment agreement. Further, it includes termination of employment with Agri-Labs or a Class A shareholder, termination of the current Distribution Agreement between Agri-Labs and the Class A shareholder, or acquiring an equity ownership interest in a competitor of Agri-Labs within the animal biologicals or pharmaceuticals business. Also, if an individual Class C shareholder ceases to be engaged in the practice of veterinarian medicine, (by death, retirement or for any other reason), or if a business or entity comprised of a group shall be dissolved, merged or discontinue the active practice of veterinary medicine Agri-Labs will have the option to repurchase the Class C shares at the then current at book value as determined by the Company's accountants at the end of the month preceding the written notice of the Company's intent to exercise this option.

Agri-Labs reserves the right, in its sole discretion to refuse to accept a subscription from any person or entity, in whole or in part, for any reason or for no reason. The Offering commenced on December 23, 2008, and is on a continuous basis until all of the allotted Shares

are sold or the Offering expires, whichever occurs first. This Amended Offering Circular is being filed under Rule 253(e)(2) of the '33 Act which states that any offering circular for a continuous offering is to be updated every twelve (12) months after the date the offering statement was qualified. The Offering is not contingent upon achieving a minimum offering by a specific date or ever. No escrow account has been established for deposit of the Offering proceeds. Subscription funds will be paid directly to Agri-Labs, and Agri-Labs will have immediate access to such funds. Subscriptions are irrevocable.

How To Subscribe. A purchaser of Class B or Class C shares must execute a "Subscription Agreement" which must be completed in full, signed and returned to Agri-Labs. The Subscription Agreement and full purchase price for the Shares should be delivered in person to Agri-Labs or by mail to:

LITIGATION

Agri-Labs is not involved in any litigation nor is it aware of any such litigation that is threatened as of the date of this Offering Circular.

LEGAL MATTERS

The validity of the Class B and Class C shares being offered by Agri-Labs and certain legal matters will be passed upon for Agri-Labs by Morris, Laing, Evans, Brock & Kennedy, Chartered with offices in Wichita, Kansas and Topeka, Kansas.

EXPERTS

The financial statements of Agri-Labs as of December 31, 2007 and as of December 31, 2008, included in this Offering Circular have been audited by Kane, Mitchell & Co., L.L.C., Certified Public Accountants as stated in the report attached hereto as Exhibit H and have been so included in reliance upon the report of such firm given on their authority as experts in accounting and auditing.

ADDITIONAL INFORMATION

Agri-Labs will make available to potential investors and their advisors any non-confidential or non-proprietary materials available to Agri-Labs and will answer all inquiries from potential investors and their advisors, other than proprietary or confidential matters, concerning the operation of Agri-Labs, its management, any other matters relating to the business and assets of Agri-Labs and this Offering and sale of Class B and Class C shares. In order to obtain additional information, please contact the CEO, Steve Schram or CFO, Helen Taylor at:

Independent Accountant's Report

Board of Directors
Agri-Laboratories, Ltd.
St. Joseph, Missouri

We have audited the accompanying consolidated balance sheets of Agri-Laboratories, Ltd., as of December 31, 2008 and 2007 and the related consolidated statements of income, stockholders' equity, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Agri-Laboratories, Ltd. as of December 31, 2008 and 2007 and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

The accompanying notes are an integral part of these financial statements

Agri-Laboratories, Ltd.
Notes to Financial Statements
For The Years Ended December 31, 2008 and 2007

Note 1: Summary of significant accounting policies

Nature of Business – Agri-Laboratories, Ltd. is a sales and marketing company that markets private labels and distributes pesticides, insecticides, pharmaceuticals, and biologicals in the animal health market. The Company is owned by its distributors.

Principals of Consolidation – The consolidated financial statements include the accounts of the company and its wholly-owned subsidiaries, Tradewinds, Inc., and Pro Labs, Ltd. All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates – The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Accounts Receivable – Receivables are reported at net realized value. The company calculates an allowance for doubtful account if deemed necessary after reviewing the accounts. No allowance was recorded at December 31, 2008 and 2007. There is no collateral on the accounts receivable.

Inventory – Inventory is stated at the lower of cost (average cost method) or market. Reported amounts have been reduced by an allowance for potential obsolete and slower moving product based on a review of inventory on hand compared to future sales and product dating.

Property and Depreciation – Property and equipment are recorded at cost. Depreciation is provided on the straight-line method over the estimated useful lives of the respective assets.

Intangible Assets – Intangible assets relate to acquisition costs for trademarks and for marketing rights. The costs of the marketing rights are being amortized over the terms of the agreements. For the years ended December 31, 2008 and 2007, amortization expense was \$706,250 and \$1,000,000 related to marketing rights. The marketing rights acquired before 2008 are fully amortized. The marketing rights acquired in 2008 relate to future years and amortization will begin in 2009.

Trademark acquisition costs are amortized over fifteen years. For the years ended December 31, 2008 and 2007 amortization expense included \$9,600 related to trademark acquisition cost for each year. At December 31, 2008 and 2007, accumulated amortization of trademarks was \$112,992 and \$103,392, respectively.

Deferred Tax Assets and Liabilities – Deferred tax assets and liabilities are recognized for the tax effect of differences between the financial statement and tax bases of assets and liabilities. A valuation allowance is established to reduce deferred tax assets if it is more likely than not that a deferred tax asset will not be realized.

Recoverability of Long-lived Assets – The company continually evaluates whether events and circumstances have occurred which might impair the recoverability of the carrying value of its long-lived assets, including intangibles. An asset deemed impaired is written down to its fair value if estimated future cash flows are less than its carrying value.

Agri-Laboratories, Ltd.
Notes to Financial Statements
For The Years Ended December 31, 2008 and 2007

Note 1: Summary of significant accounting policies (continued)

Income recognition – The Company records revenue at the time products are shipped to the the customers. The Company does not allow for the return of merchandise except for certain sales of pharmaceuticals and biological products where there is an expiration date less than six months at date of the sale. These products, if not sold by the customer, are returnable to the Company. A reserve for returns is recorded by the Company, which includes estimated returns under this policy.

Advertising, Repair, and Maintenance Cost – These costs are expensed as incurred. The advertising expense was \$616,555 and \$629,175 in 2008 and 2007, respectively.

Costs of Goods Sold – Includes, among other things, inbound freight cost while other warehousing cost and outbound freight are included in marketing and administrative.

Reclassification of Accounts – Certain reclassification of accounts in 2007 were made to conform to the 2008 presentation. These reclassifications had no effect on net income.

Note 2: Marketing Rights & Commitments

Marketing Rights

The Company has a distribution agreement with a supplier whereby the Company has the marketing rights for certain products until December 15, 2013 with exclusive marketing rights until December 15, 2009. The Company has agreed to advance the supplier \$750,000 each quarter under a take or pay obligation. Any portion of the \$750,000 not used for qualified purchases during the quarter is retained by the supplier. As part of the agreement, the supplier was to develop specific products. If the products were not developed, the supplier had the option to extend exclusivity beyond December 15, 2009 or pay the Company \$25,000 per month over a thirty month period beginning August 31, 2007. The supplier elected not to extend exclusivity and began making monthly payments of \$25,000. The Company has recorded income in the amounts of \$275,000 and \$475,000 in 2008 and 2007, respectively for these payments. The Company has also recorded amortization expense in the same amount each year. The effect of this was to reduce the amount recorded as marketing rights, under this agreement, which are fully amortized at December 31, 2008. At December 31, 2008 and 2007, the receivable due from this supplier is \$325,000 and \$350,000 respectively. Unamortized marketing rights were \$706,250, at December 31, 2007.

The Company has entered into an agreement with a supplier to be the exclusive distributor in the United States for two products. One product is currently available for distribution and the other will be available after approval by the Food and Drug Administration (FDA). The agreement begins in 2009. The Company has agreed to a \$1,000,000 non-refundable fee for these rights. \$500,000 was paid to the supplier in 2008 and the remaining \$500,000 will be paid in the future as events occur, as defined in the agreement. If the products are not available when ordered by Agrilabs, the agreement specifies the supplier will reimburse Agrilabs, up to \$16,667 per month, for each product. The maximum number of months of reimbursement is thirty months. The Company plans to amortize these marketing rights over the term of the agreement.

Agri-Laboratories, Ltd.
Notes to Financial Statements
For The Years Ended December 31, 2008 and 2007

Note 2: Marketing Rights & Commitments (continued)

The Company has entered into an agreement whereby, Agrilabs will have the exclusive right to sublicense and market specific products in the United States. The Company has advanced \$200,000 as an access fee which is refundable only in the case of events specified in the agreement. The Company has agreed to pay up to \$400,000 upon the occurrence of events as defined in the agreement. The Company plans to amortize payments made for these rights over the term of the agreement.

The Company entered into a marketing agreement in 2008 for exclusive marketing rights for a period of three years. The Company has agreed to provide at least \$50,000 in advertising each contract year. The Company paid a non-refundable distribution fee in the amount of \$50,000 which was charged to expense in 2008.

Commitments Under Marketing Agreements

Under an agreement the Company has a minimum purchase commitment with a supplier expiring December 15, 2009 to purchase \$4,000,000 (\$3,500,000 in inventory and \$500,000 in additional inventory of qualified expenditures).

Under other agreements the Company has agreed to pay a minimum royalty of \$33,334 per quarter for the first three years and to provide at least \$50,000 in advertising each contract year.

The Company has also agreed, in order to be the exclusive distributor of certain products, to the following minimum purchases. If the purchase amounts are not met, the recourse is the loss of exclusivity. The amount of minimum purchases, on agreements where the Company is maintaining exclusivity at December 31, 2008 are as follows: \$3,147,500 in 2009; \$3,196,800 in 2010; \$3,196,800 in 2011; and \$1,890,000 in 2012.

Note 3: Line-of-Credit Note Payable

The Company has a line of credit in the amount of \$10,000,000 which expires on September 1, 2009. The line has an adjustable interest rate. At December 31, 2008, the interest rate was 2.00%. At December 31, 2008, \$6,304,653 including \$201,161 of advances in progress are recorded as line-of-credit note payable.

The line of credit is secured by the Company's accounts receivables, inventory and other collateral. The line of credit requires the Company to maintain a tangible net worth of at least \$4,500,000 as defined in the loan agreement and to not have debt exceed four times consolidated tangible net worth.

Other	7,152	(9,939)
Income tax provision	\$ 231,511	\$ 282,361

Note 6: Equipment

Equipment is recorded at cost and is comprised of the following:

	2008	2007
Equipment	\$ 868,274	\$ 821,127
Less accumulated depreciation	609,152	574,383
	\$ 259,122	\$ 246,744

Note 7: Related Party Transactions

Agri-Laboratories, Ltd. has entered into a lease agreement with K Highway Limited Partnership for use of the facilities at 20927 State Route K in St. Joseph, Missouri. Agri-Laboratories, Ltd. is responsible for insurance, maintenance and property taxes during the terms of the lease. Most of the limited partners in the partnership are distributors of Agri-Laboratories, Ltd. or officers of Agri-Laboratories, Ltd.

Sales are principally to Class A stockholders. The accounts receivable customers are primarily due from Class A shareholders.

At December 31, 2008, the Company had a note payable on the redemption of Class A stock in the amount of \$234,500.

Note 8: Retirement Plan

The Company has adopted a 401(k) retirement plan covering substantially all of its employees. The plan calls for the Company to match up to 50 percent of the employee's salary reduction contribution up to 15% subject to the maximum dollar limit allowed on deferrals by the Internal Revenue Service. For the years ended December 31, 2008 and 2007, the Company's matching share totaled \$218,611 and \$243,476, respectively. The Company is eligible to make discretionary contributions. The Company's contributions vest 20% per year of service.

**Agri-Laboratories, Ltd.
Notes to Financial Statements
For The Years Ended December 31, 2008 and 2007**

Note 9: Operating Leases

Agri-Laboratories, Ltd. leases facilities at 20927 State Route in St. Joseph, Missouri under an operating lease agreement with K Highway Limited Partnership which expires on December 31, 2010. Future minimum lease payments under the lease are \$376,020 per year.

The Company has the option to renew the lease for one additional five-year period with the base rent increasing by the increase in the consumer price index at the beginning of the five-year option period.

For the years ended December 31, 2008 and 2007 the Company's rental expense was \$376,020 in each year.

Note 10: Stock Compensation Plan

The Company has an Executive Share Appreciation Plan, whereby certain employees will be paid future compensation based upon the increase in the net book value of the stock. In 2007, there were 25,000 share units outstanding under this plan. In 2008 10,000 share units were exercised and paid. At December 31, 2008 there were 15,000 share units outstanding. The units vest at 20% per year and were fully vested at December 31, 2008. The Company accrues amounts due under the plan each year. There were no units awarded in 2008 and 2007.

Note 11: Classes of Stock

The total number of shares of all classes of common stock which the Company has authorized, issued, and outstanding is as follows at December 31, 2008 and 2007.

	<u>Authorized</u>	<u>Issued and Outstanding</u>	
		<u>2008</u>	<u>2007</u>
Common stock, par value \$1 a share Class A	400,000	240,000	255,000
Common stock, par value \$1 a share Class B	200,000	67,335	76,264
Common stock, par value \$1 a share Class C	200,000	19,000	19,000
		<u>326,335</u>	<u>350,264</u>

Class A stock is voting stock and is issued to distributors / owners. Class B stock is non-voting and are offered to employees of Class A stockholders and employees of Agri-Laboratories, Ltd and it's outside directors. Class C stock is non-voting and is offered to licensed practicing Veterinarians or business entities comprised of Veterinarians.

The company has the option to purchase the Class A stock in the event of termination of the Distribution Agreement with the Class A stockholder; the Class B stock if the holder is no longer an employee of the Class A stockholder, an employee of Agri-labs or an outside director; and the Class C stock in the event the holder does not meet certain product purchase requirements. The purchase amount is the net book value at the time the company exercises its option to purchase the stock.

Dividends in the amount of \$1.00 and \$1.15 per share were declared on Class B and Class C stock in 2008 and 2007, respectively.

CONFIDENTIAL

Agri-Laboratories, Ltd.
Notes to Financial Statements
For the Period Ended October 31, 2009

Note 1: Summary of Significant Accounting Policies

The accompanying condensed consolidated financial statements should be read in conjunction with the financial statements and notes thereto included with the Company's Annual Audited Financial Statements for the years ended December 31, 2008 and 2007.

The condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles (GAAP). In management's opinion, the information furnished reflects all adjustments, consisting of only of normal recurring adjustments considered necessary to state fairly the results for the interim period as well as present this period on a consistent basis with the financial statements for the fiscal years ended December 31, 2008 and 2007, have been included.

Note 2: Line-of-Credit Note Payable

The Company has a line of credit in the amount of \$14,000,000 which expires on September 28, 2011. The line has an adjustable interest rate. At October 31, 2009 the interest rate was 3.50%. At October 31, 2009, \$2,751,265 was recorded as line-of-credit note payable.

The line of credit is secured by the Company's accounts receivables, inventory and other collateral. The line of credit requires the Company to maintain a tangible net worth of at least \$5,000,000 as defined in the loan agreement and to not have debt exceed five times consolidated tangible net worth.

Note 3: Equipment

Equipment is recorded at cost and is comprised of the following:

Equipment	\$861,746
Less Accumulated Depreciation	<u>666,785</u>
	\$194,961

Note 4: Retirement Plan

The Company has adopted a 401(k) retirement plan covering substantially all of its employees. The plan call for the Company to match up to 50 percent of the employee's salary reduction contributions up to 6% subject to the maximum dollar limit allowed on deferrals by the Internal Revenue Service. For the period ended October 31, 2009, the Company's matching share totaled \$93,414. The Company is eligible to make discretionary contributions. The Company's contributions vest 20% per year of service.

Note 5: Operating Leases

Agri-Laboratories, Ltd. leases facilities at 20927 State Route in St. Joseph, Missouri under an operating lease agreement with K Highway Limited Partnership which expires on December 31, 2010.

For the period ended October 31, 2009 the Company's rental expense was \$313,350.

Note 6: Classes of Stock

The total number of shares of all classes of common stock which the Company has authorized issued and outstanding is as follows at October 31, 2009:

	Authorized	Issued and Outstanding
Common Stock, par value \$1 a share Class A	400,000	240,000
Common Stock, par value \$1 a share Class B	200,000	62,193
Common Stock, par value \$1 a share Class C	200,000	<u>19,000</u>
		321,193

No dividends were declared during the period ended October 31, 2009.
