FOR IMMEDIATE DISTRIBUTION:

SIVENSA REPORTS RESULTS FOR THE FIRST QUARTER OF THE FISCAL YEAR

CARACAS, JANUARY 30, 2009. Siderúrgica Venezolana "SIVENSA" S.A. reported consolidated sales of US\$ 235 million during the first quarter of the 2009 fiscal year, which ended on December 31, 2008. This figure is 21% higher than the sales reported for the same quarter of the preceding fiscal year. The operating profit was US\$ 44 million, compared to US\$ 39 million for the October-December 2007 period. The net profit attributable to Sivensa shareholders was US\$ 37 million, compared to a net profit of US\$ 17 million reported for the same period of the preceding fiscal year.

Even though activity in the global steel industry has significantly declined, results for this quarter were favorably impacted because the prices of IBH sales were negotiated prior to the deceleration of the international economy. This allowed the company to offset the impact of the drop in the volume of tons that were sold. Market conditions allowed Sidetur to increase its sales as compared to the same quarter of the preceding year.

ANALYSIS OF RESULTS FOR THIS QUARTER

The most significant aspects of the results are described below:

Sales: The 21% increase in Sivensa sales is primarily explained by the increase in Sidetur's sales, since IBH sales remained stable.

Operating Profits: Operating profits increased by 13%, compared to the October-December 2007 period, due to higher briquette prices and income from Treasury transactions.

Total Financing Cost: The total financing cost decreased as compared to the same period of the prior year due to the reduction of IBH's debt, as reported in July 2008.

Net Profit: As a result of the above mentioned factors, the net profit attributable to Sivensa shareholders was US\$ 37 million.

PERFORMANCE BY BUSINESS SECTOR

Steel

Sidetur's sales for the October-December 2008 term were US\$ 142 million, 22% higher than the sales for the same period of the preceding fiscal year. Even though the sales volume was slightly lower than the sales volume reported for the same quarter of the prior year, primarily as a result of a long period of downtime for maintenance work required in one of the rolling mills, sales rose due to higher prices of some products in response to the cost increase of raw materials such as briquettes, ferroalloys and electrodes.

Pre-reduced Iron

IBH recorded sales of US\$ 135 million during the October-December 2008 term, a figure that is similar to the sales of US \$134 million reported for the same quarter of the prior year. Due to a decline in demand, sales of briquettes decreased 51% in terms of metric tons as compared to the same period of the preceding year, a factor that was offset by higher sale prices during the period. The Orinoco Iron and Venprecar plants joint production was 195,594 MT during the quarter, a figure reflecting 44% drop as compared to the same quarter of the preceding fiscal year. This decrease was mainly due to demand conditions in the international market.

DIVIDEND

As approved by the Shareholders at their Regular Meeting held on December 5, 2008, as of December 19th Sivenza paid shareholders a cash dividend of Bs. 3.85 per share.

LOAN GRANTED TO A SUBSIDIARY

During the quarter, due to conditions in the international market, IBH did not make the payments that were scheduled pursuant to the financing agreement with a Sivenza subsidiary. The companies agreed on a waiver regarding this situation.

SOCIAL RESPONSIBILITY

During the quarter, Sidetur and IBH continued to advance their programs aimed at promoting the wellbeing of workers, their families, and the community at large. Similarly, the Fundametal Center for Applied Knowledge continued to expand its role to train Venezuelan professionals from the vocational level to college level. Activities undertaken during the quarter include the following:

- Within the framework of the "Steel with Added Value" Program, Sidetur supplied construction materials to build a levee in La Acequia, an area in Carapita, benefiting 10 families in this development, as well as for a Metropolitan Police module at Cota 905 in the municipality of Libertador, and for the Fe y Alegría "Monseñor Romero" Workers Training Center at El Trompillo development in Barquisimeto. The companies also continued their sponsorship of the Siduritos de Valencia small league baseball team, which has been in place for over 22 years. This program has helped develop regional talents like Eduardo López, who started out with the Siduritos and has recently signed a contract with the San Francisco Giants.

- In the community of Urimán, in Gran Sabana, the construction of residential quarters for the students of Escuela Granja, where 260 children are studying under the direction of the sisters of the Divino Maestro congregation, was completed. Additionally, the Agricultural Program kicked off at the Urimán community in order to train approximately 200 youths of the Pemón ethnic group on crop growing, irrigation and worm cultivation techniques. Similarly, first steps were taken toward the implementation of a Feeding Program that will build the infrastructure required to raise hogs and chickens in the future. Orinoco Iron and Venprecar also provided medical and computer equipment for ambulatory clinics. Together with the population of La Esperanza (Sifontes municipality) and Kamarata, the population of Urimán is benefiting from the healthcare, education and development programs IBH has been spearheading since 2006 in indigenous communities located in remote and hard to reach areas of Bolívar state.

- In order to address the social priority of training youths to join the work force, the Fundamental Center for Applied Knowledge developed the Accelerated Training Program for 19 welders as part of an alliance with Cámara de Pequeños y Medianos Industriales y Artesanos de Carabobo (CAPEMIAC) the Chamber of Small and Medium Industrial Enterprises and Craftsmen of Carabobo. Additionally, through an agreement subscribed with EPA, and with the cooperation of Biticino, Fundametal trained 20 electricians under the Accelerated Training program.

Siderúrgica Venezolana SIVENSA S.A. is a Venezuelan corporation comprising two business units: Sidetur, engaged mainly in the manufacture of steel products for the construction, manufacturing and infrastructure industries, and International Briquettes Holding, IBH, whose Venprecar and Orinoco Iron plants produce reduced iron briquettes to be used as a high-quality raw material in the steel industry. At December 31, 2008, Sivensa employed 2,836 workers.
