4,402	5,492	2,897	(34.2)	New contracts	11,845	13,860	17.0

(1) figures have been restated to reflect the effects of disposals of Camom, Haldor Topsøe and GTT and the classification of Fertinitro as "Net assets available for disposal";

(2) figures restated net of proceeds from the disposal of the holding in Fertinitro.

As previously stated, revenues and associated profit levels, particularly in the Offshore and Onshore sectors, and, to a lesser extent, in the Drilling sector, are not consistent over time, as they are influenced not only by market performance but also by climatic conditions and individual project schedules. Consequently, the results from any one particular fiscal period can vary significantly, thereby precluding a direct comparison with the same period in other fiscal years or extrapolation of figures from a single quarter to the entire year.

The investments made during year 2008 amount to €2,044 million (€1.636 million in 2007).

The principal investment projects completed in 2008 were:

- Offshore: FPSO Gimboa for Sonangol P&P; an accommodation barge and two utility barges for Agip KCO;
- Drilling Offshore: Perro Negro 7 Jack-up contracted with Saudi Aramco, and a Tender Assisted Drilling Barge contracted with Eni Congo SA;
- Drilling Onshore: acquisition/construction of 27 rigs, contracted with various clients, mainly in Latin America.

Work on a number of major investment projects will continue in successive years. We provide below the latest forecast completion dates, updated following the most recent discussions with clients and shipyards. For the New Pipelayer, Castor ONE, the new delivery date has been agreed to benefit from a recent reduction in steel prices along with further upgrading of the operating characteristics of the vessel, and compatible with the slippage of some projects.

#### Offshore:

- New Pipelayer Castor ONE – completion Q3 2011;
- Ultra deepwater Field Development Ship FDS2 – completion Q2 2011
- Diving Support Vessel – completion Q3 2011
- Karimun Fabrication Yard Indonesia – ready for Fabrication Q4 2010

#### Drilling Offshore:

- Perro Negro 6 Jackup – completion Q2 2009
- Deepwater Semisub Scarabeo 8 – completion Q1 2010
- Deepwater Semisub Scarabeo 9 – completion Q1 2010
- Deepwater Drillship Saipem 12000 – completion Q1 2010

#### Drilling Onshore

- 5 Rigs - completion Q1 2009.

**Net financial debt** at 31<sup>st</sup> December 2008 amounted to €2,028 million, representing an increase of €334 million from 31<sup>st</sup> December 2007. This is due to investments made in 2008 and the distribution of dividends, partially offset by the cash flow from operations, proceeds from the disposal of GTT and an increase in working capital.

#### **New contracts and backlog**

During the fourth quarter of 2008, Saipem was awarded contracts amounting to €2,897 million (compared to €4,402 million in the fourth quarter of 2007).

New contracts awarded to the Saipem Group in 2008 amounted to €13,860 million (€11,845 million in 2007).

**The backlog of the Saipem Group at 31<sup>st</sup> December 2008 stands at a record level of €19,105 million** (€4,682 million in the Offshore sector, €9,201 million in the Onshore sector and €5,222 million in the Drilling sectors), of which €7,281 million are to be realised in 2009.

#### **Management outlook for 2009 and medium-term outlook**

In the second half of 2008 the dire forecasts for the development of the world economy led to a collapse of the (brent) oil price from a historical high in July of close to 150 dollars to around 40 dollars at year end.

This sudden dramatic fall in the oil price, coupled with much tighter access to credit due to difficulties of the international banking sector has led to a significant revision in the oil companies' spending plans. Projects for the development of non-conventional oil and marginal oil field development appear economically incompatible with short term oil price forecasts. Moreover, the expectation that a fall in the prices of several raw materials will lead to lower costs in manufactured products, and tighter access to credit, may lead oil companies to delay the launch of new projects and to reschedule existing ones.

All of this makes interpretation of the oil services market difficult and uncertain in the short term.

Saipem faces this negative phase with a record backlog, and a business portfolio that includes Drilling and Engineering & Construction in all the more promising areas: oil field development, subsea operations, heavy lifting, pipelaying; and with activities in all the most prolific hydrocarbon provinces. Our industrial model, which combines excellent engineering and execution with a strong presence in the countries where we operate, makes Saipem especially credible for the realization of complex projects in frontier areas; projects that are generally economically more robust, and that have planning and execution schedules that are less exposed to short-term variations in the price of hydrocarbons.

These considerations underpin Saipem's contention that it can weather this weak market, continuing to achieve a performance that puts it in a position of excellence in its own sector.

In contrast with the short-term uncertainty, the medium-term prospects for the Oil Services Industry are much more solid and promising.

The supply of Energy will continue to depend on oil and gas production, and increasingly on the development of fields in deep waters and remote areas. The oil industry has experienced a decade of under-investment that has significantly affected the ability of the International Oil Companies to replace reserves.

It therefore seems reasonable that as soon as the world economy shows signs of sustained recovery, the price of hydrocarbons will again start to climb, and with it, the investments by the Oil Industry.

With the objective of fully exploiting the potential of a market which, following this negative interval, is expected to expand strongly in the medium term, Saipem continues its own investment program with a forecast expenditure of €1.6 billion in 2009. These investments are approximately 50% in Drilling and are backed by long-term contracts with healthy clients. The remainder are in unique offshore vessels, designed to meet the challenges deriving from the production and transport of hydrocarbons in ultra-deep water and in frontier environments.

*Saipem's Chief Financial Officer, Mr Giulio Bozzini is the senior manager in charge of preparing the company's financial reports. He attests, pursuant to art. 154 bis, paragraph 2, of Law 58/98, that the information contained in this press release fully matches the accounting records, books and entries.*

*Forward-looking statements are based on a number of assumptions and expectations that could ultimately prove inaccurate, as they are subject to risks and variables outside the company's control. These include: currency fluctuations, interest rate fluctuations, the level of capital expenditure in the oil and gas industry, as well as other industries, political instability in areas where the Group operates, and actions by competitors. Moreover, contract execution is also subject to variables outside the company's control, such as weather conditions. Actual results could therefore differ materially from the forward-looking statements.*

The backlog includes the Manifa contract on behalf of Saudi Aramco, amounting to €1,440 million; the Client is expected to decide the terms and timing for its execution in the near future.

- Revenues for 2008 amounted to €5,324 million, representing a 3.9% increase over 2007, which is mainly due to higher levels of activity in the Middle East.
- Operating profit for 2008 amounted to €303 million, compared to €237 million in 2007, with margins increasing from 4.6% to 5.7%. EBITDA stood at 6.6% compared to 5.4% in 2007. This margin increase is attributable to high operational efficiency and improved contractual conditions.
- The most significant contracts awarded in the fourth quarter include:
  - on behalf of Sonatrach, the EPC contract in Algeria for the construction of infrastructure of an LPG treatment plant in the Hassi Messaoud oil complex. The contract comprises engineering, procurement and construction of three LPG trains;

The backlog at 31<sup>st</sup> December 2008 amounted to €3,759 million, of which €565 million are to be realised in 2009.

- The decrease in revenues and margins in the fourth quarter of 2008 compared to the third quarter is due, as previously stated, to an increased number of days lost for maintenance.
- Revenues for 2008 amounted to €472 million, representing a 12.4% increase compared to 2007, due mainly to increased levels of activity by the semi-submersible platform Scarabeo 3, the jack-up Perro Negro 2, the start of operations of the jack-up Perro Negro 7, as well as to higher contractual rates.
- Operating profit for 2008 amounted to €172 million, compared to €140 million in 2007, with margins increasing from 33.3% to 36.4%. EBITDA stood at 50.4% compared to 47.6% in 2007. This margin increase, both absolute and in terms of profitability, is due to higher margins on rates and increased utilisation of rigs.

## Saipem wins US\$ 1.8 billion onshore contract in Algeria

*San Donato Milanese (Milan), 23 March 2009* – Saipem has been awarded a new onshore contract in Algeria worth approximately US\$ 1.8 billion.

Saipem has signed the lump sum turn key contract with the joint venture between Eni and the Algerian oil company Sonatrach for the treatment facilities of natural gas extracted from the Menzel Ledjmet East field and from the future developments of the CAFC (Central Area Field Complex). The contract encompasses the EPC (engineering, procurement and construction) of the natural gas gathering systems and processing plant and the related export pipelines. The facilities will provide a processing capacity of 350 million cubic feet of gas per day and of 35,000 barrels per day of liquids and will be located in the Berkine Basin, approximately 1,000 kilometres southeast of Algiers.

The contract is scheduled to be completed within 36 months.
