**Skanska to construct highway in Poland for PLN 468 M, or
about SEK 1.1 billion**

Washington, DC

Skanska has secured an order to construct a highway near Wroclaw, Poland. The contract value is PLN 468 M, or about SEK 1,130 M, which will be included in order bookings for the fourth quarter. The customer is the Polish Road Administration.

The assignment is for a 25-kilometer expansion of the S-8 highway, northeast of Wroclaw. The project comprises the new construction of about 20 kilometers of four-lane highway and the broadening of about five kilometers of existing road. The project includes traffic interchanges, 18 flyovers and 12 wildlife crossings. It also includes three and a half kilometers of noise barriers and fencing along the entire stretch.

On-site work will commence this autumn and will be completed by the second quarter of 2012.

Currently, Skanska is also working on two additional major road projects in the Wroclaw area. Construction is also in progress on the north-south A1 highway; conducted as a public-private partnership project. Skanska is active in the owner company and as a contractor. Skanska's share of the construction contract for A1 amounts to EUR 570 M.

Skanska Poland, one of the largest construction companies in the Poland, had sales of SEK 7.6 billion in 2008. The company has about 5,700 employees. In Poland also Skanska Commercial Development and Skanska Infrastructure Development are active.

⁴ Refers to Construction

January–September 2009 compared to January–September 2008

- Revenue amounted to SEK 102.2 (104.6) billion.
- Operating income for the Group amounted to SEK 3,914 M (4,013).
- Revenue in Construction decreased by 3 percent in Swedish kronor, and by 12 percent adjusted for currency rate effects.
- Operating margin in Construction increased to 3.8 (2.8) percent.
- Operating income in Construction increased by 33 percent and amounted to SEK 3,717 M (2,800).
- During the report period, Skanska sold commercial properties worth SEK 2,148 M (2,604), with capital gains totaling SEK 694 M (972).
- Income after financial items amounted to SEK 3,763 M (4,339).
- Profit for the period totaled SEK 2,747 M (3,167) and earnings per share amounted to SEK 6.59 (7.53).
- Operating cash flow before taxes, financing activities and dividends amounted to SEK 3,236 M (-1,283).
- Order bookings decreased by 4 percent and amounted to SEK 94.6 (98.9) billion. Adjusted for currency rate effects, order bookings decreased by 11 percent.
- Order backlog totaled SEK 131.8 (148.1) billion, equivalent to 12 (12) months of construction.

Comments from Skanska's President and CEO Johan Karlström:

- The third quarter showed very strong earnings in Construction, and margins continued to improve. Operating income in Construction during the first nine months of 2009 was about 33 percent higher than during the corresponding period of last year, and order bookings in local currencies during the third quarter rose by 8 percent compared to the third quarter of 2008. The strong improvement in operating margin was mainly due to improved risk management and project execution, which reduces the adverse impact of loss-making projects, and that a number of projects with good margins were completed or are in the process of completion. Sales and our administrative expenses are decreasing almost at the pace of the revenue decline.
- We have been very successful in selling both in completed and ongoing residential projects, which has also resulted in a sharp decline in the number of unsold residential units. The improved market situation means that we are now raising our ambition level when it comes to starting new projects.
- Despite weak general economic conditions, during the third quarter we continued to carry out commercial property divestments. As for new projects, we are following market conditions closely and remain very selective regarding project start-ups. In keeping with our strategy to broaden operations in the United States, we announced that we will launch our first commercial development project in Washington, D.C. shortly after the end of the quarter
- Although there are various indications that the economic cycle has passed its low point, the fact remains that the construction and real estate sector is late in the economic cycle and that total construction investments in Skanska's markets are continuing to decrease. This means that we anticipate continued revenue declines in Construction during 2010, primarily in the Nordic countries and the Czech Republic. A situation where the total market is shrinking also means more intense competition, resulting in pressure on tender margins.

Market outlook

Construction

European markets for building construction remain weak, both in residential and other private construction. Requests for new projects from private customers remain low as a proportion of overall building construction, although activity in the Nordic countries has increased somewhat, especially in residential construction. As for the British market, we expect reduced construction investments, with a reduced number of projects for which to tender for. The U.S. market is generally weak, but in some segments such as healthcare, education and public administration there is relatively good demand.

Civil construction markets, where the public sector represents a significantly higher proportion of customers, continue to show a relatively stable trend, since declining tax revenue at the local level is being offset to some extent by spending at the national level. We expect that the large government stimulus packages will have a positive impact on civil construction markets, especially in the U.S.

Residential Development

Housing markets are continuing to recover in Sweden and Norway, with a good pace of sales and a positive price trend. The housing market in Finland has also stabilized, but there is still a large proportion of unsold newly constructed residential units. In the Czech Republic and Slovakia, the markets remain weak.

Commercial Development

Vacancy rates in the Nordic and Central European office markets continue to increase, which also means a general squeeze on rent levels. Demand for high-volume retail space remains weak. Yield requirements by property investors, which rose during the first half of 2009, have now stabilized but investors remain very selective in choosing properties to invest in. Modern green properties in good locations with creditworthy tenants on long-term leases are the properties that investors are primarily interested in.

Infrastructure Development

The volume of public-private partnership (PPP) projects in the United Kingdom is still significant. In other markets, the supply of projects is more limited, although there is an interest in PPP solutions. The turbulence in financial markets has made financing more expensive and has led to delays in arranging it for new projects, but as financial markets recover, the prerequisites for reaching financial close in new projects have improved.

Order bookings and backlog in Construction, SEK bn

Order bookings

Order bookings decreased by 4 percent compared to the same period of last year, totaling SEK 94.6 (98.9) billion. Adjusted for currency rate effects, order bookings decreased by 11 percent. Order bookings were 4 (2) percent lower than revenue during the report period. During the period Skanska USA Civil's order bookings were SEK 6.3 billion, of which SEK 4.5 billion in the third quarter, which shows that increasing bidding activity is now also affecting order bookings.

Order bookings during the third quarter included about SEK 6.2 billion for Skanska Poland's construction contract related to the second phase of the A1 expressway in Poland. The same unit was also awarded an assignment to construct a section of the ring road around Poznan, Poland. Skanska's share of the project contract amounts to about SEK 890 M.

During the third quarter, Skanska USA Building was awarded its first contracts fully funded by the U.S. government's stimulus package. The assignment is for the renovation of two federal buildings and the contract value is about SEK 720 M. Skanska USA Building also secured an assignment to construct a new library at a university in Raleigh, North Carolina, with a contract amount of approximately SEK 610 M.

Skanska USA Civil was awarded a design/build contract for the reconstruction of the 11th Street Bridges and adjacent interchanges in Washington, D.C. Its share of the contract amounts to about SEK 1.4 billion. Skanska USA Civil also secured an assignment to renovate and widen the I-215 highway in San Bernardino, California, which is largely funded by the U.S. government's stimulus package. Skanska's share of the contract amount totals about SEK 660 M. Skanska USA Civil secured an additional assignment worth about SEK 840 M for construction of the Fulton Street Transit Center in lower Manhattan, New York City.

Skanska Sweden was contracted to expand the E45 highway into an expressway and to expand the railroad to two tracks on parts of the Bohus-Nödinge phase in western Sweden. The contract amounts to SEK 520 M.

Skanska Czech Republic was contracted to build a stretch of the R48 expressway in the Czech Republic. Skanska's share of the contract amounts to approximately SEK 560 M. In Slovakia, Skanska secured an assignment to construct a railroad tunnel, with its share of the contract totaling about SEK 540 M.

Skanska UK was awarded a contract to build a cancer clinic in London for University College Hospitals NHS Foundation Trust. The contract amount is approximately SEK 740 M. Skanska UK also secured an assignment to construct a railroad viaduct in London for about SEK 660 M.

Order backlog

Order backlog decreased by 11 percent and totaled SEK 131.8 (148.1) at the end of the third quarter. Adjusted for currency rate effects, it decreased by 9 percent. Order backlog was equivalent to about 12 (12) months of construction.

Revenue fell by 2 percent to SEK 102.2 (104.6) billion. Adjusted for currency rate effects, it decreased by 12 percent. Revenue in the Construction business stream decreased by 3 percent in Swedish kronor and by 12 percent in local currencies.

Operating income amounted to SEK 3,914 M (4,013). Currency rate effects increased operating income by SEK 297 M.

In the Construction business stream, operating income increased by 33 percent and amounted to SEK 3,717 M (2,800). The strong margin improvement was primarily due to improved risk management, which reduced the impact of projects writedowns. During the comparative period of 2008, Skanska made major project writedowns totaling about SEK 690 M, of which SEK 570 M in the United Kingdom, SEK 70 M in Norway and SEK 50 M in the Czech Republic. Operating margin increased to 3.8 (2.8) percent. Operating margin improved mainly at Skanska UK to 2.2 (-3.5) percent and Skanska Czech Republic to 4.3 (2.9) percent, mainly because of almost no project writedowns compared to earlier period. Skanska USA Building, Skanska USA Civil and Skanska Norway reported both higher operating income and higher operating margins. At Skanska Sweden and Skanska Poland, volume fell but operating margins remained at very good levels.

In Residential Development, operating income totaled SEK 60 M (353). The operating margin in this business stream amounted to 1.3 (6.7) percent. Income was adversely affected by lower volume and the fact that projects that had been written down during the fourth quarter of 2008 did not contribute appreciably. Sweden and the Czech Republic reported positive earnings, while other markets were negative. The weakest market was Finland, mainly due to a large oversupply of unsold apartments in the Finnish housing market. However, all Nordic housing markets improved gradually during the year.

Operating income in Commercial Development totaled SEK 710 M (829). Operating income in the business stream included capital gains from property divestments amounting to SEK 654 M (934). Of this, SEK 520 M (514) was attributable to ongoing projects that were divested ahead of completion. For these projects, Skanska applied the percentage of completion method of accounting. In the Group accounts, an additional SEK 40 M (38) is reported, from reversal of previously made intra-Group profit eliminations.

Operating income in the Infrastructure Development business stream totaled SEK -72 M (565). Earnings in the comparative period of 2008 included realized development gains totaling SEK 684 M from the sale of Skanska's stake in the Brazilian hydropower plant Ponte de Pedra.

Central expenses, including businesses that are being discontinued, totaled SEK -441 M (-500).

Net financial items amounted to SEK -151 M (326). For a more detailed break down of financial items, see page 10. Net interest income amounted to SEK 24 M (388). Capitalization of interest expenses in ongoing projects for Skanska's own account totaled SEK 58 M (151). The net change in the market value of financial instruments amounted to SEK -81 M (12). The deterioration in net interest income was primarily due to lower interest income on financial assets, a decrease in net

financial items on pension liabilities because of the increase in pension liabilities during 2008 and lower capitalized interest in ongoing projects. Other financial items totaled SEK -94 M (-74) and mainly consisted of currency rate differences.

Income after financial items amounted to SEK 3,763 M (4,339). Taxes for the period amounted to SEK -1,016 M (-1,172), equivalent to a tax rate of about 27 (27) percent. Profit for the period totaled SEK 2,747 M (3,167). Earnings per share for the period amounted to SEK 6.59 (7.53).

Investments and divestments

SEK M	Jan-Sep 2009	Jan-Sep 2008	Jul-Sep 2009	Jul-Sep 2008
Investments	-6,275	-9,840	-1,473	-2,540
Divestments	5,526	7,301	1,468	1,712
Net investments ¹	-749	-2,539	-5	-828
1 Of which strategic investments/divestments	-49	-6	-44	-5

In the Construction business stream, investments totaled SEK -1,584 M (-1,936). This item was mainly related to investments in property, plant and equipment for Skanska's own construction and manufacturing. Net investments in Construction amounted to SEK -1,157 M (-1,213). During the period, depreciation of property, plant and equipment totaled SEK -1,056 M (-960).

In Residential Development, investments totaled SEK -2,109 M (-3,420), including about SEK -432 M related to acquisitions of land equivalent to about 1,200 building rights. Of this SEK 432 M, SEK 206 M was related to an intra-Group purchase from Commercial Development. Divestments amounted to SEK 2,877 M (2,733). Net divestments in Residential Development amounted to SEK 768 M (-687).

In Commercial Development, investments decreased to SEK -2,486 M (-4,381), including SEK 189 M related to investments in land. Divestments in the form of sale of completed properties, ongoing projects and shares totaled SEK 2,356 M (2,640). Of this SEK 2,356 M, SEK 206 M was related to an intra-Group sale to Residential Development. Net investments in Commercial Development amounted to SEK -130 M (-1,741).

Investments in Infrastructure Development amounted to SEK -292 M (-101) and divestments SEK 55 M (1,212). During the comparative period, Skanska divested its stake in the Ponte de Pedro hydropower project. Net investments in Infrastructure Development totaled SEK -237 M (1,111).

The Group's total investments amounted to SEK -6,275 M (-9,840). Divestments amounted to SEK 5,526 M (7,301) and the Group's net investments were SEK -749 M (-2,539).

Operating cash flow and changes in interest-bearing net receivables

SEK M	Jan-Sep 2009	Jan-Sep 2008	Jul-Sep 2009	Jul-Sep 2008

Translation differences, net receivables/net debt	-806	396	-490	445
Change in pension liability	90	-1,811	177	-1,132
Reclassification, interest-bearing net receivables/net debt	9	0	0	-4
Other changes, interest-bearing net receivables/net debt	-154	-99	-15	-43
Change in interest-bearing net receivables	-1,273	-7,673	2,026	-662
1 of which repurchases of shares	-203	-263	-141	-70

Cash flow before taxes, financing operations and dividends amounted to SEK 3,236 M (-1,283).

In Construction, cash flow totaled SEK 3,387 M (1,060). This strong cash flow was explained in part by positive effects related to the financial close and start-up of the A1 expressway in Poland and the M25 orbital road in the United Kingdom, and in part by further improvement in working capital efficiency, especially at Skanska Sweden and Skanska USA Civil.

In Residential Development, cash flow amounted to SEK 247 M (-1,215). Netdivestments explained the positive cash flow. In Commercial Development, cash flow from business operations totaled SEK 354 M (-1,527). This stronger cash flow was mainly due to decreased net investments. In Infrastructure Development, cash flow amounted to SEK -229 M (1,006), where the strong cash flow in the comparative period were due to payment for the sale of Skanska's stake in the Ponte de Pedro hydropower plant in Brazil.

Skanska's taxes paid amounted to SEK -965 M (-1,632). Dividends, repurchases of shares and adjustments of non-controlling interests totaled SEK -2,395 M (-3,725). Cash flow before changes in interest-bearing receivables and liabilities amounted to SEK -412 M (-6,159). The change in pension liability in defined benefit plans amounted to SEK 90 M (-1,811). The change in interest-bearing net receivables totaled SEK -1,273 M (-7,673).

Financial position

Skanska has a strong financial position, with interest-bearing net receivables of SEK 8.0 billion (December 31, 2008: 9.2) and an unutilized long-term credit facility of SEK 7.7 billion that runs through June 2014. Interest-bearing loans plus interest-bearing pensions and provisions totaled SEK 6.4 billion (Dec. 31, 2008: 5.9). Of this amount, "Interest-bearing pensions and provisions" totaled SEK 2.9 billion (Dec. 31, 2008: 3.2).

At the end of the period, capital employed amounted to SEK 25.7 billion (Dec. 31, 2008: 25.2).

The equity of the Group totaled SEK 19.3 billion (Dec 31, 2008: 19.2). The net debt/equity ratio amounted to -0.4 (Dec. 31, 2008: -0.5), and the equity/assets ratio was 23.1 (Dec 31, 2008: 23.1) percent.

Total assets in the consolidated statement of financial position amounted to SEK 83.4 billion (Dec 31, 2008: 83.5). Due to currency rate effects, total assets decreased by SEK 2.3 billion.

The carrying amount of current-asset properties totaled SEK 19.0 billion (Dec 31, 2008: 18.6), of which Commercial Development current-asset properties accounted for SEK 10.1 billion (Dec 31, 2008: 9.6). See the table on page 19.

Surplus value in project development business streams about SEK 10 billion

The underlying assumptions that are used in the calculation of market values are based on the review of market values performed in conjunction with the annual financial statements dated December 31, 2008.

The appraisal of the market value of land in Residential Development showed surplus values of about SEK 1 billion.

The appraisal of market values in Commercial Development showed surplus values of about SEK 1.9 billion. For ongoing projects, Skanska reported accrued market value, which is defined as the carrying amount at the end of the year plus estimated surplus value upon completion multiplied by the degree of completion and the percentage of pre-leasing. See page 19 for details.

At the end of the period, the market values in Infrastructure Development showed surplus values at the Group level of SEK 7.2 billion. This is approximately SEK 0.8 billion lower than at the end of Q2. This change was mainly due to currency rate effects and the strengthening of the Swedish krona reduced the surplus value with SEK 1,1 billion during the third quarter. See page 20 for more details.

Exchange rates for the most important currencies

SEK	Average exchange rates		Exchange rates on the balance sheet date

Personnel

The average number of employees in the Group was 54,401 (58,500).

Parent Company

Net sales in the Parent Company during the period January-September were SEK 0 M (0). Operating income amounted to SEK -288 M (-278). Income after financial items totaled SEK 2,171 M (2,583). The average number of employees in the Parent Company was 81 (80).

Accounting principles

For the Group, this interim report has been prepared in compliance with IAS 34, "Interim financial reporting," the Annual Accounts Act and Securities Market Act. For the Parent Company, the interim report has been prepared in compliance with the Annual Accounts Act and the Securities Market Act, which is pursuant to the Swedish Financial Reporting Board's Recommendation RFR 2.2. Aside from presentation changes in compliance with IAS 1, the accounting principles for the Parent Company and the Group are unchanged compared to the most recently published Annual Report. Figures in tables are rounded off. The introduction of IFRS 8 has not caused any change in the Group's segment reporting.

Transactions with related parties

No transactions between Skanska and related parties having an essential effect on the Company's position and earnings have taken place.

Essential risks and uncertainty factors

The construction business is largely about risk management. Practically every project is unique. Size, shape, environment – everything varies for each new assignment. The construction industry varies in this way from typical manufacturing that operates in permanent facilities with long production runs.

In Skanska's operations there are many types of contractual mechanisms. The degree of risks associated with prices of goods and services varies greatly, depending on the contract type. Sharp increases in prices of materials may pose a risk, especially in long projects with fixed-price commitments. Shortages of human resources as well as certain input goods may potentially have an adverse impact on operations. Delays in the design phase or changes in design are other circumstances that may adversely affect projects.

To ensure a systematic and uniform assessment of construction projects, Skanska uses a common model for identifying and managing risks throughout the Group. With the help of this model, Skanska evaluates construction projects continuously, from tender preparations to completion of the assignment, with regard to technical, legal and financial risks.

For further information about risks and a description of key estimates and judgments, see the Report of the Directors and Notes 2 and 6 in the Annual Report for 2008 as well as the above section on the market outlook.

Other matters

Repurchases of shares

At its meeting on May 5, the Board of Directors decided to exercise its authorization by the Annual Shareholders' Meeting to repurchase shares on the following conditions. On one or more occasions, however no longer than until the 2010 Annual Shareholders' Meeting, a maximum of 4,500,000 Series B shares may be acquired for the purpose of securing delivery of shares to participants in the Skanska Employee Ownership Program. Acquisitions may only be made on the NASDAQ OMX Stockholm Exchange at a price within the applicable range of prices at any given time, meaning the interval between the highest purchase price and the lowest selling price. During the third quarter, 1,466,000 shares were repurchased in accordance with the authorization of the Annual Shareholders' Meeting, which means that a total of 2,210,000 shares have been repurchased within the framework of this authorization.

Events after the end of the report period

Skanska launches commercial property development business in the US

Skanska is expanding its operations in the Commercial Development business stream to selected cities in the US. The first project will be initiated in central Washington, D.C. The investment is expected to amount to USD 85 M. The project is related to an office building of about 16,000 square meters (172,000 sq.ft.) of floor space. Construction work is scheduled to commence during the fourth quarter of 2009 and the building is expected to be completed during the latter half of 2011.

Financial reports related to 2009

Skanska's interim reports as well as the Year-end Report are available for downloading on Skanska's website, www.skanska.com, and can also be ordered from Skanska AB, Investor Relations.

The Group's remaining report related to the financial year 2009 will be published on the following date:

February 5, 2010 Year-end Report

Solna, November 5, 2009

JOHAN KARLSTRÖM
President and CEO

Auditors' Review Report concerning this interim report

Introduction

We have reviewed the interim report for Skanska AB (publ) as of September 30, 2009 and the nine month period ending on this date. The Board of Directors and the President and CEO are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Swedish Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

The focus and scope of the review

We conducted our review in accordance with the Standard on Review Engagements (SÖG) 2410, *Review of the Interim Financial Information Performed by the Independent Auditor of the Entity*. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, performing an analytical examination and applying other review procedures. A review has a different focus and is substantially less in scope than an audit conducted according to Standards on Auditing in Sweden (RS) and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Accordingly, the conclusion expressed based on a review does not constitute the same level of assurance as a conclusion based on an audit.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report, in all material respects, is not prepared for the Group in accordance with IAS 34 and the Swedish Annual Accounts Act and for the Parent Company in accordance with the Swedish Annual Accounts Act.

Note, Contingent Liabilities

Contingent liabilities amounted to SEK 22.7 bn on Sep 30, 2009 (Dec 31, 2008: 7.6). During the period contingent liabilities increased by SEK 15.1 bn. The increase was partly due Skanska's to the participation in road consortia in Great Britain and Poland.

Operating segments

Skanska's business streams are reported as operating segments: Construction, Residential Development, Commercial Development and Infrastructure Development.

These business streams coincide with Skanska's operational organization and the way in which the Senior Executive Team monitors Group operations. The Senior Executive Team also constitutes Skanska's "chief operating decision maker".

Each operating segment carries out distinct types of operations with different risks. The Construction segment includes both building and civil construction.

Residential Development develops residential projects for immediate sale. Housing units are adapted to selected customer categories. Its units are responsible for planning and selling the projects. The construction assignments are performed by construction units in Skanska's Construction business stream in each respective market.

Commercial Development initiates, develops, leases and divests commercial real estate projects. Its project development focuses on office space, retail and logistics properties located in Stockholm, Gothenburg, the Öresund region, Helsinki, Prague, Ostrava, Budapest, Warsaw and selected regional centers in Poland. The construction assignments are performed in most markets by Skanska's Construction segment.

Infrastructure Development specializes in identifying, developing and investing in privately financed infrastructure projects, for example roads, hospitals and power generating plants. The business stream focuses on creating new project opportunities primarily in those markets where the Group has operations. The construction assignments are performed in most markets by Skanska's construction units.

Intra-Group pricing between the operating segments occurs on market conditions.

There are no assets in the operating segments that are affected by material changes, compared to the latest Annual Report. Their accounting principles coincide with those of the consolidated financial statements.

¹ Development gain only. Construction margin reported under Construction.

² Rolling 12 months

At the end of the third quarter, there were 2,809 (5,919) residential units under construction. Of these, 67 (63) percent were sold. The number of completed unsold residential units totaled 479 (421), of which 294 in Finland. During the period, construction started on 388 (2,586) units. In the Nordic countries, the number of residential units started was 267 (1,820) – of which 258 were in Sweden – while in the Czech Republic they totaled 121 (766). The number of residential units sold during the period was 1,649 (2,013). In the Nordic countries, the number of units sold totaled 1,446 (1,460), while sales in the Czech Republic totaled 203 (553) units.

The carrying amount of current-asset properties in Residential Development totaled SEK 7.2 billion (Dec 31, 2008: 7.7). A breakdown of the carrying amount can be seen in the table below. The carrying amount of undeveloped land and development properties was SEK 5.8 billion. This was equivalent to building rights for about 21,100 residential units and about 2,200 building rights in associated companies. In addition, the business stream was entitled to purchase about 10,400 more building rights under certain conditions.

Breakdown of carrying amount, current-asset properties, September 30, 2009

Commercial Development has 16 projects underway, 13 of them in the Nordic countries. Ongoing projects represented leasable space of about 234,000 sq. m (2.48 million sq. ft.) and had an occupancy rate of 83 percent, measured in rent. At the end of the period, the carrying amount for ongoing projects was SEK 4.1 billion (Dec 31, 2008: 3.3). Their carrying amount upon completion is expected to total SEK 5.4 billion, with an estimated market value of SEK 6.1 billion, of which SEK 4.5 billion was accrued at the end of the period. The degree of completion in ongoing projects was about 78 percent.

The carrying amount of Skanska's portfolio of completed projects amounted to SEK 3.6 billion (Dec 31, 2008: 3.8), with an estimated market value, based on an appraisal dated December 2008, of SEK 4.8 billion (Dec 31, 2008: 5.1). The occupancy rate, measured in rent, amounted to 92 percent (Dec 31, 2008: 94).

The carrying amount of Skanska's undeveloped land and development properties (building rights) totaled about SEK 2.4 billion (Dec 31, 2008: 2.5), with an estimated market value of SEK 2.7 billion.

Value creation, which is defined as accrued development gains minus the cost of the project development organization, amounted to SEK 438 M (1,088) during the twelve month period October 2008 – September 2009.

At the end of the report period, accumulated eliminations of intra-Group project gains amounted to SEK 330 M (Dec 31, 2008: 294). These eliminations are reversed as each respective project is divested.

Infrastructure Development

SEK bn	Sep 30	Jun 30	Dec 31
	2009	2009	2008
Present value of cash flow from projects	10.4	11.4	8.4
Present value of remaining investments	-1.2	-1.3	-0.6
Net present value of projects	9.2	10.1	7.8
Carrying amount	-2.3	-2.4	-2.0
Unrealized development gain Skanska ID	6.9	7.7	5.8
Group eliminations	0.3	0.3	0.2
Unrealized development gain, Group	7.2	8.0	6.0

At the end of the period, the carrying amount of shares, participations, subordinated receivables and concessions in Infrastructure Development totaled about SEK 2.3 billion (Dec 31, 2008: 2.0). Remaining investment obligations related to ongoing Infrastructure Development projects nominally amounted to about SEK 1.4 billion (Dec 31, 2008: 0.7), with a present value of about SEK 1.2 billion (Dec 31, 2008: 0.6). At the Group level, Skanska eliminates gains from Construction equivalent to Skanska's ownership in projects. Altogether, these eliminations totaled about SEK 0.3 (0.2) billion at the end of the period. These eliminations are reversed as projects are divested. At the end of the period, unrealized development gains at the Group level totaled about SEK 7.2 (6.0) billion. The increase in unrealized development gains consisted mainly of the investments in the M25 orbital road in the United Kingdom and the A1 expressway in Poland and time value effects in appraisal of future cash flows. A reduction in the unrealized development gain during the third quarter was mainly coming from currency rate effects, primarily the strengthening of the Swedish krona, which reduces the unrealized development gain by SEK 1.1 billion.

Five-year Group financial summary

	Sep 30 2009	Sep 30 2008	Sep 30 2007	Sep 30 2006	Sep 30 2005

SKANSKA

Press Release

November 4, 2009
08:30 am CET

Skanska to construct UK school for GBP 28 M, or approximately SEK 310 M

Skanska has been awarded the contract to construct Belfairs High School in Leigh-on-Sea, Essex, northeast of London. The contract amounts to GBP 28 M, or approximately SEK 310 M, and will be included in fourth-quarter order bookings. The customer is Southend-on-Sea Borough Council and the scheme is funded by the Government's Department for Children Schools and Families.

Skanska will be responsible for the structural design and construction of an 11,000 square meter school building that will accommodate 1,300 students from years 7-13 (11-18 year olds). In addition, the new facility will provide specialist Catering and Motor Mechanics facilities as well as provision for Adult Education. The assignment includes mechanical and electrical installations, an IT system, piling work and other site engineering and some refurbishment work to existing buildings.

Construction work will commence immediately and is scheduled for completion in summer 2011, ready for the start of the new school year.

Skanska UK reported revenues of SEK 17.9 billion in 2008, with about 4,800 employees. The company is active in building and civil construction, utilities and building services. Skanska is also a leader in the British program for private public partnerships, PFI (Private Finance Initiative).

Skanska AB may be required to disclose the information provided herein pursuant to the Securities Markets Act.

Skanska is one of the world's leading project development and construction groups with expertise in construction, development of commercial and residential projects and public-private partnerships. The Group currently has 55,000 employees in selected home

markets in Europe, in the US and Latin America. Headquartered in Stockholm, Sweden and listed on the Stockholm Stock Exchange, Skanska's sales in 2008 totaled SEK 144 billion.

Skanska is a leading provider of construction services and solutions, offering a wide range of services including project management, construction management, and general contracting. The company operates in various sectors, including infrastructure, commercial buildings, and industrial facilities. Skanska's global presence is supported by a strong network of regional offices and a commitment to innovation and sustainability. The company's financial performance is closely monitored, and it maintains a strong reputation for reliability and quality in the construction industry.

Skanska's operations are divided into several key areas, each with its own set of challenges and opportunities. The company's focus on sustainable construction practices and its commitment to social responsibility are key differentiators in the market. Skanska's extensive experience and expertise in project management and construction management have enabled it to successfully complete a wide range of complex projects across the globe.

The company's financial performance in 2008 was strong, reflecting its solid operational performance and effective risk management. Skanska's sales of SEK 144 billion were a testament to its global reach and the demand for its services. The company's strong financial position and commitment to innovation ensure its continued success in the construction industry.

Skanska's commitment to sustainability and social responsibility is a core part of its business strategy. The company is dedicated to reducing its carbon footprint, promoting energy efficiency, and supporting local communities. Skanska's focus on these areas is not only a moral imperative but also a key driver of its long-term success and competitive advantage.

Skanska's global presence and strong network of regional offices enable it to provide high-quality services and solutions to clients worldwide. The company's commitment to innovation and sustainability ensures that it remains at the forefront of the construction industry, ready to meet the challenges and opportunities of the future.

SKANSKA**Press Release**

October 27, 2009
15:30 pm CET

**Invitation to presentation of Skanska's
Nine Month Report on November 5**

Skanska's Nine Month Report 2009 will be presented on Thursday, November 5, 2009. In conjunction with the release of the report, you are invited to participate in a combined press- and telephone conference, at 11.00 am (UK 10.00 am, US Eastern 05.00 am). The press- and telephone conference will be held at Spårvagnshallarna, Birger Jarlsgatan 57 A in Stockholm.

Johan Karlström, Skanska's President and CEO, and Hans Biörck, EVP and CFO, will present the report and thereafter respond to questions.

To participate in the press conference, please contact marianne.bergstrom@skanska.se, no later than Wednesday, November 4.

The press conference will be webcast live at www.skanska.com/investors, where also a recording of the conference will be available.

To participate in the telephone conference, please dial +46 (0)8 505 598 53, or +44 (0) 203 043 24 36, or +1 866 458 40 87.

After the conference there will be possibilities for individual meetings with Johan Karlström and Hans Biörck. To apply for a meeting please contact serhat.ok@skanska.se no later than November 4.

If you have any practical questions regarding the webcast or the telephone conference, please contact Serhat Ok, tel +46 10 448 64 37 or by mail to serhat.ok@skanska.se.

Welcome!
