STATEMENT OF FINANCIAL CONDITION
AS OF NOVEMBER 30, 2008
AND
INDEPENDENT AUDITORS' REPORT
AND
SUPPLEMENTAL REPORT ON INTERNAL CONTROL

Filed pursuant to Rule 17a-5(e)(3)
under the Securities Exchange Act of 1934
as a PUBLIC DOCUMENT

INDEPENDENT AUDITORS' REPORT

To the Board of Directors of
Prime Dealer Services Corp.

We have audited the accompanying statement of financial condition of Prime Dealer Services Corp. (the "Company") as of November 30, 2008, that you are filing pursuant to Rule 17a-5 under the Securities Exchange Act of 1934. This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, such statement of financial condition presents fairly, in all material respects, the financial position of Prime Dealer Services Corp. at November 30, 2008, in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP

PRIME DEALER SERVICES CORP.
NOTES TO STATEMENT OF FINANCIAL CONDITION
November 30, 2008
(In thousands of dollars)

Note 1 - Introduction and Basis of Presentation

The Company

Prime Dealer Services Corp. (the "Company") is a wholly owned subsidiary of Morgan Stanley & Co. Incorporated ("MS&Co."), which is a wholly owned subsidiary of Morgan Stanley (the "Parent"). The Company is registered with the Securities and Exchange Commission ("SEC") as a broker-dealer and is primarily engaged in the borrowing and lending of securities.

Basis of Financial Information

The statement of financial condition is prepared in accordance with accounting principles generally accepted in the U.S., which require the Company to make estimates and assumptions regarding the valuation of certain financial instruments, tax and other matters that affect the statement of financial condition and related disclosures. The Company believes that the estimates utilized in the preparation of the statement of financial condition are prudent and reasonable. Actual results could differ materially from these estimates.

Related Party Transactions

At November 30, 2008, the Company had securities borrowed and securities received as collateral transactions of \$3,332,777 and \$4,766,396, respectively, all of which relates to collateral received from affiliates. Receivables from affiliates relate primarily to a receivable from MS&Co. due to the unwinding of securities borrowed. Payables to affiliates relate primarily to income taxes paid by the Parent on behalf of the Company. Payables to affiliates also include \$3,710 of unpaid interest expense associated with this payable. The Company paid a dividend totaling \$50,000 to MS&Co. on January 11, 2008.

Note 2 - Summary of Significant Accounting Policies

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and highly liquid investments not held for resale with maturities, when purchased, of three months or less.

Cash Deposited With Clearing Organization

Cash deposited with clearing organization represents cash deposited with the Options Clearing Corporation.

Financial Instruments and Fair Value

Securities received as collateral and obligation to return securities received as collateral are measured at fair value. A description of the Company's policies regarding fair value measurement and its application follows.

Fair Value Option

The Company adopted the provisions of Statement of Financial Accounting Standards ("SFAS") No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities" ("SFAS No. 159") effective December 1, 2006. SFAS No. 159 provides entities the option to measure certain financial assets and financial liabilities at fair value with changes in fair value recognized in earnings each period. SFAS No. 159 permits the fair value option election on an instrument-by instrument basis at initial recognition of an asset or liability or upon an event that gives rise to a new basis of accounting for that instrument. The Company has not elected to apply the fair value option to any financial assets and liabilities at November 30, 2008.

Fair Value Measurement – Definition and Hierarchy

The Company adopted the provisions of SFAS No. 157, "Fair Value Measurements" ("SFAS No. 157"), effective December 1, 2006. Under this standard, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the "exit price") in an orderly transaction between market participants at the measurement date.

In determining fair value, the Company uses various valuation approaches. SFAS No. 157 establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the Company. Unobservable inputs are inputs that reflect the Company's assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the reliability of inputs as follows:

- Level 1 -- Valuations based on quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Valuation adjustments and block discounts are not applied to Level 1 instruments. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these products does not entail a significant degree of judgment.
- Level 2 -- Valuations based on one or more quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.
- Level 3 -- Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The availability of observable inputs can vary from product to product and is affected by a wide variety of factors, including, for example, the type of product, whether the product is new and not yet established in the marketplace, the liquidity of markets and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly,

the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3.

The Company uses prices and inputs that are current as of the measurement date, including during periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from Level 1 to Level 2 or Level 2 to Level 3 (See Note 3).

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Valuation Techniques

Many cash and over-the counter (“OTC”) contracts have bid and ask prices that can be observed in the marketplace. Bid prices reflect the highest price that a party is willing to pay for an asset. Ask prices represent the lowest price that a party is willing to accept for an asset. For financial instruments whose inputs are based on bid-ask prices, the Company does not require that fair value estimate always be a predetermined point in the bid-ask range. The Company’s policy is to allow for mid-market pricing and adjusting to the point within the bid-ask range that meets the Company’s best estimate of fair value. For offsetting positions in the same financial instrument, the same price within the bid-ask spread is used to measure both long and short positions.

Fair value for some cash and OTC contracts is derived primarily using pricing models. Pricing models take into account the contract terms (including maturity) as well as multiple inputs including, where applicable, commodity prices, equity prices, interest rate yield curves, credit curves, correlation creditworthiness of the counterparty, option volatility and currency rates. Where appropriate, valuation adjustments are made to account for various factors such as liquidity risk (bid-ask adjustments), credit quality, concentration risk and model risk. These adjustments are subject to judgment, are applied on a consistent basis and are based upon observable inputs where available. The Company generally subjects all valuations and models to a review process initially and on a periodic basis thereafter.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company’s own assumptions are set to reflect those that the Company believes market participants would use in pricing the asset or liability at the measurement date.

See Note 3 for a description of valuation techniques applied to the major categories of assets and liabilities measured at fair value.

Income Taxes

Income taxes are provided using the asset and liability method, under which deferred tax assets and liabilities are determined based upon the temporary differences between the financial statement and income tax bases of assets and liabilities using currently enacted tax rates.

Accounting Developments

In July 2006, the Financial Accounting Standards Board (“FASB”) issued FASB Interpretation No. 48, “Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109” (“FIN 48”). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company’s financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in an income tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The adoption of FIN 48 on December 1, 2007 did not have an impact on the Company’s statement of financial condition.

On October 10, 2008, the FASB issued the FSP FAS 157-3, “Determining Fair Value of a Financial Asset When the Market for That Asset Is Not Active” (FSP FAS 157-3). FSP FAS 157-3 clarifies the application of SFAS 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial instrument when the market for that financial asset is not active. The immediate adoption of FSP FAS 157-3 did not have a material impact on the Company’s statement of financial condition.

Note 3 – Fair Value Disclosures

The Company’s assets and liabilities recorded at fair value have been categorized based upon a fair value hierarchy in accordance with SFAS No. 157. See Note 2 for a discussion of the Company’s policies regarding this hierarchy.

A description of the valuation techniques applied to the Company’s major categories of assets and liabilities measured at fair value on a recurring basis follows.

Securities received as collateral and obligation to return securities received as collateral

Securities received as collateral and obligation to return securities received as collateral are generally valued based on quoted market prices and are categorized in Level 1 of the fair value hierarchy. A portion of the securities received as collateral and obligation to return securities received as collateral are valued using pricing models or based on inputs that are unobservable and are categorized in Level 2 and Level 3 of the fair value hierarchy, respectively.

The following fair value hierarchy table presents information about the Company’s assets and liabilities measured at fair value on a recurring basis as of November 30, 2008:

Assets and Liabilities Measured at Fair Value on a Recurring Basis as of November 30, 2008

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of November 30, 2008
Assets				
Securities received as collateral	\$ 3,992,466	\$ 759,402	\$ 14,528	\$ 4,766,396
Liabilities				
Obligation to return securities received as collateral	\$ 3,992,466	\$ 759,402	\$ 14,528	\$ 4,766,396

Note 4 – Collateralized Transactions

Securities borrowed and securities loaned are carried at the amount of cash collateral advanced and received in connection with the transactions.

The Company enters into securities borrowed and securities loaned transactions to accommodate customers' needs. Under securities borrowed transactions, the Company receives collateral in the form of securities, which in many cases can be sold or repledged. The Company uses this collateral to enter into securities lending transactions. At November 30, 2008, the fair value of securities received as collateral where the Company is permitted to sell or repledge the securities was \$8,099,173, of which \$7,643,991 had been repledged.

The Company receives securities as collateral in connection with certain securities for securities transactions in which the Company is the lender. In instances where the Company is permitted to sell or repledge these securities, the Company reports the fair value of the collateral received and related obligation to return the collateral in the statement of financial condition. At November 30, 2008, \$4,766,396 was reported as securities received as collateral and obligation to return securities received as collateral in the statement of financial condition, \$4,311,214 of which had been repledged.

The Company manages credit exposure arising from securities borrowed and securities loaned transactions by, in appropriate circumstances, entering into master netting agreements and collateral arrangements with counterparties that provide the Company, in the event of a customer default, the right to liquidate collateral and the right to offset counterparty's rights and obligations. The Company also monitors the fair value of the underlying securities as compared with the related receivable or payable, including accrued interest, and, as necessary, requests additional collateral to ensure such transactions are adequately collateralized. Where deemed appropriate, the Company's agreements with third parties specify its rights to request additional collateral.

Note 5 – Contingencies

There are no pending legal actions, including arbitrations, class actions and other litigation, arising in connection with the Company's activities as a global diversified financial services institution. Legal reserves are established in accordance with SFAS No. 5, "Accounting for Contingences". Once established, reserves are adjusted when there is more information available or when an event occurs requiring a change. There are no legal reserves in the statement of financial condition as of November 30, 2008.

Note 6 - Risk Management

The Company's risk management policies and related procedures are integrated with those of the Parent and its other consolidated subsidiaries. These policies and related procedures are administered on a coordinated global basis with consideration given to each subsidiary's, including the Company's, specific capital and regulatory requirements. For the discussion which follows, the term "Company" includes the Parent and its subsidiaries.

The cornerstone of the Company's risk management philosophy is the execution of risk adjusted returns through prudent risk-taking that protects the Company's capital base and franchise. The Company's risk management philosophy is based on the following principles: comprehensiveness,

independence, accountability, defined risk tolerance and transparency. Given the importance of effective risk management to the Company's reputation, senior management requires thorough and frequent communication and appropriate escalation of risk matters.

Risk management at the Company requires independent Company-level oversight, accountability of the Company's businesses, constant communication, judgment, and knowledge of specialized products and markets. The Company's senior management takes an active role in the identification, assessment and management of various risks at both the Company and business level. In recognition of the increasingly varied and complex nature of the global financial services business, the Company's risk management philosophy, with its attendant policies, procedures and methodologies, is evolutionary in nature and subject to ongoing review and modification.

The nature of the Company's risks, coupled with this risk management philosophy, informs the Company's risk governance structure. The Company's risk governance structure includes the Firm Risk Committee, the Chief Risk Officer, the Internal Audit Department, independent control groups and various risk control managers, committees and groups located within and across the business.

The Firm Risk Committee, composed of the Company's most senior officers, oversees the Company's risk management structure. The Firm Risk Committee's responsibilities include oversight of the Company's risk management principles, procedures and limits, and the monitoring of material market, credit, liquidity and funding, legal, operational and franchise risks and the steps management has taken to monitor and manage such risks. The Firm Risk Committee is overseen by the Audit Committee of the Board of Directors (the "Audit Committee").

The Chief Risk Officer, a member of the Firm Risk Committee, who reports to the Chief Executive Officer, oversees compliance with Company risk limits; approves certain excessions of Company risk limits; reviews material market, credit and operational risks; reviews results of risk management processes with the Audit Committee.

The Internal Audit Department provides independent risk and control assessment and reports to the Audit Committee and administratively to the Chief Legal Officer. The Internal Audit Department examines the Company's operational and control environment and conducts audits designed to cover all major risk categories.

The Market Risk, Credit Risk, Operational Risk, Financial Control, Treasury and Legal and Compliance Departments (collectively, the "Company Control Groups"), which are all independent of the Company's business units, assist senior management and the Firm Risk Committee in monitoring and controlling the Company's risk through a number of control processes. The Company is committed to employing qualified personnel with appropriate expertise in each of its various administrative and business areas to implement effectively the Company's risk management and monitoring systems and processes.

In the normal course of business, the Company enters into transactions whereby various securities are borrowed from/loaned to counterparties in exchange for collateral. Credit risk occurs when the fair value of the underlying securities borrowed falls below the collateral pledged by the Company or when the fair value of the securities loaned rises above the collateral received by the Company.

The Company seeks to limit credit risk (as well as concentrations of credit risk) created in its business through the use of various control policies and procedures. The Company measures the fair

value of the securities borrowed and loaned against the respective collateral amounts on a daily basis and requests additional collateral when deemed necessary.

Note 7 - Income Taxes

The Company is included in the consolidated federal income tax return filed by the Parent. Federal income taxes have been provided on a separate entity basis. The Company is included in the combined state and local income tax returns with the Parent and certain other subsidiaries of the Parent. State and local income taxes have been provided on separate entity income at the effective tax rate of the Company's combined filing group.

In accordance with the terms of the Tax Allocation Agreement with the Parent, all current and deferred taxes are offset with all other intercompany balances with the Parent.

Income Tax Examinations

The Company is under continuous examination by the Internal Revenue Service (the "IRS") and other state tax authorities in certain states in which the Company has significant business operations, such as New York. The IRS authorities are scheduled to conclude the fieldwork portion of their examination in the second half of 2009. The Company regularly assesses the likelihood of additional assessments in each of the taxing jurisdictions resulting from these and subsequent years' examinations. The Company believes that the resolution of tax matters will not have a material effect on the statement of financial condition of the Company.

The following are the major tax jurisdictions in which the Company operates and the earliest tax year subject to examination:

<u>Jurisdiction</u>	<u>Tax Year</u>
United States	1999
New York State and City	2002

Note 8 - Regulatory Requirements

The Company is a registered broker-dealer and, accordingly, is subject to the net capital rules of the SEC and the Financial Industry Regulatory Authority. Under these rules, the Company has elected to compute its net capital requirement in accordance with the "Alternative Net Capital Requirement," which specifies that net capital shall not be less than 2% of aggregate debit items arising from customer transactions or \$250, whichever is greater. At November 30, 2008, the Company's net capital, as defined under such rules, was \$80,003, which exceeded the minimum requirement by \$79,753.

Advances to affiliates, dividend payments and other equity withdrawals are subject to certain notification and other provisions of the net capital rules of the SEC.

The Company is exempt from the provisions of Rule 15c3-3 under the Securities Exchange Act of 1934 in that the Company's activities are limited to those set forth in the conditions for exemption appearing in paragraph (k)(2)(ii) of the Rule.

Note 9 – Subsequent Event

On December 16, 2008, the Board of Directors of Morgan Stanley approved a change in the firm's fiscal year end from November 30 to December 31 of each year. This change in the calendar year reporting cycle will begin January 1, 2009. As a result, the Company will include December 2008 in the results for the thirteen month period ending December 31, 2009.

January 27, 2009

Prime Dealer Services Corp.
1221 Avenue of the Americas
New York, NY 10020

In planning and performing our audit of the financial statements of Prime Dealer Services Corp. (the "Company") as of and for the year ended November 30, 2008 (on which we issued our report dated January 27, 2009), in accordance with auditing standards generally accepted in the United States of America, we considered the Company's internal control over financial reporting ("internal control") as a basis for designing our auditing procedures for the purpose of expressing an opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Also, as required by Rule 17a-5(g)(1) of the Securities and Exchange Commission (the "SEC"), we have made a study of the practices and procedures followed by the Company, including consideration of control activities for safeguarding securities. This study included tests of compliance with such practices and procedures that we considered relevant to the objectives stated in Rule 17a-5(g) in making the periodic computations of aggregate debits and net capital under Rule 17a-3(a)(11) and for determining compliance with the exemptive provisions of Rule 15c3-3. We did not review the practices and procedures followed by the Company in making the quarterly securities examinations, counts, verifications, and comparisons, and the recordation of differences required by Rule 17a-13 or in complying with the requirements for prompt payment for securities under Section 8 of Federal Reserve Regulation T of the Board of Governors of the Federal Reserve System, because the Company does not carry securities accounts for customers or perform custodial functions relating to customer securities.

The management of the Company is responsible for establishing and maintaining internal control and the practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of controls and of the practices and procedures referred to in the preceding paragraph and to assess whether those practices and procedures can be expected to achieve the SEC's above-mentioned objectives. Two of the objectives of internal control and the practices and procedures are to provide management with reasonable but not absolute assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in conformity with generally accepted accounting principles. Rule 17a-5(g) lists additional objectives of the practices and procedures listed in the preceding paragraph.

Because of inherent limitations in internal control and the practices and procedures referred to above, error or fraud may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

A *deficiency* in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *significant deficiency* is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control was for the limited purpose described in the first and second paragraphs and would not necessarily identify all deficiencies in internal control that might be material weaknesses. We did not identify any deficiencies in internal control and control activities for safeguarding securities that we consider to be material weaknesses, as defined above.

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the SEC to be adequate for its purposes in accordance with the Securities Exchange Act of 1934, and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company's practices and procedures, as described in the second paragraph of this report, were adequate at November 30, 2008, to meet the SEC's objectives.

This report is intended solely for the information and use of the Board of Directors, management, the SEC, Financial Industry Regulatory Authority, Inc., and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 in their regulation of registered broker-dealers, and is not intended to be and should not be used by anyone other than these specified parties.

Yours truly,

Debra M. Sanchez LLP
