Re: Schwab Investments
File Nos. 33-036459 and 811-06200

Dear Ms. Florschutz:

On behalf of Schwab Investments, enclosed, pursuant to Section 33 of the Investment Company Act of 1940, as amended, a copy of a complaint in the case entitled Jerry Smit v. Charles Schwab & Co., Inc., Schwab Investments and Charles Schwab Investment Management, Inc.

If you have any questions, please contact me at (415) 667-0780.

Very truly yours,

A handwritten signature in cursive script that reads 'Christine Pierangeli'.

Christine Pierangeli
Corporate Counsel
Charles Schwab Investment Management, Inc.

E-filing **JCS**

**UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA**

CV 10 3971
Case No.

JERRY SMIT, individually and on behalf of all
others similarly situated,

Plaintiff,

v.

CHARLES SCHWAB & CO., INC., SCHWAB
INVESTMENTS and CHARLES SCHWAB
INVESTMENT MANAGEMENT, INC.,

Defendants.

**COMPLAINT FOR VIOLATION OF
CALIFORNIA BUS. & PROF. CODE
§ 17200**

Per Filing

1 Plaintiff, for her Class Action Complaint, alleges the following upon personal knowledge as
2 to herself and her own acts, and as to all other matters upon information and belief, based upon the
3 investigation made by his attorneys, which included, *inter alia*, a review of Securities and
4 Exchange Commission ("SEC") filings, news reports and other publicly available materials.

5 **I. NATURE OF THE ACTION**

6 1. Plaintiff brings this action against members of the Charles Schwab financial
7 services family on behalf of persons who owned shares of the Schwab Total Bond Market Fund
8 (the "Fund") (Ticker: SWLBX) as of May 31, 2007.

9 2. The action is brought against defendants for causing the Fund to deviate from its
10 fundamental investment objective to track the Lehman Brothers U.S. Aggregate Bond Index (the
11 "Index") (Ticker: LBSTRUU). Section 8 of the Investment Company Act of 1940 (the "ICA")
12 directs an investment company to recite in its Registration Statement "all investment policies of the
13 registrant ..., which are changeable only if authorized by shareholder vote," as well as all policies
14 that "the registrant deems matters of fundamental policy." 15 U.S.C. § 80a-8(b) (2) & (3). Section
15 13 prohibits a registered investment company from deviating from any such policies "unless
16 authorized by the vote of a majority of its outstanding voting securities." 15 U.S.C. § 80a-13. By
17 violating Section 13, defendants committed a per se violation of the California Unfair Competition
18 Law, Cal. Bus. & Prof. Code §§ 17200, *et seq.* (the "UCL").

19 3. The Fund deviated from its stated investment objective by investing a material
20 percentage of its portfolio in high risk non-agency collateralized mortgage obligations ("CMOs").
21 The non-agency CMOs were not part of the Index and were substantially more risky than the U.S.
22 agency securities and other instruments that comprised the Index.

23 4. The Fund also deviated from its stated fundamental investment objective by
24 investing more than 25% of its total assets in non-agency mortgage-backed securities and CMOs.
25 The Fund's investment objectives prohibited any concentration of investments greater than 25% in
26 any industry (other than if necessary to track the Index).

27 5. Defendants' deviation from the Fund's investment objective exposed the Fund and
28 its shareholders to tens of millions of dollars in losses stemming from a sustained decline in the

1 value of non-agency mortgage-backed securities. The Fund's deviation from its stated investment
2 objective caused investors to suffer a negative 12.64% differential in total return for the Fund
3 compared to the Index for the period August 31, 2007, through February 27, 2009, consisting of a
4 negative total return of 4.80% for the Fund compared to a positive total return of 7.85% for the
5 Index over that same period (including interest payments).

6 II. JURISDICTION AND VENUE

7 6. This Court has jurisdiction over the subject matter of this action under 28 U.S.C.
8 §§ 1332(d)(2), and 1367. The plaintiff is diverse from at least one of the defendants and the
9 amount in controversy exceeds \$5 million.

10 7. Venue is proper in this District pursuant to 28 U.S.C. § 1391(b). Many of the acts
11 giving rise to the violations of law complained of herein, including the dissemination to
12 shareholders of the Registration Statements, Proxy Statements, and Prospectuses, referenced herein
13 occurred in this District.

14 8. Intradistrict Assignment: Assignment to the San Francisco or Oakland division of
15 this Court is appropriate because Defendants' headquarters and principal place of business is in San
16 Francisco, California. Because this action arises in the county of San Francisco, pursuant to
17 Northern District of California, Local Rule 3-2(d), assignment to the San Francisco or Oakland
18 Division is proper.

19 III. PARTIES

20 9. Plaintiff Jerry Smit is a resident of Arvada, Colorado. Beginning in October 1998,
21 and continuing through July 2010, Mrs. Smit purchased shares of the Schwab Total Bond Market
22 Fund, through both regular share purchases and reinvestment of dividends. Mrs. Smit presently
23 holds approximately 546.07 shares of the Fund. Mrs. Smit suffered damage as a result of
24 defendants' violations of the California Unfair Competition Law.

25 10. Defendant Charles Schwab & Co., Inc. ("Schwab" or "Underwriter") is
26 headquartered at 101 Montgomery Street, San Francisco, CA 94104. Schwab is the parent
27 company of Schwab Investments. Pursuant to a Distribution Agreement, Schwab was, during the
28

1 relevant time period, the principal underwriter and distributor for shares of the Fund and was the
2 Trust's agent for the purpose of the continuous offering of the Fund's shares.

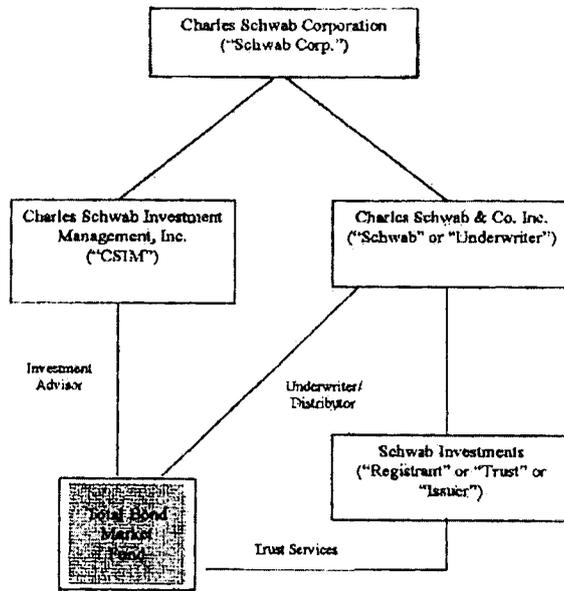

3 11. Defendant Charles Schwab Investment Management, Inc., also known as Charles
4 Schwab Investment Management Services ("CSIM" or the "Investment Advisor"), is also
5 headquartered at 101 Montgomery Street, San Francisco, CA 94104. Schwab Management is the
6 asset management arm of The Charles Schwab Corporation, with over \$200 billion in assets under
7 management. Schwab Management oversees the asset management and administration of the Total
8 Bond Market Fund. As compensation for these services, Schwab Management receives a
9 management fee from the Fund.

10 12. Defendant Schwab Investments ("Issuer," "Trust" or "Registrant") also has its
11 headquarters at 101 Montgomery Street, San Francisco, CA 94104. Schwab Investments was
12 organized under Massachusetts law on October 26, 1990, and is a Massachusetts Business Trust. It
13 is the Registrant for the Total Bond Market Fund, the issuer of Fund shares, and performed trust
14 services for the Fund. The Total Bond Market Fund is a series of the Trust.

15 13. Schwab, CSIM, and the Trust are under the common control of The Charles Schwab
16 Corp., a publicly traded corporation.

17 14. The relationship between the foregoing entities and the Fund is depicted in the

IV. SUBSTANTIVE ALLEGATIONS

A. Background and History Prior to the 1997 Shareholder Vote

15. The Schwab Total Bond Market Fund (SWLBX) was initiated on March 5, 1993, under a predecessor name – the Schwab Long-Term Government Bond Fund (the “Government Bond Fund”) – as an actively managed bond fund.

16. According to the Prospectus for the Government Bond Fund dated December 30, 1994, as amended June 30, 1995, the investment objective of the Government Bond Fund was “to provide a high level of current income consistent with preservation of capital by investing primarily in securities issued or guaranteed by the United States Government, its agencies or instrumentalities and repurchase agreements covering those securities.”

1 17. The June 30, 1995 Prospectus also stated that “[the] Fund’s investment objective ...
2 is fundamental and cannot be changed without approval by holders of a majority of the Fund’s
3 outstanding voting shares.”

4 18. The Prospectus added that “U.S. Government Securities are generally viewed by the
5 Investment Manager as being among the safest of debt securities with respect to the timely
6 payment of principal and interest....”

7 19. Schwab was unable to successfully market the Government Bond Fund.

8 20. As of August 31, 1997, after more than four years of operations, the Government
9 Bond Fund only had \$24.8 million in investment assets.

10 **B. The Formation of the Schwab Total Bond Market Index Fund**

11 21. On July 25, 1997, Schwab Investments mailed to investors in the Government Bond
12 Fund a Proxy Statement on SEC Form 14A with respect to a shareholder vote “[t]o amend [the]
13 Fund’s fundamental investment objective resulting in changing the Fund from [a] Government
14 bond fund[] to [a] bond index fund[] that would include Government and other fixed income
15 securities” (at 2).

16 22. The Proxy Statement (at 14) informed investors that the Board of Trustees of the
17 Fund was proposing to change the Fund’s then existing investment objective from attempting “to
18 provide a high level of current income consistent with preservation of capital by investing
19 primarily in securities issued or guaranteed by the U.S. Government” to a “proposed investment
20 objective ... to attempt to provide a high level of current income consistent with preservation of
21 capital by seeking to track the investment results of a particular bond index through the use of an
22 indexing strategy.”

23 23. The Proxy Statement added (at 3) that “[i]f its proposed investment objective is
24 approved, the Total Bond Fund would invest in a portfolio of fixed-income securities that seeks to
25 track the Lehman Brothers Aggregate Bond Index.”

26 24. The Lehman Index was described in the Proxy Statement (at 18) as “a broad market-
27 weighted index which encompasses the following classes of investment grade fixed-income
28

1 securities: U.S. Treasury and agency securities, corporate bonds, international (dollar-
2 denominated) bonds, agency mortgage-backed securities, and asset-backed securities.”

3 25. The Lehman Index is a proprietary Lehman Brothers index, consisting of over 9,000
4 separate instruments whose exact composition is not generally available to investors. The
5 composition of the Index changes from time-to-time. It is now called the Barclay’s U.S. Aggregate
6 Bond Index.

7 26. The Proxy Statement stated with respect to mortgage-backed securities and asset-
8 backed securities (at 21) that “[t]he primary risk of these securities is ‘prepayment risk.’ Namely
9 that during periods of changing interest rates, the payment streams in the underlying pools will be
10 paid faster ... than anticipated.”

11 27. The Proxy Statement further described (at 22) the “investment process of indexing”
12 by stating that the Fund “would be unable to hold all of the individual issues which comprise the
13 [Index] because of the large number of securities in the [Index],” but that the “Fund would hold a
14 portfolio of fixed-income securities that is managed to *closely approximate* [the] Index’s
15 ‘characteristics’ of coupon rate, duration, sector, quality and optionality (or convexity)”:

16 If the proposed investment objective is approved, the Funds would
17 not be managed according to traditional methods of “active”
18 investment management, which involve the buying and selling of
19 securities based upon economic, financial, and market analyses and
20 investment judgment. Instead, the Investment Manager would utilize
21 a “passive” or “indexing” investment approach, to attempt to track
22 the investment performance of each Fund’s Index through statistical
23 sampling and other procedures. The Funds would be unable to hold
24 all of the individual issues which comprise the Indexes because of
25 the large number of securities in the Indexes. Each Fund would hold
26 a portfolio of fixed-income securities that is *managed to closely*
27 *approximate* its Index’s ‘characteristics’ of coupon rate, duration,
28 sector, quality and optionality (or convexity). [Emphasis added.]

23 28. The Proxy Statement assured investors (at 22) that “[b]efore purchasing or selling a
24 security, the Investment Manager would analyze each security’s characteristics and determine
25 whether purchasing or selling the security would help the Fund’s portfolio *approximate* the
26 characteristics of the Index”:

27 Before purchasing or selling a security, the Investment Manager
28 would analyze each security’s characteristics and determine whether
purchasing or selling the security would help the Fund’s portfolio

1 ***approximate the characteristics of the Index. As a result, when the***
2 ***Fund's portfolio as a whole is considered, the Fund's performance***
3 ***and risk is expected to be similar to its Index's performance and***
4 ***risk.***

5 For example, with respect to the "sector characteristic," if U.S.
6 Treasury and agency securities represent approximately 60% of an
7 Index's interest rate risk, then approximately 60% of the respective
8 Fund's interest rate risk would come from such securities. Similarly,
9 if corporate bonds represent 20% of the Fund's interest rate risk, then
10 they would represent approximately 20% of the Fund's interest rate
11 risk. This technique is expected to enable each Fund to track the
12 coupon income and price movements of its respective Index, while
13 minimizing transaction, custodial and accounting costs. [Emphasis
14 added.]

15 29. The 1997 Proxy Statement represented (at 23) that the Investment Manager would
16 seek a 90% correlation between the Fund and the Index:

17 Over the long term, the Investment Manager will seek a correlation
18 between the performance of each Fund, as measured by its net asset
19 value, including the value of its dividend and capital gain
20 distributions, and that of its Index of 0.9 or better. A correlation of
21 1.0 would indicate perfect correlation, but since each Fund incurs
22 operating expenses, unlike its respective Index, a perfect correlation
23 is unlikely to be achieved. The Investment Manager will monitor the
24 performance of each Fund versus that of its Index on a regular basis.
25 If a tracking error develops, each Fund is rebalanced to help bring it
26 in line with the Index. In the unlikely event that a correlation of 0.9
27 or better is not achieved, the Board of Trustees of a Fund will
28 consider alternative arrangements.

29 30. The 1997 Proxy Statement described (at 2) Schwab's rationale for proposing that
30 the Fund be changed to an index fund and the Fund's appeal to passive investors who were seeking
31 "broad bond portfolio diversification" and "a consistent investment style," as follows:

32 Schwab has long been an advocate of indexing as an investment
33 strategy. The Board of Trustees believes the proposed bond index
34 funds will offer customers many benefits through the use of an
35 indexing strategy. These benefits include: broad bond portfolio
36 diversification, a consistent investment style, and potentially lower
37 trading costs as a result of lower portfolio turnover and fewer
38 transactions, over the long term. And, all other things being equal,
39 lower costs can translate into higher returns.

40 The objective of an index fund, unlike an actively managed fund, is
41 to closely track the total return of a benchmark or index for a
42 particular market, or market sector. Because both proposed Funds
43 plan to invest in a larger number and broader range of bonds, the
44 Funds should provide investors a more broadly diversified bond fund
45 investment for their asset allocation plan. The proposed bond index
46 funds could represent excellent choices for the core component of an

1 investor's bond fund holdings and could fulfill the bond portion of an
2 asset allocation plan, whether that plan calls for a longer-term or
short-term bond fund.

3 31. The 1997 Proxy Statement (at 2) stated that because investors would not be required
4 to actively monitor and assess the investment selections of the Fund's Investment Advisor (which
5 was charged with the responsibility of following the Index), the bond index fund "should give a
6 broader appeal to a larger number of investors."

7 In addition, the Board of Trustees believes that the proposed bond
8 index funds should have a broader appeal to a larger number of
9 investors. This would permit the Funds to be marketed more
10 effectively, creating economies of scale if assets grow. These
economies could be achieved by spreading the Funds' fixed costs
over a larger asset base, which would potentially lower the Funds'
operating expenses.

11 32. The Proxy Statement sought to assure investors (at 4) that the change to an indexing
12 strategy would not then increase the risk profile of the Fund because 80% of the Fund's assets
13 would still be invested on a current basis in U.S. government or agency bonds, and given the then
14 current composition of the Index, 15% of the portfolio would be invested in investment grade
15 corporate bonds, 4% in international (dollar-denominated bonds), and 1% in asset-backed
16 securities:

17 As shown in the two preceding charts, as of June 30, 1997, both of
18 the proposed index Funds would maintain significant positions in
19 U.S. Treasury and agency, and agency mortgage-backed securities –
85.0% for the Short-Term Bond Market Index Fund and 80.0% for
the Total Bond Market Index Fund.

20 The non-U.S. Treasury/agency securities represented in both indices
21 are all investment grade and quite diversified. As a result, both index
22 Funds are expected to maintain relatively low levels of credit risk.
23 However, given that U.S. Treasury and agency securities have the
lowest credit risk compared to other types of fixed income securities,
24 the portfolio management team anticipates that the proposed Funds
would have a slightly higher level of credit risk than the current
25 Funds.

26 33. The July 25, 1997 Proxy Statement also proposed a change in the Fund's
27 "fundamental investment policies and investment restrictions" regarding concentration of
28 investments.

1 34. Previously, the Fund's fundamental investment policies and investment restrictions
2 barred investments of "25% or more of the value of its total assets ... in any industry" (excluding
3 investments in U.S. government, agency, or instrumentality securities):

4 Each Fund may not:

5 Purchase securities (other than securities issued or guaranteed by the
6 U.S. Government, its agencies or instrumentalities) if, as a result of
7 such purchase, 25% or more of the value of its total assets would be
8 invested in any industry. Securities issued by governments or
9 political subdivisions or authorities of governments are not
10 considered to be securities subject to this industry concentration
11 restriction.

12 35. The proposed change incorporated the definition of "concentration" under the
13 Investment Company Act of 1940, and gave the Fund discretion to concentrate investments of
14 greater than 25% of total assets in any industry if necessary to track the Lehman Index:

15 Each Fund may not concentrate investments in a particular industry
16 or group of industries, or within one state (except with respect to the
17 Total Bond Market Index Fund and the Short Term Bond Market
18 Index Fund, to the extent that the index which each Fund seeks to
19 track is also so concentrated) as concentration is defined under the
20 Investment Company Act of 1940 or the rules or regulations
21 thereunder, as such statute, rules or regulations may be amended
22 from time to time.

23 36. The rationale of the proposed change, according to the Proxy Statement, was to
24 incorporate the SEC's interpretation of the term "concentration" from the Investment Company Act
25 of 1940 (which at the time was and remains 25%) to give the Fund greater flexibility in the event
26 of future changes in interpretation:

27 The current self-designated restriction specifically limits a Fund's
28 investments to less than 25% of a Fund's total assets in a particular
29 industry. Under the Proposal, this current self-designated restriction
30 will be eliminated and replaced by a more flexible proposed
31 restriction. The proposed restriction would continue to prevent each
32 Fund from "concentrating" its investments in a single industry or in a
33 state, except if the Index that the Fund tracks is "concentrated" in a
34 particular industry or state. Further, to provide flexibility, the
35 concept of "concentration" in a Fund's proposed restriction is
36 articulated so as to always track the current meaning of
37 "concentration" under the 1940 Act.

38 At present, "concentration" is interpreted under the 1940 Act in a
39 manner consistent with each Fund's current self-designated
40 restriction (25% or more). However, in order to achieve greater
41 flexibility (if for instance the percentage limitation were to be

1 changed by the SEC), the proposed restriction would eliminate the
2 specific percentage reference and instead define the term
3 "concentration" with respect to the meaning conferred under the
4 1940 Act. Because the present interpretation of the percentage limit
5 of "concentration" under the 1940 Act is the same as the current
6 concentration restriction, it is not expected that there would be any
7 immediate impact on a Fund's operations as a result of approving
8 this aspect of the proposed concentration restriction. Any future
9 change in operations would occur only if the SEC staff changed its
10 interpretation of what constitutes "concentration."

11 37. There has been no subsequent change in the SEC's interpretation of what constitutes
12 "concentration."

13 38. On September 25, 1997, Schwab Investments reported that the shareholders of the
14 Schwab Government Fund had approved the amendment to the Fund's "fundamental investment
15 objective ... to allow [the] Fund to pursue an indexing strategy":

16 As a result of the amendment referenced in Item No. 1 above, as of
17 November 1, 1997, the name of the Schwab Short/Intermediate
18 Government Bond Fund will be changed to the Schwab Short-Term
19 Bond Market Index Fund, and the name of the Schwab Long-Term
20 Government Bond Fund will be changed to the Schwab Total Bond
21 Market Index Fund. As a result of the shareholder vote, each Fund's
22 fundamental investment objective is amended to allow each Fund to
23 pursue an indexing strategy. The Schwab Short-Term Bond Market
24 Index Fund will seek to track the Lehman Brothers Short (1-5)
25 Government/Corporate Index and the Schwab Total Bond Market
26 Index Fund will seek to track the Lehman Brothers Aggregate Bond
27 Index. Each index is market-weighted and designed to track the
28 performance of broad segments of the bond market.

39. Schwab Investments further reported that shareholders approved the change in the
Fund's fundamental investment policies and restrictions with respect to the concentration of
investments.

40. The Registration Statement and Prospectus dated January 15, 1998, for the Total
Bond Fund and the Schwab Short-Term Total Bond Market Index Fund (at page 10), issued after
the 1997 shareholder vote, reiterated the Fund's investment objective to track a bond index:

INVESTMENT OBJECTIVES:

Each Fund's investment objective is to attempt to provide a high
level of current income consistent with preservation of capital *by
seeking to track the investment results of a particular bond index
through the use of an indexing strategy.*

1 Each Fund's investment objective is fundamental, which means that
2 it may be changed only by vote of a majority of a Fund's
shareholders. [Emphasis added.]

3 41. The Prospectus further stated (at 10) that the Lehman Brothers Aggregate Bond
4 Index was the index against which the Total Bond Fund would be tracked:

5 THE INDEXES are the Lehman Brothers Mutual Fund Short (1-5)
6 Government/Corporate Index (the Short-Term Index) for the Short
7 Bond Fund and the Lehman Brothers Aggregate Bond Index (the
Aggregate Bond Index) for the Total Bond Fund.

8 42. That same recitation of the Fund's investment objective was contained in
9 subsequent Prospectuses for the Fund, as well as in Statements of Additional Information
10 incorporated by reference into the Prospectuses. A Statement of Additional Information (or "SAI")
11 contains a more comprehensive discussion of material facts than is contained in a Prospectus.

12 43. The Fund's conversion to an indexing strategy was a success, as net assets increased
13 from \$24 million as of August 31, 1997, to \$1.5 billion as of August 31, 2007.

14 44. Schwab Investments, in the August 31, 1998 Reports to shareholders, emphasized
15 the conservative nature of the Fund's indexed securities:

16 Schwab's Bond Index Funds seek to track the total returns of broadly
17 diversified bond indices. And because index funds generally result
18 in lower portfolio turnover and fewer transactions – and therefore
lower trading costs – you could potentially realize higher returns.

19 In addition to some of the same benefits of equity index funds,
20 including broad diversification, lower expenses, consistent
investment style and straightforward choices, bond index funds can
21 also provide the added benefit of high credit-quality investments.
Schwab's Bond Index Funds are designed to maintain high credit-
22 quality standards because the indices they seek to track primarily
comprise U.S. Treasuries, government agency securities and
23 government agency mortgage-backed securities; the remaining bonds
in the indices are investment-grade corporate bonds rated AAA
through BBB the four highest credit ratings. [Emphasis added.]

24 45. The government agency mortgage-backed securities referenced in the Fund's SEC
25 documents and included in the Lehman Index were issued by the Governmental National Mortgage
26 Association ("Ginnie Mae"), the Federal National Mortgage Association ("Fannie Mae") and the
27 Federal Home Loan Mortgage Corporation ("Freddie Mac"). Ginnie Mae, Fannie Mae, and
28

1 Freddie Mac are U.S. Government agencies (also known as Government Sponsored Enterprises
2 (“GSEs”)) established by Congress to facilitate residential mortgage loans.

3 46. The GSEs purchased and securitized mortgage loans that met established criteria for
4 creditworthiness.

5 47. The government agency mortgage-backed securities referenced in the 1998 Annual
6 Report as contained in the Index were fixed income pass-through securities, in which all principal
7 and interest on the underlying mortgages is passed through to the mortgage-backed securities
8 investor.

9 48. The type of securities that could be acquired by those agencies are restricted by their
10 government charters.

11 49. Ginnie Mae benefits from an express U.S. Government guarantee of payment on its
12 securities. Both Fannie Mae and Freddie Mac benefit from an implied U.S. Government guarantee
13 of payment on its securities by virtue of their status as U.S. chartered institutions.

14 50. The mortgage-backed securities issued by Ginnie Mae, Fannie Mae and Freddie
15 Mac, and maintained in the Lehman Index, had the highest credit quality among mortgage-backed
16 securities.

17 51. The Statement of Additional Information dated May 6, 2002, reported that the Fund
18 had changed its name to the Schwab Total Bond Market Fund:

19 Prior to May 6, 2002, . . . Schwab Total Bond Market Fund was
20 named Schwab Total Bond Market Index Fund.

21 52. The May 6, 2002 Statement of Additional Information, incorporated by reference
22 into the May 6, 2002 Prospectus, continued to state that the Fund’s investment objective was
23 unchanged and could only be changed by a majority shareholder vote, which had not occurred:

24 Each fund’s investment objective is to attempt to provide a high level
25 of current income consistent with preservation of capital by seeking
26 to track the investment results of a particular bond index through the
27 use of an indexing strategy.

28 * * *

The indexes are the Lehman Brothers Mutual Fund Short (1-5 Year)
U.S. Government/Credit Index for the Schwab Short-Term Bond
Market Fund (the Short-Term Index), and the Lehman Brothers U.S.

1 **Aggregate Bond Index for the Schwab Total Bond Market Fund (the**
2 **U.S. Aggregate Bond Index).**

3 * * *

4 **The U.S. Aggregate Bond Index is a market-capitalization weighted**
5 **index of investment-grade debt securities with maturities of greater**
6 **than one year.**

7 * * *

8 **Each fund's investment objective may be changed by vote of a**
9 **majority of its outstanding voting shares.**

10 **C. The Fund Continually Promised to Track the U.S. Aggregate Bond Index**

11 53. Beginning with a Prospectus dated November 15, 2003, and in subsequent
12 Prospectuses issued by Schwab Investments with respect to the Fund, including the Prospectuses
13 dated November 15, 2004 (as amended September 15, 2005), November 15, 2005, November 15,
14 2006, November 15, 2006 (as amended July 13, 2007), November 15, 2007, and November 15,
15 2007 (as amended June 13, 2008), defendants prominently reported in large type-face at the front
16 of the Prospectuses the following:

17 **The fund seeks high current income by tracking the performance**
18 **of the Lehman Brothers U.S. Aggregate Bond Index.**

19 * * *

20 **To pursue its goal, the fund primarily invests in a diversified**
21 **portfolio of debt instruments that is designed to track the**
22 **performance of the Lehman Brothers U.S. Aggregate Bond**
23 **Index.**

24 54. The Statement of Additional Information attached to the November 15, 2003
25 Prospectus – and all subsequent Statements of Additional Information – reaffirmed that the Fund
26 would continue to track the Index until that investment objective was changed by shareholder vote:

27 **Each fund's investment objective is to attempt to provide a high level**
28 **of current income consistent with preservation of capital by seeking**
 to track the investment results of a particular bond index through the
 use of an indexing strategy.

The indices are the Lehman Brothers Mutual Fund Short (1-5 Year)
 U.S. Government/Credit Index (the Short-Term Index) for the
 Schwab Short-Term Bond Market Fund, and the Lehman Brothers
 U.S. Aggregate Bond Index (the U.S. Aggregate Bond Index) for the
 Schwab Total Bond Market Fund.

1 The Short-Term Index is a market-capitalization weighted index of
 2 investment-grade debt securities with maturities between one and
 3 five years. The U.S. Aggregate Bond Index is a market-
 capitalization weighted index of investment-grade debt securities of
 greater than one year.

4 * * *

5 *Each fund's investment objective may be changed by vote of a*
 6 *majority of its outstanding voting shares.* [Emphasis added.]

7 **D. The Fund Substantially Deviated from Its Stated Investment Objective**

8 55. By May 31, 2007, the Fund deviated from its fundamental objective of tracking the
 9 investments of the Index and of investing primarily in a diversified portfolio of debt instruments to
 10 track the performance of the Index. On that date, 32% of the Fund's net assets were invested in
 non-agency CMOs, as reflected in the following table:

Nov. 30, 2006	Feb. 28, 2007	May 31, 2007	Nov. 30, 2007	Feb. 29, 2008	May 31, 2008
17.40%	17.70%	32.00%	30.00%	27.30%	13.20%

14 56. The Fund had no business investing in non-agency CMOs, which were not included
 15 in the Index, let alone in the large concentrations that resulted. The mortgage-backed securities
 16 included in the Index are limited to "agency fixed-rate and hybrid ARM pass-throughs," and the
 17 Index did not include non-agency mortgage-backed issues.

18 57. Moreover, the Fund's non-agency CMO investments pushed the Fund's total
 19 concentrations in residential mortgage-backed securities – both agency and non-agency – far
 20 beyond the residential mortgage-backed securities concentrations reflected in the Index. In 2007,
 21 the Index was comprised of 38.6% residential mortgage-backed securities. In 2008, this number
 22 increased slightly to 39.6%. In contrast, the Fund's residential mortgage-backed securities
 23 investments in 2007 would by May 31, 2007 exceed 67% of net assets as reflected in the following
 24 table:

Nov. 30, 2006	Feb. 28, 2007	May 31, 2007	Nov. 30, 2007	Feb. 29, 2008	May 31, 2008
43.80%	45.10%	67.10%	52.30%	45.40%	43.30%

1 58. Subsequent analyses of other bond index funds that represent that they track the
2 Index indicates that as of February 29, 2008, the Lehman Government Index had a 0% weighting in
3 non-agency mortgage-backed securities, and a 37% weighting in agency mortgage-backed
4 securities.

5 59. Thus, the Fund was converted from a diversified fund that would seek to track the
6 Index into a concentrated real estate bond fund. In other words, defendants changed the investment
7 objective of the Fund, which was a fundamental policy, without holding the required shareholder
8 vote.

9 60. Nonetheless, the Fund largely tracked the Index until August 31, 2007. From
10 August 31, 1997, through August 31, 2007, the Fund substantially performed in a manner that was
11 consistent with the Index, returning an annualized rate of 5.75% compared to 6.04% for the Index –
12 within the 10% deviation anticipated by the Investment Manager.

13 61. As stated in the Fund's annual and semi-annual reports, this degree of deviation
14 between the Fund and the Index occurred "mainly because, unlike the Index, the Fund incurs
15 operating expenses and trading costs and must keep a small part of its assets in cash for paying
16 expenses and processing shareholder orders."

17 62. As discussed more below, the Fund would substantially deviate from the Index
18 beginning in the Fall of 2007 and sustain large losses as a result of the Fund's concentrations in
19 non-agency CMOs.

20 **E. Defendants Failed to Tell Investors that the Fund Had Substantially Deviated From**
21 **Its Stated Investment Objective**

22 63. Not only did defendants fail to hold the required shareholder vote before changing
23 the Fund's investment objective, they also failed to give investors notice that they had changed the
24 Fund's investment objective.

25 64. The Fund first reported a material deviation from the Index in its Semi-Annual
26 Report for the period ended February 29, 2008:

27 The Schwab Total Bond Market Fund returned 3.41%
28 underperforming Lehman Brothers U.S. Aggregate Bond Index,
 which was up 5.67%. Risk aversion and forced selling in the fixed
 income market, combined with persistent volatility, impacted the

1 fund as investors remained cautious of all non-Government securities
2 irrespective of underlying credit quality. Under these conditions of
3 extreme volatility, U.S. Treasuries outperformed all other fixed
4 income securities.

5 During the period, the financial markets experienced liquidity and
6 confidence issues as the collapse of the subprime mortgage market
7 and related credit turmoil cascaded into other sectors.
8 Correspondingly, a repricing of risk premiums and a flight to quality
9 across all segments of the fixed income market contributed to
10 downward pricing pressure, with prices for many non-U.S. Treasury
11 securities falling regardless of their quality or fundamentals. In order
12 to maintain liquidity, many investors were forced to sell high quality
13 assets at depressed prices. This selling pressure occurred at the same
14 time demand for non-U.S. Treasury securities was weakest, and as a
15 result prices were driven down even further.

16 65. This Report did not inform investors that the deviation in the Fund's performance
17 was due to the Fund's concentrated play in non-agency CMOs.

18 66. Nor did defendants inform investors that the Fund would continue to deviate from
19 the Index. Among other things, the Prospectus dated September 15, 2007, had stated that "the
20 Fund primarily invests in a diversified portfolio of debt investments that is designed to track the
21 performance of the Lehman Brothers U.S. Aggregate Bond Index" and that "[y]our investment
22 follows the bond market, as measured by the index. The fund is designed to follow the
23 performance of the index during upturns as well as downturns." The November 15, 2007
24 Statement of Additional Information also reiterated that the Fund's "investment objective is to
25 attempt to provide a high level of current income consistent with preservation of capital by seeking
26 to track the investments results of [the Index] through the use of an indexing strategy."

27 67. The Trust had informed investors in the 1997 Proxy Statement (at 23) that some
28 volatility in the Fund against the Index may not be totally avoidable, and that "if a tracking error
develops, each Fund is rebalanced to help bring it in line with the Index."

68. The Fund had also consistently tracked the Index for the prior decade since
inception.

69. Accordingly, it was not apparent to investors at that time, who thought they were
holding a conservative index fund, that defendants had engaged in a risky strategy of concentrating

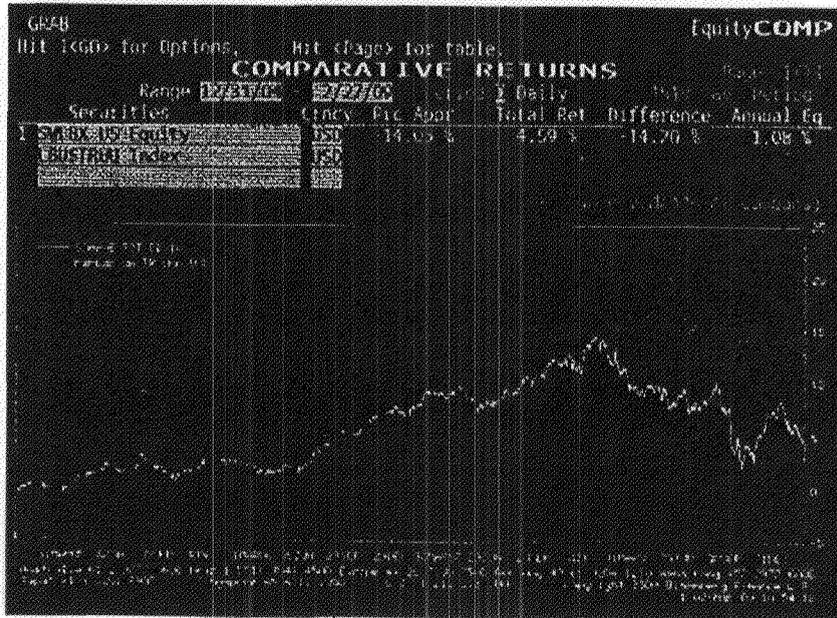

1 the Fund's portfolio in non-agency CMOs that deviated materially from the government and
2 government agency securities that comprised a majority of the Index.

3 70. Further, from 2002 until June 2008, Kimon Daifotis acted as the senior vice
4 president and chief investment officer of the Investment Advisor, responsible for the overall
5 management of the Fund. On June 13, 2008, the Trust filed a Supplement to the Fund's Prospectus
6 dated November 15, 2007, stating that Jeffrey Mortimer was then responsible for the overall
7 management of the Fund. No explanation was given by defendants, in the Prospectus or elsewhere,
8 for replacing Daifotis as Fund manager. Investors were not informed that Daifotis had engaged in
9 an investment strategy that was inconsistent with the Fund's stated investment objectives and
10 policies. Investors were also not informed that Daifotis was in fact asked to resign.

11 71. The Fund's underperformance against the Index did continue subsequent to
12 February 29, 2008. *From August 31, 2007, through February 27, 2009, the Fund experienced a*
13 *negative total return of 4.80% compared to a positive 7.85% total return for the Index – a total*
14 *underperformance of 12.64% in absolute terms (including interest payments) and representing*
15 *over \$100 million in lost value.*

16 72. The following chart, prepared on a Bloomberg terminal and comparing the Fund's
17 change in total return to the Lehman Index's change in total return over the period December 31,
18 2004, through February 27, 2009, demonstrates how closely correlated the Fund was to the Index
19 until approximately August 31, 2007, and how dramatically the Fund deviated from the Index
20 thereafter:

73. The magnitude of under-performance between the Fund and the Index was not the result of unforeseen economic circumstances, but rather due to the gross deviation by defendants from the Fund's stated investment objective.

F. The Performance Deviation and Consequent Damage Was Caused by the Fund's Concentrated Non-Agency CMO Investments

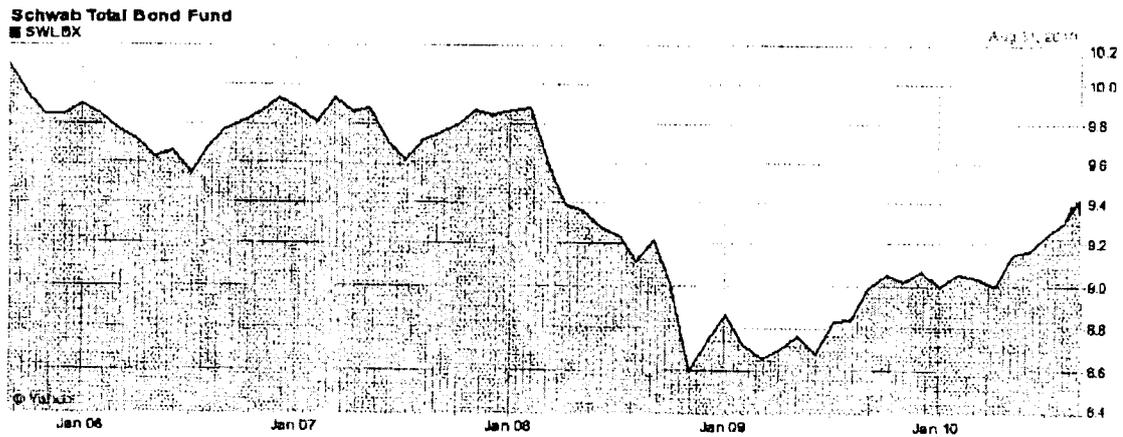

74. The Fund's deviation in performance from the Index was caused by the Fund's concentrated investments in non-agency CMOs.

75. The CMOs in the Fund's portfolio were not issued by government agencies. Rather, they were issued by financial institutions through subsidiaries and backed by residential loans that did not conform to the agencies' higher loan underwriting requirements.

76. Moreover, non-agency CMOs purchased for the Fund represented tranches of mortgage-backed securities, such as principal only or interest only payments, and were significantly more risky than the agency-issued mortgage-backed securities that were part of the Index. Included in the Fund's portfolio were CMOs sponsored by such subprime lenders as Citigroup, Merrill Lynch, Countrywide, Bear Stearns, IndyBank, Lehman, and Washington Mutual.

1 77. The Fund's concentrated investments in CMOs were made at a time when there was
2 increased concern with the quality of mortgage lending. For example, on June 28, 2007, the
3 Department of Treasury, Federal Reserve System, Federal Deposit Insurance Corp., and National
4 Credit Union Administration, issued a joint Statement on Subprime Mortgage Lending "to address
5 subprime mortgage products and lending practices."

6 78. The riskier non-agency CMO investments caused the Fund's NAV to drop
7 throughout most of 2008 as reflected in the following chart:

18 **G. Defendants Also Violated the Fund's No-Concentration Policy**

19 79. As noted, the Fund's SAIs prohibited the Fund from concentrating more than 25%
20 of its assets in any one industry (except as required by the Index). This was a fundamental policy
21 that could not be changed without a shareholder vote.

22 80. Until September 1, 2006, the Fund's SAIs considered non-agency CMOs to
23 constitute a single "industry" subject to the concentration limit:

24 Based on the characteristics of mortgage-backed securities, each fund
25 has identified mortgage-backed securities issued by private lenders
26 and not guaranteed by U.S. government agencies or instrumentalities
27 as a separate industry for purposes of a fund's concentration policy.
28

1 81. Then, by fiat and without holding a shareholder vote, the SAI amended
2 September 1, 2006, indicated that the Fund *reversed* its conclusion that mortgage-backed securities
3 comprised “a particular industry” and revised the description of “concentration”:

4 The funds have determined that mortgage-backed securities issued by
5 private lenders do not have risk characteristics that are correlated to
6 any industry and, therefore, the funds have determined that
7 mortgage-backed securities issued by private lenders are not part of
8 any industry for purposes of the funds’ concentration policies. This
9 means that a fund may invest more than 25% of its total assets in
10 privately-issued mortgage-backed securities, which may cause the
11 fund to be more sensitive to adverse economic, business or political
12 developments that affect privately-issued mortgage-backed
13 securities. Such developments may include changes in interest rates,
14 state or federal legislation affecting residential mortgages and their
15 issuers, and changes in the overall economy.

16 82. With respect to another Schwab fund that shared the *same* SAI as the Schwab Total
17 Bond Market Fund, the Honorable William Aslup of this Court has ruled, notwithstanding
18 defendants’ effort to change the definition in this manner, that the prior concentration policy must
19 be honored and that the limit may be exceeded only after a shareholder vote. *In re Charles Schwab*
20 *Corp. Sec. Litig.*, Order Re: 1940 Act Summary Judgment Motions, Cause No. C-08-01510 WHA
21 (Mar. 30, 2010).

22 83. The Fund’s non-agency CMO concentrations above 25% of net assets violated the
23 Fund’s stated investment objectives that the Fund’s assets not be concentrated more than 25% in
24 any one industry (except as required by the Index).

25 V. CLASS ACTION ALLEGATIONS

26 84. Plaintiff brings this action as a class action pursuant to Federal Rules of Civil
27 Procedure 23(a) and (b)(3), individually and on behalf of a class consisting of all person or entities
28 who owned shares of the Fund as of May 31, 2007. Excluded from the Class are the defendants
29 herein, any subsidiaries or affiliates of the defendants in which defendants or its affiliates have a
30 controlling ownership interest, officers and directors of any of the defendants, heirs, successors and
31 assigns of any of the defendants or their officers and directors, and any entity in which any
32 defendant has a controlling ownership interest.

1 85. The members of the Class are so numerous that joinder of all members is
2 impracticable. While the exact number of members of the Class is unknown to Plaintiff at this time
3 and can only be ascertained through appropriate discovery, Plaintiff believes that there are tens-of-
4 thousands of members of the proposed Class if not more given that the Fund had over \$1.3 billion
5 in assets as of January 1, 2007. Record owners and other members of the Class may be identified
6 from records maintained by the Registrant or its transfer agent and may be notified of the pendency
7 of this action by mail.

8 86. Plaintiff's claims are typical of the claims of the members of the Class as all
9 members of the Class are similarly affected by defendants' wrongful conduct in violation of the
10 California Unfair Competition Law.

11 87. Plaintiff will fairly and adequately protect the interests of the members of the Class
12 and has retained counsel competent and experienced in class litigation.

13 88. Common questions of law and fact exist as to all members of the Class and
14 predominate over any questions solely affecting individual members of the Class. Among the
15 questions of law and fact common to the Class are:

16 (a) Whether the Trust or Investment Advisor caused the Fund to deviate from an
17 investment objective or policy that could only be changed by a shareholder vote;

18 (b) Whether the Trust or Investment Advisor concentrated investments in the
19 Fund of in excess of 25% of its total assets in any one industry;

20 (c) Whether non-agency mortgage-backed securities comprise one or more than
21 one industry.

22 (d) Whether agency and non-agency mortgage-backed securities comprise one
23 or more than one industry.

24 (e) Whether the Trust's acts as alleged herein violated the ICA;

25 (f) Whether the UCL applies;

26 (g) Whether the Investment Advisor caused the Fund to violate the ICA and
27 § 17200; and

28 (h) Whether the members of the Class are entitled to restitution.

1 89. A class action is superior to all other available methods for the fair and efficient
2 adjudication of this controversy since joinder of all members is impracticable. Furthermore, as the
3 damages suffered by any individual Class member may be relatively small, the expense and burden
4 of individual litigation make it impossible for members of the Class to redress individually the
5 wrongs done to them. There will be no difficulty in managing this action as a class action.

6 **VI. APPLICATION OF CALIFORNIA LAW**

7 90. Plaintiff and the members of the Class signed account agreements with Schwab
8 stipulating that California law would apply to any disputes that arise thereunder.

9 91. In addition, defendants' efforts to deviate from the Fund's fundamental policies
10 without first obtaining shareholder approval was devised, approved, implemented, and managed
11 from defendants' headquarters in San Francisco, California.

12 92. Therefore, California law applies to the claims of Plaintiff and all Class members.

13 **COUNT:**

14 **VIOLATIONS OF THE CALIFORNIA BUS. & PROF. CODE §§ 17200, ET SEQ.**

15 93. Plaintiff repeats and realleges the allegations contained in the foregoing paragraphs
16 as if fully set forth herein.

17 94. Defendants' conduct, as described above, deviated from the Fund's "fundamental"
18 investment policies that were changeable only by a shareholder vote that was not held in that, as
19 detailed above:

20 (a) Defendants permitted the Fund to deviate from its fundamental investment
21 objective of investing in bond securities that tracked the Lehman Brothers U.S. Aggregate
22 Bond Index; and

23 (b) Defendants permitted the Fund to deviate from its fundamental no-
24 concentration policy precluding investment of more than 25% of the Fund's total assets in
25 non-agency mortgage-backed securities.

26 95. The foregoing deviations constitute a violation of § 13(a) of the Investment
27 Company Act, 15 U.S.C. § 80a-13(a) and, as such, a violation of California Business & Professions
28 Code §§ 17200, *et seq.*
