R E P O R T

Letter to our Shareholders

Stuart A. Miller
President and Chief Executive Officer
Lennar Corporation

Dear Shareholders:

Fiscal 2009 was a year of continued repositioning for our Company as we remained focused on adapting our business in light of the current economic landscape. Although we continue to face challenges from high unemployment, increased foreclosures and tightening credit standards, recent demand trends in many of the communities in which we are selling homes indicate that the markets are stabilizing and the housing market is beginning its road to recovery. We've continued to make meaningful progress by carefully managing our asset base, improving our homebuilding operating platform and reworking our joint ventures. The progress we have made has been substantial and will ultimately enable us to return to profitability.

Consistent with our long-standing strategy, the focus on our balance sheet was our top priority. In fiscal 2009, that meant:

- Maximizing our cash position by generating positive operating cash flows of \$421 million
- Enhancing our balance sheet liquidity by:
 - Issuing \$225 million of stock under our \$275 million equity draw down program
 - Extending our debt maturities by issuing \$400 million of senior notes maturing in 2017 while retiring \$448 million of shorter term senior notes and other debt
- Ending the year with \$1.3 billion in homebuilding cash and a homebuilding debt to total capital position, net of homebuilding cash, of 36.9%
- Managing our inventory by matching our starts and closings and using below market financing and incentives to sell homes and reduce cancellations
- Opportunistically purchasing new land for future growth
- Expecting to receive a tax refund of \$320 million in early 2010 as a result of tax legislation enacted during our fourth quarter

With our balance sheet fortified with ample liquidity, we are positioned to make strategic investments that will create long-term shareholder value as we begin to grow again. We are beginning to see opportunities take

shape and our Divisions are beginning to underwrite and purchase new land on a conservative basis, which would produce a reasonable profit at today's prices.

On the joint venture front, we have continued to meaningfully eliminate joint ventures in order to add clarity and simplicity to our operating program. Our focus in this area has really paid off. We have reduced the number of unconsolidated joint ventures to 62 from 270 at the peak in 2006. Many of the remaining joint ventures are strategic ventures that have already been reworked, and have assets that are well positioned for the future. At the end of 2009, our maximum recourse debt related to unconsolidated joint ventures was \$288 million, down from \$520 million a year ago and from \$1.8 billion at the peak in 2006. We expect to continue to reduce this amount and the number of unconsolidated joint ventures as we move through 2010.

Relative to our homebuilding operating platform and repositioning the Company for profitability, we have made continued progress throughout 2009 by:

- Refining our product offering targeting first-time and value-oriented homebuyers
- Reducing the number of floor plans and rebidding and value engineering our product to increase efficiency and reduce costs
- Continuing to right size our overhead in each of our operating divisions and our corporate office
- Improving our pre-impairment homebuilding gross margin to 17.8% in the fourth quarter, which allowed us to return to a positive 1.6% pre-impairment operating margin

Although we made significant progress, our results reflect the challenging market conditions our Company continued to navigate throughout 2009:

- Revenues of \$3.1 billion – down 32%
- Net loss of \$417.1 million or \$2.45 per share. Our net loss includes \$560.4 million in valuation adjustments and other write-offs and was partially offset by a benefit for income taxes of \$314.3 million primarily due to a NOL carryback

- Homebuilding operating loss of \$647 million
- Deliveries of 11,478 homes – down 27%
- New orders of 11,510 homes – down 14%

As we enter a new year, the market and the overall economy appear to be in the early stages of stabilization, which is where recovery begins. This recovery is not presenting itself as a V-shaped return to better times, but instead is proving to be a rocky bottom with visibility obscured by more questions than answers. Nevertheless, as we continue to review our operations in the field, market-by-market, there are some common themes that appear to be forming a trend.

- Prices are no longer free falling downward and in fact, in many instances, are actually starting to stabilize and even trend mildly upward
- For the Company overall, sales incentives were \$36,300 per home delivered in the fourth quarter of 2009, down from \$42,200 per home delivered in the third quarter of 2009, and \$51,400 per home delivered in the fourth quarter of 2008
- Our cancellation rate has decreased to 18% from 26% a year ago
- The \$8,000 tax credit is facilitating an inventory clearing process and will help enable a return to normalcy when the credit expires in the Spring
- Consumer confidence is increasing and there is a tangible sense that with prices and interest rates low, now is the right time to purchase a home

This improved sentiment is driving new purchasers to the market and traffic is improving. This reflected itself during the fourth quarter of 2009 when we experienced our first year-over-year increase in new orders since our first quarter of 2006.

The distress in the market has presented numerous opportunities to acquire new properties that can add to profitability starting in 2010. We have begun to purchase land assets to replace closeout communities and add new well located communities. The majority of these acquisitions are finished homesites where we can start building homes immediately. Many of these acquisitions have been structured as rolling options where we have a minimal deposit with a flexible takedown schedule.

The prices for these acquisitions are a fraction of what they were at the peak of the market because land owners have recalibrated their thinking to the reality of today's market. Accordingly, the ratio of the finished homesite in

relation to the sales price of the home is lower than the historical average and in many instances, a portion of the homesite purchase price is paid when the home is delivered to the homebuyer.

Additionally, we've continued to mature our distressed asset strategy under the banner of Rialto. We've been preparing to be a significant participant in the distressed opportunities that naturally present themselves in down cycles. The team is formed and at the beginning of our 2010 fiscal year we announced that, in partnership with the FDIC, we acquired for approximately \$243 million indirect 40% managing member interests in limited liability companies created to hold two portfolios of real estate loans with a combined unpaid balance of \$3.05 billion. Acquiring and working out distressed real estate loans was a large and extremely profitable part of our business during the last major real estate down cycle in the early 1990s. We are excited to return to this business and honored to partner with the FDIC to manage, work through and add value to the portfolio of loans. This distressed business will create additional income streams for the Company while generating new opportunities and creating significant shareholder value.

As we commence fiscal 2010, our hard work and intense focus on improving margins is producing results and positioning our Company for fundamental profitability. Although there remain headwinds for the economy and housing market overall, with a strong balance sheet and dedicated team of Associates, we are well positioned to grow our business in 2010.

Sincerely,

Stuart A. Miller
President and Chief Executive Officer

PART I

Item 1. Business.

Overview of Lennar Corporation

We are one of the nation's largest homebuilders and a provider of financial services. Our homebuilding operations include the construction and sale of single-family attached and detached homes, and to a lesser extent multi-level residential buildings, as well as the purchase, development and sale of residential land directly and through unconsolidated entities in which we have investments. We have grouped our homebuilding activities into four reportable segments, which we refer to as Homebuilding East, Homebuilding Central, Homebuilding West and Homebuilding Houston. Information about homebuilding activities in states in which our homebuilding activities are not economically similar to those in other states in the same geographic area is grouped under "Homebuilding Other." Our reportable homebuilding segments and Homebuilding Other have operations located in:

East: Florida, Maryland, New Jersey and Virginia

Central: Arizona, Colorado and Texas ⁽¹⁾

West: California and Nevada

Houston: Houston, Texas

Other: Illinois, Minnesota, New York, North Carolina and South Carolina

(1) Texas in the Central reportable segment excludes Houston, Texas, which is its own reportable segment.

We have one Financial Services reportable segment that provides primarily mortgage financing, title insurance and closing services for both buyers of our homes and others. Substantially all of the loans that we originate are sold in the secondary mortgage market on a servicing released, non-recourse basis; although, we remain liable for certain limited representations and warranties related to loan sales. Our Financial Services segment operates generally in the same states as our homebuilding operations, as well as in other states. For financial information about both our homebuilding and financial services operations, you should review Management's Discussion and Analysis of Financial Condition and Results of Operations, which is Item 7 of this Report, and our consolidated financial statements and the notes to our consolidated financial statements, which are included in Item 8 of this Report.

A Brief History of Our Company

Our company was founded as a local Miami homebuilder in 1954. We completed our initial public offering in 1971, and listed our common stock on the New York Stock Exchange in 1972. During the 1980s and 1990s, we entered and expanded operations in some of our current major homebuilding markets including California, Florida and Texas through both organic growth and acquisitions such as Pacific Greystone Corporation in 1997, amongst others. In 1997, we completed the spin-off of our commercial real estate business to LNR Property Corporation. In 2000, we acquired U.S. Home Corporation, which expanded our operations into New Jersey, Maryland, Virginia, Minnesota and Colorado and strengthened our position in other states. From 2002 through 2005, we acquired several regional homebuilders, which brought us into new markets and strengthened our position in several existing markets. We are a national homebuilder that operates in various states with deliveries of 11,478 new homes in 2009.

Recent Business Developments

Overview

During 2009, we continued to adapt our business in light of the current economic landscape. Despite high unemployment rates, increased foreclosures and tightening credit standards, recent demand trends in the communities in which we are selling homes indicate that the markets may be stabilizing as more confident homebuyers are taking advantage of increased affordability resulting from declining home prices, historically low interest rates and government stimulus programs.

We ended the year with \$1.3 billion in cash and a homebuilding debt-to-total capital ratio, net of homebuilding cash, of 36.9%. Additionally, as a result of tax legislation that was enacted in our fourth quarter, we will receive a tax refund of approximately \$320 million in early 2010. We extended our debt maturities by issuing \$400 million of senior notes maturing in 2017 and retiring \$448 million of senior notes and other debt. We also issued \$225 million of stock under our \$275 million equity draw down program. During 2009, we continued to reduce the number of unconsolidated joint ventures in which we have investments to 62 at the end of 2009 from 116 at the end of 2008 and our maximum recourse debt related to those investments to \$288 million at the end of 2009 from \$520 million at the end of 2008.

In late 2008, we experienced higher cancellation rates resulting in an increase in completed, unsold inventory. In the first half of 2009, we were able to convert this inventory into cash by offering higher sales incentives. Additionally, in 2009 we continued focusing on refining our product offering, reducing the number of floor plans and targeting first time and value oriented homebuyers. Our more efficient product offerings have significantly reduced our construction costs and allowed us to meet our customers' demands. These cost savings, combined with reduced sales incentives, improved our gross margins throughout the second half of 2009.

As demand in some of our markets showed signs of stabilization and our balance sheet strengthened, we increased our land purchases in the second half of the year in premium locations that should generate high returns once we start delivering those homes, as well as investing in strategic land-buying opportunities, such as purchasing land from distressed land sellers and banks.

During 2009, one of our more significant joint ventures, LandSource Communities Development LLC ("LandSource"), which filed for bankruptcy in 2008, was reorganized into a new company named Newhall Land Development, LLC, ("Newhall"). The reorganized company emerged from Chapter 11 free of its previous bank debt. As part of the reorganization, we invested \$140 million in exchange for approximately a 15% equity interest in the reorganized Newhall, ownership in several communities that were formerly owned by LandSource, the settlement and release of any claims that might have been asserted against us and certain other claims LandSource had against third parties.

We are also looking to invest in distressed real estate opportunities through Rialto Capital Management ("Rialto"). We may participate in investments Rialto may make, whether through a fund formed by Rialto or as a direct participant in particular investments. Rialto is actively evaluating investment opportunities in various types of residential and commercial real estate assets and/or loans and is currently bidding on pools of distressed real estate assets and/or loans.

During 2009, Rialto became a sub-advisor to AllianceBernstein L.P. with regard to a fund formed under the Federal government's Public-Private Investment Program ("PPIP") to purchase real estate related securities from banks and other financial institutions. We committed to invest \$75 million of the total equity commitments of approximately \$1.1 billion made by private investors in this fund, and the U.S. Treasury committed to a matching amount of approximately \$1.1 billion of equity in the fund, as well as agreed to extend up to approximately \$2.2 billion of financing. Subsequent to November 30, 2009, we invested \$23 million in the PPIP fund, which is focused on acquiring securities backed by real estate loans.

Inventory Impairments and Valuation Adjustments related to Investments in Unconsolidated Entities

We continued evaluating our balance sheet quarterly for impairment on an asset-by-asset basis during fiscal 2009. Based on our evaluation and assessment, during the years ended November 30, 2009, 2008 and 2007, we recorded the following inventory impairments:

	Years Ended November 30,		
	2009	2008	2007
	(In thousands)		
Valuation adjustments to finished homes, CIP and land on which we intend to build homes	\$180,239	195,518	747,843
Valuation adjustments to land we intend to sell or have sold to third parties (1)	95,314	47,791	1,167,294
Write-offs of option deposits and pre-acquisition costs	84,372	97,172	529,981
Total inventory impairments	<u>\$359,925</u>	<u>340,481</u>	<u>2,445,118</u>

(1) The \$1.2 billion of valuation adjustments recorded in 2007 to land we intend to sell or have sold to third parties included \$740.4 million of valuation adjustments related to a portfolio of land we sold to a strategic land investment venture with Morgan Stanley Real Estate Fund II, L.P., an affiliate of Morgan Stanley & Co., Inc., which was formed in November 2007 and in which we have a 20% ownership interest.

During the years ended November 30, 2009, 2008 and 2007, we recorded the following valuation adjustments related to our investments in unconsolidated entities:

	Years Ended November 30,		
	2009	2008	2007
	(In thousands)		
Our share of valuation adjustments related to assets of unconsolidated entities	\$101,893	32,245	364,162
Valuation adjustments to our investments in unconsolidated entities	88,972	172,790	132,206
Total valuation adjustments to our investments in unconsolidated entities	<u>\$190,865</u>	<u>205,035</u>	<u>496,368</u>

The inventory impairments and valuation adjustments to our investments in unconsolidated entities recorded above were estimated based on market conditions and assumptions made by management at the time the valuation adjustments were recorded, which may differ materially from actual results if market conditions or our assumptions change.

Investments in Unconsolidated Entities

For a number of years, we created and participated in joint ventures that acquired and developed land for our homebuilding operations, for sale to third parties or for use in their own homebuilding operations. Through these joint ventures, we reduced the amount we had to invest in order to assure access to potential future homesites, thereby mitigating certain risks associated with land acquisitions, and, in some instances, we obtained access to land to which we could not otherwise have obtained access or could not have obtained access on as favorable terms. Although these ventures served their initial intended purpose of risk mitigation, as the homebuilding market deteriorated and asset impairments resulted in the loss of equity, some of our joint venture partners became financially unable or unwilling to fulfill their obligations. During 2009, we continued reevaluating all of our joint venture arrangements, with particular focus on those ventures with recourse indebtedness, and reduced the number of joint ventures in which we were participating and the recourse indebtedness of those joint ventures. As of November 30, 2009, we had reduced the number of unconsolidated joint ventures in which we were participating to 62 from 261 joint ventures at November 30, 2006 and reduced our net recourse exposure related to unconsolidated joint ventures to \$194.6 million from \$1,102.9 million at November 30, 2006.

Homebuilding Operations

Overview

We primarily sell single-family attached and detached homes, and to a lesser extent, multi-level residential buildings, in communities targeted to first-time, move-up and active adult homebuyers. The average sales price of a Lennar home was \$243,000 in fiscal 2009, compared to \$270,000 in fiscal 2008 and \$297,000 in fiscal 2007. We operate primarily under the Lennar brand name.

Through our own efforts and unconsolidated entities in which we have investments, we are involved in all phases of planning and building in our residential communities including land acquisition, site planning, preparation and improvement of land and design, construction and marketing of homes. For additional information about our investments in and relationships with unconsolidated entities, see Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7 of this Report.

Management and Operating Structure

We balance a local operating structure with centralized corporate level management. Decisions related to our overall strategy, acquisitions of land and businesses, risk management, financing, cash management and information systems are centralized at the corporate level. Our local operating structure consists of divisions, which are managed by individuals who generally have significant experience in the homebuilding industry and, in most instances, in their particular markets. They are responsible for operating decisions regarding land identification, entitlement and development, the management of inventory levels for our current volume levels, community development, home design, construction and marketing our homes.

Diversified Program of Property Acquisition

We generally acquire land for development and for the construction of homes that we sell to homebuyers. Land is subject to specified underwriting criteria and is acquired through our diversified program of property acquisition which may consist of the following:

- Acquiring land directly from individual land owners/developers or homebuilders;
- Acquiring local or regional homebuilders that own, or have options to purchase, land in strategic markets;
- Acquiring land through option contracts, which generally enables us to control portions of properties owned by third parties (including land funds) and unconsolidated entities until we have determined whether to exercise the option;
- Acquiring parcels of land through joint ventures, primarily to reduce and share our risk, among other factors, by limiting the amount of our capital invested in land, while increasing our access to potential future homesites and allowing us to participate in strategic ventures; and
- Acquiring distressed assets from banks, government sponsored enterprises and opportunity funds.

At November 30, 2009, we owned 82,703 homesites and had access through option contracts to an additional 21,173 homesites, of which 7,423 were through option contracts with third parties and 13,750 were through option contracts with unconsolidated entities in which we have investments. At November 30, 2008, we owned 74,681 homesites and had access through option contracts to an additional 38,589 homesites, of which 12,718 were through option contracts with third parties and 25,871 were through option contracts with unconsolidated entities in which we have investments.

Construction and Development

We generally supervise and control the development of land and the design and building of our residential communities with a relatively small labor force. We hire subcontractors for site improvements and virtually all of the work involved in the construction of homes. Arrangements with our subcontractors generally provide that our subcontractors will complete specified work in accordance with price schedules and applicable building codes and laws. The price schedules may be subject to change to meet changes in labor and material costs or for other reasons. We believe that the sources and availability of raw materials to our subcontractors are adequate for our current and planned levels of operation. We generally do not own heavy construction equipment. We finance construction and land development activities primarily with cash generated from operations, debt issuances and equity offerings.

Marketing

We offer a diversified line of homes for first-time, move-up and active adult homebuyers available in a variety of environments ranging from urban infill communities to golf course communities. We sell our homes primarily from models that we have designed and constructed. During 2009, the homes we delivered had an average sales price of \$243,000.

We employ sales associates who are paid salaries, commissions or both to complete on-site sales of homes. We also sell homes through independent brokers. We advertise our communities through newspapers, radio advertisements and other local and regional publications, on billboards and on the Internet, including our website, www.lennar.com. In addition, we advertise our active adult communities in areas where prospective active adult homebuyers live.

Quality Service

We strive to continually improve homeowner customer satisfaction throughout the pre-sale, sale, construction, closing and post-closing periods. Through the participation of sales associates, on-site construction supervisors and customer care associates, all working in a team effort, we strive to create a quality homebuying experience for our customers, which we believe leads to enhanced customer retention and referrals.

The quality of our homes is substantially affected by the efforts of on-site management and others engaged in the construction process, by the materials we use in particular homes or by other similar factors. To the extent bonuses have been paid, management incentive programs have consistently been contingent upon achieving certain customer satisfaction standards.

We warrant our new homes against defective materials and workmanship for a minimum period of one year after the date of closing. Although we subcontract virtually all segments of construction to others and our contracts call for the subcontractors to repair or replace any deficient items related to their trades, we are primarily responsible to the homebuyers for the correction of any deficiencies.

Deliveries

The table below indicates the number of deliveries for each of our homebuilding segments and Homebuilding Other during our last three fiscal years:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
East	3,817	4,957	9,840
Central	1,796	2,442	7,020
West	2,480	4,031	8,739
Houston	2,150	2,736	4,380
Other	1,235	1,569	3,304
Total	<u>11,478</u>	<u>15,735</u>	<u>33,283</u>

Of the total home deliveries listed above, 56, 391 and 1,701, respectively, represent deliveries from unconsolidated entities for the years ended November 30, 2009, 2008 and 2007.

Backlog

Backlog represents the number of homes under sales contracts. Homes are sold using sales contracts, which are generally accompanied by sales deposits. In some instances, purchasers are permitted to cancel sales contracts if they fail to qualify for financing or under certain other circumstances. We experienced a cancellation rate of 18% in 2009, compared to 26% and 30%, respectively, in 2008 and 2007. Substantially all homes currently in backlog will be delivered in fiscal year 2010. We do not recognize revenue on homes under sales contracts until the sales are closed and title passes to the new homeowners.

The table below indicates the backlog dollar value for each of our homebuilding segments and Homebuilding Other as of the end of our last three fiscal years:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
		(In thousands)	
East	\$179,175	202,791	587,100
Central	36,158	23,736	67,344
West	143,868	108,779	408,280
Houston	60,876	57,785	128,340
Other	59,494	63,179	193,073
Total	<u>\$479,571</u>	<u>\$456,270</u>	<u>1,384,137</u>

Of the dollar value of homes in backlog listed above, \$7.2 million, \$12.5 million and \$182.7 million, respectively, represent the backlog dollar value from unconsolidated entities at November 30, 2009, 2008 and 2007.

Financial Services Operations

Mortgage Financing

We primarily originate conforming conventional, FHA-insured, VA-guaranteed residential mortgage loan products and other products to our homebuyers and others through our financial services subsidiaries, Universal American Mortgage Company, LLC and Eagle Home Mortgage, LLC, located generally in the same states as our homebuilding operations as well as other states. In 2009, our financial services subsidiaries provided loans to 87% of our homebuyers who obtained mortgage financing in areas where we offered services. Because of the availability of mortgage loans from our financial services subsidiaries, as well as independent mortgage lenders, we believe most creditworthy purchasers of our homes have access to financing.

During 2009, we originated approximately 17,900 mortgage loans totaling \$4.0 billion, compared to 18,300 mortgage loans totaling \$4.3 billion during 2008. Substantially all of the loans we originate are sold in the

secondary mortgage market on a servicing released, non-recourse basis; although, we remain liable for certain limited representations. Therefore, we have little direct exposure related to the residential mortgages we sell.

We have a corporate risk management policy under which we hedge our interest rate risk on rate-locked loan commitments and loans held-for-sale to mitigate exposure to interest rate fluctuations. We finance our mortgage loan activities with borrowings under our financial services warehouse facilities or from our operating funds. Two of our warehouse repurchase facilities with a maximum aggregate commitment of \$200 million and \$100 million, respectively, mature in June 2010, and the other warehouse facility with a maximum aggregate commitment of \$125 million matures in July 2010. We expect the facilities to be renewed or replaced with other facilities when they mature.

Title Insurance and Closing Services

We provide title insurance and closing services to our homebuyers and others. During 2009, we provided title and closing services for approximately 120,500 real estate transactions, and issued approximately 92,500 title insurance policies through our underwriter, North American Title Insurance Company. Title and closing services are provided by agency subsidiaries in Arizona, California, Colorado, District of Columbia, Florida, Illinois, Maryland, Minnesota, Nevada, New Jersey, New York, Pennsylvania, Texas, Virginia and Wisconsin. Title insurance services are provided in these same states, as well as in Alabama, Delaware, Georgia North Carolina, South Carolina and Tennessee.

Seasonality

We have historically experienced variability in our results of operations from quarter-to-quarter due to the seasonal nature of the homebuilding business.

Competition

The residential homebuilding industry is highly competitive. We compete for homebuyers in each of the market regions where we operate with numerous national, regional and local homebuilders, as well as with resales of existing homes and with the rental housing market. In recent years, lenders' efforts to sell foreclosed homes have become an increasingly competitive factor within the homebuilding industry. We compete for homebuyers on the basis of a number of interrelated factors including location, price, reputation, amenities, design, quality and financing. In addition to competition for homebuyers, we also compete with other homebuilders for desirable properties, raw materials and reliable, skilled labor. We compete for land buyers with third parties in our efforts to sell land to homebuilders and others. We believe we are competitive in the market regions where we operate primarily due to our:

- Balance sheet, where we continue to focus on inventory management and liquidity;
- Access to land, particularly in land-constrained markets;
- Pricing to current market conditions through sales incentives offered to homebuyers; and
- Production of value-engineered homes for first-time and valued-oriented homebuyers.

Our financial services operations compete with other mortgage lenders, including national, regional and local mortgage bankers and brokers, banks, savings and loan associations and other financial institutions, in the origination and sale of mortgage loans. Principal competitive factors include interest rates and other features of mortgage loan products available to the consumer. We compete with other title insurance agencies and underwriters for closing services and title insurance. Principal competitive factors include service and price.

Regulation

Homes and residential communities that we build must comply with state and local laws and regulations relating to, among other things, zoning, construction permits or entitlements, construction material requirements, density requirements, and requirements relating to building design and property elevation, building codes and handling of waste. These include laws requiring the use of construction materials that reduce the need for energy-consuming heating and cooling systems. These laws and regulations are subject to frequent change and often increase construction costs. In some instances, we must comply with laws that require commitments from us to provide roads and other offsite infrastructure to be in place prior to the commencement of new construction. These laws and regulations are usually administered by counties and municipalities and may result in fees and

assessments or building moratoriums. In addition, certain new development projects are subject to assessments for schools, parks, streets and highways and other public improvements, the costs of which can be substantial.

The residential homebuilding industry is also subject to a variety of local, state and federal statutes, ordinances, rules and regulations concerning the protection of health and the environment. These environmental laws include such areas as storm water and surface water management, soil, groundwater and wetlands protection, subsurface conditions and air quality protection and enhancement. Environmental laws and existing conditions may result in delays, may cause us to incur substantial compliance and other costs and may prohibit or severely restrict homebuilding activity in environmentally sensitive regions or areas.

In recent years, several cities and counties in which we have developments have submitted to voters "slow growth" initiatives and other ballot measures that could impact the affordability and availability of land suitable for residential development within those localities. Although many of these initiatives have been defeated, we believe that if similar initiatives were approved, residential construction by us and others within certain cities or counties could be seriously impacted.

In order to make it possible for some of our homebuyers to obtain FHA-insured or VA-guaranteed mortgages, we must construct the homes they buy in compliance with regulations promulgated by those agencies.

Various states have statutory disclosure requirements relating to the marketing and sale of new homes. These disclosure requirements vary widely from state-to-state. In addition, some states require that each new home be registered with the state at or before the time title is transferred to a buyer (e.g., the Texas Residential Construction Commission Act).

In some states, we are required to be registered as a licensed contractor and comply with applicable rules and regulations. In various states, our new home consultants are required to be registered as licensed real estate agents and to adhere to the laws governing the practices of real estate agents.

Our mortgage and title subsidiaries must comply with applicable real estate laws and regulations. The subsidiaries are licensed in the states in which they do business and must comply with laws and regulations in those states. These laws and regulations include provisions regarding capitalization, operating procedures, investments, lending and privacy disclosures, forms of policies and premiums.

A subsidiary of Newhall, of which we currently, indirectly own 15%, provides water to a portion of Los Angeles County, California. This subsidiary is subject to extensive regulation by the California Public Utilities Commission.

Compliance Policy

We have a Code of Business and Ethics that requires every associate (i.e., employee) and officer to at all times deal fairly with the Company's customers, subcontractors, suppliers, competitors and associates, and states that all our associates, officers and directors are expected to comply at all times with all applicable laws, rules and regulations. Despite this, there are instances in which subcontractors or others through which we do business engage in practices that do not comply with applicable regulations and guidelines. There have been instances in which some of our associates were aware of these practices and did not take steps to prevent them. When we learn of practices relating to homes we build or financing we provide that do not comply with applicable regulations or guidelines, we move actively to stop the non-complying practices as soon as possible and we have taken disciplinary action with regard to our associates who were aware of the practices, including in some instances terminating their employment. Our Code of Business and Ethics also has procedures in place that allows whistleblowers to submit their concerns regarding our operations, financial reporting, business integrity or any other related matter anonymously to the Audit Committee of our Board of Directors and/or to the non-management directors of our Board of Directors, thus ensuring their protection from retaliation.

Associates

At December 31, 2009, we employed 3,835 individuals of whom 2,184 were involved in our homebuilding operations and 1,651 were involved in our financial services operations, compared to November 30, 2008, when we employed 4,913 individuals of whom 3,055 were involved in our homebuilding operations and 1,858 were involved in our financial services operations. We do not have collective bargaining agreements relating to any of our associates. However, we subcontract many phases of our homebuilding operations and some of the subcontractors we use have associates who are represented by labor unions.

Relationship with LNR Property Corporation

In 1997, we transferred our commercial real estate investment and management business to LNR Property Corporation (“LNR”), and spun-off LNR to our stockholders. As a result, LNR became a publicly-traded company, and the family of Stuart A. Miller, our President, Chief Executive Officer and a Director, which had voting control of us, became the controlling shareholder of LNR.

Since the spin-off, we have entered into a number of joint ventures and other transactions with LNR. Many of the joint ventures were formed to acquire and develop land, part of which was subsequently sold to us or other homebuilders for residential building and part of which was subsequently sold to LNR for commercial development. In February 2005, LNR was acquired by a privately-owned entity. Although Mr. Miller’s family was required to purchase a 20.4% financial interest in that privately-owned entity, this interest is non-voting and neither Mr. Miller nor anyone else in his family is an officer or director, or otherwise is involved in the management, of LNR or its parent. Nonetheless, because the Miller family has a 20.4% financial, non-voting, interest in LNR’s parent, significant transactions with LNR, or entities in which it has an interest, have historically been and continued to be reviewed and approved by the Independent Directors Committee of our Board of Directors.

LandSource/Newhall Transactions

In January 2004, a company of which we and LNR each owned 50% acquired The Newhall Land and Farming Company for approximately \$1 billion, including \$200 million we contributed and \$200 million that LNR contributed (the remainder came from borrowings and sales of properties to LNR). Subsequently, we and LNR each transferred our interests in most of our joint ventures to the jointly-owned company that had acquired The Newhall Land and Farming Company, and that company was renamed LandSource Communities Development LLC (“LandSource”).

In February 2007, LandSource admitted MW Housing Partners as a new strategic partner. As part of the transaction, the joint venture obtained \$1.6 billion of non-recourse financing, which consisted of a \$200 million five-year Revolving Credit Facility, a \$1.1 billion six-year Term Loan B Facility and a \$244 million seven-year Second Lien Term Facility. The transaction resulted in a cash distribution to us of \$707.6 million. Our resulting ownership of LandSource was 16%. As a result of the recapitalization, we recognized a pretax financial statement gain of \$175.9 million in 2007.

In June 2008, LandSource and a number of its subsidiaries commenced proceedings under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware. In November 2008, our land purchase options with LandSource were terminated, thus, in 2008 we recognized a deferred profit of \$101.3 million (net of \$31.8 million of write-offs of option deposits and pre-acquisition costs and other write-offs) related to the 2007 recapitalization of LandSource.

In July 2009, the United States Bankruptcy Court for the District of Delaware confirmed the plan of reorganization for LandSource. As a result of the bankruptcy proceedings, LandSource was reorganized into a new company named Newhall Land Development, LLC, (“Newhall”). The reorganized company emerged from Chapter 11 free of its previous bank debt. As part of the reorganization, we invested \$140 million in exchange for approximately a 15% equity interest in the reorganized Newhall, ownership in several communities that were formerly owned by LandSource, the settlement and release of any claims that might have been asserted against us and certain other claims LandSource had against third parties.

Relationship with Rialto Capital Management

Over the last three years we have had a correction in housing values, which resulted in a significant drop in consumer spending and impairment in housing values. Currently, the FDIC, many banks and financial institutions have billions of dollars of underperforming and illiquid assets on their balance sheets, which have significantly curtailed their lending capacity. In 2007, Rialto was formed by Jeffrey Krasnoff, who was the co-founder of LNR Property Corporation, to focus on acquisitions of distressed debt and other real estate assets utilizing Rialto’s abilities to source, underwrite, price, turnaround and ultimately monetize such assets in markets across the United States. We might participate in investments Rialto may make, whether through a fund formed by Rialto or as a direct participant in particular investments. We will participate in profits generated by Rialto and receive fees related to those investments. In addition, this may give us access to assets for use in our homebuilding operations.

Rialto's first venture was to become a sub-advisor to AllianceBernstein L.P. with regard to Alliance Bernstein Legacy Securities Master Fund LLC, a fund formed under the Federal government's PPIP to purchase real estate related securities from banks and other financial institutions. We committed to invest \$75 million of the total of approximately \$1.1 billion of equity commitments made by private investors in this fund, and the U.S. Treasury committed to a matching amount of approximately \$1.1 billion of equity in the fund, as well as agreeing to extend up to approximately \$2.2 billion of financing. Subsequent to November 30, 2009, we invested \$23 million in the PPIP fund, which is focused on acquiring securities backed by real estate loans.

NYSE Certification

We submitted our 2008 Annual CEO Certification to the New York Stock Exchange on April 17, 2009. The certification was not qualified in any respect.

Available Information

Our corporate website is www.lennar.com. We make available on our website, free of charge, our Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to these reports, as soon as reasonably practicable after we electronically file these documents with, or furnish them to, the Securities and Exchange Commission. Information on our website is not part of this document.

Our website also includes printable versions of our Corporate Governance Guidelines, our Code of Business Conduct and Ethics and the charters for each of our Audit, Compensation and Nominating and Corporate Governance Committees of our Board of Directors. Each of these documents is also available in print to any stockholder who requests a copy by addressing a request to:

Item 1A. Risk Factors.

The following are what we believe to be the principal risks that could cause a material adverse effect upon our business, financial condition, results of operations, cash flows, strategies and prospects.

Homebuilding Market and Economic Risks

The homebuilding industry has experienced a significant downturn. A continuing decline in demand for new homes coupled with an increase in the inventory of available new homes and alternatives to new homes could adversely affect our sales volume and pricing even more than has occurred to date.

The homebuilding industry has experienced a significant downturn. As a result, we have experienced a significant decline in demand for newly built homes in almost all of our markets. Homebuilders' inventories of unsold new homes have increased as a result of increased cancellation rates on pending contracts as new homebuyers sometimes find it more advantageous to forfeit a deposit than to complete the purchase of the home. In addition, an oversupply of alternatives to new homes, such as rental properties and used homes (including foreclosed homes), has depressed prices and reduced margins. This combination of lower demand and higher inventories affects both the number of homes we can sell and the prices at which we can sell them. In 2008 and 2009, we experienced periods of significant decline in our sales results, significant reductions in our margins as a result of higher levels of sales incentives and price concessions, and a higher than normal cancellation rate. We have no basis for predicting how long demand and supply will remain out of balance in markets where we operate or whether sales volumes or pricing will return to prior levels.

Demand for new homes is sensitive to economic conditions over which we have no control, such as the availability of mortgage financing and the level of employment.

Demand for new homes is sensitive to changes in economic conditions such as the level of employment, consumer confidence, consumer income, the availability of financing and interest rate levels. During 2008 and 2009, the mortgage lending industry experienced significant instability. As a result of increased default rates,

particularly (but not entirely) with regard to sub-prime and other non-conforming loans, many lenders have reduced their willingness to make, and tightened their credit requirements with regard to, residential mortgage loans. Fewer loan products, stricter loan qualification standards and higher down payment requirements have made it more difficult for some borrowers to finance the purchase of our homes. Although our finance company subsidiaries offer mortgage loans to potential buyers of most of the homes we build, we may no longer be able to offer financing terms that are attractive to our potential buyers. Lack of availability of mortgage financing at acceptable rates reduces demand for the homes we build, including in some instances causing potential buyers to cancel contracts they have signed.

There has also been a substantial loss of jobs in the United States during 2008 and 2009. People who are not employed or are concerned about loss of their jobs are unlikely to purchase new homes and may be forced to try to sell the homes they own. Therefore, the current employment situation can adversely affect us both by reducing demand for the homes we build and by increasing the supply of homes for sale.

Mortgage defaults by homebuyers who financed homes using non-traditional financing products are increasing the number of homes available for resale.

During the period of high demand in the homebuilding industry, many homebuyers financed their purchases using non-traditional adjustable rate or interest only mortgages or other mortgages, including sub-prime mortgages that involved, at least during initial years, monthly payments that were significantly lower than those required by conventional fixed rate mortgages. As a result, new homes became more affordable. However, as monthly payments for these homes have increased either as a result of increasing adjustable interest rates or as a result of principal payments coming due, some of these homebuyers have defaulted on their payments and had their homes foreclosed, which has increased the inventory of homes available for resale. This is likely to continue. Foreclosure sales and other distress sales may result in further declines in market prices for homes. In an environment of declining home prices, many homebuyers may delay purchases of homes in anticipation of lower prices in the future. In addition, as lenders perceive deterioration in credit quality among homebuyers, lenders have been eliminating some of the available non-traditional and sub-prime financing products and increasing the qualifications needed for mortgages or adjusting their terms to address increased credit risk. In general, to the extent mortgage rates increase or lenders make it more difficult for prospective buyers to finance home purchases, it becomes more difficult or costly for customers to purchase our homes, which has an adverse effect on our sales volume.

We have had to take significant write-downs of the carrying values of the land we own and of our investments in unconsolidated entities, and a continuing decline in land values could result in additional write-downs.

Some of the land we currently own was purchased at high prices and have been written down to fair value as a result of current market conditions. Also, we obtained options to purchase land at prices that no longer are attractive, and in connection with those options we made non-refundable deposits and, in some instances, incurred pre-acquisition costs. When demand fell, we were required to take significant write-downs of the carrying value of our land inventory and we elected not to exercise high price options, even though that required us to forfeit deposits and write-off pre-acquisition costs.

Additionally, as a result of these market conditions, we recorded significant valuation adjustments to our investments in unconsolidated entities and recorded our share of valuation adjustments relative to assets of our unconsolidated entities.

The combination of land inventory impairments, write-offs of option deposits and pre-acquisition costs and valuation adjustments relating to our investments in unconsolidated entities had a material negative effect on our operating results for fiscal 2007, 2008 and 2009, contributing to most of our net loss in fiscal 2008 and 2009. If market conditions continue to deteriorate, some of our assets may be subject to further write-downs in the future, decreasing the assets reflected on our balance sheet and adversely affecting our stockholders' equity.

Inflation can adversely affect us, particularly in a period of declining home sale prices.

Inflation can have a long-term impact on us because increasing costs of land, materials and labor require us to attempt to increase the sale prices of homes in order to maintain satisfactory margins. Although an excess of supply over demand for new homes, such as the one we are currently experiencing, requires that we reduce prices, rather than increase them, it does not necessarily result in reductions, or prevent increases, in the costs of materials and labor. Under those circumstances, the effect of cost increases is to reduce the margins on the homes we sell. That makes it more difficult for us to recover the full cost of previously purchased land, and has contributed to the significant reductions in the value of our land inventory.

We face significant competition in our efforts to sell new homes.

The homebuilding industry is highly competitive. We compete in each of our markets with numerous national, regional and local homebuilders. This competition with other homebuilders could reduce the number of homes we deliver or cause us to accept reduced margins in order to maintain sales volume.

We also compete with the resale of existing homes, including foreclosed homes, sales by housing speculators and available rental housing. As demand for homes has slowed, competition, including competition with homes purchased for speculation rather than as places to live and competition with foreclosed homes, has created increased downward pressure on the prices at which we are able to sell homes, as well as upon the number of homes we can sell.

Operational Risks

Homebuilding is subject to warranty and liability claims in the ordinary course of business that can be significant.

As a homebuilder, we are subject to home warranty and construction defect claims arising in the ordinary course of business. We are also subject to liability claims for injuries that occur in the course of construction activities. We record warranty and other reserves for the homes we sell based on historical experience in our markets and our judgment of the qualitative risks associated with the types of homes we built. We have, and many of our subcontractors have, general liability, property, errors and omissions, workers compensation and other business insurance. These insurance policies protect us against a portion of our risk of loss from claims, subject to certain self-insured retentions, deductibles and other coverage limits. However, because of the uncertainties inherent in these matters, we cannot provide assurance that our insurance coverage or our subcontractors' insurance and financial resources will be adequate to address all warranty, construction defect and liability claims in the future. Additionally, the coverage offered and the availability of general liability insurance for construction defects are currently limited and costly. As a result, an increasing number of our subcontractors are unable to obtain insurance, and we have in many cases waived our customary insurance requirements. There can be no assurance that coverage will not be further restricted and become even more costly.

Performance of subcontractors and quality and suitability of building materials.

We rely on subcontractors to perform the actual construction of our homes, and in many cases, to select and obtain raw materials. Despite our detailed specifications and quality control procedures, in some cases, improper construction processes or defective materials, such as Chinese drywall, were used in the construction of our homes. When we find these issues, we repair them in accordance with our warranty obligations. Defective products widely used by the homebuilding industry can result in the need to perform extensive repairs to large numbers of homes. The cost to the Company in complying with our warranty obligations in these cases may be significant if we are unable to recover the cost of repair from subcontractors, materials suppliers and insurers.

Natural disasters and severe weather conditions could delay deliveries, increase costs and decrease demand for new homes in affected areas.

Many of our homebuilding operations are conducted in areas that are subject to natural disasters and severe weather. The occurrence of natural disasters or severe weather conditions can delay new home deliveries, increase costs by damaging inventories and negatively impact the demand for new homes in affected areas. Furthermore, if our insurance does not fully cover business interruptions or losses resulting from these events, our results of operations, liquidity or capital resources could be adversely affected.

Supply shortages and other risks related to the demand for skilled labor and building materials could increase costs and delay deliveries.

Increased costs or shortages of skilled labor and/or lumber, framing, concrete, steel and other building materials could cause increases in construction costs and construction delays. We generally are unable to pass on increases in construction costs to customers who have already entered into sales contracts, as those sales contracts generally fix the price of the homes at the time the contracts are signed, which may be well in advance of the construction of the home. Sustained increases in construction costs may, over time, erode our margins, particularly if pricing competition restricts our ability to pass on any additional costs of materials or labor, thereby decreasing our margins.

Reduced numbers of home sales could lead us to absorb additional costs.

We incur many costs even before we begin to build homes in a community. These include costs of preparing land and installing roads, sewage and other utilities, as well as taxes and other costs related to ownership of the land on which we plan to build homes. Reducing the rate at which we build homes extends the length of time it takes us to recover these costs. Also, we frequently acquire options to purchase land and make deposits that will be forfeited if we do not exercise the options within specified periods. Because of current market conditions, we have had to terminate a number of these options, resulting in significant forfeitures of deposits we made with regard to the options, and in some instances, pre-acquisition costs we incurred with regard to properties that were the subject of options we terminated.

If our financial performance further declines, we may not be able to maintain compliance with the covenants in our credit facilities and senior debt securities.

Our \$1.1 billion Credit Facility imposes certain restrictions on our operations. The most significant restrictions relate to debt incurrence, sales of assets other than in the ordinary course of business, cash distributions and investments by us and certain of our subsidiaries. In addition, our Credit Facility requires compliance with certain financial covenants, including a minimum adjusted consolidated tangible net worth requirement and a maximum permitted leverage ratio. Also, because we currently do not have investment grade debt ratings, we can only borrow up to specified percentages of the book values of various types of our assets, referred to in the credit agreement as our borrowing base. Our unrestricted cash in excess of \$750 million is excluded from our borrowing base. Because of these limitations, we were unable to borrow under the Credit Facility for a majority of 2009.

While we currently are in compliance with the financial covenants in the Credit Facility agreement, it is possible that in fiscal 2010 we will not be in compliance with our covenants if we have significant valuation adjustments and other write-offs during the year, issue debt and/or make significant investments in strategic joint ventures. If we are not in compliance and are unable to obtain a waiver or amendment to the Credit Facility, then it would constitute a default with regard to our Credit Facility, which would give the lenders the right to terminate the Credit Facility and require us to replace or cash collateralize \$177.9 million of letters of credit outstanding under the Credit Facility as of November 30, 2009. If our lenders required us to replace or cash collateralize the letters of credit outstanding under the Credit Facility and we were unable to do so, that might entitle the holders of \$2.2 billion of debt securities we have sold into the capital markets to cause the sums evidenced by those debt securities to become due immediately. We would not be able to repay those amounts without selling substantial assets, which we might have to do at prices well below the fair values, and the carrying values, of the assets. Such forced sales would have a material adverse effect on our business and financial condition.

We may be unable to obtain suitable financing and bonding for the development of our communities.

Our business depends upon our ability to finance the development of our residential communities and to provide bonds to ensure the completion of our projects. We have in the past used our Credit Facility to finance development activities and we currently use it to provide or secure some of the bonds we need. In addition, we have from time-to-time raised funds by selling debt securities into public and private capital markets, although this is expensive, and could be difficult, to do under current market conditions. The willingness of lenders to make funds available to us has been affected both by factors relating to us as a borrower, and by a decrease in the willingness of banks and other lenders to lend to homebuilders generally. If we were unable to finance the development of our communities, or if we were unable to provide required surety bonds for our projects, our business operations and revenues could suffer materially.

Our ability to continue to grow our business and operations in a profitable manner depends to a significant extent upon our ability to access capital on favorable terms.

Our ability to access capital on favorable terms has been an important factor in growing our business and operations in a profitable manner. In 2007 and 2008, each of the principal credit rating agencies lowered our credit ratings, and we no longer have investment grade ratings. This makes it more costly, and could make it more difficult, for us to access the debt capital markets for funds we may require in order to implement our business plans and achieve our growth objectives. If we are subject to a further downgrade, it would exacerbate such difficulties.

Increased debt costs will make it more difficult for us to have positive net income.

In April 2009, we sold \$400 million principal amount of 12.25% senior notes due 2017. During fiscal 2009, we retired approximately \$448 million principal amount of senior notes and other debt. The annual interest cost of the debt we retired was approximately \$29 million, while the annual interest cost of the notes we sold in April 2009 is approximately \$49 million. Thus, during the year we increased the annual interest cost of our outstanding debt securities by approximately \$20 million. This affected our results of operations in fiscal 2009 and will affect our results in 2010 and subsequent years. It could make it more difficult for us to achieve positive net income.

The repurchase warehouse credit facilities of our Financial Services segment will expire in 2010.

Our Financial Services segment has two warehouse repurchase facilities with a maximum aggregate commitment of \$200 million and \$100 million, respectively, that mature in June 2010 and another warehouse repurchase facility with a maximum aggregate commitment of \$125 million that matures in July 2010. The Financial Services segment uses these facilities to finance its mortgage lending activities until the mortgage loans are sold to investors and expects both facilities to be renewed or replaced with other facilities when they mature. If we are unable to renew or replace these facilities when they mature, it could seriously impede the activities of our Financial Services segment.

We conduct some of our operations through unconsolidated joint ventures with independent third parties in which we do not have a controlling interest and we can be adversely impacted by joint venture partners' failure to fulfill their obligations.

For a number of years, we created and participated in joint ventures that acquired and developed land for our homebuilding operations, for sale to third parties or for use in their own homebuilding operations. Through these joint ventures, we reduced the amount we had to invest in order to assure access to potential future homesites, and, in some instances, we obtained access to land to which we could not otherwise have obtained access or could not have obtained access on as favorable terms. However, as the homebuilding market deteriorated beginning in 2006, many of our joint venture partners became financially unable or unwilling to fulfill their obligations.

Most joint ventures borrowed money to help finance their activities, and although recourse on the loans was generally limited to the joint ventures and their properties, frequently we and our joint venture partners were required to provide maintenance guarantees (guarantees that the values of the joint ventures' assets would be at least specified percentages of their borrowings) or limited repayment guarantees.

Our joint venture strategy depends in large part on the ability of our joint venture partners to perform their obligations under our agreements with them. If a joint venture partner does not perform its obligations, we may be required to make significant financial expenditures or otherwise undertake the performance of obligations not satisfied by our partner at significant cost to us. Also, when we have guaranteed joint venture obligations, we have been given the right to be reimbursed by our joint venture partners for any amounts by which we pay more than our pro rata share of the joint ventures' obligations. However, particularly if our joint venture partners are having financial problems, we may have difficulty collecting the sums they owe us, and therefore, we may be required to pay a disproportionately large portion of the guaranteed amounts. In addition, because we lack a controlling interest in these joint ventures, we are usually unable to require that they sell assets, return invested capital or take any other action without the consent of at least one of our joint venture partners. As a result, without joint venture partner consent, we may be unable to liquidate our joint venture investments to generate cash. Even if we are able to liquidate joint venture investments, the amounts received upon liquidation may be insufficient to cover the costs we have incurred in satisfying joint venture obligations.

During 2007, 2008 and 2009, we have significantly reduced the number of joint ventures in which we participate and our exposure to recourse indebtedness of such joint ventures. However, the risks to us from joint ventures in which we are a participant are likely to continue at least as long as the value of residential properties continues to decline.

The unconsolidated entities in which we have investments may not be able to modify the terms of their debt arrangements.

Some of the unconsolidated entities' debt arrangements contain financial covenants they may not be able to meet. Additionally, certain joint venture loan agreements have minimum number of homesite takedown requirements in which the joint ventures are required to sell a minimum number of homesites over a stated

amount of time. Due to the deterioration of the homebuilding market, many of the joint ventures are in the process of repaying, refinancing, renegotiating or extending their loans. This action may be required, for example, in the case of an expired maturity date or a failure to comply with the loan's covenants. There can be no assurance that the joint ventures will be able to finance, refinance, renegotiate or extend, on terms we and our joint venture partners deem acceptable, all of the joint venture loans that are currently being renegotiated. If joint ventures are unsuccessful in these efforts, we could be required to provide at least a portion of the funds the joint ventures need to be able to repay the loans.

We could be adversely impacted by the loss of key management personnel.

Our future success depends, to a significant degree, on the efforts of our senior management. Our operations could be adversely affected if key members of senior management cease to be active in our company. As a result of a decline in our stock price, previous retention mechanisms, such as equity awards, have diminished in value.

If our ability to resell mortgages to investors is impaired, we may be required to broker loans or fund them ourselves.

Substantially all of the loans we originate are sold within a short period in the secondary mortgage market on a servicing released, non-recourse basis; although, we remain liable for certain limited representations and warranties related to loan sales. If there is a decline in the secondary mortgage market, our ability to sell mortgages could be adversely impacted and we could be required to fund our commitments to our homebuyers with our own financial resources or require our homebuyers to find other sources of financing. If we became unable to sell loans into the secondary mortgage market or directly to the Federal National Mortgage Association ("Fannie Mae") and the Federal Home Loan Mortgage Corporation ("Freddie Mac"), we would either have to curtail our origination of mortgage loans, which among other things, could significantly reduce our ability to sell homes, or to commit our own funds to long term investments in mortgage loans, which could, among other things, delay the time when we recognize revenues from home sales on our statements of operations.

Our Financial Services segment is adversely affected by reduced demand for our homes.

A majority of the mortgage loans made by our Financial Services segment are made to buyers of homes we build. Therefore, a decrease in the demand for our homes adversely affects the financial results of this segment of our business.

If housing markets improve, we may not be able to acquire land suitable for residential homebuilding at reasonable prices, which could increase our costs and reduce our revenues, earnings and margins.

Our long-term ability to build homes depends upon our acquiring land suitable for residential building at reasonable prices in locations where we want to build. For a number of years, we experienced an increase in competition for suitable land as a result of land constraints in many of our markets, which increased the price we had to pay to acquire land. Then, when demand for new homes began to drop beginning in 2006, we started to reduce our land inventory to bring it in line with the reduced rate at which we were absorbing land into our operations. While the current reduced demand for new homes is making it possible to purchase land at prices far below those we were required to pay prior to 2006, in the long term, competition for suitable land is likely to increase again, and as available land is developed, the cost of acquiring additional suitable land could rise, and in some areas suitable land might not be available at reasonable prices. Any land shortages or any decrease in the supply of suitable land at reasonable prices could limit our ability to develop new communities or result in increased land costs that we are not able to pass through to our customers. This could adversely impact our revenues, earnings and margins.

Regulatory Risks

Federal laws and regulations that adversely affect liquidity in the secondary mortgage market could hurt our business.

Changes in federal laws and regulations could have the effect of curtailing the activities of Fannie Mae and Freddie Mac. These organizations provide significant liquidity to the secondary mortgage market. Any curtailment of their activities could increase mortgage interest rates and increase the effective cost of our homes, which could reduce demand for our homes and adversely affect our results of operations.

Our homebuyers' ability to qualify for and obtain affordable mortgages could be impacted by changes in government sponsored entities and private mortgage insurance companies supporting the mortgage market.

Changes made by Fannie Mae, Freddie Mac, FHA/VA sponsored mortgage programs, as well as changes made by private mortgage insurance companies, could result in a reduction in the ability for homebuyers to qualify for mortgages due to tighter lending standards such as higher income requirements, larger down payments, increased reserves and higher credit scores. Higher income requirements could reduce the amount that homebuyers can qualify for when buying new homes. Larger down payment requirements and increased asset reserve thresholds could prevent or delay some homebuyers from entering the market. Increased credit score requirements could also eliminate a segment of potential homebuyers.

Government entities in regions where we operate have adopted or may adopt, slow or no growth initiatives, which could adversely affect our ability to build or timely build in these areas.

Some state and local governments in areas where we operate have approved, and others where we operate may approve, various slow growth or no growth homebuilding initiatives and other ballot measures that could negatively impact the availability of land and building opportunities within those jurisdictions. Approval of slow growth, no growth or similar initiatives (including the effect of these initiatives on existing entitlements and zoning) could adversely affect our ability to build or timely build and sell homes in the affected markets and/or create additional administrative and regulatory requirements and costs, which, in turn, could have an adverse effect on our future revenues and earnings.

Compliance with federal, state and local regulations related to our business could create substantial costs both in time and money, and some regulations could prohibit or restrict some homebuilding ventures.

We are subject to extensive and complex laws and regulations that affect the land development and homebuilding process, including laws and regulations related to zoning, permitted land uses, levels of density, building design, elevation of properties, water and waste disposal and use of open spaces. In addition, we are subject to laws and regulations related to workers' health and safety. We also are subject to a variety of local, state and federal laws and regulations concerning the protection of health and the environment. In some of the markets where we operate, we are required by law to pay environmental impact fees, use energy-saving construction materials and give commitments to municipalities to provide certain infrastructure such as roads and sewage systems. We generally are required to obtain permits, entitlements and approvals from local authorities to commence and carry out residential development or home construction. Such permits, entitlements and approvals may, from time-to-time, be opposed or challenged by local governments, neighboring property owners or other interested parties, adding delays, costs and risks of non-approval to the process. Our obligation to comply with the laws and regulations under which we operate, and our need to ensure that our associates, subcontractors and other agents comply with these laws and regulations, could result in delays in construction and land development, cause us to incur substantial costs and prohibit or restrict land development and homebuilding activity in certain areas in which we operate.

We can be injured by failures of persons who act on our behalf to comply with applicable regulations and guidelines.

Although we expect all of our associates (i.e., employees), officers and directors to comply at all times with all applicable laws, rules and regulations, there are instances in which subcontractors or others through whom we do business engage in practices that do not comply with applicable regulations or guidelines. Sometimes our associates have been aware of these practices but did not take steps to prevent them. When we learn of practices relating to homes we build or financing we provide that do not comply with applicable regulations or guidelines, we move actively to stop the non-complying practices as soon as possible and we have taken disciplinary action with regard to our associates who were aware of the practices, including in some instances terminating their employment. However, regardless of the steps we take after we learn of practices that do not comply with applicable regulations or guidelines, we can in some instances be subject to fines or other governmental penalties, and our reputation can be injured, due to the practices' having taken place.

Tax law changes could make home ownership more expensive or less attractive.

Significant expenses of owning a home, including mortgage interest expense and real estate taxes, generally are deductible expenses for the purpose of calculating an individual's federal, and in some cases state, taxable income. If the government were to make changes to income tax laws that eliminate or substantially reduce these income tax deductions, the after-tax cost of owning a home would increase substantially. This could adversely impact demand for, and/or sales prices of, new homes.

Other Risks

We have a stockholder who can exercise significant influence over matters that are brought to a vote of our stockholders.

Stuart A. Miller, our President, Chief Executive Officer and a Director, has voting control, through personal holdings and family-owned entities, of Class A and Class B common stock that enables Mr. Miller to cast approximately 46% of the votes that may be cast by the holders of our outstanding Class A and Class B common stock combined. That effectively gives Mr. Miller the power to control the election of our directors and the approval of matters that are presented to our stockholders. Mr. Miller's voting power might discourage someone from acquiring us or from making a significant equity investment in us, even if we needed the investment to meet our obligations and to operate our business. Also, because of his voting power, Mr. Miller may be able to authorize actions that are contrary to our other stockholders' desires.

We may not be able to benefit from net operating loss ("NOL") carryforwards.

We suffered significant losses in 2007, 2008 and 2009 for both tax and financial statement purposes. We were able to carry back 100% of our 2007 tax loss and most of our 2008 tax loss. However, for our 2009 fiscal year the legislation enacted in November 2009 that expanded the NOL carryback to 5 years only allows 50% of taxable income earned in 2004 to be offset with 2009 loss. As such, we will only receive tax benefits with regard to the remainder of the losses that were not carried back, if we have taxable income in the 20 year NOL carryforward period. Additionally, we have fully reserved against all our deferred tax assets, including our NOL carryforward that we were carrying on our financial statements, due to the possibility that we may not have taxable income that will enable us to benefit from them. However, these deferred tax assets will be available to us if we have sufficient future taxable income to take advantage of them.

Trading in our shares could substantially reduce our ability to use tax loss carryforwards.

Under the Internal Revenue Code, if there is a greater than 50% change of ownership of our stock during any three-year period caused by more than 5% shareholders, the ability to utilize NOL carryforwards are limited to the market value of the Company times the long term federal tax exempt rate. This change of ownership limitation can occur as a result of purchases and sales in the market by persons who become owners of more than 5% of our stock, even without becoming a new majority owner. During the past three years, there have not been any significant changes in our holdings by 5% shareholders. However, it is possible that as a result of future stock trading, within a three year period buyers could acquire in the market 5% or greater ownership interests in our stock totaling more than 50%. If that occurred, our ability to apply our tax loss carryforwards could become limited.

Item 1B. Unresolved Staff Comments.

Not applicable.

Executive Officers of Lennar Corporation

The following individuals are our executive officers as of January 29, 2010:

<u>Name</u>	<u>Position</u>	<u>Age</u>
Stuart A. Miller	President and Chief Executive Officer	52
Jonathan M. Jaffe	Vice President and Chief Operating Officer	50
Richard Beckwitt	Executive Vice President	50
Bruce E. Gross	Vice President and Chief Financial Officer	51
Diane J. Bessette	Vice President and Treasurer	49
Mark Sustana	Secretary and General Counsel	48
David M. Collins	Controller	40

Mr. Miller has served as our President and Chief Executive Officer since 1997 and is one of our Directors. Before 1997, Mr. Miller held various executive positions with us.

Mr. Jaffe has served as Vice President since 1994 and has served as our Chief Operating Officer since December 2004. Before that time, Mr. Jaffe served as a Regional President in our Homebuilding operations. Additionally, prior to his appointment as Chief Operating Officer, Mr. Jaffe was one of our Directors from 1997 through June 2004.

Mr. Beckwitt has served as our Executive Vice President since March 2006. In this position, Mr. Beckwitt is involved in all operational aspects of our company. Mr. Beckwitt served on the Board of Directors of D.R. Horton, Inc. from 1993 to November 2003. From 1993 to March 2000, he held various executive officer positions at D.R. Horton, including President of the company. From March 2000 to April 2003, Mr. Beckwitt was the owner and principal of EVP Capital, L.P., (a venture capital and real estate advisory company). Mr. Beckwitt retired in May 2003 to design and personally construct a second home in Maine.

Mr. Gross has served as Vice President and our Chief Financial Officer since 1997. Before that, Mr. Gross was Senior Vice President, Controller and Treasurer of Pacific Greystone Corporation.

Ms. Bessette joined us in 1995 and served as our Controller from 1997 to 2008. Since February 2008, she has served as our Treasurer. She was appointed a Vice President in 2000.

Mr. Sustana has served as our Secretary and General Counsel since 2005. Before joining Lennar, Mr. Sustana held various legal positions at GenTek, Inc., a manufacturer of communication products, industrial components and performance chemicals.

Mr. Collins joined us in 1998 and has served as our Controller since February 2008. Before becoming Controller, Mr. Collins served as our Executive Director of Financial Reporting.

Item 2. Properties.

We lease and maintain our executive offices in an office complex in Miami, Florida. Our homebuilding and financial services offices are located in the markets where we conduct business, primarily in leased space. We believe that our existing facilities are adequate for our current and planned levels of operation.

Because of the nature of our homebuilding operations, significant amounts of property are held as inventory in the ordinary course of our homebuilding business. We discuss these properties in the discussion of our homebuilding operations in Item 1 of this Report.

Item 3. Legal Proceedings.

We are party to various claims and lawsuits which arise in the ordinary course of business, but we do not consider the volume of our claims and lawsuits unusual given the number of homes we deliver and the fact that the lawsuits often relate to homes delivered several years before the lawsuits are commenced. Although the specific allegations in the lawsuits differ, they most commonly involve claims that we failed to construct homes in particular communities in accordance with plans and specifications or applicable construction codes and seek reimbursement for sums allegedly needed to remedy the alleged deficiencies, assert contract issues or relate to personal injuries. Lawsuits of these types are common within the homebuilding industry. We are a plaintiff in many cases in which we seek contribution from our subcontractors for home repair costs. The costs incurred by us in construction defect lawsuits are offset by warranty reserves, our third party insurers, subcontractor insurers and indemnity contributions from subcontractors. We do not believe that the ultimate resolution of these claims or lawsuits will have a material adverse effect on our business, financial position, results of operations or cash flows. From time-to-time, we also receive notices from environmental agencies regarding alleged violations of environmental laws. We typically settle these matters before they reach litigation for amounts that are not material to us.

In April 2008, we were named as a nominal defendant in a derivative suit in the United States District Court for the Southern District of Florida, Miami Division, entitled *Doris Staehr, Derivatively on Behalf of Lennar Corporation v. Stuart A. Miller, et al.*, Case No. 08-20990-CIV, in which the plaintiff purports to assert claims for our benefit against some of our current and former officers and directors, primarily relating to allegedly inadequate or incorrect disclosures about the likelihood of a decline in the housing market and the effects it would have on us. Because the suit is allegedly brought for our benefit, it does not seek any damages from us. In August 2008, we moved to dismiss the suit on the ground that the plaintiff failed to make a demand on our directors that under most circumstances is a prerequisite to a derivative suit. The director defendants moved to dismiss for that and other reasons. In March 2009, the Court issued an order requiring the plaintiff to replead her complaint to avoid confusion regarding the theories upon which she predicated her claims, and denied the motions to dismiss as moot. In April 2009, the plaintiff filed an amended complaint. In May 2009, we again moved to dismiss for failure to make a pre-suit demand on our directors. The director defendants also filed another motion to dismiss. After those motions were fully briefed, the Court asked the parties to file supplemental briefs discussing the decision in *In Re Citigroup Inc. Shareholder Derivative Litigation*, 2009 WL 2610746 (S.D.N.Y. 2009), in which another court held that stockholders cannot bring a derivative claim for

federal securities fraud based on alleged failure of disinterested directors to have disclosed facts of which they were aware when they made the decisions with which the litigation is concerned. The parties have filed the supplemental briefs and are now awaiting a decision from the Court on the motions to dismiss.

Item 4. Submission of Matters to a Vote of Security Holders.

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Our Class A and Class B common stock are listed on the New York Stock Exchange under the symbols "LEN" and "LEN.B," respectively. The following table shows the high and low sales prices for our Class A and Class B common stock for the periods indicated, as reported by the NYSE, and cash dividends declared per share:

<u>Fiscal Quarter</u>	<u>Class A Common Stock High/Low Prices</u>		<u>Cash Dividends Per Class A Share</u>	
	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>
First	\$11.56 – 5.54	\$21.64 – 11.98	4¢	16¢
Second	\$11.25 – 5.72	\$22.73 – 13.40	4¢	16¢
Third	\$15.92 – 7.28	\$17.22 – 9.33	4¢	16¢
Fourth	\$17.66 – 12.05	\$16.90 – 3.42	4¢	4¢

<u>Fiscal Quarter</u>	<u>Class B Common Stock High/Low Prices</u>		<u>Cash Dividends Per Class B Share</u>	
	<u>2009</u>	<u>2008</u>	<u>2009</u>	<u>2008</u>
First	\$ 8.99 – 4.09	\$20.10 – 11.14	4¢	16¢
Second	\$ 8.93 – 4.36	\$20.92 – 12.41	4¢	16¢
Third	\$12.49 – 5.58	\$15.43 – 8.46	4¢	16¢
Fourth	\$13.87 – 9.18	\$15.34 – 2.26	4¢	4¢

As of December 31, 2009, the last reported sale price of our Class A common stock was \$12.77 and the last reported sale price of our Class B common stock was \$9.84. As of December 31, 2009, there were approximately 1,000 and 720 holders of record, respectively, of our Class A and Class B common stock.

On January 12, 2010, our Board of Directors declared a quarterly cash dividend of \$0.04 per share for both our Class A and Class B common stock, which is payable on February 12, 2010 to holders of record at the close of business on January 26, 2010. We regularly evaluate with our Board of Directors the decision whether to declare a dividend and the amount of the dividend.

In June 2001, our Board of Directors authorized a stock repurchase program to permit future purchases of up to 20 million shares of our outstanding common stock. During the three months and year ended November 30, 2009, there were no shares repurchased under this program.

The information required by Item 201(d) of Regulation S-K is provided in Item 12 of this Report.

Performance Graph

The following graph compares the five-year cumulative total return of our Class A common stock with the Dow Jones U.S. Home Construction Index and the Dow Jones U.S. Total Market Index. The graph assumes \$100 invested on November 30, 2004 in our Class A common stock, the Dow Jones U.S. Home Construction Index and the Dow Jones U.S. Total Market Index, and the reinvestment of all dividends.

**Comparison of Five - Year Cumulative Total Return
Fiscal Year Ended November 30
(2004=\$100)**

	<u>2004</u>	<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009</u>
Lennar Corporation	\$100	130	119	33	15	28
Dow Jones U.S. Home Construction Index	\$100	135	108	45	31	38
Dow Jones U.S. Total Market Index	\$100	110	126	136	83	106

Item 6. Selected Financial Data.

The following table sets forth our selected consolidated financial and operating information as of or for each of the years ended November 30, 2005 through 2009. The information presented below is based upon our historical financial statements, except for the results of operations of a subsidiary of the Financial Services segment's title company that was sold in May 2005, which have been classified as discontinued operations.

	At or for the Years Ended November 30,				
	2009	2008	2007	2006	2005
(Dollars in thousands, except per share amounts)					
Results of Operations:					
Revenues:					
Homebuilding	\$2,834,285	4,263,038	9,730,252	15,623,040	13,304,599

-
- (1) Homebuilding operating earnings (loss) from continuing operations include \$359.9 million, \$340.5 million, \$2,445.1 million, \$501.8 million and \$20.5 million, respectively, of valuation adjustments for the years ended November 30, 2009, 2008, 2007, 2006 and 2005. In addition, it includes \$101.9 million, \$32.2 million, \$364.2 million and \$126.4 million, respectively, of our share of valuation adjustments related to assets of our investments in unconsolidated entities for the years ended November 30, 2009, 2008, 2007 and 2006, and \$89.0 million, \$172.8 million, \$132.2 million and \$14.5 million, respectively of valuation adjustments to our investments in unconsolidated entities for the years ended November 30, 2009, 2008, 2007 and 2006. During the year ended November 30, 2007, homebuilding operating earnings (loss) from continuing operations also includes \$190.2 million of goodwill impairments. There were no other material valuation adjustments for the year ended November 30, 2005.
 - (2) Financial Services operating loss from continuing operations for the year ended November 30, 2008 includes a \$27.2 million impairment of the Financial Services segment's goodwill.
 - (3) Earnings from discontinued operations before income taxes include a gain of \$15.8 million for the year ended November 30, 2005 related to the sale of a subsidiary of the Financial Services segment's title company.
 - (4) Earnings (loss) from continuing operations for the year ended November 30, 2009 primarily includes a reversal of our deferred tax asset valuation allowance of \$351.8 million, primarily due to a change in tax legislation, which allowed us to carryback our fiscal year 2009 tax loss to recover previously paid income taxes. Earnings (loss) from continuing operations for the year ended November 30, 2008 include a \$730.8 million valuation allowance recorded against our deferred tax assets.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with "Selected Financial Data" and our audited consolidated financial statements and accompanying notes included elsewhere in this Report.

Special Note Regarding Forward-Looking Statements

Some of the statements in this Management's Discussion and Analysis of Financial Condition and Results of Operations, and elsewhere in this Annual Report on Form 10-K, are "forward-looking statements," as that term is defined in the Private Securities Litigation Reform Act of 1995. These forward-looking statements include statements regarding our business, financial condition, results of operations, cash flows, strategies and prospects. You can identify forward-looking statements by the fact that these statements do not relate strictly to historical or current matters. Rather, forward-looking statements relate to anticipated or expected events, activities, trends or results. Because forward-looking statements relate to matters that have not yet occurred, these statements are inherently subject to risks and uncertainties. Many factors could cause our actual activities or results to differ materially from the activities and results anticipated in forward-looking statements. These factors include those described under the caption "*Risk Factors*" in Item 1A of this Report. We do not undertake any obligation to update forward-looking statements, except as required by Federal securities laws.

Outlook

Despite high unemployment rates, increased foreclosures and tightening credit standards, recent demand trends in the communities in which we are selling homes indicate that the markets may be stabilizing as more confident homebuyers are taking advantage of increased affordability resulting from declining home prices, historically low interest rates and government stimulus programs. We are optimistic that homebuyers have recognized that the residential housing market is improving and will continue to take advantage of the government stimulus, which includes new tax legislation that extended the homebuyer tax credit through April 30, 2010 and expanded it to include other than first time homebuyers.

We ended the year with \$1.3 billion in cash and a homebuilding debt-to-total capital ratio, net of homebuilding cash, of 36.9%. Additionally, as a result of tax legislation that was enacted in our fourth quarter, we will receive a tax refund of approximately \$320 million in early 2010. We extended our debt maturities by issuing \$400 million of senior notes maturing in 2017 and retiring \$448 million of senior notes and other debt. We also issued \$225 million of stock under our \$275 million equity draw down program. These transactions provide us additional financial flexibility and capital for new investment opportunities such as adding new communities with high return expectations, investing in long-term, strategic joint ventures (similar to Newhall) and investing in distressed opportunities.

We continue to focus on the basics of our homebuilding operations as we strategically position our company for a potential return to profitability in 2010. In late 2008, we experienced higher cancellation rates resulting in an increase in completed, unsold inventory. In early 2009 we were able to convert our completed, unsold inventory into cash by offering higher sales incentives. Additionally, in 2009 we continued focusing on refining our product offering, reducing the number of floor plans and targeting first time and value oriented homebuyers. These more efficient product offerings have significantly reduced our construction costs and allowed us to meet our customers' demands. These cost savings, combined with reduced sales incentives, improved our gross margins throughout the second half of 2009. We also reduced S,G&A expenses by right-sizing our overhead levels which should allow for leveraging additional volume. Our homebuilding divisions are focused on operating at profitable levels and generating positive cash flow in 2010.

Results of Operations

Overview

Our net loss in 2009 was \$417.1 million, or \$2.45 per basic and diluted share, compared to a net loss of \$1,109.1 million, or \$7.00 per basic and diluted share, in 2008. Our net loss in 2009 was reduced by the benefit for income taxes of \$314.3 million. The current year net loss was attributable to the challenging market conditions that have persisted during 2009 and has impacted all of our homebuilding operations. Our gross margin percentage decreased in 2009, compared to 2008, primarily due to an increase in valuation adjustments as a percentage of home sales revenue and a decrease in the average sales price of homes delivered during 2009, compared to 2008.

The following table sets forth financial and operational information for the years indicated related to our operations.

	Years Ended November 30,		
	2009	2008	2007
	(Dollars in thousands, except average sales price)		
Homebuilding revenues:			
Sales of homes	\$2,776,850	4,150,717	9,462,940
Sales of land	57,435	112,321	267,312
Total homebuilding revenues	2,834,285	4,263,038	9,730,252
Homebuilding costs and expenses:			
Cost of homes sold	2,524,850	3,641,090	8,892,268
Cost of land sold	236,277	245,536	1,928,451
Selling, general and administrative	449,259	655,255	1,368,358
Total homebuilding costs and expenses	3,210,386	4,541,881	12,189,077
Homebuilding operating margins	(376,101)	(278,843)	(2,458,825)

- (1) Financial Services costs and expenses for the year ended November 30, 2008 include a \$27.2 million impairment of goodwill.
- (2) Gross margin on home sales excluding valuation adjustments and operating margin as a percentage of revenues from home sales excluding valuation adjustments are non-GAAP financial measures disclosed by certain of our competitors and have been presented because we find it useful in evaluating our performance and believe that it helps readers of our financial statements compare our operations with those of our competitors. See the Non-GAAP Financial Measure section.

2009 versus 2008

Revenues from home sales decreased 33% in the year ended November 30, 2009 to \$2.8 billion from \$4.2 billion in 2008. Revenues were lower primarily due to a 26% decrease in the number of home deliveries, excluding unconsolidated entities, and a 10% decrease in the average sales price of homes delivered in 2009. New home deliveries, excluding unconsolidated entities, decreased to 11,422 homes in the year ended November 30, 2009 from 15,344 homes last year. In the year ended November 30, 2009, new home deliveries were lower in each of our homebuilding segments and Homebuilding Other, compared to 2008. The average sales price of homes delivered decreased to \$243,000 in the year ended November 30, 2009 from \$270,000 in 2008. Sales incentives offered to homebuyers were \$44,800 per home delivered in the year ended November 30, 2009, compared to \$48,700 per home delivered last year.

Gross margins on home sales were \$252.0 million, or 9.1%, in the year ended November 30, 2009, which included \$180.2 million of valuation adjustments, compared to gross margins on home sales of \$509.6 million, or 12.3%, in the year ended November 30, 2008, which included \$195.5 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$432.2 million, or 15.6%, in the year ended November 30, 2009, compared to \$705.1 million, or 17.0%, in 2008. Gross margin percentage on home sales, excluding valuation adjustments, decreased compared to last year, due primarily to reduced sales prices. Gross margins on home sales excluding valuation adjustments is a Non-GAAP financial measure, which is discussed in the Non-GAAP Financial Measure section.

Homebuilding interest expense was \$147.4 million in the year ended November 30, 2009 (\$67.4 million was included in cost of homes sold, \$9.2 million in cost of land sold and \$70.9 million in other interest expense), compared to \$130.4 million in the year ended November 30, 2008 (\$99.3 million was included in cost of homes sold, \$3.4 million in cost of land sold and \$27.6 million in other interest expense). Despite a decrease in deliveries during the year ended November 30, 2009, compared to last year, interest expense increased primarily due to the interest related to the \$400 million 12.25% senior notes due 2017 issued during the second quarter of 2009, as well as a reduction in qualifying assets eligible for interest capitalization as a result of a decrease in inventories from prior year.

Our homebuilding debt to total capital ratio as of November 30, 2009 was 53.1%, compared to 49.2% as of November 30, 2008. Our net homebuilding debt to total capital ratio as of November 30, 2009 was 36.9% compared to 35.7% as of November 30, 2008. The net homebuilding debt to total capital ratio consists of net homebuilding debt (homebuilding debt less homebuilding cash and cash equivalents) divided by total capital (net homebuilding debt plus stockholders' equity).

Selling, general and administrative expenses were reduced by \$206.0 million, or 31%, in the year ended November 30, 2009, compared to last year, primarily due to reductions in associate headcount, variable selling expenses and fixed costs. As a percentage of revenues from home sales, selling, general and administrative expenses increased to 16.2% in the year ended November 30, 2009, from 15.8% in 2008, due to lower revenues.

Losses on land sales totaled \$178.8 million in the year ended November 30, 2009, which included \$108.9 million of valuation adjustments and \$84.4 million of write-offs of deposits and pre-acquisition costs related to homesites under option that we do not intend to purchase. In the year ended November 30, 2008, losses on land sales totaled \$133.2 million, which included \$47.8 million of valuation adjustments and \$97.2 million of write-offs of deposits and pre-acquisition costs related to homesites that were under option.

Equity in loss from unconsolidated entities was \$130.9 million in the year ended November 30, 2009, which included \$101.9 million of our share of valuation adjustments related to assets of unconsolidated entities in which we have investments, compared to equity in loss from unconsolidated entities of \$59.2 million in the year ended November 30, 2008, which included \$32.2 million of our share of valuation adjustments related to assets of unconsolidated entities in which we have investments.

Other expense, net totaled \$98.4 million in the year ended November 30, 2009, which included \$89.0 million of valuation adjustments to our investments in unconsolidated entities and \$9.7 million of write-offs of notes and other receivables, compared to other expense, net of \$172.4 million in the year ended November 30, 2008, which included \$172.8 million of valuation adjustments to our investments in unconsolidated entities and \$25.0 million of write-offs of notes and other receivables.

Minority interest income, net was \$28.9 million in the year ended November 30, 2009, which included \$13.6 million of minority interest income as a result of \$27.2 million of valuation adjustments to inventories of 50%-owned consolidated joint ventures, compared to minority interest income, net of \$4.1 million in the year ended November 30, 2008.

Sales of land, equity in loss from unconsolidated entities, other expense, net and minority interest income, net may vary significantly from period to period depending on the timing of land sales and other transactions entered into by us and unconsolidated entities in which we have investments.

Operating earnings for our Financial Services segment was \$36.0 million in the year ended November 30, 2009, compared to an operating loss of \$31.0 million last year. The increase in profitability in our Financial Services segment was primarily due to lower fixed costs as a result of successful cost reduction initiatives implemented throughout the downturn. In addition, in the year ended November 30, 2008, there was a \$27.2 million write-off of goodwill related to the segment's mortgage operations, compared to no write-off in the year ended November 30, 2009.

Corporate general and administrative expenses were reduced by \$9.7 million, or 7%, for the year ended November 30, 2009, compared to 2008. As a percentage of total revenues, corporate general and administrative expenses increased to 3.8% in the year ended November 30, 2009, from 2.8% last year, due to lower revenues.

A reduction of the carrying amounts of deferred tax assets by a valuation allowance is required, if based on available evidence, it is more likely than not that such assets will not be realized. As a result of our net operating loss during the year ended November 30, 2009, we generated deferred tax assets of \$269.6 million and recorded a non-cash valuation allowance against the entire amount of the deferred tax assets. In addition, we recorded a reversal of our deferred tax asset valuation allowance of \$351.8 million during the fourth quarter of 2009, primarily due to a change in tax legislation, which allowed us to carry back our fiscal year 2009 tax loss to recover previously paid income taxes.

At November 30, 2009, we owned 82,703 homesites and had access to an additional 21,173 homesites through either option contracts with third parties or agreements with unconsolidated entities in which we have investments. At November 30, 2009, 2% of the homesites we owned were subject to home purchase contracts. Our backlog of sales contracts was 1,631 homes (\$479.6 million) at November 30, 2009, compared to 1,599 homes (\$456.3 million) at November 30, 2008.

2008 versus 2007

Revenues from home sales decreased 56% in the year ended November 30, 2008 to \$4.2 billion from \$9.5 billion in 2007. Revenues were lower primarily due to a 51% decrease in the number of home deliveries, excluding unconsolidated entities, and a 9% decrease in the average sales price of homes delivered in 2008. New home deliveries, excluding unconsolidated entities, decreased to 15,344 homes in the year ended November 30, 2008 from 31,582 homes in 2007. In the year ended November 30, 2008, new home deliveries were lower in each of our homebuilding segments and Homebuilding Other, compared to 2007. The average sales price of homes delivered decreased to \$270,000 in the year ended November 30, 2008 from \$297,000 in 2007, due to reduced pricing. Sales incentives offered to homebuyers were \$48,700 and \$48,000 per home delivered, respectively, in the years ended November 30, 2008 and 2007.

Gross margins on home sales were \$509.6 million, or 12.3%, in the year ended November 30, 2008, which included \$195.5 million of valuation adjustments, compared to gross margins on home sales of \$570.7 million, or 6.0%, in the year ended November 30, 2007, which included \$747.8 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$705.1 million, or 17.0%, in the year ended November 30, 2008, compared to \$1,318.5 million, or 13.9%, in 2007. Gross margin percentage on home sales, excluding valuation adjustments, improved compared to 2007 primarily due to our lower inventory basis and continued focus on repositioning our product and reducing construction costs. Gross margins on home sales excluding valuation adjustments is a non-GAAP financial measure which is discussed in the Non-GAAP Financial Measure section.

Homebuilding interest was \$130.4 million in 2008 (\$99.3 million was included in cost of homes sold, \$3.4 million in cost of land sold and \$27.6 million in other interest expense), compared to \$203.7 million in 2007 (\$168.5 million was included in cost of homes sold, \$9.4 million in cost of land sold and \$25.8 million in other interest expense). The decrease in interest expense was due to lower interest costs resulting from lower average debt during 2008, as well as decreased deliveries during 2008, compared to 2007.

Our homebuilding debt to total capital ratio as of November 30, 2008 was 49.2%, compared to 37.5% as of November 30, 2007. Our net homebuilding debt to total capital ratio as of November 30, 2008 was 35.7% compared to 30.2% as of November 30, 2007. The net homebuilding debt to total capital ratio consists of net homebuilding debt (homebuilding debt less homebuilding cash and cash equivalents) divided by total capital (net homebuilding debt plus stockholders' equity).

Selling, general and administrative expenses were reduced by \$713.1 million, or 52%, in the year ended November 30, 2008, compared to 2007, primarily due to the consolidation of divisions, which resulted in reductions in associate headcount, variable selling expense and fixed costs. As a percentage of revenues from home sales, selling, general and administrative expenses increased to 15.8% in the year ended November 30, 2008, from 14.5% in 2007, due to lower revenues.

Losses on land sales totaled \$133.2 million in the year ended November 30, 2008, which included \$47.8 million of valuation adjustments and \$97.2 million of write-offs of deposits and pre-acquisition costs related to

homesites that were under option. In the year ended November 30, 2007, losses on land sales totaled \$1,661.1 million, which included \$1,167.3 million of valuation adjustments and \$530.0 million of write-offs of deposits and pre-acquisition costs related to homesites that were under option.

Equity in loss from unconsolidated entities was \$59.2 million in the year ended November 30, 2008, which included \$32.2 million of our share of valuation adjustments related to assets of unconsolidated entities in which we have investments, compared to equity in loss from unconsolidated entities of \$362.9 million in the year ended November 30, 2007, which included \$364.2 million of our share of valuation adjustments related to assets of unconsolidated entities in which we have investments.

Other expense, net totaled \$172.4 million in the year ended November 30, 2008, which included \$172.8 million of valuation adjustments to our investments in unconsolidated entities and \$25.0 million of write-offs of notes and other receivables, compared to other expense, net of \$50.2 million in the year ended November 30, 2007, which included \$132.2 million of valuation adjustments to our investments in unconsolidated entities.

Minority interest income (expense), net was \$4.1 million in the year ended November 30, 2008, compared to minority interest income (expense), net of (\$1.9) million in the year ended November 30, 2007.

Due to the termination of our rights to purchase certain assets from our LandSource unconsolidated joint venture, we recognized deferred profit of \$101.3 million in the year ended November 30, 2008 (net of \$31.8 million of write-offs of option deposits and pre-acquisition costs and other write-offs) related to the 2007 recapitalization of LandSource.

Sales of land, equity in loss from unconsolidated entities, other expense, net and minority interest income (expense), net may vary significantly from period to period depending on the timing of land sales and other transactions entered into by us and unconsolidated entities in which we have investments.

Operating loss for the Financial Services segment was \$31.0 million in the year ended November 30, 2008, compared to operating earnings of \$6.1 million in 2007. The decline in profitability was primarily due to a goodwill impairment of \$27.2 million related to the segment's mortgage operations and fewer transactions in the segment's title and mortgage operations.

Corporate general and administrative expenses were reduced by \$43.5 million, or 25%, for the year ended November 30, 2008, compared to 2007. As a percentage of total revenues, corporate general and administrative expenses increased to 2.8% in the year ended November 30, 2008, from 1.7% in 2007, due to lower revenues.

A reduction of the carrying amounts of deferred tax assets by a valuation allowance is required, if based on available evidence, it is more likely than not that such assets will not be realized. As a result of our operational results for the year ended November 30, 2008, we incurred cumulative losses over the evaluation period we established. Accordingly, based on our evaluation of available evidence including our cumulative losses in the evaluation period, our current level of profits and losses and current market conditions, we recorded a \$730.8 million non-cash valuation allowance against our deferred tax assets during the year ended November 30, 2008.

At November 30, 2008, we owned 74,681 homesites and had access to an additional 38,589 homesites through either option contracts with third parties or agreements with unconsolidated entities in which we have investments. At November 30, 2008, 2% of the homesites we owned were subject to home purchase contracts. Our backlog of sales contracts was 1,599 homes (\$456.3 million) at November 30, 2008, compared to 4,009 homes (\$1,384.1 million) at November 30, 2007. The lower backlog was attributable to challenged market conditions that persisted throughout 2008, which resulted in lower new orders in 2008, compared to 2007.

Non-GAAP Financial Measure

Gross margins on home sales excluding valuation adjustments is a non-GAAP financial measure, and is defined by us as sales of homes revenue less cost of homes sold excluding valuation adjustments recorded during the period. Management finds this to be an important and useful measure in evaluating our performance because it discloses the profit we generate on homes we actually delivered during the period, as our valuation adjustments relate to inventory that we did not deliver during the period. Gross margins on home sales excluding valuation adjustments also is important to our management, because it assists our management in making strategic decisions regarding our construction pace, product mix and product pricing based upon the profitability we generated on homes we actually delivered during previous periods. We believe investors also find gross margins

on home sales excluding valuation adjustments to be important and useful because it discloses a profitability measure on homes we actually delivered in a period that can be compared to the profitability on homes we delivered in a prior period without regard to the variability of valuation adjustments recorded from period to period. In addition, to the extent that our competitors provide similar information, disclosure of our gross margins on home sales excluding valuation adjustments helps readers of our financial statements compare our ability to generate profits with regard to the homes we deliver in a period to our competitors' ability to generate profits with regard to the homes they deliver in the same period.

Although management finds gross margins on home sales excluding valuation adjustments to be an important measure in conducting and evaluating our operations, this measure has limitations as an analytical tool as it is not reflective of the actual profitability generated by our company during the period. This is because it excludes charges we recorded relating to inventory that was impaired during the period. In addition, because gross margins on home sales excluding valuation adjustments is a financial measure that is not calculated in accordance with generally accepted accounting principles ("GAAP"), it may not be completely comparable to similarly titled measures of our competitors due to differences in methods of calculation and charges being excluded. Our management compensates for the limitations of using gross margins on home sales excluding valuation adjustments by using this non-GAAP measure only to supplement our GAAP results in order to provide a more complete understanding of the factors and trends affecting our operations. In order to analyze our overall performance and actual profitability relative to our homebuilding operations, we also compare our gross margins on home sales during the period, inclusive of valuation adjustments, with the same measure during prior comparable periods. Due to the limitations discussed above, gross margins on home sales excluding valuation adjustments should not be viewed in isolation as it is not a substitute for GAAP measures of gross margins.

The table set forth below reconciles our gross margins on home sales excluding valuation adjustments for the years ended November 30, 2009, 2008 and 2007 to our gross margins on home sales for the years ended November 30, 2009, 2008 and 2007:

	Years Ended November 30,		
	2009	2008	2007
	(In thousands)		
Sales of homes	\$2,776,850	4,150,717	9,462,940
Cost of homes sold	2,524,850	3,641,090	8,892,268
Gross margins on home sales	252,000	509,627	570,672
Valuation adjustments to finished homes, CIP and land on which we intend to build homes	180,239	195,518	747,843
Gross margins on homes sales excluding valuation adjustments	\$ 432,239	705,145	1,318,515

Homebuilding Segments

Our Homebuilding operations construct and sell homes primarily for first-time, move-up and active adult homebuyers primarily under the Lennar brand name. In addition, our homebuilding operations also purchase, develop and sell land to third parties. In certain circumstances, we diversify our operations through strategic alliances and attempt to minimize our risks by investing with third parties in joint ventures.

We have grouped our homebuilding activities into four reportable segments, which we refer to as Homebuilding East, Homebuilding Central, Homebuilding West and Homebuilding Houston. Information about homebuilding activities in states that do not have economic characteristics that are similar to those in other states in the same geographic is grouped under "Homebuilding Other." Reference in this Management's Discussion and Analysis of Financial Condition and Results of Operations to homebuilding segments are to those reportable segments.

At November 30, 2009, our reportable homebuilding segments and Homebuilding Other consisted of homebuilding operations located in:

East: Florida, Maryland, New Jersey and Virginia.

Central: Arizona, Colorado and Texas. (1)

West: California and Nevada.

Houston: Houston, Texas.

Other: Illinois, Minnesota, New York, North Carolina and South Carolina.

(1) Texas in the Central reportable segment excludes Houston, Texas, which is its own reportable segment.

The following tables set forth selected financial and operational information related to our homebuilding operations for the years indicated:

Of the total homes in backlog above, 9 homes, 8 homes and 364 homes, respectively, represent homes in backlog from unconsolidated entities at November 30, 2009, 2008 and 2007.

	November 30,					
	Dollar Value (In thousands)			Average Sales Price		
	2009	2008	2007	2009	2008	2007
East	\$ 179,175	202,791	587,100	263,000	258,000	327,000
Central	36,158	23,736	67,344	217,000	193,000	236,000
West	143,868	108,779	408,280	428,000	440,000	433,000
Houston	60,876	57,785	128,340	244,000	215,000	218,000
Other	59,494	63,179	193,073	302,000	365,000	488,000
Total	\$ 479,571	456,270	1,384,137	294,000	285,000	345,000

Of the total dollar value of homes in backlog above, \$7.2 million, \$12.5 million and \$182.7 million, respectively, represent the dollar value of homes in backlog from unconsolidated entities at November 30, 2009, 2008 and 2007. The homes in backlog from unconsolidated entities had an average sales price of \$804,000, \$1,558,000 and \$502,000, respectively, at November 30, 2009, 2008 and 2007.

Backlog represents the number of homes under sales contracts. Homes are sold using sales contracts, which are generally accompanied by sales deposits. In some instances, purchasers are permitted to cancel sales if they fail to qualify for financing or under certain other circumstances. We experienced cancellation rates in our homebuilding segments and Homebuilding Other as follows:

	<u>Years Ended November 30,</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
Cancellation Rates			
East	22%	31%	34%
Central	17%	22%	29%
West	15%	24%	29%
Houston	19%	27%	32%
Other	16%	23%	20%
Total	<u>18%</u>	<u>26%</u>	<u>30%</u>

During the fourth quarter of 2009, our cancellation rate was 20%. Our cancellation rate during 2009 decreased to a historically normal level. We do not recognize revenue on homes under sales contracts until the sales are closed and title passes to the new homeowners, except for our multi-level residential buildings under construction for which revenue was recognized under percentage-of-completion accounting during 2007. In 2008 and 2009, we did not recognize revenues and expenses under percentage-of-completion accounting for our multi-level residential buildings under construction.

2009 versus 2008

East: Homebuilding revenues decreased in 2009, compared to 2008, primarily due to a decrease in the number of home deliveries and in the average sales price of homes delivered in all of the states in this segment. Gross margins on home sales were \$36.2 million, or 4.3%, in 2009 including valuation adjustments of \$73.7 million, compared to gross margins on home sales of \$164.5 million, or 13.1%, in 2008 including \$76.8 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$109.8 million, or 13.0%, in 2009, compared to \$241.3 million, or 19.3%, in 2008. Gross margin percentage on home sales, excluding valuation adjustments, decreased compared to last year due to reduced pricing and higher sales incentives offered to homebuyers as a percentage of revenues from home sales (18.4% in 2009 and 17.2% in 2008).

Losses on land sales were \$93.0 million in 2009 (including \$64.1 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$37.0 million of valuation adjustments), compared to losses on land sales of \$41.2 million in 2008 (including \$19.0 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$23.3 million of valuation adjustments).

Central: Homebuilding revenues decreased in 2009, compared to 2008, primarily due to a decrease in the number of home deliveries in all of the states in this segment and a decrease in the average sales price of homes delivered in Arizona, partially offset by a slight increase in the average selling price in Colorado and Texas, excluding Houston. Gross margins on home sales were \$29.2 million, or 8.1%, in 2009 including valuation adjustments of \$13.6 million, compared to gross margins on home sales of \$31.8 million, or 6.2%, in 2008 including \$28.1 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$42.8 million, or 11.9%, in 2009, compared to \$59.9 million, or 11.7%, in 2008. Sales incentives offered to homebuyers as a percentage of revenues from home sales were 15.4% in 2009 and 15.9% in 2008.

Gross profits on land sales were \$0.4 million in 2009 (net of \$0.1 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$1.3 million of valuation adjustments), compared to losses on land sales of \$11.3 million in 2008 (including \$6.0 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$12.4 million of valuation adjustments).

West: Homebuilding revenues decreased in 2009, compared to 2008, primarily due to a decrease in the number of home deliveries and average sales price of homes delivered in all of the states in this segment. Gross margins on home sales were \$92.8 million, or 11.5%, in 2009 including valuation adjustments of \$64.1 million, compared to gross margins on home sales of \$154.1 million, or 10.9%, in 2008 including \$75.6 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$156.9 million, or 19.4%, in 2009, compared to \$229.7 million, or 16.3%, in 2008. Gross margin percentage on home sales, excluding valuation adjustments, increased compared to last year primarily due to a decrease of sales incentives offered to homebuyers as a percentage of home sales revenues (13.8% in 2009, compared to 15.3% in 2008).

Losses on land sales were \$48.1 million in 2009 (including \$13.9 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$38.7 million of valuation adjustments), compared to losses on land sales of \$75.0 million in 2008 (including \$62.4 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$11.1 million of valuation adjustments).

Houston: Homebuilding revenues decreased in 2009, compared to 2008, primarily due to a decrease in the number of home deliveries in this segment. Gross margins on home sales were \$75.3 million, or 17.5%, in 2009 including valuation adjustments of \$1.1 million, compared to gross margins on home sales of \$103.9 million, or 19.2%, in 2008 including \$2.3 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$76.4 million, or 17.8%, in 2009, compared to \$106.2 million, or 19.6%, in 2008. Gross margin percentage on home sales, excluding valuation adjustments, decreased compared to last year primarily due to higher sales incentives offered to homebuyers as a percentage of revenues from home sales (14.4% in 2009, compared to 11.1% in 2008).

Losses on land sales were \$3.4 million in 2009 (including \$2.5 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$0.7 million of valuation adjustments), compared to gross profits on land sales of \$0.8 million in 2008 (net of \$0.7 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$0.1 million of valuation adjustments).

Other: Homebuilding revenues decreased in 2009, compared to 2008, primarily due to a decrease in the number of home deliveries in all of the states in Homebuilding Other except in North and South Carolina combined, and a decrease in the average sales price of homes delivered in North and South Carolina combined and Minnesota. Gross margins on home sales were \$18.5 million, or 5.6% in 2009 including valuation adjustments of \$27.8 million, compared to gross margins on home sales of \$55.3 million, or 12.7%, in 2008 including \$12.7 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$46.2 million, or 14.0%, in 2009, compared to \$68.0 million, or 15.7%, in 2008. Gross margin percentage on home sales, excluding valuation adjustments, decreased compared to last year due to reduced pricing and higher sales incentives offered to homebuyers as a percentage of revenues from home sales (14.0% in 2009, compared to 13.6% in 2008).

Losses on land sales were \$34.7 million in 2009 (including \$3.8 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$31.2 million of valuation adjustments), compared to losses on land sales of \$6.5 million in 2008 (including \$9.0 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$0.9 million of valuation adjustments).

2008 versus 2007

East: Homebuilding revenues decreased in 2008, compared to 2007, primarily due to a decrease in the number of home deliveries and in the average sales price of homes delivered in all of the states in this segment. Gross margins on home sales were \$164.5 million, or 13.1%, in 2008 including valuation adjustments of \$76.8 million, compared to gross margins on home sales of \$89.0 million, or 3.3%, in 2007 including \$279.1 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$241.3 million, or 19.3%, in 2008, compared to \$368.0 million, or 13.7%, in 2007. Gross margin percentage on home sales increased compared to 2007 due to our lower inventory basis and continued focus on reducing costs. As a percentage of home sales revenues, sales incentives were 17.2% in 2008 and 16.9% in 2007.

Losses on land sales were \$41.2 million in 2008 (including \$19.0 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$23.3 million of valuation

adjustments), compared to losses on land sales of \$400.8 million in 2007 (including \$119.6 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$307.5 million of valuation adjustments).

Central: Homebuilding revenues decreased in 2008, compared to 2007, primarily due to a decrease in the number of home deliveries in all of the states in this segment. Gross margins on home sales were \$31.8 million, or 6.2%, in 2008 including valuation adjustments of \$28.1 million, compared to gross margins on home sales of \$102.0 million, or 6.6%, in 2007 including \$91.4 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$59.9 million, or 11.7%, in 2008, compared to \$193.3 million, or 12.5%, in 2007. Gross margin percentage on home sales decreased compared to 2007 primarily due to higher sales incentives offered to homebuyers (15.9% in 2008, compared to 13.0% in 2007).

Losses on land sales were \$11.3 million in 2008 (including \$6.0 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$12.4 million of valuation adjustments), compared to losses on land sales of \$142.3 million in 2007 (including \$56.3 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$79.1 million of valuation adjustments).

West: Homebuilding revenues decreased in 2008, compared to 2007, primarily due to a decrease in the number of home deliveries and average sales price of homes delivered in all of the states in this segment. Gross margins on home sales were \$154.1 million, or 10.9%, in 2008 including valuation adjustments of \$75.6 million, compared to gross margins on home sales of \$119.1 million, or 3.4%, in 2007 including \$331.8 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$229.7 million, or 16.3%, in 2008, compared to \$451.0 million, or 13.0%, in 2007. Gross margin percentage on home sales increased compared to 2007 primarily due to our lower inventory basis and continued focus on reducing costs, despite higher sales incentives offered to homebuyers (15.3% in 2008, compared to 14.3% in 2007).

Losses on land sales were \$75.0 million in 2008 (including \$62.4 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$11.1 million of valuation adjustments), compared to losses on land sales of \$950.3 million in 2007 (including \$310.8 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$648.6 million of valuation adjustments).

Houston: Homebuilding revenues decreased in 2008, compared to 2007, primarily due to a decrease in the number of home deliveries in this segment. Gross margins on home sales were \$103.9 million, or 19.2%, in 2008 including valuation adjustments of \$2.3 million, compared to gross margins on home sales of \$171.7 million, or 21.1%, in 2007 including \$2.8 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$106.2 million, or 19.6%, in 2008, compared to \$174.5 million, or 21.4%, in 2007. Gross margin percentage on home sales decreased compared to 2007 primarily due to higher sales incentives offered to homebuyers (11.1% in 2008, compared to 7.7% in 2007).

Gross profits on land sales were \$0.8 million in 2008 (net of \$0.7 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$0.1 million of valuation adjustments), compared to gross profits on land sales of \$1.2 million in 2007 (net of \$0.8 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$1.8 million of valuation adjustments).

Other: Homebuilding revenues decreased in 2008, compared to 2007, primarily due to a decrease in the number of home deliveries in all of the states in Homebuilding Other, and a decrease in the average sales price of homes delivered in all of the states in this segment except in Minnesota. Gross margins on home sales were \$55.3 million, or 12.7%, in 2008 including valuation adjustments of \$12.7 million, compared to gross margins on home sales of \$88.9 million, or 9.4%, in 2007 including \$42.8 million of valuation adjustments. Gross margins on home sales excluding valuation adjustments were \$68.0 million, or 15.7%, in 2008, compared to \$131.7 million, or 13.9%, in 2007. Gross margin percentage on home sales increased compared to 2007 primarily due to our lower inventory basis and continued focus on reducing costs, despite higher sales incentives offered to homebuyers (13.6% in 2008, compared to 9.1% in 2007).

Losses on land sales were \$6.5 million in 2008 (including \$9.0 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$0.9 million of valuation adjustments), compared to losses on land sales of \$168.8 million in 2007 (including \$42.4 million of write-offs of deposits and pre-acquisition costs related to land under option that we do not intend to purchase and \$130.3 million of valuation adjustments).

Gross margins on home sales excluding valuation adjustments is a Non-GAAP financial measure that is discussed previously under "Non-GAAP Financial Measure." The table set forth below reconciles our gross margins on home sales excluding valuation adjustments for the years ended November 30, 2009, 2008 and 2007 for each of our reportable homebuilding segments and Homebuilding Other to our gross margins on home sales for the years ended November 30, 2009, 2008 and 2007:

Financial Services Segment

We have one Financial Services reportable segment that provides primarily mortgage financing, title insurance and closing services for both buyers of our homes and others. Substantially all of the loans the Financial Services segment originates are sold in the secondary mortgage market on a servicing released, non-recourse basis; although, we remain liable for certain limited representations. The following table sets forth selected financial and operational information relating to our Financial Services segment.

	Years Ended November 30,		
	2009	2008	2007
	(Dollars in thousands)		
Revenues	\$ 285,102	312,379	456,529
Costs and expenses (1)	249,120	343,369	450,409
Operating earnings (loss) (1)	\$ 35,982	(30,990)	6,120
Dollar value of mortgages originated	\$4,020,000	4,290,000	7,740,000
Number of mortgages originated	17,900	18,300	30,900
Mortgage capture rate of Lennar homebuyers	87%	85%	73%
Number of title and closing service transactions	120,500	105,900	136,300
Number of title policies issued	92,500	96,700	146,200

- (1) Financial Services costs and expenses and operating loss for the year ended November 30, 2008 include a \$27.2 million impairment of goodwill.

Financial Condition and Capital Resources

At November 30, 2009, we had cash and cash equivalents related to our homebuilding and financial services operations of \$1,457.4 million, compared to \$1,203.4 million at November 30, 2008 and \$795.2 million at November 30, 2007.

We finance our land acquisition and development activities, construction activities, financial services activities and general operating needs primarily with cash generated from our operations, debt issuances and equity offerings, as well as cash borrowed under our warehouse lines of credit.

Operating Cash Flow Activities

During 2009 and 2008, cash provided by operating activities totaled \$420.8 million and \$1,100.8 million, respectively. During 2009, cash provided by operating activities was positively impacted by a decrease in inventories as a result of reducing completed, unsold inventory, a reduction in construction in progress resulting from lower new home starts in early 2009 and write-offs and valuation adjustments pertaining to the respective inventory, which was partially offset by land acquisitions. Cash provided by operating activities was partially offset by our net loss, a decrease in accounts payable and other liabilities and an increase in our receivables as a result of an increase in our income tax receivables primarily due to a change in tax legislation, which allowed us to carryback our fiscal year 2009 tax loss to recover previously paid income taxes.

During 2008, cash provided by operating activities included a decrease in our inventory as a result of reduced land purchases, a reduction in construction in progress resulting from lower new home starts and write-offs and valuation adjustments pertaining to the respective inventory. In order to improve liquidity in 2008, we continued to focus our efforts on adjusting pricing to meet market conditions, as we pulled back production and curtailed land purchases where possible in order to keep our balance sheet positioned for future opportunities. Cash provided by operating activities was also impacted by a decrease in our receivables primarily related to the collection of our income tax receivables, a decrease in loans held-for-sale resulting from a decrease in our new home deliveries during the year and our deferred income tax provision. Cash provided by operating activities was partially offset by our net loss and a decrease in accounts payable and other liabilities primarily due to a decrease in our land purchases.

Investing Cash Flow Activities

During 2009 and 2008, cash used in investing activities totaled \$275.1 million and \$265.7 million, respectively. During the year ended November 30, 2009, we contributed \$326.0 million of cash to unconsolidated entities of which \$94.5 million related to our investment in the reorganized Newhall, as well as the purchase of equity interests in other joint ventures previously owned by LandSource, compared to \$403.7 million of cash contributed to unconsolidated entities in 2008. Our investing activities also included distributions of capital from unconsolidated entities of \$24.1 million and \$87.8 million, respectively, during the years ended November 30, 2009 and 2008.

We are always looking at the possibility of acquiring homebuilders and other companies. However, at November 30, 2009, we had no agreements or understandings regarding any significant transactions.

Financing Cash Flow Activities

During 2009, our net cash provided by financing activities was primarily attributed to the issuance of common stock and new debt, partially offset by the redemption of debt.

During 2008, our net cash used in financing activities primarily related to net repayments under financial services debt, principal payments on other borrowings and dividends paid, partially offset by receipts related to minority interests.

During 2007, we sold a diversified portfolio of land consisting of approximately 11,000 homesites in 32 communities located throughout the country to a strategic land investment venture with Morgan Stanley Real Estate Fund II, L.P., an affiliate of Morgan Stanley & Co., Inc., in which we have a 20% ownership interest and 50% voting rights. Due to our continuing involvement, the transaction did not qualify as a sale under GAAP; thus, the inventory remained on our balance sheet in consolidated inventory not owned. During 2009 and 2008, we exercised certain land option contracts from the land investment venture, reducing the liabilities reflected on our consolidated balance sheet related to consolidated inventory not owned by \$33.7 million and \$48.4 million, respectively.

Homebuilding debt to total capital and net homebuilding debt to total capital are financial measures commonly used in the homebuilding industry and are presented to assist in understanding the leverage of our homebuilding operations. Management believes providing a measure of leverage of our homebuilding operations enables management and readers of our financial statements to better understand our financial position and performance. Homebuilding debt to total capital and net homebuilding debt to total capital are calculated as follows:

	<u>November 30,</u>	
	<u>2009</u>	<u>2008</u>
	(Dollars in thousands)	
Homebuilding debt	\$2,761,352	2,544,935
Stockholders' equity	2,443,479	2,623,007
Total capital	<u>\$5,204,831</u>	<u>5,167,942</u>
Homebuilding debt to total capital	<u>53.1%</u>	<u>49.2%</u>
Homebuilding debt	\$2,761,352	2,544,935
Less: Homebuilding cash and cash equivalents	1,330,603	1,091,468
Net homebuilding debt	<u>\$1,430,749</u>	<u>1,453,467</u>
Net homebuilding debt to total capital (1)	<u>36.9%</u>	<u>35.7%</u>

- (1) Net homebuilding debt to total capital consists of net homebuilding debt (homebuilding debt less homebuilding cash and cash equivalents) divided by total capital (net homebuilding debt plus stockholders' equity).

At November 30, 2009, homebuilding debt to total capital was higher compared to prior year due to the increase in homebuilding debt as a result of a net increase in senior notes and other debts payable, and the decrease in stockholders' equity primarily due to our net loss, which included the effects of inventory valuation adjustments, write-offs of option deposits and pre-acquisition costs, our share of valuation adjustments related to

assets of unconsolidated entities, valuation adjustments to investments in unconsolidated entities and a valuation allowance against our deferred tax assets, all of which are non-cash items. This decrease in stockholders' equity was partially offset by common stock issued under our equity draw down program and a reversal of a portion of our deferred tax asset valuation allowance during the fourth quarter of 2009, primarily due to a change in tax legislation, which allowed us to carry back our fiscal year 2009 tax loss to recover previously paid income taxes.

In addition to the use of capital in our homebuilding and financial services operations, we actively evaluate various other uses of capital, which fit into our homebuilding and financial services strategies and appear to meet our profitability and return on capital goals. This may include acquisitions of, or investments in, other entities, the payment of dividends or repurchases of our outstanding common stock or debt. These activities may be funded through any combination of our credit facilities, cash generated from operations, sales of assets or the issuance of public debt, common stock or preferred stock.

The following table summarizes our homebuilding senior notes and other debts payable:

	November 30,	
	2009	2008
	(Dollars in thousands)	
5.125% senior notes due 2010	\$ 249,955	299,877
5.95% senior notes due 2011	244,727	249,615
5.95% senior notes due 2013	347,471	346,851
5.50% senior notes due 2014	248,365	248,088
5.60% senior notes due 2015	501,424	501,618
6.50% senior notes due 2016	249,760	249,733
12.25% senior notes due 2017	392,392	—
7 ⁵ / ₈ % senior notes due 2009	—	280,976
Mortgage notes on land and other debt	527,258	368,177
	<u>\$2,761,352</u>	<u>2,544,935</u>

Our average debt outstanding was \$2.6 billion in 2009, compared to \$2.3 billion in 2008. The average rate for interest incurred was 6.0% and 5.8%, respectively in 2009 and 2008. Interest incurred related to homebuilding debt for the year ended November 30, 2009 was \$172.1 million, compared to \$148.3 million in 2008. The majority of our short-term financing needs, including financings for land acquisition and development activities and general operating needs, are met with cash generated from operations, debt issuances and equity offerings.

In April 2009, we sold \$400 million of 12.25% senior notes due 2017 (the "12.25% Senior Notes") at a price of 98.098% in a private placement. Proceeds from the offering, after payment of initial purchase's discount and expenses, were \$386.7 million. We added the proceeds to our working capital to be used for general corporate purposes, which may include the repayment or repurchase of our near-term maturities or of debt of our joint ventures that we have guaranteed. Interest on the 12.25% Senior Notes is due semi-annually. The 12.25% Senior Notes are unsecured and unsubordinated, and are guaranteed by substantially all of our subsidiaries. The 12.25% Senior Notes were subsequently exchanged for identical 12.25% Senior Notes that had been registered under the Securities Act of 1933. At November 30, 2009, the carrying amount of the 12.25% Senior Notes was \$392.4 million.

In March 2009, we retired our \$281 million of 7⁵/₈% senior notes due March 2009 for 100% of the outstanding principal amount, plus accrued and unpaid interest as of the maturity date.

In June 2007, we redeemed our \$300 million senior floating-rate notes due 2009. The redemption price was \$300.0 million, or 100% of the principal amount of the outstanding senior floating-rate notes due 2009, plus accrued and unpaid interest as of the redemption date.

In April 2006, we sold \$250 million of 5.95% senior notes due 2011 and \$250 million of 6.50% senior notes due 2016 (collectively, the "2006 Senior Notes") at prices of 99.766% and 99.873%, respectively, in a private placement under SEC Rule 144A. Proceeds from the offering of the 2006 Senior Notes, after initial purchaser's discount and expenses, were \$248.7 million and \$248.9 million, respectively. We added the proceeds to our working capital to be used for general corporate purposes. Interest on the 2006 Senior Notes is due semi-annually. The 2006 Senior Notes are unsecured and unsubordinated, and substantially all of our subsidiaries

guarantee the 2006 Senior Notes. The 2006 Senior Notes were subsequently exchanged for identical notes registered under the Securities Act of 1933. During the year ended November 30, 2009, we redeemed \$5.0 million of the 5.95% senior notes due 2011. At November 30, 2009 and 2008, the carrying amount of the 2006 Senior Notes was \$494.5 million and \$499.3 million, respectively.

In September 2005, we sold \$300 million of 5.125% senior notes due 2010 (the "5.125% Senior Notes") at a price of 99.905% in a private placement. Proceeds from the offering, after initial purchaser's discount and expenses, were \$298.2 million. We added the proceeds to our working capital to be used for general corporate purposes. Interest on the 5.125% Senior Notes is due semi-annually. The 5.125% Senior Notes are unsecured and unsubordinated. Substantially all of our subsidiaries guaranteed the 5.125% Senior Notes. In 2006, we exchanged the 5.125% Senior Notes for registered notes. The registered notes have substantially identical terms as the 5.125% Senior Notes, except that the registered notes do not include transfer restrictions that are applicable to the 5.125% Senior Notes. During the year ended November 30, 2009, we redeemed \$50.0 million of the 5.125% Senior Notes. At November 30, 2009 and 2008, the carrying amount of the 5.125% Senior Notes was \$250.0 million and \$299.9 million, respectively.

In April 2005, we sold \$300 million of 5.60% Senior Notes due 2015 (the "5.60% Senior Notes") at a price of 99.771%. Proceeds from the offering, after initial purchaser's discount and expenses, were \$297.5 million. In July 2005, we sold \$200 million of 5.60% Senior Notes due 2015 at a price of 101.407%. The 5.60% Senior Notes were the same issue as the 5.60% Senior Notes we sold in April 2005. Proceeds from the offering, after initial purchaser's discount and expenses, were \$203.9 million. We added the proceeds of both offerings to our working capital to be used for general corporate purposes. Interest on the 5.60% Senior Notes is due semi-annually. The 5.60% Senior Notes are unsecured and unsubordinated. Substantially all of our subsidiaries guaranteed the 5.60% Senior Notes. The 5.60% Senior Notes were subsequently exchanged for identical 5.60% Senior Notes that had been registered under the Securities Act of 1933. At November 30, 2009 and 2008, the carrying amount of the 5.60% Senior Notes sold in April and July 2005 was \$501.4 million and \$501.6 million, respectively.

In August 2004, we sold \$250 million of 5.50% senior notes due 2014 (the "5.50% Senior Notes") at a price of 98.842% in a private placement. Proceeds from the offering, after initial purchaser's discount and expenses, were \$245.5 million. We used the proceeds to repay borrowings under our Credit Facility. Interest on the 5.50% Senior Notes is due semi-annually. The 5.50% Senior Notes are unsecured and unsubordinated. Substantially all of our subsidiaries guaranteed the 5.50% Senior Notes. At November 30, 2009 and 2008, the carrying value of the 5.50% Senior Notes was \$248.4 million and \$248.1 million, respectively.

In February 2003, we issued \$350 million of 5.95% senior notes due 2013 at a price of 98.287%. Substantially all of our subsidiaries guaranteed the 5.95% senior notes. At November 30, 2009 and 2008, the carrying amount of the 5.95% senior notes was \$347.5 million and \$346.9 million, respectively.

Substantially all of our wholly-owned subsidiaries have guaranteed all our Senior Notes (the "Guaranteed Notes"). The guarantees are full and unconditional and the guarantor subsidiaries are 100% directly and indirectly owned by Lennar Corporation. The principal reason our wholly-owned subsidiaries guaranteed the Guaranteed Notes is so holders of the Guaranteed Notes will have rights at least as great with regard to our subsidiaries as any other holders of a material amount of our unsecured debt. Therefore, the guarantees of the Guaranteed Notes will remain in effect while the guarantor subsidiaries guarantee a material amount of the debt of Lennar Corporation, as a separate entity, to others. At any time, however, when a guarantor subsidiary is no longer guaranteeing at least \$75 million of Lennar Corporation's debt other than the Guaranteed Notes, either directly or by guaranteeing other subsidiaries' obligations as guarantors of Lennar Corporation's debt, the guarantor subsidiaries' guarantee of the Guaranteed Notes will be suspended. Currently, the only debt the guarantor subsidiaries are guaranteeing other than the Guaranteed Notes is Lennar Corporation's principal revolving bank credit line (currently the Credit Facility). Therefore, if the guarantor subsidiaries cease guaranteeing Lennar Corporation's obligations under its principal revolving bank credit line and are not guarantors of any new debt, the guarantor subsidiaries' guarantees of the Guaranteed Notes will be suspended until such time, if any, as they again are guaranteeing at least \$75 million of Lennar Corporation's debt other than the Guaranteed Notes.

If the guarantor subsidiaries are guaranteeing a revolving credit line totaling at least \$75 million, we will treat the guarantees of the Guaranteed Notes as remaining in effect even during periods when Lennar Corporation's borrowings under the revolving credit line is less than \$75 million. Because it is possible that our banks will permit some or all of the guarantor subsidiaries to stop guaranteeing our revolving credit line, it is possible that, at some time or times in the future, the Guaranteed Notes will no longer be guaranteed by the guarantor subsidiaries.

Our senior unsecured revolving credit facility (the "Credit Facility") consists of a \$1.1 billion revolving credit facility maturing in July 2011. In order to borrow under our Credit Facility, we are required to first use our cash in excess of \$750 million and have availability under our borrowing base calculation. As of November 30, 2009, we had no availability to borrow under our Credit Facility. We can create availability under our Credit Facility to the extent we use the cash in excess of \$750 million to purchase qualified borrowing base assets.

Our Credit Facility is guaranteed by substantially all of our subsidiaries. Interest rates on outstanding borrowings are LIBOR-based, with margins determined based on changes in our credit ratings, or an alternate base rate, as described in our Credit Facility agreement. During the year ended November 30, 2009, we did not have any borrowings under our Credit Facility, compared to average daily borrowings of \$21.3 million during the year ended November 30, 2008. At both November 30, 2009 and 2008, we had no outstanding balance under our Credit Facility. However, at November 30, 2009 and 2008, \$177.9 million and \$275.2 million, respectively, of our total letters of credit outstanding discussed below, were collateralized against certain borrowings available under our Credit Facility.

Our performance letters of credit outstanding were \$97.7 millions and \$167.5 million, respectively, at November 30, 2009 and 2008. Our financial letters of credit outstanding were \$205.4 million and \$278.5 million, respectively, at November 30, 2009 and 2008. Performance letters of credit are generally posted with regulatory bodies to guarantee our performance of certain development and construction activities, and financial letters of credit are generally posted in lieu of cash deposits on option contracts and for insurance risks, credit enhancements and as other collateral.

At November 30, 2009, our Financial Services segment had two warehouse repurchase facilities with a maximum aggregate commitment of \$200 million and \$100 million, respectively, that mature in June 2010 and another warehouse repurchase facility with a maximum aggregate commitment of \$125 million that matures in July 2010. The maximum aggregate commitment under these facilities totaled \$425 million.

Our Financial Services segment uses these facilities to finance its lending activities until the mortgage loans are sold to investors and expects the facilities to be renewed or replaced with other facilities when they mature. Borrowings under the facilities were \$217.5 million and \$209.5 million, respectively, at November 30, 2009 and 2008 and were collateralized by mortgage loans and receivables on loans sold to investors but not yet paid for with outstanding principal balances of \$266.9 million and \$281.2 million, respectively, at November 30, 2009 and 2008. These facilities have several interest rate-pricing options, which fluctuate with market rates. The combined effective interest rate on the facilities at November 30, 2009 was 4.2%.

At November 30, 2008, our Financial Services segment had advances under a different conduit funding agreement totaling \$10.8 million, which had an effective interest rate of 2.9% at November 30, 2008. At November 30, 2008, our Financial Services segment had advances under the on going 60-day committed repurchase facility of \$5.2 million, which were collateralized by mortgage loans and receivables on loans sold to investors but not yet paid for with outstanding principal balances of \$5.5 million. The effective interest rate of this facility at November 30, 2008 was 3.7%.

Our Financial Services segment, in the normal course of business, uses derivative financial instruments to reduce its exposure to fluctuations in interest rates. The Financial Services segment enters into forward commitments and, to a lesser extent, option contracts to protect the value of loans held-for-sale from increases in market interest rates. We do not anticipate that we will suffer credit losses from counterparty non-performance.

Due to the fact that our Financial Services segment's borrowings under the lines of credit are generally repaid with the proceeds from the sale of mortgage loans and receivables on loans that secure those borrowings, the facilities are not likely to be a call on our current cash or future cash resources. If the facilities are not renewed, the borrowings under the lines of credit will be paid off by selling the mortgage loans held-for-sale and by collecting on receivables on loans sold but not yet paid. Without the facilities, our Financial Services segment would have to use cash from operations and other funding sources to finance its lending activities.

Debt Covenants

At November 30, 2009, we believe we were in compliance with our debt covenants. Under our Credit Facility agreement (the "Agreement"), we were required to maintain a leverage ratio of less than or equal to 55% at the end of each fiscal quarter during our 2009 fiscal year and we are required to maintain a leverage ratio of less than or equal to 52.5% for our 2010 fiscal year and through the maturity of our Credit Facility in 2011. If our

adjusted consolidated tangible net worth, as calculated per the Agreement, falls below \$1.6 billion, our Credit Facility would be reduced from \$1.1 billion to \$0.9 billion. In no event may our adjusted consolidated tangible net worth, as calculated per the Agreement, be less than \$1.3 billion.

The following are computations of our adjusted consolidated tangible net worth and our leverage ratio as calculated per the Agreement as of November 30, 2009:

	<u>Covenant Level</u>	<u>Level Achieved as of November 30, 2009</u>	<u>Cushion</u>
		(Dollars in thousands)	
Adjusted consolidated net worth (1)	\$1,686,031	2,254,661	568,630
Leverage ratio (2)	55%	48%	700 Basis Points

The terms “adjusted consolidated tangible net worth” and “leverage ratio” used in the Agreement are specifically calculated per the Agreement and differ in specified ways from comparable GAAP or common usage terms. Our adjusted consolidated tangible net worth and leverage ratio, as well as our maximum recourse exposure from joint ventures were calculated for purposes of the Agreement as of November 30, 2009 as follows:

- (1) The minimum adjusted consolidated net worth and the adjusted consolidated tangible net worth as calculated per the Agreement is as follows:

Minimum adjusted consolidated tangible net worth

	<u>As of November 30, 2009</u>
	(Dollars in thousands)
Stated adjusted consolidated tangible net worth per the Agreement	\$2,330,000
Plus: 50% of cumulative positive consolidated net income in excess of aggregate amount paid to purchase or redeem equity securities	3,416
Less: Deferred tax asset valuation allowance	<u>(647,385)</u>
Minimum adjusted consolidated tangible net worth as calculated per the Agreement ..	<u>\$1,686,031</u>

Adjusted consolidated tangible net worth

	<u>As of November 30, 2009</u>
	(In thousands)
Consolidated stockholders’ equity	\$2,443,479
Less: Intangible assets (a)	<u>(34,046)</u>
Consolidated tangible net worth as calculated per the Agreement	2,409,433
Less: Consolidated stockholders’ equity of mortgage banking subsidiaries (b)	<u>(154,772)</u>
Adjusted consolidated tangible net worth as calculated per the Agreement	<u>\$2,254,661</u>

- (a) Intangible assets consist of the Financial Services’ title operations goodwill.
(b) Consolidated stockholders’ equity of mortgage banking subsidiaries represents the stockholders’ equity of the Financial Services segment’s mortgage operations which is included in stockholders’ equity in our consolidated balance sheet as of November 30, 2009.

(2) The leverage ratio as calculated per the Agreement is as follows:

	As of November 30, 2009 (Dollars in thousands)
Senior notes and other debts payable	\$2,761,352
Less: Indebtedness of our consolidated entities (a)	(303,263)
Lennar's indebtedness as calculated per the Agreement	<u>2,458,089</u>
Plus: Letters of credit (b)	206,094
Plus: Lennar's maximum recourse exposure related to unconsolidated entities	287,739
Plus: Lennar's maximum recourse exposure related to its consolidated entities (a)	<u>110,775</u>
Consolidated indebtedness as calculated per the Agreement	<u>3,062,697</u>
Less: 75% of unconsolidated and consolidated entities reimbursement obligations (c) ..	(104,819)
Plus: 10% of unconsolidated and consolidated entities non-recourse indebtedness with completion guarantees (d)	60,840
Less: the lesser of \$500 million or unrestricted cash in excess of \$15 million per the Agreement	<u>(500,000)</u>
Numerator as calculated per the Agreement	<u>\$2,518,718</u>
Denominator as calculated per the Agreement	<u>\$5,273,379</u>
Leverage ratio (e)	<u>48%</u>

- (a) Indebtedness of our consolidated entities primarily includes \$192.9 million of non-recourse debt of our consolidated entities and \$110.8 million of recourse debt of our consolidated entities. These amounts are included in senior notes and other debts payable in our consolidated balance sheet as of November 30, 2009. Indebtedness of our consolidated entities is offset by \$0.5 million of primarily corporate guarantees.
- (b) Letters of credit include our financial letters of credit outstanding of \$205.4 million disclosed in Note 6 of the notes to our consolidated financial statements as of November 30, 2009 and \$0.7 million of letters of credit related to the Financial Services segment's title operations.
- (c) Reimbursement obligations include \$93.2 million related to our joint and several reimbursement agreements from partners of our unconsolidated entities and \$46.6 million related to our joint and several reimbursement agreements from partners of our consolidated entities.
- (d) Non-recourse debt with completion guarantees includes \$608.4 million of our unconsolidated entities non-recourse debt with completion guarantees.
- (e) Leverage ratio consists of the numerator as calculated per the Agreement divided by the denominator as calculated per the Agreement (consolidated indebtedness as calculated per the Agreement, less 75% of unconsolidated and consolidated entities reimbursement obligations, plus 10% of unconsolidated and consolidated non-recourse indebtedness with completion guarantees, plus adjusted consolidated tangible net worth as calculated per the Agreement).

Additionally, our Credit Facility requires us to effect quarterly reductions of our maximum recourse exposure related to joint ventures in which we have investments by a total of \$200 million to \$535 million by November 30, 2009, which we had already accomplished as of May 31, 2009. We must also effect quarterly reductions during our 2010 fiscal year totaling \$180 million to \$355 million of which we have already reduced it by \$136.5 million. During the first six months of our 2011 fiscal year, we must reduce our maximum recourse exposure related to joint ventures by \$80 million to \$275 million.

If the joint ventures are unable to reduce their debt, where there is recourse to us, through the sale of inventory or other means, then we and our partners may be required to contribute capital to the joint ventures.

While we currently believe we are in compliance with our debt covenants in the Agreement, if we had to record significant additional valuation adjustments and other write-offs in the future, issue debt, and/or make significant investments in strategic joint ventures, they could cause us to fail to comply with the Agreement's covenants. In addition, if we default in the payment or performance of certain obligations relating to the debt of unconsolidated entities above a specified threshold amount, we would be in default under the Agreement. If we are not in compliance and are unable to obtain a waiver or amendments to the Credit Facility, the lenders would have the right to terminate the facility and require us to replace or cash collateralize \$177.9 million of letters of credit outstanding under our Credit Facility. A default under the Agreement might entitle holders of \$2.2 billion of debt securities we have sold into the capital markets to cause the sums evidenced by those debt securities to become due immediately, which might require us to sell assets at prices well below the fair values, or the carrying values, of the assets. However, our cash and cash equivalents of \$1.3 billion at November 30, 2009 provide ample liquidity to cash collateralize the letters of credit if necessary.

Changes in Capital Structure

We have a stock repurchase program which permits the purchase of up to 20 million shares of our outstanding common stock. During 2009, 2008 and 2007, there were no material share repurchases of common stock under the stock repurchase program. As of November 30, 2009, 6.2 million shares of common stock can be repurchased in the future under the program.

Treasury stock increased by 0.3 million Class A common shares and 0.5 million Class A common shares, respectively, during the years ended November 30, 2009 and November 30, 2008, in connection with activity related to our equity compensation plan and forfeitures of restricted stock.

In April 2009, we entered into distribution agreements with J.P Morgan Securities, Inc., Citigroup Global Markets Inc., Merrill Lynch, Pierce, Fenner & Smith Incorporated and Deutsche Bank Securities Inc., relating to an offering of our Class A common stock into the market from time to time for an aggregate of up to \$275 million. As of November 30, 2009, we had sold a total of 21.0 million shares of our Class A common stock under the equity offering for gross proceeds of \$225.5 million, or an average of \$10.76 per share. After compensation to the distributors of \$4.5 million, we received net proceeds of \$221.0 million. We will use the proceeds from the offering for general corporate purposes.

During 2009, Class A and Class B common stock holders received a per share annual dividend of \$0.16. In October 2008, the Company's Board of Directors voted to decrease the annual dividend rate with regard to the Company's Class A and Class B common stock to \$0.16 per share per year (payable quarterly) from \$0.64 per share per year (payable quarterly). During 2008 and 2007, Class A and Class B common stockholders received per share annual dividends of \$0.52 and \$0.64, respectively.

Based on our current financial condition and credit relationships, we believe that our operations and borrowing resources will provide for our current and long-term capital requirements at our anticipated levels of activity.

Off-Balance Sheet Arrangements

Investments in Unconsolidated Entities

At November 30, 2009, we had equity investments in 62 unconsolidated entities, compared to 116 unconsolidated entities at November 30, 2008. We are focused on continuing to reduce the number of unconsolidated entities that we have investments in. Historically, we invested in unconsolidated entities that acquire and develop land (1) for our homebuilding operations or for sale to third parties or (2) for the construction of homes for sale to third-party homebuyers. Through these entities, we sought to reduce and share our risk by limiting the amount of our capital invested in land, while obtaining access to potential future homesites and allowing us to participate in strategic ventures. The use of these entities also, in some instances, enabled us to acquire land to which we could not otherwise obtain access, or could not obtain access on as favorable terms, without the participation of a strategic partner. Participants in these joint ventures are land owners/developers, other homebuilders and financial or strategic partners. Joint ventures with land owners/developers give us access to homesites owned or controlled by our partner. Joint ventures with other homebuilders provide us with the ability to bid jointly with our partner for large land parcels. Joint ventures with financial partners allow us to combine our homebuilding expertise with access to our partners' capital. Joint ventures with strategic partners allow us to combine our homebuilding expertise with the specific expertise (e.g. commercial or infill experience) of our partner. Each joint venture is governed by an executive committee consisting of members from the partners.

Although the strategic purposes of our joint ventures and the nature of our joint ventures partners vary, the joint ventures are generally designed to acquire, develop and/or sell specific assets during a limited life-time. The joint ventures are typically structured through non-corporate entities in which control is shared with our venture partners. Each joint venture is unique in terms of its funding requirements and liquidity needs. We and the other joint venture participants typically make pro-rata cash contributions to the joint venture. In many cases, our risk is limited to our equity contribution and potential future capital contributions. Additionally, most joint ventures obtain third-party debt to fund a portion of the acquisition, development and construction costs of their communities. The joint venture agreements usually permit, but do not require, the joint ventures to make additional capital calls in the future. However, capital calls relating to the repayment of joint venture debt under payment or maintenance guarantees generally is required.

Under the terms of our joint venture agreements, we generally have the right to share in earnings and distributions of the entities on a pro-rata basis based on our ownership percentage. Some joint venture agreements provide for a different allocation of profit and cash distributions if and when the cumulative results of the joint venture exceed specified targets (such as a specified internal rate of return). Our equity in earnings (loss) from unconsolidated entities excludes our pro-rata share of joint ventures' earnings resulting from land sales to our homebuilding divisions. Instead, we account for those earnings as a reduction of our costs of purchasing the land from the joint ventures. This in effect defers recognition of our share of the joint ventures' earnings related to these sales until we deliver a home and title passes to a third-party homebuyer.

In some instances, we are designated as the manager under the direction of a management committee that has shared power amongst the partners of the unconsolidated entity and receive fees for such services. In addition, we often enter into option contracts to acquire properties from our joint ventures, generally for market prices at specified dates in the future. Option contracts generally require us to make deposits using cash or irrevocable letters of credit toward the exercise price. These option deposits are generally negotiated by management on a case by case basis and until recently have usually been 10% of the exercise price.

We regularly monitor the results of our unconsolidated joint ventures and any trends that may affect their future liquidity or results of operations. Joint ventures in which we have investments are subject to a variety of financial and non-financial debt covenants related primarily to equity maintenance, fair value of collateral and minimum homesite takedown or sale requirements. We monitor the performance of joint ventures in which we have investments on a regular basis to assess compliance with debt covenants. For those joint ventures not in compliance with the debt covenants, we evaluate and assess possible impairment of our investment.

Our arrangements with joint ventures generally do not restrict our activities or those of the other participants. However, in certain instances, we agree not to engage in some types of activities that may be viewed as competitive with the activities of these ventures in the localities where the joint ventures do business.

As discussed above, the joint ventures in which we invest generally supplement equity contributions with third-party debt to finance their activities. In many instances, the debt financing is non-recourse, thus neither we nor the other equity partners are a party to the debt instruments. In other cases, we and the other partners agree to provide credit support in the form of repayment or maintenance guarantees.

Material contractual obligations of our unconsolidated joint ventures primarily relate to the debt obligations described above. The joint ventures generally do not enter into lease commitments because the entities are managed either by us, or another of the joint venture participants, who supply the necessary facilities and employee services in exchange for market-based management fees. However, they do enter into management contracts with the participants who manage them. Some joint ventures also enter into agreements with developers, which may be us or other joint venture participants, to develop raw land into finished homesites or to build homes.

The joint ventures often enter into option agreements with buyers, which may include us or other joint venture participants, to deliver homesites or parcels in the future at market prices. Option deposits are recorded by the joint ventures as liabilities until the exercise dates at which time the deposit and remaining exercise proceeds are recorded as revenue. Any forfeited deposit is recognized as revenue at the time of forfeiture. Our unconsolidated joint ventures generally do not enter into off-balance sheet arrangements.

As described above, the liquidity needs of joint ventures in which we have investments vary on an entity-by-entity basis depending on each entity's purpose and the stage in its life cycle. During formation and development activities, the entities generally require cash, which is provided through a combination of equity contributions and debt financing, to fund acquisition and development of properties. As the properties are completed and sold, cash generated is available to repay debt and for distribution to the joint venture's members. Thus, the amount of cash available for a joint venture to distribute at any given time is primarily a function of the scope of the joint venture's activities and the stage in the joint venture's life cycle.

We track our share of cumulative earnings and cumulative distributions of our joint ventures. For purposes of classifying distributions received from joint ventures in our statements of cash flows, cumulative distributions are treated as returns *on* capital to the extent of cumulative earnings and included in our consolidated statements of cash flows as operating activities. Cumulative distributions in excess of our share of cumulative earnings are treated as returns *of* capital and included in our consolidated statements of cash flows as investing activities.

Summarized financial information on a combined 100% basis related to unconsolidated entities in which we had investments that are accounted for by the equity method was as follows:

<u>Statements of Operations and Selected Information</u>	<u>Years Ended November 30,</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
	(Dollars in thousands)		
Revenues	\$ 339,993	862,728	2,060,279
Costs and expenses	<u>1,212,866</u>	<u>1,394,601</u>	<u>3,075,696</u>
Net loss of unconsolidated entities (1)	<u>\$ (872,873)</u>	<u>(531,873)</u>	<u>(1,015,417)</u>

Our share of net loss—recognized (2)	\$ (130,917)	(59,156)	(362,899)
Our cumulative share of net earnings—deferred at November 30	\$ 12,052	21,491	34,731
Our investments in unconsolidated entities	\$ 609,140	766,752	934,271
Equity of the unconsolidated entities	<u>\$2,249,289</u>	<u>2,688,365</u>	<u>2,739,467</u>
Our investment % in the unconsolidated entities	<u>27%</u>	<u>29%</u>	<u>34%</u>

- (1) The net loss of unconsolidated entities for the year ended November 30, 2009 was primarily related to valuation adjustments recorded by the unconsolidated entities. Our exposure to such losses was significantly lower as a result of our small ownership interest in the respective unconsolidated entities or our previous valuation adjustments to our investments in unconsolidated entities.
- (2) For the years ended November 30, 2009, 2008 and 2007, our share of net loss recognized from unconsolidated entities includes \$101.9 million, \$32.2 million and \$364.2 million, respectively, of our share of valuation adjustments related to assets of the unconsolidated entities in which we have investments.

In November 2007, we sold a portfolio of land consisting of approximately 11,000 homesites in 32 communities located throughout the country to a strategic land investment venture with Morgan Stanley Real Estate Fund II, L.P., an affiliate of Morgan Stanley & Co., Inc., in which we have a 20% ownership interest and 50% voting rights. Due to our continuing involvement, the transaction did not qualify as a sale under GAAP; thus, the inventory has remained on our consolidated balance sheet in consolidated inventory not owned. As of November 30, 2009 and 2008, the portfolio of land (including land development costs) of \$477.9 million and \$538.4 million, respectively, is reflected as inventory in the summarized condensed financial information related to unconsolidated entities in which we have investments. The decrease in this inventory from November 30, 2008 to November 30, 2009, resulted primarily from valuation adjustments of \$50.1 million recorded by the land investment venture.

In February 2007, LandSource Communities Development LLC (“LandSource”) admitted MW Housing Partners as a new strategic partner. As part of the transaction, the joint venture obtained \$1.6 billion of non-recourse financing, which consisted of a \$200 million five-year Revolving Credit Facility, a \$1.1 billion six-year Term Loan B Facility and a \$244 million seven-year Second Lien Term Facility. The transaction resulted in a cash distribution to us of \$707.6 million. As a result, our ownership in LandSource was reduced to

16%. As a result of the recapitalization, we recognized a pretax financial statements gain of \$175.9 million during the year ended November 30, 2007. During the year ended November 30, 2007, we also recognized \$24.7 million of profit deferred at the time of the recapitalization of the LandSource joint venture in other expense, net.

In June 2008, LandSource and a number of its subsidiaries commenced proceedings under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware. In November 2008, our land purchase options with LandSource were terminated, thus, in 2008, we recognized a deferred profit of \$101.3 million (net of \$31.8 million of write-offs of option deposits and pre-acquisition costs and other write-offs) related to the 2007 recapitalization of LandSource.

In July 2009, the United States Bankruptcy Court for the District of Delaware confirmed the plan of reorganization for LandSource. As a result of the bankruptcy proceedings, LandSource was reorganized into Newhall. The reorganized company emerged from Chapter 11 free of its previous bank debt. As part of the reorganization plan, we invested \$140 million in exchange for approximately 15% equity interest in the reorganized Newhall, ownership in several communities that were formerly owned by LandSource, the settlement and release of any claims that might have been asserted against us and certain other claims LandSource had against third parties.

Debt to total capital of the unconsolidated entities in which we have investments was calculated as follows:

	November 30,	
	2009	2008
	(Dollars in thousands)	
Debt	\$1,588,390	4,062,058
Equity	2,249,289	2,688,365
Total capital	<u>\$3,837,679</u>	<u>6,750,423</u>
Debt to total capital of our unconsolidated entities	<u>41.4%</u>	<u>60.2%</u>

Our investments in unconsolidated entities by type of venture were as follows:

	November 30,	
	2009	2008
	(In thousands)	
Land development	\$ 565,673	633,652
Homebuilding	43,467	133,100
Total investment	<u>\$ 609,140</u>	<u>766,752</u>

During 2009, as homebuilding market conditions remained challenged, we recorded \$101.9 million of our share of valuation adjustments related to the assets of unconsolidated entities in which we have investments, compared to \$32.2 million for the year ended November 30, 2008. In addition, we recorded \$89.0 million and \$172.8 million, respectively, of valuation adjustments to our investments in unconsolidated entities for the years ended November 30, 2009 and 2008. We will continue to monitor our investments in joint ventures and the recoverability of assets owned by those joint ventures.

The summary of our net recourse exposure related to the unconsolidated entities in which we have investments was as follows:

	November 30,	
	2009	2008
	(In thousands)	
Several recourse debt—repayment	\$ 42,691	78,547
Several recourse debt—maintenance	75,238	167,941
Joint and several recourse debt—repayment	85,799	138,169
Joint and several recourse debt—maintenance	81,592	123,051
Land seller debt and other debt recourse exposure	2,420	12,170
Lennar's maximum recourse exposure	<u>287,740</u>	519,878
Less: joint and several reimbursement agreements with our partners	<u>(93,185)</u>	(127,428)
Lennar's net recourse exposure	<u>\$194,555</u>	<u>392,450</u>

During the year ended November 30, 2009, we reduced our maximum recourse exposure related to indebtedness of unconsolidated entities by \$232.1 million, of which \$106.1 million was paid by us and \$126.0 million related to the joint ventures selling inventory, dissolution of joint ventures, renegotiation of joint venture debt agreements and in certain circumstances consolidation of joint ventures. In addition, during the year ended November 30, 2009, we recorded \$40.1 million of obligation guarantees related to debt of certain of our joint ventures. As of November 30, 2009, we had \$14.1 million of obligation guarantees recorded as a liability on our consolidated balance sheet. The obligation guarantees are estimated based on current facts and circumstances; any unexpected changes may lead us to incur additional obligation guarantees in the future.

Indebtedness of an unconsolidated entity is secured by its own assets. Some unconsolidated entities own multiple properties and other assets. There is no cross collateralization of debt to different unconsolidated entities. We also do not use our investment in one unconsolidated entity as collateral for the debt in another unconsolidated entity or commingle funds among our unconsolidated entities.

In connection with a loan to an unconsolidated entity, we and our partners often guarantee to a lender either jointly and severally or on a several basis, any, or all of the following: (i) the completion of the development, in whole or in part, (ii) indemnification of the lender from environmental issues, (iii) indemnification of the lender from "bad boy acts" of the unconsolidated entity (or full recourse liability in the event of unauthorized transfer or bankruptcy) and (iv) that the loan to value and/or loan to cost will not exceed a certain percentage (maintenance or remargining guarantee) or that a percentage of the outstanding loan will be repaid (repayment guarantee).

In connection with loans to an unconsolidated entity where there is a joint and several guarantee, we in certain instances have a reimbursement agreement with our partner. The reimbursement agreement provides that neither party is responsible for more than its proportionate share of the guarantee. However, if our joint venture partner does not have adequate financial resources to meet its obligations under the reimbursement agreement, we may be liable for more than our proportionate share, up to our maximum exposure, which is the full amount covered by the joint and several guarantee.

The recourse debt exposure in the previous table represents our maximum exposure to loss from guarantees and does not take into account the underlying value of the collateral or the other assets of the borrowers that are available to repay debt or to reimburse us for any payments on our guarantees. Our unconsolidated entities that have recourse debt have a significant amount of assets and equity. The summarized balance sheets of our unconsolidated entities with recourse debt were as follows.

	November 30,	
	2009	2008
	(In thousands)	
Assets	\$1,324,993	2,846,819
Liabilities	777,836	1,565,148
Equity (1)	547,157	1,281,671

- (1) The decrease in equity of our unconsolidated entities with recourse debt relates primarily to valuation adjustments recorded by the unconsolidated entities, partner buyouts and consolidation of joint ventures, partially offset by capital contributions made by us and our partners during the year ended November 30, 2009. Our exposure to impairment losses was significantly lower, as a result of our small ownership interest in the respective unconsolidated entities or our previous valuation adjustments to our investments in unconsolidated entities.

In addition, in most instances in which we have guaranteed debt of an unconsolidated entity, our partners have also guaranteed that debt and are required to contribute their share of the guarantee payments. Some of our guarantees are repayment guarantees and some are maintenance guarantees. In a repayment guarantee, we and our venture partners guarantee repayment of a portion or all of the debt in the event of a default before the lender would have to exercise its rights against the collateral. In the event of default, if our venture partner does not have adequate financial resources to meet its obligations under the reimbursement agreement, we may be liable for more than our proportionate share, up to our maximum recourse exposure, which is the full amount covered by the joint and several guarantee. The maintenance guarantees only apply if the value of the collateral (generally land and improvements) is less than a specified percentage of the loan balance. If we are required to make a payment under a maintenance guarantee to bring the value of the collateral above the specified percentage of the loan balance, the payment may constitute a capital contribution or loan to the unconsolidated entity and increase our share of any funds the unconsolidated entity distributes.

In many of the loans to unconsolidated entities, we and our joint venture partners (or entities related to them) have been required to give guarantees of completion to the lenders. Those completion guarantees may require that the guarantors complete the construction of the improvements for which the financing was obtained. If the construction was to be done in phases, very often the guarantee generally is limited to completing only the phases as to which construction has already commenced and for which loan proceeds were used. Under many of the completion guarantees, the guarantors are permitted, under certain circumstances, to use undisbursed loan proceeds to satisfy the completion of obligations, and in many of those cases, the guarantors only pay interest on those funds, with no repayment of the principal of such funds required.

During the years ended November 30, 2009 and 2008, amounts paid under our maintenance guarantees were \$31.6 million and \$74.0 million, respectively. During the year ended November 30, 2009, we made a payment of \$5.6 million under a completion guarantee related to one joint venture. During the year ended November 30, 2008, there were no payments under completion guarantees. During the years ended November 30, 2009 and 2008, loan repayments, including amounts paid under our repayment guarantees, were \$72.4 million and \$94.9 million, respectively. These guarantee payments are recorded primarily as contributions to our unconsolidated entities.

As of November 30, 2009, the fair values of the maintenance guarantee, completion guarantees and repayment guarantees were not material. We believe that as of November 30, 2009, in the event we become legally obligated to perform under a guarantee of the obligation of an unconsolidated entity due to a triggering event under a guarantee, most of the time the collateral should be sufficient to repay at least a significant portion of the obligation or we and our partners would contribute additional capital into the venture.

The total debt of the unconsolidated entities in which we have investments was as follows:

	<u>November 30,</u>	
	<u>2009</u>	<u>2008</u>
	(Dollars in thousands)	
Lennar's net recourse exposure	\$ 194,555	392,450
Reimbursement agreements from partners	93,185	127,428
Lennar's maximum recourse exposure	287,740	519,878
Non-recourse bank debt and other debt (partner's share of several recourse)	140,078	285,519
Non-recourse land seller debt or other debt	47,478	90,519
Non-recourse debt with completion guarantees—excluding LandSource	608,397	820,435
Non-recourse debt without completion guarantees—excluding LandSource	504,697	994,580
Non-recourse debt without completion guarantees—LandSource (1)	—	1,351,127
Non-recourse debt to Lennar	1,300,650	3,542,180
Total debt	<u>\$1,588,390</u>	<u>4,062,058</u>
Lennar's maximum recourse exposure as a % of total JV debt	18%	13%

(1) During 2009, LandSource emerged from bankruptcy as a new reorganized company named Newhall Land Development, LLC. As a result, all of LandSource's bank debts were discharged.

Some of the unconsolidated entities' debt arrangements contain certain financial covenants. As market conditions remained challenged during the year ended November 30, 2009, we continued to closely monitor these covenants and the unconsolidated entities' abilities to comply with them. Our Credit Facility requires us to report certain defaults arising under indebtedness with respect to our joint ventures. As of November 30, 2009, we had no reportable joint venture defaults under the Credit Facility.

In view of current credit market conditions, it is not uncommon for lenders to real estate developers, including joint ventures in which we have interests, to assert non-monetary defaults (such as failure to meet construction completion deadlines or declines in the market value of collateral below required amounts) or technical monetary defaults against the real estate developers. In most instances, those asserted defaults are resolved by modifications of the loan terms, additional equity investments or other concessions by the borrowers. In addition, in some instances, real estate developers, including joint ventures in which we have interests, are forced to request temporary waivers of covenants in loan documents or modifications of loan terms, which are

often, but not always obtained. However, in some instances developers, including joint ventures in which we have interests, are not able to meet their monetary obligations to lenders, and are thus declared in default. Because we sometimes guarantee all or portions of the obligations to lenders of joint ventures in which we have interests, when these joint ventures default on their obligations, lenders may or may not have claims against us. Normally, we do not make payments with regard to guarantees of joint venture obligations while the joint ventures are contesting assertions regarding sums due to their lenders. When it is determined that a joint venture is obligated to make a payment that we have guaranteed and the joint venture will not be able to make that payment, we accrue the amounts probable to be paid by us as a liability. Although we generally fulfill our guarantee obligations within reasonable time after we determine that we are obligated with regard to them, at any point in time it is likely that we will have some balance of unpaid guarantee liability. At November 30, 2009, the liability for unpaid guarantees of joint venture indebtedness on our consolidated balance sheet totaled \$14.1 million.

The following table summarizes the principal maturities of our unconsolidated entities ("JVs") debt as per current debt arrangements as of November 30, 2009 and does not represent estimates of future cash payments that will be made to reduce debt balances. Many JV loans have extension options in the loan agreements that would allow the loans to be extended into future years.

	Total JV Assets (1)	Principal Maturities of Unconsolidated JVs by Period					Other Debt (2)
		Total JV Debt	2010	2011	2012	Thereafter	
(In thousands)							
Net recourse debt to Lennar	\$	194,555	113,798	26,586	43,408	8,343	2,420
Reimbursement agreements		93,185	8,862	50,878	33,445	—	—
Gross recourse debt to Lennar	\$1,324,993	287,740	122,660	77,464	76,853	8,343	2,420
Debt without recourse to Lennar	2,585,204	1,300,650	203,134	960,820	70,381	13,996	52,319
Total	<u>\$3,910,197</u>	<u>1,588,390</u>	<u>325,794</u>	<u>1,038,284</u>	<u>147,234</u>	<u>22,339</u>	<u>54,739</u>

(1) Excludes unconsolidated joint venture assets where the joint venture has no debt.

(2) Represents land seller debt and other debt.

The following table is a breakdown of the assets, debt and equity of the unconsolidated joint ventures by partner type as of November 30, 2009:

Partner Type:	Total JV Assets	Gross Recourse Debt to Lennar	Reimbursement Agreements	Net Recourse Debt to Lennar	Total Debt Without Recourse to Lennar	Total JV Debt	Total JV Equity	JV Debt to Total Capital Ratio	Remaining Homes/Homesites in JV
Land Owners/									
Developers	\$ 680,933	62,196	—	62,196	157,190	219,386	\$ 387,439	36%	26,687

- (1) All of the joint ventures presented in the table above operate in our Homebuilding West segment except for 56th & Lone Mountain, Rocking Horse Partners and Willow Springs Properties, which operate in our Homebuilding Central segment, and MS Rialto Residential Holdings, which operates in all of our homebuilding segments and Homebuilding Other.
- (2) During 2009, LandSource emerged from bankruptcy as a new reorganized company named Newhall Land Development, LLC. As a result, all of LandSource's bank debts were discharged.

The table below indicates the percentage of assets, debt and equity of our 10 largest unconsolidated joint venture investments as of November 30, 2009:

	% of Total JV Assets	% of Gross Recourse Debt to Lennar	% of Net Recourse Debt to Lennar	% of Total Debt Without Recourse to Lennar	% of Total JV Equity
10 largest JVs	69%	29%	25%	59%	81%
Other	31%	71%	75%	41%	19%
Total	100%	100%	100%	100%	100%

Option Contracts

We have access to land through option contracts, which generally enables us to control portions of properties owned by third parties (including land funds) and unconsolidated entities until we have determined whether to exercise the option.

A majority of our option contracts require a non-refundable cash deposit or irrevocable letter of credit based on a percentage of the purchase price of the land. Until recently, these option deposits generally have approximated 10% of the exercise price. Our option contracts sometimes include price adjustment provisions, which adjust the purchase price of the land to its approximate fair value at the time of acquisition or are based on fair value at the time of takedown. The exercise periods of our option contracts generally range from one-to-ten years.

Our investments in option contracts are recorded at cost unless those investments are determined to be impaired, in which case our investments are written down to fair value. We review option contracts for indicators of impairment during each reporting period. The most significant indicator of impairment is a decline in the fair value of the optioned property such that the purchase and development of the optioned property would no longer

meet our targeted return on investment. Such declines could be caused by a variety of factors including increased competition, decreases in demand or changes in local regulations that adversely impact the cost of development. Changes in any of these factors would cause us to re-evaluate the likelihood of exercising our land options.

Some option contracts contain a predetermined take-down schedule for the optioned land parcels. However, in almost all instances, we are not required to purchase land in accordance with those take-down schedules. In substantially all instances, we have the right and ability to not exercise our option and forfeit our deposit without further penalty, other than termination of the option and loss of any unapplied portion of our deposit and pre-acquisition costs. Therefore, in substantially all instances, we do not consider the take-down price to be a firm contractual obligation.

When we intend not to exercise an option, we write-off any deposit and pre-acquisition costs associated with the option contract. For the years ended November 30, 2009, 2008 and 2007, we wrote-off \$84.4 million, \$97.2 million and \$530.0 million, respectively, of option deposits and pre-acquisition costs related to homesites under option that we do not intend to purchase.

The table below indicates the number of homesites owned and homesites to which we had access through option contracts with third parties ("optioned") or unconsolidated joint ventures in which we have investments ("JVs") (i.e., controlled homesites) for each of our homebuilding segments and Homebuilding Other at November 30, 2009 and 2008:

November 30, 2009	Controlled Homesites			Owned Homesites	Total Homesites
	Optioned	JVs	Total		
East	4,701	1,900	6,601	28,406	35,007
Central	1,273	2,381	3,654	15,607	19,261
West	78	7,667	7,745	24,770	32,515
Houston	901	1,728	2,629	6,672	9,301
Other	470	74	544	7,248	7,792
Total homesites	<u>7,423</u>	<u>13,750</u>	<u>21,173</u>	<u>82,703</u>	<u>103,876</u>

November 30, 2008	Controlled Homesites			Owned Homesites	Total Homesites
	Optioned	JVs	Total		
East	8,705	4,444	13,149	25,688	38,837
Central	1,820	5,991	7,811	14,501	22,312
West	203	12,078	12,281	18,776	31,057
Houston	1,461	2,654	4,115	7,389	11,504
Other	529	704	1,233	8,327	9,560
Total homesites	<u>12,718</u>	<u>25,871</u>	<u>38,589</u>	<u>74,681</u>	<u>113,270</u>

We evaluate all option contracts for land when entered into or upon a reconsideration event to determine whether we are the primary beneficiary of certain of these option contracts. Although we do not have legal title to the optioned land, if we are deemed to be the primary beneficiary, we are required to consolidate the land under option at the purchase price of the optioned land. During the year ended November 30, 2009, the effect of consolidation of these option contracts was an increase of \$14.3 million to consolidated inventory not owned with a corresponding increase to liabilities related to consolidated inventory not owned in our consolidated balance sheet as of November 30, 2009. This increase was offset primarily by our exercise of options to acquire land under certain contracts previously consolidated, resulting in a net decrease in consolidated inventory not owned of \$84.1 million. To reflect the purchase price of the inventory consolidated, we reclassified \$2.6 million of related option deposits from land under development to consolidated inventory not owned in the accompanying consolidated balance sheet as of November 30, 2009. The liabilities related to consolidated inventory not owned primarily represent the difference between the option exercise prices for the optioned land and our cash deposits.

Our exposure to loss related to our option contracts with third parties and unconsolidated entities consisted of our non-refundable option deposits and pre-acquisition costs totaling \$127.4 million and \$191.2 million, respectively, at November 30, 2009 and 2008. Additionally, we had posted \$58.2 million and \$89.5 million, respectively, of letters of credit in lieu of cash deposits under certain option contracts as of November 30, 2009 and 2008.

Contractual Obligations and Commercial Commitments

The following table summarizes our contractual obligations at November 30, 2009:

Contractual Obligations	Payments Due by Period				
	Total	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years
	(In thousands)				
Homebuilding—Senior notes and other debts payable	\$2,761,352	464,614	470,504	676,659	1,149,575
Financial services—Notes and other debts payable	217,557	217,482	42	30	3
Interest commitments under interest bearing debt (1)	828,994	168,311	285,381	218,460	156,842
Operating leases	158,631	46,570	57,770	28,451	25,840
Other contractual obligations (2)	75,000	75,000	—	—	—
Total contractual obligations (3)	<u>\$4,041,534</u>	<u>971,977</u>	<u>813,697</u>	<u>923,600</u>	<u>1,332,260</u>

- (1) Interest commitments on variable interest-bearing debt are determined based on the interest rate as of November 30, 2009.
- (2) Commitment to fund an equity investment.
- (3) Total contractual obligations exclude our gross unrecognized tax benefits of \$77.2 million as of November 30, 2009 because we are unable to make reasonable estimates as to the period of cash settlement with the respective taxing authorities.

We are subject to the usual obligations associated with entering into contracts (including option contracts) for the purchase, development and sale of real estate in the routine conduct of our business. Option contracts for the purchase of land generally enable us to defer acquiring portions of properties owned by third parties and unconsolidated entities until we have determined whether to exercise our option. This reduces our financial risk associated with land holdings. At November 30, 2009, we had access to 21,173 homesites through option contracts with third parties and unconsolidated entities in which we have investments. At November 30, 2009, we had \$127.4 million of non-refundable option deposits and pre-acquisition costs related to certain of these homesites and \$58.2 million of letters of credit posted in lieu of cash deposits under certain option contracts.

At November 30, 2009, we had letters of credit outstanding in the amount of \$303.1 million (which included the \$58.2 million of letters of credit discussed above). These letters of credit are generally posted either with regulatory bodies to guarantee our performance of certain development and construction activities or in lieu of cash deposits on option contracts. Additionally, at November 30, 2009, we had outstanding performance and surety bonds related to site improvements at various projects (including certain projects in our joint ventures) of \$821.2 million. Although significant development and construction activities have been completed related to these site improvements, these bonds are generally not released until all of the development and construction activities are completed. As of November 30, 2009, there were approximately \$324.4 million, or 40%, of costs to complete related to these site improvements. We do not presently anticipate any draws upon these bonds, but if any such draws occur, we do not believe they would have a material effect on our financial position, results of operations or cash flows.

Our Financial Services segment had a pipeline of loan applications in process of \$838.6 million at November 30, 2009. Loans in process for which interest rates were committed to the borrowers and builder commitments for loan programs totaled \$203.6 million as of November 30, 2009. Substantially all of these commitments were for periods of 60 days or less. Since a portion of these commitments is expected to expire without being exercised by the borrowers or borrowers may not meet certain criteria at the time of closing, the total commitments do not necessarily represent future cash requirements.

Our Financial Services segment uses mandatory mortgage-backed securities (“MBS”) forward commitments, option contracts and investor commitments to hedge our mortgage-related interest rate exposure. These instruments involve, to varying degrees, elements of credit and interest rate risk. Credit risk associated with MBS forward commitments, option contracts and loan sales transactions is managed by limiting our counterparties to investment banks, federally regulated bank affiliates and other investors meeting our credit standards. Our risk, in the event of default by the purchaser, is the difference between the contract price and fair value of the MBS forward commitments and option contracts. At November 30, 2009, we had open commitments amounting to \$247.7 million to sell MBS with varying settlement dates through February 2010.

The following sections discuss economic conditions, market and financing risk, seasonality and interest rates and changing prices that may have an impact on our business:

Economic Conditions

Throughout 2009, market conditions in the homebuilding industry remained challenging. Even though consumer confidence appears to have improved during 2009 and demand in some of our markets showed signs of stabilization, the homebuilding industry was still negatively impacted by high levels of unemployment, increased foreclosures and tight credit standards. Despite our continued use of sales incentives, our net new orders were down 14% and 48%, respectively, in 2009 and 2008, even though they increased 3% in the fourth quarter of 2009 year-over-year for the first time since the first quarter of our 2006 fiscal year. Our sales incentives were \$44,800 per home delivered and \$48,700 per home delivered, respectively in 2009 and 2008. A continued decline in the prices for new homes could adversely affect our revenues and margins, as well as the carrying amount of our inventory and other investments.

Market and Financing Risk

We finance our contributions to JVs, land acquisition and development activities, construction activities, financial services activities and general operating needs primarily with cash generated from operations, debt issuances and equity offerings, as well as cash borrowed under our Credit Facility and borrowings under our warehouse repurchase facilities. We also purchase land under option agreements, which enables us to control homesites until we have determined whether to exercise the option. We tried to manage the financial risks of adverse market conditions associated with land holdings by what we believed to be prudent underwriting of land purchases in areas we viewed as desirable growth markets, careful management of the land development process and, until recent years, limitation of risks by using partners to share the costs of purchasing and developing land, as well as obtaining access to land through option contracts. Although we believed our land underwriting standards were conservative, we did not anticipate the severe decline in land values and the sharply reduced demand for new homes encountered throughout 2008 and 2009.

Seasonality

We have historically experienced variability in our results of operations from quarter-to-quarter due to the seasonal nature of the homebuilding business.

Interest Rates and Changing Prices

Inflation can have a long-term impact on us because increasing costs of land, materials and labor result in a need to increase the sales prices of homes. In addition, inflation is often accompanied by higher interest rates, which can have a negative impact on housing demand and the costs of financing land development activities and housing construction. Rising interest rates, as well as increased materials and labor costs, may reduce gross margins. An increase in material and labor costs is particularly a problem during a period of declining home prices. During 2009, a decrease in home sales prices contributed to lower gross margins and inventory valuation adjustments. Conversely, deflation can impact the value of real estate and make it difficult for us to recover our land costs. Therefore, either inflation or deflation could adversely impact our future results of operations.

New Accounting Pronouncements

The Company adopted the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”). The ASC does not alter current accounting principles generally accepted in the United States of America (“GAAP”), but rather integrated existing accounting standards with other authoritative guidance. The ASC provides a single source of authoritative GAAP for nongovernmental entities and supersedes all other previously issued non-Securities Exchange Commission accounting and reporting guidance. The adoption of the ASC did not have any effect on the Company’s result of operations or financial position.

In December 2007, the FASB updated certain provisions of ASC Topic 805, *Business Combinations*, (“ASC 805”). These provisions broaden the guidance of ASC 805, extending its applicability to all transactions and other events in which one entity obtains control over one or more other businesses. It broadens the fair value measurement and recognition requirements of assets acquired, liabilities assumed and interests transferred as a result of business combinations. ASC 805 expands on required disclosures to improve the financial statement users’ abilities to evaluate the nature and financial effects of business combinations. ASC 805 is effective for business combinations that close on or after December 1, 2009. We do not expect the adoption of these new provisions to have a material effect on our consolidated financial statements.

In December 2007, the FASB updated certain provisions of ASC Topic 810, *Consolidation*, (“ASC 810”). These provisions require that a noncontrolling interest (formerly minority interest) in a subsidiary be reported as equity and the amount of consolidated net income specifically attributable to the noncontrolling interest be identified in the consolidated financial statements. It also calls for consistency in the manner of reporting changes in the parent’s ownership interest in a subsidiary and requires fair value measurement of any noncontrolling equity investment retained in a deconsolidation. ASC 810 is effective for our fiscal year beginning December 1, 2009. The adoption of these new provisions will result in the reclassification of the noncontrolling interest in our consolidated joint ventures into the stockholders’ equity section of our consolidated balance sheet.

In June 2009, the FASB updated certain provisions of ASC 810. These provisions amend the consolidation guidance applicable to variable interest entities and the definition of a variable interest entity, and require enhanced disclosures to provide more information about an enterprise’s involvement in a variable interest entity. ASC 810 also requires ongoing assessments of whether an enterprise is the primary beneficiary of a variable interest entity. These provisions under ASC 810 are effective for our fiscal year beginning December 1, 2009. We do not expect the adoption of these provisions to have a material effect on our consolidated financial statements.

Critical Accounting Policies and Estimates

Our accounting policies are more fully described in Note 1 of the notes to our consolidated financial statements included in Item 8 of this document. As discussed in Note 1, the preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions about future events that affect the amounts reported in our consolidated financial statements and accompanying notes. Future events and their effects cannot be determined with absolute certainty. Therefore, the determination of estimates requires the exercise of judgment. Actual results could differ from those estimates, and such differences may be material to our consolidated financial statements. Listed below are those policies and estimates that we believe are critical and require the use of significant judgment in their application.

Homebuilding Operations

Revenue Recognition

Revenues from sales of homes are recognized when sales are closed and title passes to the new homeowner, the new homeowner’s initial and continuing investment is adequate to demonstrate a commitment to pay for the home, the new homeowner’s receivable is not subject to future subordination and we do not have a substantial continuing involvement with the new home. Revenues from sales of land are recognized when a significant down payment is received, the earnings process is complete, title passes and collectability of the receivable is reasonably assured. We believe that the accounting policy related to revenue recognition is a critical accounting policy because of the significance of revenue.

Inventories

Inventories are stated at cost unless the inventory within a community is determined to be impaired, in which case the impaired inventory is written down to fair value. Inventory costs include land, land development and home construction costs, real estate taxes, deposits on land purchase contracts and interest related to development and construction. We review our inventory for indicators of impairment by evaluating each community during each reporting period. The inventory within each community is categorized as finished homes and construction in progress or land under development based on the development state of the community. There were 390 and 493 active communities as of November 30, 2009 and 2008, respectively. If the undiscounted cash flows expected to be generated by a community are less than its carrying amount, an impairment charge is recorded to write down the carrying amount of such community to its fair value.

In conducting our review for indicators of impairment on a community level, we evaluate, among other things, the margins on homes that have been delivered, margins on homes under sales contracts in backlog, projected margins with regard to future home sales over the life of the community, projected margins with regard to future land sales, and the estimated fair value of the land itself. We pay particular attention to communities in which inventory is moving at a slower than anticipated absorption pace and communities whose average sales price and/or margins are trending downward and are anticipated to continue to trend downward. From this review, we identify communities whose carrying values exceed their undiscounted cash flows. While all of our

homebuilding segments and Homebuilding Other have been severely impacted by the downturn in the housing market, our West Homebuilding segment has been most significantly impacted as evidenced by its decrease in revenues of 43% for the year ended November 30, 2009, compared to the year ended November 30, 2008.

We estimate the fair value of our communities using a discounted cash flow model. These projected cash flows for each community are significantly impacted by estimates related to market supply and demand, product type by community, homesite sizes, sales pace, sales prices, sales incentives, construction costs, sales and marketing expenses, the local economy, competitive conditions, labor costs, costs of materials and other factors for that particular community. Every division evaluates the historical performance of each of its communities as well as the current trends in the market and economy impacting the community and its surrounding areas. These trends are analyzed for each of the estimates listed above. For example, since the start of the downturn in the housing market, we have found ways to reduce our construction costs in many communities, and this reduction in construction costs in addition to changes in product type in many communities has impacted future estimated cash flows.

Each of the homebuilding markets we operate is unique, as homebuilding has historically been a local business driven by local market conditions and demographics. Each of our homebuilding markets is dynamic and has specific supply and demand relationships reflective of local economic conditions. Our projected cash flows are impacted by many assumptions. Some of the most critical assumptions in our cash flow models are our projected absorption pace for home sales, sales prices and costs to build and deliver our homes on a community by community basis.

In order to arrive at the assumed absorption pace for home sales included in our cash flow models, we analyze our historical absorption pace in the community as well as other communities in the geographical area. In addition, we analyze internal and external market studies and trends, which generally include, but are not limited to, statistics on population demographics, unemployment rates and availability of competing product in the geographic area where the community is located. When analyzing our historical absorption pace for home sales and corresponding internal and external market studies, we place greater emphasis on more current metrics and trends such as the absorption pace realized in our most recent quarters as well as forecasted population demographics, unemployment rates and availability of competing product. Generally, if we notice a variation from historical results over a span of two fiscal quarters, we consider such variation to be the establishment of a trend and adjust our historical information accordingly in order to develop assumptions on the projected absorption pace in the cash flow model for a community.

In order to determine the assumed sales prices included in our cash flow models, we analyze the historical sales prices realized on homes we delivered in the community and other communities in the geographical area as well as the sales prices included in our current backlog for such communities. In addition, we analyze internal and external market studies and trends, which generally include, but are not limited to, statistics on sales prices in neighboring communities and sales prices on similar products in non-neighboring communities in the geographic area where the community is located. When analyzing our historical sales prices and corresponding market studies, we also place greater emphasis on more current metrics and trends such as future forecasted sales prices in neighboring communities as well as future forecasted sales prices for similar product in non-neighboring communities. Generally, if we notice a variation from historical results over a span of two fiscal quarters, we consider such variation to be the establishment of a trend and adjust our historical information accordingly in order to develop assumptions on the projected sales prices in the cash flow model for a community.

In order to arrive at our assumed costs to build and deliver our homes, we generally assume a cost structure reflecting contracts currently in place with our vendors adjusted for any anticipated cost reduction initiatives or increases in cost structure. Costs assumed in our cash flow models for our communities are generally based on the rates we are currently obligated to pay under existing contracts with our vendors adjusted for any anticipated cost reduction initiatives or increases in cost structure.

Due to the fact that the estimates and assumptions included in our cash flow models are based upon historical results and projected trends, they do not anticipate unexpected changes in market conditions that may lead to us incurring additional impairment charges in the future.

Using all the available trend information, we calculate our best estimate of projected cash flows for each community. While many of the estimates are calculated based on historical and projected trends, all estimates are subjective and change from market to market and community to community as market and economic conditions change. The determination of fair value also requires discounting the estimated cash flows at a rate we believe a

market participant would determine to be commensurate with the inherent risks associated with the assets and related estimated cash flow streams. The discount rate used in determining each asset's fair value depends on the community's projected life and development stage. We generally use a discount rate of approximately 20%, subject to the perceived risks associated with the community's cash flow streams relative to its inventory.

We estimate the fair value of inventory evaluated for impairment based on market conditions and assumptions made by management at the time the inventory is evaluated, which may differ materially from actual results if market conditions or our assumptions change. For example, further market deterioration or changes in our assumptions may lead to us incurring additional impairment charges on previously impaired inventory, as well as on inventory not currently impaired, but for which indicators of impairment may arise if further market deterioration occurs.

We also have access to land inventory through option contracts, which generally enables us to defer acquiring portions of properties owned by third parties and unconsolidated entities until we have determined whether to exercise our option. A majority of our option contracts require a non-refundable cash deposit or irrevocable letter of credit based on a percentage of the purchase price of the land. Our option contracts are recorded at cost. In determining whether to walk-away from an option contract, we evaluate the option primarily based upon the expected cash flows from the property that is the subject of the option. If we intend to walk-away from an option contract, we record a charge to earnings in the period such decision is made for the deposit amount and related pre-acquisition costs associated with the option contract.

We believe that the accounting related to inventory valuation and impairment is a critical accounting policy because: (1) assumptions inherent in the valuation of our inventory are highly subjective and susceptible to change and (2) the impact of recognizing impairments on our inventory has been and could continue to be material to our consolidated financial statements. Our evaluation of inventory impairment, as discussed above, includes many assumptions. The critical assumptions include the timing of the home sales within a community, management's projections of selling prices and costs and the discount rate applied to estimate the fair value of the homesites within a community on the balance sheet date. Our assumptions on the timing of home sales are critical because the homebuilding industry has historically been cyclical and sensitive to changes in economic conditions such as interest rates, credit availability, unemployment levels and consumer sentiment. Changes in these economic conditions could materially affect the projected sales price, costs to develop the homesites and/or absorption rate in a community. Our assumptions on discount rates are critical because the selection of a discount rate affects the estimated fair value of the homesites within a community. A higher discount rate reduces the estimated fair value of the homesites within the community, while a lower discount rate increases the estimated fair value of the homesites within a community. Because of changes in economic and market conditions and assumptions and estimates required of management in valuing inventory during changing market conditions, actual results could differ materially from management's assumptions and may require material inventory impairment charges to be recorded in the future.

During the years ended November 30, 2009, 2008 and 2007, we recorded the following inventory impairments:

	Years Ended November 30,		
	2009	2008	2007
	(In thousands)		
Valuation adjustments to finished homes, CIP and land on which we intend to build homes (1)	\$180,239	195,518	747,843
Valuation adjustments to land we intend to sell or have sold to third parties (2)	95,314	47,791	1,167,294
Write-offs of option deposits and pre-acquisition costs	84,372	97,172	529,981
Total inventory impairments	<u>\$359,925</u>	<u>340,481</u>	<u>2,445,118</u>

- (1) Valuation adjustments to finished homes, CIP and land on which we intend to build homes for the years ended November 30, 2009, 2008 and 2007 relate to 131 communities, 146 communities and 428 communities, respectively.
- (2) The \$1.2 billion of valuation adjustments recorded in 2007 to land we intend to sell or have sold to third parties included \$740.4 million of valuation adjustments related to a portfolio of land we sold to a strategic land investment venture with Morgan Stanley Real Estate Fund II, L.P., an affiliate of Morgan Stanley & Co., Inc., which was formed in November 2007 and in which we have a 20% ownership interest.

The valuation adjustments were estimated based on market conditions and assumptions made by management at the time the valuation adjustments were recorded, which may differ materially from actual results if market conditions or our assumptions change. See Note 2 of the notes to our consolidated financial statements included in Item 8 of this document for details related to valuation adjustments and write-offs by reportable segment and Homebuilding Other.

Warranty Costs

Although we subcontract virtually all aspects of construction to others and our contracts call for the subcontractors to repair or replace any deficient items related to their trades, we are primarily responsible to correct any deficiencies. Additionally, in some instances, we may be held responsible for the actions of or losses incurred by subcontractors. Warranty reserves are established at an amount estimated to be adequate to cover potential costs for materials and labor with regard to warranty-type claims expected to be incurred subsequent to the delivery of a home. Reserves are determined based upon historical data and trends with respect to similar product types and geographical areas. We believe the accounting estimate related to the reserve for warranty costs is a critical accounting estimate because the estimate requires a large degree of judgment.

At November 30, 2009, the reserve for warranty costs was \$158.0 million, which included \$58.0 million related to defective drywall manufactured in China that was purchased and installed by various of our subcontractors. Defective Chinese drywall appears to be an industry-wide issue as other homebuilders have publicly disclosed that they are experiencing similar issues with defective Chinese drywall. While we believe that the reserve for warranty costs is adequate, there can be no assurances that historical data and trends will accurately predict our actual warranty costs. Additionally, there can be no assurances that future economic or financial developments might not lead to a significant change in the reserve.

Investments in Unconsolidated Entities

We strategically invest in unconsolidated entities that acquire and develop land (1) for our homebuilding operations or for sale to third parties or (2) for construction of homes for sale to third-party homebuyers. Our partners generally are unrelated homebuilders, land owners/developers and financial or other strategic partners.

Most of the unconsolidated entities through which we acquire and develop land are accounted for by the equity method of accounting because we are not the primary beneficiary, and we have a significant, but less than controlling, interest in the entities. We record our investments in these entities in our consolidated balance sheets as "Investments in Unconsolidated Entities" and our pro-rata share of the entities' earnings or losses in our consolidated statements of operations as "Equity in Earnings (Loss) from Unconsolidated Entities," as described in Note 4 of the notes to our consolidated financial statements. Advances to these entities are included in the investment balance.

Management looks at specific criteria and uses its judgment when determining if we are the primary beneficiary of, or have a controlling interest in, an unconsolidated entity. Factors considered in determining whether we have significant influence or we have control include risk and reward sharing, experience and financial condition of the other partners, voting rights, involvement in day-to-day capital and operating decisions and continuing involvement. The accounting policy relating to the use of the equity method of accounting is a critical accounting policy due to the judgment required in determining whether we are the primary beneficiary or have control or significant influence.

As of November 30, 2009, we believe that the equity method of accounting is appropriate for our investments in unconsolidated entities where we are not the primary beneficiary and we do not have a controlling interest, but rather share control with our partners. At November 30, 2009, the unconsolidated entities in which we had investments had total assets of \$4.2 billion and total liabilities of \$2.0 billion.

We evaluate our investments in unconsolidated entities for indicators of impairment during each reporting period. A series of operating losses of an investee or other factors may indicate that a decrease in the value of our investment in the unconsolidated entity has occurred which is other-than-temporary. The amount of impairment recognized is the excess of the investment's carrying amount over its estimated fair value.

The evaluation of our investment in unconsolidated entities includes certain critical assumptions: (1) projected future distributions from the unconsolidated entities, (2) discount rates applied to the future distributions and (3) various other factors.

Our assumptions on the projected future distributions from the unconsolidated entities are dependent on market conditions. Specifically, distributions are dependent on cash to be generated from the sale of inventory by the unconsolidated entities. Such inventory is also reviewed for potential impairment by the unconsolidated entities. The review for inventory impairment performed by our unconsolidated entities is materially consistent with our process, as discussed above, for evaluating its own inventory as of the end of a reporting period. The unconsolidated entities generally also use a discount rate of approximately 20% in their reviews for impairment, subject to the perceived risks associated with the community's cash flow streams relative to its inventory. If a valuation adjustment is recorded by an unconsolidated entity related to its assets, our proportionate share of it is reflected in our equity in loss from unconsolidated entities with a corresponding decrease to our investment in unconsolidated entities. In certain instances, we may be required to record additional losses relating to our investment in unconsolidated entities; such losses are included in other expense, net. We believe our assumptions on the projected future distributions from the unconsolidated entities are critical because the operating results of the unconsolidated entities from which the projected distributions are derived are dependent on the status of the homebuilding industry, which has historically been cyclical and sensitive to changes in economic conditions such as interest rates, credit availability, unemployment levels and consumer sentiment. Changes in these economic conditions could materially affect the projected operational results of the unconsolidated entities from which the distributions are derived.

In addition, we believe our assumptions on discount rates are also critical accounting policies because the selection of the discount rates also affects the estimated fair value of our investment in unconsolidated entities. A higher discount rate reduces the estimated fair value of our investment in unconsolidated entities, while a lower discount rate increases the estimated fair value of our investment in unconsolidated entities. Because of changes in economic conditions, actual results could differ materially from management's assumptions and may require material valuation adjustments to our investments in unconsolidated entities to be recorded in the future.

Additionally, we consider various qualitative factors to determine if a decrease in the value of our investment is other-than-temporary. These factors include age of the venture, intent and ability for us to recover our investment in the entity, short-term liquidity needs of the unconsolidated entity, trends in the general economic environment of the land, entitlement status of the land held by the unconsolidated entity, overall projected returns on investment, defaults under contracts with third parties (including bank debt), recoverability of the investment through future cash flows and relationships with the other partners and banks. If we believe that the decline in the fair value of the investment is temporary, then no impairment is recorded.

During the years ended November 30, 2009, 2008 and 2007, we recorded the following valuation adjustments related to our investments in unconsolidated entities:

	<u>Years Ended November 30,</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
	(In thousands)		
Our share of valuation adjustments related to assets of unconsolidated entities	\$101,893	32,245	364,162
Valuation adjustments to our investments in unconsolidated entities	88,972	172,790	132,206
Total valuation adjustments to our investments in unconsolidated entities	<u>\$190,865</u>	<u>205,035</u>	<u>496,368</u>

These valuation adjustments were calculated based on market conditions and assumptions made by management at the time the valuation adjustments were recorded, which may differ materially from actual results if market conditions or our assumptions change. See Note 2 of the notes to our consolidated financial statements included in Item 8 of this document for details related to valuation adjustments and write-offs by reportable segment and homebuilding other.

Financial Services Operations

Revenue Recognition

Premiums from title insurance policies are recognized as revenue on the effective date of the policies. Escrow fees and loan origination revenues are recognized at the time the related real estate transactions are completed, usually upon the close of escrow. Expected gains and losses from the sale of loans and their related servicing rights are included in the measurement of all written loan commitments that are accounted for at fair value through earnings at the time of commitment. Interest income on loans held-for-sale and loans

held-for-investment is recognized as earned over the terms of the mortgage loans based on the contractual interest rates. We believe that the accounting policy related to revenue recognition is a critical accounting policy because of the significance of revenue.

Allowance for Loan and Other Losses

We provide an allowance for loan losses by taking into consideration various factors such as past loan loss experience, present economic conditions and other factors considered relevant by management. Anticipated changes in economic conditions, which may influence the level of the allowance, are considered in the evaluation by management when the likelihood of the changes can be reasonably determined. This analysis is based on judgments and estimates and may change in response to economic developments or other conditions that may influence borrowers' financial conditions or prospects. At November 30, 2009, the allowance for loan losses was \$7.4 million, compared to \$20.4 million at November 30, 2008. We believe that the 2009 year-end allowance is adequate, particularly in view of the fact that we usually sell the loans in the secondary mortgage market on a non-recourse basis within 30 days after we originate them. Since we remain liable for certain representations and warranties, there can be no assurances that further deterioration in the housing market and future economic or financial developments, including general interest rate increases or a slowdown in the economy, might not lead to increased provisions to the allowance or a higher occurrence of loan write-offs. This allowance requires management's judgment and estimate. For these reasons, we believe that the accounting estimate related to the allowance for loan losses is a critical accounting estimate.

We provide a reserve for estimated title and escrow losses based upon management's evaluation of claims presented and estimates for any incurred but not reported claims. The reserve is established at a level that management estimates to be sufficient to satisfy those claims where a loss is determined to be probable and the amount of such loss can be reasonably estimated. The reserve for title and escrow losses for both known and incurred but not reported claims is considered by management to be adequate for such purposes.

Homebuilding and Financial Services Operations

Goodwill

Goodwill represents the excess of the purchase price paid over the fair value of the net assets acquired in business combinations. Evaluating goodwill for impairment involves the determination of the fair value of our reporting units in which we have recorded goodwill. A reporting unit is a component of an operating segment for which discrete financial information is available and reviewed by management on a regular basis. Inherent in the determination of fair value of our reporting units are certain estimates and judgments, including the interpretation of current economic indicators and market valuations as well as our strategic plans with regard to our operations. To the extent additional information arises or our strategies change, it is possible that our conclusion regarding goodwill impairment could change, which could have a material effect on our financial position and results of operations. For these reasons, we believe that the accounting estimate related to goodwill impairment is a critical accounting estimate.

We review goodwill annually (or whenever indicators of impairment exist) for impairment. For our review of the Financial Services segment's goodwill during the years ended November 30, 2009 and 2008, we determined the fair value of our Financial Services segment based entirely on the income approach due to a lack of guideline companies with adequate comparisons to our Financial Services segment on a stand alone basis.

The income approach establishes fair value by methods which discount or capitalize earnings and/or cash flow by a discount or capitalization rate that reflects market rate of return expectations, market conditions and the risk of the relative investment. We used a discounted cash flow method when applying the income approach. This analysis includes operating income, interest expense, taxes and incremental working capital, as well as other factors. The projections used in the analysis are for a five-year period and represent what we consider to be normalized earnings.

In determining the fair value of our Financial Services segment under the income approach, our expected cash flows are affected by various assumptions. The most significant assumptions affecting our expected cash flows are the discount rate, projected revenue growth rate and operating profit margin. The impact of a change in any of our significant underlying assumptions +/- 1% would not result in a materially different fair value.

We performed our annual impairment test in the fourth quarter of fiscal 2009 for our Financial Services segment's goodwill, and determined that an impairment adjustment was not required. During the year ended November 30, 2008, we impaired \$27.2 million of our Financial Services segment's goodwill. During the year ended November 30, 2007, we impaired all goodwill related to our homebuilding operations amounting to \$190.2 million. As of November 30, 2009 and 2008, there were no material identifiable intangible assets, other than goodwill.

At both November 30, 2009 and 2008, goodwill recorded in our Financial Services segment was \$34.0 million.

Valuation of Deferred Tax Assets

We record income taxes under the asset and liability method, whereby deferred tax assets and liabilities are recognized based on the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, as well as attributable to operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply in the years in which the temporary differences are expected to be recovered or paid. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period when the changes are enacted.

A reduction of the carrying amounts of deferred tax assets by a valuation allowance is required if, based on the available evidence, it is more likely than not that such assets will not be realized. Accordingly, the need to establish valuation allowances for deferred tax assets are assessed each reporting period by us based on the more-likely-than-not realization threshold criterion. In the assessment for a valuation allowance, appropriate consideration is given to all positive and negative evidence related to the realization of the deferred tax assets. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability, the duration of statutory carryforward periods, our experience with loss carryforwards not expiring unused and tax planning alternatives. Based upon all available evidence, we recorded a valuation allowance against our deferred tax assets of \$730.8 million during the year ended November 30, 2008, and increased it by \$269.6 million during the year ended November 30, 2009. In addition, we recorded a reversal of \$351.8 million to the deferred tax asset valuation allowance during the year ended November 30, 2009 primarily due to a change in tax legislation, which allowed us to carry back our fiscal year 2009 tax loss to recover previously paid income taxes. At November 30, 2009 and 2008, our deferred tax assets, as well as the valuation allowance recorded, were \$647.4 million and \$730.8 million, respectively. In future periods, the allowance could be reduced based on sufficient evidence indicating that it is more likely than not that a portion or all of our deferred tax assets will be realized. As such, at both November 30, 2009 and 2008, we had no net deferred tax assets.

We believe that the accounting estimate for the valuation of deferred tax assets is a critical accounting estimate because judgment is required in assessing the likely future tax consequences of events that have been recognized in our financial statements or tax returns. We base our estimate of deferred tax assets and liabilities on current tax laws and rates and, in certain cases, business plans and other expectations about future outcomes. Changes in existing tax laws or rates could affect actual tax results and future business results, which may affect the amount of deferred tax liabilities or the valuation of deferred tax assets over time. Our accounting for deferred tax consequences represents our best estimate of future events.

Share-Based Payments

We have share-based awards outstanding under four different plans which provide for the granting of stock options and stock appreciation rights and awards of restricted common stock ("nonvested shares") to key officers, associates and directors. The exercise prices of stock options and stock appreciation rights may not be less than the market value of the common stock on the date of the grant. Exercises are permitted in installments determined when options are granted. Each stock option and stock appreciation right will expire on a date determined at the time of the grant, but not more than ten years after the date of the grant. We account for stock option awards granted under the plans based on the estimated grant date fair value.

We believe that the accounting estimate for share based payments is a critical accounting estimate because the calculation of share-based employee compensation expense involves estimates that require management's judgments. These estimates include the fair value of each of our stock option awards, which are estimated on the date of grant using a Black-Scholes option-pricing model as discussed in Note 12 of the notes to our consolidated

financial statements included under Item 8 of this document. The fair value of our stock option awards, which are subject to graded vesting, is expensed on a straight-line basis over the vesting life of the options. Expected volatility is based on an average of (1) historical volatility of our stock and (2) implied volatility from traded options on our stock. The risk-free rate for periods within the contractual life of the stock option award is based on the yield curve of a zero-coupon U.S. Treasury bond on the date the stock option award is granted with a maturity equal to the expected term of the stock option award granted. We use historical data to estimate stock option exercises and forfeitures within our valuation model. The expected life of stock option awards granted is derived from historical exercise experience under our share-based payment plans and represents the period of time that stock option awards granted are expected to be outstanding.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

We are exposed to market risks related to fluctuations in interest rates on our investments, debt obligations, loans held-for-sale and loans held-for-investment. We utilize forward commitments and option contracts to mitigate the risks associated with our mortgage loan portfolio.

The table below provides information at November 30, 2009 about our significant financial instruments that are sensitive to changes in interest rates. For loans held-for-sale, loans held-for-investment, net and investments held-to-maturity, senior notes and other debts payable and notes and other debts payable, the table presents principal cash flows and related weighted average effective interest rates by expected maturity dates and estimated fair values at November 30, 2009. Weighted average variable interest rates are based on the variable interest rates at November 30, 2009.

See Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7 and Notes 1 and 14 of the notes to consolidated financial statements in Item 8 for a further discussion of these items and our strategy of mitigating our interest rate risk.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Under the supervision and with the participation of our management, including our CEO and CFO, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in *Internal Control—Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of November 30, 2009. The effectiveness of our internal control over financial reporting as of November 30, 2009 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their attestation report which is included herein.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Lennar Corporation

We have audited the internal control over financial reporting of Lennar Corporation and subsidiaries (the "Company") as of November 30, 2009, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of November 30, 2009, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements as of and for the year ended November 30, 2009 of the Company and our report dated January 29, 2010 expressed an unqualified opinion on those financial statements.

Item 8. Financial Statements and Supplementary Data.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Lennar Corporation

We have audited the accompanying consolidated balance sheets of Lennar Corporation and subsidiaries (the "Company") as of November 30, 2009 and 2008, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended November 30, 2009. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Lennar Corporation and subsidiaries as of November 30, 2009 and 2008 and the results of their operations and their cash flows for each of the three years in the period ended November 30, 2009, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of November 30, 2009, based on the criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated January 29, 2010 expressed an unqualified opinion on the Company's internal control over financial reporting.

Goodwill impairments	—	—	(190,198)
Loss before income taxes	(731,492)	(561,528)	(3,081,081)
Benefit (provision) for income taxes (6)	314,345	(547,557)	1,140,000
Net loss	\$ (417,147)	(1,109,085)	(1,941,081)
Basic and diluted loss per share	\$ (2.45)	(7.00)	(12.31)

- (1) Homebuilding costs and expenses include \$373.5 million, \$340.5 million and \$2,445.1 million, respectively, of valuation adjustments and write-offs of option deposits and pre-acquisition costs for the years ended November 30, 2009, 2008 and 2007.
- (2) Financial Services costs and expenses for the year ended November 30, 2008 include a \$27.2 million impairment of goodwill.
- (3) Equity in loss from unconsolidated entities includes the Company's share of valuation adjustments related to assets of unconsolidated entities in which the Company has investments of \$101.9 million, \$32.2 million and \$364.2 million, respectively, for the years ended November 30, 2009, 2008 and 2007.
- (4) Other expense, net includes \$89.0 million, \$172.8 million and \$132.2 million, respectively, of valuation adjustments to the Company's investments in unconsolidated entities for the years ended November 30, 2009, 2008 and 2007.
- (5) Minority interest income (expense), net, for the year ended November 30, 2009, includes \$13.6 million of minority interest income recorded as a result of \$27.2 million of valuation adjustments to inventories of 50%-owned consolidated joint ventures.
- (6) Benefit (provision) for income taxes for the year ended November 30, 2009 primarily includes a reversal of the Company's deferred tax asset valuation allowance of \$351.8 million, primarily due to a change in tax legislation, which allowed the Company to carryback its fiscal year 2009 tax loss to recover previously paid income taxes. For the year ended November 30, 2008, benefit (provision) for income taxes includes a \$730.8 million valuation allowance recorded against the Company's deferred tax assets.

See accompanying notes to consolidated financial statements.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Basis of Consolidation

The accompanying consolidated financial statements include the accounts of Lennar Corporation and all subsidiaries, partnerships and other entities in which Lennar Corporation has a controlling interest and variable interest entities (see Note 15) in which Lennar Corporation is deemed the primary beneficiary (the "Company"). The Company's investments in both unconsolidated entities in which a significant, but less than controlling, interest is held and in variable interest entities in which the Company is not deemed to be the primary beneficiary are accounted for by the equity method. All intercompany transactions and balances have been eliminated in consolidation. The Company has evaluated subsequent events through January 29, 2010, the date the consolidated financial statements were filed with the U.S. Securities and Exchange Commission ("SEC").

Accounting Standards Codification

The Company adopted the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC"). The ASC does not alter current accounting principles generally accepted in the United States of America ("GAAP"), but rather integrated existing accounting standards with other authoritative guidance. The ASC provides a single source of authoritative GAAP for nongovernmental entities and supersedes all other previously issued non-SEC accounting and reporting guidance. The adoption of the ASC did not have any effect on the Company's consolidated financial statements.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates.

Share-Based Payments

The Company has share-based awards outstanding under four different plans which provide for the granting of stock options and stock appreciation rights and awards of restricted common stock ("nonvested shares") to key officers, associates and directors. The exercise prices of stock options and stock appreciation rights may not be less than the market value of the common stock on the date of the grant. Exercises are permitted in installments determined when options are granted. Each stock option and stock appreciation right will expire on a date determined at the time of the grant, but not more than ten years after the date of the grant. The Company accounts for stock option awards granted under the plans based on the estimated grant date fair value.

Revenue Recognition

Revenues from sales of homes are recognized when the sales are closed and title passes to the new homeowner, the new homeowner's initial and continuing investment is adequate to demonstrate a commitment to pay for the home, the new homeowner's receivable is not subject to future subordination and the Company does not have a substantial continuing involvement with the new home. Revenues from sales of land are recognized when a significant down payment is received, the earnings process is complete, title passes and collectability of the receivable is reasonably assured.

Advertising Costs

The Company expenses advertising costs as incurred. Advertising costs were \$42.2 million, \$65.7 million and \$120.4 million, respectively, for the years ended November 30, 2009, 2008 and 2007.

Cash and Cash Equivalents

The Company considers all highly liquid investments purchased with original maturities of three months or less to be cash equivalents. Due to the short maturity period of cash equivalents, the carrying amounts of these instruments approximate their fair values. Cash and cash equivalents as of November 30, 2009 and 2008 included \$5.8 million and \$9.8 million, respectively, of cash held in escrow for approximately three days.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Restricted Cash

Restricted cash consists of customer deposits on home sales held in restricted accounts until title transfers to the homebuyer, as required by the state and local governments in which the homes were sold.

Income Tax Receivables

Income tax receivables consist of tax refunds that the Company expects to receive within one year. As of November 30, 2009 and 2008, there were \$334.4 million and \$255.5 million, respectively, of income tax receivables.

Inventories

Inventories are stated at cost unless the inventory within a community is determined to be impaired, in which case the impaired inventory is written down to fair value. Inventory costs include land, land development and home construction costs, real estate taxes, deposits on land purchase contracts and interest related to development and construction. Construction overhead and selling expenses are expensed as incurred. Homes held-for-sale are classified as inventories until delivered. Land, land development, amenities and other costs are accumulated by specific area and allocated to homes within the respective areas. The Company reviews its inventory for indicators of impairment by evaluating each community during each reporting period. The inventory within each community is categorized as finished homes and construction in progress or land under development based on the development state of the community. There were 390 and 493 active communities as of November 30, 2009 and 2008, respectively. If the undiscounted cash flows expected to be generated by a community are less than its carrying amount, an impairment charge is recorded to write down the carrying amount of such community to its fair value.

In conducting its review for indicators of impairment on a community level, the Company evaluates, among other things, the margins on homes that have been delivered, margins on homes under sales contracts in backlog, projected margins with regard to future home sales over the life of the community, projected margins with regard to future land sales and the estimated fair value of the land itself. The Company pays particular attention to communities in which inventory is moving at a slower than anticipated absorption pace and communities whose average sales price and/or margins are trending downward and are anticipated to continue to trend downward. From this review, the Company identifies communities whose carrying values exceed their undiscounted cash flows.

The Company estimates the fair value of its communities using a discounted cash flow model. The projected cash flows for each community are significantly impacted by estimates related to market supply and demand, product type by community, homesite sizes, sales pace, sales prices, sales incentives, construction costs, sales and marketing expenses, the local economy, competitive conditions, labor costs, costs of materials and other factors for that particular community. Every division evaluates the historical performance of each of its communities as well as current trends in the market and economy impacting the community and its surrounding areas. These trends are analyzed for each of the estimates listed above. For example, since the start of the downturn in the housing market, the Company has found ways to reduce its construction costs in many communities, and this reduction in construction costs in addition to change in product type in many communities has impacted future estimated cash flows.

Each of the homebuilding markets in which the Company operates is unique, as homebuilding has historically been a local business driven by local market conditions and demographics. Each of the Company's homebuilding markets is dynamic and has specific supply and demand relationships reflective of local economic conditions. The Company's projected cash flows are impacted by many assumptions. Some of the most critical assumptions in the Company's cash flow model are projected absorption pace for home sales, sales prices and costs to build and deliver homes on a community by community basis.

In order to arrive at the assumed absorption pace for home sales included in the Company's cash flow model, the Company analyzes its historical absorption pace in the community as well as other communities in the geographical area. In addition, the Company analyzes internal and external market studies and trends, which generally include, but are not limited to, statistics on population demographics, unemployment rates and availability of competing product in the geographic area where the community is located. When analyzing the

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Company's historical absorption pace for home sales and corresponding internal and external market studies, the Company places greater emphasis on more current metrics and trends such as the absorption pace realized in its most recent quarters as well as forecasted population demographics, unemployment rates and availability of competing product. Generally, if the Company notices a variation from historical results over a span of two fiscal quarters, the Company considers such variation to be the establishment of a trend and adjusts its historical information accordingly in order to develop assumptions on the projected absorption pace in the cash flow model for a community.

In order to determine the assumed sales prices included in its cash flow models, the Company analyzes the historical sales prices realized on homes it delivered in the community and other communities in the geographical area as well as the sales prices included in its current backlog for such communities. In addition, the Company analyzes internal and external market studies and trends, which generally include, but are not limited to, statistics on sales prices in neighboring communities and sales prices on similar products in non-neighboring communities in the geographic area where the community is located. When analyzing its historical sales prices and corresponding market studies, the Company also places greater emphasis on more current metrics and trends such as future forecasted sales prices in neighboring communities as well as future forecasted sales prices for similar products in non-neighboring communities. Generally, if the Company notices a variation from historical results over a span of two fiscal quarters, the Company considers such variation to be the establishment of a trend and adjusts its historical information accordingly in order to develop assumptions on the projected sales prices in the cash flow model for a community.

In order to arrive at the Company's assumed costs to build and deliver homes, the Company generally assumes a cost structure reflecting contracts currently in place with its vendors adjusted for any anticipated cost reduction initiatives or increases in cost structure. Costs assumed in the cash flow model for the Company's communities are generally based on the rates the Company is currently obligated to pay under existing contracts with its vendors adjusted for any anticipated cost reduction initiatives or increases in cost structure.

Due to the fact that the estimates and assumptions included in the Company's cash flow models are based upon historical results and projected trends, it does not anticipate unexpected changes in market conditions that may lead the Company to incur additional impairment charges in the future.

Using all available trend information, the Company calculates its best estimate of projected cash flows for each community. While many of the estimates are calculated based on historical and projected trends, all estimates are subjective and change from market to market and community to community as market and economic conditions change. The determination of fair value also requires discounting the estimated cash flows at a rate the Company believes a market participant would determine to be commensurate with the inherent risks associated with the assets and related estimated cash flow streams. The discount rate used in determining each asset's fair value depends on the community's projected life and development stage. The Company generally uses a discount rate of approximately 20%, subject to the perceived risks associated with the community's cash flow streams relative to its inventory.

The Company estimates the fair value of inventory evaluated for impairment based on market conditions and assumptions made by management at the time the inventory is evaluated, which may differ materially from actual results if market conditions or assumptions change. For example, further market deterioration or changes in assumptions may lead to the Company incurring additional impairment charges on previously impaired inventory, as well as on inventory not currently impaired but for which indicators of impairment may arise if further market deterioration occurs.

The Company also has access to land inventory through option contracts, which generally enables the Company to defer acquiring portions of properties owned by third parties and unconsolidated entities until it has determined whether to exercise its option. A majority of the Company's option contracts require a non-refundable cash deposit or irrevocable letter of credit based on a percentage of the purchase price of the land. The Company's option contracts are recorded at cost. In determining whether to walk-away from an option contract, the Company evaluates the option primarily based upon its expected cash flows from the property under option. If the Company intends to walk away from an option contract, it records a charge to earnings in the period such decision is made for the deposit amount and related pre-acquisition costs associated with the option contract.

See Note 2 for details of inventory valuation adjustments and write-offs of option deposits and pre-acquisition costs by reportable segment and Homebuilding Other.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Investments in Unconsolidated Entities

The Company evaluates its investments in unconsolidated entities for indicators of impairment during each reporting period. A series of operating losses of an investee or other factors may indicate that a decrease in value of the Company's investment in the unconsolidated entity has occurred which is other-than-temporary. The amount of impairment recognized is the excess of the investment's carrying amount over its estimated fair value.

The evaluation of the Company's investment in unconsolidated entities includes certain critical assumptions made by management: (1) projected future distributions from the unconsolidated entities, (2) discount rates applied to the future distributions and (3) various other factors.

The Company's assumptions on the projected future distributions from the unconsolidated entities are dependent on market conditions. Specifically, distributions are dependent on cash to be generated from the sale of inventory by the unconsolidated entities. Such inventory is also reviewed for potential impairment by the unconsolidated entities. The unconsolidated entities generally use a discount rate of approximately 20% in their reviews for impairment, subject to the perceived risks associated with the community's cash flow streams relative to its inventory. If a valuation adjustment is recorded by an unconsolidated entity related to its assets, the Company's proportionate share is reflected in the Company's equity in earnings (loss) from unconsolidated entities with a corresponding decrease to its investment in unconsolidated entities. In certain instances, the Company may be required to record additional losses relating to its investment in unconsolidated entities, if the Company's investment in the unconsolidated entity, or a portion thereof, is deemed to be other than temporarily impaired. These losses are included in other expense, net.

Additionally, the Company considers various qualitative factors to determine if a decrease in the value of the investment is other-than-temporary. These factors include age of the venture, intent and ability for the Company to recover its investment in the entity, financial condition and long-term prospects of the entity, short-term liquidity needs of the unconsolidated entity, trends in the general economic environment of the land, entitlement status of the land held by the unconsolidated entity, overall projected returns on investment, defaults under contracts with third parties (including bank debt), recoverability of the investment through future cash flows and relationships with the other partners and banks. If the Company believes that the decline in the fair value of the investment is temporary, then no impairment is recorded.

See Note 2 for details of valuation adjustments related to the Company's unconsolidated entities by reportable segment and Homebuilding Other.

The Company tracks its share of cumulative earnings and distributions of its joint ventures ("JVs"). For purposes of classifying distributions received from JVs in the Company's consolidated statements of cash flows, cumulative distributions are treated as returns *on* capital to the extent of cumulative earnings and included in the Company's consolidated statements of cash flows as operating activities. Cumulative distributions in excess of the Company's share of cumulative earnings are treated as returns *of* capital and included in the Company's consolidated statements of cash flows as investing activities.

Interest and Real Estate Taxes

Interest and real estate taxes attributable to land and homes are capitalized as inventories while they are being actively developed. Interest related to homebuilding and land, including interest costs relieved from inventories, is included in cost of homes sold and cost of land sold. Interest expense related to the financial services operations is included in its costs and expenses.

During the years ended November 30, 2009, 2008 and 2007, interest incurred by the Company's homebuilding operations related to homebuilding debt was \$172.1 million, \$148.3 million and \$199.1 million, respectively; interest capitalized into inventories was \$101.3 million, \$120.7 million and \$196.7 million, respectively.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Interest expense was included in cost of homes sold, cost of land sold and other interest expense as follows:

	Years Ended November 30,		
	2009	2008	2007
	(In thousands)		
Interest expense in cost of homes sold	\$ 67,414	99,319	168,453
Interest expense in cost of land sold	9,185	3,444	9,439
Other interest expense	70,850	27,594	25,808
Total interest expense	\$147,449	130,357	203,700

Operating Properties and Equipment

Operating properties and equipment are recorded at cost and are included in other assets in the consolidated balance sheets. The assets are depreciated over their estimated useful lives using the straight-line method. At the time operating properties and equipment are disposed of, the asset and related accumulated depreciation are removed from the accounts and any resulting gain or loss is credited or charged to earnings. The estimated useful life for operating properties is thirty years, for furniture, fixtures and equipment is two to ten years and for leasehold improvements is five years or the life of the lease, whichever is shorter. Operating properties are reviewed for possible impairment if there are indicators that their carrying amounts are not recoverable. No impairments were recorded during the periods presented.

Investment Securities

Investment securities are classified as available-for-sale unless they are classified as trading or held-to-maturity. Securities classified as trading are carried at fair value and unrealized holding gains and losses are recorded in earnings. Available-for-sale securities are recorded at fair value. Any unrealized holding gains or losses on available-for-sale securities are reported as accumulated other comprehensive gain or loss, which is a separate component of stockholders' equity, net of tax, until realized. Securities classified as held-to-maturity are carried at amortized cost because they are purchased with the intent and ability to hold to maturity.

At November 30, 2009 and 2008, investment securities classified as held-to-maturity totaled \$2.5 million and \$19.1 million, respectively, and are included in the assets of the Financial Services segment. The held-to-maturity securities consist mainly of certificates of deposit and U.S. treasury securities. At November 30, 2009 and 2008, the Company had no investment securities classified as trading or available-for-sale.

Derivative Financial Instruments

The Financial Services segment, in the normal course of business, uses derivative financial instruments to reduce its exposure to fluctuations in mortgage-related interest rates. The segment uses mortgage-backed securities ("MBS") forward commitments, option contracts and investor commitments to protect the value of fixed rate-locked loan commitments and loans held-for-sale from fluctuations in mortgage-related interest rates. These derivative financial instruments are carried at fair value with the changes in fair value included in Financial Services revenues.

Goodwill

Goodwill represents the excess of the purchase price over the fair value of the net assets acquired in business combinations. Evaluating goodwill for impairment involves the determination of the fair value of the Company's reporting units in which the Company has recorded goodwill. A reporting unit is a component of an operating segment for which discrete financial information is available and reviewed by the Company's management on a regular basis. Inherent in the determination of fair value of the Company's reporting units are certain estimates and judgments, including the interpretation of current economic indicators and market valuations as well as the Company's strategic plans with regard to its operations. To the extent additional information arises or the Company's strategies change, it is possible that the Company's conclusion regarding goodwill impairment could change, which could have a significant effect on the Company's financial position and results of operations.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

At both November 30, 2009 and 2008, goodwill was \$34.0 million. The goodwill relates to the Financial Services segment and is included in the assets of that segment. During fiscal 2008, the Company impaired \$27.2 million of the Financial Services segment's goodwill. During fiscal 2007, the Company impaired all of its homebuilding goodwill amounting to \$190.2 million.

The Company reviews goodwill annually (or whenever indicators of impairment exist) for impairment. The Company performed its annual impairment test in the fourth quarter of fiscal 2009 for the Financial Services segment's goodwill, and determined that an impairment adjustment was not required. As of both November 30, 2009 and 2008, there were no material identifiable intangible assets, other than goodwill.

Income Taxes

The Company records income taxes under the asset and liability method, whereby deferred tax assets and liabilities are recognized based on the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and attributable to operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply in the years in which the temporary differences are expected to be recovered or paid. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in earnings in the period when the changes are enacted.

A reduction of the carrying amounts of deferred tax assets by a valuation allowance is required if, based on the available evidence, it is more likely than not that such assets will not be realized. Accordingly, the need to establish valuation allowances for deferred tax assets is assessed each reporting period by the Company based on the more-likely-than-not realization threshold criterion. In the assessment for a valuation allowance, appropriate consideration is given to all positive and negative evidence related to the realization of the deferred tax assets. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future profitability, the duration of statutory carryforward periods, the Company's experience with loss carryforwards not expiring unused and tax planning alternatives. Based upon all available evidence, the Company recorded a valuation allowance against its deferred tax assets of \$730.8 million during the year ended November 30, 2008, and increased it by \$269.6 million during the year ended November 30, 2009. In addition, the Company recorded a reversal of \$351.8 million to the deferred tax asset valuation allowance during the year ended November 30, 2009 primarily due to a change in tax legislation, which allowed the Company to carry back its fiscal year 2009 tax loss to recover previously paid income taxes. At November 30, 2009 and 2008, the Company's deferred tax assets, as well as the valuation allowance recorded, were \$647.4 million and \$730.8 million, respectively. In future periods, the allowance could be reduced based on sufficient evidence indicating that it is more likely than not that a portion or all of the Company's deferred tax assets will be realized. As such, at both November 30, 2009 and 2008, the Company had no net deferred tax assets.

Effective December 1, 2007, the Company adopted certain provisions under ASC Topic 740, *Income Taxes*, ("ASC 740"), which provides interpretative guidance for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Effective with the Company's adoption of these provisions, interest related to unrecognized tax benefits is now recognized in the financial statements as a component of benefit (provision) for income taxes. Interest and penalties related to unrecognized tax benefits were previously recorded in other expense, net in the Company's statements of operations.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Product Warranty

Warranty and similar reserves for homes are established at an amount estimated to be adequate to cover potential costs for materials and labor with regard to warranty-type claims expected to be incurred subsequent to the delivery of a home. Reserves are determined based on historical data and trends with respect to similar product types and geographical areas. The Company regularly monitors the warranty reserve and makes adjustments to its pre-existing warranties in order to reflect changes in trends and historical data as information becomes available. Warranty reserves are included in other liabilities in the consolidated balance sheets. The activity in the Company's warranty reserve was as follows:

	November 30,	
	2009	2008
	(In thousands)	
Warranty reserve, beginning of year	\$129,449	164,841
Warranties issued during the period	28,710	45,338
Adjustments to pre-existing warranties from changes in estimates	69,324	15,042
Payments	(69,587)	(95,772)
Warranty reserve, end of year	<u>\$157,896</u>	<u>129,449</u>

Adjustments to pre-existing warranties from changes in estimates for the year ended November 30, 2009 include an adjustment for warranty issues related to defective drywall manufactured in China and purchased and installed by various of the Company's subcontractors. Defective Chinese drywall appears to be an industry-wide issue as other homebuilders have publicly disclosed that they are experiencing similar issues with defective Chinese drywall.

As of November 30, 2009, the Company identified approximately 600 homes delivered in Florida primarily during its 2006 and 2007 fiscal years that are confirmed to have defective Chinese drywall and resulting damage. This represents a small percentage of homes the Company delivered in Florida (3.1%) and nationally (0.8%) during those fiscal years in the aggregate.

Based on its efforts to date, the Company has not identified defective Chinese drywall in homes delivered by the Company outside of Florida. The Company is continuing its investigation of homes delivered during the relevant time period in order to determine whether there are additional homes, not yet inspected, with defective Chinese drywall and resulting damage. If the outcome of the Company's inspections identifies more homes than the Company has estimated to have defective Chinese drywall, it might require an increase in the Company's warranty reserve in the future.

Through November 30, 2009, the Company has accrued \$80.7 million of warranty reserves related to homes confirmed as having defective Chinese drywall, as well as an estimate for homes not yet inspected that may contain Chinese drywall. As of November 30, 2009, the warranty reserve, net of payments was \$58.0 million. The Company has recorded a \$38.7 million receivable for covered damages under its insurance coverage relative to the cost it expects to incur remedying the homes confirmed and estimated to have defective Chinese drywall and resulting damage. The Company is seeking reimbursement from its subcontractors, insurers and others for costs the Company has incurred or expects to incur to investigate and repair defective Chinese drywall and resulting damage.

Self-Insurance

Certain insurable risks such as general liability, medical and workers' compensation are self-insured by the Company up to certain limits. Undiscounted accruals for claims under the Company's self-insurance program are based on claims filed and estimates for claims incurred but not yet reported.

Minority Interest

The Company has consolidated certain joint ventures because the Company either was determined to be the primary beneficiary, or has a controlling interest in these joint ventures. Therefore, the entities' financial statements are consolidated in the Company's consolidated financial statements and the other partners' equity is

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

recorded as minority interest. At November 30, 2009 and 2008, minority interest was \$144.5 million and \$165.7 million, respectively. Minority interest income (expense), net was \$28.9 million, \$4.1 million and (\$1.9) million, respectively, for the years ended November 30, 2009, 2008 and 2007.

Loss per Share

Basic loss per share is computed by dividing net loss attributable to common stockholders by the weighted average number of common shares outstanding for the period. As a result of the Company's net loss during the years ended November 30, 2009, 2008 and 2007, the weighted average number of shares of common stock used for calculating basic and diluted loss per share is the same because inclusion of securities or other contracts to issue common stock would be anti-dilutive.

Financial Services

Premiums from title insurance policies are recognized as revenue on the effective date of the policies. Escrow fees and loan origination revenues are recognized at the time the related real estate transactions are completed, usually upon the close of escrow. Expected gains and losses from the sale of loans and their related servicing rights are included in the measurement of all written loan commitments that are accounted for at fair value through earnings at the time of commitment. Interest income on loans held-for-sale and loans held-for-investment is recognized as earned over the terms of the mortgage loans based on the contractual interest rates.

Loans held-for-sale by the Financial Services segment are carried at fair value and changes in fair value are reflected in earnings. Premiums and discounts recorded on these loans are presented as an adjustment to the carrying amount of the loans and are not amortized.

The Company elected the fair value option for its loans held-for-sale for mortgage loans originated subsequent to February 29, 2008 in accordance with ASC Topic 825, *Financial Instruments*, ("ASC 825"), which permits entities to measure various financial instruments and certain other items at fair value on a contract-by-contract basis. Management believes carrying loans held-for-sale at fair value improves financial reporting by mitigating volatility in reported earnings caused by measuring the fair value of the loans and the derivative instruments used to economically hedge them without having to apply complex hedge accounting provisions. In addition, the Company adopted certain provisions of ASC Topic 815-10-S99, *SEC Materials*, ("ASC 815-10-S99") on March 1, 2008, requiring the recognition of the fair value of its rights to service a mortgage loan as revenue upon entering into an interest rate lock loan commitment with a borrower. The fair value of these servicing rights is included in the Company's loans held-for-sale as of November 30, 2009 and 2008. Prior to March 1, 2008, the fair value of the servicing rights was not recognized until the related loan was sold. Fair value of the servicing rights is determined based on values in the Company's servicing sales contracts. At November 30, 2009 and 2008, loans held-for-sale, all of which were accounted for at fair value, had an aggregate fair value of \$182.7 million and \$190.1 million, respectively and an aggregate outstanding principal balance of \$175.5 million and \$185.2 million, respectively, at November 30, 2009 and 2008.

Substantially all of the loans originated are sold within a short period in the secondary mortgage market on a servicing released, non-recourse basis; although, the Company remains liable for certain limited representations and warranties related to loan sales.

Loans for which the Company has the positive intent and ability to hold to maturity consist of mortgage loans carried at lower of cost, net of unamortized discounts or fair value on a nonrecurring basis. Discounts are amortized over the estimated lives of the loans using the interest method.

The Company also provides an allowance for loan losses. The provision recorded and the adequacy of the related allowance is determined by the Company's management's continuing evaluation of the loan portfolio in light of past loan loss experience, credit worthiness and nature of underlying collateral, present economic conditions and other factors considered relevant by the Company's management. Anticipated changes in economic factors, which may influence the level of the allowance, are considered in the evaluation by the Company's management when the likelihood of the changes can be reasonably determined. While the

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Company's management uses the best information available to make such evaluations, future adjustments to the allowance may be necessary as a result of future economic and other conditions that may be beyond management's control.

New Accounting Pronouncements

In December 2007, the FASB updated certain provisions of ASC Topic 805, *Business Combinations*, ("ASC 805"). These provisions broaden the guidance of ASC 805, extending its applicability to all transactions and other events in which one entity obtains control over one or more other businesses. It broadens the fair value measurement and recognition requirement of assets acquired, liabilities assumed and interests transferred as a result of business combinations. ASC 805 expands on required disclosures to improve the financial statement users' abilities to evaluate the nature and financial effects of business combinations. ASC 805 is effective for business combinations that close on or after December 1, 2009. The Company does not expect the adoption of these new provisions to have a material effect on its consolidated financial statements.

In December 2007, the FASB updated certain provisions of ASC Topic 810, *Consolidation*, ("ASC 810"). These provisions require that a noncontrolling interest (formerly minority interest) in a subsidiary be reported as equity and the amount of consolidated net income specifically attributable to the noncontrolling interest be identified in the consolidated financial statements. It also calls for consistency in the manner of reporting changes in the parent's ownership interest in a subsidiary and requires fair value measurement of any noncontrolling equity investment retained in a deconsolidation. ASC 810 is effective for the Company's fiscal year beginning December 1, 2009. The adoption of these new provisions will result in the reclassification of the noncontrolling interest in the Company's consolidated joint ventures into the stockholders' equity section of the Company's consolidated balance sheet.

In June 2009, the FASB updated certain provisions of ASC 810. These provisions amend the consolidation guidance applicable to variable interest entities and the definition of a variable interest entity, and require enhanced disclosures to provide more information about an enterprise's involvement in a variable interest entity. ASC 810 also requires ongoing assessments of whether an enterprise is the primary beneficiary of a variable interest entity. These provisions under ASC 810 are effective for the Company's fiscal year beginning December 1, 2009. The Company does not expect the adoption of these provisions to have a material effect on its consolidated financial statements.

Reclassifications

Certain prior year amounts in the consolidated financial statements have been reclassified to conform with the 2009 presentation. These reclassifications had no impact on the Company's results of operations. Prior to 2009, the Company included other interest expense as a component of other expense, net in the consolidated statements of operations. In 2009, the Company separately disclosed other interest expense in its consolidated statements of operations and reclassified prior year amounts to conform with the 2009 presentation.

2. Operating and Reporting Segments

The Company's operating segments are aggregated into reportable segments, based primarily upon similar economic characteristics, geography and product type. The Company's reportable segments consist of:

- (1) Homebuilding East
- (2) Homebuilding Central
- (3) Homebuilding West
- (4) Homebuilding Houston
- (5) Financial Services

Information about homebuilding activities in which the Company's homebuilding activities are not economically similar to other states in the same geographic area is grouped under "Homebuilding Other," which is not considered a reportable segment.

Operations of the Company's homebuilding segments primarily include the construction and sale of single-family attached and detached homes, and to a lesser extent, multi-level residential buildings, as well as the

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

purchase, development and sale of residential land directly and through the Company's unconsolidated entities. The Company's reportable homebuilding segments, and all other homebuilding operations not required to be reported separately, have operations located in:

East: Florida, Maryland, New Jersey and Virginia

Central: Arizona, Colorado and Texas (1)

West: California and Nevada

Houston: Houston, Texas

Other: Illinois, Minnesota, New York, North Carolina and South Carolina

(1) Texas in the Central reportable segment excludes Houston, Texas, which is its own reportable segment.

Operations of the Financial Services segment include primarily mortgage financing, title insurance and closing services for both buyers of the Company's homes and others. Substantially all of the loans the Financial Services segment originates are sold in the secondary mortgage market on a servicing released, non-recourse basis; although, the Company remains liable for certain limited representations and warranties related to loan sales. The Financial Services segment operates generally in the same states as the Company's homebuilding operations, as well as in other states.

Evaluation of segment performance is based primarily on operating earnings (loss) before income taxes. Operating earnings (loss) for the homebuilding segments consist of revenues generated from the sales of homes and land, equity in earnings (loss) from unconsolidated entities, other income (expense), net, minority interest income (expense), net and gain on recapitalization of unconsolidated entity, less the cost of homes and land sold and selling, general and administrative expenses. Homebuilding operating earnings (loss) for the year ended November 30, 2009 includes the following:

- Valuation adjustments to finished homes, construction in progress ("CIP") and land on which the Company intends to build homes,
- Valuation adjustments to land the Company intends to sell or has sold to third parties,
- Write-offs of option deposits and pre-acquisition costs related to land under option that the Company does not intend to purchase,
- Valuation adjustments related to assets of unconsolidated entities in which the Company has investments, recorded in equity in earnings (loss) from unconsolidated entities, and
- Valuation adjustments to the Company's investments in unconsolidated entities and write-offs of certain notes and other receivables, recorded in other income (expense), net.

Financial Services operating earnings (loss), for the year ended November 30, 2009, consist of revenues generated from primarily mortgage financing, title insurance and closing services less the cost of such services, certain selling, general and administrative expenses incurred by the Financial Services segment and goodwill impairments.

Each reportable segment follows the same accounting policies described in Note 1—"Summary of Significant Accounting Policies" to the consolidated financial statements. Operational results of each segment are not necessarily indicative of the results that would have occurred had the segment been an independent, stand-alone entity during the periods presented.

(1) For the year ended November 30, 2009, valuation adjustments to land the Company intends to sell or has sold to third parties has been reduced by \$13.6 million of minority interest income as a result of \$27.2 million of valuation adjustments to inventories of 50%-owned consolidated joint ventures.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

During 2009, market conditions remained challenging in the homebuilding industry. These challenging market conditions during 2009 have led to lower home sales prices in certain communities and changes in the strategy of certain joint ventures, which resulted in valuation adjustments and write-offs. Further deterioration in the homebuilding market could cause additional pricing pressures and slower absorption, which could lead to additional valuation adjustments in the future. In addition, market conditions could cause the Company to re-evaluate its strategy regarding certain assets that could result in further valuation adjustments and/or additional write-offs of option deposits and pre-acquisition costs due to the abandonment of those option contracts.

	Years Ended November 30,		
	2009	2008	2007

3. Receivables

	November 30,	
	2009	2008
	(In thousands)	
Accounts receivable	\$ 88,813	51,491
Mortgages and notes receivable	44,111	76,002
	132,924	127,493
Allowance for doubtful accounts	(10,871)	(32,973)
	\$122,053	94,520

Accounts receivable relates primarily to amounts expected to be recovered related to defective Chinese drywall, rebates and other receivables. The Company performs ongoing credit evaluations of its customers and generally does not require collateral for accounts receivable. Mortgages and notes receivable arising from the sale of land are generally collateralized by the property sold to the buyer. Allowances are maintained for potential credit losses based on historical experience, present economic conditions and other factors considered relevant by the Company.

4. Investments in Unconsolidated Entities

Summarized condensed financial information on a combined 100% basis related to unconsolidated entities in which the Company has investments that are accounted for by the equity method was as follows:

<u>Statements of Operations</u>	Years Ended November 30,		
	2009	2008	2007
	(In thousands)		
Revenues	\$ 339,993	862,728	2,060,279
Costs and expenses	1,212,866	1,394,601	3,075,696
Net earnings (loss) of unconsolidated entities (1)	\$ (872,873)	(531,873)	(1,015,417)
The Company's share of net loss—recognized (2)	\$ (130,917)	(59,156)	(362,899)

- (1) The net loss of unconsolidated entities for the year ended November 30, 2009 was primarily related to valuation adjustments recorded by the unconsolidated entities. The Company's exposure to such losses was significantly lower as a result of its small ownership interest in the respective unconsolidated entities or its previous valuation adjustments recorded to its investments in unconsolidated entities.
- (2) For the years ended November 30, 2009, 2008 and 2007, the Company's share of net loss recognized from unconsolidated entities includes \$101.9 million, \$32.2 million and \$364.2 million, respectively, of the Company's share of valuation adjustments related to assets of the unconsolidated entities in which the Company has investments.

<u>Balance Sheets</u>	November 30,

The Company's equity in its unconsolidated entities	27%	29%

LENNAR CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The Company's partners generally are unrelated homebuilders, land owners/developers and financial or other strategic partners. The unconsolidated entities follow accounting principles that are in all material respects the same as those used by the Company. The Company shares in the profits and losses of these unconsolidated entities generally in accordance with its ownership interests. In many instances, the Company is appointed as the day-to-day manager under the direction of a management committee that has shared powers amongst the partners of the unconsolidated entities and receives management fees and/or reimbursement of expenses for performing this function. During the years ended November 30, 2009, 2008 and 2007, the Company received management fees and reimbursement of expenses from the unconsolidated entities totaling \$15.3 million, \$33.3 million and \$52.1 million, respectively.

The Company and/or its partners sometimes obtain options or enter into other arrangements under which the Company can purchase portions of the land held by the unconsolidated entities. Option prices are generally negotiated prices that approximate fair value when the Company receives the options. During the years ended November 30, 2009, 2008 and 2007, \$117.8 million, \$416.2 million and \$977.5 million, respectively, of the unconsolidated entities' revenues were from land sales to the Company. The Company does not include in its equity in earnings (loss) from unconsolidated entities its pro rata share of unconsolidated entities' earnings resulting from land sales to its homebuilding divisions. Instead, the Company accounts for those earnings as a reduction of the cost of purchasing the land from the unconsolidated entities. This in effect defers recognition of the Company's share of the unconsolidated entities' earnings related to these sales until the Company delivers a home and title passes to a third-party homebuyer.

In 2007, the Company sold a portfolio of land consisting of approximately 11,000 homesites in 32 communities located throughout the country to a strategic land investment venture with Morgan Stanley Real Estate Fund II, L.P., an affiliate of Morgan Stanley & Co., Inc., in which the Company has a 20% ownership interest and 50% voting rights. Due to the Company's continuing involvement, the transaction did not qualify as a sale by the Company under GAAP; thus, the inventory has remained on the Company's consolidated balance sheet in consolidated inventory not owned. In 2007, the Company recorded a valuation adjustment of \$740.4 million on the inventory sold to the investment venture. As of November 30, 2009 and 2008, the portfolio of land (including land development costs) of \$477.9 million and \$538.4 million, respectively, is reflected as inventory in the summarized condensed financial information related to unconsolidated entities in which the Company has investments. The decrease in this inventory from November 30, 2008 to November 30, 2009 resulted primarily from valuation adjustments of \$50.1 million recorded by the land investment venture.

The unconsolidated entities in which the Company has investments usually finance their activities with a combination of partner equity and debt financing. In some instances, the Company and its partners have guaranteed debt of certain unconsolidated entities.

The summary of the Company's net recourse exposure related to the unconsolidated entities in which the Company has investments was as follows:

	<u>November 30,</u>	
	<u>2009</u>	<u>2008</u>
	(In thousands)	
Several recourse debt—repayment	\$ 42,691	78,547
Several recourse debt—maintenance	75,238	167,941
Joint and several recourse debt—repayment	85,799	138,169
Joint and several recourse debt—maintenance	81,592	123,051
Land seller debt and other debt recourse exposure	<u>2,420</u>	<u>12,170</u>
The Company's maximum recourse exposure	287,740	519,878
Less joint and several reimbursement agreements with the Company's partners	<u>(93,185)</u>	<u>(127,428)</u>
The Company's net recourse exposure	<u>\$194,555</u>	<u>392,450</u>

During the year ended November 30, 2009, the Company reduced its maximum recourse exposure related to indebtedness of unconsolidated entities by \$232.1 million, of which \$106.1 million was paid by the Company

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

and \$126.0 million related to the joint venture selling inventory, dissolution of joint ventures, renegotiation of joint venture debt agreements and in certain circumstances consolidation of joint ventures. In addition, during the year ended November 30, 2009, the Company recorded \$40.1 million of obligation guarantees related to debt of certain of its joint ventures. As of November 30, 2009, the Company had \$14.1 million of obligation guarantees recorded as a liability on its consolidated balance sheet. The obligation guarantees are estimated based on current facts and circumstances; any unexpected changes may lead the Company to incur additional obligation guarantees in the future.

Indebtedness of an unconsolidated entity is secured by its own assets. Some unconsolidated entities own multiple properties and other assets. There is no cross collateralization of debt to different unconsolidated entities. We also do not use our investment in one unconsolidated entity as collateral for the debt in another unconsolidated entity or commingle funds among our unconsolidated entities.

In connection with a loan to an unconsolidated entity, the Company and its partners often guarantee to a lender either jointly and severally or on a several basis, any, or all of the following: (i) the completion of the development, in whole or in part, (ii) indemnification of the lender from environmental issues, (iii) indemnification of the lender from “bad boy acts” of the unconsolidated entity (or full recourse liability in the event of unauthorized transfer or bankruptcy) and (iv) that the loan to value and/or loan to cost will not exceed a certain percentage (maintenance or remargining guarantee) or that a percentage of the outstanding loan will be repaid (repayment guarantee).

In connection with loans to an unconsolidated entity where there is a joint and several guarantee, the Company generally has a reimbursement agreement with its partner. The reimbursement agreement provides that neither party is responsible for more than its proportionate share of the guarantee. However, if the Company’s joint venture partner does not have adequate financial resources to meet its obligations under the reimbursement agreement, the Company may be liable for more than its proportionate share, up to its maximum recourse exposure, which is the full amount covered by the joint and several guarantee.

The Company’s senior unsecured revolving credit facility (the “Credit Facility”) requires the Company to effect quarterly reductions of its maximum recourse exposure related to joint ventures in which it has investments by a total of \$200 million to \$535 million by November 30, 2009, which the Company accomplished as of May 31, 2009. The Company must also effect quarterly reductions during its 2010 fiscal year totaling \$180 million to \$355 million of which the Company has already reduced it by \$136.5 million as of November 30, 2009. During the first six months of its 2011 fiscal year, the Company must reduce its maximum recourse exposure related to joint ventures by \$80 million to \$275 million (See Note 6).

If the joint ventures are unable to reduce their debt, where there is recourse to the Company, through the sale of inventory or other means, then the Company and its partners may be required to contribute capital to the joint ventures.

The recourse debt exposure in the previous table represents the Company’s maximum recourse exposure to loss from guarantees and does not take into account the underlying value of the collateral or the other assets of the borrowers that are available to repay the debt or to reimburse the Company for any payments on its guarantees. The Company’s unconsolidated entities that have recourse debt have significant amount of assets and equity.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The summarized balance sheets of the Company's unconsolidated entities with recourse debt were as follows:

	November 30,	
	2009	2008
	(In thousands)	
Assets	\$1,324,993	2,846,819
Liabilities	777,836	1,565,148
Equity (1)	547,157	1,281,671

- (1) The decrease in equity of the Company's unconsolidated entities with recourse debt relates primarily to valuation adjustments recorded by the unconsolidated entities, partner buyouts and consolidation of joint ventures, partially offset by capital contributions made by the Company and its partners during the year ended November 30, 2009. The Company's exposure to impairment losses was significantly lower, as a result of its small ownership interest in the respective unconsolidated entities or its previous valuation adjustments to its investments in unconsolidated entities.

In addition, in most instances in which the Company has guaranteed debt of an unconsolidated entity, the Company's partners have also guaranteed that debt and are required to contribute their share of the guarantee payments. Some of the Company's guarantees are repayment guarantees and some are maintenance guarantees. In a repayment guarantee, the Company and its venture partners guarantee repayment of a portion or all of the debt in the event of default before the lender would have to exercise its rights against the collateral. In the event of default, if the Company's venture partner does not have adequate financial resources to meet its obligations under the reimbursement agreement, the Company may be liable for more than its proportionate share, up to its maximum recourse exposure, which is the full amount covered by the joint and several guarantee. The maintenance guarantees only apply if the value of the collateral (generally land and improvements) is less than a specified percentage of the loan balance. If the Company is required to make a payment under a maintenance guarantee to bring the value of the collateral above the specified percentage of the loan balance, the payment would constitute a capital contribution or loan to the unconsolidated entity and increase the Company's share of any funds the unconsolidated entity distributes.

In many of the loans to unconsolidated entities, the Company and its joint venture partners (or entities related to them) have been required to give guarantees of completion to the lenders. Those completion guarantees may require that the guarantors complete the construction of the improvements for which the financing was obtained. If the construction was to be done in phases, very often the guarantee is to complete only the phases as to which construction has already commenced and for which loan proceeds were used. Under many of the completion guarantees, the guarantors are permitted, under certain circumstances, to use undisbursed loan proceeds to satisfy the completion obligations, and in many of those cases, the guarantors pay interest only on those funds, with no repayment of the principal of such funds required.

During the years ended November 30, 2009 and 2008, amounts paid under the Company's maintenance guarantees were \$31.6 million and \$74.0 million, respectively. During the year ended November 30, 2009, the Company made a payment of \$5.6 million under a completion guarantee related to one joint venture. During the year ended November 30, 2008, there were no payments under completion guarantees. During the years ended November 30, 2009 and 2008, loan repayments, including amounts paid under the Company's repayment guarantees, were \$72.4 million and \$94.9 million, respectively. These guarantee payments are recorded primarily as contributions to the Company's unconsolidated entities.

As of November 30, 2009, the fair values of the maintenance guarantees, repayment guarantees and completion guarantees were not material. The Company believes that as of November 30, 2009, in the event it becomes legally obligated to perform under a guarantee of the obligation of an unconsolidated entity due to a triggering event under a guarantee, most of the time the collateral should be sufficient to repay at least a significant portion of the obligation or the Company and its partners would contribute additional capital into the venture.

In certain instances, the Company has placed performance letters of credit and surety bonds with municipalities for its joint ventures.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The total debt of the unconsolidated entities in which the Company has investments was as follows:

	November 30,	
	2009	2008
	(Dollars in thousands)	
Lennar's net recourse exposure	\$ 194,555	392,450
Reimbursement agreements from partners	93,185	127,428
The Company's maximum recourse exposure	287,740	519,878
Non-recourse bank debt and other debt (partner's share of several recourse)	140,078	285,519
Non-recourse land seller debt or other debt	47,478	90,519
Non-recourse debt with completion guarantees—excluding LandSource	608,397	820,435
Non-recourse debt without completion guarantees—excluding LandSource	504,697	994,580
Non-recourse debt without completion guarantees—LandSource (1)	—	1,351,127
Non-recourse debt to the Company	1,300,650	3,542,180
Total debt	\$1,588,390	4,062,058
The Company's maximum recourse exposure as a % of total JV debt	18%	13%

- (1) During 2009, LandSource emerged from bankruptcy as a new reorganized company named Newhall Land Development, LLC. As a result, all of LandSource's bank debts were discharged.

LandSource/Newhall Transactions

In January 2004, an unconsolidated entity of which the Company and LNR Property Corporation ("LNR") each owned 50% acquired The Newhall Land and Farming Company for approximately \$1 billion, including \$200 million the Company contributed and \$200 million that LNR contributed (the remainder came from borrowings and sales of properties to LNR). Subsequently, the Company and LNR each transferred their interests in most of their joint ventures to the jointly-owned company that had acquired The Newhall Land and Farming Company, and that company was renamed LandSource Communities Development LLC ("LandSource").

In February 2007, LandSource admitted MW Housing Partners as a new strategic partner. As part of the transaction, the joint venture obtained \$1.6 billion of non-recourse financing, which consisted of a \$200 million five-year Revolving Credit Facility, a \$1.1 billion six-year Term Loan B Facility and a \$244 million seven-year Second Lien Term Facility. The transaction resulted in a cash distribution from LandSource to the Company of \$707.6 million. As a result, the Company's ownership in LandSource was reduced to 16%. As a result of the recapitalization, the Company recognized a pretax financial statement gain of \$175.9 million during the year ended November 30, 2007.

In June 2008, LandSource and a number of its subsidiaries commenced proceedings under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware. In November 2008, the Company's land purchase options with LandSource were terminated, thus, in 2008, the Company recognized a deferred profit of \$101.3 million (net of \$31.8 million of write-offs of option deposits and pre-acquisition costs and other write-offs) related to the 2007 recapitalization of LandSource.

In July 2009, the United States Bankruptcy Court for the District of Delaware confirmed the plan of reorganization for LandSource. As a result of the bankruptcy proceedings, LandSource was reorganized into a new company called Newhall Land Development, LLC, ("Newhall"). The reorganized company emerged from Chapter 11 free of its previous bank debt. As part of the reorganization plan, the Company invested \$140 million in exchange for approximately a 15% equity interest in the reorganized Newhall, ownership in several communities that were formerly owned by LandSource, the settlement and release of any claims that might have been asserted against the Company and certain other claims LandSource had against third parties.

Mortgage notes on land and other debt	527,258	368,177
	<u>\$2,761,352</u>	<u>2,544,935</u>

The Company has a \$1.1 billion Credit Facility that matures in July 2011. In order to borrow under the Credit Facility, the Company is required to first use its cash in excess of \$750 million and have availability under its borrowing base calculation. As of November 30, 2009, the Company had no availability to borrow under the Credit Facility. The Company can create availability under its Credit Facility to the extent it uses the cash in excess of \$750 million to purchase qualified borrowing base assets.

The Credit Facility is guaranteed by substantially all of the Company's subsidiaries. Interest rates on outstanding borrowings are LIBOR-based, with margins determined based on changes in the Company's credit ratings, or an alternate base rate, as described in the Credit Facility agreement. At both November 30, 2009 and 2008, the Company had no outstanding balance under the Credit Facility. However, at November 30, 2009 and 2008, \$177.9 million and \$275.2 million, respectively, of the Company's total letters of credit outstanding discussed below, were collateralized against certain borrowings available under the Credit Facility.

The Company's performance letters of credit outstanding were \$97.7 million and \$167.5 million, respectively, at November 30, 2009 and 2008. The Company's financial letters of credit outstanding were \$205.4 million and \$278.5 million, respectively, at November 30, 2009 and 2008. Performance letters of credit are generally posted with regulatory bodies to guarantee the Company's performance of certain development and construction activities, and financial letters of credit are generally posted in lieu of cash deposits on option contracts and for insurance risks, credit enhancements and as other collateral. Additionally, at November 30, 2009, the Company had outstanding performance and surety bonds related to site improvements at various

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

projects (including certain projects in the Company's joint ventures) of \$821.2 million. Although significant development and construction activities have been completed related to these site improvements, these bonds are generally not released until all development and construction activities are completed. As of November 30, 2009, there were approximately \$324.4 million, or 40%, of costs to complete related to these site improvements. The Company does not presently anticipate any draws upon these bonds, but if any such draws occur, the Company does not believe they would have a material effect on its financial position, results of operations or cash flows.

At November 30, 2009, the Company believes it was in compliance with its debt covenants. Under the Credit Facility agreement, the Company was required to maintain a leverage ratio of less than or equal to 55% at the end of each fiscal quarter during the Company's 2009 fiscal year and is required to maintain a leverage ratio of less than or equal to 52.5% for its 2010 fiscal year and through the maturity of the Company's Credit Facility in 2011. If the Company's adjusted consolidated tangible net worth, as calculated per the Credit Facility agreement, falls below \$1.6 billion, the Company's Credit Facility would be reduced from \$1.1 billion to \$0.9 billion. In no event may the Company's adjusted consolidated tangible net worth, as calculated per the Credit Facility agreement, be less than \$1.3 billion.

In addition to other requirements, the Credit Facility requires the Company to effect quarterly reductions of its maximum recourse exposure related to joint ventures in which it has investments by a total of \$200 million to \$535 million by November 30, 2009, which the Company accomplished as of May 31, 2009. The Company must also effect quarterly reductions during its 2010 fiscal year totaling \$180 million to \$355 million of which the Company has already reduced it by \$136.5 million. During the first six months of its 2011 fiscal year, the Company must reduce its maximum recourse exposure related to joint ventures by \$80 million to \$275 million.

In April 2009, the Company sold \$400 million of 12.25% senior notes due 2017 (the "12.25% Senior Notes") at a price of 98.098% in a private placement. Proceeds from the offering, after payment of initial purchaser's discount and expenses, were \$386.7 million. The Company added the proceeds to its working capital to be used for general corporate purposes, which may include the repayment or repurchase of its near-term maturities or of debt of its joint ventures that it has guaranteed. Interest on the 12.25% Senior Notes is due semi-annually. The 12.25% Senior Notes are unsecured and unsubordinated, and are guaranteed by substantially all of the Company's subsidiaries. The 12.25% Senior Notes were subsequently exchanged for identical 12.25% Senior Notes that had been registered under the Securities Act of 1933. At November 30, 2009, the carrying amount of the 12.25% Senior Notes was \$392.4 million.

In March 2009, the Company retired its \$281 million of 7 ⁵/₈% senior notes due March 2009 for 100% of the outstanding principal amount, plus accrued and unpaid interest as of the maturity date.

In June 2007, the Company redeemed its \$300 million senior floating-rate notes due 2009. The redemption price was \$300.0 million, or 100% of the principal amount of the outstanding senior floating-rate notes due 2009, plus accrued and unpaid interest as of the redemption date.

In April 2006, the Company sold \$250 million of 5.95% senior notes due 2011 and \$250 million of 6.50% senior notes due 2016 (collectively, the "2006 Senior Notes") at prices of 99.766% and 99.873%, respectively, in a private placement under SEC Rule 144A. Proceeds from the offering of the 2006 Senior Notes, after initial purchaser's discount and expenses, were \$248.7 million and \$248.9 million, respectively. The Company added the proceeds to its working capital to be used for general corporate purposes. Interest on the 2006 Senior Notes is due semi-annually. The 2006 Senior Notes are unsecured and unsubordinated, and substantially all of the Company's subsidiaries guarantee the 2006 Senior Notes. The 2006 Senior Notes were subsequently exchanged for identical 2006 Senior Notes that had been registered under the Securities Act of 1933. During the year ended November 30, 2009, the Company redeemed \$5.0 million of the 5.95% senior notes due 2011. At November 30, 2009 and 2008, the carrying amount of the 2006 Senior Notes was \$494.5 million and \$499.3 million, respectively.

In September 2005, the Company sold \$300 million of 5.125% senior notes due 2010 (the "5.125% Senior Notes") at a price of 99.905% in a private placement. Proceeds from the offering, after initial purchaser's discount and expenses, were \$298.2 million. The Company added the proceeds to the Company's working capital to be used for general corporate purposes. Interest on the 5.125% Senior Notes is due semi-annually. The 5.125%

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Senior Notes are unsecured and unsubordinated. Substantially all of the Company's subsidiaries guaranteed the 5.125% Senior Notes. In 2006, the Company exchanged the 5.125% Senior Notes for registered notes. The registered notes have substantially identical terms as the 5.125% Senior Notes, except that the registered notes do not include transfer restrictions that are applicable to the 5.125% Senior Notes. During the year ended November 30, 2009, the Company redeemed \$50.0 million of the 5.125% Senior Notes. At November 30, 2009 and 2008, the carrying amount of the 5.125% Senior Notes was \$250.0 million and \$299.9 million, respectively.

In April 2005, the Company sold \$300 million of 5.60% Senior Notes due 2015 (the "5.60% Senior Notes") at a price of 99.771%. Proceeds from the offering, after initial purchaser's discount and expenses, were \$297.5 million. In July 2005, the Company sold \$200 million of 5.60% Senior Notes due 2015 at a price of 101.407%. The 5.60% Senior Notes were the same issue as the 5.60% Senior Notes the Company sold in April 2005. Proceeds from the offering, after initial purchaser's discount and expenses, were \$203.9 million. The Company added the proceeds of both offerings to its working capital to be used for general corporate purposes. Interest on the 5.60% Senior Notes is due semi-annually. The 5.60% Senior Notes are unsecured and unsubordinated. Substantially all of the Company's subsidiaries guaranteed the 5.60% Senior Notes. The 5.60% Senior Notes were subsequently exchanged for identical 5.60% Senior Notes that had been registered under the Securities Act of 1933. At November 30, 2009 and 2008, the carrying amount of the 5.60% Senior Notes sold in April and July 2005 was \$501.4 million and \$501.6 million, respectively.

In August 2004, the Company sold \$250 million of 5.50% senior notes due 2014 (the "5.50% Senior Notes") at a price of 98.842% in a private placement. Proceeds from the offering, after initial purchaser's discount and expenses, were \$245.5 million. The Company used the proceeds to repay borrowings under its Credit Facility. Interest on the 5.50% Senior Notes is due semi-annually. The 5.50% Senior Notes are unsecured and unsubordinated. Substantially all of the Company's subsidiaries guaranteed the 5.50% Senior Notes. At November 30, 2009 and 2008, the carrying value of the 5.50% Senior Notes was \$248.4 million and \$248.1 million, respectively.

In February 2003, the Company issued \$350 million of 5.95% senior notes due 2013 at a price of 98.287%. Substantially all of the Company's subsidiaries guaranteed the 5.95% senior notes. At November 30, 2009 and 2008, the carrying amount of the 5.95% senior notes was \$347.5 million and \$346.9 million, respectively.

At November 30, 2009, the Company had mortgage notes on land and other debt due at various dates through 2013 bearing interest at rates up to 10.0% with an average interest rate of 3.2%. At November 30, 2009 and 2008, the carrying amount of the mortgage notes on land and other debt was \$527.3 million and \$368.2 million, respectively.

The minimum aggregate principal maturities of senior notes and other debts payable during the five years subsequent to November 30, 2009 and thereafter are as follows:

	Debt Maturities
	(In thousands)
2010	\$ 464,614
2011	321,814
2012	148,690
2013	395,281
2014	281,378
Thereafter	1,149,575

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

7. Financial Services Segment

The assets and liabilities related to the Financial Services segment were as follows:

	November 30,	
	2009	2008
	(In thousands)	
Assets:		
Cash and cash equivalents	\$126,835	111,954
Restricted cash	25,646	21,977
Receivables, net (1)	123,967	133,641
Loans held-for-sale (2)	182,706	190,056
Loans held-for-investment, net	25,131	58,339
Investments held-to-maturity	2,512	19,139
Goodwill	34,046	34,046
Other (3)	36,707	38,826
	\$557,550	607,978
Liabilities:		
Notes and other debts payable	\$217,557	225,783
Other (4)	197,329	191,050
	\$414,886	416,833

- (1) Receivables, net, primarily relate to loans sold to investors for which the Company had not yet been paid as of November 30, 2009 and 2008, respectively.
- (2) Loans held-for-sale relate to unsold loans carried at fair value.
- (3) Other assets include mortgage loan commitments of \$4.7 million and \$4.4 million, respectively, as of November 30, 2009 and 2008, carried at fair value.
- (4) Other liabilities include forward contracts of \$3.6 million and \$6.5 million, respectively, as of November 30, 2009 and 2008, carried at fair value.

At November 30, 2009, the Financial Services segment had two warehouse repurchase facilities with a maximum aggregate commitment of \$200 million and \$100 million, respectively, that mature in June 2010, and another warehouse repurchase facility with a maximum aggregate commitment of \$125 million that matures in July 2010. The maximum aggregate commitment under these facilities totaled \$425 million. The Financial Services segment uses these facilities to finance its lending activities until the mortgage loans are sold to investors and expects the facilities to be renewed or replaced with other facilities when they mature. Borrowings under the facilities were \$217.5 million and \$209.5 million, respectively, at November 30, 2009 and 2008 and were collateralized by mortgage loans and receivables on loans sold to investors but not yet paid for with outstanding principal balances of \$266.9 million and \$281.2 million, respectively, at November 30, 2009 and 2008. The combined effective interest rate on the facilities at November 30, 2009 was 4.2%. If the facilities are not renewed, the borrowings under the lines of credit will be paid off by selling the mortgage loans held-for-sale to investors and by collecting on receivables on loans sold but not yet paid. Without the facilities, the Financial Services segment would have to use cash from operations and other funding sources to finance its lending activities.

At November 30, 2008, the Financial Services segment had advances under a different conduit funding agreement totaling \$10.8 million, which had an effective interest rate of 2.9% at November 30, 2008. At November 30, 2008, the Financial Services segment had advances under the on going 60-day committed repurchase facility of \$5.2 million, which were collateralized by mortgage loans and receivables on loans sold to investors but not yet paid for with outstanding principal balances of \$5.5 million. The effective interest rate of this facility at November 30, 2008 was 3.7%.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

8. Income Taxes

The benefit (provision) for income taxes consisted of the following:

	Years Ended November 30,		
	2009	2008	2007
	(In thousands)		
Current:			
Federal	\$327,131	249,157	715,311
State	(12,786)	(24,206)	(14,128)
	<u>314,345</u>	<u>224,951</u>	<u>701,183</u>
Deferred:			
Federal	—	(646,261)	282,263
State	—	(126,247)	156,554
	<u>—</u>	<u>(772,508)</u>	<u>438,817</u>
	<u>\$314,345</u>	<u>(547,557)</u>	<u>1,140,000</u>

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of the assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The tax effects of significant temporary differences that give rise to the net deferred tax asset are as follows:

	November 30,	
	2009	2008
	(In thousands)	
Deferred tax assets:		
Inventory valuation adjustments	\$ 175,166	239,854
Reserves and accruals	114,002	118,222
Net operating loss carryforward	330,160	217,040
Capitalized expenses	41,598	44,436
Investments in unconsolidated entities	29,685	36,614
Goodwill	—	26,383
Alternative minimum tax credits	—	65,307
Other	38,765	34,370
Total deferred tax assets	<u>729,376</u>	<u>782,226</u>
Valuation allowance	<u>(647,385)</u>	<u>(730,836)</u>
Total deferred tax assets after valuation allowance	<u>81,991</u>	<u>51,390</u>
Deferred tax liabilities:		
Capitalized expenses	35,531	18,187
Prepaid expenses	15,977	420
Other	30,483	32,783
Total deferred tax liabilities	<u>81,991</u>	<u>51,390</u>
Net deferred tax assets	<u>\$ —</u>	<u>—</u>

As a result of the valuation allowance against the Company's net deferred tax assets, at November 30, 2009 and 2008, the Company's Homebuilding operations and the Financial Services segment did not have net deferred tax assets.

A reduction of the carrying amounts of deferred tax assets by a valuation allowance is required, if based on the available evidence, it is more likely than not that such assets will not be realized. Accordingly, the need to establish valuation allowances for deferred tax assets is assessed periodically based on the more-likely-than-not realization threshold criterion. In the assessment for a valuation allowance, appropriate consideration is given to all positive and negative evidence related to the realization of the deferred tax assets. This assessment considers, among other matters, the nature, frequency and severity of current and cumulative losses, forecasts of future

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

profitability, the duration of statutory carryforward periods, the Company's experience with loss carryforwards not expiring unused and tax planning alternatives.

Based upon all available evidence, the Company recorded a valuation allowance against its deferred tax assets of \$730.8 million during the year ended November 30, 2008, and increased it by \$269.6 million during the year ended November 30, 2009. In addition, the Company recorded a reversal of its deferred tax asset valuation allowance of \$351.8 million during the fourth quarter of 2009, primarily due to a change in tax legislation, which allowed the Company to carry back its fiscal year 2009 tax loss to recover previously paid income taxes. At November 30, 2009 and 2008, the Company's deferred tax asset valuation allowance was \$647.4 million and \$730.8 million, respectively. In future periods, the allowance could be reduced based on sufficient evidence indicating that it is more likely than not that a portion or all of our deferred tax assets will be realized. At both November 30, 2009 and 2008, the Company had no net deferred tax assets.

At November 30, 2009, the Company had federal and state net operating loss carryforwards totaling \$330.2 million. Federal net operating loss carryforwards may be carried forward up to 20 years to offset future taxable income and begin to expire in 2025. State net operating losses may be carried forward from 5 to 20 years, depending on the tax jurisdiction, with losses expiring between 2012 and 2029.

A reconciliation of the statutory rate and the effective tax rate follows:

	Percentage of Pretax Loss		
	2009	2008	2007
Statutory rate	35.00%	35.00%	35.00%
State income taxes, net of federal income tax benefit	2.32	3.09	3.00
Internal Revenue Code Section 199 impact	—	(0.29)	(0.30)
Goodwill impairments and other	(0.63)	(1.60)	(0.70)
Tax reserves and interest expense	(4.97)	(3.56)	—
Deferred tax asset valuation reversal (allowance)	11.25	(130.15)	—
Effective rate	<u>42.97%</u>	<u>(97.51)%</u>	<u>37.00%</u>

The following table summarizes the changes in gross unrecognized tax benefits for the years ended November 30, 2009 and 2008:

	November 30,	
	2009	2008
	(In thousands)	
Gross unrecognized tax benefits, beginning of year	\$100,168	88,560
Decreases due to settlement with taxing authorities	(57,022)	(2,605)
Increases of prior year items	36,061	14,213
Decreases due to statute expirations	(1,996)	—
Gross unrecognized tax benefits, end of year	<u>\$ 77,211</u>	<u>100,168</u>

At November 30, 2009, the Company had \$77.2 million of gross unrecognized tax benefits. If the Company were to recognize these tax benefits, \$52.4 million would affect the Company's effective tax rate.

The Company expects the total amount of unrecognized tax benefits to decrease by \$13.4 million within twelve months as a result of the settlement of certain tax accounting items with the IRS with respect to the prior examination cycle that carried over to the current years under examination, and as a result of the conclusion of examinations with a number of state taxing authorities. The majority of these items were previously recorded as deferred tax liabilities and the settlement will not affect the Company's tax rate.

At November 30, 2009 and 2008, the Company had \$33.6 million and \$33.5 million, respectively, accrued for interest and penalties, of which \$3.9 million and \$16.1 million, respectively, were recorded during the years ended November 30, 2009 and 2008.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The IRS is currently examining the Company's federal income tax returns for fiscal years 2005 through 2009, and certain state taxing authorities are examining various fiscal years. The final outcome of these examinations is not yet determinable. The statute of limitations for the Company's major tax jurisdictions remains open for examination for fiscal year 2003 and subsequent years.

9. Loss Per Share

Basic and diluted loss per share were calculated as follows:

	Years Ended November 30,		
	2009	2008	2007
	(In thousands, except per share amounts)		
Numerator for basic and diluted loss per share—net loss	\$(417,147)	(1,109,085)	(1,941,081)
Denominator for basic and diluted loss per share—weighted average shares	170,537	158,395	157,718
Basic and diluted loss per share	\$ (2.45)	(7.00)	(12.31)

Options to purchase 7.5 million shares, 7.4 million shares and 4.9 million shares, respectively, in total of Class A and Class B common stock were outstanding and anti-dilutive for the years ended November 30, 2009, 2008 and 2007.

10. Comprehensive Loss

Comprehensive loss represents changes in stockholders' equity from non-owner sources. The components of comprehensive loss were as follows:

	Years Ended November 30,		
	2009	2008	2007
	(In thousands)		
Net loss	\$(417,147)	(1,109,085)	(1,941,081)
Unrealized gains arising during period on interest rate swaps, net of tax (37%)	—	—	1,002
Unrealized gain (loss) on Company's portion of unconsolidated entity's interest rate swap liability, net of tax (37%)	—	2,061	(2,061)
Reclassification adjustment for loss included in net loss for interest rate swaps, net of tax (37%)	—	—	338
Change to the Company's portion of unconsolidated entity's minimum pension liability, net of tax (37%)	—	—	701
Comprehensive loss	\$(417,147)	(1,107,024)	(1,941,101)

There was no accumulated other comprehensive loss at November 30, 2009 and 2008.

11. Capital Stock

Preferred Stock

The Company is authorized to issue 500,000 shares of preferred stock with a par value of \$10 per share and 100 million shares of participating preferred stock with a par value of \$0.10 per share. No shares of preferred stock or participating preferred stock have been issued as of November 30, 2009.

Common Stock

During 2009, the Company's Class A and Class B common stockholders received a per share annual dividend of \$0.16. In October 2008, the Company's Board of Directors voted to decrease the annual dividend rate with regard to the Company's Class A and Class B common stock to \$0.16 per share per year (payable

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

quarterly) from \$0.64 per share per year (payable quarterly). During the years ended November 30, 2008 and 2007, Class A and Class B common stockholders received per share annual dividends of \$0.52 and \$0.64, respectively.

The only significant difference between the Class A common stock and Class B common stock is that Class A common stock entitles holders to one vote per share and the Class B common stock entitles holders to ten votes per share.

As of November 30, 2009, Stuart A. Miller, the Company's President, Chief Executive Officer and a Director, directly owned, or controlled through family-owned entities, shares of Class A and Class B common stock, which represented approximately 46% voting power of the Company's stock.

The Company has a stock repurchase program which permits the purchase of up to 20 million shares of its outstanding common stock. During the years ended November 30, 2009, 2008 and 2007, there were no material share repurchases of common stock under the stock repurchase program. As of November 30, 2009, 6.2 million shares of common stock can be repurchased in the future under the program.

Treasury stock increased by 0.3 million Class A common shares and 0.5 million Class A common shares, respectively, during the years ended November 30, 2009 and November 30, 2008, in connection with activity related to the Company's equity compensation plan and forfeitures of restricted stock.

In April 2009, the Company entered into distribution agreements with J.P Morgan Securities, Inc., Citigroup Global Markets Inc., Merrill Lynch, Pierce, Fenner & Smith Incorporated and Deutsche Bank Securities Inc., relating to an offering of its Class A common stock into the market from time to time for an aggregate of up to \$275 million. As of November 30, 2009, the Company had sold a total of 21.0 million shares of its Class A common stock under the equity offering for gross proceeds of \$225.5 million, or an average of \$10.76 per share. After compensation to the distributors of \$4.5 million, the Company received net proceeds of \$221.0 million. The Company will use the proceeds from the offering for general corporate purposes.

Restrictions on Payment of Dividends

Other than to maintain compliance with certain covenants contained in the Credit Facility, there are no restrictions on the payment of dividends on common stock by the Company. There are no agreements which restrict the payment of dividends by subsidiaries of the Company other than to maintain the financial ratios and net worth requirements under the Financial Services segment's warehouse lines of credit, which restrict the payment of dividends from the Company's mortgage subsidiaries following the occurrence and during the continuance of an event of default thereunder and limit dividends to 50% of net income in the absence of an event of default.

401(k) Plan

Under the Company's 401(k) Plan (the "Plan"), contributions made by associates can be invested in a variety of mutual funds or proprietary funds provided by the Plan trustee. The Company may also make contributions for the benefit of associates. The Company records as compensation expense its contribution to the Plan. This amount was \$5.2 million in 2009, \$7.6 million in 2008 and \$15.2 million in 2007.

12. Share-Based Payments

The Company has share-based awards outstanding under four different plans which provide for the granting of stock options and stock appreciation rights and awards of restricted common stock ("nonvested shares") to key officers, associates and directors. These awards are primarily issued in the form of new shares. The exercise prices of stock options and stock appreciation rights may not be less than the market value of the common stock on the date of the grant. Exercises are permitted in installments determined when options are granted. Each stock option and stock appreciation right will expire on a date determined at the time of the grant, but not more than ten years after the date of the grant.

LENNAR CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Cash flows resulting from tax benefits related to tax deductions in excess of the compensation expense recognized for those options (excess tax benefits) are classified as financing cash flows. For the years ended November 30, 2009 and 2008, the Company did not have any excess tax benefits from shared-based awards. For the year ended November 30, 2007, the Company classified \$4.6 million of excess tax benefits as financing cash inflows.

Compensation expense related to the Company's share-based awards was as follows:

	<u>Years Ended November 30,</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
	(In thousands)		
Stock options	\$10,291	12,432	17,171
Nonvested shares	20,101	17,439	18,307
Total compensation expense for share-based awards	<u>\$30,392</u>	<u>29,871</u>	<u>35,478</u>

Cash received from stock options exercised during the years ended November 30, 2009, 2008 and 2007 was \$0.3 million, \$0.2 million, and \$21.6 million, respectively. There were no material tax deductions related to stock options exercised during the years ended November 30, 2009 and 2008. The tax deductions related to stock options exercised during the year ended November 30, 2007 were \$8.3 million.

The fair value of each of the Company's stock option awards is estimated on the date of grant using a Black-Scholes option-pricing model that uses the assumptions noted in the table below. The fair value of the Company's stock option awards, which are subject to graded vesting, is expensed on a straight-line basis over the vesting life of the stock options. Expected volatility is based on historical volatility of the Company's stock over the most recent period equal to the expected life of the award. The risk-free rate for periods within the contractual life of the stock option award is based on the yield curve of a zero-coupon U.S. Treasury bond on the date the stock option award is granted with a maturity equal to the expected term of the stock option award granted. The Company uses historical data to estimate stock option exercises and forfeitures within its valuation model. The expected life of stock option awards granted is derived from historical exercise experience under the Company's share-based payment plans and represents the period of time that stock option awards granted are expected to be outstanding.

The fair value of these options was determined at the date of the grant using the Black-Scholes option-pricing model. The significant weighted average assumptions for the years ended November 30, 2009, 2008 and 2007 were as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Dividend yield	1.7% - 1.8%	3.2% - 4.7%	1.3% - 2.7%
Volatility rate	73% - 121%	43% - 60%	30% - 34%
Risk-free interest rate	0.7% - 2.8%	1.9% - 3.5%	4.1% - 5.0%
Expected option life (years)	2.0 - 5.0	2.0 - 5.0	2.0 - 5.0

A summary of the Company's stock option activity for the year ended November 30, 2009 was as follows:

	<u>Stock Options</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Contractual Life</u>	<u>Aggregate Intrinsic Value (In thousands)</u>
Outstanding at November 30, 2008	8,761,204	\$31.50		
Grants	32,500	\$ 8.92		
Forfeited or expired	(2,376,150)	\$37.10		
Exercises	(22,449)	\$13.54		
Outstanding at November 30, 2009	<u>6,395,105</u>	<u>\$29.37</u>	<u>3.6 years</u>	<u>\$547</u>
Vested and expected to vest in the future at November 30, 2009	5,478,478	\$30.30	3.5 years	\$744
Exercisable at November 30, 2009	<u>3,002,000</u>	<u>\$38.66</u>	<u>2.8 years</u>	<u>\$603</u>
Available for grant at November 30, 2009	<u>3,361,621</u>			

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The weighted average fair value of options granted during the years ended November 30, 2009, 2008 and 2007 was \$4.74, \$3.85 and \$12.89, respectively. The total intrinsic value of options exercised during the years ended November 30, 2009 and 2008 was not material. The total intrinsic value of options exercised during the year ended November 30, 2007 was \$22.3 million.

The fair value of nonvested shares is determined based on the trading price of the Company's common stock on the grant date. The weighted average fair value of nonvested shares granted during the years ended November 30, 2009, 2008 and 2007 was \$12.63, \$15.11 and \$49.52, respectively. A summary of the Company's nonvested shares activity for the year ended November 30, 2009 was as follows:

	Shares	Weighted Average Grant Date Fair Value
Nonvested restricted shares at November 30, 2008	2,022,923	\$32.33
Grants	1,619,059	\$12.63
Vested	(1,153,573)	\$22.64
Forfeited	(138,924)	\$10.80
Nonvested restricted shares at November 30, 2009	<u>2,349,485</u>	<u>\$13.27</u>

At November 30, 2009, there was \$44.2 million of unrecognized compensation expense related to unvested share-based awards granted under the Company's share-based payment plans, of which \$12.7 million relates to stock options and \$31.5 million relates to nonvested shares. The unrecognized expense related to nonvested shares is expected to be recognized over a weighted-average period of 2.8 years. During the years ended November 30, 2009, 2008 and 2007, 1.2 million nonvested shares, 0.4 million nonvested shares and 0.3 million nonvested shares, respectively, vested. For the year ended November 30, 2009, there was no tax provision related to nonvested share activity because the Company has recorded a full valuation allowance against its deferred tax assets. The tax provision related to nonvested share activity during the years ended November 30, 2008 and 2007 was \$6.1 million and \$3.1 million, respectively.

13. Deferred Compensation Plan

In June 2002, the Company adopted the Lennar Corporation Nonqualified Deferred Compensation Plan (the "Deferred Compensation Plan") that allowed a selected group of members of management to defer a portion of their salaries and bonuses and up to 100% of their restricted stock. All participant contributions to the Deferred Compensation Plan are vested. Salaries and bonuses that are deferred under the Deferred Compensation Plan are credited with earnings or losses based on investment decisions made by the participants. The cash contributions to the Deferred Compensation Plan are invested by the Company in various investment securities that were classified as trading.

Restricted stock is deferred under the Deferred Compensation Plan by surrendering the restricted stock in exchange for the right to receive in the future a number of shares equal to the number of restricted shares that are surrendered. The surrender is reflected as a reduction in stockholders' equity equal to the fair value of the restricted stock when it was issued, with an offsetting increase in stockholders' equity to reflect a deferral of the compensation expense related to the surrendered restricted stock. Changes in the fair value of the shares that will be issued in the future are not reflected in the consolidated financial statements.

As of November 30, 2007, approximately 36,000 Class A common shares and 3,600 Class B common shares of restricted stock had been surrendered in exchange for rights under the Deferred Compensation Plan, resulting in a reduction in stockholders' equity of \$0.3 million fully offset by an increase in stockholders' equity to reflect the deferral of compensation in that amount. Shares that the Company is obligated to issue in the future under the Deferred Compensation Plan are treated as outstanding shares in both the Company's basic and diluted loss per share calculations for the year ended November 30, 2007. In 2008, the Compensation Committee of the Company's Board of Directors approved the termination of the Deferred Compensation Plan and \$1.8 million in total in cash and shares of common stock was distributed to its participants.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

14. Financial Instruments

The following table presents the carrying amounts and estimated fair values of financial instruments held by the Company at November 30, 2009 and 2008, using available market information and what the Company believes to be appropriate valuation methodologies. Considerable judgment is required in interpreting market data to develop the estimates of fair value. The use of different market assumptions and/or estimation methodologies might have a material effect on the estimated fair value amounts. The table excludes cash and cash equivalents, restricted cash, receivables and accounts payable, which had fair values approximating their carrying amounts due to the short maturities of these instruments.

	November 30,			
	2009		2008

Financial services:				
Notes and other debts payable	\$ 217,557	217,557	225,783	225,783

The following methods and assumptions are used by the Company in estimating fair values:

Homebuilding—For senior notes and other debts payable, the fair value of fixed-rate borrowings is based on quoted market prices. The Company's variable-rate borrowings are tied to market indices and approximate fair value due to the short maturities associated with the majority of the instruments.

Financial services—The fair values above are based on quoted market prices, if available. The fair values for instruments that do not have quoted market prices are estimated by the Company on the basis of discounted cash flows or other financial information.

Fair Value Option

GAAP provides a framework for measuring fair value, expands disclosures about fair value measurements and establishes a fair value hierarchy which prioritizes the inputs used in measuring fair value summarized as follows:

- Level 1 Fair value determined based on quoted prices in active markets for identical assets.
- Level 2 Fair value determined using significant other observable inputs.
- Level 3 Fair value determined using significant unobservable inputs.

The Company's financial instruments measured at fair value at November 30, 2009 on a recurring basis are all within the Company's Financial Services segment and are summarized below:

Financial Instruments	Fair Value Hierarchy	Fair Value at November 30, 2009
		(In thousands)
Loans held-for-sale (1)	Level 2	\$182,706
Mortgage loan commitments	Level 2	4,700
Forward contracts	Level 2	(3,558)
		\$183,848

- (1) The aggregate fair value of loans held-for-sale of \$182.7 million exceeds its aggregate principal balance of \$175.5 million by \$7.2 million.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The Company elected the fair value option for its loans held-for-sale for mortgage loans originated subsequent to February 29, 2008 in accordance with ASC 825, which permits entities to measure various financial instruments and certain other items at fair value on a contract-by-contract basis. Management believes carrying loans held-for-sale at fair value improves financial reporting by mitigating volatility in reported earnings caused by measuring the fair value of the loans and the derivative instruments used to economically hedge them without having to apply complex hedge accounting provisions. In addition, the Company adopted ASC 815-10-S99 on March 1, 2008, requiring the recognition of the fair value of its rights to service a mortgage loan as revenue upon entering into an interest rate lock loan commitment with a borrower. The fair value of these servicing rights is included in the Company's loans held-for-sale as of November 30, 2009 and 2008. Prior to March 1, 2008, the fair value of the servicing rights was not recognized until the related loan was sold. Fair value of the servicing rights is determined based on values in the Company's servicing sales contracts. Fair value of loans held for sale is based on independent quoted market prices, where available, or the prices for other mortgage whole loans with similar characteristics.

The assets accounted for under ASC 825 are initially measured at fair value. Gains and losses from initial measurement and subsequent changes in fair value are recognized in the Financial Services segment's earnings (loss). The changes in fair values that are included in earnings (loss) are shown, by financial instrument and financial statement line item, below:

	Years Ended November 30,	
	2009	2008
Changes in fair value included in Financial Services revenues:	(In thousands)	
Loans held-for-sale	\$2,264	4,923
Mortgage loan commitments	\$ 318	4,382
Forward contracts	\$2,903	(6,461)

Interest income on loans held-for-sale measured at fair value is calculated based on the interest rate of the loan and recorded in interest income in the Financial Services' statement of operations.

The Financial Services segment had a pipeline of loan applications in process of \$838.6 million at November 30, 2009. Loans in process for which interest rates were committed to the borrowers and builder commitments for loans program totaled \$203.6 million as of November 30, 2009. Substantially all of these commitments were for periods of 60 days or less. Since a portion of these commitments is expected to expire without being exercised by the borrowers or borrowers may not meet certain criteria at the time of closing, the total commitments do not necessarily represent future cash requirements.

The Financial Services segment uses mandatory mortgage-backed securities ("MBS") forward commitments, option contracts and investor commitments to hedge its mortgage-related interest rate exposure. These instruments involve, to varying degrees, elements of credit and interest rate risk. Credit risk associated with MBS forward commitments, option contracts and loan sales transactions is managed by limiting our counterparties to investment banks, federally regulated bank affiliates and other investors meeting the Company's credit standards. The segment's risk, in the event of default by the purchaser, is the difference between the contract price and fair value of the MBS forward commitments and option contracts. At November 30, 2009, the segment had open commitments amounting to \$247.7 million to sell MBS with varying settlement dates through February 2010.

LENNAR CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The Company's assets measured at fair value on a nonrecurring basis are those assets for which the Company has recorded valuation adjustments and write-offs during the year ended November 30, 2009. The assets measured at fair value on a nonrecurring basis are all within the Company's Homebuilding operations and are summarized below:

<u>Non-financial Assets</u>	<u>November 30, 2009</u>			<u>Fair Value</u>
	<u>Fair Value Hierarchy</u>	<u>Pre-impairment Amount</u>	<u>Total Losses (1)</u>	
			(In thousands)	
Finished homes and construction in progress (2)	Level 3	\$431,922	(143,920)	288,002
Land under development (2)	Level 3	\$ 99,754	(39,802)	59,952
Investments in unconsolidated entities (3)	Level 3	\$ 53,501	(88,972)	(35,471)

- (1) Represents total losses recorded during the year ended November 30, 2009.
- (2) The valuation charges were included in homebuilding costs and expenses in the Company's statement of operations for the year ended November 30, 2009.
- (3) Investments in unconsolidated entities with an aggregate carrying value of \$19.8 million were written down to their fair value of (\$39.4) million, which represents the Company's obligation for guarantees related to debt of certain unconsolidated entities recorded as a liability during the year ended November 30, 2009. In addition, investments in unconsolidated entities with an aggregate carrying value of \$33.7 million were written down to their fair value of \$3.9 million. The valuation charges was included in other expense, net in the Company's statement of operations for the year ended November 30, 2009.

See Note 1 for a detailed description of the Company's process for identifying and recording valuation adjustments related to inventory and investments in unconsolidated entities.

15. Consolidation of Variable Interest Entities

GAAP requires the consolidation of certain entities in which an enterprise absorbs a majority of the entity's expected losses, receives a majority of the entity's expected residual returns, or both, as a result of ownership, contractual or other financial interests in the entity.

Unconsolidated Entities

At November 30, 2009, the Company had investments in and advances to unconsolidated entities established to acquire and develop land for sale to the Company in connection with its homebuilding operations, for sale to third parties or for the construction of homes for sale to third-party homebuyers. The Company evaluated all agreements during 2009 that were entered into or had reconsideration events and it consolidated entities that at November 30, 2009 had total combined assets and liabilities of \$282.8 million and \$225.6 million, respectively. At November 30, 2009, the Company's consolidated joint ventures had total combined assets and liabilities of \$815.1 million and \$391.7 million, respectively.

Additionally, during 2009, the Company consolidated certain joint ventures and then bought out the respective partners at a later date, resulting in the consolidated joint ventures becoming wholly-owned. At November 30, 2009, the assets and liabilities of these entities amounted to \$85.3 million and \$22.9 million, respectively.

At November 30, 2009 and 2008, the Company's recorded investment in unconsolidated entities was \$609.1 million and \$766.8 million, respectively. The Company's estimated maximum exposure to loss with regard to unconsolidated entities was primarily its recorded investments in these entities and the exposure under the guarantees discussed in Note 4.

Option Contracts

The Company has access to land through option contracts, which generally enables it to control portions of properties owned by third parties (including land funds) and unconsolidated entities until the Company has determined whether to exercise the option.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

A majority of the Company's option contracts require a non-refundable cash deposit or irrevocable letter of credit based on a percentage of the purchase price of the land. The Company's option contracts sometimes include price adjustment provisions, which adjust the purchase price of the land to its approximate fair value at the time of acquisition, or are based on the fair value of the land at the time of takedown.

The Company's investments in option contracts are recorded at cost unless those investments are determined to be impaired, in which case the Company's investments are written down to fair value. The Company reviews option contracts for indicators of impairment during each reporting period. The most significant indicator of impairment is a decline in the fair value of the optioned property such that the purchase and development of the optioned property would no longer meet the Company's targeted return on investment with appropriate consideration given to the length of time available to exercise the option. Such declines could be caused by a variety of factors including increased competition, decreases in demand or changes in local regulations that adversely impact the cost of development. Changes in any of these factors would cause the Company to re-evaluate the likelihood of exercising its land options.

Some option contracts contain a predetermined take-down schedule for the optioned land parcels. However, in almost all instances, the Company is not required to purchase land in accordance with those take-down schedules. In substantially all instances, the Company has the right and ability to not exercise its option and forfeit its deposit without further penalty, other than termination of the option and loss of any unapplied portion of its deposit and pre-acquisition costs. Therefore, in substantially all instances, the Company does not consider the take-down price to be a firm contractual obligation.

When the Company does not intend to exercise an option, it writes off any unapplied deposit and pre-acquisition costs associated with the option contract. For the years ended November 30, 2009, 2008 and 2007, the Company wrote-off \$84.4 million, \$97.2 million and \$530.0 million, respectively, of option deposits and pre-acquisition costs related to land under option that it does not intend to purchase.

The Company evaluates all option contracts for land when entered into or upon a reconsideration event to determine whether it is the primary beneficiary of certain of these option contracts. Although the Company does not have legal title to the optioned land, if the Company is deemed to be the primary beneficiary, it is required to consolidate the land under option at the purchase price of the optioned land. During the year ended November 30, 2009, the effect of consolidation of these option contracts was an increase of \$14.3 million to consolidated inventory not owned with a corresponding increase to liabilities related to consolidated inventory not owned in the accompanying consolidated balance sheets as of November 30, 2009. This increase was offset primarily by the Company exercising its options to acquire land under certain contracts previously consolidated, resulting in a net decrease in consolidated inventory not owned of \$84.1 million for the year ended November 30, 2009. To reflect the purchase price of the inventory consolidated, the Company reclassified \$2.6 million of related option deposits from land under development to consolidated inventory not owned in the accompanying consolidated balance sheet as of November 30, 2009. The liabilities related to consolidated inventory not owned primarily represent the difference between the option exercise prices for the optioned land and the Company's cash deposits.

The Company's exposure to loss related to its option contracts with third parties and unconsolidated entities consisted of its non-refundable option deposits and pre-acquisition costs totaling \$127.4 million and \$191.2 million, respectively, at November 30, 2009 and 2008. Additionally, the Company had posted \$58.2 million and \$89.5 million, respectively, of letters of credit in lieu of cash deposits under certain option contracts as of November 30, 2009 and 2008.

LENNAR CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

16. Commitments and Contingent Liabilities

The Company is party to various claims, legal actions and complaints arising in the ordinary course of business. In the opinion of management, the disposition of these matters will not have a material adverse effect on the Company's consolidated financial statements.

The Company is subject to the usual obligations associated with entering into contracts (including option contracts) for the purchase, development and sale of real estate, which it does in the routine conduct of its business. Option contracts generally enable the Company to control portions of properties owned by third parties (including land funds) and unconsolidated entities until the Company determines whether to exercise the option. The use of option contracts allows the Company to reduce the financial risks associated with long-term land holdings. At November 30, 2009, the Company had \$127.4 million of non-refundable option deposits and pre-acquisition costs related to certain of these homesites, which were included in inventories in the consolidated balance sheet.

The Company has entered into agreements to lease certain office facilities and equipment under operating leases. Future minimum payments under the non-cancelable leases in effect at November 30, 2009 are as follows:

	<u>Lease Payments</u> (In thousands)
2010	\$46,570
2011	35,271
2012	22,499
2013	15,332
2014	13,119
Thereafter	25,840

Rental expense for the years ended November 30, 2009, 2008 and 2007 was \$67.9 million, \$108.9 million and \$150.1 million, respectively.

Rental expense includes the following termination costs related to the abandonment of leases as a result of the Company's efforts to consolidate its operations and reduce costs in the following financial statement line items:

	<u>Years Ended November 30,</u>		
	<u>2009</u>	<u>2008</u>	<u>2007</u>
	(In thousands)		
Selling general and administrative expenses	\$6,170	18,830	12,305
Corporate, general and administrative expenses	1,786	2,401	—
Financial services costs and expenses	850	6,498	4,789
Total termination costs related to abandonment of leases	<u>\$8,806</u>	<u>27,729</u>	<u>17,094</u>

The Company is committed, under various letters of credit, to perform certain development and construction activities and provide certain guarantees in the normal course of business. Outstanding letters of credit under these arrangements totaled \$303.1 million at November 30, 2009. The Company also had outstanding performance and surety bonds related to site improvements at various projects (including certain projects in the Company's joint ventures) of \$821.2 million. Although significant development and construction activities have been completed related to these site improvements, these bonds are generally not released until all development and construction activities are completed. As of November 30, 2009, there were approximately \$324.4 million, or 40%, of costs to complete related to these site improvements. The Company does not presently anticipate any draws upon these bonds that would have a material effect on its consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

17. Supplemental Financial Information

The Company's obligations to pay principal, premium, if any, and interest under its Credit Facility, 5.125% senior notes due 2010, 5.95% senior notes due 2011, 5.95% senior notes due 2013, 5.50% senior notes due 2014, 5.60% senior notes due 2015, 6.50% senior notes due 2016 and 12.25% senior notes due 2017 are guaranteed by substantially all of the Company's subsidiaries. The guarantees are full and unconditional and the guarantor subsidiaries are 100% directly or indirectly owned by Lennar Corporation. The guarantees are joint and several, subject to limitations as to each guarantor designed to eliminate fraudulent conveyance concerns. Supplemental financial information for the guarantors is presented as follows:

Loss per share:				
Basic and diluted	\$ (0.56)	(0.76)	(0.56)	(5.12)

(1) Net earnings during the fourth quarter of 2009 include a reversal of the Company's deferred tax asset valuation allowance of \$351.8 million.

(2) Net loss during the fourth quarter of 2008 includes a \$730.8 million valuation allowance recorded against the Company's deferred tax assets.

Quarterly and year-to-date computations of per share amounts are made independently. Therefore, the sum of per share amounts for the quarters may not agree with per share amounts for the year.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

Not applicable.

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer participated in an evaluation by our management of the effectiveness of our disclosure controls and procedures as of the end of our fiscal quarter that ended on November 30, 2009. Based on their participation in that evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of November 30, 2009 to ensure that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and to ensure that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934 is accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosures.

Our CEO and CFO also participated in an evaluation by our management of any changes in our internal control over financial reporting that occurred during the quarter ended November 30, 2009. That evaluation did not identify any changes that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Annual Report on Internal Control Over Financial Reporting and the Report of Independent Registered Public Accounting Firm obtained from Deloitte & Touche LLP relating to the effectiveness of Lennar Corporation's internal control over financial reporting are included elsewhere in this document.

Item 9B. Other Information.

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

The information required by this item for executive officers is set forth under the heading “Executive Officers of Lennar Corporation” in Part I. The other information called for by this item is incorporated by reference to our definitive proxy statement, which will be filed with the Securities and Exchange Commission not later than March 30, 2010 (120 days after the end of our fiscal year).

Item 11. Executive Compensation.

The information required by this item is incorporated by reference to our definitive proxy statement, which will be filed with the Securities and Exchange Commission not later than March 30, 2010 (120 days after the end of our fiscal year).

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The information required by this item is incorporated by reference to our definitive proxy statement, which will be filed with the Securities and Exchange Commission not later than March 30, 2010 (120 days after the end of our fiscal year), except for the information required by Item 201(d) of Regulation S-K, which is provided below.

The following table summarizes our equity compensation plans as of November 30, 2009:

<u>Plan category</u>	<u>Number of shares to be issued upon exercise of outstanding options, warrants and rights (a)(1)</u>	<u>Weighted- average exercise price of outstanding options, warrants and rights (b)</u>	<u>Number of shares remaining available for future issuance under equity compensation plans (excluding shares reflected in column (a)) (c)(2)</u>
Equity compensation plans approved by stockholders	6,395,105	\$29.37	3,361,621
Equity compensation plans not approved by stockholders	—	—	—
Total	<u>6,395,105</u>	<u>\$29.37</u>	<u>3,361,621</u>

- (1) This amount includes approximately 31,100 shares of Class B common stock that may be issued under our equity compensation plans.
- (2) Both Class A and Class B common stock may be issued.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The information required by this item is incorporated by reference to our definitive proxy statement, which will be filed with the Securities and Exchange Commission not later than March 30, 2010 (120 days after the end of our fiscal year).

Item 14. Principal Accounting Fees and Services.

The information required by this item is incorporated by reference to our definitive proxy statement, which will be filed with the Securities and Exchange Commission not later than March 30, 2010 (120 days after the end of our fiscal year).

PART IV

Item 15. Exhibits and Financial Statement Schedules.

(a) Documents filed as part of this Report.

1. The following financial statements are contained in Item 8:

<u>Financial Statements</u>	<u>Page in this Report</u>
Report of Independent Registered Public Accounting Firm	65
Consolidated Balance Sheets as of November 30, 2009 and 2008	66

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Lennar Corporation

We have audited the consolidated financial statements of Lennar Corporation and subsidiaries (the "Company") as of November 30, 2009 and 2008, and for each of the three years in the period ended November 30, 2009, and the Company's internal control over financial reporting as of November 30, 2009, and have issued our reports thereon dated January 29, 2010; such consolidated financial statements and reports are included elsewhere in this Form 10-K. Our audits also included the consolidated financial statement schedule of the Company listed in Item 15. This consolidated financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion based on our audits. In our opinion, such consolidated financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

CHIEF EXECUTIVE OFFICER'S CERTIFICATION

I, Stuart A. Miller, certify that:

1. I have reviewed this annual report on Form 10-K of Lennar Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
