FOOT LOCKER, INC.

2009 ANNUAL REPORT DEFINING OUR STRATEGIC VISION

ABOUT THE COMPANY

Foot Locker, Inc. (NYSE: FL) is the world's leading retailer of athletically inspired footwear and apparel. Headquartered in New York City, it operates 3,500 athletic retail stores in 21 countries in North America, Europe and Australia under the brand names Foot Locker, Lady Foot Locker, Kids Foot Locker, Footaction, Champs Sports and CCS.

Additionally, the Company's Footlocker.com/Eastbay/CCS business operates a direct-to-customers business offering athletic footwear, apparel and equipment through its Internet and catalog channels.

LETTER TO SHAREHOLDERS

Our Company is positioned well to capitalize on business opportunities in the years ahead as we strive to increase shareholder value.

As this is the first letter that I am writing to you as Foot Locker, Inc.'s Chief Executive Officer, I thought it appropriate to share some of my initial thoughts about our Company, review our 2009 accomplishments and discuss our strategic priorities for the future.

I regard the opportunity to be Chairman of the Board, President and CEO of Foot Locker, Inc., a leading retailer of athletically inspired footwear and apparel in the global marketplace, as an honor and a privilege. Our management team is experienced and well qualified, and together we have identified a series of strategic initiatives to leverage our competitive strengths and drive our Company to reach new heights in sales and profitability over the long term. We are in the early stages of implementing this plan, and off to a good start.

Since joining our Company in August 2009, I have been very involved in the day-to-day operations of the business, gaining an understanding of our strengths and weaknesses, and working to position us for the future. I have visited many of our stores in U.S. and international markets, as well as most of our division offices and support facilities. It is clear to me that our associates worldwide are fully engaged in the operations of our business; take great pride in working for our Company; and, above all, possess a winning attitude that is vital to being successful in the retail industry. So, let me review what was accomplished in the past year...and what we are planning for the future.

2009 Scoreboard

Without a doubt, the difficult economic conditions in 2009 presented considerable challenges for most retailers. For us, the financial results of our U.S. businesses reflect the impact of weak consumer spending. At the same time, our results from our international businesses were far more encouraging, with strong year-over-year sales and profit increases in some key markets in Europe and in the Asia/Pacific region.

Reflecting these challenges, our worldwide sales for 2009 declined to \$4.9 billion from \$5.2 billion in 2008, with our comparable-store sales declining 6.3 percent. The Company's net income, on an adjusted basis, was \$0.54 per diluted share for the current year versus \$0.68 per diluted share last year. A complete compilation and reconciliation of our audited GAAP to non-GAAP adjusted results, accompanies this letter in the Form 10-K.

Expecting that 2009 would be a year marked by a weak consumer spending environment, we focused on implementing strategies designed to protect our profitability, remain financially strong and improve our competitive position. As the year turned out, management's approach of running the business cautiously was beneficial to the Company. Our cash flow generation was significant; we ended 2009 in a strong financial position and, we believe, improved our competitive situation in the marketplace. Let me highlight some of the proactive steps we took in 2009:

- To conserve cash, we reduced capital expenditures by 39 percent from prior year levels to \$89 million. Projects designed to enhance the customer experience, such as store remodels and relocations to more favorable locations in the malls, and upgrades to information systems and technology, were given top priority. As the year progressed, we also made a strategic decision to more aggressively close stores that were not projected to provide an acceptable return on our invested capital, resulting in 179 closures for the year.
- A second priority was to improve the productivity of our working capital by reducing our level of inventory. To accomplish this objective, our merchants worked closely with our suppliers to purchase merchandise closer to the selling season and our “quick response” replenishment program was expanded. We also conserved working capital by closing underproductive stores. As a result of implementing these initiatives successfully, our merchandise inventory at year end was reduced by 7.4 percent from the prior year.
- A third key objective was to reduce our operating expenses. Our long-established practice of encouraging our associates worldwide to identify and implement new ways to reduce our operating expenses was successful again in 2009. Our combined selling, general and administrative expenses and occupancy costs were reduced by approximately \$100 million versus 2008.

Before discussing our future prospects, I would like to recognize the achievements of my predecessor, Matthew D. Serra, who retired from Foot Locker, Inc. at the end of our 2009 fiscal year.

Under Matt’s leadership, Foot Locker, Inc. improved its position as a leading specialty retailer in the global athletic industry. Among his many accomplishments was bringing a disciplined approach to managing the business, including a focus on generating positive cash flow from operations on an annual basis. As a result of executing that strategy with success, the Company is in a strong financial position with the flexibility to compete more effectively now and into the future. On behalf of the Foot Locker, Inc. organization, our Board and shareholders, I thank Matt and wish him much happiness and good health in the years ahead.

Strategic Priorities for the Future

As we look ahead, we are fortunate to have a strong foundation and many high potential opportunities to grow both our sales and profits. We have an optimistic outlook for the future, which stems from the conclusions drawn by our senior management team during an extensive and analytical process we undertook over the past several months to understand thoroughly our position in the marketplace today and to develop our strategic priorities for the future. In doing this, we established

a clear strategic vision: **“Be the leading global retailer of athletically inspired shoes and apparel.”**

In the near term, we believe that we can achieve a higher level of sales and profits by enhancing the performance of our existing businesses. Our sales and profit growth over the longer term can be supplemented by strengthening and expanding our current brands and assortments, and by pursuing new business opportunities that are consistent with this strategic vision. Accordingly, the strategic priorities for our Company are:

- **Be the Power Merchandiser of athletic footwear and apparel with clearly-defined Brand Banners** – strengthening our position with the leading athletic brands, offering our customers a broader range of athletic footwear and apparel, and developing powerful marketing programs that inspire customers to shop and buy in our stores and through our websites.
- **Develop a compelling Apparel Assortment** – creating a more meaningful private label business, being a leader in the branded category and strengthening our in-store merchandising presentation.
- **Make our stores and Internet sites Exciting Places to shop and buy** – capitalizing on our strong customer service model, creating an exciting and consistent shopping environment, and making shopping easier and more seamless for our customers by connecting our channels.

- **Aggressively pursue Growth Opportunities** – developing on-line initiatives, expanding international operations, broadening our reach to a wider range of customer segments including, importantly, our women’s business, and exploring new business opportunities carefully.
- **Increase the Productivity of all of our assets** – enhancing the efficiency and effectiveness of our operations, rigorously managing our expenses, improving the timeliness of our merchandise flow and converting a higher percentage of consumers who visit our stores and Internet sites into loyal customers.
- **Build on our Industry Leading Retail Team** – attracting, developing and retaining the best people in retail for our stores and across our organization; creating and sustaining a sales-oriented and customer-focused organization by strengthening the selling and service skills of our associates.

Benchmarks of Success

Our strategic priorities were developed with an aim to enhance total shareholder value – defined as the price our stock commands in the marketplace plus the dividends paid to our shareholders. To measure, monitor and be held accountable for our progress toward that end, we established a set of financial objectives for the next five years.

- **Sales of \$6.0 billion**
- **Sales per gross square foot of \$400**
- **EBIT margin of 8 percent**
- **Net Income margin of 5 percent**
- **Return on Invested Capital of 10 percent**
- **Inventory Turnover of 3.0 times**

The achievement of these financial objectives will require us to reach beyond what the Company achieved during its most productive years of the past decade. We believe, however, that these objectives are realistic, but will require the organization to “stretch” itself to achieve them.

Conclusion: A Realistic Outlook

The past few years have been challenging times for retailers, requiring management to assess the impact of the external environment on their business prospects. Early on, as I mentioned, the management of Foot Locker, Inc. recognized that the global retail environment would be slowing and took appropriate actions to reduce costs, manage inventory levels more conservatively and close underproductive stores, in order to sustain positive cash flow from operations. As a result, Foot Locker, Inc.’s leading position in the athletic retail industry is intact and our balance sheet is strong, with substantial cash and short-term investments, and minimal debt, providing financial flexibility for the future.

As we enter 2010, there are encouraging signs that the overall economy is beginning to emerge from the recent recessionary period. I believe Foot Locker, Inc. is positioned well to capitalize on our business opportunities in the years ahead. Our new strategic plan is designed to result in a significant improvement in our sales and profit performance, to reach new heights and deliver increased shareholder value.

The hard work and insights of our associates throughout the organization have been integral to the Company’s past success and will continue to be critical for our future. To them, our dedicated directors who provide ongoing oversight and insight to the Company, as well as our valued suppliers, landlords and shareholders, we express our gratitude and look forward to our future with you.

Ken C. Hicks
Chairman of the Board,
President and Chief Executive Officer

STRATEGIC VISION

“Be the leading global retailer of athletically inspired shoes and apparel.”

STRATEGIC PRIORITIES

- Be the Power Merchandiser of athletic footwear and apparel with clearly-defined Brand Banners
- Make our stores and Internet sites Exciting Places to shop and buy
- Increase the Productivity of all of our assets
- Develop a compelling Apparel Assortment
- Aggressively pursue Growth Opportunities
- Build on our Industry Leading Retail Team

LONG-TERM FINANCIAL OBJECTIVES

- Sales of \$6.0 billion
- Net Income margin of 5 percent
- Sales per gross square foot of \$400
- Return on Invested Capital of 10 percent
- EBIT margin of 8 percent
- Inventory Turnover of 3.0 times

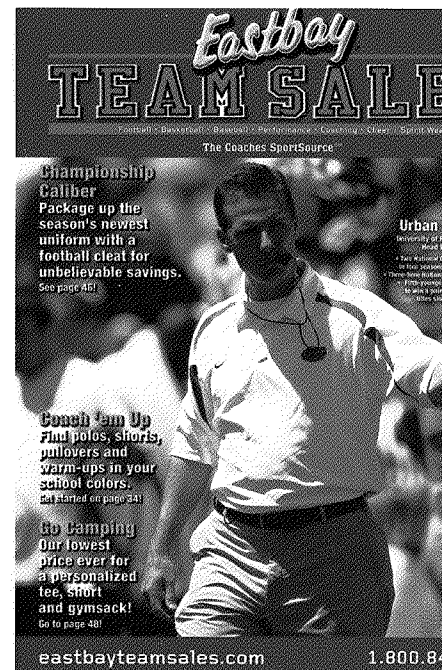

OUR BRANDS

LOYALTY PROGRAMS

In each of our brand banners we offer a customer loyalty program to reward our valued customers for shopping frequently in our stores and through our websites. Providing customers with a meaningful loyalty program is an important part of our strategy designed to develop our shopping channels further to be retail destinations of choice.

The strength of our brands is reflected in the loyalty of our customer base.

Highly Recognized and Well Respected Our store and Internet site brand banners are highly recognized and well respected in the global markets where we operate. The strength of our brand banners is reflected in the loyalty of our customer base – a consumer who looks to us first when seeking the latest in athletic footwear and apparel.

Focused on Differentiating We are focused on differentiating our brand banners through innovative marketing, customized merchandising programs and unique store environments that showcase the distinct styles that each carries. The successful implementation of this strategy will allow us to broaden our customer base while maintaining the loyalty of our existing customers.

House of Brands Each of our businesses uses a “house of brands” strategy – meaning that we merchandise our stores, websites and catalogs with athletic products manufactured by industry-leading suppliers with well-known brands to meet the demands and satisfy the needs of a particular customer segment. We also differentiate our brand banners from the competition by offering our customers an assortment of proprietary athletic apparel that we design and have manufactured to our specifications.

OUR MARKETS

Long-Established Track Record Our Company has a long-established track record of operating profitably in both United States and international markets, with 3,500 retail stores in 21 countries in North America, Europe and the Asia/Pacific region, in a range of formats. We enjoy considerable success operating stores in both urban and suburban markets, and in mall, strip center and street locations, depending on the shopping patterns within each country.

Industry-Leading Internet Sites and Catalogs Our reach to athletically inspired consumers is extended to markets through our industry-leading Internet sites and catalogs. We are on a path to expand our Internet business to international markets, by building on the existing model that we developed in the United Kingdom. Additionally, we plan to pursue new opportunities to improve shopping convenience for our customers by further coordinating our merchandise assortments between our stores and websites, and more seamlessly linking our customer service capabilities through each channel.

International Success Our proven success in international markets is somewhat unique for a U.S.-based specialty retailer and a competitive advantage. As we pursue a global expansion strategy in the years ahead, we will draw on our successful experiences to design tactical plans to be executed on a local level.

Our Company has a long-established track record of operating profitably in both United States and international markets.

OUR PARTNERS

Critical Stakeholders We highly regard the partnerships we have created with our customers, suppliers, service providers, landlords, associates and shareholders. Working together and maintaining strong relationships with each of these critical stakeholders in our business is important, as it allows each to prosper.

Working with Leaders In doing this, we strive to develop relationships with companies that are leaders in their respective industries – companies that can provide superior products and service at competitive prices. For example, the strength of our key merchandise suppliers, who consistently provide our business with innovative and fashion-right assortments, is critical to our ongoing success. Our business thrives on newness and the excitement it brings to our customers.

The Right Locations Operating our stores in the right locations is another important key to our success. This requires that we work closely with our landlords to secure the best available sites to operate profitably, both inside and outside the mall. Our strong relationships serve us well in this regard, as our stores are situated in the highest traffic, most productive retail sites in the U.S. and international markets where we operate.

OUR PEOPLE

An integral part of our culture is the collector – sneaker fiends who have a unique appreciation and love for the work they engage in every day.

Experienced Store Associates The continuing development of an industry-leading retail team is an important strategic priority for Foot Locker, Inc. Our associates worldwide remain a competitive strength including, very importantly, a talent base of experienced store associates who are dedicated to providing shoppers with superior customer service. We will build upon our strong foundation, as we continue to enhance the skills of our teams.

Work Environment that Provides Opportunities Our success over the long term is dependent on providing each of our associates with ongoing training and a work environment that provides opportunities and encourages our associates to build their careers with us. Our development strategy will be focused on programs designed to strengthen the selling and service skills of our associates.

Efficient and Effective Sales Support We also benefit from having a deep bench of management talent and experience at the operating level in each of our businesses. Additionally, our corporate staff provides efficient and effective sales support in sourcing, real estate, logistics, information systems and technology, human resources, marketing, legal and finance.

Taken together, there is great strength at all levels of our Company.

Our associates are a competitive strength for our Company.

CUSTOMER SERVICE

Our Company is well known in the marketplace for providing the consumer with best-in-class customer service. We are a full service retailer with store associates that are knowledgeable about the products that they sell and respectful in how they interact with our customers.

OUR COMMUNITY

Support the Communities in which we Live and Work

Beyond our commitment to achieving the Company's new financial objectives, we recognize our responsibility to support the communities in which we live and work. The Company started the Foot Locker Foundation, Inc. in 2001 to further its mission to support those in need.

During 2009, the Company provided support to several worthy organizations, including those that it has supported in prior years, such as the American Cancer Society and The Fred Jordan Mission. Foot Locker, Inc. also made a donation of both funds and merchandise to the Red Cross to be directed to people in need in Haiti. In 2010, Foot Locker Foundation, Inc. will host its 10th annual "On Our Feet" event to raise funds for the United Negro College Fund – as a leader in providing college scholarships to students attending a UNCF institution.

It is with great pride that we continue to be an active supporter of worthwhile causes and organizations that are meaningful to our customers, associates, suppliers and shareholders.

PART I

Item 1. Business

General

Foot Locker, Inc., incorporated under the laws of the State of New York in 1989, is a leading global retailer of athletic footwear and apparel, operating 3,500 primarily mall-based stores in the United States, Canada, Europe, Australia, and New Zealand as of January 30, 2010. Foot Locker, Inc. and its subsidiaries hereafter are referred to as the “Registrant,” “Company” or “we.” Information regarding the business is contained under the “Business Overview” section in “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

The Company maintains a website on the Internet at www.footlocker-inc.com. The Company’s filings with the Securities and Exchange Commission, including its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports are available free of charge through this website as soon as reasonably practicable after they are filed with or furnished to the SEC by clicking on the “SEC Filings” link. The Corporate Governance section of the Company’s corporate website contains the Company’s Corporate Governance Guidelines, Committee Charters, and the Company’s Code of Business Conduct for directors, officers and employees, including the Chief Executive Officer, Chief Financial Officer and Chief Accounting Officer. Copies of these documents may also be obtained free of charge upon written request to the Company’s Corporate Secretary at 112 West 34th Street, New York, NY 10120. The Company intends to promptly disclose amendments to the Code of Business Conduct and waivers of the Code for directors and executive officers on the Corporate Governance section of the Company’s corporate website.

Information Regarding Business Segments and Geographic Areas

The financial information concerning business segments, divisions and geographic areas is contained under the “Business Overview” and “Segment Information” sections in “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations.” Information regarding sales, operating results and identifiable assets of the Company by business segment and by geographic area is contained under the “Segment Information” note in “Item 8. Consolidated Financial Statements and Supplementary Data.”

The service marks and trademarks appearing on this page and elsewhere in this report (except for Alshaya Trading Co. W.L.L., and Northern Group) are owned by Foot Locker, Inc. or its subsidiaries.

Employees

The Company and its consolidated subsidiaries had 13,271 full-time and 25,493 part-time employees at January 30, 2010. The Company considers employee relations to be satisfactory.

Competition

Financial information concerning competition is contained under the “Business Risk” section in the “Financial Instruments and Risk Management” note in “Item 8. Consolidated Financial Statements and Supplementary Data.”

Merchandise Purchases

Financial information concerning merchandise purchases is contained under the “Liquidity” section in “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” and under the “Business Risk” section in the “Financial Instruments and Risk Management” note in “Item 8. Consolidated Financial Statements and Supplementary Data.”

Item 1A. Risk Factors

The statements contained in this Annual Report on Form 10-K (“Annual Report”) that are not historical facts, including, but not limited to, statements regarding our expected financial position, business and financing plans found in “Item 1. Business” and “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations,” constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Please also see “Disclosure Regarding Forward-Looking Statements.” Our actual results may differ materially due to the risks and uncertainties discussed in this Annual Report, including those discussed below. Additional risks and uncertainties that we do not presently know about or that we currently consider to be insignificant may also affect our business operations and financial performance.

The industry in which we operate is dependent upon fashion trends, customer preferences, and other fashion-related factors.

The athletic footwear and apparel industry is subject to changing fashion trends and customer preferences. We cannot guarantee that our merchandise selection will accurately reflect customer preferences when it is offered for sale or that we will be able to identify and respond quickly to fashion changes, particularly given the long lead times for ordering much of our merchandise from vendors. A substantial portion of our highest margin sales are to young males (ages 12–25), many of whom we believe purchase athletic footwear and licensed apparel as a fashion statement and are frequent purchasers of athletic footwear. Any shift in fashion trends that would make athletic footwear or licensed apparel less attractive to these customers could have a material adverse effect on our business, financial condition, and results of operations.

If we do not successfully manage our inventory levels, our operating results will be adversely affected.

We must maintain sufficient inventory levels to operate our business successfully. However, we also must guard against accumulating excess inventory. For example, we order the bulk of our athletic footwear four to six months prior to delivery to our stores. If we fail to anticipate accurately either the market for the merchandise in our stores or our customers’ purchasing habits, we may be forced to rely on markdowns or promotional sales to dispose of excess or slow moving inventory, which could have a material adverse effect on our business, financial condition, and results of operations.

The businesses in which we operate are highly competitive.

The retail athletic footwear and apparel business is highly competitive with relatively low barriers to entry. Our athletic footwear and apparel operations compete primarily with athletic footwear specialty stores, sporting goods stores and superstores, department stores, discount stores, traditional shoe stores, and mass merchandisers, many of which are units of national or regional chains that have significant financial and marketing resources. The principal competitive factors in our markets are price, quality, selection of merchandise, reputation, store location, advertising, and customer service. Our success also depends on our ability to differentiate ourselves from our competitors with respect to shopping convenience, a quality assortment of available merchandise and superior customer service. We cannot assure you that we will continue to be able to compete successfully against existing or future competitors. Our expansion into markets served by our competitors and entry of new competitors or expansion of existing competitors into our markets could have a material adverse effect on our business, financial condition, and results of operations.

Although we sell merchandise via the Internet, a significant shift in customer buying patterns to purchasing athletic footwear, athletic apparel, and sporting goods via the Internet could have a material adverse effect on our business results.

In addition, all of our significant vendors distribute products directly through the Internet and others may follow. Some vendors operate retail stores and some have indicated that further retail stores will open. Should this continue to occur, and if our customers decide to purchase directly from our vendors, it could have a material adverse effect on our business, financial condition, and results of operations.

We depend on mall traffic and our ability to identify suitable store locations.

Our sales, particularly in the United States and Canada, are dependent in part on the volume of mall traffic. Our stores in these countries are located primarily in enclosed regional and neighborhood malls. Mall traffic may be adversely affected by, among other things, economic downturns, the closing of anchor department stores, changes in customer preferences or acts of terrorism. A decline in the popularity of mall shopping among our target customers could have a material adverse effect on us.

To take advantage of customer traffic and the shopping preferences of our customers, we need to maintain or acquire stores in desirable locations such as in regional and neighborhood malls anchored by major department stores. We cannot be certain that desirable mall locations will continue to be available. Several large landlords dominate the ownership of prime malls, particularly in the United States, and because of our dependence upon these landlords for a substantial number of our locations, any significant erosion of our relationships with these landlords or their financial condition would negatively affect our ability to obtain and retain store locations. Additionally, further landlord consolidation may negatively affect our ability to negotiate favorable lease terms.

The effects of natural disasters, terrorism, acts of war, and public health issues may adversely affect our business.

Natural disasters, including earthquakes, hurricanes, floods, and tornados may affect store and distribution center operations. In addition, acts of terrorism, acts of war, and military action both in the United States and abroad can have a significant effect on economic conditions and may negatively affect our ability to purchase merchandise from vendors for sale to our customers. Public health issues, such as flu or other pandemics, whether occurring in the United States or abroad, could disrupt our operations and result in a significant part of our workforce being unable to operate or maintain our infrastructure or perform other tasks necessary to conduct our business. Additionally, public health issues may disrupt the operations of our suppliers, our operations, or our customers, or have an adverse affect on customer demand. We may be required to suspend operations in some or all of our locations, which could have a material adverse effect on our business, financial condition, and results of operations. Any significant declines in public safety concerns or uncertainties regarding future economic prospects that affect customer spending habits could have a material adverse effect on customer purchases of our products.

A change in the relationship with any of our key vendors or the unavailability of our key products at competitive prices could affect our financial health.

Our business is dependent to a significant degree upon our ability to purchase brand-name merchandise at competitive prices, including the receipt of volume discounts, cooperative advertising, and markdown allowances from our vendors, as well as our ability to negotiate returns of excess or unneeded merchandise. The Company purchased approximately 82 percent of its merchandise in 2009 from its top five vendors and expects to continue to obtain a significant percentage of its athletic product from these vendors in future periods. Approximately 68 percent was purchased from one vendor — Nike, Inc. (“Nike”). Each of our operating divisions is highly dependent on Nike; they individually purchase 46 to 85 percent of their merchandise from Nike. Our inability to obtain merchandise in a timely manner from major suppliers (particularly Nike) as a result of business decisions by our suppliers or any disruption in the supply chain could have a material adverse effect on our business, financial condition, and results of operations. Because of our strong dependence on Nike, any adverse development in Nike’s financial condition or results of operations or the inability of Nike to develop and manufacture products that appeal to our target customers could also have an adverse effect on our business, financial condition, and results of operations. We cannot be certain that we will be able to acquire merchandise at competitive prices or on competitive terms in the future.

Merchandise that is high profile and in high demand is allocated by our vendors based upon their internal criteria. Although we have generally been able to purchase sufficient quantities of this merchandise in the past, we cannot be certain that our vendors will continue to allocate sufficient amounts of such merchandise to us in the future. In addition, our vendors provide support to us through cooperative advertising allowances and promotional events. We cannot be certain that such assistance from our vendors will continue in the future. These risks could have a material adverse effect on our business, financial condition, and results of operations.

Significant increases in costs associated with the production of promotional materials may adversely affect our operating income.

In the businesses in our Direct-to-Customers segment, we advertise and promote our merchandise through print catalogs and other promotional materials mailed to consumers or displayed in our stores. As a result, significant increases in paper, printing, and postage costs could increase the cost of producing promotional and other materials and, as a result, may have a material adverse effect on our operating income.

We may experience fluctuations in and cyclicity of our comparable-store sales results.

Our comparable-store sales have fluctuated significantly in the past, on both an annual and a quarterly basis, and we expect them to continue to fluctuate in the future. A variety of factors affect our comparable-store sales results, including, among others, fashion trends, the highly competitive retail store sales environment, economic conditions, timing of promotional events, changes in our merchandise mix, calendar shifts of holiday periods, and weather conditions.

Many of our products, particularly high-end athletic footwear and licensed apparel, represent discretionary purchases. Accordingly, customer demand for these products could decline in a recession or if our customers develop other priorities for their discretionary spending. These risks could have a material adverse effect on our business, financial condition, and results of operations.

Legislative or regulatory initiatives related to global warming/climate change concerns may negatively affect our business.

There has been an increasing focus and continuous debate on global climate change recently, including increased attention from regulatory agencies and legislative bodies globally. This increased focus may lead to new initiatives directed at regulating an as yet unspecified array of environmental matters. Legislative, regulatory or other efforts in the United States to combat climate change could result in future increases in taxes or in the cost of transportation and utilities, which could decrease our operating profits and could necessitate future additional investments in facilities and equipment. We are unable to predict the potential effects that any such future environmental initiatives may have on our business.

Our operations may be adversely affected by economic or political conditions in other countries.

A significant portion of our sales and operating income for 2009 were attributable to our sales in Europe, Canada, New Zealand, and Australia. As a result, our business is subject to the risks associated with doing business outside of the United States, such as foreign governmental regulations, compliance with U.S. governmental regulations applicable to operations outside of the United States (such as the Foreign Corrupt Practices Act), foreign customer preferences, political unrest, disruptions or delays in shipments, and changes in economic conditions in countries in which we operate. Although we enter into forward foreign exchange contracts and option contracts to reduce the effect of foreign currency exchange rate fluctuations, our operations may be adversely affected by significant changes in the value of the U.S. dollar as it relates to certain foreign currencies.

In addition, because we and our suppliers have a substantial amount of our products manufactured in foreign countries, our ability to obtain sufficient quantities of merchandise on favorable terms may be affected by governmental regulations, trade restrictions, and economic, labor, and other conditions in the countries from which our suppliers obtain their product.

The current global economic conditions have adversely affected, and may continue to adversely affect our business and results of operations.

The Company's performance is subject to global economic conditions and the related impact on consumer spending levels, which have declined recently due to the current economic slowdown. Some of the factors affecting consumer spending are employment, levels of consumer debt, reductions in net worth as a result of market declines, residential real estate and mortgage markets, taxation, fuel and energy prices, interest rates, and consumer confidence, as well as other macroeconomic factors. Consumer purchases of discretionary items, including merchandise we sell, generally decline during recessionary periods and other periods where disposable income is adversely affected and customers may be hesitant to use available credit. The downturn in the global economy may continue to affect customer purchases for the foreseeable future and may adversely impact our business, financial condition and results of operations. In addition, declines in our profitability could result in a charge to earnings for the impairment of long-lived assets, goodwill and other intangible assets, which would not affect our cash flow but could decrease our earnings, and our stock price could be adversely affected.

Instability in the financial markets may adversely affect our business.

The distress in the financial markets over the past 12–18 months has resulted in volatility in security prices and diminished liquidity and credit availability. There can be no assurance that our liquidity will not be affected by changes in the financial markets and the global economy. Although we currently do not have any borrowings under our revolving credit facility (other than amounts used for standby letters of credit), tightening of credit markets could make it more difficult for us to access funds, refinance our existing indebtedness, enter into agreements for new indebtedness or obtain funding through the issuance of the Company's securities. Additionally, our borrowing costs can be affected by independent rating agencies' ratings, which are based largely on our performance as measured by credit metrics, including lease-adjusted leverage ratios. As of November 23, 2009, our credit rating from Standard & Poor's was reduced to B+. This decrease would likely increase our cost of borrowing and make it more difficult for us to obtain credit.

In addition, instability in the financial markets may have a negative affect on businesses around the world, and the impact on our major suppliers cannot be predicted. The Company relies on a few key vendors for a majority of its merchandise purchases (including a significant portion from one key vendor). The inability of key suppliers to access liquidity, or the insolvency of key suppliers, could lead to their failure to deliver our merchandise. Our inability to obtain merchandise in a timely manner from major suppliers could have a material adverse effect on our business, financial condition, and results of operations.

If our long-lived assets, goodwill or other intangible assets become impaired, we may need to record significant non-cash impairment charges.

We review our long-lived assets, goodwill and other intangible assets when events indicate that the carrying value of such assets may be impaired. Goodwill and other indefinite lived intangible assets are reviewed for impairment if impairment indicators arise and, at a minimum, annually. We determine fair value based on a combination of a discounted cash flow approach and market-based approach. If an impairment trigger is identified, the carrying value is compared to its estimated fair value and provisions for impairment are recorded as appropriate. Impairment losses are significantly affected by estimates of future operating cash flows and estimates of fair value. Our estimates of future operating cash flows are identified from our three-year plans, which are based upon our experience, knowledge and expectations; however, these estimates can be affected by such factors as our future operating results, future store profitability, and future economic conditions, all of which can be difficult to predict. Similar to others in our industry, the recent macroeconomic conditions have affected our performance and it is difficult to predict how long these economic conditions will continue and which aspects of our business may be adversely affected. The continuation of these conditions could affect the fair value of our long-lived assets, goodwill and other intangible assets and could result in future impairment charges, which would adversely affect our results of operations.

Material changes in the market value of the securities we hold may adversely affect our results of operations and financial condition.

At January 30, 2010, our cash, cash equivalents and short-term investments totaled \$589 million. The majority of our investments were short-term deposits in highly-rated banking institutions. We regularly monitor our counterparty credit risk and mitigate our exposure by making short-term investments only in highly-rated institutions and by limiting the amount we invest in any one institution. The Company continually monitors the creditworthiness of its counterparties. At January 30, 2010, most of the investments were in institutions rated A or better from a major credit rating agency. Despite those ratings, it is possible that the value or liquidity of our investments may decline due to any number of factors, including general market conditions and bank-specific credit issues.

The trust which holds the assets of our U.S. pension plan has assets totaling \$465 million at January 30, 2010. The fair values of these assets held in the trust are compared to the plan's projected benefit obligation to determine the pension funding liability. We attempt to mitigate risk through diversification, and we regularly monitor investment risk on our portfolio through quarterly investment portfolio reviews and periodic asset and liability studies. Despite these measures, it is possible that the value of our portfolio may decline in the future due to any number of factors, including general market conditions and credit issues. Such declines could have an impact on the funded status of our pension plans and future funding requirements.

Complications in our distribution centers and other factors affecting the distribution of merchandise may affect our business.

We operate four distribution centers worldwide to support our businesses. In addition to the distribution centers that we operate, we have third-party arrangements to support our operations in the U.S., Canada, Australia and New Zealand. If complications arise with any facility or any facility is severely damaged or destroyed, the Company's other distribution centers may not be able to support the resulting additional distribution demands. This may adversely affect our ability to deliver inventory on a timely basis. We depend upon UPS for shipment of a significant amount of merchandise. An interruption in service by UPS for any reason could cause temporary disruptions in our business, a loss of sales and profits, and other material adverse effects.

Our freight cost is affected by changes in fuel prices through surcharges. Increases in fuel prices and surcharges and other factors may increase freight costs and thereby increase our cost of sales. We enter into diesel fuel forward and option contracts to mitigate a portion of the risk associated with the variability caused by these surcharges.

A major failure of our information systems could harm our business.

We depend on information systems to process transactions, manage inventory, operate our websites, purchase, sell and ship goods on a timely basis, and maintain cost-efficient operations. Any material disruption or slowdown of our systems could cause information to be lost or delayed, which could have a negative effect on our business. We may experience operational problems with our information systems as a result of system failures, viruses, computer "hackers" or other causes. We cannot be assured that our systems will be adequate to support future growth.

Risks associated with Internet operations.

Our Internet operations are subject to numerous risks, including risks related to the failure of the computer systems that operate our websites and their related support systems, including computer viruses, telecommunications failures and similar disruptions. Also, we may require additional capital in the future to sustain or grow our online commerce.

Business risks related to online commerce include risks associated with the need to keep pace with rapid technological change, Internet security risks, risks of system failure or inadequacy, governmental regulation and legal uncertainties with respect to the Internet, and collection of sales or other taxes by additional states or foreign jurisdictions. If any of these risks materializes, it could have a material adverse effect on the Company's business.

Unauthorized disclosure of sensitive or confidential customer information, whether through a breach of the Company's computer systems or otherwise, could severely harm our business.

As part of the Company's normal course of business, it collects, processes, and retains sensitive and confidential customer information. Despite the security measures the Company has in place, its facilities and systems may be vulnerable to security breaches, acts of vandalism, computer viruses, misplaced or lost data, programming and/or human error, or other similar events. Any security breach involving the misappropriation, loss or other unauthorized disclosure of confidential information by the Company could severely damage its reputation, expose it to the risks of litigation and liability, disrupt its operations and harm its business.

Our reliance on key management, store and field associates.

Future performance will depend upon our ability to attract, retain, and motivate our executive and senior management team, as well as store personnel and field management. Our success depends to a significant extent both upon the continued services of our current executive and senior management team, as well as our ability to attract, hire, motivate, and retain additional qualified management in the future. Competition for key executives in the retail industry is intense, and our operations could be adversely affected if we cannot attract and retain qualified associates. Many of the store and field associates are in entry level or part-time positions with historically high rates of turnover. Our ability to meet our labor needs while controlling costs is subject to external factors such as unemployment levels, prevailing wage rates, minimum wage legislation, and changing demographics. If we are unable to attract and retain quality associates, our ability to meet our growth goals or to sustain expected levels of profitability may be compromised. In addition, a large number of our retail employees are paid the prevailing minimum wage, which if increased would negatively affect our profitability.

We face risks arising from possible union legislation in the United States.

There is a possibility that the proposed Employee Free Choice Act, ("EFCA") or similar legislation or regulations may be enacted. EFCA, also referred to as the "card check" bill, if passed in its current form could significantly change the nature of labor relations in the United States, specifically, how union elections and contract negotiations are conducted. It would be easier for unions to win elections and we could face arbitrator-imposed labor scheduling, costs and standards. Therefore, EFCA could impose more labor relations requirements and union activity on our business, thereby potentially increasing our costs, and could have a material adverse effect on our overall competitive position.

Failure to fully comply with Section 404 of the Sarbanes-Oxley Act of 2002 could negatively affect our business, the price of our common stock and market confidence in our reported financial information.

We must continue to document, test, monitor, and enhance our internal controls over financial reporting in order to satisfy all of the requirements of Section 404 of the Sarbanes-Oxley Act of 2002. We cannot be assured that our disclosure controls and procedures and our internal controls over financial reporting required under Section 404 of the Sarbanes-Oxley Act will prove to be completely adequate in the future. Failure to fully comply with Section 404 of the Sarbanes-Oxley Act of 2002 could negatively affect our business, the price of our common stock and market confidence in our reported financial information.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The properties of the Company and its consolidated subsidiaries consist of land, leased and owned stores, and administrative and distribution facilities. Gross square footage and total selling area for the Athletic Stores segment at the end of 2009 were approximately 12.96 and 7.74 million square feet, respectively. These properties, which are primarily leased, are located in the United States, Canada, various European countries, Australia, and New Zealand.

The Company currently operates four distribution centers, of which two are owned and two are leased, occupying an aggregate of 2.46 million square feet. Three of the four distribution centers are located in the United States and one is in the Netherlands.

Item 3. Legal Proceedings

Information regarding the Company's legal proceedings is contained in the "Legal Proceedings" note under "Item 8. Consolidated Financial Statements and Supplementary Data."

Item 4. Reserved

Executive Officers of the Registrant

Information with respect to Executive Officers of the Company, as of March 29, 2010, is set forth below:

Chairman of the Board, President and Chief Executive Officer	Ken C. Hicks
President and Chief Executive Officer — Foot Locker, Inc. — International	Ronald J. Halls
President and Chief Executive Officer — Foot Locker U.S., Lady Foot Locker, Kids Foot Locker and Footaction	Richard A. Johnson
Executive Vice President and Chief Financial Officer	Robert W. McHugh
Senior Vice President, General Counsel and Secretary	Gary M. Bahler
Senior Vice President — Real Estate	Jeffrey L. Berk
Senior Vice President, Chief Information Officer and Investor Relations	Peter D. Brown
Senior Vice President and Chief Accounting Officer	Giovanna Cipriano
Senior Vice President — Strategic Planning	Lauren B. Peters
Senior Vice President — Human Resources	Laurie J. Petrucci
Vice President and Treasurer	John A. Maurer

Ken C. Hicks, age 57, has served as Chairman of the Board since January 31, 2010 and President and Chief Executive Officer since August 17, 2009. Mr. Hicks served as President and Chief Merchandising Officer of J.C. Penney Company, Inc. ("JC Penney") from 2005 through 2009. He was President and Chief Operating Officer of Stores and Merchandise Operations of JC Penney from 2002 through 2004, and he served as President of Payless ShoeSource, Inc. from 1999 to 2002. Mr. Hicks is also a director of Avery Dennison Corporation.

Ronald J. Halls, age 56, has served as President and Chief Executive Officer of Foot Locker, Inc. — International since October 2006. He served as President and Chief Executive Officer of Champs Sports, an operating division of the Company, from February 2003 to October 2006 and as Chief Operating Officer of Champs Sports from February 2000 to February 2003.

Richard A. Johnson, age 52, has served as President and Chief Executive Officer of Foot Locker U.S., Lady Foot Locker, Kids Foot Locker and Footaction since January 2010. He served as President and Chief Executive Officer of Foot Locker Europe, an operating division of the Company, from August 2007 to January 2010; President and Chief Executive Officer of Footlocker.com/Eastbay, an operating division of the Company, from April 2003 to August 2007 and President and Chief Operating Officer of Footlocker.com/Eastbay from July 2000 to April 2003.

Robert W. McHugh, age 51, has served as Executive Vice President and Chief Financial Officer since May 2009. He served as Senior Vice President and Chief Financial Officer from November 2005 through April 2009. He served as Vice President and Chief Accounting Officer from January 2000 to November 2005.

Gary M. Bahler, age 58, has served as Senior Vice President since August 1998, General Counsel since February 1993 and Secretary since February 1990.

Jeffrey L. Berk, age 54, has served as Senior Vice President — Real Estate since February 2000.

Peter D. Brown, age 55, has served as Senior Vice President, Chief Information Officer and Investor Relations since September 2006; and as Vice President — Investor Relations and Treasurer from October 2001 to September 2006.

Giovanna Cipriano, age 40, has served as Senior Vice President and Chief Accounting Officer since May 2009. She served as Vice President and Chief Accounting Officer from November 2005 through April 2009. She served as Divisional Vice President, Financial Controller from June 2002 to November 2005.

Lauren B. Peters, age 48, has served as Senior Vice President — Strategic Planning since April 2002. Ms. Peters served as Vice President — Planning from January 2000 to April 2002.

Laurie J. Petrucci, age 51, has served as Senior Vice President — Human Resources since May 2001.

John A. Maurer, age 50, has served as Vice President and Treasurer since September 2006. Mr. Maurer served as Divisional Vice President and Assistant Treasurer from April 2006 to September 2006 and as Assistant Treasurer from April 2002 to April 2006.

There are no family relationships among the executive officers or directors of the Company.

PART II

Item 5. Market for the Company's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

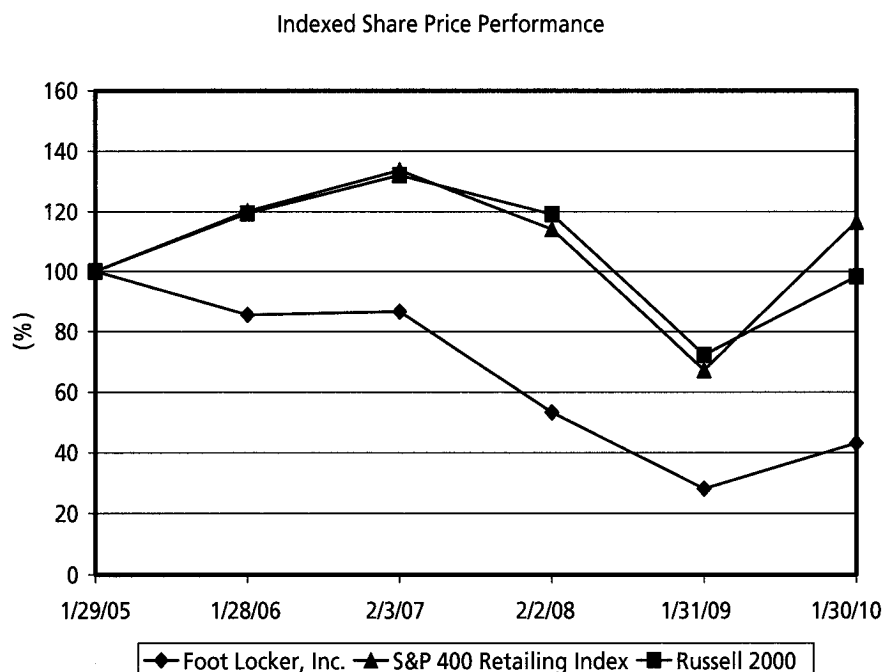

Information regarding the Company's market for stock exchange listings, common equity, quarterly high and low prices, and dividend policy are contained in the "Shareholder Information and Market Price" note under "Item 8. Consolidated Financial Statements and Supplementary Data." On February 16, 2010, the Company's Board of Directors approved the extension of the Company's 2007 common share repurchase program for an additional three years in the amount of \$250 million.

Item 6. Selected Financial Data

Selected financial data is included in the "Five Year Summary of Selected Financial Data" note in "Item 8. Consolidated Financial Statements and Supplementary Data."

Performance Graph

The following graph compares the cumulative five-year total return to shareholders on Foot Locker, Inc.'s common stock relative to the total returns of the S&P 400 Retailing Index and the Russell 2000 Index.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Business Overview

Foot Locker, Inc., through its subsidiaries, operates in two reportable segments — Athletic Stores and Direct-to-Customers. The Athletic Stores segment is one of the largest athletic footwear and apparel retailers in the world, whose formats include Foot Locker, Lady Foot Locker, Kids Foot Locker, Champs Sports, Footaction, and CCS. The Direct-to-Customers segment reflects CCS and Footlocker.com, Inc., which sells, through its affiliates, including Eastbay, Inc., to customers through catalogs and Internet websites.

The Foot Locker brand is one of the most widely recognized names in the market segments in which the Company operates, epitomizing high quality for the active lifestyle customer. This brand equity has aided the Company's ability to successfully develop and increase its portfolio of complementary retail store formats, specifically Lady Foot Locker and Kids Foot Locker, as well as Footlocker.com, Inc., its direct-to-customers business. Through various marketing channels, including television campaigns and sponsorships of various sporting events, Foot Locker, Inc. reinforces its image with a consistent message; namely, that it is the destination store for athletically inspired shoes and apparel with a wide selection of merchandise in a full-service environment.

Athletic Stores

The Company operates 3,500 stores in the Athletic Stores segment. The following is a brief description of the Athletic Stores segment's operating businesses:

Foot Locker — Foot Locker is a leading global athletic footwear and apparel retailer. Its stores offer the latest in athletic-inspired performance products, manufactured primarily by the leading athletic brands. Foot Locker offers products for a wide variety of activities including basketball, running, and training. Its 1,911 stores are located in 21 countries including 1,171 in the United States, Puerto Rico, the U.S. Virgin Islands, and Guam, 129 in Canada, 518 in Europe, and a combined 93 in Australia and New Zealand. The domestic stores have an average of 2,400 selling square feet and the international stores have an average of 1,500 selling square feet.

Lady Foot Locker — Lady Foot Locker is a leading U.S. retailer of athletic footwear, apparel and accessories for active women. Its stores carry major athletic footwear and apparel brands, as well as casual wear and an assortment of apparel designed for a variety of activities, including running, walking, toning, and fitness. Its 415 stores are located in the United States, Puerto Rico, the U.S. Virgin Islands, and Guam, and have an average of 1,300 selling square feet.

Kids Foot Locker — Kids Foot Locker is a national children's athletic retailer that offers the largest selection of brand-name athletic footwear, apparel and accessories for children. Its stores feature an environment geared to appeal to both parents and children. Its 301 stores are located in the United States, Puerto Rico and the U.S. Virgin Islands and have an average of 1,400 selling square feet.

Champs Sports — Champs Sports is one of the largest mall-based specialty athletic footwear and apparel retailers in North America. Its product categories include athletic footwear, apparel and accessories, and a focused assortment of equipment. This combination allows Champs Sports to differentiate itself from other mall-based stores by presenting complete product assortments in a select number of sporting activities. Its 552 stores are located throughout the United States, Canada, Puerto Rico, and the U.S. Virgin Islands. The Champs Sports stores have an average of 3,500 selling square feet.

Footaction — Footaction is a national athletic footwear and apparel retailer. The primary customers are young males that seek street-inspired athletic styles. Its 319 stores are located throughout the United States and Puerto Rico and focus on marquee footwear and branded apparel. The Footaction stores have an average of 2,900 selling square feet.

CCS — CCS serves the needs of the 12-18 year old skater while maintaining credibility with core skaters of all ages. During 2009, the Company opened two stores under the banner of CCS. This format complements the CCS catalog and internet business, which was acquired in November 2008. The two stores are located in New Jersey and California and average 2,000 selling square feet.

Store Profile

	<u>At</u> <u>January 31, 2009</u>	<u>Opened</u>	<u>Closed</u>	<u>At</u> <u>January 30, 2010</u>
Foot Locker	1,950	24	63	1,911

Footaction	335	—	16	319
Lady Foot Locker	486	1	72	415
Kids Foot Locker	305	6	10	301
CCS	—	2	—	2
Total Athletic Stores	<u>3,641</u>	<u>38</u>	<u>179</u>	<u>3,500</u>

Direct-to-Customers

The Company's direct-to-customers segment is multi-branded and multi-channeled. This segment sells, through its affiliates, directly to customers through catalogs and its Internet websites. Eastbay, one of the affiliates, is among the largest direct marketers in the United States, providing the high school athlete with a complete sports solution including athletic footwear, apparel, equipment, team licensed, and private-label merchandise. In 2008, the Company purchased CCS, an Internet and catalog retailer of skateboard equipment, apparel, footwear, and accessories targeted primarily to teenaged boys. The retail store operations of CCS are included in the Athletic Stores segment. This segment also operates websites aligned with the brand names of its store banners (*footlocker.com*, *ladyfootlocker.com*, *kidsfootlocker.com*, *footaction.com*, *champsports.com*, and *ccs.com*).

Franchise Operations

In March of 2006, the Company entered into a ten-year area development agreement with the Alshaya Trading Co. W.L.L., in which the Company agreed to enter into separate license agreements for the operation of Foot Locker stores, subject to certain restrictions, located within the Middle East. Additionally, in March 2007, the Company entered into a ten-year agreement with another third party for the exclusive right to open and operate Foot Locker stores in the Republic of Korea. A total of 22 franchised stores were operating at January 30, 2010. Revenue from the franchised stores was not significant for any of the periods presented. These stores are not included in the Company's operating store count above.

Overview of Consolidated Results

The challenging environment experienced in 2008 continued into 2009 as unemployment levels continued to rise and consumer confidence dropped further, which resulted in a decline in consumer spending. The Company's domestic operations were negatively affected; however, our international operations remained stable. We began the year with inventory levels in line with sales, which allowed us to reduce the level of promotional markdowns. The Company reported net income from continuing operations of \$47 million or \$0.30 per share for the year ended January 30, 2010, which compares with a loss of \$79 million or \$0.52 per share for the year ended January 31, 2009. Several factors affect the comparability of these two years, specifically:

- Impairment and other charges, before tax, totaled \$41 million and \$259 million in 2009 and 2008, respectively.
 - Impairment charges of \$32 million were recorded in 2009 to reflect the impairment of store long-lived assets, such as store fixtures and leasehold improvements, at the Company's Lady Foot Locker, Kids Foot Locker, Footaction, and Champs Sports divisions for 787 stores.
 - A charge of \$4 million was recorded in 2009 to write off certain software development costs for the Direct-to-Customers segment as a result of management's decision to terminate this project.
 - A charge of \$5 million was recorded in January 2010, to consolidate the Company's Foot Locker, Lady Foot Locker, Kids Foot Locker and Footaction operations under one management structure, as well as certain corporate staff reductions taken to improve corporate efficiency.
- As the Company began its transition to a new apparel strategy, which requires that the inventory be seasonally relevant and current, the Company recorded in 2009, within cost of sales, a \$14 million inventory reserve for certain aged apparel.
- Also included in 2009 are Canadian provincial tax rate changes that resulted in a \$4 million reduction in the value of the Company's net deferred tax assets.

The following table provides a reconciliation of reported GAAP results to income from continuing operations excluding impairment charges, the inventory reserve, Canadian tax rate changes, reorganization costs, store closing program costs, and the income tax valuation adjustment in 2007, which is considered a non-GAAP financial measure. The Company believes this information is a useful measure to investors because it allows for a more direct comparison of the Company's performance for the year with the Company's performance in prior periods.

	<u>2009</u>	<u>2008</u>	<u>2007</u>
		(in millions)	
Income (loss) from continuing operations – GAAP	\$ 47	\$ (79)	\$ 43
Impairment charges, after-tax:			
Store long-lived assets	22	41	78
Goodwill and other intangibles	—	123	—
Northern Group note	—	15	—
Money-market fund	—	3	—
Total impairment charges	<u>22</u>	<u>182</u>	<u>78</u>
Inventory reserve, after tax ⁽¹⁾	9	—	—
Canadian tax rate changes	4	—	—
Reorganization costs, after tax	3	—	—
Store closing program costs, after-tax	—	3	3
Canadian valuation allowance adjustment	—	—	(62)
Income from continuing operations – Non-GAAP	<u>\$ 85</u>	<u>\$ 106</u>	<u>\$ 62</u>
Diluted earnings per share:			
Income (loss) from continuing operations – GAAP	\$0.30	\$(0.52)	\$ 0.28
Total impairment charges	0.14	1.18	0.50
Inventory reserve	0.06	—	—
Canadian tax rate changes	0.02	—	—
Reorganization costs	0.02	—	—
Store closing program costs	—	0.02	0.02
Canadian valuation allowance adjustment	—	—	(0.40)
Income from continuing operations – Non-GAAP	<u>\$0.54</u>	<u>\$ 0.68</u>	<u>\$ 0.40</u>

(1) The \$14 million inventory reserve pre-tax charge is included in cost of sales.

Other highlights of the year:

- Cash, cash equivalents and short-term investments at January 30, 2010 were \$589 million.
- Cash flow provided by operations was \$346 million, which includes qualified pension contributions totaling \$100 million, thereby improving the funded status of the qualified plans to 87 percent in 2009 as compared with 72 percent in 2008.
- Merchandise inventories at January 30, 2010 were \$1,037 million, which represents a reduction of \$83 million from the corresponding prior-year period. Excluding the effect of foreign currency fluctuations, inventories declined by approximately 10 percent.
- Dividends totaling \$94 million were declared and paid.
- The Company closed 179 underproductive stores, most of which were at lease expiration.

The following table represents a summary of sales and operating results, reconciled to income (loss) from continuing operations before income taxes.

	2009	2008	2007
	(in millions)		
Sales			
Athletic Stores	\$4,448	\$4,847	\$5,071
Direct-to-Customers	406	390	364
Family Footwear	—	—	2
	<u>\$4,854</u>	<u>\$5,237</u>	<u>\$5,437</u>
Operating Results			
Athletic Stores ⁽¹⁾	\$ 114	\$ (59)	\$ (27)

Income (loss) from continuing operations before income taxes .	<u>\$ 73</u>	<u>\$ (100)</u>	<u>\$ (50)</u>

- (1) The year ended January 30, 2010 includes non-cash impairment charges totaling \$32 million, which were recorded to write-down long-lived assets such as store fixtures and leasehold improvements at the Company's Lady Foot Locker, Kids Foot Locker, Footaction, and Champs Sports divisions. The year ended January 31, 2009 includes a \$241 million charge representing long-lived store asset impairment, goodwill and other intangibles impairment and store closing costs related to the Company's U.S. operations. The year ended February 2, 2008 includes a \$128 million charge representing impairment and store closing costs related to the Company's U.S. operations.
- (2) Included in the results for the year ended January 30, 2010 is a non-cash impairment charge of \$4 million to write off software development costs.
- (3) During the first quarter of 2007, the Company launched a new family footwear concept, Footquarters. The concept's results did not meet the Company's expectations and, therefore, the Company decided not to invest further in this business. These stores were converted to the Company's other formats. Included in the operating loss of \$6 million was \$2 million of costs associated with the removal of signage and the write-off of unusable fixtures.
- (4) During 2009, the Company adjusted its 1999 restructuring reserves to reflect a favorable lease termination. During 2007, the Company adjusted its 1993 Repositioning and 1991 Restructuring reserve by \$2 million primarily due to favorable lease terminations.
- (5) During the fourth quarter of 2009, the Company restructured its organization by consolidating the Lady Foot Locker, Foot Locker U.S., Kids Foot Locker and Footaction businesses in addition to reducing corporate staff, resulting in a \$5 million charge. Included in corporate expense for the year ended January 31, 2009 is a \$3 million other-than-temporary impairment charge related to the investment in the Reserve International Liquidity Fund. Additionally, for the year ended January 31, 2009 the Company recorded a \$15 million impairment charge on the Northern Group note receivable.
- (6) Other income includes non-operating items, such as gains from insurance recoveries, gains on the repurchase and retirement of bonds, royalty income, the changes in fair value, premiums paid and realized gains associated with foreign currency option contracts.

Sales

All references to comparable-store sales for a given period relate to sales from stores that are open at the period-end, that have been open for more than one year, and exclude the effect of foreign currency fluctuations. Accordingly, stores opened and closed during the period are not included. Sales from the Direct-to-Customers segment, excluding CCS sales, are included in the calculation of comparable-store sales for all periods presented. Sales from acquired businesses that include the purchase of inventory are included in the computation of comparable-store sales after 15 months of operations. Accordingly, CCS sales have been excluded in the computation of comparable-store sales.

Sales decreased to \$4,854 million, or by 7.3 percent as compared with 2008. Excluding the effect of foreign currency fluctuations, sales declined 6.1 percent as compared with 2008. Comparable-store sales decreased by 6.3 percent.

Sales of \$5,237 million in 2008 decreased by 3.7 percent from sales of \$5,437 million in 2007. Excluding the effect of foreign currency fluctuations, sales declined 4.0 percent as compared with 2007. Comparable-store sales decreased by 3.2 percent.

Gross Margin

Gross margin as a percentage of sales was 27.4 percent in 2009 decreasing 50 basis points as compared with 2008. The decrease in the gross margin reflected an increase of 30 basis points in the merchandise margin rate due to lower markdowns, offset by an 80 basis point increase in the occupancy rate due to lower sales. Vendor allowances were essentially the same as compared with 2008 and did not significantly affect the gross margin rate. During the fourth quarter of 2009, the Company recorded a \$14 million inventory reserve on certain aged apparel as part of its new apparel strategy. Excluding this charge, gross margin would have declined by 20 basis points as compared with 2008.

Gross margin as a percentage of sales was 27.9 percent in 2008 increasing 180 basis points as compared with 2007. The increase in the gross margin represented an increase of 230 basis points in the merchandise margin rate reflecting lower markdowns. Lower sales in 2008 resulted in the occupancy rate increasing by 50 basis points, as a percentage of sales. The effect of reduced vendor allowances was not significant as compared with 2007.

Selling, General and Administrative Expenses

Selling, general and administrative ("SG&A") expenses decreased by \$75 million to \$1,099 million in 2009, or by 6.4 percent, as compared with 2008. SG&A as a percentage of sales increased to 22.6 percent as compared with 22.4 percent in 2008, due to the decline in sales. Excluding the effect of foreign currency fluctuations in 2009, SG&A decreased by \$64 million. This decrease reflects lower divisional expenses primarily due to operating fewer stores and compensation expense, offset, in part, by increased pension expense of \$13 million.

SG&A expenses decreased by \$2 million to \$1,174 million in 2008, or by 0.2 percent, as compared with 2007. SG&A as a percentage of sales increased to 22.4 percent as compared with 21.6 percent in 2007. The increase in SG&A as a percentage of sales is due to the decline in sales. Excluding the effect of foreign currency fluctuations in 2008, SG&A decreased by \$9 million. This decrease reflects lower divisional expenses due to operating fewer stores, offset, in part, by an increase in corporate expenses primarily related to increased incentive compensation.

Corporate Expense

Corporate expense consists of unallocated general and administrative expenses as well as depreciation and amortization related to the Company's corporate headquarters, centrally managed departments, unallocated insurance and benefit programs, certain foreign exchange transaction gains and losses, and other items.

Corporate expense decreased by \$20 million to \$67 million in 2009 as compared with 2008. Depreciation and amortization included in corporate expense was \$13 million in both 2009 and 2008. Included in 2008 corporate expense were charges that totaled \$18 million, which represented a \$3 million other-than-temporary impairment charge related to a short-term investment and a \$15 million impairment charge related to the Northern Group note receivable. The balance of the change represents lower incentive compensation costs as well as income of \$3 million related to the final settlement of the Visa/MasterCard litigation. These reductions in corporate expense were offset, in part, by higher pension expense.

Corporate expense increased by \$28 million to \$87 million in 2008 as compared with 2007. Depreciation and amortization included in corporate expense amounted to \$13 million in 2008 and \$14 million in 2007. As noted above, corporate expense for 2008 included a \$3 million other-than-temporary impairment charge related to a short-term investment and a \$15 million impairment charge related to the Northern Group note receivable. During the first quarter of 2008, the principal owners of the Northern Group requested an extension on the repayment of the note, which was scheduled to be repaid on September 28, 2008. The Company determined, based on the Northern Group's current financial condition and projected performance, that repayment of the note pursuant to the original terms of the purchase agreement was not likely. Excluding these charges, corporate expense increased by \$10 million, which is primarily related to increased incentive compensation.

Depreciation and Amortization

Depreciation and amortization of \$112 million decreased by 13.8 percent in 2009 from \$130 million in 2008. This decrease primarily reflects the effect of the impairment charges offset, in part, by increased depreciation and amortization related to the Company's capital spending, as well as the amortization expense associated with the CCS customer list intangible. The effect of foreign currency fluctuations was not significant.

Depreciation and amortization of \$130 million decreased by 21.7 percent in 2008 from \$166 million in 2007. This decrease primarily reflects the effect of the 2007 impairment charges offset, in part, by increased depreciation and amortization related to the Company's capital spending. The effect of foreign currency fluctuations was not significant.

Interest Expense, Net

	<u>2009</u>	<u>2008</u>	<u>2007</u>
		(in millions)	
Interest expense	\$ 13	\$ 16	\$ 21
Interest income	(3)	(11)	(20)
Interest expense, net	\$ 10	\$ 5	\$ 1
Weighted-average interest rate (excluding facility fees):			
Long-term debt	7.3%	6.2%	8.0%

Interest expense of \$13 million decreased by \$3 million as compared with 2008. The decrease in interest expense primarily relates to the termination of the cross currency swaps, which represented expense of \$3 million in 2008, as well as lower average debt outstanding during 2009. Interest expense in 2009 was also reduced by \$1 million, reflecting the effect of the amortization of the gain realized from the termination of the interest rate swap. This was offset, in part, by higher fees associated with the revolving credit facility. The Company did not have any short-term borrowings for any of the periods presented. Interest income of \$3 million declined from \$11 million in 2008 primarily due to lower interest rates received on its cash, cash equivalents and short-term investments.

Interest expense of \$16 million decreased by \$5 million in 2008 compared with \$21 million in 2007. The reduction in interest expense primarily relates to the repayment of the term loan in May 2008 and the purchases and retirements of \$6 million and \$5 million in 2008 and 2007, respectively, of the Company's 8.50 percent debentures. Interest rate swap agreements reduced interest expense in 2008 by \$2 million, while the cross currency swaps increased interest expense by \$3 million. Interest income of \$11 million declined from \$20 million in 2007. Interest income is mainly generated through the investment of cash equivalents and short-term investments. The decline in interest income reflects the lower interest rates received on cash, cash equivalents and short-term investments, which totaled \$10 million in 2008 and \$16 million in 2007. Additionally, the Company did not record accretion income related to the Northern Group note, which in the prior year totaled \$2 million.

Other Income

Other income of \$3 million in 2009 includes \$4 million related to gains from insurance recoveries, gains on the purchase and retirement of bonds, and royalty income, partially offset by \$1 million of foreign currency option contract premiums. The Company uses these derivatives to mitigate the effect of fluctuating foreign exchange rates on the reporting of foreign currency denominated earnings.

Other income of \$8 million in 2008 includes a net gain of \$4 million, which is comprised of the changes in fair value, realized gains and premiums paid on foreign currency contracts. Additionally, 2008 includes a \$3 million gain on lease terminations related to two lease interests in Europe.

Income Taxes

The effective tax rate for 2009 was an expense of 36.0 percent, as compared with a benefit of 20.8 percent in 2008. The effective tax rate changed primarily due to impairment charges in 2008, which created an overall book loss, coupled with the effect of an impairment of goodwill, a portion of which was not deductible for tax purposes, as well as 2009 Canadian provincial tax rate changes that resulted in a \$4 million reduction in the value of the Company's net deferred tax assets.

The effective tax rate for 2008 was a benefit of 20.8 percent as compared with a benefit of 187.0 percent in 2007. The effective income tax rate changed primarily due to the effect of the 2008 goodwill impairment, a portion of which is not deductible for tax purposes, the 2007 valuation allowance adjustment, and to a lesser extent, the mix of U.S. and international profits.

Segment Information

The Company's two reportable segments, Athletic Stores and Direct-to-Customers, are based on its method of internal reporting. The Company evaluates performance based on several factors, the primary financial measure of which is division results. Division profit (loss) reflects income (loss) from continuing operations before income taxes, corporate expense, non-operating income, and net interest expense. Sales and division results for the Company's reportable segments for the years ended January 30, 2010, January 31, 2009 and February 2, 2008 are presented below.

Athletic Stores

	2009	2008	2007
		(in millions)	
Sales	\$ 4,448	\$ 4,847	\$ 5,071
Division profit (loss)	\$ 114	\$ (59)	\$ (27)
Division profit (loss) margin	2.6%	(1.2)%	(0.5)%
Number of stores at year end	3,500	3,641	3,785
Selling square footage (in millions)	7.74	8.09	8.50
Gross square footage (in millions)	12.96	13.50	14.12

2009 compared with 2008

Athletic Stores sales of \$4,448 million decreased 8.2 percent in 2009, as compared with \$4,847 million in 2008. Excluding the effect of foreign currency fluctuations, primarily related to the euro, sales from the Athletic Stores segment decreased by 7.0 percent in 2009. Comparable-store sales for the Athletic Stores segment declined 6.2 percent as compared with prior year. The decline in sales for the year ended January 30, 2010 was primarily related to the domestic operations as the result of a decline in mall traffic and consumer spending in general. Excluding the effect of foreign currency fluctuations, sales in Europe increased low single digits in 2009 as compared with 2008.

Athletic Stores reported a division profit of \$114 million in 2009 as compared with a loss of \$59 million in 2008. Included in the results are impairment and other charges of \$46 million and \$241 million in 2009 and 2008, respectively. The 2009 results included impairment charges totaling \$32 million, which were recorded to write down long-lived assets such as store fixtures and leasehold improvements at the Company's Lady Foot Locker, Kids Foot Locker, Footaction, and Champs Sports divisions for 787 stores. Additionally, in 2009 the Company recorded a \$14 million inventory reserve on certain aged apparel. The 2008 results included a \$241 million charge representing long-lived store asset impairment, goodwill and other intangibles impairment and store closing costs related to the Company's U.S. operations. Excluding these charges, division profit decreased \$22 million in 2009 as compared with the corresponding prior-year period, which relates primarily to the domestic businesses. Excluding the effect of foreign currency fluctuations, division profits of international operations were essentially flat as compared with the corresponding prior-year period.

2008 compared with 2007

Athletic Stores sales of \$4,847 million decreased 4.4 percent in 2008, as compared with \$5,071 million in 2007. Excluding the effect of foreign currency fluctuations, primarily related to the euro, sales from athletic store formats decreased by 4.8 percent in 2008. Comparable-store sales for the Athletic Stores segment declined 3.6 percent as compared with prior year. The decline in sales for the year ended January 31, 2009 was primarily related to the domestic operations as the result of a decline in mall traffic and consumer spending in general. Excluding the effect of foreign currency fluctuations, sales in Europe decreased low single digits in 2008 as compared with 2007. The sales of low profile styles negatively affected the first three quarters of 2008. However, during the fourth quarter of 2008, sales of higher-priced marquee footwear and apparel increased, which more than offset the sales decline related to the low profile footwear styles.

Athletic Stores reported a loss of \$59 million in 2008 as compared with a loss of \$27 million in 2007, which was primarily attributable to the U.S. operations. Included in the results for 2008 and 2007 are impairment charges and store closing costs totaling \$241 million and \$128 million, respectively. Athletic Stores division loss for 2008 includes a \$167 million goodwill impairment charge, a \$67 million write-down of long-lived assets such as store fixtures and leasehold improvements for 868 stores at the Company's U.S. store operations, \$5 million of exit costs related to the closure of underperforming stores comprising primarily lease terminations and \$2 million in other intangible impairment charges related to its tradenames. The Company performs its annual impairment test as of the beginning of each year; however, due to the macroeconomic conditions affecting retail and the significant decline in the Company's common stock and market capitalization, plus a reasonable control premium, in relation to the book value, the Company determined that a triggering event had occurred and, therefore, performed an interim impairment test.

During 2008, the fair value of the four reporting units containing goodwill was determined under step 1 of the goodwill impairment test based on a weighting of a discounted cash flow analysis using forward-looking projections of estimated future operating results and a guideline company methodology under the market approach. Based on this testing, the Company determined that the fair values, as determined under step 1 as described above, was less than the carrying values of the Foot Locker, Kids Foot Locker and Footaction reporting unit and the Champs Sports reporting unit. Accordingly, the Company performed a step 2 analysis to determine the extent of the goodwill impairment and concluded that the goodwill of these two reporting units was fully impaired, resulting in a non-cash impairment charge of \$167 million. There were no goodwill impairment charges in 2007. Excluding the impairment charges and store exit costs from both 2008 and 2007, division profit would have increased to \$182 million in 2008 from \$101 million in 2007. This increase in division profit primarily related to the domestic divisions as a result of lower promotional markdowns and reduced depreciation and amortization expense.

Direct-to-Customers

	<u>2009</u>	<u>2008</u>	<u>2007</u>
		(in millions)	
Sales	\$406	\$ 390	\$ 364
Division profit	\$ 32	\$ 43	\$ 40
Division profit margin	7.9%	11.0%	11.0%

2009 compared with 2008

Direct-to-Customers sales increased 4.1 percent to \$406 million in 2009, as compared with \$390 million in 2008, reflecting a comparable-store sales decrease of 6.8 percent, offset by additional sales from CCS, which was acquired during the fourth quarter of 2008. Internet sales increased by 6.8 percent to \$344 million, as compared with 2008 reflecting continued growth in the store brands' websites. Catalog sales decreased by 8.8 percent to \$62 million in 2009 from \$68 million in 2008. Management believes that the decrease in catalog sales, which was substantially offset by the increase in Internet sales, is a result of customers browsing and selecting products through its catalogs and then making their purchases via the Internet.

The Direct-to-Customers business generated division profit of \$32 million in 2009, as compared with \$43 million in 2008. Division profit, as a percentage of sales, was 7.9 percent in 2009 and 11.0 percent in 2008. Included in division profit is a \$4 million impairment charge, which was recorded to write off certain software development costs as a result of management's decision to terminate the project. Gross margin was negatively affected by the lack of close-out inventory purchases during the year. Additionally, division profit, as compared with the corresponding prior-year period, was negatively affected by \$3 million in additional amortization expense related to the CCS customer list intangible asset.

2008 compared with 2007

Direct-to-Customers sales increased 7.1 percent to \$390 million in 2008, as compared with \$364 million in 2007, reflecting a comparable-store sales increase of 1.0 percent and additional sales from CCS, which was acquired during the fourth quarter of 2008. Internet sales increased by 12.2 percent to \$322 million, as compared with 2007. Catalog sales decreased by 11.7 percent to \$68 million in 2008 from \$77 million in 2007. Management believes that the decrease in catalog sales, which was substantially offset by the increase in Internet sales, is a result of customers browsing and selecting products through its catalogs and then making their purchases via the Internet.

The Direct-to-Customers business generated division profit of \$43 million in 2008, as compared with \$40 million in 2007. Division profit, as a percentage of sales, was 11.0 percent in 2008 and 2007. The increase in division profit reflects the accretive effect of the acquisition of CCS.

Liquidity and Capital Resources

Liquidity

Generally, the Company's primary source of cash has been from operations. The Company generally finances real estate with operating leases. The principal uses of cash have been to finance inventory requirements, capital expenditures related to store openings, store remodelings, information systems, and other support facilities, retirement plan contributions, quarterly dividend payments, interest payments, other cash requirements to support the development of its short-term and long-term operating strategies, and to fund other working capital requirements.

Management believes its cash, cash equivalents, future cash flow from operations, and the Company's current revolving credit facility will be adequate to fund these requirements. The Company may also from time to time repurchase its common stock or seek to retire or purchase outstanding debt through open market purchases, privately negotiated transactions or otherwise. Such repurchases, if any, will depend on prevailing market conditions, liquidity requirements, contractual restrictions and other factors. The amounts involved may be material. On February 16, 2010, the Company's Board of Directors approved the extension of the Company's 2007 common share repurchase program for an additional three years in the amount of \$250 million.

Maintaining access to merchandise that the Company considers appropriate for its business may be subject to the policies and practices of its key vendors. Therefore, the Company believes that it is critical to continue to maintain satisfactory relationships with its key vendors. The Company purchased approximately 82 percent in 2009 and 80 percent in 2008 of its merchandise from its top five vendors and expects to continue to obtain a significant percentage of its athletic product from these vendors in future periods. Approximately 68 percent in 2009 and 64 percent in 2008 was purchased from one vendor — Nike, Inc.

Planned capital expenditures for 2010 are approximately \$103 million, of which \$65 million relates to modernizations of existing stores and new store openings, and \$38 million reflects the development of information systems and other support facilities. In addition, planned lease acquisition costs related to the Company's operations in Europe are \$7 million. The Company has the ability to revise and reschedule the anticipated capital expenditure program, should the Company's financial position require it.

Any material adverse change in customer demand, fashion trends, competitive market forces or customer acceptance of the Company's merchandise mix and retail locations, uncertainties related to the effect of competitive products and pricing, the Company's reliance on a few key vendors for a significant portion of its merchandise purchases, and risks associated with foreign global sourcing or economic conditions worldwide could affect the ability of the Company to continue to fund its needs from business operations.

Cash Flow

Operating activities from continuing operations provided cash of \$346 million in 2009 as compared with \$383 million in 2008. These amounts reflect income from continuing operations adjusted for non-cash items and working capital changes. During 2009, the Company recorded non-cash impairment and other charges of \$36 million primarily related to impairment of store-level assets in the domestic operations. Merchandise inventories represented a \$111 million source of cash in 2009 as inventory purchases were reduced to keep inventory levels in line with sales as well as reflecting the affect of the store closings. During 2009, the Company contributed \$100 million to its U.S. and Canadian qualified pension plans as compared with \$6 million contributed in 2008. Additionally, during 2009 the Company terminated its interest rate swaps for a gain of \$19 million. The other changes primarily reflect the timing of February 2010 rent payments, which totaled \$34 million and were due and paid in 2010 as compared with the February 2009 rent payments that were due and paid in 2008, as well as income tax refunds of \$32 million.

Operating activities from continuing operations provided cash of \$383 million in 2008 as compared with \$283 million in 2007. During 2008, the Company recorded non-cash impairment charges and store closing program costs of \$259 million primarily related to its domestic operations. Merchandise inventories represented a \$128 million source of cash in 2008 as inventory purchases were reduced to keep inventory levels in line with sales. Additionally, the Company contributed \$6 million to its Canadian qualified pension plan in 2008.

Net cash used by investing activities of the Company's continuing operations was \$72 million in 2009 as compared with \$272 million used in investing activities in 2008. During 2009, the Company received \$16 million from the Reserve International Liquidity Fund representing further redemptions. Capital expenditures were \$89 million primarily related to store remodeling and to the development of information systems and other support facilities, representing a decrease of \$57 million as compared with the prior year. The Company made a strategic decision to conserve cash in 2009 and, therefore, reduced capital spending, focusing on projects that improved the customer experience.

Net cash used by investing activities of the Company's continuing operations was \$272 million in 2008 as compared with \$117 million provided by investing activities in 2007. The net cash used by investing activities for 2008 reflects the asset purchase from dELIA*s, Inc. of CCS for \$106 million (including capitalized acquisition costs). Investing activities in 2008 also included a \$3 million gain related to the sale of two lease interests in Europe. The Company did not purchase or sell short-term investments during 2008. Reflected in investing activities in 2008 is the reclassification of the \$23 million investment in the Reserve International Liquidity Fund from cash and cash equivalents to short-term investments. Capital expenditures of \$146 million in 2008 and \$148 million in 2007 were primarily related to store remodeling and new stores.

Net cash used in financing activities of continuing operations was \$94 million in 2009 as compared with \$185 million in 2008. During 2009 and 2008, the Company purchased and retired \$3 million and \$6 million, respectively, of its 8.50 percent debentures. During 2008, the Company reduced its long-term debt by repaying the balance of its term loan of \$88 million. Additionally, the Company declared and paid dividends totaling \$94 million and \$93 million in 2009 and 2008, respectively, representing a quarterly rate of \$0.15 per share in both 2009 and 2008. During 2009 and 2008, the Company received proceeds from the issuance of common stock and treasury stock in connection with the employee stock programs of \$3 million and \$2 million, respectively.

Net cash used in financing activities of continuing operations was \$185 million in 2008 as compared with \$138 million in 2007. The Company declared and paid dividends totaling \$93 million in 2008 and \$77 million in 2007. During 2008 and 2007, the Company received proceeds from the issuance of common stock and treasury stock in connection with the employee stock programs of \$2 million and \$9 million, respectively.

Capital Structure

Credit Agreement

On March 20, 2009, the Company entered into a new credit agreement (the "2009 Credit Agreement") with its banks, providing for a \$200 million asset-based revolving credit facility maturing on March 20, 2013, which replaced the Company's prior credit agreement. The 2009 Credit Agreement also provides for an incremental facility of up to \$100 million under certain circumstances. The 2009 Credit Agreement provides for a security interest in certain of the Company's domestic assets, including certain inventory assets. The Company is not required to comply with any financial covenants as long as there are no outstanding borrowings. If the Company is borrowing, then it may not make Restricted Payments, such as dividends or share repurchases, unless there is at least \$50 million of Excess Availability (as defined in the 2009 Credit Agreement), and the Company's projected fixed charge coverage ratio, which is a Non-GAAP financial ratio pursuant to the 2009 Credit Agreement designed as a measure of the Company's ability to meet current and future obligations (Consolidated EBITDA less capital expenditures less cash taxes divided by Debt Service Charges and Restricted Payments), is at least 1.1 to 1.0. The Company's management does not currently expect to borrow under the facility in 2010.

Credit Rating

As of March 29, 2010, the Company's corporate credit ratings from Standard & Poor's and Moody's Investors Service are B+ and Ba3, respectively. Additionally, as of March 29, 2010, Moody's Investors Service has rated the Company's senior unsecured notes B1.

Debt Capitalization and Equity

For purposes of calculating debt to total capitalization, the Company includes the present value of operating lease commitments in total net debt. Total net debt including the present value of operating leases is considered a non-GAAP financial measure. The present value of operating leases is discounted using various interest rates ranging from 4 percent to 15 percent, which represent the Company's incremental borrowing rate at inception of the lease. Operating leases are the primary financing vehicle used to fund store expansion and, therefore, we believe that the inclusion of the present value of operating leases in total debt is useful to our investors, credit constituencies, and rating agencies.

The following table sets forth the components of the Company's capitalization, both with and without the present value of operating leases:

	<u>2009</u>	<u>2008</u>
	(in millions)	
Long-term debt	\$ 138	\$ 142
Present value of operating leases	<u>1,923</u>	<u>1,952</u>
Total debt including the present value of operating leases	2,061	2,094
Less:		
Cash and cash equivalents	582	385
Short-term investments	<u>7</u>	<u>23</u>
Total net debt including the present value of operating leases	1,472	1,686
Shareholders' equity	<u>1,948</u>	<u>1,924</u>
Total capitalization	<u>\$3,420</u>	<u>\$3,610</u>
Total net debt capitalization percent including the present value of operating leases	43.0%	46.7%

The Company reduced debt by \$4 million and increased cash, cash equivalents, and short-term investments by \$181 million during 2009. Additionally, the present value of the operating leases decreased by \$29 million representing the effect of the store closures, offset, in part, by lease renewals and the effect of foreign currency translation. Including the present value of operating leases, the Company's net debt capitalization percent decreased 370 basis points in 2009. The increase in shareholders' equity of \$24 million in 2009 primarily relates to the following: net income of \$48 million, \$94 million in dividends paid, \$17 million related to stock plans, and an increase of \$65 million in the foreign exchange currency translation adjustment, primarily related to the value of the euro in relation to the U.S. dollar. In addition, during 2009 the Company recognized, within accumulated other comprehensive loss, amortization of prior service costs and net actuarial gains and losses, as well as an additional charge representing the change in the funded status of the pension and postretirement plans, which totaled \$13 million after-tax.

Contractual Obligations and Commitments

The following tables represent the scheduled maturities of the Company's contractual cash obligations and other commercial commitments at January 30, 2010:

<u>Contractual Cash Obligations</u>	<u>Total</u>	<u>Payments Due by Period</u>			
		<u>Less than 1 Year</u>	<u>2 – 3 Years</u>	<u>3 – 5 Years</u>	<u>After 5 Years</u>
		(in millions)			
Long-term debt ⁽¹⁾	\$ 138	\$ —	\$ —	\$ —	\$138
Operating leases ⁽²⁾	2,550	487	821	573	669
Other long-term liabilities ⁽³⁾	26	2	—	—	24
Total contractual cash obligations	<u>\$2,714</u>	<u>\$489</u>	<u>\$821</u>	<u>\$573</u>	<u>\$831</u>

- (1) The amounts presented above represent the contractual maturities of the Company's long-term debt, excluding interest. Additional information is included in the "Long-Term Debt" note under "Item 8. Consolidated Financial Statements and Supplementary Data."
- (2) The amounts presented represent the future minimum lease payments under non-cancelable operating leases. In addition to minimum rent, certain of the Company's leases require the payment of additional costs for insurance, maintenance, and other costs. These costs have historically represented approximately 25 to 30 percent of the minimum rent amount. These additional amounts are not included in the table of contractual commitments as the timing and/or amounts of such payments are unknown.
- (3) The Company's other liabilities in the Consolidated Balance Sheet at January 30, 2010 primarily comprise pension and postretirement benefits, deferred rent liability, income taxes, workers' compensation and general liability reserves and various other accruals. The amounts presented in the table are comprised of the Company's 2010 Canadian qualified plan contributions of \$2 million and the liability related to the European net investment hedge of \$24 million. The European net investment agreement includes a provision that may require the Company to settle this transaction in August 2010, at the option of the Company or the counterparty. This is the first of a series of annual settlement provisions until August 2015. Other than these liabilities, other amounts (including the Company's unrecognized tax benefits of \$39 million) have been excluded from the above table as the timing and/or amount of any cash payment is uncertain. The timing of the remaining amounts that are known has not been included as they are minimal and not useful to the presentation. Additional information is included in the "Other Liabilities, Financial Instruments and Risk Management," and "Retirement Plans and Other Benefits" notes under "Item 8. Consolidated Financial Statements and Supplementary Data."

<u>Other Commercial Commitments</u>	<u>Total Amounts Committed</u>	<u>Amount of Commitment Expiration by Period</u>			
		<u>Less than 1 Year</u>	<u>2 – 3 Years</u>	<u>3 – 5 Years</u>	<u>After 5 Years</u>
		(in millions)			
Unused line of credit ⁽⁴⁾	\$ 190	\$ —	\$—	\$190	\$—
Standby letters of credit	10	—	—	10	—
Purchase commitments ⁽⁵⁾	1,412	1,412	—	—	—
Other ⁽⁶⁾	57	28	27	2	—
Total commercial commitments	<u>\$1,669</u>	<u>\$1,440</u>	<u>\$27</u>	<u>\$202</u>	<u>\$—</u>

- (4) Represents the unused domestic lines of credit pursuant to the Company's \$200 million revolving credit agreement. The Company's management currently does not expect to borrow under the facility in 2010.
- (5) Represents open purchase orders, as well as other commitments for merchandise purchases, at January 30, 2010. The Company is obligated under the terms of purchase orders; however, the Company is generally able to renegotiate the timing and quantity of these orders with certain vendors in response to shifts in consumer preferences.
- (6) Represents minimum payments required by non-merchandise purchase agreements.

The Company does not have any off-balance sheet financing, other than operating leases entered into in the normal course of business as disclosed above, or unconsolidated special purpose entities. The Company does not participate in transactions that generate relationships with unconsolidated entities or financial partnerships, including variable interest entities. The Company's policy prohibits the use of derivatives for which there is no underlying exposure.

In connection with the sale of various businesses and assets, the Company may be obligated for certain lease commitments transferred to third parties and pursuant to certain normal representations, warranties, or indemnifications entered into with the purchasers of such businesses or assets. Although the maximum potential amounts for such obligations cannot be readily determined, management believes that the resolution of such contingencies will not significantly affect the Company's consolidated financial position, liquidity, or results of operations. The Company is also operating certain stores for which lease agreements are in the process of being negotiated with landlords. Although there is no contractual commitment to make these payments, it is likely that leases will be executed.

Critical Accounting Policies

Management's responsibility for integrity and objectivity in the preparation and presentation of the Company's financial statements requires diligent application of appropriate accounting policies. Generally, the Company's accounting policies and methods are those specifically required by U.S. generally accepted accounting principles. Included in the "Summary of Significant Accounting Policies" note in "Item 8. Consolidated Financial Statements and Supplementary Data" is a summary of the Company's most significant accounting policies. In some cases, management is required to calculate amounts based on estimates for matters that are inherently uncertain. The Company believes the following to be the most critical of those accounting policies that necessitate subjective judgments.

Merchandise Inventories

Merchandise inventories for the Company's Athletic Stores are valued at the lower of cost or market using the retail inventory method ("RIM"). The RIM is commonly used by retail companies to value inventories at cost and calculate gross margins due to its practicality. Under the retail method, cost is determined by applying a cost-to-retail percentage across groupings of similar items, known as departments. The cost-to-retail percentage is applied to ending inventory at its current owned retail valuation to determine the cost of ending inventory on a department basis. The RIM is a system of averages that requires management's estimates and assumptions regarding markups, markdowns and shrink, among others, and as such, could result in distortions of inventory amounts.

Significant judgment is required for these estimates and assumptions, as well as to differentiate between promotional and other markdowns that may be required to correctly reflect merchandise inventories at the lower of cost or market. The Company provides reserves based on current selling prices when the inventory has not been marked down to market. The failure to take permanent markdowns on a timely basis may result in an overstatement of cost under the retail inventory method. The decision to take permanent markdowns includes many factors, including the current environment, inventory levels and the age of the item. Management believes this method and its related assumptions, which have been consistently applied, to be reasonable.

Vendor Reimbursements

In the normal course of business, the Company receives allowances from its vendors for markdowns taken. Vendor allowances are recognized as a reduction in cost of sales in the period in which the markdowns are taken. Vendor allowances contributed 30 basis points to the 2009 gross margin rate. The Company also has volume-related agreements with certain vendors, under which it receives rebates based on fixed percentages of cost purchases. These volume-related rebates are recorded in cost of sales when the product is sold and were not significant to the 2009 gross margin rate.

The Company receives support from some of its vendors in the form of reimbursements for cooperative advertising and catalog costs for the launch and promotion of certain products. The reimbursements are agreed upon with vendors for specific advertising campaigns and catalogs. Cooperative income, to the extent that it reimburses specific, incremental and identifiable costs incurred to date, is recorded in SG&A in the same period as the associated expenses are incurred. Reimbursements received that are in excess of specific, incremental and identifiable costs incurred to date are recognized as a reduction to the cost of merchandise and are reflected in cost of sales as the merchandise is sold. Cooperative reimbursements amounted to approximately 27 percent and 11 percent of total advertising and catalog costs, respectively, in 2009.

Impairment of Long-Lived Assets, Goodwill and Other Intangibles

The Company recognizes an impairment loss when circumstances indicate that the carrying value of long-lived tangible and intangible assets with finite lives may not be recoverable. Management's policy in determining whether an impairment indicator exists, a triggering event, comprises measurable operating performance criteria at the division level as well as qualitative measures. If an analysis is necessitated by the occurrence of a triggering event, the Company uses assumptions, which are predominately identified from the Company's three-year strategic plans, in determining the impairment amount. In the calculation of the fair value of long-lived assets, the Company compares the carrying amount of the asset with the estimated future cash flows expected to result from the use of the asset. If the carrying amount of the asset exceeds the estimated expected undiscounted future cash flows, the Company measures the amount of the impairment by comparing the carrying amount of the asset with its estimated fair value. The estimation of fair value is measured by discounting expected future cash flows at the Company's weighted-average cost of capital. Management believes its policy is reasonable and is consistently applied. Future expected cash flows are based upon estimates that, if not achieved, may result in significantly different results. For the year ended January 30, 2010, the Company recorded non-cash impairment charges totaling \$36 million. A charge of \$32 million was recorded to write-down long-lived assets such as store fixtures and leasehold improvements, at its Lady Foot Locker, Kids Foot Locker, Footaction and Champs Sports divisions for 787 stores. Additionally, the Company recorded a charge of \$4 million to write off certain software development costs for the Direct-to-Customers segment as a result of management's decision to terminate this project. For the year ended January 31, 2009, the Company recorded non-cash impairment charges totaling \$67 million primarily to write-down long-lived assets, such as store fixtures and leasehold improvements, for the Company's U.S. store operations.

The Company performs an impairment review of its goodwill and intangible assets with indefinite lives if impairment indicators arise and, at a minimum, annually. We consider many factors in evaluating whether the carrying value of goodwill may not be recoverable, including declines in stock price and market capitalization in relation to the book value of the Company and macroeconomic conditions affecting retail. The Company has chosen to perform this review at the beginning of each fiscal year, and it is done in a two-step approach. The initial step requires that the carrying value of each reporting unit be compared with its estimated fair value. The second step — to evaluate goodwill of a reporting unit for impairment — is only required if the carrying value of that reporting unit exceeds its estimated fair value. The Company used a combination of a discounted cash flow approach and market-based approach to determine the fair value of a reporting unit. The determination of discounted cash flows of the reporting units and assets and liabilities within the reporting units requires us to make significant estimates and assumptions. These estimates and assumptions primarily include, but are not limited to, the discount rate, terminal growth rates, earnings before depreciation and amortization, and capital expenditures forecasts. The market approach requires judgment and uses one or more methods to compare the reporting unit with similar businesses, business ownership interests or securities that have been sold. Due to the inherent uncertainty involved in making these estimates, actual results could differ from those estimates.

The Company assigned discount rates ranging from 12 to 14 percent for the four reporting units. The Company evaluated the merits of each significant assumption, both individually and in the aggregate, used to determine the fair value of the reporting units, as well as the fair values of the corresponding assets and liabilities within the reporting units, and concluded they are reasonable and are consistent with prior valuations.

Owned trademarks and tradenames that have been determined to have indefinite lives are not subject to amortization but are reviewed at least annually for potential impairment. The fair values of purchased intangible assets are estimated and compared to their carrying values. We estimate the fair value of these intangible assets based on an income approach using the relief-from-royalty method. This methodology assumes that, in lieu of ownership, a third party would be willing to pay a royalty in order to exploit the related benefits of these types of assets. This approach is dependent on a number of factors, including estimates of future growth and trends, royalty rates in the category of intellectual property, discount rates and other variables. We base our fair value estimates on assumptions we believe to be reasonable, but which are unpredictable and inherently uncertain. Actual future results may differ from those estimates. We recognize an impairment loss when the estimated fair value of the intangible asset is less than the carrying value.

The Company's review of goodwill and other intangible assets did not result in any impairment charges for the year ended January 30, 2010 as the fair value of each of the reporting units substantially exceeds its carrying value. The Company recorded non-cash impairment charges totaling \$169 million for the year ended January 31, 2009.

Share-Based Compensation

The Company estimates the fair value of options granted using the Black-Scholes option pricing model. The Company estimates the expected term of options granted using its historical exercise and post-vesting employment termination patterns, which the Company believes are representative of future behavior. Changing the expected term by one year changes the fair value by 3 to 6 percent depending if the change was an increase or decrease to the expected term. The Company estimates the expected volatility of its common stock at the grant date using a weighted-average of the Company's historical volatility and implied volatility from traded options on the Company's common stock. A 50 basis point change in volatility would have a 1 percent change to the fair value. The risk-free interest rate assumption is determined using the Federal Reserve nominal rates for U.S. Treasury zero-coupon bonds with maturities similar to those of the expected term of the award being valued.

The expected dividend yield is derived from the Company's historical experience. A 50 basis point change to the dividend yield would change the fair value by approximately 4 percent. The Company records stock-based compensation expense only for those awards expected to vest using an estimated forfeiture rate based on its historical pre-vesting forfeiture data, which it believes are representative of future behavior, and periodically will revise those estimates in subsequent periods if actual forfeitures differ from those estimates.

The Black-Scholes option pricing valuation model requires the use of subjective assumptions. Changes in these assumptions can materially affect the fair value of the options. The Company may elect to use different assumptions under the Black-Scholes option pricing model in the future if there is a difference between the assumptions used in determining stock-based compensation cost and the actual factors that become known over time.

Pension and Postretirement Liabilities

The Company determines its obligations for pension and postretirement liabilities based upon assumptions related to discount rates, expected long-term rates of return on invested plan assets, salary increases, age, and mortality, among others. Management reviews all assumptions annually with its independent actuaries, taking into consideration existing and future economic conditions and the Company's intentions with regard to the plans. Management believes its estimates for 2009, as disclosed in the "Retirement Plans and Other Benefits" note in "Item 8. Consolidated Financial Statements and Supplementary Data," to be reasonable.

Long-Term Rate of Return Assumption - The expected long-term rate of return on invested pension plan assets is a component of pension expense. The rate is based on the plans' weighted-average target asset allocation, as well as historical and future expected performance of those assets. The target asset allocation is selected to obtain an investment return that is sufficient to cover the expected benefit payments and to reduce future contributions by the Company. The Company's common stock represented approximately one percent of the total pension plans' assets at January 30, 2010.

The weighted-average long-term rate of return used to determine 2009 pension expense was 7.63 percent. A decrease of 50 basis points in the weighted-average expected long-term rate of return would have increased 2009 pension expense by approximately \$3 million. The actual return on plan assets in a given year typically differs from the expected long-term rate of return, and the resulting gain or loss is deferred and amortized into the plans' expense over time.

Discount Rate - An assumed discount rate is used to measure the present value of future cash flow obligations of the plans and the interest cost component of pension expense and postretirement income. The discount rate selected to measure the present value of the Company's U.S. benefit obligations at January 30, 2010 was derived using a cash flow matching method whereby the Company matches the plans' projected payment obligations by year with the corresponding yield on the Citibank Pension Discount Curve. The cash flows are then discounted to their present value and an overall discount rate is determined. The discount rate selected to measure the present value of the Company's Canadian benefit obligations at January 30, 2010 was developed by using the plan's bond portfolio indices, which match the benefit obligations.

The weighted-average discount rates used to determine the 2009 benefit obligations related to the Company's pension and postretirement plans were 5.25 percent and 4.90 percent, respectively. A decrease of 50 basis points in the weighted-average discount rate would have increased the accumulated benefit obligation of the pension plans at January 30, 2010 by approximately \$26 million, while the effect on the postretirement plan would not have been significant. Such a decrease would not have significantly changed 2009 pension expense or postretirement income.

There is limited risk to the Company for increases in health care costs related to the postretirement plan as, beginning in 2001, new retirees have assumed the full expected costs and then-existing retirees have assumed all increases in such costs.

The Company expects to record postretirement income of approximately \$6 million and pension expense of approximately \$23 million in 2010.

Income Taxes

In accordance with GAAP, deferred tax assets are recognized for tax credit and net operating loss carryforwards, reduced by a valuation allowance, which is established when it is more likely than not that some portion or all of the deferred tax assets will not be realized. Management is required to estimate taxable income for future years by taxing jurisdiction and to use its judgment to determine whether or not to record a valuation allowance for part or all of a deferred tax asset. Estimates of taxable income are based upon the Company's three-year strategic plans. A one percent change in the Company's overall statutory tax rate for 2009 would have resulted in a \$10 million change in the carrying value of the net deferred tax asset and a corresponding charge or credit to income tax expense depending on whether such tax rate change was a decrease or an increase.

The Company has operations in multiple taxing jurisdictions and is subject to audit in these jurisdictions. Tax audits by their nature are often complex and can require several years to resolve. Accruals of tax contingencies require management to make estimates and judgments with respect to the ultimate outcome of tax audits. Actual results could vary from these estimates.

The Company expects its 2010 effective tax rate to range from 36 to 37 percent. The actual rate will primarily depend upon the percentage of the Company's income earned in the United States as compared with international operations.

Recent Accounting Pronouncements

In July of 2009, the Company adopted the FASB Accounting Standards Codification (“Codification”), which establishes the Codification as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. The historical GAAP hierarchy was eliminated and the Codification became the only level of authoritative GAAP, other than guidance issued by the SEC. The FASB will not issue new standards in the form of Statements, FASB Staff Positions or Emerging Issues Task Force Abstracts. Instead, it will issue Accounting Standards Updates (“ASUs”). ASUs will serve to update the Codification, provide background information about the guidance and provide the basis for conclusions on changes in the Codification. The Codification was effective for all financial statements issued for interim and annual periods ending after September 15, 2009. Accordingly, the Company has reflected all necessary changes in this filing.

Recently issued accounting pronouncements did not, or are not believed by management to, have a material effect on the Company’s present or future consolidated financial statements.

Disclosure Regarding Forward-Looking Statements

This report contains forward-looking statements within the meaning of the federal securities laws. All statements, other than statements of historical facts, which address activities, events or developments that the Company expects or anticipates will or may occur in the future, including, but not limited to, such things as future capital expenditures, expansion, strategic plans, financial objectives, dividend payments, stock repurchases, growth of the Company’s business and operations, including future cash flows, revenues and earnings, and other such matters are forward-looking statements. These forward-looking statements are based on many assumptions and factors detailed in the Company’s filings with the Securities and Exchange Commission, including the effects of currency fluctuations, customer demand, fashion trends, competitive market forces, uncertainties related to the effect of competitive products and pricing, customer acceptance of the Company’s merchandise mix and retail locations, the Company’s reliance on a few key vendors for a majority of its merchandise purchases (including a significant portion from one key vendor), pandemics and similar major health concerns, unseasonable weather, further deterioration of global financial markets, economic conditions worldwide, further deterioration of business and economic conditions, any changes in business, political and economic conditions due to the threat of future terrorist activities in the United States or in other parts of the world and related U.S. military action overseas, the ability of the Company to execute effectively its strategic plan and its business plans with regard to each of its business units, and risks associated with foreign global sourcing, including political instability, changes in import regulations, and disruptions to transportation services and distribution.

Any changes in such assumptions or factors could produce significantly different results. The Company undertakes no obligation to update forward-looking statements, whether as a result of new information, future events, or otherwise.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Information regarding interest rate risk management and foreign exchange risk management is included in the “Financial Instruments and Risk Management” note under “Item 8. Consolidated Financial Statements and Supplementary Data.”

Item 8. Consolidated Financial Statements and Supplementary Data

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of
Foot Locker, Inc.:

We have audited the accompanying consolidated balance sheets of Foot Locker, Inc. and subsidiaries as of January 30, 2010 and January 31, 2009, and the related consolidated statements of operations, comprehensive income (loss), shareholders' equity, and cash flows for each of the years in the three-year period ended January 30, 2010. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Foot Locker, Inc. and subsidiaries as of January 30, 2010 and January 31, 2009, and the results of their operations and their cash flows for each of the years in the three-year period ended January 30, 2010, in conformity with U.S. generally accepted accounting principles.

As discussed in the Notes to the Consolidated Financial Statements, the Company adopted the provisions of SFAS No. 157, "Fair Value Measurements" (included in FASB ASC Topic 820, "Fair Value Measurements and Disclosures") as of February 3, 2008, for the fair value measurements of all financial assets and financial liabilities and for fair value measurements of nonfinancial items that are recognized or disclosed at fair value in the financial statements on a recurring basis. In addition, effective February 4, 2007, the Company adopted the provisions of FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (included in FASB ASC Topic 740, "Income Taxes").

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Foot Locker, Inc.'s internal control over financial reporting as of January 30, 2010, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 29, 2010 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements include the accounts of Foot Locker, Inc. and its domestic and international subsidiaries (the "Company"), all of which are wholly owned. All significant intercompany amounts have been eliminated. The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

In July of 2009, the Company adopted the FASB Accounting Standards Codification ("ASC" and collectively, the "Codification"), which establishes the Codification as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. The historical GAAP hierarchy was eliminated and the Codification became the only level of authoritative GAAP, other than guidance issued by the SEC. The FASB will not issue new standards in the form of Statements, FASB Staff Positions or Emerging Issues Task Force Abstracts. Instead, it will issue Accounting Standards Updates ("ASUs"). ASUs will serve to update the Codification, provide background information about the guidance and provide the basis for conclusions on changes in the Codification. The Codification was effective for all financial statements issued for interim and annual periods ending after September 15, 2009. Accordingly, the Company has reflected all necessary changes in this filing.

Reporting Year

The reporting period for the Company is the Saturday closest to the last day in January. Fiscal years 2009, 2008 and 2007 represent the 52 week periods ending January 30, 2010, January 31, 2009 and February 2, 2008, respectively. References to years in this annual report relate to fiscal years rather than calendar years.

Revenue Recognition

Revenue from retail stores is recognized at the point of sale when the product is delivered to customers. Internet and catalog sales revenue is recognized upon estimated receipt by the customer. Sales include shipping and handling fees for all periods presented. Sales include merchandise, net of returns, and exclude taxes. The Company provides for estimated returns based on return history and sales levels. Revenue from layaway sales is recognized when the customer receives the product, rather than when the initial deposit is paid.

Gift Cards

The Company sells gift cards to its customers, which do not have expiration dates. Revenue from gift card sales is recorded when the gift cards are redeemed or when the likelihood of the gift card being redeemed by the customer is remote and there is no legal obligation to remit the value of unredeemed gift cards to the relevant jurisdictions. The Company has determined its gift card breakage rate based upon historical redemption patterns. Historical experience indicates that after 12 months the likelihood of redemption is deemed to be remote. Gift card breakage income is included in selling, general and administrative expenses and totaled \$4 million, \$5 million, and \$4 million in 2009, 2008, and 2007, respectively. Unredeemed gift cards are recorded as a current liability.

Statement of Cash Flows

The Company has selected to present the operations of the discontinued businesses as one line in the Consolidated Statements of Cash Flows. For all the periods presented this caption includes only operating activities.

Store Pre-Opening and Closing Costs

Store pre-opening costs are charged to expense as incurred. In the event a store is closed before its lease has expired, the estimated post-closing lease exit costs, less the sublease rental income, is provided for once the store ceases to be used.

Advertising Costs and Sales Promotion

Advertising and sales promotion costs are expensed at the time the advertising or promotion takes place, net of reimbursements for cooperative advertising. Advertising expenses also include advertising costs as required by some of the Company's mall-based leases. Cooperative advertising reimbursements earned for the launch and promotion of certain products agreed upon with vendors is recorded in the same period as the associated expenses are incurred. The Company accounts for reimbursements received in excess of expenses incurred related to specific, incremental, identifiable advertising, as a reduction to the cost of merchandise, which is reflected in cost of sales as the merchandise is sold.

Advertising costs, which are included as a component of selling, general and administrative expenses were as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
		(in millions)	
Advertising expenses	\$ 94.0	\$106.8	\$105.9
Cooperative advertising reimbursements	<u>(25.2)</u>	<u>(40.2)</u>	<u>(34.8)</u>
Net advertising expense	<u>\$ 68.8</u>	<u>\$ 66.6</u>	<u>\$ 71.1</u>

Catalog Costs

Catalog costs, which primarily comprise paper, printing, and postage, are capitalized and amortized over the expected customer response period related to each catalog, which is generally 90 days. Cooperative reimbursements earned for the promotion of certain products are agreed upon with vendors and are recorded in the same period as the associated catalog expenses are amortized. Prepaid catalog costs totaled \$3.9 million and \$3.1 million at January 30, 2010 and January 31, 2009, respectively.

Catalog costs, which are included as a component of selling, general and administrative expenses, were as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
		(in millions)	
Catalog costs	\$48.4	\$48.0	\$45.6
Cooperative reimbursements	<u>(4.3)</u>	<u>(4.1)</u>	<u>(3.8)</u>
Net catalog expense	<u>\$44.1</u>	<u>\$43.9</u>	<u>\$41.8</u>

Earnings Per Share

The Company accounts for and discloses net earnings (loss) per share using the treasury stock method. The Company's basic earnings per share is computed by dividing the Company's reported net income (loss) for the period by the weighted-average number of common shares outstanding at the end of the period. The Company's restricted stock awards, which contain non-forfeitable rights to dividends, are considered participating securities and are included in the calculation of basic earnings per share. Diluted earnings per share reflects the weighted-average number of common shares outstanding during the period used in the basic earnings per share computation plus dilutive common stock equivalents.

The computation of basic and diluted earnings per share is as follows:

	2009	2008	2007
		(in millions)	
Net income (loss) from continuing operations	\$ 47	\$ (79)	\$ 43
Weighted-average common shares outstanding	156.0	154.0	154.0
Basic Earnings per share from continuing operations	\$ 0.30	\$ (0.52)	\$ 0.29
Weighted-average common shares outstanding	156.0	154.0	154.0
Dilutive effect of potential common shares	0.3	—	1.6
Weighted-average common shares outstanding assuming dilution	156.3	154.0	155.6
Diluted earnings per share from continuing operations	\$ 0.30	\$ (0.52)	\$ 0.28

Potential common shares include the dilutive effect of stock options and restricted stock units. Options to purchase 6.3 million, 4.8 million, and 3.4 million shares of common stock at January 30, 2010, January 31, 2009, and February 2, 2008, respectively, were not included in the computations because the exercise price of the options was greater than the average market price of the common shares and, therefore, the effect of their inclusion would be antidilutive. Additionally, due to a loss reported for the year ended January 31, 2009, options and awards of 1.2 million shares of common stock were excluded from the calculation of diluted earnings per share as the effect would be antidilutive.

Share-Based Compensation

The Company recognizes compensation expense in the financial statements for share-based awards based on the grant date fair value of those awards. Additionally, stock-based compensation expense includes an estimate for pre-vesting forfeitures and is recognized over the requisite service periods of the awards. See Note 21, "Share-Based Compensation," for information on the assumptions the Company used to calculate the fair value of share-based compensation.

Upon exercise of stock options, issuance of restricted stock or issuance of shares under the employee stock purchase plan, the Company will issue authorized but unissued common stock or use common stock held in treasury. The Company may make repurchases of its common stock from time to time, subject to legal and contractual restrictions, market conditions and other factors.

Cash and Cash Equivalents

The Company considers all highly liquid investments with original maturities of three months or less, including money market funds, to be cash equivalents. Amounts due from third party credit card processors for the settlement of debit and credit card transactions are included as cash equivalents as they are generally collected within three business days. Cash equivalents at January 30, 2010 and January 31, 2009 were \$501 million and \$331 million, respectively.

Investments

The Company's short-term investment and auction rate security are classified as available-for-sale. Changes in the fair value of available-for-sale securities are reported as a component of accumulated other comprehensive loss in the Consolidated Statements of Shareholders' Equity and are not reflected in the Consolidated Statements of Operations until a sale transaction occurs or when declines in fair value are deemed to be other-than-temporary. The Company routinely reviews available-for-sale securities for other-than-temporary declines in fair value below the cost basis, and when events or changes in circumstances indicate the carrying value of a security may not be recoverable, the security is written down to fair value. The Company's short-term investment was \$7 million and \$23 million at January 30, 2010 and January 31, 2009, respectively. The Company's auction rate security was \$5 million and \$2 million at January 30, 2010 and January 31, 2009, respectively. See Note 19, "Fair Value Measurements," for further discussion of these investments.

Merchandise Inventories and Cost of Sales

Merchandise inventories for the Company's Athletic Stores are valued at the lower of cost or market using the retail inventory method. Cost for retail stores is determined on the last-in, first-out ("LIFO") basis for domestic inventories and on the first-in, first-out ("FIFO") basis for international inventories. The retail inventory method is commonly used by retail companies to value inventories at cost and calculate gross margins due to its practicality. Under the retail inventory method, cost is determined by applying a cost-to-retail percentage across groupings of similar items, known as departments. The cost-to-retail percentage is applied to ending inventory at its current owned retail valuation to determine the cost of ending inventory on a department basis. The Company provides reserves based on current selling prices when the inventory has not been marked down to market. Merchandise inventories of the Direct-to-Customers business are valued at the lower of cost or market using weighted-average cost, which approximates FIFO. Transportation, distribution center, and sourcing costs are capitalized in merchandise inventories. The Company expenses the freight associated with transfers between its store locations in the period incurred. The Company maintains an accrual for shrinkage based on historical rates.

Cost of sales is comprised of the cost of merchandise, occupancy, buyers' compensation and shipping and handling costs. The cost of merchandise is recorded net of amounts received from vendors for damaged product returns, markdown allowances and volume rebates, as well as cooperative advertising reimbursements received in excess of specific, incremental advertising expenses. Occupancy includes the amortization of amounts received from landlords for tenant improvements.

Property and Equipment

Property and equipment are recorded at cost, less accumulated depreciation and amortization. Significant additions and improvements to property and equipment are capitalized. Maintenance and repairs are charged to current operations as incurred. Major renewals or replacements that substantially extend the useful life of an asset are capitalized and depreciated. Owned property and equipment are depreciated on a straight-line basis over the estimated useful lives of the assets: maximum of 50 years for buildings and 3 to 10 years for furniture, fixtures and equipment. Property and equipment under capital leases and improvements to leased premises are generally amortized on a straight-line basis over the shorter of the estimated useful life of the asset or the remaining lease term. Capitalized software reflects certain costs related to software developed for internal use that are capitalized and amortized. After substantial completion of a project, the costs are amortized on a straight-line basis over a 2 to 7 year period. Capitalized software, net of accumulated amortization, is included as a component of property and equipment and was \$24 million and \$23 million at January 30, 2010 and January 31, 2009, respectively.

Recoverability of Long-Lived Assets

The Company recognizes impairment losses whenever events or changes in circumstances indicate that the carrying amounts of long-lived tangible and intangible assets with finite lives may not be recoverable. Management's policy in determining whether an impairment indicator exists, a triggering event, comprises measurable operating performance criteria at the division level, as well as qualitative measures. The Company considers historical performance and future estimated results, which are predominately identified from the Company's three-year strategic plans, in its evaluation of potential store-level impairment and then compares the carrying amount of the asset with the estimated future cash flows expected to result from the use of the asset. If the carrying amount of the asset exceeds the estimated expected undiscounted future cash flows, the Company measures the amount of the impairment by comparing the carrying amount of the asset with its estimated fair value. The estimation of fair value is measured by discounting expected future cash flows at the Company's weighted-average cost of capital. The Company estimates fair value based on the best information available using estimates, judgments and projections as considered necessary.

Goodwill and Other Intangible Assets

The Company reviews goodwill and intangible assets with indefinite lives for impairment annually during the first quarter of its fiscal year or more frequently if impairment indicators arise. The fair value of each reporting unit is determined using a combination of market and discounted cash flow approaches.

Derivative Financial Instruments

All derivative financial instruments are recorded in the Company's Consolidated Balance Sheets at their fair values. Changes in fair values of derivatives are recorded each period in earnings, other comprehensive gain or loss, or as a basis adjustment to the underlying hedged item, depending on whether a derivative is designated and is effective as part of a hedge transaction. The effective portion of the gain or loss on the hedging derivative instrument is reported as a component of other comprehensive income/loss or as a basis adjustment to the underlying hedged item and reclassified to earnings in the period in which the hedged item affects earnings.

The effective portion of the gain or loss on hedges of foreign net investments is generally not reclassified to earnings unless the net investment is disposed of. To the extent derivatives do not qualify as hedges, or are ineffective, their changes in fair value are recorded in earnings immediately, which may subject the Company to increased earnings volatility. The changes in the fair value of the Company's hedges of net investments in various foreign subsidiaries are computed using the spot method.

Fair Value

The Company adopted the provisions as prescribed by ASC 820, "Fair Value Measurements and Disclosures," for the year ended January 31, 2009. The Company categorizes its financial instruments into a three-level fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure fair value fall within different levels of the hierarchy, the category level is based on the lowest priority level input that is significant to the fair value measurement of the instrument. Fair value is determined based upon the exit price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants exclusive of any transaction costs.

The Company's financial assets recorded at fair value are categorized as follows:

Level 1 – Quoted prices for identical instruments in active markets.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs or significant value-drivers are observable in active markets.

Level 3 – Model-derived valuations in which one or more significant inputs or significant value-drivers are unobservable.

Income Taxes

The Company determines its deferred tax provision under the liability method, whereby deferred tax assets and liabilities are recognized for the expected tax consequences of temporary differences between the tax basis of assets and liabilities and their reported amounts using presently enacted tax rates. Deferred tax assets are recognized for tax credits and net operating loss carryforwards, reduced by a valuation allowance, which is established when it is more likely than not that some portion or all of the deferred tax assets will not be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

A taxing authority may challenge positions that the Company adopted in its income tax filings. Accordingly, the Company may apply different tax treatments for transactions in filing its income tax returns than for income tax financial reporting. The Company regularly assesses its tax positions for such transactions and records reserves for those differences when considered necessary.

Provision for U.S. income taxes on undistributed earnings of foreign subsidiaries is made only on those amounts in excess of the funds considered to be permanently reinvested.

On February 4, 2007, the Company adopted authoritative guidance for the Accounting for Uncertainty in Income Taxes, as prescribed by ASC 740, "Income Taxes." The guidance clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements and prescribes a recognition threshold and measurement standard for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. Upon the adoption of the guidance, the Company recognized a \$1 million increase to retained earnings to reflect the change of its liability for its unrecognized income tax benefits. The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense.

Pension and Postretirement Obligations

The discount rate selected to measure the present value of the Company's U.S. benefit obligations at January 30, 2010 was derived using a cash flow matching method whereby the Company matches the plans' projected payment obligations by year with the corresponding yield on the Citibank Pension Discount Curve. The cash flows are then discounted to their present value and an overall discount rate is determined. The discount rate selected to measure the present value of the Company's Canadian benefit obligations at January 30, 2010 was developed by using the plan's bond portfolio indices, which match the benefit obligations.

Insurance Liabilities

The Company is primarily self-insured for health care, workers' compensation and general liability costs. Accordingly, provisions are made for the Company's actuarially determined estimates of discounted future claim costs for such risks, for the aggregate of claims reported and claims incurred but not yet reported. Self-insured liabilities totaled \$15 million and \$16 million at January 30, 2010 and January 31, 2009, respectively. The Company discounts its workers' compensation and general liability using a risk-free interest rate. Imputed interest expense related to these liabilities was not significant for 2009 and 2008 and was \$1 million in 2007.

Accounting for Leases

The Company recognizes rent expense for operating leases as of the possession date for store leases or the commencement of the agreement for a non-store lease. Rental expense, inclusive of rent holidays, concessions and tenant allowances are recognized over the lease term on a straight-line basis. Contingent payments based upon sales and future increases determined by inflation-related indices cannot be estimated at the inception of the lease and accordingly, are charged to operations as incurred.

Foreign Currency Translation

The functional currency of the Company's international operations is the applicable local currency. The translation of the applicable foreign currency into U.S. dollars is performed for balance sheet accounts using current exchange rates in effect at the balance sheet date and for revenue and expense accounts using the weighted-average rates of exchange prevailing during the year. The unearned gains and losses resulting from such translation are included as a separate component of accumulated other comprehensive loss within shareholders' equity.

Recent Accounting Pronouncements Not Previously Discussed Herein

Recently issued accounting pronouncements did not, or are not believed by management to, have a material effect on the Company's present or future consolidated financial statements.

2. Segment Information

The Company has determined that its reportable segments are those that are based on its method of internal reporting. As of January 30, 2010, the Company has two reportable segments, Athletic Stores and Direct-to-Customers. The Company acquired CCS during the fourth quarter of 2008, and its operations are presented within the Direct-to-Customers segment. The Company also operated the Family Footwear segment, which included the retail format under the Footquarters brand name through the second quarter of 2007. During the third quarter, the Company converted the Footquarters stores, which were the only stores reported under the Family Footwear segment, to Foot Locker and Champs Sports outlet stores. The Company has concluded that the Footquarters store closings are not discontinued operations.

The accounting policies of both segments are the same as those described in the "Summary of Significant Accounting Policies" note. The Company evaluates performance based on several factors, of which the primary financial measure is division results. Division profit (loss) reflects income (loss) from continuing operations before income taxes, corporate expense, non-operating income, and net interest expense.

Sales

	2009	2008	2007
		(in millions)	
Athletic Stores	\$4,448	\$4,847	\$5,071
Direct-to-Customers	406	390	364
Family Footwear	—	—	2
Total sales	<u>\$4,854</u>	<u>\$5,237</u>	<u>\$5,437</u>

Operating Results

	2009	2008	2007
		(in millions)	
Athletic Stores ⁽¹⁾	\$114	\$ (59)	\$(27)
Direct-to-Customers ⁽²⁾	32	43	40
Family Footwear ⁽³⁾	—	—	(6)
	<u>146</u>	<u>(16)</u>	<u>7</u>
Restructuring income ⁽⁴⁾	1	—	2
Division profit (loss)	147	(16)	9
Corporate expense ⁽⁵⁾	(67)	(87)	(59)
Operating profit (loss)	80	(103)	(50)
Other income ⁽⁶⁾	3	8	1
Interest expense, net	10	5	1
Income (loss) from continuing operations before income taxes	<u>\$ 73</u>	<u>\$(100)</u>	<u>\$(50)</u>

- (1) The year ended January 30, 2010 includes non-cash impairment charges totaling \$32 million, which were recorded to write-down long-lived assets such as store fixtures and leasehold improvements at the Company's Lady Foot Locker, Kids Foot Locker, Footaction, and Champs Sports divisions. The year ended January 31, 2009 includes a \$241 million charge representing long-lived store asset impairment, goodwill and other intangibles impairment and store closing costs related to the Company's U.S. operations. The year ended February 2, 2008 includes a \$128 million charge representing impairment and store closing costs related to the Company's U.S. operations.
- (2) Included in the results for the year ended January 30, 2010 is a non-cash impairment charge of \$4 million to write off software development costs.
- (3) During the first quarter of 2007, the Company launched a new family footwear concept, Footquarters. The concept's results did not meet the Company's expectations and, therefore, the Company decided not to invest further in this business. These stores were converted to the Company's other formats. Included in the operating loss of \$6 million was \$2 million of costs associated with the removal of signage and the write-off of unusable fixtures.
- (4) During 2009, the Company adjusted its 1999 restructuring reserves to reflect a favorable lease termination. During 2007, the Company adjusted its 1993 Repositioning and 1991 Restructuring reserve by \$2 million primarily due to favorable lease terminations.
- (5) During the fourth quarter of 2009, the Company restructured its organization by consolidating the Lady Foot Locker, Foot Locker U.S., Kids Foot Locker and Footaction businesses in addition to reducing corporate staff resulting in a \$5 million charge. Included in corporate expense for the year ended January 31, 2009 is a \$3 million other-than-temporary impairment charge related to the investment in the Reserve International Liquidity Fund. Additionally, for the year ended January 31, 2009 the Company recorded a \$15 million impairment charge on the Northern Group note receivable.
- (6) Other income includes non-operating items, such as gains from insurance recoveries, gains on the repurchase and retirement of bonds, royalty income, the changes in fair value, premiums paid and realized gains associated with foreign currency option contracts, described more fully in Note 4, "Other Income."

	Depreciation and Amortization			Capital Expenditures			Total Assets		
	2009	2008	2007	2009	2008	2007	2009	2008	2007
					(in millions)

Total Company	<u>\$112</u>	<u>\$130</u>	<u>\$166</u>	<u>\$89</u>	<u>\$146</u>	<u>\$148</u>	<u>\$2,816</u>	<u>\$2,877</u>	<u>\$3,243</u>

Sales and long-lived asset information by geographic area as of and for the fiscal years ended January 30, 2010, January 31, 2009, and February 2, 2008 are presented below. Sales are attributed to the country in which the sales originate, which is where the legal subsidiary is domiciled. Long-lived assets reflect property and equipment. The Company's sales in Italy, Canada, and France represent approximately 24, 17, and 14 percent, respectively, of the International category's sales for the period ended January 30, 2010. No other individual country included in the International category is significant.

Sales

	<u>2009</u>	<u>2008</u>	<u>2007</u>

Total impairment and other charges	<u>\$41</u>	<u>\$259</u>	<u>\$128</u>

Impairment of Assets

During the year ended January 30, 2010, the Company recorded non-cash impairment charges totaling \$36 million. A charge of \$32 million was recorded to write-down long-lived assets such as store fixtures and leasehold improvements at its Lady Foot Locker, Kids Foot Locker, Footaction and Champs Sports divisions for 787 stores. Additionally, the Company recorded a charge of \$4 million to write off certain software development costs for the Direct-to-Customers segment as a result of management's decision to terminate this project. During 2008, the Company evaluated the long-lived assets of its U.S. retail store divisions, comprising Foot Locker U.S., Kids Foot Locker, Footaction and Champs Sports, for impairment and recorded non-cash impairment charges of \$67 million primarily to write-down long-lived assets such as store fixtures and leasehold improvements for 868 stores. During 2007, the Company evaluated the long-lived assets of its U.S. retail store divisions for impairment and recorded non-cash impairment charges of \$124 million primarily to write-down long-lived assets such as store fixtures and leasehold improvements for 1,461 stores.

Reorganization Costs

On January 8, 2010, the Company announced that it would change its organizational structure by consolidating the management team that oversees its Lady Foot Locker business with the team that currently manages the Foot Locker U.S., Kids Foot Locker and Footaction businesses. As a result of this divisional reorganization, as well as certain corporate staff reductions taken to improve corporate efficiency, the Company recorded a charge of \$5 million. This charge was comprised primarily of severance costs to eliminate approximately 120 positions.

Store Closing Program

As part of the Company's store closing program announced in 2007, the Company recognized exit costs of \$5 million for the year ended January 31, 2009, comprising primarily lease termination costs for 21 stores. In 2007, the Company recognized \$4 million of exit costs related to 33 stores, which closed during 2007, comprising primarily lease termination costs. Store closings may constitute discontinued operations if migration of customers and cash flows are not expected. The Company has concluded that no store closings have met the criteria for discontinued operations treatment.

Impairment of Goodwill and Other Intangible Assets

The Company performs its annual goodwill impairment test as of the beginning of each year. However, during the fourth quarter of 2008, as a result of the significant decline in the Company's common stock and market capitalization in relation to the book value, the Company determined that a triggering event had occurred and performed an interim goodwill impairment test. Based on this testing, the Company determined that the fair values were less than the carrying values of the Foot Locker, Kids Foot Locker and Footaction reporting unit and the Champs Sports reporting unit. Accordingly, the Company performed further analysis to determine the extent of the goodwill impairment and concluded that the carrying value of these two reporting units was fully impaired, resulting in a non-cash impairment charge of \$167 million. There were no goodwill impairment charges in 2009 or 2007.

Intangible assets that are determined to have finite lives are amortized over their useful lives and are measured for impairment only when events or circumstances indicate that the carrying value may be impaired. Intangible assets with indefinite lives are tested for impairment if impairment indicators arise and, at a minimum, annually. As a result of the impairment review related to long-lived assets and goodwill, the Company performed a review of its other intangible assets and recorded impairment charges in 2008 totaling \$2 million related to trademarks of Footaction in the U.S. and Foot Locker in the Republic of Ireland, reflecting decreases in projected revenues. There were no other intangible asset impairment charges in 2009 or 2007.

Money Market Impairment

On September 16, 2008, the Company requested redemption of its shares in the Reserve International Liquidity Fund, Ltd., a money market fund (the "Fund"), totaling \$75 million. At the time the redemption request was made, the Company was informed by the Reserve Management Company, the Fund's investment advisor, that the Company's redemption trades would be honored at a \$1.00 per share net asset value. Litigation, to which the Company is not a party, exists that involves how the remaining assets of the Fund should be distributed; therefore, there is a risk that the Company could receive less than the \$1.00 per share net asset value. As a result, during the third quarter of 2008, the Company recognized an impairment loss of \$3 million to reflect a decline in fair value that is other-than-temporary. This charge was recorded with no tax benefit. The impairment was related to the underlying securities of Lehman Brothers Holdings Inc. held in the Fund. The Company has received \$65 million of its original investment in the Fund as of January 30, 2010; however, the Company has not received information as to when the remaining amount of its redemption request will be paid.

Northern Group Note Impairment

On January 23, 2001, the Company announced that it was exiting its Northern Group segment. During the second quarter of 2001, the Company completed the liquidation of the 324 stores in the United States. On September 28, 2001, the Company completed the stock transfer of the 370 Northern Group stores in Canada through one of its wholly owned subsidiaries for approximately CAD\$59 million, which was paid in the form of a note. Over the last several years, the note has been amended and payments have been received; however, the interest and payment terms remained unchanged. The CAD\$15.5 million note was required to be repaid upon the occurrence of "payment events," as defined in the purchase agreement, but no later than September 28, 2008. During the first quarter of 2008, the principal owners of the Northern Group requested an extension on the repayment of the note. The Company determined, based on the Northern Group's current financial condition and projected performance, that repayment of the note pursuant to the original terms of the purchase agreement was not likely. Accordingly, a non-cash impairment charge of \$15 million was recorded during the first quarter of 2008. This charge was recorded with no tax benefit. The tax benefit is a capital loss that can only be used to offset capital gains. The Company does not anticipate recognizing sufficient capital gains to utilize these losses. Therefore, the Company determined that a full valuation allowance was required.

Another wholly owned subsidiary of the Company was the assignor of the store leases involved in the Northern Group transaction and, therefore, retains potential liability for such leases. As the assignor of the Northern Canada leases, the Company remained secondarily liable under these leases. At January 30, 2010, the Company estimates that its gross contingent lease liability is CAD\$1 million. The Company currently estimates the expected value of the lease liability to be insignificant. The Company believes that, because it is secondarily liable on the leases, it is unlikely that it would be required to make such contingent payments.

4. Other Income

Other income was \$3 million, \$8 million and \$1 million for 2009, 2008 and 2007, respectively. For the year ended January 30, 2010, other income includes \$4 million related to gains from insurance recoveries, gains on the purchase and retirement of bonds, and royalty income partially offset by \$1 million of foreign currency option contract premiums. Other income in 2008 primarily reflects a \$4 million net gain related to the Company's foreign currency options contracts and a \$3 million gain on lease terminations related to two lease interests in Europe. For 2007, other income includes a \$1 million gain related to a final settlement with the Company's insurance carriers of a claim related to a store damaged by fire in 2006. Additionally, the Company sold two of its lease interests in Europe for a gain of \$1 million. These gains were offset primarily by premiums paid for foreign currency option contracts.

5. Merchandise Inventories

Total other intangible assets	<u>\$262</u>	<u>\$(163)</u>	<u>\$99</u>		<u>\$251</u>	<u>\$(138)</u>	<u>\$113</u>

(1) Includes the effect of foreign currency translation, which represents an increase of \$3 million in 2009 and a reduction of \$8 million in 2008, primarily related to the movements of the euro in relation to the U.S. dollar. Additionally, the net value at January 31, 2009 includes a \$2 million impairment charge related to the Footaction trademark and the Republic of Ireland trademark, described more fully in Note 3.

(2) The weighted-average useful life disclosed excludes those assets that are fully amortized.

Lease acquisition costs represent amounts that are required to secure prime lease locations and other lease rights, primarily in Europe. Included in finite life intangibles are the customer relationship intangible associated with the purchase of CCS, trademark for the Footaction name, favorable leases associated with acquisitions and amounts paid to obtain names of members of the Footaction loyalty program. The CCS customer relationship intangible is amortized on a straight-line basis over 5 years, which represents the pattern in which the economic benefits are expected to be realized.

Amortization expense for the intangibles subject to amortization was \$19 million, \$18 million, and \$19 million for 2009, 2008, and 2007, respectively. Annual estimated amortization expense for finite life intangible assets is expected to approximate \$18 million for 2010, \$16 million for 2011, \$14 million for 2012, \$9 million for 2013 and \$3 million for 2014.

	<u>\$218</u>	<u>\$231</u>

(1) Customer deposits include unredeemed gift cards and certificates, merchandise credits, and deferred revenue related to undelivered merchandise, including layaway sales.

12. Revolving Credit Facility

On March 20, 2009, the Company entered into a credit agreement (the "2009 Credit Agreement") with its banks, providing for a \$200 million asset-based revolving credit facility maturing on March 20, 2013, which replaced the Company's prior credit agreement. The 2009 Credit Agreement also provides for an incremental facility of up to \$100 million under certain circumstances. The 2009 Credit Agreement provides for a security interest in certain of the Company's domestic assets, including certain inventory assets. The Company is not required to comply with any financial covenants as long as there are no outstanding borrowings. If the Company is borrowing, then it may not make Restricted Payments, such as dividends or share repurchases, unless there is at least \$50 million of Excess Availability (as defined in the 2009 Credit Agreement), and the Company's projected fixed charge coverage ratio, which is a Non-GAAP financial ratio pursuant to the 2009 Credit Agreement designed as a measure of the Company's ability to meet current and future obligations (Consolidated EBITDA less capital expenditures less cash taxes divided by Debt Service Charges and Restricted Payments), is at least 1.1 to 1.0. The Company's management does not currently expect to borrow under the facility in 2010.

At January 30, 2010, the Company had unused domestic lines of credit of \$190 million pursuant to its \$200 million revolving credit agreement, of which \$10 million was committed to support standby letters of credit. The letters of credit are primarily used for insurance programs.

Deferred financing fees are amortized over the life of the facility on a straight-line basis, which is comparable to the interest method. The unamortized balance at January 30, 2010 is \$6.6 million. Interest is based on the LIBOR rate in effect at the time of the borrowing plus a 3.25 to 3.75 percent applicable margin, as defined in the 2009 Credit Agreement. The quarterly facility fees paid on the unused portion ranged from 0.40 percent to 0.75 percent for 2009 and 2008. There were no short-term borrowings during 2009 or 2008. The amounts paid prior to March 20, 2009 relate to the predecessor credit agreement. Interest expense, including facility fees, related to the revolving credit facility was \$3 million and \$2 million in 2009 and 2008, respectively.

13. Long-Term Debt

The Company's long-term debt reflects the Company's 8.50 percent debentures payable in 2022. The Company has historically employed various interest rate swaps to minimize its exposure to interest rate fluctuations. During the first quarter of 2009, the Company terminated the interest rate swaps for a gain of \$19 million. The gain is being amortized as part of interest expense over the remaining term of the debt, using the effective-yield method. This amortization totaled \$1 million in 2009.

The Company's long term debt was \$138 million and \$142 million for the years ended January 30, 2010 and January 31, 2009, respectively. During 2009, the Company purchased and retired \$3 million of its 8.50 percent debentures. Interest expense related to long-term debt, including the effect of the interest rate swaps and the amortization of the associated debt issuance costs, was \$9 million in each of 2009 and 2008, and \$18 million in 2007.

14. Leases

The Company is obligated under operating leases for almost all of its store properties. Some of the store leases contain renewal options with varying terms and conditions. Management expects that in the normal course of business, expiring leases will generally be renewed or, upon making a decision to relocate, replaced by leases on other premises. Operating lease periods generally range from 5 to 10 years. Certain leases provide for additional rent payments based on a percentage of store sales. Most of the Company's leases require the payment of certain executory costs such as insurance, maintenance, and other costs in addition to the future minimum lease payments. These costs totaled \$138 million, \$147 million, and \$151 million in 2009, 2008 and 2007, respectively. Included in the amounts below, are non-store expenses that totaled \$15 million in both 2009 and 2008 and \$16 million in 2007.

	<u>2009</u>	<u>2008</u>	<u>2007</u>
	(in millions)		
Minimum rent	\$514	\$527	\$521
Contingent rent based on sales	14	14	17
Sublease income	(2)	(2)	(1)
	<u>\$526</u>	<u>\$539</u>	<u>\$537</u>

Future minimum lease payments under non-cancelable operating leases, net of future non-cancelable operating sublease payments, are:

	(in millions)
2010	\$ 487
2011	441
2012	380
2013	312
2014	261
Thereafter	<u>669</u>

Reserve for discontinued operations	8	10
Deferred taxes	—	12
Other	<u>11</u>	<u>12</u>
	<u>\$297</u>	<u>\$393</u>

16. Discontinued Operations

In 1997, the Company exited its Domestic General Merchandise segment. In 1998, the Company exited both its International General Merchandise and Specialty Footwear segments. In 2001, the Company discontinued its Northern Group segment. The remaining reserve balances at January 30, 2010 primarily represent lease obligations, of which \$2 million is expected to be utilized within twelve months and the remaining \$8 million thereafter. The balances at January 31, 2009 totaled \$12 million, of which \$2 million was classified as current and \$10 million was classified as non current. The majority of the reserve balance relates to the Domestic General Merchandise segment as the leases extend many years.

17. Income Taxes

Following are the domestic and international components of pre-tax income (loss) from continuing operations:

	2009	2008	2007
	(in millions)		
Domestic	\$(23)	\$(174)	\$(131)
International	96	74	81
Total pre-tax income (loss)	<u>\$ 73</u>	<u>\$(100)</u>	<u>\$ (50)</u>

The income tax provision (benefit) consists of the following:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
	(in millions)		
Current:			
Federal	\$(6)	\$ 2	\$ (3)
State and local	—	3	(4)
International	30	18	43
Total current tax provision	<u>24</u>	<u>23</u>	<u>36</u>
Deferred:

State and local	—	(6)	1
International	5	4	(78)
Total deferred tax provision (benefit)	<u>2</u>	<u>(44)</u>	<u>(129)</u>
Total income tax provision (benefit)	<u>\$26</u>	<u>\$(21)</u>	<u>\$ (93)</u>

Provision has been made in the accompanying Consolidated Statements of Operations for additional income taxes applicable to dividends received or expected to be received from international subsidiaries. The amount of unremitted earnings of international subsidiaries for which no such tax is provided and which is considered to be permanently reinvested in the subsidiaries totaled \$599 million and \$511 million at January 30, 2010, and January 31, 2009, respectively. Determination of the amount of the deferred tax liability, if any, related to permanently reinvested earnings is not practicable.

A reconciliation of the significant differences between the federal statutory income tax rate and the effective income tax rate on pre-tax income (loss) from continuing operations is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Federal statutory income tax rate	35.0%	(35.0)%	(35.0)%
State and local income taxes, net of federal tax benefit	0.2	(6.6)	(11.0)

Other current assets	17	29
Other current liabilities	(5)	(10)
Other liabilities	<u>—</u>	<u>(12)</u>
	<u>\$374</u>	<u>\$365</u>

The Company operates in multiple taxing jurisdictions and is subject to audit. Audits can involve complex issues that may require an extended period of time to resolve. A taxing authority may challenge positions that the Company has adopted in its income tax filings. Accordingly, the Company may apply different tax treatments for transactions in filing its income tax returns than for income tax financial reporting. The Company regularly assesses its tax positions for such transactions and records reserves for those differences.

The Company's U.S. Federal income tax filings have been examined by the Internal Revenue Service (the "IRS") through 2008. The Company is participating in the IRS's Compliance Assurance Process ("CAP") for 2009, which is expected to conclude during 2010. The Company has started the CAP for 2010. Due to the recent utilization of net operating loss carryforwards, the Company is subject to state and local tax examinations effectively including years from 1996 to the present. To date, no adjustments have been proposed in any audits that will have a material effect on the Company's financial position or results of operations.

As of January 30, 2010, the Company has a valuation allowance of \$12 million to reduce its deferred tax assets to an amount that is more likely than not to be realized. The valuation allowance primarily relates to the deferred tax assets arising from a capital loss associated with the 2008 impairment of the Northern Group note receivable, state tax loss carryforwards, and state tax credits. A full valuation allowance is required for the capital loss because the Company does not anticipate recognizing sufficient capital gains to utilize this loss. The valuation allowance for state tax loss carryforwards decreased principally due to anticipated expirations of those losses.

Based upon the level of historical taxable income and projections for future taxable income, which are based upon the Company's three-year strategic plans, over the periods in which the temporary differences are anticipated to reverse, management believes it is more likely than not that the Company will realize the benefits of these deductible differences, net of the valuation allowances at January 30, 2010. However, the amount of the deferred tax asset considered realizable could be adjusted in the future if estimates of taxable income are revised.

At January 30, 2010, the Company has a current year net operating loss with a potential benefit of \$38 million, which may be carried back up to five years or carried forward twenty years; and has federal tax credit carryforwards totaling \$36 million that expire between 2017 and 2029. The Company also has state operating loss carryforwards with a potential tax benefit of \$22 million that expire between 2010 and 2029. The Company will have, when recognized, a capital loss with a potential benefit of \$5 million arising from a note receivable. This loss will carryforward for 5 years after recognition. The Company has U.S. state and Canadian provincial credit carryforwards that total \$3 million, expiring between 2010 and 2022. The Company has international operating loss carryforwards with a potential tax benefit of \$2 million, expiring between 2010 and 2028.

The Company had \$58 million of gross unrecognized tax benefits and \$55 million of net unrecognized tax benefits, as of February 1, 2009. The Company has classified certain income tax liabilities as current or noncurrent based on management's estimate of when these liabilities will be settled. Interest expense and penalties related to unrecognized tax benefits are classified as income tax expense. The Company recognized \$1 million of interest expense in each of 2009, 2008, and 2007. The total amount of accrued interest and penalties was \$5 million in 2009 and \$4 million in 2008.

The following table summarizes the activity related to unrecognized tax benefits:

<u>(in millions)</u>	
Balance as of February 1, 2009	\$58
Foreign currency translation adjustments	6
Increases related to current year tax positions	4
Increases related to prior period tax positions	4
Decreases related to prior period tax positions	(2)
Settlements	—
Lapse of statute of limitations	—
Balance as of January 30, 2010	<u>\$70</u>

Of the unrecognized tax benefits, \$68 million would, if recognized, affect the Company's annual effective tax rate. It is reasonably possible that the liability associated with the Company's unrecognized tax benefits will increase or decrease within the next twelve months. These changes may be the result of foreign currency fluctuations, ongoing audits or the expiration of statutes of limitations. Settlements could increase earnings in an amount ranging from \$0 to \$5 million based on current estimates. Audit outcomes and the timing of audit settlements are subject to significant uncertainty. Although management believes that adequate provision has been made for such issues, the ultimate resolution of these issues could have an adverse effect on the earnings of the Company. Conversely, if these issues are resolved favorably in the future, the related provision would be reduced, generating a positive effect on earnings. Due to the uncertainty of amounts and in accordance with its accounting policies, the Company has not recorded any potential impact of these settlements.

18. Financial Instruments and Risk Management

The Company operates internationally and utilizes certain derivative financial instruments to mitigate its foreign currency exposures, primarily related to third party and intercompany forecasted transactions. As a result of the use of derivative instruments, the Company is exposed to the risk that counterparties will fail to meet their contractual obligations. To mitigate the counterparty credit risk, the Company has a policy of entering into contracts only with major financial institutions selected based upon their credit ratings and other financial factors. The Company monitors the creditworthiness of counterparties throughout the duration of the derivative instrument. Additional information is contained within Note 19, "Fair Value Measurements."

Derivative Holdings Designated as Hedges

For a derivative to qualify as a hedge at inception and throughout the hedged period, the Company formally documents the nature of the hedged items and the relationships between the hedging instruments and the hedged items, as well as its risk-management objectives, strategies for undertaking the various hedge transactions, and the methods of assessing hedge effectiveness and hedge ineffectiveness. In addition, for hedges of forecasted transactions, the significant characteristics and expected terms of a forecasted transaction must be specifically identified, and it must be probable that each forecasted transaction would occur. If it were deemed probable that the forecasted transaction would not occur, the gain or loss would be recognized in earnings immediately. No such gains or losses were recognized in earnings for any of the periods presented. Derivative financial instruments qualifying for hedge accounting must maintain a specified level of effectiveness between the hedging instrument and the item being hedged, both at inception and throughout the hedged period, which management evaluates periodically.

Cash Flow Hedges

The primary currencies to which the Company is exposed are the euro, the British pound, the Canadian dollar, and the Australian dollar. For option and forward foreign exchange contracts designated as cash flow hedges of the purchase of inventory, the effective portion of gains and losses is deferred as a component of accumulated other comprehensive loss ("AOCL") and is recognized as a component of cost of sales when the related inventory is sold. The change in AOCL related to such contracts was a decrease of \$3 million for the year ended January 30, 2010 and a \$1 million increase in AOCL for the year ended January 31, 2009. Cost of sales was reduced by approximately \$2 million for both 2009 and 2008 as a result of settling these derivative contracts. The ineffective portion of gains and losses related to cash flow hedges recorded to earnings was not significant for any of the periods presented. When using a forward contract as a hedging instrument, the Company excludes the time value from the assessment of effectiveness. At each year-end, the Company had not hedged forecasted transactions for more than the next twelve months, and the Company expects all derivative-related amounts reported in accumulated other comprehensive loss to be reclassified to earnings within twelve months.

Net Investment Hedges

The Company has numerous investments in foreign subsidiaries, and the net assets of those subsidiaries are exposed to foreign exchange-rate volatility. In 2005, the Company hedged a portion of its net investment in its European subsidiaries by entering into a 10-year cross currency swap, effectively creating a €100 million long-term liability and a \$122 million long-term asset. During the third quarter of 2008, the Company terminated this hedge by amending its existing cross currency swap and entering simultaneously into a new cross currency swap, thereby fixing the amount owed to the counterparty in 2015 at \$24 million. In 2006, the Company hedged a portion of its net investment in its Canadian subsidiaries. During the fourth quarter of 2008, the Company terminated this hedge and received approximately \$3 million.

The Company had designated these hedging instruments as hedges of the net investments in foreign subsidiaries, and used the spot rate method of accounting to value changes of the hedging instrument attributable to currency rate fluctuations. As such, adjustments in the fair market value of the hedging instrument due to changes in the spot rate were recorded in other comprehensive income and offset changes in the euro-denominated net investment. Amounts recorded to foreign currency translation within accumulated other comprehensive loss will remain there until the net investment is disposed of.

The amount recorded within the foreign currency translation adjustment included in accumulated other comprehensive loss on the Company's Consolidated Balance Sheet decreased shareholders' equity by \$15 million, \$15 million and \$20 million, net of tax at January 30, 2010, January 31, 2009 and February 2, 2008, respectively. The effect on the Consolidated Statements of Operations related to the net investment hedges was not significant for the year ended January 30, 2010, represented \$3 million of expense for 2008, and represented \$1 million of income for 2007.

Derivative Holdings Designated as Non-Hedges

The Company mitigates the effect of fluctuating foreign exchange rates on the reporting of foreign currency denominated earnings by entering into a variety of derivative instruments, including option currency contracts. Changes in the fair value of these foreign currency option contracts, which are designated as non-hedges, are recorded in earnings immediately within other income. The realized gains, premiums paid and changes in the fair market value recorded in the Consolidated Statements of Operations was not significant and was \$4 million of income for the years ended January 30, 2010 and January 31, 2009, respectively, and was not significant for the year ended February 2, 2008. The notional value of the option currency contract outstanding at January 30, 2010 was \$8 million.

The Company also enters into forward foreign exchange contracts to hedge foreign-currency denominated merchandise purchases and intercompany transactions. Net changes in the fair value of foreign exchange derivative financial instruments designated as non-hedges were substantially offset by the changes in value of the underlying transactions, which were recorded in selling, general and administrative expenses. The amount recorded for all the periods presented was not significant.

The Company enters into monthly diesel fuel forward and option contracts to mitigate a portion of the Company's freight expense due to the variability caused by fuel surcharges imposed by our third-party freight carriers. The notional value of the contracts outstanding at January 30, 2010 was \$4 million and these contracts extend through November 2010. Changes in the fair value of these contracts are recorded in earnings immediately. The effect was not significant for any of the periods presented.

As discussed above, the Company terminated its European net investment hedge during the third quarter of 2008. During the remaining term of the agreement, the Company will remit to its counterparty interest payments based on one-month U.S. LIBOR rates on the \$24 million liability. The agreement includes a provision that may require the Company to settle this transaction in August 2010, at the option of the Company or the counterparty.

Fair Value of Derivative Contracts

The following represents the fair value of the Company's derivative contracts. Many of the Company's agreements allow for a netting arrangement. The following is presented on a gross basis, by type of contract:

(in millions)	2009		2008	
	Balance Sheet Caption	Fair Value	Balance Sheet Caption	Fair Value
Hedging Instruments:				
Forward foreign exchange contracts . . .	Current assets	\$ —	Current assets	\$ 3
Interest rate swaps	Non current assets	—	Non current assets	19
Total		<u>\$ —</u>		<u>\$ 22</u>
Non Hedging Instruments:				
Forward foreign exchange contracts . . .	Current assets	\$ 1	Current assets	\$ 2
European cross currency swap	Non current liability	(24)	Non current liability	(24)
Fuel forwards and options contracts . . .	Non current liability	—	Non current liability	(1)
Total		<u>\$(23)</u>		<u>\$(23)</u>

Foreign Currency Exchange Rates

The table below presents the notional amounts and weighted-average exchange rates of foreign exchange forward contracts outstanding at January 30, 2010.

	Contract Value (U.S. in millions)	Weighted-Average Exchange Rate
Inventory		
Buy €/Sell British £	\$30	.8664
Buy US/Sell €	9	.6864
Intercompany		
Buy €/Sell British £	\$21	.8674
Buy US/Sell CAD\$.	7	1.0376

Interest Rate Risk Management

The Company historically has employed various interest rate swaps to minimize its exposure to interest rate fluctuations. On March 20, 2009, the Company terminated its interest rate swaps for a gain of \$19 million. This gain will be amortized as part of interest expense over the remaining term of the debt using the effective-yield method. The amount amortized during 2009 was \$1 million.

Business Risk

The retailing business is highly competitive. Price, quality, selection of merchandise, reputation, store location, advertising and customer service are important competitive factors in the Company's business. The Company operates in 21 countries and purchased approximately 82 percent of its merchandise in 2009 from its top 5 vendors. In 2009, the Company purchased approximately 68 percent of its athletic merchandise from one major vendor and approximately 8 percent from another major vendor. Each of our operating divisions is highly dependent on Nike; they individually purchase 46 to 85 percent of their merchandise from Nike. The Company generally considers all vendor relations to be satisfactory.

Included in the Company's Consolidated Balance Sheet at January 30, 2010, are the net assets of the Company's European operations, which total \$658 million and which are located in 17 countries, 11 of which have adopted the euro as their functional currency.

Fair Value of Financial Instruments

The carrying value and estimated fair value of long-term debt was \$138 million and \$127 million, respectively, at January 30, 2010 and \$142 million and \$120 million, respectively, at January 31, 2009. The carrying values of cash and cash equivalents and other current receivables and payables approximate their fair value due to the short-term nature of these assets and liabilities.

19. Fair Value Measurements

The following table provides a summary of the recognized assets and liabilities that are measured at fair value on a recurring basis:

As of January 30, 2010				
(in millions)	Level 1	Level 2	Level 3	Total
Assets				
Short-term investment	\$—	\$—	\$ 7	\$ 7
Auction rate security	—	5	—	5
Forward foreign exchange contracts	—	1	—	1
Total Assets	<u>\$—</u>	<u>\$ 6</u>	<u>\$ 7</u>	<u>\$13</u>
Liabilities				
European net investment hedge	—	24	—	24
Total Liabilities	<u>\$—</u>	<u>\$24</u>	<u>\$—</u>	<u>\$24</u>
As of January 31, 2009				
(in millions)	Level 1	Level 2	Level 3	Total
Assets				
Short-term investment	\$—	\$—	\$23	\$23
Auction rate security	—	2	—	2
Forward foreign exchange contracts	—	5	—	5
Interest rate swaps	—	19	—	19
Total Assets	<u>\$—</u>	<u>\$26</u>	<u>\$23</u>	<u>\$49</u>
Liabilities				
Forward foreign exchange contracts	—	1	—	1
European net investment hedge	—	24	—	24
Total Liabilities	<u>\$—</u>	<u>\$25</u>	<u>\$—</u>	<u>\$25</u>

The Company's Level 3 asset represents the Company's investment in the Reserve International Liquidity Fund, Ltd. (the "Fund"), a money market fund classified as a short-term investment on the Company's Consolidated Balance Sheets. The Company assesses the fair value of its investment in the Fund, which includes an impairment evaluation, on a quarterly basis, through a review of the underlying securities within the Fund. For the year ended January 31, 2009, the Company recorded an other-than-temporary impairment charge of \$3 million, incorporating the valuation at zero for the Lehman Brothers debt securities. The Company did not record any additional other-than-temporary impairments on the fund for the year ended January 30, 2010. Changes in market conditions and the method and timing of the liquidation process of the Fund could result in further adjustments to the fair value and classification of this investment in future periods. The Fund was not in a continuous unrealized loss position for greater than twelve months at January 30, 2010.

At January 30, 2010, the Company held a preferred stock auction rate security with a face value of \$7 million, which has experienced failed auctions due to the liquidity issues experienced in the global credit and capital markets. The security continues to earn and pay interest based on the stated terms. The Company classifies the security as long-term available-for-sale and reports the security at fair value as a component of other assets on the Company's Consolidated Balance Sheets. The Company evaluates the security for other-than-temporary impairments at each reporting period. The security is considered temporarily impaired at January 30, 2010 with a cumulative unrealized loss of \$2 million reflected in accumulated other comprehensive loss in the Company's Consolidated Statement of Comprehensive Loss. The Company has the intent and the ability to hold the security until future auctions are successful.

The Company's derivative financial instruments are valued using observable market-based inputs to industry valuation models. These valuation models require a variety of inputs, including contractual terms, market prices, yield curves, and measures of volatility obtained from various market sources.

The following table is a reconciliation of financial assets and liabilities measured at fair value on a recurring basis classified as Level 3, for the year ended January 30, 2010:

<u>(in millions)</u>	<u>Level 3</u>
Balance at January 31, 2009	\$ 23
Redemptions received from the Fund	<u>(16)</u>
Balance at January 30, 2010	<u>\$ 7</u>

The following table provides a summary of the Company's recognized assets that are measured at fair value on a non-recurring basis for the year ended January 30, 2010:

<u>(in millions)</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
Assets			
Long-lived assets held and used	\$—	\$—	\$71

For the year ended January 30, 2010, long-lived assets held and used with a carrying amount of \$107 million were written down to their fair value of \$71 million, resulting in an impairment charge of \$36 million, which was included in earnings for the period. See Note 3, "Impairment and Other Charges," for further discussion.

20. Retirement Plans and Other Benefits

Pension and Other Postretirement Plans

The Company has defined benefit pension plans covering most of its North American employees, which are funded in accordance with the provisions of the laws where the plans are in effect. In addition to providing pension benefits, the Company sponsors postretirement medical and life insurance plans, which are available to most of its retired U.S. employees. These plans are contributory and are not funded. The measurement date of the assets and liabilities is the last day of the fiscal year.

The following tables set forth the plans' changes in benefit obligations and plan assets, funded status and amounts recognized in the Consolidated Balance Sheets, measured at January 30, 2010 and January 31, 2009:

	Pension Benefits		Postretirement Benefits	
	2009	2008	2009	2008
	(in millions)			
Change in benefit obligation				
Benefit obligation at beginning of year	\$ 604	\$ 649	\$ 12	\$ 10
Service cost	11	10	—	—
Interest cost	36	36	1	1
Plan participants' contributions	—	—	3	4
Actuarial loss (gain)	49	(15)	—	(2)
Foreign currency translation adjustments	12	(18)	—	—
Plan amendment	—	—	1	3
Benefits paid	(58)	(58)	(4)	(4)
Benefit obligation at end of year	<u>\$ 654</u>	<u>\$ 604</u>	<u>\$ 13</u>	<u>\$ 12</u>
Change in plan assets				
Fair value of plan assets at beginning of year	\$ 418	\$ 611		
Actual return on plan assets	76	(127)		
Employer contributions	103	8		
Foreign currency translation adjustments	11	(16)		
Benefits paid	(58)	(58)		
Fair value of plan assets at end of year	<u>\$ 550</u>	<u>\$ 418</u>		
Funded status	<u>\$(104)</u>	<u>\$(186)</u>	\$(13)	\$(12)
Balance Sheet caption reported in:				
Accrued and other liabilities	(3)	(3)	(2)	(1)
Other liabilities	(101)	(183)	(11)	(11)
	<u>\$(104)</u>	<u>\$(186)</u>	<u>\$(13)</u>	<u>\$(12)</u>

Amounts recognized in accumulated other comprehensive loss consists of:

	Pension Benefits		Postretirement Benefits	
	2009	2008	2009	2008
	(in millions)			
Net loss (gain)	\$457	\$448	\$(35)	\$(41)
Prior service cost (credit)	1	2	(1)	(3)
	<u>\$458</u>	<u>\$450</u>	<u>\$(36)</u>	<u>\$(44)</u>

As of January 31, 2009, the accumulated benefit obligation exceeded plan assets for all plans, whereas, as of January 30, 2010, the Canadian qualified pension plan's assets equaled its accumulated benefit obligation. Information for pension plans with an accumulated benefit obligation in excess of plan assets is as follows:

	2009	2008
	(in millions)	
Projected benefit obligation	\$569	\$604
Accumulated benefit obligation	569	603
Fair value of plan assets	465	418

The components of net benefit expense (income) are:

	Pension Benefits			Postretirement Benefits		
	2009	2008	2007	2009	2008	2007
	(in millions)					
Service cost	\$ 11	\$ 10	\$ 10	\$—	\$—	\$—
Interest cost	36	36	36	1	1	—
Expected return on plan assets	(43)	(53)	(56)	—	—	—
Amortization of prior service cost (benefit)	1	1	1	—	—	(1)
Amortization of net loss (gain)	13	11	11	(7)	(8)	(8)
Net benefit expense (income)	<u>\$ 18</u>	<u>\$ 5</u>	<u>\$ 2</u>	<u>\$ (6)</u>	<u>\$ (7)</u>	<u>\$ (9)</u>

The following tables set forth the changes in accumulated other comprehensive loss (pre-tax) at January 30, 2010:

	Pension Benefits	Postretirement Benefits
	(in millions)	
Net actuarial loss (gain) at beginning of year	\$448	\$(41)
Amortization of net (loss) gain	(13)	7
Loss (gain) arising during the year	15	(1)
Foreign currency translation adjustments	7	—
Net actuarial loss (gain) at end of year ⁽¹⁾	<u>\$457</u>	<u>\$(35)</u>
Net prior service cost (benefit) at beginning of year	\$ 2	\$(3)
Amortization of prior service cost	(1)	—
Loss arising during the year	—	2
Net prior service cost (benefit) at end of year	<u>\$ 1</u>	<u>\$(1)</u>
Total amount recognized	<u>\$458</u>	<u>\$(36)</u>

(1) The amounts in accumulated other comprehensive loss that are expected to be recognized as components of net periodic benefit cost (income) during the next year are approximately \$18 million and \$(6) million related to the pension and postretirement plans, respectively.

The following weighted-average assumptions were used to determine the benefit obligations under the plans:

	Pension Benefits		Postretirement Benefits	
	2009	2008	2009	2008
Discount rate	5.25%	6.22%	4.90%	6.20%
Rate of compensation increase	3.67%	3.72%		

The following weighted-average assumptions were used to determine net benefit cost:

	Pension Benefits			Postretirement Benefits		
	2009	2008	2007	2009	2008	2007
Discount rate	6.22%	5.88%	5.66%	6.20%	6.10%	5.80%
Rate of compensation increase	3.67%	3.72%	3.75%			
Expected long-term rate of return on assets	7.63%	8.17%	8.85%			

Beginning with 2001, new retirees were charged the expected full cost of the medical plan and then-existing retirees will incur 100 percent of the expected future increases in medical plan costs. Any changes in the health care cost trend rates assumed would not affect the accumulated benefit obligation or net benefit income, since retirees will incur 100 percent of such expected future increase. In addition, the Company maintains a Supplemental Executive Retirement Plan ("SERP"), which is an unfunded plan that includes provisions for the continuation of medical and dental insurance benefits to certain executive officers and certain other key employees of the Company ("SERP Medical Plan"). The SERP Medical Plan's accumulated projected benefit obligation at January 30, 2010 was approximately \$5 million. A one hundred basis point change in the health care cost trend rates assumed would increase or decrease the accumulated projected benefit obligation by approximately \$1 million.

The expected long-term rate of return on invested plan assets is based on the plans' weighted-average target asset allocation, as well as historical and future expected performance of those assets. The target asset allocation is selected to obtain an investment return that is sufficient to cover the expected benefit payments and to reduce future contributions by the Company.

Plan Assets

During 2009, the Company changed the target composition of its U.S. plan assets from 65 percent equity and 35 percent fixed income securities to 50 percent equity and 50 percent fixed income. On January 29, 2010, the Company contributed \$60 million to the U.S. plan. This contribution was allocated to fixed income securities as the Company migrated to its new target composition. The Company may alter the targets from time to time depending on market conditions and the funding requirements of the pension plan. This change will reduce future volatility with regard to the funded status of the plan. This change will, however, result in higher pension expense due to the lower long-term rate of return associated with fixed income securities. Due to market conditions and other factors, actual asset allocations may vary from the target allocation outlined above. The Company believes that plan assets are invested in a prudent manner with an objective of providing a total return that, over the long term, provides sufficient assets to fund benefit obligations, taking into account the Company's expected contributions and the level of risk deemed appropriate. The Company's investment strategy seeks to utilize asset classes with differing rates of return, volatility, and correlation in order to reduce risk by providing diversification relative to equities. Diversification within asset classes is also utilized to ensure that there are no significant concentrations of risk in plan assets and to reduce the effect that the return on any single investment may have on the entire portfolio.

In late January 2008, the Company modified the actual asset allocation for its Canadian pension plan. Effective with the beginning of 2008, the target allocation for the Canadian plan is 95 percent debt securities and 5 percent equity. The Company believes that plan assets are invested in a prudent manner with the same overall objective and investment strategy as noted above for the U.S. pension plan. The bond portfolio is comprised of government and corporate bonds chosen to match the duration of the pension plan's benefit payment obligations. This change will reduce future volatility with regard to the funded status of the plan. This change has resulted in higher pension expense due to the lower long-term rate of return associated with fixed-income securities.

Valuation of Investments

Significant portions of plan assets are invested in commingled trust funds. These funds are valued at the net asset value of units held by the plan at year end. Stocks traded on U.S. security exchanges are valued at closing market prices on the measurement date.

Investments in real estate are carried at their estimated fair value based on information supplied by independent appraisers whereby each property is independently appraised and adjusted accordingly at least once within a five-year period. The Company's management reviews the fair value of each property during the intervening years to determine whether an impairment has occurred since receiving the latest independent appraisal and that no change is required to the fair value.

The fair values of the Company's U.S. pension plan assets at January 30, 2010 are as follows:

(in millions)	Level 1	Level 2	Level 3	Total
Cash and cash equivalents	\$—	\$ 5	\$—	\$ 5
Equity securities:				
U.S. large-cap ^(a)	—	110	—	110
U.S. mid-cap ^(a)	—	36	—	36
International ^(b)	—	62	—	62
Corporate stock ^(c)	17	—	—	17
Fixed income securities:				
Long duration corporate and government bonds ^(d)	—	200	—	200
Intermediate duration corporate and government bonds ^(e)	—	27	—	27
Other types of investments:				
Real estate	—	—	7	7
Insurance contracts	—	1	—	1
Total assets at fair value	<u>\$17</u>	<u>\$441</u>	<u>\$ 7</u>	<u>\$465</u>

- (a) These categories consist of various managed funds that invest primarily in common stocks, as well as other equity securities and a combination of other funds.
- (b) This category comprises two managed funds that invest primarily in international common stocks, as well as other equity securities and a combination of other funds.
- (c) This category consists of common and preferred stock issued by U.S. and non-U.S. corporations, including \$4 million invested in the Company's common stock.
- (d) This category consists of various fixed income funds that invest primarily in long-term bonds, as well as a combination of other funds, that together are designed to exceed the performance of related long-term market indices.
- (e) This category consists of a fixed income fund that invests primarily in intermediate duration bonds, as well as a combination of other funds, that together are designed to track the performance of the Barclays Capital U.S. Intermediate Credit Index.

The fair values of the Company's Canadian pension plan assets at January 30, 2010 are as follows:

(in millions)	Level 1	Level 2	Level 3	Total
Equity securities:				
Canadian equity securities ^(a)	\$—	\$ 7	\$—	\$ 7
Debt securities:				
Cash matched bonds ^(b)	—	78	—	78
Total assets at fair value	<u>\$—</u>	<u>\$85</u>	<u>\$—</u>	<u>\$85</u>

- (a) This category comprises a mutual fund that invests in a diverse portfolio of Canadian equity securities, and convertible bonds.
- (b) This category consists of fixed income securities, including strips and coupons, issued or guaranteed by the Government of Canada, provinces or municipalities of Canada including their agencies and crown corporations, as well as corporate bonds.

No Level 3 assets were held by the Canadian pension plan during 2009, and there was no activity within the U.S. pension plan's real estate investments classified as Level 3 for the year ended January 30, 2010.

During 2009 the Company made contributions of \$97 million and \$3 million to its U.S. and Canadian plans, respectively. In accordance with the Pension Protection Act, the Company contributed to its U.S. pension plan amounts in excess of the minimum requirements. The Company contributed approximately \$2 million to its Canadian pension plan in February 2010. The Company continuously evaluates the amount and timing of any future contributions. Additional contributions will depend on the plan asset performance for the balance of the year and statutory or regulatory changes that may occur, if any.

Estimated future benefit payments for each of the next five years and the five years thereafter are as follows:

	Pension Benefits	Postretirement Benefits
	(in millions)	
2010	\$ 70	\$2
2011	61	1
2012	59	1
2013	57	1
2014	55	1
2015–2019	253	4

In February 2007, the Company and its U.S. pension plan, the Foot Locker Retirement Plan, were named as defendants in a class action in federal court in New York. The Complaint alleged that the Company's pension plan violated the Employee Retirement Income Security Act of 1974, including, without limitation, its age discrimination and notice provisions, as a result of the Company's conversion of its defined benefit plan to a defined benefit pension plan with a cash balance feature in 1996. The Company is defending the action vigorously.

Savings Plans

The Company has two qualified savings plans, a 401(k) Plan that is available to employees whose primary place of employment is the U.S., and an 1165 (e) Plan that is available to employees whose primary place of employment is in Puerto Rico. Both plans require that the employees have attained at least the age of twenty-one and have completed one year of service consisting of at least 1,000 hours. The savings plans allow eligible employees to contribute up to 40 percent and \$9,000 as of January 1, 2010, for the U.S. and Puerto Rico plans, respectively, of their compensation on a pre-tax basis. The Company matches 25 percent of the first 4 percent of the employees' contributions with Company stock and such matching Company contributions are vested incrementally over 5 years for both plans. The charge to operations for the Company's matching contribution was \$2.7 million, \$2.2 million, and \$1.8 million in 2009, 2008, and 2007, respectively.

21. Share-Based Compensation

Stock Options

On May 30, 2007, the Company's shareholders approved the Company's 2007 Stock Incentive Plan (the "2007 Stock Plan"). Upon approval of the 2007 Stock Plan, the Company stated it would no longer grant stock awards under the 2003 Stock Option and Award Plan (the "2003 Stock Option Plan"), the 1998 Stock Option and Award Plan (the "1998 Plan"), and the 2002 Foot Locker Directors' Stock Plan (the "2002 Directors' Plan"), although awards previously made under those plans and outstanding on May 30, 2007 continue in effect governed by the provisions of those plans.

Under the 2007 Stock Plan, stock options, restricted stock, stock appreciation rights (SARs), or other stock-based awards may be granted to officers and other employees of the Company, including its subsidiaries and operating divisions worldwide. Nonemployee directors are also eligible to receive awards under this plan. Options for employees become exercisable in substantially equal annual installments over a three-year period, beginning with the first anniversary of the date of grant of the option, unless a shorter or longer duration is established at the time of the option grant. Options for nonemployee directors become exercisable one year from the date of grant. The maximum number of shares of stock reserved for all awards under the 2007 Stock Plan is 6,000,000. The number of shares reserved for issuance as restricted stock and other stock-based awards cannot exceed 1,500,000 shares. The options terminate up to ten years from the date of grant.

Under the Company's 2003 Stock Option Plan and the 1998 Plan, options to purchase shares of common stock were granted to officers and other employees at not less than the market price on the date of grant. Under these plans, the Company was authorized to grant to officers and other employees, including those at the subsidiary level, stock options, SARs, restricted stock or other stock-based awards. Generally, one-third of each stock option grant becomes exercisable on each of the first three anniversary dates of the date of grant. The options terminate up to ten years from the date of grant.

The 2002 Directors' Plan replaced both the Directors' Stock Plan, which was adopted in 1996, and the Directors' Stock Option Plan, which was adopted in 2000. No further grants or awards may be made under either of the prior plans. Options granted prior to 2003 have a three-year vesting schedule. Options granted beginning in 2003 become exercisable one year from the date of grant.

In addition, options to purchase shares of common stock remain outstanding under the Company's 1995 Stock Option and Award Plan (the "1995 Plan"). The 1995 Plan is substantially the same as the 1998 Plan. As of March 8, 2005 no further awards may be made under the 1995 Plan.

Employee Stock Purchase Plan

Under the Company's 2003 Employee Stock Purchase Plan (the "2003 Employee Stock Purchase Plan"), participating employees are able to contribute up to 10 percent of their annual compensation through payroll deductions to acquire shares of the Company's common stock at 85 percent of the lower market price on one of two specified dates in each plan year. Under the 2003 Employee Stock Purchase Plan, 3,000,000 shares of common stock are authorized for purchase beginning June 2005. Of the 3,000,000 shares of common stock authorized for purchase under this plan, 604 participating employees purchased 125,992 shares in 2009, and 587 participating employees purchased 96,800 shares in 2008. To date, a total of 663,717 shares have been purchased under this plan.

Total compensation expense related to the Company's share based compensation plans was \$12.1 million, \$8.6 million and \$10.4 million for 2009, 2008 and 2007 respectively. The total related tax benefit for 2009 and 2008 was not significant and was \$1.0 million for 2007.

Valuation Model and Assumptions

The Company uses a Black-Scholes option-pricing model to estimate the fair value of share-based awards. The Black-Scholes option-pricing model incorporates various and highly subjective assumptions, including expected term and expected volatility.

The Company estimates the expected term of share-based awards granted using the Company's historical exercise and post-vesting employment termination patterns, which it believes are representative of future behavior. The expected term for the Company's employee stock purchase plan valuation is based on the length of each purchase period as measured at the beginning of the offering period, which is one year. The Company estimates the expected volatility of its common stock at the grant date using a weighted-average of the Company's historical volatility and implied volatility from traded options on the Company's common stock. The Company believes that the combination of historical volatility and implied volatility provides a better estimate of future stock price volatility. The risk-free interest rate assumption is determined using the Federal Reserve nominal rates for U.S. Treasury zero-coupon bonds with maturities similar to those of the expected term of the award being valued. The expected dividend yield is derived from the Company's historical experience. The Company estimates pre-vesting option forfeitures at the time of grant and periodically revises those estimates in subsequent periods if actual forfeitures differ from those estimates. The Company records stock-based compensation expense only for those awards expected to vest using an estimated forfeiture rate based on its historical pre-vesting forfeiture data. The following table shows the Company's assumptions used to compute the share-based compensation expense:

	Stock Option Plans			Stock Purchase Plan		
	2009	2008	2007	2009	2008	2007
Weighted-average risk free rate of interest	1.93%	2.43%	4.43%	1.74%	4.16%	5.00%
Expected volatility	53%	37%	28%	39%	27%	22%
Weighted-average expected award life	4.6 years	4.6 years	4.2 years	1.0 year	1.0 year	1.0 year
Dividend yield	6.0%	5.1%	2.3%	4.4%	2.8%	2.0%
Weighted-average fair value	\$2.89	\$2.49	\$5.28	\$4.17	\$7.80	\$4.96

The information set forth in the following table covers options granted under the Company's stock option plans:

	2009		2008		2007	
	Number of Shares	Weighted-Average Exercise Price	Number of Shares	Weighted-Average Exercise Price	Number of Shares	Weighted-Average Exercise Price
	(in thousands, except prices per share)					
Options outstanding at beginning of year	6,080	\$18.64	5,977	\$19.57	6,048	\$19.15
Granted	1,521	\$10.02	588	\$11.73	778	\$22.38
Exercised	(181)	\$ 8.76	(81)	\$ 9.76	(474)	\$15.29
Expired or cancelled	<u>(418)</u>	\$21.03	<u>(404)</u>	\$24.12	<u>(375)</u>	\$23.99
Options outstanding at end of year	<u>7,002</u>	\$16.88	<u>6,080</u>	\$18.64	<u>5,977</u>	\$19.57
Options exercisable at end of year	<u>5,084</u>	\$18.85	<u>4,812</u>	\$18.89	<u>4,530</u>	\$18.27
Options available for future grant at end of year	<u>2,214</u>		<u>4,890</u>		<u>5,804</u>	

The total intrinsic value of options exercised (the difference between the market price of the Company's common stock on the exercise date and the price paid by the optionee to exercise the option) for 2009, 2008 and 2007 was \$0.4 million, \$0.2 million and \$2.7 million, respectively. The aggregate intrinsic value for stock options outstanding and for stock options exercisable (the difference between the Company's closing stock price on the last trading day of the period and the exercise price of the options, multiplied by the number of in-the-money stock options) as of January 30, 2010 was \$2.4 million and \$0.7 million, respectively. The Company received \$1.6 million in cash from option exercises for the year ended January 30, 2010. The tax benefit realized by the Company on stock option exercises for the year ended January 30, 2010 was not significant. Compensation expense related to the Company's stock options and employee stock purchase plan was \$3.8 million, \$3.5 million and \$4.5 million for 2009, 2008, and 2007, respectively.

The following table summarizes information about stock options outstanding and exercisable at January 30, 2010:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding	Weighted-Average Remaining Contractual Life	Weighted-Average Exercise Price	Number Exercisable	Weighted-Average Exercise Price
	(in thousands, except prices per share)				
\$9.51 to \$10.10	1,486	9.25	\$10.00	145	\$ 9.95
\$10.22 to \$11.91	1,682	4.08	\$11.29	1,340	\$11.25
\$12.30 to \$23.42	1,868	4.16	\$18.09	1,634	\$17.61
\$23.59 to \$27.01	1,483	5.02	\$24.95	1,482	\$24.95
\$27.10 to \$28.50	<u>483</u>	4.87	\$28.08	<u>483</u>	\$28.08
\$9.51 to \$28.50	<u>7,002</u>	5.45	\$16.88	<u>5,084</u>	\$18.85

Changes in the Company's nonvested options at January 30, 2010 are summarized as follows:

	Number of Shares	Weighted-Average Grant Date Fair Value per Share
	(in thousands)	
Nonvested at February 1, 2009	1,268	\$17.71
Granted	1,521	10.02
Vested	(453)	14.36
Expired or Cancelled	<u>(418)</u>	21.03
Nonvested at January 30, 2010	<u>1,918</u>	11.67

The weighted-average grant date fair value per share for options granted during 2009, 2008, and 2007 was \$10.02, \$11.73 and \$22.38, respectively. As of January 30, 2010, there was \$2.0 million of total unrecognized compensation cost, net of estimated forfeitures, related to nonvested stock options, which is expected to be recognized over a remaining weighted-average period of approximately 1 year.

Restricted Stock and Units

Restricted shares of the Company's common stock may be awarded to certain officers and key employees of the Company. For executives outside of the United States the Company issues restricted stock units. The Company also issues restricted stock units to its non-employee directors. Each restricted stock unit represents the right to receive one share of the Company's common stock provided that the vesting conditions are satisfied. In 2009, 2008 and 2007, there were 227,000, 87,500 and 90,000 restricted stock units outstanding, respectively. Compensation expense is recognized using the fair market value at the date of grant and is amortized over the vesting period, provided the recipient continues to be employed by the Company. These awards fully vest after the passage of time, generally three years. Restricted stock is considered outstanding at the time of grant, as the holders of restricted stock are entitled to receive dividends and have voting rights.

Restricted share and unit activity for the years ended January 30, 2010, January 31, 2009, and February 2, 2008 is summarized as follows:

	Number of Shares and Units		
	2009	2008	2007
		(in thousands)	
Outstanding at beginning of year	844	810	537
Granted	1,115	243	583
Vested	(279)	(109)	(285)
Cancelled or forfeited	—	(100)	(25)
Outstanding at end of year	<u>1,680</u>	<u>844</u>	<u>810</u>
Aggregate value (in millions)	\$ 22.6	\$ 16.7	\$ 19.0
Weighted-average remaining contractual life	1.50 years	1.28 years	1.77 years

The weighted-average grant-date fair value per share was \$9.90, \$11.79 and \$22.95 for 2009, 2008, and 2007, respectively. The total fair value of awards for which restrictions lapsed was \$5.2 million, \$2.7 million and \$7.3 million for 2009, 2008 and 2007 respectively. At January 30, 2010, there was \$8.0 million of total unrecognized compensation cost net of estimated forfeitures, related to nonvested restricted stock awards. The Company recorded compensation expense related to restricted shares, net of estimated forfeitures, of \$8.3 million, \$5.1 million and \$5.6 million for 2009, 2008 and 2007, respectively.

22. Legal Proceedings

Legal proceedings pending against the Company or its consolidated subsidiaries consist of ordinary, routine litigation, including administrative proceedings, incidental to the business of the Company or businesses that have been sold or disposed of by the Company in past years. These legal proceedings include commercial, intellectual property, customer, and labor-and-employment-related claims.

Certain of the Company's subsidiaries are defendants in a number of lawsuits filed in state and federal courts containing various class action allegations under state wage and hour laws, including allegations concerning classification of employees as exempt or nonexempt, unpaid overtime, meal and rest breaks, and uniforms. In *Pereira v. Foot Locker* (United States District Court, E.D. Pennsylvania), one of the class actions, plaintiff alleged that the Company permitted unpaid off-the-clock hours in violation of the Fair Labor Standards Act. In September 2009, the court conditionally certified a nationwide collective action.

Management does not believe that the outcome of any such proceedings would have a material adverse effect on the Company's consolidated financial position, liquidity, or results of operations, taken as a whole.

23. Commitments

In connection with the sale of various businesses and assets, the Company may be obligated for certain lease commitments transferred to third parties and pursuant to certain normal representations, warranties, or indemnifications entered into with the purchasers of such businesses or assets. Although the maximum potential amounts for such obligations cannot be readily determined, management believes that the resolution of such contingencies will not have a material effect on the Company's consolidated financial position, liquidity, or results of operations. The Company is also operating certain stores and making rental payments for which lease agreements are in the process of being negotiated with landlords. Although there is no contractual commitment to make these payments, it is likely that a lease will be executed.

The Company does not have any off-balance sheet financing, other than operating leases entered into in the normal course of business and disclosed above, or unconsolidated special purpose entities. The Company does not participate in transactions that generate relationships with unconsolidated entities or financial partnerships, including variable interest entities.

24. Shareholder Information and Market Prices (Unaudited)

Foot Locker, Inc. common stock is listed on The New York Stock Exchange as well as on the böerse-stuttgart stock exchange in Germany and the Elektronische Börse Schweiz (EBS) stock exchange in Switzerland. In addition, the stock is traded on the Cincinnati stock exchange. At January 30, 2010, the Company had 20,480 shareholders of record owning 156,540,788 common shares. During 2009 and 2008, the Company declared dividends of \$0.15 per share during each of the quarters.

The following table sets forth, for the period indicated, the intra-day high and low sales prices for the Company's common stock:

Common Stock Quarter	2009		2008	
	High	Low	High	Low
1 st Q	\$12.29	\$7.09	\$13.90	\$10.39
2 nd Q	12.95	9.38	15.43	11.40
3 rd Q	12.31	9.91	18.19	10.12
4 th Q	12.55	9.46	14.79	3.65

25. Quarterly Results (Unaudited)

(a) Gross margin represents sales less cost of sales.

(b) Included in the results for the fourth quarter of 2009 is an inventory reserve charge of \$14 million for certain aged apparel.

(c) Operating profit (loss) represents income (loss) from continuing operations before income taxes, interest expense, net and non-operating income.

(d) During the fourth quarter of 2008, the Company recorded \$236 million in impairment charges representing \$67 million of store long-lived assets and \$169 million of goodwill and other intangibles.

(e) During the fourth quarter of 2009, the Company recorded a charge of \$4 million to reflect the write-down of certain Canadian deferred tax assets as a result of certain Canadian provincial rate reductions enacted during the quarter.

FIVE-YEAR SUMMARY OF SELECTED FINANCIAL DATA

(1) 2006 represents the 53 weeks ended February 3, 2007.

(2) 2006 relates to the adoption of authoritative accounting guidance for share-based compensation.

(3) Represents total debt, net of cash, cash equivalents and short-term investments and includes the effect of interest rate swaps. The effect of interest rate swaps increased/(decreased) debt by \$18 million, \$19 million, \$4 million, \$(4) million, and \$(1) million, at January 30, 2010, January 31, 2009, February 2, 2008, February 3, 2007, and January 28, 2006, respectively.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There were no disagreements between the Company and its independent registered public accounting firm on matters of accounting principles or practices.

Item 9A. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures.

The Company's management performed an evaluation under the supervision and with the participation of the Company's Chief Executive Officer ("CEO") and Chief Financial Officer ("CFO"), and completed an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of January 30, 2010. Based on that evaluation, the Company's CEO and CFO concluded that the Company's disclosure controls and procedures were effective to ensure that information relating to the Company that is required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC rules and form, and is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

(b) Management's Annual Report on Internal Control over Financial Reporting.

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting (as that term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f)). The Company's internal control system over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles. Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As of January 31, 2009, management identified a material weakness pertaining to our internal control over financial reporting. Management developed a remediation plan to strengthen our internal control over financial reporting relating to accounting for income taxes. A remediation plan was implemented during 2009 to remediate the material weakness, which included the following actions:

- We improved the documentation of the income tax provision process and instituted a more formalized review process.
- We accelerated the timing of certain tax preparation and review activities during the financial statement closing.
- We automated many parts of the income tax provision process thereby eliminating various manual spreadsheets. Additionally, we implemented a software tool to assist in the calculation of the consolidated income tax provision.
- We hired various tax professionals who are experienced in accounting for income taxes.

To evaluate the effectiveness of the Company's internal control over financial reporting, the Company uses the framework in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO Framework"). Using the COSO Framework, the Company's management, including the CEO and CFO, evaluated the Company's internal control over financial reporting and concluded that the Company's internal control over financial reporting was effective as of January 30, 2010.

KPMG LLP, the independent registered public accounting firm that audits the Company's consolidated financial statements included in this annual report, has issued an attestation report on the Company's effectiveness of internal control over financial reporting, which is included in Item 9A(d).

(c) Changes in Internal Control over Financial Reporting.

During the Company's last fiscal quarter there were no changes in internal control over financial reporting that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

(d) Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting

The Board of Directors and Shareholders of
Foot Locker, Inc.:

We have audited Foot Locker, Inc.'s internal control over financial reporting as of January 30, 2010, based on criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Foot Locker, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting (Item 9A(b)). Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Foot Locker, Inc. maintained, in all material respects, effective internal control over financial reporting as of January 30, 2010, based on the criteria established in *Internal Control — Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Foot Locker, Inc. and subsidiaries as of January 30, 2010 and January 31, 2009, and the related consolidated statements of operations, shareholders' equity and comprehensive income (loss), and cash flows for each of the years in the three-year period ended January 30, 2010, and our report dated March 29, 2010, expressed an unqualified opinion on these consolidated financial statements.

KPMG LLP

New York, New York

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

(a) Directors of the Company

Information relative to directors of the Company is set forth under the section captioned "Proposal 1-Election of Directors" in the Proxy Statement and is incorporated herein by reference.

(b) Executive Officers of the Company

Information with respect to executive officers of the Company is set forth immediately following Item 4 in Part I.

(c) Information with respect to compliance with Section 16(a) of the Securities Exchange Act of 1934 is set forth under the section captioned "Section 16(a) Beneficial Ownership Reporting Compliance" in the Proxy Statement and is incorporated herein by reference.

(d) Information on our audit committee and the audit committee financial expert is contained in the Proxy Statement under the section captioned "Committees of the Board of Directors" and is incorporated herein by reference.

(e) Information about the Code of Business Conduct governing our employees, including our Chief Executive Officer, Chief Financial Officer, Chief Accounting Officer, and the Board of Directors, is set forth under the heading "Code of Business Conduct" under the Corporate Governance Information section of the Proxy Statement and is incorporated herein by reference.

Item 11. Executive Compensation

Information set forth in the Proxy Statement beginning with the section captioned "Directors Compensation and Benefits" through and including the section captioned "Pension Benefits" is incorporated herein by reference, and information set forth in the Proxy Statement under the heading "Compensation Committee Interlocks and Insider Participation" is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information set forth in the Proxy Statement under the sections captioned "Equity Compensation Plan Information" and "Beneficial Ownership of the Company's Stock" is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information set forth in the Proxy Statement under the section captioned "Related Person Transactions" and under the section captioned "Directors' Independence" is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services

Information about the principal accountant fees and services is set forth under the section captioned "Audit and Non-Audit Fees" in the Proxy Statement and is incorporated herein by reference. Information about the Audit Committee's pre-approval policies and procedures is set forth in the section captioned "Audit Committee Pre-Approval Policies and Procedures" in the Proxy Statement and is incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules

**FOOT LOCKER, INC.
INDEX OF EXHIBITS REQUIRED
BY ITEM 15 OF FORM 10-K
AND FURNISHED IN ACCORDANCE
WITH ITEM 601 OF REGULATION S-K**

<u>Exhibit No. in Item 601 of Regulation S-K</u>	<u>Description</u>
3(i)(a)	Certificate of Incorporation of the Registrant, as filed by the Department of State of the State of New York on April 7, 1989 (incorporated herein by reference to Exhibit 3(i)(a) to the Quarterly Report on Form 10-Q for the quarterly period ended July 26, 1997, filed by the Registrant with the SEC on September 4, 1997 (the "July 26, 1997 Form 10-Q").
3(i)(b)	Certificates of Amendment of the Certificate of Incorporation of the Registrant, as filed by the Department of State of the State of New York on (a) July 20, 1989, (b) July 24, 1990, (c) July 9, 1997 (incorporated herein by reference to Exhibit 3(i)(b) to the July 26, 1997 Form 10-Q), (d) June 11, 1998 (incorporated herein by reference to Exhibit 4.2(a) of the Registration Statement on Form S-8 (Registration No. 333-62425), and (e) November 1, 2001 (incorporated herein by reference to Exhibit 4.2 to the Registration Statement on Form S-8 (Registration No. 333-74688) previously filed by the Registrant with the SEC).
3(ii)	By-laws of the Registrant, as amended (incorporated herein by reference to Exhibit 3.1 to the Registrant's Current Report on Form 8-K dated May 20, 2009 filed by the Registrant with the SEC on May 27, 2009).
4.1	The rights of holders of the Registrant's equity securities are defined in the Registrant's Certificate of Incorporation, as amended (incorporated herein by reference to (a) Exhibits 3(i)(a) and 3(i)(b) to the July 26, 1997 Form 10-Q, Exhibit 4.2(a) to the Registration Statement on Form S-8 (Registration No. 333-62425) previously filed by the Registrant with the SEC, and Exhibit 4.2 to the Registration Statement on Form S-8 (Registration No. 333-74688) previously filed by the Registrant with the SEC).
4.2	Indenture dated as of October 10, 1991 (incorporated herein by reference to Exhibit 4.1 to the Registration Statement on Form S-3 (Registration No. 33-43334) previously filed by the Registrant with the SEC).
4.3	Form of 8-1/2% Debentures due 2022 (incorporated herein by reference to Exhibit 4 to the Registrant's Form 8-K dated January 16, 1992).
10.1	Foot Locker 1995 Stock Option and Award Plan (incorporated herein by reference to Exhibit 10(p) to the Registrant's Annual Report on Form 10-K for the year ended January 28, 1995 filed by the Registrant with the SEC on April 24, 1995 (the "1994 Form 10-K").
10.2	Foot Locker 1998 Stock Option and Award Plan (incorporated herein by reference to Exhibit 10.4 to the Registrant's Annual Report on Form 10-K for the year ended January 31, 1998, filed by the Registrant with the SEC on April 21, 1998).
10.3	Amendment to the Foot Locker 1998 Stock Option and Award Plan (incorporated herein by reference to Exhibit 10.2 to the Registrant's Quarterly Report on Form 10-Q for the period ended July 29, 2000, filed by the Registrant with the SEC on September 7, 2000 (the "July 29, 2000 Form 10-Q").
10.4	Executive Supplemental Retirement Plan (incorporated herein by reference to Exhibit 10(d) to the Registration Statement on Form 8-B filed by the Registrant with the SEC on August 7, 1989 (Registration No. 1-10299) (the "8-B Registration Statement").
10.5	Amendment to the Executive Supplemental Retirement Plan (incorporated herein by reference to Exhibit 10(c)(i) to the 1994 Form 10-K).

Exhibit No. in Item 601 of Regulation S-K	Description
10.6	Amendment to the Executive Supplemental Retirement Plan (incorporated herein by reference to Exhibit 10(d)(ii) to the Annual Report on Form 10-K for the year ended January 27, 1996, filed by the Registrant with the SEC on April 26, 1996 (the "1995 Form 10-K").
10.7	Supplemental Executive Retirement Plan, as Amended and Restated (incorporated herein by reference to Exhibit 10.1 to the Current Report on Form 8-K dated August 13, 2007 filed by the Registrant with the SEC on August 17, 2007).
10.8	Long-Term Incentive Compensation Plan, as amended and restated (incorporated herein by reference to Exhibit 10.8 to the Annual Report on Form 10-K for the year ended January 31, 2009, filed by the Registrant with the SEC on March 30, 2009 (the "2008 Form 10-K").
10.9	Annual Incentive Compensation Plan, as amended and restated (incorporated herein by reference to Exhibit 10.1 to the Current Report on Form 8-K dated March 26, 2008 filed by the Registrant on April 1, 2008).
10.10	Form of indemnification agreement, as amended (incorporated herein by reference to Exhibit 10(g) to the 8-B Registration Statement).
10.11	Amendment to form of indemnification agreement (incorporated herein by reference to Exhibit 10.5 to the Quarterly Report on Form 10-Q for the quarterly period ended May 5, 2001 filed by the Registrant with the SEC on June 13, 2001 (the "May 5, 2001 Form 10-Q").
10.12	Foot Locker Directors Stock Option Plan (incorporated herein by reference to Exhibit 10.1 to the July 29, 2000 Form 10-Q).
10.13	Trust Agreement dated as of November 12, 1987 ("Trust Agreement"), between F.W. Woolworth Co. and The Bank of New York, as amended and assumed by the Registrant (incorporated herein by reference to Exhibit 10(j) to the 8-B Registration Statement).
10.14	Amendment to Trust Agreement made as of April 11, 2001 (incorporated herein by reference to Exhibit 10.4 to May 5, 2001 Form 10-Q).
10.15	Foot Locker Directors' Retirement Plan, as amended (incorporated herein by reference to Exhibit 10(k) to the 8-B Registration Statement).
10.16	Amendments to the Foot Locker Directors' Retirement Plan (incorporated herein by reference to Exhibit 10(c) to the Registrant's Quarterly Report on Form 10-Q for the period ended October 28, 1995, filed by the Registrant with the SEC on December 11, 1995).
10.17	Employment Agreement with Matthew D. Serra dated as of December 12, 2008 (incorporated herein by reference to Exhibit 10.1 to the Current Report on Form 8-K dated December 12, 2008 filed by the Registrant with the SEC on December 18, 2008 (the "December 12, 2008 Form 8-K").
10.18	Amendment to Employment Agreement with Matthew D. Serra dated June 25, 2009 (incorporated herein by reference to Exhibit 10.1 to the Current Report on Form 8-K dated June 24, 2009 filed by the Registrant with the SEC on June 26, 2009 (the "June 26, 2009 Form 8-K").
10.19	Employment Agreement with Ken C. Hicks dated June 25, 2009 (incorporated herein by reference to Exhibit 10.2 to the June 26, 2009 Form 8-K).
10.20	Employment Agreement with Ronald J. Halls dated June 30, 2009 (incorporated herein by reference to Exhibit 10.1 to the Current Report on Form 8-K dated June 30, 2009 filed by the Registrant with the SEC on July 1, 2009).

<u>Exhibit No. in Item 601 of Regulation S-K</u>	<u>Description</u>
10.21	Amendment of Restricted Stock Agreement for Matthew D. Serra dated October 6, 2006 (incorporated herein by reference to Exhibit 10.2 to the October 10, 2006 Form 8-K).

CERTIFICATIONS

I, Ken C. Hicks, certify that:

1. I have reviewed this Annual Report on Form 10-K of Foot Locker, Inc. (the "Registrant");
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;
4. The Registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the Registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the Registrant's internal control over financial reporting that occurred during the Registrant's most recent fiscal quarter (the Registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant's internal control over financial reporting; and
5. The Registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant's auditors and the Audit Committee of the Registrant's Board of Directors:
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant's internal control over financial reporting.
