Atlantic Tele-Network

Communications Providers

About Atlantic Tele-Network

ATN is a telecommunications company that provides service to underserved markets in North America and the Caribbean. Through our operating subsidiaries, we provide both wireless and wireline connectivity to residential and business customers, including a range of mobile wireless solutions, local exchange services and broadband internet services. ATN operates advanced wireless and wireline networks and both terrestrial and submarine fiber optic systems.

We are proud of our track record of delivering very strong financial results since our restructuring in 1998, consistently paying dividends, while at the same time growing both our business and shareholder value.

● Atlantic Tele-Network Coverage

Corporate Network

Allied Wireless Communications Corporation (AWCC) is a wireless telecommunications provider based in Little Rock, Arkansas operating under the name "Alltel". AWCC provides retail wireless service to customers in rural areas of the United States.

Commnet Wireless, LLC (Commnet), owns and operates wholesale wireless networks in rural areas of the United States, providing its wireless carrier partners with voice and data roaming services.

Guyana Telephone & Telegraph Company, Ltd. (GT&T) is the incumbent national and international telephone company in the Republic of Guyana. GT&T is the exclusive provider of local exchange and international voice and data services, and also operates a competitive wireless phone service.

Bermuda Digital Communications, Ltd. (BDC) is the largest wireless voice and data communications service provider in Bermuda operating under the name "Cellular One". BDC also provides wireless voice services in Turks and Caicos.

Sovernet, Inc., is a leading competitive integrated voice and broadband data communications service provider in Vermont and western New Hampshire. Through its subsidiary, iON, Sovernet also provides fiber based wholesale transport service in New York State.

Choice Communications, LLC (Choice), provides wireless broadband data, dial-up internet and other communications services in the U.S. Virgin Islands.

Fellow Stockholders:

In 2009, your Company experienced continued growth and success, particularly in our U.S. wireless business, and made several key investments in existing markets. Of course, these events and activities were overshadowed by the agreement we entered into in June 2009 to purchase a number of U.S. cellular properties in a forced divestiture by Verizon Wireless of certain Alltel Wireless markets. Many commentators and analysts have called this transaction transformational for ATN and the stock market certainly reacted strongly, and positively, to the news. While we agree that it is transformational in terms of the effect on the size and source of your Company's revenues, we are determined not to transform our basic business and investment strategy of incremental growth and accretive investments.

Before we turn to a more detailed discussion of that transaction and what it may portend for our future, let us briefly review the results for the past year. Our revenue continued to grow nicely with a 17% increase over 2008. If we exclude the considerable expense related to the Alltel transaction, operating income and net income also posted solid growth of 9% and 12%, respectively. These increases mainly reflect the rewards of the planned geographic and capacity expansion of our U.S. wholesale wireless network. Gains in the size and profitability of that business were offset in part by the addition of some earlier stage businesses in the U.S. and the Caribbean and the decline in some of our more mature businesses, particularly elements of our wireline business in Guyana.

For yet another year, the price of our common stock significantly outperformed the broader market with a 107% annual increase (compared to a 24% increase for the Russell 2000 Index). Unlike 2008 where our stock performance was perhaps notable mainly because it was "less bad" than our peers and the market as a whole, the gains were excellent in absolute terms as well, with our stock price closing the year at \$54.95.

We were also pleased to reward stockholders in September 2009 with an 11% increase in the quarterly dividend, continuing our long track record

of annual increases. Stockholders should share our growth on a current basis through dividend payments, just as we pay interest on the capital we obtain from banks or debt capital markets. We will continue to work to balance that principle with the opportunities we see to earn greater returns through investments in our business.

This brings us to a key element in our overall strategy—balance sheet and capital management. As followers of our Company know, we have always been wary of the high debt levels of many of our peers. Debt is a legitimate and inexpensive form of capital, but it comes with higher risk than equity capital. We work hard to balance the cost of capital with the risks. As a telecommunications infrastructure business, we feel strongly that it is important to keep the amount of debt on the Company's balance sheet at levels that allow us to quickly ramp up investments if we see opportunity and, as important, to withstand an unexpected shock to one of our businesses without being forced to take actions that will damage the long-term value of the Company and its opportunities. We are confident that the debt we have added for the Alltel transaction does not take us out of that comfort zone, nor do we believe it will inhibit our ability to continue investing in both organic and strategic opportunities. At December 2009, we had

More places...
...more possibilities

a debt to equity ratio of 0.26:1. Following the close of the Alltel transaction, we expect to have a debt to equity ratio of less than 1:1 at June 30, 2010.

Purchase of Alltel Divestiture Assets

Our refusal to reach for the earnings boost that results from buying even expensive assets with high levels of debt put us in an excellent position in 2009 when the credit markets were in a near shutdown. Having stayed disciplined during the bubble days of 2007 and the first half of 2008, we had plenty of capacity on our balance sheet to move quickly and make a non-contingent offer for the Alltel divestiture assets.

Those assets consist of about one-third of the wireless subscribers (with attendant cellular licenses and network equipment) required to be divested by Verizon and, while we expect some net attrition, the subscribers acquired numbered about 895,000 at close. The markets covered are predominately in the U.S. Southeast (Georgia and the Carolinas) and the Midwest (Illinois and Ohio). At \$200 million, we felt these assets were reasonably priced for the risks. The risks for us include: (1) very limited pre-signing due diligence; (2) the challenge of transitioning subscribers and employees out of the much larger Alltel network and operations, and; (3) the risk that the seller, Verizon Wireless, a national carrier of vastly bigger size, will have the knowledge and resources to take significant share of these markets from us.

The last two risks are most frequently mentioned by analysts and investors, and they are the most significant. We are seeking to manage both of these risks primarily through the quality and breadth of the people we are hiring to manage the acquired operations. While the cost of bringing aboard top talent had a visible and substantial effect on our financial results every quarter since the deal was signed, we view it as an important part of our investment. Given the historic concentration of our retail wireless expertise off shore, it was also necessary to hire highly experienced domestic wireless executives.

As with everything we do, we are focused on total return from this business, not on maximizing near-term operating profits. We believe we can maximize returns by investing heavily in a smooth transition from the old Alltel systems to the new systems we are putting in place and in the network and service offerings going forward. If we retain a high percentage of the acquired subscribers through the initial transition period, we expect to capture tremendous value for our stockholders.

We will have to execute at a very high level to overcome the size and strength edge of the national carriers and to magnify the advantages that we might have with a tighter business focus and smaller, more nimble enterprise. Led by Frank O'Mara and many of his former colleagues from the old Alltel corporate group in Little Rock, the team we have assembled to operate our U.S. retail wireless business is very talented and experienced and will perform at the highest level. His team believes, and we believe, that there is a place in rural America for a strong, high-quality alternative to the national wireless carriers. It will be a great challenge, but we are excited about the possibilities.

Our investment in these U.S. retail wireless assets will substantially alter our mix of revenue and profit and our concentration of network assets. We expect that roughly 85% of our revenue will be generated by our U.S. wireless businesses in the second half of this year. Two thirds of our roughly 1.2 million wireless subscribers and $\frac{7}{8}$ of our approximately 1,500 wireless base stations are now located in rural areas of the United States.

Core Strategy Remains The Same

While the Alltel investment may present us with additional opportunities to expand in the United States, particularly in retail wireless, we do not expect it to shift our focus entirely in that direction. As longer term stockholders know well, we have put considerable effort in recent years into diversifying our sources of revenues and cash flows away from the

Expanding your range

Company's historical concentration in the Caribbean and islands.

In our letter to you last year, we reported on the substantial strides we had made in that regard and the Alltel asset purchase certainly should complete that goal. On the other hand, we have a lot invested, and a long operating experience, in the markets of Bermuda and the Caribbean. We have always viewed our diversity of earnings sources as a strength, and we will continue to view it as a positive factor in considering future investment opportunities. Indeed, as a sign of the continued importance we place on our operations and opportunities in the region, we have made several high level additions to the operating team at ATN. These additions will ensure that the substantial increase in our U.S. presence does not detract from our ability to add value and help steer our Caribbean and island investments towards continued success.

Most important, our overall investment strategy will remain opportunistic and value oriented. That does not mean we ignore the potential for operational and strategic synergies—our mix of assets and the capabilities of our people do affect which investment opportunities we pursue and how we value those opportunities. We understand that the Alltel transaction tilts that mix, giving us much greater potential for adding value and deriving synergies from U.S. wireless opportunities. However, these synergies do not necessarily ensure that future investments in the region will materialize within attractive economic and strategic parameters. Accordingly, we will remain open to other opportunities in the telecommunications services area and we will stay disciplined and value-oriented as we continue to look for ways to grow our business.

It is our operational strategy and approach that is most susceptible to change in the wake of the transformative Alltel investment. Over time, we see the opportunity and the necessity of adapting our operational philosophy and structure to our larger scale and greater concentration in one service area.

We will stick with our overall approach of trying to maximize authority and responsibility within the individual operating markets. But with the availability of greater resources and levels of expertise, we will modify that slightly in order to enhance the performance of our local management teams.

Other Major Accomplishments and Developments in 2009

The Alltel transaction was not the only major development in 2009. During the year we experienced significant profit decline in our two oldest operating areas—Guyana and Bermuda, but we also achieved some notable successes and milestones in those and other markets and operations.

» Our U.S. wholesale wireless business logged another very strong year. We expanded the number of mobile base stations in our network by 23% as we filled in more coverage gaps in remote areas of the Western United States. We face a challenge continuing our growth in the near-term with this business, as we expect to lose significant revenue as a result of one of our larger customers acquiring an overlapping network. However, we are on the lookout for other opportunities to expand this shared infrastructure solution in the United States and we expect to continue to expand our network coverage in 2010, albeit at a slower pace than previous years. Many of the managers and employees of this business are also in the process of expanding their roles to support other operations, such as the Alltel retail wireless business.

» In Guyana, we saw a 17% decline in our international long distance traffic, which was the main cause in the 20% decline in profits in that market.

» Wireless subscriber levels were flat in Bermuda despite the late third quarter launch of a GSM 3G mobile network on top of our existing 3G CDMA mobile network. On the other hand, in an encouraging sign of the increased competitiveness of our offerings, subscribers (almost entirely pre-paid) grew by 17% in Guyana.

» We held a ceremony in Guyana in December, attended by the President, to mark the shore landing of the new SG-SCS undersea cable that we expect to be fully operational in mid-2010. It is an exciting development for us and for the country, and we believe that data services are a critical part of our future in that market. However, the ceremony was held against a backdrop of continued

uncertainty on the future regulatory scheme in that market and whether there will be a reasonable and acceptable solution to our negotiations with the Government on the end of our exclusive right to provide international and local exchange services in that market. Long-term, we are absolutely committed to participating and succeeding in a fully competitive market, but we want to ensure that the transition to that market is carried out in a smooth, transparent and equitable manner.

» Also in December, we announced that ION, our NY-based emerging fiber transport business, had been chosen (along with its non-profit partner, Development Authority of the North County) for one of the largest Round 1 government stimulus grants (\$37.9 million) to build "middle-mile" fiber networks connecting over 70 rural communities in New York State (including portions of Pennsylvania and Vermont.) The grant will reimburse ION for 80% of the cost of building over 1,300 additional miles of a state-of-the-art fiber optic network. At the conclusion of the build, which is expected to take three years, our fiber network in NY will cover over 3,500 route miles and every region of upstate New York.

» Having first invested in ION only in mid-2008, we are still in the early stages of this business. However, we think there is very good long-term potential in this area of telecommunications services: providing high-capacity data "backhaul" and other related services to carriers and large institutions and businesses in underserved areas in the United States.

» Our U.S. wholesale wireless business also had news of a smaller stimulus grant. We were approved for an up to \$8 million grant as part of a \$40 million joint project with the Navajo Tribal Utility Authority to develop and expand broadband access and the data transport infrastructure in the tribe's lands located in Arizona, Colorado, New Mexico and Utah. As part of that project, we expect to provide fixed and mobile service to over 30,000 households (approximately 135,000 people) and 1,000 businesses in 15 of the largest communities in the Navajo Nation, making us among the earliest carriers to launch LTE services. This is an ambitious and difficult project, but we are excited about the opportunity to dramatically improve the quality, value and availability of high-speed internet services in these areas. Projects such as this, along with the work we are doing in upstate New York, are unlikely to appeal to the major national carriers, but they fit well with our approach of patiently investing in rural and underserved areas.

» Another operation supported by that management team is our pending launch of mobile wireless in the United States Virgin Islands, a market in which we have long had a small but growing presence providing high-speed data services. We were able to acquire wireless spectrum at an attractive price and think a mobile offering will be highly complementary to our existing data service offerings.

One of our independent Directors, Henry Wheatley, will be retiring from our Board of Directors upon completing his term at the Annual Meeting this spring and will be sorely missed. Henry, age 78, has served stockholders on the Company's board since its restructuring in 1998. He was a key advisor on the Caribbean and general financial matters. As someone from outside the telecommunications industry, he also served as a strong voice of common sense and reason. We are grateful for his years of service and fellowship.

Lastly, we were proud to receive recognition in 2009 by *Forbes* magazine for the third consecutive year as one of the "200 Best Small Companies". We also were recognized again by *Fortune* magazine as one of the "100 Fastest-Growing Companies" and appeared on the "The Globe 100—The Best of Massachusetts Business" for the third consecutive year. These are wonderful and well-deserved plaudits and helpful to our efforts to recruit talented, highly motivated people. But, we will continue to judge Company performance primarily by whether we are able to generate market-beating returns over the longer term. To date, we believe that has been the case. As we enter the next, exciting phase of your Company's development, and deal with the many challenges and opportunities that come with our recent growth and success, we will do our best to keep the focus on that fundamental objective.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains statements about future events and expectations, or forward-looking statements, all of which are inherently uncertain. We have based those forward-looking statements on our current expectations and projections about future results. When we use words such as “anticipates,” “intends,” “plans,” “believes,” “estimates,” “expects,” or similar expressions, we do so to identify forward-looking statements. Examples of forward-looking statements include statements we make regarding our pending acquisition of Alltel assets, future economic and political conditions in Guyana, the competitive environment in the markets in which we operate, legal and regulatory actions and technological changes, our future prospects for growth, our ability to maintain or increase our market share, our future operating results and our future capital expenditure levels. These statements are based on our management’s beliefs and assumptions, which in turn are based on currently available information. These assumptions could be proven inaccurate. These forward-looking statements may be found under the captions “Management’s Discussion and Analysis of Financial Condition and Results of Operations”, “Risk Factors” and “Business,” as well as in this Report generally.

You should keep in mind that any forward-looking statement made by us in this Report or elsewhere speaks only as of the date on which we make it. New risks and uncertainties arise from time to time, and it is impossible for us to predict these events or how they may affect us. In any event, these and other important factors may cause actual results to differ materially from those indicated by our forward-looking statements, including those set forth in Item 1A of this Report under the caption “Risk Factors.” We have no duty to, and do not intend to, update or revise the forward-looking statements made by us in this Report after the date of this Report, except as may be required by law.

In this Report the words “ATN”, “the Company”, “we,” “our,” “ours” and “us” refer to Atlantic Tele-Network, Inc. and its subsidiaries. Also ClearChoice™ is a service mark of one of our subsidiaries. This Report contains trademarks, service marks and trade names that are the property of Atlantic Tele-Network, Inc., its subsidiaries or others.

Reference to dollars (\$) refer to U.S. dollars unless otherwise specifically indicated.

Information regarding shares of our Common Stock prior to March 31, 2006 set forth in this Report has been retroactively adjusted to reflect our 5-for-2 stock split that we effected on that date.

PART I

ITEM 1. BUSINESS

Overview

We provide wireless and wireline telecommunications services in North America and the Caribbean. Through our operating subsidiaries, we offer the following principal services:

- **Wireless.** In the United States, we offer wholesale wireless voice and data roaming services to national, regional and local wireless carriers in rural markets located principally in the Southwest and Midwest. We offer wireless voice and data services to retail customers in Bermuda, Guyana and Turks and Caicos. As a result of our pending acquisition of former Alltel assets (the “Alltel Acquisition”), we expect to provide wireless voice and data services to retail customers, principally in the Southeast and Midwest United States. For more information on this acquisition, please see—“Pending Acquisition—Alltel Assets” in Management’s Discussion and Analysis.
- **Local Telephone and Data.** Our local telephone and data services include our operations in Guyana, the mainland United States and the U.S. Virgin Islands. We are the exclusive provider of domestic wireline local and long distance telephone services in Guyana. We offer facilities-based integrated voice and data communications services to residential and business customers in New England, primarily in Vermont, and wholesale transport services in New York State. We are a leading internet access service provider in the U.S. Virgin Islands.
- **International Long Distance Voice and Data Services.** We are the exclusive provider of international voice and data communications into and out of Guyana. As part of our infrastructure, we own interests in major international fiber optic cables linking Guyana to, among other places, Suriname, French Guiana, Trinidad, the U.S. Virgin Islands and the mainland United States.

Strategy

The key elements of our strategy consist of the following:

- **Focus on Providing Wireless and Wireline Telecommunications Services.** We are focused on providing wireless and wireline voice and data services to residential, business and carrier customers across a variety of geographic and demographic markets. We have provided these services to our customers for almost twenty years and have demonstrated our ability to grow both customers and revenues by maintaining quality networks, improving service and increasing the number of wireline and wireless products and services offered to these customers. We believe these sectors provide significant opportunities for recurring cash flows and organic and external growth.
- **Target Underserved Markets Where We Can Compete Successfully.** We operate in smaller, rural or underserved markets where we believe we are or will be one of the leading providers of telecommunications services. Our businesses typically have strong local brand identities and leading market positions. By leveraging these attributes, along with our lower cost of capital and our senior management expertise at the holding company level, we seek to improve and expand available products and services in our targeted markets to better meet the needs of our customers and expand our customer base.
- **Partner with Successful Local Owner/Operators.** Wherever feasible, we partner with local management teams who have demonstrated a successful track record. We believe that strong local management enhances our close relationship with customers and reduces risk. Our geographically diverse businesses are all operated, and often partially owned, by local managers,

employees and investors. We seek to enhance our strong market position by maintaining these partnerships and by leveraging our extensive management experience to assist them in further improving operations.

- **Maintain a Disciplined Earnings-Oriented Approach.** We carefully assess the potential for earnings stability and growth when we evaluate the performance of our subsidiaries, new investment opportunities and prospective acquisitions. In managing our more mature businesses, we seek to solidify our brands, improve customer satisfaction, add new services, control costs and preserve cash flow. In managing newer, early stage businesses, we seek to invest capital to improve our competitive position, increase market share and generate strong revenue and cash flow. We consider new investments and acquisitions on a disciplined, return-on-investment basis.

Our Company

We were incorporated in Delaware in 1987. We conduct our operations in the mainland United States, Guyana, Bermuda, the U.S. Virgin Islands and Turks and Caicos through our ownership (as indicated below) in the following principal operating subsidiaries:

- **Commnet Wireless, LLC (or Commnet).** In 2005, we acquired Commnet, which provides wireless voice and data communications roaming services in the United States.
- **Guyana Telephone & Telegraph (or GT&T).** In 1991, we acquired an 80% equity interest in GT&T, which is the exclusive provider of local exchange and international long distance telecommunications services in Guyana. We are also one of two service providers in Guyana's competitive wireless telecommunications market. GT&T is the successor to the Guyana Telecommunications Corporation, a corporation wholly owned by the Government of Guyana. The remaining 20% equity interest in GT&T is held by the Government of Guyana.
- **Sovernet, Inc. (or Sovernet).** In February 2006, we acquired Sovernet, which provides facilities-based integrated voice and broadband data communications services in New England, primarily in Vermont. In August 2008, Sovernet also began providing wholesale high capacity transport services in New York State through ION HoldCo, LLC (or ION).
- **Bermuda Digital Communications, Ltd (or BDC).** In 1998, we acquired a minority equity interest in BDC, which is the largest wireless voice and data communications service provider in Bermuda, operating under the Cellular One brand. In May 2008, BDC completed a share repurchase which increased our ownership from 43% to approximately 58% of BDC's outstanding common stock. Most of the remaining equity interests are held by BDC's Bermudian management team. In September 2008, BDC began providing wireless services in Turks and Caicos through Islandcom Telecommunications, Ltd.

- **Choice Communications, LLC (or Choice).** In October 1999, we acquired Choice, which provides fixed wireless broadband data services and dial-up internet services to retail and business customers in the U.S. Virgin Islands.

In addition, we receive management fees from our principal operating subsidiaries.

Atlantic Tele-Network, Inc. was incorporated in the State of Delaware in 1987. Our principal corporate offices are located at 10 Derby Square, Salem, Massachusetts, 01970. The telephone number at our principal corporate offices is (978) 619-1300.

Our Services

Through our operating subsidiaries, we provide wireless, local telephone and data, international long distance services and wholesale transport services in the mainland United States, Guyana, Bermuda, the U.S. Virgin Islands and Turks and Caicos. Increasingly, a larger share of our consolidated revenue is being generated by our U.S. operations. For fiscal years 2007, 2008 and 2009, our US operations generated 43%, 46% and 54% respectively, of our consolidated revenue as compared to 57%, 47% and 38% respectively, from our Guyana operations. For information about our financial segments and geographical information about our operating revenues and long-lived assets, see Note 15 to the Consolidated Financial Statements included in this Report.

Wireless Services

We provide mobile wireless voice and data communications services in the United States, Bermuda, Guyana and Turks and Caicos. For fiscal years 2007, 2008 and 2009, our revenues from wireless services were approximately 45%, 51% and 61%, respectively, of our consolidated revenues.

U.S. Operations

In the United States, we provide wholesale wireless voice and data roaming services in rural markets to national, regional, local and selected international wireless carriers through our subsidiary, Commnet. Roaming is a service offered by most wireless service providers that enables their subscribers to utilize their mobile phone service while traveling outside of their service provider's network coverage area. We provide these services through our own networks in markets located principally in six states in the Southwest and Midwest, and with smaller networks in eight other states. Many of our sites are located in popular tourist and seasonal visitor areas, which has resulted in higher call volumes and revenue in those areas during summer months.

Network. We currently operate networks with GSM and CDMA technologies in both the 850 MHz and 1900 MHz bands and often have each deployed at a single cell site in order to maximize revenue opportunities. The majority of our GSM sites are also equipped with GPRS and/or EDGE data technologies. Our networks comprise base stations and radio transceivers located on towers and buildings typically owned by others, telecommunications switches and leased transport facilities. In 2009 we increased the number of base stations and sites in service, and we expect that to continue in 2010. In December 2008, we acquired the network assets, including 49 base stations, of a rural retail wireless operation in Nevada. As of December 31, 2009, we owned and operated a total of 580 base stations on 406 owned and leased sites.

Sales and Marketing. We have long-term, preferred roaming agreements with several major wireless carriers, including AT&T and Verizon Wireless. Under these preferred roaming agreements, we typically agree to build a new mobile network at a specified location and offer the preferred carrier long-term pricing certainty in exchange for priority designation with respect to their customers' wireless traffic. Once we complete building a rural network, we then benefit from existing roaming agreements

with other international, national, regional, and local carriers to supplement our initial revenues. These non-preferred roaming agreements are usually terminable within 30 days.

We currently partner with several small rural operators to provide retail services to a limited number of subscribers. As a result, we do not incur significant retail distribution or retail marketing costs and our customer service costs are largely limited to technical and engineering support. Following the closing of our pending Alltel Acquisition, however, the increased retail activity in the United States will result in a significant increase in our sales and marketing expenses. The Alltel Acquisition, which we expect to close in the first half of 2010, is subject to a number of closing conditions, as described under the section entitled “Pending Acquisitions—Alltel Assets” in Management’s Discussion and Analysis.

Customers. We currently have roaming agreements with more than 65 United States-based wireless service providers. As of December 31, 2009, we were the preferred roaming carrier in selected markets for AT&T (which has a term through early 2011) and Verizon Wireless (which has a term through mid-2011). As voice and data usage has increased, rates for these and other major customers declined in 2009, although we believe that the new rates are still reasonable. We anticipate that data roaming rates will continue to decline in 2010 and in the near future as part of an industry-wide progression towards lower rates. In 2009, AT&T, T-Mobile and Verizon Wireless accounted for 81% of our Rural Wireless revenues.

Competition. We compete with wireless service providers that operate networks in our markets and offer wholesale roaming services. In addition, our carrier customers may also elect to build or acquire their own infrastructure in a market in which we operate, reducing or eliminating their need for our services in that market. We believe we compete for wholesale roaming customers based on price, network coverage and quality of service. We expect competition in the rural wireless sector to be dynamic, as competitors expand their networks and as new products and services that require supporting connectivity are developed.

Island Operations

We provide wireless voice and data service to retail and business customers under the name “Cellular One” in Bermuda, through our BDC subsidiary. On May 15, 2008, BDC completed a share repurchase of its common stock. We did not tender any shares for repurchase and, as a result, increased our ownership stake to approximately 58% of BDC’s outstanding common stock. BDC’s financial results, since the share repurchase, are consolidated with our financial results. In September 2008, BDC assumed control of Islandcom Telecommunications, Ltd., which is an early-stage business that provides wireless voice service in Turks and Caicos. In 2009, we upgraded and expanded the existing Islandcom network and plan to re-launch services in the first half of 2010.

In 2010, we anticipate the launch of retail wireless voice and data services to customers in the US Virgin Islands, through our Choice subsidiary.

Network. We currently operate networks with GSM and CDMA technologies, primarily in the 850 MHz frequency band, which covers virtually the entire population of Bermuda. BDC, through an affiliate, also holds the right to deploy a digital television and data network in Bermuda utilizing the 2.5 GHz band. We employ Evolution Data Optimized (or EV-DO) services on our CDMA network, and in 2009, launched services on a UMTS overlay across our GSM network in Bermuda. UMTS is a “3G” (third generation) wireless technology based on the GSM standard and we expect that this capability will allow us to offer advanced mobile voice and data services to a segment of the Bermuda market that we had not previously addressed.

We have extensive backbone facilities in Bermuda linking our sites, switching facilities and international interconnection points.

Sales and Marketing. We maintain four retail stores and a service center in Bermuda that are a core part of our brand identity and sales efforts. We advertise frequently through print and electronic media and sponsor various events and initiatives. A substantial majority of our customers in Bermuda subscribe to one of our post-paid plans, which are distinguished from pre-paid plans largely by the number of minutes and the enhanced features, such as text messaging, included in the plan. We also have a smaller number of pre-paid subscribers and have established “point of sale” payment terminals to enable those customers to increase their account balance at any one of a number of stores, such as a local grocer. The stores receive a commission and maintain the terminals. In Turks and Caicos, Islandcom maintains two retail stores.

Customers. At December 31, 2009, we had approximately 20,500 subscribers in Bermuda, which we estimate to be approximately 30-40% of the wireless market. As a major CDMA operator on Bermuda, we are the primary roaming provider for North American visitors using CDMA handsets, such as customers of Verizon Wireless and other carriers. Leveraging our enhanced data capabilities, we launched data roaming service in 2007 and, through our UMTS and EV-DO networks expect to continue to expand data roaming in 2010 for both visitors and our own subscribers. Islandcom had a negligible number of subscribers at year end.

Competition. In Bermuda, we compete against the wireless division of the incumbent telephone company and Digicel, which each operate GSM networks. Digicel is a large mobile telecommunications company operating in several Caribbean countries. Although we believe that we have the most advanced network in terms of data speeds and reliability in Bermuda, our competitors had historically enjoyed an advantage in their ability to offer roaming in European countries, where all the major carriers operate GSM networks. Our UMTS network, which we deployed in late 2009, is based on the GSM standard and we expect that it will eliminate that advantage. One of our competitors in Bermuda also constructed a smaller scale CDMA network, which competes for CDMA roaming traffic. We believe we compete for wireless retail customers based on features, price, technology deployed, network coverage (including through roaming arrangements), quality of service and customer care. In Turks and Caicos, we will also compete against the wireless division of the incumbent telephone company and Digicel.

Guyana Operations

We offer wireless telephone service in the vast majority of populated areas in Guyana through our GT&T subsidiary, including Georgetown (Guyana’s capital and largest city) and the surrounding area and substantially all of Guyana’s coastal plain where 70% of Guyana’s population is concentrated. As of the end of 2009, we estimate that Guyana’s wireline teledensity was approximately 19 access lines per 100 inhabitants. We estimate that over 50% of the population subscribes to a wireless service, although with a largely pre-paid subscriber base it is difficult to determine how many of our subscribers are also subscribers to competing services. We expect that any continued expansion of our network will be minimal, as we have already extended coverage into the most populated areas of Guyana and the remaining areas are remote and sparsely populated.

Network. Historically, we provided service on our existing TDMA network in Guyana, which was phased out beginning with the launch of our new GSM/GPRS network in 2004, and completed in 2007. Beginning in 2008, we operated only the GSM network in Guyana and returned the spectrum used for TDMA services to the Government’s National Frequency Management Unit. Our GSM network operates in approximately 12 MHz of spectrum in the 900 MHz band and 36 MHz of spectrum in the 1800 MHz band.

Customers. We estimate that over 90% of the country’s population resides in areas covered by our wireless network. As of December 31, 2009, we had approximately 289,000 wireless subscribers, up

17% from approximately 248,000 subscribers as of December 31, 2008. As of December 31, 2009, almost 98% of our wireless subscribers were on pre-paid plans.

Sales and Marketing. We actively market our wireless services through widespread radio, television and outdoor advertising, sponsored events, and merchandise giveaways as well as through our close, promotional relationships with leading disc jockeys and radio personalities and other local celebrities. We do not maintain any traditional retail stores, although all post-paid wireless customers set up accounts at one of our six business centers and pre-paid customers may do so as well. Our handsets, pre-paid cards and pre-paid accounts are sold primarily through independent dealers whom we pay on a commission basis. Wireless subscribers are offered various calling plans and are charged a monthly fee plus airtime based on the selected plan. These fees are payable on either a pre-paid basis, which means a customer purchases a calling card with a prescribed number of minutes in advance of any usage, or a post-paid basis, which means the subscriber is billed for his or her minutes of use after usage. Pre-payments can be made by the purchase of disposable pre-paid calling cards, which come in fixed Guyanese dollar amounts, or by recharging an account via our "C-Point" electronic terminals available at authorized vendors. The vast majority of our customers are on the pre-paid plan.

Competition. We provide wireless services in Guyana pursuant to a non-exclusive license. Digicel, our primary competitor in Guyana, has spent aggressively since early 2007 to gain market share, including promotional pricing, the use of extensive giveaways and handset subsidies. In turn, we have countered with our own promotions and by continuing to invest heavily in our network. In 2007 and 2008, this heightened competition resulted in our losing significant market share. In 2009, however, we believe we were able to hold on to our share of the market and resumed our growth in wireless subscribers. We expect competition for subscribers and usage to remain rigorous in 2010. We believe we compete for customers based on price, promotions, coverage and quality of service. While we believe that we are well-positioned competitively with respect to the quality of our service, we believe that Digicel may be willing to offer greater promotional giveaways to obtain market share from us.

Local Telephone and Data Services

Our local telephone and data services include our operations in Guyana, the mainland United States and the U.S. Virgin Islands. For fiscal years 2007, 2008 and 2009, our revenues from local telephone and data services were approximately 25%, 24% and 23%, respectively, of our consolidated revenues.

Guyana Operations

We are the exclusive provider of domestic wireline local and long distance telephone services in Guyana through our GT&T subsidiary. As of December 31, 2009, we had approximately 147,000 access lines in service. This represents approximately 19 lines per 100 inhabitants (based on an estimated population of approximately 770,000), an increase of approximately 6%, or over 8,000 net new lines, compared to lines in service at December 31, 2008. Of all fixed lines in service, the majority are in the largest urban areas, including Georgetown, Linden, New Amsterdam, Diamond and Beterverwagting. During 2009, we continued to extend our network to cover newly developed housing areas and residential parks and additional rural towns and communities, although at a lesser rate than in previous years. Despite our substantial and continuing investment in extending our fixed line network, some rural areas still do not have telephone service. We plan to bring service to some of these areas in 2010 and beyond, but we expect the pace of our geographic expansion of wireline build out to continue to decline due to the substantial cost of operating in remote, sparsely populated areas.

Network. We have significantly rebuilt and expanded our telecommunications network. Through December 31, 2009, we have invested nearly \$318 million in Guyanese telecommunications infrastructure and in 2009 landed a newly built fiber optic submarine cable in Guyana, which we expect to be operational in 2010. We have increased the number of fixed access lines from approximately 13,000 working lines in January 1991 to over 147,000 lines as of December 31, 2009, all of which are now digitally switched lines. For over 10,000 of these lines, services are delivered through a fixed wireless technology. Since the provider of this technology no longer adequately supports it, we began to replace that fixed wireless network in 2007 with an alternative technology for delivering both telephone and data services to households and businesses in that region. The deployment of the new technology in 2008 was slowed by repeated technical problems and the equipment manufacturer has been working with us to resolve these issues. If the issues are not permanently resolved, we may turn to a different technological solution for these customers.

In Guyana, the market for data services, including high-speed Internet is still small as compared to our U.S. markets, the number of subscribers and the demand for these services has expanded, which is one factor in our decision to build the first submarine fiber-optic cable landing in Guyana. We expect demand for data services to continue to grow and we expect to make other investments in expanding the scope and availability of advanced data services in this market.

In addition, we estimate that we have installed over 700 public telephones in locations across the country providing telecommunications for both local and international calls in areas that previously did not have service. We also maintain three public telephone centers at which the public can pay to use an ordinary residential-type telephone to make international and domestic calls.

Sales and Marketing. Our revenues for fixed access domestic service are derived from installation charges for new lines, monthly line rental charges, monthly measured service charges based on the number and duration of calls and other charges for maintenance and other customer services. For each category of revenues, rates differ for residential and commercial customers. Customers desiring to obtain an access line submit written applications to one of our customer service offices. Service representatives process the applications and service is installed within about two weeks (or, if service is not yet available in that area, the applicant is placed on a waiting list). We employ a minimal sales force, as wireline sales are primarily driven by network expansion and availability of service. Our wireline subscribers typically pay for telephone service (including international long distance) after being billed for it. Customers can pay their bills at any one of our six business centers, any Western Union branch, commercial banks and post offices. Customers can also utilize our prepaid card services on their landline phones.

Customers. We provide our wireline telephone services to residential and commercial customers. As a result of our continued network expansion into smaller communities and more recently, newly developed housing areas and residential parks, residential customers account for a growing portion of local telephone service revenues and the vast majority of new lines in service. In 2009, residential customers contributed approximately two thirds of the wireline local telephone service revenue and commercial customers provided approximately one third.

Competition. We have the exclusive right to provide domestic fixed and international voice and data services in Guyana pursuant to a license with an initial term that expires in December 2010 and which is renewable at our sole option for an additional 20 year term. In November 2009, we notified the Government of Guyana of our election to renew our exclusive license for an additional 20 years. However, the exclusivity provisions of our license have been, and currently are, the subject of negotiations with the Government of Guyana. See “—Regulation of Our GT&T Subsidiary—Other Regulatory Developments” and “Risk Factors—Our exclusive license to provide local exchange and international voice and data services in Guyana is subject to significant political and regulatory risk.”

U.S. Operations

We are a leading competitive integrated voice and broadband data communications services provider in Vermont and western New Hampshire through our Sovernet subsidiary. We also provide fiber based wholesale transport services in New York State through Sovernet's subsidiary, ION, which we acquired in August 2008.

Network. We provide voice and data services using a network comprising telecommunications switching and related equipment that we own and telecommunications lines that we typically lease from the incumbent telephone company. We operate a high capacity fiber-optic ring network in Vermont that we use to connect 10 of our largest markets in the state. As of December 31, 2009, we had approximately 42,300 business and 4,400 residential access line equivalents, or ALEs, in billing. ALEs are calculated by determining the number of individual voice or data lines that generate a monthly recurring charge within an end user circuit or circuits.

Through ION, our wholesale transport business operates several redundant fiber rings comprising more than 2,000 fiber miles that connect major New York metropolitan hubs with rural communities within the state. In 2010 pursuant to a \$39.7 million award granted to ION by the National Telecommunications and Information Administration of the U.S. Department of Commerce, we expect to begin expanding our existing network by constructing ten new segments of fiber-optic, middle-mile broadband infrastructure, serving more than 70 rural communities in upstate New York and parts of Pennsylvania and Vermont.

Sales and Marketing. We sell our services primarily through a direct sales force that assists customers in choosing tailored solutions for their unique communication needs. The direct sales staff focuses on selling integrated voice and data to small and medium-sized businesses and other organizations. The sales force is geographically dispersed to maximize customer acquisition. Residential services are largely sold through advertising and word of mouth. We advertise on television and radio through cooperative arrangements and engage in other promotional activities from time to time. Our long haul transport and capacity services are sold through a direct sales force that deals directly with our customers, predominately telecommunications carriers.

Customers. We focus on two subsets of customers in Vermont and New Hampshire: small to medium sized businesses (or SMBs) and residential customers, with a particular focus on SMBs going forward. Our SMB customers require multiple telephone lines for voice communications, digital subscriber line (or DSL), DS1 and/or DS3 broadband data communications capacity. Our residential customers require voice and data communications (using either DSL or lower-speed, dial-up modems for data communications). As of December 31, 2009, we had approximately 3,900 business accounts and 1,900 residential accounts. We also provide dial-up internet services to thousands of customers in Vermont and western New Hampshire. Due to increased availability of high-speed internet services, our dial-up internet service subscriber base has been declining, which we expect will continue. Our wholesale transport and capacity customers are predominately telecommunications carriers such as local exchange carriers, wireless carriers and interstate integrated providers. We expect to expand ION's customer base in New York State to include more large-scale end users such as large enterprises, governmental agencies and educational institutions.

Competition. We compete for retail customers by offering customized voice and data solutions designed to meet the specific needs of our two targeted subsets of customers, coupled with superior customer service and competitive pricing. Our primary retail competitor is Fairpoint Communications, which acquired the incumbent local exchange business of Verizon Communications in northern New England. We also compete occasionally with other competitive service providers who target small and medium sized businesses, cable companies and other internet service providers seeking to provide voice and/or data services primarily to residential customers. In New York State, ION competes against other

providers of wholesale high-capacity transport such as Verizon Communications and the multi-state long-haul providers.

U.S. Virgin Islands Operations

We are a leading provider of internet access services in the U.S. Virgin Islands through our Choice subsidiary, primarily under the domain names viaccess.net and islands.vi. Internet service is provided by dial-up and a variety of wireless broadband technologies. The broadband services include near-line-of-sight (or NLOS) portable wireless capabilities sold under the ClearChoice™ service name and WiFi hotspots and fixed wireless. Under our ClearChoice™ service residential and small business customers can easily self-install the broadband internet service and have the ability to move service from one location to another. In 2009, we continued to create additional broadband WiFi hotspots to serve the extensive tourist market.

In May 2009, we discontinued our multinational, wireless digital television services to residential subscribers and hotel rooms.

As of the end of 2009, the number of our broadband data customers decreased by 19% compared to 2008, due to the removal of non-paying customers from our billing system as well as other factors. During 2009, we also accelerated the sale of high capacity fixed wireless data services to some business and governmental customers. During the same period the number of our dial-up subscribers decreased by 53%.

Network. In general, our network consists of high-capacity, microwave backbone systems with lower capacity links for NLOS and WiFi access points. Off-island connectivity is provided by leased, fiber-based interconnections. We have expanded our data network over the last four years to support new service capabilities and provide more capacity for new broadband internet customers, although expansion of our data network in 2008 was at a significantly lower rate than previous years. Beginning in 2004, we built our primary customer access data networks using spectrum licensed from the FCC, which protected the spectrum from interference from other operators. All of our services (other than customer access at our WiFi hotspots) are provided over this licensed spectrum and, therefore, are protected from the interference that often affects services deployed in unlicensed spectrum.

Sales and Marketing. We have two retail locations in the U.S. Virgin Islands that account for the majority of customer interaction. We also use direct sales for larger customers, particularly hotels and commercial users of our high-speed data services.

Customers. Our services are offered to local residential customers, hotels and lodging facilities, other local businesses and governmental agencies.

Competition. Our internet access services compete mostly with the local telephone company, as well as some smaller internet providers. In 2007, another carrier introduced broadband data services using licensed PCS spectrum and we believe other carriers will soon offer these services using a recently auctioned spectrum band, or other licensed spectrum. We believe we compete for wireless broadband customers based on price, ease of installation, ease of operation and network quality.

International Long Distance Services

We are the exclusive provider of international long distance voice and data communications into and out of Guyana through our GT&T subsidiary. We collect a payment from foreign carriers for handling international long distance calls originating from the foreign carriers' country and terminating in Guyana. We make a payment to foreign carriers for international calls from Guyana terminating in the foreign carrier's country and are entitled to collect from our subscribers (and from competing wireless carriers), a rate that is regulated by the Public Utilities Commission of Guyana.

Overall, revenues from our international long distance services have been declining. For fiscal years 2007, 2008 and 2009, our revenues from such services were approximately 25%, 24% and 23%, respectively, of our consolidated revenues. Most of these revenues were from collecting settlement rate payments, which are paid in U.S. dollars, for international long distance calls into Guyana from other countries. For fiscal years 2007, 2008 and 2009, inbound international long distance traffic (together with outbound collect which also entitles us to receive a settlement rate payment), was approximately 84% of our total minutes of international long distance traffic, while outbound international traffic (including outbound collect) was approximately 15% of such traffic. We estimate that approximately one million Guyanese live in the United States, Canada and the United Kingdom and drive this profitable traffic to Guyana. With respect to outgoing international traffic, during the past three years, amounts we collected for outbound international traffic have in the aggregate exceeded the payments due to foreign carriers for such traffic, as the average rate we pay for outgoing international traffic has declined as well.

The rates at which we collect fees from foreign carriers for handling incoming international long distance calls, and the rates at which we pay foreign carriers for handling outgoing international calls, are established by agreement between us and the foreign carriers, and can be affected by maximum limits set by foreign telecommunications regulators, such as the Federal Communications Commission (or the FCC), as to how much carriers under their jurisdiction may pay for the termination of international traffic in another country.

Network. Our international long distance network is linked with the rest of the world principally through our ownership of a portion of the Americas II undersea fiber optic cable, which was commissioned in October 2000. We own capacity in four international fiber optic cables—the Americas I cable, which runs from Brazil to Trinidad, the U.S. Virgin Islands and the mainland United States, the Columbus II cable, which runs from the Caribbean region to the Azores, the Eastern Caribbean Fiber System (or ECFS) cable from Trinidad to Tortola and the Americas II cable which runs from Brazil through the Caribbean to the United States with a branch through French Guiana, Suriname and Guyana. In 2009 we began construction of a new fiber optic submarine cable into Guyana, which we are building with Telesur, the government owned telecommunications provider in Suriname. This cable will run from Trinidad and will branch into both Guyana and Suriname and is expected to be operational in the summer of 2010. This cable, when operational, would provide us with more robust redundancy, together with the capacity to meet growing data demands in Guyana, including the government's plans for a major, new technology park. We also lease capacity on Intelsat satellites and have two Standard B earth stations, which provide both international and local backhaul services in an effort to approach 100% voice redundancy and provide a partial back-up to our fiber optic cable capacity.

Sales and Marketing. Our international long distance business is driven mainly by the population of Guyanese living abroad and the number of people in Guyana capable of initiating and receiving international long distance calls, which consists of wireline telephone customers and all of the wireless subscribers in Guyana (including subscribers of other wireless service providers). We typically do not market long distance service independent of domestic wireline and wireless services.

Customers. With respect to outgoing international long distance calls, our customers consist of our local wireline customers and wireless subscribers (including the customers of competing wireless carriers) as well as wholesale customers such as our wireless competitor and local internet service providers. With respect to incoming international long distance calls, we receive payments from foreign carriers, especially AT&T and IDT Corporation, who together accounted for approximately 50%, 43% and 12% of our international long distance revenue for 2007, 2008 and 2009, respectively. This decrease was largely attributable to our efforts in 2009 to decrease our dependence on a select few number of foreign carriers.

Over the past two years, we have sought to offer promotional pricing on outbound international calls, particularly for fixed line customers. Beginning January 1, 2010, the Guyana regulatory authorities allowed us to reduce our rates for a one-time promotion through March 31, 2010. We have applied for a three-month extension of this promotion. In addition, in 2009 we launched a low-rate wholesale, PBX offering to the internet service providers in country.

Competition. We have the exclusive right to provide domestic fixed and international voice and data services in Guyana pursuant to a license that has a stated initial term that expires in December 2010, which is renewable at our sole option for an additional 20 year term. In November 2009, we notified the Government of Guyana of our election to renew our exclusive license for an additional 20 years. However, the exclusivity provisions of our license have been, and currently are, the subject of negotiations with the Government of Guyana. See “—Regulation of Our GT&T Subsidiary—Other Regulatory Developments” and “Risk Factors—Our exclusive license to provide local exchange and international voice and data services in Guyana is subject to significant political and regulatory risk.” Since 2008 there has been a substantial and ongoing increase in efforts to illegally bypass our international exchange, and therefore our international license, and avoid paying us origination and termination fees. We have taken action against some local companies and individuals who are engaging in these efforts, including taking action against unlicensed operators in Guyana, introducing special outbound call center rates and we are examining automated technical solutions. In addition, we have made complaints to various foreign carriers and regulatory bodies in an effort to protect our network and our rights under our license. Guyana governmental authorities have made some effort to assist us, however, we have yet to see a major reduction in bypass activity. We believe the largest amount of bypass is occurring with respect to calls terminating on our competitor Digicel’s local wireless network and in the first quarter of 2010, we took legal action to defend our exclusive rights to provide international voice and data services. See “Legal Proceedings” and “Risk Factors—Any significant decline in the price or volume, including bypass activities, of international long distance calls to Guyana could adversely affect our financial results.”

Employees

As of December 31, 2009, we had 889 employees (851 full-time and 38 part-time), of whom 199 were employed in the United States (including in the US Virgin Islands) and 626 were employed in Guyana. At the holding company level, we employ the executive management team and staff. More than half of the GT&T full-time work force is represented by the Guyana Postal and Telecommunications Workers Union. GT&T’s contract with the union was renegotiated effective October 1, 2008 and expires in October 2010. We do not have any union employees in Bermuda, Turks and Caicos or the United States. We believe we have good relations with our employees.

Regulation

Our telecommunications operations are subject to extensive governmental regulation. The following summary of regulatory developments and legislation does not purport to describe all present and proposed federal, state, local, and foreign regulation and legislation that may affect our businesses. Please refer to Note 13 of the Consolidated Financial Statements included in this Report for a more detailed discussion of regulatory and litigation matters that concern our business.

Legislative or regulatory requirements currently applicable to our businesses may change in the future and legislative or regulatory requirements may be adopted by those jurisdictions that currently have none. Any such changes could impose new obligations on us that would adversely affect our operating results.

Regulation of Our GT&T Subsidiary

We are subject to regulation in Guyana under the provisions of our licenses from the Government of Guyana, the Guyana Public Utilities Commission Act of 1999 (or PUC Law) and the Guyana Telecommunications Act 1990 (or Telecommunications Law). The Public Utilities Commission of Guyana (or PUC) is an independent statutory body with the principal responsibility for regulating telecommunications services in Guyana. We also have certain significant rights and obligations under our agreement with Guyana pursuant to which we acquired our interests in GT&T in 1990, which we refer to as the Guyana Agreement.

Licenses. We provide domestic fixed and international voice and data services in Guyana pursuant to a license from the Government of Guyana granting us the exclusive right to provide: public telephone, radio telephone, and pay telephone services; domestic fixed; international voice and data services; sale of advertising in any telephone directories; and, switched or non-switched private line service. Rates for most of our services must be approved by the PUC. The license, which was issued in December 1990, has an initial 20-year term. We provide mobile wireless telephone service in Guyana pursuant to a non-exclusive license from the Government of Guyana. Our wireless license also was granted in December 1990 and has an initial 20 year term. Each of these licenses is renewable at GT&T's option, for an additional term of 20 years. In November of 2009, GT&T notified the Government that it is exercising its option to renew its exclusive and non-exclusive licenses for an additional period of 20 years. In exercising our option to renew our licenses, we reiterated to the Government that we would be willing to voluntarily relinquish the exclusivity aspect of our licenses, as part of an overall settlement with the Government.

Guyana Agreement. In 1990, we entered into the Guyana Agreement, pursuant to which we agreed to provide telecommunications services for public use in Guyana, including completing by February 1995 a significant expansion of those services, in exchange for a minimum return of 15% per annum on GT&T's capital dedicated to public use (or rate base). Based on a rate of return methodology consistent with the practices and procedures of the FCC, we believe the rate base includes GT&T's entire property, plant and equipment. The PUC, however, has disallowed or challenged several million dollars of franchise rights and working capital that we believe should be included in the rate base. The Guyana Agreement also provides that, upon non-renewal of our exclusive license covering domestic fixed and international voice and data services, the Government of Guyana will be entitled to purchase our interest in GT&T or the assets of GT&T upon mutually agreed upon terms or, absent such agreement, as may be determined by arbitration before the International Center for the Settlement of Investment Disputes.

PUC Law and Telecommunications Law. The PUC Law and the Telecommunications Law provide the general framework for the regulation of telecommunications services in Guyana. The PUC has authority to set rates and has certain powers to monitor our compliance with our exclusive wireline license and to require us to supply it with such technical, administrative and financial information as it may request. While we have challenged its position, the PUC claims broad authority to review and amend any of our programs for development and expansion of facilities or services.

We believe that the PUC has failed to adhere to the provisions of the Guyana Agreement guaranteeing us a minimum 15% per annum return on GT&T's rate base as required under the current PUC Law and predecessor statutes in effect since 1990. For a description of recent actions of the PUC, see Note 13 to the Consolidated Financial Statements included in this Report.

Regulatory Developments. Since 2001, the Government of Guyana has stated its intention to introduce additional competition into Guyana's telecommunications sector, and held formal discussions with GT&T in 2002 regarding this matter. During 2008, at the request of the Government, GT&T met with high-ranking members of the Government to discuss potential modifications of GT&T's exclusivity rights and the introduction of competition for international voice and data services. We believe that

such competition is precluded by GT&T's exclusive license to provide domestic fixed and international voice and data services in Guyana, which has a stated expiration of its initial term in December 2010, and is renewable at our sole option for an additional 20 year term, which we exercised in November 2009.

We believe that any early termination of our exclusivity would require our consent and appropriate compensation to GT&T as well as the satisfactory resolution of certain long-standing claims between us and the Government relating to certain tax and other matters (described in Note 13 to the Consolidated Financial Statements included in this Report). In addition, certain modifications to the legal and regulatory regime governing the telecommunications market sector in Guyana will be necessary. The Government of Guyana has acknowledged to us that a transition to full competition may require a significant rebalancing of local and long distance rates for domestic and international services offered by GT&T. During 2008, GT&T held discussions with the Government to develop a methodology and process to implement rate rebalancing during and after a transition to competition. We have indicated to the Government that we would be willing to consider foregoing renewal of our international exclusivity rights in 2010, but only as part of an overall settlement agreement.

In October 2008, GT&T was informally notified that the Government has retained the services of a US-based law firm and a consultant to develop the legislative and regulatory reforms necessary to introduce telecommunications competition in Guyana. In 2008, GT&T met informally with these parties to discuss the process and possible timing of any legislation or regulatory initiative. In those discussions, GT&T was informed that draft legislation liberalizing the telecommunications sector in Guyana may be available as early as the second half of 2009. We currently expect that draft legislation may be available in the first half of 2010. At this time, ATN and GT&T do not know whether or how any draft legislation will address GT&T's exclusive license, and if so, whether it would be pursuant to an agreement between GT&T and the Government. Other than entering into such an agreement on mutually acceptable terms, ATN and GT&T would seek to enforce GT&T's rights by law and contract to be the exclusive provider of domestic fixed and international voice and data services in Guyana and would pursue any other legitimate avenues of recourse available to us. Although ATN and GT&T believe that they would be entitled to damages for any involuntary termination of that exclusive license, ATN and GT&T cannot guarantee that we would prevail in any court or arbitration proceeding or that our actions would effectively halt any unilateral action by the Government.

In a letter dated September 8, 2006, the National Frequency Management Unit ("NFMU") indicated that spectrum fees in 2008 and onward may be increased beyond the amount agreed between GT&T and the Government in previous years. In a September 14, 2006 letter to the Government, GT&T asserted that, by agreement with the Government, spectrum fees should be capped until the NFMU develops a fee methodology acceptable to all GSM spectrum licensees. In correspondence to GT&T in June 2007, the NFMU stated that the cap on GSM spectrum fees would be removed in December 2007 but did not indicate whether a fee methodology would be developed. In its response to the NFMU, dated July 3, 2007, GT&T objected to the NFMU's proposed action and reiterated its position that an acceptable fee calculation methodology is necessary before the Government can assess spectrum fees. In a letter dated March 24, 2009, the NFMU requested information from GT&T for use in calculating spectrum fees for 2009. On October 28, 2009, GT&T and Digicel Guyana jointly submitted to the NFMU a proposed methodology for computing annual spectrum fees for mobile service providers and a proposed process for implementing the new fee structure. The proposed formula would calculate spectrum fees based on the quantity and frequencies of assigned bandwidth used by the operator and a value determined by the NFMU based on technical and use considerations.

In January 2007, the PUC issued a ruling allowing cellular companies the freedom to set peak rates within a floor of G\$7.00 (approximately US\$0.035) and a ceiling of G\$32.00 (approximately US\$0.16), with an off-peak ceiling of not less than 12% below the peak ceiling rate. Digicel has been offering promotions that appear to us clearly to violate the floor on cellular rates. We believe the PUC has acted in an unreasonably discriminatory manner in favor of GT&T's primary competitor by not

enforcing the new minimum and maximum rates and in 2007, GT&T filed a lawsuit in Guyana High Court contesting the PUC's enforcement approach. During 2008, the PUC expressed its intent to revisit the floor rate and, possibly, eliminate it. That suit remains pending.

In 2008 and 2009, the Government of Guyana enacted legislation requiring telecommunications carriers to implement procedures and modify their networks to assist the Government's law enforcement activities. This legislation requires carriers to enable interception of communications and collect proof of address and photographic identification for all new and existing customers. GT&T is in full compliance with the intercept requirements and is in the process of updating its customer records. GT&T has communicated to the Government the logistical difficulty of complying with its records requirement and the possibility for disruptions in service and the Government has indicated that while it will not immediately enforce the disconnection, it will urge all carriers to use all possible avenues to collect this data.

FCC Rule-Making and International Long Distance Rates. The actions of telecommunications regulators, especially the FCC, affect the settlement rate payable by foreign carriers to GT&T for handling incoming international long distance calls. In 1997, the FCC adopted mandatory terminating rate benchmarks for many countries and required termination rates for Guyana, among several countries classified as low-income, to be reduced by January 2002 from \$0.85 to \$0.23 per minute. The reduction in the termination rate resulted in a substantial reduction in inbound international telecommunication revenue. On occasion, large carriers have proposed further reductions in the settlement rate benchmarks for many countries, including Guyana, and requested that the FCC initiate a rule-making to consider the issue. While the FCC has rejected these requests, it has indicated that it will continue to monitor and evaluate termination rate levels and benchmarks.

U.S. Federal Regulation of Our Commnet, Sovernet, and Choice Subsidiaries

Our wireless and wireline operations in the United States and the U.S. Virgin Islands are governed by the Communications Act of 1934, as amended (or Communications Act), the implementing regulations adopted thereunder by the FCC, judicial and regulatory decisions interpreting and implementing the Communications Act, and other federal statutes.

Wireless Services

The FCC regulates, among other things, the licensed and unlicensed use of radio spectrum; the ownership, lease, transfer of control and assignment of wireless licenses; the ongoing technical, operational and service requirements; the timing, nature and scope of network construction; the provision of certain services, such as E-911; and the interconnection of communications networks in the United States.

Licenses. We provide our wireless services under various commercial mobile radio services (or CMRS) licenses, such as cellular and broadband Personal Communications Services (or PCS) licenses, and broadband radio service (or BRS) licenses granted by the FCC and pursuant to leases of spectrum from FCC-licensed operators. Some of these licenses are site-based while others cover specified geographic market areas, typically Basic Trading Areas (or BTAs), as defined by the FCC. The technical and service rules, the specific radio frequencies and the authorized spectrum amounts vary depending on the licensed service. The FCC generally grants all CMRS and BRS licenses through periodic auctions, after determining how many licenses to make available in particular frequency ranges, what service rules will apply, and the terms on which the license auction will be conducted.

Construction Obligations. The FCC conditions licenses on the satisfaction of certain construction obligations. The obligations vary depending on the licensed service. Failure to satisfy an applicable construction requirement can result in the assessment of fines and forfeitures by the FCC, a reduced license term, or automatic license cancellation. We are in compliance with the applicable construction

requirements that have arisen for the licenses we currently hold and expect to meet all future construction requirements as well.

With respect to some of our licenses, if we were to discontinue operation of a wireless system for a period of time, at least 90 continuous days for cellular licenses, our license for that area would be automatically forfeited.

License Renewals. Licenses generally have a 10-year term and are renewable upon application to the FCC. License renewal applications may be denied if the FCC determines, after appropriate notice and hearing, that renewal would not serve the public interest, convenience, or necessity. At the time of renewal, if a competing application is filed and if we can demonstrate that we have provided “substantial” service during the past license term and have complied with applicable FCC rules and policies and the Communications Act, then the FCC will award a renewal expectancy to us and will generally renew our existing licenses without considering any competing applications. The FCC defines “substantial” service as service which is sound, favorable and substantially above a level of mediocre service that might only minimally warrant renewal. If we do not receive a renewal expectancy, then the FCC will accept competing applications for the license and conduct a comparative hearing. In that situation, the FCC may award the license to another applicant. While our licenses have been renewed regularly by the FCC in the past, there can be no assurance that all of our licenses will be renewed in the future.

The FCC may deny license applications and, in extreme cases, revoke licenses, if it finds that an entity lacks the requisite “character” qualifications to be a licensee. In making that determination, the FCC considers whether an applicant or licensee has been the subject of adverse findings in a judicial or administrative proceeding involving felonies, the possession or sale of unlawful drugs, fraud, antitrust violations, or unfair competition, employment discrimination, misrepresentations to the FCC or other government agencies, or serious violations of the Communications Act or FCC regulations. To our knowledge, there are no activities and no judicial or administrative proceedings involving either us or the licensees in which we hold a controlling interest that would warrant such a finding by the FCC.

License Acquisitions. Prior FCC approval typically is required for transfers or assignments of a controlling interest in any license or construction permit, or of any rights thereunder. Non-controlling minority interests in an entity that holds an FCC license generally may be bought or sold without FCC approval, subject to any applicable FCC notification requirements. The FCC permits licensees to lease spectrum to third parties under certain conditions, subject to prior FCC approval, unless certain spectrum leases are involved. These mechanisms provide additional flexibility for wireless providers to structure transactions and create additional business and investment opportunities.

In reviewing proposed transactions, the FCC utilizes a spectrum aggregation screen to determine whether the transaction requires additional scrutiny. A transaction will trigger heightened scrutiny if it will result in the geographic overlap of CMRS spectrum in a given area that is equal to or in excess of 95 MHz, 115 MHz, 125 MHz, or 145 MHz, depending on the availability of BRS and Advanced Wireless Services (or AWS) spectrum in an overlap area. We are well below the spectrum aggregation screen in the geographic areas in which we hold or have access to licenses, and thus we may be able to acquire additional spectrum either from the FCC in an auction or from third parties in private transactions. Similarly, our competitors may be able to strengthen their operations by making additional acquisitions of spectrum in our markets or by further consolidating the industry.

The FCC no longer caps the amount of CMRS spectrum in which an entity may hold an attributable interest and now engages in a case-by-case review of proposed wireless transactions, including spectrum acquired via auction, to ensure that the proposed transaction serves the public interest and would not result in a rule violation or an undue concentration of market power. The change in approach has further increased the ability of wireless operators to attract capital or to make investments in other wireless operators.

The FCC may prohibit, or impose conditions on, proposed transactions involving the transfer of licenses or the lease of spectrum. Although we cannot ensure that the FCC will approve, not condition, or act in a timely fashion upon any future requests for approval of proposed transactions in which we are involved, we have no reason to believe that the FCC would not approve or grant such requests or applications in due course.

Other Requirements. The Communications Act and the FCC's rules impose a number of additional requirements upon wireless service providers.

Wireless licensees must satisfy a variety of FCC requirements relating to technical and reporting matters. Licensees must often coordinate frequency usage with adjacent licensees and permittees to avoid interference between adjacent systems. In addition, the height and power of transmitting facilities and the type of signals emitted must fall within specified parameters. For certain licensed services, a variety of incumbent government and non-government operations may have to be relocated before a licensee may commence operations, which may trigger the payment of relocation costs by the incoming licensee.

The radio systems towers that we own and lease are subject to Federal Aviation Administration and FCC regulations that govern the location, marking, lighting, and construction of towers and are subject to the requirements of the National Environmental Policy Act, National Historic Preservation Act, and other environmental statutes enforced by the FCC. The FCC has also adopted guidelines and methods for evaluating human exposure to radio frequency emissions from radio equipment. We believe that all of our radio systems on towers that we own or lease comply in all material respects with these requirements, guidelines, and methods.

The FCC has adopted requirements for cellular, PCS and other CMRS providers to implement basic and enhanced 911, or E-911, services. These services provide state and local emergency service providers with the ability to better identify and locate 911 callers using wireless services, including callers using special devices for the hearing impaired. Because the implementation of these obligations requires that the local emergency services provider have certain facilities available, our specific obligations are set on a market-by-market basis as emergency service providers request the implementation of E-911 services within their locales. The FCC is considering changes to its rules and policies concerning E-911 location accuracy. We are unable at this time to predict the likely outcome of this proceeding. The extent to which we are required to deploy E-911 services will affect our capital spending obligations. Federal law limits our liability for uncompleted 911 calls to a degree commensurate with wireline carriers in our markets.

Under certain circumstances, federal law also requires telecommunications carriers to provide law enforcement agencies with capacity and technical capabilities to support lawful wiretaps pursuant to the Communications Assistance for Law Enforcement Act (or CALEA). Federal law also requires compliance with wiretap-related record-keeping and personnel-related obligations. We are in compliance with all such requirements currently applicable to us. The FCC has adopted rules that apply these CALEA obligations to high speed Internet access and voice-over Internet protocol (or VoIP) services. Maintaining compliance with these law enforcement requirements may impose additional capital spending obligations on us to make necessary system upgrades.

Wireless and Wireline Services

Universal Service. In general, all telecommunications providers are obligated to contribute to the federal Universal Service Fund (or USF), which is used to promote the availability of wireline and wireless telephone service to individuals and families qualifying for federal assistance, households located in rural and high-cost areas, and to schools, libraries and rural health care providers. Contributions to the federal USF are based on end user interstate telecommunications revenue. We contribute to the USF as required by the rules throughout the U.S., and our subsidiary Commnet receives approximately \$1.7 million per year from the USF for providing service in rural areas of

Nevada. The FCC has initiated rule making proceedings to consider broad-based reform of the USF program and the U.S. Congress has expressed similar interest. We cannot predict the impact of any changes in USF policy or rules on the amounts that we pay or receive. Some states have similar programs which require contribution based on end user intrastate telecommunications revenue. It is likely that, if the federal universal service program is modified, some or all state programs may be modified as well. We cannot predict the impact of any such changes on the amounts we pay into these programs, or the amounts that we might potentially be eligible to receive from them.

Intercarrier Compensation. Under federal and state law, telecommunications providers are generally required to compensate one another for originating and terminating traffic for other carriers. Consistent with these provisions, the Company currently receives compensation from other carriers and also pays compensation to other carriers. The FCC has had proceedings open since 2001 exploring potential changes to these rules, and the FCC recently has indicated that it may take up this issue again in the next year. We cannot currently predict the impact of any changes to these requirements on the amounts that we pay or receive.

Local Competition. The Communications Act encourages competition in local telecommunications markets by removing barriers to market entry and imposing on non-rural incumbent local exchange carriers (or ILECs), among other things, duties to:

- negotiate interconnection agreements at any technically feasible point on just, reasonable, and non-discriminatory rates, terms, and conditions;
- provide access to certain unbundled network elements (or UNEs), such as local loops and interoffice transport, or combinations of UNEs at nondiscriminatory, cost-based rates in certain circumstances;
- provide physical collocation, which allows competitive local exchange carriers (or CLECs), such as Sovernet, to install and maintain its network termination equipment in an ILEC's central office or to obtain functionally equivalent forms of interconnection under certain circumstances;
- provide access to poles, ducts, conduits, and rights-of-way on a reasonable, non-discriminatory basis;
- offer retail local telephone services to resellers at discounted wholesale rates;
- when a call originates on its network, compensate other telephone companies for terminating or transporting the call;
- provide dialing parity, which ensures that customers are able to route their calls to telecommunications service providers without having to dial additional digits;
- provide notice of changes in information needed for another carrier to transmit and route services using its facilities; and
- provide telephone number portability, so customers may keep the same telephone number if they switch service providers.

In addition, under Section 271 of the Communications Act, the Bell Operating Companies (or BOCs) have an obligation to provide certain network elements, including elements (for example, local switching) that have been removed from the mandatory list of network elements that must be unbundled under Section 251 of the Communications Act. The BOCs are required to provide Section 271 network elements under a "just and reasonable" pricing standard. Over time, the FCC has removed the BOC's obligation to provide certain network elements under Section 271. There can be no assurance that the FCC will not continue to exercise its authority to remove other Section 271 network element obligations in the future. Any such action by the FCC may have an adverse effect on Sovernet's financial condition or operations. Sovernet operates in a region where the ILEC is required to comply with the above-mentioned statutory provisions, and, accordingly, has benefited from the reduced costs in acquiring required communication services, such as ILEC interconnection, and has

benefited from the right to receive compensation for the termination of traffic. Provisions relating to interconnection, telephone number portability, equal access, and resale could, however, subject us to increased competition and additional economic and regulatory burdens.

Choice has not similarly benefited from these provisions, because, in contrast to Sovernet, Choice operates in a region where the ILEC is classified as a rural ILEC, such that under Section 251(f) of the Communications Act, the rural ILEC is exempt from certain unbundling and other obligations that are set forth in Section 251(c) of the Communications Act.

Internet Services

We provide Internet access services as an Internet service provider (or ISP). The FCC has classified such services as information services, so they are not subject to various regulatory obligations that are imposed on common carriers, such as paying access charges or contributing to the Universal Service Fund. The FCC generally preempts state and local regulation of information services. While the FCC to date has declined to classify interconnected VoIP service as a telecommunications service or information service, it has imposed a number of consumer protection and public safety obligations on interconnected VoIP providers, relying in large part on its general ancillary jurisdiction powers. To the extent that we provide interconnected VoIP service we will be subject to a number of common carrier regulations.

The FCC initiated a rulemaking proceeding in October 2009 to consider whether to amend and codify its general Internet policy statement principles. The proposed rules would require service providers to enable end users to (1) send and receive lawful content of their choosing; (2) use lawful applications and services of their choosing; (3) attach and use devices of their choosing on the network; (4) enjoy competition among network providers, application providers, service providers, and content providers; (5) not discriminate with regard to traffic sent over the network; and (6) disclose information regarding network practices to customers, application and content providers, and the government. The FCC proposes to apply the rules to broadband Internet access provided over all platforms, including mobile wireless, fixed wireless, unlicensed, and satellite. At this time, the outcome of this proceeding and its affect on the Company, if any, is uncertain.

Obligations Applicable to Sovernet Subsidiary ION HoldCo, LLC Due to Economic Stimulus Grant

Sovernet's subsidiary ION HoldCo, LLC (ION) has been awarded a \$39.7 million grant from the Broadband Technology Opportunities (BTOP) program of the U.S. Department of Commerce (DOC) pursuant to the American Recovery and Reinvestment Act of 2009 (ARRA). As a BTOP awardee, ION will be subject to the various terms and conditions included in the agency's Notice of Funds Availability (NoFA) published in the Federal Register on July 9, 2009. Among these requirements are Interconnection and Non-Discrimination requirements by which any awardee must: (i) adhere to the principles contained in the FCC's Internet Policy Statement (FCC 05-151, adopted August 5, 2005) or any subsequent ruling or statement; (ii) not favor any lawful Internet applications and content over others; (iii) display network management policies in a prominent location on its web page and provide notice to customers of changes to these policies; (iv) connect to the public Internet directly or indirectly, so that the project is not an entirely private closed network; and (v) offer interconnection, where technically feasible without exceeding current or reasonably anticipated capacity limitations, at reasonable rates and terms to be negotiated with requesting parties. These requirements apply only to ION's BTOP-funded project and thus do not apply to facilities and networks operated by our other subsidiaries, which are not funded by BTOP.

As a BTOP awardee, ION also will be required to comply with other terms and conditions of the DOC grant, including reporting, transparency and audit requirements pursuant to Section 1512 of the ARRA, and notification and reporting obligations set forth in the Office of Management and Budget Memorandum, *Implementing Guidance for Reports on Use of Funds Pursuant to the American Recovery and Reinvestment Act of 2009* (OMB M-09-21, June 22, 2009).

State Regulation of Our Commnet and Sovernet Subsidiaries

Federal law preempts state and local regulation of the entry of, or the rates charged by, any CMRS provider. As a practical matter, we are free to establish rates and offer new products and service with a minimum of regulatory requirements. The states in which we operate maintain nominal oversight jurisdiction. For example, although states do not have the authority to regulate the entry or the rates charged by CMRS providers, states may regulate the “other terms and conditions” of a CMRS provider’s service. Most states still maintain some form of jurisdiction over complaints as to the nature or quality of services and as to billing issues. Since states may continue to regulate “other terms and conditions” of wireless service, and a number of state authorities have initiated actions or investigations of various wireless carrier practices, the outcome of these proceedings is uncertain and could require us to change certain of our practices and ultimately increase state regulatory authority over the wireless industry. States and localities assess on wireless carriers taxes and fees that may equal or even exceed federal obligations.

The location and construction of our wireless transmitter towers and antennas are subject to state and local environmental regulation, as well as state or local zoning, land use and other regulation. Before we can put a system into commercial operation, we must obtain all necessary zoning and building permit approvals for the cell site and tower locations. The time needed to obtain zoning approvals and requisite state permits varies from market to market and state to state. Likewise, variations exist in local zoning processes. If zoning approval or requisite state permits cannot be obtained, or if environmental rules make construction impossible or infeasible on a particular site, our network design might be adversely affected, network design costs could increase and the service provided to our customers might be reduced.

The FCC has adopted a declaratory ruling establishing presumptive timeframes in which states and localities must resolve tower siting applications before the applicant may seek judicial review—90 days for collocations and 150 days for all other siting applications. This ruling will expedite our ability to seek legal redress, and thus mitigate tower construction delays, in the event a state or locality does not timely act on our zoning applications. A petition for reconsideration of this ruling has been filed and is awaiting FCC action.

Regulation of Our Choice Subsidiary

Our operations in the U.S. Virgin Islands are regulated by the FCC and governed by the Communications Act. Like other states, the U.S. Virgin Islands has a Public Services Commission (or PSC) that oversees public utilities including the local telephone company. While we are not regulated by the PSC, we often appear before the PSC in our efforts to provide competitive telecommunications services in the U.S. Virgin Islands.

The FCC regulates Choice’s use of Broadband Radio Service, Educational Broadband Service and PCS spectrum. The FCC has adopted new technical rules applicable to these spectrum bands. We do not anticipate that the new requirements will have a material effect on Choice operations.

Regulation of Our Bermuda Subsidiary

In Bermuda, our BDC subsidiary is subject to Bermuda’s Telecommunications Act of 1986 (the “Telecommunications Act”). BDC is authorized to use spectrum to deliver services under our “Class B” license, which entitles BDC to provide mobile voice and data services on Bermuda. BDC’s Class B license expires in 2013.

In November 2005, the Ministry of Telecommunications & eCommerce (“METEC” or the “Ministry”) and Technology directed BDC to cease offering certain data services through its “Bull” branded wireless modem. BDC challenged the directive in the Bermuda Supreme Court (the “Court”) claiming that the directive contravenes BDC’s license to provide data services and BDC’s long history

of providing data services. In June 2006, the Court ruled in favor of BDC. The Ministry filed an appeal which was decided in favor of BDC in November 2007.

In August 2006 and in January 2007, the METEC released consultation documents seeking comment on a new regulatory framework for the telecommunications industry in Bermuda. The Ministry asked current telecommunications service providers to comment on methods to liberalize the telecommunications industry in Bermuda including converting existing service-specific licenses to Unified Domestic Licenses (or UDLs) that permit any licensed carrier (whether historically a wireless, wireline, data or international licensee) to offer any type of service. BDC has actively participated in the process at the Ministry to make its position known. There was little public progress on this issue in 2007, but in February 2008 the new Minister of Energy Telecommunications & eCommerce reiterated the Bermuda Government's intention to proceed with a UDL-based scheme and to create an independent regulatory authority for telecommunications in Bermuda (the "Telecommunications Reform"). It has been proposed that two new acts will be drafted to accommodate this, (i) a Utility Regulation Act; and (ii) a Communications Act to replace sections of the Telecommunications Act (the "Telecommunications Reform Legislation").

The drafting and consultation process of the Telecommunications Reform is currently in progress and, according to the Ministry's plan, it is anticipated that the implementation of Telecommunications Reform Legislation by Bermuda's Legislature will occur in late 2010.

Taxation—Guyana

GT&T's worldwide income is subject to Guyanese tax at a rate of 45% of taxable income. The Guyana Agreement provides that the repatriation of dividends to Atlantic Tele-Network and any payment of interest on GT&T debt denominated in foreign currency are not subject to withholding taxes. It also provides that fees payable by GT&T to Atlantic Tele-Network or any of its subsidiaries for management services shall be payable in foreign currency and shall not be subject to currency restrictions or withholding or other Guyana taxes. GT&T has a number of tax issues pending before the Guyana revenue authorities or the Guyana courts. See "Risk Factors—Risk Relating to Our Wireless and Wireline Services in Guyana—GT&T is engaged in significant tax disputes with the Guyanese tax authorities which could adversely affect our financial condition and results of operations" and Note 11 to the Consolidated Financial Statements included in this Report.

Taxation—United States

As a U.S. corporation, Atlantic Tele-Network is subject to U.S. federal income taxation on its worldwide net income, currently at rates up to 35% of taxable income. In general, a U.S. corporation is only subject to U.S. taxation on the earnings and profits (or E&P) of a foreign corporation when such E&P is actually distributed or deemed distributed. Pursuant to the foreign tax credit provisions of the Internal Revenue Code, and subject to complex limitations contained under those provisions, Atlantic Tele-Network is entitled to credit foreign withholding taxes on dividends or interest received, and foreign corporate income taxes of its subsidiaries paid with respect to income distributed as dividends or income inclusions under Subpart F from such subsidiaries, against Atlantic Tele-Network's U.S. federal income tax. The Company does not provide for U.S. income taxes on the undistributed earnings of its foreign subsidiaries that are considered to be indefinitely reinvested outside of the U.S.

As of the end of 2009, Atlantic Tele-Network has a foreign tax credit carryforward of \$17.0 million. These credits begin expiring in 2011. Based upon current projections and planning, Atlantic Tele-Network currently estimates that it is more likely than not that \$12.0 million of these credits will expire unutilized. It has therefore placed a valuation allowance of \$12.0 million against the foreign tax credit carryforward.

Available Information

Our website address is www.atni.com. The information on our website is not incorporated by reference in this Report and you should not consider information provided on our website to be part of this Report. You may access, free of charge, our annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, plus amendments to such reports as filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, through the "Financial Information" portion of our website as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission. In addition, paper copies of these documents may be obtained free of charge upon request by writing to us at 10 Derby Square, Salem, Massachusetts 01970, Attention: Investor Relations, or by calling us at (978) 619-1300.

We have adopted a written Code of Ethics that applies to all of our employees and directors, including, but not limited to, our principal executive officer, principal financial officer, and principal accounting officer or controller, or persons performing similar functions. Our Code of Ethics, along with our Compensation Committee Charter and Audit Committee Charter, are available at the Corporate Governance section of our website. We intend to make any disclosure required under the SEC rules regarding amendments to, or waivers from, our Code of Ethics on our website.

ITEM 1A. RISK FACTORS

In addition to the other information contained in, or incorporated by reference into, this Report, you should carefully consider the risks described below which could materially affect our business, financial condition or future results. These risks are not the only risks facing us. Additional risks and uncertainties not presently known to us or that we currently believe are immaterial also may materially adversely affect our business, financial condition and/or results of operations.

Risks Relating to our U.S. Wireless Business

A significant portion of our U.S. wholesale wireless revenue is derived from a small number of customers that could build or acquire overlapping networks.

Our Commnet subsidiary, which accounted for approximately 43% of our consolidated revenue in 2009, generates a substantial majority of its revenues from three national wireless service providers. In 2009, these three national wireless service providers together accounted for 81% of Commnet's revenues.

Commnet's relationships with its customers generally are much more financially significant for Commnet than for Commnet's customers, which can give its customers significant leverage in negotiating pricing and other terms. If we fail to keep any of these customers satisfied with our service offerings or economic terms and lose their business or are unable to renew or enter into new agreements with these customers on beneficial terms (including pricing) to us, we could suffer a substantial loss of revenue, which would have a materially adverse effect on our results of operations and financial condition.

In addition, if these customers build or acquire wireless networks in our service areas we may lose revenue and scale. Should any of these customers take such actions over a significant portion of the areas we serve, it may have a materially adverse effect on our results of operations and financial condition. For example, the recent acquisition by Verizon Wireless of Alltel Corporation assets, and pending acquisition of Alltel assets by AT&T, will result in those customers of Commnet having their own infrastructure in markets where they are currently served by Commnet. This is expected to result in a significant loss of revenue and operating income for Commnet in future periods, which, if not offset by growth in other revenues generated by Commnet or other sources could materially reduce overall operating profits.

Our failure to maintain favorable roaming arrangements could have a material adverse effect on our ability to provide service to retail wireless customers who travel outside our coverage area.

In addition to providing us with significant revenue, the roaming arrangements established by our retail wireless operations enable our customers to use the wireless networks of other wireless carriers when they travel outside of our licensed service area. This enables us to offer our customers competitively priced regional and international rate plans that include areas for which we do not own wireless licenses. If we are not able to maintain favorable roaming agreements with other wireless carriers, we may no longer be able to offer these regional and international rate plans and the coverage area and pricing we offer to our customers may not be as attractive relative to the offers from our competitors. When our roaming agreements expire or are terminated, our roaming partners could choose not to renegotiate such agreements and could enter into roaming agreements with other carriers serving our markets or choose not to include our markets in their service offerings altogether. This could have a material adverse effect on our future operations. Furthermore, our roaming revenue from visitors to our markets is highly dependent on the pricing decisions made by our roaming partners. If our markets are not included in our roaming partners' home calling areas and are instead subject to the imposition of additional roaming charges, we could see a loss of roaming minutes and revenue which could have a material adverse effect on our results of operations.

Risks Relating to Our Wireless and Wireline Services in Guyana

Our exclusive license to provide local exchange and international voice and data services in Guyana is subject to significant political and regulatory risk.

Since 1991, our subsidiary GT&T has operated in Guyana pursuant to a license from the Government of Guyana to be the exclusive provider of domestic fixed and international voice and data services pursuant to a license with an initial term ending in December 2010, which is renewable at our sole option for an additional 20 year term. In November 2009, we notified the Government of Guyana of our election to renew our exclusive license for an additional 20 years. Since 2001, the Government of Guyana has stated its intention to introduce additional competition into Guyana's telecommunications sector, including conducting formal discussions with GT&T in 2002 regarding this matter. Specifically, Guyana Government officials have publicly stated their intention to revoke or terminate the license and have made efforts to enact legislation that would allow for competition in areas that are precluded by the exclusivity term. In addition, the telecommunications regulatory body in Guyana initiated an action a number of years ago questioning the status and validity of such terms. See "Business—Regulation of Our GT&T Subsidiary."

We believe that any early termination of our exclusivity would require our consent and appropriate compensation to GT&T, including, but not limited to, an adjustment of service rates to reflect the real economic cost to GT&T of providing such services. Further, we believe that certain modifications to the legal and regulatory regime governing the telecommunications market sector in Guyana would be needed, and we would also seek the satisfactory resolution of certain long-standing claims between us and the Government relating to certain tax and other matters (as described in Note 13 to the Consolidated Financial Statements included in this Report), for us to consider voluntarily relinquishing GT&T's rights by law and contract to be the exclusive provider of local exchange and international voice and data services in Guyana.

During 2008, at the request of the Government, GT&T met with high-ranking members of the Government to discuss potential modifications of GT&T's exclusivity rights and the Government's desire to see the introduction of competition for local exchange and international voice and data services. We believe that such competition is precluded by the exclusivity provisions of our license, but we have expressed our willingness to relinquish those rights under reasonable conditions and with the proper safeguards in place. We have continued to have less formal discussions with government officials

and remain willing to discuss a negotiated solution. In late 2008, the Government retained a law firm and consultant to prepare draft legislation for a new telecommunications regulatory regime which may provide for the issuance of multiple licenses for telecommunications services in areas in which we had exclusivity. Based on informal discussions with these parties, we currently expect draft legislation to be available in the first half of 2010.

At this time, ATN and GT&T do not know whether or how any draft legislation will address GT&T's exclusive license, and if so, whether it would be pursuant to an agreement between GT&T and the Government. Other than entering into such an agreement on terms acceptable to us, we would seek to enforce GT&T's rights by law and contract to be the exclusive provider of international voice and data services in Guyana. Although we believe that we would be entitled to damages for any involuntary termination or material modification of that license and potentially injunctive relief, we cannot guarantee that we would prevail in any court or arbitration proceeding.

We are dependent on GT&T for a substantial portion of our revenues and profits. For the year ended December 31, 2009, approximately 38% of our consolidated revenue and approximately 36% of our consolidated net income, respectively, were generated by GT&T. Our international long distance revenues alone accounted for approximately 16% of our consolidated revenues in 2009. A loss of exclusivity on international voice and data service would result in a reduction in the international call traffic that we handle and could also result in a decline in international calling rates and termination fees. As of December 31, 2009, we have invested more than \$300 million in Guyanese telecommunications infrastructure. Any modification, early termination or other revocation of the exclusive domestic fixed and international voice and data license could adversely affect a substantial portion of our revenues and profits and diminish the value of our investment in Guyana.

Any significant decline in the price or volume, including as a result of bypass activities, of international long distance calls to Guyana could adversely affect our financial results.

We collect payments from foreign carriers for handling international long distance calls originating from the foreign carriers' countries and ending in Guyana. The payments, which are based on volume and payment rates, are pursuant to arrangements we have with the foreign carriers and are subject to the actions of telecommunications regulators, such as the U.S. FCC. For the year ended December 31, 2009, our revenues from GT&T's inbound and outbound international long distance services were \$38.2 million (or 16% of our consolidated revenue for 2009) and constituted a significant portion of our profits. More than half of these revenues and profits were from collecting payments for international long distance calls into Guyana from other countries.

Any decrease in the payment rate or the volume of inbound long distance calls would reduce the amount of the payments we collect. We believe the volume of international long distance voice traffic is increasingly being threatened by customers and illegal operators bypassing our international exchange through various means, including sending voice traffic as Voice over Internet Protocol (or VoIP). In 2008 and through 2009, this activity—whether by known carriers or small “black market” operators—increased significantly. Further reductions in the payment rates or a decline in inbound international long distance volume, through VoIP, competition or otherwise, would adversely affect our revenues and profits, and would deprive us of a critical source of U.S. currency as payments from foreign carriers to GT&T are in U.S. dollars.

The regulation of the rates that GT&T may charge for services may adversely affect our profitability, revenue growth and our ability to make additional network investment in Guyana.

The rates that GT&T may charge for its public services are regulated by the PUC, an independent regulatory body responsible for regulating telecommunications in Guyana. The PUC has authority to set rates for local wireline, outbound international and a range of other services and has broad powers

to assess GT&T's compliance with the terms of GT&T's exclusive license with the Government of Guyana. Under that license, GT&T is entitled to charge rates that will enable it to earn an annual minimum rate of return equal to 15% of GT&T's capital dedicated to public use. Unless otherwise agreed to by the parties, the license states that such rates shall be calculated on the basis of GT&T's entire property, plant and equipment in a manner consistent with the practices and procedures of the FCC. The PUC, however, has disallowed or challenged several million dollars of franchise rights and working capital that we believe should be included in the base upon which rates are determined in accordance with the terms of the license (or rate base). Furthermore, when we have demonstrated under-earning in the past the PUC has often refused to allow an increase in rates to the level we believed necessary to earn the minimum return. Any failure by the PUC to calculate rates in accordance with the rate of return calculation in the license or to allow an increase in rates when we demonstrate under-earning would adversely affect our profitability, revenue growth and our ability to make additional network investment in that country.

In addition, we calculate the rate base in U.S. dollars based on a historical U.S. dollar valuation of dedicated capital, which protects the value of GT&T earnings, to the extent rate increases are allowed, from devaluations in the Guyanese dollar. The PUC has neither approved nor disapproved this method of calculation. If we were required to calculate the rate base based on a Guyanese dollar valuation of dedicated capital, the value of GT&T's earnings would be subject to devaluations in the Guyanese dollar if we are unable to increase rates.

The rates that GT&T may charge for its mobile services are also regulated by the PUC. In January 2007 the PUC established floor and ceiling rates for both pre-paid and post-paid cellular services and required cellular service providers to begin billing on a per second basis rather than a per minute basis. We believe the PUC has enforced the new minimum and maximum rates in favor of GT&T's primary wireless competitor and, in late 2007, GT&T filed a lawsuit contesting the PUC's enforcement approach. During 2008, the PUC expressed its intent to revisit the floor rate and, possibly, eliminate it. That suit remains pending.

The PUC has also proposed to extend per second billing to international calls. Any rapid decline in market pricing as a result of these changes, discriminatory enforcement, or competitive forces, without an offsetting increase in volume, would negatively impact the revenues and profits of our wireless business in Guyana.

GT&T is engaged in significant tax disputes with the Guyanese tax authorities which could adversely affect our financial condition and results of operations.

GT&T's income is subject to Guyanese tax at an overall rate of 45%. GT&T has received various income tax assessments from Guyana tax authorities that claim GT&T owes approximately \$23.5 million in additional income taxes for past periods. A substantial portion of this amount is based on the disallowance of 80% of GT&T's deduction for management fees paid to us pursuant to the original investment agreement and related agreements. This management fee was set at approximately 6% of GT&T's revenue for the fiscal year 2009, but, effective in 2010, ATN reduced the fee to 5% of GT&T's revenue. Although we believe that the fee is part of the original contract, it is similar to amounts charged by other international telecommunications companies to their foreign subsidiaries for management advisory services and is an appropriate and proper expense given the extensive services and expertise we provide, we may not prevail in these tax disputes. In addition, if recently reconvened negotiations result in an overall settlement of outstanding issues with the Government, we might be forced to agree to reduce the amount, or deductibility of the management fees. If GT&T is required to pay these additional taxes, it could have a material adverse effect on our financial condition and results of operations.

Risks Relating to Our Potential Acquisition

Our ability to expand our US operations pursuant to our pending acquisition of former Alltel assets is subject to the receipt of certain regulatory approvals.

On June 9, 2009, we entered into a Purchase Agreement with Cellco Partnership d/b/a Verizon Wireless (“Verizon”) to acquire wireless assets previously acquired by Verizon in its acquisition of Alltel Corporation (“Alltel”) located in Georgia, North Carolina, South Carolina, Illinois, Ohio and Idaho (the “Alltel Acquisition”). Verizon is required to divest these assets pursuant to consent decrees it entered into with the Department of Justice related to its purchase of Alltel in January 2009. Consummation of the Alltel Acquisition is subject to the satisfaction of certain conditions, including (i) the receipt of the approval of the Department of Justice to the Alltel Acquisition, (ii) the receipt of the approval of the Federal Communications Commission to the transfer, assignment or change in control of certain licenses pursuant to the Alltel Acquisition and (iii) the receipt of required consents from state public utility commissions, if any. In 2009, we accumulated \$7.2 million of Alltel-Acquisition-related expenses. Although we have received no indication that the required regulatory authorities do not plan to authorize the consummation of the Alltel Acquisition, there can be no guarantee that we will receive all required approvals.

Our ability to finance the Alltel Acquisition depends on our ability to draw upon our existing credit facility.

In connection with the Alltel Acquisition, we amended and restated our existing credit facility to restate our existing \$73.96 million term loan (“Term Loan A”) and previously undrawn \$75 million revolving credit facility (the “Revolver Facility”) and to provide for a new \$150 million term loan (“Term Loan B”, and, together with Term Loan A and the Revolver Facility, the “New Credit Facility”). No amount is currently outstanding under Term Loan B. We may use the proceeds of the Term Loan B solely in connection with the Alltel Acquisition and it is currently available to be drawn by us until the earlier of (i) completion of the Alltel Acquisition and (ii) March 31, 2010 (the “Term Loan B Commitment Expiration Date”). We intend to request an extension to the Term Loan B Commitment Expiration Date during the first quarter of 2010.

Our financial performance following the consummation of the Alltel Acquisition may not reflect market expectations.

As previously confirmed in the first quarter of 2010, the Company believes that annualized service revenues from the Alltel Acquisition are expected to range from \$450 million to \$500 million in the first twelve months following the anticipated close of the transaction. During that period, EBITDA margins are projected to be below industry standards, due to transition and operating expenses. While there can be no assurances regarding our future financial performance as a result of the Alltel Acquisition, we currently expect to progressively increase EBITDA margins over the first twelve to eighteen months and to reach more normalized levels of between 20% and 30% some time in 2011.

Other Risks Relating to Our Businesses and Industry

The current global economic recession, along with difficult and volatile conditions in the capital and credit markets, could materially adversely affect our financial position, results of operations and cash flow, and we do not know if these conditions will improve in the near future.

Our operations and performance depend on general economic conditions. The global economy recently experienced, and could continue to experience, an economic downturn due to the crisis in credit markets, slower economic activity, increased unemployment, concerns about inflation, increased energy costs, decreased consumer confidence and other adverse business conditions. Such fluctuations in the global economy could cause, among other things, deterioration and continued decline in spending and increase in the cost of labor and materials. As a result, our operating results could be

materially impacted. The economic recession could have a significant adverse impact on consumer confidence and discretionary consumer spending, which may result in decreased sales and earnings for us. For example, among other things:

- A decrease in tourism could negatively affect revenues and growth opportunities from operations in the islands and in a number of areas covered by U.S. rural wireless operations that serve tourist destinations.
- GT&T relies substantially on the population of Guyanese living abroad who initiate calls to Guyana or are responsible for remittances to relatives living in Guyana. A prolonged economic downturn in the U.S. or Canada could continue to effect inbound calling and, therefore, GT&T's results of operations.

The impact, if any, that these financial market events, or any governmental actions intended to address these events, might have on us and our business is uncertain and cannot be estimated at this time.

Increased competition may adversely affect growth, require increased capital expenditures, result in the loss of existing customers and decrease our revenues.

We face competition in the markets in which we operate. For example:

- In Guyana, we have faced competition from Digicel, a nationwide wireless service provider, that has been very aggressive in acquiring a substantial share of the market.
- As noted above, Commnet's greatest competitive risk is the possibility that its current customers may elect to build or enhance their own networks within the rural market in which Commnet currently provides service, which is commonly known as "over-building." If Commnet's customers, which have greater financial resources and access to capital than it has, determine to over-build, their need for Commnet's roaming services will be significantly reduced or eliminated.
- In Bermuda and Turks and Caicos, BDC competes with the incumbent wireless service provider and Digicel, each of which has greater financial and other resources than BDC. BDC's market share has declined over the past two years.
- In New England and New York State, in addition to other competitive voice and data communications service providers, we compete with much larger regional carriers, each of which has greater financial and other resources.

Over the last several years, an increase in competition has contributed to a decline in prices for communication services, including local and long distance telephone service, data services and mobile wireless services. Increased competition may decrease prices further. In addition, increased competition could reduce our customer base, require us to invest in new facilities and capabilities and reduce revenues, margins and returns.

Our foreign operations are subject to economic, political and other risks that could adversely affect our revenues or financial position.

Our operations in Bermuda and the Caribbean may face adverse financial consequences and operational problems due to foreign political or economic changes, such as changes in national or regional political or economic conditions, or laws and regulations that restrict repatriation of earnings or other funds. In addition, we face risks associated with changes in foreign currency exchange rates. Any of these changes could adversely affect our revenues or financial position.

Regulatory changes may impose restrictions that adversely affect us or cause us to incur significant unplanned costs in modifying our business plans or operations.

We are subject to U.S. federal, state and local regulations and foreign government regulations, all of which are subject to change. As new telecommunications laws and regulations are issued, we may be required to modify our business plans or operations. We cannot assure you that we can do so in a cost-effective manner. In addition, the failure by us to comply with applicable governmental regulations could result in the loss of our licenses or authorizations to operate, the assessment of penalties or fines or otherwise may have a material adverse effect on the results of our operations.

Our operations in the United States are subject to the Telecommunications Act of 1996 (or 1996 Act). The interpretation and implementation of the provisions of the 1996 Act and the FCC rules implementing the 1996 Act continue to be heavily debated and may have a material adverse effect on our business, particularly our operations in New England. Also, although legislation has not yet been introduced, there have been indications that Congress may substantially revise the 1996 Act in the next few years. We cannot predict what effect any new legislation will have on our businesses.

Sovernet and Commnet are also subject to state regulatory commissions to the extent they provide intrastate services. While we have obtained the necessary certifications to provide service, each state commission retains the authority to revoke our certificate if that commission determines we have violated any condition of our certification or if it finds that doing so would be in the public interest.

While we believe we are in compliance with federal and state regulatory requirements, our interpretation of our obligations may differ from those of regulatory authorities. Both federal and state regulators require us to pay various fees and assessments, file periodic reports and comply with various rules regarding our consumer marketing practices and the contents of our bills, on an on-going basis. If we fail to comply with these requirements, we may be subject to fines or potentially be asked to show cause as to why our certificate of authority to provide service should not be revoked.

In Guyana, we are subject to regulation by the PUC, which has authority to assess GT&T's compliance with the terms of GT&T's exclusive wireline license with the Guyanese government and has regulatory authority over GT&T's wireless service. See "Business—Regulation of Our GT&T Subsidiary."

U.S. federal or state governments (including territorial governments) or the governments of Guyana or Bermuda could adopt regulations or take other actions that might have a material adverse effect on our business. These changes could materially and adversely affect our business prospects and operating results.

The loss of certain licenses would adversely affect our ability to provide wireless and broadband services.

In the United States, wireless, PCS and microwave licenses are valid for ten years from the effective date of the license. Licensees may renew their licenses for additional ten-year periods by filing renewal applications with the FCC. Commnet's wireless licenses expire between 2009 and 2018. Choice's wireless licenses expire at various dates through 2017. The renewal applications are subject to FCC review and are put out for public comment to ensure that the licensees meet their licensing requirements and comply with other applicable FCC mandates. Failure to file for renewal of these licenses or failure to meet any licensing requirements could lead to a denial of the renewal application and thus adversely affect our ability to continue to provide service in that license area. Furthermore, our compliance with regulatory requirements such as enhanced 911 and CALEA requirements may depend on the availability of necessary equipment or software. Failure to comply with these regulatory requirements may have an adverse effect on our licenses or operations and could result in sanctions, fines or other penalties.

Rapid and significant technological changes in the telecommunications industry may adversely affect us.

We face rapid and significant changes in technology. In particular, the telecommunications industry is experiencing significant technological changes, including:

- evolving industry standards;
- the allocation of new radio frequency spectrum in which to license and operate advanced wireless services;
- ongoing improvements in the capacity and quality of digital technology and shorter development cycles for new products and enhancements;
- changes in end-user requirements and preferences;
- the development and adoption of VoIP telephony services;
- convergence between video and data services;
- development of data and broadband capabilities; and
- migration to next-generation services, which may require the purchase of additional spectrum.

For us to keep up with these technological changes and remain competitive, at a minimum we will be required to continue to make significant capital expenditures. Our value to the wireless carriers that are customers of our wholesale wireless business depends in part on our network's ability to support the services that such carriers' customers demand. For example, advanced mobile high-speed wireless data services, which allow customers of wireless carriers to use the wireless network to send and receive data files and access the internet at speeds approaching fixed broadband, have become increasingly popular in the United States. While we offer high-speed "3-G" (third generation) mobile data services in some of our retail island wireless businesses, we do not currently offer the more advanced mobile data services to our wholesale customers in the United States. As demand for these services continues to grow, we may have difficulty satisfying our wholesale customers without substantial upgrades, which could have an adverse effect on our business. Similarly, in our retail markets, if we do not offer new services that are popular with customers and are offered by competitors, we may have difficulty attracting and retaining subscribers, which will have an adverse effect on our business.

We cannot predict the effect of technological changes on our business. Technological changes may result in increases in our capital expenditures. New technologies may be protected by patents or other intellectual property laws and therefore may not be available to us. Also, alternative technologies may be developed that provide communications services or alternative services superior to those available from us. Rapid changes in technology in our market may adversely affect our business. For example, to accommodate the demand by our wholesale wireless customers for next-generation advanced wireless products such as high-speed data and streaming video, we may be required to purchase additional spectrum. In each of our markets, providing more and higher speed data services through our wireless or wireline networks may require us to make substantial investments in additional telecommunications transport capacity connecting our networks to the internet, and in some cases such capacity may not be available to us or be available on attractive terms. We cannot assure you that we will gain access to spectrum or capacity at a reasonable cost or at all. Failure to provide these services could have a material adverse effect on our ability to compete with carriers offering these new technologies in our markets.

We rely on a limited number of key suppliers and vendors for timely supply of equipment and services relating to our network infrastructure. If these suppliers or vendors experience problems or favor our competitors, we could fail to obtain sufficient quantities of the products and services we require to operate our businesses successfully.

We depend on a limited number of suppliers and vendors for equipment and services relating to our network infrastructure. If these suppliers experience interruptions or other problems delivering these network components on a timely basis, our subscriber or revenue growth and operating results could suffer significantly.

We are reliant upon a limited number of network equipment manufacturers, including Nortel Networks and Alcatel-Lucent and Nokia in the United States. Certain entities owned by Nortel Networks filed for bankruptcy protection in 2008 and significant asset sales have been made since that time. Thus far, such bankruptcy filings and asset sales have not had a significant impact on GT&T's existing contracts, however, we currently don't know whether any future asset or entity sales by Nortel Networks will impact us. If it becomes necessary to seek alternative suppliers and vendors, we may be unable to obtain satisfactory replacement suppliers or vendors on economically attractive terms on a timely basis.

If we lose our senior management, our business may be adversely affected; we rely on local management to run our operating units.

The success of our business is largely dependent on our executive officers and the executive officers of our operating units, as well as on our ability to attract and retain other highly qualified technical and management personnel. We believe that there is, and will continue to be, strong competition for qualified personnel in the communications industry and in our markets, and we cannot assure you that we will be able to attract and retain the personnel necessary for the development of our business. The loss of key personnel or the failure to attract additional personnel as required could have a material adverse effect on our business, financial condition and results of operations. We do not currently maintain "key person" life insurance on any of our key employees and none of the executives at our parent company are under employment agreements.

We rely heavily on local management to run our operating units. Many of the markets we operate in are small and somewhat isolated and therefore it is particularly difficult attracting and retaining talented and qualified managers and staff in those markets.

Our network capacity and customer service system may not be adequate and may not expand quickly enough to support our customer growth.

Our financial and operational success depends on ensuring that we have adequate network capacity and a sufficient customer and operational support systems to accommodate anticipated new customers and the related increase in usage of our network. This includes capacity on our wireless and wireline networks and capacity on our inter- and intra-network transport facilities. Our failure to expand and upgrade our networks and transport facilities to meet the increased usage could impair our quality of service, cause a decline in customer satisfaction and have a material adverse effect on our business.

Our retail wireless network capacity plans generally rely on:

- the availability of wireless handsets of the appropriate model and type to meet the demands and preferences of our customers;
- the ability to obtain and construct additional cell sites and other infrastructure equipment;
- the ability to secure adequate transport capacity between our cell sites and our network switching and routing platforms and between those platforms and the internet and other carriers.

- the ability to obtain additional spectrum if required; and
- the ability to obtain the capital to expand and upgrade our network.

In addition, we must implement, manage and monitor effective procedures for customer activation, customer service, billing and other support services. Reliance on our customer service and handset procurement functions increases as we add new customers and offer new services and pricing plans. Our failure to timely and efficiently meet the demands for these services could decrease or slow subscriber growth or delay or otherwise impede billing and collection of amounts owed, which would adversely affect our revenue. We cannot make assurances that our customer service systems and network capacity will expand and adapt quickly enough to keep up with our anticipated customer growth and changes in services, and failure to do so would impair our ability to compete, which would adversely affect our results and financial operations.

Our wireless and wireline revenues depend on the reliability and performance of our network infrastructure.

We must operate our wireless and wireline networks so as to minimize any disruption that may occur to our services. The operation and growth of our networks and the implementation of new technologies and services involve operating risks that may disrupt our services and cause losses in revenue. In Guyana, for example, the Americas II fiber optic cable, which connects Guyana with the United States, and over which we provide our international long distance service, has from time to time suffered service outages, including a lengthy outage in May 2007. These outages have been caused by accidental cuts and vandalism occurring along the terrestrial portions of the cable in Guyana and other countries, as well as cuts in the international undersea portions. These cuts have resulted in increased operational and capital expenses, customer dissatisfaction and loss of revenue. The cuts have also led us to commit substantial capital spending on building a new submarine fiber optic cable landing in Guyana. Other risks which may also cause interruptions in service or reduced capacity for customers include power loss, capacity limitations, software defects and breaches of security by computer viruses, break-ins or otherwise. Disruptions in our networks and the unavailability of our services could lead to a loss of customers, damage to our reputation and violation of the terms of our licenses and contracts with customers. These failures could also lead to significant negative publicity, regulatory problems and litigation.

The occurrence of severe weather and natural catastrophes may materially disrupt our operations.

Many of the areas in which we operate, which have experienced severe weather conditions over the years including hurricanes, tornadoes, blizzards, damaging storms and floods. Some areas we operate in may also be at risk of earthquakes. Such events may materially disrupt and adversely affect our business operations. A major hurricane passed directly over Bermuda in 2005 causing major damage to our network and to the island's infrastructure. In 2008, a hurricane caused extensive damage on a small portion of the U.S. Virgin Islands and a separate hurricane negatively effected operations in the Turks and Caicos. Guyana has suffered from severe rains and flooding in two of the last five years. While these events have not had a significant negative impact on the operating results or financial condition of the affected businesses or our overall business, we cannot assure you that these types of events will not have such an impact in the future or that the insurance coverage we maintain for these risks will adequately compensate us for all damage and economic losses resulting from natural catastrophes.

Concerns about the actual or perceived health risks relating to electromagnetic and radio frequency emissions, as well as the attendant publicity or possible resultant litigation, may have a negative effect on our financial condition or the results of our operations.

Media and other reports have suggested that electromagnetic and radio frequency emissions from wireless telephone handsets and base stations may cause health problems, including cancer. There is

also some concern that these emissions may interfere with the operation of certain electronic equipment, including automobile braking and steering systems. The actual or perceived risks relating to wireless communications devices and base stations, or press reports about these risks, could adversely affect us by, for example, reducing our subscriber growth rate, subscriber base or average use per subscriber and increasing our litigation risk. Actual or perceived risks of wireless handsets or base stations could make it difficult to find attractive sites for base stations and reduce our growth rates, customer base and average usage per customer.

We may be unable to realize the value that we believe exists in businesses that we may acquire.

To realize the value that we believe exists in any future businesses that we acquire, if any, we must successfully integrate them into our holding company organization. If we are unable to effectively manage their operations or are unable to retain their key employees, we may not realize the value that we believe such businesses hold. In addition, failure to successfully integrate these businesses may have a material adverse effect on our results of operations and financial condition.

Risks Related to Our Capital Structure

Our debt instruments include restrictive and financial covenants that limit our operating flexibility.

Our credit facility requires us to maintain certain financial ratios and contains covenants that, among other things, restrict our ability to take specific actions, even if we believe such actions are in our best interest. These include restrictions on our ability to:

- incur additional debt;
- create liens or negative pledges with respect to our assets;
- pay dividends or distributions on, or redeem or repurchase, our capital stock;
- make investments, loans or advances or other forms of payments;
- issue, sell or allow distributions on capital stock of specified subsidiaries;
- enter into transactions with affiliates; or
- merge, consolidate or sell our assets.

Any failure to comply with the restrictions of the credit facility or any subsequent financing agreements may result in an event of default. Such default may allow our creditors to accelerate the repayment of the related debt and may result in the acceleration of the repayment of any other debt to which a cross-acceleration or cross-default provision applies. In addition, these creditors may be able to terminate any commitments they had made to provide us with further funds.

If we fail to meet our payment or other obligations under the credit facility, the lenders could foreclose on and acquire control of substantially all of our assets.

In connection with the incurrence of the indebtedness under the credit facility, the lenders received a pledge of our share of the capital stock of all of our subsidiaries, and that of future direct and indirect subsidiaries with some limited exceptions. Additionally, the lenders under our credit facility generally have a lien on all of our U.S. assets and certain of our non-U.S. assets. As a result of these pledges and liens, if we fail to meet our payment or other obligations under the credit facility (including meeting or exceeding certain financial measurements), the lenders would be entitled to foreclose on and liquidate substantially all of our assets, to the extent required to pay our obligations under the credit facility. As a result, the holders of our securities may lose a portion of, or the entire value of, their investment in our securities.

Our Chairman is our largest stockholder and will continue to exert significant influence over us.

Cornelius B. Prior, Jr., our Chairman and the father of our Chief Executive Officer, beneficially owns, together with related entities approximately 39% of our outstanding common stock. As a result, Cornelius B. Prior, Jr., is able to exert significant influence over all matters presented to our stockholders for approval, including election and removal of our directors and change of control transactions. In addition, as our Chairman, he has and will continue to have significant influence over our overall strategy and business plans. His interests may not always coincide with the interests of other holders of our common stock.

Low trading volume of our stock may limit our shareholders ability to sell shares and/or result in lower sale prices.

During the last quarter of 2009, the average daily trading volume of our common stock was approximately 51,000 shares. As a result, shareholders may have difficulty selling a large number of shares of our common stock in the manner or at a price that might be attainable if our common stock were more actively traded. In addition, the market price of our common stock may not be reflective of its underlying value.

We may not pay dividends in the future.

Our stockholders may receive dividends out of legally available funds if, and when, they are declared by our Board of Directors. We have paid quarterly dividends in the past, but may cease to do so at any time. Our credit facility limits our ability to pay dividends on, or repurchase, our capital stock. We may incur additional indebtedness in the future that may further restrict our ability to declare and pay dividends. We may also be restricted from paying dividends in the future due to restrictions imposed by state corporation laws, our financial condition and results of operations, capital requirements, covenants contained in our financing agreements, management's assessment of future capital needs and other factors considered by our Board of Directors.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our corporate headquarters is located at 10 Derby Square, Salem, Massachusetts 01970, where we lease approximately 5,000 square feet of office space. GT&T operations are headquartered in Georgetown, Guyana, where GT&T owns approximately 4,000 square feet of office space. Commnet's operations are headquartered in Atlanta, Georgia, where Commnet leases approximately 5,000 square feet of office space. BDC's operations are headquartered in Bermuda where it leases approximately 5,000 square feet of office space and 4,000 square feet of retail space. Sovernet operations are headquartered in Bellows Falls, Vermont where it leases approximately 9,000 square feet. We lease approximately 9,000 square feet of office space in the Virgin Islands for Choice Communications. In the fourth quarter of 2009, we leased approximately 6,250 square feet of office space in Little Rock, Arkansas, to serve as the headquarters for our Allied Wireless Communications Corporation ("AWCC") subsidiary. The Company also utilizes approximately 324,000 square feet of space for technical operations, including approximately 266,000 square feet of building space owned by GT&T, on approximately 48 acres of land in various locations throughout Guyana. In addition, we lease and own locations for other switch facilities (including international, local, wireless and broadband data), wireless facilities (including towers) and extensive cabling (including an interest in several inter-country fiber cables). We consider our owned and leased properties to be suitable and adequate for our business operations.

ITEM 3. LEGAL PROCEEDINGS

Recent Proceedings

In November 2007, Caribbean Telecommunications Limited (“CTL”) filed a complaint in the U.S. District Court for the District of New Jersey against the Company and GT&T claiming breach of an interconnection agreement for domestic cellular services in Guyana and related claims. CTL asserted over \$200 million in damages. ATN and GT&T each moved to dismiss the complaint on procedural and jurisdictional grounds. On January 26, 2009, the court granted the motions to dismiss the complaint on the grounds asserted by ATN and GT&T. On November 7, 2009, CTL filed a similar claim against GT&T and the PUC in the High Court of Guyana. We believe the claim is without merit and is duplicative of a previous claim filed by CTL in Guyana that was dismissed. We plan to vigorously defend against this claim.

On May 8, 2009, Digicel filed a lawsuit in Guyana challenging the legality of GT&T’s exclusive license under Guyana’s constitution. Digicel initially filed this lawsuit against the Attorney General of Guyana in the High Court. On May 13, 2009, GT&T petitioned to intervene in the suit in order to oppose Digicel’s claims and that petition was granted on May 18, 2009. GT&T filed its answer to the charge on June 22, 2009 and the case is pending. We believe that any legal challenge to GT&T’s exclusive license granted in 1990 is without merit and we will vigorously defend against such a legal challenge.

By letter dated July 17, 2009, Digicel notified GT&T that it is terminating the interconnection agreement between Digicel and GT&T effective in 180 days. That agreement, which the companies signed on April 4, 2003, identifies the terms and conditions by which Digicel and GT&T networks are connected for the exchange of telecommunications traffic in Guyana. Without an interconnection agreement in place, a carrier can refuse to terminate traffic on its network that originated on another party’s network. Digicel expressed its desire to renegotiate all terms of interconnection and asserts that it is terminating the existing interconnection agreement to compel GT&T to negotiate new terms and conditions immediately.

GT&T has frequently expressed to Digicel its preference to negotiate a new interconnection agreement once there is more clarity from the Government of Guyana regarding the timing, scope and substance of its proposed telecommunications legislation, which is likely to affect any interconnection discussion. It is GT&T’s expressed belief that renegotiating the terms and conditions of the interconnection agreement at this time would be premature, and that there will be ample time to do so once the Government’s liberalization program is prepared and publicized. Nevertheless, in a letter dated August 25, 2009, GT&T proposed that negotiations begin in December 2009, and committed not to disconnect Digicel customers, upon effectiveness of Digicel’s termination notification, while negotiations are in progress. In December of 2009, GT&T and Digicel began negotiating a new interconnection agreement. The parties failed to reach agreement on the terms of interconnection and, as a result, on January 13, 2010, the interconnection agreement was terminated. Although the agreement was effectively terminated by Digicel, GT&T and Digicel continue to provide interconnection services to each other. This matter is now pending before the PUC of Guyana.

On February 17, 2010, GT&T filed a lawsuit in the High Court of Guyana asserting that, despite its denials, Digicel is engaged in international bypass in violation of GT&T’s exclusive license, the contractual relationship governing interconnection services between GT&T and Digicel and the laws of Guyana. GT&T seeks, among other things, injunctive relief to stop the illegal bypass activity, actual damages in excess of \$9 million and punitive damages of approximately \$5 million. GT&T plans to vigorously prosecute this suit.

Historical Proceedings

Historically, we have been subject to litigation proceedings and other disputes in Guyana that while not conclusively resolved, to our knowledge have not been the subject of discussions or other significant activity in the last five years. It is possible, but not likely, that these disputes, as discussed below, may be revived.

In 1995, the minister of telecommunications of Guyana initiated a proceeding with the PUC alleging that GT&T had breached our agreement with the Government of Guyana by failing to expand its facilities and telecommunications operations and improve services in Guyana pursuant to an expansion and service improvement plan (the "Plan"). Under the agreement, which we entered into in connection with our acquisition of GT&T in 1990, we agreed to complete the Plan within three years and the Government of Guyana agreed to permit rate increases in the event of any devaluation of Guyana currency within the three-year Plan period. The Plan was subsequently amended to, among other things, extend the completion deadline to February 1995. While GT&T did not complete the Plan by the extended deadline, we believe that the Government of Guyana's failure to timely provide for rate increases upon a significant devaluation of Guyanese currency in March 1991 impeded our efforts and justified our delay in completing the Plan. We substantially completed the Plan in 1997 and believe that we have satisfied our obligations under the agreement. If the PUC finds us in breach of the agreement, GT&T could be fined, its wireline license could be canceled and it could face other penalties imposed by the PUC. The PUC last held hearings on this matter in 1998.

GT&T is contesting, in the High Court of Guyana, approximately \$7.3 million in income tax assessed by the commissioner of Inland Revenue of Guyana for the years 1991 to 1996. The amount in dispute represents the amount of deductions GT&T claimed during those years for advisory fees payable to Atlantic Tele-Network that were denied by the Commission. In August 1995, the High Court upheld the deductibility of these fees for one of the years in question. In June 1996, the Guyana Commission of Inland Revenue (the "Commission") filed a writ with the High Court, which GT&T has opposed, requesting the High Court to set aside this decision. The assessments relating to the remaining 4 years have been stayed pending the outcome of the High Court's decision on the Commission's writ. GT&T has received additional assessments for approximately \$6.5 million for the years 1997 to 2000 resulting from the same dispute over the deductibility of fees in those years. GT&T believes that these additional assessments will also be stayed pending the High Court's decision on the Commission's writ.

In November 1997, GT&T applied to the High Court for an order prohibiting the commissioner of Inland Revenue from enforcing tax assessments of approximately \$9.7 million for the years 1991 to 1996. GT&T believes that the tax assessments were erroneously calculated based on a faulty audit which was stayed by the High Court prior to completion, resulting in GT&T not receiving notice of, or an opportunity to respond to, the audit. The High Court has stayed enforcement of the tax assessments pending review of GT&T's request.

In November 1997, we filed motions with the Guyana Court of Appeal and High Court appealing an order issued by the PUC in October 1997 requiring GT&T to meet annual prescribed increases in the number of telephone lines for the years 1998 to 2000 and to provide certain additional services, e.g., call waiting, three-way calling, to customers by the end of 1998. We believe that in issuing the order the PUC failed to consider the added cost of meeting these requirements and the adjustment in telephone rates that would be necessary to provide GT&T a fair return on additional investment. The appeal is still pending, however, no stay has been issued in connection with the PUC order.

In early 2000, Inet Communications, Inc., an internet service provider in Guyana, and the Guyana Consumers Association filed a suit in the High Court against the Attorney General of Guyana and GT&T. The suit claims that GT&T is not entitled to rate increases based on our 1990 agreement with the Government of Guyana and that the Civil Law of Guyana prohibits what the plaintiffs refer to as

GT&T's monopoly. Inet's motion was struck down for non-appearance of counsel. In April 2000, Inet applied for the suit to be restored. The Court has yet to act on Inet's application.

In July 2002, an individual sued the Attorney General of Guyana in the High Court asking, among other things, for a declaration that the section of our 1990 agreement with the Government of Guyana granting to GT&T an exclusive right to provide domestic fixed and international voice and data services in Guyana violated Guyana law and was null and void. In September 2002, GT&T joined the suit to oppose the plaintiff's claims. Although the suit remains pending, there have been no further developments since November 2002.

In addition to those proceedings discussed above, we are periodically subject to claims and lawsuits that are incidental to our business, some of which involve claims for damages and taxes that are substantial in amount. See Note 13 to the Consolidated Financial Statements included in this Report. We believe that none of these additional proceedings would, in the event of an adverse outcome, have a material impact on our consolidated financial position, results of operation or liquidity.

ITEM 4. (Removed and Reserved)

PART II

ITEM 5. MARKET FOR REGISTRANT’S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our Common Stock, \$.01 par value, is listed on the NASDAQ Global Select Market under the symbol “ATNI.” The following table sets forth the high and low sales prices for our Common Stock as reported by the NASDAQ Global Select Market:

	<u>High</u>	<u>Low</u>
2008		
Quarter ended March 31	\$35.01	\$27.93
Quarter ended June 30	\$35.43	\$26.00
Quarter ended September 30	\$35.52	\$26.02
Quarter ended December 31	\$28.30	\$16.33
	<u>High</u>	<u>Low</u>
2009		
Quarter ended March 31	\$26.95	\$13.93
Quarter ended June 30	\$40.98	\$18.45
Quarter ended September 30	\$56.56	\$34.00
Quarter ended December 31	\$58.51	\$43.50

The approximate number of holders of record of Common Stock as of March 16, 2010 was 60.

Dividends

The following table sets forth the quarterly dividends per share declared by us over the past two fiscal years ended December 31, 2009:

	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter</u>
2008	\$0.16	\$0.16	\$0.18	\$0.18
2009	\$0.18	\$0.18	\$0.20	\$0.20

The declaration and payment of dividends on our Common Stock is at the discretion of our Board of Directors and is subject to a number of factors. Our credit facility restricts our ability to declare or pay dividends on our Common Stock. Because Atlantic Tele-Network, Inc. is a holding company, our ability to declare dividends is effectively limited to the amount of dividends, if any, our subsidiaries and other equity holdings may distribute to us. We have paid quarterly dividends on our common stock since January 1999, and have increased the amount of our dividend in each of the years since then. The present Board of Directors believes in returning a significant portion of profits, where possible, to stockholders and, subject to prudent resource management and strategic development needs, would expect to continue to increase the amount of our dividend if earnings continue to increase, although not necessarily proportionally. In 2008 and 2009, we paid a total annual dividend of \$0.68 and \$0.76 per share, respectively. The continuation or modification of our current dividend policy will be dependent upon strategic opportunities or developments, future results of operations, financial condition, capital requirements, contractual restrictions (such as those under our existing credit facility), regulatory actions, and other factors deemed relevant at that time by the Board of Directors.

Issuer Purchases of Equity Securities in the Fourth Quarter of 2009

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of the Publicly Announced Plan</u>	<u>Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plan(1)</u>
October 1, 2009–October 31, 2009 . . .	—	—	—	\$2,919,965
November 1, 2009–November 30, 2009	—	—	—	2,919,965
December 1, 2009–December 31, 2009	2,131(2)	—	—	2,808,173
Total	<u>2,131</u>	<u>—</u>	<u>—</u>	<u>\$2,808,173</u>

- (1) In September 2004, our Board of Directors approved the repurchase of up to \$5.0 million of our Common Stock. The repurchase authorizations do not have a fixed termination date and the timing of the buyback amounts and exact number of shares purchased will depend on market conditions.
- (2) Represents shares purchased on December 5, 2009 from our executive officers and other employees who tendered these shares to ATN to satisfy their tax withholding obligations incurred in connection with the vesting of restricted stock awards on that date. The price paid per share was the closing price per share of our Common Stock on the Nasdaq Global Select Market on December 5, 2009.

ITEM 6. SELECTED FINANCIAL DATA

You should read the selected financial data in conjunction with our “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and our audited Consolidated Financial Statements and the related Notes to those Consolidated Financial Statements included in this Report. The historical results set forth below are not necessarily indicative of the results of future operations. Period to period comparisons are also significantly affected by our significant acquisitions, including our acquisition of Commnet on September 15, 2005 and Sovernet on February 10, 2006 and the increase of our equity interest in Bermuda Digital Communications on May 15, 2008.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We provide wireless and wireline telecommunications services in North America, the Caribbean and Bermuda through the following principal operating subsidiaries:

- Commnet Wireless, LLC (“Commnet”), an owner and operator of wholesale wireless networks in rural areas of the United States. Commnet provides wireless voice and data communications roaming services principally to national, regional and local wireless carriers. Commnet generated approximately 31%, 34% and 43% of the Company’s consolidated revenues for 2007, 2008 and 2009, respectively. ATN acquired a 95% equity interest in Commnet in 2005 and acquired the remaining 5% equity interest in January 2007.
- Guyana Telephone & Telegraph Company, Ltd. (“GT&T”), the national and international telephone company in the Republic of Guyana and the largest wireless service provider in that country. The Company has owned 80% of the stock of GT&T since January 1991. GT&T generated approximately 57%, 47% and 38% of the Company’s consolidated revenues for 2007, 2008 and 2009, respectively.
- Bermuda Digital Communications, Ltd. (“BDC”), a leading wireless voice and data communications service provider in Bermuda, doing business under the name “Cellular One”. The Company acquired an equity interest in, and signed a management contract with, BDC in 1998. On May 15, 2008, BDC completed a share repurchase of its common stock. ATN did not tender any shares for repurchase, and, as a result of the transaction, increased its holdings from approximately 43% to approximately 58% of BDC’s outstanding common stock. Prior to this increase in holdings, the Company accounted for its investment in BDC under the equity method and earnings from BDC did not appear in its income from operations, but were instead reflected in equity in earnings of unconsolidated affiliates. Effective with the completion of that share repurchase, the Company began consolidating BDC’s balance sheet and results of operations. In September 2008, BDC began providing wireless services in Turks and Caicos through Islandcom Telecommunications, Ltd.
- Sovernet, Inc. (“Sovernet”), a facilities-based integrated voice, broadband data communications and dial-up service provider in New England and New York State. Sovernet’s retail telecommunications service is delivered to business and residential customers in Vermont and New Hampshire. Through an acquisition made in 2008, Sovernet also delivers wholesale transport services in New York State through its majority-owned subsidiary, ION. Sovernet currently holds 75% of the equity interest in ION.
- Choice Communications, LLC (“Choice”), a leading provider of fixed and portable wireless broadband data and dial-up internet services to retail and business customers in the U.S. Virgin Islands. ATN acquired Choice in 1999. Choice discontinued its wireless television service on May 31, 2009 to focus mainly on providing wireless broadband data services.

ATN provides management, technical, financial, regulatory, and marketing services to its subsidiaries and typically receives a management fee equal to approximately 3% to 6% of their respective revenues. Management fees from consolidated subsidiaries are eliminated in consolidation. ATN received management fees from unconsolidated affiliates through May of 2008, which are included in “Other Income” in the accompanying statements of operations.

The following chart summarizes the operating activities of our principal subsidiaries and the markets they serve as of December 31, 2009:

<u>Services</u>	<u>Segment</u>	<u>Operating Subsidiary</u>	<u>Markets</u>
Wireless	Rural Wireless	Commnet	United States (rural markets)
	Integrated Telephony— International	GT&T	Guyana
	Island Wireless	BDC, Islandcom	Bermuda, Turks and Caicos
Local Telephone and Data	Integrated Telephony— International	GT&T	Guyana
	Integrated Telephony— Domestic	Sovernet, ION	United States (New England and New York State)
	Wireless Data(1)	Choice (internet access)	U.S. Virgin Islands
International Long Distance	Integrated Telephony— International	GT&T	Guyana

- (1) As described above, effective May 31, 2009, the Company terminated its wireless television services, and therefore has changed the name of the “Wireless Television and Data” segment to “Wireless Data”.

For information about our business segments and geographical information about our operating revenues and long-lived assets, see Note 15 to the Consolidated Financial Statements included in this Report.

We are dependent on Commnet and GT&T for a majority of our revenues and profits. For the year ended December 31, 2009, approximately 81% of our consolidated revenue and substantially all of our consolidated operating income were generated by these two operating subsidiaries.

However, over the last several years, we have added substantially to the diversity of our business and reduced our historical dependence on our Guyana operations for our financial results. This reduction of GT&T’s contribution is due mainly to the acquisition and growth of our U.S. wireless as well as the expansion of our U.S. wireline business and the 2008 increase in our ownership interest in our Bermuda operations and related acquisitions. In addition to our pending Alltel Acquisition, we expect to continue this trend of diversification and are actively evaluating additional investment and acquisition opportunities that meet our return-on-investment and other acquisition criteria. The pending acquisition of the Alltel wireless assets, if completed, will further substantially reduce both Commnet and GT&T’s portion of our consolidated revenue. For information regarding the pending Alltel acquisition see “Pending Acquisitions- Alltel Assets” below.

During 2009, Commnet was the single largest contributor to our revenue and operating income. The revenues and profits of this U.S. wholesale wireless business are primarily driven by the number of sites and base stations we operate, the amount of voice and data traffic that each of these sites generates, and the rate we get paid from our carrier customers on that traffic. The growth of these revenues has historically been driven mainly by the rate at which we expand the number of base stations we operate. Commnet competes with wireless service providers that operate networks in its markets and offer wholesale roaming services as well. In addition, our carrier customers may also elect to build or acquire their own infrastructure (including networks that we built out pursuant to certain roaming agreements) in a market in which they operate, reducing or eliminating their need for our services in that market. For example, the recent acquisition by Verizon Wireless of Alltel Corporation assets, and pending acquisition of Alltel assets by AT&T, will result in our wholesale customers having

their own infrastructure in certain markets where they are currently served by us. This is expected to result in a significant loss of wireless wholesale revenue and operating income in future periods, which, if not offset by growth in other revenues generated or other sources could materially reduce our overall operating profits. For more information regarding this segment, see the discussion of “Rural Wireless” in Note 15 to our Consolidated Financial Statements included in this Report.

The largest single component of our revenues and profits in the Guyana market has been from international long distance business, which accounted for approximately 16% of our consolidated revenue during the year ended December 31, 2009. While the majority of this international long distance revenue is generated by calls originated by, or terminating with, our wireline and wireless customers, we are currently the exclusive provider of international voice and data in Guyana and therefore generate revenue and profit from calls and data originating on our competitor’s wireless network pursuant to an interconnection agreement. Digicel notified us that it terminated the agreement effective January 2010. For more information about Digicel’s termination of its interconnection agreement with us, please see “Recent Proceedings” under Item 3—Legal Proceedings.

The primary drivers of this long distance business are the population of Guyanese living abroad who initiate calls to Guyana and the rate foreign carriers pay GT&T for handling incoming international calls and the number of people in Guyana with a wireless handset or fixed telephone line. However, in recent years, we believe various methods of illegal bypass and alternative and cheaper media for communication, such as e-mail and text messaging, may have had a negative impact on both voice traffic and international long distance revenues. Beginning in 2008, we believe there was a substantial increase in illegal bypass activities. We have taken a number of measures to counter illegal bypass, including taking action against unlicensed operators in Guyana, introducing special outbound call center rates, and we are examining automated technical solutions as well. More recently, we also believe the current economic recession has reduced the volume of calls into and out of Guyana and negatively impacted our revenues.

In addition to our 2010 planned capital expenditures to expand and upgrade our GT&T network, we will be investing over the next six months approximately \$8 million to \$10 million in a new submarine fiber optic cable in Guyana. We have invested approximately \$17.9 million in this cable through December 31, 2009. The construction of this new international cable connecting Guyana to Trinidad will have the potential to provide for continued growth in the provision of high speed data and internet services into Guyana, and give us a cost-effective method of increased redundancy. We believe this is particularly important in the current operating environment of a worldwide shift from voice-driven applications to data-driven applications and the growth in broadband demand. We expect this cable to be operational mid-year 2010.

As previously disclosed in our public reports, the Government of Guyana has repeatedly stated its intention to introduce additional competition into Guyana’s telecommunications sector and held formal discussions with us in early 2008 regarding potential modifications or termination of GT&T’s exclusivity rights. In October 2008, GT&T was informally notified that the Government had retained the services of a U.S. based law firm and a consultant to develop the legislative and regulatory reforms necessary to introduce telecommunication competition in Guyana. Based on informal discussions with these parties, we currently expect draft legislation to be available in the first half of 2010. Our exclusive license has a stated initial term that expires in December 2010 and is according to its terms, renewable for an additional 20 year term at our sole option. In November 2009, we notified the Government of Guyana of our election to renew our exclusive license for an additional 20 years.

At this time, ATN and GT&T do not know whether or how any draft legislation will address GT&T’s exclusive license, and if so, whether it would be pursuant to an agreement between GT&T and the Government. Other than entering into such an agreement on terms acceptable to us, we would seek to enforce GT&T’s rights by law and contract to be the exclusive provider of international voice and

data services in Guyana. Although we believe that we would be entitled to damages for any involuntary termination of that license, we cannot guarantee that we would prevail in any court or arbitration proceeding. See “Business—Regulation—Regulation of Our GT&T Subsidiary—Regulatory Developments” and “Risk Factors—Our exclusive license to provide local exchange and international voice and data services in Guyana is subject to significant political and regulatory risk”.

On May 7, 2009, at the Annual General Meeting of GT&T, the representative of the Government of Guyana indicated to representatives of ATN in attendance at the meeting that the Government of Guyana is interested in selling its 20% interest in GT&T. In a letter dated May 21, 2009, the Government of Guyana formally offered to sell its 20% interest in GT&T to ATN, which currently owns 80% of GT&T, and reserved the right to offer to sell such interest to other potential purchasers if ATN decides not to purchase the Government’s stake. The Board of Directors of ATN considered the Government’s offer and, in a letter dated June 22, 2009, indicated that it was not prepared to make a definitive offer for that interest at this time.

The principal terms of our investment in GT&T are set forth in the Agreement between The Government of The Co-Operative Republic of Guyana and ATN, dated June 18, 1990 (the “Guyana Agreement”), which is included as Exhibit 10 to our Quarterly Report on Form 10-Q for the fiscal quarter ended March 31, 2006, as filed with the SEC on May 15, 2006. The Guyana Agreement does not provide for any specific procedures in connection with the potential sale by the Government of Guyana of its 20% interest in GT&T and the Government has not indicated a timeframe in which it would seek to complete any proposed sale.

On May 8, 2009, Digicel filed a lawsuit in Guyana challenging the legality of GT&T’s exclusive license under Guyana’s constitution. Digicel initially filed this lawsuit against the Attorney General of Guyana in the High Court. On May 13, 2009, GT&T petitioned to intervene in the suit in order to oppose Digicel’s claims and that petition was granted on May 18, 2009. GT&T filed its answer to the charge on June 22, 2009 and the case is pending. We believe that any legal challenge to GT&T’s exclusive license granted in 1990 is without merit and we will vigorously defend against such a legal challenge.

Pending Acquisition- Alltel Assets

On June 9, 2009, the Company entered into a Purchase Agreement (the “Purchase Agreement”) with Celco Partnership d/b/a Verizon Wireless (“Verizon”) to acquire wireless assets previously acquired by Verizon in its acquisition of Alltel Corporation (“Alltel”) in certain, primarily rural, markets in Georgia, North Carolina, South Carolina, Illinois, Ohio and Idaho. Pursuant to the terms of the Purchase Agreement, Verizon will cause certain licenses, network assets, tower and other leases and other assets and certain related liabilities to be contributed to a newly formed, wholly-owned subsidiary limited liability company, whose membership interests will be acquired by the Company for a purchase price of approximately \$200 million (the “Alltel Acquisition”).

Verizon is required to divest these and other assets under consent decrees it entered into with the Department of Justice related to its purchase of Alltel in January 2009. On May 8, 2009, AT&T announced it has entered into a definitive agreement with Verizon to acquire the majority of the wireless assets required to be divested (the “AT&T Acquisition”). ATN has contracted to acquire from Verizon the remainder of the assets required to be divested.

The parties have agreed to a variety of customary covenants and agreements, including with respect to confidentiality, cooperation (including with respect to regulatory matters), the conduct of the business to be acquired in the ordinary course consistent with past practice and other restrictions on the operation of such business prior to the consummation of the Alltel Acquisition, public announcements and similar matters. Consummation of the Alltel Acquisition is subject to the satisfaction of certain conditions, including, among others, (i) the receipt of the United States

Department of Justice's approval of the Alltel Acquisition, (ii) the receipt of all required consents of the Federal Communications Commission to the transfer, assignment or change in control of certain licenses pursuant to the Alltel Acquisition, (iii) the receipt of required consents from state public utility commissions, if any, and (iv) the absence of any injunction or final judgment prohibiting the consummation of the Alltel Acquisition. Consummation of the Alltel Acquisition is not subject to any financing condition.

In conjunction with the Alltel Acquisition, on January 25, 2010, the Company amended and restated its existing credit facility to restate its existing \$73.9 million term loan ("Term Loan A") and previously undrawn \$75 million revolving credit facility (the "Revolver Facility") and provide for a new \$150 million term loan ("Term Loan B" and together with the Term Loan A and Revolver Facility, the "New Credit Facility"). Upon the closing of the New Credit Facility, \$73.9 million was outstanding under the Term Loan A, an amount equal to the outstanding principal amount of the Company's previous term loan under the Company's prior credit facility. No amount is currently outstanding under Term Loan B or the Revolver Facility. The Company plans to use cash on hand, the proceeds from Term Loan B and a portion of the proceeds available under the Revolver Facility towards the acquisition purchase price and related acquisition expenses and working capital adjustments. We may use the proceeds of the Term Loan B solely in connection with the Alltel Acquisition. Borrowings under the Term Loan B are available to the Company until the earlier of (i) completion of the Alltel Acquisition or (ii) March 31, 2010 (the "Term Loan B Commitment Expiration Date"). We intend to request an extension to the Term Loan B Commitment Expiration Date during the first quarter of 2010. For more information about the New Credit Facility, see Note 7 to the Consolidated Financial Statements in this Report.

Stimulus Grants

On August 20, 2009, Commnet and ION filed applications for stimulus funds made available by the US Government under provisions of the American Recovery and Reinvestment Act of 2009 intended to stimulate the deployment of broadband infrastructure and services to rural, unserved and underserved areas.

In December 2009, ION was named to receive a \$39.7 million federal stimulus grant to fund its ION Upstate New York Rural Broadband Initiative, which involves building ten new segments of fiber-optic, middle-mile broadband infrastructure, serving more than 70 rural communities in upstate New York and parts of Pennsylvania and Vermont. The new project will be undertaken through a public-private partnership between ION and the Development Authority of the North Country ("DANC"), a New York State public benefit corporation that owns and operates 750 miles of fiber optic network and provides wholesale telecommunications transport services to voice, video, data and wireless service providers.

The \$39.7 million grant, awarded to ION by the National Telecommunications and Information Administration of the U.S. Department of Commerce ("NTIA"), under its Broadband Technology Opportunities Program, will be paid over the course of the project period as expenses are incurred, which is expected to be three years. An additional \$9.9 million will be invested in the project by ION and DANC.

The funding of the new ION project is not scheduled to occur until the second quarter of 2010. Accordingly, the Company did not recognize any of the granted funds during 2009. The results of ION are included in the Company's "Integrated Telephony-Domestic" segment as reported in Note 15 to our Consolidated Financial Statements included in this Report.

Commnet and the Navajo Tribal Utility Authority submitted a combined request for \$35 million of stimulus funds to extend wireless fixed and mobile broadband service in portions of Arizona, New Mexico and Utah, and are awaiting the decision of the US Government.

Results of Operations

Years Ended December 31, 2009 and 2008

	Year Ended December 31,		Amount of Increase (Decrease)	Percent Increase (Decrease)

Wireless revenue. Wireless revenue includes wholesale voice and data roaming revenue from our rural U.S. operations, retail wireless revenues generated in Guyana, and our retail wireless revenues generated by our Island Wireless segment in Bermuda and the islands.

Wireless revenue increased to \$147.0 million for the year ended December 31, 2009 from \$105.0 million for the year ended December 31, 2008, an increase of \$42.0 million, or 40%. Our rural U.S. business increased its revenues by \$34.6 million, or 49%, to \$104.7 million from \$70.1 million for the year ended December 31, 2009 and 2008, respectively.

The increase in wireless revenue from our U.S. wireless business was due primarily to continued deployment of additional GSM and CDMA wireless base stations and the expansion of our data capabilities, which generated growth in minutes of use and increased data and international roaming revenue, as well as the December 2008 acquisition of the wireless network assets of CC Communications, a telecommunications company based in Fallon, Nevada. As of December 31, 2009 a total of 580 base stations were deployed as compared to 473 base stations as of December 31, 2008. Our rural wireless revenue also increased as a result of growth in voice and data traffic (measured in minutes and megabytes, respectively) at existing sites and growth in data roaming revenue and international roaming revenue.

Verizon's acquisition of Alltel and the AT&T acquisition of certain assets of Alltel, if approved by federal and regulatory authorities, will cause some loss of wireless revenue for us because certain network assets acquired by each of Verizon and AT&T overlap geographically with our U.S. network, of which they were our customers, in a substantial number of areas. In addition, the AT&T acquisition, if approved by the regulatory authorities, would result in a significant additional loss in revenue when AT&T completes its previously announced GSM network build in those areas. AT&T has publicly stated its expectation that it will complete such an overlay within a year from closing the purchase. This loss in revenue could have a significant negative impact on our revenues and operating income if it is not offset or replaced by increased revenue in other areas of our U.S. rural wireless business or from other sources (including increased revenue in connection with our pending Alltel Acquisition, if completed).

While we expect to see a continued increase in wireless revenues from our rural U.S. wireless business in geographical areas not impacted by Verizon or AT&T's acquisition of Alltel Wireless networks, the pace of that increase in non-Alltel overlap markets may be slowed as compared to the growth in previous periods due to scheduled reductions in revenue rates.

Wireless revenue in Guyana increased by \$0.9 million, or 4%, to \$21.6 million for the year ended December 31, 2009, from \$20.7 million for the year ended 2008. While GT&T continues to respond to increased competition as well as a decrease in rates, wireless subscribers in Guyana increased 17%, from approximately 248,000 subscribers as of December 31, 2008 to approximately 289,000 subscribers as of December 31, 2009.

While we have seen an increase in wireless subscribers, our competitor, Digicel, a large regional wireless provider, could continue to take market share with aggressive marketing campaigns and spending, including handset subsidies. In addition, the overall number of our wireless subscribers in Guyana could be reduced as a result of recent regulations imposed on Guyana telecommunications carriers, including our GT&T subsidiary, to collect proof of address and photographic identification for all new and existing customers. These requirements mandate that the telecommunications carriers must obtain this information or discontinue services to any undocumented subscribers. These regulations, which recently became effective, are part of broader legislation enacted by the Government requiring telecommunication carriers to implement procedures and network changes intended to assist law enforcement activities. In the case of wireless customers, this data collection requirement must be complied with by December 18, 2009. GT&T has communicated to the Government the logistical difficulty of complying with its records requirement and the possibility for disruptions in service and the Government has indicated that while it may not immediately enforce the disconnection, it will urge all carriers to use all possible avenues to collect this data.

Our Island Wireless business increased wireless revenue by \$6.7 million, to \$20.8 million from \$14.1 million for the year ended December 31, 2009 and 2008, respectively. The increase in revenues is due to full year consolidation of revenues in 2009 following the increase in our equity position in, and consolidation of BDC, which occurred as of May 15, 2008. Wireless subscribers in Bermuda remained consistent at 20,500 for the years ended December 31, 2008 and 2009, respectively.

We expect wireless revenue from our Island Wireless business to grow as we complete the expansion and upgrading of our network in our early stage business in Turks and Caicos and launch new services in Bermuda.

Local telephone and data revenue. Local telephone and data revenue is generated by our wireline operations in Guyana, our integrated voice and data operations in New England and New York State, and our data services in the U.S. Virgin Islands. This revenue includes basic service fees, measured service revenue, and internet access fees, as well as installation charges for new lines, monthly line rental charges, long distance or toll charges (excluding international long distance charges in Guyana), maintenance and equipment sales.

Local telephone and data revenue increased by \$4.6 million, or 9%, to \$55.3 million for the year ended December 31, 2009 from \$50.7 million for the year ended December 31, 2008. The increase is predominantly attributable to Sovernet, which increased revenues by \$2.8 million, mainly as a result of the addition of ION, which Sovernet acquired on August 15, 2008. Sovernet continues to add business customers for its voice and data services; however, its overall revenue increase is partially offset by the decline in its residential data business, particularly its dial-up internet services. Local telephone and data revenue in Guyana increased \$1.4 million, or 5%, to \$31.3 million for the year ended December 31, 2009 from \$29.9 million for the year ended December 31, 2008. GT&T's access lines in Guyana grew from approximately 139,000 lines as of December 31, 2008 to approximately 147,000 lines as of December 31, 2009 (an increase of 6%). Revenue from the growth in access lines has been partially offset by a decrease in usage that is likely due to wireless service alternatives. Data revenue at our U.S. Virgin Islands subsidiary increased \$0.4 million, or 9%, to \$5.0 million from \$4.6 million for the years ended December 31, 2009 and 2008, respectively.

In future periods, we anticipate that local telephone and data revenue will increase modestly as a result of network expansion, subscriber and access line growth, and capacity sales in New York, New England and Guyana. While ION expects to expand its network and receive a portion of the \$39.7 million grant during 2010, we do not expect the network buildout to significantly impact revenue during 2010 since the buildout will not be complete.

International long distance revenue. International long distance revenue is generated by international telephone calls into and out of Guyana and does not include international long distance revenue generated by our other operations.

Inbound traffic, which made up 84% of all international long distance traffic and 68% of international long distance revenue for the year ended December 31, 2009, is settled in U.S. dollars. International long distance revenue was \$38.2 million for the year ended December 31, 2009, a decrease of \$9.6 million, or 20%, from \$47.8 million for the year ended December 31, 2008. We believe this decrease is a result of continued and considerable illegal bypass activities resulting in lost revenue opportunities, as well as an overall reduction in call volume into Guyana attributable to the current difficult global economic environment.

International voice traffic may also be declining as a result of the growth of alternative and cheaper media for communications, such as e-mail and text messaging. That shift to alternatives may grow faster in the future as we expand our data offerings in the market. Although the other modes of communication may cause a decline in both voice traffic and in international long distance revenues in future periods, we may see a slight increase in traffic and revenues if we are effective in combating illegal bypass. We have taken a number of measures to counter illegal bypass, but have had limited success to date. These measures include taking action against unlicensed operators in Guyana, introducing special outbound call center rates and we are examining automated technical solutions as well. The outcome of negotiations with the Government of Guyana regarding the exclusivity terms of GT&T's license is also likely to negatively impact this revenue in the future. In January 2010, we launched a promotion significantly lowering international calling rates to certain destinations. We

expect this to stimulate traffic volumes but expect it still may result in a further revenue decline given the size of the rate reduction. This promotion will expire on March 31, 2010 but we have applied with the Government of Guyana for a three-month extension.

Other revenue. Other revenue represents revenue from wireless digital television services in the U.S. Virgin Islands, which decreased 69% to \$1.2 million for the year ended December 31, 2009 from \$3.9 million for the year ended December 31, 2008. On May 31, 2009 the Company terminated its digital television services to focus solely on providing wireless broadband data and dialup internet services.

Termination and access fee expenses. Termination and access fee expenses are charges that we pay for voice and data transport circuits (in particular, the circuits between our rural wireless sites and our switches), internet capacity and other access fees we pay to terminate our calls.

Termination and access fees increased by \$8.4 million, or 24%, from \$35.0 million for the year ended December 31, 2008 to \$43.4 million for the year ended December 31, 2009, as a result of increased traffic at Commnet, the consolidation of a full year of operating results for BDC in 2009 and an increase in expenses at Sovernet due to a full year of operating results of ION.

Termination and access fees are expected to increase in future periods, but remain fairly consistent as compared to their related revenues, as our rural wireless and CLEC operations in Vermont expand.

Internet and programming expenses. Internet and programming expenses include internet connectivity charges and digital television programming.

Internet and programming expenses decreased from \$3.4 million for the year ended December 31, 2008 to \$1.9 million for the year ended December 31, 2009. This decrease was a result of a decrease in expenses from the U.S. Virgin Islands, as we terminated our digital television service on May 31, 2009.

Engineering and operations expenses. Engineering and operations expenses include the expenses associated with developing, operating, supporting and expanding our networks, including the salaries and benefits paid to employees directly involved in the development and operation of our networks.

Engineering and operations expenses increased by \$3.2 million, or 13%, from \$24.9 million for the year ended December 31, 2008 to \$28.1 million for the year ended December 31, 2009. This increase is primarily the result of the expansion of our wireless networks in the United States and the consolidation of BDC's results for all of 2009.

We expect that engineering and operations expenses will continue to increase as our networks expand and require additional support.

Sales and marketing expenses. Sales and marketing expenses include salaries and benefits we pay to sales personnel, customer service expenses, sales commissions and the costs associated with the development and implementation of our promotion and marketing campaigns.

Sales and marketing expenses increased by \$2.9 million, or 22%, from \$13.2 million for the year ended December 31, 2008 to \$16.1 million for the year ended December 31, 2009. The majority of this increase is the result of the consolidation of a full year of operating results of BDC for 2009.

We expect that sales and marketing expenses will remain fairly consistent as a percentage of related revenues in the near future.

General and administrative expenses. General and administrative expenses include salaries, benefits and related costs for general corporate functions, including executive management, finance and administration, legal and regulatory, facilities, information technology and human resources.

General and administrative expenses increased by \$7.7 million, or 27%, from \$28.7 million for the year ended December 31, 2008 to \$36.4 million for the year ended December 31, 2009. Of this increase, \$3.5 million is the result of our consolidation of a full year of operating results of BDC in 2009. The remaining increase is due to increased overhead to support our growth and internal costs associated with the pending acquisition of Alltel assets.

While internal costs specific to the pending acquisition of Alltel assets are expected to decrease after the acquisition is completed, we expect overall general and administrative expenses to increase in order to support our growth but remain consistent as compared to our consolidated revenues.

Acquisition-related charges. Acquisition-related charges include the external costs, such as legal and consulting, directly associated with acquisition related activities, which are expensed as incurred. Acquisition-related charges do not include internal costs, such as employee salary and travel-related expenses, which we incurred during 2009 in connection with the pending acquisition of the Alltel assets.

For the year ended December 31, 2009 acquisition-related charges were \$7.2 million, an increase from \$1.1 million for the year ended December 31, 2008. Of the 2009 costs, \$6.8 million were associated with the pending acquisition of Alltel assets.

We anticipate that our acquisition of the Alltel assets will be completed during the first half of 2010. Until then, we expect acquisition-related charges will continue at the current pace. After the acquisition of the Alltel assets is completed, we expect that acquisition-related expenses to continue to be incurred, however, at a much reduced level, as the Company continues to explore additional acquisition opportunities that meet its investment objectives.

Depreciation and amortization expenses. Depreciation and amortization expenses represent the depreciation and amortization charges we record on our property and equipment and on our intangible assets.

Depreciation and amortization expenses increased by \$7.4 million, or 23%, from \$31.5 million for the year ended December 31, 2008 to \$38.9 million for the year ended December 31, 2009. The increase is primarily due to the addition of fixed assets from our network expansion in our rural U.S. wireless business, the consolidation of a full year of operating results of BDC in 2009, and the acquisitions of ION and Islandcom, which occurred in the third quarter of 2008.

We expect depreciation and amortization expenses to continue to increase as a result of a future network expansion.

Interest expense. Interest expense represents interest incurred on our outstanding credit facilities.

Interest expense increased from \$3.1 million for the year ended December 31, 2008 to \$3.7 million for the year ended December 31, 2009. The increase in interest expense was due to the increase in our term loan borrowings. We had no outstanding borrowings under our revolving line of credit during the years ended December 31, 2008 or 2009.

On September 10, 2008, the Company repaid the then outstanding \$50.0 million term loan with the proceeds from a new \$75.0 million variable rate term loan. At the same time, the Company's variable rate revolving line of credit facility expanded from \$20.0 million to \$75.0 million. Also during September 2008, the Company entered into an interest rate swap agreement, to effectively lock the Company's interest rate on \$68.0 million of these facilities at 5.67%, which is further detailed in Note 8 to the Consolidated Financial Statements included in this Report.

As described in Note 7 to the Consolidated Financial Statements, the Company entered into an amended and restated credit agreement on January 20, 2010. The amended credit facility is expected to increase the Company's interest expense in the future pending the Company's completion of the acquisition of the Alltel assets.

Interest income. Interest income represents interest earned on our cash, cash equivalent and short term investments.

Interest income decreased to \$1.2 million from \$1.8 million for the year ended December 31, 2009 and 2008, respectively. This decrease is a result of a decrease in the interest rates and subsequent amount earned on our cash and investments.

Income taxes. The effective tax rate was 43% for the year ended December 31, 2008 and 46% for the year ending December 31, 2009. Income tax expense includes income taxes at the statutory U.S. federal and state income tax rates as well as the Guyanese income taxes in excess of the statutory U.S. income tax rates. Since we operate in jurisdictions that have a wide range of statutory tax rates, our consolidated effective tax rate is impacted by the mix of income generated in those jurisdictions as well as the receipt of dividends from our foreign subsidiaries. The increase in the consolidated effective tax rate was a result of losses in our Island Wireless segment for which we receive no tax benefit.

Net Income Attributable to Non-Controlling Interests. Net income attributable to non-controlling interests consists of the Guyana government's 20% interest in GT&T, a non-controlling shareholder's 4% interest in Sovernet, other non-controlling shareholders' interests in certain consolidated subsidiaries of Commnet, and non-controlling shareholders' 42% equity interest in BDC as well as non-controlling shareholders' interests in consolidated subsidiaries of Sovernet and BDC.

Net income attributable to non-controlling interests decreased from \$5.0 million for the year ended December 31, 2008 to \$1.0 million for the year ended December 31, 2009. This decrease is a result of the allocation of non-controlling shareholders' share of losses in our two early stage businesses (ION and Islandcom) following the adoption the FASB's authoritative guidance on noncontrolling interests in consolidated financial statements in 2009.

Net income attributable to Atlantic Tele-Network, Inc. Stockholders. As a result of the above factors, net income increased to \$35.5 million for the year ended December 31, 2009 from \$34.8 million for the year ended December 31, 2008. On a per share basis, net income increased from \$2.29 per basic and \$2.28 per diluted share to \$2.33 per basic and \$2.32 per diluted share for the years ended December 31, 2008 to 2009, respectively.

Segment results. We have five material operating segments, which we manage and evaluate separately: (1) Rural Wireless; (2) Integrated Telephony—International; (3) Island Wireless; (4) Integrated Telephony—Domestic; and (5) Wireless Data. Island Wireless became an operating segment upon completion of BDC's share repurchase and the resulting increase in our equity interest in BDC, effective May 15, 2008. Segment results are set forth in Note 15 to the Consolidated Financial Statements included in this Report.

Wireless revenue. Wireless revenue includes wholesale voice and data roaming revenue from our rural U.S. operations and retail wireless revenues generated in Guyana. For 2008, wireless revenue also includes retail wireless revenues generated by our Island Wireless segment.

Wireless revenue increased to \$105.0 million for 2008 from \$83.5 million for 2007, an increase of \$21.5 million, or 26%. Notwithstanding the sale of 59 base stations during the fourth quarter of 2007, our rural U.S. business increased its revenues by \$12.4 million, or 21%, to \$70.1 million for 2008 from \$57.7 million for 2007. The increase in revenue from our U.S. wireless business was due primarily to growth in voice and data traffic at existing sites, as well as the continued deployment of additional GSM and CDMA wireless base stations that generated additional minutes of use and increased data revenue. Also included in this increase was \$1.9 million of switching fees earned on the 59 sold base stations. As of December 31, 2008, a total of 473 base stations were deployed as compared to 303 base stations as of December 31, 2007. We put into service 165 new base stations, acquired 46 base stations, and decommissioned 41 older TDMA/Analog base stations.

The consolidation of our BDC operating results, which began as of May 15, 2008, contributed \$14.1 million of the increase in wireless revenue. This increase in wireless revenue from our rural U.S. operations and BDC was partially offset by a decline in wireless revenue in Guyana. Digicel entered the Guyana market in early 2007 with aggressive marketing campaigns and handset subsidies. This decline in revenue in 2008 reflects the continued impact of that competition, a decrease in rates and the introduction of per second billing in March 2007 for all wireless calls. This additional competition in Guyana caused our wireless subscribers to decrease by 80,000, or 24%, from 328,000 subscribers as of December 31, 2007 to 248,000 subscribers as of December 31, 2008, respectively. We also believe there may have been a decline in the total wireless subscribers in the market as the level of handset subsidies and giveaways fell from 2007. These factors resulted in a \$5.1 million decrease in GT&T's wireless revenue from \$25.8 million during 2007 to \$20.7 million during 2008.

Local telephone and data revenue. Local telephone and data revenue increased by \$4.1 million, or 9%, to \$50.7 million for 2008 from \$46.6 million for 2007. The increase is primarily attributable to growth in GT&T's access lines in Guyana from approximately 132,000 lines as of December 31, 2007 to approximately 139,000 lines as of December 31, 2008 (an increase of 5%), increased interconnect fees, growth in broadband data customers in Guyana and continued strong growth in wireless broadband customers in the U.S. Virgin Islands. Sovernet increased revenues by \$1.5 million, due mainly to the addition of ION on August 15, 2008. Sovernet continues to add business customers for its voice and data services at a strong rate and improve profitability; however, its overall revenue increase is partially offset by the decline in its residential data business, particularly its dial-up internet services.

International long distance revenue. Inbound traffic, which made up 86% of all international long distance traffic and more than 70% of international long distance revenue for the year ended December 31, 2008, is settled in U.S. dollars.

International long distance revenue declined by \$4.8 million, or 9%, from \$52.6 million for 2007 to \$47.8 million for 2008. This decline was partly a result of certain significant events during 2007, such as the run up to Guyana's hosting of Cricket World Cup matches and the Rio Group Summit, which we believe increased traffic volumes during that period. We are also subject to illegal bypass via internet calling, which we believe increased considerably from the second to the fourth quarter of 2008.

Other revenue. Other revenue represents revenue from wireless digital television services in the U.S. Virgin Islands, which decreased 5% to \$3.9 million for 2008 from \$4.1 million for 2007. On May 31, 2009 the Company terminated its digital television services to focus solely on providing wireless broadband data and dial-up internet services.

Termination and access fee expenses. Termination and access fees increased by \$5.6 million, or 19%, from \$29.4 million to \$35.0 million from 2007 to 2008, respectively as a result of increased traffic

at Commnet, the consolidation of BDC's results of operations and an increase in expenses at Sovernet due to the operating results of its August 2008 acquisition of ION.

Internet and programming expenses. Internet and programming expenses remained at \$3.4 million in 2007 and 2008. This is consistent with the minimal growth in our broadband data and television subscribers in the U.S. Virgin Islands.

Engineering and operations expenses. Engineering and operations expenses increased by \$1.9 million, or 8%, from \$23.0 million to \$24.9 million for 2007 and 2008, respectively. This increase is primarily the result of the expansion of our wireless networks in the United States as well as the consolidation of BDC.

Sales and marketing expenses. Sales and marketing expenses decreased by \$2.3 million, or 15%, from \$15.5 million to \$13.2 million for 2007 and 2008, respectively. Throughout 2007, GT&T incurred an unusually high level of sales and marketing costs as a response to increased wireless competition, including wireless handset promotions, increased advertising and higher sales commissions. In 2008, GT&T's sales and marketing expenses returned to a lower level. The decrease in GT&T's sales and marketing expenses was partially offset by BDC's sales and marketing expenses which we began to consolidate effective May 15, 2008.

General and administrative expenses. General and administrative expenses increased by \$5.6 million, or 24%, from \$23.1 million to \$28.7 million for 2007 and 2008, respectively. Of this increase, \$4.8 million is a result of our consolidation of BDC's financials beginning in 2008.

Acquisition related charges. We incurred \$1.0 million in legal and related expenses in an unsuccessful effort to acquire a company out of bankruptcy at the end of 2008.

Depreciation and amortization expenses. Depreciation and amortization expense increased by \$4.8 million, or 18%, from \$26.7 million to \$31.5 million for 2007 and 2008, respectively. The increase is primarily due to the addition of fixed assets from our network expansion in our rural U.S. wireless business and Guyana, the consolidation of BDC's results, and the acquisitions of ION and Islandcom.

Impairment of long-lived assets. In the fourth quarter of 2007, Choice Communications recorded a \$4.4 million asset impairment charge related to the wireless digital television portion of the business. In late 2007, Choice was denied certain tax benefits by the U.S. Virgin Islands government. This denial of tax benefits, together with minimal anticipated future television subscriber and market share growth within its existing geographic footprint, resulted in the estimated future cash flows associated with this business being below the carrying value of the assets. The Company, through a separate impairment test, determined that no impairment existed as of December 31, 2007 relating to Choice's internet services, including both the broadband data and dial-up products.

Gain on disposition of long-lived assets. In December 2007, Commnet sold to a national carrier 59 base stations, along with spectrum licenses, in two Midwestern states and recorded a gain on the sale of \$5.0 million. Also, during the first half of 2007, Commnet sold telecom assets, predominantly in western states, and recognized a gain on the sale of such assets of \$1.3 million. These gains were offset by a loss of \$0.3 million as a result of the Company's sale of all of its assets in Haiti in August 2007.

Interest expense. On September 10, 2008, the Company repaid the then outstanding \$50.0 million term loan with the proceeds from a new \$75.0 million term loan. At the same time, the Company's revolving line of credit facility expanded from \$20.0 million to \$75.0 million. Also during September 2008, the Company entered into an interest rate swap agreement which is further detailed in Note 8, "Derivative Instruments and Hedging Activities" to the Consolidated Financial Statements included in this Report.

Interest expense increased \$0.8 million from \$2.3 million to \$3.1 million for the years ended 2007 and 2008, respectively. The increase in interest expense was due to the increase in our term loan borrowings. We had no outstanding borrowings under our revolving line of credit during 2007 or 2008.

Interest income. Interest income decreased \$0.7 million from \$2.5 million for 2007 to \$1.8 million in 2008. The decrease was a result of a decrease in the rate of interest earned on cash and investments in 2008.

Other income (expense). Included in other income for 2007 were management fees received from BDC which, since May 15, 2008 have been eliminated in consolidation. Other income decreased from \$2.2 million in 2007 to \$0.4 million in 2008 as a result of a \$1.3 million license settlement at Commnet during 2007, as well as the elimination, in consolidation, of management fees from BDC following their consolidation in May 2008.

Income taxes. Our effective tax rate was 42% for 2007 and 43% for 2008. Income tax expense includes tax at the statutory U.S. federal and state income tax rates as well as the Guyanese income taxes in excess of the statutory U.S. income tax rates. Since we operate in jurisdictions that have a wide range of statutory tax rates, our consolidated effective tax rate is impacted by the mix of income generated in those jurisdictions as well as the receipt of dividends from our foreign subsidiaries.

Equity in earnings of unconsolidated affiliates. Equity in earnings of unconsolidated affiliates included our share of the earnings of BDC prior to our consolidation of BDC's operating results in May 2008, as well as our share of the earnings of Commnet's unconsolidated affiliates. Equity in earnings of unconsolidated affiliates decreased \$1.6 million, or 70% from \$2.3 million for 2007 to \$0.7 million for 2008 as a result of the consolidation of BDC.

Net income attributable to non-controlling interests. Net income attributable to non-controlling interests consists of the Guyana government's 20% interest in GT&T, a minority shareholder's 4% interest in Sovernet, minority shareholders' 42% equity interest in BDC, subsequent to our consolidation of BDC in May 2008, and other minority shareholders' interests in certain consolidated subsidiaries of Commnet and Sovernet. Net income attributable to non-controlling interests remained unchanged at \$5.0 million for 2007 and 2008, respectively.

Net income attributable to Atlantic Tele-Network, Inc. stockholders. As a result of the above factors, net income decreased by \$3.1 million or 8% from \$37.9 million for 2007 to \$34.8 million for 2008. On a per share basis, net income decreased from \$2.50 per basic and \$2.48 per diluted share for 2007 to \$2.29 per basic and \$2.28 per diluted share for 2008.

Regulatory and Tax Issues

We are involved in a number of regulatory and tax proceedings. See Note 13 to the Consolidated Financial Statements included in this Report. A material and adverse outcome in one or more of these proceedings could have a material adverse impact on our financial condition and future operations.

Liquidity and Capital Resources

Historically, we have met our operational liquidity needs through a combination of cash on hand and internally generated funds and have funded capital expenditures and acquisitions with a combination of internally generated funds, cash on hand and borrowings under our credit facilities.

We expect to fund the pending acquisition of Alltel assets by using \$40 million to \$50 million of our currently available cash, drawing \$150 million from our new term loan (see, *Cash Generated by Financing Activities*, below) and by funding the remaining balance by borrowing against our new revolving line of credit (see, *Cash Generated by Financing Activities*, below).

Uses of Cash

Capital Expenditures. A significant use of our cash has been for capital expenditures to expand and upgrade our networks. For the years ended December 31, 2008 and 2009, we spent approximately \$47.4 million and \$59.7 million on capital expenditures, respectively. Of the \$59.7 million of 2009 capital expenditures, we spent approximately \$23.4 million expanding Commnet's network by increasing the number of base stations as well as switching and cell site equipment required to expand our geographic coverage and technical capabilities. Of the \$25.0 million spent in Guyana, \$13.4 million was related to construction costs on a new fiber optic submarine cable into the country which is expected to be ready for use during mid-2010, while the remainder was for the expansion of the capacity and coverage of Guyana's wireline and wireless network. A majority of the remaining 2009 consolidated capital expenditures was incurred by our Island Wireless segment in connection with our network development in Turks and Caicos, which is scheduled to be operational during the first half of 2010.

We are continuing to invest in expanding the networks of most of our currently existing subsidiaries and expect to incur capital expenditures between \$45 million and \$55 million for this expansion during the year ending December 31, 2010. A majority of these network expenditures will be used at Commnet and GT&T, including \$8 million to \$10 million relating to the construction of the submarine fiber optic cable in Guyana. Separately, if the pending acquisition of the Alltel assets is completed during the first half of 2010, we expect to incur an additional \$40 million to \$45 million of capital expenditures primarily related to network migration and IT and system conversion costs. We expect to fund our current capital expenditures primarily from cash generated from our operations, but may borrow against our new line of credit or seek additional debt financing outside our bank credit facility.

Acquisitions and Investments. Historically, we have funded our acquisitions with a combination of cash on hand and borrowings under our credit facilities. We intend to fund our pending acquisition of Alltel assets by using \$40 million to \$50 million of our currently available cash, drawing \$150 million from our new term loan (see, *Cash Generated by Financing Activities*, below) and by funding the remaining balance by borrowing against our new line of credit (see, *Cash Generated by Financing Activities*, below).

We also continue to explore opportunities to acquire communications properties or licenses in the Caribbean, the United States and elsewhere. We also explore opportunities to substantially expand our existing networks in the United States and the Caribbean. Such acquisitions may require external financing. While there can be no assurance as to whether, when or on what terms we will be able to acquire any such businesses or licenses, such acquisitions may be accomplished through the issuance of shares of our Common Stock, payment of cash or incurrence of additional debt.

Dividends. We use cash on hand to make dividend payments to our common stockholders when declared by our Board of Directors. For the year ended December 31, 2009, our dividends to our stockholders approximated \$11.6 million (which reflects dividends paid on April 10, 2009, July 10, 2009, October 15, 2009, and January 11, 2010). We have paid quarterly dividends for the last 45 fiscal quarters.

Stock Repurchase Plan. Our Board of Directors approved a \$5.0 million stock buyback plan in September 2004 pursuant to which we have spent \$2.1 million as of December 31, 2009 repurchasing common stock. We may repurchase shares at any time depending on market conditions, our available cash and our cash needs. We did not repurchase any shares under this plan during 2009.

Cash Generated by Financing Activities. On January 25, 2010, the Company amended and restated its existing credit facility with CoBank, ACB and other lenders to restate its existing \$73.9 million term loan ("Term Loan A") and previously undrawn \$75 million revolving credit facility (the "Revolver Facility") and provide for a new \$150 million term loan ("Term Loan B" and together with the Term

Loan A and Revolver Facility, the “New Credit Facility”). The New Credit Facility also provides for one or more additional term loans up to an aggregate \$50.0 million, subject to lender and administrative agent approval.

The Term Loan A and the Term Loan B each mature on September 30, 2014 and the Revolver Loan matures on September 10, 2014, unless accelerated pursuant to an event of default, as described below. Amounts borrowed under the Term Loan A, Term Loan B and the Revolver Loan bear interest at a rate equal to, at the Company’s option, either (i) the London Interbank Offered Rate (LIBOR) plus an applicable margin ranging between 3.50% to 4.75% or (ii) a base rate plus an applicable margin ranging from 2.50% to 3.75%. The Company is not required to apply a minimum LIBOR percentage for any loans bearing interest at the LIBOR rate. The base rate is equal to the higher of either (i) 1.50% plus the higher of (x) the one-week LIBOR and (y) the one-month LIBOR and (ii) the prime rate (as defined in the credit agreement). The applicable margin is determined based on the ratio of the Company’s indebtedness (as defined in the credit agreement) to its EBITDA (as defined in the credit agreement).

All amounts outstanding under the Revolver Loan will be due and payable upon the earlier of the maturity date or the acceleration of the loan upon an event of default. Amounts outstanding under the Term Loan A and the Term Loan B will be due and payable commencing on March 31, 2010 in quarterly payments equal to 1.25% of the initial principal amount outstanding under each loan, increasing to 2.50% of the initial principal amount outstanding commencing on March 31, 2012. Remaining balances will be due and payable upon maturity, unless the loans are accelerated upon an event of default.

Upon the closing of the New Credit Facility, \$73.9 million was outstanding under the Term Loan A, an amount equal to the outstanding principal amount of the Company’s previous term loan under the Company’s prior credit facility. No amount is currently outstanding under Term Loan B or the Revolver Facility. The Company plans to use cash on hand, the proceeds from Term Loan B and a portion of the proceeds available under the Revolver Facility towards the Alltel Acquisition purchase price and related acquisition expenses and working capital adjustments. The Company’s ability to draw under the Term Loan B is subject to customary closing conditions. We may use the proceeds of the Term Loan B solely in connection with the Alltel Acquisition. Borrowings under the Term Loan B are available to the Company until the earlier of (i) completion of the Alltel Acquisition or (ii) March 31, 2010 (the “Term Loan B Commitment Expiration Date”). We intend to request an extension to the Term Loan B Commitment Expiration Date during the first quarter of 2010.

The New Credit Facility contains certain affirmative and negative covenants of the Company and its subsidiaries as set forth below under “—Factors Affecting Sources of Liquidity.” The New Credit Facility is guaranteed by the Company’s U.S. domestic subsidiaries and is collateralized by a security interest in substantially all of the assets of and stock owned by the Company and such guarantors. As of March 16, 2010, the Company was in compliance with all of the covenants of the New Credit Facility.

On September 23, 2008 the Company executed a forward starting interest rate swap. The Company’s objective in using the derivative is to add stability to interest expense and to manage our exposure to adverse changes in interest rates. The interest rate swap has an initial notional amount of \$68 million, receives 1 month LIBOR, and pays a fixed rate of 4.42%. The interest rate swap agreement effectively converts the variable interest payments on the first \$68 million of the Company’s term debt to a fixed rate of 4.42% plus the Company’s credit spread, over the life of the agreement. The interest rate swap agreement has a maturity date of September 15, 2015.

Debt Service and Other Contractual Commitment Table. The following table discloses aggregate information about our debt and lease obligations as of December 31, 2009 and the periods in which payments are due:

<u>Contractual Obligations</u>	<u>Total</u>	<u>Less Than 1 Year</u>	<u>1-3 Years</u>	<u>4-5 Years</u>	<u>More Than 5 Years</u>
			(In millions)		
Debt	\$ 73.9	\$ 3.7	\$18.5	\$51.7	\$ —
Capital expenditures	5.0	5.0	—	—	—
Pension obligations	0.8	0.8	—	—	—
Operating lease obligations	32.3	9.8	16.2	1.8	4.5
Total	<u>\$112.0</u>	<u>\$19.3</u>	<u>\$34.7</u>	<u>\$53.5</u>	<u>\$4.5</u>

Sources of Cash

Total Liquidity at December 31, 2009. As of December 31, 2009, we had approximately \$90.2 million in cash and cash equivalents, an increase of \$10.5 million from the December 31, 2008 balance of \$79.7 million. In addition, the Company has \$5.2 million in restricted cash escrowed for payment on the undersea cable in Guyana. We believe our existing cash balances and other capital resources, including the \$75.0 million available under our revolving line of credit included in our credit facility, are adequate to meet our current operating and capital needs.

Cash Generated by Operations. Cash provided by operating activities was \$92.2 million for the year ended December 31, 2009 compared to \$68.3 million for the year ended December 31, 2008. The increase of \$23.9 million was primarily due to a decrease in prepaid taxes and an increase in accounts payable and accrued expenses.

Factors Affecting Sources of Liquidity

Internally Generated Funds. The key factors affecting our internally generated funds are demand for our services, competition, regulatory developments, economic conditions in the markets where we operate our businesses and industry trends within the telecommunications industry. For a discussion of tax and regulatory risks in Guyana that could have a material adverse impact on our liquidity, see “Risk Factors—Risks Relating to Our Wireless and Wireline Services in Guyana”, “Business—Regulation of Our GT&T Subsidiary”.

Restrictions Under Credit Facility. Our credit facility contains customary representations, warranties and covenants, including covenants by us limiting additional indebtedness, liens, guaranties, mergers and consolidations, substantial asset sales, investments and loans, sale and leasebacks, transactions with affiliates and fundamental changes. In addition, our credit facility contains financial covenants by us that (i) impose a maximum ratio of indebtedness (as defined in the credit agreement) to EBITDA (as defined in the credit agreement), (ii) require a minimum ratio of EBITDA to cash interest expense, (iii) require a minimum ratio of equity to consolidated assets and (iv) require a minimum ratio of EBITDA to fixed charges (as defined in the credit agreement). As of March 16, 2010, we were in compliance with all of the covenants of our credit facility and would be able to fully draw the \$75 million available under our revolving credit facility. We may use the proceeds of the Term Loan B solely in connection with the Alltel Acquisition. Borrowings under the Term Loan B are available to the Company until the earlier of (i) completion of the Alltel Acquisition or (ii) March 31, 2010 (the “Term Loan B Commitment Expiration Date”). We intend to request an extension to the Term Loan B Commitment Expiration Date during the first quarter of 2010.

Our ability to draw additional term loans of up to an aggregate of \$50 million is subject to Lender and Administrative Agent approval.

Capital Markets. Our ability to raise funds in the capital markets depends on, among other things, general economic conditions, the conditions of the telecommunications industry, our financial performance, the state of the capital markets and our compliance with Securities and Exchange Commission (“SEC”) requirements for the offering of securities. In June 2009, the Company’s “universal” shelf registration statement filed with the SEC expired by its own terms. The Company currently anticipates that it will file with the SEC a new “universal” shelf registration in the first half of 2010, subject to closing of the Alltel Acquisition and completion of the required audited financial statements in connection therewith. If declared effective by the SEC, such filing will register potential future offerings by the Company, of the Company’s securities.

Inflation

We do not believe that inflation has had a significant impact on our consolidated operations in any of the periods presented in the Report.

Critical Accounting Estimates

We have based our discussion and analysis of our financial condition and results of operations on our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America (or GAAP). We base our estimates on our operating experience and on various conditions existing in the market and we believe them to be reasonable under the circumstances. Our estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ materially from these estimates under different assumptions or conditions.

We have identified the critical accounting estimates that we believe require significant judgment in the preparation of our consolidated financial statements. We consider these accounting estimates to be critical because changes in the assumptions or estimates we have selected have the potential of materially impacting our financial statements.

Revenue Recognition. In determining the appropriate amount of revenue to recognize for a particular transaction, we apply the criteria established by the authoritative guidance for revenue recognition and defer those items that do not meet the recognition criteria. As a result of the cutoff times of our billing cycles, we are often required to estimate the amount of revenues earned but not billed from the end of each billing cycle to the end of each reporting period. These estimates are based primarily on rate plans in effect and historical evidence with each customer or carrier. Adjustments affecting revenue can and occasionally do occur in periods subsequent to the period when the services were provided, billed and recorded as revenue, however historically these adjustments have not been material.

A small portion of our revenue is attributable to activation or reactivation fees, installation fees and equipment sales. We evaluate these and, where the amounts charged for such services or the equipment does not represent a separate unit of accounting, these amounts are deferred and recognized ratably over the estimated customer relationship period.

We apply judgment when assessing the ultimate realization of receivables, including assessing the probability of collection and the current credit-worthiness of customers. We establish an allowance for doubtful accounts sufficient to cover probable and reasonably estimable losses. Our estimate of the allowance for doubtful accounts considers collection experience, aging of the accounts receivable, the credit quality of customer and, where necessary, other macro-economic factors.

Long-Lived and Intangible Assets. In accordance with the authoritative guidance regarding the accounting for impairments or disposals of long-lived assets and the authoritative guidance for the accounting for goodwill and other intangible assets, we evaluate the carrying value of our long-lived

assets, including property and equipment, whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss exists when estimated undiscounted cash flows attributable to the assets are less than their carrying amount. If an asset is deemed to be impaired, the amount of the impairment loss recognized represents the excess of the asset's carrying value as compared to its estimated fair value, based on management's assumptions and projections. During the fourth quarter of 2007, the Company determined that certain assets of Choice Communications became impaired, and as such, recorded a \$4.4 million impairment charge in its 2007 statement of operations. See Note 10 to the Consolidated Financial Statements included in this report for additional information on the impairment charge.

Our estimates of the future cash flows attributable to our long-lived assets and the fair value of our businesses involve significant uncertainty. Those estimates are based on management's assumptions of future results, growth trends and industry conditions. If those estimates are not met, we could have additional impairment charges in the future, and the amounts may be material.

We also assess the carrying value of goodwill and indefinite-lived intangible assets on an annual or whenever events or changes in circumstances indicate that the carrying value of goodwill may not be recoverable. The carrying value of each reporting unit, including goodwill assigned to that reporting unit, is compared to its fair value. If the fair value of the reporting unit does not exceed the carrying value of the reporting unit, including goodwill, an analysis is performed to determine if an impairment charge should be recorded.

We assess the recoverability of the value of our FCC licenses using a market approach. We believe that our FCC licenses have an indefinite life based on historical ability to renew such licenses, that such renewals may be obtained indefinitely and at little cost, and that the related technology used is not expected to be replaced in the foreseeable future. If the value of these assets was impaired by some factor, such as an adverse change in the subsidiary's operating market, we may be required to record an impairment charge. We test the impairment of our FCC licenses annually or whenever events or changes in circumstances indicate that such assets might be impaired. The impairment test consists of a comparison of the fair value of FCC licenses with their carrying amount on a license by license basis.

Contingencies. We are subject to proceedings, lawsuits, audits and other claims related to lawsuits and other legal and regulatory proceedings that arise in the ordinary course of business. We are required to assess the likelihood of any adverse judgments or outcomes to these matters as well as potential ranges of probable losses. A determination of the amount of loss accruals required, if any, for these contingencies are made after careful analysis of each individual issue. We consult with legal counsel and other experts where necessary in connection with our assessment of any contingencies. The required accrual for any such contingency may change materially in the future due to new developments or changes in each matter. We estimate these contingencies amount to approximately \$23.5 million at December 31, 2009, the majority of which are not recorded on our books as we do not believe that an adverse outcome is probable. Adverse developments in these matters may result in the recording of liabilities to satisfy all or a portion of these claims.

Recent Accounting Pronouncements

Recently Adopted Standards

In June 2009, the FASB issued guidance which changed the referencing of financial standards and the Hierarchy of Generally Accepted Accounting Principles and is effective for interim or annual financial periods ending after September 15, 2009. The Company adopted the provisions of the new guidance in the third quarter of 2009 and updated its interim disclosures.

In April 2009, the FASB issued new authoritative guidance that requires the recognition of an other-than-temporary impairment when an entity has the intent to sell a debt security or when it is

more likely than not that an entity will be required to sell the debt security before its anticipated recovery in value. Additionally, the new guidance changes the presentation and amount of other-than-temporary impairment losses recognized in the income statement for instances in which the Company does not intend to sell or it is more likely than not that the Company will not be required to sell a debt security prior to the anticipated recovery of its remaining cost basis. In addition to the changes in measurement and presentation, the new guidance expands the disclosures related to other-than-temporary impairments and require all such disclosures to be included in both interim and annual periods. The provisions of the new guidance were effective for the three month period ended June, 30, 2009. The adoption of the provisions of this guidance did not have a material impact on the Company's consolidated financial statements.

In April 2009, the FASB issued new authoritative guidance for determining when a transaction is not orderly and for estimating fair value in accordance with FASB standards when there has been a significant decrease in the volume and level of activity for an asset or liability. The guidance requires the disclosure of the inputs and valuation techniques used, as well as any changes in valuation techniques and inputs used during the period, to measure fair value in interim and annual periods. In addition, the new guidance requires that the presentation of the fair value hierarchy be presented by major security type in accordance with FASB guidance. The adoption of the provisions of this guidance did not have a material impact on the Company's consolidated financial statements.

In December 2007, the FASB issued new authoritative guidance that requires the Company to revise its application of the acquisition method for business combinations in a number of significant aspects such as requiring the Company to expense transaction costs and to recognize 100% of the acquiree's assets and liabilities rather than a proportional share for acquisitions of less than 100% of a business. In addition, the guidance eliminates the step acquisition model and provides that all business combinations, whether full, partial, or step acquisitions, results in all assets and liabilities of an acquired business being recorded at their fair values at the acquisition date. The Company adopted the provisions of this guidance on January 1, 2009. The impact of the provisions of this guidance on the Company's financial statements will be dependent upon the number of and magnitude of the acquisitions that are consummated. We expensed \$7.2 million in acquisition-related costs in 2009.

In April 2009, the FASB issued new authoritative guidance which amends the initial and subsequent measurement guidance and disclosure requirements for assets and liabilities arising from contingencies in a business combination. The provisions of this guidance are effective on a prospective basis for all business combinations for which the acquisition date is on or after January 1, 2009.

In January 2009, the FASB issued new authoritative guidance that requires disclosures about the fair value of financial instruments in interim financial statements as well as in annual financial statements. Additionally, this guidance requires those disclosures in all interim financial statements. The Company adopted the provisions of this guidance, as required, for the period ended June 30, 2009. The adoption of the provisions of this guidance did not have a material impact on the Company's consolidated financial statements.

In December 2008, the FASB issued new authoritative guidance that provides additional guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The adoption of the provisions of this guidance increases the disclosures in the financial statements related to the assets of an employers' defined benefit pension plan. This new guidance was effective as of December 31, 2009 and did not have a material impact on the consolidated financial statements.

Standards to be Adopted

In June 2009, the FASB issued new authoritative guidance that amends certain guidance for determining whether an entity is a variable interest entity (VIE). The guidance requires an enterprise to perform an analysis to determine whether the Company's variable interests give it a controlling financial interest in a VIE. A company would be required to assess whether it has an implicit financial responsibility to ensure that a VIE operates as designed when determining whether it has the power to direct the activities of the VIE that most significantly impact the entity's economic performance. In addition, this guidance amends earlier guidance requiring ongoing reassessments of whether an enterprise is the primary beneficiary of a VIE. The guidance is effective for the Company for fiscal year 2010. The Company does not anticipate that the adoption of the provisions of this guidance will have a material impact on the consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Sensitivity. GT&T's functional currency is the U.S. dollar because a significant portion of GT&T's revenues and expenditures are transacted in U.S. dollars. The results of future operations nevertheless may be affected by changes in the value of the Guyana dollar, however the Guyanese exchange rate has remained at approximately \$205 Guyana dollars to \$1 U.S. dollar since 2004 so we have not recorded any foreign exchange gains or losses since that date. All of our other foreign subsidiaries operate in jurisdictions where the US dollar is the recognized currency.

Interest Rate Sensitivity. Our exposure to changes in interest rates is limited and relates primarily to our variable interest rate long-term debt. As of December 31, 2009, \$68.0 million of our long term debt has a fixed rate by way of an interest-rate swap that effectively hedges our interest rate risk. The remaining \$5.9 million of long term debt as of December 31, 2009, is subject to interest rate risk. As a result of our hedging policy we believe our exposure to fluctuations in interest rates is not material.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The response to this item is submitted as a separate section to this report. See "Item 15. Exhibits, Financial Statement Schedules."

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as of December 31, 2009. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their

objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of December 31, 2009, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Exchange Act as a process designed by, or under the supervision of, the Company's Chief Executive Officer and Chief Financial Officer or persons performing similar functions and effected by the Company's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2009. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in *Internal Control—Integrated Framework*.

Based on its assessment, management concluded that, as of December 31, 2009, our internal control over financial reporting was effective based on those criteria.

Our internal control over financial reporting as of December 31, 2009 have been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their attestation report which appears on page F-2.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our fourth fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Executive Officers

Our executive officers and their respective ages and positions as of March 16, 2010, as well as a brief description of the recent business experience of each, are set forth below:

<u>Name</u>	<u>Age</u>	<u>Position</u>
Michael T. Prior	45	President and Chief Executive Officer
Justin D. Benincasa	48	Chief Financial Officer and Treasurer
William F. Kreisher	47	Senior Vice President, Corporate Development
Douglas J. Minster	49	Vice President, General Counsel and Secretary
John P. Audet	52	Vice President, Financial Analysis and Planning
Andrew S. Fienberg	42	Chief Accounting Officer

Michael T. Prior is our President and Chief Executive Officer and a member of the Board of Directors. Mr. Prior joined us in 2003 as our Chief Financial Officer and Treasurer and was appointed President and Chief Executive Officer in December 2005. Before joining us, Mr. Prior was a partner with Q Advisors LLC, a Denver-based investment banking and financial advisory firm focused on the telecommunications sector. From 1999 to 2002, he headed corporate development for LighTrade, Inc., a telecommunications infrastructure provider. From 1998 to 1999, Mr. Prior was a member of ComSpace Development LLC, a seed investment concern in the communications industry and an early investor in LighTrade. From 1992 to 1998, Mr. Prior was a corporate lawyer with Cleary Gottlieb Steen & Hamilton in London and New York and Perkins Coie LLP in Seattle. Mr. Prior received a B.A. degree from Vassar College and a J.D. degree *summa cum laude* from Brooklyn Law School. He is the son of Cornelius B. Prior, Jr., Chairman of our Board. In 2008, Mr. Prior was named Entrepreneur of the Year for the New England Region by Ernst & Young.

Justin D. Benincasa is our Chief Financial Officer and Treasurer. Prior to joining us in May 2006, Mr. Benincasa was a Principal at Windover Development, LLC since 2004. From 1998 to 2004, he was Executive Vice President of Finance and Administration at American Tower Corporation, a leading wireless and broadcast communications infrastructure company, where he managed finance and accounting, treasury, IT, tax, lease administration and property management. Prior to that, he was Vice President and Corporate Controller at American Radio Systems Corporation and held accounting and finance positions at American Cablesystems Corporation. Mr. Benincasa holds an M.B.A. degree from Bentley College and a B.A. degree from the University of Massachusetts.

William F. Kreisher joined the company in 2007 as Senior Vice President, Corporate Development. Prior to joining ATN, Mr. Kreisher was Vice President—Corporate Development at Cingular Wireless (now AT&T Mobility) since 2004. He was part of the corporate development team at Cingular since its formation and spent five years at Bell South before that as a Director of Finance, the acting Chief Financial Officer at its broadband and video division, and as a senior manager in its mergers and acquisitions group. Mr. Kreisher is a twenty-year veteran of the telecommunications industry, having also worked with MCI Telecommunications and Equant. Mr. Kreisher holds a Masters in Business Administration from Fordham University and a Bachelor of Arts degree from the Catholic University of America.

Douglas J. Minster joined us in 2003 as our Vice President, General Counsel and Secretary. From November 1999 to February 2002, Mr. Minster served as Vice President, External Affairs, at LighTrade, Inc. From 1997 to 1998, he headed corporate development at IP Radio, Inc., a wireless broadband service. From 1990 to 1992, he served as a senior legal advisor at Time Warner

Telecommunications. In addition, Mr. Minster co-founded Digital Satellite Broadcasting Corp., a satellite radio company, helping to develop the regulatory foundation for the satellite radio service. Mr. Minster began his career as an attorney at the FCC, later joining the former Chairman of the FCC at Patrick Communications as an advisor on domestic and international regulatory and legal issues. He received a B.S. degree from Ithaca College and a J.D. degree from The Catholic University of America, Columbus School of Law.

John P. Audet joined the Company in 2006 as Vice President—Financial Analysis and Planning, after serving as a consultant and advisor to the Company for three years. Prior to his relationship with ATN, he held executive finance positions with a number of start-up telecommunications companies. Mr. Audet was also a Senior Consultant with BIA Financial Network, Inc, a financial and appraisal consultancy to the media and telecommunications industry where he participated in formal appraisals of businesses and assets worth in excess of over \$2 billion. Early in his career, Mr. Audet was a principal in a specialized engineering consultancy that designed and built over two dozen of the first cellular radio systems in the United States. He is a *summa cum laude* graduate of the University of Maryland, University College with a B.S. in Finance & Technology & Management.

Andrew S. Fienberg joined us in May 2005 as our Chief Accounting Officer. From 2003 to 2005, Mr. Fienberg served as a Divisional Controller for Pegasus Satellite Television, Inc., a re-seller of DirecTV services throughout the rural United States. From August 1999 to December 2003, Mr. Fienberg was the Corporate Controller at iBasis, Inc., a publicly-traded international VoIP telecommunications service provider. Prior to iBasis, Mr. Fienberg was with Iron Mountain Incorporated, a data storage provider, which he joined in May 1997. Before that, he served as an auditor at BDO Seidman, LLP in Boston beginning in September 1989. Mr. Fienberg received a B.S. degree in Accountancy from Bentley College and is a Certified Public Accountant.

Additional information required by this Item regarding our directors and executive officers will be set forth in our Definitive Proxy Statement for the Annual Meeting of Stockholders to be held on June 16, 2010 (or 2010 Proxy Statement) under “Election of Directors” and “Section 16(a) Beneficial Ownership Reporting Compliance” and is incorporated herein by reference. Required information regarding our audit committee financial experts and identification of the audit committee of our Board of Directors will be set forth in our 2010 Proxy Statement under “Corporate Governance” and is incorporated herein by reference.

Information regarding our Code of Ethics applicable to our principal executive officer, our principal financial officer, our controller and other senior financial officers appears in Item 1 of this Report under the caption “Business—Available Information.”

ITEM 11. EXECUTIVE COMPENSATION

Information required by this Item regarding executive compensation will be set forth in our 2010 Proxy Statement under “Executive Officer and Director Compensation” and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information required by this Item regarding security ownership of certain beneficial owners, directors and executive officers will be set forth in our 2010 Proxy Statement under “Security Ownership of Certain Beneficial Owners and Management” and is incorporated herein by reference.

Information required by this Item regarding our equity compensation plans will be set forth in our 2010 Proxy Statement under “Executive Officer Compensation—Securities Authorized for Issuance Under Equity Compensation Plans” and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information required by this Item regarding certain relationships and related transactions will be set forth in our 2010 Proxy Statement under “Related Person Transactions” and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

Information required by this Item regarding auditor fees and services will be set forth in our 2010 Proxy Statement under “Independent Registered Public Accounting Firm” and is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(a) The following documents are filed as part of this Report:

(1) *Financial Statements*. See Index to Consolidated Financial Statements, which appears on page F-1 hereof. The financial statements listed in the accompanying Index to Consolidated Financial Statements are filed herewith in response to this Item.

(2) *Schedule II*. Valuation and Qualifying Accounts.

(3) *Exhibits*. See Index to Exhibits. The exhibits listed in the Index to Exhibits immediately preceding the exhibits are filed herewith in response to this Item.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of
Atlantic Tele-Network, Inc.:

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Atlantic Tele-Network, Inc. and its subsidiaries at December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2009 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 1 to the consolidated financial statements, in 2009 the Company changed the manner in which it accounts for non-controlling interests and, as discussed in Note 2, the manner in which it accounts for business combinations.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. ORGANIZATION AND BUSINESS OPERATIONS

Atlantic Tele-Network, Inc. (“ATN” or “Company”) provides wireless and wireline telecommunication services in North America and the Caribbean through the following operating subsidiaries:

- Commnet Wireless, LLC (“Commnet”), an owner and operator of wholesale wireless networks in rural areas of the United States. Commnet provides wireless voice and data communications roaming services principally to national, regional and local wireless carriers. Commnet generated approximately 31%, 34% and 43% of the Company’s consolidated revenues for 2007, 2008 and 2009, respectively. ATN acquired a 95% equity interest in Commnet in 2005 and acquired the remaining 5% equity interest in January 2007.
- Guyana Telephone & Telegraph Company, Ltd. (“GT&T”), the national and international telephone company in the Republic of Guyana and the largest wireless service provider in that country. The Company has owned 80% of the stock of GT&T since January 1991. GT&T generated approximately 57%, 47% and 38% of the Company’s consolidated revenues for 2007, 2008 and 2009, respectively.
- Bermuda Digital Communications, Ltd. (“BDC”), a leading wireless voice and data communications service provider in Bermuda, doing business under the name “Cellular One”. The Company acquired an equity interest in, and signed a management contract with, BDC in 1998. On May 15, 2008, BDC completed a share repurchase of its common stock. ATN did not tender any shares for repurchase, and, as a result of the transaction, increased its holdings from approximately 43% to approximately 58% of BDC’s outstanding common stock. Prior to this increase in holdings, the Company accounted for its investment in BDC under the equity method and earnings from BDC did not appear in its income from operations, but were instead reflected in equity in earnings of unconsolidated affiliates. Effective with the completion of that share repurchase, the Company began consolidating BDC’s balance sheet and results of operations. In September 2008, BDC began providing wireless services in Turks and Caicos through Islandcom Telecommunications, Ltd.
- Sovernet, Inc. (“Sovernet”), a facilities-based integrated voice, broadband data communications and dial-up service provider in New England and New York State. Sovernet’s retail telecommunications service is delivered to business and residential customers in Vermont and New Hampshire. Through an acquisition made in 2008, Sovernet also delivers wholesale transport services in New York State through its majority-owned subsidiary, ION. Sovernet currently holds 75% of the equity interest in ION.
- Choice Communications, LLC (“Choice”), a leading provider of fixed and portable wireless broadband data and dial-up internet services to retail and business customers in the U.S. Virgin Islands. Choice was acquired by ATN in 1999 and is a wholly owned subsidiary of the Company. Choice discontinued its wireless television service on May 31, 2009 to focus mainly on providing wireless broadband data services.

ATN provides management, technical, financial, regulatory, and marketing services to its subsidiaries and typically receives a management fee equal to approximately 3% to 6% of their respective revenues. Management fees from consolidated subsidiaries are eliminated in consolidation. ATN received management fees from unconsolidated affiliates in 2007 and 2008, which are included in “Other Income” in the accompanying income statements.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The consolidated financial statements include the accounts of the Company, its majority-owned subsidiaries and certain entities, which are consolidated in accordance with the provisions of Financial Accounting Standards Board ("FASB") authoritative guidance on the consolidation of variable interest entities since it is determined that the Company is the primary beneficiary of these entities. Revenue from these entities constitutes less than 1% of total Company revenue.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenues and expenses during the reporting periods. The most significant estimates relate to allowance for doubtful accounts, useful lives of the Company's fixed and finite-lived intangible assets, allocation of purchase price to assets acquired and liabilities assumed in purchase business combinations, fair value of indefinite-lived intangible assets, goodwill and income taxes. Actual results could differ significantly from those estimates.

Cash and Cash Equivalents

The Company considers all investments with an original maturity of three months or less at date of purchase to be cash equivalents. The Company places its cash and temporary investments with banks and other institutions that it believes have a high credit quality. At December 31, 2009, the Company had deposits with banks in excess of FDIC insured limits and \$13.1 million of its cash is on deposit with non-insured institutions such as corporate money market issuers. Except for \$5.2 million of cash that is restricted for the purpose of acquiring certain equipment, the Company's cash and cash equivalents are not subject to any restrictions. As of December 31, 2008 and 2009, the Company held \$14.9 million and \$5.3 million of its cash in Guyana dollars. While there are risks associated with the conversion of Guyana dollars to U.S. dollars due to limited liquidity in the Guyana foreign currency markets, it has not prevented the Company from converting Guyana dollars into U.S. dollars within a given three month period or from converting at a price that reasonably approximates the reported exchange rate.

Short-Term Investments

The Company classifies short term investments as available-for-sale in accordance with the authoritative guidance for the accounting for certain investments in debt and equity securities. These securities are carried at fair market value, with unrealized gains and losses reported as a component of other comprehensive income (loss) in stockholders' equity. Gains or losses on securities sold are based on the specific identification method. Short term investments at December 31, 2008 consisted of certificates of deposit held in U.S. dollars by GT&T that had an original maturity date greater than three months. There were no gains or losses, realized or unrealized, with respect to short term investments in any year presented.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Materials and Supplies

Materials and supplies primarily include handsets, customer premise equipment, cables, and poles and are carried at weighted-average cost.

Fixed Assets

The Company's fixed assets are recorded at cost and depreciated using the straight-line method generally between 3 and 39 years. Repairs and replacements of minor items of property are charged to maintenance expense as incurred. The cost of fixed assets in service and under construction includes an allocation of indirect costs applicable to construction.

The fair value of a liability for an asset retirement obligation is recorded in the period in which it is incurred if a reasonable estimate of fair value can be made. In periods subsequent to initial measurement, period-to-period changes in the liability for an asset retirement obligation resulting from the passage of time and revisions to either the timing or the amount of the original estimate of undiscounted cash flows are recognized. The increase in the carrying value of the associated long-lived asset is depreciated over the corresponding estimated economic life. The consolidated balance sheets include accruals of \$1.1 million and \$1.6 million as of December 31, 2008 and 2009, respectively, for estimated costs associated with asset retirement obligations.

In accordance with the authoritative guidance for the accounting for the impairment or disposal of long-lived assets", the Company evaluates the carrying value of long-lived assets, including property and equipment, in relation to the operating performance and future undiscounted cash flows of the underlying business whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. An impairment loss exists when estimated undiscounted cash flows attributable to an asset are less than its carrying amount. If an asset is deemed to be impaired, the amount of the impairment loss recognized represents the excess of the asset's carrying value as compared to its estimated fair value, based on management's assumptions and projections.

Management's estimate of the future cash flows attributable to its long-lived assets and the fair value of its businesses involve significant uncertainty. Those estimates are based on management's assumptions of future results, growth trends and industry conditions. If those estimates are not met, the Company could have additional impairment charges in the future, and the amounts may be material.

During 2007, the Company determined that certain assets of Choice Communications became impaired, and as such, recorded a \$4.4 million impairment charge in its 2007 income statement. See Note 10 for additional information on the impairment charge and the sale of such assets during 2009 to the Company's Chairman.

Goodwill and Other Indefinite-Lived Intangible Assets

As a result of acquisitions, the Company has identified intangible assets and generated significant goodwill. Intangible assets are valued based on estimates of future cash flows and amortized over their estimated useful life. Goodwill is subject to annual impairment testing as well as testing upon the occurrence of any event that indicates a potential impairment. Intangible assets and other long-lived assets are subject to an impairment test if there is an indicator of impairment. The carrying value and ultimate realization of these assets is dependent upon estimates of future earnings and benefits that the Company expects to generate from their use. If the Company's expectations of future results and cash

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

flows are significantly diminished, intangible assets and goodwill may be impaired and the resulting charge to operations may be material. When the Company determines that the carrying value of intangibles or other long-lived assets may not be recoverable based upon the existence of one or more indicators of impairment, the Company uses the projected undiscounted cash flow method to determine whether an impairment exists, and then measure the impairment using discounted cash flows. To measure impairment for goodwill, the Company compares the fair value of its reporting units by measuring discounted cash flows to the book value of the reporting units. Goodwill would be impaired if the resulting implied fair value of goodwill was less than the recorded book value of the goodwill.

The estimation of useful lives and expected cash flows requires the Company to make significant judgments regarding future periods that are subject to some factors outside of its control. Changes in these estimates can result in significant revisions to the carrying value of these assets and may result in material charges to the results of operations.

The Company has elected to perform its annual goodwill impairment testing on December 31st of each fiscal year, or more often if events or circumstances indicate that there may be impairment. Reporting units are defined as operating segments. The Company allocates goodwill to reporting units at the time of acquisition and base that allocation on which reporting units will benefit from the acquired assets and liabilities. The estimated fair values of our reporting units were based on discounted cash flow models derived from internal earnings and external market forecasts. Assumptions in estimating future cash flows are subject to a high degree of judgment and complexity. The Company makes every effort to forecast these future cash flows as accurately as possible with the information available at the time the forecast is developed. Goodwill impairment is determined using a two-step process. The first step involves a comparison of the estimated fair value of a reporting unit to its carrying amount, including goodwill. In performing the first step, the Company determines the fair value of a reporting unit using a discounted cash flow (“DCF”) analysis. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, perpetual growth rates, and the amount and timing of expected future cash flows. Discount rates are based on a weighted average cost of capital (“WACC”), which represents the average rate a business must pay its providers of debt and equity. The WACC used to test goodwill is derived from a group of comparable companies. The cash flows employed in the DCF analysis are derived from internal earnings and forecasts and external market forecasts. If the estimated fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is not impaired and the second step of the impairment test is not necessary. If the carrying amount of a reporting unit exceeds its estimated fair value, then the second step of the goodwill impairment test must be performed. The second step of the goodwill impairment test compares the implied fair value of the reporting unit’s goodwill with its carrying amount of goodwill to measure the amount of impairment loss, if any. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination, whereby the estimated fair value of the reporting unit is allocated to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the purchase price paid. If the carrying amount of the reporting unit’s goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess.

The Company assesses the recoverability of telecommunications licenses using the market approach. Management believes that telecommunications licenses have an indefinite life based on historical ability to renew such licenses, that such renewals may be obtained indefinitely and at little

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

cost, and that the related technology used is not expected to be replaced in the foreseeable future. If the value of these assets was impaired by some factor, such as an adverse change in the subsidiary's operating market, the Company may be required to record an impairment charge. The impairment test consists of a comparison of the fair value of telecommunications licenses with their carrying amount on a license by license basis.

The Company performed impairment tests of its goodwill and licenses as of December 31, 2008 and 2009 noting no impairment as of those dates.

See Note 6 for additional information on transactions relating to goodwill and other intangible assets.

Non-Controlling Interests

The non-controlling interests in the accompanying consolidated balance sheets reflect the original investments by the minority stockholders in GT&T, Commnet's consolidated subsidiaries, BDC and its consolidated subsidiary and Sovernet and its consolidated subsidiary, along with their proportional share of the earnings or losses, net of any distributions.

Effective January 1, 2009, the Company adopted new authoritative guidance for non-controlling interests in our consolidated financial statements. The guidance requires that (a) the ownership interest in subsidiaries be clearly identified, labeled and presented in the consolidated statement of financial position within equity, but separate from the parent's equity, (b) the amount of consolidated net income attributable to the parent and to the non-controlling interests be clearly identified and presented on the face of the consolidated income statement, and (c) changes in a parent's ownership interest while the parent retains its controlling financial interest in its subsidiary be accounted for consistently within equity. A parent's ownership interest in a subsidiary changes if the parent purchases additional ownership interest in its subsidiary, the parent sells some of its ownership interest or the subsidiary issues additional ownership interests. Upon adoption of the guidance, previously reported financial statements were revised and we reclassified the previously reported non-controlling interests to a component of shareholders' equity. Previously reported minority interest was renamed net income attributable to the non-controlling interests.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Comprehensive Income

For the three years ending December 31, 2009, comprehensive income included net income for each year and the following other items (in thousands):

	<u>Projected Pension Benefit Obligation</u>	<u>Interest Rate Swap Agreement</u>	<u>Accumulated Other Comprehensive Loss</u>
Balance at December 31, 2006	\$(1,785)	\$ —	\$(1,785)
Adjustment	(848)	—	(848)
Tax effect	<u>398</u>	<u>—</u>	<u>398</u>
Balance at December 31, 2007	(2,235)	—	(2,235)
Adjustment	248	(8,020)	(7,772)
Tax effect	<u>(103)</u>	<u>3,208</u>	<u>3,105</u>
Balance at December 31, 2008	(2,090)	(4,812)	(6,902)
Adjustment	(235)	2,923	2,688
Tax effect	<u>111</u>	<u>(1,169)</u>	<u>(1,058)</u>
Balance at December 31, 2009	<u>\$(2,214)</u>	<u>\$(3,058)</u>	<u>\$(5,272)</u>

Revenue Recognition

Revenue Recognition. In determining the appropriate amount of revenue to recognize for a particular transaction, we apply the criteria established by the authoritative guidance relating to revenue recognition and defer those items that do not meet the recognition criteria. As a result of the cutoff times of our billing cycles, we are often required to estimate the amount of revenues earned but not billed from the end of each billing cycle to the end of each reporting period. These estimates are based primarily on rate plans in effect and historical evidence with each customer or carrier. Adjustments affecting revenue can and occasionally do occur in periods subsequent to the period when the services were provided, billed and recorded as revenue, however historically these adjustments have not been material.

A small portion of our revenue is attributable to activation or reactivation fees, installation fees and equipment sales. We evaluate these transactions, and, where the amounts charged for such services or the equipment does not represent a separate unit of accounting, these amounts are deferred and recognized ratably over the estimated customer relationship period.

We apply judgment when assessing the ultimate realization of receivables, including assessing the probability of collection and the current credit-worthiness of customers. We establish an allowance for doubtful accounts sufficient to cover probable and reasonably estimable losses. Our estimate of the allowance for doubtful accounts considers collection experience, aging of the accounts receivable, the credit quality of customers and, where necessary, other macro-economic factors.

Income Taxes

The Company's provision for income taxes is comprised of a current and deferred portion. The current income tax provision is calculated as the estimated taxes payable or refundable on tax returns

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

for the current year. The deferred income tax provision is calculated for the estimated future tax effects attributable to temporary differences and carryforwards using expected tax rates in effect in the years during which the differences are expected to reverse.

The Company does not provide for United States income taxes on earnings of foreign subsidiaries as such earnings are considered to be indefinitely reinvested.

The Company currently has significant deferred tax assets, resulting from tax credit carryforwards and deductible temporary differences. The Company provides a valuation allowance against a portion of its deferred tax assets. In assessing the realization of deferred tax assets, management weighs the positive and negative evidence to determine if it is more likely than not that some or all of the deferred tax assets will be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income in the appropriate tax jurisdiction. A decrease in the Company's valuation allowance could result in an immediate material income tax benefit, an increase in total assets and stockholder's equity and could have a significant impact on earnings in future periods.

The Company's estimate of the value of its tax reserves contains assumptions based on past experiences and judgments about the interpretation of statutes, rules and regulations by taxing jurisdictions. It is possible that the ultimate resolution of these matters may be greater or less than the amount that the Company estimated. If payment of these amounts proves to be unnecessary, the reversal of the liabilities would result in tax benefits being recognized in the period in which it is determined that the liabilities are no longer necessary. If the estimate of tax liabilities proves to be less than the ultimate assessment, a further charge to expense would result.

The Company evaluated its uncertain tax positions relating to its various tax matters and rulings in Guyana and has reserved the estimated settlement amounts of such matters. As noted in Note 13, due to various arrangements and relationships in place with the government of Guyana, there is no expectation that interest and penalties will be assessed upon reaching final settlement of the matters. There is no expected settlement date and upon settlement, which might not occur in the near future, the payment may vary significantly from the amounts currently recorded. The Company will continue to update amounts recorded as new developments arise.

Credit Concentrations and Significant Customers

The following table indicates the percentage of revenues generated from a single customer that exceeds 10% of the Company's consolidated revenue in any of the past three years:

<u>Customer</u>	<u>2007</u>	<u>2008</u>	<u>2009</u>
AT&T	22%	17%	17%
T-Mobile	6%	9%	11%

No other customer accounted for more than 10% of consolidated revenue in any of the past three years.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The following table indicates the percentage of accounts receivable, net of allowances, from customers that exceeds 10% of the Company's consolidated accounts receivable as of December 31, 2008 and 2009:

<u>Customer</u>	<u>2008</u>	<u>2009</u>
AT&T	19%	26%
T-Mobile	14%	17%

Foreign Currency Gains and Losses

With regard to GT&T operations, for which the U.S. dollar is the functional currency, foreign currency transaction gains and losses are included in determining net income. At each balance sheet date, balances denominated in foreign currencies are adjusted to reflect the current exchange rate. For all three years presented, the value of the Guyana dollar remained constant at approximately G\$205 to one U.S. dollar and so no foreign currency gains or losses have been recorded.

Fair Value of Financial Instruments

The Company's financial instruments at December 31, 2008 and 2009 included cash and cash equivalents, restricted cash, accounts receivable, accounts payable, debt and an interest rate swap agreement. The estimated fair values of all of the Company's financial instruments approximate their carrying values.

The FASB's authoritative guidance on fair value measurements provides a framework for measuring fair value and requires expanded disclosures regarding fair value measurements. Fair value is defined as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The guidance also establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs, where available.

The following tables present information (in thousands) about our monetary assets and liabilities that are measured and recorded at fair value on a recurring basis as of December 31, 2008, and 2009 and indicates the fair value hierarchy of the valuation and recorded techniques we utilized to determine such fair value. In general, fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities. Fair values determined by Level 2 are determined by using observable inputs other than quoted prices in active markets for identical assets and liabilities. Fair values determined by Level 3 inputs are unobservable data points for the asset or liability, and

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

includes situations where there is little, if any, market activity for the asset or liability. As of December 31, 2008 and 2009, the Company did not have any Level 3 assets or liabilities.

Description	December 31, 2008		
	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Total
Certificates of deposit	\$ —	\$5,456	\$ 5,456
Money market funds	19,367	—	19,367
Total assets measured at fair value	<u>\$19,367</u>	<u>\$5,456</u>	<u>\$24,823</u>
Interest rate swap (Note 8)	\$ —	\$8,020	\$ 8,020
Total liabilities measured at fair value	<u>\$ —</u>	<u>\$8,020</u>	<u>\$ 8,020</u>

Description	December 31, 2009		
	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Total
Certificates of deposit	\$ —	\$8,362	\$ 8,362
Money market funds	13,091	—	13,091
Total assets measured at fair value	<u>\$13,091</u>	<u>\$8,362</u>	<u>\$21,453</u>
Interest rate swap (Note 8)	\$ —	\$5,096	\$ 5,096
Total liabilities measured at fair value	<u>\$ —</u>	<u>\$5,906</u>	<u>\$ 5,096</u>

Net Income Per Share

Basic net income per share is computed by dividing net income by the weighted-average number of common shares outstanding during the period and does not include any other potentially dilutive securities. Diluted net income per share gives effect to all potentially dilutive securities using the treasury stock method.

The reconciliation from basic to diluted weighted average common shares outstanding is as follows (in thousands):

	For the Year Ending December 31,		
	2007	2008	2009
Basic weighted average common shares outstanding	15,210	15,215	15,234
Stock options	<u>94</u>	<u>56</u>	<u>103</u>
Diluted weighted average common shares outstanding	<u>15,304</u>	<u>15,271</u>	<u>15,337</u>

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following notes the number of potential common shares not included in the above calculation because the effects of such were anti-dilutive:

	For the Year Ending December 31,		
	2007	2008	2009
Stock options	50	246	75
Total	50	246	75

Stock-Based Compensation

The Company applies the fair value recognition provisions of the authoritative guidance for the accounting for stock based compensation and is expensing the fair value of grants of options to purchase common stock over their vesting period of four years. The Company issued 205,000 options in 2007; 76,500 options in 2008 and 34,500 options during 2009. Relating to grants of options, the Company recognized \$522,000, \$604,000 and \$842,000 of non-cash share based compensation expense during 2007, 2008 and 2009, respectively. See Note 9 for assumptions used to calculate the fair value of the options granted.

The Company has also issued 10,000 restricted shares of common stock in 2007; 31,414 restricted shares of common stock in 2008, and 2,950 restricted shares of common stock during 2009. These shares are being charged to income based upon their fair values over their vesting period of three or four years. Non-cash equity-based compensation expense, related to the vesting of shares issued, was \$364,000 in 2007 and \$373,000 and \$395,000 in 2008 and 2009, respectively.

Recent Accounting Pronouncements

Recently Adopted Standards

In June 2009, the FASB issued guidance which changed the referencing of financial standards and the Hierarchy of Generally Accepted Accounting Principles and is effective for interim or annual financial periods ending after September 15, 2009. The Company adopted the provisions of the new guidance in the third quarter of 2009 and updated its interim disclosures.

In April 2009, the FASB issued new authoritative guidance that requires the recognition of an other-than-temporary impairment when an entity has the intent to sell a debt security or when it is more likely than not that an entity will be required to sell the debt security before its anticipated recovery in value. Additionally, the new guidance changes the presentation and amount of other-than-temporary impairment losses recognized in the income statement for instances in which the Company does not intend to sell or it is more likely than not that the Company will not be required to sell a debt security prior to the anticipated recovery of its remaining cost basis. In addition to the changes in measurement and presentation, the new guidance expands the disclosures related to other-than-temporary impairments and require all such disclosures to be included in both interim and annual periods. The provisions of the new guidance were effective for the three month period ended June, 30, 2009. The adoption of the provisions of this guidance did not have a material impact on the Company's consolidated financial statements.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

In April 2009, the FASB issued new authoritative guidance for determining when a transaction is not orderly and for estimating fair value in accordance with FASB standards when there has been a significant decrease in the volume and level of activity for an asset or liability. The guidance requires the disclosure of the inputs and valuation techniques used, as well as any changes in valuation techniques and inputs used during the period, to measure fair value in interim and annual periods. In addition, the new guidance requires that the presentation of the fair value hierarchy be presented by major security type in accordance with FASB guidance. The adoption of the provisions of this guidance did not have a material impact on the Company's consolidated financial statements.

In December 2007, the FASB issued new authoritative guidance that requires the Company to revise its application of the acquisition method for business combinations in a number of significant aspects such as requiring the Company to expense transaction costs and to recognize 100% of the acquiree's assets and liabilities rather than a proportional share for acquisitions of less than 100% of a business. In addition, the guidance eliminates the step acquisition model and provides that all business combinations, whether full, partial, or step acquisitions, results in all assets and liabilities of an acquired business being recorded at their fair values at the acquisition date. The Company adopted the provisions of this guidance on January 1, 2009. The impact of the provisions of this guidance on the Company's financial statements will be dependent upon the number of and magnitude of the acquisitions that are consummated. During the year ended December 31, 2009, the company expensed \$7.2 million of acquisition-related costs.

In April 2009, the FASB issued new authoritative guidance which amends the initial and subsequent measurement guidance and disclosure requirements for assets and liabilities arising from contingencies in a business combination. The provisions of this guidance are effective on a prospective basis for all business combinations for which the acquisition date is on or after January 1, 2009.

In January 2009, the FASB issued new authoritative guidance that requires disclosures about the fair value of financial instruments in interim financial statements as well as in annual financial statements. Additionally, this guidance requires those disclosures in all interim financial statements. The Company adopted the provisions of this guidance, as required, for the period ended June 30, 2009. The adoption of the provisions of this guidance did not have a material impact on the Company's consolidated financial statements.

Standards to be Adopted

In December 2008, the FASB issued new authoritative guidance that provides additional guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan. The adoption of the provisions of this guidance will increase the disclosures in the financial statements related to the assets of an employers' defined benefit pension plan. This guidance is effective in 2009. The Company does not anticipate that adoption of the provisions of this guidance will have a material impact on the consolidated financial statements.

In June 2009, the FASB issued new authoritative guidance that amends certain guidance for determining whether an entity is a variable interest entity (VIE). The guidance requires an enterprise to perform an analysis to determine whether the Company's variable interests give it a controlling financial interest in a VIE. A company would be required to assess whether it has an implicit financial responsibility to ensure that a VIE operates as designed when determining whether it has the power to direct the activities of the VIE that most significantly impact the entity's economic performance. In

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

addition, this guidance amends earlier guidance requiring ongoing reassessments of whether an enterprise is the primary beneficiary of a VIE. The guidance is effective for the Company for fiscal year 2010. The Company does not anticipate that the adoption of the provisions of this guidance will have a material impact on the consolidated financial statements.

3. ACQUISITIONS

Pending Acquisition of Alltel Assets

On June 9, 2009, the Company entered into a Purchase Agreement (the "Purchase Agreement") with Cellco Partnership d/b/a Verizon Wireless ("Verizon") to acquire wireless assets previously acquired by Verizon in its acquisition of Alltel Corporation in certain, primarily rural, markets in Georgia, North Carolina, South Carolina, Illinois, Ohio and Idaho. Pursuant to the terms of the Purchase Agreement, Verizon will cause certain licenses, network assets, tower and other leases, and other assets and certain related liabilities to be contributed to a newly formed, wholly-owned subsidiary limited liability company, whose membership interests will be acquired by the Company for a purchase price of approximately \$200 million (the "Alltel Acquisition"). Verizon is required to divest these assets under consent decrees it entered into with the U.S. Department of Justice related to its purchase of Alltel Corporation in January 2009.

The parties have agreed to a variety of customary covenants and agreements, including with respect to confidentiality, cooperation (including with respect to regulatory matters), the conduct of the business to be acquired in the ordinary course consistent with past practice and other restrictions on the operation of such business prior to the consummation of the Alltel Acquisition, public announcements and similar matters. Consummation of the Alltel Acquisition is subject to the satisfaction of certain conditions, including, among others, (i) the receipt of the United States Department of Justice's approval of the Alltel Acquisition, (ii) the receipt of all required consents of the Federal Communications Commission to the transfer, assignment or change in control of certain licenses pursuant to the Alltel Acquisition, (iii) the receipt of required consents from state public utility commissions, if any, and (iv) the absence of any injunction or final judgment prohibiting the consummation of the Alltel Acquisition. Consummation of the Alltel Acquisition is not subject to any financing condition.

In conjunction with the Alltel Acquisition, the Company has amended and restated its existing credit facility. See Note 7 for further discussion.

The Company plans to use cash on hand and the a portion of the proceeds from the new credit facility discussed in Note 7 towards the acquisition purchase price, related acquisition expenses and working capital adjustments.

Bermuda Digital Communications, Ltd.

On May 15, 2008, the Company's equity interest in BDC increased from 43% to 58% as a result of BDC's repurchase of \$17.0 million of shares from other shareholders. Prior to this increase in equity interest, the Company accounted for its investment in BDC under the equity method and earnings from BDC did not appear in its income from operations, but were instead reflected in equity in earnings of unconsolidated affiliates. The Company began consolidating BDC's balance sheet and results of

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

3. ACQUISITIONS (Continued)

operations from May 16, 2008, the date that we obtained control of BDC, and includes such results in the Company's Island Wireless segment as reported in Note 15.

The transaction was accounted for using the purchase method and the \$17.0 million of cash consideration was allocated to the Company's increased share of the assets acquired and liabilities assumed at their estimated fair values as of May 15, 2008. Included in the allocation of the purchase price was \$9.4 million of licenses, \$0.9 million attributable to BDC's relationships with its existing customers and trade name as of the date of acquisition and \$6.0 million allocable to other acquired assets and liabilities at fair value. The excess of the purchase price over the amounts allocated to assets acquired and liabilities assumed of \$0.6 million has been recorded as goodwill. The value of the goodwill from this acquisition can be attributed to a number of business factors including, but not limited to, the reputation of BDC as a retail provider of wireless services as well as a network operator, BDC's reputation for customer care, the skills and experience of its management and staff and the strategic position it holds in its marketplace. The customer relationships will be amortized, on an accelerated basis, over the expected period during which their economic benefits are to be realized, which is expected to be ten years. For tax purposes, the goodwill and amortization of the customer relationships will not be deductible.

On September 1, 2008, BDC completed its acquisition of 42% of the equity of Islandcom Telecommunications ("Islandcom"), a provider of wireless telecommunication services in Turks and Caicos. If current laws, which restrict foreign ownership of companies operating in Turks and Caicos, are changed, BDC will be able to increase its ownership in Islandcom from 42% to 77% through the exercise of a warrant received as a part of the acquisition. The value of the warrant was determined to be \$0.6 million based upon the estimated value of Islandcom's shares and the likelihood that the current laws are changed. The Company, through its majority representation on Islandcom's board of directors exercises control and as a result, the Company has consolidated the balance sheet and operating results of Islandcom since the date of acquisition.

The Islandcom transaction was accounted for using the purchase method and the \$5.5 million of consideration was allocated to the Company's share of the assets acquired and liabilities assumed at their estimated fair values as of the acquisitions date. The allocation of the purchase price, as determined by management, included \$6.4 million of telecommunications licenses.

Islandcom, which further expands the Company's wireless networks into under-served markets, is included in the Company's "Island Wireless" segment as reported in Note 15.

In accordance with current accounting standards, the goodwill and licenses will not be amortized and will be tested for impairment at least annually.

Sovernet's Acquisition of ION HoldCo, LLC

In August 2008, Sovernet acquired 75% of the equity of ION HoldCo, LLC ("ION"), an upstate New York provider of high capacity communications network transport services. The acquisition of ION continues the Company's strategy of providing high quality network services to underserved rural markets. Beginning with the acquisition date of August 15, 2008, the Company began consolidating ION's balance sheet and the operating results of ION into its results of operations.

The transaction was accounted for using the purchase method and the \$5.9 million of cash consideration was allocated to the Company's share of the assets acquired and liabilities assumed at

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

3. ACQUISITIONS (Continued)

their estimated fair values as of the acquisition date. No goodwill or intangible assets were recorded in connection with this transaction.

In December 2009, ION was named to receive a \$39.7 million federal stimulus grant to fund its ION Upstate New York Rural Broadband Initiative, which involves building ten new segments of fiber-optic, middle-mile broadband infrastructure, serving more than 70 rural communities in upstate New York and parts of Pennsylvania and Vermont. The new project will be undertaken through a public-private partnership between ION and the Development Authority of the North Country (“DANC”), a New York State public benefit corporation that owns and operates 750 miles of fiber optic network and provides wholesale telecommunications transport services to voice, video, data and wireless service providers.

The \$39.7 million grant, awarded to ION by the National Telecommunications and Information Administration of the U.S. Department of Commerce (“NTIA”), under its Broadband Technology Opportunities Program, will be paid over the course of the project period as expenses are incurred, which is expected to be three years. An additional \$9.9 million will be invested in the project by ION and DANC.

The funding of the new project is not scheduled to occur until the second quarter of 2010. Accordingly, the Company did not recognize any of the granted funds during 2009. The results of ION are included in the Company’s “Integrated Telephony-Domestic” segment as reported in Note 15.

The following table reflects unaudited pro forma results of operations of the Company for 2008 assuming that the acquisitions of BDC, Islandcom and ION had occurred at the beginning of each period presented (in thousands, except per share data):

	<u>Year Ended December 31, 2007</u>		<u>Year Ended December 31, 2008</u>	
	<u>As Reported</u>	<u>As Adjusted</u>	<u>As Reported</u>	<u>As Adjusted</u>
Revenue	\$186,741	\$212,975	\$207,341	\$217,433
Net income	\$ 37,940	\$ 33,013	\$ 34,798	\$ 32,320
Earnings per share:				
Basic	\$ 2.50	\$ 2.18	\$ 2.29	\$ 2.13
Diluted	\$ 2.48	\$ 2.16	\$ 2.28	\$ 2.12

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES

4. ACCOUNTS RECEIVABLE

As of December 31, 2008 and 2009, accounts receivable consist of the following (in thousands):

	<u>2008</u>	<u>2009</u>
Connecting carriers, net of allowance for doubtful accounts of \$1.2 million and \$1.5 million in 2008 and 2009, respectively	\$16,286	\$17,839
Subscribers, net of allowance for doubtful accounts of \$1.3 million and \$2.7 million in 2008 and 2009, respectively	10,221	8,780
Other	272	212
Total accounts receivable, net.	<u>\$26,779</u>	<u>\$26,831</u>

5. FIXED ASSETS

As of December 31, 2008 and 2009, property, plant, and equipment consist of the following (in thousands):

	<u>Useful Life (in Years)</u>	<u>2008</u>	<u>2009</u>
Telecommunications equipment	5-15	\$288,430	\$315,594
Office and computer equipment	3-10	20,307	21,220
Buildings	15-39	13,492	13,734
Transportation vehicles	3-10	4,199	4,857
Leasehold improvements.	Shorter of useful life or lease term	2,557	6,455
Land	—	1,104	1,124
Furniture and fixtures	5-10	1,254	2,742
Total plant in service		<u>331,343</u>	<u>365,726</u>
Construction in progress		10,716	24,697
Total property, plant, and equipment		<u>\$342,059</u>	<u>\$390,423</u>

Depreciation and amortization of fixed assets using the straight-line method over the assets' estimated useful life for the years ended December 31, 2007, 2008 and 2009 was \$25.5 million, \$30.9 million and \$38.5 million, respectively.

6. INTANGIBLE ASSETS

Goodwill and Telecommunications Licenses

The Company evaluated the carrying value of the goodwill and licenses as of December 31, 2008 and 2009 and determined that these assets were not impaired as of those dates.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

6. INTANGIBLE ASSETS (Continued)

The changes in the carrying amount of goodwill, by operating segment, for the three years ended December 31, 2009 were as follows (in thousands):

	Rural Wireless	Integrated Telephony— Domestic	Island Wireless	Consolidated
Balance at December 31, 2006	\$29,175	\$6,408	—	\$35,583
Acquisition of 5% interest in Commnet	2,951	—	—	2,951
Pre-acquisition transactions	—	454	—	454
Adjustments	22	334	—	356
Balance at December 31, 2007	32,148	7,196	—	39,344
Pre-acquisition transactions	—	110	—	110
Acquisition of 75% interest in ION	—	165	—	165
Acquisition of additional 15% interest in BDC	—	—	618	618
Balance at December 31, 2008	32,148	7,471	618	40,237
Pre-acquisition transactions	—	20	104	124
Balance at December 31, 2009	<u>\$32,148</u>	<u>\$7,491</u>	<u>\$722</u>	<u>\$40,361</u>

Other Intangibles

Included in the allocation of the assets acquired and liabilities assumed in the Sovernet and BDC acquisitions was \$5.0 million and \$0.5 million attributable to Sovernet's and BDC's relationships with its existing customers, respectively, as of the date of their acquisitions. The customer relationships are being amortized, on an accelerated basis, over the expected period during which their economic benefits are to be realized. The Company recorded \$1.2 million, \$0.8 million, and \$0.6 million of amortization during 2007, 2008, and 2009 respectively. The cost and accumulated amortization of customer relationships at December 31, 2008 was \$5.9 million and \$3.5 million, respectively, and for December 31, 2009, \$5.9 million and \$4.0 million respectively.

Future amortization of customer relationships, by operating segment, is as follows:

	Integrated Telephony— Domestic	Island Wireless	Consolidated
2010	\$ 495	\$ 74	\$ 569
2011	495	59	554
2012	71	47	118
2013	—	38	38
2014	—	35	35
Thereafter	—	117	117
Total	<u>\$1,061</u>	<u>\$370</u>	<u>\$1,431</u>

Also included in the allocation of the assets acquired and liabilities assumed in the acquisition of BDC was \$0.4 million attributable to BDC's trade name, an indefinite-lived asset. The Company

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

6. INTANGIBLE ASSETS (Continued)

evaluated the carrying value of the BDC's trade name as of December 31, 2009 and determined that this asset was not impaired.

7. LONG-TERM DEBT

Long-term debt comprises the following (in thousands):

	December 31,	
	2008	2009
Note payable—\$75 million term loan	\$74,625	\$73,875
Less: current portion	(750)	(3,694)
Total long term debt	73,875	70,181
Less: debt discount	(564)	(630)
Net carrying amount	\$73,311	\$69,551

2005 Loan Facility

On August 31, 2007, the Company, as borrower, amended and restated its credit agreement with CoBank, ACB and Banco Popular de Puerto Rico (the "2005 CoBank Credit Agreement"). The 2005 CoBank Credit Agreement provided a \$50 million term loan (the "2005 Term Loan") and a \$20 million revolving credit facility (the "2005 Revolver Facility", together with the 2005 Term Loan, the "2005 Credit Facility"). The 2005 Term Loan had principal repayments deferred until the maturity of the loan on October 31, 2010. Interest on the 2005 Term Loan was payable on a quarterly basis at a fixed annual interest rate of 5.85%, net of any patronage payments received by the Company from the bank. Amounts outstanding under the 2005 Revolver Facility accrued interest at a rate equal to (at the Company's option): (i) LIBOR plus a margin ranging from 1.25% to 1.50% or (ii) a variable rate of interest as defined within the 2005 Revolver Facility plus 1%.

2008 Loan Facility

On September 10, 2008, the Company, as borrower, entered into a credit agreement with CoBank, ACB and other lenders as referenced within the credit agreement (the "2008 CoBank Credit Agreement"). The 2008 CoBank Credit Agreement replaced the 2005 CoBank Credit Agreement and provided a \$75 million term loan (the "2008 Term Loan") as well as a \$75 million revolving credit facility (the "2008 Revolver Facility", together with the 2008 Term Loan, the "2008 Credit Facility").

The 2008 Term Loan required quarterly repayments of principal of \$0.2 million through June 30, 2013 and quarterly repayments of principal of \$1.4 million from September 30, 2013 to June 30, 2015. The remaining outstanding principal balance was to be repaid on September 10, 2015 when the 2008 Term Loan was to mature.

The 2008 Revolver Facility included a \$5 million letter of credit facility. At December 31, 2008, no amounts had been drawn under the 2008 Revolver Facility.

All borrowings under the 2008 Credit Facility were bearing interest at a rate, selected by the Company from one of the options as defined within the agreement, plus a margin. Such interest rate options included i) a base rate, defined as the greater of the prime rate or the federal funds rate plus

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

7. LONG-TERM DEBT (Continued)

0.5%, or ii) a LIBOR rate. Margins for base rate borrowings ranged from 0% to 0.5%, depending upon the Company's leverage ratio while margins for LIBOR borrowings ranged from 1.25% to 2% also depending upon the Company's leverage ratio. Borrowings as of December 31, 2009, including the interest rate swap agreement as described in Note 8, were bearing a weighted average interest rate of 5.36%.

The 2008 Credit Agreement contained certain affirmative and negative covenants of the Company and its subsidiaries. Among other things, these covenants restricted the Company's ability to incur additional debt or to incur liens on its property. The 2008 Credit Agreement also required the Company to maintain certain financial ratios including a net leverage ratio of less than or equal to 3.0 to 1, an interest coverage ratio of greater than or equal to 3.5 to 1 and an equity to assets ratio of greater than or equal to 0.4 to 1. As of December 31, 2009, the Company was in compliance with all of the financial covenants of the 2008 CoBank Credit Agreement.

2010 Loan Facility

On January 20, 2010, the Company amended and restated its 2008 Credit Facility with CoBank as Administrative Agent. (the "2010 CoBank Credit Agreement"). The 2010 CoBank Credit Agreement provides for a \$298.9 million credit facility, consisting of a \$73.9 million term loan (the "2010 Term Loan A"), a \$150.0 million term loan (the "2010 Term Loan B") and a \$75.0 million revolver loan (the "2010 Revolver Loan," and together with the Term Loan A and Term Loan B, the "2010 Credit Facility"). The 2010 Credit Facility also provides for one or more additional term loans up to an aggregate \$50.0 million, subject to lender and administrative agent approval.

Upon the closing of the 2010 Credit Facility, \$73.9 million was outstanding under the 2010 Term Loan A, an amount equal to the outstanding principal amount under the 2008 Term Loan. No amount is currently outstanding under the 2010 Term Loan B. We may use the proceeds of the Term Loan B solely in connection with the Alltel Acquisition. Borrowings under the 2010 Term Loan B are available to the Company until the earlier of (i) completion of the Alltel Acquisition or (ii) March 31, 2010 (the "2010 Term Loan B Commitment Expiration Date"). We intend to request an extension to the 2010 Term Loan B Commitment Expiration Date during the first quarter of 2010. The Company currently has no borrowings outstanding under the 2010 Revolver Loan, of which the Company may use up to \$10.0 million for standby or trade letters of credit.

The 2010 Term Loan A and the 2010 Term Loan B each mature on September 30, 2014, unless accelerated pursuant to an event of default, as described below. The Revolver Loan matures on September 10, 2014, unless accelerated pursuant to an event of default, as described below. Amounts borrowed under the 2010 Term Loan A, 2010 Term Loan B and the 2010 Revolver Loan bear interest at a rate equal to, at the Company's option, either (i) the London Interbank Offered Rate (LIBOR) plus an applicable margin ranging between 3.50% to 4.75% or (ii) a base rate plus an applicable margin ranging from 2.50% to 3.75%. The Company is not required to apply a minimum LIBOR percentage for any loans bearing interest at the LIBOR rate. The base rate is equal to the higher of either (i) 1.50% plus the higher of (x) the one-week LIBOR and (y) the one-month LIBOR and (ii) the prime rate (as defined in the credit agreement). The applicable margin is determined based on the ratio of the Company's indebtedness (as defined in the credit agreement) to its EBITDA (as defined in the credit agreement).

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

7. LONG-TERM DEBT (Continued)

All amounts outstanding under the 2010 Revolver Loan will be due and payable upon the earlier of the maturity date or the acceleration of the loan upon an event of default. Amounts outstanding under the 2010 Term Loan A and the 2010 Term Loan B will be due and payable commencing on March 31, 2010 in quarterly payments equal to 1.25% of the initial principal amount outstanding under each loan, increasing to 2.50% of the initial principal amount outstanding commencing on March 31, 2012. Remaining balances will be due and payable upon maturity, unless the loans are accelerated upon an event of default.

Certain of the Company's subsidiaries, including Commnet, Sovernet, and Choice are guarantors of the Company's obligations under the 2010 Credit Facility. Further, the Company's obligations are secured by (i) a first priority, perfected lien on substantially all the property and assets of the Company and the guarantor subsidiaries, including its principal wholly-owned domestic operating subsidiaries and (ii) a pledge of 100% of the Company's equity interests in certain domestic subsidiaries and up to 65% of the equity interests outstanding of certain foreign subsidiaries, in each case, including the Company's principal operating subsidiaries. Upon closing of the Alltel Acquisition and as a condition to the 2010 Term Loan B, certain subsidiaries formed by the Company in connection with the Alltel Acquisition must also become guarantors and the Company's obligations under the 2010 Credit Facility must be secured by a first priority, perfected lien on substantially all of the property and assets of certain of the Company's subsidiaries formed in connection with the Alltel Acquisition and a pledge of 100% of the Company's equity interests in those subsidiaries.

The 2010 Credit Facility contains customary representations, warranties and covenants, including covenants by the Company limiting additional indebtedness, liens, guaranties, mergers and consolidations, substantial asset sales, investments and loans, sale and leasebacks, transactions with affiliates and fundamental changes. In addition, the 2010 Credit Facility contains financial covenants by the Company that (i) impose a maximum ratio of indebtedness (as defined in the credit agreement) to EBITDA (as defined in the credit agreement), (ii) require a minimum ratio of EBITDA to cash interest expense, (iii) require a minimum ratio of equity to consolidated assets and (iv) require a minimum ratio of EBITDA to fixed charges (as defined in the credit agreement).

The 2010 Credit Facility provides for events of default customary for credit facilities of this type, including but not limited to non-payment, defaults on other debt, misrepresentation, breach of covenants, representations and warranties, insolvency and bankruptcy. After the occurrence of an event of default and for so long as it continues, the administrative agent or the requisite lenders (as defined in the credit agreement) may increase the interest rate then in effect on all outstanding obligations by 2.0%. Upon an event of default relating to insolvency, bankruptcy or receivership, the amounts outstanding under the 2010 Credit Facility will become immediately due and payable and the lender commitments will be automatically terminated. Upon the occurrence and continuation of any other event of default, the administrative agent and/or the requisite lenders (as defined in the credit agreement) may accelerate payment of all obligations and terminate the lenders' commitments under the 2010 Credit Facility.

2013	7,388
2014	51,711
Thereafter	<u>—</u>
Total principal repayments	<u>\$73,875</u>

8. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

As required by the FASB’s authoritative guidance on accounting for derivative instruments and hedging activities, the Company records all derivatives on the balance sheet at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the Company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives designated and qualifying as a hedge of the exposure to changes in the fair value of an asset, liability, or firm commitment attributable to a particular risk, such as interest rate risk, are considered fair value hedges. Derivatives designated and qualifying as a hedge of the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. Hedge accounting generally provides for the matching of the timing of gain or loss recognition on the hedging instrument with the recognition of the changes in the fair value of the hedged asset or liability that are attributable to the hedged risk in a fair value hedge or the earnings effect of the hedged forecasted transactions in a cash flow hedge. The Company may enter into derivative contracts that are intended to economically hedge certain of its risk, even though hedge accounting does not apply or the Company elects not to apply hedge accounting.

Risk Management Objective of Using Derivatives

The Company is exposed to certain risk arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risks related to interest rates primarily by managing the amount, sources, and duration of its debt funding and the use of derivative financial instruments. Specifically, the Company entered into derivative financial instruments to manage exposures that arise from business activities that result in the payment of future known and uncertain cash amounts, the value of which are determined by interest rates. The Company’s derivative financial instruments are used to manage differences in the amount, timing, and duration of its known or expected cash payments principally related to the Company’s borrowings.

8. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES (Continued)

Cash Flow Hedges of Interest Rate Risk

The Company's objectives in using interest rate derivatives are to add stability to interest expense and to manage its exposure to interest rate movements. To accomplish this objective, the Company primarily uses an interest rate swap as part of its interest rate risk management strategy. Interest rate swaps designated as cash flow hedges involve the receipt of variable-rate amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount.

The effective portion of changes in the fair value of interest rate swaps designated and that qualify as cash flow hedges is recorded in Accumulated Other Comprehensive Income and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. Since September 23, 2008, a derivative was used to hedge the variable cash flows associated with existing variable-rate debt. The ineffective portion of the change in fair value of the derivative is recognized directly in earnings. No hedge ineffectiveness was recognized during either 2008 or 2009.

Amounts reported in accumulated other comprehensive income related to the interest rate swap will be reclassified to interest expense as interest payments are made on the Company's variable-rate debt. Through December 31, 2010, the Company estimates that an additional \$2.6 million will be reclassified as an increase to interest expense due to the interest rate swap since the hedge interest rate exceeds the variable interest rate on the debt.

As of December 31, 2009, the Company's sole derivative instrument was an interest rate swap with a notional amount of \$68 million that was designated as a cash flow hedge of interest rate risk.

The table below presents the fair value of the Company's derivative financial instrument as well as its classification on the consolidated balance sheet as of December 31, 2008 and 2009 (in thousands):

	Liability Derivatives		
	Balance Sheet Location	Fair Value as of December 31,	
		2008	2009
Derivatives designated as hedging instruments:			
Interest Rate Swap	Other long-term liabilities	\$8,019	\$5,096
Total derivatives designated as hedging instruments		\$8,019	\$5,096

The table below presents the effect of the Company's derivative financial instrument on the income statements for the years ended December 31, 2008 and 2009 (in thousands):

Year ended December 31,	Derivative in Cash Flow Hedging Relationships	Amount of Gain or (Loss) Recognized in OCI on Derivative (Effective Portion)	Location of Gain or (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)	Amount of Gain or (Loss) Reclassified from Accumulated OCI into Income (Effective Portion)
2008	Interest Rate Swap	\$(8,181)	Interest expense	\$ 259
2009	Interest Rate Swap	32	Interest expense	(2,794)

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

8. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES (Continued)

Credit-risk-related Contingent Features

The Company has an agreement with its derivative counterparty that contains a provision where if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations.

As of December 31, 2009, the fair value of the interest rate swap liability position, related to this agreement was \$5.1 million. As of December 31, 2009, the Company has not posted any collateral related to this agreement. If the Company had breached any of these provisions at December 31, 2009, it would have been required to settle its obligation under the agreement at its termination value of \$5.1 million.

9. EQUITY

Common Stock

The Company has paid quarterly dividends on its common stock since January 1999.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

9. EQUITY (Continued)

Treasury Stock

During 2007, the Company reissued 21,000 shares from treasury in connection with the acquisition of the remaining 5% interest in Commnet (see Note 3). Also during 2007, the Company reissued 14,756 shares from treasury to directors under the Directors' Plan and repurchased 3,333 shares issued to management under the Company's 2006 Restricted Stock Plan for \$110,000 the fair value of the shares as of the date of the vesting, and to satisfy statutory minimum withholding obligations. The Company recognized a tax benefit of approximately \$39,000 in connection with the vesting and repurchase of such shares.

During 2008, the Company reissued 876 shares from treasury to a director under the Director's Remuneration Plan. Also during 2008, the Company repurchased 42,351 shares of its common stock at an aggregate cost of \$1,164,000 or an average price of \$27.48 per share.

During 2009, the Company reissued 791 shares from treasury to a director under the Director's Remuneration Plan. Also during the fourth quarter of 2009, the Company repurchased 2,981 shares of its common stock at an aggregate cost of \$134,360 or an average price of \$45.07 per share.

Stock-Based Compensation

In May 2008, at the Company's Annual Meeting of Stockholders, the Company's stockholders approved the 2008 Equity Incentive Plan (the "2008 Plan"). The 2008 Plan replaced the 1998 Stock Option Plan, the 2005 Restricted Stock Plan and the Director's Remuneration Plan (collectively and including the 2008 Plan the "Share Based Plans"), under which no further awards will be made. The 2008 Plan allows for the grant of stock options, restricted stock, restricted stock units, stock equivalents and awards of shares of common stock that are not subject to restrictions or forfeiture. A total of 1,500,000 shares have been reserved to be granted under the 2008 Plan.

Stock Options

Stock options issued under the Share Based Plans have terms of either seven years or ten years and vest annually and ratably over a period of four years.

9. EQUITY (Continued)

The following table summarizes stock option activity under the Company's share-based plans for the years ended December 31, 2008 and 2009:

Year Ended December 31, 2008				
	Number of Options	Weighted Avg. Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at January 1, 2008	455,750	\$24.93		
Granted	76,500	27.92		
Forfeited	—	—		
Exercised	<u>(18,125)</u>	<u>16.80</u>		
Outstanding at December 31, 2008	<u>514,125</u>	<u>\$25.66</u>	<u>7.53</u>	<u>\$1,840,308</u>
Vested and expected to vest at December 31, 2008	<u>445,956</u>	<u>\$25.32</u>	<u>7.42</u>	<u>\$1,693,941</u>
Exercisable at December 31, 2008	<u>187,254</u>	<u>\$22.52</u>	<u>6.84</u>	<u>\$1,048,475</u>
Year Ended December 31, 2009				
	Number of Options	Weighted Avg. Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at January 1, 2009	514,125	\$25.66		
Granted	34,500	20.79		
Forfeited	(4,375)	16.80		
Exercised	<u>(4,375)</u>	<u>16.80</u>		
Outstanding at December 31, 2009	<u>539,875</u>	<u>\$25.49</u>	<u>6.71</u>	<u>\$15,904,156</u>
Vested and expected to vest at December 31, 2009	<u>501,357</u>	<u>\$25.35</u>	<u>6.61</u>	<u>\$14,840,282</u>
Exercisable at December 31, 2009	<u>316,253</u>	<u>\$23.79</u>	<u>6.12</u>	<u>\$ 9,855,173</u>

The 501,357 options vested and expected to vest as of December 31, 2009 represent \$1.3 million in unamortized stock based compensation which will be recognized over a weighted average term of 2.1 years.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

9. EQUITY (Continued)

The following table summarizes information relating to options granted and exercised during 2007, 2008 and 2009:

	<u>2007</u>	<u>2008</u>	<u>2009</u>
Weighted average of fair value of options granted . . .	\$ 6.93	\$ 7.97	\$ 6.55
Aggregate intrinsic value of options exercised	171,170	243,563	25,288
Cash proceeds received upon exercise of options . . .	209,000	304,500	73,500
Tax benefits realized upon exercise of options	87,000	84,000	25,000

The aggregate intrinsic value represents the total pre-tax intrinsic value (the difference between our closing common stock price on December 31, 2009 and the exercise price, multiplied by the number of the in-the-money stock options) that would have been received by the stock option holders had all stock options holders exercised their stock options on December 31, 2009. The amount of aggregate intrinsic value will change based on the fair market value of our common stock.

The estimated fair value of the options granted were determined using a Black Scholes option pricing model, based on the following assumptions:

	<u>Options Granted in</u>		
	<u>2007</u>	<u>2008</u>	<u>2009</u>
Risk-free interest rate	4.2% to 4.5%	1.9% to 2.8%	1.8%
Expected dividend yield	1.7% to 2.1%	1.9% to 3.2%	3.0%
Expected life	4.8 to 6.25 years	6.25 years	6.25 years
Expected volatility	40%	39% to 44%	42%

The Company recognized \$522,000, \$604,000 and \$842,000 respectively, of stock compensation expense relating to the granting of stock options during 2007, 2008 and 2009, respectively.

Restricted Stock

Restricted stock issued under the Share Based Plans vest ratably over four years.

The following table summarizes restricted stock activity during the year ended December 31, 2009:

	<u>Shares</u>	<u>Weighted Avg. Fair Value</u>
Unvested as of January 1, 2009	46,729	\$24.69
Granted	2,950	25.41
Vested and issued	(21,642)	23.78
Unvested as of December 31, 2009	<u>28,037</u>	<u>\$25.47</u>

The weighted-average grant date fair value of shares granted for 2008 and 2009 were \$24.16 per share and \$25.41 per share, respectively. In connection with the grant of restricted shares, the Company recognized \$364,000, \$373,000 and \$395,000 of compensation expense within its income statements for 2007, 2008 and 2009, respectively.

The 28,037 unvested shares as of December 31, 2009 represent \$656,000 in unamortized stock based compensation which will be recognized over a weighted average of 2.5 years.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

10. IMPAIRMENT AND DISPOSITION OF LONG-LIVED ASSETS

Choice

During the fourth quarter of 2007, Choice was notified that it would be denied certain tax benefits by the U.S. Virgin Islands government. With the denial of such benefits, the Company evaluated each of Choice's two product lines and determined that telecommunications equipment relating to its wireless digital television services was impaired. As a result, the Company recorded a \$4.4 million charge in its 2007 income statement as the fair value of the assets, determined by using the assets' discounted estimated future cash flows, was below the carrying value of the assets by such amount. However, based on a separate impairment test, the Company determined that no impairment existed as of December 31, 2007 relating to Choice's internet service (including both the broadband data and dial-up products). Choice discontinued its wireless television service in May 2009 and sold the related telecom equipment to the Company's Chairman (see Note 14).

Commnet

In December 2007, Commnet sold, to a national carrier, 59 base stations along with spectrum licenses in two Midwestern states for total consideration of \$17.0 million and recorded a pre-tax gain on the sale of \$5.0 million. At the same time, Commnet acquired spectrum, and agreed to lease additional spectrum and build base stations in rural areas in three states. The agreement also provided the carrier a purchase option on the new base stations exercisable beginning in 2010 through 2012 at a predetermined price each year intended to reflect the estimated fair value of the base stations at those times.

During the first half of 2007, Commnet sold certain telecom assets for net proceeds of \$1.8 million, predominantly in western states, and recognized a gain on the sale of such assets of \$1.3 million.

Haiti

During August 2007, the Company sold all of its assets in Haiti to Access Haiti, S.A., a Haitian company in which the Chairman of the Company's Board of Directors is a significant equity holder. After taking into account outstanding claims, legal and other related expenses incurred in connection with the transaction and the dissolution of the Company's Haitian Subsidiaries the Company recognized a loss of approximately \$0.3 million (see Note 14).

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

11. INCOME TAXES

The following is a reconciliation from the tax computed at statutory income tax rates to the Company's income tax expense for the years ended December 31, 2007, 2008, and 2009 (in thousands):

	<u>2007</u>	<u>2008</u>	<u>2009</u>
Tax computed at statutory U.S. federal income tax rates	\$24,812	\$24,149	\$23,741
Income taxes in excess (below) statutory U.S. tax rates:			
Guyana	5,145	5,131	3,331
Bermuda	—	(560)	761
Valuation allowance on capital loss carryforward	(1,484)	—	—
Guyanese tax reserve	—	(310)	(183)
State taxes	443	255	2,402
Other, net	13	886	1,108
Income tax expense	<u>\$28,929</u>	<u>\$29,551</u>	<u>\$31,160</u>

The components of income before income taxes for the years ended December 31, 2007, 2008 and 2009 are as follows (in thousands):

	<u>2007</u>	<u>2008</u>	<u>2009</u>
Domestic	\$31,377	\$32,028	\$41,399
Foreign	38,193	36,559	26,344
Total	<u>\$69,570</u>	<u>\$68,587</u>	<u>\$67,743</u>

The components of income tax expense for the years ended December 31, 2007, 2008 and 2009 are as follows (in thousands):

	<u>2007</u>	<u>2008</u>	<u>2009</u>
Current:			
United States—Federal	\$ 9,867	\$ 3,675	\$12,297
United States—State	483	547	2,467
Foreign	17,688	16,915	14,776
Deferred:			
United States—Federal	540	9,080	1,836
United States—State	199	156	1,273
Foreign	152	(822)	(1,489)
	<u>\$28,929</u>	<u>\$29,551</u>	<u>\$31,160</u>

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

11. INCOME TAXES (Continued)

The significant components of deferred tax assets and liabilities are as follows as of December 31, 2008 and 2009 (in thousands):

	<u>2008</u>	<u>2009</u>
Deferred tax assets:		
Receivables reserve	\$ 737	\$ 1,090
Temporary differences not currently deductible for tax	706	1,956
Foreign tax credit carryforwards	16,983	16,983
Valuation allowance on foreign tax credit carryforwards	(11,734)	(11,734)
Net operating losses—state	27	242
Pension benefits	86	197
Interest rate swap	3,208	3,397
Total deferred tax asset	<u>\$ 10,013</u>	<u>\$ 12,131</u>
Deferred tax liabilities:		
Property, plant and equipment, net	\$ 25,660	\$ 27,351
Intangible assets, net	3,076	4,820
Total deferred tax liabilities	<u>\$ 28,736</u>	<u>32,171</u>
Net deferred tax liabilities	<u>\$ 18,723</u>	<u>\$ 20,040</u>

The Company's foreign tax credit carryforwards start to expire in 2011 and continue to expire through 2016.

The undistributed earnings of the Company's foreign subsidiaries are considered to be indefinitely reinvested and, accordingly, no U.S. federal and state income taxes have been provided thereon. Determination of the amount of unrecognized deferred U.S. income tax liability is not practical because of the complexities associated with its hypothetical calculation; however, unrecognized foreign tax credits would be available to reduce a portion of the U.S. tax liability.

The following shows the activity related to unrecognized tax benefits during the three years ended December 31, 2009 (in thousands):

Gross unrecognized tax benefits at January 1, 2007	\$6,000
Increases in tax positions	<u>301</u>
Gross unrecognized tax benefits at December 31, 2007	6,301
Decrease in tax positions from prior years	(301)
Lapse in statute of limitations	<u>(310)</u>
Gross unrecognized tax benefits at December 31, 2008	5,690
Lapse in statute of limitations	<u>(183)</u>
Gross unrecognized tax benefits at December 31, 2009	<u>\$5,507</u>

All \$5.5 million of unrecognized tax benefits would affect the effective tax rate if recognized. The Company accrues interest and penalties related to unrecognized tax benefits in its provision for income taxes, if material. No penalties or interest were accrued for in any of the years presented since we do not believe our uncertain positions would be subject to interest and penalties.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

11. INCOME TAXES (Continued)

The Company and its subsidiaries file income tax returns in the U.S. and in various state and local jurisdictions. The statute of limitations related to the consolidated U.S. federal income tax return is closed for all tax years up to and including 2004. The expiration of the statute of limitations related to the various state income tax returns that the Company and subsidiaries file varies by state. The Company's consolidated federal tax return and any significant state tax returns are not currently under examination. The Company does not expect that the amount of unrecognized tax benefits relating to U.S. tax matters will change significantly within the next 12 months.

The Company also files an income tax return in Guyana. See Note 13 relating to certain tax matters pertaining to those filings. There is no expected settlement date of those matters and upon settlement, which might not occur in the near future, the payment may vary significantly from the amounts currently recorded. The Company will continue to update amounts recorded as new developments arise.

12. RETIREMENT PLANS

The Company has a noncontributory defined benefit pension plan for eligible employees of GT&T who meet certain age and employment criteria. Contributions are intended to provide not only for benefits attributed for service to date but also for those expected to be earned in the future. The Company's funding policy is to contribute to the plan such amounts as are actuarially determined to meet funding requirements. The benefits are based on the participants' average salary or hourly wages during the last three years of employment and credited service years.

12. RETIREMENT PLANS (Continued)

The weighted average rates assumed in the actuarial calculations for the pension plan are as follows as of December 31, 2007, 2008 and 2009:

	<u>2007</u>	<u>2008</u>	<u>2009</u>
Discount rate	7.25%	7.50%	7.50%
Annual salary increase	7.50%	7.50%	7.50%
Expected long term return on plan assets	8.00%	8.00%	8.00%

The expected long-term rate of return on pension plan assets was determined based on several factors including input from pension investment consultants, projected long-term returns of equity and bond indices in Guyana and the United States, and historical returns over the life of the related obligations of the fund. GT&T, in conjunction with its pension investment consultants, reviews its asset allocation periodically and rebalances its investments when appropriate in an effort to earn the expected long-term returns. The Company will continue to evaluate its long-term rate of return assumptions at least annually and will adjust them as necessary.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

12. RETIREMENT PLANS (Continued)

Changes during the year in the projected benefit obligations and in the fair value of plan assets are as follows for 2008 and 2009 (in thousands):

	<u>2008</u>	<u>2009</u>
Projected benefit obligations:		
Balance at beginning of year:	\$9,675	\$ 9,951
Service cost	499	528
Interest cost	683	736
Benefits paid	(311)	(533)
Actuarial loss	(595)	(32)
Balance at end of year	<u>\$9,951</u>	<u>\$10,650</u>
Plan net assets:		
Balance at beginning of year:	\$9,217	\$ 9,767
Actual return on plan assets	212	347
Company contributions	649	650
Benefits paid	(311)	(533)
Balance at end of year	<u>\$9,767</u>	<u>\$10,231</u>
Under funded status of plan	<u>\$ (184)</u>	<u>\$ (419)</u>

GT&T's investment policy for its pension assets is to have a reasonably balanced investment approach, with a long-term bias toward debt investments. GT&T's strategy allocates plan assets among equity, debt and other assets in both Guyana and the United States to achieve long-term returns without significant risk to principal. The fund is prohibited under Guyana law from investing in the equity, debt or other securities of the employer, its subsidiaries or associates of the employer or any company of which the employer is a subsidiary or an associate. Furthermore, the plan must invest between 70%-80% of its total plan assets within Guyana.

The fair values for the pension plan's net assets, by asset category, at December 31, 2009 are as follows:

<u>Asset Category</u>	<u>Total</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
Cash, cash equivalents, money markets and other	\$ 4,232	\$4,232	\$ —	\$—
Equity securities	1,052	874	172	6
Fixed income securities	4,947	—	4,947	—
Total	<u>\$10,231</u>	<u>\$ 874</u>	<u>\$9,351</u>	<u>\$ 6</u>

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

12. RETIREMENT PLANS (Continued)

The plan's weighted-average asset allocations at December 31, 2008 and 2009, by asset category are as follows:

	<u>2008</u>	<u>2009</u>
Cash, cash equivalents, money markets and other	54.4%	41.4%
Equity securities	13.0	10.3
Fixed income securities	32.6	48.3
Total	<u>100.0%</u>	<u>100.0%</u>

Amounts recognized on the Company's consolidated balance sheets consist of (in thousands):

	As of December 31,	
	<u>2008</u>	<u>2009</u>
Other liabilities	\$ (184)	\$ (419)
Accumulated other comprehensive loss, net of tax	2,090	2,214
Total	<u>\$1,906</u>	<u>\$1,795</u>

Amounts recognized in accumulated other comprehensive loss consist of (in thousands):

	<u>2008</u>	<u>2009</u>
Net actuarial loss	\$(3,934)	\$(4,186)
Prior service cost	(34)	(22)
Accumulated other comprehensive loss, pre-tax	<u>\$(3,968)</u>	<u>\$(4,208)</u>
Accumulated other comprehensive loss, net of tax	<u>\$(2,090)</u>	<u>\$(2,214)</u>

Components of the plan's net periodic pension cost are as follows for the years ended December 31, 2007, 2008 and 2009 (in thousands):

	<u>2007</u>	<u>2008</u>	<u>2009</u>
Service cost	\$ 487	\$ 500	\$ 528
Interest cost	642	683	736
Expected return on plan assets	(717)	(764)	(798)
Amortization of unrecognized net actuarial loss	177	193	167
Amortization of prior service costs	11	11	11
Net periodic pension cost	<u>\$ 600</u>	<u>\$ 623</u>	<u>\$ 644</u>

For 2010, the Company expects to contribute approximately \$0.8 million to its pension plan and amortize \$179,000 of unrecognized net actuarial loss and \$11,000 of prior service costs.

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

12. RETIREMENT PLANS (Continued)

The following estimated pension benefits, which reflect expected future service, as appropriate, are expected to be paid over the next ten years as indicated below (in thousands):

<u>Fiscal Year</u>	<u>Pension Benefits</u>
2010	\$ 278
2011	332
2012	371
2013	420
2014	444
2015-2019	3,161
	<u>\$5,006</u>

13. COMMITMENTS AND CONTINGENCIES

Regulatory and Litigation Matters

The Company and its subsidiaries are subject to certain regulatory and legal proceedings and other claims arising in the ordinary course of business, some of which involve claims for damages and taxes that are substantial in amount. The Company believes that, except for the items discussed below, for which the Company is currently unable to predict the final outcome, the disposition of proceedings currently pending will not have a material adverse effect on the Company's financial position or results of operations.

Regulatory

The Company's Guyana subsidiary, GT&T, is subject to regulation in Guyana under the provisions of its license and under the Guyana Public Utilities Commission Act of 1999 and the Guyana Telecommunications Act of 1990. GT&T also has certain significant rights and obligations under the agreement pursuant to which the Company acquired its interest in GT&T in 1990 and because of the large volume of traffic that GT&T has with the United States, GT&T can be significantly affected by orders of U.S. regulatory agencies.

In a letter dated September 8, 2006, the National Frequency Management Unit (NFMU) agreed that GT&T's total spectrum fees should not increase for the years 2006 and 2007. However, that letter implied that spectrum fees in 2008 and onward may be increased beyond the amount agreed between GT&T and the Government. GT&T restated its position in a September 14, 2006 letter to the Government that, by agreement with the Government, spectrum fees should be capped until the NFMU develops a fee methodology, acceptable to all GSM spectrum licensees. In correspondence to GT&T in June 2007, the NFMU stated, without indicating whether a fee methodology would be developed, that the cap on GSM spectrum fees will be removed in December 2007. In a letter dated July 3, 2007 to the NFMU, GT&T objected to the NFMU's proposed action and reiterated its position that an increase in fees prior to development of an acceptable methodology would violate the Government's prior agreement. This matter is still pending and the NFMU has not issued an invoice to GT&T for 2008 and 2009 GSM spectrum fees.

Since 2001, the Government has stated its intention to introduce additional competition into Guyana's telecommunications sector. In 2002, the Government held formal discussions with GT&T

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

13. COMMITMENTS AND CONTINGENCIES (Continued)

regarding this matter. During 2008, at the request of the Government, GT&T met with high-ranking members of the Government to discuss potential modifications of GT&T's exclusivity rights and the introduction of competition for international voice and data services. ATN and GT&T believe that such competition is precluded by GT&T's exclusive license to provide domestic fixed and international voice and data services in Guyana, which has a stated expiration in December 2010. Each of these licenses is renewable at GT&T's option, for an additional term of twenty years. In November of 2009, GT&T notified the Government that it is exercising its option to renew its exclusive and non-exclusive licenses for a further period of twenty years. In exercising our option to renew our licenses, we reiterated to the Government that we would be willing to voluntarily relinquish the exclusivity aspect of its licenses, but only as part of an overall settlement agreement with the Government.

ATN and GT&T believe that any early termination of our exclusivity would require our consent and appropriate compensation to GT&T, as well as the satisfactory resolution of certain long-standing claims between us and the Government relating to certain tax and other matters. In addition, certain modifications to the legal and regulatory regime governing the telecommunications market sector in Guyana will be necessary. The Government of Guyana has acknowledged that a transition to full competition will require a significant rebalancing of local and long distance rates for domestic and international services provided by GT&T. During 2008, GT&T held discussions with the Government to develop an appropriate methodology and process to implement rate rebalancing during and after a transition to competition. We have been open about our willingness to consider foregoing renewal of our international exclusivity rights in 2010 as part of an overall settlement and agreement.

In October 2008, GT&T was informally notified that the Government has retained the services of a US-based law firm and a consultant to develop the legislative and regulatory reforms necessary to introduce telecommunications competition in Guyana. GT&T has met informally with those persons to discuss the process and possible timing of any legislation or regulatory initiative. GT&T has been informed that draft legislation liberalizing the telecommunications sector in Guyana may be available during the first half of 2010. At this time, ATN and GT&T do not know whether or how any draft legislation will address GT&T's exclusive license, and if so, whether it would be pursuant to an agreement between GT&T and the Government. Other than entering into such an agreement on mutually acceptable terms, ATN and GT&T would seek to enforce GT&T's rights by law and contract to be the exclusive provider of domestic fixed and international voice and data services in Guyana and would pursue any other legitimate avenues of recourse available to us. Although ATN and GT&T believe that they would be entitled to damages for any involuntary termination of that exclusive license, ATN and GT&T cannot guarantee that we would prevail in any court or arbitration proceeding or that our actions would effectively halt any unilateral action by the Government.

On January 15, 2007, the Public Utilities Commission ("PUC") issued a ruling that fixed floor and ceiling rates for both the pre-paid and the post-paid cellular services offered by GT&T and its competition. GT&T's national competitor has been offering promotions that appear to us to violate the floor on cellular rates. We believe the PUC has acted in an unreasonably discriminatory manner in favor of GT&T's primary competitor by not enforcing the minimum and maximum rates (among other regulations) and, in late 2007, GT&T filed a lawsuit contesting the PUC's enforcement approach. That lawsuit remains outstanding.

In October 1997, the PUC ordered GT&T to increase the number of telephone lines in service to a total of 69,278 lines by the end of 1998; 89,054 lines by the end of 1999; and 102,126 lines by the end

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

13. COMMITMENTS AND CONTINGENCIES (Continued)

of 2000; to allocate and connect an additional 9,331 telephone lines before the end of 1998; and to provide to subscribers who request them certain calling features (e.g. call waiting) by the end of 1998. In issuing this order, the PUC did not hear evidence or make any findings on the cost of providing these lines and services, the adjustment in telephone rates that may be necessary to give GT&T a fair return on its investment, or the method of financing the requirements of the PUC's order. GT&T has appealed the PUC's order to the Guyana Court of Appeal, and that appeal is still pending. No stay currently exists against this order.

Litigation

Upon the acquisition of GT&T in 1990, ATN entered into an agreement with the government of Guyana to significantly expand GT&T's existing facilities and telecommunications operations and to improve service within a three-year period pursuant to an expansion and service improvement plan (the "Plan"). The government agreed to permit rate increases in the event of currency devaluation within the three-year period, but GT&T was unable to get timely increases when the Guyanese currency suffered a sharp decline in March 1991. The Plan was modified in certain respects, and the date for completion of the Plan was extended to February 1995. Since 1995, the PUC has had pending a proceeding initiated by the Minister of Telecommunications of Guyana with regard to the failure of GT&T to complete the Plan by February 1995. The PUC last held hearings on this matter in 1998. It is GT&T's position that its failure to receive timely rate increases in compensation for the devaluation of currency in 1991 provides legal justification for GT&T's delay in completing the Plan. If the PUC were to find that GT&T was not excused from fulfilling the terms of the Plan by February 1995, GT&T could be subject to monetary penalties, cancellation of its license, or other action by the PUC or the government that could have a material adverse effect on the Company's business and prospects. The requirements of the Plan were substantially completed more than five years ago. GT&T believes that its obligations have been fulfilled and it has continued to aggressively develop the telecommunications infrastructure in all areas including landline, wireless and data.

GT&T is contesting, in the High Court of Guyana, approximately \$7.3 million in income tax assessed by the commissioner of Inland Revenue for the years 1991 to 1996. The amount in dispute represents the amount of deductions GT&T claimed during those years for advisory fees payable to ATN that were denied by the Guyana Commission of Inland Revenue (the "Commission"). The deductibility of these advisory fees was upheld for one of these years by a decision of the High Court in August 1995. The Commission has filed a High Court Writ, which GT&T has opposed, requesting the High Court to set aside this decision. The assessments for the other years are being held in abeyance pending decision on the Writ and GT&T motions to strike. Subsequent to December 31, 2001, GT&T received assessments for the years 1997-2000 in the aggregate amount of approximately \$6.5 million raising the same issues. GT&T expects that proceedings on these assessments will also be held in abeyance pending the Court's decision.

In November 1997, GT&T received assessments of the current equivalent of approximately \$9.7 million from the commissioner of Inland Revenue for taxes for the years 1991 through 1996. It is GT&T's understanding that these assessments stem from an audit that the Guyana High Court stayed before it was completed. Apparently, because the audit was cut short as a result of the High Court's order, GT&T did not receive notice of, and an opportunity to respond to, the proposed assessments as is the customary practice in Guyana, and substantially all of the issues raised in the assessments appear to be based on mistaken facts. GT&T has applied to the Guyana High Court for an order prohibiting

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

13. COMMITMENTS AND CONTINGENCIES (Continued)

the commissioner of Inland Revenue from enforcing the assessments on the grounds that the origin of the audit and the failure to give GT&T notice of, and opportunity to respond to, the proposed assessments violated Guyanese law. The Guyana High Court has issued an order effectively prohibiting any action on the assessments pending the determination by the High Court of the merits of GT&T's application.

Should GT&T be held liable for any of the above tax liabilities, totaling \$23.5 million, the Company believes that the government of Guyana would be obligated to reimburse GT&T for any amounts that would reduce GT&T's return on investment to less than 15% per annum for the relevant periods.

In early 2000, Inet Communications, Inc., an internet service provider in Guyana, and the Guyana Consumers Association filed a suit in the High Court against the Attorney General of Guyana and GT&T. The suit claims that GT&T is not entitled to rate increases based on the agreement between the Government of Guyana and ATN and that the Civil Law of Guyana prohibits what is referred to as GT&T's monopoly. Inet's motion was struck down for non-appearance of counsel. However, Inet's counsel has applied for the matter to be restored. The Court has not yet taken action on Inet's application.

In July 2002 an individual sued the Attorney General of Guyana in the Guyana courts asking, among other things, for a declaration that the section of the Company's 1990 contract with the Government of Guyana granting to GT&T an exclusive right to operate a telecommunications system in Guyana was null and void as contrary to law and to the Constitution of Guyana. GT&T has joined the suit to contest these claims and this proceeding remains pending.

On May 8, 2009, Digicel filed a lawsuit in Guyana challenging the legality of GT&T's exclusive license under Guyana's constitution. Digicel initially filed this lawsuit against the Attorney General of Guyana in the High Court. On May 13, 2009, GT&T petitioned to intervene in the suit in order to oppose Digicel's claims and that petition was granted on May 18, 2009. GT&T filed its answer to the charge on June 22, 2009 and the case is pending. We believe that any legal challenge to GT&T's exclusive license granted in 1990 is without merit and we will vigorously defend against such a legal challenge.

For all of the above regulatory, litigation, or related matters, the Company believes some adverse outcome is probable the Company has accrued \$5.0 million as of December 31, 2009 as discussed in Note 11.

Lease Commitments and Other Obligations

The Company leases approximately 103,000 square feet for its operations centers and administrative offices as well as certain tower sites under non-cancelable operating leases. The

ATLANTIC TELE-NETWORK, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

13. COMMITMENTS AND CONTINGENCIES (Continued)

Company's obligation for payments under these leases is as follows at December 31, 2009 (in thousands):

2010	\$ 9,826
2011	6,750
2012	5,864
2013	3,634
2014	1,804
Thereafter	4,521
Total obligations under operating leases	<u>\$32,399</u>

Rent expense for the years 2007, 2008 and 2009 was \$5.0 million, \$6.1 million and \$8.4 million, respectively.

14. RELATED-PARTY TRANSACTIONS

Choice Television Assets

In December 2007, the Company wrote down its investment in the television assets of Choice and began exploring strategic alternatives for their use or disposition. Choice discontinued its wireless television service in May 2009. In November 2009, upon approval by the Audit Committee of the Board of Directors, the Company entered into an agreement with Cornelius B. Prior, Jr., the Chairman and the father of the Company's Chief Executive Officer, to sell to Mr. Prior such assets of Choice for \$400,000 in cash. The assets, which are located in the US Virgin Islands, consisted primarily of television transmission facilities, subscriber equipment and satellite receiver equipment. The sale to Mr. Prior was completed in December 2009.

Haiti

In 2001, the Company curtailed the operations and funding of its ATN-Haiti and Transnet S.A. subsidiaries (the "Haitian Subsidiaries"), wrote-down its investment and began exploring strategic alternatives for the use or disposition of the remaining assets of the Haitian Subsidiaries. In May 2006, the Company's Board of Directors authorized the Company to enter into discussions to sell, at fair value, subject to review and final approval by the Audit Committee, the remaining assets of the Haitian Subsidiaries, consisting primarily of an office building and 13 tower sites located in Haiti, to Cornelius B. Prior, Jr., the Company's Executive Chairman, who is also the father of the Company's Chief Executive Officer.

In August 2007, the Company, upon final approval by the Company's Board of Directors and Audit Committee, completed the sale of the remaining assets of the Haitian Subsidiaries to Access Haiti, S.A., a Haitian company in which Mr. Prior is a significant equity holder, for \$750,000 and the release by Access Haiti, S.A. of certain indebtedness of Transnet S.A. In connection with the sale, Mr. Prior agreed to indemnify the Company for any claims made against the Haitian Subsidiaries by creditors and vendors of the Haitian Subsidiaries in excess of \$200,000 in the aggregate. In addition, pursuant to the purchase agreement Mr. Prior purchased the Company's remaining equity interests in the Haitian Subsidiaries for \$1 on May 6, 2008.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

14. RELATED-PARTY TRANSACTIONS (Continued)

Mobile Network Services, LLC

During 2008, the Company's Commnet subsidiary purchased certain equipment from Mobile Network Services, LLC, ("MNS") for approximately \$280,000. The equipment was purchased through several transactions on market terms consistent with Commnet's ordinary business practices. MNS was founded in 2007 by Brian A. Schuchman, one of the Company's directors, who, at the time, beneficially owned approximately 28% of the equity interests in MNS and was Chairman of MNS's Board of Managers. Michael T. Prior, the Company's President, Chief Executive Officer and Director, and Justin D. Benincasa, the Company's Chief Financial Officer and Treasurer, each beneficially owned 1.25% or less of the equity interests in MNS at the time of these transactions. The transactions were ratified and approved by the Company's Audit Committee.

In September of 2009, each of Messrs. Schuchman, Prior and Benincasa redeemed their equity interests in MNS, and Mr. Schuchman resigned from MNS's Board of Managers. MNS is no longer owned or operated by the directors, officers or employees of the Company or its subsidiaries.

15. SEGMENT REPORTING

The Company has five reportable segments for separate disclosure in accordance with the FASB's authoritative guidance on disclosures about segments of an enterprise. Those five segments are: i) Integrated Telephony-International, which generates all of its revenues in Guyana and has all of its assets located in Guyana, ii) Rural Wireless, which generates all of its revenues in the United States and has all of its assets located in the United States, iii) Island Wireless, which generates its revenues in and has its assets in Bermuda and Turks and Caicos, iv) Integrated Telephony-Domestic, which generates all of its revenues and has all of its assets located in the United States and v) Wireless Data, which generates all of its revenues in and has all of its assets located in the U.S Virgin Islands. The operating segments are managed separately because each offers different services and serves different markets.

Island Wireless became a reportable segment upon completion of BDC's share repurchase and resulting increase in the Company's equity interest in BDC, effective May 15, 2008. Effective May 31, 2009, the Company discontinued providing wireless television services, and therefore has changed the name of its segment from "Wireless Television and Data" to "Wireless Data". The Company determined that the wireless television services operations were immaterial for reporting as discontinued operations in the Company's financial statements.
