The Issuer will not be a party to any such arrangements with Investors (other than the Lead Manager) in connection with the offer or sale of the Notes and, accordingly, this Securities Note, the Registration Document and the Summary Note will not contain such information and an Investor must obtain such information from the Offeror. Subject as provided above, neither the Issuer nor any of its affiliates shall have any responsibility to an Investor in respect of such information.

Each Noteholder takes full responsibility for its decision to purchase any Notes and the terms on which it does so.

The Prospectus does not constitute an offer of, or an invitation by or on behalf of, the Issuer or the Lead Manager to subscribe for, or purchase, any Notes. ## **Risk Factors**

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including but not limited to investments in currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Lead Manager, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition. Some or all of the risks highlighted below could adversely affect the trading price of the Notes or the rights of investors under the Notes and, as a result, investors could lose some or all of their investment.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below and the risk factors below should be read in conjunction with the risk factors incorporated by reference in the Registration Document from pages 10 and 11 of the Base Prospectus.

### **Market, Liquidity and Yield Considerations**

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

### **Legal Investment Considerations**

#### *General*

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

### **Risk Warning**

There are significant risks associated with the Notes including, but not limited to:

- the imposition of restrictions that would affect the acquisition, the holding and/or the transfer of RUB;
- exchange rate risk;
- settlement risk;

- price risk; and
- liquidity risk.

Investors should consult their own financial, legal, accounting and tax advisers about the risks associated with an investment in these Notes, the appropriate tools to analyse that investment, and the suitability of the investment in each investor's particular circumstances. No investor should purchase the Notes unless that investor understands and has sufficient financial resources to bear the price, market liquidity, structure and other risks associated with an investment in these Notes (including, but not limited to, any political, economic and other factors which could affect the value of, and return on, the Notes).

#### *Economic instability in Russia*

Since the dissolution of the Soviet Union, the Russian economy has experienced:

- significant declines in gross domestic product;
- hyperinflation;
- an unstable currency;
- high government debt relative to gross domestic product;
- a weak banking system providing limited liquidity to Russian enterprises;
- high levels of loss-making enterprises that continued to operate due to the lack of effective bankruptcy proceedings;
- widespread tax evasion;
- growth of "black" and "grey" market economies;
- high levels of corruption and the penetration of organised crime into the economy;
- pervasive capital flight;
- significant increases in unemployment and underemployment; and
- high poverty levels amongst the Russian population.

The Russian economy has been subject to abrupt downturns. In particular, on 17 August 1998, in the face of a rapidly deteriorating economic situation, the Russian government defaulted on its RUB-denominated securities, the Central Bank of Russia ("CBR") stopped its support of the RUB and a temporary moratorium was imposed on certain hard currency payments. These actions resulted in an immediate and severe devaluation of the RUB and a sharp increase in the rate of inflation, a dramatic decline in the prices of Russian debt and equity securities and an inability of Russian issuers to raise funds in the international capital markets.

These problems were aggravated by the near collapse of the Russian banking sector after the events of 17 August 1998, as evidenced by the revocation of the banking licences of a number of major Russian banks. This further impaired the ability of the banking sector to act as a consistent source of liquidity to Russian companies, and resulted in the losses of bank deposits in some cases.

Concurrently with the implementation of political reforms, the Russian government has been attempting to carry out economic reforms and stabilise the economy. These policies have involved removing pricing restrictions, reducing defence expenditures and subsidies, privatising state-owned enterprises, reforming the tax and bankruptcy systems, and introducing legal structures designed to facilitate private, market-based activities, foreign trade and investment. Of late, the pace of these economic reforms has slowed, and there appears to be a disagreement within the Russian government on how to proceed with further proposed reforms.

In addition, the economic situation in Russia has been adversely affected by weakening economic conditions and the turmoil in the global financial markets. In particular, Russia has experienced declining economic growth, increasing rates of unemployment as well as decreasing asset values, volatile interest rates and a volatile RUB rate. Moreover, fluctuations in international oil and gas prices, the consequences of uncertain monetary policy in Russia, budget deficit or other factors, could adversely affect Russia's economy and the value of the Notes as they will be denominated in RUB.

The ability of the Russian government and the CBR to limit the volatility of the RUB will depend on many political and economic factors. According to the CBR, inflation in Russia was 12.0% in 2003, 11.7% in 2004 and, according to the Russian Federal Service for State Statistics, 10.9% in 2005, 9.0% in 2006, 11.9% in 2007, 13.3% in 2008, 8.8% in 2009 and 8.7% in 2010. Any return to high and sustained inflation could lead to market instability and new financial crises, which could lead to, among other things, a fall of the RUB and/or an increase of RUB interest rates and, thus, adversely affect the value of the Notes.

#### *Settlement Disruption Events and Calculation of the Exchange Rate*

The Notes are subject to Settlement Disruption Events in the Russian Federation whereby non-residents of the Russian Federation may be subject to regulations restricting their ability to, among others, obtain, purchase, hold or transfer RUB. The Russian Federation has a long history of maintaining currency restrictions, and notwithstanding recent measures to liberalise the currency regime, investors face the risk that restrictions may be imposed during the term of the Notes that would constitute a Settlement Disruption Event (as determined by the Calculation Agent). Such an event may result in a delay of payments due from the Issuer under the Notes and in such payments having to be converted and paid in USD rather than RUB.

Investors should be aware that the methodology for determining the Exchange Rate for converting RUB into USD may result in a Fixed Interest Amount, the Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated. It is not certain that the Calculation Agent will be able to establish a meaningful Exchange Rate for converting RUB into USD rate in such a scenario. The determination of the Exchange Rate by the Calculation Agent may result in a rate of zero, and in this case a Fixed Interest Amount, the Final Redemption Amount and/or any Early Redemption Amount (as the case may be) of the Notes payable by the Issuer would also be zero.

Investors should also be aware that a Fixed Interest Date, the Maturity Date and/or the Early Redemption Date, as the case may be, may be postponed and that no additional amounts shall be payable by the Issuer in respect of any delay in payment resulting from such postponement.

#### *Risks associated with debt instruments that are both denominated and settled in RUB*

Offerings of debt instruments that are both denominated and settled in RUB, such as the Notes, are a recent phenomenon in the international capital markets. This, coupled with inexperience of the clearing systems and the Russian and international banking systems in dealing with RUB payments and RUB accounts, could lead to unforeseen difficulties, which may have an adverse effect on the liquidity, marketability or trading price of the Notes. In particular:

- (i) RUB became an eligible settlement currency of Clearstream, Luxembourg with effect from 15 January 2007 and of Euroclear with effect from 13 February 2007. Due to the lack of experience of the clearing systems with settling, clearing and trading debt instruments that are both denominated and settled in RUB, there can be no guarantee that such clearing, settlement and trading procedures will progress smoothly or in a way which is comparable to procedures carried out with respect to instruments denominated in more conventionally settled currencies, such as USD or euros.

- (ii) Russian law previously prohibited or otherwise severely restricted the transfer and holding of RUB offshore and their repatriation onshore. Although these restrictions have been lifted for non-residents (save for some restrictions which apply to the regime of residents' accounts held outside of Russia), there is still no specific tested framework under Russian law for transferring or holding RUB in offshore accounts. As with much recent Russian legislation, there is extremely limited or non-existent regulatory or court practice in interpreting these regulations. If restrictions or prohibitions were placed on the transfer and holding of RUB offshore or if such legislation was reinterpreted by the Russian regulators or courts to the effect that restrictions were still deemed to apply to the transfer and holding of RUB offshore, this would severely hinder Noteholders' ability to receive payments under the Notes or proceeds from the sale of the Notes.
- (iii) Payments under the Notes and proceeds from the sale of the Notes will be made in RUB. All payments of RUB to, from, or between RUB accounts located outside Russia will involve the use of onshore correspondent accounts within the Russian banking system. The Russian banking system is less developed than many of its Western counterparts and at present has little experience in dealing with payments relating to eurobonds or similar international debt instruments. Consequently there is a risk that payments under the Notes and proceeds from the sale of the Notes, which need to pass through the Russian banking system, will be subject to delays and disruptions which may not exist in more mature banking markets.
- (iv) In order for Noteholders to receive payments on the Notes and proceeds from the sale of the Notes from the clearing systems in RUB, they will need to hold a bank account denominated in RUB. The administrative difficulties associated with opening RUB accounts outside Russia are significant. Non-resident Noteholders may also encounter considerable procedural difficulties with opening RUB accounts onshore in Russia. There can therefore be no guarantee that Noteholders will be able to successfully open up a RUB bank account either offshore or in Russia or transfer RUB payments made under the Notes out of the clearing systems.

## **Investor Suitability**

*The purchase of the Notes involves substantial risks and is not suitable for all investors*

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it. None of the Issuer, the Lead Manager or the Calculation Agent acts as an investment adviser, or assumes any fiduciary obligation, to any prospective purchaser of the Notes.

In particular, but without prejudice to the generality of the above paragraph, prospective investors should note that an investment in the Notes is only suitable for investors who:

- (i) have the requisite knowledge and experience in financial and business matters to evaluate the merits and risks of an investment in the Notes;
- (ii) are capable of bearing the economic risk of an investment in the Notes for an indefinite period of time;
- (iii) are acquiring the Notes for their own account for investment, not with a view to resale, distribution or other disposition of the Notes (subject to any applicable law requiring that the disposition of the investor's property be within its control); and
- (iv) who will recognise that it may not be possible to make any transfer of the Notes for a substantial period of time, if at all.

*Understanding and appropriateness of the investment*

Each investor (a) should be an investor with substantial knowledge of and/or experience in financial and business matters that it is capable of evaluating the merits and risks (including tax, legal, regulatory and accounting) of an investment in the Notes because the Notes are not an appropriate investment for investors who are unsophisticated with respect to such transactions; (b) should be financially able to bear such risks; (c) in making such investment shall not rely on any advice or recommendations of or any information, representation or warranty provided by the Lead Manager, the Calculation Agent and/or any of their respective affiliates, the Issuer or any of their respective representatives; (d) should recognise that it may not be possible to make any transfer of the Notes for a substantial period of time; and (e) should seek advice from such advisers as such investor considers necessary and appropriate, to enable such investor to make its own independent decision with regard to the suitability and appropriateness of the Notes as an investment for its own account. Each investor should be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes. None of the Issuer, the Lead Manager or any of their respective representatives makes any representation and has given, nor will give, any advice concerning the appropriate accounting treatment or possible tax consequences of purchasing the Notes. Each investor should consult its own financial, tax, accounting and legal advisers about risks associated with an investment in the Notes and the suitability of investing in such Notes in light of the investor's particular circumstances.

Any information communicated (in any manner) to investors by the Issuer or the Lead Manager should not be relied upon as investment advice or as a recommendation to invest in the Notes, which shall include, amongst other things, any such information, explanations or discussions concerning the terms and conditions of the Notes, or related features.

Investment in the Notes should comply, and be fully consistent, with all investment policies, guidelines and restrictions applicable to an investor. It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Lead Manager should not be relied upon, nor shall such information be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes. Each investor should be aware that any return on the Notes may not exceed or even equal the return that might have been achieved had the amount of its initial investment been placed on deposit for the same period.

Each investor should be aware that none of the Issuer, the Lead Manager or the Calculation Agent is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

#### *Investment considerations relating to the Notes*

Investment in the Notes carries with it a degree of risk including, but not limited to, the risks referred to below.

The level of the RUB/USD foreign exchange rate may go down as well as up. Prospective investors may receive an amount less than their initial investment.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security. Such risks include, without limitation, changes in the level or value of the RUB/USD foreign exchange rate and the possibility that a holder of the Notes will receive a lower amount of interest, repayment or other consideration than the holder expected. Depending on the exchange rate to be determined by the Calculation

Agent upon a Settlement Disruption Event, such amount may even be zero. The Issuer has no control over a number of matters that are important in determining the existence, magnitude and longevity of such risks and their results, including economic, financial and political events.

Past performance of the RUB/USD foreign exchange rate is not necessarily indicative of future performance.

The Calculation Agent may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes including, without limitations, in relation to the role of the Calculation Agent in determining the occurrence of a Settlement Disruption Event and in determining the exchange rate for converting RUB into USD upon the occurrence of a Settlement Disruption Event. The Calculation Agent is required to carry out its duties as Calculation Agent in good faith and using its reasonable judgement, however each investor should be aware that any such determination may potentially adversely affect the amount payable to Noteholders under the Notes and that potential conflicts of interest could arise.

*Risks relating to the Notes*

No assurances can be made that any meaningful secondary market will develop in the Notes. The Lead Manager may, but is not obligated to, make a market in the Notes. The Lead Manager may discontinue any market-making activities at any time without notice. In addition, the Notes may not be transferred except to qualified investors in accordance with applicable private offering rules. If an active public market for the Notes does not develop, the market prices and liquidity of the Notes may be adversely affected.

Volatility is the term used to describe the size and frequency of price and/or market fluctuations. If the volatility, or anticipated volatility, of the RUB/USD foreign exchange rate increases or decreases, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes. In general, if interest rates increase, it is expected that the trading value of the Notes will increase and, conversely, if interest rates decrease, it is expected that the trading value of the Notes will decrease. If interest rates increase or decrease in markets based on any of the RUB or the USD, the trading value of the Notes may be adversely affected. Interest rates may also affect the economies of the Russian Federation or the United States, and, in turn, the exchange rates and therefore the value of the RUB/USD foreign exchange rate.

If the Calculation Agent determines that a Settlement Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

**THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" ON PAGES 10 AND 11 OF THE BASE PROSPECTUS.**

<b>37</b>	Additional Information:	The provisions set out in Annex A shall apply to the Terms and Conditions in accordance herewith.
	(i) Investment Considerations:	Russian Rouble Exchange Risk

The Notes are denominated in Russian Rouble. Currency exchange rates may be volatile and, in certain circumstances, may affect the return to the holder of the Notes. The Government of the Russian Federation can from time to time intervene in the foreign exchange market. These interventions or other governmental actions could adversely affect the value of the Notes in U.S. Dollars, as well as the actual yield (in U.S. Dollar terms) on the Notes and the amount payable at maturity. Even in the absence of governmental action directly affecting currency exchange rates, political or economic developments in the Russian Federation or elsewhere could lead to significant and sudden changes in the exchange rate between the Russian Rouble and the U.S. Dollar.

**Notes are Not Liquid Instruments**

The Notes are not actively traded in any financial market and there may exist at times only limited markets for the Notes resulting in low or non-existent volumes of trading in the Notes and such obligations, and therefore a lack of liquidity and price volatility of the Notes and such obligations.

**38** Total Commissions: 1.625 per cent.

If a Settlement Disruption Event no longer subsists, the Calculation Agent shall notify the Issuer and the Agent thereof as soon as practicable on or after the Business Day on which the Settlement Disruption Event no longer subsists (but in no event later than one (1) Business Day thereafter) whereupon the Agent shall as soon as practicable thereafter (but in no event later than one (1) Business Day after receipt of the aforementioned notice from the Calculation Agent) notify the Noteholders thereof (in accordance with Condition 13 of the Notes).

If only one Reference Dealer provides a firm quote then such quote shall apply, and if no Reference Dealer provides such a firm quote, then the Calculation Agent, acting in good faith and in a commercially reasonable manner, shall establish the Exchange Rate in its sole discretion, which may result in an exchange rate of zero;

Negative Pledge .....	The terms of the Notes will contain a negative pledge in respect of bonds, notes or other evidence of indebtedness issued or guaranteed by the Issuer which are listed or quoted on any stock exchange or other organised securities market.
Cross-Default .....	The terms of the Notes will contain a cross default clause in respect of bonds, notes or similar obligations which have been issued, assumed or guaranteed by the Issuer and in respect of which a default shall continue for a period of 90 days.
Rating.....	The Issuer and/or its debt obligations have been assigned an AAA credit rating from Standard & Poor's Ratings Services, a division of The McGraw Hill Companies, Inc. (together with any of its affiliates or their successors, "S&P") since 1991, an Aaa credit rating from Moody's Investors Service Limited Corporation (together with any of its affiliates or their successors, "Moody's") since 1992 and an AAA credit rating from Fitch Ratings Limited (together with any of its affiliates or their successors, "Fitch") since 2002. As defined by S&P, an "AAA" rating means that the ability of the Issuer to meet its financial commitment on its obligations is extremely strong. As defined by Moody's, an "Aaa" rating means that the Issuer's ability to meet its financial obligations is judged to be of the highest quality, with minimal credit risk. As defined by Fitch, an "AAA" rating denotes the lowest expectation of credit risk and means that the Issuer has an

exceptionally strong capacity for timely payment of its financial commitments.

A rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.

Credit ratings included or referred to in this Prospectus have been issued by S&P, Moody's and Fitch, none of which is established and registered in the European Union under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies.

Listing..... Application has been made for Notes issued under the Programme to be admitted on the Official List of the UK Listing Authority and to be admitted to trading on the Regulated Market (within the meaning Directive 2004/39/EC of the European Parliament and of the Council on Markets in financial instruments) of the London Stock Exchange plc with effect from 9 February 2011 or as soon as practicable thereafter. No assurance can be given that such listing and admission to trading will be obtained on or prior to such date, or, if obtained, that it will be maintained.

Governing Law ..... English

Selling Restrictions..... There are restrictions on the sale of Notes in the United Kingdom, the European Economic Area, Russia, The Netherlands, Japan, France, Singapore and other jurisdictions (and other restrictions) that may be applicable to a particular issue of Notes and the distribution of offering material.

The Issuer makes and guarantees loans and makes equity investments in its countries of operation.

The business address of each of the directors is the principal office of the Issuer, which is at One Exchange Square, London EC2A 2JN.

## **Use of Proceeds**

The net proceeds of the issue of the Notes (which are expected to be RUB992,975,000.00) will be included in the ordinary capital resources of the Issuer and used in its ordinary operations.

## **Risk Factors**

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including, but not limited to, investments in exotic currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Lead Manager, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below.

### **Risk Factors relating to the Notes**

#### **Market, Liquidity and Yield Considerations**

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

Past performance of the RUB/USD rate is not necessarily indicative of future performance.

If the volatility or anticipated volatility, of the RUB/USD rate increases or decreases, the trading value of the Notes may be adversely affected.

We expect that changes in interest rates will affect the trading value of the Notes.

#### **Legal Investment Considerations**

##### *General*

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

## **Risk Factors relating to the Issuer**

The Issuer makes loans and equity instruments and issues guarantees primarily to the private sector in its countries of operation. Changes in the macroeconomic environment and financial markets in these countries may affect the creditworthiness of the Issuer's clients. Even severe changes in the macroeconomic and financial climate should, however, not affect the Issuer's ability to repay its borrowings, which is assured above all through the Issuer's prudent provisioning policy, ample liquidity, and limitations in the Agreement on its outstanding loans, equity investment and guarantees to the total amount of its subscribed capital, reserves and surpluses.

Of the Issuer's €21 billion of authorised share capital, €6 billion has been paid in. €15 billion is callable to cover the unlikely eventuality that the Issuer encounters difficulties meeting its liabilities. The Issuer has among the highest quality callable capital of any multilateral development bank, with approximately 60 per cent. from shareholders rated AAA/Aaa and over 95 per cent. from shareholders rated investment grade, by at least one of S&P and Moody's at 11 August 2010<sup>1</sup>. It is therefore unlikely that a call on the Issuer's shareholders will not be honoured.

Since the second half of 2007, disruption to the global financial markets, the re-pricing of credit risk and increased volatility have created challenging global market conditions and adversely affected the economies of many countries. It is difficult to predict how long these conditions will continue to exist and the effectiveness of measures taken by many countries to reduce their budget deficits and bring about recovery. The operations and financial position of the Issuer may be affected by any lengthy continuation of such conditions.

## **Risk Warning**

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk, settlement risk and liquidity risk.

The Notes are subject to Settlement Disruption Events in the Russian Federation whereby non-residents of the Russian Federation may be subject to regulations restricting their ability to, among others, obtain, purchase, hold or transfer RUB. The Russian Federation has a long history of maintaining currency restrictions, and notwithstanding recent measures to liberalise the currency regime, investors face the risk that restrictions may be imposed during the term of the Notes that would constitute a Settlement Disruption Event. Such an event may result in a delay of payments due from the Issuer under the Notes and in such payments having to be converted and paid in USD rather than RUB.

Investors should be aware that the Fixed Interest Amount, Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated. It is not certain that a meaningful Exchange Rate for converting RUB into USD rate can be established in such a scenario, and the payments received by an investor can be far lower than expected, and even zero.

Offerings of debt instruments denominated and settled in RUB are a recent phenomenon in the international capital markets. This, coupled with the inexperience of the clearing systems and the Russian and international banking systems in dealing with RUB payments and RUB accounts, could lead to unforeseen difficulties, which may have an adverse effect on the liquidity, marketability or trading price of the Notes.

---

<sup>1</sup> To the extent S&P and Moody's have rated shareholders of the Issuer at different levels, the higher of these ratings has been used for the purpose of these calculations.

## **Investor Suitability**

*The purchase of the Notes involves substantial risks and is not suitable for all investors*

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it.

*Understanding and appropriateness of the investment*

Each investor should have the knowledge and experience to evaluate material risks and be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes.

Any information communicated (in any manner) to investors by the Issuer or the Lead Manager should not be relied upon as investment advice or as a recommendation to invest in the Notes.

It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Lead Manager should not be relied upon, nor shall such be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes.

Each investor should be aware that none of the Issuer, the Lead Manager nor The Toronto-Dominion Bank acting as Calculation Agent (the "Calculation Agent") is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

*Investment considerations relating to the Notes*

The Calculation Agent may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes.

No assurances can be made that any meaningful secondary market will develop in the Notes.

**THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" IN THE BASE PROSPECTUS.**

affect the value of the Notes in U.S. Dollars, as well as the actual yield (in U.S. Dollar terms) on the Notes and the amount payable at maturity. Even in the absence of governmental action directly affecting currency exchange rates, political or economic developments in the Russian Federation or elsewhere could lead to significant and sudden changes in the exchange rate between the Russian Rouble and the U.S. Dollar.

**Notes are Not Liquid Instruments**

The Notes are not actively traded in any financial market and there may exist at times only limited markets for the Notes resulting in low or non-existent volumes of trading in the Notes and such obligations, and therefore a lack of liquidity and price volatility of the Notes and such obligations.

38 Total Commissions: 1.625 per cent.

### **Settlement Disruption Event and Fallback Provisions**

#### Settlement Disruption Event and Fallback Provisions

All payments in respect of the Notes will be made in RUB, subject to the occurrence of a Settlement Disruption Event (as defined below) and will in all cases be subject to any fiscal or other laws applicable thereto. If the Calculation Agent (as defined below) determines (in its sole discretion acting in good faith and in a commercially reasonable manner) that a Settlement Disruption Event has occurred or is subsisting during the Determination Period (as defined below):

A. The Calculation Agent shall notify the Issuer and the Agent of its determination as soon as practicable after making such determination (but in no event later than 8.00 a.m. London time one (1) Business Day after the last Day of the Determination Period) whereupon the Agent shall as soon as practicable thereafter (but in no event later than one (1) Business Day after receipt of the aforementioned notice from the Calculation Agent) notify the Noteholders thereof (in accordance with Condition 13 of the Notes), and

B. Noteholders will not be entitled to any amounts in respect of the Notes until the earlier to occur of (i) the day falling two Business Days after the day on which the Issuer is notified by the Calculation Agent that a Settlement Disruption Event no longer subsists and (ii) the Postponed Fixed Interest Date (as defined below), the Postponed Maturity Date (as defined below), or the Postponed Early Redemption Date (as defined below), as the case may be.

If a Settlement Disruption Event no longer subsists, the Calculation Agent shall notify the Issuer and the Agent thereof as soon as practicable on or after the Business Day on which the Settlement Disruption Event no longer subsists (but in no event later than one (1) Business Day thereafter) whereupon the Agent shall as soon as practicable thereafter (but in no event later than one (1) Business Day after receipt of the aforementioned notice from the Calculation Agent) notify the Noteholders thereof (in accordance with Condition 13 of the Notes).

If any amount is to be paid on a Postponed Fixed Interest Date, Postponed Maturity Date or Postponed Early Redemption Date (as the case may be), regardless of whether a Settlement Disruption Event is still subsisting at such time, payment shall be made in United States Dollars ("USD") and shall be calculated by the Calculation Agent (and promptly notified to the Agent and the Issuer (but in no event later than two Business Days before the Postponed Fixed Interest Date, Postponed Maturity Date or Postponed Early Redemption Date (as the case may be)) in an amount per Calculation Amount which shall be produced by the following provisions, such amount to be rounded to the nearest whole cent (with 0.5 cent being rounded upwards):

For the avoidance of doubt, no additional amounts shall be payable by the Issuer in respect of any delay in payment beyond the originally scheduled Fixed Interest Date, Maturity Date, or as the case may be, Early Redemption Date (in each case, as adjusted, if appropriate, in accordance with the Following Business Day Convention) to the Postponed Fixed Interest Date, Postponed Maturity Date or Postponed Early Redemption Date (as appropriate) because of the operation of the provisions of these Settlement Disruption Events and Fallback Provisions.

For the purposes of these provisions:

"Business Day" means any day on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealings in foreign exchange and foreign currency deposits) in London, New York City and Moscow.

"Calculation Agent" means The Toronto-Dominion Bank in accordance with the provisions of the Calculation Agency Agreement entered into between the Issuer and the Calculation Agent dated 22nd August 2007 (as amended and/or supplemented from time to time). The determination by the Calculation Agent of any amount or of any state of affairs, circumstance, event or other matter, or the formation of any opinion or the exercise of any discretion required or permitted to be determined, formed or exercised by the Calculation Agent under the Notes

The highest and lowest of such quotes will be disregarded and the arithmetic mean of the remaining quotations shall be the Exchange Rate, provided, however, that if fewer than four (but at least two) Reference Dealers provide such a firm quote then the average of the quotes actually obtained shall apply. If only one Reference Dealer provides a firm quote then such quote shall apply, and if no Reference Dealer provides such a firm quote, then the Calculation Agent, acting in good faith and in a commercially reasonable manner, shall establish the Exchange Rate in its sole discretion, which may result in an exchange rate of zero;

**"Postponed Fixed Interest Date"** means the tenth Business Day following the originally scheduled Fixed Interest Date;

(a) the imposition of laws or regulations by the Central Banking Authority or other legislative, governmental or regulatory authority of Russia which (i) require non-residents of Russia to obtain permission from such Central Banking Authority or other authority to obtain RUB, or (ii) otherwise restrict a non-resident's ability to obtain RUB or (iii) otherwise regulate the purchase or holding of RUB such that costs are imposed in obtaining RUB which would not be imposed in the absence of such regulations, or (iv) has the direct or indirect effect of hindering, limiting or restricting the transfer of RUB from Russia to recipients resident in another country; and

The Issuer will not be a party to any such arrangements with Investors (other than the Lead Manager) in connection with the offer or sale of the Notes and, accordingly, this Securities Note, the Registration Document and the Summary Note will not contain such information and an Investor must obtain such information from the Offeror. Subject as provided above, neither the Issuer nor any of its affiliates shall have any responsibility to an Investor in respect of such information.

## **Risk Factors**

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including but not limited to investments in currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Lead Manager, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition. Some or all of the risks highlighted below could adversely affect the trading price of the Notes or the rights of investors under the Notes and, as a result, investors could lose some or all of their investment.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below and the risk factors below should be read in conjunction with the risk factors incorporated by reference in the Registration Document from pages 10 and 11 of the Base Prospectus.

### **Market, Liquidity and Yield Considerations**

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

### **Legal Investment Considerations**

#### *General*

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

### **Risk Warning**

There are significant risks associated with the Notes including, but not limited to:

- the imposition of restrictions that would affect the acquisition, the holding and/or the transfer of RUB;
- exchange rate risk;
- settlement risk;

- price risk; and
- liquidity risk.

Investors should consult their own financial, legal, accounting and tax advisers about the risks associated with an investment in these Notes, the appropriate tools to analyse that investment, and the suitability of the investment in each investor's particular circumstances. No investor should purchase the Notes unless that investor understands and has sufficient financial resources to bear the price, market liquidity, structure and other risks associated with an investment in these Notes (including, but not limited to, any political, economic and other factors which could affect the value of, and return on, the Notes).

#### *Economic instability in Russia*

Since the dissolution of the Soviet Union, the Russian economy has experienced:

- significant declines in gross domestic product;
- hyperinflation;
- an unstable currency;
- high government debt relative to gross domestic product;
- a weak banking system providing limited liquidity to Russian enterprises;
- high levels of loss-making enterprises that continued to operate due to the lack of effective bankruptcy proceedings;
- widespread tax evasion;
- growth of "black" and "grey" market economies;
- high levels of corruption and the penetration of organised crime into the economy;
- pervasive capital flight;
- significant increases in unemployment and underemployment; and
- high poverty levels amongst the Russian population.

The Russian economy has been subject to abrupt downturns. In particular, on 17 August 1998, in the face of a rapidly deteriorating economic situation, the Russian government defaulted on its RUB-denominated securities, the Central Bank of Russia ("CBR") stopped its support of the RUB and a temporary moratorium was imposed on certain hard currency payments. These actions resulted in an immediate and severe devaluation of the RUB and a sharp increase in the rate of inflation, a dramatic decline in the prices of Russian debt and equity securities and an inability of Russian issuers to raise funds in the international capital markets.

These problems were aggravated by the near collapse of the Russian banking sector after the events of 17 August 1998, as evidenced by the revocation of the banking licences of a number of major Russian banks. This further impaired the ability of the banking sector to act as a consistent source of liquidity to Russian companies, and resulted in the losses of bank deposits in some cases.

Concurrently with the implementation of political reforms, the Russian government has been attempting to carry out economic reforms and stabilise the economy. These policies have involved removing pricing restrictions, reducing defence expenditures and subsidies, privatising state-owned enterprises, reforming the tax and bankruptcy systems, and introducing legal structures designed to facilitate private, market-based activities, foreign trade and investment. Of late, the pace of these economic reforms has slowed, and there appears to be a disagreement within the Russian government on how to proceed with further proposed reforms.

In addition, the economic situation in Russia has been adversely affected by weakening economic conditions and the turmoil in the global financial markets. In particular, Russia has experienced declining economic growth, increasing rates of unemployment as well as decreasing asset values, volatile interest rates and a volatile RUB rate. Moreover, fluctuations in international oil and gas prices, the consequences of uncertain monetary policy in Russia, budget deficit or other factors, could adversely affect Russia's economy and the value of the Notes as they will be denominated in RUB.

The ability of the Russian government and the CBR to limit the volatility of the RUB will depend on many political and economic factors. According to the CBR, inflation in Russia was 12.0% in 2003, 11.7% in 2004 and, according to the Russian Federal Service for State Statistics, 10.9% in 2005, 9.0% in 2006, 11.9% in 2007, 13.3% in 2008, 8.8% in 2009 and 8.7% in 2010. Any return to high and sustained inflation could lead to market instability and new financial crises, which could lead to, among other things, a fall of the RUB and/or an increase of RUB interest rates and, thus, adversely affect the value of the Notes.

#### *Settlement Disruption Events and Calculation of the Exchange Rate*

The Notes are subject to Settlement Disruption Events in the Russian Federation whereby non-residents of the Russian Federation may be subject to regulations restricting their ability to, among others, obtain, purchase, hold or transfer RUB. The Russian Federation has a long history of maintaining currency restrictions, and notwithstanding recent measures to liberalise the currency regime, investors face the risk that restrictions may be imposed during the term of the Notes that would constitute a Settlement Disruption Event (as determined by the Calculation Agent). Such an event may result in a delay of payments due from the Issuer under the Notes and in such payments having to be converted and paid in USD rather than RUB.

Investors should be aware that the methodology for determining the Exchange Rate for converting RUB into USD may result in a Fixed Interest Amount, the Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated. It is not certain that the Calculation Agent will be able to establish a meaningful Exchange Rate for converting RUB into USD rate in such a scenario. The determination of the Exchange Rate by the Calculation Agent may result in a rate of zero, and in this case a Fixed Interest Amount, the Final Redemption Amount and/or any Early Redemption Amount (as the case may be) of the Notes payable by the Issuer would also be zero.

Investors should also be aware that a Fixed Interest Date, the Maturity Date and/or the Early Redemption Date, as the case may be, may be postponed and that no additional amounts shall be payable by the Issuer in respect of any delay in payment resulting from such postponement.

#### *Risks associated with debt instruments that are both denominated and settled in RUB*

Offerings of debt instruments that are both denominated and settled in RUB, such as the Notes, are a recent phenomenon in the international capital markets. This, coupled with inexperience of the clearing systems and the Russian and international banking systems in dealing with RUB payments and RUB accounts, could lead to unforeseen difficulties, which may have an adverse effect on the liquidity, marketability or trading price of the Notes. In particular:

- (i) RUB became an eligible settlement currency of Clearstream, Luxembourg with effect from 15 January 2007 and of Euroclear with effect from 13 February 2007. Due to the lack of experience of the clearing systems with settling, clearing and trading debt instruments that are both denominated and settled in RUB, there can be no guarantee that such clearing, settlement and trading procedures will progress smoothly or in a way which is comparable to procedures carried out with respect to instruments denominated in more conventionally settled currencies, such as USD or euros.

- (ii) Russian law previously prohibited or otherwise severely restricted the transfer and holding of RUB offshore and their repatriation onshore. Although these restrictions have been lifted for non-residents (save for some restrictions which apply to the regime of residents' accounts held outside of Russia), there is still no specific tested framework under Russian law for transferring or holding RUB in offshore accounts. As with much recent Russian legislation, there is extremely limited or non-existent regulatory or court practice in interpreting these regulations. If restrictions or prohibitions were placed on the transfer and holding of RUB offshore or if such legislation was reinterpreted by the Russian regulators or courts to the effect that restrictions were still deemed to apply to the transfer and holding of RUB offshore, this would severely hinder Noteholders' ability to receive payments under the Notes or proceeds from the sale of the Notes.
- (iii) Payments under the Notes and proceeds from the sale of the Notes will be made in RUB. All payments of RUB to, from, or between RUB accounts located outside Russia will involve the use of onshore correspondent accounts within the Russian banking system. The Russian banking system is less developed than many of its Western counterparts and at present has little experience in dealing with payments relating to eurobonds or similar international debt instruments. Consequently there is a risk that payments under the Notes and proceeds from the sale of the Notes, which need to pass through the Russian banking system, will be subject to delays and disruptions which may not exist in more mature banking markets.
- (iv) In order for Noteholders to receive payments on the Notes and proceeds from the sale of the Notes from the clearing systems in RUB, they will need to hold a bank account denominated in RUB. The administrative difficulties associated with opening RUB accounts outside Russia are significant. Non-resident Noteholders may also encounter considerable procedural difficulties with opening RUB accounts onshore in Russia. There can therefore be no guarantee that Noteholders will be able to successfully open up a RUB bank account either offshore or in Russia or transfer RUB payments made under the Notes out of the clearing systems.

### **Investor Suitability**

*The purchase of the Notes involves substantial risks and is not suitable for all investors*

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it. None of the Issuer, the Lead Manager or the Calculation Agent acts as an investment adviser, or assumes any fiduciary obligation, to any prospective purchaser of the Notes.

In particular, but without prejudice to the generality of the above paragraph, prospective investors should note that an investment in the Notes is only suitable for investors who:

- (i) have the requisite knowledge and experience in financial and business matters to evaluate the merits and risks of an investment in the Notes;
- (ii) are capable of bearing the economic risk of an investment in the Notes for an indefinite period of time;
- (iii) are acquiring the Notes for their own account for investment, not with a view to resale, distribution or other disposition of the Notes (subject to any applicable law requiring that the disposition of the investor's property be within its control); and
- (iv) who will recognise that it may not be possible to make any transfer of the Notes for a substantial period of time, if at all.

*Understanding and appropriateness of the investment*

Each investor (a) should be an investor with substantial knowledge of and/or experience in financial and business matters that it is capable of evaluating the merits and risks (including tax, legal, regulatory and accounting) of an investment in the Notes because the Notes are not an appropriate investment for investors who are unsophisticated with respect to such transactions; (b) should be financially able to bear such risks; (c) in making such investment shall not rely on any advice or recommendations of or any information, representation or warranty provided by the Lead Manager, the Calculation Agent and/or any of their respective affiliates, the Issuer or any of their respective representatives; (d) should recognise that it may not be possible to make any transfer of the Notes for a substantial period of time; and (e) should seek advice from such advisers as such investor considers necessary and appropriate, to enable such investor to make its own independent decision with regard to the suitability and appropriateness of the Notes as an investment for its own account. Each investor should be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes. None of the Issuer, the Lead Manager or any of their respective representatives makes any representation and has given, nor will give, any advice concerning the appropriate accounting treatment or possible tax consequences of purchasing the Notes. Each investor should consult its own financial, tax, accounting and legal advisers about risks associated with an investment in the Notes and the suitability of investing in such Notes in light of the investor's particular circumstances.

Any information communicated (in any manner) to investors by the Issuer or the Lead Manager should not be relied upon as investment advice or as a recommendation to invest in the Notes, which shall include, amongst other things, any such information, explanations or discussions concerning the terms and conditions of the Notes, or related features.

Investment in the Notes should comply, and be fully consistent, with all investment policies, guidelines and restrictions applicable to an investor. It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Lead Manager should not be relied upon, nor shall such information be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes. Each investor should be aware that any return on the Notes may not exceed or even equal the return that might have been achieved had the amount of its initial investment been placed on deposit for the same period.

Each investor should be aware that none of the Issuer, the Lead Manager or the Calculation Agent is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

#### *Investment considerations relating to the Notes*

Investment in the Notes carries with it a degree of risk including, but not limited to, the risks referred to below.

The level of the RUB/USD foreign exchange rate may go down as well as up. Prospective investors may receive an amount less than their initial investment.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security. Such risks include, without limitation, changes in the level or value of the RUB/USD foreign exchange rate and the possibility that a holder of the Notes will receive a lower amount of interest, repayment or other consideration than the holder expected. Depending on the exchange rate to be determined by the Calculation

Agent upon a Settlement Disruption Event, such amount may even be zero. The Issuer has no control over a number of matters that are important in determining the existence, magnitude and longevity of such risks and their results, including economic, financial and political events.

Past performance of the RUB/USD foreign exchange rate is not necessarily indicative of future performance.

The Calculation Agent may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes including, without limitations, in relation to the role of the Calculation Agent in determining the occurrence of a Settlement Disruption Event and in determining the exchange rate for converting RUB into USD upon the occurrence of a Settlement Disruption Event. The Calculation Agent is required to carry out its duties as Calculation Agent in good faith and using its reasonable judgement, however each investor should be aware that any such determination may potentially adversely affect the amount payable to Noteholders under the Notes and that potential conflicts of interest could arise.

#### *Risks relating to the Notes*

No assurances can be made that any meaningful secondary market will develop in the Notes. The Lead Manager may, but is not obligated to, make a market in the Notes. The Lead Manager may discontinue any market-making activities at any time without notice. In addition, the Notes may not be transferred except to qualified investors in accordance with applicable private offering rules. If an active public market for the Notes does not develop, the market prices and liquidity of the Notes may be adversely affected.

Volatility is the term used to describe the size and frequency of price and/or market fluctuations. If the volatility, or anticipated volatility, of the RUB/USD foreign exchange rate increases or decreases, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes. In general, if interest rates increase, it is expected that the trading value of the Notes will increase and, conversely, if interest rates decrease, it is expected that the trading value of the Notes will decrease. If interest rates increase or decrease in markets based on any of the RUB or the USD, the trading value of the Notes may be adversely affected. Interest rates may also affect the economies of the Russian Federation or the United States, and, in turn, the exchange rates and therefore the value of the RUB/USD foreign exchange rate.

If the Calculation Agent determines that a Settlement Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

**THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" ON PAGES 10 AND 11 OF THE BASE PROSPECTUS.**

<b>37</b>	Additional Information:	The provisions set out in Annex A shall apply to the Terms and Conditions in accordance herewith.
	(i) Investment Considerations:	Russian Rouble Exchange Risk

The Notes are denominated in Russian Rouble. Currency exchange rates may be volatile and, in certain circumstances, may affect the return to the holder of the Notes. The Government of the Russian Federation can from time to time intervene in the foreign exchange market. These interventions or other governmental actions could adversely affect the value of the Notes in U.S. Dollars, as well as the actual yield (in U.S. Dollar terms) on the Notes and the amount payable at maturity. Even in the absence of governmental action directly affecting currency exchange rates, political or economic developments in the Russian Federation or elsewhere could lead to significant and sudden changes in the exchange rate between the Russian Rouble and the U.S. Dollar.

**Notes are Not Liquid Instruments**

The Notes are not actively traded in any financial market and there may exist at times only limited markets for the Notes resulting in low or non-existent volumes of trading in the Notes and such obligations, and therefore a lack of liquidity and price volatility of the Notes and such obligations.

**38** Total Commissions: 1.625 per cent.

This Pricing Supplement comprises the pricing supplement required for issue and admission to trading on the London Stock Exchange's Regulated Market of the Notes described herein pursuant to the Euro 30,000,000,000 Global Medium Term Note Programme of European Bank for Reconstruction and Development as from 9 February 2011 or as soon as practicable thereafter.

**RESPONSIBILITY**

The Issuer accepts responsibility for the information contained in this Pricing Supplement. Annex B has been extracted from Bloomberg. The Issuer confirms that such information has been accurately reproduced and that, so far as it is aware, and is able to ascertain from information published by Bloomberg, no facts have been omitted which would render the reproduced information inaccurate or misleading.

As defined by Moody's, an "Aaa" rating means that the Issuer's ability to meet its financial obligations is judged to be of the highest quality, with minimal credit risk. As defined by Fitch, an "AAA" rating denotes the lowest expectation of credit risk and means that the Issuer has an exceptionally strong capacity for timely payment of its financial commitments.

## Settlement Disruption Event and Fallback Provisions

### Settlement Disruption Event and Fallback Provisions

All payments in respect of the Notes will be made in RUB, subject to the occurrence of a Settlement Disruption Event (as defined below) and will in all cases be subject to any fiscal or other laws applicable thereto. If the Calculation Agent (as defined below) determines (in its sole discretion acting in good faith and in a commercially reasonable manner) that a Settlement Disruption Event has occurred or is subsisting during the Determination Period (as defined below):

A. The Calculation Agent shall notify the Issuer and the Agent of its determination as soon as practicable after making such determination (but in no event later than 8.00 a.m. London time one (1) Business Day after the last Day of the Determination Period) whereupon the Agent shall as soon as practicable thereafter (but in no event later than one (1) Business Day after receipt of the aforementioned notice from the Calculation Agent) notify the Noteholders thereof (in accordance with Condition 13 of the Notes), and

B. Noteholders will not be entitled to any amounts in respect of the Notes until the earlier to occur of (i) the day falling two Business Days after the day on which the Issuer is notified by the Calculation Agent that a Settlement Disruption Event no longer subsists and (ii) the Postponed Fixed Interest Date (as defined below), the Postponed Maturity Date (as defined below), or the Postponed Early Redemption Date (as defined below), as the case may be.

If a Settlement Disruption Event no longer subsists, the Calculation Agent shall notify the Issuer and the Agent thereof as soon as practicable on or after the Business Day on which the Settlement Disruption Event no longer subsists (but in no event later than one (1) Business Day thereafter) whereupon the Agent shall as soon as practicable thereafter (but in no event later than one (1) Business Day after receipt of the aforementioned notice from the Calculation Agent) notify the Noteholders thereof (in accordance with Condition 13 of the Notes).

If any amount is to be paid on a Postponed Fixed Interest Date, Postponed Maturity Date or Postponed Early Redemption Date (as the case may be), regardless of whether a Settlement Disruption Event is still subsisting at such time, payment shall be made in United States Dollars ("USD") and shall be calculated by the Calculation Agent (and promptly notified to the Agent and the Issuer (but in no event later than two Business Days before the Postponed Fixed Interest Date, Postponed Maturity Date or Postponed Early Redemption Date (as the case may be)) in an amount per Calculation Amount which shall be produced by the following provisions, such amount to be rounded to the nearest whole cent (with 0.5 cent being rounded upwards):

$$\text{Relevant RUB Amount} \div \text{Exchange Rate}$$

For the avoidance of doubt, no additional amounts shall be payable by the Issuer in respect of any delay in payment beyond the originally scheduled Fixed Interest Date, Maturity Date, or as the case may be, Early Redemption Date (in each case, as adjusted, if appropriate, in accordance with the Following Business Day Convention) to the Postponed Fixed Interest Date, Postponed Maturity Date or Postponed Early Redemption Date (as appropriate) because of the operation of the provisions of these Settlement Disruption Events and Fallback Provisions.

For the purposes of these provisions:

**"Business Day"** means any day on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealings in foreign exchange and foreign currency deposits) in London, New York City and Moscow.

The determination by the Calculation Agent of any amount or of any state of affairs, circumstance, event or other matter, or the formation of any opinion or the exercise of any discretion required or permitted to be determined, formed or exercised by the Calculation Agent under the Notes and pursuant to the Calculation Agency Agreement shall (in the absence of manifest error) be final and binding on all parties (including, but not limited to, the Issuer and the Noteholders) and shall be made in its sole discretion in good faith and in a commercially reasonable manner in accordance with the Calculation Agency Agreement. In performing its duties under the Notes, the Calculation Agent shall act in accordance with the Calculation Agency Agreement;

**"Exchange Rate"** means the average of such firm quotes (expressed in RUB per 1 USD) as the Calculation Agent is able to obtain from the Reference Dealers at or about 11.00 a.m. London Time for the sale of RUB and the purchase of USD, on the day falling two Business Days prior to the Postponed Fixed Interest Date, Postponed Early Redemption Date (if any) or the Postponed Maturity Date (as the case may be). The highest and lowest of such quotes will be disregarded and the arithmetic mean of the remaining quotations shall be the Exchange Rate, provided, however, that if fewer than four (but at least two) Reference Dealers provide such a firm quote then the average of the quotes actually obtained shall apply. If only one Reference Dealer provides a firm quote then such quote shall apply, and if no Reference Dealer provides such a firm quote, then the Calculation Agent, acting in good faith and in a commercially reasonable manner, shall establish the Exchange Rate in its sole discretion, which may result in an exchange rate of zero;

(a) the imposition of laws or regulations by the Central Banking Authority or other legislative, governmental or regulatory authority of Russia which (i) require non-residents of Russia to obtain permission from such Central Banking Authority or other authority to obtain RUB, or (ii) otherwise restrict a non-resident's ability to obtain RUB or (iii) otherwise regulate the purchase or holding of RUB such that costs are imposed in obtaining RUB which would

not be imposed in the absence of such regulations, or (iv) has the direct or indirect effect of hindering, limiting or restricting the transfer of RUB from Russia to recipients resident in another country; and

The Issuer makes and guarantees loans and makes equity investments in its countries of operation.

The business address of each of the directors is the principal office of the Issuer, which is at One Exchange Square, London EC2A 2JN.

## **Use of Proceeds**

The net proceeds of the issue of the Notes (which are expected to be RUB992,975,000.00) will be included in the ordinary capital resources of the Issuer and used in its ordinary operations.

## **Risk Factors**

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including, but not limited to, investments in exotic currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Lead Manager, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below.

### **Risk Factors relating to the Notes**

#### **Market, Liquidity and Yield Considerations**

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

Past performance of the RUB/USD rate is not necessarily indicative of future performance.

If the volatility or anticipated volatility, of the RUB/USD rate increases or decreases, the trading value of the Notes may be adversely affected.

We expect that changes in interest rates will affect the trading value of the Notes.

#### **Legal Investment Considerations**

##### *General*

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

## **Risk Factors relating to the Issuer**

The Issuer makes loans and equity instruments and issues guarantees primarily to the private sector in its countries of operation. Changes in the macroeconomic environment and financial markets in these countries may affect the creditworthiness of the Issuer's clients. Even severe changes in the macroeconomic and financial climate should, however, not affect the Issuer's ability to repay its borrowings, which is assured above all through the Issuer's prudent provisioning policy, ample liquidity, and limitations in the Agreement on its outstanding loans, equity investment and guarantees to the total amount of its subscribed capital, reserves and surpluses.

Of the Issuer's €21 billion of authorised share capital, €6 billion has been paid in. €15 billion is callable to cover the unlikely eventuality that the Issuer encounters difficulties meeting its liabilities. The Issuer has among the highest quality callable capital of any multilateral development bank, with approximately 60 per cent. from shareholders rated AAA/Aaa and over 95 per cent. from shareholders rated investment grade, by at least one of S&P and Moody's at 11 August 2010<sup>1</sup>. It is therefore unlikely that a call on the Issuer's shareholders will not be honoured.

Since the second half of 2007, disruption to the global financial markets, the re-pricing of credit risk and increased volatility have created challenging global market conditions and adversely affected the economies of many countries. It is difficult to predict how long these conditions will continue to exist and the effectiveness of measures taken by many countries to reduce their budget deficits and bring about recovery. The operations and financial position of the Issuer may be affected by any lengthy continuation of such conditions.

## **Risk Warning**

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk, settlement risk and liquidity risk.

The Notes are subject to Settlement Disruption Events in the Russian Federation whereby non-residents of the Russian Federation may be subject to regulations restricting their ability to, among others, obtain, purchase, hold or transfer RUB. The Russian Federation has a long history of maintaining currency restrictions, and notwithstanding recent measures to liberalise the currency regime, investors face the risk that restrictions may be imposed during the term of the Notes that would constitute a Settlement Disruption Event. Such an event may result in a delay of payments due from the Issuer under the Notes and in such payments having to be converted and paid in USD rather than RUB.

Investors should be aware that the Fixed Interest Amount, Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated. It is not certain that a meaningful Exchange Rate for converting RUB into USD rate can be established in such a scenario, and the payments received by an investor can be far lower than expected, and even zero.

Offerings of debt instruments denominated and settled in RUB are a recent phenomenon in the international capital markets. This, coupled with the inexperience of the clearing systems and the Russian and international banking systems in dealing with RUB payments and RUB accounts, could lead to unforeseen difficulties, which may have an adverse effect on the liquidity, marketability or trading price of the Notes.

---

<sup>1</sup> To the extent S&P and Moody's have rated shareholders of the Issuer at different levels, the higher of these ratings has been used for the purpose of these calculations.

## **Investor Suitability**

*The purchase of the Notes involves substantial risks and is not suitable for all investors*

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it.

*Understanding and appropriateness of the investment*

Each investor should have the knowledge and experience to evaluate material risks and be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes.

Any information communicated (in any manner) to investors by the Issuer or the Lead Manager should not be relied upon as investment advice or as a recommendation to invest in the Notes.

It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Lead Manager should not be relied upon, nor shall such be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes.

Each investor should be aware that none of the Issuer, the Lead Manager nor The Toronto-Dominion Bank acting as Calculation Agent (the "Calculation Agent") is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

*Investment considerations relating to the Notes*

The Calculation Agent may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes.

No assurances can be made that any meaningful secondary market will develop in the Notes.

**THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" IN THE BASE PROSPECTUS.**

affect the value of the Notes in U.S. Dollars, as well as the actual yield (in U.S. Dollar terms) on the Notes and the amount payable at maturity. Even in the absence of governmental action directly affecting currency exchange rates, political or economic developments in the Russian Federation or elsewhere could lead to significant and sudden changes in the exchange rate between the Russian Rouble and the U.S. Dollar.

**Notes are Not Liquid Instruments**

The Notes are not actively traded in any financial market and there may exist at times only limited markets for the Notes resulting in low or non-existent volumes of trading in the Notes and such obligations, and therefore a lack of liquidity and price volatility of the Notes and such obligations.

38 Total Commissions: 1.625 per cent.
