C O R P O R A T E D E S C R I P T I O N

1st Source Corporation is the largest locally controlled financial institution headquartered in the northern Indiana-southwestern Michigan area. While delivering a comprehensive range of consumer and commercial banking services, 1st Source has distinguished itself with highly personalized services. 1st Source also provides nationally specialized financing services for new and used private and cargo aircraft, automobiles and light trucks for leasing and rental agencies, medium and heavy duty trucks, construction equipment, and environmental equipment.

At year-end, the Corporation had 76 banking centers in 17 counties in Indiana and Michigan, seven 1st Source Insurance offices, seven Trust and Wealth Management locations, and 22 locations nationwide for the 1st Source Specialty Finance Group. With a history dating back to 1863, 1st Source is proud of its tradition of providing superior service to clients while playing a leadership role in the continued development of the communities it serves.

2010 IN BRIEF

2010 net income of \$41.24 million was up 61.80% from the \$25.49 million earned in 2009. Diluted net income per common share for 2010 was \$1.21, up 53.16% from the \$0.79 for 2009.

Return on average total assets was 0.91% compared to 0.57% a year ago. Return on average common shareholders' equity was 6.10% for 2010, compared to 4.07% for 2009. The average common shareholders' equity-to-assets ratio for 2010 was 10.69%, compared to 10.40% last year.

At year end, total assets were \$4.45 billion, down slightly from a year earlier. Loans and leases were down 0.73%, deposits were down 0.81% and common shareholders' equity was \$486.38 million, an increase of 4.51% from a year earlier.

The reserve for loan and lease losses at year end was 2.83% of total loans and leases. Nonperforming loans and leases were 2.45% of total loans and leases, while nonperforming assets amounted to 2.81% of total loans and leases.

2010 ANNUAL SHAREHOLDERS' LETTER

I am pleased to start this letter by saying that 2010 was a good year – a record in net income for 1st Source. I am proud and thankful for the job my colleagues did which allowed us to achieve or exceed many of our goals for the year. Even with the calamitous economy over half of the last five years, we achieved many of the goals set in our five year plan in 2005 for 2010. We may not have hit the income targets, but we hit the tactical goals which will echo over time – replacing our core systems, rolling out full services in all of our present markets (personal and business banking, agricultural banking, trust and estate planning, investment management, and insurance), opening new branches in new markets (Lafayette, IN, and Kalamazoo, MI), and developing our people to organize for growth and future leadership. Our most prescient goal was under “superior financials” and charged us to develop a “fortress” balance sheet – which certainly helped us weather the storm over the last five years!

build their wealth, and realize their dreams. And we need to do this by listening carefully to them and then providing straight talk and sound advice in a highly personal way.

Our net income was \$41.24 million, an increase of 61.80% over the previous year and our diluted net income per common share for the year was \$1.21, up 53.16% from a year earlier. During the year we provided \$19.21 million to our loan loss reserve, charged off \$24.11 million and had \$3.54 million dollars in principal recoveries. Additionally, we took write downs of \$3.04 million on assets we had foreclosed on and held for sale. We even had some gains on these of \$1.72 million when we sold them. At the close of the year, the loan and lease loss reserve was \$86.87 million or 2.83% of total loans and leases outstanding; and nonperforming assets were \$88.71 million or 2.81% of net loans and leases outstanding. These compared to 2.85% and 3.15% the year before.

STRONG.

1st Source Corporate Headquarters, South Bend, Indiana.

STABLE.

Serving its clients since 1863, the bank has persevered and prospered through every economic phase.

My simple message to you is we had record earnings, the economy and credit quality are still major risks, liquidity and interest rate risks are always a challenge, we paid off the Capital Purchase Program (CPP or TARP) monies without any additional requirements from the Government, competition is heating up, regulatory requirements are almost overwhelming, we renewed our lease for our headquarters' space, and ... it still all comes down to having great colleagues who love being in service to others and go that extra mile to help each other ensure we deliver distinctive service to our clients in every contact, in every transaction, in every market, every day. We all need to live our Mission of helping our clients achieve security,

After paying off the TARP monies, we still closed the year with strong capital ratios. Our tangible common equity to asset ratio is 9.12% and our Tier 1 and total risk based capital ratios are 14.05% and 15.34%, respectively. Please see the annual report and 10K for the detailed numbers in all these categories.

A few highlights for the year:

We paid off the \$111 million TARP money with no conditions attached. With the flat economy and the threat of a deep depression significantly receding, we just didn't need it and it was costly. It was good insurance against economic crises but expensive additional capital.

With the 30-year lease on our downtown South Bend main office set to expire, we closed on a new 10-year lease that allowed us to reduce our space in the building and lower our financial commitment for the term of the contract. Although the new lease accounted for almost \$2.0 million in write downs in the fourth quarter, it benefits 1st Source in the long run because of the advantages we will receive over time, as well as the cost savings.

We spent a good part of the year questioning who we are, what we are, how we are distinctive, what we want to be, and how we are going to assure success. We have changed our planning process to a three year cycle from a five year one. The world is just too volatile and too dynamic to think we can plan that far out. We spent the summer developing a three year tactical plan and set some five year aspirational goals. One thing we found out from working with people who know our industry (but are outside of 1st Source) is that we naturally do things for the benefit of our clients because we simply think that is the way it should be done, but we don't really tell people about

As we look at ourselves, we also find that we have made things more complicated than they need to be. Certainly the overwhelming deluge of regulation has caused us to pile procedures on top of procedures to ensure we are compliant. Many of these make us more difficult to do business with than we would certainly like. They also cause significant inefficiencies and make us much less effective than we would prefer. Many actually become pain points for our customers. We need to identify those pain points so we can fix and eradicate them. To do this we need better analytical skills and more discipline. With that aim in mind, six of our strong management leaders have spent the year learning about lean/six sigma, interviewing consulting firms, and visiting places where the process and tools are used. As we begin 2011, we are starting on a journey to get everyone working on making 1st Source the best, most friendly, and easiest place to do business.

Even though the overall economic climate may have been slow, our lending areas weren't. The residential mortgage staff turned in a fine performance with over \$225 million in mortgage

LOCAL.

Maple Lane – Grand opening of our redesigned banking center featuring side-by-side banking.

it. This may not maximize our income but we think it is right for our clients. Apparently many other financial institutions do not think this way. We have a distinctive difference in the way we set and follow policies that impact our clients and yet, as I mentioned, we don't tell them about our differences and benefits enough – from the convenient hours we're open, to the way we handle overdrafts, the 24/7 accessibility of our trust and business bankers, and the breadth and depth of our services, we think of our client first. To hone in on distinct differences, we have been meeting with clients and non-clients alike to determine what they know about us and how we can communicate our distinctiveness more clearly. We want everyone to choose us as their primary bank.

PERSONAL.

2010 Ernestine M. Raclin Award winners – Award established by 1st Source to celebrate volunteer leadership in our communities.

volume produced in 2010, 158% of our projections. And, by the second half of the year, our overall personal lending was headed up; and we were recognized by the SBA for our strong small business performance. A leader in small business lending, 1st Source Bank ranked No. 1 among all banks in Indiana for the number of Small Business Administration (SBA) 504 loans closed during the last fiscal year, according to SBA figures. 1st Source received the No. 1 ranking out of more than 120 active SBA lenders in the state. Additionally, several of our specialty lending divisions turned in outstanding performances, most notably the division financing automobiles for leasing and rental car agencies.

In spite of the difficult economic environment and because of the high unemployment in the markets we serve, the challenge to remain in Community Leadership was even more critical. Because we have always taken a long term view, we built the 1st Source Foundation so that it could continue to meet the needs of the communities we serve even when our earnings were challenged and things were difficult for us. That commitment, discipline and foresight allowed us to help many organizations in the markets we serve continue to provide critical human and social services. In the past three years of 2008 through 2010, the 1st Source Foundation provided nearly \$2.5 million in contributions to local charitable service providers, as well as approximately 75,000 man-hours of volunteer time by our employees. We have been very pleased to continue to live one of our important values of being in leadership of the communities we serve with both our financial and human resources. Since, in many ways, we are nothing more than a reflection of the communities we serve, it is important for us to make sure that they are cared for presently and that structures are put in place to ensure their positive future.

In closing:

I want to thank all of my colleagues across 1st Source whether they be our maintenance people, banking officers, staff assistants, investment managers, accounting and finance people, information and operations people, marketing folks, personal wealth managers, retirement planning specialists, trust and estate planners, specialty finance officers, customer service people, insurance agents, property managers, credit staff, human resources, and everyone who assists them to help make this place a wonderful organization. Their dedication to each other individually and their collective dedication to our clients is what sets us apart; I am thankful for them every day.

I also want to thank our Board of Directors for its commitment and oversight. To a person, they are committed to 1st Source's success for the long term and they understand the importance of remaining independent, building the company, and serving our constituencies well. Board service today requires a significant commitment of time and talent and we have been given both by our Board members.

I especially want to thank two members retiring from our Board of Directors. They each have brought us a totally different perspective and unique set of skills. Dane Miller, the founder and former CEO of Biomet started his company in a garage, and through innovation, research and experimentation, and a commitment to excellence, built one of our country's largest and most successful orthopedic device companies.

Recognized many times as one of the nation's best CEOs, he brought quiet perspective and strong views to our Board's discussion of strategic alternatives and direction. Terry Gerber, an engineer by education, an entrepreneur at heart, took over a family company and competed in one of the most challenging and competitive business areas in our country: "the rag trade," as they say. His focus is uniforms for police forces across the country and he has weathered the changing work and pricing environment in the US, Mexico, and China. Our specialty at 1st Source is family businesses, and Terry has given us insight into small family businesses. I am pleased to add that his is being carried on by the next generation of his family. Terry has also always been there when we needed him. He probably has the best attendance record of any of our Directors and is always quick with advice, counseling, thoughtful support, and a little chiding from time to time! Both Dane and Terry have been good partners and we will miss them.

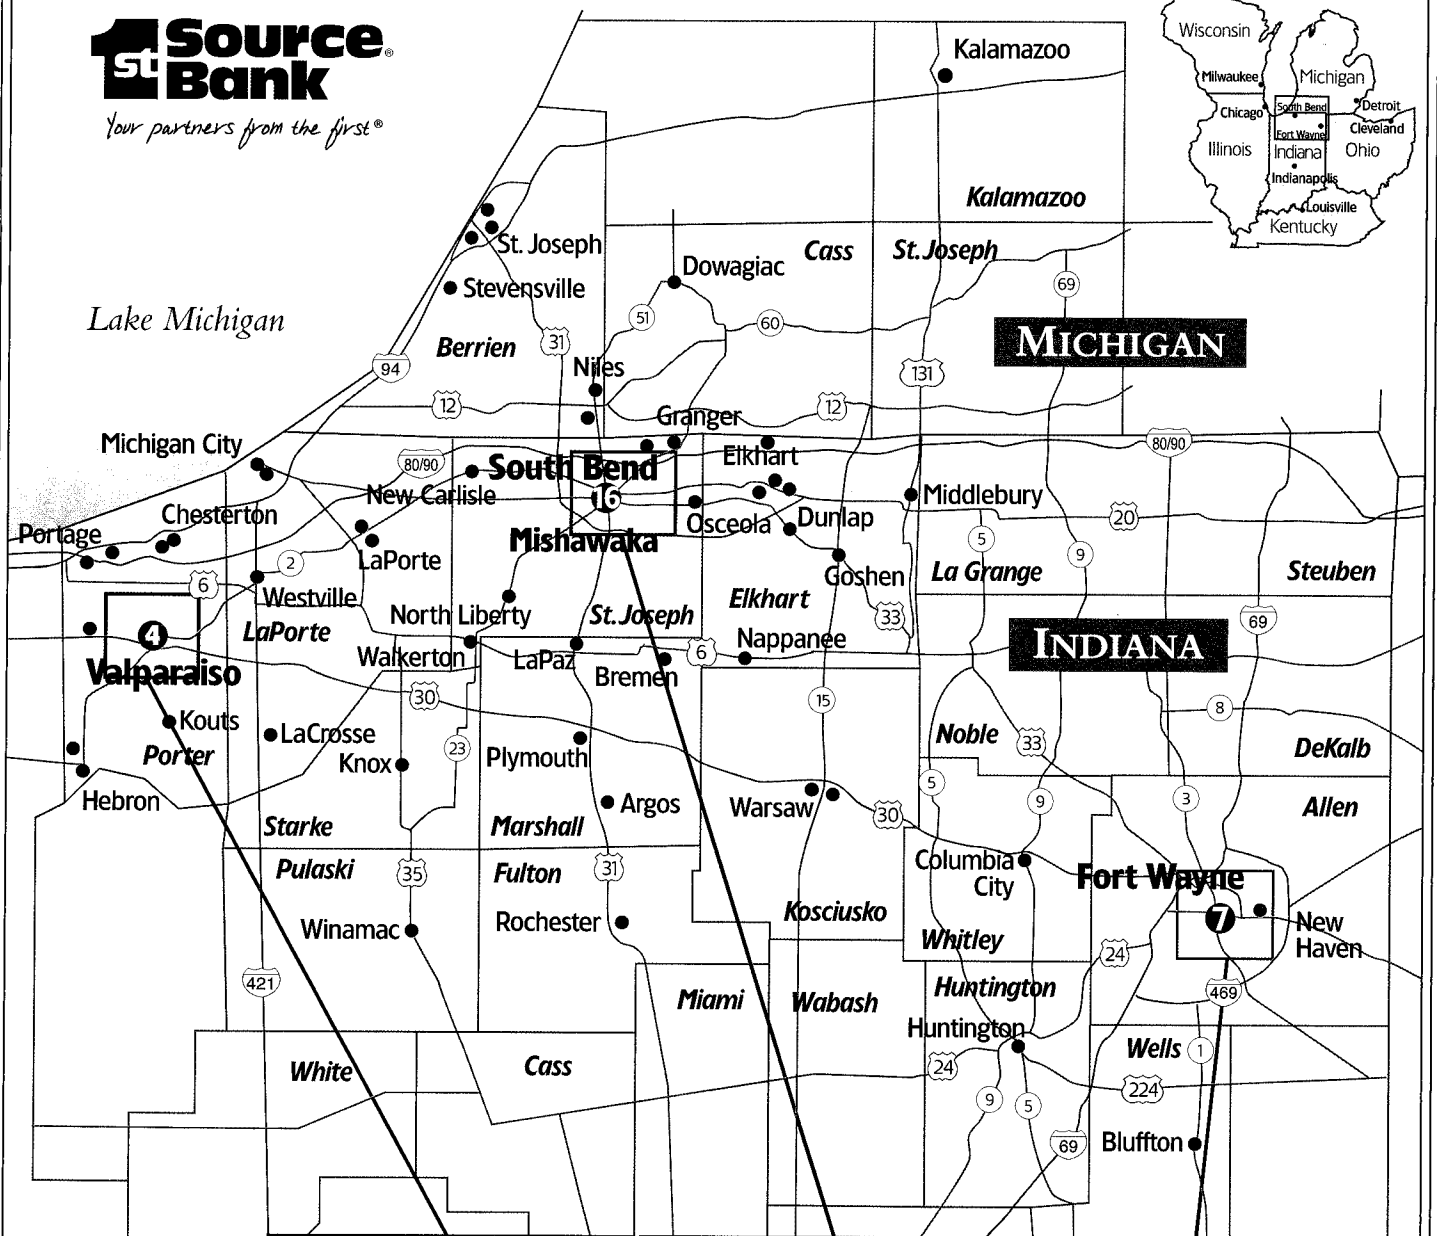

Lastly, I want to thank you, our shareholders, for your support and your encouragement. We weathered well the economic challenges of the last few years, being declared the 8th Best Performing Bank in the country last year for those with over \$3 billion in deposits according to *Bank Director Magazine*. We did this because you support our taking a long term view and staying focused on the basics of pristine credit quality, rigorous cost control, and outstanding client service. And, with your support, we will keep this same focus in the years ahead.

Sincerely yours, Chris

Christopher J. Murphy III

1ST SOURCE CORPORATION

1st Source Corporation, an Indiana corporation incorporated in 1971, is a bank holding company headquartered in South Bend, Indiana that provides, through our subsidiaries (collectively referred to as "1st Source"), a broad array of financial products and services. 1st Source Bank ("Bank"), our banking subsidiary, offers commercial and consumer banking services, trust and investment management services, and insurance to individual and business clients through most of our 76 banking center locations in 17 counties in Indiana and Michigan. 1st Source Bank's Specialty Finance Group, with 22 locations nationwide, offers specialized financing services for new and used private and cargo aircraft, automobiles and light trucks for leasing and rental agencies, medium and heavy duty trucks, construction equipment, and environmental equipment. While concentrated in certain equipment types, we serve a diverse client base. We are not dependent upon any single industry or client. At December 31, 2010, we had consolidated total assets of \$4.45 billion, loans and leases of \$3.07 billion, deposits of \$3.62 billion, and total shareholders' equity of \$486.38 million.

Our principal executive office is located at 100 North Michigan Street, South Bend, Indiana 46601 and our telephone number is 574 235-2000. Access to our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports is available, free of charge, at www.1stsource.com soon after the material is electronically filed with the Securities and Exchange Commission (SEC).

1ST SOURCE BANK

1st Source Bank is a wholly owned subsidiary of 1st Source Corporation that offers a broad range of consumer and commercial banking services through its lending operations, retail branches, and fee based businesses.

Commercial, Agricultural, and Real Estate Loans — 1st Source Bank provides commercial, small business, agricultural, and real estate loans to primarily privately owned business clients mainly located within our regional market area. Loans are made for a wide variety of general corporate purposes, including financing for industrial and commercial properties, financing for equipment, inventories and accounts receivable, and acquisition financing. Other services include commercial leasing and cash management services.

Consumer Services — 1st Source Bank provides a full range of consumer banking services, including checking accounts, on-line banking including bill payment, telephone banking, savings programs, installment and real estate loans, home equity loans and lines of credit, drive-through and night deposit services, safe deposit facilities, automated teller machines, debit and credit card services, financial literacy seminars and brokerage services.

Trust Services — 1st Source Bank provides a wide range of trust, investment, agency, and custodial services for individual, corporate, and not-for-profit clients. These services include the administration of estates and personal trusts, as well as the management of investment accounts for individuals, employee benefit plans, and charitable foundations.

Specialty Finance Group Services — 1st Source Bank, through its Specialty Finance Group, provides a broad range of comprehensive equipment loan and lease finance products addressing the financing needs of a broad array of companies. This group can be broken down into five areas: auto and light trucks; environmental equipment; medium and heavy duty trucks; new and used aircraft; and construction equipment.

The auto and light truck division consists of financings to automobile rental and leasing companies, light truck rental and leasing companies, and special purpose vehicles. The auto and light truck finance receivables generally range from \$100,000 to \$14 million with fixed or variable interest rates and terms of one to five years.

Environmental equipment financing handles trash and recycling equipment for municipalities and private businesses as well as equipment for landfills. Receivables generally range from \$50,000 to \$4 million with fixed or variable interest rates and terms of one to seven years.

The medium and heavy duty truck division provides financing for highway tractors and trailers and delivery trucks to the commercial trucking industry. Medium and heavy duty truck finance receivables generally range from \$500,000 to \$6 million with fixed or variable interest rates and terms of three to seven years.

Aircraft financing consists of financings for new and used general aviation aircraft (including helicopters) for private and corporate aircraft users, aircraft distributors and dealers, air charter operators, air cargo carriers, and other aircraft operators. We have selectively entered the international business aircraft markets, primarily Brazil and Mexico, on a limited basis where desirable aircraft financing opportunities exist. Aircraft finance receivables generally range from \$500,000 to \$14 million with fixed or variable interest rates and terms of one to ten years.

Construction equipment financing includes financing of equipment (i.e., asphalt and concrete plants, bulldozers, excavators, cranes, and loaders, etc.) to the construction industry. Construction equipment finance receivables generally range from \$100,000 to \$14 million with fixed or variable interest rates and terms of three to six years.

We also generate equipment rental income through the leasing of construction equipment, medium and heavy duty trucks, automobiles, and other equipment to clients through operating leases.

SPECIALTY FINANCE GROUP SUBSIDIARIES

The Specialty Finance Group also consists of separate wholly owned subsidiaries of 1st Source Bank which include: Michigan Transportation Finance Corporation, 1st Source Specialty Finance, Inc., SFG Aircraft, Inc., 1st Source Intermediate Holding, LLC, SFG Commercial Aircraft Leasing, Inc., and SFG Equipment Leasing Corporation I.

FIRST NATIONAL BANK, VALPARAISO

First National Bank, Valparaiso (First National) was a wholly owned subsidiary of 1st Source Corporation that was acquired on May 31, 2007 for \$134.19 million. First National was a full service bank with 16 banking facilities, as of December 31, 2007, located in Porter and LaPorte Counties of Indiana. On June 6, 2008, First National was merged with 1st Source Bank.

1ST SOURCE INSURANCE, INC.

1st Source Insurance, Inc. is a wholly owned subsidiary of 1st Source Bank that provides insurance products and services to individuals and businesses covering corporate and personal property, casualty insurance, and individual and group health and life insurance. 1st Source Insurance, Inc. has seven offices.

1ST SOURCE CORPORATION INVESTMENT ADVISORS, INC.

1st Source Corporation Investment Advisors, Inc. (Investment Advisors) is a wholly owned subsidiary of 1st Source Bank that provides investment advisory services to trust and investment clients of 1st Source Bank and to Wasatch Advisors, Inc., the investment advisor of the Wasatch Mutual Fund family. Investment Advisors is registered as an investment advisor with the Securities and Exchange Commission under the Investment Advisors Act of 1940. Investment Advisors serves strictly in an advisory capacity and, as such, does not hold any client securities.

OTHER CONSOLIDATED SUBSIDIARIES

We have other subsidiaries that are not significant to the consolidated entity.

1ST SOURCE CAPITAL TRUST IV AND 1ST SOURCE MASTER TRUST

Our unconsolidated subsidiaries include 1st Source Capital Trust IV and 1st Source Master Trust. These subsidiaries were created for the purposes of issuing \$30.00 million and \$57.00 million of trust preferred securities, respectively, and lending the proceeds to 1st Source. We guarantee, on a limited basis, payments of distributions on the trust preferred securities and payments on redemption of the trust preferred securities.

COMPETITION

The activities in which we and the Bank engage in are highly competitive. Our businesses and the geographic markets we serve require us to compete with other banks, some of which are affiliated with large bank holding companies headquartered outside of our principal market. We generally compete on the basis of client service and responsiveness to client needs, available loan and deposit products, the rates of interest charged on loans and leases, the rates of interest paid for funds, other credit and service charges, the quality of services rendered, the convenience of banking facilities, and in the case of loans and leases to large commercial borrowers, relative lending limits.

In addition to competing with other banks within our primary service areas, the Bank also competes with other financial service companies, such as credit unions, industrial loan associations, securities firms, insurance companies, small loan companies, finance companies, mortgage companies, real estate investment trusts, certain governmental agencies, credit organizations, and other enterprises.

Additional competition for depositors' funds comes from United States Government securities, private issuers of debt obligations, and suppliers of other investment alternatives for depositors. Many of our non-bank competitors are not subject to the same extensive Federal regulations that govern bank holding companies and banks. Such non-bank competitors may, as a result, have certain advantages over us in providing some services.

We compete against these financial institutions by being convenient to do business with, and by taking the time to listen and understand our clients' needs. We deliver personalized, one-on-one banking through knowledgeable local members of the community, offering a full array of products and highly personalized services. We rely on our history and our reputation in northern Indiana dating back to 1863.

EMPLOYEES

At December 31, 2010, we had approximately 1,160 employees on a full-time equivalent basis. We provide a wide range of employee benefits and consider employee relations to be good.

REGULATION AND SUPERVISION

General — 1st Source and the Bank are extensively regulated under Federal and State law. To the extent that the following information describes statutory or regulatory provisions, it is qualified in its entirety by reference to the particular statutory and regulatory provisions. Any change in applicable laws or regulations may have a material effect on our business and our prospective business. Our operations may be affected by legislative changes and by the policies of various regulatory authorities. We are unable to predict the nature or the extent of the effects on our business and earnings that fiscal or monetary policies, economic controls, or new Federal or State legislation may have in the future.

We are a registered bank holding company under the Bank Holding Company Act of 1956 (BHCA) and, as such, we are subject to regulation, supervision, and examination by the Board of Governors of the Federal Reserve System (Federal Reserve). We are required to file annual reports with the Federal Reserve and to provide the Federal Reserve such additional information as it may require.

1st Source Bank, as an Indiana state bank and member of the Federal Reserve System, is supervised by the Indiana Department of Financial Institutions (DFI) and the Federal Reserve. As such, 1st Source Bank is regularly examined by and subject to regulations promulgated by the DFI and the Federal Reserve. Because the Federal Deposit Insurance Corporation (FDIC) provides deposit insurance to 1st Source Bank, we are also subject to supervision and regulation by the FDIC (even though the FDIC is not our primary Federal regulator).

Bank Holding Company Act — Under the BHCA, as amended, our activities are limited to business so closely related to banking, managing, or controlling banks as to be a proper incident thereto. We are also subject to capital requirements applied on a consolidated basis in a form substantially similar to those required of the Bank. The BHCA also requires a bank holding company to obtain approval from the Federal Reserve before (i) acquiring, or holding more than 5% voting interest in any bank or bank holding company, (ii) acquiring all or substantially all of the assets of another bank or bank holding company, or (iii) merging or consolidating with another bank holding company.

The BHCA also restricts non-bank activities to those which, by statute or by Federal Reserve regulation or order, have been identified as activities closely related to the business of banking or of managing or controlling banks. As discussed below, the Gramm-Leach-Bliley Act, which was enacted in 1999, established a new type of bank holding company known as a "financial holding company" that has powers that are not otherwise available to bank holding companies.

The Federal Deposit Insurance Corporation Improvement Act of 1991 — The Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) was adopted to supervise and regulate a wide variety of banking issues. In general, FDICIA provided for the recapitalization of the former Bank Insurance Fund, deposit insurance reform, including the implementation of risk-based deposit insurance premiums, the establishment of five capital levels for financial institutions ("well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized," and "critically undercapitalized") that would impose more scrutiny and restrictions on less capitalized institutions, along with a number of other supervisory and regulatory issues. At December 31, 2010, the Bank

was categorized as “well capitalized,” meaning that our total risk-based capital ratio exceeded 10.00%, our Tier 1 risk-based capital ratio exceeded 6.00%, our leverage ratio exceeded 5.00%, and we are not subject to a regulatory order, agreement, or directive to meet and maintain a specific capital level for any capital measure.

Federal Deposit Insurance Reform Act — On February 1, 2006, Congress approved the Federal Deposit Insurance Reform Act of 2005 (FDIRA). Among other things, the FDIRA provides for the merger of the Bank Insurance Fund with the Savings Association Insurance Fund and for an immediate increase in Federal deposit insurance for certain retirement accounts up to \$250,000. The statute further provides for the indexing of the maximum deposit insurance coverage for all types of deposit accounts in the future to account for inflation. The FDIRA also requires the FDIC to provide certain banks and thrifts that were in existence prior to December 31, 1996 with one-time credits against future premiums based on the amount of their payments to the Bank Insurance Fund or Savings Association Insurance Fund prior to that date.

FDIC Deposit Insurance Assessments — On October 16, 2008, in response to the problems facing the financial markets and the economy, the Federal Deposit Insurance Corporation published a restoration plan (Restoration Plan) designed to replenish the Deposit Insurance Fund (DIF) such that the reserve ratio would return to 1.15 percent within five years. On December 16, 2008, the FDIC adopted a final rule increasing risk-based assessment rates uniformly by seven basis points, on an annual basis, for the first quarter 2009.

On February 27, 2009, the FDIC concluded that the problems facing the financial services sector and the economy at large constituted extraordinary circumstances and amended the Restoration Plan and extended the time within which the reserve ratio would return to 1.15 percent from five to seven years (Amended Restoration Plan). In May 2009, Congress amended the statutory provision governing establishment and implementation of a Restoration Plan to allow the FDIC eight years to bring the reserve ratio back to 1.15 percent, absent extraordinary circumstances.

On May 22, 2009, the FDIC adopted a final rule imposing a five basis point special assessment on each insured depository institution's assets minus Tier 1 capital as of June 30, 2009. The special assessment was collected on September 30, 2009.

In a final rule issued on September 29, 2009, the FDIC amended the Amended Restoration Plan as follows:

- The period of the Amended Restoration Plan was extended from seven to eight years.
- The FDIC announced that it will not impose any further special assessments under the final rule it adopted in May 2009.
- The FDIC announced plans to maintain assessment rates at their current levels through the end of 2010. The FDIC also immediately adopted a uniform three basis point increase in assessment rates effective January 1, 2011 to ensure that the DIF returns to 1.15 percent within the Amended Restoration Plan period of eight years.
- The FDIC announced that, at least semi-annually following the adoption of the Amended Restoration Plan, it will update its loss and income projections for the DIF. The FDIC also announced that it may, if necessary, adopt a new rule prior to the end of the eight-year period to increase assessment rates in order to return the reserve ratio to 1.15 percent.

On November 12, 2009, the FDIC adopted a final rule to require insured institutions to prepay their quarterly risk-based deposit insurance assessments for the fourth quarter of 2009, and for all of 2010, 2011 and 2012, on December 30, 2009. Our payment was \$20.26 million.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), which was signed into law on July 21, 2010, changes how the FDIC will calculate future deposit insurance premiums payable by insured depository institutions. The Dodd-Frank Act directs the FDIC to amend its assessment regulations so that future assessments will generally be based upon a depository institution's average total consolidated assets minus the average tangible equity of the insured depository institution during the assessment period, whereas assessments were previously based on the amount of an institution's insured deposits. The minimum deposit insurance fund rate will increase from 1.15% to 1.35% by September 30, 2020, and the cost of the increase will be borne by depository institutions with assets of \$10 billion or more.

The Dodd-Frank Act also provides the FDIC with discretion to determine whether to pay rebates to insured depository institutions when its deposit insurance reserves exceed certain thresholds. Previously, the FDIC was required to give rebates to depository institutions equal to the excess once the reserve ratio exceeded 1.50%, and was required to rebate 50% of the excess over 1.35% but not more than 1.5% of insured deposits. The FDIC adopted a final rule on February 7, 2011 that implements these provisions of the Dodd-Frank Act.

Temporary Liquidity Guarantee Program — On November 21, 2008, the FDIC Board of Directors adopted a final rule implementing the Temporary Liquidity Guarantee Program (TLGP). The TLGP consists of two basic components: a guarantee of newly issued senior unsecured debt of banks, thrifts, and certain holding companies (the debt guarantee program) and full guarantee of non-interest bearing deposit transaction accounts, such as business payroll accounts, regardless of dollar amount (the transaction account guarantee program). The purpose of the guarantee of transaction accounts and the debt guarantee was to reduce funding costs and allow banks and thrifts to increase lending to consumers and businesses. All insured depository institutions were automatically enrolled in both programs unless they elected to opt out by a specified date. 1st Source did not elect to opt out and thus participated in both programs.

As originally adopted, the transaction account guarantee program was to terminate on December 31, 2009, although the FDIC subsequently extended the program through December 31, 2010. The Dodd-Frank Act, which was adopted on July 21, 2010, included a provision that effectively replaced the transaction account guarantee program and extended the unlimited FDIC guarantee of noninterest bearing transaction accounts through December 31, 2012 for all insured depository institutions, not just those that elect to participate. Also, the Dodd-Frank Act provision, unlike the transaction account guarantee program, does not include low-interest NOW accounts within the definition of noninterest-bearing transaction accounts, and such accounts are therefore not covered by unlimited deposit insurance coverage. A subsequent amendment to the Dodd-Frank Act that became effective on December 31, 2010 extended unlimited deposit insurance coverage for “Interest on Lawyers Trust Accounts” through December 31, 2012.

The debt guarantee program under the TLGP initially permitted participating entities to issue FDIC-guaranteed senior unsecured debt until June 30, 2009, with the FDIC's guarantee for such debt to expire on the earlier of the maturity of the debt (or the conversion date, for mandatory convertible debt) or June 30, 2012. On March 17, 2009, the FDIC extended the debt guarantee portion of the TLGP from June 30, 2009 to October 31, 2009 and imposed a surcharge on debt issued with a maturity of one year or more beginning in the second quarter to gradually phase out the program. There were no further extensions of the debt guarantee program, and the program concluded on October 31, 2009. The FDIC's guarantee of debt issued before that date will expire no later than December 31, 2012.

Emergency Economic Stabilization Act of 2008 — On October 3, 2008, President George W. Bush signed the Emergency Economic Stabilization Act of 2008 (EESA). This Act temporarily increased the standard maximum deposit insurance amount from \$100,000 to \$250,000 effective immediately. This temporary increase in the scope of deposit insurance coverage was originally set to expire on December 31, 2013, but the Dodd-Frank Act made this temporary increase permanent.

Under the Troubled Asset Relief Program established by EESA, the U.S. Treasury Department announced a Capital Purchase Program (CPP). CPP is designed to encourage U.S. financial institutions to build capital to increase the flow of financing to U.S. businesses and consumers and support the U.S. economy. Under the program, Treasury will purchase up to \$250 billion of senior preferred shares on standardized terms as described in the program's term sheet. The program is available to qualifying U.S. controlled banks, savings associations, and certain bank and savings and loan holding companies engaged only in financial activities that elect submitted applications to Treasury by November 14, 2008. EESA provides for Treasury to determine an applicant's eligibility to participate in the CPP after consulting with the appropriate federal banking agency.

1st Source submitted an application to participate in the CPP and obtained Treasury approval on December 11, 2008. On January 23, 2009, 1st Source issued preferred stock valued at \$111.00 million and a warrant to acquire 837,947 shares of its common stock to Treasury pursuant to the CPP. The warrant is exercisable at any time during the ten-year period following issuance at an exercise price of \$19.87 per share. On December 29, 2010, 1st Source redeemed all of the preferred stock issued to the Treasury under CPP for \$111.68 million, which included accrued and unpaid dividends payable to Treasury on the preferred stock. The warrant remains outstanding as of December 31, 2010.

Securities and Exchange Commission (SEC) and The Nasdaq Stock Market (Nasdaq) — We are under the jurisdiction of the SEC and certain state securities commissions for matters relating to the offering and sale of our securities and our investment advisory services. We are subject to the disclosure and regulatory requirements of the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended, as administered by the SEC. We are listed on the Nasdaq Global Select Market under the trading symbol "SRCE," and we are subject to the rules of Nasdaq for listed companies.

Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 — Congress enacted the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (Interstate Act) in September 1994. Beginning in September 1995, bank holding companies have the right to expand, by acquiring existing banks, into all states, even those which had theretofore restricted entry. The legislation also provides that, subject to future action by individual states, a holding company has the right to convert the banks which it owns in different states to branches of a single bank. The states of Indiana and Michigan have adopted the interstate branching provisions of the Interstate Act.

Economic Growth and Regulatory Paperwork Reduction Act of 1996 — The Economic Growth and Regulatory Paperwork Reduction Act of 1996 (EGRPRA) was signed into law on September 30, 1996. Among other things, EGRPRA streamlined the non-banking activities application process for well-capitalized and well-managed bank holding companies.

Gramm-Leach-Bliley Act of 1999 — The Gramm-Leach-Bliley Act of 1999 (GLBA) is intended to modernize the banking industry by removing barriers to affiliation among banks, insurance companies, the securities industry, and other financial service providers. It provides financial organizations with the flexibility of structuring such affiliations through a holding company structure or through a financial subsidiary of a bank, subject to certain limitations. The GLBA establishes a new type of bank holding company, known as a financial holding company, which may engage in an expanded list of activities that are "financial in nature," which include securities and insurance brokerage, securities underwriting, insurance underwriting, and merchant banking. The GLBA also sets forth a system of functional regulation that makes the Federal Reserve the "umbrella supervisor" for holding companies, while providing for the supervision of the holding company's subsidiaries by other Federal and state agencies. A bank holding company may not become a financial holding company if any of its subsidiary financial institutions are not well-capitalized or well-managed. Further, each bank subsidiary of the holding company must have received at least a satisfactory Community Reinvestment Act (CRA) rating. The GLBA also expands the types of financial activities a national bank may conduct through a financial subsidiary, addresses state regulation of insurance, generally prohibits unitary thrift holding companies organized after May 4, 1999 from participating in new activities that are not financial in nature, provides privacy protection for nonpublic customer information of financial institutions, modernizes the Federal Home Loan Bank system, and makes miscellaneous regulatory improvements. The Federal Reserve and the Secretary of the Treasury must coordinate their supervision regarding approval of new financial activities to be conducted through a financial holding company or through a financial subsidiary of a bank. While the provisions of the GLBA regarding activities that may be conducted through a financial subsidiary directly apply only to national banks, those provisions indirectly apply to state-chartered banks. In addition, the Bank is subject to other provisions of the GLBA, including those relating to CRA and privacy, regardless of whether we elect to become a financial holding company or to conduct activities through a financial subsidiary. We do not currently intend to file notice with the Board to become a financial holding company or to engage in expanded financial activities through a financial subsidiary.

Financial Privacy — In accordance with the GLBA, Federal banking regulators adopted rules that limit the ability of banks and other financial institutions to disclose non-public information about customers to nonaffiliated third parties. These limitations require disclosure of privacy policies to consumers and, in some circumstances, allow consumers to prevent disclosure of certain personal information to a nonaffiliated third party. The privacy provisions of the GLBA affect how consumer information is transmitted through diversified financial companies and conveyed to outside vendors.

USA Patriot Act of 2001 — The USA Patriot Act of 2001 (USA Patriot Act) was signed into law following the terrorist attacks of September 11, 2001. The USA Patriot Act is comprehensive anti-terrorism legislation that, among other things, substantially broadened the scope of anti-money laundering laws and regulations by imposing significant new compliance and due diligence obligations on financial institutions.

The regulations adopted by the United States Treasury Department under the USA Patriot Act require financial institutions to maintain appropriate policies, procedures and controls to detect, prevent and report money laundering, and terrorist financing. Additionally, the regulations require that we, upon request from the appropriate Federal regulatory agency, provide records related to anti-money laundering, perform due diligence of private banking and correspondent accounts, establish standards for verifying customer identity, and perform other related duties.

Failure of a financial institution to comply with the USA Patriot Act's requirements could have serious legal and reputational consequences for the institution.

Regulations Governing Capital Adequacy — The Federal bank regulatory agencies use capital adequacy guidelines in their examination and regulation of bank holding companies and banks. If capital falls below the minimum levels established by these guidelines, a bank holding company or bank will be required to submit an acceptable plan for achieving compliance with the capital guidelines and will be subject to denial of applications and appropriate supervisory enforcement actions. The various regulatory capital requirements that we are subject to are disclosed in Part II, Item 8, Financial Statements and Supplementary

Data — Note 20 of the Notes to Consolidated Financial Statements. Our management believes that the risk-weighting of assets and the risk-based capital guidelines do not have a material adverse impact on our operations or on the operations of the Bank.

Community Reinvestment Act — The Community Reinvestment Act of 1977 requires that, in connection with examinations of financial institutions within their jurisdiction, the Federal banking regulators must evaluate the record of the financial institutions in meeting the credit needs of their local communities, including low and moderate income neighborhoods, consistent with the safe and sound operation of those banks. Federal banking regulators are required to consider a financial institution's performance in these areas as they review applications filed by the institution to engage in mergers or acquisitions or to open a branch or facility.

Regulations Governing Extensions of Credit — 1st Source Bank is subject to certain restrictions imposed by the Federal Reserve Act on extensions of credit to 1st Source or our subsidiaries, or investments in our securities and on the use of our securities as collateral for loans to any borrowers. These regulations and restrictions may limit our ability to obtain funds from the Bank for our cash needs, including funds for acquisitions and for payment of dividends, interest and operating expenses. Further, the BHCA, certain regulations of the Federal Reserve, state laws and many other Federal laws govern the extensions of credit and generally prohibit a bank from extending credit, engaging in a lease or sale of property, or furnishing services to a customer on the condition that the customer obtain additional services from the bank's holding company or from one of its subsidiaries.

1st Source Bank is also subject to certain restrictions imposed by the Federal Reserve Act on extensions of credit to executive officers, directors, principal shareholders, or any related interest of such persons. Extensions of credit (i) must be made on substantially the same terms, including interest rates and collateral, and subject to credit underwriting procedures that are at least as stringent as those prevailing at the time for comparable transactions with non affiliates, and (ii) must not involve more than the normal risk of repayment or present other unfavorable features. The Bank is also subject to certain lending limits and restrictions on overdrafts to such persons.

Reserve Requirements — The Federal Reserve requires all depository institutions to maintain reserves against their transaction account deposits. The Bank must maintain reserves of 3.00% against net transaction accounts greater than \$10.70 million and up to \$58.80 million (subject to adjustment by the Federal Reserve) and reserves of 10.00% must be maintained against that portion of net transaction accounts in excess of \$58.80 million.

Dividends — The ability of the Bank to pay dividends is limited by state and Federal laws and regulations that require 1st Source Bank to obtain the prior approval of the DFI and the Federal Reserve Bank of Chicago before paying a dividend that, together with other dividends it has paid during a calendar year, would exceed the sum of its net income for the year to date combined with its retained net income for the previous two years. The amount of dividends the Bank may pay may also be limited by certain covenant agreements and by the principles of prudent bank management. See Part II, Item 5, Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities for further discussion of dividend limitations.

Monetary Policy and Economic Control — The commercial banking business in which we engage is affected not only by general economic conditions, but also by the monetary policies of the Federal Reserve. Changes in the discount rate on member bank borrowing, availability of borrowing at the "discount window," open market operations, the imposition of changes in reserve requirements against member banks' deposits and assets of foreign branches, and the imposition of, and changes in, reserve requirements against certain borrowings by banks and their affiliates are some of the instruments of monetary policy available to the Federal Reserve. These monetary policies are used in varying combinations to influence overall growth and distributions of bank loans, investments, and deposits, and such use may affect interest rates charged on loans and leases or paid on deposits. The monetary policies of the Federal Reserve have had a significant effect on the operating results of commercial banks and are expected to do so in the future. The monetary policies of the Federal Reserve are influenced by various factors, including economic growth, inflation, unemployment, short-term and long-term changes in the international trade balance, and in the fiscal policies of the U.S. Government. Future monetary policies and the effect of such policies on our future business and earnings, and the effect on the future business and earnings of the Bank cannot be predicted.

Sarbanes-Oxley Act of 2002 — On July 30, 2002, the Sarbanes-Oxley Act of 2002 (SOA) was signed into law. The SOA's stated goals include enhancing corporate responsibility, increasing penalties for accounting and auditing improprieties at publicly traded companies and protecting investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities laws. The SOA generally applies to all companies that file or are required to file periodic reports with the SEC under the Securities Exchange Act of 1934 (Exchange Act.)

Among other things, the SOA creates the Public Company Accounting Oversight Board as an independent body subject to SEC supervision with responsibility for setting auditing, quality control, and ethical standards for auditors of public companies. The SOA also requires public companies to make faster and more-extensive financial disclosures, requires the chief executive officer and the chief financial officer of public companies to provide signed certifications as to the accuracy and completeness of financial information filed with the SEC, and provides enhanced criminal and civil penalties for violations of the Federal securities laws.

The SOA also addresses functions and responsibilities of audit committees of public companies. The statute, by mandating certain stock exchange listing rules, makes the audit committee directly responsible for the appointment, compensation, and oversight of the work of the company's outside auditor, and requires the auditor to report directly to the audit committee. The SOA authorizes each audit committee to engage independent counsel and other advisors, and requires a public company to provide the appropriate funding, as determined by its audit committee, to pay the company's auditors and any advisors that its audit committee retains. The SOA also requires public companies to prepare an internal control report and assessment by management, along with an attestation to this report prepared by the company's registered public accounting firm, in their annual reports to stockholders.

Secure and Fair Enforcement for Mortgage Licensing Act — The Secure and Fair Enforcement for Mortgage Licensing Act of 2008 (S.A.F.E. Act) establishes a nationwide licensing and registration system for mortgage loan originators. The S.A.F.E. Act requires an employee of a bank, savings association or credit union and certain of their subsidiaries that are regulated by a federal banking agency (agency-regulated institutions) who acts as a residential mortgage loan originator to register with the Nationwide Mortgage Licensing System and Registry (NMLS), obtain a unique identifier, and maintain this registration.

The federal banking agencies adopted a final rule that was published on August 23, 2010 to implement these provisions. The final rule requires, among other things, that a loan originator submit to the NMLS certain information concerning his or her personal history and experience, undergo an FBI criminal background check, and authorize the NMLS to obtain information related to any administrative, civil, or criminal findings by any governmental agency regarding the loan originator. All loan originators employed by agency-regulated institutions must register with the NMLS within 180 days of the date on which this registration system becomes operational, which the banking agencies expect to occur on or around January 31, 2011.

Dodd-Frank Wall Street Reform and Consumer Protection Act — On July 21, 2010, President Obama signed into law the Dodd-Frank Act, which significantly changes the regulation of financial institutions and the financial services industry. The Dodd-Frank Act includes provisions affecting large and small financial institutions alike, including several provisions that will profoundly affect how community banks, thrifts, and small bank and thrift holding companies will be regulated in the future. Among other things, these provisions abolish the Office of Thrift Supervision and transfer its functions to the other federal banking agencies, relax rules regarding interstate branching, allow financial institutions to pay interest on business checking accounts, and impose new capital requirements on bank and thrift holding companies.

The Dodd-Frank Act also makes permanent the temporary increase in deposit insurance coverage from \$100,000 to \$250,000 that was included in the EESA, and extends until December 31, 2012 the period during which the FDIC will provide unlimited deposit insurance for “noninterest-bearing transaction accounts.”

The Dodd-Frank Act also establishes the Bureau of Consumer Financial Protection as an independent entity within the Federal Reserve, which will be given the authority to promulgate consumer protection regulations applicable to all entities offering consumer financial services or products, including banks. Additionally, the Dodd-Frank Act includes a series of provisions covering mortgage loan origination standards affecting, among other things, originator compensation, minimum repayment standards, and pre-payment penalties. The Dodd-Frank Act contains numerous other provisions affecting financial institutions of all types, many of which may have an impact on our operating environment in substantial and unpredictable ways.

Because many of the regulations required to implement the Dodd-Frank Act have not yet been issued, the statute’s effect on the financial services industry in general, and on us in particular, is uncertain at this time. The Dodd-Frank Act is likely to affect our cost of doing business, however, and may limit or expand the scope of our permissible activities and affect the competitive balance within our industry and market areas. Our management is actively reviewing the provisions of the Dodd-Frank Act and assessing its probable impact on our business, financial condition, and results of operations.

Pending Legislation — Because of concerns relating to competitiveness and the safety and soundness of the banking industry, Congress often considers a number of wide-ranging proposals for altering the structure, regulation, and competitive relationships of the nation’s financial institutions. We cannot predict whether or in what form any proposals will be adopted or the extent to which our business may be affected.

ITEM 1A. RISK FACTORS.

An investment in our common stock is subject to risks inherent to our business. The material risks and uncertainties that we believe affect us are described below. See “Forward Looking Statements” under Item 7 of this report for a discussion of other important factors that can affect our business.

Fluctuations in interest rates could reduce our profitability and affect the value of our assets — Like other financial institutions, we are subject to interest rate risk. Our primary source of income is net interest income, which is the difference between interest earned on loans and leases and investments, and interest paid on deposits and borrowings. We expect that we will periodically experience imbalances in the interest rate sensitivities of our assets and liabilities and the relationships of various interest rates to each other. Over any defined period of time, our interest-earning assets may be more sensitive to changes in market interest rates than our interest-bearing liabilities, or vice-versa. In addition, the individual market interest rates underlying our loan and lease and deposit products may not change to the same degree over a given time period. In any event, if market interest rates should move contrary to our position, earnings may be negatively affected. In addition, loan and lease volume and quality and deposit volume and mix can be affected by market interest rates as can the businesses of our clients. Changes in levels of market interest rates could have a material adverse effect on our net interest spread, asset quality, origination volume, and overall profitability.

Market interest rates are beyond our control, and they fluctuate in response to general economic conditions and the policies of various governmental and regulatory agencies, in particular, the Federal Reserve Board. Changes in monetary policy, including changes in interest rates, may negatively affect our ability to originate loans and leases, the value of our assets and our ability to realize gains from the sale of our assets, all of which ultimately could affect our earnings.

Competition from other financial services providers could adversely impact our results of operations — The banking and financial services business is highly competitive. We face competition in making loans and leases, attracting deposits and providing insurance, investment, trust, and other financial services. Increased competition in the banking and financial services businesses may reduce our market share, impair our growth or cause the prices we charge for our services to decline. Our results of operations may be adversely impacted in future periods depending upon the level and nature of competition we encounter in our various market areas.

We are dependent upon the services of our management team — Our future success and profitability is substantially dependent upon our management and the banking abilities of our senior executives. We believe that our future results will also depend in part upon our ability to attract and retain highly skilled and qualified management. We are especially dependent on a limited number of key management personnel, many of whom do not have employment agreements with us. The loss of the chief executive officer and other senior management and key personnel could have a material adverse impact on our operations because other officers may not have the experience and expertise to readily replace these individuals. Many of these senior officers have primary contact with our clients and are important in maintaining personalized relationships with our client base. The unexpected loss of services of one or more of these key employees could have a material adverse effect on our operations and possibly result in reduced revenues if we were unable to find suitable replacements promptly. Competition for senior personnel is intense, and we may not be successful in attracting and retaining such personnel. Changes in key personnel and their responsibilities may be disruptive to our businesses and could have a material adverse effect on our businesses, financial condition, and results of operations.

Technology security breaches and constant technological change — Any compromise of our security could deter our clients from using our banking services that involve the transmission of confidential information. We rely on security systems to provide the security and authentication necessary to effect secure transmission of data. These precautions may not protect our systems from compromises or breaches of our security measures that could result in damage to our reputation and business.

The financial services industry is constantly undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better service clients and reduce costs. Our future success depends, in part, upon our ability to address the needs of our clients by using technology to provide products and services that will satisfy client demands, as well as create additional efficiencies within our operations. Many of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services quickly or be successful in marketing these products and services to our clients. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on our business and, in turn, our financial condition and results of operations.

We are subject to credit risks relating to our loan and lease portfolios — We have certain lending policies and procedures in place that are designed to optimize loan and lease income within an acceptable level of risk. Our management reviews and approves these policies and procedures on a regular basis. A reporting system supplements the review process by providing our management with frequent reports related to loan and lease production, loan quality, concentrations of credit, loan and lease delinquencies, and nonperforming and potential problem loans and leases. Diversification in the loan and lease portfolios is a means of managing risk associated with fluctuations and economic conditions.

We maintain an independent loan review department that reviews and validates the credit risk program on a periodic basis. Results of these reviews are presented to our management. The loan and lease review process complements and reinforces the risk identification and assessment decisions made by lenders and credit personnel, as well as our policies and procedures.

Commercial and commercial real estate loans generally involve higher credit risks than residential real estate and consumer loans. Because payments on loans secured by commercial real estate or equipment are often dependent upon the successful operation and management of the underlying assets, repayment of such loans may be influenced to a great extent by conditions in the market or the economy. We seek to minimize these risks through our underwriting standards. We obtain financial information and perform credit risk analysis on our customers. Credit criteria may include, but are not limited to, assessments of income, cash flows, and net worth; asset ownership; bank and trade credit reference; credit bureau report; and operational history.

Commercial real estate or equipment loans are underwritten after evaluating and understanding the borrower's ability to operate profitably and generate positive cash flows. Our management examines current and projected cash flows of the borrower to determine the ability of the borrower to repay their obligations as agreed. Underwriting standards are designed to promote relationship banking rather than transactional banking. Most commercial and industrial loans are secured by the assets being financed or other business assets; however, some loans may be made on an unsecured basis. Our credit policy sets different maximum exposure limits both by business sector and our current and historical relationship and previous experience with each customer.

We offer both fixed-rate and adjustable-rate consumer mortgage loans secured by properties, substantially all of which are located in our primary market area. Adjustable-rate mortgage loans help reduce our exposure to changes in interest rates; however, during periods of rising interest rates, the risk of default on adjustable-rate mortgage loans may increase as a result of repricing and the increased payments required from the borrower. Additionally, most residential mortgages are sold into the secondary market and serviced by our principal banking subsidiary, 1st Source Bank.

Consumer loans are primarily all other non-real estate loans to individuals in our regional market area. Consumer loans can entail risk, particularly in the case of loans that are unsecured or secured by rapidly depreciating assets. In these cases, any repossessed collateral may not provide an adequate source of repayment of the outstanding loan balance. The remaining deficiency often does not warrant further substantial collection efforts against the borrower beyond obtaining a deficiency judgment. In addition, consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be adversely affected by job loss, divorce, illness, or personal bankruptcy.

The 1st Source Specialty Finance Group loan and lease portfolio consists of commercial loans and leases secured by construction and transportation equipment, including aircraft, autos, trucks, and vans. Finance receivables for this Group generally provide for monthly payments and may include prepayment penalty provisions.

Our construction and transportation related businesses could be adversely affected by slowdowns in the economy. Clients who rely on the use of assets financed through the Specialty Finance Group to produce income could be negatively affected, and we could experience substantial loan and lease losses. By the nature of the businesses these clients operate in, we could be adversely affected by rapid increases of fuel costs. Since some of the relationships in these industries are large (up to \$25 million), a slowdown could have a significant adverse impact on our performance.

Our construction and transportation related businesses could be adversely impacted by the negative effects caused by high fuel costs, terrorist and other potential attacks, and other destabilizing events. These factors could contribute to the deterioration of the quality of our loan and lease portfolio, as they could have a negative impact on the travel and transportation sensitive businesses for which our specialty finance businesses provide financing.

In addition, our leasing and equipment financing activity is subject to the risk of cyclical downturns, industry concentration and clumping, and other adverse economic developments affecting these industries and markets. This area of lending, with transportation in particular, is dependent upon general economic conditions and the strength of the travel, construction, and transportation industries.

Our reserve for loan and lease losses may prove to be insufficient to absorb probable losses in our loan and lease portfolio — In the financial services industry, there is always a risk that certain borrowers may not repay borrowings. The determination of the appropriate level of the reserve for loan and lease losses inherently involves a high degree of subjectivity and requires us to make significant estimates of current credit risks and future trends, all of which may undergo material changes. Our reserve for loan and lease losses may not be sufficient to cover the loan and lease losses that we may actually incur. If we experience defaults by borrowers in any of our businesses, our earnings could be negatively affected. Changes in local economic conditions could adversely affect credit quality, particularly in our local business loan and lease portfolio. Changes in national or international economic conditions could also adversely affect the quality of our loan and lease portfolio and negate, to some extent, the benefits of national or international diversification through our Specialty Finance Group's portfolio. In addition, bank regulatory agencies periodically review our reserve for loan and lease losses and may require an increase in the provision for possible loan and lease losses or the recognition of further loan or lease charge-offs based upon their judgments, which may be different from ours.

The soundness of other financial institutions could adversely affect us — Financial services institutions are interrelated as a result of trading, clearing, counterparty, or other relationships. We have exposure to many different industries and counterparties, and we routinely execute transactions with counterparties in the financial services industry, including commercial banks, brokers and dealers, investment banks, and other institutional clients. Many of these transactions expose us to credit risk in the event of a default by our counterparty or client. In addition, our credit risk may be exacerbated when the collateral held by us cannot be realized or is liquidated at prices not sufficient to recover the full amount of the credit or derivative exposure due us. Any such losses could have a material adverse effect on our financial condition and results of operations.

Our investments in municipalities could have a negative impact — As a result of recent economic conditions, some municipalities are struggling to meet financial obligations. We have certain municipal investment securities which are subject to credit risk if the municipalities are unable to meet their obligations to us. In addition, certain bond insurers have filed bankruptcy in recent months. Although we believe the municipalities will be able to meet their obligations, there can be no certainty regarding future results.

We could have liquidity risks associated with our Indiana public fund deposits — The State of Indiana recently changed the law governing the collateralization of public fund deposits. Under the new law, the Indiana Board for Depositories (IBFD) that administers the Public Deposit Insurance Fund (PDIF) will determine which financial institutions are required to pledge collateral and may prohibit certain institutions from holding Indiana public funds. The IBFD will determine which financial institutions are required to pledge collateral based on the strength of their financial ratings. We have been informed by the IBFD that no collateral is required at this time and the next evaluation will occur on or before March 31, 2011. However, pending legislation could alter this requirement in the future and adversely impact our liquidity.

Adverse changes in economic conditions could impair our financial condition and results of operations — We are impacted by general business and economic conditions in the United States and abroad. These conditions include short-term and long-term interest rates, inflation, money supply, political issues, legislative and regulatory changes, fluctuations in both debt and equity capital markets, broad trends in industry and finance, unemployment, and the strength of the U.S. economy and the local economies in which we operate, all of which are beyond our control. A deterioration in economic conditions could result in an increase in loan delinquencies and non-performing assets, decreases in loan collateral values and a decrease in demand for our products and services.

We are subject to extensive government regulation and supervision — Our operations are subject to extensive federal and state regulation and supervision. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds and the banking system as a whole, not security holders. These regulations affect our lending practices, capital structure, investment practices, dividend policy and growth, among other things. Congress and federal regulatory agencies continually review banking laws, regulations and policies for possible change. Changes to statutes, regulations or regulatory policies, including changes in interpretation or implementation of statutes, regulation or policies, could affect us in substantial and unpredictable ways. Such changes could subject us to additional costs and limit the types of financial services and products we may offer. Failure to comply with laws, regulations or policies could result in sanctions by regulatory agencies, civil money penalties and/or reputation damage, which could have a material adverse effect on our business, financial condition and results of operations. While we have policies and procedures designed to prevent any such violations, there can be no assurance that such violations will not occur.

We rely on dividends from our subsidiaries — Our parent company, 1st Source Corporation, receives substantially all of its revenue from dividends from our subsidiaries. These dividends are the principal source of funds to pay dividends on our common stock and interest and principal on our debt. Various federal and/or state laws and regulations limit the amount of dividends that our subsidiaries may pay to our parent company. In the event our subsidiaries are unable to pay dividends to our parent company, we may not be able to service debt, pay obligations or pay dividends on our common stock. The inability to receive dividends from our subsidiaries could have a material adverse effect on our business, financial condition and results of operations.

Changes in accounting standards could impact reported earnings — Current accounting and tax rules, standards, policies and interpretations influence the methods by which financial institutions conduct business, implement strategic initiatives and tax compliance, and govern financial reporting and disclosures. These laws, regulations, rules, standards, policies and interpretations are constantly evolving and may change significantly over time. Events that may not have a direct impact on us, such as bankruptcy of major U.S. companies, have resulted in legislators, regulators, and authoritative bodies, such as the Financial Accounting Standards Board, the Securities and Exchange Commission, the Public Company Accounting Oversight Board and various taxing authorities, responding by adopting and/or proposing substantive revision to laws, regulations, rules, standards, policies and interpretations. New accounting pronouncements and varying interpretations of accounting pronouncements have occurred and may occur in the future. A change in accounting standards may adversely affect reported financial condition and results of operations.

Our deposit insurance premiums could be higher in the future which will have an adverse effect on our future earnings — The FDIC expects a higher rate of insured institution failures in the next few years, which may result in a continued decline in the reserve ratio. Due to the continued failures of FDIC insured depository institutions, FDIC insurance premiums have increased. FDIC deposit insurance premiums may increase in the future, perhaps significantly, which will adversely impact our future earnings.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None

ITEM 2. PROPERTIES.

Our headquarters building is located in downtown South Bend. The building is part of a larger complex, including a 300-room hotel and a 500-car parking garage. In 1982, we sold the building and entered into a leaseback agreement with the purchaser for a term of 30 years. The building is a structure of approximately 160,000 square feet, with 1st Source and our subsidiaries occupying approximately 65% of the available office space and approximately 35% subleased to unrelated tenants as of December 31, 2010.

In December 2010, we entered into a new 10.5 year lease on our headquarters building which became effective January 1, 2011. Pursuant to the new lease agreement, we are relieved of our responsibility for managing the building. Effective January 1, 2011, 1st Source will lease approximately 60% of the office space.

At December 31, 2010, we also owned property and/or buildings on which 54 of the 1st Source Bank's 76 banking centers were located, including the facilities in Allen, Elkhart, Fulton, Huntington, Kosciusko, LaPorte, Marshall, Porter, St. Joseph, Starke, and Wells Counties in the State of Indiana and Berrien and Cass Counties in the State of Michigan, as well as an operations center, warehouse, and our former headquarters building, which is utilized for additional business operations. The Bank leases additional property and/or buildings to and from third parties under lease agreements negotiated at arms-length.

ITEM 3. LEGAL PROCEEDINGS.

1st Source and our subsidiaries are involved in various legal proceedings incidental to the conduct of our businesses. Our management does not expect that the outcome of any such proceedings will have a material adverse effect on our consolidated financial position or results of operations.

ITEM 4. (REMOVED AND RESERVED).

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Our common stock is traded on the Nasdaq Global Select Market under the symbol "SRCE." The following table sets forth for each quarter the high and low sales prices for our common stock, as reported by Nasdaq, and the cash dividends paid per share for each quarter.

Common Stock Prices (quarter ended)	2010 Sales Price		Cash Dividends	2009 Sales Price		Cash Dividends
	High	Low	Paid	High	Low	Paid
March 31	\$18.74	\$14.25	\$.15	\$23.92	\$14.16	\$.14
June 30	20.36	16.58	.15	21.98	15.36	.14
September 30	18.99	15.98	.15	17.94	14.52	.15
December 31	20.75	17.01	.16	16.60	13.84	.16

As of February 14, 2011, there were 984 holders of record of 1st Source common stock

COMPARISON OF FIVE YEAR CUMULATIVE TOTAL RETURN*

Among 1st Source, Morningstar Market Weighted NASDAQ Index** and Peer Group Index***

* Assumes \$100 invested on December 31, 2005, in 1st Source Corporation common stock, NASDAQ market index, and peer group index.

** The Morningstar Weighted NASDAQ Index Return is calculated using all companies which trade as NASD Capital Markets, NASD Global Markets or NASD Global Select. It includes both domestic and foreign companies. The index is weighted by the then current shares outstanding and assumes dividends reinvested. The return is calculated on a monthly basis.

***The peer group is a market-capitalization-weighted stock index of 142 banking companies in Illinois, Indiana, Michigan, Ohio, and Wisconsin.

NOTE: Total return assumes reinvestment of dividends.

The following table summarizes our share repurchase activity during the three months ended December 31, 2010.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs*	Maximum Number (or Approximate Dollar Value) of Shares that may yet be Purchased Under the Plans or Programs
October 01 - 31, 2010	9,400	\$ 17.85	9,400	1,259,812
November 01 - 30, 2010	21,295	18.48	21,295	1,238,517
December 01 - 31, 2010	145	20.62	145	1,238,372

*1st Source maintains a stock repurchase plan that was authorized by the Board of Directors on April 26, 2007. Under the terms of the plan, 1st Source may repurchase up to 2,000,000 shares of its common stock when favorable conditions exist on the open market or through private transactions at various prices from time to time. Since the inception of the plan, 1st Source has repurchased a total of 761,628 shares.

Federal laws and regulations contain restrictions on the ability of 1st Source and the Bank to pay dividends. For information regarding restrictions on dividends, see Part I, Item 1, Business - Regulation and Supervision - Dividends and Part II, Item 8, Financial Statements and Supplementary Data - Note 20 of the Notes to Consolidated Financial Statements.

Due to restrictions to which we were subject as a participant in the Capital Purchase Program established by the U.S. Treasury Department under EESA, we were not permitted to pay cash in respect to the bonus awarded under the 1998 Performance Compensation Plan that was payable in 2010. Accordingly, the Executive Compensation and Human Resources Committee determined to issue shares of Common Stock in respect to such bonus that would have been payable to Christopher J. Murphy III, Chairman of the Board and Chief Executive Officer, issuing 10,323 shares of common stock to Mr. Murphy in February 2010. Such issuance will be presented to shareholders for ratification at the 2011 Annual Meeting. The issuance was exempt from registration under the Securities Act, among other reasons, because of the exemption afforded under Section 4(2) of the Securities Act.

ITEM 6. SELECTED FINANCIAL DATA.

The following selected financial data should be read in conjunction with our Consolidated Financial Statements and the accompanying notes presented elsewhere herein.

<i>(Dollars in thousands, except per share amounts)</i>	2010	2009	2008	2007 (2)	2006
Interest income	\$ 200,626	\$ 200,412	\$ 235,308	\$ 253,587	\$ 208,994
Interest expense	53,129	72,200	103,148	134,677	102,561
Net interest income	147,497	128,212	132,160	118,910	106,433
Provision for (recovery of) loan and lease losses	19,207	31,101	16,648	7,534	(2,736)
Net interest income after provision for (recovery of) loan and lease losses	128,290	97,111	115,512	111,376	109,169
Noninterest income	86,691	85,530	84,003	70,619	76,585
Noninterest expense	154,505	151,123	153,114	140,312	126,211
Income before income taxes	60,476	31,518	46,401	41,683	59,543
Income taxes	19,232	6,028	13,015	11,144	20,246
Net income	41,244	25,490	33,386	30,539	39,297
Net income available to common shareholders	\$ 29,655	\$ 19,074	\$ 33,386	\$ 30,539	\$ 39,297
Assets at year-end	\$4,445,281	\$4,542,100	\$4,464,174	\$4,447,104	\$3,807,315
Long-term debt and mandatorily redeemable securities at year-end	24,816	19,761	29,832	34,702	43,761
Shareholders' equity at year-end (3)	486,383	570,320	453,664	430,504	368,904
Basic net income per common share (1)	1.21	0.79	1.38	1.30	1.74
Diluted net income per common share (1)	1.21	0.79	1.37	1.28	1.72
Cash dividends per common share (1)	.610	.590	.580	.560	.534
Dividend payout ratio	50.41%	74.68%	42.34%	43.75%	31.05%
Return on average assets	0.91%	0.57%	0.76%	0.74%	1.11%
Return on average common equity	6.10%	4.07%	7.52%	7.47%	10.98%
Average common equity to average assets	10.69%	10.40%	10.09%	9.85%	10.07%

(1) The computation of per common share data gives retroactive recognition to a 10% stock dividend declared July 27, 2006.

(2) Results for 2007 and later include the acquisition of FINA Bancorp, Inc.

(3) Results for 2009 include the issuance of Preferred Stock under TARP. Refer to Note 13 of the Notes to Consolidated Financial Statements for further details.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The purpose of this analysis is to provide the reader with information relevant to understanding and assessing our results of operations for each of the past three years and financial condition for each of the past two years. In order to fully appreciate this analysis the reader is encouraged to review the consolidated financial statements and statistical data presented in this document.

FORWARD-LOOKING STATEMENTS

This report, including Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements. Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, anticipations, assumptions, estimates, intentions, and future performance, and involve known and unknown risks, uncertainties and other factors, which may be beyond our control, and which may cause actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements.

All statements other than statements of historical fact are statements that could be forward-looking statements. Words such as "believe," "contemplate," "seek," "estimate," "plan," "project," "anticipate," "possible," "assume," "expect," "intend," "targeted," "continue," "remain," "will," "should," "indicate," "would," "may" and other similar expressions are intended to identify forward-looking statements but are not the exclusive means of identifying such statements. Forward-looking statements provide current expectations or forecasts of future events and are not guarantees of future performance, nor should they be relied upon as representing management's views as of any subsequent date.

All written or oral forward-looking statements that are made by or attributable to us are expressly qualified in their entirety by this cautionary notice. We have no obligation and do not undertake to update, revise, or correct any of the forward-looking statements after the date of this report, or after the respective dates on which such statements otherwise are made. We have expressed our expectations, beliefs, and projections in good faith and we believe they have a reasonable basis. However, we make no assurances that our expectations, beliefs, or projections will be achieved or accomplished. These forward-looking statements may not be realized due to a variety of factors, including, without limitation, the following:

- Local, regional, national, and international economic conditions and the impact they may have on us and our clients and our assessment of that impact.
- Changes in the level of nonperforming assets and charge-offs.
- Changes in estimates of future cash reserve requirements based upon the periodic review thereof under relevant regulatory and accounting requirements.
- The effects of and changes in trade and monetary and fiscal policies and laws, including the interest rate policies of the Federal Reserve Board.
- Inflation, interest rate, securities market, and monetary fluctuations.
- Political instability.
- Acts of war or terrorism.
- Substantial increases in the cost of fuel.
- The timely development and acceptance of new products and services and perceived overall value of these products and services by others.
- Changes in consumer spending, borrowings, and savings habits.
- Changes in the financial performance and/or condition of our borrowers.
- Technological changes.
- Acquisitions and integration of acquired businesses.
- The ability to increase market share and control expenses.
- Changes in the competitive environment among bank holding companies.
- The effect of changes in laws and regulations (including laws and regulations concerning taxes, banking, securities, and insurance) with which we and our subsidiaries must comply.
- The effect of changes in accounting policies and practices and auditing requirements, as may be adopted by the regulatory agencies, as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board, and other accounting standard setters.
- Changes in our organization, compensation, and benefit plans.
- The costs and effects of legal and regulatory developments including the resolution of legal proceedings or regulatory or other governmental inquiries and the results of regulatory examinations or reviews.
- Greater than expected costs or difficulties related to the integration of new products and lines of business.
- Our success at managing the risks described in Item 1A. Risk Factors.

APPLICATION OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP) and follow general practices within the industries in which we operate. Application of these principles requires our management to make estimates or judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates or judgments reflect our management's view of the most appropriate manner in which to record and report our overall financial performance. Because these estimates or judgments are based on current circumstances, they may change over time or prove to be inaccurate based on actual experience. As such, changes in these estimates, judgments, and/or assumptions may have a significant impact on our financial statements. All accounting policies are important, and all policies described in Part II, Item 8, Financial Statements and Supplementary Data, Note 1 (Note 1), should be reviewed for a greater understanding of how our financial performance is recorded and reported.

We have identified three policies as being critical because they require our management to make particularly difficult, subjective, and/or complex estimates or judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts would be reported under different

conditions or using different assumptions. These policies relate to the determination of the reserve for loan and lease losses, the valuation of mortgage servicing rights, and fair value measurements. Our management has used the best information available to make the estimations or judgments necessary to value the related assets and liabilities. Actual performance that differs from estimates or judgments and future changes in the key variables could change future valuations and impact net income. Our management has reviewed the application of these policies with the Audit Committee of the Board of Directors. Following is a discussion of the areas we view as our most critical accounting policies.

Reserve for Loan and Lease Losses — The reserve for loan and lease losses represents our management's estimate of probable losses inherent in the loan and lease portfolio and the establishment of a reserve that is sufficient to absorb those losses. In determining an adequate reserve, our management makes numerous judgments, assumptions, and estimates based on continuous review of the loan and lease portfolio, estimates of client performance, collateral values, and disposition, as well as historical loss rates and expected cash flows. In assessing these factors, our management benefits from a lengthy organizational history and experience with credit decisions and related outcomes. Nonetheless, if our management's underlying assumptions prove to be inaccurate, the reserve for loan and lease losses would have to be adjusted. Our accounting policy related to the reserve is disclosed in Note 1 under the heading "Reserve for Loan and Lease Losses."

Fair Value Measurements — We use fair value measurements to record certain financial instruments and to determine fair value disclosures. Available-for-sale securities, trading account securities, mortgage loans held for sale, and interest rate swap agreements are financial instruments recorded at fair value on a recurring basis. Additionally, from time to time, we may be required to record at fair value other financial assets on a nonrecurring basis. These nonrecurring fair value adjustments typically involve write-downs of, or specific reserves against, individual assets. GAAP establishes a three-level hierarchy for disclosure of assets and liabilities recorded at fair value. The classification of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used in the measurement are observable or unobservable. Observable inputs reflect market-driven or market-based information obtained from independent sources, while unobservable inputs reflect our estimates about market data.

The degree of management judgment involved in determining the fair value of a financial instrument is dependent upon the availability of quoted market prices or observable market data. For financial instruments that trade actively and have quoted market prices or observable market data, there is minimal subjectivity involved in measuring fair value. When observable market prices and data are not fully available, management judgment is necessary to estimate fair value. In addition, changes in the market conditions may reduce the availability of quoted prices or observable data. For example, reduced liquidity in the capital markets or changes in secondary market activities could result in observable market inputs becoming unavailable. Therefore, when market data is not available, we use valuation techniques that require more management judgment to estimate the appropriate fair value measurement. Fair value is discussed further in Note 1 under the heading "Fair Value Measurements" and in Note 21, "Fair Values of Financial Instruments."

Mortgage Servicing Rights Valuation — We recognize as assets the rights to service mortgage loans for others, known as mortgage servicing rights, whether the servicing rights are acquired through purchases or through originated loans. Mortgage servicing rights do not trade in an active open market with readily observable market prices. Although sales of mortgage servicing rights do occur, the precise terms and conditions may not be readily available. As such, the value of mortgage servicing assets is established and valued using discounted cash flow modeling techniques which require management to make estimates regarding future net servicing cash flows, taking into consideration actual and expected mortgage loan prepayment rates, discount rates, servicing costs, and other economic factors. The expected rates of mortgage loan prepayments are the most significant factors driving the value of mortgage servicing assets. Increases in mortgage loan prepayments reduce estimated future net servicing cash flows because the life of the underlying loan is reduced. In determining the fair value of the mortgage servicing assets, mortgage interest rates (which are used to determine prepayment rates), and discount rates are held constant over the estimated life of the portfolio. Expected mortgage loan prepayment rates are derived from a third-party model and adjusted to reflect our actual prepayment experience. Mortgage servicing assets are carried at the lower of amortized cost or fair value. The values of these assets are sensitive to changes in the assumptions used and readily available market pricing does not exist. The valuation of mortgage servicing assets is discussed further in Note 21 "Fair Values of Financial Instruments."

EARNINGS SUMMARY

Net income in 2010 was \$41.24 million, up from \$25.49 million in 2009 and up from \$33.39 million in 2008. Diluted net income per common share was \$1.21 in 2010, \$0.79 in 2009, and \$1.37 in 2008. Return on average total assets was 0.91% in 2010 compared to 0.57% in 2009, and 0.76% in 2008. Return on average common shareholders' equity was 6.10% in 2010 versus 4.07% in 2009, and 7.52% in 2008.

Net income in 2010 was positively impacted by a \$19.29 million or 15.04% increase in net interest income and a \$11.89 million or 38.24% decrease in provision for loan and lease losses over 2009, which was offset by an increase of \$13.20 million or 219.04% in income tax expense. Net income in 2009, as compared to 2008, was negatively impacted by a \$14.45 million or 86.82% increase in provision for loan and lease losses over 2008 and a reduction of \$11.49 million gain due to sale of certain assets of Investment Advisors in 2008, which was offset by an improvement of \$11.68 million or 116.88% in investment securities due to impairment recorded in 2008 that was not present in 2009.

Dividends paid on common stock in 2010 amounted to \$0.61 per share, compared to \$0.59 per share in 2009, and \$0.58 per share in 2008. The level of earnings reinvested and dividend payouts are determined by the Board of Directors based on management's assessment of future growth opportunities and the level of capital necessary to support them.

Net Interest Income — Our primary source of earnings is net interest income, the difference between income on earning assets and the cost of funds supporting those assets. Significant categories of earning assets are loans and securities while deposits and borrowings represent the major portion of interest-bearing liabilities. For purposes of the following discussion, comparison of net interest income is done on a tax equivalent basis, which provides a common basis for comparing yields on earning assets exempt from federal income taxes to those which are fully taxable.

Net interest margin (the ratio of net interest income to average earning assets) is affected by movements in interest rates and changes in the mix of earning assets and the liabilities that fund those assets. Net interest margin on a fully taxable equivalent basis was 3.59% in 2010 compared to 3.14% in 2009, and 3.34% in 2008. The higher margin in 2010 reflects the decline in funding costs. Net interest income was \$147.50 million for 2010, compared to \$128.21 million for 2009. Tax-equivalent net interest income totaled \$150.87 million for 2010, an increase of \$18.87 million from the \$132.00 million reported for 2009. The \$18.87 million increase is mainly due to changes in rates.

During 2010, average earning assets increased \$7.97 million while average interest-bearing liabilities decreased \$39.72 million over the comparable period in 2009. The yield on average earning assets decreased 1 basis point to 4.85% for 2010 from 4.86% for 2009. Total cost of average interest-bearing liabilities decreased 54 basis points during 2010 as liabilities were impacted by decreases in market rates and rate repricing on maturing certificates of deposit. The result was an increase of 45 basis points to net interest spread, or the difference between interest income on earning assets and expense on interest-bearing liabilities.

The largest contributor to the decrease in the yield on average earning assets in 2010 was the change in asset mix. Average net loans and leases decreased \$45.31 million or 1.44% in 2010 from 2009 while the yield increased 9 basis points to 5.53%. During 2010, the tax-equivalent yield on securities available for sale decreased 14 basis points to 3.14% while the average balance increased \$79.23 million. Average mortgages held for sale decreased \$22.08 million during 2010 and the yield decreased 61 basis points.

Average interest-bearing deposits decreased \$24.97 million during 2010 while the effective rate paid on those deposits decreased 59 basis points. Average noninterest-bearing demand deposits increased \$56.52 million during 2010.

Average short-term borrowings decreased \$21.46 million during 2010 while the effective rate paid decreased 11 basis points. Average long-term debt increased \$6.70 million during 2010 as the effective rate decreased 59 basis points.

The following table provides an analysis of net interest income and illustrates interest income earned and interest expense charged for each major component of interest earning assets and the interest bearing liabilities. Yields/rates are computed on a tax-equivalent basis, using a 35% rate. Nonaccrual loans and leases are included in the average loan and lease balance outstanding.

	2010			2009			2008

Noninterest Income — Noninterest income increased \$1.16 million or 1.36% in 2010 from 2009 following a \$1.53 million or 1.82% increase in 2009 over 2008. Noninterest income for the most recent three years ended December 31 was as follows:

<i>(Dollars in thousands)</i>	2010	2009	2008
Noninterest income:			
Trust fees	\$15,838	\$15,036	\$18,599
Service charges on deposit accounts	19,323	20,645	22,035
Mortgage banking income	6,218	8,251	2,994
Insurance commissions	5,074	4,930	5,363
Equipment rental income	26,036	25,757	24,224
Other income	11,909	9,224	9,293
Gain on sale of certain Investment Advisor assets	-	-	11,492
Investment securities and other investment gains (losses)	2,293	1,687	(9,997)
Total noninterest income	\$86,691	\$85,530	\$84,003

Trust fees (which include investment management fees, estate administration fees, mutual fund fees, annuity fees, and fiduciary fees) increased by \$0.80 million or 5.33% in 2010 from 2009 compared to a decrease of \$3.56 million or 19.16% in 2009 over 2008. Trust fees are largely based on the size of client relationships and the market value of assets under management. The market value of trust assets under management at December 31, 2010 and 2009 was \$3.19 billion and \$2.80 billion, respectively. At December 31, 2010, these trust assets were comprised of \$1.92 billion of personal and agency trusts, \$879.32 million of employee benefit plan assets, \$303.44 million of estate administration assets and individual retirement accounts, and \$84.90 million of custody assets. The increase in trust fees in 2010 was a result of an increase in the market values of investment accounts. The decline in trust fees in 2010 and 2009 from 2008 was primarily due to a reduction in our investment advisory management fees received from the 1st Source Monogram Funds due to the sale of assets related to the management of such funds in December 2008. The reduction in investment advisory management fees was partially offset by earnout fees on the sale of \$3.06 million in 2010 and \$2.10 million in 2009 which were reflected in other income.

Service charges on deposit accounts decreased \$1.32 million or 6.40% in 2010 from 2009 compared to a decrease of \$1.39 million or 6.31% in 2009 from 2008. The decline in service charges on deposit accounts in 2010 reflects a lower volume of nonsufficient fund transactions. The decline in service charges on deposit accounts in 2009 reflects a lower volume of overdraft and nonsufficient fund transactions.

Mortgage banking income decreased \$2.03 million or 24.64% in 2010 over 2009, compared to an increase of \$5.26 million or 175.58% in 2009 over 2008. In 2010, we had no valuation adjustments of mortgage servicing rights compared to \$2.07 million in recoveries of mortgage servicing rights impairment in 2009. In 2009, we also had increased gains on sale of loans over 2008 levels. During 2010, 2009 and 2008, we determined that no permanent write-down was necessary for previously recorded impairment on mortgage servicing assets.

Insurance commissions were relatively flat in 2010 from 2009 compared to a decrease of \$0.43 million or 8.07% in 2009 from 2008. The lower commission income in 2009 was mainly due to lower premiums as a result of market conditions and a reduction in customer accounts.

Equipment rental income generated from operating leases grew by \$0.28 million or 1.08% during 2010 from 2009 compared to an increase of \$1.53 million or 6.33% during 2009 from 2008. Revenues from operating leases for transportation equipment, aircraft and special purpose vehicles increased as clients responded positively to our marketing efforts and entered into new lease agreements.

On August 25, 2008, Investment Advisors entered into a Purchase and Sale Agreement with WA Holdings, Inc. ("Buyer") whereby Investment Advisors agreed to sell certain assets to Buyer and to enter into a long-term strategic partnership with Buyer. Pursuant to the Purchase and Sale Agreement, in December 2008, Buyer and its wholly-owned subsidiary, Wasatch Advisors, Inc., investment advisor of the Wasatch Funds, Inc., acquired assets of Investment Advisors related to the management of the 1st Source Monogram Mutual Funds - the Income Equity Fund, the Long/Short Fund and the Income Fund. The 1st Source Monogram Mutual Funds were reorganized into the Wasatch - 1st Source Income Equity Fund, the Wasatch - 1st Source Long/Short Fund, and the Wasatch - 1st Source Income Fund. Investment Advisors recorded a net gain of \$11.49 million at closing, which was net of \$1.51 million of legal and compensation expense.

Investment securities and other investment gains totaled \$2.29 million for the year ended 2010 compared to gains of \$1.69 million for the year ended 2009 and losses of \$10.00 million for the year ended 2008. In 2008, we took \$10.82 million in impairment charges on investments in the Federal National Mortgage Association (FNMA) and the Federal Home Loan Mortgage Corporation (FHLMC) preferred stock and other preferred equities as a result of the deterioration in the residential mortgage business and government intervention at the FNMA and the FHLMC. Due to the uncertainty of future market conditions and how they might impact the financial performance of the FNMA and the FHLMC, we sold our remaining shares of the FHLMC and FNMA preferred stock in 2009 realizing gains of \$390 thousand. Also due to market uncertainty in 2009, we sold our remaining shares of corporate preferred stocks, realizing losses of \$688 thousand. In 2010, we recognized a gain on sale of a venture capital investment of \$1.62 million and had other partnership gains of \$0.64 million.

Other income increased \$2.69 million or 29.11% in 2010 from 2009 and remained relatively stable in 2009 from 2008. The increase in other income in 2010 was primarily due to higher bank owned life insurance income and higher earnout fees on the Wasatch sale.

Noninterest Expense — Noninterest expense increased \$3.38 million or 2.24% in 2010 over 2009 following a \$1.99 million or 1.30% decrease in 2009 from 2008. Noninterest expense for the recent three years ended December 31 was as follows:

<i>(Dollars in thousands)</i>	2010	2009	2008
Noninterest expense:			
Salaries and employee benefits	\$ 75,815	\$ 72,483	\$ 76,965
Net occupancy expense	8,788	9,185	9,698
Furniture and equipment expense	12,543	13,980	15,095
Depreciation — leased equipment	20,715	20,515	19,450
Professional fees	6,353	4,399	8,446
Supplies and communications	5,499	5,916	6,782
Business development and marketing expense	3,774	3,488	3,749
Loan and lease collection and repossession expense	6,227	4,283	1,162
FDIC and other insurance	6,256	8,362	2,601
Intangible asset amortization	1,324	1,352	1,393
Other expense	7,211	7,160	7,773
Total noninterest expense	\$154,505	\$151,123	\$153,114

Total salaries and employee benefits increased \$3.33 million or 4.60% in 2010 from 2009, following a \$4.48 million or 5.82% decrease in 2009 from 2008.

Employee salaries increased \$1.34 million or 2.19% in 2010 from 2009 compared to a decrease of \$0.63 million or 1.02% in 2009 from 2008. The increase in 2010 was primarily due to higher executive incentive expense offset by lower base salaries. The decline in 2009 was the result of a reduced work force offset by a decline in salaries deferred relating to the origination of loans.

Employee benefits grew by \$1.99 million or 17.75% in 2010 from 2009, compared to a decrease of \$3.85 million or 25.56% in 2009 from 2008. The increase in 2010 was primarily due to higher group insurance costs and a one-time reversal of post retirement benefit obligations in 2009 due to the termination of the post retirement benefit plan for new retirees which was not present in 2010. The decrease in 2009 was primarily due to lower group insurance costs and a one-time reversal of post retirement benefit obligations due to the termination of the post retirement benefit plan for new retirees.

Occupancy expense decreased \$0.40 million or 4.32% in 2010 from 2009, compared to a decrease of \$0.51 million or 5.29% in 2009 from 2008. The decrease in 2010 was mainly a result of lower real estate taxes offset by higher repair costs on our premises. The decrease in 2009 was mainly due to lower repair costs on our premises.

Furniture and equipment expense, including depreciation, declined \$1.44 million or 10.28% in 2010 from 2009 compared to a decline of \$1.12 million or 7.39% in 2009 from 2008. The decrease in 2010 was caused by lower depreciation expense, computer processing charges and ATM operating expense. The decrease in 2009 was caused by lower depreciation expense and lower computer processing charges.

Depreciation on equipment owned under operating leases increased \$0.20 million or 0.97% in 2010 from 2009, following a \$1.07 million or 5.48% increase in 2009 from 2008. In 2010 and 2009, depreciation on equipment owned under operating leases increased in conjunction with the increase in equipment rental income as some of our clients opted to enter into new lease arrangements rather than purchase equipment.

Professional fees increased \$1.95 million or 44.42% in 2010 from 2009, compared to a \$4.05 million or 47.92% decrease in 2009 from 2008. In 2008, professional fees were higher due to expenses recorded for a systems security breach that occurred in May 2008 and other consulting expenses. In 2009, professional fees returned to the 2007 level. In 2010, professional fees were higher than 2009 levels due to deposit pricing modeling and strategic planning consulting costs.

Supplies and communications expense decreased \$0.42 million or 7.05% in 2010 from 2009 after a \$0.87 million or 12.77% decrease in 2009 as compared to 2008. The decreases in 2010 and 2009 were primarily a result of lower postage expense and printing and supplies expense.

Business development and marketing expense increased \$0.29 million or 8.20% in 2010 from 2009 compared to a \$0.26 million or 6.96% decrease in 2009 from 2008. The higher costs in 2010 were in the areas of retail marketing and mutual fund rebates. The decrease in 2009 was related to lower retail marketing and institutional marketing expenses.

Loan and lease collection and repossession expenses increased \$1.94 million or 45.39% in 2010 from 2009 compared to an increase of \$3.12 million or 268.59% in 2009 from 2008. The higher expenses in 2010 mainly resulted from valuation adjustments on aircraft repossessions and mortgage loan repurchase losses. The increase in 2009 was due to increased collection and repossession activity as our nonperforming assets increased.

FDIC and other insurance expense declined \$2.11 million or 25.19% in 2010 over 2009 versus a \$5.76 million or 221.49% increase in 2009 over 2008. The 2010 reduction in Federal Deposit Insurance Corporation (FDIC) insurance premiums resulted from lack of the special insurance assessment incurred in 2009. The increase in 2009 was due to higher FDIC insurance premiums as insurance rates increased and a \$1.98 million special FDIC insurance assessment which was calculated at 5 basis points of assets minus tier 1 capital as of June 30, 2009.

Intangible asset amortization decreased \$0.03 million or 2.07% in 2010 from 2009 compared to a \$0.04 million or 2.94% decrease in 2009 from 2008. The decreases in 2010 and 2009 were due to carrying value adjustments relating to a prior acquisition.

Other expenses were flat in 2010 as compared to 2009 following a decrease of \$0.61 million or 7.89% in 2009 from 2008. The decrease in 2009 was due to higher deferred costs on originated loans, lower convention costs, lower trust preferred amortization expense and lower filing expenses offset by higher mortgage loan payoff expense and lower gain on sale of operating equipment.

Income Taxes — 1st Source recognized income tax expense in 2010 of \$19.23 million, compared to \$6.03 million in 2009, and \$13.02 million in 2008. The effective tax rate in 2010 was 31.80% compared to 19.13% in 2009, and 28.05% in 2008. The effective tax rate was lower in 2009 compared to 2010 and 2008 due to a one time benefit of \$2.60 million and an increase in tax-exempt interest in relation to income before taxes. The 2009 benefit was the result of a reduction in our tax contingency reserve due to the resolution of tax audits. For a detailed analysis of 1st Source's income taxes see Part II, Item 8, Financial Statements and Supplementary Data — Note 17 of the Notes to Consolidated Financial Statements.

FINANCIAL CONDITION

Loan and Lease Portfolio — The following table shows 1st Source's loan and lease distribution at the end of each of the last five years as of December 31:

<i>(Dollars in thousands)</i>	2010	2009	2008	2007	2006
Commercial and agricultural loans	\$ 530,228	\$ 546,222	\$ 643,440	\$ 593,806	\$ 478,310
Auto, light truck and environmental equipment	396,500	349,741	353,838	305,238	317,604
Medium and heavy duty truck	162,824	204,545	243,375	300,469	341,744
Aircraft financing	614,357	617,384	632,121	587,022	498,914
Construction equipment financing	285,634	313,300	375,983	377,785	305,976
Commercial real estate	594,729	580,709	574,394	530,448	412,523
Residential real estate	390,951	371,514	344,355	351,198	219,760
Consumer loans	95,400	109,735	130,706	145,475	127,706
Total loans and leases	\$3,070,623	\$3,093,150	\$3,298,212	\$3,191,441	\$2,702,537

At December 31, 2010, 11.6% of total loans and leases were concentrated with auto rental and leasing and 10.9% of total loans and leases were concentrated with construction end users.

Average loans and leases, net of unearned discount, decreased \$45.31 million or 1.44% and decreased \$108.46 million or 3.32% in 2010 and 2009, respectively. Loans and leases, net of unearned discount, at December 31, 2010, were \$3.07 billion and were 69.08% of total assets, compared to \$3.09 billion and 68.10% of total assets at December 31, 2009.

Commercial and agricultural lending, excluding those loans secured by real estate, decreased \$15.99 million or 2.93% in 2010 over 2009. Commercial and agricultural lending outstandings were \$530.23 million and \$546.22 million at December 31, 2010 and December 31, 2009, respectively. This decrease was mainly due to the weak economy in our geographic markets. Businesses reduced their working capital line of credit borrowings given lower accounts receivable and inventory levels caused by a decline in their sales. The weak economy also accounted for a reduction in term loan financing attributed to less equipment purchases by companies in our market.

Auto, light truck, and environmental equipment financing increased \$46.76 million or 13.37% in 2010 over 2009. At December 31, 2010, auto, light truck, and environmental equipment financing had outstandings of \$396.50 million and \$349.74 million at December 31, 2009. The increase was mainly due to significant growth in the auto rental and leasing segments. These segments were abandoned by other lenders during the credit crisis and we have been able to develop new accounts. In addition, our current clients asked for expanded credit limits and utilized them fully.

Medium and heavy duty truck loans and leases decreased \$41.72 million or 20.40% in 2010. Medium and heavy duty truck financing at December 31, 2010 and 2009 had outstandings of \$162.82 million and \$204.55 million, respectively. Most of the decrease at December 31, 2010 from December 31, 2009 can be attributed to a reduced need for funding as over-capacity issues caused our customer base to downsize their fleets.

Aircraft financing at year-end 2010 decreased only slightly by \$3.03 million or 0.49% from year-end 2009. Aircraft financing at December 31, 2010 and 2009 had outstandings of \$614.36 million and \$617.38 million, respectively.

Construction equipment financing decreased \$27.67 million or 8.83% in 2010 compared to 2009. Construction equipment financing at December 31, 2010 had outstandings of \$285.63 million, compared to outstandings of \$313.30 million at December 31, 2009. The decrease in this category was primarily due to a national decrease in construction related activity and a decrease in sales of both new and used construction equipment.

Commercial loans secured by real estate, the majority of which is owner occupied, increased \$14.02 million or 2.41% during 2010 over 2009. Commercial loans secured by real estate outstanding at December 31, 2010 were \$594.73 million and \$580.71 million at December 31, 2009.

Residential real estate loans were \$390.95 million at December 31, 2010 and \$371.51 million at December 31, 2009. Residential real estate loans increased \$19.44 million or 5.23% in 2010 from 2009. The increase in residential mortgage lending was primarily due to a higher volume of refinance activity as a result of lower market interest rates and our decision to retain more loans in our portfolio.

Consumer loans decreased \$14.34 million or 13.06% in 2010 over 2009. Consumer loans outstanding at December 31, 2010, were \$95.40 million and \$109.74 million at December 31, 2009. The decrease during 2010 was due to higher unemployment rates in our primary markets, thereby decreasing the demand for consumer loans.

The following table shows the maturities of loans and leases in the categories of commercial and agriculture, auto, light truck and environmental equipment, medium and heavy duty truck, aircraft and construction equipment outstanding as of December 31, 2010. The amounts due after one year are also classified according to the sensitivity to changes in interest rates.

<i>(Dollars in thousands)</i>	0-1 Year	1-5 Years	Over 5 Years	Total
Commercial and agricultural loans	\$ 319,274	\$ 203,476	\$ 7,478	\$ 530,228
Auto, light truck and environmental equipment	187,415	207,800	1,285	396,500
Medium and heavy duty truck	64,563	97,027	1,234	162,824
Aircraft financing	201,399	337,568	75,390	614,357
Construction equipment financing	107,192	177,606	836	285,634
Total	\$879,843	\$1,023,477	\$86,223	\$1,989,543

<i>Rate Sensitivity (Dollars in thousands)</i>	Fixed Rate	Variable Rate	Total

Most of the Bank's residential mortgages are sold into the secondary market. Mortgage loans held for sale were \$32.60 million at December 31, 2010 and were \$26.65 million at December 31, 2009. Although 1st Source Bank is participating in the U.S. Treasury Making Home Affordable programs, we do not feel it has a material effect on our financial condition or results of operations.

1st Source Bank sells residential mortgage loans to Fannie Mae and Freddie Mac, as well as FHA-insured and VA-guaranteed loans in Ginnie Mae mortgage-backed securities. Additionally, we have sold loans on a service released basis to various other financial institutions in recent years. The agreements under which we sell these mortgage loans contain various representations and warranties regarding the acceptability of loans for purchase. On occasion, we may be asked to indemnify the loan purchaser for credit losses on loans that were later deemed ineligible for purchase or we may be asked to repurchase a loan. Both circumstances are collectively referred to as "repurchases." Within the industry, repurchase demands have increased during 2010. While we believe the quality of loans we have underwritten and sold to these entities has been superior, we must acknowledge the current trend of mortgage insurance rescissions and speculative repurchase requests.

Our liability for repurchases, included in accrued expenses and other liabilities on the Statement of Financial Condition, was \$0.74 million and \$0.38 million as of December 31, 2010 and 2009, respectively. The mortgage repurchase liability represents our best estimate of the loss that we may incur. The estimate is based on specific loan repurchase requests and a historical loss ratio with respect to origination dollar volume. Because the level of mortgage loan repurchase losses are dependent on economic factors, investor demand strategies and other external conditions that may change over the life of the underlying loans, the level of liability for mortgage loan repurchase losses is difficult to estimate and requires considerable management judgment.

In 2010, we made the decision to end our relationships with nine mortgage brokerage firms and ceased our wholesale residential mortgage lending operation. We exited wholesale mortgage lending due to the increasing compliance risks, limited success in developing deeper relationships with customers whose mortgages were not originated by us, and lack of synergies in our footprint where independent mortgage brokers competed directly with our own team of mortgage originators. We will continue to offer consumer mortgage products by increasing the number of mortgage originators employed directly by us. Thus, we do not anticipate that our decision to discontinue wholesale mortgage lending will have a material effect on our financial performance over the long term.

CREDIT EXPERIENCE

Reserve for Loan and Lease Losses — Our reserve for loan and lease losses is provided for by direct charges to operations. Losses on loans and leases are charged against the reserve and likewise, recoveries during the period for prior losses are credited to the reserve. Our management evaluates the adequacy of the reserve quarterly, reviewing all loans and leases over a fixed-dollar amount (\$100,000) where the internal credit rating is at or below a predetermined classification, actual and anticipated loss experience, current economic events in specific industries, and other pertinent factors including general economic conditions. Determination of the reserve is inherently subjective as it requires significant estimates, including the amounts and timing of expected future cash flows or fair value of collateral on collateral-dependent impaired loans and leases, estimated losses on pools of homogeneous loans and leases based on historical loss experience, and consideration of environmental factors, principally economic risk and concentration risk, all of which may be susceptible to significant and unforeseen changes. We review the status of the loan and lease portfolio to identify borrowers that might develop financial problems in order to aid borrowers in the handling of their accounts and to mitigate losses. See Part II, Item 8, Financial Statements and Supplementary Data — Note 1 of the Notes to Consolidated Financial Statements for additional information on management's evaluation of the adequacy of the reserve for loan and lease losses.

The reserve for loan and lease loss methodology has been consistently applied for several years, with enhancements instituted periodically. Reserve ratios are reviewed quarterly and revised periodically to reflect recent loss history and to incorporate current risks and trends which may not be recognized in historical data. As we update our historical charge-off analysis, we review the look-back periods for each business loan portfolio. We changed the short period portion of the look-back to two years given that 2010 and 2009 losses were considerably impacted by the severe recession which began in December 2007, but whose financial consequences were not recognized in the loan portfolios until 2009. We gave the greatest weight to this recent two year period in our calculation, as we feel it is most consistent with our current expectations for 2011. Furthermore, we perform a thorough analysis of charge-offs, non-performing asset levels, special attention outstandings and delinquency in order to review portfolio trends and other factors, including specific industry risks and economic conditions, which may have an impact on the reserves and reserve ratios applied to various portfolios. We adjust the calculated historical based ratio as a result of our analysis of environmental factors, principally economic risk and concentration risk. Key economic factors affecting our portfolios are growth in gross domestic product, unemployment rates, housing market trends, commodity prices and inflation. Concentration risk is impacted primarily by geographic concentration in Northern Indiana and Southwestern Lower Michigan in our business banking and commercial real estate portfolios and by collateral concentration in our specialty finance portfolios.

During 2010, we sustained large losses on two significant commercial real estate projects as well as numerous smaller losses on several real estate related transactions, many of which were owner occupied facilities where there was doubt as to the ability of the underlying business operations capacity to continue to perform. While our commercial real estate loss ratio remains significantly below our peer group, our recent loss history indicated an increase in the reserve ratio for this portfolio was necessary and prudent.

A second area of concern as we move into 2011 is our aircraft portfolio. Several aircraft borrowers who are experiencing financial difficulty have significant commercial real estate exposure. The severe recession and the protracted recovery have had a negative effect on our borrowers and global economic concerns have resulted in plummeting aircraft values. As a result of current economic conditions and the depressed private jet market as evidenced by significant declines in new jet deliveries and continuous softening of used jet prices, we have increased our reserves for the aircraft portfolio.

The medium and heavy duty truck portfolio was another portfolio where we experienced relatively large losses in 2010. We recognized sizable losses on five relationships during the first six months of the year; however, there were no charge-offs during the second half of the year. Current industry concerns are focused on capacity constraints resulting from potential new safety and environmental regulations and driver shortages. Nevertheless, the underlying fundamentals appear to be improving. As a result, we lowered our calculated reserve ratio slightly as a result of lower environmental risk.

For 2010, construction equipment losses as a percentage of average loans were lower than losses for commercial real estate, aircraft and trucking, but were still significantly greater than the two year and ten year portfolio average, and continued throughout the year, indicating high potential for losses in 2011 in this portfolio. The private sector construction industry remains depressed. Losses have been mitigated by relatively strong collateral values due to the global market for used construction equipment. We increased our calculated reserve slightly for this portfolio.

The auto, light truck and environmental equipment portfolio has been a source of strength during this time of economic turmoil. Portfolio credit quality remained exceptionally strong, with low delinquencies and net charge-offs. Industry dynamics have changed favorably for franchisees with stable to increasing rental rates, strong used car prices and improved efficiencies in the business model with downsized fleets and fewer repurchase vehicles. The reserve ratio was not revised.

There are several industries represented in the commercial and agricultural portfolio. The outlook for the business banking portfolio is somewhat mixed. While recent economic news indicates improvement, the economy remains weak and there is a lack of confidence among small business owners. With the struggling job market, unemployment remains high, which also bodes poorly for our residential real estate and consumer portfolios. The outlook for the agriculture portfolio is strong, with increasing crop prices and land values. Agricultural input costs are higher, but the strong commodity prices are more than offsetting the increased input costs. We have reviewed the calculated loss ratios and the environmental factors and concentration issues affecting these portfolios and incorporated minor adjustments to the reserve ratios as deemed appropriate.

The reserve for loan and lease losses at December 31, 2010, totaled \$86.87 million and was 2.83% of loans and leases, compared to \$88.24 million or 2.85% of loans and leases at December 31, 2009 and \$79.78 million or 2.42% of loans and leases at December 31, 2008. It is our opinion that the reserve for loan and lease losses was adequate to absorb losses inherent in the loan and lease portfolio as of December 31, 2010.

Charge-offs for loan and lease losses were \$24.11 million for 2010, compared to \$28.22 million for 2009 and \$8.39 million for 2008. Charge-offs decreased in 2010 due to a decrease in nonperforming loans and leases reflecting a slowly improving economy. In 2010, the ten largest charge-offs accounted for fifty percent of total losses. The large losses were principally attributable to loans secured by aircraft or commercial real estate as a result of the decline in the values of the underlying collateral. Charge-offs increased in 2009 compared to 2008 as a result of an increase in nonperforming loans and leases related to weaker economic conditions. The provision for loan and lease losses was \$19.21 million for 2010, compared to the provision for loan and lease losses of \$31.10 million for 2009 and the provision for loan and lease losses of \$16.65 million for 2008. The high provision for loan and lease losses in 2010 and 2009 was due to the deterioration in the loan portfolio mainly due to the deterioration in the economy which led to a decline in underlying collateral values.

The following table summarizes our loan and lease loss experience for each of the last five years ended December 31:

<i>(Dollars in thousands)</i>	2010	2009	2008	2007	2006
Amounts of loans and leases outstanding at end of period	\$3,070,623	\$3,093,150	\$3,298,212	\$3,191,441	\$2,702,537
Average amount of net loans and leases outstanding during period	\$3,109,508	\$3,154,820	\$3,263,276	\$2,992,540	\$2,566,217
Balance of reserve for loan and lease losses at beginning of period	\$ 88,236	\$ 79,776	\$ 66,602	\$ 58,802	\$ 58,697

Total	\$86,874	100.00%	\$88,236	100.00%	\$79,776	100.00%	\$66,602	100.00%	\$58,802	100.00%

Nonperforming Assets — Nonperforming assets include nonaccrual loans, other real estate, former bank premises held for sale, repossessions and other nonperforming assets we own. Our policy is to discontinue the accrual of interest on loans and leases where principal or interest is past due and remains unpaid for 90 days or more, or when an individual analysis of a borrower's credit worthiness indicates a credit should be placed on nonperforming status, except for residential mortgage loans, which are placed on nonaccrual at the time the loan is placed in foreclosure and consumer loans that are both well secured and in the process of collection.

Nonperforming assets amounted to \$88.71 million at December 31, 2010, compared to \$101.01 million at December 31, 2009, and \$44.17 million at December 31, 2008. During 2010, interest income on nonaccrual loans and leases would have increased by approximately \$5.81 million compared to \$5.17 million in 2009 if these loans and leases had earned interest at their full contract rate.

Nonperforming assets at December 31, 2010 decreased from December 31, 2009, mainly due to decreases in nonaccrual loans and leases and repossessions. The decrease in nonaccrual loans and leases was spread among the various loan portfolios except for increases in aircraft and construction equipment. The largest dollar decreases during the most recent year occurred in the auto, light truck and environmental, medium and heavy duty trucks and commercial real estate portfolios.

As of December 31, 2010, the industry with the largest dollar exposure was with borrowers whose primary source of income was derived from commercial real estate. These impaired loans totaled approximately \$30.59 million which were comprised of \$21.07 million secured by commercial real estate and included in commercial real estate loans and \$9.52 million secured by aircraft and included in aircraft financing. We have limited exposure to commercial real estate. However, our borrowers with commercial real estate exposure, whether local real estate developers in our commercial portfolio or customers in our niche portfolios such as aircraft whose underlying business is dependent on developing, marketing and managing real estate properties, have suffered as a result of declining real estate values and minimal sales activity. Furthermore, aircraft values declined during 2009 and 2010, increasing the risk in aircraft secured transactions. Medium and heavy duty trucks are also a large exposure area for us. Medium and heavy duty trucks non-accrual loans and leases decreased to \$5.07 million as of December 31, 2010, down from \$11.62 million as of December 31, 2009. The trucking industry continues to correct itself from the overcapacity which affected it during the recession. Freight rates are strengthening while utilization and collateral values are improving.

Nonperforming assets at December 31 <i>(Dollars in thousands)</i>	2010	2009	2008	2007	2006
Loans past due over 90 days	\$ 361	\$ 628	\$ 1,022	\$ 1,105	\$ 116

Nonperforming assets to loans and leases and operating leases, net of unearned discount	2.81%	3.15%	1.30%	0.56%	0.64%

In recent months, questions regarding the validity of foreclosure actions instituted by certain servicers of residential mortgage loans have been publicized. As a result, the Attorney Generals of all 50 states have announced an inquiry into the foreclosure practices of lenders. In response to this publicity, we undertook an internal review of our foreclosure practices which did not reveal any defects in our process. Controversy over the industry practice of recording mortgages in the name of Mortgage Electronic Registration Systems, Inc. (MERS) has also gained momentum in recent months. MERS is a company that acts as the mortgagee of record and as the agent for the owner of the related note. When mortgage notes are sold and subsequently assigned to buyers, the change of ownership is recorded electronically within a register maintained by MERS and at that point MERS acts as agent for the new owner. This practice was introduced by the mortgage industry as a means of saving both borrowers and lenders the time and funds needed to record assignments of mortgages in county land offices each time the ownership of the mortgage changed. While MERS has been used throughout the industry for many years, recent developments in the foreclosures arena have challenged its validity. 1st Source is a MERS subscriber, and given this controversy, has chosen to obtain assignments from MERS prior to instituting foreclosure in most jurisdictions.

Potential Problem Loans — Potential problem loans consist of loans that are performing but for which management has concerns about the ability of a borrower to continue to comply with repayment terms because of the borrower's potential operating or financial difficulties. Management monitors these loans closely and reviews their performance on a regular basis. As of December 31, 2010 and 2009, we had \$16.62 million and \$12.08 million, respectively, in loans of this type which are not included in either of the non-accrual or 90 days past due loan categories. At December 31, 2010, potential problem loans consisted of 14 credit relationships. Weakness in these companies' operating performance has caused us to heighten attention given to these credits.

Foreign Outstandings — Our foreign loan and lease outstandings, all denominated in U.S. dollars were \$201.03 million and \$169.08 million as of December 31, 2010 and 2009, respectively. Foreign loans and leases are in aircraft financing. Loan and lease outstandings to borrowers in Brazil and Mexico were \$134.34 million and \$34.03 million as of December 31, 2010, respectively, compared to \$107.24 million and \$23.86 million as of December 31, 2009, respectively. Outstanding balances to borrowers in other countries were insignificant.

INVESTMENT PORTFOLIO

The amortized cost of securities at year-end 2010 increased 6.57% from 2009, following a 24.89% increase from year-end 2008 to year-end 2009. The amortized cost of securities at December 31, 2010 was \$952.10 million or 21.42% of total assets, compared to \$893.44 million or 19.67% of total assets at December 31, 2009. The increase in the investment portfolio in 2010 was primarily funded by a decline in loan and lease outstandings and a decline in interest bearing deposits with other banks.

The amortized cost of securities available-for-sale as of December 31 is summarized as follows:

<i>(Dollars in thousands)</i>	2010	2009	2008
U.S. Treasury and Federal agencies securities	\$442,612	\$390,189	\$293,461
U.S. States and political subdivisions securities	147,679	188,706	198,640
Mortgage-backed securities — Federal agencies	309,046	286,415	207,954
Corporate debt securities	45,778	26,166	10,494
Foreign government and other securities	5,732	675	435
Marketable equity securities	1,254	1,288	4,396
Total investment securities available-for-sale	\$952,101	\$893,439	\$715,380

Yields on tax-exempt obligations are calculated on a fully tax equivalent basis assuming a 35% tax rate. The following table shows the maturities of securities available-for-sale at December 31, 2010, at the amortized costs and weighted average yields of such securities:

<i>(Dollars in thousands)</i>	Amount	Yield
U.S. Treasury and Federal agencies securities		
Under 1 year	\$ 9,992	1.21%
1 – 5 years	402,021	1.56
5 – 10 years	30,598	3.30
Over 10 years	-	-
Total U.S. Treasury and Federal agencies securities	442,611	1.67

Foreign government and other securities		
Under 1 year	1,131	1.79
1 – 5 years	4,601	1.78
5 – 10 years	-	-
Over 10 years	-	-
Total Foreign government and other securities	5,732	1.78
Mortgage-backed securities — Federal agencies	309,046	3.34
Marketable equity securities	1,254	7.38
Total investment securities available-for-sale	\$952,101	2.77%

At December 31, 2010, the residential mortgage-backed securities we held consisted primarily of GNMA, FNMA and FHLMC pass-through certificates (or Government Sponsored Enterprise, GSEs). The type of loans underlying the securities were all conforming loans at the time of issuance. All securities have a current credit rating of AAA. At December 31, 2010, the vintage of the underlying loans comprising our securities are: 53% in the years 2009 and 2010; 22% in the years 2007 and 2008; 13% in the years 2005 and 2006; and 12% in years 2004 and prior.

DEPOSITS

The average daily amounts of deposits and rates paid on such deposits are summarized as follows:

<i>(Dollars in thousands)</i>	2010		2009		2008	
	Amount	Rate	Amount	Rate	Amount	Rate
Noninterest bearing demand deposits	\$ 484,028	- %	\$ 427,513	- %	\$ 377,440	- %
Interest bearing demand deposits	1,377,549	0.32	1,209,800	0.62	1,137,491	1.82
Savings deposits	321,030	0.13	325,801	0.29	285,538	0.63
Other time deposits	1,422,588	2.79	1,610,534	3.42	1,573,801	4.09
Total deposits	\$3,605,195		\$3,573,648		\$3,374,270	

See Part II, Item 8, Financial Statements and Supplementary Data — Note 10 of the Notes to Consolidated Financial Statements for additional information on deposits.

SHORT-TERM BORROWINGS

The following table shows the distribution of our short-term borrowings and the weighted average interest rates thereon at the end of each of the last three years. Also provided are the maximum amount of borrowings and the average amount of borrowings, as well as weighted average interest rates for the last three years.

<i>(Dollars in thousands)</i>	Federal Funds Purchased and Security Repurchase Agreements	Commercial Paper	Other Short-Term Borrowings	Total Borrowings
2010				
Balance at December 31, 2010	\$136,028	\$3,598	\$ 16,363	\$155,989
Maximum amount outstanding at any month-end	169,831	8,533	21,542	199,906
Average amount outstanding	137,368	6,866	19,957	164,191
Weighted average interest rate during the year	0.27%	0.43%	1.97%	0.49%
Weighted average interest rate for outstanding amounts at December 31, 2010	0.20%	0.28%	0.68%	0.25%
2009				
Balance at December 31, 2009	\$123,787	\$ 4,726	\$ 21,597	\$150,110
Maximum amount outstanding at any month-end	275,407	5,392	23,863	304,662
Average amount outstanding	161,529	4,048	20,070	185,647
Weighted average interest rate during the year	0.40%	0.34%	2.30%	0.60%
Weighted average interest rate for outstanding amounts at December 31, 2009	0.25%	0.43%	1.80%	0.48%
2008				
Balance at December 31, 2008	\$272,529	\$ 4,461	\$ 19,185	\$296,175
Maximum amount outstanding at any month-end	359,452	9,875	247,828	617,155
Average amount outstanding	270,503	7,694	108,653	386,850
Weighted average interest rate during the year	1.97%	2.35%	1.95%	1.97%
Weighted average interest rate for outstanding amounts at December 31, 2008	0.49%	0.29%	2.92%	0.65%

LIQUIDITY

Core Deposits — Our major source of investable funds is provided by stable core deposits consisting of all interest bearing and noninterest bearing deposits, excluding brokered certificates of deposit and certain certificates of deposit of \$100,000 and over. In 2010, average core deposits equaled 70.53% of average total assets, compared to 68.13% in 2009 and 66.31% in 2008. The effective rate of core deposits in 2010 was 1.05%, compared to 1.54% in 2009 and 2.36% in 2008.

Average demand deposits (noninterest bearing core deposits) increased 13.22% in 2010 compared to an increase of 13.27% in 2009. These represented 15.10% of total core deposits in 2010, compared to 13.93% in 2009, and 12.93% in 2008.

Purchased Funds — We use purchased funds to supplement core deposits, which include certain certificates of deposit of \$100,000 and over, brokered certificates of deposit, over-night borrowings, securities sold under agreements to repurchase, commercial paper, and other short-term borrowings. Purchased funds are raised from customers seeking short-term investments and are used to manage the Bank's interest rate sensitivity. During 2010, our reliance on purchased funds decreased to 12.43% of average total assets from 15.30% in 2009.

Shareholders' Equity — Average shareholders' equity equated to 13.00% of average total assets in 2010 compared to 12.57% in 2009. Shareholders' equity was 10.94% of total assets at year-end 2010, compared to 12.56% at year-end 2009. We include unrealized gains (losses) on available-for-sale securities, net of income taxes, in accumulated other comprehensive income (loss) which is a component of shareholders' equity. While regulatory capital adequacy ratios exclude unrealized gains (losses), it does impact our equity as reported in the audited financial statements. The unrealized gains (losses) on available-for-sale securities, net of income taxes, were \$10.51 million and \$5.09 million at December 31, 2010 and 2009, respectively.

Our sale of preferred shares under the TARP Capital Purchase Program in January 2009 increased our shareholders' equity by \$111.00 million. We redeemed all of the preferred shares in December 2010 which reduced shareholders' equity by \$111.00 million.

Other Liquidity — During 2010, our \$30.00 million line of credit matured with \$10.00 million outstanding. The \$10.00 million was paid off during the fourth quarter. The line of credit was not renewable. In addition, the State of Indiana recently changed the law governing the collateralization of public fund deposits. Under the new law, the Indiana Board of Depositories will determine what financial institutions are required to pledge collateral. We have been informed that no collateral is necessary through March 31, 2011 for our Indiana public fund deposits. However, pending legislation could alter this requirement in the future. Our potential liquidity exposure if we must pledge collateral is approximately \$600.00 million.

Liquidity Risk Management — The Bank's liquidity is monitored and closely managed by the Asset/Liability Management Committee (ALCO), whose members are comprised of the Bank's senior management. Asset and liability management includes the management of interest rate sensitivity and the maintenance of an adequate liquidity position. The purpose of interest rate sensitivity management is to stabilize net interest income during periods of changing interest rates.

Liquidity management is the process by which the Bank ensures that adequate liquid funds are available to meet financial commitments on a timely basis. Financial institutions must maintain liquidity to meet day-to-day requirements of depositors and borrowers, take advantage of market opportunities and provide a cushion against unforeseen needs.

Liquidity of the Bank is derived primarily from core deposits, principal payments received on loans, the sale and maturity of investment securities, net cash provided by operating activities, and access to other funding sources. The most stable source of liability-funded liquidity is deposit growth and retention of the core deposit base. The principal source of asset-funded liquidity is available-for-sale investment securities, cash and due from banks, overnight investments, securities purchased under agreements to resell, and loans and interest bearing deposits with other banks maturing within one year. Additionally, liquidity is provided by repurchase agreements, and the ability to borrow from the Federal Reserve Bank (FRB) and the Federal Home Loan Bank (FHLB).

The Bank's liquidity strategy is guided by internal policies and the Interagency Policy Statement on Funding and Liquidity Risk Management. Internal guidelines consist of:

- (i) Available Liquidity (sum of short term borrowing capacity) greater than \$500 million;
- (ii) Liquidity Ratio (total of net cash, short term investments and unpledged marketable assets divided by the sum of net deposits and short term liabilities) greater than 15%;
- (iii) Dependency Ratio (net potentially volatile liabilities minus short term investments divided by total earning assets minus short term investments) less than 15%; and
- (iv) Loans to Deposits Ratio less than 100%

At December 31, 2010, we were in compliance with the foregoing internal policies and regulatory guidelines.

The Bank also maintains a contingency funding plan that assesses the liquidity needs under various scenarios of market conditions, asset growth and credit rating downgrades. The plan includes liquidity stress testing which measures various sources and uses of funds under the different scenarios. The contingency plan provides for ongoing monitoring of unused borrowing capacity and available sources of contingent liquidity to prepare for unexpected liquidity needs and to cover unanticipated events that could affect liquidity.

We have borrowing sources available to supplement deposits and meet our funding needs. 1st Source Bank has established relationships with several banks to provide short term borrowings in the form of federal funds purchased. While at December 31, 2010 there were no amounts outstanding, management believes we could borrow approximately \$255.00 million for a short time from these banks on a collective basis. As of December 31, 2010, the Bank had \$15.93 million outstanding in FHLB advances and could borrow an additional \$208.46 million. We also had \$377.40 million available to borrow from the FRB with no amounts outstanding as of December 31, 2010.

Interest Rate Risk Management — ALCO monitors and manages the relationship of earning assets to interest bearing liabilities and the responsiveness of asset yields, interest expense, and interest margins to changes in market interest rates. In the normal course of business, we face ongoing interest rate risks and uncertainties. We occasionally utilize interest rate swaps to partially manage the primary market exposures associated with the interest rate risk related to underlying assets, liabilities, and anticipated transactions.

A hypothetical change in net interest income was modeled by calculating an immediate 100 basis point (1.00%) change in interest rates across all maturities. At December 31, 2010 and 2009, the aggregate hypothetical impact to pre-tax net interest income was as follows:

Change in Interest Rates (<i>dollars in thousands</i>)	Aggregate Hypothetical Change in Net Interest Income					
	December 31, 2010			December 31, 2009		
	Estimated Net Interest Income	Dollar Change	Percent Change	Estimated Net Interest Income	Dollar Change	Percent Change
+1.00%	\$149,966	\$ 269	0.18 %	\$151,503	\$ 3,388	2.29 %
Base	149,697	-	-	148,115	-	-
-1.00%	145,056	(4,641)	(3.10)	141,445	(6,670)	(4.50)

The earnings simulation model excludes the earnings dynamics related to how fee income and noninterest expense may be affected by changes in interest rates. Actual results may differ materially from those projected. The use of this methodology to quantify the market risk of the balance sheet should not be construed as an endorsement of its accuracy or the accuracy of the related assumptions.

At December 31, 2010 and 2009, the impact of these hypothetical fluctuations in interest rates on our derivative holdings was not significant, and, as such, separate disclosure is not presented. We manage the interest rate risk related to mortgage loan commitments by entering into contracts for future delivery of loans with outside parties. See Part II, Item 8, Financial Statements and Supplementary Data — Note 18 of the Notes to Consolidated Financial Statements.

OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS

In the ordinary course of operations, we enter into certain contractual obligations. Such obligations include the funding of operations through debt issuances as well as leases for premises and equipment. The following table summarizes our significant fixed, determinable, and estimated contractual obligations, by payment date, at December 31, 2010, except for obligations associated with short-term borrowing arrangements. Payments for borrowings do not include interest. Further discussion of the nature of each obligation is included in the referenced note to the consolidated financial statements.

Contractual obligation payments by period follows:

(<i>Dollars in thousands</i>)	Note	0 – 1 Year	1 – 3 Years	3 – 5 Years	Over 5 Years	Indeterminate maturity	Total
Deposits without stated maturity	-	\$2,293,167	\$ -	\$ -	\$ -	\$ -	\$2,293,167
Certificates of deposit	10	631,192	311,032	108,130	2,094	-	1,052,448
Long-term debt	11	286	10,238	5,247	817	8,228	24,816
Subordinated notes	12	-	-	-	89,692	-	89,692
Operating leases	18	2,269	4,877	3,837	9,563	-	20,546
Purchase obligations	-	23,464	6,385	350	-	-	30,199
Total contractual obligations		\$2,950,378	\$332,532	\$117,564	\$102,166	\$8,228	\$3,510,868

We routinely enter into contracts for services. These contracts may require payment for services to be provided in the future and may also contain penalty clauses for early termination of the contract. We have made a diligent effort to estimate such payments and penalties, where applicable. Additionally, where necessary, we have made reasonable estimates as to certain purchase obligations as of December 31, 2010. Our management has used the best information available to make the estimations necessary to value the related purchase obligations. Our management is not aware of any additional commitments or contingent liabilities which may have a material adverse impact on our liquidity or capital resources at year-end 2010.

We also enter into derivative contracts under which we are required to either receive cash from, or pay cash to, counterparties depending on changes in interest rates. Derivative contracts are carried at fair value on the consolidated balance sheet with the fair value representing the net present value of expected future cash receipts or payments based on market interest rates as of the balance sheet date. The fair value of the contracts change daily as market interest rates change. Because the derivative assets and liabilities recorded on the balance sheet at December 31, 2010 do not necessarily represent the amounts that may ultimately be paid under these contracts, these assets and liabilities are not included in the table of contractual obligations presented above.

In addition, due to the uncertainty with respect to the timing of future cash flows associated with our unrecognized tax benefits at December 31, 2010, we are unable to make reasonably reliable estimates of the period of cash settlement with the respective taxing authority. Therefore, \$2.12 million of unrecognized tax benefits have been excluded from the contractual obligations table above. See Note 17 of the Notes to Consolidated Financial Statements for a discussion on income taxes.

Assets under management and assets under custody are held in fiduciary or custodial capacity for our clients. In accordance with U.S. generally accepted accounting principles, these assets are not included on our balance sheet.

We are also party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our clients. These financial instruments include commitments to extend credit and standby letters of credit. Further discussion of these commitments is included in Part II, Item 8, Financial Statements and Supplementary Data — Note 18 of the Notes to Consolidated Financial Statements.

QUARTERLY RESULTS OF OPERATIONS

The following table sets forth unaudited consolidated selected quarterly statement of operations data for the years ended December 31, 2010 and 2009.

Three Months Ended <i>(Dollars in thousands, except per share amounts)</i>	March 31	June 30	September 30	December 31
2010				
Interest income	\$49,412	\$50,050	\$50,241	\$50,923
Interest expense	14,510	13,801	13,057	11,761
Net interest income	34,902	36,249	37,184	39,162
Provision for loan and lease losses	4,388	5,798	5,578	3,443
Investment securities and other investment gains	881	95	1,083	234
Income before income taxes	14,326	11,404	16,547	18,199
Net income	9,679	7,795	11,203	12,567
Net income available to common shareholders	7,968	6,078	9,482	6,127
Diluted net income per common share	0.33	0.25	0.39	0.25
2009				
Interest income	\$50,676	\$50,630	\$49,741	\$49,365
Interest expense	19,954	18,717	17,695	15,834
Net interest income	30,722	31,913	32,046	33,531
Provision for loan and lease losses	7,785	8,487	6,469	8,360
Investment securities and other investment (losses) gains	(469)	426	716	1,014
Income before income taxes	4,846	8,782	9,263	8,627
Net income	6,251	6,283	6,733	6,223
Net income available to common shareholders	4,938	4,587	5,032	4,517
Diluted net income per common share	0.20	0.19	0.21	0.19

Net income was \$12.57 million for the fourth quarter of 2010, compared to the \$6.22 million of net income reported for the fourth quarter of 2009. Diluted net income per common share for the fourth quarter of 2010 amounted to \$0.25, compared to \$0.19 per common share reported in the fourth quarter of 2009.

The net interest margin was 3.67% for the fourth quarter of 2010 versus 3.27% for the same period in 2009. Tax-equivalent net interest income was \$39.96 million for the fourth quarter of 2010, up 15.88% from 2009's fourth quarter.

Our provision for loan and lease losses was \$3.44 million in the fourth quarter of 2010 compared to provision for loan and lease losses of \$8.36 million in the fourth quarter of 2009. Net charge-offs were \$6.08 million for the fourth quarter 2010, compared to net charge-offs of \$5.63 million a year ago.

Noninterest income for the fourth quarter of 2010 was \$22.42 million, compared to \$22.02 million for the fourth quarter of 2009. Noninterest expense for the fourth quarter of 2010 was \$39.94 million and was \$38.56 million in the fourth quarter 2009.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

For information regarding Quantitative and Qualitative Disclosures about Market Risk, see Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, Interest Rate Risk Management.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of 1st Source Corporation

We have audited 1st Source Corporation's ("the Company") internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). 1st Source Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, 1st Source Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition of 1st Source Corporation and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2010 and our report dated February 17, 2011 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

Chicago, Illinois
February 17, 2011

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of 1st Source Corporation

We have audited the accompanying consolidated statements of financial condition of 1st Source Corporation and subsidiaries ("the Company") as of December 31, 2010 and 2009, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2010. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of 1st Source Corporation and subsidiaries at December 31, 2010 and 2009, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), 1st Source Corporation's internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 17, 2011 expressed an unqualified opinion thereon.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 — Accounting Policies

1st Source Corporation is a bank holding company headquartered in South Bend, Indiana that provides, through our subsidiaries (collectively referred to as "1st Source"), a broad array of financial products and services. 1st Source Bank ("Bank"), our banking subsidiary, offers commercial and consumer banking services, trust and investment management services, and insurance to individual and business clients in Indiana and Michigan. The following is a summary of significant accounting policies followed in the preparation of the consolidated financial statements.

Basis of Presentation — The financial statements consolidate 1st Source and our subsidiaries (principally the Bank). All significant intercompany balances and transactions have been eliminated. For purposes of the parent company only financial information presented in Note 22, investments in subsidiaries are carried at equity in our underlying net assets.

Use of Estimates in the Preparation of Financial Statements — Financial statements prepared in accordance with U.S. generally accepted accounting principles require our management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Business Combinations — Business combinations are accounted for under the purchase method of accounting. Under the purchase method, assets and liabilities of the business acquired are recorded at their estimated fair values as of the date of acquisition with any excess of the cost of the acquisition over the fair value of the net tangible and intangible assets acquired recorded as goodwill. Results of operations of the acquired business are included in the income statement from the date of acquisition.

Cash Flow — For purposes of the consolidated and parent company only statements of cash flows, we consider cash and due from banks as cash and cash equivalents.

Securities — Securities that we have the ability and positive intent to hold to maturity are classified as investment securities held-to-maturity. Held-to-maturity investment securities, when present, are carried at amortized cost. As of December 31, 2010 and 2009, we held no securities classified as held-to-maturity. Securities that may be sold in response to, or in anticipation of, changes in interest rates and resulting prepayment risk, or for other factors, are classified as available-for-sale and are carried at fair value. Unrealized gains and losses on these securities are reported, net of applicable taxes, as a separate component of accumulated other comprehensive income (loss) in shareholders' equity.

The initial indication of other-than-temporary impairment (OTTI) for both debt and equity securities is a decline in fair value below amortized cost. Quarterly, the impaired securities are analyzed on a qualitative and quantitative basis in determining OTTI. Declines in the fair value of available-for-sale debt securities below their cost that are deemed to be other-than-temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of impairment related to other factors is recognized in other comprehensive income. In estimating OTTI impairment losses, we consider among other things, (i) the length of time and the extent to which fair value has been less than cost, (ii) the financial condition and near-term prospects of the issuer, and (iii) whether it is more likely than not that we will not have to sell any such securities before an anticipated recovery of cost.

Debt and equity securities that are purchased and held principally for the purpose of selling them in the near term are classified as trading account securities and are carried at fair value with unrealized gains and losses reported in earnings. Realized gains and losses on the sales of all securities are reported in earnings and computed using the specific identification cost basis.

Other investments consist solely of shares of Federal Home Loan Bank of Indianapolis (FHLBI) and Federal Reserve Bank stock. As restricted member stocks, these investments are carried at cost. Both cash and stock dividends received on the stocks are reported as income. Quarterly, we review our investment in FHLBI for impairment. Factors considered in determining impairment are: history of dividend payments; determination of cause for any net loss; adequacy of capital; and review of the most recent financial statements. As of December 31, 2010 and 2009, it was determined that our investment in FHLBI stock is appropriately valued at cost, which equates to par value.

Loans and Leases — Loans are stated at the principal amount outstanding, net of unamortized deferred loan origination fees and costs and net of unearned income. Interest income is accrued as earned based on unpaid principal balances. Origination fees and direct loan and lease origination costs are deferred and the net amount amortized to interest income over the estimated life of the related loan or lease. Loan commitment fees are deferred and amortized into other income over the commitment period.

Direct financing leases are carried at the aggregate of lease payments plus estimated residual value of the leased property, net of unamortized deferred lease origination fees and costs and unearned income. Interest income on direct financing leases is recognized over the term of the lease to achieve a constant periodic rate of return on the outstanding investment.

The accrual of interest on loans and leases is discontinued when a loan or lease becomes contractually delinquent for 90 days, or when an individual analysis of a borrower's credit worthiness indicates a credit should be placed on nonperforming status, except for residential mortgage loans and consumer loans that are well secured and in the process of collection. Residential mortgage loans are placed in nonaccrual at the time the loan is placed in foreclosure. When interest accruals are discontinued, interest credited to income in the current year is reversed and interest accrued in the prior year is charged to the reserve for loan and lease losses. However, in some cases, management may elect to continue the accrual of interest when the net realizable value of collateral is sufficient to cover the principal and accrued interest. When a loan or lease is classified as nonaccrual and the future collectibility of the recorded loan or lease balance is doubtful, collections on interest and principal are applied as a reduction to principal outstanding. Loans are returned to accrual status when all principal and interest amounts contractually due are brought current and future payments are reasonably assured.

A loan or lease is considered impaired, based on current information and events, if it is probable that we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan or lease agreement. Interest on impaired loans and leases, which are not classified as nonaccrual, is recognized on the accrual basis. We evaluate loans and leases exceeding \$100,000 for impairment and establish an allowance as a component of the reserve for loan and lease losses when it is probable all amounts due will not be collected pursuant to the contractual terms of the loan and lease and the recorded investment in the loan or lease exceeds its fair value.

1st Source Bank sells mortgage loans to the Government National Mortgage Association (GNMA) in the normal course of business and retains the servicing rights. The GNMA programs under which the loans are sold allow us to repurchase individual delinquent loans that meet certain criteria from the securitized loan pool. At our option, and without GNMA's prior authorization, we may repurchase a delinquent loan for an amount equal to 100% of the remaining principal balance on the loan. Once we have the unconditional ability to repurchase a delinquent loan, we are deemed to have regained effective control over the loan and we are required to recognize the loan on our balance sheet and record an offsetting liability, regardless of our intent to repurchase the loan. At December 31, 2010 and 2009, residential real estate portfolio loans included \$9.70 million and \$8.70 million, respectively, of loans available for repurchase under the GNMA optional repurchase programs with the offsetting liability recorded within other short-term borrowings.

Mortgage Banking Activities — Loans held for sale are primarily composed of performing one-to-four family residential mortgage loans originated for resale. Mortgage loans originated with the intent to sell are carried at fair value.

We recognize the rights to service mortgage loans for others as separate assets, whether the servicing rights are acquired through a separate purchase or through the sale of originated loans with servicing rights retained. We allocate a portion of the total proceeds of a mortgage loan to servicing rights based on the fair value. These assets are amortized as reductions of mortgage servicing fee income over the estimated servicing period in proportion to the estimated servicing income to be received. Gains and losses on the sale of mortgage servicing rights are recognized as noninterest income in the period in which such rights are sold.

Mortgage servicing assets are evaluated for impairment at each reporting date. For purposes of impairment measurement, mortgage servicing assets are stratified based on the predominant risk characteristics of the underlying servicing, principally by loan type and interest rate. If temporary impairment exists within a tranche, a valuation allowance is established through a charge to income equal to the amount by which the carrying value exceeds the fair value. If it is later determined all or a portion of the temporary impairment no longer exists for a particular tranche, the valuation allowance is reduced through a recovery of income.

Mortgage servicing assets are also reviewed for other-than-temporary impairment. Other-than-temporary impairment exists when recoverability of a recorded valuation allowance is determined to be remote considering historical and projected interest rates, prepayments, and loan pay-off activity. When this situation occurs, the unrecoverable portion of the valuation allowance is applied as a direct write-down to the carrying value of the mortgage servicing asset. Unlike a valuation allowance, a direct write-down permanently reduces the carrying value of the mortgage servicing asset and the valuation allowance, precluding subsequent recoveries.

As part of mortgage banking operations, we enter into commitments to purchase or originate loans whereby the interest rate on these loans is determined prior to funding ("rate lock commitments"). Similar to loans held for sale, the fair value of rate lock commitments is subject to change primarily due to changes in interest rates. Under our risk management policy, these fair values are hedged primarily by selling forward contracts on agency securities. The rate lock commitments on mortgage loans intended to be sold and the related hedging instruments are recorded at fair value with changes in fair value recorded in current earnings.

Reserve for Loan and Lease Losses — The reserve for loan and lease losses is maintained at a level believed to be adequate by management to absorb probable losses inherent in the loan and lease portfolio. The determination of the reserve requires significant judgment reflecting management's best estimate of probable loan and lease losses related to specifically identified impaired loans and leases as well as probable losses in the remainder of the various loan and lease portfolios. The methodology for assessing the appropriateness of the reserve consists of several key elements, which include: specific reserves for impaired loans, percentage allocations for special attention loans and leases not deemed impaired (classified loans and leases and internal watch list credits), formula reserves for each business lending division portfolio, and reserves for pooled homogenous loans and leases. Management's evaluation is based upon a continuing review of these portfolios, estimates of customer performance, collateral values and dispositions, and assessments of economic and geopolitical events, all of which are subject to judgment and will change.

Specific reserves are established for certain business and specialty finance credits based on a regular analysis of special attention loans and leases. This analysis is performed by the Credit Policy Committee, the Loan Review Department, Credit Administration, and the Loan Workout Departments. The specific reserves are based on an analysis of underlying collateral values, cash flow considerations and, if applicable, guarantor capacity.

The formula reserves determined for each business lending division portfolio are calculated quarterly by applying loss factors to outstanding loans and leases and certain unfunded commitments based upon a review of historical loss experience and qualitative factors, which include but are not limited to, economic trends, current market risk assessment by industry, recent loss experience in particular segments of the portfolios, movement in equipment values collateralizing specialized industry portfolios, concentrations of credit, delinquencies, trends in volume, experience and depth of relationship managers and division management, and the effects of changes in lending policies and practices, including changes in quality of the loan and lease origination, servicing and risk management processes. Special attention loans and leases without specific reserves receive a higher percentage allocation ratio than credits not considered special attention.

Pooled loans and leases are smaller credits and are homogenous in nature, such as consumer credits and residential mortgages. Pooled loan and lease loss reserves are based on historical net charge-offs, adjusted for delinquencies, the effects of lending practices and programs and current economic conditions, and current trends in the geographic markets which we serve.

A comprehensive analysis of the reserve is performed by management on a quarterly basis by reviewing all loans and leases over a fixed dollar amount (\$100,000) where the internal credit rating is at or below a predetermined classification. Although management determines the amount of each element of the reserve separately and relies on this process as an important credit management tool, the entire reserve is available for the entire loan and lease portfolio. The actual amount of losses incurred can vary significantly from the estimated amounts both positively and negatively. Management's methodology includes several factors intended to minimize the difference between estimated and actual losses. These factors allow management to adjust our estimate of losses based on the most recent information available.

Loans and leases, which are deemed uncollectible or have a low likelihood of collection, are charged off and deducted from the reserve, while recoveries of amounts previously charged off are credited to the reserve. A (recovery of) provision for loan and lease losses is credited or charged to operations based on management's periodic evaluation of the factors previously mentioned, as well as other pertinent factors.

Equipment Owned Under Operating Leases — We finance various types of construction equipment, medium and heavy duty trucks, automobiles and other equipment under leases classified as operating leases. Revenue consists of the contractual lease payments and is recognized on a straight-line basis over the lease term. Lease terms range from three to seven years. Leased assets are being depreciated on a straight-line method over the lease term to the estimate of

the equipment's fair market value at lease termination, also referred to as "residual" value. For automobile leases, fair value was based upon published industry market guides. For other equipment leases, fair value may be based upon observable market prices, third-party valuations, or prices received on sales of similar assets at the end of the lease term. These residual values are reviewed periodically to ensure the recorded amount does not exceed the fair market value at the lease termination.

Other Real Estate — Other real estate acquired through partial or total satisfaction of nonperforming loans is included in other assets and recorded at the lower of cost or fair value less anticipated selling costs based upon the property's appraised value at the date of transfer, with any difference between the fair value of the property less cost to sell, and the carrying value of the loan charged to the reserve for loan losses. Other real estate also includes bank premises qualifying as held for sale. Bank premises are transferred at the lower of carrying value or estimated fair value less anticipated selling costs. Fair value write-downs, property maintenance costs, and gains or losses recognized upon the sale of other real estate are recognized in noninterest expense on the Statements of Income. Gains or losses resulting from the sale of other real estate are recognized on the date of sale. As of December 31, 2010 and 2009, other real estate had carrying values of \$7.59 million and \$6.53 million, respectively, and is included in Other Assets in the Statements of Financial Condition.

Repossessed Assets — Repossessed assets may include fixtures and equipment, inventory and receivables, aircraft, construction equipment, and vehicles acquired from our business banking activities and our specialty finance activities. Repossessed assets are included in other assets at the lower of cost or fair value of the equipment or vehicle less estimated selling costs. At the time of repossession, the recorded amount of the loan or lease is written down, if necessary, to the fair value of the equipment or vehicle by a charge to the reserve for loan and lease losses. Subsequent write-downs are included in noninterest expense on the Statement of Income. Gains or losses resulting from the sale of repossessed assets are recognized on the date of sale. Repossessed assets totaled \$5.67 million and \$10.17 million, as of December 31, 2010 and 2009, respectively, and is included in Other Assets in the Statements of Financial Condition.

Premises and Equipment — Premises and equipment are stated at cost, less accumulated depreciation and amortization. The provision for depreciation is computed by the straight-line method, primarily with useful lives ranging from three to 31.5 years. Maintenance and repairs are charged to expense as incurred, while improvements, which extend the useful life, are capitalized and depreciated over the estimated remaining life.

Goodwill and Intangibles — Goodwill represents the excess of the cost of businesses acquired over the fair value of the net assets acquired. Other intangible assets represent purchased assets that also lack physical substance but can be distinguished from goodwill because of contractual or other legal rights or because the asset is capable of being sold or exchanged either on its own or in combination with a related contract, asset, or liability. Goodwill is reviewed for impairment at least annually or on an interim basis if an event occurs or circumstances change that would more likely than not reduce the carrying amount. Intangible assets that have finite lives are amortized over their estimated useful lives and are subject to impairment testing. All of our other intangible assets have finite lives and are amortized on a straight-line basis over varying periods not exceeding eight years. We performed the required annual impairment test of goodwill during the first quarter of 2010 and determined that no impairment exists.

Partnership Investment — We account for our investments in partnerships for which we own three percent or more of the partnership on the equity method. The partnerships which we have investments in account for their investments at fair value. As a result, our investments in these partnerships reflect the underlying fair value of the partnerships' investments. We account for our investments in partnerships of which we own less than three percent at the lower of cost or fair value. Investments in partnerships are included in Other Assets in the Statements of Financial Condition. The balances as of December 31, 2010 and 2009 were \$1.96 million and \$3.09 million, respectively.

Short-Term Borrowings — Short-term borrowings consist of Federal funds purchased, securities sold under agreements to repurchase, commercial paper, U.S. Treasury demand notes, Federal Home Loan Bank notes, and borrowings from non-affiliated banks. Federal funds purchased, securities sold under agreements to repurchase, and other short-term borrowings mature within one to 365 days of the transaction date. Commercial paper matures within seven to 270 days. Other short-term borrowings in the Statements of Financial Condition include our liability related to mortgage loans available for repurchase under GNMA optional repurchase programs.

Securities purchased under agreements to resell and securities sold under agreements to repurchase are treated as collateralized financing transactions and are recorded at the amounts at which the securities were acquired or sold plus accrued interest. The fair value of collateral either received from or provided to a third party is continually monitored and additional collateral obtained or requested to be returned to us as deemed appropriate.

Trust Fees — Trust fees are recognized on the accrual basis.

Income Taxes — 1st Source and our subsidiaries file a consolidated Federal income tax return. The provision for incomes taxes is based upon income in the consolidated financial statements, rather than amounts reported on our income tax return. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized as income or expense in the period that includes the enactment date. A valuation allowance, if needed, reduces deferred tax assets to the expected amount most likely to be realized. Realization of deferred tax assets is dependent upon the generation of a sufficient level of future taxable income and recoverable taxes paid in prior years. Although realization is not assured, we believe it is more likely than not that all of the deferred tax assets will be realized.

Positions taken in our tax returns may be subject to challenge by the taxing authorities upon examination. Uncertain tax positions are initially recognized in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions are both initially and subsequently measured as the largest amount of tax benefit that is greater than 50% likely of being realized upon settlement with the tax authority, assuming full knowledge of the position and all relevant facts. We provide for interest and, in some cases, penalties on tax positions that may be challenged by the taxing authorities. Interest expense is recognized beginning in the first period that such interest would begin accruing. Penalties are recognized in the period that we claim the position in the tax return. Interest and penalties on income tax uncertainties are classified within income tax expense in the Statements of Income.

Net Income Per Common Share — Basic earnings per common share is computed by dividing net income available to common shareholders by the weighted-average number of shares of common stock outstanding. Diluted earnings per common share is computed by dividing net income available to common shareholders by the weighted-average number of shares of common stock outstanding, plus the dilutive effect of outstanding stock options, stock warrants and nonvested stock-based compensation awards.

Stock-Based Employee Compensation — We recognize stock-based compensation as compensation cost in the Statements of Income based on their fair values on the measurement date, which, for our purposes, is the date of grant. We transitioned to fair-value based accounting for stock-based compensation using the modified prospective application and, therefore, have not restated results for prior periods. This transition method applies to new awards for service periods beginning on or after January 1, 2006, and to awards modified, repurchased, or cancelled after January 1, 2006. Additionally, compensation cost for the portion of stock option awards for which the requisite service has not been rendered (generally referring to non-vested award) which were granted prior to January 1, 2006 will be recognized as the remaining requisite service is rendered.

Segment Information — In our management's opinion, 1st Source has one principal business segment, commercial banking. While our chief decision makers monitor the revenue streams of various products and services, the identifiable segments' operations are managed and financial performance is evaluated on a company-wide basis. Accordingly, all of our financial service operations are considered by management to be aggregated in one reportable operating segment.

Derivative Financial Instruments — We occasionally enter into derivative financial instruments as part of our interest rate risk management strategies. These derivative financial instruments consist primarily of interest rate swaps. All derivative instruments are recorded on the Statements of Financial Condition, as either an asset or liability, at their fair value. The accounting for the gain or loss resulting from the change in fair value depends on the intended use of the derivative. For a derivative used to hedge changes in fair value of a recognized asset or liability, or an unrecognized firm commitment, the gain or loss on the derivative will be recognized in earnings together with the offsetting loss or gain on the hedged item. This results in an earnings impact only to the extent that the hedge is ineffective in achieving offsetting changes in fair value. If it is determined that the derivative instrument is not highly effective as a hedge, hedge accounting is discontinued and the adjustment to fair value of the derivative instrument is recorded in earnings. For a derivative used to hedge changes in cash flows associated with forecasted transactions, the gain or loss on the effective portion of the derivative will be deferred, and reported as accumulated other comprehensive income, a component of shareholders' equity, until such time the hedged transaction affects earnings. For derivative instruments not accounted for as hedges, changes in fair value are recognized in noninterest income/expense. Deferred gains and losses from derivatives that are terminated and were in a cash flow hedge are amortized over the shorter of the original remaining term of the derivative or the remaining life of the underlying asset or liability.

Fair Value Measurements — We record certain assets and liabilities at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Securities available for sale, trading securities, mortgage loans held for sale, and derivative instruments are carried at fair value on a recurring basis. Fair value measurements are also utilized to determine the initial value of certain assets and liabilities, to perform impairment assessments, and for disclosure purposes. We use quoted market prices and observable inputs to the maximum extent possible when measuring fair value. In the absence of quoted market prices, various valuation techniques are utilized to measure fair value. When possible, observable market data for identical or similar financial instruments are used in the valuation. When market data is not available, fair value is determined using valuation models that incorporate management's estimates of the assumptions a market participant would use in pricing the asset or liability.

Fair value measurements are classified within one of three levels based on the observability of the inputs used to determine fair value, as follows:

Level 1 — The valuation is based on quoted prices in active markets for identical instruments.

Level 2 — The valuation is based on observable inputs such as quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 — The valuation is based on unobservable inputs that are supported by minimal or no market activity and that are significant to the fair value of the instrument. Level 3 valuations are typically performed using pricing models, discounted cash flow methodologies, or similar techniques that incorporate management's own estimates of assumptions that market participants would use in pricing the instrument, or valuations that require significant management judgment or estimation.

Reclassifications — Certain amounts in the prior period consolidated financial statements have been reclassified to conform with the current year presentation. These reclassifications had no effect on total assets, shareholders' equity or net income as previously reported.

Note 2 — Recent Accounting Pronouncements

Business Combinations: In December 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2010-29 "*Business Combinations (Topic 805) - Disclosure of Supplementary Pro Forma Information for Business Combinations.*" If a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. ASU 2010-29 also expands the supplementary pro forma disclosures. ASU 2010-29 is effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2010. ASU 2010-29 will only affect us if there are future business combinations.

Intangibles - Goodwill and Other: In December 2010, the FASB issued ASU No. 2010-28 "*Intangibles - Goodwill and Other (Topic 350) - When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts.*" ASU 2010-28 affects all entities that have recognized goodwill and have one or more reporting units whose carrying amount for purposes of performing Step 1 of the goodwill impairment test is zero or negative. ASU 2010-28 is effective for fiscal years and interim periods within those years, beginning after December 15, 2010. ASU 2010-28 is not expected to have an impact on our financial condition, results of operations, or disclosures.

Receivables: In July 2010, the FASB issued ASU No. 2010-20 "*Receivables (Topic 310) - Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses.*" ASU 2010-20 requires extensive new disclosures about financing receivables, including credit risk exposures and the allowance for credit losses. For public entities, ASU 2010-20 disclosures of period-end balances was effective for interim or annual reporting periods ending on or after December 15, 2010. Disclosures related to activity that occurs during the reporting period are required for interim and annual reporting periods beginning on or after December 15, 2010. The impact of ASU 2010-20 on our disclosures is reflected in Note 4 - Loan and Lease Financings and Note 5 - Reserve for Loan and Lease Losses.

Receivables: In April 2010, the FASB issued ASU No. 2010-18 "*Receivables (Topic 310) - Effect of a Loan Modification When the Loan is Part of a Pool that is Accounted for as a Single Asset - a consensus of the FASB Emerging Issues Task Force.*" ASU 2010-18 provides guidance on accounting for acquired loans that have evidence of credit deterioration upon acquisition. It allows acquired assets with common risk characteristics to be accounted for in the aggregate as a pool.

ASU 2010-18 was effective for modifications of loans accounted for within pools under Subtopic 310-30 in the first interim or annual reporting period ending on or after July 15, 2010. ASU 2010-18 did not have an impact on our financial condition, results of operations, or disclosures.

Financial Services – Insurance: In April 2010, the FASB issued ASU No. 2010-15 “*Financial Services – Insurance (Topic 944) – How Investments Held through Separate Accounts Affect an Insurer’s Consolidation Analysis of Those Investments – a consensus of the FASB Emerging Issues Task Force.*” ASU 2010-15 affects insurance entities that have separate accounts that meet the definition of a separate account in paragraph 944-80-25-2 when evaluating whether to consolidate an investment held through its separate account or through a combination of investments in its separate and general accounts. ASU 2010-15 was effective for fiscal years and interim periods within those fiscal years, beginning after December 15, 2010. ASU 2010-15 did not have an impact on our financial condition, results of operations, or disclosures.

Subsequent Events: In February 2010, the FASB issued ASU No. 2010-09 “*Subsequent Events (Topic 855) – Amendments to Certain Recognition and Disclosure Requirements.*” ASU 2010-09 amends the subsequent events disclosure guidance. The amendments include a definition of an SEC filer, requires an SEC filer or conduit bond obligor to evaluate subsequent events through the date the financial statements are issued, and removes the requirement for an SEC filer to disclose the date through which subsequent events have been evaluated. ASU 2010-09 was effective upon issuance for us. The impact of ASU 2010-09 on our disclosures is reflected in Note 23 – Subsequent Events.

Fair Value Measurements and Disclosures: In January 2010, the FASB issued ASU No. 2010-06 “*Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements.*” ASU 2010-06 amends the fair value disclosure guidance. The amendments include new disclosures and changes to clarify existing disclosure requirements. ASU 2010-06 was effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements of Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. The impact of ASU 2010-06 on our disclosures is reflected in Note 21 – Fair Value Measurements.

Consolidations: In December 2009, the FASB issued ASU No. 2009-17 (formerly Statement No. 167), “*Consolidations (Topic 810) – Improvements to Financial Reporting for Enterprises involved with Variable Interest Entities.*” ASU 2009-17 amends the consolidation guidance applicable to variable interest entities. The amendments to the consolidation guidance affect all entities, as well as qualifying special-purpose entities (QSPEs) that are currently excluded from previous consolidation guidance. ASU 2009-17 was effective as of the beginning of the first annual reporting period that begins after November 15, 2009. ASU 2009-17 did not have an impact on our financial condition, results of operations, or disclosures.

Accounting for Transfers of Financial Assets: In December 2009, the FASB issued ASU No. 2009-16 (formerly Statement No. 166), “*Transfers and Servicing (Topic 860) – Accounting for Transfers of Financial Assets.*” ASU 2009-16 amends the derecognition accounting and disclosure guidance. ASU 2009-16 eliminates the exemption from consolidation for QSPEs and also requires a transferor to evaluate all existing QSPEs to determine whether they must be consolidated. ASU 2009-16 was effective as of the beginning of the first annual reporting period that begins after November 15, 2009. ASU 2009-16 did not have an impact on our financial condition, results of operations, or disclosures.

Note 3 — Investment Securities

Investment securities available-for-sale were as follows:

<i>(Dollars in thousands)</i>	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2010				
U.S. Treasury and Federal agencies securities	\$442,612	\$ 5,546	\$ (849)	\$447,309
U.S. States and political subdivisions securities	147,679	4,381	(1,753)	150,307
Mortgage-backed securities – Federal agencies	309,046	7,854	(232)	316,668
Corporate debt securities	45,778	182	(345)	45,615
Foreign government and other securities	5,732	18	(34)	5,716
Total debt securities	950,847	17,981	(3,213)	965,615
Marketable equity securities	1,254	2,152	(3)	3,403
Total investment securities available-for-sale	\$ 952,101	\$20,133	\$(3,216)	\$969,018
December 31, 2009				
U.S. Treasury and Federal agencies securities	\$ 390,189	\$ 760	\$(1,780)	\$389,169
U.S. States and political subdivisions securities	188,706	5,450	(2,337)	191,819
Mortgage-backed securities – Federal agencies	286,415	5,996	(1,434)	290,977
Corporate debt securities	26,166	194	(38)	26,322
Foreign government and other securities	675	-	-	675
Total debt securities	892,151	12,400	(5,589)	898,962
Marketable equity securities	1,288	1,417	(29)	2,676
Total investment securities available-for-sale	\$ 893,439	\$ 13,817	\$(5,618)	\$901,638

At December 31, 2010, the residential mortgage-backed securities we held consisted primarily of GNMA, FNMA and FHLMC pass-through certificates which are guaranteed by those respective agencies of the United States government (or Government Sponsored Enterprise, GSEs).

At December 31, 2010 and 2009, we held no preferred equity securities. The contractual maturities of investments in securities available-for-sale at December 31, 2010, are shown below. Expected maturities will differ from contractual maturities, because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

<i>(Dollars in thousands)</i>	Amortized Cost	Fair Value
Due in one year or less	\$ 42,983	\$ 43,307
Due after one year through five years	506,854	513,124
Due after five years through ten years	80,733	82,843
Due after ten years	11,231	9,673
Mortgage-backed securities	309,046	316,668
Total debt securities available-for-sale	\$950,847	\$965,615

The following table shows the gross realized gains and losses on sale of securities from the securities available-for-sale portfolio, including marketable equity securities.

<i>(Dollars in thousands)</i>	2010	2009	2008
Gross realized gains	\$297	\$2,108	\$ 830
Gross realized losses	(36)	(707)	(11,050)
Net realized gains (losses)	\$261	\$1,401	\$(10,220)

The gross losses in 2008 reflect OTTI writedowns of \$10.82 million on FNMA, FHLMC, Farmer Mac common stock and other corporate preferred stock. There were no OTTI writedowns in 2010 or 2009.

There were net gains of \$13 thousand and \$25 thousand recorded on \$0.14 million and \$0.13 million in trading securities outstanding at December 31, 2010 and December 31, 2009, respectively.

The following tables summarize our gross unrealized losses and fair value by investment category and age:

<i>(Dollars in thousands)</i>	Less than 12 Months		12 months or Longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
December 31, 2010						
U.S. Treasury and Federal agencies securities	\$158,497	\$ (849)	\$ -	\$ -	\$158,497	\$ (849)
U.S. States and political subdivisions securities	9,226	(246)	9,055	(1,507)	18,281	(1,753)
Mortgage-backed securities – Federal agencies	23,351	(213)	4,887	(19)	28,238	(232)
Corporate debt securities	26,407	(345)	-	-	26,407	(345)
Foreign government and other securities	3,015	(34)	-	-	3,015	(34)
Total debt securities	220,496	(1,687)	13,942	(1,526)	234,438	(3,213)
Marketable equity securities	-	-	5	(3)	5	(3)
Total temporarily impaired available-for-sale securities	\$220,496	\$(1,687)	\$13,947	\$(1,529)	\$234,443	\$(3,216)
December 31, 2009						
U.S. Treasury and Federal agencies securities	\$245,921	\$(1,780)	\$ -	\$ -	\$245,921	\$(1,780)
U.S. States and political subdivisions securities	9,501	(178)	16,718	(2,159)	26,219	(2,337)
Mortgage-backed securities – Federal agencies	90,592	(1,137)	22,330	(297)	112,922	(1,434)
Corporate debt securities	7,149	(38)	-	-	7,149	(38)
Total debt securities	353,163	(3,133)	39,048	(2,456)	392,211	(5,589)
Marketable equity securities	2	(2)	4	(27)	6	(29)
Total temporarily impaired available-for-sale securities	\$353,165	\$(3,135)	\$39,052	\$(2,483)	\$392,217	\$(5,618)

At December 31, 2010, we do not have the intent to sell any of the available-for-sale securities in the table above and believe that it is more likely than not that we will not have to sell any such securities before an anticipated recovery of cost. The unrealized losses are due to increases in market interest rates over the yields available at the time the underlying securities were purchased and market illiquidity on auction rate securities which are reflected in U.S. States and Political subdivisions. The fair value is expected to recover on all debt securities as they approach their maturity date or repricing date or if market yields for such investments decline. We do not believe any of the securities are impaired due to reasons of credit quality. Accordingly, as of December 31, 2010, we believe the impairments detailed in the table above are temporary and no impairment loss has been realized in our consolidated statements of income.

At December 31, 2010 and 2009, investment securities with carrying values of \$299.88 million and \$351.84 million, respectively, were pledged as collateral to secure government deposits, security repurchase agreements, and for other purposes.

Note 4 — Loans and Lease Financings

Total loans and leases outstanding were recorded net of unearned income and deferred loan fees and costs at December 31, 2010 and 2009, and totaled \$3.07 billion and \$3.09 billion, respectively. At December 31, 2010 and 2009, net deferred loan and lease costs were \$2.96 million and \$3.18 million, respectively.

The loan and lease portfolio includes direct financing leases, which are included in auto, light truck and environmental equipment, medium and heavy duty truck, aircraft financing, and construction equipment financing on the consolidated Statements of Financial Condition.

A summary of the gross investment in lease financing and the components of the investment in lease financing at December 31, 2010 and 2009, follows:

<i>(Dollars in thousands)</i>	2010	2009
Direct finance leases:		
Rentals receivable	\$200,640	\$207,666
Estimated residual value of leased assets	25,473	29,696
Gross investment in lease financing	226,113	237,362
Unearned income	(33,384)	(34,753)
Net investment in lease financing	\$192,729	\$202,609

At December 31, 2010, the minimum future lease payments receivable for each of the years 2011 through 2015 were \$42.36 million, \$33.50 million, \$26.82 million, \$22.65 million, and \$18.69 million, respectively.

In the ordinary course of business, we have extended loans to certain directors, executive officers, and principal shareholders of equity securities of 1st Source and to their affiliates. In the opinion of management, these loans are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other parties and are consistent with sound banking practices and within applicable regulatory and lending limitations. The aggregate dollar amounts of these loans were \$9.97 million and \$9.58 million at December 31, 2010 and 2009, respectively. During 2010, \$1.87 million of new loans and other additions were made and repayments and other reductions totaled \$1.48 million.

We evaluate loans and leases for credit quality on a monthly basis. All loans and leases, except residential real estate loans and consumer loans, are assigned credit quality ratings on a scale from 1 to 12 with grade 1 representing superior credit quality. The criteria used to assign quality ratings to extensions of credit that exhibit potential problems or well-defined weaknesses are primarily based upon the degree of risk and the likelihood of orderly repayment, and their effect on the Bank's safety and soundness. Loans graded 7 or weaker are considered "special attention" credits and, as such, relationships in excess of \$100,000 are reviewed quarterly as part of management's evaluation of the adequacy of the reserve for loan and lease losses. Grade 7 credits are defined as "watch" and contain greater than average credit risk and thus warrant timely follow-up to limit the Bank's exposure to increased risk; grade 8 credits are "special mention" and, following regulatory guidelines, are defined as having potential weaknesses that deserve management's close attention. Credits that exhibit well-defined weaknesses and a distinct possibility of loss are considered "classified" and are graded 9 through 12 corresponding to the regulatory definitions of "substandard" (grades 9 and 10) and the more severe "doubtful" (grade 11) and "loss" (grade 12).

The table below presents the recorded investment of loans and leases by credit quality rating as of December 31.

<i>(Dollars in thousands)</i>	Grade:		
	1-6	7-12	Total
2010			
Commercial and agricultural loans	\$ 485,307	\$ 46,812	\$ 532,119
Auto, light truck, and environmental equipment	390,671	6,755	397,426
Medium and heavy duty truck	143,733	19,437	163,170
Aircraft financing	556,641	59,528	616,169

At December 31, 2010 and 2009, nonaccrual loans and leases, substantially all of which are collateralized, were \$74.85 million and \$83.54 million, respectively. Interest income for the years ended December 31, 2010, 2009, and 2008, would have increased by approximately \$5.81 million, \$5.17 million, and \$1.54 million, respectively, if these loans and leases had earned interest at their full contract rate.

The table below presents impaired loans and leases and the corresponding reserve for impaired loan and lease losses as of December 31.

<i>(Dollars in thousands)</i>	Recorded Investment	Unpaid Principal Balance	Related Allowance	Average Recorded Investment	Interest Income Recognized
2010					
With no related allowance recorded:					
Commercial and agricultural loans	\$ 4,932	\$ 4,930	\$ -	\$ 4,729	\$ 20

Construction equipment financing	7,116	7,111	898	4,227	13
Commercial real estate	32,486	32,482	4,373	23,454	161
Total impaired loans	\$80,620	\$80,537	\$8,920	\$66,391	\$ 497

As of December 31, 2008, impaired loans and leases totaled \$30.94 million of which \$21.36 million had corresponding specific reserves for loan and lease losses totaling \$4.54 million. The remaining balance of impaired loans and leases had no specific reserves associated with them. For 2008, the average recorded investment in impaired loans and leases was \$15.25 million and interest income recognized was \$1.68 million.

Note 6 — Operating Leases

We finance various types of construction equipment, medium and heavy duty trucks, automobiles, and miscellaneous production equipment under leases classified as operating leases. The equipment underlying the operating leases is reported at cost, net of accumulated depreciation, in the Statements of Financial Condition. These operating lease arrangements require the lessee to make a fixed monthly rental payment over a specified lease term, typically from three to seven years. Rental income is earned on the operating lease assets and reported as noninterest income. These operating lease assets are depreciated over the term of the lease to the estimated fair value of the asset at the end of the lease. The depreciation of these operating lease assets is reported as a component of noninterest expense. At the end of the lease, the operating lease asset is either purchased by the lessee or returned to us.

Operating lease equipment at December 31, 2010 and 2009 was \$78.14 million and \$97.00 million, respectively, net of accumulated depreciation of \$47.80 million and \$48.48 million, respectively. Depreciable lives for operating lease equipment generally range from three to seven years.

The minimum future lease rental payments due from clients on operating lease equipment at December 31, 2010, totaled \$45.61 million, of which \$21.08 million is due in 2011, \$14.12 million in 2012, \$6.44 million in 2013, \$2.84 million in 2014, \$0.95 million in 2015, and \$0.18 million in 2016. Depreciation expense related to operating lease equipment for the years ended December 31, 2010, 2009 and 2008 was \$20.72 million, \$20.52 million and \$19.45 million, respectively.

Note 7 — Premises and Equipment

Premises and equipment as of December 31 consisted of the following:

(Dollars in thousands)

	2010	2009
Land	\$11,089	\$11,052
Buildings and improvements	43,594	47,771
Furniture and equipment	35,566	36,261
Total premises and equipment	90,249	95,084
Accumulated depreciation and amortization	(56,368)	(57,177)
Net premises and equipment	\$33,881	\$37,907

On December 28, 2010, 1st Source entered into an agreement with the City of South Bend for the sale of the South Bend headquarters building parking garage for \$1.95 million. Although the City of South Bend took possession of the parking garage on that date, the proceeds were placed in an escrow account. Under the terms of the agreement, receipt of the proceeds from the escrow are contingent upon 1st Source investing \$5.40 million into its properties within the City of South Bend by December 31, 2013. 1st Source intends to fulfill that commitment and expects to receive the proceeds from escrow, however due to the timing of the long term investments, receipt of the proceeds is not anticipated to occur within the next twelve months. Consequently, a gain on the garage sale of \$1.02 million was deferred.

Depreciation and amortization of properties and equipment totaled \$4.13 million in 2010, \$4.61 million in 2009, and \$5.31 million in 2008.

Note 8 — Mortgage Servicing Assets

The unpaid principal balance of residential mortgage loans serviced for third parties was \$1.08 billion at December 31, 2010, compared to \$1.03 billion at December 31, 2009, and \$0.78 billion at December 31, 2008.

Amortization on mortgage servicing rights is expected to total \$1.95 million, \$1.56 million, \$1.26 million, \$0.97 million, and \$0.72 million in 2011, 2012, 2013, 2014, and 2015, respectively. Projected amortization excludes the impact of future asset additions or disposals.

Changes in the carrying value of mortgage servicing assets and the associated valuation allowance follow:

(Dollars in thousands)

	2010	2009
Mortgage servicing assets:		
Balance at beginning of year	\$ 8,749	\$ 6,708
Additions	3,643	7,143
Amortization	(3,277)	(3,331)
Sales	(1,559)	(1,771)
Carrying value before valuation allowance at end of year	7,556	8,749
Valuation allowance:		
Balance at beginning of year	(1)	(2,073)
Impairment recoveries (charges)	1	2,072
Balance at end of year	\$ -	\$ (1)
Net carrying value of mortgage servicing assets at end of year	\$ 7,556	\$ 8,748
Fair value of mortgage servicing assets at end of year	\$ 8,785	\$10,180

During 2010, management determined that it was not necessary to permanently write-down any previously established valuation allowance. At December 31, 2010, the fair value of mortgage servicing assets exceeded the carrying value reported in the consolidated Statement of Financial Condition by \$1.23 million. This difference represents increases in the fair value of certain mortgage servicing assets that could not be recorded above cost basis.

The key economic assumptions used to estimate the fair value of the mortgage servicing rights as of December 31 follow:

	2010	2009
Expected weighted-average life (in years)	3.34	2.95
Weighted-average constant prepayment rate (CPR)	19.09%	18.73%
Weighted-average discount rate	8.49%	8.96%

Funds held in trust at 1st Source for the payment of principal, interest, taxes and insurance premiums applicable to mortgage loans being serviced for others, were approximately \$26.37 million and \$16.78 million at December 31, 2010 and December 31, 2009, respectively. Mortgage loan contractual servicing fees, including late fees and ancillary income, were \$4.04 million, \$3.74 million, and \$3.05 million for 2010, 2009, and 2008, respectively. Mortgage loan contractual servicing fees are included in Mortgage banking income on the consolidated Statement of Income.

Note 9 — Intangible Assets and Goodwill

At December 31, 2010, intangible assets consisted of goodwill of \$83.33 million and other intangible assets of \$5.63 million, which is net of accumulated amortization of \$5.07 million. At December 31, 2009, intangible assets consisted of goodwill of \$83.33 million and other intangible assets of \$6.89 million, which is net of accumulated amortization of \$3.78 million. Intangible asset amortization was \$1.32 million, \$1.35 million, and \$1.39 million for 2010, 2009, and 2008, respectively. Amortization on other intangible assets is expected to total \$1.30 million, \$1.19 million, \$1.02 million, \$0.84 million, and \$0.56 million in 2011, 2012, 2013, 2014, and 2015, respectively.

A summary of core deposit intangible and other intangible assets as of December 31 follows:

<i>(Dollars in thousands)</i>	2010	2009
Core deposit intangibles:		
Gross carrying amount	\$10,442	\$10,421
Less: accumulated amortization	(4,956)	(3,699)
Net carrying amount	\$ 5,486	\$ 6,722
Other intangibles:		
Gross carrying amount	\$ 254	\$ 254
Less: accumulated amortization	(114)	(82)
Net carrying amount	\$ 140	\$ 172

Note 10 — Deposits

The amount of certificates of deposit of \$100,000 or more and other time deposits of \$100,000 or more outstanding at December 31, 2010, by time remaining until maturity is as follows:

<i>(Dollars in thousands)</i>	
Under 3 months	\$ 86,337
4 – 6 months	52,135
7 – 12 months	138,613
Over 12 months	205,078
Total	\$482,163

Scheduled maturities of time deposits, including both private and public funds, at December 31, 2010 were as follows:

<i>(Dollars in thousands)</i>	
2011	\$ 631,192
2012	162,127
2013	148,905
2014	95,757
2015	12,373
Thereafter	2,094
Total	\$1,052,448

Note 11 — Borrowed Funds and Mandatorily Redeemable Securities

Details of long-term debt and mandatorily redeemable securities as of December 31, 2010 and 2009 are as follows:

<i>(Dollars in thousands)</i>	2010	2009
Term loan	\$ -	\$10,000
Federal Home Loan Bank borrowings (1.80%–6.54%)	15,927	955
Mandatorily redeemable securities	8,228	8,201
Other long-term debt	661	605
Total long-term debt and mandatorily redeemable securities	\$24,816	\$19,761

Annual maturities of long-term debt outstanding at December 31, 2010, for the next five years beginning in 2011, are as follows (in thousands): \$286; \$118; \$10,120; \$5,123; and \$124.

During 2007, we entered into a line of credit agreement whereby 1st Source could borrow up to \$30.00 million. During 2008, \$10.00 million was drawn on this line and converted to a term loan bearing a fixed interest rate of 4.28%. Interest was payable quarterly with principal due at the October 30, 2010 maturity. The Loan Agreement contained, among other provisions, certain covenants relating to capital structure and financial requirements. \$20.00 million remained available on the line of credit at December 31, 2009. The line of credit matured on October 30, 2010 and was not renewed.

At December 31, 2010, the Federal Home Loan Bank borrowings represented a source of funding for certain residential mortgage activities and consisted of eight fixed rate notes with maturities ranging from 2013 to 2022. These notes were collateralized by \$19.91 million of certain real estate loans.

Short-term borrowings include federal funds purchased, security repurchase agreements, commercial paper and other short-term borrowings. There were no Federal funds purchased outstanding as of December 31, 2010 and 2009. Securities sold under agreement to repurchase were \$136.03 million and \$123.79 million as of December 31, 2010 and 2009. Commercial paper was \$3.60 million and \$4.73 million as of December 31, 2010 and 2009. Other short-term borrowings were \$16.36 million and \$21.60 million as of December 31, 2010 and 2009. Weighted average interest rates on short term borrowings as of December 31, 2010 and 2009 were 0.20% and 0.25% for security repurchase agreements, 0.28% and 0.43% for commercial paper and 0.68% and 1.80% for other short-term borrowings, respectively.

Mandatorily redeemable securities as of December 31, 2010, of \$8.23 million reflected the “book value” shares under the 1st Source Executive Incentive Plan. See Note 16 – Employee Stock Benefit Plans for additional information. Dividends paid on these shares and changes in book value per share are recorded as other interest expense. Total interest expense recorded for 2010, 2009, and 2008 was \$0.55 million, \$0.45 million, and \$0.66 million, respectively.

Note 12 — Subordinated Notes

As of December 31, 2010, we sponsored two trusts, 1st Source Capital Trust IV and 1st Source Master Trust (Capital Trusts) of which 100% of the common equity is owned by 1st Source. The Capital Trusts were formed for the purpose of issuing corporation-obligated mandatorily redeemable capital securities (the capital securities) to third-party investors and investing the proceeds from the sale of the capital securities solely in junior subordinated debenture securities of 1st Source (the subordinated notes). The subordinated notes held by each Capital Trust are the sole assets of that Capital Trust. The Capital Trusts qualify as variable interest entities for which 1st Source is not the primary beneficiary and therefore reported in the financial statements as unconsolidated subsidiaries. The junior subordinated debentures are reflected as subordinated notes in the Statements of Financial Condition with corresponding interest distributions reflected as interest expense in the Statements of Income. The common shares issued by the Capital Trusts are included in other assets in the Statements of Financial Condition.

Distributions on the capital securities issued by the Capital Trusts are payable quarterly at a rate per annum equal to the interest rate being earned by the Capital Trust on the subordinated notes held by that Capital Trust. The capital securities are subject to mandatory redemption, in whole or in part, upon repayment of the subordinated notes. We have entered into agreements which, taken collectively, fully and unconditionally guarantee the capital securities subject to the terms of each of the guarantees. The capital securities held by the Capital Trusts qualify as Tier 1 capital under Federal Reserve Board guidelines.

The subordinated notes are summarized as follows, at December 31, 2010:

<i>(Dollars in thousands)</i>	Amount of Subordinated Notes	Interest Rate	Maturity Date
September 2004 issuance–fixed rate	\$ 30,928	7.66%	12/15/34
June 2007 issuance–fixed rate	41,238	7.22%	06/15/37
August 2007 issuance–fixed rate	17,526	7.10%	09/15/37
Total	\$89,692		

Note 13 — Preferred Stock

On January 23, 2009, we entered into a Letter Agreement with the United States Department of the Treasury (the “Treasury”), pursuant to which we issued and sold (i) 111,000 shares of our Fixed Rate Cumulative Perpetual Preferred Stock, Series A (the “Series A Preferred Stock”) and (ii) a warrant (the “Warrant”) to purchase 837,947 shares of our common stock, without par value (the “Common Stock”), for an aggregate purchase price of \$111,000,000 in cash.

The \$111.00 million proceeds were allocated to the Series A Preferred Stock and the Warrant based on the relative fair value of the instruments. The fair value of the warrants was estimated using the binomial method. The expected volatility was based on the historical volatility for the ten year estimated life of the warrants. The following assumptions were used to value the warrants: a risk-free interest rate of 3.49%; an expected dividend yield of 3.21%; an expected volatility factor of 40.48%; and an expected warrant life of ten years. The fair value of the preferred stock was estimated using a discounted cash flow approach assuming a preferred stock life of five years and a 13.00% discount rate. The difference between the initial carrying value of \$103.73 million that was allocated to the Series A Preferred Stock and its redemption value of \$111.00 million was charged to retained earnings (with a corresponding increase in the carrying value of the Series A Preferred Stock) as an adjustment to the dividend yield using the effective yield method.

The Series A Preferred Stock qualified as Tier 1 capital and paid cumulative dividends at a rate of 5% per annum for the first five years, and 9% per annum thereafter. The Series A Preferred Stock was non-voting except with respect to certain matters affecting the rights of the holders thereof.

The Warrant has a 10-year term and is immediately exercisable upon its issuance, with an exercise price, subject to anti-dilution adjustments, equal to \$19.87 per share of the Common Stock.

In addition, we could not increase the quarterly dividend we paid on our common stock above \$0.16 per share during the two-year period ending December 29, 2010, without consent of the Treasury.

On December 29, 2010, we redeemed all 111,000 shares of the Series A Preferred Stock issued to the Treasury for \$111.00 million. The warrant remained outstanding as of December 31, 2010.

Note 14 — Earnings Per Share

Earnings per common share is computed using the two-class method. Basic earnings per common share is computed by dividing net income available to common shareholders by the weighted-average number of common shares outstanding during the applicable period, excluding outstanding participating securities. Participating securities include non-vested restricted stock awards. Non-vested restricted stock awards are considered participating securities to the extent the holders of these securities receive non-forfeitable dividends at the same rate as holders of common stock. Diluted earnings per common share is computed using the weighted-average number of shares determined for the basic earnings per common share computation plus the dilutive effect of stock compensation using the treasury stock method.

Stock options and warrants, where the exercise price was greater than the average market price of the common shares, were excluded from the computation of diluted earnings per common share because the result would have been antidilutive. Stock options of 33,000, 49,763 and 422,439 were considered antidilutive as of December 31, 2010, 2009 and 2008, respectively. Stock warrants of 837,947 were considered antidilutive as of December 31, 2010 and 2009. No warrants were outstanding as of December 31, 2008.

The following table presents a reconciliation of the number of shares used in the calculation of basic and diluted earnings per common share for the three years ending December 31.

<i>(Dollars in thousands - except per share amounts)</i>	2010	2009	2008
Distributed earnings allocated to common stock	\$ 14,771	\$ 14,247	\$ 13,980
Undistributed earnings allocated to common stock	14,594	4,735	19,035
Net earnings allocated to common stock	29,365	18,982	33,015
Net earnings allocated to participating securities	290	92	371
Net income allocated to common stock and participating securities	\$ 29,655	\$ 19,074	\$ 33,386
Weighted average shares outstanding for basic earnings per common share	24,232,092	24,157,179	24,105,753
Dilutive effect of stock compensation	7,102	6,510	281,979
Weighted average shares outstanding for diluted earnings per common share	24,239,194	24,163,689	24,387,732
Basic earnings per common share	\$ 1.21	\$ 0.79	\$ 1.38
Diluted earnings per common share	\$ 1.21	\$ 0.79	\$ 1.37

Note 15 — Employee Benefit Plans

The 1st Source Corporation Employee Stock Ownership and Profit Sharing Plan (as amended, the "Plan") includes an employee stock ownership component, which is designed to invest in and hold 1st Source common stock, and a 401(k) plan component, which holds all Plan assets not invested in 1st Source common stock. The Plan also includes a number of features that encourage diversification of investments with more opportunities to change investment elections and contribution levels.

Employees are eligible to participate in the Plan the first of the month following 90 days of employment. We match dollar for dollar on the first 4% of deferred compensation, plus 50 cents on the dollar of the next 2% deferrals. We will also contribute to the Plan an amount designated as a fixed 2% employer contribution. The amount of fixed contribution is equal to two percent of eligible compensation. Additionally, each year we may, in our sole discretion, make a discretionary profit sharing contribution. As of December 31, 2010 and 2009, there were 1,404,564 and 1,262,509 shares, respectively, of 1st Source Corporation common stock held in relation to employee benefit plans.

Our contributions are allocated among the participants on the basis of compensation. Each participant's account is credited with cash and/or shares of 1st Source common stock based on that participant's compensation earned during the year. After completing five years of service in which they worked at least 1,000 hours per year, a participant will be completely vested in their employer's contribution. An employee is always 100% vested in their deferral. Plan participants are entitled to receive distributions from their Plan accounts upon termination of service, which includes retirement or death.

Contribution expense for the years ended December 31, 2010, 2009, and 2008, amounted to \$4.01 million, \$3.93 million, and \$4.27 million, respectively.

In addition to the 1st Source Corporation Employee Stock Ownership and Profit Sharing Plan, we provide certain health care and life insurance benefits for some of our retired employees. Effective March 31, 2009, we amended the plan so that no new retirees will be covered by the plan. The amendment will have no effect on the coverage for retirees covered at the time of the amendment. Prior to amendment, all of our full-time employees became eligible for these retiree benefits upon reaching age 55 with 20 years of credited service. The medical plan pays a stated percentage of eligible medical expenses reduced for any deductibles and payments made by government programs and other group coverage. The lifetime maximum benefit payable under the medical plan is \$15,000 and for life insurance is \$3,000.

Our net periodic post retirement benefit cost (recovery) recognized in the consolidated Statement of Income for the years ended December 31, 2010, 2009, and 2008 amounted to \$(0.02) million, \$(1.43) million, and \$0.13 million, respectively. Our accrued post retirement benefit cost was not material at December 31, 2010, 2009, and 2008.

Note 16 — Employee Stock Benefit Plans

As of December 31, 2010, we had five stock-based employee compensation plans. These plans include two stock option plans, namely, the 1992 Stock Option Plan, and the 2001 Stock Option Plan; two executive stock award plans, namely, the Executive Incentive Plan, and the Restricted Stock Award Plan; and the Employee Stock Purchase Plan. These stock-based employee compensation plans were established to help retain and motivate key employees. All of the plans have been approved by the shareholders of 1st Source Corporation. The Executive Compensation and Human Resources Committee (the "Committee") of the 1st Source Corporation Board of Directors has sole authority to select the employees, establish the awards to be issued, and approve the terms and conditions of each award under the stock-based compensation plans.

A combined summary of activity regarding our active stock option plans and stock award plans is presented in the following table.

	Shares Available for Grant	Non-Vested Stock Awards Outstanding		Stock Options Outstanding	
		Number of Shares	Weighted-Average Grant-Date Fair Value	Number of Shares	Weighted-Average Exercise Price
Balance, January 1, 2008	2,373,668	470,202	\$15.18	471,517	\$26.51
Shares authorized – 2008 EIP	64,847	-	-	-	-
Granted	(66,847)	66,847	17.96	-	-
Stock options exercised	-	-	-	-	-
Stock awards vested	-	(37,070)	16.92	-	-

Canceled	-	-	-	-	-
Balance, December 31, 2008	2,387,570	435,471	15.47	80,948	18.51
Shares authorized – 2009 EIP	46,261	-	-	-	-
Granted	(87,761)	87,761	17.75	-	-
Stock options exercised	-	-	-	-	-
Stock awards vested	-	(34,395)	16.99	-	-
Forfeited	2,047	(66,930)	11.85	(9,185)	21.03
Canceled	-	-	-	-	-
Balance, December 31, 2009	2,348,117	421,907	16.40	71,763	18.19
Shares authorized – 2010 EIP	55,351	-	-	-	-
Granted	(93,350)	93,350	17.31	-	-
Stock options exercised	-	-	-	-	-
Stock awards vested	-	(21,666)	19.21	-	-
Forfeited	9,530	(54,981)	12.68	(9,255)	25.03
Canceled	-	-	-	-	-
Balance, December 31, 2010	2,319,648	438,610	\$16.92	62,508	\$17.18

Stock Option Plans — Our incentive stock option plans include the 1992 Stock Option Plan (the "1992 Plan") and the 2001 Stock Option Plan (the "2001 Plan"). As of December 31, 2010, there were 7,508 stock options remaining exercisable under the 1992 Plan, all of which will expire no later than January 2011. We have not issued any awards from the 1992 Plan since 2001, as the 1992 Plan was terminated, except for outstanding options, after the 2001 Plan was approved by the shareholders. Options under the 2001 Plan vest in one to eight years from date of grant. As of December 31, 2010, there were 55,000 shares available for issuance upon exercise and 2,129,177 shares available for issuance under the 2001 Plan.

Each award from all plans is evidenced by an award agreement that specifies the option price, the duration of the option, the number of shares to which the option pertains, and such other provisions as the Committee determines. The option price is equal to the fair market value of a share of 1st Source Corporation's common stock on the date of grant. Options granted expire at such time as the Committee determines at the date of grant and in no event does the exercise period exceed a maximum of ten years. Upon merger, consolidation, or other corporate consolidation in which 1st Source Corporation is not the surviving corporation, as defined in the plans, all outstanding options immediately vest.

There were no stock option exercises during 2010, 2009 or 2008. All shares issued in connection with stock option exercises and non-vested stock awards are issued from available treasury stock.

The total intrinsic value of outstanding stock options and outstanding exercisable stock options was \$0.20 million and \$0.19 million at December 31, 2010. The total fair value of share awards vested was \$0.38 million during 2010, \$0.72 million in 2009, and \$0.66 million in 2008.

Other information regarding stock options outstanding and exercisable as of December 31, 2010, is as follows:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number of Shares	Weighted-Average Remaining Contractual Life (Years)	Weighted-Average Exercise Price	Number of Shares	Weighted-Average Exercise Price
\$12.04 to \$17.99	29,508	1.73	\$13.38	26,758	\$13.52
\$18.00 to \$20.86	33,000	0.55	20.58	33,000	20.58

Stock-based compensation to employees is recognized as compensation cost in the Statement of Income based on their fair values on the measurement date, which, for 1st Source, is the date of grant. Stock-based compensation expense is recognized ratably over the requisite service period for all awards. We recognized additional stock-based compensation expense related to stock options of \$12,362 for 2010, \$12,362 for 2009 and \$15,364 for 2008 (not subject to tax).

The fair value of each option on the date of grant was estimated using the Black-Scholes option pricing model. Expected volatility is based on the historical volatility estimated over a period equal to the expected life of the options. In estimating the fair value of stock options under the Black-Scholes valuation model, separate groups of employees that have similar historical exercise behavior are considered separately. The expected life of the options granted is derived based on past experience and represents the period of time that options granted are expected to be outstanding.

Stock Award Plans — Our incentive stock award plans include the Executive Incentive Plan (EIP) and the Restricted Stock Award Plan (RSAP). The EIP is also administered by the Committee. Awards under the EIP include “book value” shares and “market value” shares of common stock. These shares are awarded annually based on weighted performance criteria and generally vest over a period of five years. The EIP book value shares may only be sold to 1st Source and such sale is mandatory in the event of death, retirement, disability, or termination of employment. The RSAP is designed for key employees. Awards under the RSAP are made to employees recommended by the Chief Executive Officer and approved by the Committee. Shares granted under the RSAP vest over a two to ten year period and vesting is based upon meeting certain various criteria, including continued employment with 1st Source.

Stock-based compensation expense relating to the EIP and RSAP totaled \$1.84 million in 2010, \$1.02 million in 2009, and \$0.31 million in 2008. The total income tax benefit recognized in the accompanying consolidated statements of income related to stock-based compensation was \$0.70 million in 2010, \$0.39 million in 2009, and \$0.12 million in 2008. Unrecognized stock-based compensation expense related to stock options (2001 Plan) totaled \$3,759 at December 31, 2010. At such date, the weighted-average period over which this unrecognized expense was expected to be recognized was 0.3 years. Unrecognized stock-based compensation expense related to non-vested stock awards (EIP/RSAP) was \$2.85 million at December 31, 2010. At such date, the weighted-average period over which this unrecognized expense was expected to be recognized was 3.23 years.

The fair value of non-vested stock awards for the purposes of recognizing stock-based compensation expense is market price of the stock on the measurement date, which, for our purposes is the date of the award.

Employee Stock Purchase Plan — We offer an Employee Stock Purchase Plan (ESPP) for substantially all employees with at least two years of service on the effective date of an offering under the plan. Eligible employees may elect to purchase any dollar amount of stock, so long as such amount does not exceed 25% of their base rate of pay and the aggregate stock accrual rate for all offerings does not exceed \$25,000 in any calendar year. The purchase price for shares offered is the lower of the closing market bid price for the offering date or the average market bid price for the five business days preceding the offering date. The purchase price and discount to the actual market closing price on the offering date for the 2010, 2009, and 2008 offerings were \$17.80 (0.00%), \$17.63 (0.05%), and \$20.70 (0.05%), respectively. Payment for the stock is made through payroll deductions over the offering period, and employees may discontinue the deductions at any time and exercise the option or take the funds out of the program. The most recent offering began June 1, 2010 and runs through May 31, 2012, with \$293,208 in stock value to be purchased at \$17.80 per share.

Note 17 — Income Taxes

Income tax expense was comprised of the following:

Year Ended December 31 (<i>Dollars in thousands</i>)	2010	2009	2008
Current:			
Federal	\$17,446	\$ (983)	\$21,112
State	2,841	1,324	2,682
Total current	20,287	341	23,794
Deferred:			
Federal	(731)	6,172	(9,446)
State	(324)	(485)	(1,333)
Total deferred	(1,055)	5,687	(10,779)
Total provision	\$19,232	\$6,028	\$13,015

The reasons for the difference between income tax expense and the amount computed by applying the statutory federal income tax rate (35%) to income before income taxes are as follows:

Year Ended December 31 <i>(Dollars in thousands)</i>	2010		2009		2008	
	Amount	Percent of Pretax Income	Amount	Percent of Pretax Income	Amount	Percent of Pretax Income
Statutory federal income tax	\$21,167	35.0%	\$11,031	35.0%	\$16,240	35.0%
(Decrease) increase in income taxes resulting from:						
Tax-exempt interest income	(2,240)	(3.7)	(2,539)	(8.1)	(2,412)	(5.2)
Settlements with taxing authorities	-	-	(2,170)	(6.9)	-	-
State taxes, net of federal income tax benefit	1,636	2.7	545	1.7	877	1.9
Other	(1,331)	(2.2)	(839)	(2.6)	(1,690)	(3.6)
Total	\$19,232	31.8%	\$ 6,028	19.1%	\$13,015	28.1%

The tax expense (benefit) applicable to securities gains for the years 2010, 2009, and 2008 was \$868,000, \$639,000, and \$(3,786,000), respectively.

Deferred tax assets and liabilities as of December 31, 2010 and 2009 consisted of the following:

<i>(Dollars in thousands)</i>	2010	2009
Deferred tax assets:		
Reserve for loan and lease losses	\$33,446	\$33,809
Accruals for employee benefits	3,959	2,785
Alternative minimum tax	-	1,678
Capital loss carryover	455	459
Securities valuation reserve	110	82
Other	671	557
Total deferred tax assets	38,641	39,370
Deferred tax liabilities:		
Differing depreciable bases in premises and leased equipment	27,051	30,671
Differing bases in assets related to acquisitions	3,608	3,242
Net unrealized gains on securities available-for-sale	6,407	3,105
Mortgage servicing	2,435	3,018
Capitalized loan costs	1,188	1,306
Prepaid expenses	2,728	615
Other	907	857
Total deferred tax liabilities	44,324	42,814
Net deferred tax liability	\$ (5,683)	\$ (3,444)

No valuation allowance for deferred tax assets was recorded at December 31, 2010 and 2009 as we believe it is more likely than not that all of the deferred tax assets will be realized.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits is as follows:

<i>(Dollars in thousands)</i>	2010	2009	2008
Balance, beginning of year	\$3,043	\$7,601	\$7,063
Additions based on tax positions related to the current year	431	409	1,271
Additions for tax positions of prior years	1,105	771	693
Reductions for tax positions of prior years	(2)	(52)	(136)
Reductions due to lapse in statute of limitations	(1,153)	(837)	(1,290)
Settlements	-	(4,849)	-
Balance, end of year	\$3,424	\$3,043	\$7,601

The total amount of unrecognized tax benefits that would affect the effective tax rate if recognized was \$1.52 million at December 31, 2010, \$1.30 million at December 31, 2009 and \$4.19 million at December 31, 2008. Interest and penalties are recognized through the income tax provision. For the years 2010, 2009 and 2008, we recognized approximately \$0.05 million, \$(0.73) million and \$0.14 million in interest, net of tax effect, and penalties, respectively. Interest and penalties of approximately \$0.60 million, \$0.55 million and \$1.27 million were accrued at December 31, 2010, 2009 and 2008, respectively.

Tax years that remain open and subject to audit include the federal 2007–2010 years and the Indiana 2007–2010 years. We have an open tax assessment with the Indiana Department of Revenue for the 2008 tax year. As a result of the expiration of the statute of limitations in both federal and state tax jurisdictions as well as an expected state tax settlement, it is reasonably possible that within the next 12 months there will be a reduction of unrecognized tax benefits that will affect the effective tax rate and increase earnings in an amount ranging from \$0.00 to \$0.85 million.

Note 18 — Contingent Liabilities, Commitments, and Financial Instruments with Off-Balance-Sheet Risk

Contingent Liabilities — 1st Source and our subsidiaries are defendants in various legal proceedings arising in the normal course of business. In the opinion of management, based upon present information including the advice of legal counsel, the ultimate resolution of these proceedings will not have a material effect on our consolidated financial position or results of operations.

1st Source Bank sells residential mortgage loans to Fannie Mae and Freddie Mac, as well as FHA-insured and VA-guaranteed loans in Ginnie Mae mortgage-backed securities. Additionally, we have sold loans on a service released basis to various other financial institutions in recent years. The agreements under which we sell these mortgage loans contain various representations and warranties regarding the acceptability of loans for purchase. On occasion, we may be asked to indemnify the loan purchaser for credit losses on loans that were later deemed ineligible for purchase or we may be asked to repurchase a loan. Both circumstances are collectively referred to as “repurchases.”

Our liability for repurchases, included in accrued expenses and other liabilities on the Statement of Financial Condition, was \$0.74 million and \$0.38 million as of December 31, 2010 and 2009, respectively. The mortgage repurchase liability represents our best estimate of the loss that we may incur. The estimate is based on specific loan repurchase requests and a historical loss ratio with respect to origination dollar volume. Because the level of mortgage loan repurchase losses are dependent on economic factors, investor demand strategies and other external conditions that may change over the life of the underlying loans, the level of liability for mortgage loan repurchase losses is difficult to estimate and requires considerable management judgment.

Commitments — 1st Source and our subsidiaries are obligated under operating leases for certain office premises and equipment. In 1982, we sold the headquarters building and entered into a leaseback agreement with the purchaser. In December 2010, we entered into a new 10.5 year lease effective January 1, 2011. Future minimum rental commitments for all noncancellable operating leases total approximately, \$2.27 million in 2011, \$2.63 million in 2012, \$2.25 million in 2013, \$2.04 million in 2014, \$1.80 million in 2015, and \$9.56 million, thereafter. As of December 31, 2010, future minimum rentals to be received under noncancellable subleases totaled \$2.91 million.

Rental expense of office premises and equipment and related sublease income were as follows:

Year Ended December 31 <i>(Dollars in thousands)</i>	2010	2009	2008
Gross rental expense	\$3,173	\$3,016	\$3,116
Sublease rental income	(1,562)	(1,516)	(1,523)
Net rental expense	\$1,611	\$1,500	\$1,593

On December 28, 2010, 1st Source entered into an agreement with the City of South Bend for the sale of the South Bend headquarters building parking garage. Under the terms of the agreement, 1st Source is required to invest \$5.40 million into its properties within the City of South Bend. For additional information, see Note 7 Premises and Equipment.

Financial Instruments with Off-Balance-Sheet Risk —To meet the financing needs of our clients, 1st Source and our subsidiaries are parties to financial instruments with off-balance-sheet risk in the normal course of business. These off-balance-sheet financial instruments include commitments to originate, purchase and sell loans, and standby letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated statements of financial condition.

Our exposure to credit loss in the event of nonperformance by the other party to the financial instruments for loan commitments and standby letters of credit is represented by the dollar amount of those instruments. We use the same credit policies and collateral requirements in making commitments and conditional obligations as we do for on-balance-sheet instruments.

Loan commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Bank grants mortgage loan commitments to borrowers, subject to normal loan underwriting standards. The interest rate risk associated with these loan commitments is managed by entering into contracts for future deliveries of loans.

Standby letters of credit are conditional commitments issued to guarantee the performance of a client to a third party. The credit risk involved in and collateral obtained when issuing standby letters of credit are essentially the same as those involved in extending loan commitments to clients. Standby letters of credit totaled \$17.84 million and \$19.02 million at December 31, 2010 and 2009, respectively. Standby letters of credit generally have terms ranging from six months to one year.

Note 19 — Derivative Financial Instruments

Commitments to originate or purchase residential mortgage loans held for sale and forward commitments to sell residential mortgage loans are considered derivative instruments. See Note 18 for further information.

We have certain interest rate derivative positions that are not designated as hedging instruments. These derivative positions relate to transactions in which we enter into an interest rate swap with a client while at the same time entering into an offsetting interest rate swap with another financial institution. In connection with each transaction, we agree to pay interest to the client on a notional amount at a variable interest rate and receive interest from the client on the same notional amount at a fixed interest rate. At the same time, we agree to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows our client to effectively convert a variable rate loan to a fixed rate. Because the terms of the swaps with our customers and the other financial institution offset each other, with the only difference being counterparty credit risk, changes in the fair value of the underlying derivative contracts are not materially different and do not significantly impact our results of operations.

At December 31, 2010 and 2009, the amounts of non-hedging derivative financial instruments are shown in the chart below:

	Asset derivatives			Liability derivatives	
	Notional or contractual amount	Statement of Financial Condition location	Fair value	Statement of Financial Condition location	Fair value
Interest rate swap contracts	\$446,224	Other assets	\$14,959	Other liabilities	\$15,384
Loan commitments	28,666	Mortgages held for sale	30	N/A	-
Forward contracts	40,320	Mortgages held for sale	451	N/A	-
Total - December 31, 2010	\$515,210		\$15,440		\$15,384
Interest rate swap contracts	\$ 412,717	Other assets	\$ 13,516	Other liabilities	\$13,988
Loan commitments	48,821	Mortgages held for sale	77	N/A	-
Forward contracts	38,940	Mortgages held for sale	411	N/A	-
Total - December 31, 2009	\$ 500,478		\$ 14,004		\$13,988

At December 31, 2010, 2009 and 2008, the amounts included in the consolidated statements of income for non-hedging derivative financial instruments are shown in the chart below:

	Statement of Income location	Gain (loss)		
		2010	2009	2008
Interest rate swap contracts	Other expense	\$ 61	\$ (431)	\$ (271)
Interest rate swap contracts	Other income	448	77	744
Loan commitments	Mortgage banking income	(47)	(1,505)	1,595
Forward contracts	Mortgage banking income	40	1,796	(1,131)
Total		\$502	\$ (63)	\$ 937

Note 20 — Regulatory Matters

We are subject to various regulatory capital requirements administered by the Federal banking agencies. Failure to meet minimum capital requirements can result in certain mandatory and possible additional discretionary actions by regulators that, if undertaken, could have a material effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, we must meet specific capital guidelines that involve quantitative measures of our assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. Our capital amounts and classification are subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require us to maintain minimum amounts and ratios of total capital and Tier I capital to risk-weighted assets and of Tier I capital to average assets. We believe that we meet all capital adequacy requirements to which we are subject.

The most recent notification from the Federal bank regulators categorized 1st Source Bank, the largest of our subsidiaries, as "well capitalized" under the regulatory framework for prompt corrective action. To be categorized as "well capitalized" we must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table below. There are no conditions or events since that notification that we believe will have changed the institution's category.

As discussed in Note 12, the capital securities held by the Capital Trusts qualify as Tier 1 capital under Federal Reserve Board guidelines. As discussed in Note 13, preferred stock issued under the TARP program qualified as Tier 1 capital while it was outstanding.

The actual and required capital amounts and ratios for 1st Source Corporation and 1st Source Bank as of December 31, 2010, are presented in the table below:

<i>(Dollars in thousands)</i>	Actual		Minimum Capital Adequacy		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
2010						
Total Capital (to Risk-Weighted Assets):						
1st Source Corporation	\$517,527	15.34%	\$269,840	8.00%	\$337,300	10.00%
1st Source Bank	511,953	15.23%	268,885	8.00%	336,107	10.00%
Tier I Capital (to Risk-Weighted Assets):						
1st Source Corporation	473,846	14.05%	134,920	4.00%	202,380	6.00%
1st Source Bank	469,329	13.96%	134,443	4.00%	201,664	6.00%
Tier I Capital (to Average Assets):						
1st Source Corporation	473,846	10.39%	182,497	4.00%	228,121	5.00%
1st Source Bank	469,329	10.32%	181,843	4.00%	227,304	5.00%
2009						
Total Capital (to Risk-Weighted Assets):						
1st Source Corporation	\$605,793	17.72%	\$273,568	8.00%	\$341,961	10.00%
1st Source Bank	571,328	16.78%	272,404	8.00%	340,505	10.00%
Tier I Capital (to Risk-Weighted Assets):						
1st Source Corporation	561,862	16.43%	136,784	4.00%	205,176	6.00%
1st Source Bank	528,184	15.51%	136,202	4.00%	204,303	6.00%
Tier I Capital (to Average Assets):						
1st Source Corporation	561,862	12.74%	176,346	4.00%	220,433	5.00%
1st Source Bank	528,184	12.03%	175,577	4.00%	219,471	5.00%

The Bank is required to maintain noninterest bearing cash balances with the Federal Reserve Bank. The average balance of these deposits for the years ended December 31, 2010 and 2009, was approximately \$3.00 million.

Dividends that may be paid by a subsidiary bank to the parent company are subject to certain legal and regulatory limitations and also may be affected by capital needs, as well as other factors. Without regulatory approval, the Bank cannot pay dividends in 2011 or 2012 as a result of the \$106.48 million in dividends paid in 2010 which exceed retained net income as defined by federal regulations.

Due to our mortgage activities, 1st Source Bank is required to maintain minimum net worth capital requirements established by various governmental agencies. 1st Source Bank's net worth requirements are governed by the Department of Housing and Urban Development and GNMA. As of December 31, 2010, 1st Source Bank met its minimum net worth capital requirements.

Note 21 — Fair Values of Financial Instruments

We determine the fair values of our financial instruments based on the fair value hierarchy, which requires an entity to maximize the use of quoted price and observable inputs and to minimize the use of unobservable inputs when measuring fair value. We elected fair value accounting for mortgages held for sale. We believe the election for mortgages held for sale (which are hedged with free-standing derivatives [economic hedges]) will reduce certain timing differences and better match changes in the value of these assets with changes in the value of derivatives used as economic hedges for these assets. At December 31, 2010 and 2009, all mortgages held for sale are carried at fair value.

The following table reflects the differences between fair value carrying amount of mortgages held for sale measured at fair value and the aggregate unpaid principal amount we are contractually entitled to receive at maturity on December 31, 2010 and 2009:

<i>(Dollars in thousands)</i>	Fair value carrying amount	Aggregate unpaid principal	Excess of fair value carrying amount over (under) unpaid principal
December 31, 2010			
Mortgages held for sale reported at fair value:			
Total Loans	\$32,599	\$32,285	\$314 (1)
Nonaccrual Loans	-	-	-
Loans 90 days or more past due and still accruing	-	-	-
December 31, 2009			
Mortgages held for sale reported at fair value:			
Total Loans	\$26,649	\$25,758	\$891 (1)
Nonaccrual Loans	-	-	-
Loans 90 days or more past due and still accruing	-	-	-

(1) The excess of fair value carrying amount over unpaid principal is included in mortgage banking income and includes changes in fair value at and subsequent to funding, gains and losses on the related loan commitment prior to funding, and premiums on acquired loans.

Financial Instruments on Recurring Basis:

The following is a description of the valuation methodologies used for financial instruments measured at fair value on a recurring basis:

Investment securities available for sale are valued primarily by a third party pricing agent and both the market and income valuation approaches are implemented using the following types of inputs:

- U.S. treasuries are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.
- Government-sponsored agency debt securities and corporate bonds are primarily priced using available market information through processes such as benchmark curves, market valuations of like securities, sector groupings and matrix pricing.
- Other government-sponsored agency securities, mortgage-backed securities and some of the actively traded REMICs and CMOs, are primarily priced using available market information including benchmark yields, prepayment speeds, spreads and volatility of similar securities.
- Other inactive government-sponsored agency securities are primarily priced using consensus pricing and dealer quotes.
- State and political subdivisions are largely grouped by characteristics, i.e., geographical data and source of revenue in trade dissemination systems. Since some securities are not traded daily and due to other grouping limitations, active market quotes are often obtained using benchmarking for like securities. Local tax anticipation warrants, with very little market activity, are priced using an appropriate market yield curve.
- Marketable equity (common) securities are primarily priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.

Trading account securities are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.

Mortgages held for sale and the related loan commitments and forward contracts (hedges) are valued using a market value approach and utilizing an appropriate current market yield and a loan commitment closing rate based on historical analysis.

Interest rate swap positions, both assets and liabilities, are valued by a third-party pricing agent using an income approach and utilizing models that use as their basis readily observable market parameters. This valuation process considers various factors including interest rate yield curves, time value and volatility factors. Management believes an adjustment is required to "mid-market" valuations for derivatives tied to its performing loan portfolio to recognize the imprecision and related exposure inherent in the process of estimating expected credit losses as well as velocity of deterioration evident with systemic risks imbedded in these portfolios.

The table below presents the balance of assets and liabilities at December 31, 2010 and 2009 measured at fair value on a recurring basis.

(Dollars in thousands)

	Level 1	Level 2	Level 3	Total
Assets:				
Investment securities available-for-sale:				
U.S. Treasury and Federal agencies securities	\$20,186	\$ 427,123	\$ -	\$ 447,309

Total - December 31, 2009	\$ -	\$ 13,988	\$ -	\$ 13,988

The changes in Level 3 assets and liabilities at December 31, 2010 and 2009 measured at fair value on a recurring basis are summarized as follows:

<i>(Dollars in thousands)</i>	U.S. States and political subdivisions securities	Corporate debt securities	Marketable equity securities	Foreign government and other securities	Investment securities available-for-sale
Beginning balance January 1, 2010	\$ 18,310	\$ -	\$ 9	\$ 675	\$ 18,994
Total gains or losses (realized/unrealized):					
Included in earnings	-	-	-	-	-
Included in other comprehensive income	38	-	-	-	38
Purchases	1,034	9,992	-	100	11,126
Issuances	-	-	-	-	-
Settlements	-	-	-	-	-
Maturities	(13,941)	-	-	(100)	(14,041)
Transfers into Level 3	10,865	-	-	-	10,865
Transfers out of Level 3	-	-	(9)	-	(9)
Ending balance December 31, 2010	\$ 16,306	\$9,992	\$ -	\$ 675	\$ 26,973
Beginning balance January 1, 2009	\$ 18,972	\$ -	\$ 9	\$ 435	\$ 19,416
Total gains or losses (realized/unrealized):					
Included in earnings	-	-	-	-	-
Included in other comprehensive income	362	-	-	-	362
Purchases and issuances	20,116	-	-	400	20,516
Settlements	-	-	-	-	-
Maturities	(21,140)	-	-	(160)	(21,300)
Transfers in and/or out of Level 3	-	-	-	-	-
Ending balance December 31, 2009	\$ 18,310	\$ -	\$ 9	\$ 675	\$ 18,994

Transfers into Level 3 represent auction rate securities which were previously classified as Level 2. We have determined that Level 3 is a more appropriate classification based on the fair value methodology used due to market illiquidity and the lack of other observable inputs. The transfer was made as of September 30, 2010. Transfers out of Level 3 represent non-marketable stock which was reclassified on the Statement of Financial Condition.

There were no gains or losses for the period included in earnings attributable to the change in unrealized gains or losses relating to assets and liabilities still held at December 31, 2010.

Financial Instruments on Non-recurring Basis:

We may be required, from time to time, to measure certain other financial assets at fair value on a non-recurring basis in accordance with GAAP. These adjustments to fair value usually result from application of lower of cost or market accounting or impairment charges of individual assets.

Impaired loans and related write-downs are based on the fair value of the underlying collateral if repayment is expected solely from the collateral. Collateral values are reviewed quarterly and estimated using customized discounting criteria, appraisals and dealer and trade magazine quotes which are used in a market valuation approach.

Partnership investments and the adjustments to fair value primarily result from application of lower of cost or fair value accounting. The partnership investments are priced using financial statements provided by the partnerships.

Mortgage servicing rights (MSRs) and related adjustments to fair value result from application of lower of cost or fair value accounting. For purposes of impairment, MSRs are stratified based on the predominant risk characteristics of the underlying servicing, principally by loan type and interest rate. The fair value of each tranche of the servicing portfolio is estimated by calculating the present value of estimated future net servicing cash flows, taking into consideration actual and expected mortgage loan prepayment rates, discount rates, servicing costs, and other economic factors. A fair value analysis is also obtained from an independent third party agent. MSRs do not trade in an active, open market with readily observable prices and though sales of MSRs do occur, precise terms and conditions typically are not readily available and the characteristics of our servicing portfolio may differ from those of any servicing portfolios that do trade.

Other real estate is based on the lower of cost or fair value of the underlying collateral less expected selling costs. Collateral values are estimated primarily using appraisals and reflect a market value approach. New appraisals are obtained annually. Repossessions are similarly valued.

For assets measured at fair value on a nonrecurring basis the following represents impairment charges (recoveries) recognized on these assets during the year ended December 31, 2010 and 2009, respectively: impaired loans - \$14.03 million and \$16.06 million; partnership investments - \$(0.43) million and \$(0.45) million; mortgage servicing rights - \$0.00 million and \$(2.07) million; repossessions - \$2.62 million and \$0.30 million, and other real estate - \$0.42 million and \$0.16 million.

The table below presents the carrying value of assets at December 31, 2010 and 2009, measured at fair value on a non-recurring basis.

<i>(Dollars in thousands)</i>	Level 1	Level 2	Level 3	Total
December 31, 2010				
Loans	\$-	\$-	\$ 78,076	\$ 78,076
Accrued income and other assets (partnership investments)	-	-	1,964	1,964
Accrued income and other assets (mortgage servicing rights)	-	-	7,556	7,556
Accrued income and other assets (repossessions)	-	-	5,670	5,670
Accrued income and other assets (other real estate)	-	-	7,592	7,592
Total	\$-	\$-	\$100,858	\$100,858
December 31, 2009				
Loans	\$-	\$-	\$ 80,537	\$ 80,537
Accrued income and other assets (partnership investments)	-	-	2,662	2,662
Accrued income and other assets (mortgage servicing rights)	-	-	8,748	8,748
Accrued income and other assets (repossessions)	-	-	10,165	10,165
Accrued income and other assets (other real estate)	-	-	6,529	6,529
Total	\$-	\$-	\$108,641	\$108,641

The fair values of our financial instruments as of December 31, 2010 and 2009 are summarized in the table below.

<i>(Dollars in thousands)</i>	2010		2009	
	Carrying or Contract Value	Fair Value	Carrying or Contract Value	Fair Value
Assets:				
Cash and due from banks	\$ 62,313	\$ 62,313	\$ 72,872	\$ 72,872
Federal funds sold and interest bearing deposits with other banks	36,394	36,394	141,166	141,166
Investment securities, available-for-sale	969,018	969,018	901,638	901,638
Other investments and trading account securities	19,646	19,646	21,137	21,137
Mortgages held for sale	32,599	32,599	26,649	26,649
Loans and leases, net of reserve for loan and lease losses	2,983,749	3,040,895	3,004,914	3,042,251
Cash surrender value of life insurance policies	54,182	54,182	51,342	51,342
Mortgage servicing rights	7,556	8,785	8,748	10,180
Interest rate swaps	14,959	14,959	13,516	13,516
Liabilities:				
Deposits	\$3,622,745	\$3,654,067	\$3,652,464	\$3,692,203
Short-term borrowings	155,989	155,989	150,110	150,110
Long-term debt and mandatorily redeemable securities	24,816	25,072	19,761	19,831
Subordinated notes	89,692	79,811	89,692	81,118
Interest rate swaps	15,384	15,384	13,988	13,988
Off-balance-sheet instruments *	-	134	-	150

* Represents estimated cash outflows required to currently settle the obligations at current market rates.

GAAP requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring or non-recurring basis. The methodologies for estimating fair value of financial assets and financial liabilities that are measured at fair value on a recurring or non-recurring basis are discussed above. The estimated fair value approximates carrying value for cash and cash equivalents, federal funds sold and interest bearing deposits with other banks, and cash surrender value of life insurance policies. The methodologies for other financial assets and financial liabilities are discussed below:

Loans and Leases — For variable rate loans and leases that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. The fair values of other loans and leases are estimated using discounted cash flow analyses which use interest rates currently being offered for loans and leases with similar terms to borrowers of similar credit quality.

Deposits — The fair values for all deposits other than time deposits are equal to the amounts payable on demand (the carrying value). Fair values of variable rate time deposits are equal to their carrying values. Fair values for fixed rate time deposits are estimated using discounted cash flow analyses using interest rates currently being offered for deposits with similar remaining maturities.

Short-Term Borrowings — The carrying values of Federal funds purchased, securities sold under repurchase agreements, and other short-term borrowings, including our liability related to mortgage loans available for repurchase under GNMA optional repurchase programs, approximate their fair values.

Long-Term Debt and Mandatorily Redeemable Securities — The fair values of long-term debt are estimated using discounted cash flow analyses, based on our current estimated incremental borrowing rates for similar types of borrowing arrangements. The carrying values of mandatorily redeemable securities are based on approximate fair values.

Subordinated Notes — Fair values are based on quoted market prices, where available. If quoted market prices are not available, fair values are estimated based on calculated market prices of comparable securities.

Off-Balance-Sheet Instruments — Contract and fair values for certain of our off-balance-sheet financial instruments (guarantees) are estimated based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

Limitations — Fair value estimates are made at a specific point in time based on relevant market information and information about the financial instruments. Because no market exists for a significant portion of our financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other such factors.

These estimates do not reflect any premium or discount that could result from offering for sale at one time our entire holdings of a particular financial instrument. These estimates are subjective in nature and require considerable judgment to interpret market data. Accordingly, the estimates presented herein are not necessarily indicative of the amounts we could realize in a current market exchange, nor are they intended to represent the fair value of 1st Source as a whole. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. The fair value estimates presented herein are based on pertinent information available to management as of the respective balance sheet date. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued since the presentation dates, and therefore, estimates of fair value after the balance sheet date may differ significantly from the amounts presented herein.

Other significant assets, such as premises and equipment, other assets, and liabilities not defined as financial instruments, are not included in the above disclosures. Also, the fair value estimates for deposits do not include the benefit that results from the low-cost funding provided by the deposit liabilities compared to the cost of borrowing funds in the market.

Note 23 — Subsequent Events

We have evaluated subsequent events through the date our financial statements were issued. We do not believe any subsequent events have occurred that would require further disclosure or adjustment to our financial statements.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None

ITEM 9A. CONTROLS AND PROCEDURES.

1st Source carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, at December 31, 2010, our disclosure controls and procedures were effective in ensuring that information required to be disclosed by 1st Source in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and are designed to ensure that information required to be disclosed in those reports is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure.

In addition, there were no changes in our internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during the fourth fiscal quarter of 2010 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

MANAGEMENT REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management of 1st Source Corporation ("1st Source") is responsible for establishing and maintaining adequate internal control over financial reporting. 1st Source's internal control over financial reporting includes policies and procedures pertaining to 1st Source's ability to record, process, and report reliable information. Actions are taken to correct any deficiencies as they are identified through internal and external audits, regular examinations by bank regulatory agencies, 1st Source's formal risk management process, and other means. 1st Source's internal control system is designed to provide reasonable assurance to 1st Source's management and Board of Directors regarding the preparation and fair presentation of 1st Source's published financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Further, because of changes in conditions, the effectiveness of internal control may vary over time.

1st Source's management assessed the effectiveness of internal control over financial reporting as of December 31, 2010. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control – Integrated Framework. Based on management's assessment, we believe that, as of December 31, 2010, 1st Source's internal control over financial reporting is effective based on those criteria.

Ernst & Young LLP, independent registered public accounting firm, has issued an attestation report on management's assessment of 1st Source's internal control over financial reporting. This report appears on page 30.

CERTIFICATIONS

EXHIBIT 31.1

I, Christopher J. Murphy III, Chief Executive Officer, certify that:

1. I have reviewed this annual report on Form 10-K of 1st Source Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's Board of Directors:
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
