2010 Annual Report

BARD

Received SEC

MAR 21 2011

Washington, DC 20549

FINANCIAL HIGHLIGHTS

Net Sales

(in millions of dollars)

Diluted Earnings Per Share Available To Common Shareholders¹

(in dollars)

¹ Excluding the items identified to the right

Cash Dividends Paid Per Share

(in dollars)

Operations as of and for the year ended December 31:

(dollars in millions except per share data)

	2010	2009	2008
Net sales	\$ 2,720.2	\$ 2,534.9	\$ 2,452.1
Net income attributable to common shareholders	\$ 509.2	\$ 460.1	\$ 416.5
Diluted earnings per share:			
available to common shareholders	\$ 5.32	\$ 4.60	\$ 4.05
Diluted earnings per share available to common shareholders excluding the items identified below	\$ 5.60	\$ 5.09	\$ 4.42
Cash dividends paid per share	\$ 0.70	\$ 0.66	\$ 0.62
Research and development expense	\$ 185.4	\$ 179.6	\$ 199.1
Return on shareholders' investment	26.5%	21.9%	21.7%
Number of employees	11,700	11,000	11,000

"Net sales in constant currency" and "diluted earnings per share available to common shareholders excluding items" (adjusted EPS) are non-GAAP financial measures. For a reconciliation of net sales in constant currency, see page II-4 in the accompanying Annual Report on Form 10-K for the year ended December 31, 2010 (Form 10-K).

Net Income and Adjusted Earnings Per Share Reconciliation

- As discussed below, items in each of 2010, 2009 and 2008 affect the comparability of the company's results of operations between periods.
- For the year ended December 31, 2010, the following items affected the comparability of results between periods: (i) a charge of \$20.8 million pre-tax for acquisition-related items including purchased research and development, transaction costs, which consisted primarily of legal and valuation costs, purchase accounting adjustments and integration costs; (ii) a charge of \$3.8 million pre-tax for the write-down of public hospital receivables in Greece; (iii) a charge of \$16.7 million pre-tax for restructuring; and (iv) a net decrease of \$4.8 million in the income tax provision, including a decrease of \$10.4 million due to a remeasurement of certain tax positions related to the completion of the IRS examinations of the tax years 2003 and 2004, the completion of certain foreign tax examinations, and the expiration of statutes of limitations in foreign jurisdictions, offset by an increase of \$5.6 million due to cash repatriation of certain foreign earnings as a result of new tax legislation. The net effect of these items decreased net income attributable to common shareholders by \$26.5 million, or \$0.28 diluted earnings per share available to common shareholders.
- For the year ended December 31, 2009, the following items affected the comparability of results between periods: (i) a charge of \$21.7 million pre-tax for acquisition-related items including purchased research and development, transaction costs, which consisted primarily of legal and valuation costs, purchase accounting adjustments and integration costs; (ii) a charge of \$8.4 million pre-tax for asset dispositions; (iii) a charge of \$25.0 million pre-tax related to an insurance settlement; (iv) a gain of \$18.0 million pre-tax for an insurance recovery; (v) a charge of \$15.4 million pre-tax for restructuring; and (vi) an increase of \$2.1 million in the income tax provision resulting from a tax assessment that related to prior periods. The net effect of these items decreased net income attributable to common shareholders by \$49.4 million, or \$0.49 diluted earnings per share available to common shareholders.
- For the year ended December 31, 2008, the following items affected the comparability of results between periods: (i) a charge of \$40.5 million pre-tax for an asset disposition; (ii) a charge of \$49.3 million pre-tax for acquisition-related adjustments consisting of purchased research and development; (iii) a charge of \$1.3 million pre-tax for reorganization costs; (iv) a gain of \$0.7 million pre-tax associated with the sale of an asset; and (v) a net decrease of \$27.3 million in the income tax provision, including a decrease of \$28.3 million as a result of the completion of the IRS examination for the tax years of 2003 and 2004, offset by an increase of \$1.0 million due to a tax-related interest adjustment. The net effect of these items decreased net income attributable to common shareholders by \$38.9 million, or \$0.38 diluted earnings per share available to common shareholders.

This report contains forward-looking statements, the accuracy of which is necessarily subject to risks and uncertainties. Please refer to our detailed statement regarding forward-looking information in the accompanying Form 10-K.

INNOVATIONS FOR CLINICIANS AND THEIR PATIENTS

C. R. Bard, Inc., is a leading multinational developer, manufacturer and marketer of innovative, life-enhancing medical technologies in the fields of vascular, urology, oncology and surgical specialty products. We market our products and services worldwide to hospitals, individual healthcare professionals, extended-care facilities and alternate-site facilities. We pioneered the development of single-patient-use medical products for hospital procedures, and we are committed to pursuing technological innovations that offer superior clinical benefits while helping to reduce overall healthcare costs.

TO OUR SHAREHOLDERS:

In 2010, we continued to achieve solid results in a challenging environment, generating 7% net sales growth in constant currency, up from 6% in 2009. Bard continued to drive revenue growth through innovation, providing clinicians with differentiated products to better meet the needs of their patients.

Timothy M. Ring
Chairman and
Chief Executive Officer

John H. Weiland
President and
Chief Operating Officer

We reached record levels of organic research and development (R&D) in 2010. In all, we invested over \$180 million in R&D and participated in a record 37 clinical trials while navigating a regulatory approval process that has become increasingly difficult. We focused on operational excellence, developing an even more innovative and diverse portfolio, launching 37 new products and expanding in emerging markets like China and Brazil.

We also achieved record performance in business development, gross margin and sales-force deployment, all key components of our growth strategy. We delivered strong year-over-year adjusted earnings per share growth of 10% while investing in and building for our future.

While our industry continues to feel the residual effects of a global economy that has been slow to pull itself out of a recession, we have taken a long-term view. Our results indicate that we remain on the right strategic path.

Following are some of the 2010 highlights from our four major product categories.

VASCULAR

Sales of the LIFEStENT® vascular stent have more than doubled in the past two years. We continue to enjoy the benefit of having the only stent indicated for use in the superficial femoral artery in the U.S. market. While we anticipate increased competition in this area in late 2011, we believe our strong clinical data, including one-year follow-up results that were published in June and two- and three-year follow-up results expected to be published this year, will help us maintain our leadership position. This position will be further enhanced with the planned launches of new LIFEStENT® vascular stent offerings in late 2011 and in 2012.

A year ago, Bard entered the specialty percutaneous transluminal angioplasty (PTA) market with the acquisition of the VASCUTrak™ catheter family. In early 2010, we entered the small-vessel market with our own ULTRAVERSE® PTA Balloon Dilatation Catheters. The small-vessel segment continues to be the fastest growth driver in PTA, and will be further strengthened by favorable reimbursement rates for below-the-knee procedures scheduled to begin in 2011.

Our 2010 acquisition of the CROSSER™ CTO Recanalization Catheter (see page 8), which uses high-frequency vibration to break through chronic total occlusions (CTOs), has further broadened our success and reach into treatments for vascular disease in the leg. The addition of this device to our portfolio is beginning to drive incremental LIFEStENT® vascular stent sales as physicians cross CTOs and then seek a stent solution to support the reopened artery.

Building on the success of our VACORA® vacuum-assisted biopsy platform, at the end of 2009 we launched the next-generation vacuum-assisted device for ultrasound-guided procedures. This product, the FINESSE® ULTRA Breast Biopsy System, is our first single-insertion, multiple-sample device (see page 10).

Early in the third quarter of 2010, we seized upon an opportunity to leverage our existing success in the breast biopsy market and expand into the stereotactic X-ray segment through the acquisition of SenoRx, Inc. SenoRx was a complementary match that more than doubled the size of our biopsy franchise. In addition to the ENCOR® vacuum-assisted breast biopsy system, the transaction brought the CONTURA® breast brachytherapy catheter, tissue markers and other related devices into our portfolio.

Our line of ULTRAClip® breast tissue markers has shown strong growth since we acquired the technology in 2007, and we recently augmented the line with the launch of our new VISIClip™ family of higher-visibility tissue markers.

UROLOGY

With the leading position in the U.S. Foley catheter market, Bard felt the impact of reduced hospital patient volumes in 2010. Nevertheless, our Bardex I.C. Infection Control Foley catheter line, with BACTI-GUARD®* silver coating and BARD® hydrogel, is clinically proven to reduce the occurrence of urinary tract infections in catheterized patients. We believe that as hospitals increase their focus on preventing hospital-acquired infections to reduce overall treatment costs, this line is well-positioned to return to strong growth.

Our STATLOCK® catheter stabilization line saw double-digit growth in 2010 despite similar headwinds.

WORLD-CLASS QUALITY

Bard's goal is to do more than just comply with FDA regulations. Instead, we aim to create a total quality system that stands as the benchmark for the medical device industry. Our Quality Task Force is one of the largest and most important collaborative efforts in Bard's history, encompassing hundreds of employees from a variety of functional areas working in teams headed by the leaders pictured above. (L-R): **Todd C. Schermerhorn**, Senior Vice President and Chief Financial Officer; **John H. Weiland**, President and Chief Operating Officer; **Gary D. Dolch, PhD**, Senior Vice President, Quality, Regulatory and Medical Affairs; **John A. DeFord, PhD**, Senior Vice President, Science, Technology and Clinical Affairs; **Timothy P. Collins**, Group Vice President; **Bronwen K. Kelly**, Vice President, Human Resources; **Jim C. Beasley**, Group Vice President.

Early in 2010, we launched the AJUST® single-incision sling system in the United States. On the strength of its innovative, two-way post-placement adjustability and positive clinical data from Europe—where it was introduced earlier—it has bolstered our position in the market for devices that treat stress urinary incontinence in women.

Our DIGNICARE® Stool Management System (SMS) maintained a strong growth profile in 2010. We received 510(k) concurrence from the U.S. Food and Drug Administration (FDA) in late December for our next-generation product in this space, the DIGNISHIELD™ SMS, which incorporates new material to reduce odor and an improved collection and containment system to reduce the likelihood of contamination.

ONCOLOGY

At the heart of Bard's product leadership strategy is our focus on providing products with positive clinical outcomes and reduced procedural costs. Prime examples include our peripherally inserted central catheter (PICC) and implanted port product lines.

In PICCs, growth has been driven primarily by upgrades to our SHERLOCK® Tip Location System (TLS) and maximum barrier PICC kits. Catheter tip-placement and tip-confirmation technology represents a significant opportunity in this franchise. In November, we acquired the SAPIENS™ electrocardiogram-based catheter tip-confirmation system (TCS), which is used as an alternative to chest X-ray and fluoroscopy for central venous catheter tip-placement confirmation in adult patients. Based on a several-hundred-patient clinical study conducted in Europe, the product received 510(k) concurrence in the United States for guidance and positioning of central venous catheters such as PICCs, implantable ports and hemodialysis catheters. We launched the SAPIENS™ TCS system in the first quarter of 2011, and late in the year we expect to launch our next-generation system called SHERLOCK 3CG™ TLS.

In our estimation, the penetration of ports into the eligible U.S. chemotherapy market is less than 60%. We believe the best way to capitalize on this potential is through clinical and customer education, and by advancing port technology to improve clinical outcomes and facilitate ease of use. The POWERPORT® VUE implanted port, launched in the third quarter of 2010, includes a silicone-encapsulated body that speeds up and simplifies the placement of sutures anywhere around the base of the port. Since identification of the power injection capability of these devices is critical, the POWERPORT® VUE implanted port introduces our new TRINITY™ CT marker to provide the highest-visibility marker currently available in the market.

Growth in our vascular-access ultrasound product line was led by our SITE-RITE VISION® ultrasound system, launched early in the second quarter of 2010. The SITE-RITE VISION® system gives clinicians more tools to optimize and manage ultrasound images, including a

color-flow Doppler display and a linear probe with controls that enable common image adjustments from within the sterile field.

We've seen healthy growth in our dialysis access business, reflecting the success of our recently launched EQUISTREAM® and POWER-TRIALYSIS® catheter lines.

SURGICAL SPECIALTIES

Bard offers a comprehensive portfolio of natural tissue products in the soft-tissue repair market. Our growth in this franchise reflects the success of the XENMATRIX® implant in the treatment of complex hernias, and the success of our ALLOMAX® product line, particularly in breast reconstruction (see page 6), a new market segment for Bard. Whether allograft or xenograft in origin, our implants leave healthy collagen intact as the scaffold to strengthen and promote the patient's natural healing. We anticipate further expansion of the market opportunity for natural tissue as this technology continues to develop and demonstrate improved clinical performance.

Bard has long been a leader in synthetic hernia products. In the third quarter of 2010, we launched the VENTRALIGHT™ ST mesh for laparoscopic ventral hernia repairs. With a 50% weight reduction, improved ease of use and the proven performance of the SEPRAMESH® IP resorbable barrier technology, this product has been well-received by customers. Our plans for 2011 include the launch of several new synthetic ventral repair meshes that incorporate the SEpra® resorbable barrier.

Sales of the innovative SORBAFIX™ resorbable anchor fixation device continue to grow at a healthy rate. We're on schedule to launch an enhanced delivery system for this and our PERMAFIX™ permanent anchor fixation device in the first half of 2011, which should continue to drive growth in fixation products.

MANAGEMENT AND THE BOARD OF DIRECTORS

Bard's experienced Board of Directors remained unchanged in 2010, providing the steadfast guidance and wise counsel to which we have become accustomed. We bid farewell to Vincent J. Gurnari Jr., who is retiring after leading Bard's global information technology

function since 1996. The Information Technology Solutions group is now headed by Patrick D. Roche, who joined Bard from PricewaterhouseCoopers LLP.

LOOKING AHEAD TO 2011

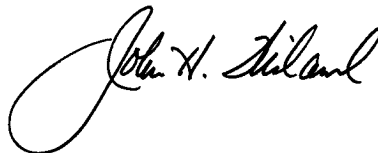

Product leadership remains a strategic priority for Bard. Today, 82% of our sales are generated by products that are number one or number two in the market. We strive to offer clinical solutions with the best value in terms of outcomes and cost. By increasing our investments in research and development, quality control, and sales-force size and effectiveness, we're turning market challenges into a competitive advantage.

To sustain this advantage, we count upon the commitment and dedication of almost 12,000 employees around the world. We know we speak for all of them when we thank you, our shareholders, for your ongoing support and confidence.

Sincerely,

Timothy M. Ring
Chairman and Chief Executive Officer

John H. Weiland
President and Chief Operating Officer

February 28, 2011

Estela Serrano earns a living as a customer service business analyst. In the evenings and on weekends, however, she works toward her true calling, taking classes that will eventually lead to a graduate degree in mental health counseling. “I want to help people who are hurting become mentally and emotionally well again,” she explains.

Her upbeat attitude served her well when she went through her own recent physical and emotional challenges. A year after she had a lumpectomy, a follow-up mammogram showed that a tumor had reappeared in her breast, the same size and in the same location as before. Though there was no family history of breast cancer, Estela recognized that there was a strong chance it could return yet again following a similar procedure.

After discussing her options with her surgeon, she elected to undergo a mastectomy, a difficult decision that was made easier when she learned that her breast could be reconstructed with biological tissue, eliminating the need to wear a prosthesis. Robert Grant, MD, Chief of Plastic Surgery at New York Presbyterian Hospital, performed the reconstructive surgery using the ALLOMAX[®] Surgical Graft, a sterile, regenerative human dermal matrix. The ALLOMAX[®] graft provided a natural framework for Estela’s own tissue to grow into and, in a relatively short time, remodel. A silicone implant completed the reconstruction.

“I wanted to take care of this and move on,” Estela says. And move on she did, beginning dance classes just a few weeks after the surgery. “The procedure has been nothing short of a blessing.”

A NATURAL CHOICE

“Among my last 20 patients who underwent tissue expander breast reconstruction with this technology, I have seen a shorter expansion time while achieving results that pleased them.”

Robert Grant, MD
New York, NY

PICKING UP WHERE HE LEFT OFF

“By channeling through a chronic total occlusion, we are able to spare patients like Roscoe from more invasive procedures such as a bypass or, in more extreme cases, an amputation.”

John Paul Runyon, MD
Cincinnati, OH

Since retiring, Roscoe Bowling has been free to occupy his time any way he sees fit, tinkering with the pickup he bought new in 1972 or heading up the road to Lexington, season tickets in hand, to see the Kentucky Wildcats basketball team in action. Pain and numbness in his right leg began to limit his mobility last year, making the walk to his garage uncomfortable and the hike from the parking lot to Rupp Arena almost unbearable.

Roscoe's doctor diagnosed a chronic total occlusion (CTO), or blockage, in his leg, but insisted treatment options were limited. "He told me I had two choices: get a bypass, or do nothing," Roscoe recalls. Thanks to an internet search, however, Roscoe learned there was another way—breaking through the blockage with the CROSSER™ CTO Recanalization Catheter. He sought a second opinion

from John Paul Runyon, MD, an interventional cardiologist with a subspecialty in peripheral vascular disease, at Christ Hospital in Cincinnati.

Instead of bypassing the blockage, the CROSSER™ catheter oscillates at a high frequency to bore through the occlusion. The clinician is then able to thread an angioplasty balloon to the site, flatten the plaque buildup against the arterial wall and place a vascular stent to restore and maintain blood flow.

Dr. Runyon scheduled Roscoe for the outpatient procedure in September, and Roscoe could feel the difference immediately afterward. "I was back on my feet that day, without pain," he says. A few weeks later, he was back at the arena for the season-opening tip-off. "I don't think that would have been the case had I settled for another option."

Kathy Sterling could use a few more hours in each day. In addition to the pet daycare and grooming business she runs with her husband, she owns a floor-covering and decorating store, and many clients hire her to manage their kitchen and bathroom renovations and other home improvement projects. Always on the move, her cell phone seldom stops ringing.

When she discovered a suspicious lump in her breast, it threatened to put the brakes on several ventures at once. "I thought, let's get this taken care of so I can get back to work," says Kathy.

She appreciated the thoroughness and efficiency of the biopsy process. Her radiologist, Margaret Bertrand, MD, used the FINESSE® ULTRA Breast Biopsy System, the only handheld, vacuum-assisted breast biopsy device with

single-insertion, multiple-sample (SIMS) technology. Like Kathy, it's a multi-tasker: with one insertion into the lesion, the probe can acquire several tissue samples in a short amount of time. In Kathy's case, the device was also used later to biopsy a questionable lymph node discovered during an MRI. "It was a very easy procedure," recalls Kathy. "The doctor and I carried on a conversation while it was going on."

Fortunately, the samples from her lymph node biopsy tested negative, and Kathy's tumor was caught at an early stage. She underwent a lumpectomy and radiation treatment, and never needed chemotherapy. For Kathy, the best part is that she didn't miss a beat—quite an accomplishment for someone who estimates that she works 80 hours per week.

MULTIPLE SAMPLES, MINIMAL TIME

“You can get five or six tissue samples with one insertion using the FINESSÉ[®] ULTRA Breast Biopsy System. By the time the patient realizes the biopsy has begun, it’s already over.”

Margaret Bertrand, MD
Greensboro, NC

Comparison of Five-Year Cumulative Total Returns

The graph below compares the cumulative total shareholder return on Bard common stock for the last five years with the cumulative total return on the S&P 500 Index and the S&P 500 Health Care Equipment Index over the same period. The graph assumes the investment of \$100 in each of Bard common stock, the S&P 500 Index and the S&P 500 Health Care Equipment Index on December 31, 2005, and that all dividends were reinvested.

SECURITIES AND EXCHANGE COMMISSION

Washington, D. C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2010

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number: 1-6926

C. R. BARD, INC.

(Exact name of registrant as specified in its charter)

New Jersey
(State or other jurisdiction of incorporation or organization)

730 Central Avenue
Murray Hill, New Jersey 07974
(Address of principal executive offices)

22-1454160
(I.R.S. Employer Identification No.)

Registrant's telephone number, including area code: (908) 277-8000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock - \$.25 par value	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting stock held by nonaffiliates of the registrant was approximately \$7,260,518,818 based on the closing price of stock traded on the New York Stock Exchange on June 30, 2010. As of January 31, 2011, there were 85,043,493 shares of Common Stock, \$.25 par value per share, outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the company's definitive Proxy Statement in connection with its 2011 annual meeting of shareholders are incorporated by reference into Part III of this Form 10-K.

C. R. BARD, INC. AND SUBSIDIARIES

------------------	------

PART I

Item 1. Business

General

C. R. Bard, Inc. and its subsidiaries (the “company” or “Bard”) are engaged in the design, manufacture, packaging, distribution and sale of medical, surgical, diagnostic and patient care devices. Charles Russell Bard founded the company in 1907. In 1923, the company was incorporated as C. R. Bard, Inc. and distributed an assortment of urological and surgical products. Bard became a publicly traded company in 1963 and began trading on the New York Stock Exchange five years later. Currently, the company sells a broad range of products to hospitals, individual healthcare professionals, extended care facilities and alternate site facilities on a global basis. In general, Bard’s products are intended to be used once and then discarded or implanted either temporarily or permanently. The company participates in the markets for vascular, urology, oncology and surgical specialty products. Bard’s product strategy is based on the following tenets, which are designed to position the company for continued growth:

- *Clinician Preference* - Bard targets markets where clinicians drive purchasing decisions based on the benefits a product provides to patients;
- *Product Leadership* - The company pursues opportunities in markets where products that consistently provide superior clinical outcomes and medical economic value can attain a leadership position;
- *Market Growth* - Bard focuses its investments in fast growing and/or under-served markets;
- *Competitive Advantage* - The company strives to achieve a sustainable competitive advantage through product quality and innovation, intellectual property protection and a core competency in managing complex clinical and regulatory requirements; and
- *Product Diversity* - Bard offers a broad, diverse product portfolio to balance the risks inherent in the highly competitive and complex medical device industry.

Bard’s execution of this strategy has helped the company establish market leadership positions across its four product group categories. In 2010, approximately 82% of the company’s net sales were derived from product lines in which the company holds a number one or number two market share position.

Product Group Information

The company reports its sales in four major product group categories: vascular, urology, oncology and surgical specialties. The company also has a product group of other products. The following table sets forth for the three years ended December 31, 2010, 2009 and 2008 the approximate percentage contribution by category to Bard’s consolidated net sales on a worldwide basis.

	For the Years Ended December 31,		
	2010	2009	2008
Vascular	28%	27%	26%
Urology	26%	28%	29%
Oncology	27%	27%	26%
Surgical Specialties	16%	15%	15%
Other	3%	3%	4%
Consolidated net sales	<u>100%</u>	<u>100%</u>	<u>100%</u>

Vascular Products

Bard's vascular products cover a wide range of minimally invasive devices for the treatment of peripheral vascular disease ("PVD") and heart arrhythmias. These products include: percutaneous transluminal angioplasty ("PTA") catheters, chronic total occlusions ("CTO") catheters, guidewires, introducers and accessories; peripheral vascular stents and stent grafts, vena cava filters and biopsy devices; electrophysiology products, including electrophysiology laboratory systems and diagnostic, therapeutic and temporary pacing electrode catheters; and fabrics, meshes and implantable vascular grafts. Bard's low-profile catheter and high-pressure balloon technology has made Conquest™, Atlas® and Dorado® PTA catheters leading choices of clinicians for the treatment of arterial venous access stenosis and other PVDs. The company's new Ultraverse® and VascuTrak™ PTA catheters and Crosser™ CTO catheter give Bard one of the broadest offerings in the rapidly growing small-vessel segment of the PVD market. Bard's line of peripheral vascular stent and stent-graft devices includes the Flair™ AV (arterial venous) Access Stent Graft, E•Luminexx™ Iliac Stent, and the LifeStent® family of stents approved for use in the superficial femoral artery and proximal popliteal artery. Bard's vena cava filters product line includes devices for permanent implant or removal after the threat of blood clots traveling from the lower extremities to a patient's lungs has passed. Bard's Vacora® and Finesse™ devices combine the benefits of a vacuum-assisted biopsy sample with a portable, self-contained needle system for the diagnosis of breast tumors. In July 2010, the company acquired SenoRx, Inc. whose product portfolio includes products such as the EnCor® stereotactic-guided and MRI-guided breast biopsy systems, the Gel Mark® line of breast tissue markers and the Contura® brachytherapy catheter used in the treatment of breast cancer. The acquisition allows Bard to offer products across all percutaneous breast biopsy and marker segments, in addition to providing a therapeutic device for site-specific partial breast irradiation following lumpectomy procedures. In Europe, the company sells its HD (high-density) Mesh Ablation Catheter for the diagnosis and treatment of atrial fibrillation, the most commonly diagnosed sustained cardiac arrhythmia.

Urology Products

Bard's urology products include basic drainage products, continence products and urological specialty products. The Foley catheter, which Bard introduced in 1934, remains one of the most important products in the urology field. The company has a market-leading position in Foley catheters, including the infection control Foley catheter (Bardex® I.C. Foley catheter), which has been proven to substantially reduce the rate of urinary tract infections. Other urology products include: surgical slings used to treat stress urinary incontinence; fecal incontinence products; natural and synthetic devices for the treatment of pelvic floor and vaginal prolapse; brachytherapy services, devices and radioactive seeds used to treat prostate cancer; intermittent urinary drainage catheters, urine monitoring and collection systems; ureteral stents; and specialty devices for ureteroscopic procedures and stone removal. The company also markets the proprietary line of StatLock® catheter stabilization devices, which are used primarily to secure peripheral intravenous catheters, thereby reducing restarts and other complications. These devices are also used to secure many other types of catheters sold by Bard and other companies, including Foley catheters.

Oncology Products

Bard's oncology products cover a wide range of devices used in the treatment and management of various cancers and other diseases and disorders. These include specialty vascular access catheters and ports, vascular access ultrasound devices, dialysis access catheters and enteral feeding devices. The company's specialty vascular access products, used primarily for chemotherapy, serve a well-established market in which Bard holds a leading position. The features and benefits of the company's broad line of peripherally inserted central catheters ("PICCs") have allowed Bard to capitalize on this important segment of the specialty vascular access market. The company's PowerPICC® catheters and PowerPort® devices can also be used to inject contrast media at high flow rates. These devices eliminate the need to place an additional catheter in the significant number of PICC and port recipients who also require contrast enhanced CT (computed tomography) scans. Bard's Site-Rite® vascular access ultrasound device and Sherlock™ tip locator system help nurses place a PICC catheter at a patient's bedside, making PICCs a more convenient and cost-effective treatment option.

Surgical Specialty Products

Bard's surgical specialty products include implanted patches and fixation systems for hernia and other soft tissue repairs, irrigation devices for orthopedic, laparoscopic and gynecological procedures and products for topical hemostasis. The company's soft tissue repair products consist primarily of hernia repair implants, including both synthetic and natural-tissue configurations, and hernia implant fixation devices. Within the hernia implants line, products such as Bard's PerFix[®] plug and 3D Max[®] are used for inguinal (groin) hernia repair procedures. The company also markets products for the repair of ventral (abdominal) hernias including the Ventrio[™], Ventralex[®] and Composix[®] LP hernia patches. Bard's line of natural-tissue hernia products, including the Collamend FM[®] and Allomax[™] patches, are used to repair complex ventral hernias. In complex hernias, pre-existing infections or high risk of infection precludes the use of synthetic mesh for the repair. In 2009, the company acquired the rights to the XenMatrix[™] product, a non-crosslinked xenograft patch for complex hernia repair, giving Bard an enhanced offering of natural-tissue hernia repair patches. Also in 2009, the company acquired the rights to sell the Allomax[™] patch for breast reconstruction following mastectomy procedures. In 2009, the company launched its new SorbaFix[™] device, a next-generation bioresorbable-tack fixation device for use in laparoscopic and open surgical procedures. In the first quarter of 2010, the company launched its new PermaFix[™] product, a permanent anchor fixation device built on the SorbaFix[™] platform.

International

Through subsidiaries and a joint venture, Bard markets its products to customers in over 100 countries outside the United States. The products sold in the international markets include many of the products described above. However, the principal markets, products and methods of distribution in the company's international businesses vary with market size and stage of development. The company's principal international markets are currently in Europe and Japan and the company expects to continue investing to expand sales and marketing resources in order to capitalize on opportunities in other markets, such as certain emerging markets in Asia and Latin America. Generally, the company maintains a geographically-based sales organization that it believes gives it greater flexibility in international markets. Approximately 74% of international sales are of products manufactured by Bard in the United States, Puerto Rico or Mexico. For financial reporting purposes, revenues, income from operations before tax provision and long-lived assets in significant geographic areas are presented in Note 14 of the notes to consolidated financial statements included in this Form 10-K.

Bard's foreign operations are subject to certain financial and other risks, and international operations in general present complex tax and cash management issues. Relationships with customers and effective terms of sale frequently vary by country. Trade receivable balances outside the United States generally are outstanding for longer periods than in the United States. Inventory management is also an important business concern due to the potential for rapidly changing business conditions and currency exposure. Foreign currency exchange rate fluctuations can affect income and cash flows of international operations. The company attempts to hedge some of these currency exposures to help reduce the effects of foreign exchange fluctuations on the business. For more information, see Item 7A. "Quantitative and Qualitative Disclosures About Market Risk", Note 6 of the notes to consolidated financial statements and Item 1A. "Risk Factors" included in this Form 10-K.

Competition

The company competes in therapeutic and diagnostic medical device markets around the world. These global markets are characterized by rapid change resulting from technological advances and scientific discoveries. The company's market position depends on its reliable product quality, dependable service, value proposition and ability to develop products to meet evolving market needs. The company faces a mix of competitors ranging from large manufacturers with multiple business lines to smaller manufacturers that offer a limited selection of products, and to a lesser extent, reproducers of single-use medical devices. Many of Bard's products are patented or are the subject of patent applications. Patent protection also affects the company's market position.

In keeping with the increased emphasis on cost-effectiveness in healthcare delivery, the trend among hospitals and other customers of medical device manufacturers is to consolidate purchases to enhance purchasing power. The medical device industry has also experienced some consolidation, partly in order to offer a broader range of products to large purchasers. As a result, sales transactions are more complex and tend to involve more significant contracts than in the past. This enhanced purchasing power has placed pressure on product pricing. For more information, see Item 1A. "Risk Factors."

Marketing

The company's products are distributed domestically directly to hospitals and other healthcare institutions, as well as through numerous hospital/surgical supply and other medical specialty distributors with whom the company has distribution agreements. In international markets, products are distributed either directly or through distributors, with the practice varying by country. Full-time representatives of the company in domestic and international markets engage in sales promotion. Sales to distributors, which supply the company's products to many end-users, accounted for approximately 32%, 33% and 33% of the company's net sales for the years ended 2010, 2009 and 2008, respectively, and the five largest distributors combined accounted for approximately 66%, 65% and 65%, respectively, of distributors' sales for the corresponding years. One large distributor accounted for approximately 9% of the company's net sales in 2010 and approximately 10% in each of 2009 and 2008.

In order to service its customers, optimize logistics, lower facilities costs and reduce finished goods inventory levels, the company operates consolidated distribution facilities in both the United States and Europe. Orders are normally shipped within a matter of days after receipt. Backlog is not currently considered a significant issue for the company.

Most of the products sold by the company, whether manufactured by the company or by others, are sold under the BARD® trade name or trademark and/or other trademarks owned by the company. Products manufactured for the company by outside suppliers are generally produced according to the company's specifications.

Available Information

The company makes available, free of charge, on its website located at www.crbard.com, its annual reports to shareholders, annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, proxy statements and any amendments to these reports, as soon as reasonably practicable after such materials are electronically filed with, or furnished to, the U.S. Securities and Exchange Commission ("SEC").

The company has adopted, and has posted on its website, a Code of Ethics for Senior Financial Officers that applies to the company's chief executive officer, chief financial officer and controller. To the extent required, the company intends to disclose any amendments to, or waivers of, the Code of Ethics on its website. In addition, the company's audit committee charter, compensation committee charter, governance committee charter, corporate governance guidelines and business ethics policy are also posted on the company's website. From time-to-time Bard uses its website to distribute company information, including material information. Financial and other information, including material information regarding the company is routinely posted on and accessible at <http://investorrelations.crbard.com/>. In addition, shareholders or interested parties may enroll to automatically receive email alerts and other information about Bard by visiting the "Email Alert Service" section at <http://investorrelations.crbard.com/>. Shareholders, employees or other interested parties may communicate directly with the Board of Directors, the non-management members of the Board of Directors or the Audit Committee. The process for doing so is described on the company's website.

Regulation

The development, manufacture, sale and distribution of the company's products are subject to comprehensive government regulation both within and outside the United States. Government regulation,

including detailed inspection of and controls over research and laboratory procedures, clinical investigations, manufacturing, marketing, sampling, distribution, recordkeeping and storage and disposal practices, substantially increases the time, difficulty and costs incurred in obtaining and maintaining the approval to market newly developed and existing products. Government regulatory actions can result in the seizure or recall of products, suspension or revocation of the authority necessary for their production and sale, and other civil or criminal sanctions.

Medical device laws are in effect in many of the countries in which the company does business outside the United States. These range from comprehensive device approval requirements for some or all of the company's medical device products to requests for product data or certifications. Inspection of and controls over manufacturing as well as monitoring of device-related adverse events are also components of most of these regulatory systems. The number and scope of these requirements are increasing.

For more information, see Item 1A. "Risk Factors."

Third-Party Reimbursement and Healthcare Cost Containment

Reimbursement remains an important strategic consideration in the development and marketing of medical devices and procedures. Difficulty in obtaining coverage, coding and payment can be a significant barrier to the commercial success of a new product or procedure. The consequences can include slow adoption in the marketplace and inadequate payment levels that can linger for months or even years. For more information, see Item 1A. "Risk Factors."

Bard's products are purchased principally by hospitals or physicians, which typically bill various third-party payors, such as governmental programs (e.g., Medicare and Medicaid), private insurance plans and managed care plans, for the healthcare services provided to their patients. The ability of customers to obtain appropriate reimbursement for products and services from third-party payors is critical to the success of medical device companies because it can affect the products customers purchase and the prices they are willing to pay. Manufacturers such as Bard rely on insurance reimbursement to create favorable markets for their products, while providers depend on this reimbursement to incorporate new products into their medical practices. As the largest single insurer in the United States, Medicare has a profound influence on the healthcare market. The Center for Medicare and Medicaid Services ("CMS") formulates national and local coverage policy and sets payment rates for facilities and physician providers. Additionally, most private payors will follow the lead of CMS when developing their policies and payment rates. Technology assessment organizations, including the one run by the Blue Cross Blue Shield Association, are consulted by public and private payors to evaluate the relative merits of new technologies and their impact on net health outcomes in an effort to get as much value for the healthcare dollar as possible.

The processes necessary for a manufacturer to obtain appropriate levels of reimbursement are complex and usually vary from payor to payor. Third-party reimbursements to hospitals and ambulatory care facilities are typically made for procedures or episodes of care, which include the costs of devices, supplies and equipment, and provide an incentive for efficient care and careful use of more expensive technologies.

Third-party payors for hospital services in the United States and abroad are increasingly focused on strategies to control spending on healthcare and reward improvements in quality and patient outcomes. In addition, in an effort to better align incentives for providers, CMS and several large commercial payors have recently adopted policies that will cease to pay for certain preventable, hospital-acquired infections such as catheter-associated urinary tract infections. The company believes that the Bardex[®] IC products are well-positioned to help its customers prevent certain hospital acquired infections. However, the uncertainty and complexity of future legislation seeking to reform the health insurance market and the healthcare delivery system make it difficult to ultimately predict the impact on Bard's business.

Raw Materials

The company uses a wide variety of readily available oil-based resins, textiles, alloys and latex materials for the manufacture of its devices. These materials are primarily purchased from external suppliers. Certain of the raw materials are available only from single-source suppliers. Materials are purchased from selected suppliers for reasons of quality assurance, sole-source availability, cost effectiveness or constraints resulting from regulatory requirements. Bard works closely with its suppliers to assure continuity of supply while maintaining high quality and reliability. For more information, see Item 1A. "Risk Factors."

Environment

The company is subject to various environmental laws and regulations both within and outside the United States. The operations of the company, like those of other medical device companies, involve the use of substances regulated under environmental laws, primarily in manufacturing and sterilization processes. While the company continues to make capital and operational expenditures relating to compliance with existing environmental laws and regulations, management believes that such compliance will not have a material effect on the company's business, results of operations, financial condition and/or liquidity. For more information, see Item 3. "Legal Proceedings."

Employees

The company had approximately 11,700 employees as of December 31, 2010.

Seasonality

The company's business is not affected to any material extent by seasonal factors.

Research and Development

The company is engaged in both internal and external research and development in an effort to introduce new products, to enhance the effectiveness, ease of use, safety and reliability of its existing products, and to expand the applications for which the uses of its products are appropriate. The company is dedicated to developing and acquiring technologies that will furnish healthcare providers with a more complete line of products to treat medical conditions through less invasive procedures and in a cost-effective manner. The company's research and development expenditures, including purchased research and development, were \$185.4 million in 2010, \$179.6 million in 2009, and \$199.1 million in 2008. The company evaluates developing technologies primarily in areas where it may have technological or marketing expertise for possible investment or acquisition.

Intellectual Property

Patents and other proprietary rights are important to Bard's business. The company also relies upon trade secrets, manufacturing know-how, continuing technological innovations and licensing opportunities to maintain and improve its competitive position.

The company owns an extensive portfolio of patents and has numerous patent applications pending in the United States and in certain foreign countries that relate to aspects of the technology used in many of the company's products. The company's policy is to file patent applications in the United States and foreign countries where rights are available and where the company believes it is commercially advantageous to do so. However, the standards for international protection of intellectual property vary widely. The company does not consider its business to be materially dependent upon any individual patent. For more information, see Item 1A. "Risk Factors."

Item 1A. Risk Factors

An investor should carefully consider the risks described below, as well as other information contained in this Annual Report on Form 10-K and in our other filings with the Securities and Exchange Commission, in evaluating our business. Additional risks not presently known to us or that we currently deem immaterial may also adversely affect our business. The occurrence of any of these events or circumstances could individually or in the aggregate have a material adverse effect on our business, results of operations, financial condition, and/or liquidity.

Defects or failures associated with our products could lead to recalls or safety alerts, negative publicity regarding the company and litigation, including product liability claims, that could adversely affect our business and reputation and result in loss of customers. Loss reserves are difficult to estimate.

The design, manufacture and marketing of medical devices of the types we produce entail inherent risks. Our products are often used in clinically demanding circumstances with seriously ill patients, and many of the medical devices we manufacture and sell are implanted in the human body for long periods of time or indefinitely. There are a number of factors that could result in an unsafe condition, injury or death of a patient with respect to products that we manufacture or sell, including component failures, manufacturing flaws, unanticipated or improper uses of our products, design defects or inadequate disclosure of product-related risks or product-related information.

These problems could lead to a recall of, or safety alert relating to, one or more of our products and could ultimately result in the removal of these products from the body and claims against us for costs associated with the removal. Any recall, whether voluntary or required by the United States Food and Drug Administration (“FDA”) or similar governmental authorities in other countries, could result in significant costs and significant negative publicity. Negative publicity, whether accurate or inaccurate, could reduce market acceptance of our products, harm our reputation, decrease demand for our products, result in the loss of customers, lead to product withdrawals and/or harm our ability to market our products in the future. The foregoing problems could also result in product liability claims or lawsuits including those being brought by individuals or by groups seeking to represent a class or establish multi-district litigation proceedings. While we believe that many settlements and judgments, as well as legal defense costs, may be covered in whole or in part under our product liability insurance policies with a limited number of insurance companies, amounts recovered under these policies may be less than the stated coverage limits and may not be adequate to cover damages and/or costs. In addition, there is no guarantee that insurers will pay claims or that coverage will be otherwise available. See Item 3. “Legal Proceedings” below for a description of lawsuits filed or asserted against us, including the Hernia Product Claims, Women’s Health Product Claims and Filter Product Claims (each, as defined below). Moreover, in some circumstances adverse events arising from or associated with the design, manufacture or marketing of our products could result in the FDA suspending or delaying its review of our applications for new product approvals. Any of the foregoing problems could have a material adverse effect on our business, results of operations, financial condition and/or liquidity.

Reserves established for estimated losses, including with respect to legal proceedings, do not represent an exact calculation of our actual liability but instead represent our estimate of the ultimate loss at the time the reserve is established. Due to the inherent uncertainty underlying loss reserve estimates, actual losses may be materially higher or lower than the related reserve. Liabilities in excess of our reserves could have a material adverse effect on our business, results of operations, financial condition and/or liquidity.

We face intense competition from other companies, and our inability to continue to effectively develop, acquire and/or market new products and technologies could have a material adverse effect on our business, results of operations and/or financial condition.

The medical device business is intensely competitive and is characterized by rapid technological change. Our customers consider many factors when choosing among products, including product features and reliability, product quality, product technology, clinical outcomes, product availability, price and product services provided by the manufacturer. Product introductions, alternative therapies or enhancements by competitors that provide better features and/or lower pricing, may make our products or proposed products obsolete or less competitive.

As a result, we engage in product development and improvement programs to maintain and improve our competitive position. We may not, however, be successful in enhancing existing products or developing new products or technologies that will achieve regulatory approval or receive market acceptance. As part of our business strategy, we also pursue the acquisition of complementary businesses, technologies and products. We may not be able to identify appropriate acquisition candidates, consummate transactions or obtain agreements with favorable terms. Further, once a business is acquired, any inability to successfully integrate the business, failure to retain and develop its workforce or failure to establish and maintain appropriate controls could adversely affect our ability to realize the anticipated benefits of any acquisition. If we fail to develop new products, enhance existing products or identify, acquire and integrate complementary businesses, technologies and products, or otherwise compete effectively, our business, results of operations and/or financial condition could be adversely affected.

Domestic and foreign legislative or administrative reforms resulting in restrictive reimbursement practices of third-party payors and cost containment measures could decrease the demand for products purchased by our customers, the prices that our customers are willing to pay for those products and the number of procedures using our devices.

Our products are purchased principally by hospitals or physicians which typically bill various third-party payors, such as governmental programs (e.g., Medicare, Medicaid and comparable foreign programs), private insurance plans and managed care plans, for the healthcare services provided to their patients. The ability of our customers to obtain appropriate reimbursement for products and services from third-party payors is critical to the success of medical device companies because it affects which products customers purchase and the prices they are willing to pay. Reimbursement varies by country and can significantly impact the acceptance of new technology. Implementation of healthcare reforms in the United States and in significant overseas markets such as Germany, Japan, France and other countries may limit, reduce or eliminate reimbursement for our products and adversely affect both our pricing flexibility and the demand for our products. Even when we develop or acquire a promising new product, we may find limited demand for the product unless reimbursement approval is obtained from private and governmental third-party payors.

Major third-party payors for hospital services in the United States and abroad continue to work to contain healthcare costs through, among other things, the introduction of cost containment incentives and closer scrutiny of healthcare expenditures by both private health insurers and employers. For example, in an effort to decrease costs, certain hospitals and other customers reprocess our products intended for a single use or purchase reprocessed products from third-party reprocessors in lieu of purchasing new products from us.

Further legislative or administrative reforms to the reimbursement systems in the United States and abroad, or adverse decisions relating to our products by administrators of these systems in coverage or reimbursement, could significantly reduce reimbursement for procedures using our medical devices or result in the denial of coverage for those procedures. Examples of these reforms or adverse decisions include price regulation, competitive pricing, coverage and payment policies, comparative effectiveness of therapies, technology assessments and managed-care arrangements. Any of such reforms or adverse decisions resulting in restrictive reimbursement practices or denials of coverage could have an adverse impact on the acceptance of our products and the prices that our customers are willing to pay for them. These outcomes, along with cost containment measures, could have a material adverse effect on our business and/or results of operations.

An interruption in our ability to manufacture our products or an inability to obtain key components or raw materials may adversely affect our business and/or results of operations.

We manufacture our products at facilities located throughout the world, some of which are in areas that are prone to hurricanes and other natural disasters. In some cases, certain of our key products are manufactured at one facility. If an event occurred that resulted in damage to one or more of our facilities, we may be unable to manufacture the relevant products at previous levels or at all. In addition, we purchase many of the components and raw materials used in manufacturing our products from numerous suppliers in various countries. For reasons of quality assurance, sole source availability or cost effectiveness, certain components and raw materials are

available only from a sole supplier. Due to the stringent regulations and requirements of the FDA and other regulatory authorities regarding the manufacture of our products, we may not be able to quickly establish additional or replacement sources for certain components or materials or do so without excessive cost. As a result, a reduction or interruption in manufacturing, or an inability to secure alternative sources of raw materials or components, could have a material adverse effect on our business and/or results of operations.

We are subject to a comprehensive system of federal, state and international laws and regulations, and we could be the subject of an enforcement action or face lawsuits and monetary or equitable judgments.

We operate in many parts of the world, and our operations are affected by various state, federal and international healthcare, environmental, antitrust, anti-corruption and employment laws, including for example various FDA and international regulations, the federal Anti-Kickback Statute and the Foreign Corrupt Practices Act (“FCPA”). We are subject to periodic inspections to determine compliance with the FDA’s Quality System Regulation requirements, current medical device adverse event reporting regulations, and foreign rules and regulations. The failure to comply with these laws and regulatory standards or the discovery of previously unknown problems with a product or manufacturer: (i) could result in FDA Form-483 notices and/or Warning Letters, fines, delays or suspensions of regulatory clearances, detainment, seizures or recalls of products (with the attendant expenses), the banning of a particular device, an order to replace or refund the cost of any device previously manufactured or distributed, operating restrictions and/or civil or criminal prosecution, and/or penalties, as well as decreased sales as a result of negative publicity and product liability claims; and (ii) could have a material adverse effect on our business, results of operations, financial condition and/or liquidity.

It can be costly and time-consuming to obtain regulatory approvals to market a medical device. Approvals might not be granted for new devices on a timely basis, if at all. Product approvals by the FDA and other foreign regulators can be withdrawn due to failure to comply with regulatory standards or the occurrence of unforeseen problems following initial approval. Regulations are also subject to change as a result of legislative, administrative or judicial action, which may further increase our costs or reduce sales. As an example, the FDA has proposed changes to the 510(k) process, which is the clearance process for medical devices that are substantially equivalent to other legally-marketed devices. If changes to the 510(k) process are adopted, the time and cost to get many of our medical devices to market could increase; however, at this time, the impact that any changes could have is uncertain. Our failure to maintain approvals or obtain approval for new products could adversely affect our business, results of operations, financial condition and/or liquidity.

The healthcare industry is under scrutiny from state governments and the federal government with respect to industry practices in the area of sales and marketing. If our marketing or sales activities fail to comply with the FDA’s regulations or guidelines, or other applicable laws, we may be subject to warnings from the FDA or enforcement actions from the FDA or other enforcement bodies. In the recent past, medical device manufacturers have been the subject of investigations from state and federal prosecutors related to their relationships with doctors and off-label promotion of products, among other activities or practices. See Item 3. “Legal Proceedings” below for a description of a matter relating to the company’s brachytherapy business. If an enforcement action involving the company were to occur, it could result in penalties, fines, the exclusion of our products from reimbursement under federally-funded programs and/or prohibitions on our ability to sell our products, and could have a material adverse effect on our business, results of operations, financial condition and/or liquidity.

In addition, lawsuits by employees, customers, licensors, licensees, suppliers, business partners, distributors, shareholders or competitors with respect to how we conduct our business could be very costly and could substantially disrupt our business. Disputes from time-to-time with companies or individuals are not uncommon, and we cannot assure you that we will be able to resolve these disputes on terms favorable to us. See Item 3. “Legal Proceedings” below for a description of lawsuits against the company, including the lawsuit entitled *St. Francis Medical Center, et al. v. C. R. Bard, Inc., et al.* The occurrence of an adverse monetary or equitable judgment or a large expenditure in connection with a settlement of any of these matters could have a material adverse effect on our business, results of operations, financial condition and/or liquidity.

We are substantially dependent on patent and proprietary rights and incur significant costs defending and protecting these rights. We also may face restrictions or additional costs in connection with the sale of our products.

We operate in an industry characterized by extensive patent litigation. Patent litigation is generally expensive, complex and can result in significant damage awards (treble damages under certain circumstances), injunctions that could prevent the manufacture and sale of affected products, settlement payments or royalty payments to enable us to continue selling the products. At any given time, we are generally involved as either a plaintiff or a defendant in a number of patent infringement actions, the outcomes of which may not be known for prolonged periods of time. While it is not possible to predict the outcome of patent litigation incident to our business, we believe that an adverse outcome associated with any pending litigation could generally have a material adverse effect on our business and/or results of operations.

We rely on a combination of patents, trade secrets and nondisclosure agreements to protect our proprietary intellectual property and will continue to do so. Although these patents, trade secrets and nondisclosure agreements may not successfully protect our intellectual property, we intend to defend against threats to our intellectual property. Our pending patent applications may not result in patents issuing to us, and patents issued to or licensed by us in the past or in the future may be challenged, invalidated or circumvented and these patents may not be sufficiently broad to provide us with a competitive advantage. In addition, we operate in foreign markets where protection or enforcement of intellectual property rights may be weaker than in the United States, and inadequate patent protection in those markets may adversely affect our competitive position. Third parties could also obtain patents that may require us to negotiate licenses to conduct our business, and we cannot assure you that the required licenses would be available on reasonable terms or at all. Any inability to protect our intellectual property or obtain necessary licenses could have a material adverse effect on our business and/or results of operations. For more information, see Item 3. "Legal Proceedings."

Our international sales and operations are subject to risks and uncertainties that vary by country and which could have a material adverse effect on our business and/or results of operations.

Sales outside the U.S. accounted for approximately 31% of our net sales in 2010. We anticipate that sales from international operations will continue to represent a significant portion of our total sales. In addition, many of our manufacturing facilities and suppliers are located outside of the United States. As a result, our sales and profitability from our international operations and our ability to implement our overall business strategy are subject to risks and uncertainties that can vary by country, including those related to political and economic conditions, foreign currency exchange rate fluctuations, changes in tax laws, regulatory and reimbursement programs and policies, and the protection of intellectual property rights.

The adoption of healthcare reform in the United States may adversely affect our business, results of operations and/or financial condition.

In March 2010, significant reforms to the U.S. healthcare system were adopted in the form of the Patient Protection and Affordable Care Act (the "PPACA"). The PPACA includes provisions that, among other things, reduce and/or limit Medicare reimbursement, require all individuals to have health insurance (with limited exceptions) and impose new and/or increased taxes. Specifically, the law requires the medical device industry to subsidize healthcare reform in the form of a 2.3% excise tax on U.S. sales of most medical devices beginning in 2013. While we are still evaluating the impact of this tax on our overall business, in 2010 this would have equated to an excise tax of approximately \$43 million. Various healthcare reform proposals have also emerged at the state level. The PPACA and these proposals could reduce medical procedure volumes and impact the demand for our products or the prices at which the company sells its products. In addition, the excise tax will increase our cost of doing business. The impact of the PPACA and these proposals could have a material adverse effect on our business and/or results of operations.

Current economic instability could adversely affect the company.

Financial markets and the economies in the United States and internationally may continue to experience disruption and volatility as they have in recent years and conditions could worsen. As a result, the economic environment may, among other things:

- create downward pressure on the pricing of our products;

- affect the collection of accounts receivable;
- increase the sales cycle for certain of our products;
- slow the adoption of new technology;
- adversely affect our customers, causing them to reduce spending; and
- adversely affect our suppliers, which could disrupt our ability to produce our products.

Any of these conditions could have a material adverse effect on our business, results of operations, financial condition and/or liquidity.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The executive offices of the company are located in Murray Hill, New Jersey. Domestic manufacturing and development units are located in Arizona, California, Georgia, Illinois, Massachusetts, Montana, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, South Carolina and Utah. Sales offices are in many of these locations as well as others. Outside the United States, the company has plants or offices in Austria, Australia, Belgium, Brazil, Canada, China, the Czech Republic, Denmark, Finland, France, Germany, Greece, India, Ireland, Italy, Jordan, Korea, Malaysia, Mexico, the Netherlands, Norway, Poland, Portugal, Russia, Singapore, South Africa, Spain, Sweden, Switzerland, Taiwan and the United Kingdom.

The company owns approximately 2.4 million square feet of space in 16 locations and leases approximately 1.3 million square feet of space in 56 locations. All of these facilities are well-maintained and suitable for the operations conducted in them.

Item 3. Legal Proceedings

General

In the ordinary course of business, the company is subject to various legal proceedings and claims, including, for example, product liability matters, environmental matters, employment disputes, disputes on agreements and other commercial disputes. In addition, the company operates in an industry susceptible to significant patent legal claims. At any given time, in the ordinary course of business, the company is involved as either a plaintiff or defendant in a number of patent infringement actions. If a third party's patent infringement claim were to be determined against the company, the company might be required to make significant royalty or other payments or might be subject to an injunction or other limitation on its ability to manufacture or distribute one or more products. If a patent owned by or licensed to the company were to be determined to be invalid or unenforceable, the company might be required to reduce the value of the patent on the company's balance sheet and to record a corresponding charge, which could be significant in amount. The company believes that any of these proceedings and claims could have a material adverse effect on its business, results of operations, financial condition and/or liquidity.

Product Liability Matters

As of February 17, 2011, approximately 1,840 federal and 1,625 state lawsuits involving individual claims by approximately 3,580 plaintiffs, as well as two putative class actions in the United States and four putative class actions in various Canadian provinces, have been filed or asserted against the company with respect to its Composix® Kugel® and certain other hernia repair implant products (collectively, the "Hernia Product Claims"). One of the U.S. class action lawsuits consolidates ten previously-filed U.S. class action lawsuits. The putative class actions, none of which has been certified, seek (i) medical monitoring, (ii) compensatory damages,

(iii) punitive damages, (iv) a judicial finding of defect and causation and/or (v) attorneys' fees. Approximately 1,600 of the state lawsuits, involving individual claims by a substantially equivalent number of plaintiffs, are pending in the Superior Court of the State of Rhode Island, with the remainder in various other jurisdictions. The Hernia Product Claims also generally seek damages for personal injury resulting from use of the products. The company voluntarily recalled certain sizes and lots of the Composix® Kugel® products beginning in December 2005.

On June 22, 2007, the Judicial Panel on Multidistrict Litigation transferred Composix® Kugel® lawsuits pending in federal courts nationwide into one Multidistrict Litigation ("MDL") for coordinated pre-trial proceedings in the United States District Court for the District of Rhode Island. The MDL court subsequently determined to include other hernia repair products of the company in the MDL proceeding. The first MDL trial was completed in April 2010 and resulted in a judgment for the company based on the jury's finding that the company was not liable for the plaintiff's damages. The second MDL trial was completed in August 2010 and resulted in a judgment for the plaintiffs of \$1.5 million. The company expects additional trials of Hernia Product Claims to take place over the next 12 months. While the company intends to vigorously defend the Hernia Product Claims, it expects to participate in court-mandated settlement conferences beginning in March 2011 with respect to certain lawsuits pending in the Superior Court of the State of Rhode Island and, where appropriate, may enter into settlement arrangements with respect to certain of these or other claims. The company cannot give any assurances that the resolution of the Hernia Product Claims will not have a material adverse effect on the company's business, results of operations, financial condition and/or liquidity. For more information, see Item 1A. "Risk Factors."

As of February 17, 2011, approximately 120 product liability lawsuits have been filed or asserted against the company in various federal and state jurisdictions alleging personal injuries associated with the use of the company's women's health products, principally its Avaulta® line of pelvic floor reconstruction products (collectively, the "Women's Health Product Claims"). The Women's Health Product Claims generally seek damages for personal injury resulting from use of the products. With respect to certain of these claims, the company believes that one of its suppliers has an obligation to defend and indemnify the company. On October 12, 2010, the Judicial Panel on Multidistrict Litigation transferred the Women's Health Product Claims involving Avaulta® products pending in federal courts nationwide into an MDL for coordinated pre-trial proceedings in the United States District Court for the Southern District of West Virginia. Approximately 60 of the Women's Health Product Claims involving Avaulta® products are pending in federal courts and have been or will be transferred to the MDL, with the remainder of the Women's Health Product Claims in various state or federal courts. While the company intends to vigorously defend the Women's Health Product Claims, it cannot give any assurances that the resolution of these claims will not have a material adverse effect on the company's business, results of operations, financial condition and/or liquidity.

As of February 17, 2011, product liability lawsuits involving individual claims by approximately 30 plaintiffs have been filed or asserted against the company in various federal and state jurisdictions alleging personal injuries associated with the use of the company's vena cava filter products. In addition, a putative class action lawsuit has been filed against the company in California state court on behalf of plaintiffs who are alleged to have no present injury (all lawsuits, collectively, the "Filter Product Claims"). The putative class action, which has not been certified, seeks: (i) medical monitoring; (ii) punitive damages; (iii) a judicial finding of defect and causation; and/or (iv) attorneys' fees. While the company intends to vigorously defend the Filter Product Claims, it cannot give any assurances that the resolution of these claims will not have a material adverse effect on the company's business, results of operations, financial condition and/or liquidity.

In most product liability litigations of this nature, including the Hernia Product Claims, the Women's Health Product Claims and the Filter Product Claims, plaintiffs allege a wide variety of claims, ranging from allegations of serious injury caused by the products to efforts to obtain compensation notwithstanding the absence of any injury. In the majority of these cases, the company has not yet received and reviewed complete information regarding the plaintiffs and their medical conditions, and consequently, is unable to fully evaluate the claims. The company expects that it will receive and review additional information regarding the Hernia Product Claims, the Women's Health Product Claims, the Filter Product Claims and related matters as these cases progress.

The company believes that many settlements and judgments, as well as legal defense costs, relating to product liability matters are or may be covered in whole or in part under its product liability insurance policies with a limited number of insurance carriers. In certain circumstances, insurance carriers reserve their rights with respect to coverage, or contest or deny coverage, as has occurred with respect to certain claims. When this occurs, the company intends to vigorously contest disputes with respect to its insurance coverage and to enforce its rights under the terms of its insurance policies, and accordingly, may record receivables with respect to amounts due under these policies. In connection with the Hernia Product Claims, the company is in dispute with two of its excess insurance carriers relating to an aggregate of \$50 million of insurance coverage. Regardless of the outcome of these disputes (including any arbitration proceedings), the company's insurance coverage with respect to the Hernia Product Claims may be fully depleted in the next 12 months. Amounts recovered under the company's product liability insurance policies may be less than the stated coverage limits and may not be adequate to cover damages and/or costs relating to claims. In addition, there is no guarantee that insurers will pay claims or that coverage will otherwise be available.

Other Legal Matters

On November 27, 2006, the company received a subpoena issued by the U.S. Department of Health and Human Services, Office of Inspector General, under the authority of the federal healthcare fraud and false claims statutes. The subpoena seeks documents related to the company's brachytherapy business. The company has responded to the subpoena and is cooperating with the government in this matter. Although the company recently began discussions with federal authorities with respect to a potential resolution of this matter, there can be no assurance that a resolution will be reached or what the terms of any such resolution may be. The company cannot give any assurances that this matter will not have a material adverse effect on the company's business, results of operations, financial condition and/or liquidity.

On February 21, 2007, Southeast Missouri Hospital ("Southeast") filed a putative class action complaint on behalf of itself and all others similarly situated against the company and another manufacturer, Tyco International, Inc., which was subsequently dismissed from the action. The complaint was later amended to add St. Francis Medical Center ("St. Francis") as an additional named plaintiff. The action was re-named as *St. Francis Medical Center, et al. v. C. R. Bard, Inc., et al.* (Civil Action No. 1:07-cv-00031, United States District Court, Eastern District of Missouri, Southeastern District) when the court denied Southeast's motion to serve as a class representative and dismissed Southeast from the lawsuit. In September 2008, the court granted St. Francis's motion for class certification and determined the measurement period for any potential damages. St. Francis alleges that the company conspired to exclude competitors from the urological catheter market and that the company sought to maintain market share by engaging in conduct in violation of state and federal antitrust laws. St. Francis seeks injunctive relief and presented an expert report that calculates damages of up to approximately \$320 million, a figure that the company believes is unsupported by the facts. The company's expert report establishes that, even assuming a determination adverse to the company, the plaintiffs suffered no damages. In September 2009, the District Court granted the company's summary judgment motion and dismissed with prejudice all counts in this action. St. Francis appealed the Court's decision to the Eighth Circuit Court of Appeals. In August 2010, the Eighth Circuit Court of Appeals affirmed the decision of the District Court. In October 2010, the Eighth Circuit Court of Appeals granted St. Francis's request for a re-hearing of its appeal. The re-hearing is pending. The company intends to defend this matter vigorously. If, however, St. Francis is ultimately successful, any damages awarded under the federal antitrust laws will be subject to statutory trebling and St. Francis's attorneys would be entitled to an award of reasonable fees and costs. At this time, it is not possible to assess the likelihood of an adverse outcome or determine an estimate, or a range of estimates, of potential damages. The company cannot give any assurances that this matter will not have a material adverse effect on the company's business, results of operations, financial condition and/or liquidity.

In December 2007, a U.S. District Court jury in Arizona found that certain of W.L. Gore & Associates Inc.'s ("Gore") ePTFE vascular grafts and stent-grafts infringe the company's patent number 6,436,135. The jury upheld the validity of the patent and awarded the company \$185 million in past damages. The jury also found

that Gore willfully infringed the patent. In a second phase of the trial, the Court ruled that Gore failed to prove that the patent is unenforceable due to inequitable conduct. In March 2009, the U.S. District Court doubled the jury award to approximately \$371 million for damages through June 2007. The Court also awarded the company attorneys' fees of \$19 million and prejudgment interest of approximately \$20 million. In addition, the Court denied Gore's remaining motions, including its motions for a new trial and to set aside the jury's verdict. In July 2010, the U.S. District Court awarded the company approximately \$109 million in additional damages for the period from July 2007 through March 2009. The Court also assessed a royalty rate of between 12.5% and 20%, depending on the product, that will be used to calculate damages for Gore's infringing sales from April 2009 through the expiration of the patent. Gore has deposited with the Court an additional approximately \$200 million, representing Gore's calculation of royalties for its infringing sales through December 2010. Gore has appealed this matter to the Court of Appeals for the Federal Circuit.

The company is subject to numerous federal, state, local and foreign environmental protection laws governing, among other things, the generation, storage, use and transportation of hazardous materials and emissions or discharges into the ground, air or water. The company is or may become a party to proceedings brought under various federal laws including the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), commonly known as Superfund, the Resource Conservation and Recovery Act, the Clean Water Act, the Clean Air Act and similar state laws. These proceedings seek to require the owners or operators of contaminated sites, transporters of hazardous materials to the sites and generators of hazardous materials disposed of at the sites to clean up the sites or to reimburse the government for cleanup costs. In most cases, there are other potentially responsible parties that may be liable for any remediation costs. In these cases, the government alleges that the defendants are jointly and severally liable for the cleanup costs; however, these proceedings are frequently resolved so that the allocation of cleanup costs among the parties more closely reflects the relative contributions of the parties to the site contamination. The company's potential liability varies greatly from site to site. For some sites, the potential liability is de minimis and for others the costs of cleanup have not yet been determined. The company believes that the proceedings and claims described above will likely be resolved over an extended period of time. While it is not feasible to predict the outcome of these proceedings, based upon the company's experience, current information and applicable law, the company does not expect these proceedings to have a material adverse effect on its financial condition and/or liquidity. However, one or more of the proceedings could be material to the company's business and/or results of operations.

Item 4. [Removed and Reserved]

Not applicable.

Executive Officers of the Registrant

Set forth below is the name, age, position, five-year business history and other information with respect to each executive officer of the company as of February 24, 2011. No family relationships exist among the officers or Board of Directors of the company. The Board of Directors elects all officers of the company annually.

<u>Name</u>	<u>Age</u>	<u>Position</u>
Timothy M. Ring	53	Chairman and Chief Executive Officer and Director
John H. Weiland	55	President and Chief Operating Officer and Director
Todd C. Schermerhorn	50	Senior Vice President and Chief Financial Officer
Sharon M. Alterio	48	Group Vice President
Jim C. Beasley	47	Group Vice President
Timothy P. Collins	50	Group Vice President
Brian P. Kelly	52	Group Vice President
John A. DeFord	49	Senior Vice President-Science, Technology and Clinical Affairs
Gary D. Dolch	63	Senior Vice President-Quality, Regulatory and Medical Affairs
Bronwen K. Kelly	58	Vice President-Human Resources
Stephen J. Long	45	Vice President, General Counsel and Secretary
Frank Lupisella Jr.	50	Vice President and Controller

Timothy M. Ring joined Bard in 1992 as Vice President, Human Resources after 10 years with Abbott Laboratories, Inc. In 1993, Mr. Ring was promoted to Group Vice President, International Operations. He later assumed responsibility for Bard's Interventional Cardiology and Electrophysiology Divisions, as well as Bard's Cardiac Assist and Cardiopulmonary Divisions. In 1997, Mr. Ring was promoted to Group President for Coronary Vascular Products. In 1999, he was named Group President with oversight for Bard's Corporate Healthcare Services, Peripheral Vascular, Access Systems and Electrophysiology Divisions, as well as Bard's businesses in Europe, the Middle East and Africa. Mr. Ring was elected Chairman and Chief Executive Officer in 2003.

John H. Weiland joined Bard in 1996 as Group Vice President. He was promoted to Group President in 1997. From 1997 until 2003, Mr. Weiland had numerous responsibilities including for Bard's Davol, Urological, Medical and Endoscopic Technologies Divisions, as well as responsibility for Bard's businesses in Japan, Latin and Central America, Canada and Asia Pacific, and for Bard's worldwide manufacturing operations. Mr. Weiland previously served as Senior Vice President of North American Operations for Dentsply International, President and Chief Executive Officer of Pharmacia Diagnostics, Inc. and was with American Hospital Supply and Baxter Healthcare. He served one year as a White House Fellow in the role of Special Assistant to the Director of the Office of Management and Budget as well as Special Assistant to the Secretary of Interior. Mr. Weiland was elected to the position of President and Chief Operating Officer in 2003 and to the Board of Directors in 2005.

Todd C. Schermerhorn joined Bard in 1985 as a cost analyst and has held various financial positions including Controller of the Vascular Systems Division and Vice President and Controller of the USCI division. In 1996, Mr. Schermerhorn was promoted to Vice President and Group Controller for Bard's Global Cardiology Unit. He was promoted to Vice President and Treasurer in 1998. Mr. Schermerhorn was elected to the position of Senior Vice President and Chief Financial Officer in 2003.

Sharon M. Alterio joined Bard in 2004 as President of Bard Medical Division. In January 2009, Ms. Alterio was promoted to Group Vice President with responsibility for Bard's international businesses. Prior to joining Bard, Ms. Alterio held positions at Baxter Healthcare including Vice President, Global Therapeutic Marketing for its Renal Division.

Jim C. Beasley joined Bard in 1989 as a territory sales manager for Bard Interventional Products. He has held a succession of management positions including President of Bard Access Systems division from 2003 to 2007 and President of Bard Peripheral Vascular division since 2007. In May 2009, Mr. Beasley was promoted to Group Vice President and assumed responsibility for both divisions.

Timothy P. Collins joined Bard in 1986 as a facilities planner with the USCI Division. Over the next 12 years, he held positions of increasing responsibility including Director of Operations for Diagnostic Cardiology. Concurrent with the sale of Bard's cardiology business, Mr. Collins joined Medtronic Vascular in 1998 as Vice President/Business Unit Manager in Medtronic/AVE and was later appointed Vice President, Global Operations, Vascular. In 2003, Mr. Collins returned to Bard as President of the Bard Electrophysiology Division. In March 2008, Mr. Collins was promoted to Group Vice President responsible for worldwide manufacturing operations. In November 2008, Mr. Collins also assumed responsibility for the Electrophysiology Division.

Brian P. Kelly joined Bard in 1983 as a territory sales manager for the Davol division. He has held a succession of management positions including Vice President of Sales for Bard Access Systems and in 1997 became President of the Davol division. Mr. Kelly was promoted to Group Vice President in 2003 with responsibility for Bard's Davol, Urological and Electrophysiology divisions. In November 2008, Mr. Kelly changed positions and assumed responsibility for Corporate Healthcare Services.

John A. DeFord, Ph.D., joined Bard in 2004 as Vice President, Science & Technology after serving as Managing Director with Early Stage Partners, LLP (ESP), a venture capital fund, from 2002 until 2004. Before

joining ESP he was President and CEO of Cook Incorporated, a privately-held medical device company. He was promoted to Senior Vice President-Science, Technology & Clinical Affairs in 2007.

Gary D. Dolch joined Bard in 2008 as Senior Vice President-Quality, Regulatory and Medical Affairs. Prior to joining Bard, he was with Cardinal Health as Executive Vice President, Quality, Regulatory, and Operational Excellence since 2003. Previously, Mr. Dolch held executive positions with Knoll Pharmaceutical Co. division of BASF and the American Red Cross.

Bronwen K. Kelly joined Bard in 2002 as Vice President-Human Resources. Prior to joining Bard, she was with American Home Products as Vice President, Human Resources for the Global Agricultural Products Group. Previously, Ms. Kelly held positions with American Cyanamid Company, including Director, Human Resources for the Cyanamid International, Agricultural Products and Shulton USA divisions.

Stephen J. Long joined Bard in 2000 as Associate General Counsel. In February 2007, he was promoted to Vice President, General Counsel and Secretary. Prior to joining Bard, he was most recently Assistant General Counsel with Warner-Lambert Company from 1998 until it was acquired by Pfizer Inc. in 2000. From 1994 until 1998, Mr. Long was an associate with Willkie Farr & Gallagher in New York.

Frank Lupisella Jr. joined Bard in 1987 and has served in various capacities in the finance organization of the company. Mr. Lupisella served as Vice President and Controller of the Davol division from 1999 until 2005 when he was promoted to Assistant Corporate Controller, Manufacturing Operations. In 2006, he was elected to his present position of Vice President and Controller of the company.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market and Market Prices of Common Stock

The company's common stock is traded on the New York Stock Exchange under the symbol BCR. The following table illustrates the high and low composite sale prices as reported on the New York Stock Exchange for each quarter during the last two years.

<u>2010</u>	<u>1st Qtr</u>	<u>2nd Qtr</u>	<u>3rd Qtr</u>	<u>4th Qtr</u>
High	\$87.10	\$90.00	\$82.20	\$95.72
Low	\$77.85	\$77.31	\$75.16	\$80.82
<u>2009</u>	<u>1st Qtr</u>	<u>2nd Qtr</u>	<u>3rd Qtr</u>	<u>4th Qtr</u>
High	\$88.43	\$80.94	\$82.98	\$85.49
Low	\$70.00	\$68.94	\$70.10	\$73.99

<u>Title of Class</u>	<u>Number of record holders of the company's common stock as of January 31, 2011</u>
Common Stock - \$.25 par value	4,048

Dividends

The company paid cash dividends of \$66.9 million, or \$0.70 per share, in 2010 and \$65.4 million, or \$0.66 per share, in 2009. The following table illustrates the dividends paid per share in each of the indicated quarters.

	<u>1st Qtr</u>	<u>2nd Qtr</u>	<u>3rd Qtr</u>	<u>4th Qtr</u>	<u>Year</u>
2010	\$0.17	\$0.17	\$0.18	\$0.18	\$0.70
2009	\$0.16	\$0.16	\$0.17	\$0.17	\$0.66

The first quarter 2011 dividend of \$0.18 per share was declared on December 8, 2010 and was paid on February 4, 2011 to shareholders of record on January 24, 2011.

Issuer Purchases of Equity Securities

<u>Issuer Purchases of Equity Securities</u>				
	<u>Total Number of Shares Purchased⁽¹⁾⁽²⁾⁽³⁾</u>	<u>Average Price Paid Per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Programs⁽²⁾⁽³⁾</u>	<u>Maximum Approximate Dollar Value of Shares that May Yet Be Purchased Under Plans or Programs⁽²⁾⁽³⁾</u>
October 1 - October 31, 2010	215,486	\$82.92	212,300	\$487,184,378
November 1 - November 30, 2010	120	85.41	—	487,184,378
December 1 - December 31, 2010	8,101,809	92.59	8,100,000	487,184,378
Total	<u>8,317,415</u>	<u>\$92.34</u>	<u>8,312,300</u>	<u>\$487,184,378</u>

- (1) The company repurchased 5,115 shares during the three month period ended December 31, 2010 that were not part of the publicly announced share repurchase authorization. These shares were purchased from employees to satisfy tax withholding requirements on the vesting of restricted shares from equity-based awards.
- (2) On June 9, 2010, the Board of Directors approved the repurchase of up to \$500 million of the common stock of the company.
- (3) On December 15, 2010, the company entered into an agreement with a bank to effect an accelerated repurchase of \$750 million of shares of the common stock of the company. The shares are being repurchased pursuant to an additional share repurchase authorization approved by the Board of Directors on December 8, 2010. The company received 8.1 million shares upon initial settlement under an accelerated share repurchase transaction. The total number of shares ultimately repurchased upon final settlement is subject to an adjustment based on the volume-weighted average share price of the company's common stock during a predetermined period of less than one year, less a discount.

Item 6. Selected Financial Data

Set forth below is selected financial data as of the end of and for each of the years ended December 31.

	<u>2010</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>

^(A) Amounts for 2010 include the impact of the debt offering and accelerated share repurchase. See Note 9 of the notes to the consolidated financial statements.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Executive Overview

The company designs, manufactures, packages, distributes and sells medical, surgical, diagnostic and patient care devices. The company sells a broad range of products to hospitals, individual healthcare professionals, extended care health facilities and alternate site facilities on a global basis. Outside the United States, Europe and Japan are the company's largest markets, while certain emerging markets in Asia and Latin America are the company's fastest growing markets. In general, the company's products are intended to be used once and then discarded or implanted either temporarily or permanently. The company reports sales in four major product group categories: vascular, urology, oncology and surgical specialties. The company also has a product group of other products.

The company's earnings are driven by its ability to continue to generate sales of its products and improve operating efficiency. Bard's ability to increase sales over time depends upon its success in developing, acquiring and marketing differentiated products that meet the needs of clinicians and their patients. In 2010, the company's research and development ("R&D") expense, excluding purchased R&D, as a percentage of net sales was 6.7%. The company expects R&D expense as a percentage of net sales to continue to increase up to a range of 9% to 10% over the course of the next several years. The company also makes selective acquisitions of businesses, products and technologies, generally focusing on small-to-medium sized transactions to provide ongoing growth opportunities. In addition, the company may from time-to-time consider acquisitions of larger, established companies. The company may also periodically divest lines of business in which it is not able to reasonably attain or maintain a leadership position in the market or for other strategic reasons. The company spent \$303.9 million in 2010, including purchased R&D, for the acquisition of businesses, products and technologies.

Acquisitions and Other Initiatives

On July 6, 2010, the company acquired all of the outstanding stock of SenoRx, Inc. ("SenoRx") for a purchase price of \$11.00 per share in cash, totaling \$213.5 million. SenoRx was a public company engaged in the manufacture and sale of minimally-invasive medical devices used in the percutaneous diagnosis and treatment of breast cancer. SenoRx's products expand Bard's existing biopsy product portfolio to include the EnCor[®] stereotactic-guided and MRI-guided breast biopsy systems, the Gel Mark[®] line of breast tissue markers and the Contura[®] brachytherapy catheter used in the treatment of breast cancer. Substantially all of the purchase price for the acquisition was funded through the issuance of commercial paper.

On May 20, 2010, the company, through its wholly-owned subsidiary, Bard Holdings Limited, acquired the remaining 15% of the common shares that it did not already own of its Malaysian manufacturing operation, Bard Sendirian Berhad, for \$25.9 million.

On April 12, 2010, the company acquired all of the outstanding stock of FlowCardia, Inc. ("FlowCardia"), a privately-held company engaged in the design and manufacture of endovascular products used in the treatment of chronic total occlusions ("CTOs"), for total consideration of \$80.1 million. FlowCardia's products complement Bard's percutaneous transluminal angioplasty products and peripheral stents. FlowCardia's Crosser[®] product line of clinically-proven catheters deliver vibrational energy, enabling physicians to cross CTOs and allow for subsequent therapies, such as balloon angioplasty, stent implantation and atherectomy.

For more information on acquisitions, see Note 2 of the notes to consolidated financial statements.

On December 20, 2010, the company issued \$750 million of senior unsecured notes consisting of \$250 million aggregate principal amount of 2.875% notes due 2016 and \$500 million aggregate principal amount of 4.40% notes due 2021. Net proceeds from this offering were \$740.0 million, after deducting debt offering costs, consisting of underwriting commissions and offering expenses, and a debt issuance discount. Net proceeds from the issuance of the notes were used to fund an accelerated share repurchase ("ASR") transaction.

In connection with the offering of the notes, on December 15, 2010, the company entered into an ASR agreement with a bank to repurchase \$750 million of the company's common stock. The company received 8.1 million shares upon initial settlement under the ASR transaction. The total number of shares to be ultimately repurchased upon final settlement is subject to an adjustment based on the volume-weighted average share price of the company's common stock during a predetermined period of less than one year, less a discount.

For more information on the issuance of the notes and the ASR, see Note 9 of the notes to consolidated financial statements.

On December 9, 2010, the company committed to a plan (the "2010 Restructuring Plan") to improve its overall cost structure and enhance operational effectiveness. The 2010 Restructuring Plan includes the realignment of certain manufacturing, sales and marketing, and administrative functions. In connection with this plan, the company recorded employee separation costs under the company's existing severance programs and other costs related to one-time employee termination benefits of \$16.7 million (\$11.4 million after tax). Substantially all of these costs are expected to be cash expenditures. The company expects the 2010 Restructuring Plan to result in pre-tax costs savings of approximately \$19 million on an annual basis. See Note 3 of the notes to consolidated financial statements.

Results of Operations

Net Sales

Bard's 2010 consolidated net sales increased 7% on both a reported basis and a constant currency basis over 2009 consolidated net sales. Bard's 2009 consolidated net sales increased 3% on a reported basis (6% on a constant currency basis) over 2008 consolidated net sales. Net sales "on a constant currency basis" is a non-GAAP measure and should not be viewed as a replacement of GAAP results. See "Management's Use of Non-GAAP Measures" below. Price changes had the effect of decreasing consolidated net sales by approximately 30 basis points and 10 basis points for 2010 and 2009, respectively, compared to the prior years. The primary exchange rate movement that impacts net sales is the movement of the Euro compared to the U.S. dollar. The impact of exchange rate movements on net sales is not indicative of the impact on net earnings due to the offsetting impact of exchange rate movements on operating costs and expenses, costs incurred in other currencies and the company's hedging activities.

Bard's 2010 United States net sales of \$1,889.0 million increased 7% compared to \$1,759.2 million in 2009. Bard's 2010 international net sales of \$831.2 million increased 7% on a reported basis (6% on a constant currency basis) compared to \$775.7 million in 2009. Bard's 2009 United States net sales increased 6% compared to \$1,661.3 million in 2008. Bard's 2009 international net sales decreased 2% on a reported basis (increased 5% on a constant currency basis) compared to \$790.8 million in 2008.

Presented below is a summary of consolidated net sales by disease state.

Product Group Summary of Net Sales

	For the Years Ended December 31,						
	2010	2009	Change	Constant Currency	2008	Change	Constant Currency
<i>(dollars in millions)</i>							
Vascular	\$ 755.9	\$ 681.5	11%	11%	\$ 643.1	6%	9%
Urology	718.1	700.3	3%	2%	708.5	(1)%	1%
Oncology	724.8	678.7	7%	6%	646.6	5%	7%
Surgical Specialties	434.6	387.8	12%	12%	368.2	5%	7%
Other	86.8	86.6	—	—	85.7	1%	4%
Total net sales	<u>\$2,720.2</u>	<u>\$2,534.9</u>	7%	7%	<u>\$2,452.1</u>	3%	6%

Vascular Products - Bard markets a wide range of products for the peripheral vascular market, including endovascular products, electrophysiology products and vascular graft products. The increase in consolidated net sales of vascular products in 2010 compared to the prior year was due primarily to growth in endovascular products. United States net sales of vascular products in 2010 increased 14% compared to the prior year. International net sales in 2010 increased 7% on a reported basis (8% on a constant currency basis) compared to the prior year. The increase in consolidated net sales of vascular products in 2009 compared to the prior year was due to growth in endovascular products, partially offset by a decline in electrophysiology and vascular graft products. United States net sales in 2009 increased 12% compared to the prior year. International net sales in 2009 decreased 1% on a reported basis (increased 6% on a constant currency basis) compared to the prior year.

Consolidated net sales of endovascular products in 2010 increased 16% on both a reported basis and constant currency basis compared to the prior year (including 5% growth, on both a reported and constant currency basis, from the addition of the recently acquired SenoRx biopsy products). Consolidated net sales of endovascular products in 2009 increased 12% on a reported basis (15% on a constant currency basis) compared to the prior year. Growth in 2009 was favorably impacted by the Pre-Market Approval in February 2009 for the use of LifeStent® in the superficial femoral artery and proximal popliteal artery. Percutaneous transluminal angioplasty balloon catheters, stents and biopsy products were the primary contributors to the growth in this category in both 2010 and 2009.

Consolidated net sales in 2010 of electrophysiology products increased 2% on both a reported basis and a constant currency basis compared to the prior year. Electrophysiology laboratory systems and steerable diagnostic catheters contributed to the increase in 2010. Consolidated net sales of electrophysiology products in 2009 decreased 3% on a reported basis (increased 1% on a constant currency basis) compared to the prior year. Growth in the steerable diagnostic catheter and atrial fibrillation catheter lines was primarily offset by a decline in the conventional diagnostic catheter line in 2009.

Consolidated net sales in 2010 of vascular graft products decreased 4% on a reported basis (3% on a constant currency basis) compared to the prior year. Consolidated net sales of vascular graft products in 2009 decreased 6% on a reported basis (2% on a constant currency basis) compared to the prior year. Declining sales in peripheral vascular grafts were the primary drivers of both 2010 and 2009 results.

Urology Products - Bard markets a wide range of products for the urology market, including basic drainage products, continence products and urological specialty products. Bard also markets StatLock® catheter stabilization products, which are used to secure many types of catheters sold by Bard and other companies. The majority of basic drainage products, StatLock® catheter stabilization devices and certain urological specialty products are sold through distributors. The increase in consolidated net sales of urology products in 2010 compared to the prior year was led by growth in sales of StatLock® products and basic drainage products. Net sales growth in urology products in 2010 was favorably impacted by inventory reductions made by U.S. distributors during 2009. United States net sales in 2010 increased 2% compared to the prior year. International net sales in 2010 increased 4% on a reported basis (2% on a constant currency basis) compared to the prior year. The decrease in consolidated net sales of urology products in 2009 compared to the prior year was due to declines in continence and urological specialty products. During 2009, U.S. distributors reduced their inventory of the company's products in this category, which also contributed to the decrease in net sales. United States net sales in 2009 decreased 2% compared to the prior year. International net sales in 2009 were flat on a reported basis (increased 8% on a constant currency basis) compared to the prior year.

Consolidated net sales of basic drainage products in 2010 increased 2% on both a reported basis and a constant currency basis compared to the prior year. Consolidated net sales of basic drainage products in 2009 were flat on a reported basis (increased 2% on a constant currency basis) compared to the prior year. Sales of basic drainage products in 2009 were impacted by inventory reductions made by U.S. distributors. Consolidated net sales of infection control Foley catheter products declined 1% in 2010 on both a reported and constant currency basis compared to the prior year. Consolidated net sales of infection control Foley catheter products in 2009 grew 1% on a reported basis (2% on a constant currency basis) compared to the prior year.

Consolidated net sales of urological specialty products in 2010 decreased 3% on a reported basis (4% on a constant currency basis) compared to the prior year. Consolidated net sales of urological specialty products in 2009 decreased 10% on a reported basis (9% on a constant currency basis) compared to the prior year. The decrease in 2010 and 2009 was primarily driven by a decline in brachytherapy sales. The brachytherapy market has been losing procedural share to alternative therapies, a trend that may continue.

Consolidated net sales of continence products in 2010 decreased 5% on both a reported basis and a constant currency basis compared to the prior year. Consolidated net sales of continence products in 2009 decreased 3% on a reported basis (increased 1% on a constant currency basis) compared to the prior year. Net sales in both 2010 and 2009 were impacted by a decline in sales of surgical continence products, a trend that may continue, partially offset by sales growth in fecal management products.

Consolidated net sales of the StatLock® catheter stabilization product line in 2010 increased 19% on a reported basis (18% on a constant currency basis) compared to the prior year. Net sales growth of the StatLock® product line in 2010 was favorably impacted by inventory reductions made by U.S. distributors during 2009. Consolidated net sales of the StatLock® catheter stabilization product line in 2009 increased 8% on a reported basis (9% on a constant currency basis) compared to the prior year. Sales of StatLock® devices in 2009 were unfavorably impacted by the inventory reductions made by U.S. distributors.

Oncology Products - Bard's oncology business includes specialty vascular access products and enteral feeding devices. Specialty vascular access products include peripherally inserted central catheters ("PICCs") used for intermediate to long-term central venous access, specialty access ports and accessories ("Ports") used most commonly for chemotherapy, dialysis access catheters, and vascular access ultrasound devices which help facilitate the placement of PICCs.

The increase in consolidated net sales of oncology products in 2010 compared to the prior year was due primarily to growth in net sales of PICCs and Ports. Dialysis access catheters and vascular access ultrasound devices also contributed to growth in 2010 net sales. United States net sales of oncology products in 2010 increased 5% compared to the prior year. International net sales in 2010 increased 11% on a reported basis (8% on a constant currency basis) compared to the prior year. The increase in consolidated net sales of oncology products in 2009 compared to the prior year was due primarily to growth in net sales of PICCs and Ports. United States net sales of oncology products in 2009 increased 7% compared to the prior year. International net sales in 2009 were flat on a reported basis (increased 6% on a constant currency basis) compared to the prior year.

Consolidated net sales of PICCs in 2010 increased 8% on both a reported basis and a constant currency basis compared to the prior year. Consolidated net sales of Ports in 2010 increased 6% on both a reported basis and constant currency basis compared to the prior year. Consolidated net sales of PICCs in 2009 increased 9% on a reported basis (10% on a constant currency basis) compared to the prior year. Consolidated net sales of Ports in 2009 increased 8% on a reported basis (9% on a constant currency basis) compared to the prior year.

Consolidated net sales of dialysis access catheters in 2010 increased 10% on a reported basis (9% on a constant currency basis) compared to the prior year. Consolidated net sales of vascular access ultrasound devices in 2010 increased 15% on a reported basis (14% on a constant currency basis) compared to the prior year. Consolidated net sales of dialysis access catheters in 2009 decreased 1% on a reported basis (increased 1% on a constant currency basis) compared to the prior year. Consolidated net sales of vascular access ultrasound devices in 2009 decreased 9% on a reported basis (8% on a constant currency basis) compared to the prior year.

Surgical Specialty Products - Surgical specialty products include soft tissue repair, performance irrigation and hemostasis product lines. United States net sales in 2010 increased 14% compared to the prior year. International net sales in 2010 increased 6% on a reported basis (5% on a constant currency basis) compared to the prior year. The increase in consolidated net sales of surgical specialty products in each of 2010 and 2009 compared to the prior year was due to growth in soft tissue repair products. United States net sales in 2009 increased 11% compared to the prior year. International net sales in 2009 decreased 8% on a reported basis (2% on a constant currency basis) compared to the prior year.

The soft tissue repair product line includes synthetic and natural-tissue hernia repair implants, natural-tissue breast reconstruction implants, and hernia fixation products. Consolidated net sales of soft tissue repair products in 2010 increased 17% on a reported basis (16% on a constant currency basis) compared to the prior year. The company's voluntary recall of its XenMatrix™ product on January 7, 2011 had a minor impact on net sales of soft tissue repair products in 2010. Consolidated net sales of soft tissue repair products in 2009 increased 10% on a reported basis (12% on a constant currency basis) compared to the prior year. Natural-tissue products for both hernia repair and breast reconstruction, and hernia fixation products were the drivers of growth in this category in both 2010 and 2009.

Beginning in December 2005 the company initiated, and later expanded, a voluntary product recall of certain of its Bard® Composix® Kugel® mesh products intended for ventral hernia repair. In connection with the recall, the FDA conducted several inspections of the company's Davol, Inc. subsidiary and issued several Form-483 notices and a Warning Letter, each citing observations generally relating to non-conformances in Davol's quality systems. The company responded to the Form-483 notices and the Warning Letter and, in each case, completed corrective actions to address the observations. In January 2010, the FDA notified the company that the observations relating to its Davol facility contained in the Form-483 notices and the Warning Letter had been satisfactorily resolved and closed out.

In connection with several inspections conducted by the FDA of the company's manufacturing facility located in Humacao, Puerto Rico, the FDA issued a Form-483 notice in February 2008 and a Warning Letter in July 2008, each citing observations generally relating to non-conformances in the facility's quality systems. The company responded to the Form-483 notice and the Warning Letter and, in each case, completed corrective actions to address the observations. In April 2010, the FDA notified the company that the observations relating to the Humacao, Puerto Rico facility contained in the Form-483 notice and the Warning Letter had been satisfactorily resolved and closed out. The facility manufactures products for many of the company's divisions and subsidiaries, including soft tissue repair products for the company's Davol subsidiary.

Other Products - The other product group includes irrigation, wound drainage and certain original equipment manufacturers' products. Consolidated net sales in 2010 of other products were flat on both a reported basis and constant currency basis compared to the prior year. Consolidated net sales in 2009 of other products increased 1% on a reported basis (4% on a constant currency basis) compared to the prior year.

Costs and Expenses

The following is a summary of costs and expenses as a percentage of net sales for the following years ended December 31:

	<u>2010</u>	<u>2009</u>	<u>2008^(A)</u>
Cost of goods sold	37.5%	37.8%	38.7%
Marketing, selling and administrative expense	27.9%	26.9%	28.9%
Research and development expense	6.8%	7.1%	8.1%
Interest expense	0.5%	0.5%	0.5%
Other (income) expense, net	0.9%	1.2%	1.2%
Total costs and expenses	<u>73.6%</u>	<u>73.5%</u>	<u>77.5%</u>

^(A) Amounts do not add due to rounding.

Cost of goods sold - Cost of goods sold consists principally of the manufacturing and distribution costs of the company's products. The category also includes royalties, amortization of intangible assets and the impact of certain hedging activities. Cost of goods sold as a percentage of net sales for 2010 decreased 30 basis points from the prior year. This reduction was attributed primarily to cost improvements partially offset by the impact of

approximately 50 basis points of incremental amortization of intangible assets acquired in 2009 and 2010. Cost of goods sold as a percentage of net sales for 2009 decreased 90 basis points from the prior year. This reduction was attributed primarily to cost improvements partially offset by the impact of approximately 20 basis points of incremental amortization of intangible assets acquired in 2008 and 2009.

Marketing, selling and administrative expense - Marketing, selling and administrative expense consists principally of the costs associated with the company's sales and administrative organizations. These costs as a percentage of net sales for 2010 increased 100 basis points from the prior year primarily due to higher related costs from the acquired operations of SenoRx and FlowCardia. These costs as a percentage of net sales for 2009 decreased 200 basis points from 2008 primarily due to company wide spending controls, including the impact of the restructuring plan announced in 2009. See Note 3 of the notes to consolidated financial statements.

Research and development expense - Research and development expense consists principally of the costs related to internal research and development activities, milestone payments for third-party research and development activities, and purchased R&D arising from business development activities. Purchased R&D payments may impact the comparability of the company's results of operations between periods. The following table presents a summary of research and development expense for the following years ended December 31:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
(dollars in millions)			
Research and development	\$182.8	\$163.5	\$149.8
Purchased research and development	2.6	16.1	49.3
Total research and development expense	<u>\$185.4</u>	<u>\$179.6</u>	<u>\$199.1</u>

Research and development expense in 2010 increased approximately 3% compared to the prior year. Research and development expense in 2009 decreased approximately 10% compared to the prior year. Included in research and development expense for 2009 was purchased R&D of \$16.1 million primarily associated with the acquisition of technology for laparoscopic hernia repair. The entire purchase price related to this asset acquisition was allocated to purchased R&D in 2009. Included in the research and development expense for 2008 was purchased R&D of \$49.3 million primarily associated with the acquisition of the LifeStent® family of stents from Edwards Lifesciences.

Interest expense - Interest expense in 2010 was \$12.7 million as compared with 2009 interest expense of \$11.8 million and 2008 interest expense of \$12.1 million.

Other (income) expense, net - Other (income) expense, net, was \$24.6 million, \$30.5 million and \$29.4 million for 2010, 2009 and 2008, respectively. These amounts include interest income of \$3.7 million, \$3.6 million and \$16.5 million in 2010, 2009 and 2008, respectively. The decrease in 2009 was primarily due to lower global interest rates. Other (income) expense, net, in 2010 also included restructuring costs of \$16.7 million and acquisition related integration costs of \$9.3 million. Other (income) expense, net, in 2009 also included restructuring costs of \$15.4 million, non-cash charges of \$7.2 million for asset write-offs, insurance settlements, net, of \$7.0 million, and acquisition related contract termination costs of \$3.2 million. See Note 13 of the notes to consolidated financial statements.

Income Tax Provision

The company's effective tax rate for 2010 was approximately 29%, compared to approximately 31% in 2009. The effective tax rate for 2010 reflected the tax effect of a \$10.4 million benefit associated with certain tax positions being remeasured as a result of new information related to the completion of the U.S. Internal Revenue Service examinations of the tax years 2003 and 2004, reductions of tax positions related to the completion of certain foreign tax examinations, and the expiration of statutes of limitation in certain foreign jurisdictions. The \$10.4 million benefit was partially offset by a charge of \$5.6 million associated with a cash repatriation of approximately \$62 million of earnings from operations in certain foreign jurisdictions as a result of tax legislation enacted in the third quarter. The tax rate in 2010 also reflected the tax effect of acquisition related items (primarily integration and transaction costs, and purchased R&D).

As a result of the retroactive application of the research tax credit under the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010, the income tax provision for the year was reduced by \$3.7 million in the fourth quarter of 2010.

The company's effective tax rate for 2009 was approximately 31% compared to approximately 24% in 2008. The tax rate for 2009 reflected the tax effect of the insurance settlements, acquisition related items (primarily purchased R&D) and an increase in the liability for uncertain tax positions resulting from a tax assessment that related to prior periods.

Net Income Attributable to Common Shareholders and Earnings per Share Available to Common Shareholders

The company reported 2010 net income attributable to common shareholders of \$509.2 million, an increase of 11% from 2009 net income attributable to common shareholders of \$460.1 million. The company reported 2010 diluted earnings per share available to common shareholders of \$5.32, an increase of 16% from 2009 diluted earnings per share available to common shareholders of \$4.60. Net income attributable to common shareholders in 2010 reflects restructuring costs of \$11.4 million, or \$0.12 per diluted share, and acquisition related items (primarily integration and transaction costs and purchased R&D) of \$16.1 million, or \$0.17 per diluted share. The current year also reflects bad debt expense of \$3.8 million, or \$0.04 per diluted share, related to the write-down of accounts receivable in Greece and a net decrease to the income tax provision of \$4.8 million, or \$0.05 per diluted share, as a result of the reductions of certain tax positions and the cash repatriation as discussed above.

The company reported 2009 net income attributable to common shareholders of \$460.1 million, an increase of 10% from 2008 net income attributable to common shareholders of \$416.5 million. The company reported 2009 diluted earnings per share available to common shareholders of \$4.60, an increase of 14% from 2008 diluted earnings per share available to common shareholders of \$4.05. Net income attributable to common shareholders in 2009 reflected acquisition related items of \$16.9 million or \$0.17 per diluted share, primarily consisting of purchased R&D charges and contract termination costs, insurance settlements, net, of \$13.3 million or \$0.13 per diluted share, restructuring costs of \$10.2 million, or \$0.10 per diluted share, non-cash charges related to asset write-offs of \$6.9 million, or \$0.07 per diluted share, and an increase in the income tax provision related to an uncertain tax position of \$2.1 million, or \$0.02 per diluted share.

Liquidity and Capital Resources

The company assesses its liquidity in terms of its ability to generate cash to fund its operating, investing and financing activities. Significant factors affecting the management of liquidity are cash flows generated from operating activities, capital expenditures, acquisitions of businesses and technologies, cash dividends and common stock repurchases. Cash provided from operations continues to be the company's primary source of funds. The company believes it could borrow adequate funds at competitive terms should it be necessary. The company also believes that its overall financial strength gives it sufficient financial flexibility. The table below summarizes liquidity measures for Bard for the following years ended December 31:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
(dollars in millions)			
Cash and cash equivalents	\$ 641.4	\$ 674.4	\$ 592.1
Working capital	1,131.6	1,210.1	1,081.1
Current ratio	3.85/1	5.30/1	4.96/1

For the years ended December 31, 2010, 2009 and 2008, net cash provided by operating activities was \$637.8 million, \$619.3 million and \$516.2 million respectively. The increase in net cash provided by operating activities in 2010 reflects higher net income, excluding non-cash items, partially offset by higher levels of inventory and the timing of tax payments. The increase in 2009 reflects improvements in accounts receivable and inventories.

During 2010, the company used \$355.1 million in cash for investing activities, \$165.9 million more than in 2009. During 2009, the company used \$189.2 million in cash for investing activities, \$37.3 million more than in 2008. Capital expenditures amounted to \$51.2 million, \$48.1 million and \$50.6 million for the years ended December 31, 2010, 2009 and 2008, respectively. The company spent \$303.9 million in 2010, \$141.1 million in 2009 and \$185.2 million in 2008 for the acquisition of businesses, products and technologies to augment existing product lines. Net cash provided by the change in short-term investments, net, which matured in 2008, was \$82.1 million.

During 2010, the company used \$310.6 million in cash for financing activities, \$67.8 million less than in 2009. During 2009, the company used \$378.4 million in cash for financing activities, \$162.4 million more than in 2008. Total debt was \$977.4 million and \$149.8 million at December 31, 2010 and December 31, 2009, respectively. The increase in debt reflected the net proceeds of \$746.3 million from the issuance of the senior unsecured notes, net of debt issuance discount. Total debt to total capitalization was 37.5%, 6.4% and 7.0% at December 31, 2010, 2009 and 2008, respectively. The company spent approximately \$1.1 billion to repurchase 12,025,000 shares of common stock in 2010 compared to \$342.2 million to repurchase 4,535,047 shares and \$227.0 million to repurchase 2,361,492 shares in 2009 and 2008, respectively. The repurchases of common stock in 2010 include \$750.0 million to repurchase 8,100,000 shares upon initial settlement under an accelerated share repurchase agreement with a bank. The company paid cash dividends of \$66.9 million, \$65.4 million and \$62.2 million in 2010, 2009 and 2008, respectively. In 2010, the company purchased the noncontrolling interest in its Malaysian operation for \$25.9 million.

The company maintains a committed syndicated bank credit facility with a \$400 million five-year credit agreement that expires in June 2012. The credit facility supports the company's commercial paper program and can be used for general corporate purposes. The facility includes pricing based on the company's long-term credit rating and includes a financial covenant that limits the amount of total debt to total capitalization. The company had outstanding commercial paper borrowings of \$80.5 million at December 31, 2010. There were no outstanding borrowings or commercial paper borrowings at December 31, 2009.

Contractual Obligations

Payments due under contractual obligations at December 31, 2010, are as follows:

(dollars in millions)	<u>Total</u>	<u>1 Year</u>	<u>2-3 Years</u>	<u>4-5 Years</u>	<u>5+ Years</u>
Forward contracts	\$ 130.5	\$ 71.4	\$ 59.1	\$ —	\$ —
Short-term borrowings	80.5	80.5	—	—	—
Long-term debt	1,314.0	23.9	71.6	81.6	1,136.9
Operating lease obligations	129.3	22.3	35.7	25.3	46.0
Acquisition and related milestones	22.2	9.9	8.3	4.0	—
Purchase obligations	172.5	139.5	31.0	0.3	1.7
Other long-term liabilities	88.5	12.7	11.0	10.5	54.3
	<u>\$1,937.5</u>	<u>\$360.2</u>	<u>\$216.7</u>	<u>\$121.7</u>	<u>\$1,238.9</u>

The table above does not include \$53.6 million of the total unrecognized tax benefits for uncertain tax positions and \$11.4 million of associated accrued interest. Due to the high degree of uncertainty regarding the timing of potential future cash flows, the company is unable to make a reasonable estimate of the amount and period in which these liabilities might be paid.

Forward contracts - Forward contracts obligate the company for the forward purchase of currencies in which the company has known or anticipated sales or payments.

Short-term borrowings - Short-term borrowings consist of commercial paper.

Long-term debt - Long-term debt includes expected principal and interest payments, including the effect of an interest rate swap contract.

Operating lease obligations - The company is committed under noncancelable operating leases involving certain facilities and equipment.

Acquisition and related milestones - The company enters into various acquisition and related arrangements, including business combinations, research and development arrangements, and product and intellectual property acquisitions. In connection with some of these activities, the company agrees to make payments to third parties when milestones are achieved, such as the achievement of research and development targets, receipt of regulatory approvals or achievement of performance or operational targets.

Purchase obligations - The company's business creates a need to enter into commitments with suppliers. These inventory purchase commitments do not exceed the company's projected requirements over the related terms and are in the normal course of business.

Other long-term liabilities - The company estimates required funding obligations related to its pension and postretirement benefit plans and deferred compensation.

Management's Use of Non-GAAP Measures

Net sales "on a constant currency basis" is a non-GAAP measure. The company analyzes net sales on a constant currency basis to better measure the comparability of results between periods. Because changes in foreign currency exchange rates have a non-operating impact on net sales, the company believes that evaluating growth in net sales on a constant currency basis provides an additional and meaningful assessment of net sales to both management and the company's investors. Constant currency growth rates are calculated by translating the prior year's local currency sales by the current period's exchange rate. Constant currency growth rates are not indicative of changes in corresponding cash flows. The limitation of these non-GAAP measures is that they do not reflect results on a standardized reporting basis. Non-GAAP measures are intended to supplement the applicable GAAP disclosures and should not be viewed as a replacement of GAAP results.

Critical Accounting Policies and Estimates

The preparation of financial statements requires the company's management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Critical accounting policies are those that require application of management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain and may change in subsequent periods. The following is not intended to be a comprehensive list of all of the company's accounting policies. The company's significant accounting policies are more fully described in the company's notes to consolidated financial statements. See Note 1 of the notes to consolidated financial statements. The critical accounting policies described below are areas in which management's judgment in selecting an available alternative might produce a materially different result.

Revenue Recognition - Generally, sales to end-user customers and European distributors are recognized at the point of delivery, and sales to domestic distributors are recognized at the time of shipment. In certain circumstances, end-user customers may require the company to maintain consignment inventory at the customer's location. In the case of consignment inventories, revenues and associated costs are recognized upon the notification of usage by the customer.

Share-Based Compensation - Share-based compensation cost is measured at the grant date based on the fair value of the award. Generally, compensation expense is recognized over the vesting period. In order to determine

the fair value of stock options on the grant date, the company utilizes a binomial model. Inherent in the binomial model are assumptions related to expected stock-price volatility, option life, risk-free interest rate and dividend yield. The expected stock-price volatility is based upon weightings of the historical volatility of the company's stock and the implied volatility from publicly traded options. The company reviews the trading volumes and option life of its publicly traded options in order to determine the appropriate weighting of implied volatility. This approach is used as a predictor of future realized and implied volatilities and is directly related to stock option valuations. With respect to the weighted-average option life assumption, the company considers the exercise behavior of past grants and models the pattern of aggregate exercises. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the grant date with a term equal to the contractual term of the stock option.

As share-based compensation expense is based on awards ultimately expected to vest, the amount of expense has been reduced for estimated forfeitures. The company estimates forfeitures at the time of grant based on historical experience and revises estimates, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

Contingencies - The company is subject to various legal proceedings and claims, including, for example, product liability matters, environmental matters, employment disputes, disputes on agreements and other commercial disputes, the outcomes of which are not within the company's complete control and may not be known for extended periods of time. In some cases, the claimants seek damages, as well as other relief, which, if granted, could require significant expenditures. The company records a liability in its consolidated financial statements for damages and/or costs related to claims, settlements and judgments where the company has assessed that the loss is probable and an amount can be reasonably estimated. If the estimate of a probable loss is a range and no amount within the range is more likely, the company accrues the minimum amount of the range. The company records a receivable from its product liability insurance carriers when those recoveries are probable and collectible. Amounts recovered under these policies may be less than the stated coverage limits and may not be adequate to cover damages and/or costs. In addition, there is no guarantee that insurers will pay claims or that coverage will be otherwise available. Legal costs associated with these matters are expensed as incurred. See Note 10 of the notes to consolidated financial statements.

Income Taxes - The company operates in multiple taxing jurisdictions, both within the United States and internationally. The company regularly assesses its tax positions and includes reserves for uncertain tax positions. These positions relate to transfer pricing, the deductibility of certain expenses, intercompany transactions and other matters. Although the outcome of tax audits is uncertain, in management's opinion, adequate provisions for income taxes have been made for potential liabilities resulting from such matters. The recognition and measurement of a tax position is based on the company's best judgment given the facts, circumstances and information available at the reporting date. The reserves are used or reversed once the statutes of limitation have expired or the position is effectively settled. The company believes that the ultimate outcome of these matters will not have a material impact on its financial condition and/or liquidity but may be material to the income tax provision and results of operations.

Allowance for Doubtful Accounts, Customer Rebates and Inventory Writedowns - The company makes estimates of the uncollectibility of the company's accounts receivable, amounts that are rebated to specific customers in accordance with contractual requirements and inventory adjustments to reflect inventory valuation at the lower of cost or market. In estimating the reserves necessary for the allowance for doubtful accounts, management considers historical bad debt trends, customer concentrations, customer creditworthiness and current economic trends. The company establishes an allowance for doubtful accounts for estimated amounts that are uncollectible from customers. In estimating the allowance for customer rebates, management considers the lag time between the point of sale and the payment of the customer's rebate claim, customer specific trend analysis and contractual commitments including the stated rebate rate. The company establishes an allowance for customer rebates and reduces sales for such rebate amounts. In estimating the adjustment for inventory writedowns, management considers product obsolescence, quantity on hand, future demand for the product and other market-related conditions. The company records an adjustment for inventory writedowns when such

conditions cause the inventory market value to be below carrying value. The company records such adjustments to cost of sales in the period in which the condition exists.

It is possible that the underlying factors discussed above for the allowance for doubtful accounts, customer rebates and inventory writedowns could change. Depending on the extent and nature of the change to the underlying factors, the impact to the company's results of operations and financial condition could be material in the period of change.

Acquisitions - On January 1, 2009, the company adopted Financial Accounting Standards Board ("FASB") guidance on accounting for business combinations. This guidance changed the way in which the purchase method is applied in a business combination. The guidance contained significant revisions requiring an acquirer to measure the identifiable assets acquired and liabilities assumed at their fair value, with goodwill being the excess value of consideration paid over the fair value of the net identifiable assets acquired. This guidance also required that acquired in-process research and development be capitalized and recorded as an intangible asset at the acquisition date, that contingent consideration be recorded at fair value at the acquisition date, and that transaction costs are to be expensed. The amount of the purchase price allocated to purchased R&D and other intangible assets is determined by estimating the future cash flows of each project or technology and discounting the net cash flows back to their present values. The discount rate used is determined at the time of the acquisition in accordance with accepted valuation methods. For purchased R&D, these methodologies include consideration of the risk of the project not achieving commercial feasibility. When the company acquires net assets that do not constitute a business under generally accepted accounting principles in the United States, no goodwill is recognized. The judgments made in determining fair value assigned to assets acquired and liabilities assumed, as well as asset lives, can materially impact results of operations.

Impairment of Long-Lived Assets - Goodwill is tested for impairment annually, or more frequently if changes in circumstances or the occurrence of events suggest an impairment exists. Intangible assets other than goodwill and other long-lived assets, such as property, plant and equipment, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The company evaluates the recoverability of assets to be held and used by comparing the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset.

Pension Plans - The company sponsors pension plans covering substantially all domestic employees and certain foreign employees who meet eligibility requirements. Several statistical and other factors that attempt to anticipate future events are used in calculating the expense and liability related to the plans. These factors include assumptions about the discount rate, expected return on plan assets and rate of future compensation increases as determined by the company. In addition, the company's actuarial consultants also use subjective factors, such as withdrawal and mortality rates, to estimate these factors. The actuarial assumptions used by the company may differ materially from actual results due to changing market and economic conditions, higher or lower withdrawal rates or longer or shorter life spans of the participants. A change of plus (minus) 25 basis points in the discount rate assumption, with other assumptions held constant, would have an estimated \$0.9 million favorable (unfavorable) impact on the company's net pension cost. A change of plus (minus) 25 basis points in the expected rate of return on plan assets assumption, with other assumptions held constant, would have an estimated \$0.7 million favorable (unfavorable) impact on the company's net pension cost.

Risks and Uncertainties; Cautionary Statement Regarding Forward-Looking Information

Certain statements contained herein or in other company documents and certain statements that may be made by management of the company orally may contain forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. You can identify these statements by the fact that they do not relate strictly to historical or current facts. They use words such as "anticipate," "estimate," "expect," "project,"

“intend,” “forecast,” “plan,” “believe” and other words and terms of similar meaning in connection with any discussion of future operating or financial performance. In particular, these include statements relating to product approvals, future performance of current and anticipated products, sales efforts, expenses, the outcome of contingencies, such as legal proceedings, and financial results. The company’s forward-looking statements speak only as of the date of this report or as of the date they are made, and the company undertakes no obligation to update its forward-looking statements.

In addition, there are substantial risks inherent in the medical device business. The company’s business involves the design, development, manufacture, packaging, distribution and sale of life-sustaining medical devices. These devices are often used on, or permanently or temporarily implanted in, patients in clinically demanding circumstances, such as operating rooms, emergency units, intensive care and critical care settings, among others. These circumstances, among other factors, can cause the products to become associated with adverse clinical events, including patient mortality and injury, and could lead to product liability claims (including lawsuits seeking class action status or seeking to establish multi-district litigation proceedings) and other litigation, product withdrawals, Warning Letters, recalls, field corrections or regulatory enforcement actions relating to one or more of the company’s products, any of which could have a material adverse effect on our business, results of operations, financial condition and/or liquidity.

Because actual results are affected by these and other risks and uncertainties, the company cautions investors that actual results may differ materially from those expressed or implied. It is not possible to predict or identify all risks and uncertainties, but the most significant factors, in addition to those addressed above and those under Item 1A. “Risk Factors,” that could adversely affect our business or cause the actual results to differ materially from those expressed or implied include, but are not limited to:

Effective management of and reaction to risks involved in our business, including:

- the ability to achieve manufacturing or administrative efficiencies, including gross margin benefits from our manufacturing processes and supply chain programs or in connection with the integration of acquired businesses;
- the effects of negative publicity concerning our products, which could result in product withdrawals or decreased product demand and which could reduce market or governmental acceptance of our products;
- the ability to identify appropriate companies, businesses and technologies as potential acquisition candidates, to consummate and successfully integrate such transactions or to obtain agreements for such transactions with favorable terms;
- the reduction in the number of procedures using our devices caused by customers’ cost-containment pressures or preferences for alternate therapies;
- the ability to maintain or increase research and development expenditures;
- the uncertainty of whether increased research and development expenditures and sales force expansion will result in increased sales;
- the ability to maintain our effective tax rate and uncertainty related to tax audits, appeals and litigation;
- internal factors, such as retention of key employees, including sales force employees;
- the ability to achieve earnings forecasts, which are generated based, among other things, on projected volumes and sales of many product types, some of which are more profitable than others;
- changes in factors and assumptions or actual results that differ from our assumptions on stock valuation and employee stock option exercise patterns, which could cause compensation expense recorded in future periods to differ significantly from the compensation expense recorded in the current period;
- changes in factors and assumptions could cause pension cost recorded in future periods to differ from the pension cost recorded in the current period;

- the effect of market fluctuations on the value of assets in the company's pension plans and the possibility that the company may need to make additional contributions to the plans as a result of any decline in the fair value of such assets;
- damage to a company facility, which could render the company unable to manufacture one or more products (as the company may utilize only one manufacturing facility for certain of its major products) and may require the company to reduce the output of products at the damaged facility thereby making it difficult to meet product shipping targets;
- the potential impairment of goodwill and intangible assets of the company resulting from insufficient cash flow generated from such assets specifically, or our business more broadly, so as to not allow the company to justify the carrying value of the assets;
- the ability to obtain appropriate levels of product liability insurance on reasonable terms;
- the ability to recover for claims made to our insurance companies; and
- the ability to realize the anticipated benefits of the 2010 Restructuring Plan to improve its overall cost structure and improve efficiency.

Competitive factors, including:

- the trend of consolidation in the medical device industry as well as among our customers, resulting in potentially greater pricing pressures and more significant and complex contracts than in the past, both in the United States and abroad;
- development of new products or technologies by competitors having superior performance compared to our current products or products under development which could negatively impact sales of our products or render one or more of our products obsolete;
- technological advances, patents and registrations obtained by competitors that would have the effect of excluding the company from new market segments or preventing the company from selling a product or including key features in the company's products;
- attempts by competitors to gain market share through aggressive marketing programs; and
- reprocessing by third-party reproducers of our products designed and labeled for single use.

Difficulties and delays inherent in the development, manufacturing, marketing and sale of medical products, including:

- the ability to complete planned clinical trials successfully, to develop and obtain regulatory approval for products on a timely basis and to launch products on a timely basis within cost estimates;
- lengthy and costly regulatory approval processes, which may result in lost market opportunities and/or delayed product launches;
- delays or denials of, or grants of low or reduced levels of reimbursement for, procedures using newly developed products;
- the suspension or revocation of authority to manufacture, market or distribute existing products;
- the imposition of additional or different regulatory requirements, such as those affecting manufacturing and labeling;
- performance, efficacy or safety concerns for existing products, whether scientifically justified or not, that may lead to product discontinuations, product withdrawals, recalls, field corrections, regulatory enforcement actions, litigation or declining sales, including adverse events relating to the company's vena cava filters, pelvic floor repair products and hernia repair products;

- FDA inspections resulting in Form-483 notices and/or Warning Letters identifying deficiencies in the company's manufacturing practices and/or quality systems; Warning Letters identifying violations of FDA regulations that could result in product holds, recalls, restrictions on future clearances by the FDA and/or civil penalties;
- the failure to obtain, limitations on the use of, or the loss of, patent and other intellectual property rights, and the failure of efforts to protect our intellectual property rights against infringement and legal challenges that can increase our costs;
- difficulties obtaining necessary components or raw materials used in the company's products and/or price increases from the company's suppliers of critical components or raw materials, including oil-based resins, or other interruptions of the supply chain; and
- customers that may limit the number of manufacturers or vendors from which they will purchase products, which can result in the company's inability to sell products to or contract with large hospital systems, integrated delivery networks or group purchasing organizations.

Governmental action, including:

- the impact of continued healthcare cost containment;
- new laws and judicial decisions related to healthcare availability, healthcare reform, payment for healthcare products and services or the marketing and distribution of products, including legislative or administrative reforms to the United States Medicare and Medicaid systems or other United States or international reimbursement systems in a manner that would significantly reduce or eliminate reimbursements for procedures that use the company's products;
- changes in the FDA and/or foreign regulatory approval processes that may delay or prevent the approval of new products and result in lost market opportunity;
- the impact of more vigorous compliance and enforcement activities affecting the healthcare industry in general or the company in particular;
- changes in the tax laws affecting our business, such as the recently-enacted excise tax in Puerto Rico;
- changes in the environmental laws or standards affecting our business;
- changes in laws that could require facility upgrades or process changes and could affect production rates and output; and
- compliance costs and potential penalties and remediation obligations in connection with environmental laws, including regulations regarding air emissions, waste water discharges and solid waste.

Legal disputes, including:

- disputes over intellectual property rights;
- product liability claims, which may involve lawsuits seeking class action status or seeking to establish multi-district litigation proceedings, including the Hernia Product Claims, the Women's Health Product Claims and the Filter Product Claims;
- claims asserting securities law violations;
- claims asserting, and/or subpoenas seeking information regarding, violations of law in connection with federal and/or state healthcare programs such as Medicare or Medicaid;
- derivative shareholder actions;
- claims and subpoenas asserting antitrust violations;
- environmental claims, including risks relating to accidental contamination or injury from the use of hazardous materials in the company's manufacturing, sterilization and research activities and the potential for the company to be held liable for any resulting damages; and

- commercial disputes, including disputes over distribution agreements, license agreements, manufacturing/supply agreements, development/research agreements, acquisition or sale agreements, and insurance policies.

General economic conditions, including:

- international and domestic business conditions;
- political or economic instability in foreign countries;
- interest rates;
- foreign currency exchange rates;
- changes in the rate of inflation; and
- instability of global financial markets and economies including certain countries in Southern Europe.

Other factors beyond our control, including catastrophes, both natural and man-made, earthquakes, floods, fires, explosions, acts of terrorism or war.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Bard operates on a global basis and therefore is subject to the exposures that arise from foreign currency exchange rate fluctuations. The company manages these exposures using operational and economic hedges as well as derivative financial instruments. The company's foreign currency exposures may change over time as changes occur in the company's international operations. The company's objective in managing its exposures to foreign currency fluctuations is to minimize earnings and cash flow volatility associated with assets, liabilities, net investments and probable commitments denominated in foreign currencies. In order to reduce the risk of foreign currency exchange rate fluctuations, the company will from time-to-time enter into derivative financial instruments to hedge a portion of its expected foreign currency denominated cash flow from operations. The instruments that the company uses for hedging are forward contracts and options with major financial institutions. The company expects that the changes in fair market value of such contracts will have a high correlation to the price changes in the related hedged cash flow. The principal currencies the company hedges are the Euro, the British Pound, the Mexican Peso, the Canadian Dollar, the Australian Dollar and the Japanese Yen. Any gains and losses on these hedge contracts are expected to offset changes in the value of the related exposure. Bard's risk management guidelines prohibit entering into financial instruments for speculative purposes. The company enters into foreign currency transactions only to the extent that foreign currency exposure exists. A sensitivity analysis of changes in the fair value of all foreign exchange derivative contracts at December 31, 2010 indicates that if the U.S. dollar uniformly strengthened by 10% against all currencies, the fair value of these contracts would decrease by \$4.6 million, and if the U.S. dollar uniformly weakened by 10% against all currencies, the fair value of these contracts would increase by \$6.9 million. Any gains and losses on the fair value of derivative contracts would be largely offset by gains and losses on the underlying transactions. These offsetting gains and losses are not reflected in the above analysis.

The company's investment portfolio primarily includes cash equivalents, for which the market values are not significantly affected by changes in interest rates. The market value of the company's fixed-rate debt is affected by a change in the medium- to long-term U.S. interest rates because the borrowings generally have longer maturities. The market value of the company's debt including the effect of the related interest rate swap contract effectively converting the 2.875% fixed-rate notes to floating-rate instruments approximated \$937.7 million at December 31, 2010. A sensitivity analysis, assuming a 100 basis point increase or decrease in U.S. interest rates and assuming that the debt and related swap are held to maturity, indicates that the market value of the debt and related swap would have approximated \$856.9 million or \$1,007.9 million, respectively, on December 31, 2010.

Item 8. Financial Statements and Supplementary Data

**MANAGEMENT'S REPORT ON
INTERNAL CONTROL OVER FINANCIAL REPORTING**

Management of the company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended. The company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The company's internal control over financial reporting includes those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2010. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework.

Based on its assessment and those criteria, management believes that the company maintained effective internal control over financial reporting as of December 31, 2010.

The company's independent registered public accounting firm has issued an attestation report on the effectiveness of the company's internal control over financial reporting. That report appears on page II-21.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
C. R. Bard, Inc.:

We have audited the accompanying consolidated balance sheets of C. R. Bard, Inc. and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of income, shareholders' investment, and cash flows for each of the years in the three-year period ended December 31, 2010. In connection with our audits of the consolidated financial statements, we also have audited the consolidated financial statement schedule. These consolidated financial statements and financial statement schedule are the responsibility of C. R. Bard, Inc.'s management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of C. R. Bard, Inc. and subsidiaries as of December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

As discussed in Note 12 to the consolidated financial statements, the company changed its method of accounting for defined benefit pension plans in 2008 due to the adoption of the measurement date requirements of the Financial Accounting Standards Board statement on employers' accounting for defined benefit pension plans.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), C. R. Bard, Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 24, 2011 expressed an unqualified opinion on the effectiveness of C. R. Bard, Inc.'s internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
C. R. Bard, Inc.:

We have audited C. R. Bard, Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in "Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)". C. R. Bard, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying "Management's Annual Report on Internal Control Over Financial Reporting". Our responsibility is to express an opinion on the effectiveness of C. R. Bard, Inc.'s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, C. R. Bard, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in "Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO)".

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of C. R. Bard, Inc. and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of income, shareholders' investment, and cash flows for each of the years in the three-year period ended December 31, 2010, and our report dated February 24, 2011 expressed an unqualified opinion on those consolidated financial statements.

The accompanying notes are an integral part of these consolidated financial statements.

C. R. BARD, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Significant Accounting Policies

Nature of Operations - C. R. Bard, Inc. and its subsidiaries (the “company” or “Bard”) are engaged in the design, manufacture, packaging, distribution and sales of medical, surgical, diagnostic and patient care devices. The company markets its products worldwide to hospitals, individual healthcare professionals, extended care facilities and alternate site facilities.

Consolidation - The consolidated financial statements include the accounts of C. R. Bard, Inc. and its subsidiaries. All significant intercompany accounts and transactions are eliminated in consolidation. The accounts of most foreign subsidiaries are consolidated as of November 30. No events occurred related to these foreign subsidiaries during the months of December 2010, 2009 or 2008 that materially affected the financial position or results of operations of the company. The company has no material interests in variable interest entities and none that require consolidation.

Related Parties - The company and Kobayashi Pharmaceutical Co., Ltd. are parties to an equally-owned joint venture, Medicon Inc. (“Medicon”), which distributes Bard’s products in Japan. Bard accounts for the joint venture under the equity method of accounting. All transactions with Medicon are denominated in U.S. dollars. Bard recorded sales to Medicon of \$128.7 million, \$122.5 million and \$117.2 million for the years ended 2010, 2009 and 2008, respectively. Bard eliminates the intercompany profits on sales to Medicon until Medicon sells Bard’s products to a third party. Bard recorded Medicon equity income of \$3.6 million, \$2.3 million and \$1.9 million for the years ended 2010, 2009 and 2008, respectively. Bard received dividends from Medicon of \$1.6 million, \$1.5 million and \$1.3 million for the years ended December 31, 2010, 2009 and 2008, respectively. Bard’s investment in Medicon was \$20.0 million and \$18.0 million at December 31, 2010 and 2009, respectively. Included in accounts receivable are trade receivables due from Medicon for purchases of Bard’s products of \$33.4 million and \$33.8 million at December 31, 2010 and 2009, respectively.

Use of Estimates in the Preparation of Financial Statements - The preparation of these financial statements in conformity with accounting principles generally accepted in the United States requires the company to make estimates and judgments that affect reported amounts of assets, liabilities, revenues and expenses, and the related disclosure of contingent assets and liabilities at the date of the financial statements. The company evaluates these estimates and judgments on an ongoing basis and bases its estimates on historical experience, current conditions and various other assumptions that are believed to be reasonable under the circumstances. The results of these estimates form the basis for making judgments about the carrying values of assets and liabilities as well as identifying and assessing the accounting treatment with respect to commitments and contingencies. Actual results may differ from these estimates under different assumptions or conditions.

Foreign Currency - Net assets of foreign subsidiaries are translated into U.S. dollars at current year-end rates, and revenues, costs and expenses are translated at average monthly rates during each monthly period. Net exchange gains or losses resulting from the translation of foreign financial statements and the effect of exchange rate changes on intercompany transactions of a long-term investment nature are accumulated and credited or charged directly to a separate component of shareholders’ investment. Any foreign currency gains or losses related to monetary assets are charged to other (income) expense, net. Foreign currency translation gains included in accumulated other comprehensive loss were \$29.0 million and \$67.4 million at December 31, 2010 and 2009, respectively.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Revenue Recognition - The company's net sales represent gross sales invoiced to both end-user customers and independent distributors, less certain related charges, including discounts, returns, rebates and other allowances. The company recognizes product revenue when persuasive evidence of a sales arrangement exists, title and risk of loss have transferred, the selling price is fixed or determinable, contractual obligations have been satisfied and collectibility is reasonably assured. Generally, sales to end-user customers and European distributors are recognized at the point of delivery, and sales to domestic distributors are recognized at the time of shipment. In certain circumstances, end-user customers may require the company to maintain consignment inventory at the customer's location. In the case of consignment inventories, revenue and associated cost are recognized upon the notification of usage by the customer.

Charges for discounts, returns, rebates and other allowances are recognized as a deduction from revenue on an accrual basis in the period in which the revenue is recorded. The accrual for product returns, discounts and other allowances is based on the company's history. The company allows customers to return defective or damaged products. Historically, product returns have not been material. The company grants sales rebates to independent distributors based upon the distributor's reporting of end-user sales and pricing. Sales rebates are accrued by the company in the period in which the sale is recorded. The company's rebate accrual is based on its history of actual rebates paid. In estimating rebate accruals, the company considers the lag time between the point of sale and the payment of the distributor's rebate claim, distributor-specific trend analysis and contractual commitments including stated rebate rates. The company's reserves for rebates are reviewed at each reporting period and adjusted to reflect data available at that time. The company adjusts reserves to reflect any differences between estimated and actual amounts. Such adjustments impact the amount of net product sales revenue recognized by the company in the period of adjustment.

Shipping and Handling Costs - Shipping and handling costs are included in cost of goods sold.

Advertising Costs - Costs related to advertising are expensed as incurred. Advertising expense was \$3.3 million, \$2.5 million and \$3.1 million in 2010, 2009 and 2008, respectively, and is included in marketing, selling and administrative expense.

Research and Development - Research and development expenses are comprised of expenses related to internal research and development activities, milestone payments for third-party research and development activities and purchased research and development ("purchased R&D") costs arising from acquisitions not accounted for as a business combination subsequent to January 1, 2009. All internal research and development costs are expensed as incurred.

Share-Based Compensation - Share-based compensation cost is measured at the grant date based on the fair value of the award. Generally, compensation expense is recognized over the vesting period. As share-based compensation expense is based on awards ultimately expected to vest, the amount of expense has been reduced for estimated forfeitures.

Cash Equivalents - Cash equivalents consist of highly liquid investments purchased with an original maturity of three months or less and amounted to \$588.1 million and \$644.1 million at December 31, 2010 and 2009, respectively.

Accounts Receivable - In addition to trade receivables, accounts receivable included \$37.1 million and \$33.1 million of non-trade receivables at December 31, 2010 and 2009, respectively.

Inventories - Inventories are stated at the lower of cost or market. For most domestic businesses, cost is determined using the last-in-first-out ("LIFO") method. For all other inventories, cost is determined using the first-in-first-out ("FIFO") method. The difference between the inventory valuation under the LIFO method and the FIFO method is not significant.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Depreciation - Depreciation is provided over the estimated useful lives of depreciable assets using the straight-line method. The estimated useful lives primarily range from three to 40 years for buildings and improvements and three to 20 years for machinery and equipment. Depreciation expense was \$51.8 million in 2010, \$51.0 million in 2009 and \$51.3 million in 2008.

Software Capitalization - Internally used software, whether purchased or developed, is capitalized and amortized using the straight-line method over an estimated useful life of five to seven years. Capitalized software costs are included in machinery and equipment. The company capitalizes certain costs associated with internal-use software such as the payroll costs of employees devoting time to the projects and external direct costs for materials and services. Costs associated with internal-use software are expensed during the design phase until the point at which the project has reached the application development stage. Subsequent additions, modifications or upgrades to internal-use software are capitalized only to the extent that they allow the software to perform a task it previously did not perform. Software maintenance and training costs are expensed in the period in which they are incurred. The company capitalized \$4.7 million, \$4.5 million and \$1.7 million of internal-use software for the years ended December 31, 2010, 2009 and 2008, respectively. Depreciation expense for capitalized software was \$10.7 million, \$11.1 million and \$11.5 million in 2010, 2009 and 2008, respectively.

Goodwill and Other Intangible Assets - Goodwill is tested for impairment annually or more frequently if impairment indicators arise. The company assigns goodwill recorded in connection with acquisitions to its four reporting units, each of which is one level below the company's single reporting segment. Other intangible assets, including core technologies and patents, are amortized on a straight-line basis over their estimated useful lives ranging from seven to 21 years with a weighted average of 13 years. When events or circumstances indicate that the carrying amount of intangible assets may not be recoverable, the company will assess recoverability from future operations using undiscounted cash flows derived from the lowest appropriate asset groupings. To the extent carrying value exceeds the undiscounted cash flows, impairments are recognized in operating results to the extent that the carrying value exceeds the fair value, which is determined based on the net present value of estimated future cash flows.

Income Taxes - Deferred tax assets and liabilities are recognized based on the expected future tax consequences of temporary differences between the carrying amounts of assets and liabilities for financial and income tax reporting purposes.

The company regularly assesses its tax positions to determine whether the benefits of tax positions are more likely than not of being sustained upon audit. These positions relate to transfer pricing, the deductibility of certain expenses, intercompany transactions and other matters. Although the outcome of tax audits is uncertain, provisions for income taxes have been made for potential liabilities resulting from such matters. Any reserves are used or reversed once the statutes of limitation have expired or the tax position is effectively settled. The company's policy is to classify interest and penalties related to unrecognized tax positions as income tax expense.

Income Statement Presentation of Taxes Collected from Customers and Remitted to Government Authorities - The company follows a net basis policy with regard to sales, use, value added or any other tax collected from customers and remitted to government authorities, which excludes them from both net sales and expenses.

Treasury Stock - The company accounts for treasury stock purchases as retirements by reducing retained earnings for the cost of the repurchase. Reissuances of these treasury shares are accounted for as new issuances. There were 30.8 million and 20.1 million treasury shares at December 31, 2010 and 2009, respectively.

Derivative Instruments - On January 1, 2009, the company adopted Financial Accounting Standards Board ("FASB") guidance on enhanced disclosure requirements regarding the company's derivative and hedging

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

activities. This guidance required disclosures about (a) how and why the company uses derivative instruments, (b) the accounting for derivative instruments and related hedged items, and (c) how derivative instruments and related hedged items affect the company's financial condition, financial performance and cash flow (see Note 6 of the notes to consolidated financial statements).

The company recognizes all derivative instruments at fair value in its consolidated balance sheets. Changes in fair value of derivative instruments are recorded in each period in current earnings or accumulated other comprehensive loss depending on whether the derivative instrument is designated as part of a hedged transaction, and if so, the type of hedge transaction.

The company's objective in managing its exposures to foreign currency fluctuations is to minimize earnings and cash flow volatility associated with future intercompany receivables and payables denominated in foreign currencies. These risks are managed using derivative instruments, mainly through forward currency and option contracts. The company does not utilize derivative instruments for trading or speculation purposes. No derivative instruments extend beyond December 2011. All of these derivative instruments are designated and qualify as cash flow hedges. The effective portion of the changes in fair value of the derivative instruments' gains or losses are reported as a component of accumulated other comprehensive loss and reclassified into earnings on the same line item associated with the forecasted transaction and in the same period or periods when the forecasted transaction affects earnings. At December 31, 2010, all of these derivative instruments used were highly effective hedging instruments because they were denominated in the same currency as the hedged item and because the maturities of the derivative instruments matched the timing of the hedged items.

When applicable, foreign currency exposures that arise from remeasuring intercompany loans denominated in currencies other than the functional currency are mitigated through the use of forward contracts. Hedges of these foreign exchange exposures are not designated as hedging instruments for accounting purposes. The gains or losses on these instruments are recognized in earnings and are effectively offset by the gains or losses on the underlying hedged items.

The company may use interest rate swap contracts to manage interest rate exposure on its long-term debt. The company entered into an interest rate swap contract with respect to its \$250 million tranche of senior unsecured notes. Under this interest rate swap contract, the company exchanges, at specified intervals, the difference between fixed and floating interest amounts calculated by reference to a notional principal amount of this tranche. The company's swap contract is designated and qualifies as a fair value hedge. Changes in the fair value of the swap contract offset changes in the fair value of the fixed rate debt due to changes in market interest rates.

Reclassifications - Certain prior year amounts have been reclassified to conform to the current year presentation.

2. Acquisitions and Divestiture

The company acquires businesses, products and technologies to augment its existing product lines and periodically divests product lines for strategic reasons. Unaudited pro forma financial information has not been presented because the effects of these acquisitions and divestitures were not material on either an individual or aggregate basis.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Acquisitions

On January 1, 2009, the company adopted FASB guidance on accounting for business combinations. This guidance requires an acquirer to measure the identifiable assets acquired and liabilities assumed at their fair value on the acquisition date, with goodwill being the excess value of consideration paid over the fair value of the net identifiable assets acquired. This guidance also requires that purchased R&D be capitalized and recorded as an intangible asset at the acquisition date, that contingent consideration be recorded at fair value at the acquisition date and that transaction costs be expensed.

On July 6, 2010, the company acquired all of the outstanding stock of SenoRx, Inc. (“SenoRx”) for a purchase price of \$11.00 per share in cash, totaling \$213.5 million. SenoRx was a public company engaged in the manufacture and sale of minimally-invasive medical devices used in the percutaneous diagnosis and treatment of breast cancer. SenoRx’s products expand Bard’s existing biopsy product portfolio to include the EnCor® stereotactic-guided and MRI-guided breast biopsy systems, the Gel Mark® line of breast tissue markers and the Contura® brachytherapy catheter used in the treatment of breast cancer. Substantially all of the purchase price for the acquisition was funded through the issuance of commercial paper. The acquisition was accounted for as a business combination, and the results of operations have been included in the company’s results since the acquisition date. The purchase price allocation at fair value resulted in the recognition of: deferred tax assets of \$42.3 million, consisting primarily of net operating loss carryforwards; core technologies of \$95.1 million; deferred tax liabilities of \$44.0 million, primarily associated with core technologies; and other net assets of \$23.5 million consisting of cash, accounts receivable and inventories. An indefinite-lived intangible asset of \$12.8 million was also recorded primarily for the next generation of the EnCor® stereotactic-guided breast biopsy system. The fair value of this intangible asset was determined based upon the present value of expected future cash flows adjusted for the probability of technological and commercial risk, utilizing a risk-adjusted discount rate. The excess of the purchase price over fair value of the acquired net assets was recorded as goodwill of \$83.8 million. The goodwill recognized is attributable to expected cost synergies and other benefits created by the expanded and more comprehensive biopsy product portfolio of the company as a result of the acquisition. The goodwill is not deductible for tax purposes. Core technologies are being amortized over their estimated useful lives of approximately 10 years. The company incurred acquisition related transaction costs of \$3.2 million, which were expensed to marketing, selling and administrative expense. In connection with this acquisition, the company recorded charges of \$6.9 million (\$4.2 million after tax) to other (income) expense, net, associated with the termination of existing SenoRx commercial agreements, the settlement of disputes that arose under certain of these agreements and integration costs.

On May 20, 2010, the company, through its wholly-owned subsidiary, Bard Holdings Limited, acquired the remaining 15% of the common shares that it did not already own of its Malaysian manufacturing operation, Bard Sendirian Berhad, for \$25.9 million. In connection with the transaction, Bard’s shareholder’s investment was reduced by \$13.2 million, which represented the excess of the cash paid over the carrying amount of the noncontrolling interest.

On April 12, 2010, the company acquired all of the outstanding stock of FlowCardia, Inc. (“FlowCardia”), a privately-held company engaged in the design and manufacture of endovascular products used in the treatment of chronic total occlusions (“CTOs”), for total consideration of \$80.1 million. FlowCardia’s products complement Bard’s percutaneous transluminal angioplasty products and peripheral stents. FlowCardia’s Crosser® product line of clinically-proven catheters deliver vibrational energy, enabling physicians to cross CTOs and allow for subsequent therapies, such as balloon angioplasty, stent implantation and atherectomy. The acquisition was accounted for as a business combination, and the results of operations have been included in the company’s results since the acquisition date. The purchase price allocation at fair value resulted in the recognition of:

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

deferred tax assets of \$18.1 million, consisting primarily of net operating loss carryforwards; core technologies of \$46.4 million; deferred tax liabilities of \$19.3 million primarily associated with core technologies; and other net assets of \$3.0 million. In addition, an indefinite-lived intangible asset of \$4.7 million was recorded for follow-on product applications for CTOs. The excess of the purchase price over fair value of the acquired net assets was recorded as goodwill of \$27.2 million. The goodwill recognized is attributable to complementary product sales opportunities and expected cost synergies. The goodwill is not deductible for tax purposes. Core technologies are being amortized over their estimated useful lives of approximately 11 years.

On November 18, 2009, the company acquired all of the outstanding stock of Y-Med, Inc. (“Y-Med”), a privately-held company focused on the development and manufacture of specialty percutaneous transluminal angioplasty (“PTA”) catheters, for total consideration of \$35.3 million. Y-Med’s products complement Bard’s peripheral stents and existing PTA products. Y-Med’s VascuTrak™ PTA dilatation catheter product line is designed to treat highly stenotic and calcified lesions in patients with lower-limb arterial disease. The acquisition was accounted for as a business combination and the results of operations have been included in the company’s results since the acquisition date. The purchase price allocation at fair value resulted in: the recognition of deferred tax assets of \$2.3 million consisting of net operating loss carryforwards; core technologies of \$28.4 million; deferred tax liabilities of \$10.8 million primarily associated with core technologies; and other net assets of \$2.7 million. The excess of the purchase price over fair value of the acquired net assets was recorded as goodwill of \$12.7 million. The goodwill is not deductible for tax purposes. Core technologies are being amortized over their estimated useful lives of approximately 10 years. In connection with this acquisition, the company recorded a cost of \$3.2 million (\$2.0 million after tax) associated with the termination of certain existing Y-Med agreements. This termination cost was recorded to other (income) expense, net.

On June 15, 2009, the company acquired worldwide rights and related assets of the hernia products business of Brennen Medical, LLC for \$17.0 million. The acquisition included technology for a non-crosslinked xenograft device, which expanded Bard’s product offerings in hernia repair. The acquisition was accounted for as a business combination, and the results of operations have been included in the company’s results since the acquisition date. The purchase price allocation at fair value resulted in the recognition of core technologies of \$15.5 million and other assets of \$1.5 million, which includes \$0.9 million of goodwill. Core technologies are being amortized over their estimated useful lives of approximately 13 years. In connection with this acquisition, the company discontinued the sale of an existing xenograft device and recorded a related non-cash charge of \$5.7 million (\$5.2 million after tax). This charge consisted of acceleration of remaining depreciation costs related to property, plant and equipment of \$4.5 million, which was recorded to other (income) expense, net, and the write-off of inventory of \$1.2 million, which was recorded to cost of goods sold.

On June 5, 2008, the company acquired all of the outstanding shares of Specialized Health Products International, Inc. (“Specialized Health Products”) for a purchase price of \$1.00 per share in cash, totaling \$68.4 million, plus direct acquisition costs of \$2.3 million. Specialized Health Products manufactures and markets vascular access products, including winged infusion sets, which are used to deliver therapeutic agents through vascular access ports. The acquisition was a strategic addition to Bard’s port franchise. The acquisition was accounted for as a business combination, and the results of operations have been included in the company’s results since the acquisition date. The purchase price allocation resulted in: the recognition of core technologies of \$34.0 million; patents of \$11.2 million; deferred tax assets of \$9.1 million consisting of a net operating loss carryforward; other net assets of \$12.0 million primarily consisting of cash, inventory and accounts receivable; and deferred tax liabilities of \$15.8 million primarily associated with acquired intangible assets. The acquired intangible assets are being amortized over their weighted average useful lives of approximately 12 years. The excess of the purchase price over the fair value of the assets acquired of \$20.2 million was recorded as goodwill, which is not deductible for income tax purposes.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

On January 11, 2008, the company acquired the assets of the LifeStent® family of stents from Edwards Lifesciences Corporation for a net cash payment of \$73.3 million, plus direct acquisition costs of \$3.6 million, and up to \$65.0 million in contingent milestone payments. The contingent milestone payments consisted of \$50.0 million related to regulatory approvals and \$15.0 million related to the transfer of manufacturing operations to Bard. The acquisition was a strategic addition to Bard's portfolio of non-coronary stent and stent graft products that is complementary to the company's current products, call points and technology platforms. The acquisition was accounted for as a business combination, and the results of operations have been included in the company's results since the acquisition date. The fair value of the assets acquired was approximately \$102.3 million. The difference between the fair value of the assets acquired and the initial payments was recognized as an acquisition related liability. This liability was reduced upon the payment of the contingent milestone payments with the remaining amounts recorded as a deferred tax asset and goodwill.

The purchase price allocation resulted in the recognition of core technologies of \$52.0 million; customer relationships of \$9.1 million; other assets of \$13.1 million consisting primarily of inventory and equipment; an acquisition related liability of \$25.4 million; and deferred tax liabilities of \$16.3 million. Core technologies and customer relationships are being amortized over the estimated useful lives of 15 and 8 years, respectively. In addition, \$44.4 million was allocated to purchased R&D for which technological feasibility had not been established and no alternative future use existed at the acquisition date. The purchased R&D relates to the Pre-Market Approval ("PMA") submitted to the U.S. Food and Drug Administration ("FDA") for use of the LifeStent® products in the superficial femoral artery and proximal popliteal artery. The company recorded a charge for purchased R&D in research and development expense in its consolidated statements of income. In connection with the write-off of purchased R&D, the company recorded a tax benefit of \$16.4 million. The value assigned to purchased R&D was determined based upon the present value of expected future cash flows associated with the product adjusted for the probability of product approval and discounted at a risk-adjusted rate. The ongoing activity with respect to the future development for this product is not expected to be material to the company's research and development expense.

The contingent milestone payment related to regulatory approvals was amended, which resulted in \$23.0 million being paid in December 2008. This payment resulted in a decrease to the acquisition related liability of \$14.5 million and an increase to deferred tax assets of \$8.5 million. The company received PMA approval in February 2009 for use of the LifeStent® in the superficial femoral artery and proximal popliteal artery, which resulted in a contingent milestone payment of \$27.0 million. This payment resulted in a decrease to the acquisition related liability of \$10.9 million, an increase to deferred tax assets of \$7.8 million, and an increase to goodwill of \$8.3 million. The \$15.0 million contingent milestone payment related to the transfer of manufacturing operations to Bard was paid in September 2009. The payment resulted in an increase to goodwill.

Asset Disposition

On June 12, 2008, the company decided to discontinue the sale of its Salute II hernia fixation device. This decision was based on a strategic review, which considered the continued technical challenges associated with the product's manufacturing and its overall profitability, as well as an assessment of alternative hernia fixation devices under development. In connection with this decision, the company recorded a non-cash charge of \$40.5 million (\$34.9 million after tax). This charge consisted of the write-off of patents of \$34.6 million and machinery and equipment of \$2.2 million, which in total were recorded to other (income) expense, net, and inventory of \$3.7 million, which was recorded to cost of goods sold.

3. Restructuring

On December 9, 2010, the company committed to a plan (the "2010 Restructuring Plan") to improve its overall cost structure and enhance operational effectiveness. The 2010 Restructuring Plan includes the

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

realignment of certain manufacturing, sales and marketing, and administrative functions. In connection with this plan, the company recorded employee separation costs under the company's existing severance programs and other costs related to one-time employee termination benefits of \$16.7 million (\$11.4 million after tax). Substantially all of these costs are expected to be cash expenditures. At December 31, 2010, the entire liability related to this restructuring charge was outstanding. The company expects activities under the 2010 Restructuring Plan to be substantially complete by the end of 2011.

On April 22, 2009, the company announced a plan (the "2009 Restructuring Plan") to reduce its overall cost structure and improve efficiency. The 2009 Restructuring Plan included the consolidation of certain businesses in the United States and the realignment of certain sales and marketing functions outside the United States. The 2009 Restructuring Plan resulted in the elimination of certain positions and other employee terminations worldwide. The company recorded employee separation costs under the company's existing severance programs and other costs primarily related to one-time termination benefits offered under this plan. The total cost of the 2009 Restructuring Plan was \$15.4 million (\$10.2 million after tax). Substantially all of these costs were cash expenditures. At December 31, 2010, no liability related to this restructuring charge remained.

4. Income Taxes

The components of income before income taxes for the following years ended December 31 consisted of:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
(dollars in millions)			
United States	\$455.8	\$481.3	\$348.0
Foreign	261.9	190.2	204.7
	<u>\$717.7</u>	<u>\$671.5</u>	<u>\$552.7</u>

The income tax provision for the following years ended December 31 consisted of:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
(dollars in millions)			
Current provision			
Federal	\$168.3	\$182.8	\$120.4
Foreign	31.8	33.6	29.4
State	10.3	8.7	16.5
	<u>210.4</u>	<u>225.1</u>	<u>166.3</u>
Deferred (benefit) provision			
Federal	3.7	(13.3)	(25.0)
Foreign	(7.2)	(0.1)	(3.4)
State	1.2	(1.6)	(4.5)
	<u>(2.3)</u>	<u>(15.0)</u>	<u>(32.9)</u>
	<u>\$208.1</u>	<u>\$210.1</u>	<u>\$133.4</u>

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Deferred tax assets and deferred tax liabilities at December 31 consisted of:

	<u>2010</u>	<u>2009</u>
(dollars in millions)		
Deferred tax assets		
Employee benefits	\$158.2	\$137.4
Inventory	13.8	12.6
Receivables and rebates	24.2	24.7
Accrued expenses	16.6	3.4
Loss carryforwards and credits	73.8	27.7
Other	—	8.6
	<u>286.6</u>	<u>214.4</u>
Gross deferred tax assets		
Valuation allowance	(36.2)	(29.4)
	<u>250.4</u>	<u>185.0</u>
Deferred tax liabilities		
Amortization	97.0	40.0
Accelerated depreciation	40.3	37.8
Other	7.0	—
	<u>144.3</u>	<u>77.8</u>
	<u>\$106.1</u>	<u>\$107.2</u>

At December 31, 2010, the company had federal net operating loss carryforwards of \$120.8 million, which generally expire between 2013 and 2031 and state net operating loss carryforwards of \$176.1 million, which expire between 2011 and 2031. The company also had various tax credits of \$10.0 million, with an indefinite life and \$8.9 million, which expire between 2013 and 2031.

The company records valuation allowances to reduce its deferred tax assets to the amount that it believes is more likely than not to be realized. The company considers future taxable income and the periods over which it must be earned in assessing the need for valuation allowances. In the event the company determines it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax assets would be charged to expense in the period such determination was made. At December 31, 2010, the valuation allowance primarily related to state net operating loss carryforward and credits, and to certain other state deferred tax assets.

A reconciliation between the effective income tax rate and the federal statutory rate for the following years ended December 31 is:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Federal statutory rate	35%	35%	35%
State taxes, net of federal benefit	2%	1%	2%
Operations taxed at less than U.S. rate	(9)%	(5)%	(8)%
Other, net	1%	—	(5)%
	<u>29%</u>	<u>31%</u>	<u>24%</u>

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The company's foreign tax incentives consist of incentive tax grants in Puerto Rico and Malaysia. The company's previous grant in Malaysia expired on June 30, 2008, and a new grant was entered into on March 1, 2010 that will expire in 2015. The incentive tax grant in Puerto Rico will expire in 2016. The approximate dollar and per share effects of the Puerto Rican and Malaysian grants are as follows:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
(dollars in millions, except per share amounts)			
Tax benefit	\$44.6	\$24.0	\$37.5
Per share benefit	\$0.47	\$0.24	\$0.37

A tax benefit from an uncertain tax position may be recognized only if it is more likely than not that the position is sustainable based on its technical merits. The tax benefit of a qualifying position is the largest amount of tax benefit that is greater than 50% likely of being realized upon settlement with a taxing authority having full knowledge of all relevant information. A reconciliation of the gross amounts of unrecognized tax benefits, excluding interest and penalties, is as follows:

	<u>2010</u>	<u>2009</u>
(dollars in millions)		
Balance, January 1	\$53.2	\$41.3
Additions related to prior year tax positions	2.1	5.8
Reductions related to prior year tax positions	(7.4)	(2.6)
Additions for tax positions of the current year	8.9	8.7
Settlements	(0.7)	—
Lapse of statutes of limitation	(2.5)	—
Balance, December 31	<u>\$53.6</u>	<u>\$53.2</u>

The company operates in multiple taxing jurisdictions and faces audits from various tax authorities regarding transfer pricing, the deductibility of certain expenses, intercompany transactions and other matters. As of December 31, 2010, the liability for unrecognized tax benefits related to federal, state and foreign taxes was \$53.6 million (of which \$44.6 million would impact the effective tax rate if recognized), plus \$11.4 million of accrued interest. As of December 31, 2009, the liability for unrecognized tax benefits was \$53.2 million plus \$11.3 million of accrued interest. Interest and penalties associated with uncertain tax positions amounted to \$0.7 million of expense in 2010, \$2.6 million of expense in 2009, and a \$2.8 million credit in 2008.

The company is currently under examination in several tax jurisdictions and remains subject to examination until the statutes of limitation expire for the applicable tax jurisdiction. Within specific countries, the company may be subject to audit by various tax authorities, or subsidiaries operating within the country may be subject to different statutes of limitation expiration dates. As of December 31, 2010, a summary of the tax years that remain subject to examination in the company's major tax jurisdictions are:

United States – federal	2005 and forward
United States – states	2003 and forward
Germany	2006 and forward
Malaysia	2005 and forward
Puerto Rico	2006 and forward
United Kingdom	2005 and forward

The company's federal tax filings have been examined by the U.S. Internal Revenue Service ("IRS") for calendar years ending prior to 2005. In 2008, the company's income tax provision was reduced by \$28.3 million as a result of the completion of the IRS examination for tax years 2003 and 2004. The remaining two tax positions under review

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

through the administrative appeals process for those years were closed in 2010. Depending upon open tax examinations and/or the expiration of applicable statutes of limitation, the company believes that it is reasonably possible that the total amount of unrecognized tax benefits may decrease by up to \$23.9 million within the next 12 months.

At December 31, 2010, the company had not provided for income taxes on the undistributed earnings of its foreign operations of approximately \$1.3 billion as it is the company's intention to permanently reinvest these undistributed earnings.

5. Earnings per Common Share

Earnings per share ("EPS") is computed under the two-class method, which requires nonvested share-based payment awards that have non-forfeitable rights to dividend or dividend equivalents to be treated as a separate class of securities in calculating EPS. Participating securities include nonvested restricted stock, nonvested shares or units under the management stock purchase program, and certain other nonvested stock-based awards.

EPS is computed using the following common share information for the following years ended December 31:

(dollars and shares in millions)	<u>2010</u>	<u>2009</u>	<u>2008</u>
EPS Numerator:			
Net income attributable to common shareholders	\$509.2	\$460.1	\$416.5
Less: Income allocated to participating securities	<u>5.5</u>	<u>5.0</u>	<u>5.8</u>
Net income available to common shareholders	<u>\$503.7</u>	<u>\$455.1</u>	<u>\$410.7</u>
EPS Denominator:			
Weighted average common shares outstanding	93.4	97.7	99.5
Dilutive common share equivalents from share-based compensation plans	<u>1.2</u>	<u>1.3</u>	<u>2.0</u>
Weighted average common and common equivalent shares outstanding, assuming dilution	<u>94.6</u>	<u>99.0</u>	<u>101.5</u>

6. Financial Instruments

Foreign Exchange Derivative Instruments

The company enters into readily marketable forward and option contracts with financial institutions to help reduce its exposure to foreign currency exchange rate fluctuations. These contracts limit volatility because gains and losses associated with foreign exchange rate movements are generally offset by movements in the underlying hedged item. The notional value of the company's forward currency and option contracts was \$182.7 million and \$111.7 million at December 31, 2010 and 2009, respectively.

Interest Rate Derivative Instruments

On December 20, 2010, the company entered into an interest rate swap contract in connection with its debt offering. See Note 9 of the notes to consolidated financial statements. The swap contract effectively converts the 2.875% fixed-rate notes to a floating-rate instrument. The notional value of the company's interest rate swap contract is \$250.0 million.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The location and fair values of derivative instruments segregated between those derivatives that are designated as hedging instruments and those that are not designated as hedging instruments at December 31, are as follows:

<u>Derivatives Designated as Hedging Instruments</u> (dollars in millions)	<u>Balance Sheet Location</u>	<u>Fair Value of Derivatives</u>	
		<u>2010</u>	<u>2009</u>
Forward currency contracts	Other current assets	\$2.8	\$ 1.5
Option contracts	Other current assets	1.5	0.9
Interest rate swap contract	Other assets	0.7	—
		<u>\$5.0</u>	<u>\$ 2.4</u>
 Forward currency contracts	 Accrued expenses	 \$1.1	 \$—
		<u>\$1.1</u>	<u>\$—</u>
 <u>Derivatives Not Designated as Hedging Instruments</u> (dollars in millions)			
Forward currency contracts	Other assets	\$1.8	\$—
		<u>\$1.8</u>	<u>\$—</u>

The location and amounts of gains and losses on derivative instruments designated as cash flow hedges and the impact on the consolidated statement of shareholders' investment for the years ended December 31, are as follows:

(dollars in millions)	<u>Gain/(Loss) Recognized in Other Comprehensive Income</u>		<u>Location of Gain/(Loss) Reclassified from Accumulated Other Comp. Loss to Income</u>	<u>Gain/(Loss) Reclassified from Accumulated from Accumulated Other Comp. Loss to Income</u>	
	<u>2010</u>	<u>2009</u>		<u>2010</u>	<u>2009</u>
	Forward currency contracts	\$0.1	\$ 3.6	Costs of goods sold	\$0.4
Option contracts	0.8	(8.4)	Costs of goods sold	0.4	5.0
	<u>\$0.9</u>	<u>\$(4.8)</u>		<u>\$0.8^(A)</u>	<u>\$ 3.0^(A)</u>

^(A) The tax effect of the amount reclassified from accumulated other comprehensive loss to income was \$0.1 million and \$0.4 million at December 31, 2010 and 2009, respectively.

At December 31, 2010, the company had losses of approximately \$0.1 million in accumulated other comprehensive loss in the consolidated balance sheet that are expected to be reclassified into earnings in 2011.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The location and amounts of gains and losses on the derivative instrument designated as a fair value hedge for the year ended December 31, 2010 are as follows:

	<u>Income Statement Location</u>	<u>Gain Recognized on Swap</u>	<u>(Loss) Recognized on Long-Term Debt</u>
(dollars in millions)			
Interest rate swap contract	Interest expense	<u>\$0.7</u>	<u>\$(0.7)</u>

The location and amounts of gains and losses on derivative instruments not designated as hedging instruments for the year ended December 31, 2010 are as follows:

	<u>Income Statement Location</u>	<u>Gain Recognized in Earnings</u>
(dollars in millions)		
Forward currency contracts ^(A)	Other (income) expense, net	<u>\$1.8</u>

^(A) These derivative contracts mitigate changes in the value of remeasured foreign currency denominated monetary loans attributable to changes in foreign currency exchange rates.

Financial Instruments Measured at Fair Value on a Recurring Basis

Fair value is defined as the exit price that would be received to sell an asset or paid to transfer a liability. Fair value is a market-based measurement that should be determined using assumptions that market participants would use in pricing an asset or liability. The fair value guidance establishes a three-level hierarchy to prioritize the inputs used in measuring fair value. The levels within the hierarchy range from Level 1 having the highest priority to Level 3 having the lowest.

The following table summarizes financial instruments measured at fair value on a recurring basis at December 31:

	<u>2010</u>	<u>2009</u>
(dollars in millions)		
Forward currency contracts	\$3.5	\$1.5
Option contracts	1.5	0.9
Interest rate swap contract	0.7	—

The fair values of these contracts were measured using significant other observable inputs and valued by reference to similar financial instruments, adjusted for restrictions and other terms specific to each contract. All of these financial instruments are categorized as Level 2 under the fair value hierarchy.

Financial Instruments Not Measured at Fair Value

The fair value of commercial paper borrowings of \$80.5 million at December 31, 2010 approximates carrying value.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The estimated fair value of long-term debt including the effect of the related swap contract was \$937.7 million and \$163.1 million at December 31, 2010 and 2009, respectively. The fair value was estimated using dealer quotes for similarly-rated debt instruments over the remaining contractual term of the company's obligation. Long-term debt is categorized as Level 2 under the fair value hierarchy.

Concentration Risks

The company is potentially subject to financial instrument concentration of credit risk through its cash equivalents and accounts receivable. The company performs periodic evaluations of the relative credit standing of these financial institutions and limits the amount of credit exposure with any one institution. Concentrations of risk with respect to trade accounts receivable are limited due to the large number of customers dispersed across many geographic areas. However, accounts receivable balances include sales to government-supported healthcare systems outside the United States. The company monitors these receivables for potential collection risks. The company is experiencing significant delays in the collection of accounts receivable associated with the national healthcare system in Greece, which amounted to \$32.8 million and \$36.7 million, at December 31, 2010 and December 31, 2009, respectively. Due to the continued challenges with the financial stability and creditworthiness of Greece, the company recorded a write-down on these receivables of \$3.8 million in the second quarter of 2010. The write-down was based on a proposal that the Greek government announced on June 15, 2010 to settle its outstanding debts from 2007 through 2009, primarily by issuing non-interest bearing bonds with maturities of one to three years. The proposal was adopted as law on August 3, 2010. On December 22, 2010, the Greek government began the process of issuing these bonds. The issuance process is ongoing and is expected to be complete in the first quarter of 2011.

Sales to distributors, which supply the company's products to many end users, accounted for approximately 32% of the company's net sales in 2010, and the five largest distributors combined, including the company's Medicon joint venture, accounted for approximately 66% of distributors' sales. One large distributor accounted for approximately 9% of the company's net sales in 2010, and approximately 10% in each of 2009 and 2008. This distributor represented gross receivables of approximately \$39.1 million and \$36.0 million as of December 31, 2010 and 2009, respectively.

7. Inventories

Inventories at December 31 consisted of:

	<u>2010</u>	<u>2009</u>
(dollars in millions)		
Finished goods	\$176.3	\$176.2
Work in process	18.6	27.1
Raw materials	114.0	92.1
	<u>\$308.9</u>	<u>\$295.4</u>

Approximately 68% of the company's inventory costs are determined using LIFO. Consigned inventory was \$29.9 million and \$30.5 million at December 31, 2010 and 2009, respectively.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

8. Other Intangible Assets

Other intangible assets at December 31 consisted of:

	2010		2009	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
(dollars in millions)				
Core technologies	\$515.8	\$(118.3)	\$364.5	\$ (83.0)
Patents	80.5	(37.3)	76.7	(31.5)
Other intangibles	<u>172.9</u>	<u>(73.3)</u>	<u>141.0</u>	<u>(61.3)</u>
	<u>\$769.2</u>	<u>\$(228.9)</u>	<u>\$582.2</u>	<u>\$(175.8)</u>

Amortization expense was \$53.1 million, \$42.5 million and \$39.6 million in 2010, 2009 and 2008, respectively. The estimated amortization expense for the years 2011 through 2015 based on the company's intangible assets as of December 31, 2010 is as follows: 2011 - \$58.8 million; 2012 - \$58.7 million; 2013 - \$57.4 million; 2014 - \$55.9 million; and 2015 - \$53.8 million.

9. Debt

Long-term debt at December 31 consisted of:

	2010	2009
(dollars in millions)		
4.40% notes due 2021	\$496.4	\$ —
2.875% notes due 2016	250.7	—
6.70% notes due 2026	<u>149.8</u>	<u>149.8</u>
	<u>\$896.9</u>	<u>\$149.8</u>

On December 20, 2010, the company issued \$750 million senior unsecured notes consisting of \$250 million aggregate principal amount of 2.875% notes due 2016 and \$500 million aggregate principal amount of 4.40% notes due 2021. Interest on the notes is payable semi-annually. The notes are redeemable in whole or in part at any time, at the company's option at the specified redemption prices or upon a change of control, as defined in the associated indenture. Net proceeds from this offering were \$740.0 million, after deducting debt offering costs, consisting of underwriting commissions and offering expenses of \$6.3 million, which were capitalized and recorded to other assets, and a debt issuance discount of \$3.7 million, which was recorded to long-term debt. The debt offering costs have been allocated proportionately to each tranche of the notes and will be amortized over their respective terms. The debt issuance discount will be amortized over the terms of the respective notes. Net proceeds from the issuance of the notes were used to fund an accelerated share repurchase ("ASR") transaction.

In connection with the offering of the notes, on December 15, 2010, the company entered into an ASR agreement with a bank to repurchase \$750 million of the company's outstanding common stock. The company received 8.1 million shares upon initial settlement under the ASR transaction. The initial settlement is subject to an adjustment related to a forward purchase contract based on the volume-weighted average share price of the company's common stock during a predetermined period of less than one year, less a discount. The fair value of the forward purchase contract of \$10.2 million was recorded to capital in excess of par value. Upon final settlement of the forward purchase contract, the company will either receive a settlement amount of additional shares of its common stock or be required to remit a settlement amount, payable, at the company's option, in cash or common stock. The payment to the bank was recorded as a decrease to shareholders' investment, consisting of decreases of \$2.0 million in common stock, \$10.2 million in capital in excess of par value, and \$737.8 million in retained earnings.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The company also maintains a \$400 million committed syndicated bank credit facility that expires in June 2012. The credit facility supports the company's commercial paper program and can be used for general corporate purposes. The facility includes pricing based on the company's long-term credit rating and includes a financial covenant that limits the amount of total debt to total capitalization. There were commercial paper borrowings of \$80.5 million at December 31, 2010 and no commercial paper borrowings at December 31, 2009.

10. Commitments and Contingencies

General

In the ordinary course of business, the company is subject to various legal proceedings and claims, including, for example, product liability matters, environmental matters, employment disputes, disputes on agreements and other commercial disputes. In addition, the company operates in an industry susceptible to significant patent legal claims. The company accounts for estimated losses with respect to legal proceedings and claims when such losses are probable and reasonably estimable. Legal costs associated with these matters are expensed as incurred. At any given time, in the ordinary course of business, the company is involved as either a plaintiff or defendant in a number of patent infringement actions. If a third party's patent infringement claim were to be determined against the company, the company might be required to make significant royalty or other payments or might be subject to an injunction or other limitation on its ability to manufacture or distribute one or more products. If a patent owned by or licensed to the company were to be determined to be invalid or unenforceable, the company might be required to reduce the value of the patent on the company's balance sheet and to record a corresponding charge, which could be significant in amount. The company believes that any of these proceedings and claims could have a material adverse effect on its business, results of operations, financial condition and/or liquidity.

The company requires limited product warranty accruals as the majority of the company's products are intended for single use. Certain of the company's products carry limited warranties that in general do not exceed one year from sale. The company accrues estimated product warranty costs at the time of sale.

Product Liability Matters

As of February 17, 2011, approximately 1,840 federal and 1,625 state lawsuits involving individual claims by approximately 3,580 plaintiffs, as well as two putative class actions in the United States and four putative class actions in various Canadian provinces, have been filed or asserted against the company with respect to its Composix® Kugel® and certain other hernia repair implant products (collectively, the "Hernia Product Claims"). One of the U.S. class action lawsuits consolidates ten previously-filed U.S. class action lawsuits. The putative class actions, none of which has been certified, seek (i) medical monitoring, (ii) compensatory damages, (iii) punitive damages, (iv) a judicial finding of defect and causation and/or (v) attorneys' fees. Approximately 1,600 of the state lawsuits, involving individual claims by a substantially equivalent number of plaintiffs, are pending in the Superior Court of the State of Rhode Island, with the remainder in various other jurisdictions. The Hernia Product Claims also generally seek damages for personal injury resulting from use of the products. The company voluntarily recalled certain sizes and lots of the Composix® Kugel® products beginning in December 2005.

On June 22, 2007, the Judicial Panel on Multidistrict Litigation transferred Composix® Kugel® lawsuits pending in federal courts nationwide into one Multidistrict Litigation ("MDL") for coordinated pre-trial proceedings in the United States District Court for the District of Rhode Island. The MDL court subsequently determined to include other hernia repair products of the company in the MDL proceeding. The first MDL trial was completed in April 2010 and resulted in a judgment for the company based on the jury's finding that the company was not liable for the plaintiff's damages. The second MDL trial was completed in August 2010 and

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

resulted in a judgment for the plaintiffs of \$1.5 million. The company expects additional trials of Hernia Product Claims to take place over the next 12 months. While the company intends to vigorously defend the Hernia Product Claims, it expects to participate in court-mandated settlement conferences beginning in March 2011 with respect to certain lawsuits pending in the Superior Court of the State of Rhode Island and, where appropriate, may enter into settlement arrangements with respect to certain of these or other claims. The company cannot give any assurances that the resolution of the Hernia Product Claims will not have a material adverse effect on the company's business, results of operations, financial condition and/or liquidity.

As of February 17, 2011, approximately 120 product liability lawsuits have been filed or asserted against the company in various federal and state jurisdictions alleging personal injuries associated with the use of the company's women's health products, principally its Avaulta® line of pelvic floor reconstruction products (collectively, the "Women's Health Product Claims"). The Women's Health Product Claims generally seek damages for personal injury resulting from use of the products. With respect to certain of these claims, the company believes that one of its suppliers has an obligation to defend and indemnify the company. On October 12, 2010, the Judicial Panel on Multidistrict Litigation transferred the Women's Health Product Claims involving Avaulta® products pending in federal courts nationwide into an MDL for coordinated pre-trial proceedings in the United States District Court for the Southern District of West Virginia. Approximately 60 of the Women's Health Product Claims involving Avaulta® products are pending in federal courts and have been or will be transferred to the MDL, with the remainder of the Women's Health Product Claims in various state or federal courts. While the company intends to vigorously defend the Women's Health Product Claims, it cannot give any assurances that the resolution of these claims will not have a material adverse effect on the company's business, results of operations, financial condition and/or liquidity.

As of February 17, 2011, product liability lawsuits involving individual claims by approximately 30 plaintiffs have been filed or asserted against the company in various federal and state jurisdictions alleging personal injuries associated with the use of the company's vena cava filter products. In addition, a putative class action lawsuit has been filed against the company in California state court on behalf of plaintiffs who are alleged to have no present injury (all lawsuits, collectively, the "Filter Product Claims"). The putative class action, which has not been certified, seeks: (i) medical monitoring; (ii) punitive damages; (iii) a judicial finding of defect and causation; and/or (iv) attorneys' fees. While the company intends to vigorously defend the Filter Product Claims, it cannot give any assurances that the resolution of these claims will not have a material adverse effect on the company's business, results of operations, financial condition and/or liquidity.

In most product liability litigations of this nature, including the Hernia Product Claims, the Women's Health Product Claims and the Filter Product Claims, plaintiffs allege a wide variety of claims, ranging from allegations of serious injury caused by the products to efforts to obtain compensation notwithstanding the absence of any injury. In the majority of these cases, the company has not yet received and reviewed complete information regarding the plaintiffs and their medical conditions, and consequently, is unable to fully evaluate the claims. The company expects that it will receive and review additional information regarding the Hernia Product Claims, the Women's Health Product Claims, the Filter Product Claims and related matters as these cases progress.

The company believes that many settlements and judgments, as well as legal defense costs, relating to product liability matters are or may be covered in whole or in part under its product liability insurance policies with a limited number of insurance carriers. In certain circumstances, insurance carriers reserve their rights with respect to coverage, or contest or deny coverage, as has occurred with respect to certain claims. When this occurs, the company intends to vigorously contest disputes with respect to its insurance coverage and to enforce its rights under the terms of its insurance policies, and accordingly, may record receivables with respect to amounts due under these policies. In connection with the Hernia Products Claims, the company is in dispute with

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

two of its excess insurance carriers relating to an aggregate of \$50 million of insurance coverage. Regardless of the outcome of these disputes (including any arbitration proceedings), the company's insurance coverage with respect to the Hernia Product Claims may be fully depleted in the next 12 months. Amounts recovered under the company's product liability insurance policies may be less than the stated coverage limits and may not be adequate to cover damages and/or costs relating to claims. In addition, there is no guarantee that insurers will pay claims or that coverage will otherwise be available.

Other Legal Matters

On November 27, 2006, the company received a subpoena issued by the U.S. Department of Health and Human Services, Office of Inspector General, under the authority of the federal healthcare fraud and false claims statutes. The subpoena seeks documents related to the company's brachytherapy business. The company has responded to the subpoena and is cooperating with the government in this matter. Although the company recently began discussions with federal authorities with respect to a potential resolution of this matter, there can be no assurance that a resolution will be reached or what the terms of any such resolution may be. The company cannot give any assurances that this matter will not have a material adverse effect on the company's business, results of operations, financial condition and/or liquidity.

On February 21, 2007, Southeast Missouri Hospital ("Southeast") filed a putative class action complaint on behalf of itself and all others similarly situated against the company and another manufacturer, Tyco International, Inc., which was subsequently dismissed from the action. The complaint was later amended to add St. Francis Medical Center ("St. Francis") as an additional named plaintiff. The action was re-named as *St. Francis Medical Center, et al. v. C. R. Bard, Inc., et al.* (Civil Action No. 1:07-cv-00031, United States District Court, Eastern District of Missouri, Southeastern District) when the court denied Southeast's motion to serve as a class representative and dismissed Southeast from the lawsuit. In September 2008, the court granted St. Francis's motion for class certification and determined the measurement period for any potential damages. St. Francis alleges that the company conspired to exclude competitors from the urological catheter market and that the company sought to maintain market share by engaging in conduct in violation of state and federal antitrust laws. St. Francis seeks injunctive relief and presented an expert report that calculates damages of up to approximately \$320 million, a figure that the company believes is unsupported by the facts. The company's expert report establishes that, even assuming a determination adverse to the company, the plaintiffs suffered no damages. In September 2009, the District Court granted the company's summary judgment motion and dismissed with prejudice all counts in this action. St. Francis appealed the Court's decision to the Eighth Circuit Court of Appeals. In August 2010, the Eighth Circuit Court of Appeals affirmed the decision of the District Court. In October 2010, the Eighth Circuit Court of Appeals granted St. Francis's request for a re-hearing of its appeal. The re-hearing is pending. The company intends to defend this matter vigorously. If, however, St. Francis is ultimately successful, any damages awarded under the federal antitrust laws will be subject to statutory trebling and St. Francis's attorneys would be entitled to an award of reasonable fees and costs. At this time, it is not possible to assess the likelihood of an adverse outcome or determine an estimate, or a range of estimates, of potential damages. The company cannot give any assurances that this matter will not have a material adverse effect on the company's business, results of operations, financial condition and/or liquidity.

In December 2007, a U.S. District Court jury in Arizona found that certain of W.L. Gore & Associates Inc.'s ("Gore") ePTFE vascular grafts and stent-grafts infringe the company's patent number 6,436,135. The jury upheld the validity of the patent and awarded the company \$185 million in past damages. The jury also found that Gore willfully infringed the patent. In a second phase of the trial, the Court ruled that Gore failed to prove

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

that the patent is unenforceable due to inequitable conduct. In March 2009, the U.S. District Court doubled the jury award to approximately \$371 million for damages through June 2007. The Court also awarded the company attorneys' fees of \$19 million and prejudgment interest of approximately \$20 million. In addition, the Court denied Gore's remaining motions, including its motions for a new trial and to set aside the jury's verdict. In July 2010, the U.S. District Court awarded the company approximately \$109 million in additional damages for the period from July 2007 through March 2009. The Court also assessed a royalty rate of between 12.5% and 20%, depending on the product, that will be used to calculate damages for Gore's infringing sales from April 2009 through the expiration of the patent. Gore has deposited with the Court an additional approximately \$200 million, representing Gore's calculation of royalties for its infringing sales through December 2010. Gore has appealed this matter to the Court of Appeals for the Federal Circuit. Because the company considers this matter a gain contingency, no amounts have been recorded as of December 31, 2010.

The company is subject to numerous federal, state, local and foreign environmental protection laws governing, among other things, the generation, storage, use and transportation of hazardous materials and emissions or discharges into the ground, air or water. The company is or may become a party to proceedings brought under various federal laws including the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), commonly known as Superfund, the Resource Conservation and Recovery Act, the Clean Water Act, the Clean Air Act and similar state laws. These proceedings seek to require the owners or operators of contaminated sites, transporters of hazardous materials to the sites and generators of hazardous materials disposed of at the sites to clean up the sites or to reimburse the government for cleanup costs. In most cases, there are other potentially responsible parties that may be liable for any remediation costs. In these cases, the government alleges that the defendants are jointly and severally liable for the cleanup costs; however, these proceedings are frequently resolved so that the allocation of cleanup costs among the parties more closely reflects the relative contributions of the parties to the site contamination. The company's potential liability varies greatly from site to site. For some sites, the potential liability is de minimis and for others the costs of cleanup have not yet been determined. Accruals for estimated losses from environmental remediation obligations generally are recognized no later than completion of the remedial feasibility study and are adjusted as further information develops or circumstances change. Costs of future expenditures for environmental remediation obligations are not discounted to their present value. Recoveries of environmental remediation costs from other parties are recorded as assets when their receipt is deemed probable. The company believes that the proceedings and claims described above will likely be resolved over an extended period of time. While it is not feasible to predict the outcome of these proceedings, based upon the company's experience, current information and applicable law, the company does not expect these proceedings to have a material adverse effect on its financial condition and/or liquidity. However, one or more of the proceedings could be material to the company's business and/or results of operations.

Accruals for product liability and other legal matters amounted to \$54.4 million and \$47.1 million at December 31, 2010 and 2009, respectively. The company also has receivables from insurance companies for unresolved matters amounting to \$54.6 million and \$33.1 million at December 31, 2010 and 2009, respectively.

The company is committed under noncancelable operating leases involving certain facilities and equipment. The minimum annual rentals under the terms of these leases are as follows: 2011 - \$22.3 million; 2012 - \$19.4 million; 2013 - \$16.3 million; 2014 - \$14.7 million; 2015 - \$10.6 million and thereafter - \$46.0 million. Total rental expense for operating leases approximated \$22.8 million in 2010, \$22.6 million in 2009 and \$21.2 million in 2008.

Effective December 31, 2009, the company entered into a settlement agreement with one of its insurance companies with respect to a previously-denied insurance claim. Pursuant to this agreement, the company secured a specified coverage commitment for the Hernia Product Claims. As a result, the company recorded a charge of \$25.0 million (\$24.5 million after tax) to other (income) expense, net, for the write-off of a related insurance receivable.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

On December 30, 2009, the company reached a settlement with an insurance company related to a legal action settled in 2006 entitled *Rochester Medical Corporation, Inc. v. C R. Bard Inc., et al.* In connection with this settlement, the company recorded to other (income) expense, net, an insurance recovery of \$18.0 million (\$11.2 million after tax).

11. Share-Based Compensation Plans

The company may grant a variety of share-based payments under the 2003 Long Term Incentive Plan of C. R. Bard, Inc. (the “2003 Plan”) and the 2005 Directors’ Stock Award Plan of C. R. Bard, Inc. (the “Directors’ Plan”) to certain directors, officers and employees. In 2009, the company changed the timing of its annual grant of share-based compensation from July to December. The total number of remaining shares at December 31, 2010 that may be issued under the 2003 Plan was 4,607,991 and under the Directors’ Plan was 57,166. Shares remaining for issuance under the 2003 Plan include 3,150,000 shares authorized by the shareholders at the company’s Annual Meeting of Shareholders on April 21, 2010. Awards under the 2003 Plan may be in the form of stock options, stock appreciation rights, limited stock appreciation rights, restricted stock, unrestricted stock and other stock-based awards. Awards under the Directors’ Plan may be in the form of stock awards, stock options or stock appreciation rights. The company has two employee stock purchase programs.

Amounts recognized for share-based compensation for the following years ended December 31 are:

	2010	2009	2008
(dollars in millions)			
Total cost of share-based compensation plans	\$58.1	\$52.3	\$53.3
Amounts capitalized in inventory and fixed assets	(1.5)	(1.6)	(1.9)
Amounts charged against income for amounts previously capitalized in inventory and fixed assets	1.6	1.7	1.7
Amounts charged against income	\$58.2	\$52.4	\$53.1
Amount of related income tax benefit recognized in income	\$21.4	\$18.2	\$18.1

As of December 31, 2010, there were \$97.2 million of unrecognized compensation expenses related to share-based payment arrangements. These costs are expected to be recognized over a weighted-average period of approximately three years. The company repurchases shares from time-to-time on the open market to satisfy share-based payment arrangements. The company has sufficient treasury shares to satisfy expected share-based payment arrangements in 2011.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Stock Options - The company grants stock options to certain employees and may grant stock options to directors with exercise prices equal to the average of the high and low prices of the company's common stock on the date of grant. These stock option awards generally have requisite service periods between four and five years, and ten-year contractual terms. Certain stock option awards provide for accelerated vesting after a minimum of two years if certain performance conditions are met. Summarized information regarding total stock option activity and amounts for the year ended December 31, 2010 is as follows:

<u>Options</u>	<u>Number of Shares</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Contractual Term (years)</u>	<u>Aggregate Intrinsic Value (millions)</u>
Outstanding - January 1	7,514,670	\$67.96		
Granted	1,182,313	85.97		
Exercised	(647,656)	52.95		
Canceled/forfeited	(106,034)	84.69		
Outstanding - December 31	<u>7,943,293</u>	\$71.64	6.3	\$160.0
Exercisable	<u>5,751,727</u>	\$66.87	5.1	\$143.3

The company uses a binomial-lattice option valuation model to estimate the fair value of stock options. The assumptions used to estimate the fair value of the company's stock option grants for the following years ended December 31 are:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Dividend yield	0.9%	0.9%	0.7%
Risk-free interest rate	1.29%	1.72%	3.28%
Expected option life in years	7.2	7.1	7.5
Expected volatility	23%	24%	26%
Option fair value	\$21.34	\$22.64	\$29.58

Compensation expense related to stock options was \$22.1 million, \$23.3 million and \$26.9 million for the years ended December 31, 2010, 2009 and 2008, respectively. At December 31, 2010, there were \$30.2 million of total unrecognized compensation costs related to nonvested stock options. These costs are expected to be recognized over a weighted-average period of approximately two years. During the years ended December 31, 2010, 2009 and 2008, 1,105,398, 1,166,246 and 676,343 options, respectively, vested with a weighted-average fair value of \$29.40, \$25.68 and \$22.89, respectively. The total intrinsic value of stock options exercised during 2010, 2009 and 2008 was \$21.3 million, \$23.2 million and \$72.0 million, respectively.

Cash received from stock option exercises for the years ended December 31, 2010, 2009 and 2008 was \$34.3 million, \$23.3 million and \$49.8 million, respectively. The actual tax benefit realized for the tax deductions from option exercises was \$7.1 million for each of the years ended December 31, 2010 and 2009, respectively, and \$24.5 million for the year ended December 31, 2008.

Restricted Stock—Restricted stock awards entitle employees to voting and dividend rights. Certain restricted stock awards have performance features. Restricted stock grants have requisite service periods of between four to seven years. Compensation expense related to restricted stock was \$21.5 million, \$13.6 million and \$12.2 million for the years ended December 31, 2010, 2009 and 2008, respectively. At December 31, 2010, there were \$41.7 million of total unrecognized compensation costs related to nonvested restricted stock awards. These costs are

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

expected to be recognized over a weighted-average period of approximately three years. The activity in the nonvested restricted stock awards for the year ended December 31, 2010 is as follows:

	<u>Number of Shares</u>	<u>Weighted Average Grant Date Fair Value</u>
Outstanding - January 1	862,139	\$81.92
Granted	297,112	85.91
Vested	(116,498)	69.49
Forfeited	(9,485)	80.94
Outstanding - December 31	<u>1,033,268</u>	\$84.48

Restricted Stock Units—Restricted stock units have requisite service periods of between four and seven years. No voting or dividend rights are associated with these grants until the underlying shares are issued upon vesting. Compensation expense related to these awards was \$4.8 million, \$4.9 million and \$3.4 million for the years ended December 31, 2010, 2009 and 2008, respectively. At December 31, 2010, there were \$19.9 million of total unrecognized compensation costs related to nonvested restricted stock unit awards. These costs are expected to be recognized over a weighted-average period of approximately four years. The activity in the nonvested restricted stock unit awards for the year ended December 31, 2010 is as follows:

	<u>Number of Units</u>	<u>Weighted Average Grant Date Fair Value</u>
Outstanding - January 1	574,018	\$71.69
Granted	162,140	80.52
Vested	(101,416)	45.66
Forfeited	(75,235)	76.71
Outstanding - December 31	<u>559,507</u>	\$78.29

Other Stock-Based Awards—The company grants stock awards to directors. Shares are generally distributed to a director in his or her year of election and vest on a pro rata basis in each year of his or her term, although additional awards may be granted with other terms. The fair value of these awards is charged to compensation expense over the directors' terms. Restrictions limit the sale or transfer of these awards until the awarded stock vests and until an additional two-year period lapses. There are voting and dividend rights associated with these awards. Compensation expense related to these stock awards was \$1.2 million, \$0.8 million and \$0.9 million for the years ended December 31, 2010, 2009 and 2008, respectively. At December 31, 2010, there were \$0.5 million of total unrecognized compensation costs related to nonvested other stock-based awards. These costs are expected to be recognized over a weighted-average period of approximately two years. At December 31, 2010 and 2009, nonvested other stock-based awards of 19,600 and 15,200 shares, respectively, were outstanding.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Management Stock Purchase Program—The company maintains a management stock purchase program under the 2003 Plan (together with a predecessor stock purchase plan, the “MSPP”). Under the MSPP, employees at a specified level may purchase, with their eligible annual bonus, common stock units at a 30% discount from the lower of the price of the common stock on July 1 of the previous year or on the date of purchase, which occurs on the date bonuses are approved by the Board of Directors. Employees make an election on or before June 30 of the previous year as to the percentage of their eligible annual bonus that will be used to purchase common stock units under the MSPP. The company’s predecessor plan provided for the purchase of shares of the company’s common stock. Employees are required to allocate at least 25% of their eligible annual bonuses to purchase common stock units under the MSPP to the extent they have not satisfied certain stock ownership guidelines. MSPP shares or units are restricted from sale or transfer for four years from the purchase date. Only shares or units corresponding to the 30% discount are forfeited if the employee’s employment terminates prior to the end of the four-year vesting period. Dividends or dividend-equivalents are paid on MSPP shares or units, and the participant has the right to vote all MSPP shares. The activity in the MSPP for the year ended December 31, 2010 is as follows:

	<u>Number of Units</u>	<u>Weighted Average Grant Date Fair Value</u>
Outstanding - January 1	194,162	\$49.84
Purchased	64,656	28.20
Vested	(34,439)	68.21
Forfeited	<u>(5,056)</u>	38.77
Outstanding - December 31	<u>219,323</u>	\$40.83

The company uses the Black-Scholes model, as a result of the option-like features of the MSPP, to estimate the expense associated with anticipated MSPP purchases. Compensation expense is recognized over a period that will end four years after purchase. The assumptions used for the following years ended December 31 are:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Dividend yield	0.9%	0.8%	0.7%
Risk-free interest rate	0.22%	0.35%	2.21%
Expected life in years	0.6	0.6	0.6
Expected volatility	20%	27%	24%
Fair value	\$27.42	\$28.20	\$32.53

Compensation expense related to this program was \$6.5 million, \$7.3 million and \$7.4 million for the years ended December 31, 2010, 2009 and 2008, respectively. At December 31, 2010, there were \$4.9 million of total unrecognized compensation costs related to nonvested MSPP shares and units. These costs are expected to be recognized over a weighted-average period of approximately two years.

Employee Stock Purchase Plan—Under the 1998 Employee Stock Purchase Plan of C. R. Bard, Inc. (“ESPP”), domestic employees and certain foreign employees can purchase Bard stock at a 15% discount to the lesser of the market price on the beginning or ending date of the six-month periods ending June 30 and December 31 of each year. Participants may elect to make after tax payroll deductions of 1% to 10% of compensation as defined by the plan up to a maximum of \$25,000 per year. The ESPP is intended to meet the requirements of Section 423 of the Internal Revenue Code of 1986, as amended. At December 31, 2010, 181,870 shares were available for purchase under the ESPP. Employee payroll deductions are for six-month periods beginning each January 1 and July 1. Shares of the company’s common stock are purchased on June 30 or December 31 or the following business day, unless either the purchase of such shares was delayed at the election of the participant or the participant’s employment was terminated. Purchased shares are restricted for sale or

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

transfer for a six-month period. All participant funds received prior to the ESPP purchase dates are held as company liabilities without interest or other increment. No dividends are paid on employee contributions until shares are purchased.

The company values the ESPP purchases utilizing the Black-Scholes model. The weighted average assumptions used for the following years ended December 31 are:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Dividend yield	0.9%	0.8%	0.7%
Risk-free interest rate	0.20%	0.30%	2.85%
Expected life in years	0.5	0.5	0.5
Expected volatility	20%	32%	23%
Fair value	\$15.70	\$18.74	\$19.41

Compensation expense related to this plan was \$2.1 million, \$2.5 million and \$2.3 million for the years ended December 31, 2010, 2009 and 2008, respectively. For the years ended December 31, 2010 and 2009, employees purchased 146,551 and 147,683 shares, respectively.

12. Pension and Other Postretirement Benefit Plans

Defined Benefit Pension Plans

The company has both tax-qualified and nonqualified, noncontributory defined benefit pension plans that together cover substantially all domestic and certain foreign employees. These plans provide benefits based upon a participant's compensation and years of service. The nonqualified plans are made up of the following arrangements: a nonqualified supplemental deferred compensation arrangement and a nonqualified excess pension deferred compensation arrangement (together, "the nonqualified plans"). The nonqualified supplemental deferred compensation arrangement provides supplemental income to key executives of the company. The benefit is determined by the accumulation of an account balance that results from a percentage of pay credit and interest. No deferrals of pay are required from participants. The balance is paid to a participant after retirement over a 15-year period. The nonqualified excess pension deferred compensation arrangement provides benefits to key employees that cannot be provided by the qualified plan due to IRS limitations.

The company amended its domestic tax qualified pension plan to provide that new hires, effective January 1, 2011 or later, will no longer be eligible to participate in the company's defined benefit plan. The company also amended its domestic defined contribution plan to provide for a new annual retirement contribution by the company for new hires beginning January 1, 2011. These amendments are not expected to have a material impact on the net pension cost of the company.

The company amended certain of its foreign tax qualified pension plans to provide that new hires, as of October 1, 2009 or later, will no longer be eligible to participate in the company's defined benefit plan. The company established a defined contribution plan for new hires beginning October 1, 2009. This amendment did not have a material impact on the net pension cost of the company.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

In 2008, the company adopted FASB guidance to measure plan assets and benefit obligations as of the date of the company's year-end. The impact of this measurement date change reduced retained earnings by \$3.0 million and increased accumulated other comprehensive (loss) income by \$0.6 million at December 31, 2008.

The change in benefit obligation, change in fair value of plan assets and funded status for the plans are as follows:

	<u>2010</u>	<u>2009</u>
(dollars in millions)		
Benefit obligation - beginning	\$348.6	\$ 284.1
Service cost	25.2	20.6
Interest cost	18.9	17.4
Actuarial loss	11.5	39.8
Benefits paid	(20.9)	(17.5)
Currency/other	(6.3)	4.2
Benefit obligation - ending	<u>\$377.0</u>	<u>\$ 348.6</u>
Fair value of plan assets - beginning	\$239.1	\$ 181.0
Actual return on plan assets	32.3	44.5
Company contributions	33.4	26.7
Benefits paid	(20.9)	(17.5)
Currency/other	(2.3)	4.4
Fair value of plan assets - ending	<u>\$281.6</u>	<u>\$ 239.1</u>
Funded status of the plans, December 31	<u>\$(95.4)</u>	<u>\$(109.5)</u>

Foreign benefit plan assets at fair value included in the preceding table were \$56.8 million and \$51.5 million at December 31, 2010 and 2009, respectively. The foreign pension plan benefit obligations included in this table were \$59.2 million and \$58.9 million at December 31, 2010 and 2009, respectively. The benefit obligation for nonqualified plans also included in this table were \$55.6 million and \$51.9 million at December 31, 2010 and 2009, respectively. The nonqualified plans are generally not funded.

At December 31, 2010 and 2009, the accumulated benefit obligation for all pension plans was \$326.5 million and \$297.4 million, respectively. At December 31, 2010 and 2009, the accumulated benefit obligation for foreign pension plans was \$47.9 million and \$47.6 million, respectively. The accumulated benefit obligation for the nonqualified plans was \$50.9 million and \$47.4 million at December 31, 2010 and 2009, respectively.

For pension plans with benefit obligations in excess of plan assets at December 31, 2010 and 2009, the fair value of plan assets was \$281.6 million and \$239.1 million, respectively, and the benefit obligation was \$377.0 million and \$348.6 million, respectively. For pension plans with accumulated benefit obligations in excess of plan assets at December 31, 2010 and 2009, the fair value of plan assets was \$224.9 million and \$187.5 million, respectively, and the accumulated benefit obligation was \$278.6 million and \$249.9 million, respectively.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Amounts recognized in accumulated other comprehensive loss at December 31 consisted of:

	<u>2010</u>	<u>2009</u>
<i>(dollars in millions)</i>		
Net loss	\$132.3	\$139.0
Prior service (credit) cost	<u>(2.7)</u>	<u>0.1</u>
Before tax amount	<u>\$129.6</u>	<u>\$139.1</u>
After tax amount	<u>\$ 83.1</u>	<u>\$ 89.1</u>

The change in net loss in the above table included net gains of \$2.6 million and net losses of \$16.7 million (\$1.9 million and \$11.5 million after tax) arising during the years ended December 31, 2010 and 2009, respectively.

Amounts recognized in the consolidated balance sheets at December 31 consisted of:

	<u>2010</u>	<u>2009</u>
<i>(dollars in millions)</i>		
Accrued compensation and benefits	\$ (3.0)	\$ (2.8)
Other long-term liabilities	<u>(92.4)</u>	<u>(106.7)</u>
Net amount recognized	<u>\$(95.4)</u>	<u>\$(109.5)</u>

The estimated net actuarial loss for pension benefits that will be amortized from accumulated other comprehensive loss into net pension cost over the next fiscal year is expected to be \$7.8 million.

The components of net periodic benefit cost for the following years ended December 31 are:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
<i>(dollars in millions)</i>			
Service cost, net of employee contributions	\$ 24.6	\$ 19.9	\$ 18.5
Interest cost	18.9	17.4	17.3
Expected return on plan assets	(22.0)	(20.4)	(19.6)
Amortization of net loss	6.9	3.1	3.8
Amortization of prior service cost	<u>—</u>	<u>0.1</u>	<u>0.1</u>
Net periodic pension cost	<u>\$ 28.4</u>	<u>\$ 20.1</u>	<u>\$ 20.1</u>

The net pension cost attributable to foreign plans included in the above table were \$3.9 million, \$1.2 million and \$2.8 million in 2010, 2009 and 2008, respectively.

The weighted average assumptions used in determining pension plan information for the following years ended December 31 are:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Net Cost			
Discount rate	5.62%	6.32%	6.16%
Expected return on plan assets	8.15%	8.10%	8.16%
Rate of compensation increase	4.35%	4.27%	4.33%
Benefit Obligation			
Discount rate	5.15%	5.62%	6.32%
Rate of compensation increase	4.34%	4.35%	4.27%

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The company's discount rates are determined by considering current yield curves representing high quality, long-term fixed income instruments. The resulting discount rates are consistent with the duration of plan liabilities.

The long-term rate of return for plan assets is derived from return assumptions determined for each of the significant asset classes. Under this approach, the historical real returns (net of inflation) on different asset classes are combined with long-term expectations for inflation to determine an expected return on assets within that class. These real rates of return for each asset class reflect the long-term historical relationships between equities and fixed income investments. Current market factors such as inflation and interest rates are evaluated before long-term assumptions are determined. The long-term portfolio return is established based on the combination of these asset class real returns and inflation with proper consideration of the effects of diversification and rebalancing.

Plan Assets - Plan assets consist of a diversified portfolio of equity securities, fixed income securities and cash equivalents. The company employs a total return investment approach whereby a mix of equities and fixed income investments are used to maximize the long-term return of plan assets for a prudent level of risk. The intent of this strategy is to minimize plan expenses by exceeding the interest growth in plan liabilities over the long run. Risk tolerance is established through careful consideration of plan liabilities, plan funded status and corporate financial condition. This consideration involves the use of long-term measures that address both return and risk and are not impacted significantly by short-term fluctuations. Equity investments include a diversified mix of growth, value and small and large capitalization securities. Investment risks and returns are measured and monitored on an ongoing basis through quarterly investment portfolio reviews.

The weighted average target asset allocations for the plans at December 31, are as follows:

	<u>Target Allocation</u>	<u>2010</u>	<u>2009</u>
Asset Categories			
Equity securities		60.9%	60.8%
Fixed income securities		33.5%	33.4%
Cash equivalents		5.6%	5.8%
Total		<u>100.0%</u>	<u>100.0%</u>

Due to short-term fluctuations in asset performance, allocation percentages may temporarily deviate from these target allocation percentages before a rebalancing occurs. Cash equivalents are targeted at five percent of plan assets and are used to satisfy benefit disbursement requirements and will vary throughout the year.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following table summarizes fair value measurements of plan assets at December 31:

	Quoted prices in active markets for identical assets (Level 1)		Significant other observable inputs (Level 2)		Total ^(B)	
	2010	2009	2010	2009	2010	2009
	<i>(dollars in millions)</i>					
Cash equivalents	\$ —	\$ —	\$ 7.1	\$ 4.0	\$ 7.1	\$ 4.0
Equity securities:						
U.S. large-cap	—	—	73.3	62.3	73.3	62.3
U.S. mid-cap	26.7	20.5	—	—	26.7	20.5
U.S. small-cap	31.0	23.8	—	—	31.0	23.8
Foreign	21.4	17.1	28.6	27.2	50.0	44.3
Fixed income securities:						
Diversified bond fund ^(A)	—	—	75.5	60.3	75.5	60.3
Mortgage-backed securities	—	—	—	5.7	—	5.7
Foreign government bonds	—	—	6.7	6.9	6.7	6.9
Foreign corporate notes and bonds	—	—	6.7	6.7	6.7	6.7
Guaranteed insurance contracts	—	—	4.6	4.6	4.6	4.6
Total plan assets	\$79.1	\$61.4	\$202.5	\$177.7	\$281.6	\$239.1

(A) Diversified bond fund consists of U.S. Treasury bonds, mortgage backed securities, and corporate bonds.

(B) There were no assets categorized as Level 3 at December 31, 2010 and 2009, respectively.

Plan assets categorized as Level 2 primarily consist of commingled funds and mortgage-backed securities. These securities are valued using other inputs, such as net asset values provided by the fund administrators or by dealer quotes for similarly-rated instruments that are observable or that can be corroborated by observable market data for substantially the remaining term of the plan instruments.

Funding Policy and Expected Contributions - The company's objective in funding its domestic tax-qualified plan is to accumulate funds sufficient to provide for all benefits and to satisfy the minimum contribution requirements of ERISA. Outside the United States, the company's objective is to fund the international retirement costs over time within the limits of minimum requirements and allowable tax deductions. The company's annual funding decisions also consider the relationship between the returns on each asset compared to the plan's corresponding expense and consider the relationship between each tax-qualified plan's benefit obligation and its corresponding funded status. The company expects to make discretionary contributions of approximately \$30 million to its qualified plans in 2011.

The total expected benefit payments are as follows:

<i>(dollars in millions)</i>	
2011	\$ 23.8
2012	23.6
2013	26.3
2014	27.9
2015	37.1
2016 through 2020	165.0

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Defined Contribution Retirement Plans

All domestic employees of the company not covered by a collective bargaining agreement who have been scheduled for 1,000 hours of service are eligible to participate in the company's defined contribution plan. The amounts charged to income for this plan were \$9.5 million, \$9.3 million and \$8.4 million for the years ended December 31, 2010, 2009 and 2008, respectively. Outside the United States, the company maintains defined contribution plans along with small pension arrangements that are typically funded with insurance products. These arrangements had a total expense of \$1.9 million, \$1.8 million and \$1.7 million for the years ended December 31, 2010, 2009 and 2008, respectively. In addition, the company maintains a long-term deferred compensation arrangement for directors that allows deferral of the annual retainer and meeting fees at the director's election. The company annually accrues for long-term compensation, which is paid out upon the director's retirement from the board. The total 2010 expense for these arrangements was not material.

Other Postretirement Benefit Plan

The company does not provide subsidized postretirement healthcare benefits and life insurance coverage except for a limited number of former employees. As this plan is unfunded, contributions are made as benefits are incurred.

The change in the benefit obligation is as follows:

	<u>2010</u>	<u>2009</u>
(dollars in millions)		
Benefit obligation at January 1	\$ 9.5	\$10.1
Interest cost	0.5	0.6
Participant contributions	0.1	0.1
Actuarial loss (gain)	0.2	(0.4)
Benefits paid	<u>(0.9)</u>	<u>(0.9)</u>
Benefit obligation at December 31	<u>\$ 9.4</u>	<u>\$ 9.5</u>

Amounts recognized in accumulated other comprehensive loss are \$3.4 million (\$2.1 million after tax) in each of the years ended December 31, 2010 and 2009.

The estimated net actuarial loss for other postretirement benefits that will be amortized from accumulated other comprehensive loss into net benefit cost over the next fiscal year is expected to be \$0.2 million.

The net periodic benefit cost was \$0.7 million, \$0.8 million and \$0.9 million for the years ended December 31, 2010, 2009 and 2008, respectively.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

13. Other (Income) Expense, Net

The components of other (income) expense, net for the following years ended December 31 are:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
(dollars in millions)			
Interest income	\$(3.7)	\$(3.6)	\$(16.5)
Foreign exchange (gains) losses	(0.7)	(1.5)	7.1
Restructuring	16.7	15.4	—
Asset dispositions	—	7.2	36.8
Insurance settlements, net	—	7.0	—
Acquisition related items	9.3	3.2	—
Other, net	<u>3.0</u>	<u>2.8</u>	<u>2.0</u>
Total other (income) expense, net	<u>\$24.6</u>	<u>\$30.5</u>	<u>\$ 29.4</u>

Interest income - In 2010, interest income was \$3.7 million compared to \$3.6 million and \$16.5 million in 2009 and 2008, respectively. The decrease in 2009 was primarily due to lower global interest rates.

Restructuring - See Note 3 of the notes to consolidated financial statements.

Asset dispositions - In 2009, the amount reflected non-cash charges for asset write-offs primarily related to the company's decision to discontinue a hernia repair xenograft device. In 2008, the amount reflects a non-cash charge related to the write-off of certain assets as a result of the company's decision to discontinue the sale of the Salute II hernia fixation device. See Note 2 of the notes to consolidated financial statements.

Insurance settlements, net - In 2009, the amount reflected a charge for an insurance settlement, partially offset by an unrelated insurance recovery. See Note 10 of the notes to consolidated financial statements.

Acquisition related items - The amounts consist of acquisition related integration costs. See Note 2 to the notes of the consolidated financial statements.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

14. Segment Information

The company's management considers its business to be a single segment entity — the manufacture and sale of medical devices. The company's products generally share similar distribution channels and customers. The company designs, manufactures, packages, distributes and sells medical, surgical, diagnostic and patient care devices. The company sells a broad range of products to hospitals, individual healthcare professionals, extended care health facilities and alternate site facilities on a global basis. In general, the company's products are intended to be used once and then discarded or implanted either temporarily or permanently. The company's chief operating decision makers evaluate the various global product portfolios on a net sales basis. The company's chief operating decision makers generally evaluate profitability and associated investments on an enterprise-wide basis due to shared geographic infrastructures. Net sales based on the location of the external customer and identifiable assets by geographic region for the following years ended December 31 are:

(dollars in millions)	<u>2010</u>	<u>2009</u>	<u>2008</u>
Net sales			
United States	\$1,889.0	\$1,759.2	\$1,661.3
Europe	474.8	471.7	502.2
Japan	131.9	126.5	121.7
Other	224.5	177.5	166.9
	<u>\$2,720.2</u>	<u>\$2,534.9</u>	<u>\$2,452.1</u>
 Long-lived assets			
United States	\$ 362.0	\$ 339.7	\$ 348.1
Europe	43.1	55.4	54.8
Other	11.0	8.8	8.0
	<u>\$ 416.1</u>	<u>\$ 403.9</u>	<u>\$ 410.9</u>

Total net sales by disease state for the following years ended December 31 are:

(dollars in millions)	<u>2010</u>	<u>2009</u>	<u>2008</u>
Vascular	\$ 755.9	\$ 681.5	\$ 643.1
Urology	718.1	700.3	708.5

15. Unaudited Interim Financial Information

<u>2010</u>	<u>1st Qtr</u>	<u>2nd Qtr</u>	<u>3rd Qtr</u>	<u>4th Qtr</u>	<u>Year</u>
(dollars in millions except per share amounts)					
Net sales	\$650.8	\$673.9	\$678.4	\$717.1	\$2,720.2
Cost of goods sold	252.7	251.7	251.9	263.7	1,020.0
Income from operations before income taxes	175.0	182.7	183.2	176.8	717.7
Net income attributable to common shareholders	120.9	124.6	127.5	136.2	509.2
Basic earnings per share available to common shareholders	1.25	1.31	1.35	1.48	5.39
Diluted earnings per share available to common shareholders ^(A)	1.24	1.29	1.34	1.47	5.32

(A) Total per share amounts may not add due to rounding.

For the second quarter 2010, marketing, selling and administrative expenses included acquisition related items consisting of transaction costs (primarily legal and valuation costs) of \$2.5 million and bad debt expense of \$3.8 million related to the write-down of accounts receivable in Greece. These items decreased net income attributable to common shareholders by \$6.3 million after tax, or \$0.07 diluted earnings per share available to common shareholders.

For the third quarter 2010, other (income) expense, net, included acquisition related items consisting of integration costs of \$7.7 million. The income tax provision increased \$1.4 million resulting from the net effect of a charge for a cash repatriation, partially offset by the remeasurement of certain tax positions. These items decreased net income attributable to common shareholders by \$6.1 million after tax, or \$0.06 diluted earnings per share available to common shareholders.

For the fourth quarter 2010, other (income) expense, net, included a restructuring charge of \$16.7 million. The income tax provision decreased \$6.2 million resulting from reductions of certain tax positions. These items decreased net income attributable to common shareholders by \$5.2 million after tax or \$0.06 diluted earnings per share available to common shareholders.

<u>2009</u>	<u>1st Qtr</u>	<u>2nd Qtr</u>	<u>3rd Qtr</u>	<u>4th Qtr</u>	<u>Year</u>
(dollars in millions except per share amounts)					
Net sales	\$596.4	\$624.6	\$637.0	\$676.9	\$2,534.9
Cost of goods sold	224.3	238.6	240.9	255.2	959.0
Income from operations before income taxes	159.1	163.8	185.2	163.4	671.5
Net income attributable to common shareholders	112.5	112.2	129.5	105.9	460.1
Basic earnings per share available to common shareholders	1.12	1.13	1.32	1.09	4.66
Diluted earnings per share available to common shareholders	1.10	1.11	1.31	1.08	4.60

For the first quarter 2009, other (income) expense, net, included a restructuring charge of \$9.8 million. This item decreased net income attributable to common shareholders by \$6.5 million, or \$0.07 diluted earnings per share available to common shareholders.

For the second quarter 2009, research and development expense included an acquisition related item consisting of a purchased R&D charge of \$2.3 million. In addition, other (income) expense, net, included a non-cash charge of \$4.5 million for an asset write-off and a restructuring charge of \$5.6 million. These items decreased net income attributable to common shareholders by \$10.5 million, or \$0.10 diluted earnings per share available to common shareholders.

C. R. BARD, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

For the fourth quarter 2009, research and development expense included an acquisition related item consisting of a purchased R&D charge of \$13.4 million. In addition, other (income) expense, net, included insurance settlements, net, of \$7.0 million, an acquisition related item consisting of contract termination costs of \$3.2 million, and an asset disposition of \$2.7 million. The income tax provision increased \$2.1 million resulting from a tax assessment that related to prior periods. These items decreased net income attributable to common shareholders by \$29.7 million, or \$0.30 diluted earnings per share available to common shareholders.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

The company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the company's reports under the Securities Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosures. Any controls and procedures, no matter how well defined and operated, can provide only reasonable assurance of achieving the desired control objectives.

The company's management, with the participation of the company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of the company's disclosure controls and procedures as of December 31, 2010. Based upon that evaluation, as of December 31, 2010, the company's Chief Executive Officer and Chief Financial Officer have concluded that the design and operation of the company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) provide reasonable assurance that the disclosure controls and procedures are effective as of December 31, 2010 to accomplish their objectives. There have been no changes in internal control over financial reporting for the year ended December 31, 2010 that have materially affected, or are reasonably likely to materially affect, the company's internal control over financial reporting.

Management's Report On Internal Control Over Financial Reporting is included in Item 8 and is incorporated herein by reference.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information with respect to Directors of the company is incorporated herein by reference to the material contained under the heading “Proposal No. 1 — Election of Directors” in the company’s definitive Proxy Statement for its 2011 annual meeting of shareholders (the “2011 Proxy Statement”).

Information with respect to Executive Officers of the company begins on page I-14 of this filing and is incorporated by reference into this Item.

The information contained under the caption “Section 16(a) Beneficial Ownership Reporting Compliance” in the company’s 2011 Proxy Statement is incorporated herein by reference.

The information contained under the caption “Corporate Governance — The Board of Directors and Committees of the Board” in the company’s 2011 Proxy Statement is incorporated herein by reference.

Code of Ethics

The company has adopted, and has posted on its website at www.crbard.com, a Code of Ethics for Senior Financial Officers that applies to the company’s chief executive officer, chief financial officer and controller. To the extent required, the company intends to disclose any amendments to, or waivers from, the Code of Ethics on its website.

Item 11. Executive Compensation

The information contained under the captions “Executive Officer Compensation,” “Director Compensation,” “Corporate Governance — The Board of Directors and Committees of the Board — Compensation Committee — Compensation Committee Interlocks and Insider Participation” and “Compensation Committee Report” in the company’s 2011 Proxy Statement is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information contained under the captions “Security Ownership of Certain Beneficial Owners,” “Security Ownership of Management” and “Equity Compensation Plan Information” in the company’s 2011 Proxy Statement is incorporated herein by reference.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information contained under the captions “Related Person Transactions” and “Corporate Governance — Director Independence” in the company’s 2011 Proxy Statement is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

The information contained under the caption “Proposal No. 2 — Ratification of the Appointment of KPMG LLP as Independent Registered Public Accounting Firm” in the company’s 2011 Proxy Statement is incorporated herein by reference.
