RPC, INC. 2010 ANNUAL REPORT

RPC INCORPORATED, AN OIL AND GAS SERVICES COMPANY

RPC, Inc. is an oil and gas services company that provides a broad range of specialized oilfield services and equipment to independent and major oilfield companies engaged in the exploration, production and development of oil and gas properties throughout the United States and in selected international markets. RPC is headquartered in Atlanta, Georgia, and its common shares are traded on the New York Stock Exchange under the ticker symbol RES. Visit our corporate web site at www.rpc.net.

Corporate Information

DEAR STOCKHOLDERS

In 2010 our industry recovered strongly from the cyclical downturn of 2008 and 2009, as recovering commodity prices and capital availability encouraged our customers to increase their drilling and production activities. In addition to this improvement in business conditions from the normal energy industry cycle, RPC also benefited from the effect of a shift in U.S. domestic drilling and completion towards service-intensive shale plays which produce both natural gas and oil. Our customers' needs and expectations have increased because of this shift, and as a result, some of our traditional paradigms regarding the impact of cyclicality in our business have changed.

Following the steepest annualized decline in U.S. history, the commodity prices and indicators of our industry's activity levels began to recover during the second half of 2009 and into 2010. The average U.S. domestic rig count during 2010 was 1,536, 41.5 percent higher than 2009. The rig count began the year at 1,189, its lowest point during the year, and steadily increased through the year, reaching a high of 1,723 in mid-December. The average price of oil during 2010 was \$79.27, a 28.2 percent increase compared to 2009. The price of natural gas began the year at \$5.81 per Mcf, dropping to \$3.17 at the beginning of the fourth quarter, before recovering to end the year at \$4.23. The average price of natural gas during 2010 was \$4.38 per Mcf, 12.3 percent lower than 2009.

RPC reported record revenues and profits in 2010. Revenues for 2010 of \$1.1 billion increased by 86.5 percent compared to \$587.9 million in 2009. Our revenues increased at a higher rate than the change in the domestic rig count due to our increased activity within the service-intensive unconventional resource plays, the nature of the work we are performing to support the significant customer agreements that we obtained early in 2010, and the addition of revenue-producing equipment to support these customer agreements. Cost of revenues was \$606.1 million in 2010, an increase of 53.9 percent compared to 2009. The increase in these costs was due to the variable nature of many of these expenses. However, cost of revenues as a percentage of revenues decreased significantly from 67.0 percent in 2009 to 55.3 percent in 2010 due to leverage of employment and other direct costs over higher activity levels and improved pricing for our services.

Selling, general and administrative expenses increased to \$121.8 million in 2010, or 11.1 percent of revenues, compared to \$97.7 million, or 16.6 percent of revenues, in 2009. Selling, general and administrative expenses increased by 24.7 percent during the year due to increases in total employment costs, including increased incentive compensation consistent with improved operating results. As a percentage of revenues, however, costs decreased due to the fixed nature other selling, general and administrative expenses. Depreciation and amortization were \$133.4 million in 2010, an increase of \$2.8 million compared to \$130.6 million in 2009.

RPC reported an operating profit of \$238.8 million in 2010, compared to an operating loss of \$33.1 million in 2009. Our operating profit improvement was due to higher revenues, lower cost of revenues and selling, general and administrative expenses as a percentage of revenues, offset by slightly higher depreciation and amortization. Interest expense increased by 22.3 percent, from \$2.2 million in 2009 to \$2.7 million in 2010, due to a higher average balance and interest rate on our revolving credit facility.

Net income for 2010 was \$146.7 million compared to net loss of \$22.7 million in 2009. Diluted earnings per share were \$1.00, compared to loss per share of \$0.16 in 2009. Our earnings before interest, taxes, depreciation and amortization (EBITDA) were \$373.7 million in 2010, a 276.9 percent increase compared to \$99.1 million in 2009.

Our strong financial results during 2010 were driven by several factors, including a cyclical increase in domestic oilfield activity, the financial leverage of fixed costs over higher revenues, a larger fleet of equipment, and our strategic location in strong oilfield basins. An additional driver of our growth and profitability, however, and one that we believe represents a secular change in what has traditionally been a cyclical industry, is our customers' interest in forming long-term agreements with service providers. By forming these agreements, our customers can rely on the presence of a committed, competent service provider who can formulate and execute a repeatable process that maximizes the efficiency and productivity of their drilling programs. By the end of 2010, approximately half of our pressure pumping fleet was committed to these types of arrangements, and the majority of our planned fleet additions in 2011 are committed to this type of arrangement as well.

To facilitate our ongoing capital needs, during the third quarter RPC refinanced its existing revolving credit facility with a new revolving \$350 million credit agreement. By the end of the fourth quarter, we had taken delivery of the majority of the equipment that we anticipated to have in place by the end of the first quarter of 2011, and almost half of it was in service and generating revenue. In spite of our large capital expenditures and the working capital requirements of increased activity levels, the balance on our revolving credit facility at the end of the year only increased by \$31 million, from \$90.3 million at the end of 2009 to \$121.3 million at the end of 2010. This new credit facility has a five-year term, and we believe that it will provide RPC with the liquidity to meet our capital needs sufficient to fund our growth opportunities.

At its regular quarterly meeting in October, the Board of Directors approved a three-for-two stock split, the fifth stock split in RPC's history. RPC's Board also increased our dividend twice in recent months as an immediate and tangible way of sharing our success with our stockholders. As a response to our strong earnings, confidence in our continued long-term growth and our strengthening balance sheet, the Board believes these actions are to reward our stockholders and enhance the investment appeal of our common stock.

One of the most notable events of 2010 was the Macondo blowout in the Gulf of Mexico. Although this incident had

very little direct impact on our business, it attracted society's scrutiny on potential safety and environmental issues in the oilfield. In addition, during 2010, our industry's recent expansion into new U.S. domestic markets close to large population centers attracted media attention and government scrutiny as well. RPC has responded to each inquiry in an open and transparent manner, and we have also begun to respond to inquiries from citizens in the local communities in which we operate. We welcome the opportunity to hold a dialogue among the different stakeholders and regulatory authorities in our industry, because we believe that in the long run, the discussion will benefit everyone. While we cannot accurately predict any of the long-term implications to our business that may result from this dialogue, we believe that those service companies which are well-capitalized and have a culture that emphasizes quality and safety will thrive in an environment of changing social and governmental scrutiny.

An additional driver of our growth and profitability, however, and one that we believe represents a secular change in what has traditionally been a cyclical industry, is our customers' interest in forming long-term agreements with service providers.

RPC remains optimistic about our long-term future as well as the position that we hold within the industry. As always, we are mindful of the potential risks associated with the price levels of oil and gas, potential oversupply of equipment, availability and cost of critical materials and supplies, as well as the availability and cost of qualified operational personnel. While there may be challenges over the next year, RPC remains committed to the long-term growth and health of the company as well as generating high returns on capital.

Sincerely,

R. Randall Rollins
Chairman of the Board

Richard A. Hubbell
President and Chief Executive Officer

DESCRIPTION OF SERVICE LINES

PRESSURE PUMPING

RPC's largest service line is pressure pumping, which accounted for 48 percent of RPC's 2010 revenues. Pressure pumping is a stimulation service that involves fracturing or acidizing a formation to initiate or stimulate production in new and existing customer wells, either at the completion of drilling or later in the well's life cycle. It is especially useful in unconventional completion activities, where exposing additional surface area in a formation is critical to enhanced flow of hydrocarbons from the formation. Because of the growth of shale-related production activities, our customers' needs for high-capacity, high quality pressure pumping services has grown tremendously. This service line has received the majority of our capital investments and is responsible for a great deal of our growth. Pressure pumping services involve using complex, truck-mounted equipment, so the mobility of this equipment permits our services to be performed in various geographic areas. RPC provides these services to customers in a number of U.S. domestic oil and gas producing regions, increasingly focused in the unconventional basins.

RENTAL TOOLS

The rental tools service line is the largest part of our support services segment and accounted for approximately eight percent of RPC revenues for 2010. This service line rents equipment for customers to use for onshore and offshore oil and gas well drilling, as well as completion and workover activities. Usually, operators and drilling contractors find it more economical to supplement their tool and tubular inventories with rental items instead of owning a complete inventory. Our facilities are strategically located to serve major staging points for oil and gas activities throughout the Gulf Coast, mid-continent and Rocky Mountain Regions for use with onshore and offshore oil and gas well drilling, completion and workover activities.

DOWNHOLE TOOLS

RPC's downhole tools service line is dedicated to the coiled tubing and snubbing industry, specializing in working downhole tools under pressure during various fishing and drilling operations. This service line accounted for approximately 12 percent of RPC's revenues in 2010. Our downhole tools service line's engineering department has developed a complete line of downhole equipment, some proprietary in nature. This service line continues to lead its segment of the industry with the development of several new applications.

Downhole situations are unpredictable, so determining the best method for solving downhole problems requires visualization skills and the ability to apply the best engineering solution. Our engineering staff understands the mechanical and fluid parameters of any downhole tool assignment. Because our services are especially suited for unconventional drilling and completion activities, the service line has experienced significant growth over the past several years. In addition to our domestic success, we now have regular opportunities in several international markets.

COILED TUBING

Coiled tubing is a continuous reel of steel tubing that is unwound, straightened and inserted into a well to perform a variety of services in diverse environments. Coiled tubing is mobile and because of this versatility it can be tripped in and out of a well more quickly than conventional tubing and, in many cases, enables the well to continue producing during the well-servicing operations. RPC was a pioneer in coiled tubing, and today we see renewed interest in this market due to the unique requirements of unconventional wells and the enhanced capabilities of larger-diameter coiled tubing strings. Coiled tubing comprised 11 percent of 2010 revenues.

SNUBBING-HYDRAULIC WORKOVER

Snubbing-Hydraulic Workover has been an important service line due to its specialization. This service line contributed approximately five percent of our 2010 revenues. Snubbing-Hydraulic Workover is a well intervention service that uses a portable, hydraulic workover rig and crew to repair damaged casing, production tubing and downhole production equipment in a high-pressure environment and even replace downhole equipment while maintaining pressure in the well. Snubbing-Hydraulic Workover requires significant experience and knowledge to perform this service safely and efficiently; therefore, Snubbing-Hydraulic Workover is a small, specialized segment of the oil and gas industry. Snubbing has been a long-standing international performer, and we undertook several successful Snubbing-Hydraulic Workover campaigns in 2010. We continue to use Snubbing-Hydraulic Workover services in a number of unconventional well completion activities.

NITROGEN

Nitrogen is a safe, noncombustible and noncorrosive substance and has a variety of oilfield uses; it is used to complement several of our other service lines, including coiled tubing, snubbing and pressure pumping. There are a number of uses for nitrogen, an inert, noncombustible element, in providing services to oilfield customers and industrial users outside of the oilfield. For our oilfield customers, nitrogen can be used to clean drilling and production pipe and displace fluids in various drilling applications. It also can be used to create a fire-retardant environment in hazardous blowout situations and as a fracturing medium for our fracturing service line. Specialized equipment is required to deliver nitrogen to the well at the well site safely and effectively. Nitrogen accounted for approximately five percent of RPC's revenues in 2010.

OILFIELD PIPE INSPECTION SERVICES, PIPE MANAGEMENT AND PIPE STORAGE

Our pipe inspection services include Full Body Electromagnetic and Phased Array Ultrasonic inspection of pipe used in oil and gas wells. These services are provided at both the Company's inspection facilities and at pipe mills in accordance with negotiated sales and/or service contracts. Our customers are major oil companies and steel mills, for which we provide in-house inspection services, inventory management and process control of tubing, casing, and drill pipe. Our locations near the Gulf Coast are equipped with large capacity cranes, specially designed forklifts and a computerized inventory system to serve a variety of storage and handling services for both oilfield and non-oilfield customers. Pipe inspection services accounted for approximately two percent of 2010 revenues.

WELL CONTROL

Well Control specializes in responding to and controlling oil and gas well emergencies, including blowouts and well fires domestically and internationally, and is a service line we are known for in the industry. The Company's professional firefighting staff has many years of aggregate industry experience in responding to well fires and blowouts and the successful performance of this service often leads to additional service opportunities. We perform these services all over the world and on short notice. In the past few years we have performed well control work in most oil-producing regions around the world. While Well Control accounted for less than one percent of RPC's 2010 revenues, it remains an important component of our service offerings.

THE CHANGE IN OUR INDUSTRY

One of the traditions in our industry is that oilfield exploration is speculative. The methods for finding hydrocarbons are not always reliable, and when a new play is discovered, it may not be large enough to produce economically for an extended period of time. Because of this uncertainty, operators are unable to schedule service providers in advance of their needs and are unwilling to establish long-term arrangements with their providers.

The development of shale plays is changing these ideas. In recent years, our industry has come to realize that the U.S. domestic market has vast reserves of hydrocarbons which can be exploited using newly developed techniques and larger fleets of specialized equipment. These reserves are located in hydrocarbon-rich shale formations which are not only producing natural gas, but in some areas, contain heavier liquids and oil as well.

These formations are located in widely dispersed geographic areas. While these reserves are proving to be productive, recovering hydrocarbons from them is not easy. However, our customers can be successful by developing repeatable processes and gaining leverage by working in the same location for an extended period of time.

Production in these formations requires competent operational management and large amounts of the type of equipment that RPC operates. These reserves are located in geologically complex formations, many of which are narrow and deep, and since they are rarely located in a vertical direction relative to the wellhead, they require service equipment which can travel directionally in order to reach the desired location. The surface pressure in many of these completions is very high, which in turn requires more equipment at the wellhead.

The new paradigm is one of success driven by the development of engineered solutions that can be repeated consistently in service-intensive completion operations. An integral part of this process includes production companies establishing arrangements with oilfield service companies like RPC who can provide reliable people, equipment and

processes. With these new dynamics in place, our customers can earn acceptable returns on their investment, even during periods of lower commodity prices.

WHERE WE FIT RPC's position within this changing paradigm is easy to understand. In addition to a large fleet of specialized equipment, this service work also requires the expertise of tenured management and operational personnel who maintain equipment in accordance with high customer standards. Several of our large service lines, including pressure pumping, downhole tools, and coiled tubing, are well-positioned to serve this growing market.

Our facilities are positioned in the midst of many of these domestic shale basins. Also, we have demonstrated our ability to establish new locations successfully, due to committed customer agreements and a fleet of equipment that can move to a new location and begin producing revenue soon after being placed in service. This competency continues to support our growth as our customers find new resource plays in domestic markets and require our services to perform increasingly difficult completions.

POTENTIAL FOR THE FUTURE RPC is encouraged by the shift to oil production in the U.S. domestic market, which has grown from 20 percent of U.S. domestic drilling in 2008 to 38 percent in 2010, and during the first quarter of 2011 increased to more than 45 percent of U.S. domestic drilling. With the current unrest in the Middle East, and associated high oil prices, we believe this trend will continue.

The oilfield services industry has always been cyclical, and with our extensive experience in this business, we believe it will remain so in the future. However, we also believe that the secular changes of the past few years will endure through the cycles in our industry. If this is the case, RPC should be able to create and execute operational plans with more certain outcomes, thus creating continued strong returns to our shareholders.

PART I

Throughout this report, we refer to RPC, Inc., together with its subsidiaries, as “we,” “us,” “RPC” or “the Company.”

Forward-Looking Statements

Certain statements made in this report that are not historical facts are “forward-looking statements” under the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may include, without limitation, statements that relate to our business strategy, plans and objectives, and our beliefs and expectations regarding future demand for our products and services and other events and conditions that may influence the oilfield services market and our performance in the future. Forward-looking statements made elsewhere in this report include without limitation statements regarding our belief that the long-term prospects for our business are favorable due to growing demand for oil and natural gas; our belief that the long-term demand outlook for natural gas is still favorable; our belief that the lack of foreign competition with domestic natural gas production tends to keep prices high enough to ensure that domestic drilling and production will continue at certain minimum levels; our belief that gas-directed drilling will continue to represent the majority of the total drilling rig count in the foreseeable future; our expectation to continue to focus on the development of international business opportunities in current and other international markets; our ability to obtain other customers in the event of a loss of our largest customers; the adequacy of our insurance coverage; the impact of lawsuits, legal proceedings and claims on our business and financial condition; our expectation to continue to pay cash dividends to the common stockholders, subject to the earnings and financial condition of the Company and other relevant factors; our belief that the favorable long-term returns on our purchases of revenue producing equipment will continue, thus justifying the funding of these expenditures with debt; our belief that continued increases in the U.S. domestic rig count during 2011 may be limited by the number of rigs available to drill new wells; that the outlook for the U.S. domestic rig count is for it to remain stable or increase slightly during 2011 with the service-intensive nature of the activity being projected to continue to increase; our belief that an increase in the supply in oilfield equipment in our markets can cause a decrease in the price we receive for our services if commodity prices and drilling activity do not also increase; our expectations to take delivery of a large amount of revenue-producing equipment during the first and second quarters of 2011; our expectation that our consolidated revenues and financial performance will improve; our ability to maintain sufficient liquidity and a conservative capital structure; our belief about the amount of the contribution to the defined benefit pension plan in 2011; our ability to fund capital requirements in the future; the estimated amount of our capital expenditures and contractual obligations for future periods; estimates made with respect to our critical accounting policies; and the effect of new accounting standards.

The words “may,” “will,” “expect,” “believe,” “anticipate,” “project,” “estimate,” and similar expressions generally identify forward-looking statements. Such statements are based on certain assumptions and analyses made by our management in light of its experience and its perception of historical trends, current conditions, expected future developments and other factors it believes to be appropriate. We caution you that such statements are only predictions and not guarantees of future performance and that actual results, developments and business decisions may differ from those envisioned by the forward-looking statements. See “Risk Factors” contained in Item 1A. for a discussion of factors that may cause actual results to differ from our projections.

Item 1. Business

Organization and Overview

RPC is a Delaware corporation originally organized in 1984 as a holding company for several oilfield services companies and is headquartered in Atlanta, Georgia.

RPC provides a broad range of specialized oilfield services and equipment primarily to independent and major oil and gas companies engaged in the exploration, production and development of oil and gas properties throughout the United States, including the Gulf of Mexico, mid-continent, southwest, Rocky Mountain and northeast regions, and in selected international markets. The services and equipment provided include, among others, (1) pressure pumping services, (2) coiled tubing services, (3) snubbing services (also referred to as hydraulic workover services), (4) nitrogen services, (5) the rental of drill pipe and other specialized oilfield equipment, (6) downhole tool services and (7) well control. RPC acts as a holding company for its operating units, Cudd Energy Services, Patterson Rental and Fishing Tools, Bronco Oilfield Services, Thru Tubing Solutions, Well Control School, and others. As of December 31, 2010, RPC had approximately 2,500 employees.

Business Segments

RPC's service lines have been aggregated into two reportable oil and gas services business segments, Technical Services and Support Services, because of the similarities between the financial performance and approach to managing the service lines within each of the segments, as well as the economic and business conditions impacting their business activity levels.

During 2010, approximately three percent of RPC's consolidated revenues were generated from offshore operations in the U.S. Gulf of Mexico. In addition, approximately one percent of RPC's consolidated revenues were generated from offshore operations in the offshore territory of other countries, principally in New Zealand. We also estimate that 33 percent of our 2010 revenues were related to drilling and production activities for oil, and 67 percent were related to drilling and production activities for natural gas.

Technical Services include RPC's oil and gas service lines that utilize people and equipment to perform value-added completion, production and maintenance services directly to a customer's well. The demand for these services is generally influenced by customers' decisions to invest capital toward initiating production in a new oil or natural gas well, improving production flows in an existing formation, or to address well control issues. This business segment consists primarily of pressure pumping, downhole tools, coiled tubing, snubbing, nitrogen, well control, wireline and fishing. The principal markets for this business segment include the United States, including the Gulf of Mexico, mid-continent, southwest, Rocky Mountain, and Appalachian regions, and contract or project work in selected international locations in the last three years including primarily Africa, Canada, China, Eastern Europe, Latin America, the Middle East and New Zealand. Customers include major multi-national and independent oil and gas producers, and selected nationally owned oil companies.

Support Services include RPC's oil and gas service lines that primarily provide equipment for customer use or services to assist customer operations. The equipment and services include drill pipe and related tools, pipe handling, pipe inspection and storage services, and oilfield training services. The demand for these services tends to be influenced primarily by customer drilling-related activity levels. The principal markets for this segment include the United States, including the Gulf of Mexico, mid-continent, Rocky Mountain and Appalachian regions and project work in selected international locations in the last three years including primarily Canada, Latin America and the Middle East. Customers primarily include domestic operations of major multi-national and independent oil and gas producers, and selected nationally owned oil companies.

Technical Services

The following is a description of the primary service lines conducted within the Technical Services business segment:

Pressure Pumping. Pressure pumping services, which accounted for approximately 48 percent of 2010 revenues, 38 percent of 2009 revenues and 41 percent of 2008 revenues, are provided to customers throughout the Gulf Coast, mid-continent and Rocky Mountain regions of the United States and are

generally utilized to initiate production in new or enhance production in existing customer wells. Pressure pumping services involve using complex, truck or skid-mounted equipment designed and constructed for each specific pumping service offered. The mobility of this equipment permits pressure pumping services to be performed in varying geographic areas. Principal materials utilized in the pressure pumping business include fracturing proppants, acid and bulk chemical additives. Generally, these items are available from several suppliers, and the Company utilizes more than one supplier for each item. Pressure pumping services offered include:

Fracturing — Fracturing services are performed to stimulate production of oil and natural gas by increasing the permeability of a formation. The fracturing process consists of pumping nitrogen or a fluid gel into a cased well at sufficient pressure to fracture the formation at desired depths. Sand, bauxite or synthetic proppant, which is suspended in the gel, is pumped into the fracture. When the pressure is released at the surface, the fluid gel returns to the well, but the proppant remains in the fracture, thus keeping it open so that oil and natural gas can flow through the fracture into the well. In some cases, fracturing is performed in formations with a high amount of carbonate rock by an acid solution pumped under pressure without a proppant or with small amounts of proppant.

Acidizing — Acidizing services are also performed to stimulate production of oil and natural gas, but they are used in wells that have undergone formation damage due to the buildup of various materials that block the formation. Acidizing entails pumping large volumes of specially formulated acids into reservoirs to dissolve barriers and enlarge crevices in the formation, thereby eliminating obstacles to the flow of oil and natural gas. Acidizing services can also enhance production in limestone formations.

Downhole Tools. Thru Tubing Solutions (“TTS”) accounted for approximately 12 percent of 2010 revenues, 15 percent of 2009 revenues and nine percent of 2008 revenues. TTS provides services and proprietary downhole motors, fishing tools and other specialized downhole tools and processes to operators and service companies in drilling and production operations, including casing perforation at the completion stage of an oil or gas well. The services that TTS provides are especially suited for unconventional drilling and completion activities. TTS’ experience providing reliable tool services allows it to work in a pressurized environment with virtually any coiled tubing unit or snubbing unit.

Coiled Tubing. Coiled tubing services, which accounted for approximately 10 percent of 2010 revenues and nine percent of 2009 and 2008 revenues, involve the injection of coiled tubing into wells to perform various applications and functions for use principally in well-servicing operations and more recently to facilitate completion of horizontal wells. Coiled tubing is a flexible steel pipe with a diameter of less than four inches manufactured in continuous lengths of thousands of feet and wound or coiled around a large reel. It can be inserted through existing production tubing and used to perform workovers without using a larger, more costly workover rig. Principal advantages of employing coiled tubing in a workover operation include: (i) not having to “shut-in” the well during such operations, (ii) the ability to reel continuous coiled tubing in and out of a well significantly faster than conventional pipe, (iii) the ability to direct fluids into a wellbore with more precision, and (iv) enhanced access to remote or offshore fields due to the smaller size and mobility of a coiled tubing unit compared to a workover rig. Increasingly, coiled tubing units are also used to support completion activities in directional and horizontal wells. Such completion activities usually require multiple entrances in a wellbore in order to complete multiple fractures in a pressure pumping operation. A coiled tubing unit can accomplish this type of operation because its flexibility allows it to be steered in a direction other than vertical, which is necessary in this type of wellbore. At the same time, the strength of the coiled tubing string allows various types of tools or motors to be conveyed into the well effectively. The uses for coiled tubing in directional and horizontal wells have been enhanced by improved fabrication techniques and higher-diameter coiled tubing which allows coiled tubing units to be used effectively over greater distances, thus allowing them to function in more of the completion activities currently taking place in the U.S. domestic market. There are several manufacturers of flexible steel pipe used in coiled tubing services, and the Company believes that its sources of supply are adequate.

Snubbing. Snubbing (also referred to as hydraulic workover services), which accounted for approximately five percent of 2010 revenues, eight percent of 2009 revenues, and seven percent of 2008 revenues, involves using a hydraulic workover rig that permits an operator to repair damaged casing, production tubing and downhole production equipment in a high-pressure environment. A snubbing unit makes it possible to remove and replace downhole equipment while maintaining pressure on the well. Customers benefit because these operations can be performed without removing the pressure from the well, which stops production and can damage the formation, and because a snubbing rig can perform many applications at a lower cost than other alternatives. Because this service involves a very hazardous process that entails high risk, the snubbing segment of the oil and gas services industry is limited to a relative few operators who have the experience and knowledge required to perform such services safely and efficiently.

Nitrogen. Nitrogen accounted for approximately five percent of 2010 revenues, seven percent of 2009 revenues, and eight percent of 2008 revenues. There are a number of uses for nitrogen, an inert, non-combustible element, in providing services to oilfield customers and industrial users outside of the oilfield. For our oilfield customers, nitrogen can be used to clean drilling and production pipe and displace fluids in various drilling applications. It also can be used to create a fire-retardant environment in hazardous blowout situations and as a fracturing medium for our fracturing service line. In addition, nitrogen can be complementary to our snubbing and coiled tubing service lines, because it is a non-corrosive medium and is frequently injected into a well using coiled tubing. Nitrogen is complementary to our pressure pumping service line as well, because foam-based nitrogen stimulation is appropriate in certain sensitive formations in which the fluids used in fracturing or acidizing would damage a customer's well.

For non-oilfield industrial users, nitrogen can be used to purge pipelines and create a non-combustible environment. RPC stores and transports nitrogen and has a number of pumping unit configurations that inject nitrogen in its various applications. Some of these pumping units are set up for use on offshore platforms or inland waters. RPC purchases its nitrogen in liquid form from several suppliers and believes that these sources of supply are adequate.

Well Control. Cudd Energy Services specializes in responding to and controlling oil and gas well emergencies, including blowouts and well fires, domestically and internationally. In connection with these services, Cudd Energy Services, along with Patterson Services, has the capacity to supply the equipment, expertise and personnel necessary to restore affected oil and gas wells to production. The Company has responded to well control situations in several international locations including Algeria, Argentina, Australia, Bolivia, Canada, Colombia, Egypt, Hungary, India, Kuwait, Libya, Mexico, Peru, Qatar, Taiwan, Trinidad, Turkmenistan and Venezuela.

The Company's professional firefighting staff has many years of aggregate industry experience in responding to well fires and blowouts. This team of experts responds to well control situations where hydrocarbons are escaping from a well bore, regardless of whether a fire has occurred. In the most critical situations, there are explosive fires, the destruction of drilling and production facilities, substantial environmental damage and the loss of hundreds of thousands of dollars per day in well operators' production revenue. Since these events ordinarily arise from equipment failures or human error, it is impossible to predict accurately the timing or scope of this work. Additionally, less critical events frequently occur in connection with the drilling of new wells in high-pressure reservoirs. In these situations, the Company is called upon to supervise and assist in the well control effort so that drilling operations can resume as promptly as safety permits.

Wireline Services. Wireline is classified into two types of services: slick or braided line and electric line. In both, a spooled wire is unwound and lowered into a well, conveying various types of tools or equipment. Slick or braided line services use a non-conductive line primarily for jarring objects into or out of a well, as in fishing or plug-setting operations. Electric line services lower an electrical conductor line into a well allowing the use of electrically-operated tools such as perforators, bridge plugs and logging tools. Wireline services can be an integral part of the plug and abandonment process, near the end of the life cycle of a well.

Fishing. Fishing involves the use of specialized tools and procedures to retrieve lost equipment from a well drilling operation and producing wells. It is a service required by oil and gas operators who have lost equipment in a well. Oil and natural gas production from an affected well typically declines until the lost equipment can be retrieved. In some cases, the Company creates customized tools to perform a fishing operation. The customized tools are maintained by the Company after the particular fishing job for future use if a similar need arises.

Support Services

The following is a description of the primary service lines conducted within the Support Services business segment:

Rental Tools. Rental tools accounted for approximately eight percent of 2010 and 2009 revenues and 11 percent of 2008 revenues. The Company rents specialized equipment for use with onshore and offshore oil and gas well drilling, completion and workover activities. The drilling and subsequent operation of oil and gas wells generally require a variety of equipment. The equipment needed is in large part determined by the geological features of the production zone and the size of the well itself. As a result, operators and drilling contractors often find it more economical to supplement their tool and tubular inventories with rental items instead of owning a complete inventory. The Company's facilities are strategically located to serve the major staging points for oil and gas activities in the Gulf of Mexico, mid-continent region, northeast and Rocky Mountains.

Patterson Rental Tools offers a broad range of rental tools including:

Blowout Preventors	Diverters
High Pressure Manifolds and Valves	Drill Pipe
Hevi-wate Drill Pipe	Drill Collars
Tubing	Handling Tools
Production Related Rental Tools	Coflexip Hoses
Pumps	

Oilfield Pipe Inspection Services, Pipe Management and Pipe Storage. Pipe inspection services include Full Body Electromagnetic and Phased Array Ultrasonic inspection of pipe used in oil and gas wells. These services are provided at both the Company's inspection facilities and at independent tubular mills in accordance with negotiated sales and/or service contracts. Our customers are major oil companies and steel mills, for which we provide in-house inspection services, inventory management and process control of tubing, casing and drill pipe. Our locations in Channelview, Texas and Morgan City, Louisiana are equipped with large capacity cranes, specially designed forklifts and a computerized inventory system to serve a variety of storage and handling services for both the oilfield and non-oilfield customers.

Well Control School. Well Control School provides industry and government accredited training for the oil and gas industry both in the United States and in limited international locations. Well Control School provides this training in various formats including conventional classroom training, interactive computer training including training delivered over the internet, and mobile simulator training.

Energy Personnel International. Energy Personnel International provides drilling and production engineers, well site supervisors, project management specialists, and workover and completion specialists on a consulting basis to the oil and gas industry to meet customers' needs for staff engineering and well site management.

Refer to Note 12 in the Notes to the Consolidated Financial Statements for additional financial information on our business segments.

Industry

United States. RPC provides its services to its domestic customers through a network of facilities strategically located to serve the Gulf of Mexico, the mid-continent, the southwest, the Rocky Mountains and the northeast production fields. Demand for RPC's services in the U.S. tends to be extremely volatile

and fluctuates with current and projected price levels of oil and natural gas and activity levels in the oil and gas industry. Customer activity levels are influenced by their decisions about capital investment toward the development and production of oil and gas reserves.

Due to aging oilfields and lower-cost sources of oil internationally, the drilling rig count in the U.S. has declined by approximately 63 percent from its peak in 1981. Due to enhanced technology, however, more wells are being drilled and the domestic production of oil and natural gas remains roughly equivalent to prior years. Record low drilling activity levels were experienced in 1986, 1992, 1999 (with April 1999 recording the lowest U.S. drilling rig count in the industry's history), 2002 and again in 2009.

The rig count during the most recent prior cycle peaked at the end of the third quarter of 2008, and began to decline sharply during the fourth quarter of 2008. U.S. domestic drilling activity declined by 57 percent from the third quarter of 2008 to the second quarter of 2009, which was the steepest annualized decline rate in the industry's history. Between the second quarter of 2009 and the end of 2010, U.S. domestic drilling activity increased by 93 percent, but is 17 percent lower than the prior cyclical peak in the third quarter of 2008. As of a recent date in 2011, U.S. domestic drilling activity has increased by approximately two percent compared to the fourth quarter of 2010.

During 2010 the average price of natural gas increased by approximately 12 percent, and the average price of oil increased by approximately 17 percent. The change in domestic drilling activity during 2010 was consistent with the recovery in the prices of oil and natural gas, as well as the improvement in the overall economy following the financial crisis and recession in 2008 and 2009. Although our business has repeatedly demonstrated that it is cyclical, we continue to believe that the long-term prospects for our business are favorable due to growing global demand for oil and natural gas. In addition, we believe in the long-term growth of our business due to increased need for RPC's services demanded by current drilling and completion techniques.

Since 2001 and 2009, gas drilling rigs represented an increasing percentage of the total drilling rig count, and have represented over 70 percent of the drilling rig count during these years. In 2010, the percentage of drilling rigs drilling for natural gas declined, and represented 61 percent of total drilling activity. Although the demand trend for natural gas is continuing to rise, the price of natural gas has remained low in recent years due to increased domestic reserves and productivity of new wells. In contrast, the price of oil has increased, and producers in the domestic market have started to exploit new resource plays that are economical at current high oil prices. The long-term demand outlook for natural gas is still favorable because, unlike oil, foreign imports of natural gas do not compete with domestic production to a meaningful degree. This lack of foreign competition tends to keep prices high enough to ensure that domestic drilling and production will continue at certain minimum levels. Based on current demand levels for natural gas as well as the high oil and gas well depletion rates experienced over the past several years, it is anticipated that gas-directed drilling will continue to represent the majority of the total drilling rig count in the foreseeable future.

In addition, there are certain types of wells being drilled in the U.S. domestic market for which there is a higher demand for RPC's services. Known as either directional or horizontal wells, these wells are more difficult and costly to complete. These wells are predominantly natural gas wells, although they are increasingly being drilled for oil as well. Because they are drilled through a narrow formation and the formation is typically a relatively impermeable formation such as shale, they require additional stimulation when they are completed. Also, many of these formations require high pumping rates of stimulation fluids under high pressures, which in turn means that there is a great deal of pressure pumping horsepower required to complete the well. Furthermore, since they are not drilled in a straight vertical direction from the Earth's surface, they require tools and drilling mechanisms that are flexible, rather than rigid, and can be steered once they are downhole. Specifically, these types of wells require RPC's pressure pumping and coiled tubing services, as well as our downhole tools and services.

International. RPC has historically operated in several countries outside of the United States, although international revenues have never accounted for more than 10 percent of total revenues. Over the past several years, RPC has continued its focus on developing international opportunities, although our

equipment investments over the last couple of years have emphasized domestic rather than international expansion. International revenues for 2010 increased due to higher customer activity levels in Canada, Colombia, and Qatar, among other countries, partially offset by decreases in Mexico and the elimination of revenue in Egypt. During 2010, RPC provided snubbing, well control and oilfield training services in New Zealand, Qatar, Colombia, Gabon, Saudi Arabia, and Mexico, among other countries. We also provided rental tools in Colombia and Argentina, and downhole motors and tools in Canada, Tunisia, Mexico, the Congo and Oman. We continue to focus on the selective development of international opportunities in these and other markets, although we believe that it will continue to be less than 10 percent of total revenues.

RPC provides services to its international customers through branch locations or wholly owned foreign subsidiaries. The international market is prone to political uncertainties, including the risk of civil unrest and conflicts. However, due to the significant investment requirement and complexity of international projects, customers' drilling decisions relating to such projects tend to be evaluated and monitored with a longer-term perspective with regard to oil and natural gas pricing, and therefore have the potential to be more stable than most U.S. domestic operations. Additionally, the international market is dominated by major oil companies and national oil companies which tend to have different objectives and more operating stability than the typical independent oil and gas producer in the U.S. Predicting the timing and duration of contract work is not possible. Pursuing selective international opportunities for revenue growth continues to be a strong emphasis for RPC. Refer to Note 12 in the Notes to Consolidated Financial Statements for further information on our international operations.

Growth Strategies

RPC's primary objective is to generate excellent long-term returns on investment through the effective and conservative management of its invested capital, thus yielding strong cash flow. This objective continues to be pursued through strategic investments and opportunities designed to enhance the long-term value of RPC while improving market share, product offerings and the profitability of existing businesses. Growth strategies are focused on selected customers and markets in which we believe there exist opportunities for higher growth, customer and market penetration, or enhanced returns achieved through consolidations or through providing proprietary value-added products and services. RPC intends to focus on specific market segments in which it believes that it has a competitive advantage and on potential large customers who have a long-term need for our services in markets in which we operate.

RPC seeks to expand its service capabilities through a combination of internal growth, acquisitions, joint ventures and strategic alliances. Because of the fragmented nature of the oil and gas services industry, RPC believes a number of attractive acquisition opportunities exist. However, current strong business conditions have encouraged potential sellers of businesses to expect high prices for their businesses, so we believe we generate better returns growing organically in service lines and geographic locations in which we have experience and presence.

RPC has a revolving credit facility to fund the purchase of revenue-producing equipment and other working capital requirements. During the third quarter of 2010, we renewed our facility to fund our ongoing capital needs. We have pursued this capital source because of the high returns on investment that have been generated by many of our service lines during the previous several years, and because of the low cost and ready availability of debt capital. During 2009 we reduced capital expenditures due to the industry downturn and the resulting lower near-term expected returns on investment. However, we increased our purchases of revenue-producing equipment in 2010 to support new and projected significant customer agreements. In spite of increased capital expenditures and working capital requirements during 2010, at the end of the year our level of debt was conservative compared to a number of our peers. Furthermore, we believe that the favorable long-term returns on investment in our revenue-producing equipment justify financing their purchase using debt.

Customers

Demand for RPC's services and products depends primarily upon the number of oil and natural gas wells being drilled, the depth and drilling conditions of such wells, the number of well completions and

the level of production enhancement activity worldwide. RPC's principal customers consist of major and independent oil and natural gas producing companies. During 2010, RPC provided oilfield services to several hundred customers. Of these customers, only one, Chesapeake Energy Corporation at approximately 15 percent of revenues, accounted for more than 10 percent of revenues. RPC believes that its relationship with this customer is good. Although the Company believes that we would be able to obtain other customers for our services in the event of the loss of this major customer, the loss of this customer could have a material adverse effect on Company revenues and operating results in the near term.

Sales are generated by RPC's sales force and through referrals from existing customers. During 2010 we entered into several agreements, with terms beyond one year, to provide services to certain domestic customers. These agreements represent a growing percentage of our revenues, and we monitor closely the financial condition of these customers, their capital expenditure plans, and other indications of their drilling and completion activities. Due to the short lead time between ordering services or equipment and providing services or delivering equipment, there is no significant sales backlog in most of our service lines.

Competition

RPC operates in highly competitive areas of the oilfield services industry. RPC's products and services are sold in highly competitive markets, and its revenues and earnings are affected by changes in prices for our services, fluctuations in the level of customer activity in major markets, general economic conditions and governmental regulation. RPC competes with many large and small oilfield industry competitors, including the largest integrated oilfield services companies. RPC believes that the principal competitive factors in the market areas that it serves are product and service quality and availability, reputation for safety and technical proficiency, and price.

The oil and gas services industry includes a small number of dominant global competitors including, among others, Halliburton Energy Services Group, a division of Halliburton Company, Baker Hughes and Schlumberger Ltd., and a significant number of locally oriented businesses.

Facilities/Equipment

RPC's equipment consists primarily of oil and gas services equipment used either in servicing customer wells or provided on a rental basis for customer use. Substantially all of this equipment is Company owned. RPC purchases oilfield service equipment from a limited number of manufacturers. These manufacturers of our oilfield service equipment may not be able to meet our requests for timely delivery during periods of high demand which may result in delayed deliveries of equipment and higher prices for equipment.

RPC both owns and leases regional and district facilities from which its oilfield services are provided to land-based and offshore customers. RPC's principal executive offices in Atlanta, Georgia are leased. The Company owns two primary administrative buildings, one in Houston, Texas that includes the Company's operations, engineering, sales and marketing headquarters, and one in Houma, Louisiana that includes certain administrative functions. RPC believes that its facilities are adequate for its current operations. For additional information with respect to RPC's lease commitments, see Note 9 of the Notes to Consolidated Financial Statements.

Governmental Regulation

RPC's business is affected by state, federal and foreign laws and other regulations relating to the oil and gas industry, as well as laws and regulations relating to worker safety and environmental protection. RPC cannot predict the level of enforcement of existing laws and regulations or how such laws and regulations may be interpreted by enforcement agencies or court rulings, whether additional laws and regulations will be adopted, or the effect such changes may have on it, its businesses or financial condition.

In addition, our customers are affected by laws and regulations relating to the exploration for and production of natural resources such as oil and natural gas. These regulations are subject to change, and new regulations may curtail or eliminate our customers' activities in certain areas where we currently operate. We cannot determine the extent to which new legislation may impact our customers' activity levels, and ultimately, the demand for our services.

Intellectual Property

RPC uses several patented items in its operations, which management believes are important but are not indispensable to RPC's success. Although RPC anticipates seeking patent protection when possible, it relies to a greater extent on the technical expertise and know-how of its personnel to maintain its competitive position.

Availability of Filings

RPC makes available, free of charge, on its website, www.rpc.net, its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports on the same day as they are filed with the Securities and Exchange Commission.

Item 1A. Risk Factors

Demand for our products and services is affected by the volatility of oil and natural gas prices.

Oil and natural gas prices affect demand throughout the oil and gas industry, including the demand for our products and services. Our business depends in large part on the conditions of the oil and gas industry, and specifically on the capital investments of our customers related to the exploration and production of oil and natural gas. When these capital investments decline, our customers' demand for our services declines.

Although the production sector of the oil and gas industry is less immediately affected by changing prices, and, as a result, less volatile than the exploration sector, producers react to declining oil and gas prices by curtailing capital spending, which would adversely affect our business. A prolonged low level of customer activity in the oil and gas industry will adversely affect the demand for our products and services and our financial condition and results of operations.

The relationship between the prices of oil and natural gas and our customers' drilling and production activities may not be highly correlated in the future.

Historically, fluctuations in the prices of oil and natural gas have led to corresponding changes in our customers' drilling and production activities as measured by the domestic rig count. As drilling and production activities increase (or remain active) or decrease (or remain stagnant), our operating results are correspondingly favorably or adversely impacted. If this correlation weakens in the future, then it is possible that increases in the prices of oil and natural gas will not lead to corresponding increases in our customers' activities, and our future operating results could be negatively impacted.

We may be unable to compete in the highly competitive oil and gas industry in the future.

We operate in highly competitive areas of the oilfield services industry. The products and services in our industry segments are sold in highly competitive markets, and our revenues and earnings have in the past been affected by changes in competitive prices, fluctuations in the level of activity in major markets and general economic conditions. We compete with the oil and gas industry's many large and small industry competitors, including the largest integrated oilfield service providers. We believe that the principal competitive factors in the market areas that we serve are product and service quality and availability, reputation for safety, technical proficiency and price. Although we believe that our reputation for safety and quality service is good, we cannot assure you that we will be able to maintain our competitive position.

We may be unable to identify or complete acquisitions.

Acquisitions have been and may continue to be a key element of our business strategy. We cannot assure you that we will be able to identify and acquire acceptable acquisition candidates on terms favorable to us in the future. We may be required to incur substantial indebtedness to finance future acquisitions and also may issue equity securities in connection with such acquisitions. The issuance of additional equity securities could result in significant dilution to our stockholders. We cannot assure you that we will be able to integrate successfully the operations and assets of any acquired business with our own business. Any inability on our part to integrate and manage the growth from acquired businesses could have a material adverse effect on our results of operations and financial condition.

Our operations are affected by adverse weather conditions.

Our operations are directly affected by the weather conditions in several domestic regions, including the Gulf of Mexico, the Gulf Coast, the mid-continent, the Rocky Mountains and the Northeast. Hurricanes and other storms prevalent in the Gulf of Mexico and along the Gulf Coast during certain times of the year may also affect our operations, and severe hurricanes may affect our customers' activities for a period of several years. While the impact of these storms may increase the need for certain of our services over a longer period of time, such storms can also decrease our customers' activities immediately after they occur. Such hurricanes may also affect the prices of oil and natural gas by disrupting supplies in the short term, which may increase demand for our services in geographic areas not damaged by the storms. Prolonged rain, snow or ice in many of our locations may temporarily prevent our crews and equipment from reaching customer work sites. Due to seasonal differences in weather patterns, our crews may operate more days in some periods than others. Accordingly, our operating results may vary from quarter to quarter, depending on the impact of these weather conditions.

Our ability to attract and retain skilled workers may impact growth potential and profitability.

Our ability to be productive and profitable will depend substantially on our ability to attract and retain skilled workers. Our ability to expand our operations is, in part, impacted by our ability to increase our labor force. A significant increase in the wages paid by competing employers could result in a reduction in our skilled labor force, increases in the wage rates paid by us, or both. If either of these events occurred, our capacity and profitability could be diminished, and our growth potential could be impaired.

Our concentration of customers in one industry may impact our overall exposure to credit risk.

Substantially all of our customers operate in the energy industry. This concentration of customers in one industry may impact our overall exposure to credit risk, either positively or negatively, in that customers may be similarly affected by changes in economic and industry conditions. We perform ongoing credit evaluations of our customers and do not generally require collateral in support of our trade receivables.

Reliance upon a large customer may adversely affect our revenues and operating results.

During 2010, one of our largest customers accounted for approximately 15 percent of our total revenues. This reliance on a large customer for a significant portion of our total revenues exposes us to the risk that the loss or reduction in revenues from this customer, which could occur unexpectedly, could have a material and disproportionate adverse impact upon our revenues and operating results.

Our business has potential liability for litigation, personal injury and property damage claims assessments.

RPC's subsidiaries have a number of agreements of various types in place with our customers. In general, these agreements indemnify RPC and its subsidiaries against damage or liabilities that arise from the actions of our employees or the operation of our equipment. The provisions in these agreements do not make a distinction among the types of services that RPC provides or the location of the work. These

agreements also require that RPC maintain a certain level and type of insurance coverage against any claims that are determined to be our responsibility. RPC has insurance coverage in place with several well-capitalized insurance companies for accidental environmental claims.

Our operations involve the use of heavy equipment and exposure to inherent risks, including blowouts, explosions and fires. If any of these events were to occur, it could result in liability for personal injury and property damage, pollution or other environmental hazards or loss of production. Litigation may arise from a catastrophic occurrence at a location where our equipment and services are used. This litigation could result in large claims for damages. The frequency and severity of such incidents will affect our operating costs, insurability and relationships with customers, employees and regulators. These occurrences could have a material adverse effect on us. We maintain what we believe is prudent insurance protection. We cannot assure you that we will be able to maintain adequate insurance in the future at rates we consider reasonable or that our insurance coverage will be adequate to cover future claims and assessments that may arise.

Our operations may be adversely affected if we are unable to comply with regulatory and environmental laws.

Our business is significantly affected by stringent environmental laws and other regulations relating to the oil and gas industry and by changes in such laws and the level of enforcement of such laws. We are unable to predict the level of enforcement of existing laws and regulations, how such laws and regulations may be interpreted by enforcement agencies or court rulings, or whether additional laws and regulations will be adopted. The adoption of laws and regulations curtailing exploration and development of oil and gas fields in our areas of operations for economic, environmental or other policy reasons would adversely affect our operations by limiting demand for our services. We also have potential environmental liabilities with respect to our offshore and onshore operations, and could be liable for cleanup costs, or environmental and natural resource damage due to conduct that was lawful at the time it occurred, but is later ruled to be unlawful. We also may be subject to claims for personal injury and property damage due to the generation of hazardous substances in connection with our operations. We believe that our present operations substantially comply with applicable federal and state pollution control and environmental protection laws and regulations. We also believe that compliance with such laws has had no material adverse effect on our operations to date. However, such environmental laws are changed frequently. We are unable to predict whether environmental laws will, in the future, materially adversely affect our operations and financial condition. Penalties for noncompliance with these laws may include cancellation of permits, fines, and other corrective actions, which would negatively affect our future financial results.

Our international operations could have a material adverse effect on our business.

Our operations in various countries including, but not limited to, Africa, Canada, China, Eastern Europe, Latin America, the Middle East and New Zealand are subject to risks. These risks include, but are not limited to, political changes, expropriation, currency restrictions and changes in currency exchange rates, taxes, boycotts and other civil disturbances. The occurrence of any one of these events could have a material adverse effect on our operations.

Our common stock price has been volatile.

Historically, the market price of common stock of companies engaged in the oil and gas services industry has been highly volatile. Likewise, the market price of our common stock has varied significantly in the past.

Our management has a substantial ownership interest, and public stockholders may have no effective voice in the management of the Company.

The Company has elected the “Controlled Corporation” exemption under Rule 303A of the New York Stock Exchange (“NYSE”) Company Guide. The Company is a “Controlled Corporation” because a group that includes the Company’s Chairman of the Board, R. Randall Rollins and his brother, Gary W. Rollins,

who is also a director of the Company, and certain companies under their control, controls in excess of fifty percent of the Company's voting power. As a "Controlled Corporation," the Company need not comply with certain NYSE rules including those requiring a majority of independent directors.

RPC's executive officers, directors and their affiliates hold directly or through indirect beneficial ownership, in the aggregate, approximately 71 percent of RPC's outstanding shares of common stock. As a result, these stockholders effectively control the operations of RPC, including the election of directors and approval of significant corporate transactions such as acquisitions and other matters requiring stockholder approval. This concentration of ownership could also have the effect of delaying or preventing a third party from acquiring control over the Company at a premium.

Our management has a substantial ownership interest, and the availability of the Company's common stock to the investing public may be limited.

The availability of RPC's common stock to the investing public may be limited to those shares not held by the executive officers, directors and their affiliates, which could negatively impact RPC's stock trading prices and affect the ability of minority stockholders to sell their shares. Future sales by executive officers, directors and their affiliates of all or a portion of their shares could also negatively affect the trading price of our common stock.

Provisions in RPC's Certificate of Incorporation and Bylaws may inhibit a takeover of RPC.

RPC's certificate of incorporation, bylaws and other documents contain provisions including advance notice requirements for stockholder proposals and staggered terms for the Board of Directors. These provisions may make a tender offer, change in control or takeover attempt that is opposed by RPC's Board of Directors more difficult or expensive.

Some of our equipment and several types of materials used in providing our services are available from a limited number of suppliers.

We purchase equipment provided by a limited number of manufacturers who specialize in oilfield service equipment. During periods of high demand, these manufacturers may not be able to meet our requests for timely delivery, resulting in delayed deliveries of equipment and higher prices for equipment. There are a limited number of suppliers for certain materials used in pressure pumping services, our largest service line. While these materials are generally available, supply disruptions can occur due to factors beyond our control. Such disruptions, delayed deliveries, and higher prices can limit our ability to provide services, or increase the costs of providing services, thus reducing our revenues and profits.

We have used outside financing to accomplish our growth strategy, and outside financing may become unavailable or may be unfavorable to us.

Our business requires a great deal of capital in order to maintain our equipment and increase our fleet of equipment to expand our operations, and we have access to our \$350 million credit facility to fund our necessary working capital and equipment requirements. Most of our existing credit facility bears interest at a floating rate, which exposes us to market risks as interest rates rise. If our existing capital resources become unavailable, inadequate or unfavorable for purposes of funding our capital requirements, we would need to raise additional funds through alternative debt or equity financings to maintain our equipment and continue our growth. Such additional financing sources may not be available when we need them, or may not be available on favorable terms. If we fund our growth through the issuance of public equity, the holdings of stockholders will be diluted. If capital generated either by cash provided by operating activities or outside financing is not available or sufficient for our needs, we may be unable to maintain our equipment, expand our fleet of equipment, or take advantage of other potentially profitable business opportunities, which could reduce our future revenues and profits.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

RPC owns or leases approximately 100 offices and operating facilities. The Company leases approximately 17,250 square feet of office space in Atlanta, Georgia that serves as its headquarters, a portion of which is allocated and charged to Marine Products Corporation. See “Related Party Transactions” contained in Item 7. The lease agreement on the headquarters is effective through October 2013. RPC believes its current operating facilities are suitable and adequate to meet current and reasonably anticipated future needs. Descriptions of the major facilities used in our operations are as follows:

Owned Locations

Houma, Louisiana — Administrative office
Houston, Texas — Pipe storage terminal and inspection sheds
Houston, Texas — Operations, sales and administrative office
Elk City, Oklahoma — Operations, sales and equipment storage yards
Rock Springs, Wyoming — Operations, sales and equipment storage yards
Lafayette, Louisiana — Operations, sales and equipment storage yards
Conway, Arkansas — Operations, sales and equipment storage yards
Kilgore, Texas — Pumping services facility

Leased Locations

Seminole, Oklahoma — Pumping services facility
Oklahoma City, Oklahoma — Operations, sales and administrative office
Houston, Texas — Operations, sales and administrative office
Odessa, Texas — Operations, sales and equipment storage yards
Washington, Pennsylvania — Operations, sales and equipment storage yards

Item 3. Legal Proceedings

RPC is a party to various routine legal proceedings primarily involving commercial claims, workers’ compensation claims and claims for personal injury. RPC insures against these risks to the extent deemed prudent by its management, but no assurance can be given that the nature and amount of such insurance will, in every case, fully indemnify RPC against liabilities arising out of pending and future legal proceedings related to its business activities. While the outcome of these lawsuits, legal proceedings and claims cannot be predicted with certainty, management believes that the outcome of all such proceedings, even if determined adversely, would not have a material adverse effect on RPC’s business or financial condition.

Item 4. Reserved

Item 4A. Executive Officers of the Registrant

Each of the executive officers of RPC was elected by the Board of Directors to serve until the Board of Directors' meeting immediately following the next annual meeting of stockholders or until his or her earlier removal by the Board of Directors or his or her resignation. The following table lists the executive officers of RPC and their ages, offices, and terms of office with RPC.

<u>Name and Office with Registrant</u>	<u>Age</u>	<u>Date First Elected to Present Office</u>
R. Randall Rollins (1) Chairman of the Board	79	1/24/84
Richard A. Hubbell (2) President and Chief Executive Officer	66	4/22/03
Linda H. Graham (3) Vice President and Secretary	74	1/27/87
Ben M. Palmer (4) Vice President, Chief Financial Officer and Treasurer	50	7/8/96

- (1) R. Randall Rollins began working for Rollins, Inc. (consumer services) in 1949. Mr. Rollins has served as Chairman of the Board of RPC since the spin-off of RPC from Rollins, Inc. in 1984. He has served as Chairman of the Board of Marine Products Corporation (boat manufacturing) since it was spun off from RPC in 2001 and Chairman of the Board of Rollins, Inc. since October 1991. He is also a director of Dover Downs Gaming and Entertainment, Inc. and Dover Motorsports, Inc.
- (2) Richard A. Hubbell has been the President of RPC since 1987 and Chief Executive Officer since 2003. He has also been the President and Chief Executive Officer of Marine Products Corporation since it was spun off from RPC in February 2001. Mr. Hubbell serves on the Board of Directors for both of these companies.
- (3) Linda H. Graham has been the Vice President and Secretary of RPC since 1987. She has also been the Vice President and Secretary of Marine Products Corporation since it was spun off from RPC in 2001. Ms. Graham serves on the Board of Directors for both of these companies.
- (4) Ben M. Palmer has been the Vice President, Chief Financial Officer and Treasurer of RPC since 1996. He has also been the Vice President, Chief Financial Officer and Treasurer of Marine Products Corporation since it was spun off from RPC in 2001.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

RPC's common stock is listed for trading on the New York Stock Exchange under the symbol RES. On October 26, 2010 RPC's Board of Directors declared a three-for-two stock split of the Company's common shares. The additional shares were distributed on December 10, 2010 to stockholders of record on November 10, 2010. All share, earnings per share, and dividends per share data presented throughout this document have been adjusted to reflect this stock split. At February 18, 2011 there were 147,964,000 shares of common stock outstanding and approximately 7,800 beneficial holders of common stock. The following table sets forth the high and low prices of RPC's common stock and dividends paid for each quarter in the years ended December 31, 2010 and 2009:

Quarter	2010			2009		
	High	Low	Dividends	High	Low	Dividends
First	\$ 9.00	\$ 7.07	\$ 0.027	\$ 7.63	\$ 3.45	\$ 0.047
Second.....	10.00	6.61	0.027	7.98	4.29	0.047
Third	14.47	8.69	0.040	7.29	4.73	0.027
Fourth	22.53	13.64	0.047	7.57	6.10	0.027

On January 26, 2011, the Board of Directors approved a \$0.07 per share cash dividend, payable March 10, 2011 to stockholders of record at the close of business on February 10, 2011. The Company expects to continue to pay cash dividends to the common stockholders, subject to the earnings and financial condition of the Company and other relevant factors.

Issuer Purchases of Equity Securities

Shares repurchased in the fourth quarter of 2010 are outlined below.

Period	Total Number of Shares (or Units) Purchased	Average Price Paid Per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs
October 1, 2010 to October 31, 2010	—	\$ —	—	4,210,898
November 1, 2010 to November 30, 2010 ..	—	—	—	4,210,898
December 1, 2010 to December 31, 2010 ..	2,700 ⁽¹⁾	14.03	—	4,210,898
Totals	2,700	\$14.03	—	4,210,898

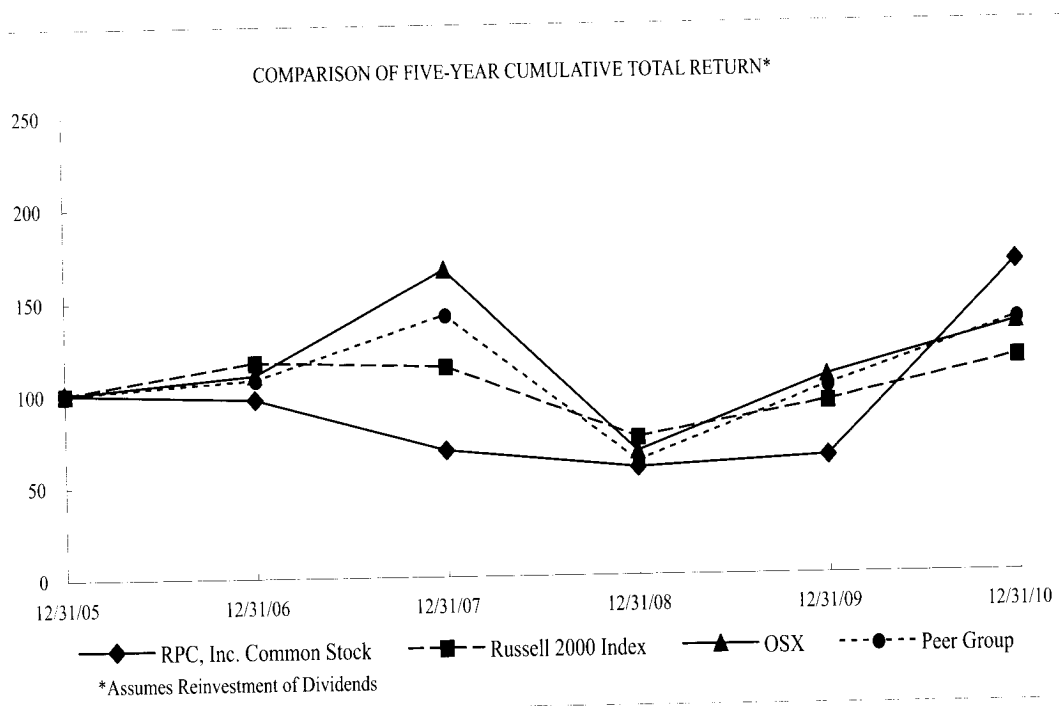

(1) Consists of shares repurchased by the Company in connection with option exercises.

The Company's Board of Directors announced a stock buyback program in March 1998 authorizing the repurchase of 17,718,750 shares in the open market. Currently the program does not have a predetermined expiration date.

Performance Graph

The following graph shows a five year comparison of the cumulative total stockholder return based on the performance of the stock of the Company, assuming dividend reinvestment, as compared with both a broad equity market index and an industry or peer group index. The indices included in the following graph are the Russell 2000 Index ("Russell 2000"), the Philadelphia Stock Exchange's Oil Service Index ("OSX"), and a peer group which includes companies that are considered peers of the Company, as discussed below (the "Peer Group"). The Company has voluntarily chosen to provide both an industry and a peer group index.

The Russell 2000 is a stock index representing small capitalization U.S. stocks. The components of the index had an average market capitalization in 2010 of \$1.255 billion, and the Company was a component of the Russell 2000 during 2010. The Russell 2000 was chosen because it represents companies with comparable market capitalizations to the Company. The OSX is a stock index of 15 companies that provide oil drilling and production services, oilfield equipment, support services and geophysical/reservoir services. The Company is not a component of the OSX, but this index was chosen because it represents a large group of companies that provide the same or similar products and services as the Company. The companies included in the Peer Group are Weatherford International, Inc., Basic Energy Services, Inc., Superior Energy Services, Inc., and Halliburton Company. BJ Services, Inc., a member of the 2009 Peer Group, is no longer publicly traded and was substituted with Basic Energy Services, Inc. for the 2010 Peer Group. The companies included in the Peer Group have been weighted according to each respective issuer's stock market capitalization at the beginning of each year.

Item 6. Selected Financial Data

The following table summarizes certain selected financial data of the Company. The historical information may not be indicative of the Company's future results of operations. The information set forth below should be read in conjunction with "Management's Discussion and Analysis of Financial Condition and Results of Operations" and the Consolidated Financial Statements and the notes thereto included elsewhere in this document.

STATEMENT OF OPERATIONS DATA:

Years Ended December 31,	2010	2009	2008	2007	2006
	(in thousands, except employee and per share amounts)				
Revenues	\$ 1,096,384	\$ 587,863	\$ 876,977	\$ 690,226	\$ 596,630
Cost of revenues.....	606,098	393,806	503,631	368,175	287,037
Selling, general and administrative expenses	121,839	97,672	117,140	107,800	91,051
Depreciation and amortization.....	133,360	130,580	118,403	78,506	46,711
Gain on disposition of assets, net	(3,758)	(1,143)	(6,367)	(6,293)	(5,969)
Operating profit (loss)	238,845	(33,052)	144,170	142,038	177,800
Interest expense	(2,662)	(2,176)	(5,282)	(4,179)	(356)
Interest income.....	46	147	73	70	319
Other income (expense), net	1,303	1,582	(1,176)	1,905	1,085
Income (loss) before income taxes	237,532	(33,499)	137,785	139,834	178,848

Diluted (a)	\$ 1.00	\$ (0.16)	\$ 0.57	\$ 0.59	\$ 0.75
Dividends paid per share (a)	\$ 0.140	\$ 0.147	\$ 0.160	\$ 0.133	\$ 0.089

OTHER DATA:

Operating margin percent	21.8%	(5.6)%	16.4%	20.6%	29.8%
Net cash provided by operating activities	\$ 168,657	\$ 168,740	\$ 177,320	\$ 141,872	\$ 118,228
Net cash used for investing activities.	(171,769)	(61,144)	(158,953)	(239,624)	(151,085)
Net cash provided by (used for) financing activities	7,658	(106,144)	(21,668)	101,361	22,777
Depreciation and amortization.....	133,360	130,580	118,403	78,506	46,711
Capital expenditures.....	\$ 187,486	\$ 67,830	\$ 170,318	\$ 248,758	\$ 159,831
Employees at end of period	2,500	1,980	2,532	2,370	2,000

BALANCE SHEET DATA AT END OF YEAR:

Accounts receivable, net	\$ 294,002	\$ 130,619	\$ 210,375	\$ 176,154	\$ 148,469
Working capital	281,174	151,681	200,494	144,338	111,302
Property, plant and equipment, net	453,017	396,222	470,115	433,126	262,797
Total assets	887,871	649,043	793,461	701,015	478,007
Long-term debt (b).....	121,250	90,300	174,450	156,400	35,600
Total stockholders' equity	\$ 538,895	\$ 409,723	\$ 449,084	\$ 409,272	\$ 335,287

(a) Earnings (loss) per share and dividends paid per share have been restated to reflect the December 2010 stock split.

(b) During the third quarter of 2010, the company closed on a new \$350 million revolving credit facility. This facility replaced the revolving credit facility that was effective beginning in September 2006.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The following discussion should be read in conjunction with "Selected Financial Data," and the Consolidated Financial Statements included elsewhere in this document. See also "Forward-Looking Statements" on page 8.

RPC, Inc. ("RPC") provides a broad range of specialized oilfield services primarily to independent and major oilfield companies engaged in exploration, production and development of oil and gas properties throughout the United States, including the Gulf of Mexico, mid-continent, southwest, northeast, the Rocky Mountains regions and selected international locations. The Company's revenues and profits are generated by providing equipment and services to customers who operate oil and gas properties and invest capital to drill new wells and enhance production or perform maintenance on existing wells.

Our key business and financial strategies are:

- To focus our management resources on and invest our capital in equipment and geographic markets that we believe will earn high returns on capital, and maintain an appropriate capital structure.
- To maintain a flexible cost structure that can respond quickly to volatile industry conditions and business activity levels.
- To deliver equipment and services to our customers safely.
- To secure adequate sources of supplies of certain high-demand raw materials used in our operations, both in order to conduct our operations and to enhance our competitive position.
- To maintain and selectively increase market share.
- To maximize stockholder return by optimizing the balance between cash invested in the Company's productive assets, the payment of dividends to stockholders, and the repurchase of our common stock on the open market.
- To align the interests of our management and stockholders.
- To maintain an efficient, low-cost capital structure, which includes an appropriate use of debt financing.

In assessing the outcomes of these strategies and RPC's financial condition and operating performance, management generally reviews periodic forecast data, monthly actual results, and other similar information. We also consider trends related to certain key financial data, including revenues, utilization of our equipment and personnel, pricing for our services and equipment, profit margins, selling, general and administrative expenses, cash flows and the return on our invested capital. We continuously monitor factors that impact the level of current and expected customer activity levels, such as the price of oil and natural gas, changes in pricing for our services and equipment and utilization of our equipment and personnel. Our financial results are affected by geopolitical factors such as political instability in the petroleum-producing regions of the world, overall economic conditions and weather in the United States, the prices of oil and natural gas, and our customers' drilling and production activities.

Current industry conditions are characterized by natural gas prices which stabilized during 2010 at higher levels than in 2009, and are stable during the first quarter of 2011 compared to the fourth quarter of 2010. Oil prices also increased during 2010 compared to 2009, and have continued to increase during the first quarter of 2011. Compared to the first quarter of 2010, the price of natural gas in 2011 is approximately 12 percent lower, but the price of oil is approximately 14 percent higher. The average U.S. rig count increased by 41 percent during 2010, all of which took place during the second through the fourth quarters. During the first quarter of 2011, the rig count was approximately 27 percent higher than the first quarter of 2010 and slightly higher than the fourth quarter of 2010. Continued increases in the U.S. domestic rig count during 2011 may be limited by the number of rigs available to drill new wells.

In addition to the overall rig count, the Company also monitors the number of horizontal and directional wells drilled in the U.S. domestic market, because this type of well is more service-intensive than a vertical oil or gas well, thus requiring more of the Company's services provided for a longer period of time. The number of horizontal and directional wells drilled in the United States increased in 2010, and was 67 percent of total wells drilled during the year. During the first part of 2011, the percentage of horizontal and directional wells drilled as a percentage of total wells increased to approximately 70 percent. In addition, the percentage of wells drilled for oil increased during 2010, and we believe that this percentage will increase in 2011 due to the high price of oil and the renewed civil unrest in the Middle East. During 2010, the increase in U.S. domestic oilfield activity and the increasingly service-intensive nature of this activity caused the demand for the Company's services to increase significantly. This increased demand was especially evident in the Company's service lines which are used in unconventional completion work, such as pressure pumping, coiled tubing and downhole tools. Also, due to the repetitive nature of this work and the long-term capital commitment required by our customers to execute their drilling programs, several of our large customers entered into contractual relationships with us to provide services to support their drilling and completion programs. These arrangements typically have terms that are greater than one year, and have specific pricing and other financial arrangements which provide satisfactory financial returns to us in the event that the customer's activities decline for any reason.

The Company's response to our current operating environment has been to increase our fleet of equipment, and in some cases, to open new operational locations, to support these significant customer relationships. The capital expenditures have been funded by cash flows from operating activities as well as borrowings under our revolving credit facility. During the third quarter of 2010 the Company re-financed its existing syndicated revolving credit facility in order to maintain sufficient liquidity to fund its capital expenditure requirements.

Income before income taxes was \$237.5 million in 2010 compared to a loss before taxes of \$33.5 million in the prior year. The effective tax rate for 2010 was 38.2 percent compared to 32.1 percent in the prior year. Diluted earnings per share were \$1.00 in 2010 compared to a loss per share of \$0.16 for the prior year. Cash flows from operating activities were \$168.7 million in 2010, the same as in the prior year, and cash and cash equivalents were \$9.0 million at December 31, 2010, an increase of \$4.5 million compared to December 31, 2009. As of December 31, 2010, there was \$121.3 million in outstanding borrowings under our credit facility.

Cost of revenues as a percentage of revenues decreased approximately 11.8 percentage points in 2010 compared to 2009, because of higher utilization of equipment and personnel, which improved operational leverage, and improved pricing for our services.

Selling, general and administrative expenses as a percentage of revenues decreased approximately 11.1 percentage points in 2010 compared to 2009, which was due to the fixed nature of many of these expenses which we were able to leverage over higher revenues.

Consistent with our strategy to selectively grow our capacity, support our significant customer relationships and maintain our existing fleet of high demand equipment, capital expenditures increased to \$187.5 million in 2010, a significant increase compared to \$67.8 million last year.

Outlook

Drilling activity in the U.S. domestic oilfields, as measured by the rotary drilling rig count, had been gradually increasing since about 2003 when rig count was just over 800 through a cyclical peak in the latter half of 2008 when the U.S. rig count peaked at 2,031 during the third quarter. The global recession that began in the fourth quarter of 2007 precipitated the steepest annualized rig count decline in U.S. domestic oilfield history. From the third quarter of 2008 to the second quarter of 2009, the U.S. domestic rig count dropped almost 57 percent, reaching a trough of 876 in June 2009. Since June 2009, the rig count has increased by 98 percent to 1,732 early in the first quarter of 2011. The outlook for the U.S. domestic rig count is for it to remain stable or increase slightly during 2011, although the service-intensive

nature of the activity is projected to continue to increase. From a low of \$34 per barrel early in 2009, the price of oil increased to \$92 per barrel during the fourth quarter of 2010. The average price of oil in 2010 was approximately \$79 per barrel, an increase of 17 percent compared to 2009. During the first quarter of 2011, the price of oil increased to over \$100, an increase of 27 percent compared to the average price of oil in 2010. The price of natural gas fell by 85 percent from approximately \$13 per Mcf in the second quarter of 2008 to slightly below \$2 per Mcf in the third quarter of 2009. The average price of natural gas in 2010 was approximately \$4 per Mcf, 12.3 percent higher than the average price in 2009. During the first quarter of 2011, the price of natural gas increased slightly compared to 2010. Unconventional drilling activity, which requires more of RPC's services, accounted for 67 percent of total U.S. domestic drilling during 2010. Unconventional activity as a percentage of total oilfield activity had grown to 70 percent during the first quarter of 2011.

We continue to monitor the competitive environment in 2011, and while we are concerned about the low price of natural gas, we are encouraged by the increasingly service-intensive nature of the completion activities in our markets. We are also encouraged by the high price of oil, and the fact that early in 2011 approximately 47 percent of U.S. domestic drilling activity was directed towards oil, the highest percentage of U.S. domestic drilling activity directed to oil since 1995. We are also monitoring the amount of new oilfield equipment that is projected to be placed in service during 2011, because an increase in the supply of oilfield equipment in our markets can cause a decrease in the price we receive for our services if commodity prices and drilling activity do not also increase. We increased our commitments to purchase equipment in 2010 and also intend to take delivery of a large amount of revenue-producing equipment during the first and second quarters of 2011. This is consistent with our business and financial strategies because we believe that the equipment will produce high financial returns. However, we understand that factors influencing the industry are unpredictable, and our response to the industry's potential uncertainty is to maintain sufficient liquidity and a conservative capital structure and monitor our discretionary spending. Although we used our bank credit facility to finance our expansion, we will still maintain a conservative financial structure by industry standards. Based on current industry conditions, we believe that the Company's consolidated revenues will increase in 2011 compared to 2010 and financial performance for the same period will also improve.

Results of Operations

Years Ended December 31,	2010	2009	2008
Consolidated revenues	\$1,096,384	\$587,863	\$876,977
Revenues by business segment:			
Technical	\$ 979,834	\$513,289	\$745,991
Support	116,550	74,574	130,986
Consolidated operating profit (loss)	\$ 238,845	\$ (33,052)	\$144,170
Operating profit (loss) by business segment:			
Technical	\$ 217,144	\$ (20,328)	\$110,648
Support	31,086	(1,636)	36,515
Corporate expenses	(13,143)	(12,231)	(9,360)
Gain on disposition of assets, net	3,758	1,143	6,367
Net income (loss)	\$ 146,742	\$ (22,745)	\$ 83,403
Earnings (loss) per share — diluted	\$ 1.00	\$ (0.16)	\$ 0.85
Percentage of cost of revenues to revenues	55%	67%	57%
Percentage of selling, general and administrative expenses to revenues	11%	17%	13%
Percentage of depreciation and amortization expense to revenues	12%	22%	14%
Effective income tax rate	38.2%	32.1%	39.5%
Average U.S. domestic rig count	1,536	1,089	1,879
Average natural gas price (per thousand cubic feet (mcf))	\$ 4.38	\$ 3.90	\$ 8.81
Average oil price (per barrel)	\$ 79.27	\$ 61.90	\$ 99.96

Year Ended December 31, 2010 Compared To Year Ended December 31, 2009

Revenues. Revenues in 2010 increased \$508.5 million or 86.5 percent compared to 2009. The Technical Services segment revenues for 2010 increased 90.9 percent from the prior year due primarily to higher activity levels from expanded customer commitments and improved pricing. The Support Services segment revenues for 2010 increased 56.3 percent from the prior year due to higher activity levels and improved pricing.

Domestic revenues increased 92 percent during 2010 compared to 2009 to \$1,041.5 million due to increased customer activity levels coupled with increased capacity of equipment. The average price of natural gas increased by 12 percent and the average price of oil increased by approximately 28 percent during 2010 compared to the prior year. In conjunction with the increase in natural gas prices, the average domestic rig count during 2010 was 41 percent higher than in 2009. This increase in drilling activity had a positive impact on our financial results. We believe that our activity levels are affected more by the price of natural gas than by the price of oil, because the majority of U.S. domestic drilling activity relates to natural gas, and many of our services are more appropriate for gas wells than oil wells. International revenues, which increased from \$44.8 million in 2009 to \$54.9 million in 2010, were five percent of consolidated revenues. These international revenue increases were due mainly to higher customer activity levels in Canada and Qatar, compared to the prior year. Our international revenues are impacted by the timing of project initiation and their ultimate duration.

Cost of revenues. Cost of revenues in 2010 was \$606.1 million compared to \$393.8 million in 2009, an increase of \$212.3 million or 53.9 percent. The increase in these costs was due to the variable nature of most of these expenses. However, cost of revenues, as a percent of revenues, decreased significantly due to leverage of employment and other direct costs over higher activity levels coupled with improved pricing for our services in 2010 compared to 2009.

Selling, general and administrative expenses. Selling, general and administrative expenses increased 24.7 percent to \$121.8 million in 2010 compared to \$97.7 million in 2009. This increase was primarily due to increases in total employment costs, including increased incentive compensation consistent with improved operating results. However, as a percentage of revenues, selling, general and administrative expenses decreased to 11.1 percent in 2010 compared to 16.6 percent in 2009 due to leverage of the fixed costs over higher revenues.

Depreciation and amortization. Depreciation and amortization were \$133.4 million in 2010, an increase of \$2.8 million or 2.1 percent compared to \$130.6 million in 2009. This increase resulted from a higher level of capital expenditures during recent quarters within both Support Services and Technical Services to increase capacity and to maintain our existing equipment.

Gain on disposition of assets, net. Gain on the disposition of assets, net increased due primarily to increased gains related to various property and equipment dispositions or sales to customers of lost or damaged rental equipment due to the increased intensity of work.

Other income, net. Other income, net was \$1.3 million in 2010, a decrease of \$279 thousand compared to other expense of \$1.6 million in 2009. The increase is mainly due to the current year increase in the fair value of trading securities held in the non-qualified Supplemental Retirement Plan. In addition to changes in the fair value of trading securities, other income (expense) includes gains (losses) from settlements of various legal and insurance claims and royalty payments.

Interest expense. Interest expense was \$2.7 million in 2010 compared to \$2.2 million in 2009. The increase is primarily due to higher interest rates in 2010 incurred on outstanding interest bearing advances on our revolving credit facility.

Interest income. Interest income decreased to \$46 thousand in 2010 compared to \$147 thousand in 2009 as a result of a lower average investable cash balance in 2010 compared to 2009.

Income tax provision (benefit). The income tax provision was \$90.8 million in 2010 compared to an income tax benefit of \$10.8 million in 2009. The change is due to the level of income before income tax in 2010, coupled with an increase in the effective tax rate to 38.2 percent in 2010 from 32.1 percent in 2009.

Net income (loss) and diluted earnings (loss) per share. Net income was \$146.7 million in 2010, or \$1.00 per diluted share, compared to net loss of \$22.7 million, or \$0.16 per share in 2009. This improvement was due to increased revenues and lower, as a percentage of revenues, costs of revenues, selling, general and administrative expenses and depreciation expense.

Year Ended December 31, 2009 Compared To Year Ended December 31, 2008

Revenues. Revenues in 2009 decreased \$289.1 million or 33.0 percent compared to 2008. The Technical Services segment revenues for 2009 decreased 31.2 percent from the prior year due primarily to highly competitive pricing coupled with lower equipment utilization. The Support Services segment revenues for 2009 decreased 43.1 percent from 2008 due to decreased customer activity and significantly lower pricing in the rental tool service line, the largest within this segment.

Domestic revenues decreased 36 percent to \$543.0 million during 2009 compared to 2008 due to decreased customer activity and competitive pricing in our largest service lines, such as pressure pumping and rental tools. The average price of natural gas decreased by 56 percent and the average price of oil decreased by approximately 38 percent during 2009 compared to 2008. In conjunction with the decrease in natural gas prices, the average domestic rig count during 2009 was 42 percent lower than in 2008. This decrease in drilling activity had a negative impact on our financial results. We believe that our activity levels are affected more by the price of natural gas than by the price of oil, because the majority of U.S. domestic drilling activity relates to natural gas, and many of our services are more appropriate for gas wells than oil wells. Foreign revenues, which increased from \$30.8 million in 2008 to \$44.8 million in 2009, were eight percent of consolidated revenues. These revenue increases were due mainly to higher customer activity levels in New Zealand and Mexico compared to 2008. Our international revenues are impacted by the timing of project initiation and their ultimate duration.

Cost of revenues. Cost of revenues in 2009 was \$393.8 million compared to \$503.6 million in 2008, a decrease of \$109.8 million or 21.8 percent. The decrease in these costs was due to the variable nature of most of these expenses as well as the impact of expense reduction measures taken during 2009, including employment cost reductions. Cost of revenues, as a percent of revenues, increased in 2009 from 2008 due to lower pricing for our services.

Selling, general and administrative expenses. Selling, general and administrative expenses decreased 16.6 percent to \$97.7 million in 2009 compared to \$117.1 million in 2008. This decrease was primarily due to lower employment costs and other expenses resulting from expense reduction efforts instituted during 2009. In response to the industry downturn that RPC experienced in the third and fourth quarters of 2008 and most of 2009, the Company undertook several measures which it believes reduced its operating and net losses for the 12 months ended December 31, 2009. Primary among these measures was a reduction in employment costs, which we accomplished by headcount reductions among both field and administrative employees. During 2009, RPC reduced its headcount by 22 percent. This headcount reduction, along with other compensation reductions, resulted in a 22 percent decrease in total employment costs in 2009 as compared to 2008. As a percentage of revenues, selling, general and administrative expenses increased to 16.6 percent in 2009 compared to 13.4 percent in 2008.

Depreciation and amortization. Depreciation and amortization were \$130.6 million in 2009, an increase of \$12.2 million or 10.3 percent compared to \$118.4 million in 2008. This increase resulted from a higher level of capital expenditures during 2009 within both Support Services and Technical Services to increase capacity and to maintain our existing equipment.

Gain on disposition of assets, net. Gain on the disposition of assets, net decreased due primarily to decreased gains related to various property and equipment dispositions or sales to customers of lost or damaged rental equipment.

Other income (expense), net. Other income, net was \$1.6 million in 2009, an increase of \$2.8 million compared to other expense of \$1.2 million in 2008. The increase is mainly due to the 2009 increase in the fair value of trading securities held in the non-qualified Supplemental Retirement Plan. In addition to

changes in the fair value of trading securities, other income (expense) includes gains (losses) from settlements of various legal and insurance claims and royalty payments.

Interest expense. Interest expense was \$2.2 million in 2009 compared to \$5.3 million in 2008. The decrease is due to lower interest expense in 2009 incurred on lower outstanding interest bearing advances on our revolving credit facility. During 2009 RPC also reduced its capital expenditures due to the industry downturn. While we reduced capital expenditures in order to strengthen our balance sheet and preserve cash, and because we did not believe the potential expenditures met our financial return criteria, this action also had the effect of reducing interest expense.

Interest income. Interest income increased to \$147 thousand in 2009 compared to \$73 thousand in 2008 as a result of a higher average investable cash balance in 2009 compared to 2008.

Income tax (benefit) provision. The income tax benefit was \$10.8 million in 2009 compared to a tax provision of \$54.4 million in 2008. The change is due to 2009's loss before income tax, partially offset by a decrease in the effective tax rate to 32.1 percent in 2009 from 39.5 percent in 2008.

Net (loss) income and diluted (loss) earnings per share. Net loss was \$22.7 million in 2009, or \$0.16 per share, compared to net income of \$83.4 million, or \$0.57 per diluted share in 2008. This decrease is due to decreased revenues and higher, as a percentage of revenues, costs of revenues, selling, general and administrative expenses and depreciation expense.

Liquidity and Capital Resources

Cash and Cash Flows

The Company's cash and cash equivalents were \$9.0 million as of December 31, 2010, \$4.5 million as of December 31, 2009 and \$3.0 million as of December 31, 2008.

The following table sets forth the historical cash flows for the years ended December 31:

	(in thousands)		
	2010	2009	2008
Net cash provided by operating activities	\$ 168,657	\$ 168,740	\$ 177,320
Net cash used for investing activities	(171,769)	(61,144)	(158,953)
Net cash provided by (used for) financing activities	7,658	(106,144)	(21,668)

2010

Cash provided by operating activities was comparable in 2010 compared to the prior year despite net income increasing significantly to \$146.7 million in 2010 compared to net loss of \$22.7 million in 2009. This contribution of net income to cash provided by operating activities was largely offset by increases in working capital requirements. Increased business activity levels and revenues in 2010 resulted in higher accounts receivable and increased inventory, partially offset by increases in accounts payable and accrued payroll including bonuses, consistent with higher activity levels and profitability.

Cash used for investing activities in 2010 increased by \$110.6 million compared to 2009, primarily as a result of higher capital expenditures.

Cash provided by (used for) financing activities in 2010 increased by \$113.8 million compared to 2009, primarily due to the net increase in borrowings under our credit facility during 2010 to fund working capital requirements and capital expenditures.

2009

Cash provided by operating activities decreased by \$8.6 million in 2009 compared to 2008. Net loss was \$22.7 million in 2009 compared to net income of \$83.4 million in 2008, decreasing cash provided by operating activities partially offset by decreases in working capital requirements. Decreased business activity levels and revenues in 2009 resulted in lower accounts receivable and prepaid expenses partially

offset by increased inventory and declines in accounts payable and accrued payroll including bonuses, consistent with lower activity levels and profitability.

Cash used for investing activities in 2009 decreased by \$97.8 million compared to 2008, primarily as a result of lower capital expenditures.

Cash used for financing activities in 2009 increased by \$84.5 million compared to 2008, primarily due to the reduction in notes payable to banks during 2009, partially offset by a decrease in common stock purchased and retired.

Financial Condition and Liquidity

The Company's financial condition as of December 31, 2010, remains strong. We believe the liquidity provided by our existing cash and cash equivalents, our overall strong capitalization which includes a revolving credit facility and cash expected to be generated from operations will provide sufficient capital to meet our requirements for at least the next twelve months. The Company currently has a \$350 million revolving credit facility that matures in August 2015. The facility contains customary terms and conditions, including certain financial covenants including covenants restricting RPC's ability to incur liens, merge or consolidate with another entity. A total of \$209.9 million was available under the facility as of December 31, 2010; approximately \$18.8 million of the facility supports outstanding letters of credit relating to self-insurance programs or contract bids. For additional information with respect to RPC's facility, see Note 6 of the Notes to Consolidated Financial Statements.

The Company's decisions about the amount of cash to be used for investing and financing purposes are influenced by its capital position, including access to borrowings under our facility, and the expected amount of cash to be provided by operations. We believe our liquidity will continue to provide the opportunity to grow our asset base and revenues during periods with positive business conditions and strong customer activity levels. The Company's decisions about the amount of cash to be used for investing and financing activities could be influenced by the financial covenants in our credit facility but we do not expect the covenants to restrict our planned activities. The Company is in compliance with these financial covenants.

Cash Requirements

Capital expenditures were \$187.5 million in 2010, and we currently expect capital expenditures to be in excess of \$250.0 million in 2011. We expect these expenditures to be primarily directed towards revenue-producing equipment in our larger, core service lines including pressure pumping, snubbing, nitrogen, and rental tools. The actual amount of 2011 expenditures will depend primarily on equipment maintenance requirements, expansion opportunities, and equipment delivery schedules.

The Company's Retirement Income Plan, a multiple employer trustee defined benefit pension plan, provides monthly benefits upon retirement at age 65 to eligible employees. During the second quarter of 2010, the Company contributed \$0.6 million to the pension plan. The Company expects that additional contributions to the defined benefit pension plan of \$0.6 million will be required in 2011 to achieve the Company's funding objective.

The Company's Board of Directors announced a stock buyback program on March 9, 1998 authorizing the repurchase of up to 17,718,750 shares of which 4,210,898 additional shares were available to be repurchased as of December 31, 2010. The program does not have a predetermined expiration date.

On January 26, 2011, the Board of Directors approved a \$0.07 per share cash dividend, payable March 10, 2011 to stockholders of record at the close of business on February 10, 2011. The Company expects to continue to pay cash dividends to common stockholders, subject to the earnings and financial condition of the Company and other relevant factors.

Contractual Obligations

The Company's obligations and commitments that require future payments include our credit facility, certain non-cancelable operating leases, purchase obligations and other long-term liabilities. The following table summarizes the Company's significant contractual obligations as of December 31, 2010:

(in thousands)	Contractual obligations	Payments due by period			
		Total	Less than 1 year	1-3 years	3-5 years
Long-term debt obligations	\$121,250	\$ —	\$ —	\$121,250	\$ —
Interest on long-term debt obligations . . .	21,898	4,692	9,385	7,821	—
Capital lease obligations	—	—	—	—	—
Operating leases (1)	14,098	5,202	6,051	2,559	286
Purchase obligations (2)	209	209	—	—	—
Other long-term liabilities (3)	2,415	—	2,415	—	—
Total contractual obligations	\$159,870	\$10,103	\$17,851	\$131,360	\$ 286

- (1) Operating leases include agreements for various office locations, office equipment, and certain operating equipment.
- (2) Includes agreements to purchase goods or services that have been approved and that specify all significant terms (pricing, quantity, and timing). As part of the normal course of business the Company occasionally enters into purchase commitments to manage its various operating needs.
- (3) Includes expected cash payments for long-term liabilities reflected on the balance sheet where the timing of the payments are known. These amounts include incentive compensation. These amounts exclude pension obligations with uncertain funding requirements and deferred compensation liabilities.

Fair Value Measurements

The Company's assets and liabilities measured at fair value are classified in the fair value hierarchy (Level 1, 2 or 3) based on the inputs used for valuation. Assets and liabilities that are traded on an exchange with a quoted price are classified as Level 1. Assets and liabilities that are valued using significant observable inputs in addition to quoted market prices are classified as Level 2. The Company currently has no assets or liabilities measured on a recurring basis that are valued using unobservable inputs and therefore no assets or liabilities measured on a recurring basis are classified as Level 3. For defined benefit plan assets classified as Level 3, the values are computed using inputs such as cost, discounted future cash flows, independent appraisals and market based comparable data or on net asset values calculated by the fund and not publicly available.

In 2009, the Company transferred trading securities from assets utilizing Level 1 inputs to assets utilizing Level 2 inputs because significant observable inputs in addition to quoted market prices were used to value these trading securities.

Inflation

The Company purchases its equipment and materials from suppliers who provide competitive prices, and employs skilled workers from competitive labor markets. If inflation in the general economy increases, the Company's costs for equipment, materials and labor could increase as well. Also, increases in activity in the domestic oilfield can cause upward wage pressures in the labor markets from which it hires employees as well as increases in the costs of certain materials and key equipment components used to provide services to the Company's customers. During 2010, the Company incurred higher fuel costs due to increased commodity prices compared to 2009. Also, the Company believes that it will be subject to upward wage pressures 2011. Finally, the costs of certain materials and equipment used to provide services to RPC's customers remain high and may increase during 2011 if oilfield activity remains strong. The Company has attempted to mitigate the risk of cost increases by securing materials and equipment through additional sources and increasing amounts held in inventory, although no assurance can be given that these efforts will be successful.

Off Balance Sheet Arrangements

The Company does not have any material off balance sheet arrangements.

Related Party Transactions

Marine Products Corporation

Effective February 28, 2001, the Company spun off the business conducted through Chaparral Boats, Inc. ("Chaparral"), RPC's former powerboat manufacturing segment. RPC accomplished the spin-off by contributing 100 percent of the issued and outstanding stock of Chaparral to Marine Products Corporation (a Delaware corporation) ("Marine Products"), a newly formed wholly owned subsidiary of RPC, and then distributing the common stock of Marine Products to RPC stockholders. In conjunction with the spin-off, RPC and Marine Products entered into various agreements that define the companies' relationship.

In accordance with a Transition Support Services agreement, which may be terminated by either party, RPC provides certain administrative services, including financial reporting and income tax administration, acquisition assistance, etc., to Marine Products. Charges from the Company (or from corporations that are subsidiaries of the Company) for such services aggregated approximately \$689,000 in 2010, \$713,000 in 2009 and \$842,000 in 2008. The Company's receivable due from Marine Products for these services as of December 31, 2010 and 2009 was approximately \$65,000. The Company's directors are also directors of Marine Products and all of the executive officers are employees of both the Company and Marine Products.

Other

The Company periodically purchases in the ordinary course of business products or services from suppliers, who are owned by significant officers or stockholders, or affiliated with the directors of RPC. The total amounts paid to these affiliated parties were approximately \$551,000 in 2010, \$409,000 in 2009 and \$393,000 in 2008.

RPC receives certain administrative services and rents office space from Rollins, Inc. (a company of which Mr. R. Randall Rollins is also Chairman and which is otherwise affiliated with RPC). The service agreements between Rollins, Inc. and the Company provide for the provision of services on a cost reimbursement basis and are terminable on six months notice. The services covered by these agreements include office space, administration of certain employee benefit programs, and other administrative services. Charges to the Company (or to corporations which are subsidiaries of the Company) for such services and rent totaled \$94,000 in 2010, \$87,000 in 2009 and \$90,000 in 2008.

Critical Accounting Policies

The consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States, which require significant judgment by management in selecting the appropriate assumptions for calculating accounting estimates. These judgments are based on our historical experience, terms of existing contracts, trends in the industry, and information available from other outside sources, as appropriate. Senior management has discussed the development, selection and disclosure of its critical accounting estimates with the Audit Committee of our Board of Directors. The Company believes the following critical accounting policies involve estimates that require a higher degree of judgment and complexity:

Allowance for doubtful accounts — Substantially all of the Company's receivables are due from oil and gas exploration and production companies in the United States, selected international locations and foreign, nationally owned oil companies. Our allowance for doubtful accounts is determined using a combination of factors to ensure that our receivables are not overstated due to uncollectibility. Our established credit evaluation procedures seek to minimize the amount of business we conduct with higher risk customers. Our customers' ability to pay is directly related to their ability to generate cash flow on

their projects and is significantly affected by the volatility in the price of oil and natural gas. Provisions for doubtful accounts are recorded in selling, general and administrative expenses. Accounts are written off against the allowance for doubtful accounts when the Company determines that amounts are uncollectible and recoveries of amounts previously written off are recorded when collected. Significant recoveries will generally reduce the required provision in the period of recovery. Therefore, the provision for doubtful accounts can fluctuate significantly from period to period. Recoveries were insignificant in 2010 and 2009. Recoveries in 2008 totaled \$1.5 million, causing a reduction in bad debt expense in 2008. We record specific provisions when we become aware of a customer's inability to meet its financial obligations to us, such as in the case of bankruptcy filings or deterioration in the customer's operating results or financial position. If circumstances related to customers change, our estimates of the realizability of receivables would be further adjusted, either upward or downward.

The estimated allowance for doubtful accounts is based on our evaluation of the overall trends in the oil and gas industry, financial condition of our customers, our historical write-off experience, current economic conditions, and in the case of international customers, our judgments about the economic and political environment of the related country and region. In addition to reserves established for specific customers, we establish general reserves by using different percentages depending on the age of the receivables which we adjust periodically based on management judgment and the economic strength of our customers. Excluding the effect of the recoveries referred to above, the net provisions for doubtful accounts have ranged from 0.10 percent to 0.45 percent of revenues over the last three years. Increasing or decreasing the estimated general reserve percentages by 0.50 percentage points as of December 31, 2010 would have resulted in a change of approximately \$1.5 million to the allowance for doubtful accounts and a corresponding change to selling, general and administrative expenses.

Income taxes — The effective income tax rates were 38.2 percent in 2010, 32.1 percent in 2009 and 39.5 percent in 2008. Our effective tax rates vary due to changes in estimates of our future taxable income, fluctuations in the tax jurisdictions in which our earnings and deductions are realized, and favorable or unfavorable adjustments to our estimated tax liabilities related to proposed or probable assessments. As a result, our effective tax rate may fluctuate significantly on a quarterly or annual basis.

We establish a valuation allowance against the carrying value of deferred tax assets when we determine that it is more likely than not that the asset will not be realized through future taxable income. Such amounts are charged to earnings in the period in which we make such determination. Likewise, if we later determine that it is more likely than not that the net deferred tax assets would be realized, we would reverse the applicable portion of the previously provided valuation allowance. We have considered future market growth, forecasted earnings, future taxable income, the mix of earnings in the jurisdictions in which we operate, and prudent and feasible tax planning strategies in determining the need for a valuation allowance.

We calculate our current and deferred tax provision based on estimates and assumptions that could differ from the actual results reflected in income tax returns filed during the subsequent year. Adjustments based on filed returns are recorded when identified, which is generally in the third quarter of the subsequent year for U.S. federal and state provisions. Deferred tax liabilities and assets are determined based on the differences between the financial and tax bases of assets and liabilities using enacted tax rates in effect in the year the differences are expected to reverse.

The amount of income taxes we pay is subject to ongoing audits by federal, state and foreign tax authorities, which may result in proposed assessments. Our estimate for the potential outcome for any uncertain tax issue is highly judgmental. We believe we have adequately provided for any reasonably foreseeable outcome related to these matters. However, our future results may include favorable or unfavorable adjustments to our estimated tax liabilities in the period the assessments are made or resolved or when statutes of limitation on potential assessments expire. Additionally, the jurisdictions in which our earnings or deductions are realized may differ from our current estimates.

Insurance expenses — The Company self insures, up to certain policy-specified limits, certain risks related to general liability, workers' compensation, vehicle and equipment liability. The cost of claims

under these self-insurance programs is estimated and accrued using individual case-based valuations and statistical analysis and is based upon judgment and historical experience; however, the ultimate cost of many of these claims may not be known for several years. These claims are monitored and the cost estimates are revised as developments occur relating to such claims. The Company has retained an independent third party actuary to assist in the calculation of a range of exposure for these claims. As of December 31, 2010, the Company estimates the range of exposure to be from \$12.0 million to \$15.3 million. The Company has recorded liabilities at December 31, 2010 of approximately \$13.6 million which represents management's best estimate of probable loss.

Depreciable life of assets — RPC's net property, plant and equipment at December 31, 2010 was \$453.0 million representing 51.0 percent of the Company's consolidated assets. Depreciation and amortization expenses for the year ended December 31, 2010 were \$133.4 million. Management judgment is required in the determination of the estimated useful lives used to calculate the annual and accumulated depreciation and amortization expense.

Property, plant and equipment are reported at cost less accumulated depreciation and amortization, which is provided on a straight-line basis over the estimated useful lives of the assets. The estimated useful life represents the projected period of time that the asset will be productively employed by the Company and is determined by management based on many factors including historical experience with similar assets. Assets are monitored to ensure changes in asset lives are identified and prospective depreciation and amortization expense is adjusted accordingly. We have not made any changes to the estimated lives of assets resulting in a material impact in the last three years.

Defined benefit pension plan — In 2002, the Company ceased all future benefit accruals under the defined benefit plan, although the Company remains obligated to provide employees benefits earned through March 2002. The Company accounts for the defined benefit plan in accordance with the provisions of FASB ASC 715, "Compensation – Retirement Benefits" and engages an outside actuary to calculate its obligations and costs. With the assistance of the actuary, the Company evaluates the significant assumptions used on a periodic basis including the estimated future return on plan assets, the discount rate, and other factors, and makes adjustments to these liabilities as necessary.

The Company chooses an expected rate of return on plan assets based on historical results for similar allocations among asset classes, the investments strategy, and the views of our investment adviser. Differences between the expected long-term return on plan assets and the actual return are amortized over future years. Therefore, the net deferral of past asset gains (losses) ultimately affects future pension expense. The Company's assumption for the expected return on plan assets was seven percent for 2010 and 2009 and eight percent for 2008.

The discount rate reflects the current rate at which the pension liabilities could be effectively settled at the end of the year. In estimating this rate, the Company utilizes a yield curve approach. The approach utilizes an economic model whereby the Company's expected benefit payments over the life of the plan are forecasted and then compared to a portfolio of investment grade corporate bonds that will mature at the same time that the benefit payments are due in any given year. The economic model then calculates the one discount rate to apply to all benefit payments over the life of the plan which will result in the same total lump sum as the payments from the corporate bonds. A lower discount rate increases the present value of benefit obligations. The discount rate was 5.49 percent as of December 31, 2010 compared to 6.00 percent in 2009 and 6.84 percent in 2008.

As set forth in note 10 to the Company's financial statements, included among the asset categories for the Plan's investments are real estate, tactical composite and alternative investments comprised of investments in real estate and hedge funds. These investments are categorized as level 3 investments and are valued using significant non-observable inputs which do not have a readily determinable fair value. In accordance with ASU No. 2009-12 "Investments In Certain Entities That Calculate Net Asset Value per Share (Or Its Equivalent)," these investments are valued based on the net asset value per share calculated by the funds in which the plan has invested. These valuations are subject to judgments and assumptions of

the funds which may prove to be incorrect, resulting in risks of incorrect valuation of these investments. The Company seeks to mitigate against these risks by evaluating the appropriateness of the funds' judgments and assumptions by reviewing the financial data included in the funds' financial statements for reasonableness.

As of December 31, 2010, the defined benefit plan was under-funded and the recorded change within accumulated other comprehensive loss decreased stockholders' equity by \$1.4 million after tax. Holding all other factors constant, a change in the discount rate used to measure plan liabilities by 0.50 percentage points would not result in a significant pre-tax change to the net loss related to pension reflected in accumulated other comprehensive loss.

The Company recognized pre-tax pension (income) expense of \$0.6 million in 2010, \$2.0 million in 2009 and \$(0.4) million in 2008. Based on the under-funded status of the defined benefit plan as of December 31, 2010, the Company expects to recognize pension expense of \$0.5 million in 2011. Holding all other factors constant, a change in the expected long-term rate of return on plan assets by 0.50 percentage points would result in an increase or decrease in pension expense of approximately \$0.1 million in 2011. Holding all other factors constant, a change in the discount rate used to measure plan liabilities by 0.25 percentage points would result in an increase or decrease in pension expense of approximately \$1.0 million in 2011.

New Accounting Pronouncements

Recently Adopted Accounting Pronouncements:

- ***ASU 2010-01, Equity (Topic 505): Accounting for Distributions to Shareholders with Components of Stock and Cash.*** The amendments to the Codification in this ASU clarify that the stock portion of a distribution to shareholders that allows them to elect to receive cash or stock with a potential limitation on the total amount of cash that all shareholders can elect to receive in the aggregate is considered a share issuance that is reflected in earnings per share prospectively and not a share dividend. The Company adopted these provisions in the first quarter of 2010 and the adoption did not have a material impact on the Company's consolidated financial statements.
- ***ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements.*** The amendments to the Codification in this ASU now require
 1. the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and the reasons for the transfer be disclosed separately and
 2. in the reconciliation for fair value measurements using significant unobservable inputs, a reporting entity should present separately information about purchases, sales, issuances and settlements.
 3. judgment in determining the appropriate classes of assets and liabilities when reporting fair value measurements for each class
 4. disclosures about valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements.

The Company complied with these disclosure requirements in its annual report on Form 10-K for the year ended December 31, 2009 and plans to provide the disclosures in every reporting period as necessary. Adoption of these disclosure requirements did not have a material impact on the Company's consolidated financial statements.

Recently Issued Accounting Pronouncements Not Yet Adopted:

- ***ASU 2010-13, Compensation – Stock Compensation (topic 718): Effect of Denominating the Exercise Price of a Share-Based Payment Award in the Currency of the Market in Which the Underlying Equity Security Trades.*** The amendments to the Codification in this ASU provide guidance on share-based payment awards to employees with an exercise price denominated in the currency of a

market in which a substantial portion of the entity's equity shares trade. The ASU states that if such awards meet all the criteria for equity should be classified as such and not liability based solely on the currency it is denominated in. The amendments are effective beginning in 2011 with adoption required in the first quarter of that year. Adoption of these provisions is not expected to have a material impact on the Company's consolidated financial statements.

- **ASU 2010-28, *Intangibles - Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts.*** The amendments to the Codification in this ASU modify Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. Goodwill of a reporting unit is required to be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. These amendments are effective starting in the first quarter of 2011 with early adoption not permitted. Adoption of these provisions is not expected to have a material impact on the Company's consolidated financial statements.
- **ASU 2010-29, *Business Combinations (Topic 805): Disclosure of Supplementary Pro Forma Information for Business Combinations.*** The amendments to the Codification in this ASU apply to any public entity that enters into business combinations that are material on an individual or aggregate basis and specify that the entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments also expand the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The amendments are effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning in January 2011 with early adoption permitted. The Company plans to adopt these provisions for all acquisitions completed beginning in 2011 and provide the appropriate disclosures.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

The Company is subject to interest rate risk exposure through borrowings on its credit facility. As of December 31, 2010, there are outstanding interest-bearing advances of \$121.3 million on our credit facility which bear interest at a floating rate. Effective December 2008, we entered into an interest rate swap agreement that effectively converted \$50 million of the outstanding variable-rate borrowings under the revolving credit facility to a fixed-rate basis, thereby hedging against the impact of potential interest rate changes. Under this agreement, the Company and the issuing lender settle each month for the difference between a fixed interest rate of 2.07 percent and a comparable one month variable-rate interest paid to the syndicate of lenders under our credit facility on the same notional amount, excluding the margin. The swap agreement terminates on September 8, 2011. As of December 31, 2010 the interest rate swap had a negative fair value of \$610,000. An increase in interest rates of one half of one percent would result in the interest rate swap having a negative fair value of approximately \$458,000 at December 31, 2010. A decrease in interest rates of one half of one percent would result in the interest rate swap having a negative fair value \$765,000 at December 31, 2010. A change in interest rates will have no impact on the interest expense associated with the \$50,000,000 of borrowings under the credit facility that are subject to the interest rate swap. A change in interest rates of one percent on the balance outstanding on the credit facility at December 31, 2010 not subject to the interest rate swap would cause a change of \$0.7 million in total annual interest costs.

Additionally, the Company is exposed to market risk resulting from changes in foreign exchange rates. However, since the majority of the Company's transactions occur in U.S. currency, this risk is not expected to have a material effect on its consolidated results of operations or financial condition.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

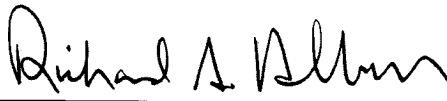

To the Stockholders of RPC, Inc.:

The management of RPC, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. RPC, Inc. maintains a system of internal accounting controls designed to provide reasonable assurance, at a reasonable cost, that assets are safeguarded against loss or unauthorized use and that the financial records are adequate and can be relied upon to produce financial statements in accordance with accounting principles generally accepted in the United States of America. The internal control system is augmented by written policies and procedures, an internal audit program and the selection and training of qualified personnel. This system includes policies that require adherence to ethical business standards and compliance with all applicable laws and regulations.

There are inherent limitations to the effectiveness of any controls system. A controls system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the controls system are met. Also, no evaluation of controls can provide absolute assurance that all control issues and any instances of fraud, if any, within the Company will be detected. Further, the design of a controls system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. The Company intends to continually improve and refine its internal controls.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of the design and operations of our internal control over financial reporting as of December 31, 2010 based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, management's assessment is that RPC, Inc. maintained effective internal control over financial reporting as of December 31, 2010.

The independent registered public accounting firm, Grant Thornton LLP, has audited the consolidated financial statements as of and for the year ended December 31, 2010, and has also issued their report on the effectiveness of the Company's internal control over financial reporting, included in this report on page 39.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL
CONTROL OVER FINANCIAL REPORTING**

Board of Directors and Stockholders
RPC, Inc.

We have audited RPC, Inc. (a Delaware Corporation) and subsidiaries' (the "Company") internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of December 31, 2010 and 2009, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2010 and our report dated March 4, 2011 expressed an unqualified opinion on those consolidated financial statements.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON
CONSOLIDATED FINANCIAL STATEMENTS**

Board of Directors and Stockholders
RPC, Inc.

We have audited the accompanying consolidated balance sheets of RPC, Inc. (a Delaware corporation) and subsidiaries (the "Company") as of December 31, 2010 and 2009, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2010. Our audits of the basic consolidated financial statements included the financial statement schedule listed in the index appearing under Item 15. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2010 and 2009, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2010 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated March 4, 2011 expressed an unqualified opinion thereon.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Note 1: Significant Accounting Policies

Principles of Consolidation and Basis of Presentation

The consolidated financial statements include the accounts of RPC, Inc. and its wholly-owned subsidiaries ("RPC" or the "Company"). All significant intercompany accounts and transactions have been eliminated.

Nature of Operations

RPC provides a broad range of specialized oilfield services and equipment primarily to independent and major oil and gas companies engaged in the exploration, production and development of oil and gas properties throughout the United States, including the Gulf of Mexico, mid-continent, southwest, northeast and Rocky Mountain regions, and in selected international markets. The services and equipment provided include Technical Services such as pressure pumping services, coiled tubing services, snubbing services (also referred to as hydraulic workover services), nitrogen services, and firefighting and well control, and Support Services such as the rental of drill pipe and other specialized oilfield equipment and oilfield training.

Common Stock

RPC is authorized to issue 159,000,000 shares of common stock, \$0.10 par value. Holders of common stock are entitled to receive dividends when, as, and if declared by the Board of Directors out of legally available funds. Each share of common stock is entitled to one vote on all matters submitted to a vote of stockholders. Holders of common stock do not have cumulative voting rights. In the event of any liquidation, dissolution or winding up of the Company, holders of common stock are entitled to ratable distribution of the remaining assets available for distribution to stockholders.

Preferred Stock

RPC is authorized to issue up to 1,000,000 shares of preferred stock, \$0.10 par value. As of December 31, 2010, there were no shares of preferred stock issued. The Board of Directors is authorized, subject to any limitations prescribed by law, to provide for the issuance of preferred stock as a class without series or, if so determined from time to time, in one or more series, and by filing a certificate pursuant to the applicable laws of the state of Delaware and to fix the designations, powers, preferences and rights, exchangeability for shares of any other class or classes of stock. Any preferred stock to be issued could rank prior to the common stock with respect to dividend rights and rights on liquidation.

Dividends

On January 26, 2011, the Board of Directors approved a \$0.07 per share cash dividend payable March 10, 2011 to stockholders of record at the close of business on February 10, 2011.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Significant estimates are used in the determination of the allowance for doubtful accounts, income taxes, accrued insurance expenses, depreciable lives of assets, and pension liabilities.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Revenues

RPC's revenues are generated principally from providing services and the related equipment. Revenues are recognized when the services are rendered and collectibility is reasonably assured. Revenues from services and equipment are based on fixed or determinable priced purchase orders or contracts with the customer and do not include the right of return. Rates for services and equipment are priced on a per day, per unit of measure, per man hour or similar basis. Sales tax charged to customers is presented on a net basis within the consolidated statement of operations and excluded from revenues.

Concentration of Credit Risk

Substantially all of the Company's customers are engaged in the oil and gas industry. This concentration of customers may impact overall exposure to credit risk, either positively or negatively, in that customers may be similarly affected by changes in economic and industry conditions. The Company provided oilfield services to several hundred customers. One customer at, 15 percent, accounted for more than ten percent of the Company's 2010 revenues. Two customers individually accounted for 13 percent and 12 percent of the Company's 2009 revenues. No customers accounted for more than 10 percent of 2008 revenues. Additionally, one customer accounted for 15 percent of accounts receivable as of December 31, 2010 and one customer accounted for 12 percent of accounts receivable as of December 31, 2009.

Cash and Cash Equivalents

Highly liquid investments with original maturities of three months or less when acquired are considered to be cash equivalents. The Company maintains its cash in bank accounts which, at times, may exceed federally insured limits. RPC maintains cash equivalents and investments in one or more large financial institutions, and RPC's policy restricts investment in any securities rated less than "investment grade" by national rating services.

Investments

Investments classified as available-for-sale are stated at their fair values, with the unrealized gains and losses, net of tax, reported as a separate component of stockholders' equity. The cost of securities sold is based on the specific identification method. Realized gains and losses, declines in value judged to be other than temporary, interest, and dividends with respect to available-for-sale securities are included in interest income. The Company did not realize any gains or losses on securities during 2010, 2009 or 2008 on its available-for-sale securities. Securities that are held in the non-qualified Supplemental Retirement Plan ("SERP") are classified as trading. See Note 10 for further information regarding the SERP. The change in fair value of trading securities is presented in other income (expense) on the consolidated statements of operations.

Management determines the appropriate classification of investments at the time of purchase and re-evaluates such designations as of each balance sheet date.

Accounts Receivable

The majority of the Company's accounts receivable are due principally from major and independent oil and natural gas exploration and production companies. Credit is extended based on evaluation of a customer's financial condition and, generally, collateral is not required. Accounts receivable are considered past due after 60 days and are stated at amounts due from customers, net of an allowance for doubtful accounts.

Allowance for Doubtful Accounts

Accounts receivable are carried at the amount owed by customers, reduced by an allowance for estimated amounts that may not be collectible in the future. The estimated allowance for doubtful accounts is based on an evaluation of industry trends, financial condition of customers, historical write-off

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

experience, current economic conditions, and in the case of international customers, judgments about the economic and political environment of the related country and region. Accounts are written off against the allowance for doubtful accounts when the Company determines that amounts are uncollectible and recoveries of previously written-off accounts are recorded when collected.

Inventories

Inventories, which consist principally of (i) raw materials and supplies that are consumed providing services to the Company's customers, (ii) spare parts for equipment used in providing these services and (iii) manufactured components and attachments for equipment used in providing services, are recorded at the lower of weighted average cost or market value. Market value is determined based on replacement cost for material and supplies. The Company regularly reviews inventory quantities on hand and records provisions for excess or obsolete inventory based primarily on its estimated forecast of product demand, market conditions, production requirements and technological developments.

Derivative Instruments and Hedging Activities

The Company is subject to interest rate risk on the variable component of the interest rate under our credit facility. Effective December 2008, the Company entered into a \$50 million interest rate swap agreement. The agreement terminates on September 8, 2011. The Company has designated the interest rate swap as a cash flow hedge. Changes in the fair value of the effective portion of the interest rate swap are recognized in other comprehensive loss until the hedged item is recognized in earnings.

Property, Plant and Equipment

Property, plant and equipment, including software costs, are reported at cost less accumulated depreciation and amortization, which is provided on a straight-line basis over the estimated useful lives of the assets. Annual depreciation and amortization expense is computed using the following useful lives: operating equipment, 3 to 10 years; buildings and leasehold improvements, 15 to 30 years; furniture and fixtures, 5 to 7 years; software, 5 years; and vehicles, 3 to 5 years. The cost of assets retired or otherwise disposed of and the related accumulated depreciation and amortization are eliminated from the accounts in the year of disposal with the resulting gain or loss credited or charged to income from operations. Expenditures for additions, major renewals, and betterments are capitalized. Expenditures for restoring an identifiable asset to working condition or for maintaining the asset in good working order constitute repairs and maintenance and are expensed as incurred.

RPC records impairment losses on long-lived assets used in operations when events and circumstances indicate that the assets might be impaired and the undiscounted cash flows estimated to be generated by those assets are less than the carrying amount of those assets. The Company periodically reviews the values assigned to long-lived assets, such as property, plant and equipment and other assets, to determine if any impairments should be recognized. Management believes that the long-lived assets in the accompanying balance sheets have not been impaired.

Goodwill and Other Intangibles

Goodwill represents the excess of the purchase price over the fair value of net assets of businesses acquired. The carrying amount of goodwill was \$24,093,000 at December 31, 2010 and 2009. Goodwill is reviewed annually, or more frequently if events occur or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying amount, for impairment. In reviewing goodwill for impairment, potential impairment is measured by comparing the estimated fair value of a reporting unit with its carrying value. Based upon the results of these analyses, the Company has concluded that no impairment of its goodwill has occurred for the years ended December 31, 2010, 2009 and 2008.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Other intangibles primarily represent non-compete agreements related to businesses acquired. Non-compete agreements are amortized on a straight-line basis over the period of the agreement, as this method best estimates the ratio that current revenues bear to the total of current and anticipated revenues. These non-compete agreements are fully amortized as of December 31, 2010 and 2009.

Advertising

Advertising expenses are charged to expense during the period in which they are incurred. Advertising expenses totaled \$1,782,000 in 2010, \$1,065,000 in 2009 and \$1,957,000 in 2008.

Insurance Expenses

RPC self insures, up to certain policy-specified limits, certain risks related to general liability, workers' compensation, vehicle and equipment liability, and employee health insurance plan costs. The estimated cost of claims under these self-insurance programs is estimated and accrued as the claims are incurred (although actual settlement of the claims may not be made until future periods) and may subsequently be revised based on developments relating to such claims. The portion of these estimated outstanding claims expected to be paid more than one year in the future is classified as long-term accrued insurance expenses.

Income Taxes

Deferred tax liabilities and assets are determined based on the difference between the financial and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The Company establishes a valuation allowance against the carrying value of deferred tax assets when the Company determines that it is more likely than not that the asset will not be realized through future taxable income.

Defined Benefit Pension Plan

The Company has a defined benefit pension plan that provides monthly benefits upon retirement at age 65 to eligible employees with at least one year of service prior to 2002. In 2002, the Company's Board of Directors approved a resolution to cease all future retirement benefit accruals under the defined benefit pension plan. See Note 10 for a full description of this plan and the related accounting and funding policies.

Share Repurchases

The Company records the cost of share repurchases in stockholders' equity as a reduction to common stock to the extent of par value of the shares acquired and the remainder is allocated to capital in excess of par value.

Three-for-Two Stock Split

On October 26, 2010 RPC's Board of Directors declared a three-for-two stock split of the Company's common shares. The additional shares were distributed on December 10, 2010, to stockholders of record on November 10, 2010. All share, earnings per share, and dividends per share data presented in the accompanying financial statements have been adjusted to reflect this stock split.

Earnings per Share

FASB ASC Topic 260-10 "Earnings Per Share-Overall," requires a basic earnings per share and diluted earnings per share presentation. During 2009, the Company adopted certain amendments to ASC 260-10 which requires that all outstanding unvested share-based payment awards that contain non-forfeitable rights to dividends or dividend equivalents, whether paid or unpaid, be considered participating securities and included in the calculation of its basic earnings per share.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

The Company has periodically issued share-based payment awards that contain non-forfeitable rights to dividends, and therefore are considered participating securities. See Note 10 for further information on restricted stock granted to employees.

The basic and diluted calculations differ as a result of the dilutive effect of stock options and time lapse restricted shares and performance restricted shares included in diluted earnings per share, but excluded from basic earnings per share. Basic and diluted earnings per share are computed by dividing net income (loss) by the weighted average number of shares outstanding during the respective periods.

A reconciliation of weighted average shares outstanding along with the earnings (loss) per share attributable to restricted shares of common stock (participating securities) is as follows:

<i>(In thousands except per share data)</i>	2010	2009	2008
Net income (loss) available for stockholders:	\$146,742	\$(22,745)	\$ 83,403
Less: Dividends paid			
Common stock	(20,294)	(21,229)	(22,905)
Restricted shares of common stock	(353)	(327)	(423)
Undistributed earnings (loss)	<u>\$126,095</u>	<u>\$(44,301)</u>	<u>\$ 60,075</u>
Allocation of undistributed earnings:			
Common stock	\$123,536	\$(43,408)	\$ 58,992
Restricted shares of common stock	2,559	(893)	1,083

	<u>\$ 1.00</u>	<u>\$ (0.16)</u>	<u>\$ 0.57</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

During the year ended December 31, 2009, the Company incurred a net loss from continuing operations and consequently the common stock equivalents were excluded from the computation of diluted loss per share because the effect would have been anti-dilutive.

Fair Value of Financial Instruments

The Company's financial instruments consist of cash and cash equivalents, accounts receivable, marketable securities, accounts payable, an interest rate swap, and debt. The carrying value of cash and cash equivalents, accounts receivable and accounts payable approximate their fair value due to the short-term nature of such instruments. The marketable securities classified as available-for-sale and the securities held in the SERP classified as trading are carried at fair value in the accompanying consolidated balance sheets. The interest rate swap is carried at fair value, which is based on quotes from the issuer of the swap and represents the estimated amounts that we would expect to pay to terminate the swap. See Note 8 for additional information.

Stock-Based Compensation

Stock-based compensation expense is recognized for all share-based payment awards, net of an estimated forfeiture rate. Thus, compensation cost is amortized for those shares expected to vest on a straight-line basis over the requisite service period of the award. See Note 10 for additional information.

New Accounting Pronouncements

Recently Adopted Accounting Pronouncements:

- ***ASU 2010-01, Equity (Topic 505): Accounting for Distributions to Shareholders with Components of Stock and Cash.*** The amendments to the Codification in this ASU clarify that the stock portion of a distribution to shareholders that allows them to elect to receive cash or stock with a potential limitation on the total amount of cash that all shareholders can elect to receive in the aggregate is considered a share issuance that is reflected in earnings per share prospectively and not a share dividend. The Company adopted these provisions in the first quarter of 2010 and the adoption did not have a material impact on the Company's consolidated financial statements.
- ***ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements.*** The amendments to the Codification in this ASU now require
 1. the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and the reasons for the transfer be disclosed separately and
 2. in the reconciliation for fair value measurements using significant unobservable inputs, a reporting entity should present separately information about purchases, sales, issuances and settlements.
 3. judgment in determining the appropriate classes of assets and liabilities when reporting fair value measurements for each class
 4. disclosures about valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements.

The Company complied with these disclosure requirements in its annual report on Form 10-K for the year ended December 31, 2009 and plans to provide the disclosures in every reporting period as necessary. Adoption of these disclosure requirements did not have a material impact on the Company's consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Recently Issued Accounting Pronouncements Not Yet Adopted:

- **ASU 2010-13, Compensation – Stock Compensation (Topic 718): Effect of Denominating the Exercise Price of a Share-Based Payment Award in the Currency of the Market in Which the Underlying Equity Security Trades.** The amendments to the Codification in this ASU provide guidance on share-based payment awards to employees with an exercise price denominated in the currency of a market in which a substantial portion of the entity's equity shares trade. The ASU states that if such awards meet all the criteria for equity should be classified as such and not liability based solely on the currency it is denominated in. The amendments are effective beginning in 2011 with adoption required in the first quarter of that year. Adoption of these provisions is not expected to have a material impact on the Company's consolidated financial statements.
- **ASU 2010-28, Intangibles - Goodwill and Other (Topic 350): When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts.** The amendments to the Codification in this ASU modify Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. For those reporting units, an entity is required to perform Step 2 of the goodwill impairment test if it is more likely than not that a goodwill impairment exists. Goodwill of a reporting unit is required to be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. These amendments are effective starting in the first quarter of 2011 with early adoption not permitted. Adoption of these provisions is not expected to have a material impact on the Company's consolidated financial statements.
- **ASU 2010-29, Business Combinations (Topic 805): Disclosure of Supplementary Pro Forma Information for Business Combinations.** The amendments to the Codification in this ASU apply to any public entity that enters into business combinations that are material on an individual or aggregate basis and specify that the entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendments also expand the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. The amendments are effective prospectively for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning in January 2011 with early adoption permitted. The Company plans to adopt these provisions for all acquisitions completed beginning in 2011 and provide the appropriate disclosures.

Note 2: Accounts Receivable

Accounts receivable, net consists of the following:

<u>December 31,</u>	<u>2010</u>	<u>2009</u>
<i>(in thousands)</i>		
Trade receivables:		
Billed	\$ 216,201	\$ 98,275
Unbilled	84,977	34,753
Other receivables	1,519	801
Total	<u>302,697</u>	<u>133,829</u>
Less: allowance for doubtful accounts	(8,695)	(3,210)
Accounts receivable, net	<u>\$ 294,002</u>	<u>\$ 130,619</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Trade receivables relate to sale of our services and products, for which credit is extended based on our evaluation of the customer's credit worthiness. Unbilled receivables represent revenues earned but not billed to the customer until future dates, usually within one month. Other receivables consist primarily of amounts due from purchasers of Company property and rebates from suppliers.

Changes in the Company's allowance for doubtful accounts are as follows:

<u>Years Ended December 31,</u>	<u>2010</u>	<u>2009</u>
<i>(in thousands)</i>		
Beginning balance	\$ 3,210	\$ 6,199
Bad debt expense	4,812	660
Accounts written-off	(730)	(3,763)
Recoveries	1,403	114
Ending balance	<u>\$ 8,695</u>	<u>\$ 3,210</u>

Note 3: Inventories

Inventories are \$64,059,000 at December 31, 2010 and \$55,783,000 at December 31, 2009 and consist of raw materials, parts and supplies.

Note 4: Property, Plant and Equipment

Property, plant and equipment are presented at cost net of accumulated depreciation and consist of the following:

<u>December 31,</u>	<u>2010</u>	<u>2009</u>
<i>(in thousands)</i>		
Land	\$ 15,053	\$ 14,980
Buildings and leasehold improvements	82,457	80,928
Operating equipment	755,028	631,666
Capitalized software	15,899	15,391
Furniture and fixtures	4,690	4,342
Vehicles	219,555	180,408
Construction in progress	1,821	35
Gross property, plant and equipment	<u>1,094,503</u>	<u>927,750</u>
Less: accumulated depreciation	(641,486)	(531,528)
Net property, plant and equipment	<u>\$ 453,017</u>	<u>\$ 396,222</u>

Depreciation expense was \$133.4 million in 2010, \$130.6 million in 2009 and \$118.4 million in 2008. There are no capital leases outstanding as of December 31, 2010 and December 31, 2009. The Company had accounts payable for purchases of property and equipment of approximately \$18.1 million, \$3.7 million and \$9.4 million as of December 31, 2010, 2009 and 2008.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Note 5: Income Taxes

The following table lists the components of the provision (benefit) for income taxes:

<u>Years ended December 31,</u>	<u>2010</u>	<u>2009</u>	<u>2008</u>
<i>(in thousands)</i>			
Current provision (benefit):			
Federal	\$ 56,289	\$ (13,490)	\$ 20,793
State	11,180	235	5,453
Foreign	1,059	832	937
Deferred provision (benefit):			
Federal	22,833	1,698	25,486
State	(571)	(29)	1,713
Total income tax provision (benefit)	<u>\$ 90,790</u>	<u>\$(10,754)</u>	<u>\$ 54,382</u>

Reconciliation between the federal statutory rate and RPC's effective tax rate is as follows:

<u>Years ended December 31,</u>	<u>2010</u>	<u>2009</u>	<u>2008</u>
Federal statutory rate	35.0%	35.0%	35.0%
State income taxes, net of federal benefit	2.9	(2.4)	3.2
Tax credits	(0.6)	1.3	(0.8)
Non-deductible expenses	0.4	(2.6)	0.9
Other	0.5	0.8	1.2
Effective tax rate	<u>38.2%</u>	<u>32.1%</u>	<u>39.5%</u>

Significant components of the Company's deferred tax assets and liabilities are as follows:

<u>December 31,</u>	<u>2010</u>	<u>2009</u>
<i>(in thousands)</i>		
Deferred tax assets:		
Self-insurance	\$ 5,643	\$ 5,445
Pension	6,715	5,346
State net operating loss carryforwards	2,955	1,742

All others	232	149
Valuation allowance	(1,295)	(1,550)
Gross deferred tax assets	<u>21,467</u>	<u>15,772</u>
Deferred tax liabilities:		
Depreciation	(89,456)	(62,640)
Goodwill amortization	(5,020)	(4,403)
All others	(453)	—
Gross deferred tax liabilities	<u>(94,929)</u>	<u>(67,043)</u>
Net deferred tax liabilities	<u>\$(73,462)</u>	<u>\$(51,271)</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Historically and currently, undistributed earnings of the Company's foreign subsidiaries are considered indefinitely reinvested and, accordingly, no provision for U.S. federal income taxes has been recorded. Deferred taxes are provided for earnings outside the United States when those earnings are not considered indefinitely reinvested.

As of December 31, 2010, the Company has net operating loss carryforwards related to state income taxes of approximately \$68.2 million that will expire between 2011 and 2030. As of December 31, 2010 the Company has a valuation allowance of approximately \$1.3 million, representing the tax affected amount of loss carryforwards that the Company does not expect to utilize, against the corresponding deferred tax asset.

Total net income tax payments (refunds) were \$61,632,000 in 2010, (\$8,351,000) in 2009 and \$29,714,000 in 2008.

The Company's policy is to record interest and penalties related to income tax matters as income tax expense. Accrued interest and penalties were immaterial to the financial statements as of December 31, 2010 and 2009.

The Company's liability for unrecognized tax benefits was \$33 thousand as of December 31, 2010 and \$30 thousand as of December 31, 2009, all of which would affect our effective rate if recognized. A reconciliation of the beginning and ending amount of unrecognized tax benefits for 2010 and 2009 are as follows:

<u>Years Ended December 31,</u>	<u>2010</u>	<u>2009</u>
<i>(in thousands)</i>		
Beginning balance	\$30	\$11
Additions based on tax positions related to current year	—	—
Additions for tax positions of prior years	3	19
Reductions for tax positions of prior years	—	—
Ending balance.	<u>\$33</u>	<u>\$30</u>

The Company and its subsidiaries are subject to U.S. federal and state income tax in multiple jurisdictions. In many cases our uncertain tax positions are related to tax years that remain open and subject to examination by the relevant taxing authorities. The Company's 2007 through 2010 tax years remain open to examination.

It is reasonably possible that the amount of the unrecognized tax benefits with respect to our unrecognized tax positions will increase or decrease in the next 12 months. These changes may be the result of, among other things, state tax settlements under Voluntary Disclosure Agreements. However, quantification of an estimated range cannot be made at this time.

Note 6: Long-Term Debt

On August 31, 2010, the Company replaced its \$200 million credit facility with a new \$350 million revolving credit facility with Banc of America Securities, LLC, SunTrust Robinson Humphrey, Inc., and Regions Capital Markets as Joint Lead Arrangers and Joint Book Managers, and a syndicate of other lenders. The facility includes a full and unconditional guarantee by the Company's 100% owned domestic subsidiaries whose assets equal substantially all of the consolidated assets of RPC and its subsidiaries. The subsidiaries of the Company that are not guarantors are considered minor.

The facility has a general term of five years and provides for an unsecured line of credit of up to \$350 million, which includes a \$50 million letter of credit subfacility, and a \$25 million swingline subfacility. The maturity date of all revolving loans under the facility is August 31, 2015. The Company has incurred loan origination fees and other debt related costs associated with the facility in the aggregate of approximately \$1.9 million. These costs are being amortized to interest expense over the five year term of the loan, and the net amount is classified as non-current other assets on the consolidated balance sheets.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Revolving loans under the Revolving Credit Agreement bear interest at one of the following two rates, at the Company's election:

- the Base Rate, which is the highest of Bank of America's "prime rate" for the day of the borrowing, a fluctuating rate per annum equal to the Federal Funds Rate plus .50%, and a rate per annum equal to the one (1) month LIBOR rate plus 1.00%, in each case plus a margin that ranges from 0.75% to 1.50% based on a quarterly debt covenant calculation; or
- with respect to any Eurodollar borrowings, Adjusted LIBOR (which equals LIBOR as increased to account for the maximum reserve percentages established by the U.S. Federal Reserve) plus a margin ranging from 1.75% to 2.50%, based upon a quarterly debt covenant calculation.

In addition, the Company pays an annual fee ranging from .25% to .40%, based on a quarterly debt covenant calculation, of the unused portion of the credit facility.

The facility contains customary terms and conditions, including certain financial covenants and restrictions on indebtedness, dividend payments, business combinations and other related items. Further, the facility contains financial covenants limiting the ratio of the Company's consolidated debt-to-EBITDA to no more than 2.5 to 1, and limiting the ratio of the Company's consolidated EBITDA to interest expense to no less than 2 to 1. The Company was in compliance with these covenants as of and for the year ended December 31, 2010.

As of December 31, 2010, RPC has outstanding borrowings of \$121.3 million under the facility. Interest incurred and recorded as expense on the facility was \$3,170,000 in 2010, \$2,327,000 in 2009 and \$5,188,000 in 2008. The weighted average interest rate was 3.0% in 2010, 1.8% in 2009 and 3.6% in 2008. The Company capitalized interest incurred of \$554,000 in 2010, \$150,000 in 2009 and \$1,064,000 in 2008 related to facilities and equipment under construction. Additionally there were letters of credit relating to self-insurance programs and contract bids outstanding for \$18.8 million as of December 31, 2010.

Cash interest paid (net of capitalized interest) was approximately \$1,899,000 in 2010, \$2,192,000 in 2009 and \$5,232,000 in 2008.

Effective December 2008 the Company entered into an interest rate swap agreement that effectively converted \$50 million of the Company's variable-rate debt to a fixed rate basis, thereby hedging against the impact of potential interest rate changes on future interest expense. The agreement terminates on September 8, 2011. Under this agreement the Company and the issuing lender settle on a monthly basis for the difference between a fixed interest rate of 2.07% and a comparable one month LIBOR rate.

Note 7: Accumulated Other Comprehensive (Loss) Income

Accumulated other comprehensive (loss) income consists of the following (in thousands):

	Pension Adjustment	Unrealized Gain (Loss) On Securities	Foreign Currency Translation	Net Loss On Cash Flow Hedge	Total
Balance at December 31, 2008.....	\$ (9,480)	\$ 129	\$(154)	\$(527)	\$(10,032)
Change during 2009:					
Before-tax amount	1,413	143	530	11	2,097
Tax benefit	(516)	(52)	(299)	(4)	(871)

Tax expense (benefit)	775	(160)	(120)	(76)	419
Total activity in 2010	(1,350)	281	209	133	(727)
Balance at December 31, 2010.....	\$ (9,933)	\$ 501	\$ 286	\$(387)	\$ (9,533)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Note 8: Fair Value Disclosures

The various inputs used to measure assets at fair value establish a hierarchy that distinguishes between assumptions based on market data (observable inputs) and the Company's assumptions (unobservable inputs). The hierarchy consists of three broad levels as follows:

1. Level 1 – Quoted market prices in active markets for identical assets or liabilities.
2. Level 2 – Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
3. Level 3 – Unobservable inputs developed using the Company's estimates and assumptions, which reflect those that market participants would use.

The following table summarizes the valuation of financial instruments measured at fair value on a recurring basis on the balance sheet as of December 31, 2010 and 2009:

	Fair Value Measurements at December 31, 2010 with:		
<i>(in thousands)</i>	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets:			
Trading securities	\$ —	\$8,445	\$—
Available-for-sale securities – equity securities	1,124	—	—
Liabilities:			
Interest rate swap	\$ —	\$ 610	\$—
	Fair Value Measurements at December 31, 2009 with:		
<i>(in thousands)</i>	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets:			
Trading securities	\$ —	\$6,905	\$ —
Available-for-sale securities – equity securities	653	—	—
Liabilities:			
Interest rate swap	\$ —	\$ 820	\$ —

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

The Company determines the fair value of the marketable securities that are available-for-sale through quoted market prices. The total fair value is the final closing price, as defined by the exchange in which the asset is actively traded, on the last trading day of the period, multiplied by the number of units held without consideration of transaction costs. The trading securities are comprised of the SERP assets, as described in Note 10, and are recorded primarily at their net cash surrender values, which approximates fair value, as provided by the issuing insurance company. Significant observable inputs, in addition to quoted market prices, were used to value the trading securities. As a result, the Company classified these investments as using level 2 inputs.

At December 31, 2010 and 2009, there was \$121,250,000 and \$90,300,000 outstanding under the Company's credit facility. The fair value of these borrowings was \$121,250,000 in 2010 and \$88,043,000 in 2009. The fair value of these borrowings was based on quotes from the lender (level 2 inputs). The borrowings under our revolving credit facility bear interest at the variable rate described in Note 6. We are subject to interest rate risk on the variable component of the interest rate. Our risk management objective is to lock in the interest cash outflows on a portion of our debt. As a result, as described in Note 6, we entered into an interest rate swap agreement effectively converting a portion of the outstanding borrowings under the revolving credit facility to a fixed-rate, thereby hedging against the impact of potential interest rate changes on future interest expense. The fair value of this swap was negative \$610,000 at December 31, 2010 and is recorded in other accrued expenses. At December 31, 2009 the fair value of this swap was negative \$820,000 and is recorded in other long-term liabilities. The fair value of the interest rate swap was based on quotes from the issuer of the swap and represents the estimated amounts that we would expect to pay to terminate the swap.

The carrying amounts of other financial instruments reported in the balance sheet for current assets and current liabilities approximate their fair values because of the short maturity of these instruments. The Company currently does not use the fair value option to measure any of its existing financial instruments and has not determined whether or not it will elect this option for financial instruments it may acquire in the future.

Note 9: Commitments and Contingencies

Lease Commitments - Minimum annual rentals, principally for noncancelable real estate and equipment leases with terms in excess of one year, in effect at December 31, 2010, are summarized in the following table:

<i>(in thousands)</i>	
2011	\$ 4,105
2012	3,612
2013	2,439
2014	1,565
2015	994
Thereafter	286
Total rental commitments	<u>\$ 13,001</u>

Total rental expense, including short-term rentals, charged to operations was approximately \$11,970,000 in 2010, \$10,787,000 in 2009 and \$9,109,000 in 2008.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Income Taxes - The amount of income taxes the Company pays is subject to ongoing audits by federal and state tax authorities, which often result in proposed assessments. Other long-term liabilities include \$33,000 as of December 31, 2010 and \$30,000 as of December 31, 2009, that represents the Company's estimated liabilities for the probable assessments payable.

Sales and Use Taxes - The Company has ongoing sales and use tax audits in various jurisdictions and may be subjected to varying interpretations of statute that could result in unfavorable outcomes that cannot be currently estimated.

Litigation - RPC is a party to various routine legal proceedings primarily involving commercial claims, workers' compensation claims and claims for personal injury. RPC insures against these risks to the extent deemed prudent by its management, but no assurance can be given that the nature and amount of such insurance will, in every case, fully indemnify RPC against liabilities arising out of pending and future legal proceedings related to its business activities. While the outcome of these lawsuits, legal proceedings and claims cannot be predicted with certainty, management, after consultation with legal counsel, believes that the outcome of all such proceedings, even if determined adversely, would not have a material adverse effect on the Company's business or financial condition.

Note 10: Employee Benefit Plans

Defined Benefit Pension Plan

The Company's Retirement Income Plan, a trustee defined benefit pension plan, provides monthly benefits upon retirement at age 65 to substantially all employees with at least one year of service prior to 2002. As of February 28, 2001, the plan became a multiple employer plan, with Marine Products Corporation as an adopting employer.

In 2002, the Company's Board of Directors approved a resolution to cease all future retirement benefit accruals under the Retirement Income Plan. In lieu thereof, the Company began providing enhanced benefits in the form of cash contributions for certain longer serviced employees that had not reached the normal retirement age of 65 as of March 31, 2002. The contributions were discretionary and made annually based on continued employment over a seven year period ending in 2008. These discretionary contributions were made to either the SERP established by the Company or to the 401(k) plan for each employee that was entitled to the enhanced benefit. There was no expense related to the enhanced benefits for 2010 or 2009. The expense related to enhanced benefits was \$295,000 for 2008.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

The Company's projected benefit obligation exceeds the fair value of the plan assets under its pension plan by \$9,351,000 and thus the plan was under-funded as of December 31, 2010.

The following table sets forth the funded status of the Retirement Income Plan and the amounts recognized in RPC's consolidated balance sheets:

December 31,	2010	2009
<i>(in thousands)</i>		
Accumulated Benefit Obligation at end of year	\$ 35,873	\$ 32,190
CHANGE IN PROJECTED BENEFIT OBLIGATION:		
Benefit obligation at beginning of year	\$ 32,190	\$ 29,203

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

The accumulated benefit obligation for the Retirement Income Plan at December 31, 2010 and 2009 has been disclosed above. The Company uses a December 31 measurement date for this qualified plan.

Amounts recognized in the consolidated balance sheets consist of:

December 31,	2010	2009
<i>(in thousands)</i>		
Funded status	\$ (9,351)	\$ (7,258)
SERP contributions/deferrals	(9,046)	(7,389)
Long-term pension liabilities	<u>\$ (18,397)</u>	<u>\$ (14,647)</u>

RPC's funding policy is to contribute to the defined benefit pension plan the amount required, if any, under the Employee Retirement Income Security Act of 1974. RPC contributed \$614,000 in 2010 but made no contributions in 2009.

The components of net periodic benefit cost are summarized as follows:

Years ended December 31,	2010	2009	2008
<i>(in thousands)</i>			
Service cost for benefits earned during the period	\$ —	\$ —	\$ —
Interest cost on projected benefit obligation	1,893	1,938	1,841
Expected return on plan assets	(1,720)	(1,521)	(2,543)
Amortization of net loss	409	1,538	285
Net periodic benefit plan cost (credit)	<u>\$ 582</u>	<u>\$ 1,955</u>	<u>\$ (417)</u>

The Company recognized pre-tax decreases (increases) to the funded status in comprehensive loss of \$2,125,000 in 2010, \$(1,413,000) in 2009 and \$9,532,000 in 2008. There were no previously unrecognized prior service costs as of December 31, 2010, 2009 and 2008. The pre-tax amounts recognized in comprehensive loss for the years ended December 31, 2010, 2009 and 2008 are summarized as follows:

<i>(in thousands)</i>	2010	2009	2008
Net loss (gain)	\$ 2,534	\$ 125	\$ 9,817
Amortization of net (loss) gain	(409)	(1,538)	(285)
Net transition obligation (asset)	—	—	—
Amount recognized in other comprehensive loss	<u>\$ 2,125</u>	<u>\$ (1,413)</u>	<u>\$ 9,532</u>

The amounts in accumulated other comprehensive loss expected to be recognized as components of net periodic benefit cost in 2011 are as follows:

<i>(in thousands)</i>	2011
Amortization of net loss (gain)	\$ 458
Prior service cost (credit)	—
Net transition obligation (asset)	—
Estimated net periodic benefit plan cost	<u>\$ 458</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries
Years ended December 31, 2010, 2009 and 2008

The weighted average assumptions as of December 31 used to determine the projected benefit obligation and net benefit cost were as follows:

<u>December 31,</u>	<u>2010</u>	<u>2009</u>	<u>2008</u>
<i>Projected Benefit Obligation:</i>			
Discount rate	5.49%	6.00%	6.84%
Rate of compensation increase	N/A	N/A	N/A
<i>Net Benefit Cost:</i>			
Discount rate	6.00%	6.84%	6.25%
Expected return on plan assets	7.00%	7.00%	8.00%
Rate of compensation increase	N/A	N/A	N/A

The Company's expected return on assets assumption is derived from a detailed periodic assessment conducted by its management and its investment adviser. It includes a review of anticipated future long-term performance of individual asset classes and consideration of the appropriate asset allocation strategy given the anticipated requirements of the plan to determine the average rate of earnings expected on the funds invested to provide for the pension plan benefits. While the study gives appropriate consideration to recent fund performance and historical returns, the rate of return assumption is derived primarily from a long-term, prospective view. Based on its recent assessment, the Company has concluded that its expected long-term return assumption of seven percent is reasonable.

The Plan's weighted average asset allocation at December 31, 2010 and 2009 by asset category along with the target allocation for 2011 are as follows:

<u>Asset Category</u>	<u>Target Allocation for 2011</u>	<u>Percentage of Plan Assets as of December 31, 2010</u>	<u>Percentage of Plan Assets as of December 31, 2009</u>
Debt Securities - Core Fixed Income	30.0%	26.2%	26.2%
Tactical - Fund of Equity and Debt Securities	20.0%	10.1%	5.2%
Domestic Equity Securities	25.0%	26.4%	25.0%
Global Equity Securities	2.8%	4.3%	4.4%
International Equity Securities	8.9%	13.8%	13.8%
Real Estate	5.6%	4.6%	4.2%
Real Return	5.6%	5.6%	—
Other	2.1%	9.0%	21.2%
Total	<u>100.0%</u>	<u>100.0%</u>	<u>100.0%</u>

The Company's overall investment strategy is to achieve a mix of approximately 70 percent of investments for long-term growth and 30 percent for near-term benefit payments, with a wide diversification of asset types, fund strategies and fund managers. Equity securities primarily include investments in large-cap and mid-cap companies. Fixed-income securities include corporate bonds of companies in diversified securities, mortgage-backed securities, and U.S. Treasuries. Other types of investments include hedge funds and private equity funds that follow several different investment strategies. For each of the asset categories in the pension plan, the investment strategy is identical – maximize the long-term rate of return on plan assets with an acceptable level of risk in order to minimize the cost of providing pension benefits. The investment policy establishes a target allocation for each asset class which is rebalanced as required.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Some of our assets, primarily our private equity, real estate and hedge funds, do not have readily determinable market values given the specific investment structures involved and the nature of the underlying investments. For the December 31, 2010 plan asset reporting, publicly traded asset pricing was used where possible. For assets without readily determinable values, estimates were derived from investment manager discussions focusing on underlying fundamentals and significant events.

Included among the asset categories for the Plans' investments are real estate and other investments comprised of investments in real estate and hedge funds. These investments are categorized as level 3 investments and are valued using significant non-observable inputs which do not have a readily determinable fair value. In accordance with ASU No. 2009-12 "Investments In Certain Entities That Calculate Net Asset Value per Share (Or Its Equivalent)," these investments are valued based on the net asset value per share calculated by the funds in which the plan has invested. These valuations are subject to judgments and assumptions of the funds which may prove to be incorrect, resulting in risks of incorrect valuation of these investments. The Company seeks to mitigate against these risks by evaluating the appropriateness of the funds' judgments and assumptions by reviewing the financial data included in the funds' financial statements for reasonableness.

The following table presents our plan assets using the fair value hierarchy as of December 31, 2010 and December 31, 2009. The fair value hierarchy has three levels based on the reliability of the inputs used to determine fair value. See Note 8 for a brief description of the three levels under the fair value hierarchy.

Fair Value Hierarchy as of December 31, 2010:

<i>Investments (in thousands)</i>	Total	Level 1	Level 2	Level 3
Cash and Cash Equivalents (1)	\$ 2,081	\$ 2,081	\$ —	\$ —
Fixed Income Securities (2)	6,937	—	6,937	—
Domestic Equity Securities	7,015	7,015	—	—
Global Equity Securities	1,153	—	1,153	—
International Equity Securities (3)	3,672	1,636	2,036	—
Tactical Composite (4)	2,687	—	2,687	—
Real Estate (5)	1,210	—	—	1,210
Real Return (6)	1,492	—	1,492	—
Alternative Investments (7)	275	—	—	275
	<u>\$ 26,522</u>	<u>\$ 10,732</u>	<u>\$ 14,305</u>	<u>\$ 1,485</u>

Fair Value Hierarchy as of December 31, 2009:

<i>Investments (in thousands)</i>	Total	Level 1	Level 2	Level 3
Cash and Cash Equivalents (1)	\$ 943	\$ 943	\$ —	\$ —
Fixed Income Securities (2)	6,529	—	6,529	—
Domestic Equity Securities	6,237	6,237	—	—
Global Equity Securities	1,085	—	1,085	—
International Equity Securities (3)	3,440	1,475	1,965	—
Real Estate (5)	1,039	—	—	1,039
Alternative Investments (7)	5,659	—	1,302	4,357
	<u>\$ 24,932</u>	<u>\$ 8,655</u>	<u>\$ 10,881</u>	<u>\$ 5,396</u>

- (1) Cash and cash equivalents, which are used to pay benefits and plan administrative expenses, are held in Rule 2a-7 money market funds.
- (2) Fixed income securities are primarily valued using a market approach with inputs that include broker quotes, benchmark yields, base spreads and reported trades.
- (3) Some international equity securities are valued using a market approach based on the quoted market prices of identical instruments in their respective markets.
- (4) Tactical composite funds invest in stocks, bonds and cash, both domestic and international. These assets are valued primarily using a market approach based on the quoted market prices of identical instruments in their respective markets.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

- (5) Real estate fund values are primarily reported by the fund manager and are based on valuation of the underlying investments, which include inputs such as cost, discounted future cash flows, independent appraisals and market based comparable data.
- (6) Real return funds invest in global equities, commodities and inflation protected core bonds that are valued primarily using a market approach based on the quoted market prices of identical instruments in their respective markets.
- (7) Alternative investments consist of fund-of-fund LLC or commingled fund structures. The LLCs are primarily valued based on Net Asset Values [NAV] calculated by the fund and are not publicly available. Liquidity for the LLCs is monthly and is subject to liquidity of the underlying funds. The commingled fund NAV is calculated by the manager on a daily basis and has monthly liquidity.

The following table presents a reconciliation of Level 3 assets held during the year ended December 31, 2010:

<i>Investments (in thousands)</i>	Balance at December 31, 2009	Net Realized and Unrealized Gains/(Losses)	Net Purchases, Issuances and Settlements	Net Transfers In to (Out of) Level 3	Balance at December 31, 2010
Real Estate	\$ 1,039	\$ 171	\$ —	\$ —	\$1,210
Alternative Investments	4,357	(235)	(2,127)	(1,720)	275
	<u>\$ 5,396</u>	<u>\$ (64)</u>	<u>\$(2,127)</u>	<u>\$(1,720)</u>	<u>\$1,485</u>

The following table presents a reconciliation of Level 3 assets held during the year ended December 31, 2009:

<i>Investments (in thousands)</i>	Balance at December 31, 2009	Net Realized and Unrealized Gains/(Losses)	Net Purchases, Issuances and Settlements	Net Transfers In to (Out of) Level 3	Balance at December 31, 2010
Real Estate	\$ 1,723	\$ (360)	\$ (324)	\$—	\$1,039
Alternative Investments	4,114	243	—	—	4,357
	<u>\$ 5,837</u>	<u>\$ (117)</u>	<u>\$ (324)</u>	<u>\$—</u>	<u>\$5,396</u>

The Company expects to contribute approximately \$600,000 to the Retirement Income Plan in 2011 and does not expect to receive a refund in 2011.

The Company estimates that the future benefits payable for the Retirement Income Plan over the next ten years are as follows:

<i>(in thousands)</i>	
2011	\$ 1,659
2012	1,761
2013	1,867
2014	1,962
2015	2,036
2016-2020	11,716

Supplemental Executive Retirement Plan (SERP)

The Company permits selected highly compensated employees to defer a portion of their compensation into the SERP. The SERP assets are invested primarily in company-owned life insurance (“COLI”) policies as a funding source for the deferred compensation obligations in the SERP. The assets are subject to claims by creditors, and the Company can designate them to another purpose at any time. Investments in COLI policies consisted of \$17.3 million in variable life insurance policies as of December 31, 2010 and December 31, 2009. In the COLI policies, the Company is able to allocate investment of the assets across a set of choices provided by the insurance company, including fixed income securities and equity funds. The COLI policies are recorded at their net cash surrender values, which approximates fair value, as provided by the issuing insurance company, whose Standard & Poor’s credit rating was A+.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

The Company classifies the SERP assets as trading securities as described in Note 1. The fair value of these assets totaled \$8,445,000 as of December 31, 2010 and \$6,905,000 as of December 31, 2009. The SERP assets are reported in other assets on the balance sheet. The changes in the fair value of these assets, and normal insurance expenses are recorded in the consolidated statement of operations as part of other income (expense), net. Trading gains (losses) related to the SERP assets totaled \$701,000 for 2010, \$1,373,000 for 2009 and \$(1,661,000) for 2008. The SERP deferrals and the contributions are recorded on the balance sheet in pension liabilities with any change in the fair value of the liabilities recorded as compensation cost in the statement of operations.

401(k) Plan

RPC sponsors a defined contribution 401(k) plan that is available to substantially all full-time employees with more than three months of service. This plan allows employees to make tax-deferred contributions from one to 25 percent of their annual compensation, not exceeding the permissible contribution imposed by the Internal Revenue Code. RPC matches 50 percent of each employee's contributions that do not exceed six percent of the employee's compensation, as defined by the plan. Employees vest in the RPC contributions after three years of service. The charges to expense for the Company's contributions to the 401(k) plan were approximately \$2,485,000 in 2010, \$2,621,000 in 2009 and \$2,814,000 in 2008.

Stock Incentive Plans

The Company has issued stock options and restricted stock to employees under two 10 year stock incentive plans that were approved by stockholders in 1994 and 2004. The 1994 plan expired in 2004. The Company reserved 7,593,750 shares of common stock under the 2004 Plan which expires in 2014. This plan provides for the issuance of various forms of stock incentives, including, among others, incentive and non-qualified stock options and restricted stock which are discussed in detail below. As of December 31, 2010, there were approximately 2,700,000 shares available for grants. The Company issues new shares from its authorized but unissued share pool.

The Company recognizes compensation expense for the unvested portion of awards outstanding over the remainder of the service period. The compensation cost recorded for these awards is based on their fair value at grant date less the cost of estimated forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods to reflect actual forfeitures. Cash flows related to share-based payment awards to employees that result in tax benefits in excess of recognized cumulative compensation cost (excess tax benefits) are classified as financing activity in the accompanying consolidated statements of cash flows.

Pre-tax stock-based employee compensation expense was \$4,909,000 in 2010 (\$3,117,000 after tax), \$4,440,000 in 2009 (\$2,819,000 after tax) and \$3,732,000 in 2008 (\$2,382,000 after tax).

Stock Options

Stock options are granted at an exercise price equal to the fair market value of the Company's common stock at the date of grant except for grants of incentive stock options to owners of greater than 10 percent of the Company's voting securities which must be made at 110 percent of the fair market value of the Company's common stock. Options generally vest ratably over a period of five years and expire in 10 years, except incentive stock options granted to owners of greater than 10 percent of the Company's voting securities, which expire in five years.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries
Years ended December 31, 2010, 2009 and 2008

The Company estimates the fair value of stock options as of the date of grant using the Black-Scholes option pricing model. The Company has not granted stock options to employees since 2003.

Transactions involving RPC's stock options for the year ended December 31, 2010 were as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Outstanding at January 1, 2010	1,291,091	\$2.26	2.25 years	
Granted	—	—	N/A	
Exercised	(180,192)	2.73	N/A	
Forfeited	(40,511)	2.13	N/A	
Expired	—	—	N/A	
Outstanding at December 31, 2010	<u>1,070,388</u>	<u>\$2.26</u>	<u>1.23 years</u>	<u>\$16,977,000</u>
Exercisable at December 31, 2010	<u>1,070,388</u>	<u>\$2.26</u>	<u>1.23 years</u>	<u>\$16,977,000</u>

The total intrinsic value of stock options exercised was approximately \$2,293,000 during 2010, \$1,519,000 during 2009 and \$6,214,000 during 2008. There were no recognized excess tax benefits associated with the exercise of stock options during 2010, since all of the stock options exercised in 2010 were incentive stock options which do not generate tax deductions for the Company. Recognized excess tax benefits associated with the exercise of stock options were approximately \$353,000 during 2009 and \$344,000 during 2008.

Restricted Stock

The Company has granted employees two forms of restricted stock: time lapse restricted and performance restricted.

Time lapse restricted shares

Time lapse restricted shares vest after a stipulated number of years from the grant date, depending on the terms of the issue. Time lapse restricted shares issued in years 2003 and prior vest after ten years. Time lapse restricted shares issued subsequent to fiscal year 2003 vest in 20 percent increments annually starting with the second anniversary of the grant, over six years from the date of grant. Grantees receive dividends declared and retain voting rights for the granted shares.

Performance restricted shares

The performance restricted shares are granted, but not earned and issued until certain five-year tiered performance criteria are met. The performance criteria are predetermined market prices of RPC's common stock. On the date the common stock appreciates to each level (determination date), 20 percent of performance shares are earned. Once earned, the performance shares vest five years from the determination date. After the determination date, the grantee will receive dividends declared and voting rights to the shares. The Company has not granted performance restricted shares since 1999.

The agreements under which the restricted stock is issued provide that shares awarded may not be sold or otherwise transferred until restrictions established under the stock plans have lapsed. Upon termination of employment from RPC or, in certain cases, termination of employment from Marine Products Corporation or Chaparral Boats, Inc., shares with restrictions must be returned to RPC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

The following is a summary of the changes in non-vested restricted shares for the year ended December 31, 2010:

	Shares	Weighted Average Grant-Date Fair Value
Non-vested shares at January 1, 2010	2,973,174	\$7.25
Granted	849,000	8.21
Vested	(629,933)	7.25
Forfeited	(184,888)	7.31
Non-vested shares at December 31, 2010	3,007,353	\$7.58

The fair value of restricted awards is based on the market price of the Company's stock on the date of the grant and is amortized to compensation expense on a straight-line basis over the requisite service period. The weighted average grant date fair value of these restricted stock awards was \$8.21, \$5.70 and \$6.54 for the years ended December 31, 2010, 2009 and 2008. The total fair value of shares vested was approximately \$5,079,000 during 2010, \$3,976,000 during 2009 and \$3,675,000 during 2008. The tax benefit for compensation tax deductions in excess of compensation expense was credited to capital in excess of par value aggregating \$651,000 for 2010, \$1,068,000 for 2009 and \$502,000 for 2008. The excess tax deductions are classified as a financing activity in the accompanying consolidated statements of cash flows.

Other Information

As of December 31, 2010, total unrecognized compensation cost related to non-vested restricted shares was approximately \$20,812,000 which is expected to be recognized over a weighted-average period of 3.6 years. As of December 31, 2010, there was no unrecognized compensation cost related to non-vested stock options.

The Company received cash from options exercised of \$240,000 during 2010, \$122,000 during 2009 and \$347,000 during 2008. These cash receipts are classified as a financing activity in the accompanying consolidated statements of cash flows. The fair value of shares tendered to exercise employee stock options totaled approximately \$144,000 during 2010, \$389,000 during 2009 and \$1,911,000 during 2008 and have been excluded from the consolidated statements of cash flows.

Note 11: Related Party Transactions

Related Party Transactions

Marine Products Corporation

Effective February 28, 2001, the Company spun-off the business conducted through Chaparral Boats, Inc. ("Chaparral"), RPC's former powerboat manufacturing segment. RPC accomplished the spin-off by contributing 100 percent of the issued and outstanding stock of Chaparral to Marine Products Corporation (a Delaware corporation) ("Marine Products"), a newly formed wholly-owned subsidiary of RPC, and then distributing the common stock of Marine Products to RPC stockholders. In conjunction with the spin-off, RPC and Marine Products entered into various agreements that define the companies' relationship.

In accordance with a Transition Support Services agreement, which may be terminated by either party, RPC provides certain administrative services, including financial reporting and income tax administration, acquisition assistance, etc., to Marine Products. Charges from the Company (or from corporations that are subsidiaries of the Company) for such services aggregated approximately \$689,000 in 2010, \$713,000 in 2009 and \$842,000 in 2008. The Company's receivable due from Marine Products for these services as of December 31, 2010 and 2009 was approximately \$65,000. The Company's directors are also directors of Marine Products and all of the executive officers are employees of both the Company and Marine Products.

Years ended December 31, 2010, 2009 and 2008

Other

The Company periodically purchases in the ordinary course of business products or services from suppliers, who are owned by significant officers or stockholders, or affiliated with the directors of RPC. The total amounts paid to these affiliated parties were approximately \$551,000 in 2010, \$409,000 in 2009 and \$393,000 in 2008.

RPC receives certain administrative services and rents office space from Rollins, Inc. (a company of which Mr. R. Randall Rollins is also Chairman and which is otherwise affiliated with RPC). The service agreements between Rollins, Inc. and the Company provide for the provision of services on a cost reimbursement basis and are terminable on six months notice. The services covered by these agreements include office space, administration of certain employee benefit programs, and other administrative services. Charges to the Company (or to corporations which are subsidiaries of the Company) for such services and rent totaled \$94,000 in 2010, \$87,000 in 2009 and \$90,000 in 2008.

A group that includes the Company's Chairman of the Board, R. Randall Rollins and his brother Gary W. Rollins, who is also a director of the Company, and certain companies under their control, controls in excess of fifty percent of the Company's voting power.

Note 12: Business Segment Information

RPC's service lines have been aggregated into two reportable oil and gas services segments — Technical Services and Support Services — because of the similarities between the financial performance and approach to managing the service lines within each of the segments, as well as the economic and business conditions impacting their business activity levels. Corporate includes selected administrative costs incurred by the Company.

Technical Services include RPC's oil and gas service lines that utilize people and equipment to perform value-added completion, production and maintenance services directly to a customer's well. These services include pressure pumping services, coiled tubing, snubbing, nitrogen pumping, well control consulting and firefighting, downhole tools, wireline, and fluid pumping services. These Technical Services are primarily used in the completion, production and maintenance of oil and gas wells. The principal markets for this segment include the United States, including the Gulf of Mexico, the mid-continent, southwest, Rocky Mountain and northeast regions, and international locations including primarily Africa, Canada, China, Latin America, the Middle East and New Zealand. Customers include major multi-national and independent oil and gas producers, and selected nationally-owned oil companies.

Support Services include RPC's oil and gas service lines that primarily provide equipment for customer use or services to assist customer operations. The equipment and services include drill pipe and related tools, pipe handling, inspection and storage services, and oilfield training services. The demand for these services tends to be influenced primarily by customer drilling-related activity levels. The principal markets for this segment include the United States, including the Gulf of Mexico, the mid-continent and Appalachian regions, and international locations, including primarily Canada, Latin America, and the Middle East. Customers include domestic operations of major multi-national and independent oil and gas producers, and selected nationally-owned oil companies.

The accounting policies of the reportable segments are the same as those described in Note 1 to these consolidated financial statements. RPC evaluates the performance of its segments based on revenues, operating profits and return on invested capital. Gains or losses on disposition of assets are reviewed by the Company's chief decision maker on a consolidated basis, and accordingly the Company does not report gains or losses at the segment level. Inter-segment revenues are generally recorded in segment operating results at prices that management believes approximate prices for arm's length transactions and are not material to operating results.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

RPC, Inc. and Subsidiaries

Years ended December 31, 2010, 2009 and 2008

Summarized financial information concerning RPC's reportable segments for the years ended December 31, 2010, 2009 and 2008 are shown in the following table.

	Technical Services	Support Services	Corporate	Gain on disposition of assets, net	Total
<i>(in thousands)</i>					
2010					
Revenues	\$979,834	\$116,550	\$ —	\$ —	\$1,096,384
Operating profit (loss)	217,144	31,086	(13,143)	3,758	238,845
Capital expenditures	163,362	23,012	1,112	—	187,486
Depreciation and amortization	106,480	26,640	240	—	133,360
Identifiable assets	668,081	158,577	61,213	—	887,871
2009					
Revenues	\$513,289	\$ 74,574	\$ —	\$ —	\$ 587,863
Operating profit (loss)	(20,328)	(1,636)	(12,231)	1,143	(33,052)
Capital expenditures	48,175	19,220	435	—	67,830
Depreciation and amortization	101,780	28,085	715	—	130,580
Identifiable assets	453,133	144,905	51,005	—	649,043
2008					
Revenues	\$745,991	\$130,986	\$ —	\$ —	\$ 876,977
Operating profit (loss)	110,648	36,515	(9,360)	6,367	144,170
Capital expenditures	127,054	42,238	1,026	—	170,318
Depreciation and amortization	92,738	24,798	867	—	118,403
Identifiable assets	564,708	181,991	46,762	—	793,461

The following summarizes selected information between the United States and all international locations combined for the years ended December 31, 2010, 2009 and 2008. The revenues are presented based on the location of the use of the product or service. Assets related to international operations are less than 10 percent of RPC's consolidated assets, and therefore are not presented.

Years ended December 31,	2010	2009	2008
<i>(in thousands)</i>			
United States Revenues	\$1,041,461	\$543,026	\$846,202
International Revenues	54,923	44,837	30,775
	<u>\$1,096,384</u>	<u>\$587,863</u>	<u>\$876,977</u>

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of disclosure controls and procedures — The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in its Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms, and that such information is accumulated and communicated to its management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, December 31, 2010 (the "Evaluation Date"), the Company carried out an evaluation, under the supervision and with the participation of its management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures. Based upon this evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective at a reasonable assurance level as of the Evaluation Date.

Management's report on internal control over financial reporting — Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Management's report on internal control over financial reporting is included on page 38 of this report. Grant Thornton LLP, the Company's independent registered public accounting firm, has audited the effectiveness of internal control as of December 31, 2010 and issued a report thereon which is included on page 39 of this report.

Changes in internal control over financial reporting — Management's evaluation of changes in internal control did not identify any changes in the Company's internal control over financial reporting that occurred during the Company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information concerning directors and executive officers will be included in the RPC Proxy Statement for its 2011 Annual Meeting of Stockholders, in the section titled "Election of Directors." This information is incorporated herein by reference. Information about executive officers is contained on page 21 of this document.

Audit Committee and Audit Committee Financial Expert

Information concerning the Audit Committee of the Company and the Audit Committee Financial Expert(s) will be included in the RPC Proxy Statement for its 2011 Annual Meeting of Stockholders, in the section titled "Corporate Governance and Board of Directors, Committees and Meetings – Audit Committee." This information is incorporated herein by reference.

Code of Ethics

RPC, Inc. has a Code of Business Conduct that applies to all employees. In addition, the Company has a Code of Business Conduct and Ethics for Directors and Executive Officers and Related Party Transaction Policy. Both of these documents are available on the Company's website at www.rpc.net. Copies are available at no charge by writing to Attention: Human Resources, RPC Inc., 2801 Buford Highway, Suite 520, N.E., Atlanta, GA 30329.

RPC, Inc. intends to satisfy the disclosure requirement under Item 10 of Form 8-K regarding an amendment to, or waiver from, a provision of its code that relates to any elements of the code of ethics definition enumerated in SEC rules by posting such information on its internet website, the address of which is provided above.

Section 16(a) Beneficial Ownership Reporting Compliance

Information regarding compliance with Section 16(a) of the Exchange Act will be included under "Section 16(a) Beneficial Ownership Reporting Compliance" in the Company's Proxy Statement for its 2011 Annual Meeting of Stockholders, which is incorporated herein by reference.

Item 11. Executive Compensation

Information concerning director and executive compensation will be included in the RPC Proxy Statement for its 2011 Annual Meeting of Stockholders, in the sections titled "Compensation Committee Interlocks and Insider Participation," "Director Compensation," "Compensation Discussion and Analysis," "Compensation Committee Report" and "Executive Compensation." This information is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information concerning security ownership will be included in the RPC Proxy Statement for its 2011 Annual Meeting of Stockholders, in the sections "Capital Stock" and "Election of Directors." This information is incorporated herein by reference.

Securities Authorized for Issuance Under Equity Compensation Plans

The following table sets forth certain information regarding equity compensation plans as of December 31, 2010.

<i>Plan Category</i>	(A) Number of Securities To Be Issued Upon Exercise of Outstanding Options, Warrants and Rights	(B) Weighted Average Exercise Price of Outstanding Options, Warrants and Rights	(C) Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (A))
Equity compensation plans approved by securityholders	1,070,388	\$ 2.26	2,676,129(1)
Equity compensation plans not approved by securityholders	—	—	—
Total	<u>1,070,388</u>	<u>\$ 2.26</u>	<u>2,676,129</u>

(1) All of the securities can be issued in the form of restricted stock or other stock awards.

See Note 10 to the Consolidated Financial Statements for information regarding the material terms of the equity compensation plans.

Item 13. Certain Relationships and Related Party Transactions and Director Independence

Information concerning certain relationships and related party transactions will be included in the RPC Proxy Statement for its 2011 Annual Meeting of Stockholders, in the sections titled, “Certain Relationships and Related Party Transactions.” Information regarding director independence will be included in the RPC Proxy Statement for its 2011 Annual Meeting of Stockholders in the section titled “Director Independence and NYSE Requirements.” This information is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

Information regarding principal accountant fees and services will be included in the section titled “Independent Registered Public Accounting Firm” in the RPC Proxy Statement for its 2011 Annual Meeting of Stockholders. This information is incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules

Consolidated Financial Statements, Financial Statement Schedule and Exhibits

1. Consolidated financial statements listed in the accompanying Index to Consolidated Financial Statements and Schedule are filed as part of this report.
2. The financial statement schedule listed in the accompanying Index to Consolidated Financial Statements and Schedule is filed as part of this report.
3. Exhibits listed in the accompanying Index to Exhibits are filed as part of this report. The following such exhibits are management contracts or compensatory plans or arrangements:
 - 10.1 2004 Stock Incentive Plan (incorporated herein by reference to Appendix B to the Registrant's definitive Proxy Statement filed on March 24, 2004).
 - 10.6 Form of stock option grant agreement (incorporated herein by reference to Exhibit 10.1 to Form 10-Q filed on November 2, 2004).
 - 10.7 Form of time lapse restricted stock grant agreement (incorporated herein by reference to Exhibit 10.2 to Form 10-Q filed on November 2, 2004).
 - 10.8 Form of performance restricted stock grant agreement (incorporated herein by reference to Exhibit 10.3 to Form 10-Q filed on November 2, 2004).
 - 10.9 Supplemental Retirement Plan (incorporated herein by reference to Exhibit 10.11 to the Form 10-K filed on March 16, 2005).
 - 10.10 First Amendment to 1994 Employee Stock Incentive Plan and 2004 Stock Incentive Plan (incorporated herein by reference to Exhibit 10.14 to the Form 10-K filed on March 2, 2007).
 - 10.11 Performance-Based Incentive Cash Compensation Plan (incorporated by reference to Exhibit 10.1 to the Form 8-K filed April 28, 2006).
 - 10.12 Summary of "At-Will" of Compensation Arrangements with Executive Officers as of February 28, 2008 (incorporated by reference to Exhibit 10.16 to the Form 10-K filed on March 4, 2008).
 - 10.13 Summary of Compensation Arrangements with Non-Employee Directors as of February 28, 2008 (incorporated by reference to Exhibit 10.17 to the Form 10-K filed on March 4, 2008).

The Directors of RPC (listed below) executed a power of attorney, appointing Richard A. Hubbell their attorney-in-fact, empowering him to sign this report on their behalf.

R. Randall Rollins, Director
Wilton Looney, Director
Gary W. Rollins, Director
Henry B. Tippie, Director
James B. Williams, Director

James A. Lane, Jr., Director
Linda H. Graham, Director
Bill J. Dismuke, Director
Larry L. Prince, Director

Richard A. Hubbell
Director and as Attorney-in-fact
March 4, 2011

INDEX TO CONSOLIDATED FINANCIAL STATEMENTS, REPORTS AND SCHEDULE

The following documents are filed as part of this report.

FINANCIAL STATEMENTS AND REPORTS	PAGE
Management's Report on Internal Control Over Financial Reporting	38
Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting	39
Report of Independent Registered Public Accounting Firm on Consolidated Financial Statements ..	40
Consolidated Balance Sheets as of December 31, 2010 and 2009	41
Consolidated Statements of Operations for the three years ended December 31, 2010	42
Consolidated Statements of Stockholders' Equity for the three years ended December 31, 2010 ..	43
Consolidated Statements of Cash Flows for the three years ended December 31, 2010	44
Notes to Consolidated Financial Statements	45 - 68
 SCHEDULE	
Schedule II — Valuation and Qualifying Accounts	76

Schedules not listed above have been omitted because they are not applicable or the required information is included in the consolidated financial statements or notes thereto.

SCHEDULE II — VALUATION AND QUALIFYING ACCOUNTS

<i>(in thousands)</i>	For the years ended December 31, 2010, 2009 and 2008			
	Balance at Beginning of Period	Charged to Costs and Expenses	Net Recoveries (Deductions)	Balance at End of Period
Year ended December 31, 2010				
Allowance for doubtful accounts	\$3,210	\$4,812	\$ 672 ⁽¹⁾	\$8,694
Deferred tax asset valuation allowance	\$1,550	\$ —	\$ (255) ⁽²⁾	\$1,295
Year ended December 31, 2009				
Allowance for doubtful accounts	\$6,199	\$ 660	\$ (3,649) ⁽¹⁾	\$3,210
Deferred tax asset valuation allowance	\$1,454	\$ 96	\$ — ⁽²⁾	\$1,550
Year ended December 31, 2008				
Allowance for doubtful accounts	\$5,217	\$ (84)	\$ 1,066 ⁽¹⁾	\$6,199
Deferred tax asset valuation allowance	\$1,503	\$ —	\$ (49) ⁽²⁾	\$1,454

(1) Deductions in the allowance for doubtful accounts principally reflect the write-off of previously reserved accounts net of recoveries.

(2) The valuation allowance for deferred tax assets is increased or decreased each year to reflect the state net operating losses that management believes will not be utilized before they expire.

SELECTED QUARTERLY FINANCIAL DATA (UNAUDITED)

Quarters ended	March 31	June 30	September 30	December 31
<i>(in thousands except per share data)</i>				
2010				
Revenues	\$213,144	\$252,896	\$302,200	\$328,144
Net income	\$ 13,400	\$ 31,602	\$ 46,269	\$ 55,471
Net income per share — basic (a)	\$ 0.09	\$ 0.22	\$ 0.32	\$ 0.38
Net income per share — diluted (a)	\$ 0.09	\$ 0.21	\$ 0.31	\$ 0.38
2009				
Revenues	\$176,271	\$127,018	\$132,159	\$152,415
Net (loss) income	\$ 4,466	\$ (11,624)	\$ (10,385)	\$ (5,202)
Net (loss) income per share — basic (a)	\$ 0.03	\$ (0.08)	\$ (0.07)	\$ (0.03)
Net (loss) income per share — diluted (a)	\$ 0.03	\$ (0.08)	\$ (0.07)	\$ (0.03)

(a) The sum of the income (loss) per share for the four quarters may differ from annual amounts due to the required method of computing the weighted average shares for the respective periods.

CAUTION CONCERNING FORWARD-LOOKING STATEMENTS

This Annual Report contains statements that constitute "forward-looking statements" under the Private Securities Litigation Reform Act of 1995, including all statements that look forward in time or express management's beliefs, expectations or hopes. In particular, such statements include, without limitation, statements regarding our belief that our customers' interests in forming long-term agreements with service providers represents a secular change in what has traditionally been a cyclical industry; our belief that a majority of our planned fleet additions in 2011 are committed to unconventional drilling activities; our belief that our new credit facility will provide us with the liquidity to meet our capital needs sufficient to fund our growth opportunities; our confidence in our continued long-term growth and our strengthening balance sheet; our belief that those service companies which are well-capitalized and have a culture that emphasizes quality and safety will thrive in an environment of changing social and governmental scrutiny; our optimism about our long-term future as well as the current position we hold within the industry; our commitment to the long-term growth and health of the Company as well as generating high returns on capital; our belief that our customers are able to earn acceptable returns on their investment even during periods of low commodity prices; our belief that several of our large service lines, including pressure pumping, downhole tools, and coiled tubing, are well-positioned to service the growing domestic shale market; our belief that the trend for the shift to oil production in the U.S. domestic market will continue; our belief that the oilfield services industry will continue to be cyclical; our belief that the secular changes we have witnessed will endure through cycles in the oilfield services industry; and our belief that we will be able to create and execute operational plans with more certain outcomes which will create continued strong returns to our shareholders with lower risk. The actual results of the Company could differ materially from those indicated by the forward-looking statements because of various risks and uncertainties, including without limitation those identified under the title "Risk Factors" in the Company's Annual Report on Form 10-K included as part of this Annual Report. All of the foregoing risks and uncertainties are beyond the ability of the Company to control, and in many cases the Company cannot predict the risks and uncertainties that could cause its actual results to differ materially from those indicated in the forward-looking statements.
