KOPPERS

Sustaining the global economy's infrastructure

Financial Highlights

Years Ended December 31	2010	2009	2008
(Dollars in millions, except share, per share and employee amounts)			
Operating Performance			
Net Sales	\$1,245.5	\$1,124.4	\$1,364.8
Operating Profit	99.0	94.9	130.2
Income from Continuing Operations	44.7	21.7	48.4
Net Income Attributable to Koppers	44.1	18.8	138.0
Diluted Earnings per Share – Continuing Operations	2.14	0.92	2.30
Financial Condition			
Total Assets	\$669.2	\$644.4	\$661.1
Total Debt	296.4	335.3	374.9
Cash and Cash Equivalents	35.3	58.4	63.1
Other Data			
Capital Expenditures	\$29.9	\$18.0	\$37.1
Number of Employees	1,729	1,616	1,747
Stock Information			
Market Price per Share—High	\$36.47	\$34.00	\$51.95
Market Price per Share—Low	19.77	9.29	12.60
Dividends per Share	0.88	0.88	0.88
Shares Outstanding (000s)	20,578	20,455	20,429

Value at	2/1/06	12/31/06	12/31/07	12/31/08	12/31/09	12/31/10
Koppers	\$100.00	\$191.85	\$325.40	\$166.24	\$243.85	\$296.33
S&P 500	\$100.00	\$128.10	\$118.42	\$74.60	\$94.34	\$108.55
Russell 2000	\$100.00	\$108.63	\$106.92	\$70.79	\$90.02	\$114.19

Set forth above are a line graph and table comparing the cumulative total returns (assuming reinvestment of dividends) during the period commencing on February 1, 2006, the date of Koppers Holdings Inc.'s initial public offering and ending December 31, 2010, of \$100 invested in each of Koppers Holdings Inc.'s common stock, the Standard & Poor's 500 Index, and the Russell 2000 Index. Because our competitors are principally privately held concerns or subsidiaries or divisions of corporations engaged in multiple lines of business, we do not believe it is feasible to construct a peer group industry comparison. The Russell 2000 Index, which includes corporations both larger and smaller than Koppers Holdings Inc., is composed of corporations with an average market capitalization similar to us.

To Our Shareholders,

While we made significant progress in 2010 towards moving Koppers back to the sales, earnings, and growth levels that we achieved prior to the start of the global economic crisis in late 2008, the year was not without its challenges. Increasing raw material costs in China, price competition in the Middle East, and destocking efforts by the Class I railroads were a few of the difficulties that we encountered as we attempted to rekindle the growth trend the company had been on for the last several years. I am proud to say that despite those and other obstacles, 2010 was our third best financial performance in our 22-year history.

Our sales finished 11% higher than 2009, operating profit improved by 4%, and total debt outstanding net of cash on hand declined by \$16 million after we spent \$36 million on acquisitions. In addition, our adjusted diluted earnings per share for the year were \$2.32 compared to \$1.83 in 2009, moving us closer to pre-recession profitability levels. While I am pleased with the improvement of both the top and bottom line in 2010, I am even more excited by the growth opportunities I see ahead.

I am also pleased to report that we made additional progress in each of the three key areas of our long-term strategy, specifically: 1) consolidating mature geographic markets; 2) building upon our core businesses through the addition of complementary products and services; and 3) geographic expansion.

In March 2010, we acquired Cindu Chemicals B.V., now known as Koppers Netherlands, as part of our strategy to consolidate the European market. Through that transaction, we were able to acquire market share, strengthen our export capabilities, and increase our operating leverage by rationalizing our underutilized tar distillation capacity in Europe. We also acquired a refined tar business in the United States in November 2010. While the size of the transaction was small, it represents a nice addition to one of our seasonal product lines in the Carbon Materials and Chemicals business.

In December 2010, we added the rail joint bar business of Portec Rail Products to our Railroad and Utility Products business to strengthen our core businesses through the addition of complementary products and services. We believe that we can leverage our long-standing relationships with the railroads to supply additional products and services to this important customer base.

Altogether the three acquisitions are expected to add about \$85 million per year to our revenues.

We also continued to look for opportunities to expand our businesses geographically in 2010. We pursued opportunities for expansion in Asia, focusing mainly on China and India as the most attractive targets. The steel and aluminum industries in these regions are expected to continue their robust levels of production and demand for our products. China and India also provide convenient access to the growing aluminum market in the Middle East. While the Middle East market provided some challenges for us as we experienced significant pricing pressure on our pitch products, we believe that it provides us with the best potential for long-term growth, and we intend to be patient as the market continues to develop.

While I was optimistic about our prospects entering 2010, I am even more excited by the outlook for our businesses as we begin 2011. All indicators seem to be pointing in the right direction. The global aluminum industry is projected to increase production over the next three years by more than ten million tons, which translates into an additional one million tons of carbon pitch for our Carbon Materials and Chemicals business. Not surprisingly, we have seen three recent announcements regarding restarts of idled aluminum capacity in North America. We are optimistic that the projections for global aluminum demand and production, coupled with higher aluminum prices, will result in additional smelter restarts.

Regarding our Railroad and Utility Products business, the North American railroad market experienced a down year in 2010 due in part to what we believe was an inventory reduction strategy. However, crosstie insertions continue at a consistent level. This should result in higher volumes in 2011 as the railroads continue to restock from historically low inventory levels. Our Class I railroad customers are in a strong position to implement robust maintenance programs in 2011 on the heels of a strong 2010 for revenues and profitability. I am also optimistic that our commercial railroad business will be stronger in 2011 as a result of the growing economy combined with the extension of tax credits for capital spending.

Our employees and the Koppers culture are the foundation of our success. Our strong commitment to safety, health, and the environment resulted in another year of strong performance in 2010. We will not be satisfied until we have achieved zero incidents with our safety and environmental performance.

As we enter 2011, Koppers is well positioned to capitalize on the growth opportunities that lie ahead. We have historically shown the ability to generate strong cash flow, pay significant dividends, and reduce debt. We have over \$300 million of liquidity as of year-end and one of the highest dividend yields relative to our peers. We intend to focus primarily on investing excess cash back into our businesses to drive our growth objectives.

In closing, I would like to thank our Board of Directors for their guidance and support. I also want to thank you, our investors, for believing in our management team and showing your confidence in our ability to generate shareholder value through these unpredictable and unprecedented times.

Sincerely,

Walter W. Turner
President and Chief Executive Officer

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2010

Commission file number 1-32737

KOPPERS HOLDINGS INC.

(Exact name of registrant as specified in its charter)

Pennsylvania
(State of incorporation)

20-1878963
(IRS Employer Identification No.)

436 Seventh Avenue
Pittsburgh, Pennsylvania 15219
(Address of principal executive offices)

(412) 227-2001
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, par value \$0.01 per share
Title of Each Class

New York Stock Exchange
Name of Exchange on which registered

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act: Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of Common Stock held by non-affiliates of the registrant, based on the closing sales price of the Common Stock on the New York Stock Exchange on June 30, 2010 was \$450.4 million (affiliates, for this purpose, have been deemed to be Directors and executive officers of Koppers Holdings Inc.).

As of January 31, 2011, 20,578,276 shares of Common Stock of the registrant were issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for the 2011 Annual Meeting of Stockholders are incorporated by reference into Part III of this Annual Report on Form 10-K.

FORWARD-LOOKING INFORMATION

This report and the documents incorporated herein by reference contain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 and may include, but are not limited to, statements about sales levels, restructuring, profitability and anticipated expenses and cash outflows. All forward-looking statements involve risks and uncertainties. All statements contained herein that are not clearly historical in nature are forward-looking, and words such as “believe”, “anticipate”, “expect”, “estimate”, “may”, “will”, “should”, “continue”, “plans”, “intends”, “likely” or other similar words or phrases are generally intended to identify forward-looking statements. Any forward-looking statement contained herein, in press releases, written statements or other documents filed with the SEC, or in our communications with and discussions with investors and analysts in the normal course of business through meetings, phone calls and conference calls are subject to known and unknown risks, uncertainties and contingencies. Many of these risks, uncertainties and contingencies are beyond our control, and may cause actual results, performance or achievements to differ materially from anticipated results, performance or achievements. Factors that might affect such forward-looking statements include, among other things:

- general economic and business conditions;
- demand for our goods and services;
- availability of and fluctuations in the prices of key raw materials, including coal tar and timber;
- competitive conditions in the industries in which we operate;
- the ratings on our debt and our ability to repay or refinance our outstanding indebtedness as it matures;
- our ability to operate within the limitations of our debt covenants;
- interest rate fluctuations and other changes in borrowing costs;
- other capital market conditions, including foreign currency rate fluctuations;
- economic and political conditions in international markets, including governmental changes and restrictions on the ability to transfer capital across countries;
- potential impairment of our goodwill and/or long-lived assets;
- parties who are obligated to indemnify us for legal and environmental liabilities fail to perform under their legal obligations;
- changes in laws, including increased tax rates, regulations or accounting standards, third-party relations and approvals, and decisions of courts, regulators and governmental bodies;
- the effects of competition, including locations of competitors and operating and market competition;
- unfavorable resolution of litigation against us; and
- the other factors set forth under “Risk Factors.”

We caution you that the foregoing list of important factors may not contain all of the material factors that are important to you. In addition, in light of these risks and uncertainties, the matters referred to in the forward looking statements contained in this report and the documents incorporated by reference herein may not in fact occur. We undertake no obligation to publicly update or revise any forward looking statement as a result of new information, future events or otherwise, except as otherwise required by law.

PART I

ITEM 1. BUSINESS

General

In this report, unless otherwise noted or the context otherwise requires, (i) the term “Koppers”, the “Company”, “we” or “us” refers to Koppers Holdings Inc. and its consolidated subsidiaries, (ii) the term “KH” refers to Koppers Holdings Inc. and not any of its subsidiaries and (iii) the term “KI” refers to Koppers Inc. and not any of its subsidiaries. Koppers Inc. is a wholly-owned subsidiary of Koppers Holdings Inc. Koppers Holdings Inc. has substantially no operations independent of Koppers Inc. and its subsidiaries. The use of these terms is not intended to imply that Koppers Holdings and Koppers Inc. are not separate and distinct legal entities.

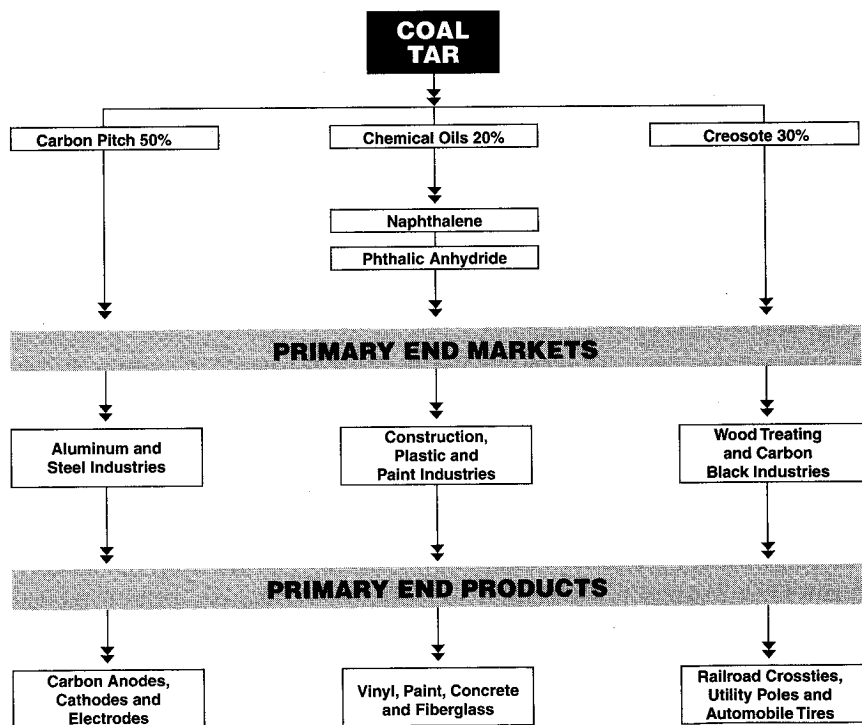

We are a leading integrated global provider of carbon compounds and commercial wood treatment products and services. Our products are used in a variety of niche applications in a diverse range of end-markets, including the aluminum, railroad, specialty chemical, utility, rubber, concrete and steel industries. We serve our customers through a comprehensive global manufacturing and distribution network, with manufacturing facilities located in the United States, Australia, China, the United Kingdom, the Netherlands and Denmark.

We operate two principal business segments: Carbon Materials & Chemicals and Railroad & Utility Products.

Our operations are, to a substantial extent, vertically integrated. Through our Carbon Materials & Chemicals business, we process coal tar into a variety of products, including carbon pitch, creosote, naphthalene and phthalic anhydride, which are intermediate materials necessary in the production of aluminum, the pressure treatment of wood, the production of high-strength concrete, and the production of plasticizers and specialty chemicals, respectively. Through our Railroad & Utility Products business, we believe that we are the largest supplier of railroad crossties to the North American railroads.

Carbon Materials & Chemicals

Carbon pitch, naphthalene, and creosote are produced through the distillation of coal tar, a by-product generated through the processing of coal into coke for use in steel and iron manufacturing. Coal tar distillation involves the conversion of coal tar into a variety of intermediate chemical products in processes beginning with distillation. During the distillation process, heat and vacuum are utilized to separate coal tar into three primary components: carbon pitch (approximately 50 percent), chemical oils (approximately 20 percent) and creosote (approximately 30 percent). The diagram below shows the streams derived from coal tar distillation:

Our Carbon Materials & Chemicals business (“CM&C”) manufactures the following principal products:

- carbon pitch, a critical raw material used in the production of aluminum and steel;
- naphthalene, used for the production of phthalic anhydride and as a surfactant in the production of concrete;
- phthalic anhydride, used in the production of plasticizers, polyester resins and alkyd paints;
- creosote and carbon black feedstock, used in the treatment of wood or as a feedstock in the production of carbon black, respectively; and
- carbon black, used primarily in the manufacture of rubber tires.

Carbon Pitch

Carbon pitch is a critical raw material used in the production of aluminum and for the production of steel in electric arc furnaces. Approximately one ton of carbon pitch is required for every 10 tons of aluminum produced and there are currently no known viable substitutes for carbon pitch in the aluminum production process. Over 90 percent of our carbon pitch is sold to the aluminum industry, typically under long-term contracts ranging from three to five years. Many of these long-term contracts have provisions for periodic pricing reviews. We have been a leading supplier of carbon pitch to the aluminum industry for over 20 years, and we believe we are the largest producer of carbon pitch for the aluminum industry. Competitive factors in the carbon pitch market include price, quality, service and security of supply. We believe we have a competitive advantage based on our global presence and long-term raw material supply contracts.

Naphthalene & Phthalic Anhydride

Chemical oils are further processed to produce naphthalene which we sell into the industrial sulfonate market for use as dispersants or in the concrete additive and gypsum board markets. Additional end-uses include oil field additives, agricultural emulsifiers, synthetic tanning agents and dyestuffs. In the United States, we also use naphthalene as a feedstock in the manufacture of phthalic anhydride. The primary markets for phthalic anhydride are in the production of plasticizers, unsaturated polyester resins and alkyd resins. We believe our ability to utilize our internally produced naphthalene gives us a more stable supply and generally lower-cost feedstock for the production of phthalic anhydride.

Creosote, Carbon Black & Carbon Black Feedstock

In the United States, creosote is used as a commercial wood treatment chemical to preserve railroad crossties and lumber, utility poles and piling. The majority of our domestically produced creosote is sold to our Railroad & Utility Products business. In Australia, China and Europe, creosote is sold primarily into the carbon black market for use as a feedstock in the production of carbon black. In Australia, the majority of creosote generated at our tar distillation facility is sold to our carbon black facility. In Europe and China creosote is also sold to wood treaters. Globally, approximately one-third of our total creosote production was sold internally in 2010. Our wood treating plants in the United States purchase substantially all of their creosote from our tar distillation plants. We believe we are the only major competitor in these markets that is integrated in this fashion. The remainder of our creosote is sold to railroads and other wood treaters.

Other Products

Other products include the sale of refined tars, benzole and specialty chemicals.

Our CM&C business manufactures its primary products and sells them directly to our global customer base under long-term contracts or through purchase orders negotiated by our regional sales personnel and coordinated through our global marketing group in the United States. We believe we have a strategic advantage over our competitors based on our ability to access coal tar from many global suppliers. Our nine coal tar distillation facilities including joint ventures and six carbon materials terminals give us the ability to offer customers multiple sourcing and a consistent supply of high quality products.

Railroad & Utility Products

Our Railroad & Utility Products business ("R&UP") sells treated and untreated wood products, rail joint bars and services primarily to the railroad and public utility markets in the United States and Australia. We also produce concrete crossties, a complementary product to our wood treatment business, through a joint venture in the United States.

Railroad products include procuring and treating items such as crossties, switch ties and various types of lumber used for railroad bridges and crossings. Railroad products also include manufacturing and selling rail joint bars, which are steel bars used to join rails together for railroads. Utility products include transmission and distribution poles for electric and telephone utilities and piling used in industrial foundations, beach housing, docks and piers. The R&UP business operates 14 wood treating plants, one rail joint bar manufacturing facility, one co-generation facility and 12 pole distribution yards located throughout the United States and Australia. Our network of plants is strategically located near timber supplies to enable us to access raw materials and service customers effectively. In addition, our crosstie treating plants are typically adjacent to our railroad customers' track lines, and our pole distribution yards are typically located near our utility customers.

Our R&UP business manufactures its primary products and sells them directly to our customers through long-term contracts and purchase orders negotiated by our regional sales personnel and coordinated through our marketing group at corporate headquarters.

Hardwoods, such as oak and other species, are the major raw materials in wood crossties. Hardwood prices, which account for more than 50 percent of a finished crosstie's cost, fluctuate with the demand from other hardwood lumber markets, such as oak flooring, pallets and other specialty lumber products. Weather conditions can be a factor in the supply of raw material, as unusually wet or inclement conditions may make it difficult to harvest timber.

In the United States, hardwood lumber is procured by us from hundreds of small sawmills throughout the northeastern, midwestern and southern areas of the country. The crossties are shipped via rail car or trucked directly to one of our crosstie treating plants, all of which are on line with a major railroad. The crossties are either air-stacked for a period of six to twelve months or artificially dried by a process called boultonizing. Once dried, the crossties are pressure treated with creosote, a product of our Carbon Materials & Chemicals business.

We believe we are the largest supplier of railroad crossties in North America. There are several principal regional competitors in this North American market. Competitive factors in the railroad crosstie market include price, quality, service and security of supply. We believe we have a competitive advantage due to our national network of treating plants and direct access to our major customers' rail lines, which provide for security of supply and logistics advantages for our customers.

Our R&UP business' largest customer base is the North American Class I railroad market, which buys approximately 80 percent of all crossties produced in the United States and Canada. We also have relationships with many of the approximately 550 short-line and regional rail lines. This also forms the customer base for our rail joint bar products. The railroad crosstie market is a mature market with approximately 20 million replacement crossties (both wood and non-wood) purchased during 2010. We currently supply all seven of the North American Class I railroads and have contracts with all of them.

Demand for railroad crossties may decline during winter months due to inclement weather conditions which make it difficult to install railroad crossties. As a result, operating results may vary from quarter to quarter depending on the severity of weather conditions and other variables affecting our products.

8

Utility poles are produced mainly from softwoods such as pine in the United States and from hardwoods of the eucalyptus species in Australia. Most of these poles are purchased from large timber owners and individual landowners and shipped to one of our pole-peeling facilities. While crossties are treated exclusively with creosote, we treat poles with a variety of preservatives, including pentachlorophenol, copper chrome arsenates and creosote.

In the United States the market for utility pole products is characterized by a large number of small, highly competitive producers selling into a price-sensitive industry. The utility pole market is highly fragmented domestically, with over 200 investor-owned electric and telephone utilities and 2,900 smaller municipal utilities and rural electric associations. In recent years we have seen our utility pole volumes decrease due to industry deregulation, its impact on maintenance programs, and overcapacity in the pole treating business. We expect demand for utility poles to remain at low levels. In Australia, in addition to utility poles, we market smaller poles to the agricultural, landscape and vineyard markets.

We have a number of principal competitors in the U.S. utility products market. There are few barriers to entry in the utility products market, which consists primarily of regional wood treating companies operating small to medium-size plants and serving local markets.

Equity Investments

KSA Limited Partnership, located in Portsmouth, Ohio, produces concrete crossties, a complementary product to our wood treatment crosstie business. We own 50 percent of KSA, with the other 50 percent owned by subsidiaries of Heidelberg Cement AG. KSA Limited Partnership also provides concrete turnouts for rail traffic switching and used crosstie rehabilitation.

Tangshan Koppers Kailuan Carbon Chemical Company ("TKK") is a coal tar distillation facility located in China in the Hebei Province near the Jingtang Port. We hold a 30 percent investment in TKK which commenced production in the second quarter of 2009.

Research and Development

Our research efforts are directed toward new product development regarding alternate uses for coal tar and technical service efforts to promote the use of creosote and vacuum-distilled carbon pitch. Expenditures for research and development were \$2.1 million, \$2.0 million and \$2.8 million, for the years ended December 31, 2010, 2009 and 2008, respectively.

Technology and Licensing

In 1988, we acquired certain assets from Koppers Company, Inc., including the patents, patent applications, trademarks, copyrights, transferable licenses, inventories, trade secrets and proprietary processes used in the businesses acquired. The most important trademark acquired was the name "Koppers." The association of the name with the chemical, building, wood preservation and coke industries is beneficial to our company, as it represents long-standing, high quality products. As long as we continue to use the name "Koppers" and comply with applicable registration requirements, our right to use the name "Koppers" should continue without expiration. The expiration of other intellectual property rights is not expected to materially affect our business.

Backlog

Generally, Koppers does not manufacture its products against a backlog of orders. Inventory and production levels are typically driven by expectations of future demand based on contractual obligations.

Seasonality

Demand for certain products may decline during winter months due to weather conditions. As a result, operating results may vary from quarter to quarter depending on the severity of weather conditions and other variables affecting our products.

Segment Information

Please see Note 8, "Segment Information," under Item 8 of this Form 10-K for financial information relating to business segments. See also "Item 1A. Risk Factors – Risks Related to Our Business – Demand for our products is cyclical and we may experience prolonged depressed market conditions for our products."

Non-U.S. Operations

Koppers has a significant investment in non-U.S. operations. Therefore, we are subject to certain risks that are inherent to foreign operations, including complying with applicable laws relating to foreign operations, the laws of foreign countries in which we operate, political and economic conditions in international markets and fluctuations in foreign exchange rates.

Environmental Matters

Our operations and properties are subject to extensive federal, state, local and foreign environmental laws and regulations relating to protection of the environment and human health and safety, including those concerning the treatment, storage and disposal of wastes, the investigation and remediation of contaminated soil and groundwater, the discharge of effluents into waterways, the emission of substances into the air, as well as various health and safety matters. Environmental laws and regulations are subject to frequent amendment and have historically become more stringent. We have incurred and could incur in the future significant costs as the result of our failure to comply with, and liabilities under, environmental laws and regulations, including cleanup costs, civil and criminal penalties, injunctive relief and denial or loss of, or imposition of significant restrictions on, environmental permits. In addition, we have been and could in the future be subject to suit by private parties in connection with alleged violations of, or liabilities under, environmental laws and regulations. See "Item 1A. Risk Factors – Risks Related to Our Business – We are subject to extensive environmental laws and regulations and may incur significant costs as a result of continued compliance with, violations of or liabilities under environmental laws and regulations" and Note 18 of the Notes to Consolidated Financial Statements, "Commitments and Contingent Liabilities."

Employees and Employee Relations

As of December 31, 2010, we had 575 salaried employees and 1,154 non-salaried employees. Listed below is a breakdown of employees by our businesses, including administration.

<i>Business</i>	<i>Salaried</i>	<i>Non-Salaried</i>	<i>Total</i>
Carbon Materials & Chemicals	295	463	758
Railroad & Utility Products	210	687	897
Administration	70	4	74
Total Employees	575	1,154	1,729

Of our employees, approximately 60 percent are represented by approximately 15 different labor unions and are covered under numerous labor agreements. The United Steelworkers of America currently represent more than 250 of our employees at six of our facilities and, therefore, represent the largest number of our unionized employees.

Internet Access

Our Internet address is www.koppers.com. Our recent filings on Form 10-K, 10-Q and 8-K and any amendments to those documents can be accessed without charge on our website under Investor Relations – SEC Filings. The contents of our internet site are not incorporated by reference into this document.

ITEM 1A. RISK FACTORS

You should carefully consider the risks described below before investing in our publicly traded securities. Our business is subject to the risks that affect many other companies, such as competition, technological obsolescence, labor relations, general economic conditions, geopolitical events and international operations.

Risks Related to Our Business

Conditions in the global economy and global capital markets may adversely affect our results of operations, financial condition and cash flows.

The U.S and global economy and capital markets have experienced significant uncertainties and volatility in the past few years. Our business and operating results for the last three years were significantly affected by these global economic issues. Many of our customers have experienced deterioration of their business during the latest business cycle. They may experience cash flow shortages and may have difficulty obtaining financing. As a result, our customers may delay or cancel plans to purchase our products and may not be able to fulfill their payment obligations to us in a timely fashion. Our suppliers may be experiencing similar conditions which could impact their ability to supply us with raw materials and otherwise fulfill their obligations to us. If global economic recession conditions deteriorate significantly, there could be a material adverse effect to our results of operations, financial condition and cash flows.

In addition, we rely on our \$300.0 million revolving credit agreement with a consortium of banks to provide us with liquidity to meet our working capital needs. At December 31, 2010, we had \$252.4 million of available borrowing capacity under this arrangement. Our ability to fund our liquidity needs and working capital requirements could be impacted in the event that disruptions in the credit markets result in the banks being unable to lend to us under our revolving credit agreement.

Global economic issues could prevent us from accurately forecasting demand for our products which could have a material effect on our results of operations and our financial condition.

Adverse global economic issues, market instability and volatile commodity price fluctuations make it increasingly difficult for us, our customers and our suppliers to accurately forecast future product demands, which could cause us to procure raw materials in excess of end-product demand. This could cause a material increase to our inventory carrying costs and result in significant inventory lower of cost or market charges.

We may be required to recognize impairment charges for our long-lived assets.

At December 31, 2010, the net carrying value of long-lived assets (property, plant and equipment, goodwill, other intangible assets and equity investments) totaled approximately \$272 million. In accordance with generally accepted accounting principles,

we periodically assess these assets to determine if they are impaired. Significant negative industry or economic trends, disruptions to our business, unexpected significant changes or planned changes in use of the assets, divestitures and market capitalization declines may result in impairments to goodwill and other long-lived assets. Future impairment charges could significantly affect our results of operations in the periods recognized. Impairment charges would also reduce our shareholder's equity and could affect compliance with the covenants in our debt agreements.

We may not be able to compete successfully in any or all of the industry segments in which we operate.

The markets in which we operate are highly competitive, and this competition could harm our business, results of operations, cash flow and financial condition. If we are unable to respond successfully to changing competitive conditions, the demand for our products could be affected. We believe that the most significant competitive factor for our products is selling price. Some of our competitors have greater financial resources and larger capitalization than we do.

Demand for our products is cyclical and we may experience prolonged depressed market conditions for our products.

Our products are sold primarily in markets which historically have been cyclical, such as the aluminum, specialty chemical and utility industries.

- The principal consumers of our carbon pitch are primary aluminum smelters. Although the aluminum industry has experienced growth on a long-term basis, there may be cyclical periods of weak demand which could result in decreased primary aluminum production. Our pitch sales have historically declined during such cyclical periods of weak global demand for aluminum.
- The principal use of our phthalic anhydride is in the manufacture of plasticizers and flexible vinyl, which are used mainly in the housing and automobile industries. Therefore, a decline in remodeling and construction or global automobile production could reduce the demand for phthalic anhydride.
- In addition to deregulation in the utility industry, utility pole demand has declined most recently due to the general downturn in the economy and its impact on utility companies' operating and capital budgets.

We have experienced significant volatility linked to global economic issues in the past three years that we more fully discuss in this report under Management's Discussion and Analysis of Financial Condition and Results of Operations.

We are dependent on major customers for a significant portion of our net sales, and the loss of one or more of our major customers could result in a significant reduction in our profitability as a whole or the profitability at a particular payment. For the year ended December 31, 2010, our top ten customers accounted for approximately 45 percent of our net sales. During this same period, our two largest customers accounted for approximately 9.6 percent and eight percent of our total net sales.

Fluctuations in the price, quality and availability of our primary raw materials could reduce our profitability.

Our operations depend on an adequate supply of quality raw materials being available on a timely basis. The loss of a key source of supply or a delay in shipments could cause a significant increase in our operating expenses. For example, our operations are highly dependent on a relatively small number of freight transportation services. We are also dependent on utilizing specialized ocean-going transport vessels that we lease to deliver raw materials to our facilities and finished goods to our customers. Interruptions in such freight services could impair our ability to receive raw materials and ship finished products in a timely manner. We are also exposed to price and quality risks associated with raw material purchases. Such risks include the following:

- The primary raw material used by our Carbon Materials & Chemicals business is coal tar, a by-product of furnace coke production. A shortage in the supply of domestic coal tar or a reduction in the quality of coal tar could require us to increase coal tar and carbon pitch imports, as well as the use of petroleum substitutes to meet future carbon pitch demand. This could cause a significant increase in our operating expenses if we are unable to pass these costs on to our customers.
- In certain circumstances coal tar may also be used as an alternative to fuel. In the past, increases in energy prices have resulted in higher coal tar costs which we have attempted to pass through to our customers. If these increased costs cannot be passed through to our customers, it could result in margin reductions for our coal tar-based products.
- The availability and cost of softwood and hardwood lumber are critical elements in our production of pole products and railroad crossties, respectively. Historically, the supply and cost of hardwood for railroad crossties have been subject to availability and price pressures. We may not be able to obtain wood raw materials at economical prices in the future.

- Our price realizations and profit margins for phthalic anhydride have historically fluctuated with the price of orthoxylylene and its relationship to our cost to produce naphthalene; however, during periods of excess supplies of phthalic anhydride, margins may be reduced despite high levels for orthoxylylene prices.

If the costs of raw materials increase significantly and we are unable to offset the increased costs with higher selling prices, our profitability will decline.

Our products may be rendered obsolete or less attractive by changes in regulatory, legislative or industry requirements.

Changes in regulatory, legislative or industry requirements may render certain of our products obsolete or less attractive. Our ability to anticipate changes in these requirements, especially changes in regulatory standards, will be a significant factor in our ability to remain competitive. We may not be able to comply in the future with new regulatory, legislative and/or industrial standards that may be necessary for us to remain competitive and certain of our products may, as a result, become obsolete or less attractive to our customers.

The development of new technologies or changes in our customers' products could reduce the demand for our products.

Our products are used for a variety of applications by our customers. Changes in our customers' products or processes may enable our customers to reduce consumption of the products we produce or make our products unnecessary. Customers may also find alternative materials or processes that no longer require our products.

Hazards associated with chemical manufacturing may cause suspensions or interruptions of our operations.

Due to the nature of our business, we are exposed to the hazards associated with chemical manufacturing and the related use, storage and transportation of raw materials, products and wastes in our manufacturing facilities and our distribution centers, such as fires, explosions and accidents that could lead to a suspension or interruption of operations. Any disruption could reduce the productivity and profitability of a particular manufacturing facility or of our company as a whole. Other hazards include the following:

- piping and storage tank leaks and ruptures;
- mechanical failure;
- exposure to hazardous substances; and
- chemical spills and other discharges or releases of toxic or hazardous wastes, substances or gases.

These hazards, among others, may cause personal injury and loss of life, damage to property and contamination of the environment, which could lead to government fines or work stoppage injunctions, cleanup costs and lawsuits by injured persons. While we are unable to predict the outcome of such matters, if determined adversely to us, we may not have adequate insurance to cover related costs or liabilities and, if not, we may not have sufficient cash flow to pay for such costs or liabilities. Such outcomes could harm our customer goodwill and reduce our profitability.

We are subject to extensive environmental laws and regulations and may incur significant costs as a result of continued compliance with, violations of or liabilities under environmental laws and regulations.

Like other companies involved in environmentally sensitive businesses, our operations and properties are subject to extensive federal, state, local and foreign environmental laws and regulations, including those concerning the following, among other things:

- the treatment, storage and disposal of wastes;
- the investigation and remediation of contaminated soil and groundwater;
- the discharge of effluents into waterways;
- the emission of substances into the air;
- the marketing, sale, use and registration of our chemical products, such as creosote;

- the European Union's regulation under the Registration Evaluation Authorization and Restriction of Chemicals, which requires manufacturers or importers of substances manufactured or imported into the EU in quantities of one tonne per year or more to register with a central European Chemicals Agency; and
- other matters relating to environmental protection and various health and safety matters.

We have incurred, and expect to continue to incur, significant costs to comply with environmental laws and regulations and as a result of remedial obligations. We could incur significant costs, including cleanup costs, fines, civil and criminal sanctions and claims by third parties for property damage and personal injury, as a result of violations of or liabilities under environmental laws and regulations. We accrue for environmental liabilities when a determination can be made that they are probable and reasonably estimable. Total environmental reserves at December 31, 2010 and December 31, 2009 were \$6.6 million and \$10.7 million, respectively, which include provisions primarily for environmental fines and remediation. For the last three fiscal years, our annual capital expenditures in connection with environmental control facilities averaged approximately \$6.7 million, and annual operating expenses for environmental matters, excluding depreciation, averaged approximately \$12.5 million. Management estimates that capital expenditures in connection with matters relating to environmental control facilities will be approximately \$14.1 million for 2011. Contamination has been identified and is being investigated and remediated at many of our sites by us or other parties. We believe that we will have continuing significant expenditures associated with compliance with environmental laws and regulations and, to the extent not covered by insurance or available recoveries under third-party indemnification arrangements, for present and future remediation efforts at plant sites and third-party waste sites and other liabilities associated with environmental matters. There can be no assurance that these expenditures will not exceed current estimates and will not have a material adverse effect on our business, financial condition, cash flow and results of operations.

Actual costs and liabilities to us may exceed forecasted amounts. Moreover, currently unknown environmental issues, such as the discovery of additional contamination or the imposition of additional sampling or cleanup obligations with respect to our sites or third party sites, may result in significant additional costs, and potentially significant expenditures could be required in order to comply with future changes to environmental laws and regulations or the interpretation or enforcement thereof. We also are involved in various litigation and proceedings relating to environmental matters and toxic tort claims.

Future climate change regulation could result in increased operating costs and reduced demand for our products.

Although the United States has not ratified the Kyoto Protocol, a number of federal laws related to "greenhouse gas," or "GHG," emissions are being considered by Congress. Additionally, various federal, state and regional regulations and initiatives have been enacted or are being considered.

In addition, our operations in the United Kingdom and Denmark are subject to binding caps on GHG emissions imposed by Member States of the European Union as a result of the European Commission's directive implementing the Kyoto Protocol. Under this directive, companies receive from the relevant Member States set limitations on the levels of GHG emissions from their industrial facilities. These allowances are tradable so as to enable companies that manage to reduce their GHG emissions to sell their excess allowances to companies that are not reaching their emissions objectives. Failure to meet the emissions caps is subject to significant monetary penalties. For the years 2008 through 2012, the European Commission significantly reduced the overall availability of allowances.

In 2008, Australia issued guidance outlining the components and rationale for its proposed carbon pollution reduction scheme, as well as associated timing. The plan calls for a cap and trade model with a medium-term target range of between five percent to 15 percent reduction in GHG by 2020. The reduction scheme aims to provide some assistance to emissions-intensive, trade-exposed companies based on the amount and intensity of its direct and indirect GHG emissions. Compliance under Australia's reduction scheme was expected to begin in 2010, but legislation seeking to implement a reduction scheme was rejected by the Australian Senate in August 2009.

Any laws or regulations that may be adopted to restrict or reduce emissions of GHGs could cause an increase to our raw material costs, could require us to incur increased operating costs and could have an adverse effect on demand for our products.

Beazer East and Beazer Limited may not continue to meet their obligations to indemnify us.

Under the terms of the asset purchase agreement between us and Koppers Company, Inc. (now known as Beazer East, Inc.) upon the formation of KI in 1988, subject to certain limitations, Beazer East and Beazer Limited assumed the liability for and

indemnified us against among other things certain clean-up liabilities for contamination occurring prior to the purchase date at sites acquired from Beazer East and certain third-party claims arising from such contamination (the "Indemnity"). Beazer East and Beazer Limited (which are indirect subsidiaries of Heidelberg Cement AG) may not continue to meet their obligations. In addition, Beazer East could in the future choose to challenge its obligations under the Indemnity or our satisfaction of the conditions to indemnification imposed on us thereunder. The government and other third parties may have the right under applicable environmental laws to seek relief directly from us for any and all such costs and liabilities. In July 2004, we entered into an agreement with Beazer East to amend the December 29, 1988 asset purchase agreement to provide, among other things, for the continued tender of pre-closing environmental liabilities to Beazer East under the Indemnity through July 2019. As consideration for the agreement, we, among other things, paid Beazer East \$7.0 million and agreed to share toxic tort litigation defense costs arising from sites acquired from Beazer East. Qualified expenditures under the Indemnity are not subject to a monetary limit.

The Indemnity provides for the resolution of issues between KI and Beazer East by an arbitrator on an expedited basis upon the request of either party. The arbitrator could be asked, among other things, to make a determination regarding the allocation of environmental responsibilities between KI and Beazer East. Arbitration decisions under the Indemnity are final and binding on the parties. Periodically, issues have arisen between KI and Beazer East and/or other indemnitors that have been resolved without arbitration. From time to time, KI and Beazer East have engaged in discussions that involve, among other things, the allocation of environmental costs related to certain operating and closed facilities.

Without reimbursement under the Indemnity, the obligation to pay the costs and assume the liabilities relating to these matters would have a significant impact on our net income. Furthermore, without reimbursement, we could be required to record a contingent liability on our balance sheet with respect to environmental matters covered by the Indemnity, which could result in our having significant negative net worth. Finally, the Indemnity does not afford us indemnification against environmental costs and liabilities attributable to acts or omissions occurring after the closing of the acquisition of assets from Beazer East under the asset purchase agreement, nor is the Indemnity applicable to liabilities arising in connection with other acquisitions by us after that closing.

The insurance that we maintain may not fully cover all potential exposures.

We maintain property, casualty, general liability and workers' compensation insurance, but such insurance may not cover all risks associated with the hazards of our business and is subject to limitations, including deductibles and maximum liabilities covered. We may incur losses beyond the limits, or outside the coverage, of our insurance policies, including liabilities for environmental compliance and remediation. In addition, from time to time, various types of insurance for companies in our industry have not been available on commercially acceptable terms or, in some cases, have not been available at all. In the future, we may not be able to obtain coverage at current levels, and our premiums may increase significantly on coverage that we maintain.

Adverse weather conditions may reduce our operating results.

Our quarterly operating results fluctuate due to a variety of factors that are outside our control, including inclement weather conditions, which in the past have caused a decline in our operating results. For example, adverse weather conditions have at times negatively impacted our supply chain as wet conditions impacted logging operations, reducing our ability to procure crossties. In addition, adverse weather conditions have had a negative impact on our customers in the pavement sealer businesses, resulting in a negative impact on our sales of these products. Moreover, demand for many of our products declines during periods of inclement weather.

We are subject to risks inherent in foreign operations, including additional legal regulation, changes in social, political and economic conditions.

We have operations in the United States, Australia, China, the United Kingdom and Denmark, and sell our products in many foreign countries. For the year ended December 31, 2010, net sales from products sold by our foreign subsidiaries accounted for approximately 46 percent of our total net sales.

Doing business on a global basis requires us to comply with the laws and regulations of the U.S. government and various international jurisdictions. These regulations place restrictions on our operations, trade practices and partners and investment decisions. In particular, our international operations are subject to U.S. and foreign anti-corruption laws and regulations, such as

the Foreign Corrupt Practices Act, and economic sanction programs administered by the U.S. Treasury Department's Office of Foreign Assets Control. Violations of these laws and regulations may result in civil or criminal penalties, including fines.

In addition, as a global business, we are also exposed to market risks relating to fluctuations in interest rates and foreign currency exchange rates. Our international revenues could be reduced by currency fluctuations or devaluations. Changes in currency exchange rates could lower our reported revenues and could require us to reduce our prices to remain competitive in foreign markets, which could also reduce our profitability. We have not historically hedged our financial statement exposure and, as a result, we could incur unanticipated losses. We are also subject to potentially increasing transportation and shipping costs associated with international operations. Furthermore, we are also exposed to risks associated with changes in the laws and policies governing foreign investments in countries where we have operations as well as, to a lesser extent, changes in U.S. laws and regulations relating to foreign trade and investment.

Our strategy to selectively pursue complementary acquisitions may present unforeseen integration obstacles or costs.

Our business strategy includes the potential acquisition of businesses and entering into joint ventures and other business combinations that we expect would complement and expand our existing products and the markets where we sell our products. We may not be able to successfully identify suitable acquisition or joint venture opportunities or complete any particular acquisition, combination, joint venture or other transaction on acceptable terms. We cannot predict the timing and success of our efforts to acquire any particular business and integrate the acquired business into our existing operations. Also, efforts to acquire other businesses or the implementation of other elements of this business strategy may divert managerial resources away from our business operations. In addition, our ability to engage in strategic acquisitions may depend on our ability to raise substantial capital and we may not be able to raise the funds necessary to implement our acquisition strategy on terms satisfactory to us, if at all. Our failure to identify suitable acquisition or joint venture opportunities may restrict our ability to grow our business. In addition, we may not be able to successfully integrate businesses that we acquire in the future, which could lead to increased operating costs, a failure to realize anticipated operating synergies, or both.

Litigation against us could be costly and time-consuming to defend, and due to the nature of our business and products, we may be liable for damages arising out of our acts or omissions, which may have a material adverse affect on us.

We produce chemicals that require appropriate procedures and care to be used in handling them or using them to manufacture other products. As a result of the nature of some of the products we use and produce, we may face product liability, toxic tort and other claims relating to incidents involving the handling, storage and use of and exposure to our products.

For example, we are a defendant in a significant number of lawsuits in which the plaintiffs claim they have suffered a variety of illnesses (including cancer) and/or property damage as a result of exposure to coal tar pitch, benzene, wood treatment chemicals and other chemicals, including certain cases in state and federal court relating to our Grenada, Mississippi and Somerville, Texas facilities. A further description of the material claims against us is included in Note 18 of the consolidated financial statements.

We are indemnified for certain product liability exposures under the Indemnity with Beazer East related to products sold prior to the closing of the acquisition of assets from Beazer East. Beazer East and Beazer Limited may not continue to meet their obligations under the Indemnity. In addition, Beazer East could choose to challenge its obligations under the Indemnity or our satisfaction of the conditions to indemnification imposed on us thereunder.

If for any reason (including disputed coverage or financial incapability) one or more of such parties fail to perform their obligations and we are held liable for or otherwise required to pay all or part of such liabilities without reimbursement, the imposition of such liabilities on us could have a material adverse effect on our business, financial condition, cash flows and results of operations. Furthermore, we could be required to record a contingent liability on our balance sheet with respect to such matters, which could result in us having significant negative net worth.

In addition to the above, we are regularly subject to legal proceedings and claims that arise in the ordinary course of business, such as workers' compensation claims, governmental investigations, employment disputes, and customer and supplier disputes arising out of the conduct of our business. Litigation could result in substantial costs and may divert management's attention and resources away from the day-to-day operation of our business.

Labor disputes could disrupt our operations and divert the attention of our management and may cause a decline in our production and a reduction in our profitability.

Of our employees, approximately 60 percent are represented by approximately 15 different labor unions and are covered under numerous labor agreements. The United Steelworkers of America currently represent more than 250 of our employees at six of our facilities and, therefore, represent the largest number of our unionized employees. Every year, a number of labor agreements are scheduled to expire. We may not be able to reach new agreements without union action or on terms satisfactory to us. Any future labor disputes with any such unions could result in strikes or other labor protests, which could disrupt our operations and divert the attention of our management from operating our business. If we were to experience a strike or work stoppage, it may be difficult for us to find a sufficient number of employees with the necessary skills to replace these employees. Any such labor disputes could cause a decline in our production and a reduction in our profitability.

Our post-retirement obligations are currently underfunded. We expect to make significant cash payments to our pension and other post-retirement plans, which will reduce the cash available for our business.

As of December 31, 2010, our benefit obligation under our defined benefit pension plans exceeded the fair value of plan assets by approximately \$74 million. Our pension asset funding to total pension obligation ratio was 66 percent as of December 31, 2010. The underfunding was caused, in large part, by fluctuations in the financial markets that have caused the value of the assets in our defined benefit pension plans to be significantly lower than anticipated. In addition, our obligations for other post-retirement benefit obligations are unfunded and total approximately \$13 million at December 31, 2010.

During the years ended December 31, 2010 and December 31, 2009, we contributed \$7.5 million and \$3.4 million, respectively, to our post-retirement benefit plans. With respect to our U.S. defined benefit pension plan which is our largest plan, we had funding obligations of \$4.3 million in 2010. However, we estimate that mandatory funding for this plan will be approximately \$12 million in 2011 and between \$8 and \$10 million in 2012 unless legislative changes occur.

Management expects that any future obligations under our post-retirement benefit plans that are not currently funded will be funded from our future cash flow from operations. If our contributions to our post-retirement benefit plans are insufficient to fund the post-retirement benefit plans adequately to cover our future obligations, the performance of the assets in our pension plans does not meet our expectations or other actuarial assumptions or mandatory funding laws are modified, our contributions to our post-retirement benefit plans could be materially higher than we expect, thus reducing the cash available for our business.

We may incur significant charges in the event we close all or part of a manufacturing plant or facility.

We periodically assess our manufacturing operations in order to manufacture and distribute our products in the most efficient manner. Based on our assessments, we may make capital improvements to modernize certain units, move manufacturing or distribution capabilities from one plant or facility to another plant or facility, discontinue manufacturing or distributing certain products or close all or part of a manufacturing plant or facility.

We depend on our senior management team and the loss of any member could adversely affect our operations.

Our success is dependent on the management, experience and leadership skills of our senior management team. Our senior management team has an average of over 20 years of industry experience. The loss of any of these individuals or an inability to attract, retain and maintain additional personnel with similar industry experience could prevent us from implementing our business strategy. We cannot assure you that we will be able to retain our existing senior management personnel or to attract additional qualified personnel when needed.

Risks Relating to Our Common Stock

Our stock price may be extremely volatile.

There has been significant volatility in the market price and trading volume of equity securities, which is unrelated to the financial performance of the companies issuing the securities. These broad market fluctuations may negatively affect the market price of our common stock.

Some specific factors that may have a significant effect on our common stock market price include the following:

- actual or anticipated fluctuations in our operating results or future prospects;
- the public's reaction to our press releases, our other public announcements and our filings with the Securities and Exchange Commission, or the SEC;
- strategic actions by us or our competitors, such as acquisitions or restructurings;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
- changes in accounting standards, policies, guidance, interpretations or principles;
- adverse conditions in the financial markets or general economic conditions, including those resulting from war, incidents of terrorism and responses to such events;
- sales of common stock by us, members of our management team or a significant shareholder; and
- changes in stock market analyst recommendations or earnings estimates regarding our common stock, other comparable companies or the aluminum or railroad industry generally.

We cannot predict the extent to which investor interest in our company will continue to support an active trading market on the New York Stock Exchange (the "NYSE") or otherwise or how liquid that market will continue to be. If there does not continue to be an active trading market for our common stock, you may have difficulty selling any of our common stock that you buy.

Future sales, or the perception of future sales, of a substantial amount of our common stock may depress the price of the shares of our common stock.

Future sales, or the perception or the availability for sale in the public market, of substantial amounts of our common stock could adversely affect the prevailing market price of our common stock and could impair our ability to raise capital through future sales of equity securities at a time and price that we deem appropriate.

We may issue shares of our common stock, or other securities, from time to time as consideration for future acquisitions and investments. We may also issue shares of our common stock, or other securities, in connection with employee stock compensation programs and board of directors' compensation. In addition, we may issue shares of our common stock or other securities in public or private offerings as part of our efforts to raise additional capital. In the event any such acquisition, investment, issuance under stock compensation programs or offering is significant, the number of shares of our common stock or the number or aggregate principal amount, as the case may be, of other securities that we may issue may in turn be significant. We may also grant registration rights covering those shares or other securities in connection with any such acquisitions and investments. Any additional capital raised through the sale of our equity securities may dilute your percentage ownership in us.

You may not receive dividends because our board of directors could, in its discretion, depart from or change our dividend policy at any time, because of restrictions in our debt agreements or because of restrictions imposed by Pennsylvania law.

We are not required to pay dividends, and our shareholders are not guaranteed, and do not have contractual rights, to receive dividends. Our board of directors may decide at any time, in its discretion, to decrease the amount of dividends, otherwise change or revoke the dividend policy or discontinue entirely the payment of dividends. Our board of directors could depart from or change our dividend policy, for example, if it were to determine that we had insufficient cash to take advantage of other opportunities with attractive rates of return or if we failed to reach a sufficient level of profitability. In addition, if we do not pay dividends, for whatever reason, your shares of our common stock could become less liquid and the market price of our common stock could decline.

The ability of Koppers Inc. and its subsidiaries to pay dividends or make other payments or distributions to us will depend on our operating results and may be restricted by, among other things, the covenants in Koppers Inc.'s revolving credit facility. Our ability to pay dividends is also limited by the indentures governing Koppers Inc.'s outstanding notes as well as Pennsylvania law and may in the future be limited by the covenants of any future outstanding indebtedness we or our subsidiaries incur. If a dividend is paid in violation of Pennsylvania law, each director approving the dividend could be liable to the corporation if the director did not act with such care as a person of ordinary prudence would use under similar circumstances. Directors are

entitled to rely in good faith on information provided by employees of the corporation and experts retained by the corporation. Directors who are held liable would be entitled to contribution from any shareholders who received an unlawful dividend knowing it to be unlawful. Furthermore, we are a holding company with no operations, and unless we receive dividends, distributions, advances, transfers of funds or other payments from our subsidiaries, we will be unable to pay dividends on our common stock.

Provisions of our charter documents may inhibit a takeover, which could negatively affect our stock price.

Provisions of our charter documents and the Business Corporation Law of Pennsylvania, the state in which we are organized, could discourage potential acquisition proposals or make it more difficult for a third party to acquire control of our company, even if doing so might be beneficial to our shareholders. Our Articles of Incorporation and Bylaws provide for various procedural and other requirements that could make it more difficult for shareholders to effect certain corporate actions. For example, our Amended and Restated Articles of Incorporation, or our Articles of Incorporation, authorizes our board of directors to determine the rights, preferences, privileges and restrictions of unissued series of preferred stock without any vote or action by our shareholders. Our board of directors can therefore authorize and issue shares of preferred stock with voting or conversion rights that could adversely affect the voting or other rights of holders of our common stock. The following additional provisions could make it more difficult for shareholders to effect certain corporate actions:

- Our board of directors is classified into three classes. Each director will serve a three-year term and will stand for re-election once every three years.
- Our shareholders will be able to remove directors only for cause by the affirmative vote of the holders of a majority of the outstanding shares of our capital stock entitled to vote in the election of directors. Vacancies on our board of directors may be filled only by our board of directors.
- Under Pennsylvania law, cumulative voting rights are available to the holders of our common stock if our Articles of Incorporation have not negated cumulative voting. Our Articles of Incorporation provide that our shareholders do not have the right to cumulative votes in the election of directors.
- Our Articles of Incorporation do not permit shareholder action without a meeting by consent except for the unanimous consent of all holders of our common stock. It also provides that special meetings of our shareholders may be called only by the board of directors or the chairman of the board of directors.
- Our Bylaws provide that shareholders seeking to nominate candidates for election as directors or to bring business before an annual meeting of shareholders must provide timely notice of their proposal in writing to the corporate secretary.

These provisions may discourage acquisition proposals and may make it more difficult or expensive for a third party to acquire a majority of our outstanding voting stock or may delay, prevent or deter a merger, acquisition, tender offer or proxy contest, which may negatively affect our stock price.

Risks Relating to the Koppers Inc. 7⁷/₈% Senior Notes Due 2019 (the "Senior Notes") and Other Indebtedness

Our level of indebtedness could limit cash flow available for our operations and could adversely affect our ability to service our debt or obtain additional financing, if necessary.

We have and will continue to have a significant amount of indebtedness. Our level of indebtedness could restrict our operations and make it more difficult for us to satisfy our obligations under the Senior Notes. Among other things, our substantial indebtedness could:

- limit our ability to obtain additional financing for working capital, capital expenditures, acquisitions and general corporate purposes;
- make it more difficult for us to satisfy our financial obligations, including those with respect to the Senior Notes;
- increase our vulnerability to general adverse economic and industry conditions;
- require us to dedicate a substantial portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures, research and development efforts and other general corporate purposes;

- limit our flexibility in planning for, or reacting to, changes in our business and the markets in which we compete; and
- place us at a competitive disadvantage compared to our competitors that have less debt.

In addition, the indentures governing the Senior Notes and Koppers Inc.'s revolving credit facility contain financial and other restrictive covenants that will limit our ability to engage in activities that may be in our long-term best interests. Our failure to comply with those covenants could result in an event of default which, if not cured or waived, could result in the acceleration of the repayment of all of our debts.

Despite current indebtedness levels, we may still be able to incur substantially more debt. This could further exacerbate the risks associated with our substantial leverage.

We may be able to incur substantial additional indebtedness in the future. The terms of the Senior Notes indenture and Koppers Inc.'s revolving credit facility do not fully prohibit us from doing so. Koppers Inc.'s \$300.0 million revolving credit facility permits additional borrowing and all of those borrowings would rank senior to the Senior Notes and the guarantees to the extent of the collateral securing such facility. In addition, the indenture relating to the Senior Notes will permit us to incur all of those borrowings under Koppers Inc.'s revolving credit facility and substantial additional indebtedness, including additional secured indebtedness. If new debt is added to our and our subsidiaries' current debt levels, the related risks that we and they now face could intensify.

To service our indebtedness, we will require a significant amount of cash. Our ability to generate cash depends on many factors beyond our control.

Our ability to make payments on and to refinance our indebtedness, including the Senior Notes, and to fund planned capital expenditures and research and development efforts will depend on our ability to generate cash in the future. Although there can be no assurances, we believe that the cash provided by our operations will be sufficient to provide for our cash requirements for the foreseeable future. However, our ability to satisfy our obligations will depend on our future operating performance and financial results, which will be subject, in part, to factors beyond our control, including interest rates and general economic, financial and business conditions. We cannot assure you, however, that our business will generate sufficient cash flow from operations or that future borrowings will be available to us in an amount sufficient to enable us to pay our indebtedness, including the Senior Notes, or to fund our other liquidity needs. If we are unable to generate sufficient cash flow to service our debt, we may be required to:

- refinance all or a portion of our debt, including the Senior Notes;
- obtain additional financing;
- sell some of our assets or operations;
- reduce or delay capital expenditures and acquisitions; or
- revise or delay our strategic plans.

If we are required to take any of these actions, it could have a material adverse affect on our business, financial condition and results of operations. In addition, we cannot assure you that we would be able to take any of these actions, that these actions would enable us to continue to satisfy our capital requirements or that these actions would be permitted under the terms of our various debt instruments.

The covenants in Koppers Inc.'s revolving credit facility impose restrictions that may limit our ability to take certain actions. Our failure to comply with these covenants could result in the acceleration of our outstanding indebtedness.

Koppers Inc.'s revolving credit facility contains minimum fixed charge coverage and maximum leverage ratios. Additionally, the facility includes covenants limiting liens, mergers, asset sales, dividends and the incurrence of debt. Our ability to borrow under Koppers Inc.'s revolving credit facility will depend upon satisfaction of these covenants. Events beyond our control can affect our ability to meet those covenants.

If we are unable to meet the terms of our financial covenants, or if we break any of these covenants, a default could occur. A default, if not waived, would entitle our lenders to declare all amounts borrowed under it immediately due and payable, which

could also cause the acceleration of obligations under certain other agreements. In the event of acceleration of our outstanding indebtedness, there can be no assurance that we would be able to repay our debt or obtain new financing to refinance our debt. Even if new financing is made available to us, it may not be on terms acceptable to us.

The Senior Notes are unsecured and are effectively subordinated to our current and future secured indebtedness.

The Senior Notes are unsecured, and are effectively subordinated to all our current secured indebtedness and any future secured indebtedness that we may incur to the extent of the assets securing such indebtedness. At December 31, 2010, we have a \$300.0 million secured revolving credit facility. The revolving credit agreement and indenture governing the Senior Notes permit us to incur a substantial amount of additional indebtedness. The Senior Notes do not have the right to any security interests in any collateral.

In the event of our insolvency, bankruptcy, liquidation, reorganization, dissolution or winding up, we may not have sufficient assets to pay amounts due on any or all of the Senior Notes then outstanding. Holders of the Senior Notes will participate ratably with all holders of our unsecured indebtedness that is deemed to be of the same class as the Senior Notes, and potentially with all of our other general creditors, based upon the respective amounts owed to each holder or creditor, in our remaining assets. In any of the foregoing events, we cannot assure holders of our Senior Notes that there will be sufficient assets to pay amounts due on the Senior Notes. As a result, holders of the Senior Notes may receive less, ratably, than holders of our secured indebtedness.

We may not have the ability to raise the funds necessary to finance the change of control offer required by the indenture or may be prohibited from making a repurchase offer required by the indenture.

Upon the occurrence of certain specific kinds of change of control events, we will be required to offer to repurchase all outstanding Senior Notes at 101 percent of the principal amount thereof plus accrued and unpaid interest, if any, to the date of repurchase. The source of funds for that purchase of Senior Notes will be available cash or cash generated from Koppers Inc. or its subsidiaries operations or other potential sources, including borrowings, sales of assets or equity financing. It is possible that we will not have sufficient funds at the time of the change of control to make the required repurchase of Senior Notes or that restrictions in our other indebtedness will not allow such repurchases. In addition, certain important corporate events, such as leveraged recapitalizations that would increase the level of our indebtedness, would not constitute a change of control under the Senior Notes indenture.

Holders of Senior Notes may not be able to determine when a change of control giving rise to their right to have the Senior Notes repurchased by us has occurred following a sale of "substantially all" of our assets.

A change of control, as defined in the indenture governing the Senior Notes, requires us to make an offer to repurchase all outstanding Senior Notes. The definition of change of control includes a phrase relating to the sale, lease or transfer of "all or substantially all" of our assets. There is no precise established definition of the phrase "substantially all" under applicable law. Accordingly, the ability of a holder of Senior Notes to require us to repurchase its Senior Notes as a result of a sale, lease or transfer of less than all of our assets to another individual, group or entity may be uncertain.

The claims of holders of Senior Notes will be structurally subordinated to claims of creditors of any of Koppers Inc's subsidiaries that do not guarantee the notes.

Only Koppers Holdings and the wholly-owned domestic restricted subsidiaries of Koppers Inc. guarantee the Senior Notes. The Senior Notes are not guaranteed by any of our non-U.S. subsidiaries. Subject to certain limitations, the indenture governing the Senior Notes permits the non-guarantor subsidiaries to acquire additional assets and incur additional indebtedness. Holders of Senior Notes would not have any claim as a creditor against any of the non-guarantor subsidiaries to the assets and earnings of those subsidiaries. The claims of the creditors of those subsidiaries, including their trade creditors, banks and other lenders, will have priority over any of Koppers Inc.'s claims or those of Koppers Inc.'s other subsidiaries as equity holders of the non-guarantor subsidiaries. Consequently, in any insolvency, liquidation, reorganization, dissolution or other winding-up of any of the non-guarantor subsidiaries, creditors of those subsidiaries would be paid before any amounts would be distributed to Koppers Inc. or to any of the other guarantors as equity and thus be available to satisfy the obligations under the Senior Notes and the guarantees. Accordingly, there can be no assurance that any of the assets of the non-guarantor subsidiaries will be available to satisfy the obligations under the Senior Notes and the guarantees. In addition, Koppers Holdings has substantially

no operations independent of Koppers Inc. and its subsidiaries, and there can be no assurance that Koppers Holdings will have any assets available to satisfy the obligations under its guarantee. As of December 31, 2010, the non-guarantor subsidiaries had approximately \$87 million of liabilities (including trade payables but excluding intercompany indebtedness).

Our subsidiaries that do not guarantee the Senior Notes accounted for approximately \$493 million, or 40 percent of our net sales and approximately \$59 million, or 60 percent of our operating profit, for the year ended December 31, 2010, and approximately \$289 million, or 43 percent of our total assets as of December 31, 2010. Amounts are presented after giving effect to intercompany eliminations.

Federal or state laws allow courts, under specific circumstances, to void debts, including guarantees, and could require holders of Senior Notes to return payments received from guarantors.

The Senior Notes are guaranteed by Koppers Holdings and the wholly-owned domestic restricted subsidiaries of Koppers Inc. If a bankruptcy proceeding or lawsuit were to be initiated by unpaid creditors, the Senior Notes and the guarantees of the Senior Notes could come under review for federal or state fraudulent transfer violations. Under federal bankruptcy law and comparable provisions of state fraudulent transfer laws, obligations under the Senior Notes or a guarantee of the Senior Notes could be voided, or claims in respect of the Senior Notes or a guarantee of the Senior Notes could be subordinated to all other debts of the debtor or that guarantor if, among other things, the debtor or the guarantor, at the time it incurred the debt evidenced by such Senior Notes or guarantee:

- received less than reasonably equivalent value or fair consideration for the incurrence of such debt or guarantee; and
- one of the following applies:
 - it was insolvent or rendered insolvent by reason of such incurrence;
 - it was engaged in a business or transaction for which its remaining assets constituted unreasonably small capital; or
 - it intended to incur, or believed that it would incur, debts beyond its ability to pay such debts as they mature.

In addition, any payment by the debtor or guarantor under the Senior Notes or guarantee of the Senior Notes could be voided and required to be returned to the debtor or guarantor, as the case may be, or deposited in a fund for the benefit of the creditors of the debtor or guarantor.

The measure of insolvency for purposes of these fraudulent transfer laws will vary depending upon the law applied in any proceeding to determine whether a fraudulent transfer has occurred. Generally, however, a debtor or a guarantor would be considered insolvent if:

- the sum of its debts, including contingent liabilities, was greater than the fair saleable value of all its assets;
- the present fair saleable value of its assets was less than the amount that would be required to pay its probable liability on its existing debts, including contingent liabilities, as they become absolute and mature; or
- it could not pay its debts as they become due.

We cannot be sure as to the standards that a court would use to determine whether or not a guarantor was solvent at the relevant time, or, regardless of the standard that the court uses, that the issuance of the guarantees of the Senior Notes would not be voided or subordinated to the guarantor's other debt. If a guarantee was legally challenged, it could also be subject to the claim that, because it was incurred for our benefit, and only indirectly for the benefit of the guarantor, the obligations of the guarantor were incurred for less than fair consideration. A court could thus void the obligations under a guarantee or subordinate a guarantee to a guarantor's other debt or take other action detrimental to holders of the Senior Notes.

The trading price of the Senior Notes may be volatile.

The trading price of the Senior Notes could be subject to significant fluctuations in response to, among other factors, changes in our operating results, interest rates, the market for non-investment grade debt securities, general economic conditions and securities analysts' recommendations, if any, regarding our securities.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The following chart sets forth information regarding our production facilities. Generally, our production facilities are suitable and adequate for the purposes for which they are intended and overall have sufficient capacity to conduct business in the upcoming year.

<i>Primary Product Line</i>	<i>Location</i>	<i>Description of Property Interest</i>
Carbon Materials & Chemicals		
Carbon pitch	Clairton, Pennsylvania	Owned
Carbon pitch	Follansbee, West Virginia	Owned
Carbon pitch ^(a)	Jingtang, Hebei Province, China	Leased
Carbon black	Kurnell, New South Wales, Australia	Leased
Carbon pitch	Longview, Washington	Leased
Carbon pitch	Mayfield, New South Wales, Australia	Owned
Carbon pitch	Nyborg, Denmark	Owned/Leased
Carbon pitch	Port Clarence, United Kingdom	Owned
Carbon pitch	Portland, Oregon	Leased
Carbon pitch	Scunthorpe, United Kingdom	Owned
Carbon pitch, phthalic anhydride	Stickney, Illinois	Owned
Carbon pitch	Tangshan, Hebei Province, China	Leased
Carbon pitch	Uithoorn, the Netherlands	Leased
Railroad & Utility Products		
Railroad crossties, utility poles	Bunbury, Western Australia, Australia	Owned/Leased
Railroad crossties, utility poles	Denver, Colorado	Owned
Railroad crossties, utility poles	Florence, South Carolina	Owned
Railroad crossties	Galesburg, Illinois	Leased
Utility poles	Grafton, New South Wales, Australia	Owned
Railroad crossties	Green Spring, West Virginia	Owned
Railroad crossties, utility poles	Grenada, Mississippi	Owned
Railroad crossties	Guthrie, Kentucky	Owned
Rail joint bars	Huntington, West Virginia	Leased
Utility poles	Longford, Tasmania, Australia	Owned
Railroad crossties	Muncy, Pennsylvania	Owned
Railroad crossties	North Little Rock, Arkansas	Owned
Concrete crossties ^(b)	Portsmouth, Ohio	Owned
Railroad crossties	Roanoke, Virginia	Owned
Railroad crossties	Somerville, Texas	Owned
Pine products	Takura, Queensland, Australia	Leased

(a) Ownership percentage is 30 percent.

(b) Ownership percentage is 50 percent.

Our corporate offices are located in approximately 60,000 square feet of leased office space in Pittsburgh, Pennsylvania. The lease term expires on December 31, 2018.

ITEM 3. LEGAL PROCEEDINGS

We are involved in litigation and various proceedings relating to environmental laws and regulations, toxic tort, product liability and other matters. An adverse outcome for certain of these cases could result in a material adverse effect on our business, cash flows and results of operations. The information related to legal matters set forth in Note 18 to the Consolidated Financial Statements of Koppers Holdings Inc. is hereby incorporated by reference.

EXECUTIVE OFFICERS OF THE COMPANY

The following table sets forth the names, ages and positions of our and Koppers Inc.'s executive officers as of February 3, 2011. Our executive officers hold their positions until the annual meeting of the board of directors or until their respective successors are elected and qualified.

<i>Name</i>	<i>Age</i>	<i>Position</i>
Walter W. Turner	64	President and Chief Executive Officer of Koppers Holdings Inc. and Koppers Inc. and Director of Koppers Holdings Inc. and Koppers Inc.
Leroy M. Ball	42	Vice President and Chief Financial Officer, Koppers Holdings Inc. and Koppers Inc.
James T. Dietz	54	Vice President, European Operations, Koppers Inc.
Donald E. Evans	45	Vice President, Strategic Planning and Growth, Koppers Inc.
Robert J. Howard	55	Vice President, Human Resources, Koppers Inc.
Leslie S. Hyde	50	Vice President, Safety and Environmental Affairs, Koppers Inc.
Steven R. Lacy	55	Senior Vice President, Administration, General Counsel and Secretary, Koppers Holdings Inc. and Koppers Inc.
Thomas D. Loadman	56	Vice President and General Manager, Railroad and Utility Products & Services, Koppers Inc.
Michael J. Mancione	44	Vice President, North American Carbon Materials & Chemicals, Koppers Inc.
Mark R. McCormack	51	Vice President, Australian Operations, Koppers Inc.
Brian H. McCurrie	50	Senior Vice President, Global Carbon Materials & Chemicals, Koppers Inc.
Markus G. Spiess	50	Vice President, Global Sales and Marketing, Global Carbon Materials & Chemicals, Koppers Inc.
Louann E. Tronsberg-Deihle	47	Treasurer, Koppers Holdings Inc. and Koppers Inc.

Mr. Turner was elected President and Chief Executive Officer in, and has been our director since, November 2004. He has been President and Chief Executive Officer and director of Koppers Inc. since February 1998.

Mr. Ball was elected Vice President and Chief Financial Officer in August 2010. Prior to joining Koppers, Mr. Ball was Senior Vice President and Chief Financial Officer of Calgon Carbon Inc. (granular activated carbon products and treatment systems) since 2002.

Mr. Dietz was elected Vice President, European Operations of Koppers Inc., in November 2006 effective January 2007. He joined Koppers in 1995 and has held positions in operations and engineering. Most recently, he was Operations Manager, Carbon Materials & Chemicals of Koppers Inc., beginning in March 1999.

Mr. Evans was elected Vice President, Strategic Planning and Growth, in August 2010. Mr. Evans had been previously elected Vice President, Global Marketing, Sales and Development, Carbon Materials & Chemicals of Koppers Inc. in February 2007. From October 2004 through December 2006, Mr. Evans was Vice President for Advanced Recycling Systems (industrial equipment manufacturing). From July 1998 through September 2004, Mr. Evans had been Manager, Business Development & Strategic Planning, Carbon Materials & Chemicals of Koppers Inc.

Mr. Howard was elected Vice President, Human Resources of Koppers Inc. in February 2009. In September 2006, Mr. Howard was appointed Vice President, Human Resources. Prior to joining Koppers Inc., Mr. Howard was Vice President, Human Resources and Administration of L.B. Foster Company Inc. (rail and piling supply and precast products) since May 2002.

Ms. Hyde was elected Vice President, Safety and Environmental Affairs of Koppers Inc. in January 2005. Prior to that date, Ms. Hyde held the position of Manager, Environmental Department of Koppers Inc. since 1999.

Mr. Lacy was elected Senior Vice President, Administration, General Counsel and Secretary in November 2004 and has been Senior Vice President, Administration, General Counsel and Secretary of Koppers Inc. since January 2004. Mr. Lacy had previously been elected Vice President, Law and Human Resources and Secretary of Koppers Inc. in July 2002.

Mr. Loadman was elected Vice President and General Manager, Railroad and Utility Products & Services of Koppers Inc. in November 1994.

Mr. Mancione was elected Vice President, Carbon Materials & Chemicals, North America of Koppers Inc. in November 2006. Mr. Mancione was Manager, Marketing and Sales, Carbon Materials & Distillates of Koppers Inc., beginning in November 2004, and prior to that, was Operations Manager, Railroad Products & Services of Koppers Inc. beginning in 2002.

Mr. McCormack was elected Vice President, Australian Operations of Koppers Inc. in November 2006. Mr. McCormack had been elected Vice President, Global Marketing, Sales and Development, Carbon Materials & Chemicals of Koppers Inc. in February 2002.

Mr. McCurrie was elected Senior Vice President, Global Carbon Materials & Chemicals of Koppers Inc. in February 2010. Mr. McCurrie had been Vice President and Chief Financial Officer of Koppers Inc. since October 2003.

Mr. Spiess was elected Vice President, Global Sales and Marketing, Global Carbon Materials & Chemicals of Koppers Inc. in February 2011. Mr. Spiess had been Vice President, Global Supply, European Marketing and Sales, European Operations of Koppers Inc. since November 2007. From July 2007 through October 2007, Mr. Spiess was a Business Development Manager for L&M Rohstoffhandelsgesellschaft GmbH (ferroalloy and bulk trading). Prior to that, Mr. Spiess was the executive Vice President, Aromatics Division for Ruetgers Chemicals GmbH (coal tar distillation for chemical industry).

Ms. Tronsberg-Deihle was elected Treasurer of Koppers Holdings Inc. and Koppers Inc. in August 2008. In July 2008, Ms. Tronsberg-Deihle was appointed as our Treasurer. Ms. Tronsberg-Deihle was the Assistant Treasurer and Risk Manager of WESCO Distribution Inc. (global provider of services and procurement solutions) from 1995 to June 2008.

PART II**ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common shares are listed and traded on the NYSE under the symbol "KOP".

The number of registered holders of Koppers common shares at January 31, 2011 was 98.

See Note 20 to the consolidated financial statements below for information concerning dividends and high and low market prices of our common shares during the past two years.

Dividend Policy

Our board of directors adopted a dividend policy, which reflects its judgment that our shareholders would be better served if we distributed to them, as quarterly dividends payable at the discretion of our board of directors, a portion of the cash generated by our business in excess of our expected cash needs rather than retaining it or using the cash for other purposes. Our expected cash needs include operating expenses and working capital requirements, interest and principal payments on our indebtedness, capital expenditures, incremental costs associated with being a public company, taxes and certain other costs. On an annual basis we expect to pay dividends with cash flow from operations, but, due to seasonal or other temporary fluctuations in cash flow, we may from time to time use temporary short-term borrowings to pay quarterly dividends.

We are not required to pay dividends, and our shareholders will not be guaranteed, or have contractual or other rights, to receive dividends. Our board of directors may decide, in its discretion, at any time, to decrease the amount of dividends, otherwise modify or repeal the dividend policy or discontinue entirely the payment of dividends.

Because we are a holding company, substantially all the assets shown on our consolidated balance sheet are held by our subsidiaries. Accordingly, our earnings and cash flow and our ability to pay dividends are dependent upon the earnings and cash flows of our subsidiaries and the distribution or other payment of such earnings to us in the form of dividends. Our ability to pay dividends is restricted by limitations on the ability of our only direct subsidiary, Koppers Inc., to pay dividends, as a result of limitations imposed by Koppers Inc.'s credit agreement, the indenture governing Koppers Inc.'s 7 7/8% Senior Notes due 2019 (the "Senior Notes") and by Pennsylvania law. See "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources – Restrictions on Dividends to Koppers Holdings."

Equity Compensation Plans

<i>Plan Category</i>	<i>Number of securities to be issued upon exercise of outstanding options, warrants and rights</i>	<i>Weighted-average exercise price of outstanding options, warrants and rights</i>	<i>Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in first column)</i>
Equity compensation plans approved by security holders	669,989 ⁽¹⁾	\$10.72	1,187,933 ⁽²⁾

⁽¹⁾ Includes shares of our common stock that may be issued pursuant to outstanding options, time-based restricted stock units and performance-based restricted stock units awarded under our 2005 Long Term Incentive Plan.

⁽²⁾ Includes shares of our common stock that remain available for issuance under our 2004 Restricted Stock Unit Plan and our amended and restated 2005 Long Term Incentive Plan.

Issuer Purchases of Equity Securities

The following table sets forth information regarding Koppers Holdings' repurchases of shares of its common stock during the three months ended December 31, 2010:

<u>Period</u>	<u>Total Number of Common Shares Purchased</u>	<u>Average Price paid per Common Share</u>	<u>Total Number of Common Shares Purchased as Part of Publicly announced Plans or Programs</u>	<u>Maximum Number of Common Shares that May Yet be Purchased Under the Plans or Programs</u>
October 1 - October 31	1,121 ⁽¹⁾	\$27.88	0	0
November 1 - November 30	0	\$ 0.00	0	0
December 1 - December 31	0	\$ 0.00	0	0

(1) Under the terms of our amended and restated 2005 Long Term Incentive Plan, upon the vesting of restricted stock units, each employee who holds these restricted stock units has the right to cause us to withhold shares of our common stock for tax obligations incurred in connection with the vesting of these units and the related issuance of shares of our common stock to such employee.

ITEM 6. SELECTED FINANCIAL DATA

The following table contains our selected historical consolidated financial data for the five years ended December 31, 2010. The selected historical consolidated financial data for each of the five years ended December 31, 2010, 2009, 2008, 2007 and 2006 have been derived from our audited consolidated financial statements. This selected financial data should be read in conjunction with Koppers' Consolidated Financial Statements and related notes included elsewhere in this Annual Report on Form 10-K as well as Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations.

	Year ended December 31,				
	2010	2009	2008	2007	2006
<i>(Dollars in millions, except share and per share amounts)</i>					
Statement of Operations Data:					
Net sales	\$1,245.5	\$1,124.4	\$1,364.8	\$1,255.6	\$1,044.2
Depreciation and amortization	28.1	24.8	30.0	29.5	29.6

Earnings Per Common Share Data:					
Basic – continuing operations	\$ 2.15	\$ 0.93	\$ 2.31	\$ 2.30	\$ 0.39
Diluted – continuing operations	2.14	0.92	2.30	2.29	0.36
Weighted average common shares outstanding (in thousands):					
Basic	20,543	20,446	20,651	20,768	19,190
Diluted	20,676	20,561	20,767	20,874	20,104
Balance Sheet Data:					
Cash and cash equivalents ⁽⁵⁾	\$ 35.3	\$ 58.4	\$ 63.1	\$ 14.4	\$ 21.3
Total assets	669.2	644.4	661.1	669.3	649.4
Total debt	296.4	335.3	374.9	440.2	475.9
Other Data:					
Capital expenditures ⁽⁶⁾	\$ 29.9	\$ 18.0	\$ 36.7	\$ 23.2	\$ 27.5
Cash dividends declared per common share	\$ 0.88	\$ 0.88	\$ 0.88	\$ 0.68	\$ 1.30

(1) Includes loss (gain) on the extinguishment of Senior Discount Notes and Senior Secured Notes in 2009, a portion of the Senior Secured Notes in 2008 and a portion of the Senior Discount Notes in 2006.

(2) In July 2007, we sold our 51 percent interest in Koppers Arch Investments Pty Limited and its subsidiaries ("Koppers Arch"). Koppers Arch's results of operations have been classified as a discontinued operation for all periods presented.

(3) In October 2008, we sold our 95 percent interest in Koppers Monessen Partners LP ("Monessen"). Monessen's results of operations have been classified as a discontinued operation for all periods presented.

(4) In connection with our initial public offering in February 2006, costs totaling \$17.4 million were incurred for a related call premium on the Senior Secured Notes (\$10.1 million), the write-off of deferred financing costs (\$3.2 million), the termination of the Saratoga Partners III, L.P. advisory services contract (\$3.0 million) and payment of bond consent fees (\$1.1 million).

(5) Includes cash of discontinued operations as of December 31, 2007 and 2006.

(6) Excludes capital expenditures by Koppers Arch, a discontinued operation, of \$0.0 million, \$0.1 million and \$0.8 million and by Koppers Monessen, a discontinued operation, of \$0.4 million, \$1.0 million and \$0.2 million for the years ended December 31, 2008, 2007 and 2006, respectively.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We are a leading integrated global provider of carbon compounds and commercial wood treatment products and services. Our products are used in a variety of niche applications in a diverse range of end-markets, including the aluminum, railroad, specialty chemical, utility, rubber, concrete and steel industries. We serve our customers through a comprehensive global manufacturing and distribution network, with manufacturing facilities located in the United States, Australia, China, the United Kingdom, Denmark and the Netherlands.

We operate two principal businesses: **Carbon Materials & Chemicals ("CM&C")** and **Railroad & Utility Products ("R&UP")**.

Through our CM&C business, we process coal tar into a variety of products, including carbon pitch, creosote, naphthalene and phthalic anhydride, which are intermediate materials necessary in the production of aluminum, the pressure treatment of wood, the production of high-strength concrete, and the production of plasticizers and specialty chemicals, respectively. Through our R&UP business, we believe that we are the largest supplier of railroad crossties to the North American railroads. Our other commercial wood treatment products include the provision of utility poles to the electric and telephone utility industries.

Our CM&C business has entered into a number of strategic transactions during the last year to expand and focus on its core business related to coal tar distillation and derived products. In March 2010, we completed the acquisition of Cindu Chemicals B.V., a coal tar distillation company located in the Netherlands. This company was subsequently renamed Koppers Netherlands B.V. ("Koppers Netherlands"). The revenues from this facility from March 1 through December 31, 2010 amounted to approximately \$48 million. In October 2010 we also purchased the midwestern United States refined tar business of Stella Jones Inc. to increase our presence in this market.

Our R&UP business purchased the rail joint bar business of Portec Rail Products, Inc. located in Huntington, West Virginia in December 2010. This acquisition strengthens our product portfolio offerings to our existing Class I and commercial railroad customers in the United States.

On October 1, 2008, we sold our 95 percent interest in Koppers Monessen Partners LP ("Monessen") to ArcelorMittal S.A. for cash of \$160.0 million plus working capital of \$10.0 million. Net cash proceeds, after deduction for the limited partner interest, taxes and transaction costs, were approximately \$100.0 million. Monessen is a metallurgical furnace coke facility. Effective as of the end of the second quarter of 2008, Monessen was classified as a discontinued operation in the Company's statement of operations.

Outlook

Trend Overview

Our businesses and results of operations are impacted by various competitive and other factors including (i) the impact of global economic conditions on demand for our products both in the United States and overseas; (ii) raw materials pricing and availability, in particular the amount and quality of coal tar available in global markets, which could be negatively impacted by reductions in steel production; (iii) volatility in oil prices, which impacts selling prices and margins for certain of our products including carbon black feedstock and phthalic anhydride; (iv) competitive conditions in global carbon pitch markets; and (v) changes in foreign exchange rates.

Our businesses and results of operations were impacted by the global recession starting in late 2008 and continuing through 2010. Certain key end markets experienced significant global reductions in demand that has negatively affected the profitability of our products. During 2010 our key end markets showed increased stability for our Carbon Materials & Chemicals business; however, volumes for our Railroad & Utility Products business declined substantially from 2009 levels as our Class I railroad customer base reduced their purchases.

During 2009 we saw the idling or closure of several aluminum smelters, particularly in North America and Europe, as global production of aluminum declined over previous levels. However, in late 2010 several North American smelters announced that they are planning to increase production and restart some of their previously idled capacity during 2011. We also believe we are well positioned to supply the new Middle Eastern smelters due to our capacity expansions in China.

While our volumes of carbon pitch have increased as our Chinese operations supply several of the new smelters in the Middle East, profit margins in this region have been reduced as coal tar costs have increased in response to reduced availability and higher oil prices, and carbon pitch pricing has been negatively affected by excess supplies of product in Asia.

Our carbon black facility in Australia experienced operating problems related to a boiler in 2010 that had a negative impact on operating profit of approximately \$2.6 million for the year ended December 31, 2010.

Our railroad business was down substantially in 2010 from an unusually strong prior year as we believe the railroads reduced their untreated crosstie purchases and treating volumes in order to reduce inventory levels.

We produced lower volumes in 2009 and 2010 as compared to 2008 in many of our products which reduced the capacity utilization at our facilities. Lower throughput volumes combined with increasing pressure for price reductions has led us to review our capacity utilization and has resulted in production cutbacks, from time to time, at certain facilities, which can result in lower margins. To the extent these trends continue, we may temporarily idle or permanently close facilities. For example, in December 2009 we announced the sale of our Gainesville utility pole treatment plant, and in the fourth quarter of 2010 we recorded impairment and related charges of \$2.2 million related to a wood treating plant in the United States. Utility pole markets are expected to continue to remain competitive with resulting low margins. We will continue to review underperforming assets and rationalize capacity as necessary to remain competitive in this market and will reduce market share if warranted.

Several of our products, particularly carbon black feedstock and phthalic anhydride, have end market pricing that is linked to oil. During the past few years we have benefited in terms of revenues and profitability from the higher pricing for these products as the cost of coal tar has not increased proportionally with oil. However, when the price of oil declined in late 2008 we saw significant price and profit declines for these products.

The availability of our key raw material, coal tar, is linked to levels of metallurgical coke production. As the global steel industry has reduced production of steel and metallurgical coke the volumes of coal tar by-product were also reduced. Our ability to obtain coal tar and the price we are able to negotiate have a significant impact on the level of profitability of our business. Many of our sales contracts include provisions that allow for price increases based on increases in the price of raw materials, which has allowed us to generally maintain profit dollars in our core businesses. However, significant increases in raw material costs will result in margin dilution because only the increased cost of the raw material is passed on to the customer. Additionally, in certain regions such as China that have competing markets for coal tar, we may not be able to recover raw material cost increases in the selling prices of all of our end products.

Seasonality and Effects of Weather on Operations

Our quarterly operating results fluctuate due to a variety of factors that are outside of our control, including inclement weather conditions, which in the past have affected operating results. Operations at several facilities have been halted for short periods of time during the winter months. Moreover, demand for some of our products declines during periods of inclement weather. As a result of the foregoing, we anticipate that we may experience material fluctuations in quarterly operating results. Historically, our operating results have been significantly lower in the fourth and first calendar quarters as compared to the second and third calendar quarters. We expect this seasonality trend to continue in future periods.

Results of Operations – Comparison of Years Ended December 31, 2010 and December 31, 2009

Consolidated Results

Net sales for the years ended December 31, 2010 and 2009 are summarized by segment in the following table:

	Year Ended December 31,		Net Change
	2010	2009	
<i>(Dollars in millions)</i>			
Carbon Materials & Chemicals	\$ 795.6	\$ 655.2	+21%
Railroad & Utility Products	449.9	469.2	-4%
	\$1,245.5	\$1,124.4	+11%

CM&C net sales increased by \$140.4 million or 21 percent due to the following changes in volume, pricing and foreign exchange:

	Price	Volume	Foreign Exchange	Net Change
Carbon Materials ^(a)	-5%	+10%	+1%	+6%
Distillates ^(b)	+2%	+2%	0%	+4%
Coal Tar Chemicals ^(c)	+4%	+3%	0%	+7%
Other ^(d)	+1%	+2%	+1%	+4%
Total CM&C	+2%	+17%	+2%	+21%

(a) Includes carbon pitch, petroleum pitch and refined tar.

(b) Includes creosote and carbon black feedstock.

(c) Includes naphthalene and phthalic anhydride.

(d) Includes carbon black, benzole, freight and other products.

Carbon materials' pricing for carbon pitch decreased five percent due to lower demand and excess pitch availability. Offsetting this decrease were higher sales volumes of carbon pitch from Chinese operations of five percent and Europe of three percent due primarily to the acquisition in the Netherlands. The volume increases are due to increased worldwide demand for aluminum products and the increased production from our Chinese operations to supply carbon pitch to smelters in the Middle East.

Distillate pricing for carbon black feedstock increased two percent in Europe due to higher average worldwide oil prices as compared to the prior year. The increase in distillate sales volume is due to the acquisition in the Netherlands.

For coal tar chemicals, increases in phthalic anhydride prices in the U.S. of three percent and naphthalene prices of one percent were experienced. Higher volumes of phthalic anhydride of one percent resulted from increased production in the U.S. auto industry, and higher volumes of naphthalene of one percent were due to the acquisition in the Netherlands. With respect to other products, pricing for benzole increased one percent as compared to the prior year.

R&UP net sales decreased by \$19.3 million or four percent due to the following changes in volume, pricing and foreign exchange:

	Price	Volume	Foreign Exchange	Net Change
Railroad Crossties ^(a)	-1%	-3%	0%	-4%
TSO Crossties ^(b)	+1%	0%	0%	+1%
Distribution Poles	0%	-1%	+1%	0%
Other ^(c)	0%	-1%	0%	-1%
Total R&UP	0%	-5%	+1%	-4%

(a) Includes treated and untreated railroad crossties.

(b) Includes sales from treatment services only ("TSO").

(c) Includes creosote, transmission poles, pilings, freight and other treated and untreated lumber products.

Sales volume and price decreases for railroad crossties totaled three and one percent, respectively for the year ended December 31, 2010, driven by lower purchases from the Class I railroad customers. Price increases for treating services increased one percent and volumes for utility poles decreased one percent. With respect to other products, lower creosote volumes of one percent in the U.S. were realized.

Cost of sales as a percentage of net sales was 85 percent for the year ended December 31, 2010 as compared to 84 percent for the year ended December 31, 2009. Overall, cost of sales increased by \$108.5 million when compared to the prior year period due primarily to higher CM&C sales volumes.

Depreciation and amortization for the year ended December 31, 2010 was \$3.3 million higher when compared to the prior year period due to an impairment charge of \$1.8 million in 2010 related to a wood treating plant and incremental depreciation from the Koppers Netherlands acquisition.

Selling, general and administrative expenses for the year ended December 31, 2010 were \$5.2 million higher when compared to the prior year period due primarily to higher stock based compensation expense and higher management incentive.

Interest expense for the year ended December 31, 2010 was \$9.2 million lower when compared to the prior year period due primarily to lower average borrowings and lower borrowing costs as compared to the prior period. Lower average borrowings resulted from the use of operating cash flow to reduce debt and lower borrowing costs resulted from the refinancing of long-term debt in the fourth quarter of 2009 at a lower interest rate of 7 $\frac{7}{8}$ percent.

Loss on the extinguishment of debt was \$22.4 million in 2009 and resulted from the tender offer and call of the 9 $\frac{7}{8}$ Senior Discount Notes due 2014 (the "Senior Discount Notes") and the call of the Koppers Inc. 9 $\frac{7}{8}$ % Senior Secured Notes due 2013 ("Senior Secured Notes").

Income taxes for the year ended December 31, 2010 were \$15.3 million higher when compared to the prior year period due primarily to the increase in pretax income of \$38.3 million as compared to the prior year. Our effective income tax rate for the year ended December 31, 2010 was 39.5 percent as compared to the prior year period of 38.8 percent.

For the year ended December 31, 2009, although we had book income before taxes of \$35.5 million, we incurred a U.S. taxable loss, for federal purposes, of \$58.4 million due to the refinancing of the Senior Discount Notes. This taxable loss occurred due to the ability to deduct accrued but unpaid interest on the Senior Discount Notes for which we had previously provided deferred tax. As a result we recorded an income tax receivable of \$37.1 million as of December 31, 2009 to reflect the anticipated refunds of federal and state income taxes paid in 2009 and 2008.

Segment Results

Segment operating profit for the years ended December 31, 2010 and 2009 is summarized by segment in the following table:

	Year Ended December 31,		% Change
	2010	2009	
<i>(Dollars in millions)</i>			
Operating profit:			
Carbon Materials & Chemicals	\$77.6	\$58.5	+33%
Railroad & Utility Products	23.0	38.2	-40%
Corporate	(1.6)	(1.8)	-11%
	\$99.0	\$94.9	+4%
Operating profit as a percentage of segment net sales:			
Carbon Materials & Chemicals	9.8%	8.9%	+0.9%
Railroad & Utility Products	5.1%	8.1%	-3.0%
	7.9%	8.4%	-0.5%

Carbon Materials & Chemicals net sales and operating profit by geographic region for the years ended December 31, 2010 and 2009 is summarized in the following table:

	<i>Twelve months ended December 31,</i>		<i>% Change</i>
	<i>2010</i>	<i>2009</i>	
<i>(Dollars in millions)</i>			
Net sales:			
North America	\$306.5	\$270.4	+13%
Europe	230.0	179.4	+28%
Australia	148.5	145.7	+2%
China	116.2	78.6	+48%
Intrasegment	(5.6)	(18.9)	-70%
	\$795.6	\$655.2	+21%
Operating profit:			
North America	\$ 37.1	\$ 18.3	+103%
Europe	26.6	19.8	+34%
Australia	15.0	14.5	+3%
China	(1.1)	5.9	-119%
	\$ 77.6	\$ 58.5	+33%

North American CM&C sales increased by \$36.1 million due primarily to higher volumes and prices for phthalic anhydride totaling \$26.0 million combined with higher volumes for pitch and refined tar totaling \$15.5 million, partially offset by lower pricing for pitch of \$8.3 million. Operating profit as a percentage of net sales increased to 12 percent from seven percent for the prior year reflecting the impact of higher volumes of refined tar coupled with higher volumes and prices for phthalic anhydride.

European CM&C sales increased by \$50.6 million due primarily to the acquisition in the Netherlands of \$48.4 million and higher prices for carbon black feedstock of \$10.6 million, partially offset by lower prices for carbon pitch totaling \$8.8 million. In addition, currency exchange rate changes resulted in a reduction of sales totaling \$6.2 million. Operating profit as a percentage of net sales increased to 12 percent from 11 percent in the prior year.

Australian CM&C sales increased by \$2.8 million as lower prices for carbon pitch totaling \$13.0 million and lower freight costs of \$6.6 million were more than offset by currency exchange rate changes resulting in an increase in sales of \$20.0 million. Operating profit as a percentage of net sales was flat at ten percent for both years.

Chinese CM&C sales increased by \$37.6 million due primarily to higher volumes of carbon pitch totaling \$29.8 million and higher pricing for carbon black feedstock and naphthalene totaling \$9.2 million. Chinese operations incurred an operating loss of \$1.1 million compared to operating profit as a percentage of net sales of eight percent for the prior year. The 2010 operating loss was due to lower pricing for carbon pitch exports to the Middle East combined with higher tar costs in China.

Railroad & Utility Products sales for the twelve months ended December 31, 2010 decreased by \$19.3 million as compared to the prior period due primarily to lower sales volumes and prices for untreated crossties of \$13.1 million and lower volumes for utility poles totaling \$7.1 million. Operating profit as a percentage of net sales decreased to five percent from eight percent in the prior year as a result of lower capacity utilization, impairment and related charges totaling \$2.2 million, and a legal settlement for \$3.0 million.

Results of Operations – Comparison of Years Ended December 31, 2009 and December 31, 2008

Consolidated Results

Net sales for the years ended December 31, 2009 and 2008 are summarized by segment in the following table:

	Year Ended December 31,		Net Change
	2009	2008	
<i>(Dollars in millions)</i>			
Carbon Materials & Chemicals	\$ 655.2	\$ 892.0	-27%
Railroad & Utility Products	469.2	472.8	-1%
	\$1,124.4	\$1,364.8	-18%

CM&C net sales decreased by \$236.8 million or 27 percent due to the following changes in volume, pricing and foreign exchange:

	Price	Volume	Foreign Exchange	Net Change
Carbon Materials ^(a)	+2%	-11%	-1%	-10%
Distillates ^(b)	-2%	-3%	0%	-5%
Coal Tar Chemicals ^(c)	-3%	-2%	0%	-5%
Other ^(d)	-1%	-4%	-2%	-7%
Total CM&C	-4%	-20%	-3%	-27%

(a) Includes carbon pitch and refined tar.

(b) Includes creosote and carbon black feedstock.

(c) Includes naphthalene and phthalic anhydride.

(d) Includes carbon black, petroleum pitch, benzole, freight and other products.

Carbon materials' pricing for carbon pitch increased three percent in the U.S. and Australia as customer prices were increased in response to higher raw material costs. Offsetting this increase were lower sales volumes of carbon pitch in the U.S. of nine percent and Europe of two percent. The volume decreases are due to reduced worldwide demand for aluminum products and the related idling of a number of aluminum smelters to reduce supply.

Distillate pricing for carbon black feedstock decreased two percent in Europe due to lower average worldwide oil prices as compared to the prior year. The decrease in distillate sales volume is due primarily to lower creosote sales in the U.S. totaling two percent.

For coal tar chemicals, decreases in phthalic anhydride prices in the U.S. of two percent and naphthalene prices of one percent in Europe were experienced. Lower volumes of phthalic anhydride of one percent resulted from weakness in the U.S. housing and auto industries. With respect to other products, benzole and carbon black volumes decreased one percent each as compared to the prior year.

R&UP net sales decreased by \$3.6 million or one percent due to the following changes in volume, pricing and foreign exchange:

	Price	Volume	Foreign Exchange	Net Change
Railroad Crossties ^(a)	+2%	-4%	0%	-2%
TSO Crossties ^(b)	+1%	+1%	0%	+2%
Distribution Poles	0%	-2%	-1%	-3%
Other ^(c)	+4%	-2%	0%	+2%
Total R&UP	+7%	-7%	-1%	-1%

(a) Includes treated and untreated railroad crossties.

(b) Includes sales from treatment services only ("TSO").

(c) Includes creosote, transmission poles, pilings, freight and other treated and untreated lumber products.

Sales price increases and volume increases for untreated railroad crossties totaled two and three percent, respectively for the year ended December 31, 2009. Offsetting the volume increase in untreated crossties was a decrease of six percent in treated railroad crossties sales, as volume reductions for sales to commercial customers offset volume increases for the Class I railroads. With respect to other products, higher creosote prices of three percent in the U.S. were realized.

Cost of sales as a percentage of net sales was 84 percent for both years ended December 31, 2009 and 2008. Overall, cost of sales decreased by \$193.4 million when compared to the prior year period due primarily to lower CM&C production volumes and foreign exchange.

Depreciation and amortization for the year ended December 31, 2009 was \$5.2 million lower when compared to the prior year period due to an impairment charge of \$3.7 million in 2008 related to our glycerine refining plant in the United Kingdom.

Selling, general and administrative expenses for the year ended December 31, 2009 were \$6.5 million lower when compared to the prior year period due primarily to lower salary, incentive, benefit expenses and lower discretionary spending as a result of programs to decrease spending to react to changing global economic conditions.

Interest expense for the year ended December 31, 2009 was \$6.3 million lower when compared to the prior year period due primarily to lower average borrowings as compared to the prior period. Lower average borrowings resulted from debt reductions in the fourth quarter of 2008 funded by the net proceeds from the sale of Monessen in October 2008.

Loss on the extinguishment of debt was \$22.4 million in 2009 and resulted from the tender offer and call of the Senior Discount Notes and the call of the Senior Secured Notes. The gain on extinguishment of debt of \$1.2 million in 2008 resulted from the repurchase of Senior Secured Notes at a discount to principal value.

Income taxes for the year ended December 31, 2009 were \$27.8 million lower when compared to the prior year period due primarily to the decrease in pretax income of \$54.5 million and estimated taxes on unremitted European earnings for 2008. For the year ended December 31, 2009, European earnings were considered to be permanently reinvested and did not attract U.S. taxation. In 2008, we provided U.S. deferred tax on European earnings of approximately \$18 million. Our effective income tax rate for the year ended December 31, 2009 was 38.8 percent as compared to the prior year period of 46.2 percent.

For the year ended December 31, 2009, although we had book income before taxes of \$35.5 million, we incurred a U.S. taxable loss, for federal purposes, of \$58.4 million due to the refinancing of the Senior Discount Notes. This taxable loss occurred due to the ability to deduct accrued but unpaid interest on the Senior Discount Notes for which we had previously provided deferred tax. As a result we have recorded an income tax receivable of \$37.1 million as of December 31, 2009 to reflect the anticipated refunds of federal and state income taxes paid in 2009 and 2008.

Gain on sale of Monessen for the year ended December 31, 2008 represents the gain, net of tax expense, from the sale of our 95 percent interest in Monessen to ArcelorMittal S.A. on October 1, 2008. Effective as of this date, Monessen was classified as a discontinued operation in our statement of operations. The loss on sale of Monessen for 2009 represented sales price adjustments negotiated with the buyer.

Segment Results

Segment operating profit for the years ended December 31, 2009 and 2008 is summarized by segment in the following table:

	Year Ended December 31,		% Change
	2009	2008	
<i>(Dollars in millions)</i>			
Operating profit:			
Carbon Materials & Chemicals	\$58.5	\$108.2	-46%
Railroad & Utility Products	38.2	24.3	+57%
Corporate	(1.8)	(2.3)	-22%
	\$94.9	\$130.2	-27%
Operating profit as a percentage of segment net sales:			
Carbon Materials & Chemicals	8.9%	12.1%	-3.2%
Railroad & Utility Products	8.1%	5.1%	+3.0%
	8.4%	9.5%	-1.1%

Carbon Materials & Chemicals net sales and operating profit by geographic region for the years ended December 31, 2009 and 2008 is summarized in the following table:

	<i>Twelve months ended December 31,</i>		<i>% Change</i>
	<i>2009</i>	<i>2008</i>	
<i>(Dollars in millions)</i>			
Net sales:			
North America	\$270.4	\$398.6	-32%
Europe	179.4	259.4	-31%
Australia	145.7	167.4	-13%
China	78.6	77.7	+1%
Intrasegment	(18.9)	(11.1)	+70%
	<u>\$655.2</u>	<u>\$892.0</u>	-27%
Operating profit:			
North America	\$ 18.3	\$ 56.4	-68%
Europe	19.8	25.8	-23%
Australia	14.5	26.1	-44%
China	5.9	(0.1)	n/a%
	<u>\$ 58.5</u>	<u>\$108.2</u>	-46%

North American CM&C sales decreased by \$128.2 million due primarily to lower volumes for carbon pitch, creosote and phthalic anhydride totaling \$111.4 million in addition to lower freight of \$11.1 million. Higher volumes of refined tar and petroleum pitch of \$11.1 million partially offset these decreases. Operating profit as a percentage of net sales decreased to seven percent from 14 percent for the prior period reflecting the impact of significantly lower sales volumes coupled with lower pricing for phthalic anhydride.

European CM&C sales decreased by \$80.0 million due primarily to lower prices for carbon black feedstock, benzole and naphthalene totaling \$29.9 million and lower volumes for carbon pitch, benzole and creosote totaling \$24.0 million. In addition, currency exchange rate changes resulted in a reduction of sales totaling \$21.1 million. Operating profit as a percentage of net sales increased to 11 percent from ten percent from the prior period.

Australian CM&C sales decreased by \$21.7 million due primarily to lower volumes for carbon pitch, carbon black feedstock and carbon black totaling \$17.5 million. These decreases were partially offset by higher prices for carbon pitch totaling \$15.9 million. Currency exchange rate changes resulted in a reduction of sales totaling \$10.6 million. Operating profit as a percentage of net sales was ten percent for the period as compared to 16 percent for the prior period reflecting the impact of lower sales volumes during 2009.

Chinese CM&C sales increased by \$0.9 million due primarily to higher volumes of carbon black feedstock, carbon pitch and naphthalene totaling \$12.4 million, partially offset by lower carbon pitch and carbon black feedstock prices of \$12.2 million. Currency exchange rate changes contributed \$0.9 million to increased sales. Operating profit as a percentage of net sales was eight percent and compared to breakeven for the prior period. The 2008 operating margin was negatively impacted by lower of cost of market write-downs of inventory.

Railroad & Utility Products sales for the twelve months ended December 31, 2009 decreased by \$3.6 million as compared to the prior period primarily as higher sales volumes of treated crossties, untreated crossties and treating services to the Class I railroads of \$22.3 million and higher prices for untreated crossties of \$8.1 million were more than offset by lower volumes of treated crossties to commercial customers of \$35.4 million. Operating profit as a percentage of net sales increased to eight percent from five percent between periods due to product mix, cost reduction initiatives and the impact in 2008 of additional operating costs due to a boiler outage at one of the Company's wood treatment plants and the unplanned outage of an electricity cogeneration unit at another of the Company's wood treatment plants.

Cash Flow

Net cash provided by operating activities was \$105.3 million for the year ended December 31, 2010 as compared to net cash provided by operating activities of \$112.3 million for the year ended December 31, 2009. Net cash flows from operating activities decreased by approximately \$7 million between periods due to changes in working capital.

Net cash provided by operating activities was \$112.3 million for the year ended December 31, 2009 as compared to net cash provided by operating activities of \$51.9 million for the year ended December 31, 2008. Net cash provided by operating activities for 2008 includes income taxes paid in connection with the Monessen transaction of approximately \$50 million. Excluding this amount, net cash flow from operating activities increased by approximately \$10 million between periods due to reductions in inventories and accounts receivable.

Net cash used in investing activities was \$63.4 million for the year ended December 31, 2010 as compared to net cash used in investing activities of \$20.8 million for the year ended December 31, 2009. Increased capital spending was \$11.9 million in 2010 and acquisition expenditures in 2010 primarily represent the acquisition of Koppers Netherlands and the rail joint bar business of Portec Rail Products Inc.

Net cash used in investing activities was \$20.8 million for the year ended December 31, 2009 as compared to net cash provided by investing activities of \$120.7 million for the year ended December 31, 2008. Net cash proceeds from divestitures and asset sales in 2008 primarily represent the net cash proceeds from the sale of Monessen. Decreased capital spending in 2009 is primarily related to our plant expansion in China and increased environmental improvement spending at our U.S. wood treating plants during 2008. Acquisition expenditures in 2009 primarily represent an asset acquisition in our US R&UP business and capital contributions to Tangshan Koppers Kailuan Carbon Chemical Company Limited (TKK), our 30 percent-owned coal tar distillation joint venture in China. Acquisition expenditures in 2008 primarily related to capital contributions to TKK.

Net cash used in financing activities was \$64.3 million for the year ended December 31, 2010 as compared to net cash used in financing activities of \$96.9 million for the year ended December 31, 2009. Net repayments of debt totaled \$40.0 million in the year ended December 31, 2010 and was funded from operating cash flow.

Net cash used in financing activities was \$96.9 million for the year ended December 31, 2009 as compared to net cash used in financing activities of \$123.1 million for the year ended December 31, 2008. Net repayments of debt totaled \$70.8 million in the year ended December 31, 2009 as a result of refinancing the Senior Discount Notes and the Senior Secured Notes with borrowings under the revolving credit agreement, cash and the issuance of \$300.0 million principal value Senior Notes.

Dividends paid were \$23.1 million for the year ended December 31, 2010 as compared to dividends paid of \$18.0 million for the year ended December 31, 2009. Dividends totaling \$18.0 million in both periods reflect an annual dividend rate of 88 cents per common share. For the year ended December 31, 2010, dividends of \$5.0 million were paid to noncontrolling interests with respect to a partially owned subsidiary.

Liquidity and Capital Resources

Indebtedness as of December 31, 2010

On December 1, 2009, Koppers Inc. completed a private placement offering of \$300.0 million aggregate principal amount of 7⁷/₈% Senior Notes due 2019 (the "Senior Notes"). The Senior Notes are guaranteed by Koppers Holdings Inc., as parent guarantor, and certain subsidiaries of Koppers Inc. as additional guarantors. A portion of the net proceeds of the offering of the Senior Notes was used to finance a cash tender offer for, and a redemption of, Koppers Holdings' remaining outstanding 9⁷/₈% Senior Discount Notes due 2014 (the "Senior Discount Notes"), with remaining net proceeds used to repay outstanding debt under Koppers Inc.'s revolving credit facility and for general corporate purposes. In connection with the issuance of the Senior Notes, Koppers Inc. also amended its revolving credit agreement to extend the expiration date of the revolving credit facility to October 31, 2013 and to amend interest pricing and certain covenants.

Restrictions on Dividends to Koppers Holdings

Koppers Holdings depends on the dividends from the earnings of Koppers Inc. and its subsidiaries to generate the funds necessary to meet its financial obligations, including the payment of any declared dividend of Koppers Holdings. Koppers Inc.'s credit agreement prohibits it from making dividend payments to us unless (1) such dividend payments are permitted by the indenture governing Koppers Inc.'s Senior Notes and (2) no event of default or potential default has occurred or is continuing under the credit agreement. The indenture governing Koppers Inc.'s Senior Notes restricts its ability to finance our payment of

dividends if (1) a default has occurred or would result from such financing, (2) a restricted subsidiary of Koppers Inc. which is not a guarantor under the indenture is not able to incur additional indebtedness (as defined in the indenture), and (3) the sum of all restricted payments (as defined in the indenture) have exceeded the permitted amount (which we refer to as the "basket") at such point in time.

The basket is governed by a formula based on the sum of a beginning amount, plus or minus a percentage of Koppers Inc.'s consolidated net income (as defined in the indenture), plus the net proceeds of Koppers Inc.'s qualified stock issuance or conversions of debt to qualified stock, plus the net proceeds from the sale of or a reduction in an investment (as defined in the indenture) or the value of the assets of an unrestricted subsidiary which is designated a restricted subsidiary. At December 31, 2010 the basket totaled \$162.1 million. Notwithstanding such restrictions, the indenture governing Koppers Inc.'s Senior Notes permits an additional aggregate amount of \$20.0 million each fiscal year to finance dividends on the capital stock of Koppers Holdings, whether or not there is any basket availability, provided that at the time of such payment, no default in the indenture has occurred or would result from financing the dividends.

In addition, certain required coverage ratios in Koppers Inc.'s revolving credit facility may restrict the ability of Koppers Inc. to pay dividends. See "—Debt Covenants."

The ability of Koppers Inc. to pay dividends to us, and our ability to pay dividends to our shareholders, is also restricted by Pennsylvania law. Under Pennsylvania law, a corporation has the power, subject to restrictions in its bylaws, to pay dividends or make other distributions to its shareholders unless, after giving effect thereto, (1) the corporation would not be able to pay its debts as they become due in the usual course of business or (2) the corporation's assets would be less than the sum of its total liabilities plus (unless otherwise provided in its articles) the amount that would be needed upon the dissolution of the corporation to satisfy the preferential rights, if any, of the shareholders having superior preferential rights to the shareholders receiving the distribution. In determining whether a particular level of dividends is permitted under Pennsylvania law, the board of directors may base its conclusion on one or more of the following: the book values of the assets and liabilities of the company as reflected on its books and records; a valuation that takes into consideration unrealized appreciation, depreciation or other changes in value of the assets and liabilities of the company; the current value of the assets and liabilities of the company either valued separately or valued in segments or as an entirety as a going concern; or any other method that is reasonable in the circumstances. Our bylaws and articles and those of Koppers Inc. contain no restrictions regarding dividends.

Liquidity

The Koppers Inc. revolving credit facility agreement provides for a revolving credit facility of up to \$300.0 million at variable interest rates. Borrowings under the revolving credit facility are secured by a first priority lien on substantially all of the assets of Koppers Inc. and its material domestic subsidiaries. The revolving credit facility contains certain covenants for Koppers Inc. and its restricted subsidiaries that limit capital expenditures, additional indebtedness, liens, dividends and investments or acquisitions. In addition, such covenants give rise to events of default upon the failure by Koppers Inc. and its restricted subsidiaries to meet certain financial ratios.

As of December 31, 2010, the Company had \$252.4 million of unused revolving credit availability for working capital purposes after restrictions by various debt covenants and certain letter of credit commitments. As of December 31, 2010, \$13.4 million of commitments were utilized by outstanding letters of credit.

The following table summarizes our estimated liquidity as of December 31, 2010 (*dollars in millions*):

Cash and cash equivalents	\$ 35.3
Amount available under revolving credit facility	252.4
Amount available under other credit facilities	14.9
Total estimated liquidity	\$302.6

Our estimated liquidity was \$230.2 million at December 31, 2009. The increase in estimated liquidity from that date is due primarily to an increase in availability under the revolving credit facility due to a decrease in borrowing of \$40.0 million under the revolving credit facility and other covenant restrictions.

As of December 31, 2010, we had \$325.0 million aggregate amount of common stock, debt securities, preferred stock, depository shares and warrants (or a combination of these securities) available to be issued under our registration statement on Form S-3 filed in 2009.

Our need for cash in the next twelve months relates primarily to contractual obligations which include debt service, purchase commitments and operating leases, as well as for working capital, capital maintenance programs and mandatory defined benefit plan funding. We may also use cash to pursue potential strategic acquisitions. Capital expenditures in 2011, excluding acquisitions, are expected to total approximately \$32 million. We believe that our cash flow from operations and available borrowings under the revolving credit facility will be sufficient to fund our anticipated liquidity requirements for at least the next twelve months. In the event that the foregoing sources are not sufficient to fund our expenditures and service our indebtedness, we would be required to raise additional funds.

Cash Flows from Discontinued Operations

The cash flows related to Monessen for the year ended December 31, 2008 have not been restated in the consolidated statement of cash flows. Excluding cash proceeds from the sales of Monessen, the net cash inflows of discontinued operations totaled \$0.7 million for the year ended December 31, 2008.

Schedule of Certain Contractual Obligations

The following table details our projected payments for our significant contractual obligations as of December 31, 2010. The table is based upon available information and certain assumptions we believe to be reasonable.

	<i>Payments Due by Period</i>				
	<i>Total</i>	<i>2011</i>	<i>2012-2013</i>	<i>2014-2015</i>	<i>Later years</i>
<i>(in millions)</i>					
Long-term debt (including accretion)	\$ 301.1	\$ 1.0	\$ 0.1	\$ 0.0	\$300.0
Interest on debt	210.7	23.6	47.3	47.3	92.5
Operating leases	119.2	35.6	45.7	14.3	23.6
Purchase commitments ⁽¹⁾	1,666.9	350.9	463.1	376.2	476.7
Total contractual cash obligations	\$2,297.9	\$411.1	\$556.2	\$437.8	\$892.8

(1) Consists primarily of raw materials purchase contracts. These are typically not fixed price arrangements; the prices are based on the prevailing market prices. As a result, we generally expect to be able to hedge the purchases with sales at those future prices.

Pension and other employee benefit plan funding obligations (for defined benefit plans) are not included in the table above. We expect defined benefit plan contributions to total approximately \$14 million in 2011. Estimated funding obligations are determined by asset performance, workforce and retiree demographics, tax and employment laws and other actuarial assumptions which may change the annual funding obligations. The funded status of our defined benefit plans is disclosed in Note 15 of the Consolidated Financial Statements.

Schedule of Certain Other Commercial Commitments

The following table details our projected payments for other significant commercial commitments as of December 31, 2010. The table is based upon available information and certain assumptions we believe to be reasonable.

	<i>Payments Due by Period</i>				
	<i>Total</i>	<i>2011</i>	<i>2012-2013</i>	<i>2014-2015</i>	<i>Later years</i>
<i>(in millions)</i>					
Lines of credit (unused)	\$267.3	\$14.9	\$252.4	\$0.0	\$0.0
Standby letters of credit	13.4	13.4	0.0	0.0	0.0
Total other commercial commitments	\$280.7	\$28.3	\$252.4	\$0.0	\$0.0

Debt Covenants

The covenants that affect availability of the revolving credit facility and which may restrict the ability of Koppers Inc. to pay dividends include the following financial ratios:

- The fixed charge coverage ratio, calculated as of the end of each fiscal quarter for the four fiscal quarters then ended, is not permitted to be less than 1.10. The fixed charge coverage ratio at December 31, 2010 was 2.3.
- The leverage ratio, calculated as of the end of each fiscal quarter for the four fiscal quarters then ended, is not permitted to exceed 4.50. The leverage ratio at December 31, 2010 was 2.31.

- The senior secured leverage ratio, calculated as of the end of each fiscal quarter for the four fiscal quarters then ended, is not permitted to exceed 2.75. The senior secured leverage ratio at December 31, 2010 was 0.00.

We are currently in compliance with all covenants in the credit agreement governing the revolving credit facility.

At December 31, 2010, Koppers Inc. had \$300.0 million principal value outstanding of Senior Notes. The Senior Notes include customary covenants that restrict, among other things, our ability to incur additional debt, pay dividends or make certain other restricted payments, incur liens, merge or sell all or substantially all of the assets or enter into various transactions with affiliates. We are currently in compliance with all covenants in the Senior Notes indenture.

Other Matters

Foreign Operations and Foreign Currency Transactions

We are subject to foreign currency translation fluctuations due to our foreign operations. For the years ended December 31, 2010, 2009 and 2008, exchange rate fluctuations resulted in an increase (decrease) to comprehensive income of \$11.5 million, \$24.0 million and \$(28.5) million, respectively. Foreign currency transaction gains and losses result from transactions denominated in a currency which is different from the currency used by the entity to prepare its financial statements. Foreign currency transaction gains (losses) were \$(2.3) million, \$(1.9) million and \$1.8 million for the years ended December 31, 2010, 2009 and 2008, respectively.

Recently Issued Accounting Guidance

There is no recently issued accounting guidance that is expected to have a material impact on our financial results.

Critical Accounting Policies

The preparation of financial statements in conformity with generally accepted accounting principles in the United States requires management to use judgment in making estimates and assumptions that affect the reported amounts of revenues and expenses, assets and liabilities, and the disclosure of contingent liabilities. The following accounting policies are based on, among other things, judgments and assumptions made by management that include inherent risks and uncertainties. Our management's estimates are based on the relevant information available at the end of each period.

Revenue Recognition. We recognize revenue from product sales at the time of shipment or when title passes to the customer. We recognize revenue related to the procurement of certain untreated railroad crossties upon transfer of title, which occurs upon delivery to our plant and acceptance by the customer. Service revenue, consisting primarily of wood treating services, is recognized at the time the service is provided. Our recognition of revenue with respect to untreated crossties meets all the recognition criteria of the Securities and Exchange Commission's Staff Accounting Bulletin Topic 13A3, including transfer of title and risk of ownership, the existence of fixed purchase commitments and delivery schedules established by the customer and the completion of all performance obligations by us.

Accounts Receivable. We maintain allowances for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. In circumstances where we become aware of a specific customer's inability to meet its financial obligations, a specific reserve for bad debts is recorded against amounts due. If the financial conditions of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Inventories. In the United States, CM&C and R&UP inventories are valued at the lower of cost, utilizing the last-in, first-out ("LIFO") basis, or market. Inventories outside the United States are valued at the lower of cost, utilizing the first-in, first-out basis ("FIFO"), or market. Market represents replacement cost for raw materials and net realizable value for work in process and finished goods. LIFO inventories constituted approximately 59 percent of the FIFO inventory value at December 31, 2010 and 2009.

Long-Lived Assets. Our management periodically evaluates the net realizable value of long-lived assets, including property, plant and equipment, based on a number of factors including operating results, projected future cash flows and business plans. We record long-lived assets at the lower of cost or fair value, with fair value based on assumptions concerning the amount and timing of estimated future cash flows. Since judgment is involved in determining the fair value of fixed assets, there is a risk that the carrying value of our long-lived assets may be overstated.

Goodwill. Goodwill is not amortized but is assessed for impairment at least on an annual basis. In making this assessment, management relies on various factors, including operating results, estimated future cash flows, and business plans. There are inherent uncertainties related to these factors and in our management's judgment in applying them to the analysis of goodwill impairment. Because management's judgment is involved in performing goodwill impairment analyses, there is risk that the carrying value of goodwill is overstated.

Goodwill valuations are performed using an average of actual and projected operating results of the relevant reporting units. Changes in economic and operating conditions impacting these assumptions could result in goodwill impairments in future periods. Additionally, disruptions to our business such as prolonged recessionary periods or unexpected significant declines in operating results of the relevant reporting units could result in charges for goodwill and other asset impairments in future periods.

Deferred Tax Assets. At December 31, 2010 our balance sheet included \$64.7 million of deferred tax assets, net of an \$11.4 million valuation allowance. We have determined that this valuation allowance is required for our deferred tax assets based on future earnings projections. To the extent that we encounter unexpected difficulties in market conditions, adverse changes in regulations affecting our businesses and operations, adverse outcomes in legal and environmental matters, or any other unfavorable conditions, the projections for future taxable income may be overstated and we may be required to record an increase in the valuation allowance related to these deferred tax assets which could have a material adverse effect on income in the future.

Accrued Insurance. We are insured for property, casualty and workers' compensation insurance up to various stop loss amounts after meeting required retention levels. Losses are accrued based upon estimates of the liability for the related retentions for claims incurred using certain actuarial assumptions followed in the insurance industry and based on our experience. In the event we incur a significant number of losses beyond the coverage retention limits, additional expense beyond the actuarial projections would be required.

Asset Retirement Obligations. We measure asset retirement obligations based upon the applicable accounting guidance, using certain assumptions including estimates regarding the recovery of residues in storage tanks. In the event that operational or regulatory issues vary from our estimates, we could incur additional significant charges to income and increases in cash expenditures related to the disposal of those residues.

Pension and Postretirement Benefits. Accounting for pensions and other postretirement benefits involves estimating the cost of benefits to be provided far into the future and allocating that cost over the time period each employee works. This calculation requires extensive use of assumptions regarding inflation, investment returns, mortality, medical costs, employee turnover and discount rates. In determining the expected return on plan assets assumptions, we evaluate long-term actual return information, the mix of investments that comprise plan assets and estimates of future investment returns. In selecting rates for current and long-term health care assumptions, we take into consideration a number of factors including our actual health care cost increases, the design of our benefit programs, the characteristics of our active and retiree populations and expectations of inflation rates. Because these items require our management's judgment, the related liabilities currently recorded by us could be lower or higher than amounts ultimately required to be paid.

Litigation and Contingencies. We record liabilities related to legal matters when an adverse outcome is probable and reasonably estimable. To the extent we anticipate favorable outcomes to these matters which ultimately result in adverse outcomes, we could incur material adverse impacts on earnings and cash flows. Because such matters require significant judgments on the part of management, the recorded liabilities could be lower than what is ultimately required.

Environmental Liabilities. We are subject to federal, state, local and foreign laws and regulations and potential liabilities relating to the protection of the environment and human health and safety, including, among other things, the cleanup of contaminated sites, the treatment, storage and disposal of wastes, the discharge of effluent into waterways, the emission of substances into the air and various health and safety matters. We expect to incur substantial costs for ongoing compliance with such laws and regulations. We may also incur costs as a result of governmental or third-party claims, or otherwise incur costs, relating to cleanup of, or for injuries resulting from, contamination at sites associated with past and present operations. We accrue for environmental liabilities when a determination can be made that they are probable and reasonably estimable.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Like other global companies, we are exposed to market risks relating to fluctuations in interest rates and foreign currency exchange rates. The objective of our financial risk management is to minimize the negative impact of interest rate and foreign exchange rate fluctuations on our earnings, cash flows and equity.

To manage the interest rate risks, we use a combination of fixed and variable rate debt. This reduces the impact of short-term fluctuations in interest rates. To manage foreign currency exchange rate risks, we enter into foreign currency debt instruments that are held by our foreign subsidiaries. This reduces the impact of fluctuating currencies on net income and equity. We also use forward exchange contracts to hedge firm commitments up to twelve months and all such contracts are marked to market with the recognition of a gain or loss at each reporting period.

The following analyses present the sensitivity of the market value, earnings and cash flows of our financial instruments and foreign operations to hypothetical changes in interest and exchange rates as if these changes occurred at December 31, 2010 and 2009. The range of changes chosen for these analyses reflects our view of changes which are reasonably possible over a one-year period. Market values are the present values of projected future cash flows based on the interest rate and exchange rate assumptions. These forward-looking statements are selective in nature and only address the potential impacts from financial instruments and foreign operations. They do not include other potential effects that could impact our business as a result of these changes.

Interest Rate and Debt Sensitivity Analysis. Our exposure to market risk for changes in interest rates relates primarily to our debt obligations. We have fixed variable rate debt and the ability to incur variable rate debt under the Koppers Inc. credit agreement.

At December 31, 2010 we had \$296.4 million of fixed rate debt and at December 31, 2009, we had \$295.3 million of fixed rate debt and \$40.0 million of variable rate debt. Our ratio of variable rate debt to fixed rate debt at December 31, 2009 was approximately 12 percent. For fixed rate debt, interest rate changes affect the fair market value but do not impact earnings or cash flows. For variable rate debt, interest rate changes generally do not affect the fair market value but do impact future earnings and cash flows, assuming other factors are held constant.

Holding other variables constant (such as debt levels and foreign exchange rates), a one percentage point decrease in interest rates at December 31, 2010 and 2009 would have increased the unrealized fair market value of the fixed rate debt by approximately \$25.6 million and \$21.7 million, respectively.

Exchange Rate Sensitivity Analysis. Our exchange rate exposures result primarily from our investment and ongoing operations in Australia, Denmark, China and the United Kingdom. Holding other variables constant, if there were a ten percent reduction in all relevant exchange rates, the effect on our earnings, based on actual earnings from foreign operations for the years ended December 31, 2010 and 2009, would be reductions of approximately \$4.4 million and \$2.8 million, respectively.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Koppers Holdings Inc. is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States of America.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Management has assessed the effectiveness of Koppers Holdings Inc.'s internal control over financial reporting as of December 31, 2010. In making this assessment, management has utilized the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control – Integrated Framework*. Management concluded that based on its assessment, Koppers Holdings Inc.'s internal control over financial reporting was effective as of December 31, 2010.

The effectiveness of Koppers Holdings Inc.'s internal control over financial reporting as of December 31, 2010, has been audited by Ernst & Young LLP, the independent registered public accounting firm that also audited the consolidated financial statements included in this annual report, as stated in their attestation report which appears on page 45.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Koppers Holdings Inc.:

We have audited the accompanying consolidated balance sheets of Koppers Holdings Inc. as of December 31, 2010 and 2009, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2010. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Koppers Holdings Inc. at December 31, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Koppers Holdings Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 22, 2011 expressed an unqualified opinion thereon.

/s/ ERNST & YOUNG LLP

Pittsburgh, Pennsylvania
February 22, 2011

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Koppers Holdings Inc.:

We have audited Koppers Holdings Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Koppers Holdings Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying "Management's Report on Internal Control Over Financial Reporting". Our responsibility is to express an opinion on the effectiveness of the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Koppers Holdings Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Koppers Holdings Inc. as of December 31, 2010 and 2009, and the related consolidated statements of operations, comprehensive income, stockholders' equity and cash flows for each of the three years in the period ended December 31, 2010 of Koppers Holdings Inc. and our report dated February 22, 2011 expressed an unqualified opinion thereon.

The accompanying notes are an integral part of these consolidated financial statements.

KOPPERS HOLDINGS INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Description of Business

Parent company of Koppers Inc. – In these financial statements, unless otherwise indicated or the context requires otherwise, when the terms “Koppers,” the “Company,” “we,” “our” or “us,” are used, they mean Koppers Holdings Inc. (“Koppers Holdings”) and its subsidiaries on a consolidated basis. The use of these terms is not intended to imply that Koppers Holdings and Koppers Inc. are not separate and distinct legal entities. Koppers Holdings has no direct operations and no significant assets other than the stock of Koppers Inc. It depends on the dividends from the earnings of Koppers Inc. and its subsidiaries to generate the funds necessary to meet its financial obligations. The terms of Koppers Inc.’s revolving credit facility prohibit Koppers Inc. from paying dividends and otherwise transferring assets except for certain limited dividends. Further, the terms of the indenture governing Koppers Inc.’s Senior Notes significantly restrict Koppers Inc. from paying dividends and otherwise transferring assets to Koppers Holdings.

Business description – The Company is a global integrated producer of carbon compounds and treated and untreated wood products and services for use in a variety of markets including the aluminum, railroad, specialty chemical, utility, rubber, concrete and steel industries. The Company’s business is operated through two business segments, Carbon Materials & Chemicals and Railroad & Utility Products.

The Company’s Carbon Materials & Chemicals segment is primarily a manufacturer of carbon pitch, naphthalene, phthalic anhydride, creosote, carbon black feedstock and carbon black. Carbon pitch is a critical raw material used in the production of aluminum and for the production of steel in electric arc furnaces. Naphthalene is used for the production of phthalic anhydride and as a surfactant in the production of concrete. Phthalic anhydride is used in the production of plasticizers, polyester resins and alkyd paints. Creosote is used in the treatment of wood and carbon black feedstock is used in the production of carbon black. Carbon black is used primarily in the production of rubber tires.

The Company’s Railroad & Utility Products segment sells treated and untreated wood products, rail joint bars and services primarily to the railroad industry and treated wood products to the utility industry. Railroad products include procuring and treating items such as crossties, switch ties and various types of lumber used for railroad bridges and crossings and the manufacture of rail joint bars. Utility products include transmission and distribution poles and pilings. The segment also produces concrete crossties through a joint venture.

2. Summary of Significant Accounting Policies

Basis of presentation – The consolidated financial statements include the accounts of the Company and all majority-owned subsidiaries for which the Company is deemed to exercise control over its operations. All significant intercompany transactions have been eliminated in consolidation. The Company’s investments in 20 percent to 50 percent-owned companies in which it has the ability to exercise significant influence over operating and financial policies are accounted for using the equity method of accounting. Accordingly, the Company’s share of the earnings of these companies is included in the accompanying consolidated statement of operations.

Use of estimates – Accounting principles generally accepted in the U.S. require management to make estimates and judgments that affect the reported amounts of assets and liabilities and the disclosure of contingencies on the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Estimates have been prepared on the basis of the most current and best available information and actual results could differ materially from these estimates.

Foreign currency translation – For consolidated entities outside of the U.S. that prepare financial statements in currencies other than the U.S. dollar, results of operations and cash flows are translated at average exchange rates during the period, and asset and liabilities are translated at end-of-period exchange rates. Cumulative translation adjustments are included as a separate component of accumulated other comprehensive loss in stockholders’ equity. Amounts credited (charged) to cumulative translation adjustments for intercompany loans totaled \$7.2 million in 2010, \$12.7 million in 2009 and \$(12.0) million in 2008.

Foreign currency transaction gains and losses result from transactions denominated in a currency which is different than the currency used by the entity to prepare its financial statements. Foreign currency transaction (losses) gains were \$(2.3) million, \$(1.9) million and \$1.8 million for the years ended December 31, 2010, 2009 and 2008, respectively.

Revenue recognition – The Company recognizes revenue when the risks and rewards of ownership and title to the product have transferred to the customer. Revenue recognition generally occurs at the point of shipment; however in certain circumstances as shipping terms dictate, revenue is recognized at the point of destination. Shipping and handling costs are included as a component of cost of sales.

The Company recognizes revenue related to the procurement of certain untreated railroad crossties upon transfer of title to the customer, which occurs upon delivery to the Company's plant and acceptance by the customer. Service revenue, consisting primarily of wood treating services, is recognized at the time the service is provided. Payment on sales of untreated railroad crossties and wood treating services are generally due within 30 days of the invoice date. The Company's recognition of revenue with respect to untreated crossties meets all the recognition criteria of Securities and Exchange Commission Staff Accounting Bulletin Topic 13.A.3., including transfer of title and risk of ownership, the existence of fixed purchase commitments and delivery schedules established by the customer, and the completion of all performance obligations by the Company. Revenue recognized for untreated crosstie sales for the years ended December 31, 2010, 2009 and 2008 amounted to \$106.4 million, \$119.1 million and \$98.9 million, respectively.

Research & development – Research and development costs are expensed as incurred and are included in selling, general and administrative expenses. These costs totaled \$2.1 million in 2010, \$2.0 million in 2009 and \$2.8 million in 2008.

Cash and cash equivalents – Cash and cash equivalents include cash on hand and on deposit and investments in highly liquid investments with an original maturity of 90 days or less.

Restricted cash – Restricted cash includes cash that is required to be held on deposit by a bank and is not available for immediate withdrawal.

Accounts receivable – The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. In circumstances where the Company becomes aware of a specific customer's inability to meet its financial obligations to Koppers, a specific reserve for bad debts is recorded against amounts due. If the financial condition of the Company's customers were to deteriorate, resulting in an inability to make payments, additional allowances may be required.

Inventories – Inventories are carried at lower of cost or market on a worldwide basis. In the U.S., inventory cost (excluding miscellaneous types of inventory) is determined primarily utilizing the last-in, first-out ("LIFO") basis. Inventory cost outside the U.S. is determined utilizing the first-in, first-out ("FIFO") basis. Market represents replacement cost for raw materials and net realizable value for work in process and finished goods. LIFO inventories constituted approximately 59 percent and 63 percent of the FIFO inventory value at December 31, 2010 and 2009, respectively.

Property, plant & equipment – Property, plant and equipment are recorded at purchased cost and include improvements which significantly increase capacities or extend useful lives of existing plant and equipment. Depreciation expense is calculated by applying the straight-line method over estimated useful lives. Estimated useful lives for buildings generally range from 10 to 20 years and depreciable lives for machinery and equipment generally range from 3 to 10 years. Net gains and losses related to asset disposals are recognized in earnings in the period in which the disposal occurs. Routine repairs, replacements and maintenance are expensed as incurred.

The Company periodically evaluates whether current facts and circumstances indicate that the carrying value of its depreciable long-lived assets may not be recoverable. If an asset, or logical grouping of assets, is determined to be impaired, the asset is written down to its fair value using discounted future cash flows and, if available, quoted market prices.

Goodwill & other intangible assets – Goodwill and other purchased intangible assets are included in the identifiable assets of the business segment to which they have been assigned. The Company performs impairment tests annually for goodwill, and more often as circumstances require. When it is determined that impairment has occurred, an appropriate charge to earnings is recorded. The Company performed its annual impairment test in the fourth quarters of 2010 and 2009 and determined that the estimated fair values substantially exceeded the carrying values of all the reporting units and accordingly, there was no impairment of goodwill.

Identifiable intangible assets, other than goodwill, are recorded at cost. Identifiable intangible assets that do not have indefinite lives are amortized on a straight-line basis over their estimated useful lives.

Deferred income taxes – Deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. The effect on deferred tax assets and liabilities of a change in tax laws is recognized in earnings in the period the new laws are enacted. A valuation allowance is recorded to reduce the carrying amounts of deferred tax assets unless it is more likely than not that such assets will be realized. Deferred tax liabilities have not been recognized for the undistributed earnings of certain foreign subsidiaries because management intends to permanently reinvest such earnings in foreign operations.

Self-insured liabilities – The Company is self-insured for property, casualty and workers' compensation exposures up to various stop-loss coverage amounts. Losses are accrued based upon the Company's estimates of the liability for the related deductibles of claims incurred. Such estimates utilize actuarial methods based on various assumptions, which include but are not limited to, the Company's historical loss experience and projected loss development factors. In 2010 and 2009, reversals of self-insured liabilities occurred as a result of favorable loss trends related to self-insured claims.

	2010	2009
<i>(Dollars in millions)</i>		
Self-insured liabilities at beginning of year	\$12.1	\$11.9
Expense	2.5	3.2
Reversal of self-insured liabilities	(4.5)	(1.6)
Cash expenditures	(2.2)	(1.4)
Self-insured liabilities at end of year	<u>\$ 7.9</u>	<u>\$12.1</u>

Derivative financial instruments – The Company uses forward exchange contracts to hedge exposure to currency exchange rate changes on transactions and other commitments denominated in a foreign currency. Contracts are generally written on a short-term basis and are not held for trading or speculative purposes. The Company recognizes the fair value of the forward contracts as an asset or liability at each reporting date. Because the Company has not elected to designate the forward exchange contracts for hedge accounting treatment, changes in the fair value of the forward exchange contracts are recognized immediately in earnings.

During 2004, the Company entered into an interest rate swap agreement to convert the fixed rate on a portion (\$50.0 million) of Koppers Inc.'s Senior Secured Notes to a floating rate based on six-month LIBOR rates plus a specified spread. On October 15, 2009 and concurrent with the redemption of the Senior Secured Notes, the swap was terminated which resulted in a gain of \$1.6 million. The swap agreement required semiannual cash settlements of interest paid or received. The differential between the interest paid or interest received from semi-annual settlements were recorded as an adjustment to interest expense. The effect of the swap for the year ended December 31, 2009, including the gain on termination, was a decrease in interest expense of approximately \$2.3 million. For the year ended December 31, 2008, the effect of the swap decreased interest expense by approximately \$0.3 million.

The swap hedged the Company's exposure related to changes in interest rates on the fair value of the Company's fixed rate debt. The swap was accounted for as a fair value hedge and has been determined to have no ineffectiveness as the critical terms of the swap were aligned with the hedged item. Any changes in the fair value of the swap were offset by an equal and opposite change in the fair value of the hedged item; therefore there was no net impact on reported earnings.

Asset retirement obligations – Asset retirement obligations are initially recorded at fair value and are capitalized as part of the cost of the related long-lived asset when sufficient information is available to estimate fair value. The capitalized costs are subsequently charged to depreciation expense over the estimated useful life of the related long-lived asset. The fair value of the obligation is determined by calculating the discounted value of expected future cash flows and accretion expense is recorded each month to ultimately increase this obligation to full value.

The Company recognizes asset retirement obligations for the removal and disposal of residues; dismantling of certain tanks required by governmental authorities; cleaning and dismantling costs for owned rail cars; and cleaning costs for leased rail cars and barges.

The following table describes changes to the Company's asset retirement obligation liabilities at December 31, 2010 and 2009:

	2010	2009
<i>(Dollars in millions)</i>		
Asset retirement obligation at beginning of year	\$16.6	\$16.2
Accretion expense	1.3	1.2
Revision in estimated cash flows	1.5	0.6
Cash expenditures	(2.4)	(1.6)
Acquisitions	0.3	0.0
Currency translation	(0.3)	0.2
Asset retirement obligation at end of year	\$17.0	\$16.6

Litigation & contingencies – Amounts associated with litigation and contingencies are accrued when management, after taking into consideration the facts and circumstances of each matter including any settlement offers, has determined that it is probable that a liability has been incurred and the amount of loss can be reasonably estimated.

Other current assets – Included in other current assets are prepaid expenses totaling \$7.6 million and \$5.0 million at December 31, 2010 and December 31, 2009, respectively.

Environmental liabilities – The Company accrues for remediation costs and penalties when the responsibility to remediate is probable and the amount of related cost is reasonably estimable. If only a range of potential liability can be estimated and no amount within the range is more probable than another, the accrual is recorded at the low end of that range. Remediation liabilities are discounted if the amount and timing of the cash disbursements are readily determinable.

Deferred revenue from extended product warranty liabilities – The Company defers revenues associated with extended product warranty liabilities based on historical loss experience and sales of extended warranties on certain products. The following table describes changes to the Company's deferred revenue at December 31, 2010 and 2009:

	2010	2009
<i>(Dollars in millions)</i>		
Deferred revenue at beginning of year	\$ 6.7	\$ 7.5
Deferred revenue for sales of extended warranties	0.0	0.3
Revenue earned	(1.0)	(1.1)
Deferred revenue at end of year	\$ 5.7	\$ 6.7

Stock-based compensation – The Company records compensation cost over the vesting period for share-based payments to employees at an amount equivalent to the grant date fair value of the stock award. No compensation cost is recognized for any stock awards that are forfeited in the event the recipient fails to meet the vesting requirements.

Reclassifications – Dividends to noncontrolling shareholders of \$5.0 million was reclassified from accrued liabilities to dividends payable in the consolidated balance sheet as of December 31, 2009.

3. Business Acquisitions

Koppers Netherlands – On March 1, 2010, the Company acquired 100 percent of the outstanding shares of privately-owned Cindu Chemicals B.V. ("Cindu"), a Dutch company which operates a 140,000 metric ton coal tar distillation plant in Uithoorn, Netherlands. Concurrent with the acquisition, the Company entered into a long-term tar supply agreement with Corus Staal, who supplies the majority of the Uithoorn plant's raw material requirements. The acquisition strengthens the Company's presence in Europe and increases the Company's ability to service its export markets. Cindu was subsequently renamed Koppers Netherlands B.V. ("Koppers Netherlands").

The acquired company contributed revenues of \$48.4 million and operating profit of \$0.8 million for the year ended December 31, 2010. Depreciation and amortization associated with Koppers Netherlands totaled \$1.2 million for the year ended December 31, 2010.

The acquisition was funded with cash on hand and the acquisition price was \$21.6 million. The identifiable assets acquired and liabilities assumed upon the acquisition of Koppers Netherlands are shown in the table below.

March 1, 2010

(Dollars in millions)

Cash and cash equivalents	\$ 2.1
Accounts receivable	6.5
Inventory	7.1
Other current assets	2.8
Property, plant and equipment	8.7
Intangibles	4.4
Goodwill	6.1
<hr/>	
Total assets acquired	37.7
Accounts payable	9.8
Accrued liabilities	3.0
Long-term debt	0.6
Deferred tax liability	2.2
Long-term liabilities	0.5
<hr/>	
Net assets acquired	\$21.6

All assets acquired and liabilities assumed were recorded at estimated fair value. Goodwill of \$6.1 million was allocated to the Carbon Materials & Chemicals segment and is not deductible for income tax purposes under Dutch law. Net assets acquired included intangible assets with respect to a coal tar supply agreement of \$2.9 million and customer relationships of \$0.7 million which will be amortized over a period of ten years and a favorable lease agreement of \$0.8 million which will be amortized over a period of three years. The intangible assets other than goodwill are classified in other assets in the consolidated balance sheet. Acquisition expenses were \$1.8 million and \$1.7 million for the years ended December 31, 2010 and 2009, respectively, and are charged to selling, general and administrative expenses.

Portec – On December 22, 2010, the Company acquired the rail joint bar business of Portec Rail Products, Inc. located in Huntington, West Virginia. The purchase price was cash of \$10.1 million and an estimated working capital adjustment payable of \$0.6 million. The preliminary allocation of purchase price to acquired assets consisted of inventory totaling \$7.1 million, plant and equipment totaling \$2.3 million and intangible assets consisting primarily of customer relationships totaling \$1.3 million.

Other acquisitions – On October 31, 2010, the Company acquired the midwestern United States refined tar business of Stella Jones Inc. for cash of \$5.8 million. The preliminary allocation of purchase price to acquired assets consisted of inventory totaling \$1.6 million and intangible assets consisting primarily of customer relationships totaling \$1.7 million and tax deductible goodwill of \$2.5 million. The goodwill is allocated to the Carbon Materials and Chemicals segment.

Pro-forma information – The consolidated pro forma results of operations if the acquisitions had been completed as of the beginning of the year in 2010 would have been pro forma revenue of \$1,280.4 million and operating profit of \$100.1 million for the year ended December 31, 2010. The consolidated pro forma results of operations if the acquisitions had been completed as of the beginning of the year in 2009 would have been revenues of \$1,191.9 million and operating profit of \$91.0 million for the year ended December 31, 2009.

4. Business Dispositions

Sale of Koppers Monessen Partners LP

On October 1, 2008, Koppers Inc. and a limited partner sold Koppers Monessen Partners LP (“Monessen”) to ArcelorMittal S.A. for cash of \$160.0 million plus working capital of \$10.0 million. Net cash proceeds, after deduction for the limited partner interest, taxes and transaction costs, were approximately \$100 million. The Company recognized an after-tax gain of

\$85.9 million in 2008 and an after-tax loss of \$0.3 million in 2009, the latter representing purchase price adjustments. Monessen is a metallurgical furnace coke facility that was 95 percent-owned by Koppers Inc. (which served as the general partner) and five percent-owned by a limited partner. Effective as of the end of the second quarter of 2008, Monessen was classified as a discontinued operation in the Company's statement of operations and earnings per share. Monessen was part of the Carbon Materials & Chemicals business segment.

Net sales and operating profit from discontinued operations for the year ended December 31, 2008 consist of the following amounts:

	<i>Year Ended December 31, 2008</i>
<i>(Dollars in millions)</i>	
Net sales	\$50.2
Operating profit	1.4
Diluted earnings per common share:	
Income from discontinued operations	\$0.21
Gain on sale of Koppers Arch	0.0
Gain on sale of Monessen	4.14
Earnings per common share – discontinued operations	\$4.35

5. Earnings and Dividends per Common Share

The computation of basic earnings per common share for the periods presented is based upon the weighted average number of common shares outstanding during the periods. The computation of diluted earnings per common share includes the effect of nonvested nonqualified stock options and restricted stock units assuming such options and stock units were outstanding common shares at the beginning of the period. The effect of antidilutive securities and performance restricted stock units that have not met vesting criteria are excluded from the computation of diluted earnings per common share.

The following table sets forth the computation of basic and diluted earnings per common share:

	<i>Year Ended December 31,</i>		
	<i>2010</i>	<i>2009</i>	<i>2008</i>
<i>(Dollars in millions, except share amounts, in thousands, and per share amounts)</i>			
Net income attributable to Koppers	\$ 44.1	\$ 18.8	\$ 138.0
Less: discontinued operations	(0.2)	(0.3)	90.3
Income from continuing operations attributable to Koppers	\$ 44.3	\$ 19.1	\$ 47.7
Weighted average common shares outstanding:			
Basic	20,543	20,446	20,651
Effect of dilutive securities	133	115	116
Diluted	20,676	20,561	20,767
Earnings per common share – continuing operations:			
Basic earnings per common share	\$ 2.15	\$ 0.93	\$ 2.31
Diluted earnings per common share	2.14	0.92	2.30
Other data:			
Antidilutive securities excluded from computation of diluted earnings per common share	154	103	97

On February 2, 2011, the board of directors declared a quarterly dividend of 22 cents per common share, payable on April 8, 2011 to shareholders of record as of February 14, 2011.

6. Stock-based Compensation

The amended and restated 2005 Long-Term Incentive Plan (the "LTIP") provides for the grant to eligible persons of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance awards, dividend equivalents and other stock-based awards, which are collectively referred to as the awards.

Under the LTIP, the board of directors granted restricted stock units and performance stock units to certain employee participants (collectively, the "stock units") each year starting in 2007. The restricted stock units vest on the third anniversary of the grant date, assuming continued employment by the participant. The performance stock units vest upon the attainment of the applicable performance objective at the end of a three-year period for some awards and at the end of a three year service period, provided that the applicable performance objective is attached over a two year period for other awards. The applicable performance objective is based upon a multi-year cumulative value creation calculation commencing on the first day of each grant year. The number of performance stock units granted represents the target award and participants have the ability to earn between zero and 150 percent of the target award based upon actual performance. If minimum performance criteria are not achieved, no performance stock units will vest. The performance stock units originally awarded in 2007 vested at 140 percent of target in March 2010 and resulted in a grant of 28,060 performance stock units above target.

Dividends declared on the Company's common stock during the restriction period of the stock units are credited at equivalent value as additional stock units and become payable as additional common shares upon vesting. In the event of termination of employment, other than retirement, death or disability, any nonvested stock units are forfeited, including additional stock units credited from dividends. In the event of termination of employment due to retirement, death or disability, pro-rata vesting of the stock units over the service period will result. There are special vesting provisions for the stock units related to a change in control.

Restricted stock units that vest immediately are also issued under the LTIP to members of the board of directors in connection with annual director compensation and, from time to time, are issued to members of management in connection with employee compensation.

Compensation expense for nonvested stock units is recorded over the vesting period based on the fair value at the date of grant. The fair value of stock units is the market price of the underlying common stock on the date of grant.

The following table shows a summary of the performance stock units as of December 31, 2010:

<i>Performance Period</i>	<i>Minimum Shares</i>	<i>Target Shares</i>	<i>Maximum Shares</i>
2008 – 2010	0	46,378	69,567
2009 – 2011	0	137,144	205,716
2010 – 2011	0	68,457	102,686

The following table shows a summary of the status and activity of nonvested stock awards for the year ended December 31, 2010:

	<i>Restricted Stock Units</i>	<i>Performance Stock Units</i>	<i>Total Stock Units</i>	<i>Weighted Average Grant Date Fair Value per Unit</i>
Nonvested at December 31, 2009	112,387	256,138	368,525	\$22.50
Granted	55,244	68,457	123,701	\$27.99
Credited from dividends	3,463	7,651	11,114	\$23.16
Performance share adjustment	0	28,060	28,060	\$25.75
Vested	(47,576)	(98,197)	(145,773)	\$25.98
Forfeited	(2,121)	(5,107)	(7,228)	\$17.51
Nonvested at December 31, 2010	121,397	257,002	378,399	\$23.31

Stock options to executive officers vest and become exercisable upon the completion of a three-year service period commencing on the grant date. The stock options have a term of 10 years. In the event of termination of employment, other than

retirement, death or disability, any nonvested options are forfeited. In the event of termination of employment due to retirement, death or disability, pro-rata vesting of the options over the service period will result. There are special vesting provisions for the stock options related to a change in control.

In accordance with accounting standards, compensation expense for unvested stock options is recorded over the vesting period based on the fair value at the date of grant. The fair value of stock options on the date of grant is calculated using the Black-Scholes-Merton model and the assumptions listed below for unvested stock options:

	August 2010 Grant	February 2010 Grant	February 2009 Grant	February 2008 Grant
Grant date price per share of option award	\$20.00	\$28.10	\$15.26	\$39.99
Expected dividend yield per share	2.50%	2.50%	2.50%	2.00%
Expected life in years	6.5	6.5	6.5	6.5
Expected volatility	62.00%	62.00%	51.00%	40.67%
Risk-free interest rate	3.05%	3.05%	2.05%	3.28%
Grant date fair value per share of option awards	\$ 9.82	\$13.81	\$ 6.19	\$14.79

The dividend yield is based on the Company's current and prospective dividend rate which calculates a continuous dividend yield based upon the market price of the underlying common stock. The expected life in years is based on the simplified method permitted under Securities and Exchange Commission Staff Accounting Bulletin No. 107 which calculates the average of the weighted vesting term and the contractual term of the option. This method was selected due to the lack of historical exercise data with respect to the Company. Expected volatility is based on the historical volatility of the Company's common stock and the historical volatility of certain other similar public companies. The risk-free interest rate is based on U.S. Treasury bill rates for the expected life of the option.

The following table shows a summary of the status and activity of stock options for the year ended December 31, 2010:

	Options	Weighted Average Exercise Price per Option	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in millions)
Outstanding at January 1, 2010	246,016	\$23.30		
Granted	61,460	\$27.77		
Exercised	(8,495)	\$15.26		\$0.1
Forfeited	(7,390)	\$17.25		
Outstanding at December 31, 2010	291,591	\$24.63	7.69	\$3.4
Exercisable at December 31, 2010	62,351	\$30.73	5.67	\$0.3

Total stock-based compensation expense recognized for the three years ended December 31, 2010 is as follows:

	Year Ended December 31,		
	2010	2009	2008
<i>(Dollars in millions)</i>			
Stock-based compensation expense recognized:			
Selling, general and administrative expenses	\$3.3	\$2.5	\$3.7
Less related income tax benefit	1.3	1.0	1.5
Decrease in net income attributable to Koppers	\$2.0	\$1.5	\$2.2

As of December 31, 2010, total future compensation expense related to non-vested stock-based compensation arrangements totaled \$3.8 million and the weighted-average period over which this expense is expected to be recognized is approximately 11 months.

7. Income Taxes

Income Tax Provision

Components of the Company's income tax provision are as follows:

	<i>Years Ended December 31,</i>		
	<i>2010</i>	<i>2009</i>	<i>2008</i>
<i>(Dollars in millions)</i>			
Current:			
Federal	\$10.0	\$(21.1)	\$13.2
State	0.4	0.1	0.8
Foreign	13.7	11.9	16.9
Total current tax provision (benefit)	24.1	(9.1)	30.9
Deferred:			
Federal	4.1	22.7	11.8
State	0.3	(0.7)	0.6
Foreign	0.6	0.9	(1.7)
Total deferred tax provision	5.0	22.9	10.7
Total income tax provision	\$29.1	\$ 13.8	\$41.6

Income before income taxes for 2010, 2009 and 2008 included \$48.7 million, \$42.4 million and \$53.3 million, respectively, from foreign operations.

The provision for income taxes is reconciled with the federal statutory rate as follows:

	<i>Years Ended December 31,</i>		
	<i>2010</i>	<i>2009</i>	<i>2008</i>
Federal income tax rate	35.0%	35.0%	35.0%
State income taxes, net of federal tax benefit	0.7	(1.2)	1.0
Foreign earnings taxed at different rates	2.6	5.2	10.1
Domestic production activities deduction	(0.7)	0.0	(1.2)
Non-deductible fines and penalties	0.0	1.1	0.8
Deferred tax adjustments	0.0	(0.9)	0.0
Change in tax contingency reserves	0.2	0.3	1.0
Other	1.7	(0.7)	(0.5)
	39.5%	38.8%	46.2%

The Company has not provided any U.S. tax on undistributed earnings of foreign subsidiaries or joint ventures that are reinvested indefinitely. For the year ended December 31, 2008, the Company provided deferred tax on 2008 unremitted earnings of its European subsidiaries. In 2010 and 2009, deferred taxes were not provided on unremitted European earnings as these earnings are permanently reinvested. At December 31, 2010 consolidated retained earnings of the Company included approximately \$100 million of undistributed earnings from these investments.

Koppers China Tax Holiday

As a result of being a Foreign Investment Enterprise in the manufacturing sector, the Company's 60 percent-owned joint venture in China is entitled to an income tax holiday under which it is exempted from corporate income tax for its first two profit making years (after deducting losses incurred in previous years), and is entitled to a 50 percent reduction in the corporate tax for the succeeding three years. The effect of the tax holiday on net income attributable to Koppers for the years ended December 31, 2008 was approximately \$0.4 million. The tax holiday expired on January 1, 2009.

Taxes Excluded from Net Income Attributable to Koppers

The amount of income tax (benefit) provision included in comprehensive income but excluded from net income attributable to Koppers relating to adjustments to reflect the unfunded status of employee post-retirement benefit plans is \$(0.7) million, \$2.4 million and \$(19.6) million for the years ended December 31, 2010, 2009 and 2008, respectively.

The amount of income tax benefit included in stockholders' equity but excluded from net income attributable to Koppers relating to the expense for restricted stock and employee stock options recognized differently for financial and tax reporting purposes was \$0.2 million, \$0.0 million and \$0.8 million for the years ended December 31, 2010, 2009 and 2008, respectively.

Deferred Tax Assets and Liabilities

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

Significant components of the Company's deferred tax assets and liabilities are as follows:

	December 31,	
	2010	2009
<i>(Dollars in millions)</i>		
Deferred tax assets:		
Pension and other postretirement benefits obligations	\$ 30.9	\$ 31.0
Reserves, including insurance, environmental and deferred revenue	12.0	11.6
Net operating loss benefit	10.6	9.7
Accrued employee compensation	8.6	4.2
Asset retirement obligations	4.9	5.0
Capital loss benefit	2.0	2.0
Book/tax inventory accounting differences	1.8	3.9
Excess tax basis on Koppers Australia assets	0.9	2.0
Other	4.4	3.2
Valuation allowance	(11.4)	(11.2)
Total deferred tax assets	64.7	61.4
Deferred tax liabilities:		
Tax over book depreciation and amortization	23.1	16.5
Unremitted earnings of foreign subsidiaries	5.9	6.4
Tax/book inventory accounting differences	1.9	0.9
Other	4.3	3.2
Total deferred tax liabilities	35.2	27.0
Net deferred tax assets	\$ 29.5	\$ 34.4

A valuation allowance is provided when it is more likely than not that some portion or all of the deferred tax assets will not be realized. At December 31, 2010, the Company has recorded a valuation allowance of \$9.4 million for certain state net operating loss carryforwards anticipated to produce no tax benefit. Additionally, the Company has recorded a valuation allowance of \$2.0 million for certain capital loss carryforwards expected to produce no benefit. The Company has a state net operating loss benefit of \$9.9 million, which will expire from 2011 to 2030.

Uncertain Tax Positions

The Company or one of its subsidiaries files income tax returns in U.S. federal jurisdiction, individual U.S. state jurisdictions and non-U.S. jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2005.

As of December 31, 2010, the total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate, was approximately \$3.5 million. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	December 31,		
	2010	2009	2008
<i>(Dollars in millions)</i>			
Balance at beginning of year	\$ 4.0	\$ 4.0	\$ 2.7
Additions based on tax provisions related to the current year	0.4	0.5	0.5
Additions for tax provisions of prior years	2.6	0.0	1.1
Reductions as a result of a lapse of the applicable statute of limitations	(0.5)	(0.5)	(0.3)
Balance at end of year	\$ 6.5	\$ 4.0	\$ 4.0

The Company recognizes interest expense and any related penalties from uncertain tax positions in income tax expense. For each year ended December 31, 2010, 2009 and 2008, the Company recognized \$0.2 million, \$0.1 million and \$0.3 million, respectively, in interest and penalties. As of December 31, 2010 and 2009, the Company had accrued approximately \$0.7 million for interest and penalties in both years.

8. Segment Information

The Company has two reportable segments: Carbon Materials & Chemicals and Railroad & Utility Products. The Company's reportable segments are business units that offer different products. The reportable segments are each managed separately because they manufacture and distribute distinct products with different production processes. The business units have been aggregated into two reportable segments since management believes the long-term financial performance of these business units is affected by similar economic conditions.

The Company's Carbon Materials & Chemicals segment is primarily a manufacturer of carbon pitch, naphthalene, phthalic anhydride, creosote, carbon black feedstock and carbon black. Carbon pitch is a critical raw material used in the production of aluminum and for the production of steel in electric arc furnaces. Naphthalene is used for the production of phthalic anhydride and as a surfactant in the production of concrete. Phthalic anhydride is used in the production of plasticizers, polyester resins and alkyd paints. Creosote is used in the treatment of wood and carbon black feedstock is used in the production of carbon black. Carbon black is used primarily in the production of rubber tires.

The Company's Railroad & Utility Products segment sells treated and untreated wood products, manufactured products and services primarily to the railroad and public utility markets. Railroad products include procuring and treating items such as crossties, switch ties and various types of lumber used for railroad bridges and crossings and the manufacture of rail joint bars. Utility products include transmission and distribution poles and pilings.

The Company evaluates performance and determines resource allocations based on a number of factors, the primary measure being operating profit or loss from operations. Operating profit does not include equity in earnings of affiliates, other income, interest expense or income taxes. Operating profit also excludes the operating costs of Koppers Holdings Inc., the parent company of Koppers Inc. The accounting policies of the reportable segments are the same as those described in the summary of significant accounting policies. Intersegment transactions are eliminated in consolidation.

Results of Segment Operations

	Year Ended December 31,		
	2010	2009	2008
<i>(Dollars in millions)</i>			
Revenues from external customers:			
Carbon Materials & Chemicals	\$ 795.6	\$ 655.2	\$ 892.0
Railroad & Utility Products	449.9	469.2	472.8
Total	\$1,245.5	\$1,124.4	\$1,364.8
Intersegment revenues:			
Carbon Materials & Chemicals	\$ 97.2	\$ 91.5	\$ 72.4
Depreciation & amortization:			
Carbon Materials & Chemicals	\$ 18.7	\$ 17.5	\$ 22.7
Railroad & Utility Products	9.4	7.3	7.3
Total	\$ 28.1	\$ 24.8	\$ 30.0
Operating profit:			
Carbon Materials & Chemicals	\$ 77.6	\$ 58.5	\$ 108.2
Railroad & Utility Products	23.0	38.2	24.3
Corporate ^(a)	(1.6)	(1.8)	(2.3)
Total	\$ 99.0	\$ 94.9	\$ 130.2
Capital expenditures (including acquisitions):			
Carbon Materials & Chemicals ^(b)	\$ 44.9	\$ 10.7	\$ 24.3
Railroad & Utility Products	20.2	8.5	13.8
Corporate	0.3	1.0	1.5
Total	\$ 65.4	\$ 20.2	\$ 39.6

^(a) Operating loss for Corporate includes general and administrative costs for Koppers Holdings Inc, the parent company of Koppers Inc.

^(b) Excludes capital expenditures by Koppers Monessen, a discontinued operation, of \$0.4 million in 2008.

Assets and Goodwill by Segment

	December 31,	
	2010	2009
<i>(Dollars in millions)</i>		
Assets:		
Carbon Materials & Chemicals	\$447.4	\$402.2
Railroad & Utility Products	154.8	141.3
Segment assets	602.2	543.5
Cash & cash equivalents	8.5	13.1
Income tax receivable	11.9	37.1
Deferred taxes	27.1	30.1
Deferred financing costs	9.1	10.0
Deferred charges	4.0	4.0
Other	6.4	6.6
Total	\$669.2	\$644.4
Goodwill:		
Carbon Materials & Chemicals	\$ 69.6	\$ 59.4
Railroad & Utility Products	2.5	2.2
Total	\$ 72.1	\$ 61.6

Revenues and Long-lived Assets by Geographic Area

	Year	Revenue	Long-lived assets
<i>(Dollars in millions)</i>			
United States	2010	\$ 672.5	\$157.1
	2009	649.1	149.1
	2008	723.6	153.6
Australasia	2010	276.9	79.8
	2009	239.4	73.4
	2008	261.8	63.9
Europe	2010	194.0	35.8
	2009	144.1	14.9
	2008	223.7	15.2
Other countries	2010	102.1	0.0
	2009	91.8	0.0
	2008	155.7	0.0
Total	2010	\$1,245.5	\$272.7
	2009	\$1,124.4	\$237.4
	2008	\$1,364.8	\$232.7

Revenues by geographic area in the above table are attributed by the destination country of the sale. Revenues from non U.S. countries totaled \$573.0 million in 2010, \$475.3 million in 2009 and \$641.2 million in 2008. Revenues from one customer of the Carbon Materials & Chemicals segment and one customer from the Railroad & Utility Products segment represented approximately 11 percent each of the Company's consolidated revenues in 2009.

Segment Revenues for Significant Product Lines

	Year Ended December 31,		
	2010	2009	2008
<i>(Dollars in millions)</i>			
Carbon Materials & Chemicals:			
Carbon pitch	\$ 325.6	\$ 302.9	\$ 401.6
Creosote and carbon black feedstock	104.4	76.3	119.1
Phthalic anhydride	93.9	67.3	101.6
Naphthalene	68.0	49.8	56.9
Carbon black	50.6	45.4	64.8
Other products	153.1	113.5	148.0
	795.6	655.2	892.0
Railroad & Utility Products:			
Railroad crossties	282.5	298.1	305.7
Utility poles	73.3	66.8	80.2
Creosote	57.9	60.6	42.4
Other products	36.2	43.7	44.5
	449.9	469.2	472.8
Total	\$1,245.5	\$1,124.4	\$1,364.8

9. Inventories

Inventories as of December 31, 2010 and 2009 were as follows:

	December 31,	
	2010	2009
<i>(Dollars in millions)</i>		
Raw materials	\$107.6	\$ 94.3
Work in process	7.6	8.3
Finished goods	95.0	94.9
	210.2	197.5
Less revaluation to LIFO	44.8	44.8
Net	\$165.4	\$152.7

For the year ended December 31, 2008 the Company recorded inventory lower of cost or market charges totaling \$3.9 million. For the years ended December 31, 2009 and 2008, liquidations of LIFO inventories increased operating profit by \$1.2 million and \$0.1 million, respectively.

10. Equity Investments

The Company holds two investments in unconsolidated companies. KSA Limited Partnership is a 50 percent owned concrete crosstie operation located in Portsmouth, Ohio. Tangshan Koppers Kailuan Carbon Chemical Company Limited ("TKK") commenced operation of a new tar distillation facility in the Hebei Province of China. The Company holds a 30 percent investment in TKK. Equity in earnings (losses) and total dividends received for the three years ended December 31, 2010 were as follows:

	Equity Income (loss)	Dividends Received
<i>(Dollars in millions)</i>		
2010	\$ 0.0	\$0.0
2009	(1.5)	0.5
2008	(0.6)	0.2

11. Property, Plant and Equipment

Property, plant and equipment as of December 31, 2010 and 2009 were as follows:

	December 31,	
	2010	2009
<i>(Dollars in millions)</i>		
Land	\$ 7.6	\$ 7.5
Buildings	36.5	29.3
Machinery and equipment	605.5	491.0
	649.6	527.8
Less accumulated depreciation	481.4	378.5
Net	\$168.2	\$149.3

Depreciation expense for the years ended December 31, 2010, 2009 and 2008 amounted to \$25.6 million, \$22.8 million and \$29.1 million, respectively. Included in depreciation expense for 2010 was an impairment charge, determined using a discounted cash flow method, of \$1.8 million related to a Railroad and Utility Products segment's wood treating plant in the United States. Included in depreciation expense for 2008 was an impairment charge of \$3.7 million related to the CM&C segment's glycerine refining plant in the United Kingdom.

12. Goodwill and Other Identifiable Intangible Assets

The change in the carrying amount of goodwill attributable to each business segment for the years ended December 31, 2010 and December 31, 2009 was as follows:

	Carbon Materials & Chemicals	Railroad & Utility Products	Total
<i>(Dollars in millions)</i>			
Balance at December 31, 2008	\$56.6	\$1.8	\$58.4
Currency translation	2.8	0.4	3.2
Balance at December 31, 2009	59.4	2.2	61.6
Acquisitions	8.6	0.0	8.6
Currency translation	1.6	0.3	1.9
Balance at December 31, 2010	\$69.6	\$2.5	\$72.1

The Company's identifiable intangible assets with finite lives are being amortized over their estimated useful lives and are summarized below:

	2010			December 31, 2009		
	Gross Carrying Amount	Accumulated Amortization	Net	Gross Carrying Amount	Accumulated Amortization	Net
<i>(Dollars in millions)</i>						
Customer contracts	\$13.2	\$5.9	\$ 7.3	\$ 9.6	\$5.3	\$4.3
Supply contracts	2.8	0.2	2.6	0.0	0.0	0.0
Favorable lease agreements	0.8	0.2	0.6	0.0	0.0	0.0
Non-compete agreements	1.2	1.2	0.0	1.2	1.2	0.0
Total	\$18.0	\$7.5	\$10.5	\$10.8	\$6.5	\$4.3

In 2010, the gross carrying value of identifiable intangible assets increased by \$7.4 million from acquisitions and decreased by \$0.2 million due to foreign currency translation. In 2009 the gross carrying value of the Company's intangible assets increased by \$0.3 million due to foreign currency translation. The customer contracts and supply contracts have estimated useful lives of 10 years and the favorable lease agreements and non-compete agreements have estimated useful lives of 3 years. Total amortization expense related to these identifiable intangible assets was \$1.2 million, \$0.8 million and \$0.9 million for the years ended December 31, 2010, 2009 and 2008, respectively. Estimated amortization expense for the next five years is summarized below:

	Estimated annual amortization
<i>(Dollars in millions)</i>	
2011	\$1.6
2012	1.6
2013	1.4
2014	1.3
2015	1.3

13. Debt

Debt at December 31, 2010 and December 31, 2009 was as follows:

	Weighted Average Interest Rate	Maturity	December 31,	
			2010	2009
<i>(Dollars in millions, except interest rates)</i>				
Revolving Credit Facility		2013	\$ 0.0	\$ 40.0
Senior Notes	7 7/8%	2019	295.3	295.0
Other debt, including capital leases	8%	Various	1.1	0.3
Total debt			296.4	335.3
Less short-term debt and current maturities of long-term debt			1.0	0.2
Long-term debt (excluding current portion)			\$295.4	\$335.1

Revolving Credit Facility

The Koppers Inc. revolving credit facility agreement provides for a revolving credit facility of up to \$300.0 million at variable rates. Borrowings under the revolving credit facility are secured by a first priority lien on substantially all of the assets of Koppers Inc. and its material domestic subsidiaries. The revolving credit facility contains certain covenants for Koppers Inc. and its restricted subsidiaries that limit capital expenditures, additional indebtedness, liens, dividends, investments or acquisitions. In addition, such covenants give rise to events of default upon the failure by Koppers Inc. and its restricted subsidiaries to meet certain financial ratios. Commitment fees totaled \$1.3 million in 2010, \$1.8 million in 2009 and \$0.6 million in 2008 and are charged to interest expense. The weighted average interest rate on this borrowing was 2.49 percent at December 31, 2009.

As of December 31, 2010, the Company had \$252.4 million of unused revolving credit availability for working capital purposes after restrictions from certain letter of credit commitments and other covenants. As of December 31, 2010, \$13.4 million of commitments were utilized by outstanding letters of credit.

Senior Notes

The Koppers Inc. 7 7/8 percent Senior Notes due 2019 (the "Senior Notes") were issued on December 1, 2009 at an offering price of 98.311 percent of face value, or \$294.9 million and have a principal amount at maturity of \$300.0 million. The Senior Notes have an effective interest rate yield of 8 1/8 percent per annum. The Senior Notes are unsecured senior obligations that are fully and unconditionally guaranteed by Koppers Holdings and certain of Koppers Inc.'s wholly-owned domestic subsidiaries. The Senior Notes are structurally subordinated to indebtedness under the revolving credit facility.

Interest on the Senior Notes is payable semiannually on December 1 and June 1 each year. On or after December 1, 2014, the Company is entitled to redeem all or a portion of the Senior Notes at a redemption price of 103.938 percent of principal value, declining annually in ratable amounts until the redemption price is equivalent to the principal value on December 1, 2017.

The indenture governing the Senior Notes includes customary covenants that restrict, among other things, the ability of Koppers Inc. and its restricted subsidiaries to incur additional debt, pay dividends or make certain other restricted payments, incur liens, merge or sell all or substantially all of the assets of Koppers Inc. or its subsidiaries or enter into various transactions with affiliates.

Loss on Extinguishment of Debt

All of the outstanding Koppers Inc. 9 7/8 percent Senior Secured Notes due 2013 (the "Senior Secured Notes") were redeemed on October 15, 2009. The Senior Secured Notes were guaranteed, jointly and severally, on a senior secured basis by certain of the Company's subsidiaries. The Senior Secured Notes were redeemed at a premium to principal value and accordingly, the Company realized a loss on extinguishment of debt totaling \$9.2 million consisting of \$6.1 million for bond premium and \$3.1 million for the write-off of deferred financing costs in 2009.

In 2008, the Company repurchased Senior Secured Notes with a face value of \$32.5 million. The Senior Secured Notes were repurchased at a discount to face value and accordingly, the Company realized a gain on extinguishment of debt totaling \$1.4 million consisting of \$2.1 million for bond discount partially offset by \$0.7 million for the write-off of deferred financing costs.

The Company had a notional \$50.0 million interest rate swap to convert a portion of the Senior Secured Notes from fixed-interest rate debt to floating-interest rate debt. On October 15, 2009 and concurrent with the redemption of the Senior Secured Notes, the swap was terminated which resulted in a gain of \$1.6 million which was recorded in interest expense.

All of the outstanding Koppers Holdings' 9 $\frac{7}{8}$ percent Senior Discount Notes due 2014 (the "Senior Discount Notes") were redeemed in December 2009 through a tender offer and call. The Senior Discount Notes had a principal amount \$203.0 million. The Senior Discount Notes were redeemed at a premium to principal value and accordingly, the Company in 2009 realized a loss on extinguishment of debt totaling \$13.2 million consisting of \$10.0 million for bond premium, \$2.6 million for the write-off of deferred financing costs and \$0.6 million for bond tender expenses.

Guarantees

The Company's 60-percent owned subsidiary in China has issued a guarantee of \$18.5 million in support of the Company's 30-percent investment in TKK. The guarantee relates to bank debt incurred by TKK which matures in August 2011 and is expected to be refinanced.

Debt Maturities and Deferred Financing Costs

At December 31, 2010 the aggregate debt maturities for the next five years are as follows:

<i>(Dollars in millions)</i>	
2011	\$ 1.0
2012	0.1
2013	0.0
2014	0.0
2015	0.0
Thereafter	300.0
Total maturities	301.1
Future accretion on Senior Notes	(4.7)
Total debt	\$296.4

Unamortized deferred financing costs (net of accumulated amortization of \$2.1 million and \$0.8 million at December 31, 2010 and 2009, respectively) were \$9.1 million and \$10.0 million at December 31, 2010 and 2009, respectively, and are included in other assets.

14. Leases

Future minimum commitments for operating leases having non-cancelable lease terms in excess of one year are as follows:

<i>(Dollars in millions)</i>	
2011	\$ 35.6
2012	27.1
2013	18.6
2014	8.0
2015	6.3
Thereafter	23.6
Total	\$119.2

Operating lease expense for 2010, 2009 and 2008 was \$42.5 million, \$41.5 million and \$39.0 million, respectively.

15. Pensions and Post-retirement Benefit Plans

The Company and its subsidiaries maintain a number of defined benefit and defined contribution plans to provide retirement benefits for employees in the U.S., as well as employees outside the U.S. These plans are maintained and contributions are made in accordance with the Employee Retirement Income Security Act of 1974 ("ERISA"), local statutory law or as determined by the board of directors. The defined benefit pension plans generally provide benefits based upon years of service and compensation. Pension plans are funded except for three domestic non-qualified defined benefit pension plans for certain key executives.

All qualified defined benefit pension plans for salaried employees have been closed to new participants and a number of plans, including some plans for hourly employees, have been frozen. Accordingly, these pension plans no longer accrue additional years of service or recognize future increases in compensation for benefit purposes. In addition, a number of pension plans are subject to a "soft" freeze which precludes new employees from entering the defined benefit pension plans.

The defined contribution plans generally provide retirement assets to employee participants based upon employer and employee contributions to the participant's individual investment account. The Company also provides retiree medical insurance coverage to certain U.S. employees and a life insurance benefit to most U.S. employees. For salaried employees, the retiree medical and retiree insurance plans have been closed to new participants.

Expense related to defined contribution plans totaled \$4.7 million, \$2.5 million and \$4.7 million for the years ended December 31, 2010, 2009 and 2008, respectively. Expense related to contributions to multi-employer pension plans totaled \$0.7 million for the year ended December 31, 2010.

Net periodic pension costs for 2010, 2009 and 2008 were as follows:

	Pension Benefits			Other Benefits		
	2010	2009	2008	2010	2009	2008
<i>(Dollars in millions)</i>						
Components of net periodic benefit cost:						
Service cost	\$ 3.1	\$ 2.8	\$ 3.1	\$ 0.2	\$ 0.2	\$ 0.2
Interest cost	11.4	10.8	11.7	0.7	0.8	0.8
Expected return on plan assets	(9.9)	(8.5)	(13.1)	0.0	0.0	0.0
Amortization of prior service cost	0.2	0.2	0.2	(0.1)	(0.3)	(0.3)
Amortization of net loss	5.2	6.3	0.8	0.0	0.0	0.0
Amortization of transition asset	(0.3)	(0.3)	(0.4)	0.0	0.0	0.0
Settlements and curtailments	0.5	0.0	0.2	0.0	0.0	0.0
Net periodic benefit cost	\$10.2	\$11.3	\$ 2.5	\$ 0.8	\$ 0.7	\$ 0.7

Net periodic pension cost (benefit) that is expected to be recognized from the amortization of prior service cost, net loss and transition asset is estimated to total \$0.1 million, \$7.0 million and \$(0.3) million, respectively, for all plans in 2011.

The change in the funded status of the pension and postretirement plans as of December 31, 2010 and December 31, 2009 is as follows:

	December 31,			
	Pension Benefits		Other Benefits	
	2010	2009	2010	2009
<i>(Dollars in millions)</i>				
Change in benefit obligation:				
Benefit obligation at beginning of year	\$201.9	\$176.9	\$ 13.6	\$ 13.6
Service cost	3.1	2.8	0.2	0.2
Interest cost	11.4	10.8	0.7	0.8
Plan participants' contributions	0.2	0.2	0.0	0.0
Actuarial (gains) losses	12.9	14.3	(0.5)	0.3
Plan amendments	0.0	0.0	0.0	0.0
Settlements	(2.4)	0.0	0.0	0.0
Curtailments	(1.1)	0.0	0.0	0.0
Currency translation	(0.7)	6.2	0.0	0.0
Benefits paid	(9.4)	(9.3)	(1.2)	(1.3)
Benefit obligation at end of year	215.9	201.9	12.8	13.6
Change in plan assets:				
Fair value of plan assets at beginning of year	132.8	113.4	0.0	0.0
Actual return on plan assets	14.3	20.8	0.0	0.0
Employer contribution	6.3	2.1	1.2	1.3
Plan participants' contributions	0.2	0.2	0.0	0.0
Settlements	(2.4)	0.0	0.0	0.0
Currency translation	(0.2)	5.6	0.0	0.0
Benefits paid	(9.4)	(9.3)	(1.2)	(1.3)
Fair value of plan assets at end of year	141.6	132.8	0.0	0.0
Funded status of the plan	\$ (74.3)	\$ (69.1)	\$(12.8)	\$(13.6)
Amounts recognized in the balance sheet consist of:				
Noncurrent assets	\$ 0.9	\$ 0.9	\$ 0.0	\$ 0.0
Current liabilities	0.6	0.4	1.3	1.3
Noncurrent liabilities	74.6	69.6	11.5	12.3
Pension plans with benefit obligations in excess of plan assets:				
Benefit obligation	\$208.1	\$193.3		
Fair value of plan assets	132.9	123.3		
Pension plans with accumulated benefit obligations in excess of plan assets:				
Accumulated benefit obligation	\$201.6	\$185.4		
Fair value of plan assets	132.9	123.3		

The measurement date for the U.S., Australian and United Kingdom pension and postretirement assets and obligations is December 31 for each respective year.

The accumulated benefit obligation for all defined benefit pension plans as of December 31, 2010 and 2009 was \$209.4 million and \$193.9 million, respectively.

Expected Contributions for the 2011 Fiscal Year

The expected contributions by the Company for 2011 are estimated to be \$14.0 million for pension plans and \$1.3 million for other benefit plans.

Projected Benefit Payments

Benefit payments for pension benefits, which are primarily funded by the pension plan assets, and other benefits, which are funded by general corporate assets and reflecting future expected service as appropriate, are expected to be paid as follows:

<i>(Dollars in millions)</i>	<i>Pension Benefits</i>		<i>Other Benefits</i>	
2011	\$11.3		\$1.3	
2012	11.0		1.3	
2013	10.5		1.2	
2014	11.4		1.2	
2015	11.6		1.2	
2016 – 2020	67.4		6.4	

Weighted-Average Assumptions as of December 31

	<i>December 31,</i>			
	<i>Pension Benefits</i>		<i>Other Benefits</i>	
	<i>2010</i>	<i>2009</i>	<i>2010</i>	<i>2009</i>
Discount rate	5.28%	5.89%	5.09%	5.74%
Expected return on plan assets	7.65	7.62		
Rate of compensation increase	3.10	3.15		
Initial medical trend rate			8.00	8.20

Basis for the Selection of the Long-Term Rate of Return on Assets

The long-term rate of return on assets assumption was determined by using the plan's asset allocation as described in the plan's investment policy and modeling a distribution of compound average returns over a 20-year time horizon. The model uses asset class return, variance, and correlation assumptions to produce the expected return. The return assumptions used forward looking gross returns influenced by the current bond yields, corporate bond spreads and equity risk premiums based on current market conditions.

In general, the long-term rate of return is the sum of the portion of total assets in each asset class multiplied by the expected return for that class, adjusted for expected expenses to be paid from the assets. To develop the expected long-term rate of return on assets assumption, the Company considered the historical returns and the future expectations for returns for each asset class, as well as the target asset allocation of the pension portfolio. This resulted in the selection of the 7.65 percent long-term rate of return on assets assumption.

Investment Strategy

The weighted average asset allocation for the Company's pension plans at December 31 by asset category is as follows:

	<i>December 31,</i>	
	<i>2010</i>	<i>2009</i>
Equity securities	67%	69%
Debt securities	27	27
Other	6	4
	100%	100%

The Company's investment strategy for its pension plans is to maintain an adequate level of diversification, to reduce interest rate and market risk and to provide adequate liquidity to meet immediate and future benefit payment requirements. The Company's overall investment strategy is to achieve a mix of growth seeking assets, principally U.S. and international public company equity securities and income generating assets, principally debt securities, real estate and cash. Currently, the Company targets an allocation of 50 percent to 75 percent growth seeking assets and 25 percent to 50 percent income generating assets. The Company utilizes investment managers to assist in identifying and monitoring investments that meet these allocation criteria.

The investment valuation policy of the Company is to value investments at fair value. Most of the assets are invested in pooled or commingled investment vehicles. The Company's interest in these investment vehicles is expressed as a unit of account with a value per unit that is the result of the accumulated values of the underlying investments. Equity securities are typically priced on a daily basis using the closing market price from the exchange the security is traded. Debt securities are typically priced on a daily basis by independent pricing services. The fair value of real estate investments are either priced through a listing on an exchange or are subject to periodic appraisals.

The pension assets are all substantially held in pooled or commingled investment vehicles. The following table sets forth by level, the Company's pension plan assets at fair value, within the fair value hierarchy, as of December 31, 2010 and December 31, 2009:

	As of December 31, 2010			Total
	Quoted prices in active markets for identical assets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	
<i>(Dollars in millions)</i>				
U.S. equity securities	\$0.0	\$ 70.3	\$0.0	\$ 70.3
International equity securities	0.0	25.3	0.0	25.3
U.S. debt securities	0.0	18.5	0.0	18.5
International debt securities	0.0	19.3	0.0	19.3
Real estate and other investments	0.0	1.6	0.0	1.6
Cash and cash equivalents	0.0	6.6	0.0	6.6
	\$0.0	\$141.6	\$0.0	\$141.6

	As of December 31, 2009			Total
	Quoted prices in active markets for identical assets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	
<i>(Dollars in millions)</i>				
U.S. equity securities	\$0.0	\$ 64.0	\$0.0	\$ 64.0
International equity securities	0.0	27.4	0.0	27.4
U.S. debt securities	0.0	17.8	0.0	17.8
International debt securities	0.0	17.7	0.0	17.7
Real estate and other investments	0.0	2.1	0.0	2.1
Cash and cash equivalents	0.0	3.8	0.0	3.8
	\$0.0	\$132.8	\$0.0	\$132.8

Health Care Cost Trend Rates

The 2010 initial health care cost trend rate is assumed to be eight percent and is assumed to decrease gradually to 4.5 percent in 2027 and remain at that level thereafter. The assumed health care cost trend rate has a significant effect on the amounts reported for other postretirement benefit liability. A one-percentage-point change in the assumed health care cost trend rate would have the following effects:

	1% Increase	1% Decrease
<i>(Dollars in millions)</i>		
Increase (decrease) from change in health care cost trend rates:		
Postretirement benefit expense	\$0.0	\$ 0.0
Postretirement benefit liability	0.4	(0.4)

Incentive Plan

The Company has short-term management incentive plans that pay cash bonuses if certain Company performance and individual goals are met. The charge to operating expense for these plans was \$5.0 million in 2010, \$4.5 million in 2009 and \$4.7 million in 2008.

16. Common Stock and Senior Convertible Preferred Stock

Changes in senior convertible preferred stock, common stock and treasury stock for the three years ended December 31, 2010 are as follows:

	<i>Year Ended December 31,</i>		
	2010	2009	2008
<i>(Shares in thousands)</i>			
Senior Convertible Preferred Stock:			
Balance at beginning and end of year	0	0	0
Common Stock:			
Balance at beginning of year	21,124	21,097	20,971
Issued for employee stock plans	154	27	126
Balance at end of year	21,278	21,124	21,097
Treasury Stock:			
Balance at beginning of year	(669)	(669)	(145)
Shares repurchased	(31)	0	(524)
Balance at end of year	(700)	(669)	(669)

Common Stock

In February 2008, the board of directors approved a \$75.0 million common stock repurchase program which expired in February 2010. During 2008, the Company repurchased \$20.7 million of common stock under the program. There were no repurchases under the program in 2010 and 2009.

17. Fair Value of Financial Instruments

Carrying amounts and the related estimated fair values of the Company's financial instruments as of December 31, 2010 and 2009 are as follows:

	December 31, 2010		December 31, 2009	
	Fair Value	Carrying Value	Fair Value	Carrying Value
<i>(Dollars in millions)</i>				
Financial assets:				
Cash and cash equivalents, including restricted cash	\$ 35.3	\$ 35.3	\$ 58.4	\$ 58.4
Short-term investments	0.0	0.0	4.4	4.4
Investments and other assets ^(a)	1.3	1.3	1.3	1.3
Financial liabilities:				
Long-term debt (including current portion)	\$324.5	\$296.4	\$344.8	\$335.3

(a) Excludes equity method investments.

Cash and short-term investments – The carrying amount approximates fair value because of the short maturity of those instruments.

Investments and other assets – Represents the broker-quoted cash surrender value on life insurance policies. The cash surrender value asset is classified as Level 2 in the valuation hierarchy and is measured from values received from the insuring entity.

Long-term debt – The fair value of the Company's long-term debt is estimated based on the market prices for the same or similar issues or on the current rates offered to the Company for debt of the same remaining maturities (Level 2). The fair values of the revolving credit facility approximate carrying value due to the variable rate nature of these instruments.

72

18. Commitments and Contingent Liabilities

Koppers Inc. and its subsidiaries are involved in litigation and various proceedings relating to environmental laws and regulations and toxic tort, product liability and other matters. Certain of these matters are discussed below. The ultimate resolution of these contingencies is subject to significant uncertainty and should the Company fail to prevail in any of these legal matters or should several of these legal matters be resolved against the Company in the same reporting period, these legal matters could, individually or in the aggregate, be material to the consolidated financial statements.

Legal Proceedings

Coal Tar Pitch Cases. Koppers Inc., along with other defendants, is currently a defendant in lawsuits filed in four states in which the plaintiffs claim they suffered a variety of illnesses (including cancer) as a result of exposure to coal tar pitch sold by the defendants. There are approximately 120 plaintiffs in 67 cases pending as of December 31, 2010 as compared to 112 plaintiffs in 62 cases at December 31, 2009. As of December 31, 2010, there are a total of 63 cases pending in state court in Pennsylvania, one case each pending in state courts in Tennessee and Illinois, and two cases pending in an Indiana state court.

The plaintiffs in all 67 pending cases seek to recover compensatory damages, while plaintiffs in 57 cases also seek to recover punitive damages. The plaintiffs in the 63 cases filed in Pennsylvania state court seek unspecified damages in excess of the court's minimum jurisdictional limit. The plaintiffs in the two cases filed in Indiana state court also seek damages in an unspecified amount. The plaintiffs in the Tennessee state court case each seek damages of \$15.0 million. The plaintiff in the Illinois state court case seeks compensatory damages in excess of \$50,000.

The other defendants in these lawsuits vary from case to case and include companies such as Beazer East, Inc., United States Steel Corporation, Honeywell International Inc., Vertellus Specialties Inc., Dow Chemical Company, Rust-Oleum Corporation, UCAR Carbon Company, Inc., Exxon Mobil Corporation, Chemtura Corporation, SGL Carbon Corporation, Alcoa, Inc., and PPG Industries, Inc. Discovery is proceeding in these cases.

The Company has not provided a reserve for these lawsuits because, at this time, the Company cannot reasonably determine the probability of a loss, and the amount of loss, if any, cannot be reasonably estimated. The timing of resolution of these cases

cannot be reasonably determined. Although Koppers Inc. is vigorously defending these cases, an unfavorable resolution of these matters may have a material adverse effect on the Company's business, financial condition, cash flows and results of operations. No trial dates have been set in any of these cases.

Somerville Cases. Koppers Inc. is currently defending five sets of state court cases in Texas (*Antu*, *Baade*, *Davis*, *Hensen* and *Moses*) involving approximately 109 plaintiffs who allegedly have worked or resided in Somerville, Texas, where Koppers Inc. has operated a wood treatment plant since 1995. Koppers Inc. has been named, but not served, as a defendant in another Texas state court case (*Asselin*) involving 11 plaintiffs who allegedly worked or resided in Somerville, Texas. These cases are pending in Bureson County, Texas, and Tarrant County, Texas. In addition to those Texas state court cases, Koppers Inc. is defending another state court case (*Gonzalez*) that is pending in the Circuit Court of Cook County, Illinois. The *Gonzalez* case initially involved 28 plaintiffs who allegedly worked or resided in Somerville, Texas. The court dismissed 23 of the *Gonzalez* plaintiffs' claims. Twenty-two of those plaintiffs filed an appeal, but the appeal has been dismissed for want of prosecution. The remaining five plaintiffs have voluntarily dismissed their claims. The BNSF Railway Company ("BNSF") has also been named as a defendant in these cases. The complaints allege that plaintiffs have suffered personal injuries (including death, in some cases) resulting from exposure to wood preservative chemicals used at the Somerville, Texas wood treatment plant. The complaints in the *Moses*, *Davis* and *Asselin* cases additionally allege that plaintiffs have suffered property damage.

The complaints seek to recover various damages for each plaintiff, including compensatory and punitive damages within the jurisdictional limits of the court for, among other things, bodily injuries, pain and mental anguish, emotional distress, medical monitoring, medical expenses, diminished earning capacity, permanent disability, physical impairment and/or disfigurement, loss of companionship and society, loss of consortium, devaluation of property, loss of use and enjoyment of personal property, loss of use and enjoyment of real property, property damage, property remediation costs, funeral and burial expenses and lost wages.

Currently, there are a total of 34 plaintiffs in the *Moses* cases. There are a total of ten plaintiffs in the *Antu* case, four of whom have claims pending against only the BNSF. There are a total of 46 plaintiffs in the *Hensen* case, two of whom have claims pending against only the BNSF. The *Davis* case involves one plaintiff. There are a total of 24 plaintiffs in the *Baade* case.

No cases pending against Koppers Inc. have discovery completion dates or trial dates.

The Company has not provided a reserve for these matters because, at this time, it cannot reasonably determine the probability of a loss, and the amount of loss, if any, cannot be reasonably estimated. The timing of resolution of these cases cannot be reasonably determined. Although Koppers Inc. is vigorously defending these cases, an unfavorable resolution of these matters may have a material adverse effect on the Company's business, financial condition, cash flows and results of operations.

Grenada – All Cases. Koppers Inc., together with various co-defendants (including Beazer East), has been named as a defendant in toxic tort lawsuits in federal court in Mississippi (see "Grenada – Federal Court Cases" below) and in state court in Mississippi (see "Grenada – State Court Cases" below) arising from the operation of the Grenada facility. The complaints allege that plaintiffs were exposed to harmful levels of various toxic chemicals, including creosote, pentachlorophenol, polycyclic aromatic hydrocarbons and dioxin, as a result of soil, surface water and groundwater contamination and air emissions from the Grenada facility. Based on the experience of Koppers Inc. in defending previous toxic tort cases, the Company does not believe that the damages sought by the plaintiffs in the state and federal court cases are supported by the facts of the cases.

Grenada – Federal Court Cases.

Beck Case – The complaint in this case was originally filed by approximately 110 plaintiffs. Pursuant to an order granting defendants' motion to sever, the court dismissed the claims of 98 plaintiffs in the Beck case without prejudice to their right to re-file their complaints. In December 2005, 94 of the 98 plaintiffs in the Beck case whose claims were dismissed re-filed their complaints. The plaintiffs in the 94 cases that were re-filed seek compensatory damages from the defendants of at least \$5.0 million for each of eight counts and punitive damages of at least \$10.0 million for each of three counts (in addition to damages in an unspecified amount for alleged trespass and nuisance). No discovery orders have been issued with respect to the 94 additional cases. The claims of eight of the 12 plaintiffs whose claims were not dismissed are still pending. The eight remaining plaintiffs seek compensatory damages from the defendants in an unspecified amount and punitive damages of \$20.0 million for each of four counts.

The first of these trials occurred in 2006 and, after an appeal, the court ultimately rendered a judgment in favor of Koppers Inc. In January 2010, the trial court granted summary judgment in favor of Koppers Inc. on all claims for the second trial plaintiff. A trial date was set for August 8, 2011 for the third trial plaintiff, but on August 5, 2010 the district court dismissed with prejudice that case as well as the next plaintiff after that who was scheduled to be tried. At this date no trial plaintiff has been selected for the next trial. On September 17, 2010, the Court ordered the parties to participate in mediation applicable for all of the Grenada cases, which was held on December 2, 2010.

Ellis Case – There are approximately 1,200 plaintiffs in this case. Each plaintiff seeks compensatory damages from the defendants of at least \$5.0 million for each of seven counts and punitive damages of at least \$10.0 million for each of three counts (in addition to damages in an unspecified amount for trespass and nuisance). The Ellis complaint also requests injunctive relief. These cases have been stayed and no trial dates have been scheduled pending the completion of the trials for the remaining eight plaintiffs in the Beck case. On October 15, 2010, the Court granted the plaintiff's motion to dismiss, with prejudice, nine of the Ellis claimants. Since then the Court has dismissed with prejudice an additional 69 claimants from either the Ellis or Beck litigation.

Grenada – State Court Cases. The state court cases were brought on behalf of approximately 200 plaintiffs in five counties in Mississippi. Each plaintiff seeks compensatory damages from the defendants of at least \$5.0 million for each of up to eight counts and punitive damages of at least \$10.0 million for each of three counts. Certain plaintiffs also seek damages for alleged trespass and private nuisance in unspecified amounts together with injunctive relief. The Mississippi Supreme Court ordered that the claims of the plaintiffs in the pending state court cases filed in counties other than Grenada County (approximately 110 cases) be severed and transferred to Grenada County. Plaintiffs' counsel attempted to transfer ten such cases to Grenada County, but all ten cases were dismissed by the Court in Grenada County. Plaintiffs' counsel has not attempted to transfer any additional cases to Grenada County and defendants have filed motions to dismiss the claims of the remaining plaintiffs in the four non-Grenada County cases, which motions remain pending. No trial dates have been scheduled in these cases.

74
With respect to the state court case that was originally filed in Grenada County, the plaintiffs filed 104 individual complaints in Grenada County. After dismissals and other procedural and substantive motions, one case filed in Grenada County remains pending. The Mississippi Supreme Court recently affirmed the entry of summary judgment in favor of Koppers Inc. based on the state statute of limitations in 40 of the cases, and an appeal is pending on the entry of summary judgment and the dismissal of 18 additional plaintiffs. No trial dates have been set in any of these cases.

Counsel for the plaintiffs in the Grenada state and federal cases and counsel for the Company engaged in a mediation on December 2, 2010. As a result of the mediation, a tentative settlement agreement has been reached with respect to all outstanding state and federal cases, except one case pending in state court. The terms of the definitive agreement have not yet been finalized and some claims may not be dismissed. In light of this agreement, the Company has included a charge with respect to the state and federal litigation in its financial statements.

With respect to the one state court case excluded from the above agreement, the Company has not provided a reserve because at this time, the Company cannot reasonably determine the probability of a loss, and the amount of loss, if any, cannot be reasonably estimated. The timing of resolution of this case cannot be reasonably determined. Although Koppers Inc. is vigorously defending this case, an unfavorable resolution of the case may have a material adverse effect on the Company's business, financial condition, cash flows and results of operations.

Gainesville. Koppers Inc. operated a utility pole treatment plant in Gainesville from 1988 until its closure late in 2009. The property upon which the utility pole treatment plant was located was sold by Koppers Inc. to Beazer East, Inc. in the first quarter of 2010. In April 2010, a class action complaint was filed in the United States District Court for the Northern District of Florida, by residents of Gainesville, Florida which named Koppers Inc., Beazer East and Cabot Corporation, Inc. as defendants. In October 2010, an amended class action complaint was filed which added the Company and Beazer Limited as defendants and dropped Cabot Corporation as a defendant. On December 6, 2010, the court denied class certification and on January 11, 2011 the plaintiffs' filed a notice to voluntarily dismiss the case. This motion was granted on January 18, 2011. The plaintiffs had alleged that their property has been contaminated by various toxic substances.

In November 2010, another class action complaint was filed in the Circuit Court of the Eighth Judicial Circuit located in Aluchua County, Florida by residential real property owners located in neighborhoods adjacent to the former utility pole treatment plant in Gainesville. The complaint named Koppers Inc., Beazer East and several other parties as defendants. The complaint alleges

that chemicals and contaminants from the plant have contaminated plaintiffs' properties, have caused property damage and have placed residents and owners of the properties at an elevated risk of exposure to the alleged chemicals. The complaint seeks damages for diminution in property values and injunctive relief. The case was removed to the United States District Court for the Northern District of Florida in December 2010, and plaintiffs have requested that the case be remanded back to state court.

The Company has not provided a reserve for this matter because, at this time, it cannot reasonably determine the probability of a loss, and the amount of loss, if any, cannot be reasonably estimated. The timing of resolution of this case cannot be reasonably determined. Although Koppers Inc. is vigorously defending this case, an unfavorable resolution of this matter may have a material adverse effect on the Company's business, financial condition, cash flows and results of operations.

Legal Reserves Rollforward. The following table reflects changes in the accrued liability for legal proceedings:

	<i>Year Ended December 31,</i>	
	<i>2010</i>	<i>2009</i>
<i>(Dollars in millions)</i>		
Balance at beginning of year	\$0.0	\$0.0
Accrual of reserves	3.0	0.0
Balance at end of year	\$3.0	\$0.0

Environmental and Other Litigation Matters

The Company and its subsidiaries are subject to federal, state, local and foreign laws and regulations and potential liabilities relating to the protection of the environment and human health and safety including, among other things, the cleanup of contaminated sites, the treatment, storage and disposal of wastes, the discharge of effluent into waterways, the emission of substances into the air and various health and safety matters. The Company's subsidiaries expect to incur substantial costs for ongoing compliance with such laws and regulations. The Company's subsidiaries may also face governmental or third-party claims, or otherwise incur costs, relating to cleanup of, or for injuries resulting from, contamination at sites associated with past and present operations. The Company accrues for environmental liabilities when a determination can be made that a liability is probable and reasonably estimable.

Environmental and Other Liabilities Retained or Assumed by Others. The Company's subsidiaries have agreements with former owners of certain of their operating locations under which the former owners retained, assumed and/or agreed to indemnify such subsidiaries against certain environmental and other liabilities. The most significant of these agreements was entered into at Koppers Inc.'s formation on December 29, 1988 (the "Acquisition"). Under the related asset purchase agreement between Koppers Inc. and Beazer East, subject to certain limitations, Beazer East retained the responsibility for and agreed to indemnify Koppers Inc. against certain liabilities, damages, losses and costs, including, with certain limited exceptions, liabilities under and costs to comply with environmental laws to the extent attributable to acts or omissions occurring prior to the Acquisition and liabilities related to products sold by Beazer East prior to the Acquisition (the "Indemnity"). Beazer Limited, the parent company of Beazer East, unconditionally guaranteed Beazer East's performance of the Indemnity pursuant to a guarantee (the "Guarantee"). In 1998, the parent company of Beazer East purchased an insurance policy under which the funding and risk of certain environmental and other liabilities relating to the former Koppers Company, Inc. operations of Beazer East (which includes locations purchased from Beazer East by Koppers Inc.) are underwritten by Centre Solutions (a member of the Zurich Group) and Swiss Re. Beazer East is a wholly-owned, indirect subsidiary of Heidelberg Cement AG. The Indemnity provides different mechanisms, subject to certain limitations, by which Beazer East is obligated to indemnify Koppers Inc. with regard to certain environmental, product and other liabilities and imposes certain conditions on Koppers Inc. before receiving such indemnification, including, in some cases, certain limitations regarding the time period as to which claims for indemnification can be brought. In July 2004, Koppers Inc. and Beazer East agreed to amend the environmental indemnification provisions of the December 29, 1988 asset purchase agreement to extend the indemnification period for pre-closing environmental liabilities through July 2019. As consideration for the amendment, Koppers Inc. paid Beazer East a total of \$7.0 million and agreed to share toxic tort litigation defense costs arising from any sites acquired from Beazer East. The July 2004 amendment did not change the provisions of the Indemnity with respect to indemnification for non-environmental claims, such as product liability claims, which claims may continue to be asserted after July 2019.

Qualified expenditures under the Indemnity are not subject to a monetary limit. Qualified expenditures under the Indemnity include (i) environmental cleanup liabilities required by third parties, such as investigation, remediation and closure costs, relating to pre-December 29, 1988, or Pre-Closing, acts or omissions of Beazer East or its predecessors; (ii) environmental claims by third parties for personal injuries, property damages and natural resources damages relating to Pre-Closing acts or omissions of Beazer East or its predecessors; (iii) punitive damages for the acts or omissions of Beazer East and its predecessors without regard to the date of the alleged conduct and (iv) product liability claims for products sold by Beazer East or its predecessors without regard to the date of the alleged conduct. If the third party claims described in sections (i) and (ii) above are not made by July 2019, Beazer East will not be required to pay the costs arising from such claims under the Indemnity. However, with respect to any such claims which are made by July 2019, Beazer East will continue to be responsible for such claims under the Indemnity beyond July 2019. The Indemnity provides for the resolution of issues between Koppers Inc. and Beazer East by an arbitrator on an expedited basis upon the request of either party. The arbitrator could be asked, among other things, to make a determination regarding the allocation of environmental responsibilities between Koppers Inc. and Beazer East. Arbitration decisions under the Indemnity are final and binding on the parties.

Contamination has been identified at most manufacturing and other sites of the Company's subsidiaries. Three sites currently owned and operated by Koppers Inc. in the United States are listed on the National Priorities List promulgated under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA"). Currently, at the properties acquired from Beazer East (which include all of the National Priorities List sites and all but one of the sites permitted under the Resource Conservation and Recovery Act ("RCRA")), a significant portion of all investigative, cleanup and closure activities are being conducted and paid for by Beazer East pursuant to the terms of the Indemnity. In addition, other of Koppers Inc.'s sites are or have been operated under RCRA and various other environmental permits, and remedial and closure activities are being conducted at some of these sites.

To date, the parties that retained, assumed and/or agreed to indemnify the Company against the liabilities referred to above, including Beazer East, have performed their obligations in all material respects. The Company believes that, for the last three years, amounts paid by Beazer East as a result of its environmental remediation obligations under the Indemnity have averaged in total approximately \$11 million per year. Periodically, issues have arisen between Koppers Inc. and Beazer East and/or other indemnitors that have been resolved without arbitration. Koppers Inc. and Beazer East engage in discussions from time to time that involve, among other things, the allocation of environmental costs related to certain operating and closed facilities.

If for any reason (including disputed coverage or financial incapability) one or more of such parties fail to perform their obligations and the Company or its subsidiaries are held liable for or otherwise required to pay all or part of such liabilities without reimbursement, the imposition of such liabilities on the Company or its subsidiaries could have a material adverse effect on its business, financial condition, cash flows and results of operations. Furthermore, the Company could be required to record a contingent liability on its balance sheet with respect to such matters, which could result in a negative adjustment to the Company's net worth.

Domestic Environmental Matters. Koppers Inc. has been named as a potentially responsible party (a "PRP") at the Portland Harbor CERCLA site located on the Willamette River in Oregon. Koppers Inc. has replied to an EPA Information request and has executed a PRP agreement which outlines the process to develop an allocation of past and future costs. The current estimate for past costs incurred in the remedial investigation/feasibility study is approximately \$100 million. Koppers Inc. currently operates a coal tar pitch terminal near the site. Koppers Inc. has accrued its estimated cost of participation in the PRP group. Separate from the EPA activities, a natural resources damages assessment is being conducted by a local trustee group. In September 2009, Koppers Inc. received a general notice letter notifying it that it may be a PRP at the Newark Bay CERCLA site. In January 2010, Koppers Inc. submitted a response to the general notice letter asserting that Koppers Inc. is a de minimus party at this site. Other than the estimated cost of participating in the PRP group at the Portland Harbor CERCLA site, the Company has not provided a reserve for these matters because, at this time, it cannot reasonably determine the probability of a loss, and the amount of loss, if any, cannot be reasonably estimated. An unfavorable resolution of these matters may have a material adverse effect on the Company's business, financial condition, cash flows and results of operations.

The Illinois Environmental Protection Agency (the "IEPA") has requested that Koppers Inc. conduct a voluntary investigation of soil and groundwater at its Stickney, Illinois carbon materials and chemicals facility. Koppers Inc. is also conducting an investigation of soil and groundwater at a leased terminal site located adjacent to the Stickney facility. Koppers Inc. is conducting such investigations in cooperation with Beazer East. The Company has provided a reserve for this matter totaling \$0.8 million as of December 31, 2010.

In August 2005, the Pennsylvania Department of Environmental Protection (the "PADEP") proposed a fine related to alleged water discharge exceedances from a storm water sewer pipe at the tar distillation facility of Koppers Inc. in Clairton, Pennsylvania. In July 2010, Koppers Inc. reached a final settlement of the fine with the PADEP and executed a consent order with the PADEP. Koppers Inc. also agreed to undertake certain engineering and capital improvements and agreed to contribute the capital improvements, primarily a new sewer line, to the city of Clairton. Accordingly, Koppers Inc. has provided a reserve of \$1.7 million related to the new sewer line and PADEP fine as of December 31, 2010. Koppers Inc. expects to complete construction of the sewer line in 2011.

Australian Environmental Matters. Soil and groundwater contamination has been detected at certain of the Company's Australian facilities. At the Company's tar distillation facility in Newcastle, New South Wales, Australia, soil contamination from an abandoned underground coal tar pipeline and other groundwater contamination have been detected at a property adjacent to the facility. In December 2006 the Company and the owner of the adjacent property reached an agreement in principle pursuant to which the Company will contribute \$1.9 million and the owner of the adjacent property will contribute \$6.8 million toward remediation of the property. Subject to the approval of a remediation action plan by local environmental authorities, the agreement in principle provides that the Company will assume responsibility for the management of the remediation effort and will indemnify the current owner for any remediation costs in excess of its agreed contribution. At the completion of the remediation, the agreement in principle provides that the property will be transferred to the Company. The Company has reserved its expected total remediation costs of \$1.9 million at December 31, 2010.

Other Australian environmental matters include soil and groundwater remediation at a number of current and former facilities in Australia. With respect to a closed facility in Thornton, Australia, the sale of the property was completed in March 2010 and the buyer assumed all remediation liability. Accordingly, the accrual for remediation at this site was reversed in 2010 and resulted in a decrease to cost of sales of \$2.9 million. The Company has reserved \$1.2 million for remediation costs at the remaining Australian sites.

Environmental Reserves Rollforward. The following table reflects changes in the accrued liability for environmental matters:

	<i>Year Ended December 31,</i>	
	<i>2010</i>	<i>2009</i>
<i>(Dollars in millions)</i>		
Balance at beginning of year	\$10.7	\$ 9.4
Expense	1.2	0.5
Reversal of reserves	(4.3)	0.0
Cash expenditures	(1.5)	(0.5)
Currency translation	0.5	1.3
Balance at end of year	\$ 6.6	\$10.7

19. Related Party Transactions

In connection with the issuance of the Senior Notes in December 2009, Walter W. Turner, President and Chief Executive Officer of Koppers Holdings Inc. and Koppers Inc., purchased \$500,000 aggregate principal amount of Senior Notes at the offering price of 98.311 percent, or \$491,555. The offering price for this purchase represents the same offering price paid by the purchasers for the remaining \$295.0 million of Senior Notes.

Schnader Harrison Segal & Lewis LLP provided counsel to the Company during 2008. Clayton A. Sweeney, a Director and shareholder of the Company at the time, was also of counsel to Schnader Harrison Segal & Lewis LLP. In 2008, the Company paid a total of \$0.1 million in legal fees to this firm.

20. Selected Quarterly Financial Data (Unaudited)

The following is a summary of the quarterly results of operations for the years ended December 31, 2010 and 2009:

	Year Ended December 31, 2010

(a) In the fourth quarter of 2009, the Company refinanced its Senior Secured Notes and Senior Discount Notes and incurred a loss on extinguishment of debt totaling \$22.4 million.

21. Subsidiary Guarantor Information for Koppers Inc. Senior Notes

On December 1, 2009, Koppers Inc. issued \$300.0 million principal value of Senior Notes. Koppers Holdings and each of Koppers Inc.'s wholly-owned material domestic subsidiaries other than Koppers Assurance, Inc. fully and unconditionally guarantee the payment of principal and interest on the Senior Notes. The domestic guarantor subsidiaries include World-Wide Ventures Corporation, Koppers Delaware, Inc., Koppers Concrete Products, Inc., Concrete Partners, Inc., and Koppers Asia LLC.

Separate condensed consolidating financial statement information for Koppers Holdings Inc. (the parent), Koppers Inc., domestic guarantor subsidiaries and non-guarantor subsidiaries as of December 31, 2010 and 2009 and for the years ended December 31, 2010, 2009 and 2008 is as follows:

22. Subsidiary Guarantor Information for Shelf Registration

Under a registration statement on Form S-3, Koppers Holdings may sell a combination of securities including common stock, debt securities, preferred stock, depository shares and warrants, from time to time in one or more offerings with an aggregate offering price of up to \$325 million. In addition, Koppers Inc. may sell debt securities from time to time under the registration statement. Debt securities may be fully and unconditionally guaranteed, on a joint and several basis, by Koppers Holdings, Koppers Inc. and/or other guarantor subsidiaries which will correspond to subsidiaries in the United States, Europe and Australia. The non-guarantor subsidiaries consist of certain subsidiaries in the United States, China and Mauritius. The guarantor subsidiaries that issue guarantees, if any, will be determined when a debt offering actually occurs under the registration statement and accordingly, the condensed consolidated financial information for subsidiary guarantors will be revised to identify the subsidiaries that actually provided guarantees.

Separate condensed consolidating financial statement information for the parent, Koppers Inc., domestic guarantor subsidiaries, foreign guarantor subsidiaries and non-guarantor subsidiaries as of December 31, 2010 and 2009 and for the years ended December 31, 2010, 2009 and 2008 is as follows:

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, have evaluated the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as of the end of the period covered by this report. Based on that evaluation, our chief executive officer and chief financial officer have concluded that these controls and procedures were effective as of the end of the period covered by this report.

(b) Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

See Management Report on page 43 for management's annual report on internal control over financial reporting. See Report of Independent Registered Public Accounting Firm on page 45 for Ernst & Young LLP's attestation report on internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information required by Item 401 of Regulation S-K with respect to directors is contained in our definitive Proxy Statement for our 2011 Annual Meeting of Shareholders (the "Proxy Statement") which we will file with the Securities and Exchange Commission, pursuant to Regulation 14A, not later than 120 days after the end of the Company's fiscal year under the caption "Proxy Item 1 – Proposal for Election of Directors", and is incorporated herein by reference.

The information required by this item concerning our executive officers is incorporated by reference herein from Part I of this report under "Executive Officers of the Company".

The information required by Item 405 of Regulation S-K is included in the Proxy Statement under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" and is incorporated herein by reference.

The information required by Item 407(d)(4) and Item 407(d)(5) of Regulation S-K is included in the Proxy Statement under the caption "Board Meetings and Committees" and is incorporated herein by reference.

The audit committee and our board have approved and adopted a Code of Business Conduct and Ethics for all directors, officers and employees and a Code of Ethics Applicable to Senior Officers, copies of which are available on our website at www.koppers.com and upon written request by our shareholders at no cost. We will describe the date and nature of any amendment to our Code of Business Conduct and Ethics or Code of Ethics Applicable to Senior Officers or any waiver (implicit or explicit) from a provision of our Code of Business Conduct and Ethics or Code of Ethics Applicable to Senior Officers within four business days following the date of the amendment or waiver on our Internet website at www.koppers.com. We do not intend to incorporate the contents of our website into this report.

ITEM 11. EXECUTIVE COMPENSATION

The information required by Item 11 is contained in the Proxy Statement under the caption "Executive Compensation" and "Committee Reports to Shareholders – Management Development and Compensation Committee Report" and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by Item 12 is contained Part II, Item 5 of this report under "Equity Compensation Plans" and in the Proxy Statement under the caption "Common Stock Ownership" and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by Item 13 is contained in the Proxy Statement under the caption "Transactions with Related Persons" and "Corporate Governance Matters – Director Independence" and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by Item 14 is contained in the Proxy Statement under the caption "Auditors" and is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) 1. Financial Statements

Financial statements filed as part of this report are included in "Item 8 – Financial Statements and Supplementary Data" as listed on the index on page 42.

(a) 2. Financial Statement Schedules

"Schedule II – Valuation and Qualifying Accounts and Reserves is included on page 97. All other schedules are omitted because they are not applicable or the required information is contained in the applicable financial statements of notes thereto.

(a) 3. Exhibits

CERTIFICATIONS

I, Walter W. Turner, certify that:

1. I have reviewed this annual report on Form 10-K of Koppers Holdings Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report of Koppers Holdings Inc. (the "Company") on Form 10-K for the year ended December 31, 2010, as filed with the Securities and Exchange Commission on the date hereof (the "Report"), each of the undersigned hereby certifies in his capacity as an officer of Koppers Holdings Inc., pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

A signed original of this written statement required by Section 906, or other document authenticating, acknowledging, or otherwise adopting the signature that appears in typed form within the electronic version of this written statement required by Section 906, has been provided to the Company and will be retained by the Company and furnished to the Securities and Exchange Commission or its staff upon request.
