

Inspiring Confidence

2010 Annual Report

Financial Summary

Years Ended December 31

2010 2009

(In thousands, except per-share data)

Net Income and Diluted Earnings Per Share

Net income (loss) as reported under generally accepted accounting principles (GAAP)	\$ 27,027	\$ (1,353)
After-tax effects of:		
(Gains) losses associated with plant shutdowns, asset impairments and restructurings	863	2,407
(Gains) losses from sale of assets and other	1,043	(2,720)
Goodwill impairment relating to aluminum extrusions business	—	30,559
Income from ongoing operations¹	\$ 28,933	\$ 28,893
Diluted earnings (loss) per share as reported under GAAP	\$.83	\$ (.04)
After-tax effects per diluted share of:		
(Gains) losses associated with plant shutdowns, asset impairments and restructurings	.03	.07
(Gains) losses from sale of assets and other	.03	(.08)
Goodwill impairment relating to aluminum extrusions business	—	.90
Diluted earnings per share from ongoing operations¹	\$.89	\$.85

Ongoing Operations

Film Products:

Net sales ²	\$520,445	\$455,007
Ongoing operating profit	71,184	64,379
Adjusted EBITDA ³	104,949	96,739
Depreciation and amortization	33,765	32,360
Capital expenditures	15,664	11,487

Aluminum Extrusions:

Net sales ²	199,639	177,521
Ongoing operating profit	(4,154)	(6,494)
Adjusted EBITDA ³	4,900	1,072
Depreciation and amortization	9,054	7,566
Capital expenditures	4,339	22,530

Other:

Net sales ²	2,579	—
Ongoing operating profit	(4,173)	—
Adjusted EBITDA ³	(3,478)	—
Depreciation and amortization	695	—
Capital expenditures	179	—

Financial Position and Other Data

Cash and cash equivalents	73,191	90,663
Debt outstanding	450	1,163
Shareholders' equity	417,546	429,072
Annualized dividends per share	.16	.16
Shares outstanding at end of period	31,883	33,888
Shares used to compute diluted earnings (loss) per share	32,572	33,861

Closing Market Price Per Share

High	\$ 20.19	\$ 18.68
Low	14.93	12.79
End of year	19.38	15.82

Our Vision

Inspiring confidence by delivering long-term value to all of our stakeholders by:

- Growing Profitably in our Target Markets
- Passionately Pursuing Operational Excellence, Innovation and Leadership
- Promoting Global Citizenship
- Embracing the Talents of our People

Dear Shareholders,

Inspiring Confidence. There's no higher praise from a shareholder, customer or employee than to have earned their confidence. And as you can see from the prior page of this Annual Report, it's our vision for Tredegar. We want our shareholders to be confident in what Tredegar is and what it can achieve. We want our customers to have confidence in our service and the quality of our products. And we want our employees to feel confident that Tredegar is an employer that will support their professional development and unleash their talents.

So, how do we fulfill that vision? Growing profitably in our target markets, passionately pursuing operational excellence, innovation and leadership, promoting global citizenship and embracing the talents of our people.

Growing Profitably in Our Target Markets. Volume growth has been a challenge for both our Film Products and Bonnell Aluminum businesses during the last few years. The economy certainly hasn't helped.

Bonnell's volume declined by almost 40% from 2007 to 2010 (although we did see a slight increase in 2010 volumes versus 2009). The commercial construction market had been a sweet spot for Bonnell until the latest down cycle. It looks like the decline in that market may have finally bottomed out, but no one is betting on a quick recovery for commercial construction in the U.S. And whether that market will ever return to its heyday is anybody's guess.

During 2010, Bonnell's leadership launched a strategic growth initiative to identify new, attractive markets that would value Bonnell's service and quality. In other words, we are looking for a few more sweet spots. We may need to broaden our capabilities to participate in those markets, and we are committed to doing just that for the right market opportunity. This will be an important activity for Bonnell during 2011.

Meanwhile, Bonnell will continue to pursue new customers and opportunities created by its new large press at the Carthage, Tennessee plant. That press is fully operational, and we are confident that its capability to produce quality extrusions for the commercial construction market is unmatched.

Film Products experienced a second consecutive year of volume growth. In particular, our surface protection business had its strongest year yet in both volume and revenues. We experienced some encouraging growth in other markets too, due to new product introductions.

Film Products is committed to continued growth in its current markets. The personal care market has been an important market for Films for over 30 years and transformed us into a global company. Another critical part of Films' strategy, however, is to identify other attractive markets where we can emerge as a leader. Our success in surface protection, a small contributor to Films just five years ago, gives us the confidence that we can succeed in that strategy. A refocused and augmented upstream research and development organization will play a critical role in the pursuit of new markets as will our dedicated business development efforts.

Business development is an important part of our overall growth strategy, so we will continue to evaluate opportunities for growth within and outside of Film Products and Bonnell. While our newest businesses, Bright View Technologies and Falling Springs, are in early stages, they each participate in markets poised for significant growth. Our good cash flow and strong balance sheet provide us the flexibility to pursue external growth. I have complete confidence in the strength and ability of Tredegar's management team to execute upon the right opportunities.

Passionately Pursuing Operational Excellence, Innovation and Leadership. Last year's shareholders' letter was devoted to these crucial building blocks, so I won't repeat that letter here. It is important to highlight though, that one year later, Operational Excellence, Innovation and Leadership are even more firmly embedded in Tredegar's culture. Operational Excellence, Innovation and Leadership are the reasons that Bonnell was able to generate positive free cash flow* in 2010 despite a \$4.2 million operating loss (a \$2.3 million

improvement over 2009) and nearly a 4% improvement in volume. These guiding principles are personified in the actions that allowed Bonnell's Carthage, Tennessee employees to manage through a 100-year flood while barely missing a beat.

Operational Excellence, Innovation and Leadership are the reasons that Film Products was able to satisfy our customers' needs during unprecedented volume surges. It's also how a global team moved from a ceremonial ground breaking to an operational plant in Pune, India in less than 12 months.

As much as Operational Excellence, Innovation and Leadership are becoming part of Tredegar's DNA, we still have much work to do to improve on each of these key building blocks. While we can be proud of how our safety record compares to the industry benchmarks for Films and Bonnell, both businesses

"OUR GOOD CASH FLOW AND STRONG BALANCE SHEET PROVIDE US THE FLEXIBILITY TO PURSUE EXTERNAL GROWTH. I HAVE COMPLETE CONFIDENCE IN THE STRENGTH AND ABILITY OF TREDEGAR'S MANAGEMENT TEAM TO EXECUTE UPON THE RIGHT OPPORTUNITIES."

fell short of our internal 2010 safety goals and experienced a slight backslide in comparison with 2009. We set high quality improvement goals in 2010 and, while there was improvement, we didn't meet our overall internal targets. We are striving to be a process organization, yet in the past year, there were still examples of firefighting and the need for streamlined processes. So, as I said, there are many opportunities to improve. The good news is that the commitment to Operational Excellence, Innovation and Leadership is strongly held across the entire company.

Promoting Global Citizenship. In many ways, this is the most ambitious element of our vision because it is so multi-dimensional. On the most basic level, it is about increasing our global mindedness. In the last five years, the face of Tredegar has become significantly more culturally diverse. But we need to draw more on our cultural diversity as we navigate our global expansion in an increasingly complex world. It's also about having a positive impact on the communities in which we operate—something we are taking steps to better coordinate around the globe. And then there's the important topic of sustainability. We have been working in this area for a few years and have already introduced some of our initiatives to customers. And we'll keep working on this front in a thoughtful way that integrates sustainability into the fabric of our culture.

Embracing the Talents of our People. Tredegar has many strengths, and our greatest strength, our most precious asset, is our people. I would put the passion, commitment and engagement of our employees up against those of any other company. The challenge we have at Tredegar is to create more opportunities for our employees to grow and develop, to provide the right support and structure to leverage the talents of our people. In other words, to ensure our employees understand the business strategy and targets, provide them with the right tools and training and then get out of the way! I wish I could report that we have all of that fully in place today. We don't. This is another area where there is still work to do, but it's work about which we are excited. In 2011, we will launch an improved set of development and training programs and processes. We have the raw talent, and Tredegar's management team is committed to doing the work necessary to enable our employees to realize their full potential.

Inspiring Confidence. Inspiring the confidence of our shareholders, customers, employees, Board of Directors, suppliers and communities. No matter the constituency, in the end, it's about performance.

So how did we perform in 2010? Our Film Products business had a very strong year with top line volume growth, near record operating profit, good cost control and strong cash generation. Bonnell showed improvement, despite incurring an operating loss, largely due to their keen focus on operational excellence, and their efforts were highlighted by generating positive free cash flow. Tredegar's balance sheet remains strong, and we ended the year with net cash of \$73 million (after repurchasing 2.1 million shares of our stock). 2010 economic profit added, operating profit and adjusted EBITDA* all showed improvement over 2009. All in all, I feel good about Tredegar's performance in 2010.

Thank you. We are nothing without our customers. Thank you for your business and loyalty. Our success comes from the efforts of our employees. Thank you for stepping up and going the extra mile with a "can do" attitude. In addition, I have to express my deep gratitude to Tredegar's Board of Directors. Your continued support and counsel, especially during my first year as CEO, has been invaluable.

After serving on Tredegar's Board of Directors since Tredegar's birth as a public company in 1989, Norm Scher will retire from the Board in May. Norm has made innumerable contributions to Tredegar. His agenda has always been Tredegar's success, and his words and actions have always been grounded in reason and practicality. I'm happy to report that, after some arm-twisting, Norm has agreed to remain as part of the Tredegar management team for at least the remainder of 2011. I am grateful that I and the rest of Tredegar's management will continue to have access to his wisdom and perspective as we drive towards our vision.

Nancy M. Taylor
President and Chief Executive Officer

"OUR FILM PRODUCTS BUSINESS HAD A VERY STRONG YEAR WITH TOP LINE VOLUME GROWTH, NEAR RECORD OPERATING PROFIT, GOOD COST CONTROL AND STRONG CASH FLOW GENERATION. BONNELL SHOWED IMPROVEMENT, DESPITE INCURRING AN OPERATING LOSS, LARGELY DUE TO THEIR KEEN FOCUS ON OPERATIONAL EXCELLENCE."

*See appendix for footnotes 5, 6 and 7.

AMONG THE TOP GLOBAL LEADERS IN THE PLASTIC FILMS INDUSTRY, TREDEGAR FILM PRODUCTS IS WELL POSITIONED FOR GROWTH, WITH EXTENSIVE PRODUCT DEVELOPMENT CAPABILITIES, A GLOBAL CUSTOMER BASE, AND MANUFACTURING PLANTS THROUGHOUT THE WORLD.

Delivering Layers of Confidence™

Headquartered in Richmond, Virginia, Tredeggar Film Products has 1,200 employees around the world and 13 locations throughout North America, Europe, Asia, and South America, including a new location in Pune, India. Our technology serves numerous industries, including: personal care, electronic displays, flexible packaging, building materials, and healthcare.

In 2010, we kicked off the development of our new Tredeggar Film Products' brand, starting with the introduction of our brand promise, "Delivering Layers of Confidence," which speaks to who we are. We believe in Making a Difference for our customers, business partners, shareholders, and communities through employee creativity and superior quality. This commitment is demonstrated by our key focus on continuous improvement efforts through the Lean Six Sigma methodology.

We have a strong commitment to innovative technology efforts, and have a global R&D structure. We realize that many additional ideas and technologies relevant to our continued growth are also generated outside of our company. As a result, part of our innovation team's role is to develop technologies and partnerships globally through interactions with universities, research institutes, large corporations, and start-up companies.

One of our top priorities is to create value for our customers through strategically located global operations. In November 2010, Tredeggar opened its new manufacturing plant near Pune, India to better serve our customers. The development of the India plant is integral to the company's plans to expand in emerging markets.

Aluminum Extrusions

AS ONE OF NORTH AMERICA'S LEADING ALUMINUM EXTRUSION MANUFACTURERS TO THE BUILDING AND CONSTRUCTION MARKET, BONNELL ALUMINUM RECOGNIZES THAT ITS HIGHEST RESPONSIBILITY IS TO HELP CUSTOMERS DELIVER INNOVATIVE AND COMPETITIVE PRODUCTS TO MARKET.

Extruding Confidence

Aluminum Extrusions
Volume by End Market
(95 Million Pounds in 2010)

Bonnell Aluminum's full service approach is what inspires confidence in our customers and embodies market differentiation. The company is recognized for its longevity in customer relationships and continuously seeks to provide its core markets with the highest quality products supported by comprehensive extrusion and finishing capabilities and superior customer service. Bonnell's dedicated and experienced personnel work relentlessly towards achieving operational excellence utilizing Lean Six Sigma methodologies to improve product quality and consistency while reducing waste.

Estimated North American Market Share of Extruded Shapes into Building & Construction

AN IMPORTANT ELEMENT OF TREDEGAR'S VISION FOR PROFITABLE GROWTH IS GROWING THROUGH ACQUISITIONS. WE ARE ACTIVELY SEEKING OPPORTUNITIES WITHIN THE BROADLY DEFINED MANUFACTURING SEGMENT THAT WILL ALLOW US TO LEVERAGE OUR KEY COMPETENCIES—OUR DEMONSTRATED STRENGTH IN PROCESS, INNOVATION, AND PRODUCT COMMERCIALIZATION, COMPLEMENTED BY THE SUBSTANTIAL BENEFITS THAT COME FROM HAVING A GLOBAL FOOTPRINT.

Confident Growth

Bright View Technologies has developed a technology platform with rapid design and quick turn tooling capability to produce highly engineered, complex micro-structured surfaces. With the rapid growth of LED lighting and the push for increased energy efficiency with fluorescent lighting, we have focused our microstructure surface technology on developing products for the lighting market. By combining advanced microstructures with various substrate options, coatings, and form factors, Bright View diffuser products provide industry leading performance in terms of angle control, efficiency, source hiding, and aesthetics.

Falling Springs develops, owns and operates mitigation banks for the purpose of selling compensatory mitigation credits to those who need to offset their environmental impacts required by Section 404 of the Clean Water Act. In short, we restore critical habitat to protect and enhance water quality and biodiversity throughout Virginia and several other states. Our work offsets the negative impacts that other land disturbance projects like roads and buildings often have in our communities. In conjunction with our partners, we oversee the entitlement, design, construction, compliance, and sales of these important restoration projects.

CONFIDENCE IN OUR BUSINESS PERFORMANCE, IN THE STRENGTH OF OUR PEOPLE, AND IN THE POSITIVE CONTRIBUTIONS THAT WE MAKE TO OUR CUSTOMERS AND COMMUNITIES IN WHICH WE OPERATE AROUND THE GLOBE ARE THE FOUNDATION OF OUR LEADERSHIP DEVELOPMENT PRACTICES.

Confident Leadership

The goal of our leadership development program is to build the overall leadership capability and bench strength at Tredegar, as part of a comprehensive talent management and development strategy. In addition to a program of coursework to build leadership competency, we're designing personal and professional development opportunities at each leadership level to enhance on-the-job experiences and learning.

Our core values are central to our leadership development efforts:

- Integrity & Trust
- Safety
- Quality
- Innovation
- Humility & Credibility
- Long-term Perspective
- Collaboration
- Courage

Building leaders at every level of the business gives us confidence.

PART I

Item 1. **BUSINESS**

Description of Business

Tredegar Corporation (“Tredegar”), a Virginia corporation incorporated in 1988, is primarily engaged, through its subsidiaries, in the manufacture of plastic films and aluminum extrusions. The financial information related to Tredegar’s film products, aluminum extrusions and other segments and related geographical areas included in Note 3 to the Notes to Financial Statements is incorporated herein by reference. Unless the context requires otherwise, all references herein to “Tredegar,” “we,” “us” or “our” are to Tredegar Corporation and its consolidated subsidiaries.

Film Products

Tredegar Film Products Corporation and its subsidiaries (together, “Film Products”) manufacture plastic films, elastics and laminate materials primarily for personal and household care products and surface protection and packaging applications. These products are manufactured at locations in the United States (“U.S.”) and at plants in The Netherlands, Hungary, Italy, China, Brazil and India. Film Products competes in all of its markets on the basis of product innovation, quality, price and service.

Personal Care Materials. Film Products is one of the largest global suppliers of apertured, breathable, elastic and embossed films, and laminate materials for personal care markets, including:

- Apertured film and nonwoven materials for use as topsheet in feminine hygiene products, baby diapers and adult incontinence products (including materials sold under the ComfortQuilt™, ComfortAire™, SoftAire™ and FreshFeel™ brand names);
- Breathable, embossed and elastic materials for use as components for baby diapers, adult incontinence products and feminine hygiene products (including elastic components sold under the FabriFlex™, StretchTab™, FlexAire™ and FlexFeel™ brand names); and
- Absorbent transfer layers for baby diapers and adult incontinence products sold under the Aquidry™ and Aquisoft™ brand names.

In 2010, 2009 and 2008, personal care products accounted for approximately 50%, 52% and 40% of Tredegar’s consolidated net sales from continuing operations, respectively.

Protective Films. Film Products produces single and multi-layer surface protection films sold under the UltraMask™ and ForceField™ brand names. These films are used in high technology applications, most notably protecting components of flat panel displays, which include liquid crystal display (“LCD”) televisions, monitors, notebooks, smart phones, tablets, e-readers and digital signage, during the manufacturing process. In 2010, 2009 and 2008, protective films accounted for approximately 12%, 10% and 7% of Tredegar’s consolidated net sales from continuing operations, respectively.

Packaging Films and Films for Other Markets. Film Products produces a broad line of packaging films with an emphasis on paper products, as well as laminating films for food packaging applications. We believe these products give our customers a competitive advantage by providing cost savings with thin-gauge films that are readily printable and convertible on conventional processing equipment. Major end uses include overwrap for bathroom tissue and paper towels as well as retort pouches.

Film Products also makes apertured films, breathable barrier films and laminates that regulate fluid or vapor transmission. These products are typically used in industrial, medical, agricultural and household markets, including filter layers for personal protective suits, facial masks, landscaping fabric and construction applications.

Raw Materials. The primary raw materials used by Film Products are low density, linear low density and high density polyethylene and polypropylene resins, which are obtained from domestic and foreign suppliers at

competitive prices. We believe there will be an adequate supply of polyethylene and polypropylene resins in the foreseeable future. Film Products also buys polypropylene-based nonwoven fabrics based on these same resins, and we believe there will be an adequate supply of these materials in the foreseeable future.

Customers. Film Products sells to many branded product producers throughout the world. Its largest customer is The Procter & Gamble Company (“P&G”). Net sales to P&G totaled \$273 million in 2010, \$253 million in 2009 and \$283 million in 2008 (these amounts include film sold to third parties that converted the film into materials used with products manufactured by P&G).

P&G and Tredegar have had a successful long-term relationship based on cooperation, product innovation and continuous process improvement. The loss or significant reduction in sales associated with P&G would have a material adverse effect on our business.

Aluminum Extrusions

The William L. Bonnell Company, Inc. and its subsidiaries (together, "Aluminum Extrusions") produce high-quality, soft-alloy aluminum extrusions primarily for building and construction, distribution, transportation, electrical, consumer durables and machinery and equipment markets. On February 12, 2008, we sold our aluminum extrusions business in Canada. All historical results for the Canadian business have been reflected as discontinued operations (see Note 17 to the notes to financial statements for more information).

Aluminum Extrusions manufactures mill (unfinished), anodized (coated) and painted aluminum extrusions for sale directly to fabricators and distributors that use our extrusions to produce architectural curtain walls, storefronts, windows and doors, hurricane shutters, tub and shower enclosures, heatsinks and components for LED (light emitting diode) lighting and automotive and light truck aftermarket parts, among other products. Sales are made primarily in the United States, principally east of the Rocky Mountains. Aluminum Extrusions competes primarily on the basis of product quality, service and price.

Aluminum Extrusions’ sales volume from continuing operations by market segment over the last three years is shown below:

% of Aluminum Extrusions Sales Volume by Market Segment (Continuing Operations)			
	2010	2009	2008
Building and construction:			
Nonresidential	68	71	72
Residential	14	14	13
Transportation	8	6	4
Distribution	5	4	5
Electrical	2	2	2
Consumer durables	2	2	2
Machinery and equipment	1	1	2
Total	100	100	100

Raw Materials. The primary raw materials used by Aluminum Extrusions consist of aluminum ingot, aluminum scrap and various alloys, which are purchased from domestic and foreign producers in open-market purchases and under short-term contracts. We believe there will be an adequate supply of aluminum and other required raw materials and supplies in the foreseeable future.

Other

In February 2010, we added a new segment, Other, comprised of the start-up operations of Bright View Technologies Corporation (“Bright View”) and Falling Springs, LLC (“Falling Springs”).

We acquired the assets of Bright View, a late-stage development company, on February 3, 2010. Bright View is a developer and producer of high-value microstructure-based optical films for the LED and fluorescent lighting markets.

Falling Springs develops, owns and operates multiple mitigation banks. Through the establishment of perpetual easements to restore, enhance and preserve wetlands, streams or other protected environmental resources, these mitigation banks create saleable credits that are used by the purchaser of credits to offset the negative environmental impacts from private and public development projects.

With Bright View's focus on the eco-efficient LED and fluorescent lighting markets and Falling Springs' work in environmental restoration, the two businesses that comprise this segment address environmental sustainability issues, which are of growing significance to us.

General

Intellectual Property. We consider patents, licenses and trademarks to be of significance for Film Products and Bright View. We routinely apply for patents on significant developments in this business. As of December 31, 2010, Film Products held 222 issued patents (76 of which are issued in the U.S.) and 95 trademarks (6 of which are issued in the U.S.). Bright View held 39 issued patents (26 of which are issued in the U.S.). Aluminum Extrusions held two U.S. trademark registrations. Our patents have remaining terms ranging from 1 to 17 years. We also have licenses under patents owned by third parties.

Research and Development. Tredegar's spending for research and development ("R&D") activities in 2010, 2009 and 2008 was primarily related to Film Products. Film Products has technical centers in Richmond, Virginia; Terre Haute, Indiana; and Chieti, Italy. R&D spending was approximately \$13.6 million in 2010, \$11.9 million in 2009 and \$11.0 million in 2008.

Backlog. Backlogs are not material to our operations in Film Products. Overall backlog for continuing operations in Aluminum Extrusions at December 31, 2010 increased by approximately 25% compared with December 31, 2009. Demand for extruded aluminum shapes improved slightly in 2010 after declining in most market segments in recent years. Aluminum extrusion volume from continuing operations, which we believe is cyclical in nature, increased 3.7% in 2010 compared to 2009 after decreasing 32.8% in 2009 compared to 2008 and 12.6% in 2008 compared to 2007.

Government Regulation. Laws concerning the environment that affect or could affect our domestic operations include, among others, the Clean Water Act, the Clean Air Act, the Resource Conservation Recovery Act, the Occupational Safety and Health Act, the National Environmental Policy Act, the Toxic Substances Control Act, the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), as amended, regulations promulgated under these acts, and any other federal, state or local laws or regulations governing environmental matters.

The U.S. Environmental Protection Agency has adopted regulations under the Clean Air Act relating to emissions of carbon dioxide and other greenhouse gases ("GHG"), including mandatory reporting and permitting requirements. Additional regulations are anticipated. Several of our manufacturing operations result in emissions of GHG and are subject to these new GHG regulations. Compliance with the newly adopted regulations has yet to require significant expenditures. The cost of compliance with any future GHG legislation or regulations is not presently determinable, but it is not anticipated to have a material adverse effect on our financial condition or results of operation based on information currently available.

At December 31, 2010, we believe that we were in substantial compliance with all applicable environmental laws, regulations and permits. In order to maintain substantial compliance with such standards, we may be required to incur additional expenditures, the amounts and timing of which are not presently determinable but which could be significant, in constructing new facilities or in modifying existing facilities.

Employees. Tredegar employed approximately 2,000 people at December 31, 2010.

Available Information and Corporate Governance Documents. Our Internet address is www.tredegar.com. We make available, free of charge through our website, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after such documents are electronically filed with, or furnished to, the SEC. Information filed electronically with the SEC can be accessed on its website at www.sec.gov. In addition, our Corporate Governance Guidelines, Code of Conduct and the charters of our Audit, Executive Compensation and Nominating and Governance Committees are available on our website and are available in print, without charge, to any shareholder upon request by contacting Tredegar's Corporate Secretary at 1100 Boulders Parkway, Richmond, Virginia 23225. The information on or that can be accessed through our website is not, and shall not be deemed to be, a part of this report or incorporated into other filings we make with the SEC.

Item 1A. RISK FACTORS

There are a number of risks and uncertainties that could have a material adverse effect on the operating results of our businesses and our financial condition. The following risk factors should be considered, in addition to the other information included in the Form 10-K, when evaluating Tredegar and our businesses:

General

- ***Our performance is influenced by costs incurred by our operating companies including, for example, the cost of raw materials and energy.*** These costs include, without limitation, the cost of resin (the raw material on which Film Products primarily depends), aluminum (the raw material on which Aluminum Extrusions primarily depends), natural gas (the principal fuel necessary for Aluminum Extrusions' plants to operate), electricity and diesel fuel. Resin, aluminum and natural gas prices are extremely volatile as shown in the charts on pages 34-35. We attempt to mitigate the effects of increased costs through price increases and contractual pass-through provisions, but there are no assurances that higher prices can effectively be passed through to our customers or that we will be able to offset fully or on a timely basis the effects of higher raw material and energy costs through price increases or pass-through arrangements. Further, there is no assurance that our cost control efforts will be sufficient to offset any additional future declines in revenue or increases in raw material, energy or other costs.
- ***Tredegar and its customers operate in highly competitive markets.*** Tredegar and its businesses compete on product innovation, quality, price and service, and our businesses and its customers operate in highly competitive markets. Recent economic volatility has exacerbated our exposure to margin compression due to competitive forces, especially as certain products move into the later stages of their product life cycles. We attempt to mitigate the effects of this trend through cost saving measures and manufacturing efficiency initiatives, but there is no assurance that these efforts will be sufficient to offset the impact of margin compression as a result of competitive pressure.
- ***Noncompliance with any of the covenants in our \$300 million credit facility could result in all debt under the agreement outstanding at such time becoming due and limiting our borrowing capacity, which could have a material adverse effect on our financial condition and liquidity.*** The credit agreement governing our revolving credit facility contains restrictions and financial covenants that could restrict our financial flexibility. While we had no outstanding borrowings on our \$300 million credit facility at December 31, 2010, our failure to comply with these covenants in a future period when we have borrowings outstanding could result in an event of default, which if not cured or waived, could have a material adverse effect on our financial condition and liquidity if such borrowings are material. Renegotiation of the covenant(s) through an amendment to our revolving credit facility may effectively cure the noncompliance, but may have an effect on financial condition or liquidity depending upon how the covenant is negotiated.

- ***Loss of certain key officers or employees could adversely affect our businesses.*** We depend on our senior executive officers and other key personnel to run our businesses. The loss of any of these officers or other key personnel could have a materially adverse affect on our operations. Competition for qualified employees among companies that rely heavily on engineering and technology is intense, and the loss of qualified employees or an inability to attract, retain and motivate highly skilled employees required for the operation and expansion of our businesses could hinder our ability to improve manufacturing operations, conduct research activities successfully and develop marketable products.
- ***Tredegar is subject to increased credit risk that is inherent with economic uncertainty and efforts to increase market share as we attempt to broaden our customer base.*** In the event of the deterioration of operating cash flows or diminished borrowing capacity of our customers, the collection of trade receivable balances may be delayed or deemed unlikely. The operations of our customers for Aluminum Extrusions generally follow the cycles within the economy, resulting in greater credit risk from diminished operating cash flows and higher bankruptcy rates when the economy is deteriorating or in recession. In addition, Film Products' credit risk exposure could increase as efforts to expand its business may lead to a broader, more diverse customer base.
- ***Tredegar may not be able to successfully execute its acquisition strategy.*** New acquisitions can provide meaningful opportunities to grow our business and improve profitability. Acquired businesses may not achieve the levels of revenue, profit, productivity, or otherwise perform as we expect. Acquisitions involve special risks, including, without limitation, diversion of management's time and attention from our existing businesses, the potential assumption of unanticipated liabilities and contingencies and potential difficulties in integrating acquired businesses and achieving anticipated operational improvements. While our strategy is to acquire businesses that will improve our competitiveness and profitability, we can give no assurance that acquisitions will be successful or accretive to earnings.
- ***Tredegar is subject to various environmental laws and regulations and could become exposed to material liabilities and costs associated with such laws.*** We are subject to various environmental obligations and could become subject to additional obligations in the future. In the case of known potential liabilities, it is management's judgment that the resolution of ongoing and/or pending environmental remediation obligations is not expected to have a material adverse effect on our consolidated financial condition or liquidity. In any given period or periods, however, it is possible such obligations or matters could have a material adverse effect on the results of operations. Changes in environmental laws and regulations, or their application, including, but not limited to, those relating to global climate change, could subject us to significant additional capital expenditures and operating expenses. Moreover, future developments in federal, state, local and international environmental laws and regulations are difficult to predict. Environmental laws have become and are expected to continue to become increasingly strict. As a result, we will be subject to new environmental laws and regulations. However, any such changes are uncertain and, therefore, it is not possible for us to predict with certainty the amount of additional capital expenditures or operating expenses that could be necessary for compliance with respect to any such changes.
- ***An inability to renegotiate one of our collective bargaining agreements could adversely affect our financial results.*** Some of our employees are represented by labor unions under various collective bargaining agreements with varying durations and expiration dates. Tredegar may not be able to satisfactorily renegotiate collective bargaining agreements when they expire, which could result in strikes or work stoppages or higher labor costs. In addition, existing collective bargaining agreements may not prevent a strike or work stoppage at our facilities in the future. Any such work stoppages (or potential work stoppages) could negatively impact our ability to manufacture our products and adversely affect results of operations.
- ***Our investments (primarily \$7.5 million of investments in a privately-held specialty pharmaceutical company and a \$6.4 million net investment in Harbinger) have high risk.*** The value of our investment in a specialty pharmaceutical company can fluctuate, primarily as a result of its ability to meet its developmental and commercialization milestones within an anticipated time frame. The specialty pharmaceutical company may require additional rounds of financing to have the opportunity to complete product development and bring its

technology to market, which may never occur. The estimated fair value of our investment was \$16.0 million at December 31, 2010. There is no secondary market for selling our interests in the specialty pharmaceutical company. As a result, we may be required to bear the risk of our investment in the specialty pharmaceutical company for an indefinite period of time.

Harbinger Capital Partners Special Situations Fund, L.P. (“Harbinger”) is a private investment fund and an investment in the fund involves risk and is subject to limitations on withdrawal. We are withdrawing from the fund, and we received the first installments of withdrawal proceeds in the third and fourth quarters of 2010. The timing and amount of future withdrawal proceeds are not known.

Film Products

- ***Film Products is highly dependent on sales associated with one customer, P&G.*** P&G comprised approximately 38% of Tredegar’s consolidated net sales from continuing operations in 2010, 40% in 2009 and 33% in 2008. The loss or significant reduction of sales associated with P&G would have a material adverse effect on our business. Other P&G-related factors that could adversely affect our business include, by way of example, (i) failure by P&G to achieve success or maintain share in markets in which P&G sells products containing our materials, (ii) operational decisions by P&G that result in component substitution, inventory reductions and similar changes, (iii) delays in P&G rolling out products utilizing new technologies developed by us and (iv) P&G rolling out products utilizing technologies developed by others that replace our business with P&G. While we have undertaken efforts to expand our customer base, there can be no assurance that such efforts will be successful, or that they will offset any delay or loss of sales and profits associated with P&G.
- ***Growth of Film Products depends on our ability to develop and deliver new products at competitive prices.*** Personal care, surface protection and packaging products are now being made with a variety of new materials and the overall cycle for changing materials has accelerated. While we have substantial technical resources, there can be no assurance that our new products can be brought to market successfully, or if brought to market successfully, at the same level of profitability and market share of replaced films. A shift in customer preferences away from our technologies, our inability to develop and deliver new profitable products, or delayed acceptance of our new products in domestic or foreign markets, could have a material adverse effect on our business. In the long term, growth will depend on our ability to provide innovative materials at a price that meets our customers’ needs.
- ***Continued growth in Film Products’ sale of protective film products is not assured.*** A shift in our customers’ preference to new or different products or new technology that displaces flat panel displays that currently utilize our protective films could have a material adverse effect on our sales of protective films. Similarly, a decline in the rate of growth for flat panel displays could have a material adverse effect on protective film sales.
- ***Our substantial international operations subject us to risks of doing business in countries outside the U.S., which could adversely affect our business, financial condition and results of operations.*** Risks inherent in international operations include the following, by way of example: changes in general economic conditions, potential difficulty enforcing agreements and intellectual property rights, staffing and managing widespread operations and the challenges of complying with a wide variety of laws and regulations, restrictions on international trade or investment, restrictions on the repatriation of income, fluctuations in exchange rates, imposition of additional taxes on our income generated outside the U.S., nationalization of private enterprises and unexpected adverse changes in international laws and regulatory requirements.
- ***Our inability to protect our intellectual property rights or our infringement of the intellectual property rights of others could have a material adverse impact on Film Products.*** Film Products operates in a field where our significant customers and competitors have substantial intellectual property portfolios. The continued success of this business depends on our ability not only to protect our own technologies and trade secrets, but also to develop and sell new products that do not infringe upon existing patents or threaten existing customer relationships. An unfavorable outcome in any intellectual property litigation or similar proceeding could have a materially adverse effect on results of operations in Film Products.

- ***An unstable economic environment could have a disruptive impact on our supply chain.*** Certain raw materials used in manufacturing our products are available from a single supplier, and we may not be able to quickly or inexpensively re-source to another supplier. The risk of damage or disruption to our supply chain has been exacerbated as different suppliers have consolidated their product portfolios or experienced financial distress due to recent uncertainty in the economy. Failure to take adequate steps to effectively manage such events, which are intensified when a product is sourced from a single supplier or location, could adversely affect our business and results of operations, as well as require additional resources to restore our supply chain.
- ***Failure of our customers to achieve success or maintain market share could adversely impact sales and operating margins.*** Our products serve as components for various consumer products sold worldwide. Our customers' ability to successfully develop, manufacture and market their products is integral to our success.

Aluminum Extrusions

- ***Sales volume and profitability of Aluminum Extrusions is cyclical and highly dependent on economic conditions of end-use markets in the U.S., particularly in the construction sector.*** Our end-use markets can be subject to seasonal slowdowns. Because of the high degree of operating leverage inherent in our operations (generally constant fixed costs until full capacity utilization is achieved), the percentage drop in operating profits in a cyclical downturn will likely exceed the percentage drop in volume. Any benefits associated with cost reductions and productivity improvements may not be sufficient to offset the adverse effects on profitability from pricing and margin pressure and higher bad debts (including a greater chance of loss associated with defaults on fixed-price forward sales contracts with our customers) that usually accompany a downturn. In addition, higher energy costs can further reduce profits unless offset by price increases or cost reductions and productivity improvements.

Currently, there is uncertainty surrounding the extent and timing of recovery in the building and construction sector. There can be no assurance as to the extent and timing of the recovery of sales volumes and profits for Aluminum Extrusions, especially since there can be a lag in the recovery of its end-use markets in comparison to the overall economic recovery.

- ***The markets for our products are highly competitive with product quality, service, delivery performance and price being the principal competitive factors.*** Aluminum Extrusions has approximately 805 customers that are in a variety of end-use markets within the broad categories of building and construction, distribution, transportation, machinery and equipment, electrical and consumer durables. No single customer exceeds 5% of Aluminum Extrusions' net sales. Due to the diverse customer mix across many end-use markets, we believe the industry generally tracks the real growth of the overall economy. Future success and prospects depend on our ability to retain existing customers and participate in overall industry cross-cycle growth.

During improving economic conditions, excess industry capacity is absorbed and pricing pressure becomes less of a factor in many of our end-use markets. Conversely, during an economic slowdown, excess industry capacity often drives increased pricing pressure in many end-use markets as competitors protect their position with key customers. Because the business is susceptible to these changing economic conditions, Aluminum Extrusions targets complex, customized, service-intensive business with more challenging requirements in order to differentiate itself from competitors that focus on higher volume, standard extrusion applications.

Imports into the U.S., primarily from China, represent a portion of the U.S. aluminum extrusion market. Imports from China have the potential of further exacerbating a very competitive market, thereby amplifying market share and pricing pressures. While the industry submitted a petition to the Department of Commerce in March 2010 alleging Chinese extrusions are being imported through unfair trade practices, the results of this initiative and the impact that this may have on the volume of imports is unknown at this time.

Item 1B. UNRESOLVED STAFF COMMENTS

None.

Item 2. PROPERTIES

General

Most of the improved real property and the other assets used in our operations are owned, and none of the owned property is subject to an encumbrance that is material to our consolidated operations. We consider the plants, warehouses and other properties and assets owned or leased by us to be in generally good condition.

We believe that the capacity of our plants is adequate to meet our immediate needs. Our plants generally have operated at 50-90% of capacity. Our corporate headquarters, which is leased, is located at 1100 Boulders Parkway, Richmond, Virginia 23225.

Our principal plants and facilities are listed below:

Film Products

Locations in the U.S.

Lake Zurich, Illinois
Pottsville, Pennsylvania
Red Springs, North Carolina
(leased)
Richmond, Virginia (technical
center) (leased)
Terre Haute, Indiana
(technical center and
production facility)

Locations Outside the U.S.

Chieti, Italy (technical center)
(leased)
Guangzhou, China
Kerkrade, The Netherlands
Pune, India
Rétság, Hungary
Roccamontepiano, Italy
São Paulo, Brazil
Shanghai, China

Principal Operations

Production of plastic films and
laminated materials

Aluminum Extrusions

Locations in the U.S.

Carthage, Tennessee
Kentland, Indiana
Newnan, Georgia

Principal Operations

Production of aluminum extrusions,
fabrication and finishing

Other

Locations in the U.S.

Morrisville, North Carolina
(leased)

Principal Operations

Development and production of
optical films for LED and
fluorescent lighting

We also have various mitigation banking properties in Virginia, Georgia and Florida.

Item 3. LEGAL PROCEEDINGS

None.

PART II

Item 5. MARKET FOR TREDEGAR'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Prices of Common Stock and Shareholder Data

Our common stock is traded on the New York Stock Exchange ("NYSE") under the ticker symbol TG. We have no preferred stock outstanding. There were 31,883,173 shares of common stock held by 2,739 shareholders of record on December 31, 2010.

The following table shows the reported high and low closing prices of our common stock by quarter for the past two years.

	2010		2009	
	High	Low	High	Low
First quarter	\$ 17.58	\$ 14.93	\$ 18.68	\$ 14.43
Second quarter	18.03	15.26	17.99	12.79
Third quarter	19.34	15.84	15.82	13.07
Fourth quarter	20.19	18.38	15.93	13.40

The closing price of our common stock on February 25, 2011 was \$19.11.

Dividend Information

We have paid a dividend every quarter since becoming a public company in July 1989. During 2010, 2009 and 2008, our quarterly dividend was 4 cents per share.

All decisions with respect to the declaration and payment of dividends will be made by the Board of Directors in its sole discretion based upon earnings, financial condition, anticipated cash needs, restrictions in our credit agreement and other such considerations as the Board deems relevant. See Note 8 beginning on page 62 for the restrictions contained in our credit agreement related to minimum shareholders' equity required and aggregate dividends permitted.

Issuer Purchases of Equity Securities

On January 7, 2008, we announced that our board of directors approved a share repurchase program whereby management is authorized at its discretion to purchase, in the open market or in privately negotiated transactions, up to 5 million shares of Tredegar's outstanding common stock. The authorization has no time limit. This share repurchase program replaced our previous share repurchase authorization announced on August 8, 2006.

Under these standing authorizations, we purchased approximately 2.1 million shares in 2010, 105,497 shares in 2009 and 1.1 million shares in 2008 of our stock in the open market at an average price of \$16.54, \$14.44 and \$14.88 per share, respectively. The table below summarizes share repurchase activity under the current program by month beginning in January 2010:

Period	Total Number of Shares Purchased	Average Price Paid Per Share Before Broker Commissions	Total Number of Shares Purchased Since Inception of Program (a)	Maximum Number of Shares at End of Period that May Yet be Purchased Under Program (a)
January 2010	201,600	\$ 15.81	1,344,697	3,655,303
February 2010	548,900	16.48	1,893,597	3,106,403
March 2010	380,338	17.16	2,273,935	2,726,065
April 2010	171,630	17.20	2,445,565	2,554,435
May 2010	537,302	16.28	2,982,867	2,017,133
June 2010	284,930	16.28	3,267,797	1,732,203
July 2010	200	15.74	3,267,997	1,732,003
August - December 2010	-	-	3,267,997	1,732,003

(a) On January 7, 2008, our board of directors approved a share repurchase program authorizing management at its discretion to purchase, in the open market or in privately negotiated transactions, up to 5 million shares of our outstanding Common Stock. The authorization has no time limit.

Annual Meeting

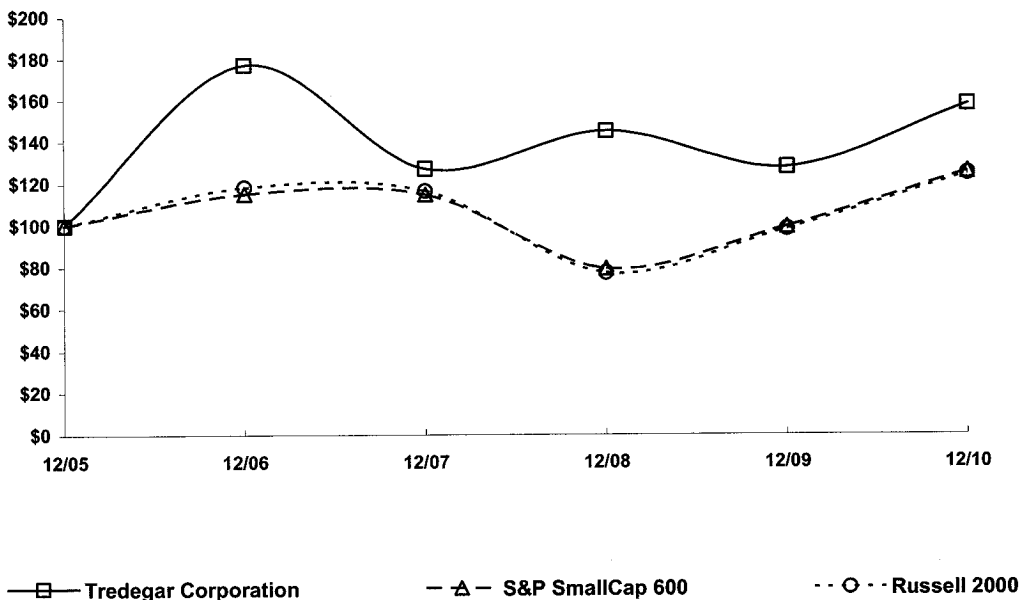

Our annual meeting of shareholders will be held on May 24, 2011, beginning at 9:00 a.m. EDT at the Jepson Alumni Center of the University of Richmond, 49 Crenshaw Way, Richmond, Virginia. We expect to mail formal notice of the annual meeting, proxies and proxy statements to shareholders on or about April 13, 2011.

Comparative Tredegar Common Stock Performance

The following graph compares cumulative total shareholder returns for Tredegar, the S&P SmallCap 600 Stock Index (an index comprised of companies with market capitalizations similar to Tredegar) and the Russell 2000 Index for the five years ended December 31, 2010. Tredegar is part of both the S&P SmallCap 600 Index and Russell 2000 Index.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Among Tredegar Corporation, the S&P SmallCap 600 Index and the Russell 2000 Index

*\$100 invested on 12/31/05 in stock or index, including reinvestment of dividends. Fiscal year ending December 31.

NOTES TO FINANCIAL TABLES

- (a) On February 12, 2008, we sold our aluminum extrusions business in Canada. All historical results for this business have been reflected as discontinued operations. In 2008, discontinued operations include an after-tax loss of \$412,000 on the sale in addition to operating results through the closing date. In 2007, discontinued operations also include \$11.4 million in cash income tax benefits from the sale that were realized in 2008.
- (b) A goodwill impairment charge of \$30.6 million (\$30.6 million after taxes) was recognized in Aluminum Extrusions upon completion of an impairment analysis performed as of March 31, 2009. The non-cash charge, computed under U.S. generally accepted accounting principles, resulted from the estimated adverse impact on the business unit's fair value of possible future losses and the uncertainty of the amount and timing of an economic recovery.
- (c) Plant shutdowns, asset impairments, restructurings and other for 2010 include gains of \$893,000 associated with Aluminum Extrusions for timing differences between the recognition of realized losses on aluminum futures contracts and related revenues from the delayed fulfillment by customers of fixed-price forward purchase commitments (included in "Cost of goods sold" in the consolidated statements of income); asset impairment charges of \$608,000 related to Films Products (\$355,000) and the Other segment (\$253,000); a charge of \$400,000 related to expected future environmental costs at the aluminum extrusions manufacturing facility in Newnan, Georgia (included in "Cost of goods sold" in the consolidated statements of income); charges of \$165,000 for severance and other employee-related costs in connection with restructurings in Film Products; a gain of \$120,000 on the sale of previously impaired equipment (included in "Other income (loss), net" in the consolidated statements of income) at the film products manufacturing facility in Pottsville, Pennsylvania; and losses of \$105,000 on the disposal of equipment (included in "Other income (expense), net" in the consolidated statements of income) from a previously shutdown film products manufacturing facility in LaGrange, Georgia. The loss from the write-down of an investment accounted for under the fair value method of \$2.2 million in 2010 is included in "Other income (expense), net" in the consolidated statement of income. Income taxes in 2010 include the recognition of an additional valuation allowance of \$215,000 related to the expected limitations on the utilization of assumed capital losses on certain investments.
- (d) Plant shutdowns, asset impairments, restructurings and other for 2009 include a charge of \$2.1 million for severance and other employee related costs in connection with restructurings for Film Products (\$1.3 million), Aluminum Extrusions (\$433,000) and corporate headquarters (\$396,000, included in "Corporate expenses, net" in the operating profit by segment table); an asset impairment charge of \$1.0 million in Films Products; losses of \$952,000 associated with Aluminum Extrusions for timing differences between the recognition of realized losses on aluminum futures contracts and related revenues from the delayed fulfillment by customers of fixed-price forward purchase commitments (included in "Cost of goods sold" in the consolidated statements of income); a gain of \$640,000 related to the sale of land at our aluminum extrusions facility in Newnan, Georgia (included in "Other income (expense), net" in the consolidated statements of income); a gain of \$275,000 on the sale of equipment (included in "Other income (expense), net" in the consolidated statements of income) from a previously shutdown film products manufacturing facility in LaGrange, Georgia; a gain of \$175,000 on the sale of a previously shutdown aluminum extrusions manufacturing facility in El Campo, Texas (included in "Other income (expense), net" in the consolidated statements of income); a gain of \$149,000 related to the reversal to income of certain inventory impairment accruals in Film Products; and a net charge of \$69,000 (included in "Costs of goods sold" in the consolidated statement of income) related to adjustments of future environmental costs expected to be incurred by Aluminum Extrusions. The gain from the write-up of an investment accounted for under the fair value method of \$5.1 million in 2009 is included in "Other income (expense), net" in the consolidated statement of income. The gain on sale of investments in Theken Spine and Therics, LLC, which is also included in "Other income (expense), net" in the consolidated statement of income, includes the receipt of a contractual earn-out payment of \$1.8 million and a post-closing contractual adjustment of \$150,000. AFBS Inc. (formerly Therics, Inc.) received these investments in 2005, when substantially all of the assets of AFBS, Inc., a wholly owned subsidiary of Tredegar, were sold or assigned to a newly created limited liability company, Therics, LLC, controlled and managed by an individual not affiliated with Tredegar. Income taxes in 2009 include the recognition of an additional valuation allowance of \$2.1 million related to the expected limitations on the utilization of assumed capital losses on certain investments.
- (e) Plant shutdowns, asset impairments, restructurings and other for 2008 include an asset impairment charge of \$9.7 million for Film Products; a charge of \$2.7 million for severance and other employee related costs in connection with restructurings for Film Products (\$2.2 million) and Aluminum Extrusions (\$510,000); a gain of \$583,000 from the sale of land rights and related improvements at the film products facility in Shanghai, China (included in "Other income (expense), net" in the consolidated statement of income); and a \$177,000 charge related to expected future environmental costs at the aluminum extrusions facility in Newnan, Georgia (included in "Cost of goods sold" in the consolidated statements of income). The gain of \$1.5 million from the sale of our investments in Theken Spine and Therics, LLC is included in "Other income (expense), net" in the consolidated statements of income. The gain from the write-up of an investment accounted for under the fair value method of \$5.6 million in 2008 is included in "Other income (expense), net" in the consolidated statements of income. Income taxes in 2008 includes the reversal of a valuation allowance recognized in the third quarter of 2007 of \$1.1 million that originally related to expected limitations on the utilization of assumed capital losses on certain investments.
- (f) Plant shutdowns, asset impairments, restructurings and other for 2007 include a charge of \$2.8 million related to the estimated loss on the sub-lease of a portion of the AFBS (formerly Therics) facility in Princeton, New Jersey; charges of \$594,000 for asset impairments in Film Products; a charge of \$592,000 for severance and other employee-related costs in Aluminum Extrusions; a charge of \$55,000 related to the shutdown of the films manufacturing facility in LaGrange, Georgia; and a charge of \$42,000 associated with the expected future environmental costs at the aluminum extrusions facility in Newnan, Georgia (included in "Cost of goods sold" in the consolidated statements of income). The loss from the write-down of an investment in 2007 of \$2.1 million is included in "Other income (expense), net" in the consolidated statements of income.
- (g) Plant shutdowns, asset impairments, restructurings and other for 2006 include a net gain of \$1.5 million associated with the shutdown of the films manufacturing facility in LaGrange, Georgia, including a gain of \$2.9 million for related LIFO inventory liquidations (included in "Cost of goods sold" in the consolidated statements of income) and a gain of \$261,000 on the sale of related property and equipment (included in "Other income (expense), net" in the consolidated statements of income), partially offset by severance and other costs of \$1.6 million and asset impairment charges of \$130,000; charges of \$1.0 million for asset impairments in Film Products; a charge of \$920,000 related to expected future environmental costs at the aluminum extrusions facility in Newnan, Georgia (included in "Cost of goods sold" in the consolidated statements of income); charges of \$727,000 for severance and other employee-related costs in connection with restructurings in Film Products (\$213,000) and Aluminum Extrusions (\$514,000); and charges of \$637,000 related to the estimated loss on the sub-lease of a portion of the AFBS facility in Princeton, New Jersey. Income taxes in 2006 include a reversal of a valuation allowance of \$577,000 for deferred tax assets associated with capital loss carry-forwards recorded with the write-down of the investment in Novalex in 2005. Outside appraisal of the value of corporate assets, primarily real estate, performed in December 2006, indicated that realization of related deferred tax assets is more likely than not.
- (h) Total return to shareholders is defined as the change in stock price during the year plus dividends per share, divided by the stock price at the beginning of the year.
- (i) Equity market capitalization is the closing market price per share for the period multiplied by the shares outstanding at the end of the period.
- (j) Net sales represent gross sales less freight. Net sales is the measure used by the chief operating decision maker of each segment for purposes of assessing performance.

Item 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-looking and Cautionary Statements

Some of the information contained in this Form 10-K may constitute "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995. When we use the words "believe," "estimate," "anticipate," "expect," "project," "likely," "may" and similar expressions, we do so to identify forward-looking statements. Such statements are based on our then current expectations and are subject to a number of risks and uncertainties that could cause actual results to differ materially from those addressed in the forward-looking statements. It is possible that our actual results and financial condition may differ, possibly materially, from the anticipated results and financial condition indicated in these forward-looking statements. For risks and important factors that could cause actual results to differ from expectations refer to "Risk Factors" in Part I, Item 1A of this Form 10-K. Readers are urged to review and consider carefully the disclosures Tredegar makes in the reports Tredegar files with or furnishes to the SEC. Tredegar does not undertake to update any forward-looking statement to reflect any change in management's expectations or any change in conditions, assumptions or circumstances on which such statements are based.

Executive Summary

General

Tredegar is primarily a manufacturer of plastic films and aluminum extrusions. Descriptions of all of our businesses are provided on pages 1-7.

Income from continuing operations was \$27.0 million (83 cents per diluted share) in 2010, compared with losses from continuing operations of \$1.4 million (4 cents per diluted share) in 2009. Losses associated with plant shutdowns, assets impairments and restructurings and gains and losses on the sale of assets, gains or losses on investments accounted for under the fair value method and other items are described in results of continuing operations beginning on page 25. The business segment review begins on page 36.

Film Products

A summary of operating results for Film Products is provided below:

(In thousands, except percentages)	Year Ended		Favorable/ (Unfavorable) % Change
	December 31		
	2010	2009	
Sales volume (pounds)	221,210	206,670	7.0 %
Net sales	\$ 520,445	\$ 455,007	14.4 %
Operating profit from ongoing operations	\$ 71,184	\$ 64,379	10.6 %

Net sales increased in 2010 compared to the prior year due to higher volume in all major markets and an increase in average selling prices from the pass-through of higher resin prices. Operating profit from ongoing operations increased in 2010 compared to 2009 due to the higher sales volumes referenced above, partially offset by the unfavorable lag in the pass-through of higher resin costs, an increase in selling, general and administrative expenses that were planned to support growth initiatives and unfavorable changes in the U.S. dollar value of currencies for operations outside the U.S.

Film Products has index-based pass-through raw material cost agreements for the majority of its business. However, under certain agreements, changes in resin prices are not passed through for an average period of 90 days. The estimated impact of the lag in the pass-through of changes in average resin costs and year-end adjustments for inventories accounted for under the last-in first-out method ("LIFO") was a negative \$5.5 million in 2010 and a positive \$1.7 million in 2009. The estimated unfavorable impact from U.S. dollar value currencies for operations outside the U.S. was \$1.3 million in 2010 compared with 2009.

Future operating profit levels within Film Products will depend upon our ability to design and market new application of our films, to maintain margins associated with new product introductions and growth initiatives and to effectively address competitive pricing pressures and the challenge of competition from substitute materials.

Capital expenditures in Film Products were \$15.7 million in 2010 compared to \$11.5 million in 2009, and are projected to be approximately \$27 million in 2011. Depreciation expense was \$33.6 million in 2010 compared to \$32.2 million in 2009, and is projected to be approximately \$35 million in 2011.

Aluminum Extrusions

A summary of operating results for Aluminum Extrusions is provided below:

(In thousands, except percentages)	Year Ended		Favorable/ (Unfavorable) % Change
	December 31		
	2010	2009	
Sales volume (pounds)	94,890	91,486	3.7 %
Net sales	\$ 199,639	\$ 177,521	12.5 %
Operating loss from ongoing operations	\$ (4,154)	\$ (6,494)	36.0 %

The increase in net sales was due to higher volumes and an increase in average selling prices driven by higher average aluminum costs. Sales volume increased 3.7% in 2010 compared to 2009 despite extremely challenging conditions in nonresidential construction. Shipments in nonresidential construction, which comprised 68% of total volume in 2010, were relatively flat in 2010 compared with 2009. The favorable change in operating losses from ongoing operations in 2010 reflects higher volumes in multiple sectors, tightly managed overhead expenses, and the favorable impact in 2010 versus 2009 of \$2.9 million for adjustments related to inventories accounted for under LIFO, partially offset by a less favorable sales mix. Aluminum Extrusions continues to concentrate its efforts on controlling costs and effectively managing working capital, as the timing of a meaningful recovery in the U.S. nonresidential construction market remains uncertain.

Upon completing an impairment analysis as of March 31, 2009, a goodwill impairment charge of \$30.6 million (\$30.6 million after tax) was recognized in Aluminum Extrusions in the prior year. This impairment charge represents the entire amount of goodwill associated with the Aluminum Extrusions reporting unit. For additional detail on this goodwill impairment charge, see Note 1 of the notes to the financial statements beginning on page 49.

Capital expenditures in Aluminum Extrusions were \$4.3 million in 2010, an \$18.2 million decrease from \$22.5 million in 2009, and are projected to be approximately \$5 million in 2011. The project to expand capacity at our Carthage, Tennessee manufacturing facility, which was completed in 2009 and increased our capabilities in the nonresidential construction sector, accounted for \$19.0 million of capital expenditures in 2009. Depreciation expense was \$9.1 million in 2010, compared to \$7.6 million in 2009, and is projected to be \$9 million in 2011.

Other

In February 2010, we reported an additional segment, Other, comprised of the start-up operations of Bright View and Falling Springs. We acquired the assets of Bright View, a late-stage development company, on February 3, 2010. Bright View is a developer and producer of high-value microstructure-based optical films for the LED (light emitting diode) and fluorescent lighting markets. Falling Springs develops, owns and operates multiple mitigation banks. Through the establishment of perpetual easements to restore, enhance and preserve wetlands, streams or other protected environmental resources, these mitigation banks create saleable credits that are used by the purchaser of credits to offset the negative environmental impacts from private and public development projects.

Net sales for this segment can fluctuate from quarter-to-quarter as Bright View is a late-stage development company and Falling Springs' revenue can vary based upon the timing of development projects within its markets. Operating losses from ongoing operations were \$4.2 million in 2010. Although these companies are in their relative infancy and currently are incurring operating losses, we are encouraged by their progress in developing new products

and sustainable business models.

Corporate Expenses, Interest and Income Taxes

Pension expense was \$662,000 in 2010, an unfavorable change of \$3.8 million from net pension income recognized in 2009. Most of the change is reflected in "Corporate expenses, net" in the segment operating profit table presented on page 16. We contributed approximately \$167,000 to our pension plans in 2010, and minimum required contributions to our pension plans in 2011 are expected to be comparable. Pension expense in 2011 is estimated at \$2.3 million. Corporate expenses, net in 2010 increased in comparison to 2009 primarily due to the unfavorable impact of pension expense noted above and adjustments for certain performance-based compensation programs.

In June 2010, we entered into a new four-year, \$300 million unsecured revolving credit facility, which replaced our previous revolving credit facility that was due to expire on December 15, 2010. Interest expense, which includes the amortization of debt issue costs, increased by \$353,000 in 2010.

The effective tax rate used to compute income taxes was 33.7% in 2010 compared with 107.8% in 2009. The change in the effective tax rate for 2010 versus 2009 was due to numerous factors as shown in the effective income tax rate reconciliation provided in Note 14 on page 71.

In 2010, we repurchased 2.1 million shares of our stock under a standing authorization from our board of directors for \$35.1 million, compared to 105,497 shares for \$1.5 million in 2009 and 1.1 million shares for \$16.4 million in 2008. Our net cash balance (cash and cash equivalents of \$73.2 million in excess of total debt of \$450,000) at December 31, 2010 was \$72.7 million, compared to net cash balance (cash and cash equivalents of \$90.7 million in excess of total debt of \$1.2 million) at December 31, 2009 of \$89.5 million. Net cash is not intended to represent debt or cash as defined by generally accepted accounting principles, but is utilized by management in evaluating financial leverage and equity valuation and we believe that investors also may find net debt or cash helpful for the same purposes. Consolidated net capitalization and other credit measures are provided in the financial condition section beginning on page 28.

Critical Accounting Policies

In the ordinary course of business, we make a number of estimates and assumptions relating to the reporting of results of operations and financial position in the preparation of financial statements in conformity with generally accepted accounting principles. Actual results could differ significantly from those estimates under different assumptions and conditions. We believe the following discussion addresses our critical accounting policies. These policies require management to exercise judgments that are often difficult, subjective and complex due to the necessity of estimating the effect of matters that are inherently uncertain.

Impairment and Useful Lives of Long-lived Identifiable Assets and Goodwill

We regularly assess our long-lived identifiable assets for impairment when events or circumstances indicate that their carrying value may not be recoverable from future cash flows. Any necessary impairment charges are recorded when we do not believe the carrying value of the long-lived asset will be recoverable. We also reassess the useful lives of our long-lived assets based on changes in our business and technologies.

We assess goodwill for impairment when events or circumstances indicate that the carrying value may not be recoverable, or, at a minimum, on an annual basis (December 1st of each year). Our reporting units include, but are not limited to, Film Products and Aluminum Extrusions, each of which may have separately identifiable operating net assets (operating assets including goodwill and intangible assets net of operating liabilities). As of December 31, 2010, Film Products was the only reporting unit that carried a goodwill balance.

In assessing the recoverability of long-lived identifiable assets and goodwill, we estimate fair value using discounted cash flow analysis and comparative enterprise value-to-EBITDA (earnings before interest, taxes, depreciation and amortization) multiples. These calculations require us to make assumptions regarding estimated future cash flows,

discount rates and other factors to determine if an impairment exists. If these estimates or their related assumptions change in the future, we may be required to record additional impairment charges.

Based on the severity of the economic downturn and its impact on sales volumes of our aluminum extrusions business (a 36.8% decline in sales volume in the first quarter of 2009 compared with the first quarter of 2008), the resulting loss in the first quarter of 2009, possible future losses and the uncertainty in the amount and timing of an economic recovery, we determined that impairment indicators existed in the first quarter of 2009. Upon completing the impairment analysis as of March 31, 2009, a goodwill impairment charge of \$30.6 million, which represents the entire amount of goodwill associated with Aluminum Extrusions, was recorded.

Based upon assessments performed as to the recoverability of long-lived identifiable assets, we have recorded asset impairment losses for continuing operations of \$608,000 in 2010, \$1.0 million in 2009 and \$8.6 million in 2008.

Investment Accounted for Under the Fair Value Method

During the third quarter of 2007, we invested \$6.5 million in a privately held specialty pharmaceutical company. In the fourth quarter of 2008, we invested an additional \$1.0 million as part of a new round of equity financing completed by the investee. This investment is accounted for under the fair value method. We elected the fair value option over the equity method of accounting since our investment objectives are similar to those of venture capitalists, which typically do not have controlling financial interests (venture capital funds generally use the fair value method to account for their investment portfolios). At December 31, 2010, our ownership interest was approximately 21% on a fully diluted basis.

U.S. generally accepted accounting principles requires disclosure of the level within the fair value hierarchy in which fair value measurements in their entirety fall, segregating fair value measurements using quoted prices in active markets for identical assets or liabilities (Level 1), significant other observable inputs (Level 2), and significant unobservable inputs (Level 3). On the dates of our investments (August 31, 2007 and December 15, 2008), we believe that the amount we paid for our ownership interest and liquidation preferences was based on Level 2 inputs, including investments by other investors. Subsequent to the last round of financing, and until the next round of financing, we believe fair value estimates drop to Level 3 inputs since there is no secondary market for our ownership interest. In addition, the investee currently has no product sales. Accordingly, after the latest financing and until the next round of financing or any other significant financial transaction, fair value estimates will primarily be based on assumptions relating to meeting product development and commercialization milestones, cash flow projections (projections of development and commercialization milestone payments, sales, costs, expenses, capital expenditures and working capital investment) and discounting of these factors for the high degree of risk.

In connection with the new round of equity financing in the fourth quarter of 2008, we recognized an unrealized gain of \$5.6 million for the write-up of this investment based upon the implied valuation of our ownership interest. In the fourth quarter of 2009, we recognized an additional unrealized gain of \$5.1 million for the appreciation of our ownership interest upon the investee entering into an exclusive licensing agreement that included an upfront payment, additional potential milestone payments and tiered royalties on sales of any products commercialized under the license. In the fourth quarter of 2010, we recognized an unrealized loss of \$2.2 million after the investee, which had its new drug application to the Food & Drug Administration (“FDA”) accepted for review during the quarter, reassessed its projected timeframe for obtaining final marketing approval from the FDA. At December 31, 2010 and 2009, the fair value of our investment (the carrying value included in “Other assets and deferred charges” in our consolidated balance sheet) was \$16.0 million and \$18.2 million, respectively. The fair market valuation of our interest in the specialty pharmaceutical company is sensitive to changes in the weighted average cost of capital used to discount cash flow projections for the high degree of risk associated with meeting development and commercialization milestones as anticipated. At December 31, 2010, the effect of a 500 basis point change in the weighted average cost of capital assumption would have increased or decreased the fair value of our interest in the specialty pharmaceutical company by approximately \$1-2 million. Any future changes in the estimated fair value of our ownership interest will likely be attributed to a new round of financing, a merger or initial public offering or adjustments to the timing or magnitude of cash flows associated with development and commercialization milestones. Adjustments to the estimated fair value of our investment will be made in the period upon which such changes can be quantified.

Pension Benefits

We have noncontributory defined benefit (pension) plans in our continuing operations that have resulted in varying amounts of net pension income or expense, as developed from actuarial valuations. Inherent in these valuations are key assumptions including discount rates, expected return on plan assets and rate of future compensation increases. We are required to consider current market conditions, including changes in interest rates and plan asset investment returns, in determining these assumptions. Actuarial assumptions may differ materially from actual results due to changing market and economic conditions, higher or lower withdrawal rates or longer or shorter life spans of participants. These differences may result in a significant impact to the amount of net pension income or expense recorded in future periods.

The discount rate is used to determine the present value of future payments. The discount rate is the single rate that, when applied to expected benefit payments, provides a present value equal to the present value of expected benefit payments determined by using the AA-rated bond yield curve. In general, our liability increases as the discount rate decreases and vice versa. Our weighted average discount rate for continuing operations was 5.45% at the end of 2010, 5.70% at the end of 2009 and 6.5% at the end of 2008, with changes between periods due to changes in market interest rates. Based on plan changes announced in 2006, pay for active participants of the plan was frozen as of December 31, 2007. A lower expected return on plan assets increases the amount of expense and vice versa. Decreases in the level of actual plan assets will also serve to increase the amount of pension expense. The value of our plan assets relating to continuing operations, which is primarily affected by the change in fair value of plan assets and current year payments to participants, increased 4.7% and 17.7%, in 2010 and 2009, respectively, partially recovering from an \$89.6 million decline in 2008. The 31.5% asset value decline in 2008 was primarily due to the drop in global stock prices. Between 2003 and 2007, the value of our plan assets relating to continuing operations increased due to improved general market conditions after declining from 2000 to 2002. Our expected long-term return on plan assets relating to continuing operations, which is estimated by asset class and generally based on inflation-adjusted historical returns, volatilities, risk premiums and managed asset premiums, was 8.25% in 2010 and 2009 and 8.5% from 2004 to 2008. We anticipate that our expected long-term return on plan assets will be 8.25% for 2011. See page 68 for more information on expected long-term return on plan assets and asset mix.

See the executive summary beginning on page 19 for further discussion regarding the financial impact of our pension plans.

Income Taxes

On a quarterly basis, we review our judgments regarding uncertain tax positions and the likelihood that the benefits of a deferred tax asset will be realized. As circumstances change, we reflect in earnings any adjustments to unrecognized benefits for uncertain tax positions and valuation allowances for deferred tax assets.

For financial reporting purposes, we had unrecognized tax benefits on uncertain tax positions of \$1.1 million, \$1.0 million and \$2.6 million as of December 31, 2010, 2009 and 2008, respectively. Included in the 2010, 2009 and 2008 amounts were \$234,000, \$348,000 and \$1.8 million, respectively, for tax positions for which ultimate deductibility is highly certain but for which the timing of deductibility is uncertain. Because of the impact of deferred income tax accounting, other than interest, penalties and deductions not related to timing, a longer deductibility period would not affect the total income tax expense or the annual effective tax rate shown for financial reporting purposes, but would accelerate payments to the taxing authority. Tax payments resulting from the successful challenge by the taxing authority for accelerated deductions taken by us would possibly result in the payment of interest and penalties. Accordingly, we also accrue for possible interest and penalties on uncertain tax positions. The balance of accrued interest and penalties on deductions taken relating to uncertain tax positions was approximately \$125,000, \$537,000, and \$1.3 million at December 31, 2010, 2009 and 2008, respectively (\$79,000, \$342,000 and \$827,000, respectively, net of corresponding federal and state income tax benefits). Accruals for possible interest and penalties on uncertain tax positions are reflected in income tax expense for financial reporting purposes.

In 2009, we settled several disputed issues raised by the IRS during its examination of our U.S. income tax returns for 2001-2003, the most significant of which regards the recognition of our captive insurance subsidiary as an insurance company for U.S. income tax purposes. The settlement with the IRS for the disputed issues cost us

approximately \$1.0 million, which is lower than the previous estimate of \$1.3 million and was applied against the balance of unrecognized tax benefits.

Tredegear and its subsidiaries file income tax returns in the U.S., various states, and jurisdictions outside the U.S. Generally, except for refund claims and amended returns, Tredegear is no longer subject to U.S. federal income tax examinations by tax authorities for years before 2006. With few exceptions, Tredegear and its subsidiaries are no longer subject to state or non-U.S. income tax examinations by tax authorities for years before 2007.

As of December 31, 2010 and 2009, we had valuation allowances relating to deferred tax assets of \$12.0 million and \$11.7 million, respectively. For more information on deferred income tax assets and liabilities, see Note 14 of the notes to financial statements.

Recently Issued Accounting Standards

The Financial Accounting Standards Board (“FASB”) Emerging Issues Task Force issued a consensus updating accounting standards for revenue recognition for multiple-deliverable arrangements in October 2009. The stated objective of the accounting standards update was to address the accounting for multiple-deliverable arrangements to enable vendors to account for products or services (deliverables) separately rather than as a combined unit. The revision of current FASB guidance provides amended methodologies for separating consideration in multiple-deliverable arrangements and expands disclosure requirements. The accounting standards update will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, with early adoption permitted. We do not expect these FASB rules to have a material impact on our financial statements and disclosures.

The FASB issued guidance in January 2010 that requires new disclosures for fair value measurements and provides clarification for existing disclosure requirements. More specifically, this update will require (a) an entity to disclose separately the amounts of significant transfers in and out of Levels 1 and 2 fair value measurements and to describe the reasons for such transfers; and (b) information about purchases, sales, issuances and settlements to be presented separately (i.e. present the activity on a gross basis rather than net) in the reconciliation for fair value measurements using significant unobservable inputs (Level 3 inputs). This update also clarifies existing disclosure requirements for the level of disaggregation used for classes of assets and liabilities measured at fair value and requires disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements using Level 2 and Level 3 inputs. The new disclosures and clarifications of existing disclosures were effective for interim and annual reporting periods beginning after December 15, 2009, except for disclosures about the purchase, sale, issuance and settlement activity of Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for the interim periods in that year. The adoption of these new disclosures and clarifications of existing disclosures have not and are not expected to materially expand our current financial statement footnote disclosures.

In March 2010, the Patient Protection and Affordable Care Act (the “PPACA”) was signed into law, as was the Health Care and Education Reconciliation Act of 2010, which amends certain aspects of the PPACA. Included in the provisions of these laws are changes to the taxation related to the federal subsidy available to companies that provide retiree health benefit plans that include a benefit that is at least actuarially equivalent to the benefits of Medicare Part D. Our retiree medical plan does not include prescription drug coverage for Medicare-eligible retirees, so we are not impacted by changes to the taxation of this federal subsidy. We will continue to assess the other potential long-term impacts, if any, that any amendments or clarifications of this legislation may have on future results of operations, cash flows or financial position related to our health care benefits and postretirement health care obligations, as events warrant.

Results of Continuing Operations

2010 versus 2009

Revenues. Sales in 2010 increased by 14.2% compared with 2009 due to higher sales in both Film Products and Aluminum Extrusions. Net sales (sales less freight) increased 14.4% in Film Products due to higher volumes in all major markets and an increase in average selling prices related to the pass-through of higher resin prices to customers. Net sales increased 12.5% in Aluminum Extrusions as a result of higher volumes (an increase of 3.7%) and an increase in average selling prices driven by higher average aluminum prices. For more information on net sales and volume, see the executive summary beginning on page 19.

Operating Costs and Expenses. Consolidated gross profit (sales minus cost of goods sold and freight) as a percentage of sales was 17.1% in 2010 and 17.8% in 2009. The gross profit margin decreased in Film Products primarily due to the unfavorable effect of the lag in the pass-through of higher average resin costs and the unfavorable changes in the U.S. dollar value of currencies for operations outside of the U.S. Excluding adjustments related to inventories accounted for under LIFO, gross profit margins in Aluminum Extrusions decreased primarily as a result of a less favorable sales mix.

As a percentage of sales, selling, general and administrative and R&D expenses were 11.1% in 2010, which was relatively flat in comparison to 11.2% in 2009. Selling, general and administrative expenses and R&D expenses increased 13.7% primarily due to higher product development costs and expenditures for planned strategic initiatives in Film Products and expenditures related to our development and start-up enterprises in the Other segment, partially offset by tightly managed overhead expenses in Aluminum Extrusions.

Losses associated with plant shutdowns, asset impairments, restructurings and other charges in 2010 totaled \$265,000 (\$297,000 after taxes) and included:

- A fourth quarter benefit of \$413,000 (\$257,000 after taxes), a third quarter benefit of \$14,000 (\$9,000 after taxes), a second quarter benefit of \$23,000 (\$14,000 after taxes), and a first quarter benefit of \$443,000 (\$275,000 after taxes) for timing differences between the recognition of realized losses on aluminum futures contracts and related revenues from the delayed fulfillment by customers of fixed-price forward purchase commitments (included in "Cost of goods sold" in the consolidated statements of income, see Note 6 starting on page 59 for additional detail);
- Fourth quarter charges of \$253,000 (\$155,000 after taxes) for asset impairments in the Other segment and a second quarter charge of \$355,000 (\$355,000 after taxes) for asset impairments in Film Products;
- A fourth quarter charge of \$400,000 (\$249,000 after taxes) related to expected future environmental costs at our aluminum extrusions manufacturing facility in Newnan, Georgia (included in "Cost of goods sold" in the consolidated statements of income);
- A third quarter charge of \$109,000 (\$69,000 after taxes) and a first quarter charge of \$56,000 (\$35,000 after taxes) for severance and other employee-related costs in connection with restructurings in Film Products;
- A second quarter gain of \$120,000 (\$73,000 after taxes) related to the sale of previously impaired equipment (included in "Other income (expense), net" in the consolidated statements of income) at our film products manufacturing facility in Pottsville, Pennsylvania; and
- A second quarter loss of \$44,000 (\$26,000 after taxes) and a first quarter loss of \$61,000 (\$36,000 after taxes) on the disposal of equipment (included in "Other income (expense), net" in the consolidated statements of income) from a previously shutdown films manufacturing facility in LaGrange, Georgia.

Results in 2010 include an unrealized loss from the write-down of an investment accounted for under the fair value method of \$2.2 million (\$1.4 million after taxes; see further discussion on page 22). For more information on costs and expenses, see the executive summary beginning on page 19.

Interest Income and Expense. Interest income, which is included in "Other income (expense), net" in the consolidated statements of income, was \$709,000 in 2010, compared to \$806,000 in 2009. Our policy permits investment of excess cash in marketable securities that have the highest credit ratings and maturities of less than one year with the primary objectives being safety of principal and liquidity.

Interest expense, which includes the amortization of debt issue costs, was \$1.1 million in 2010, compared to \$783,000 for 2009. Average debt outstanding and interest rates were as follows:

(In Millions)	2010	2009
Floating-rate debt with interest charged on a rollover basis at one-month LIBOR plus a credit spread:		
Average outstanding debt balance	\$ -	\$ 5.0
Average interest rate	n/a	1.2%
Fixed-rate and other debt:		
Average outstanding debt balance	\$ 0.9	\$ 1.5
Average interest rate	4.0%	3.5%
Total debt:		
Average outstanding debt balance	\$ 0.9	\$ 6.5
Average interest rate	4.0%	1.8%

Income Taxes. The effective tax rate used to compute income taxes from continuing operations was 33.7% in 2010 compared with 107.8% in 2009. The differences between the U.S. federal statutory rate and the effective tax rate for continuing operations are shown in the effective income tax rate reconciliation provided in Note 14 on page 71.

2009 versus 2008

Revenues. Sales in 2009 decreased by 26.6% compared with 2008 due to sales declines in both Film Products and Aluminum Extrusions. Net sales (sales less freight) decreased 13.0% in Film Products due to the impact of lower selling prices from the pass-through of reduced resin prices, volume declines in personal care materials and packaging films and the unfavorable effect of foreign currency rates. Net sales decreased 47.8% in Aluminum Extrusions due to lower sales volumes and a decrease in average selling prices driven by lower aluminum prices. Volume in Aluminum Extrusions was 91.5 million pounds in 2009, down 32.8% from 136.2 million pounds in 2008.

Operating Costs and Expenses. Consolidated gross profit (sales minus cost of goods sold and freight) as a percentage of sales was 17.8% in 2009 and 14.0% in 2008. The gross profit margin increased in Film Products primarily due to cost reduction efforts, productivity gains, a change in product mix mostly driven by sales of higher-value surface protection materials and the lag in the pass-through of substantially higher average resin costs in 2008. Gross profit margins in Aluminum Extrusions decreased as a result of volume declines noted above.

As a percentage of sales, selling, general and administrative and R&D expenses were 11.2% in 2009, an increase from 7.9% in 2008. The increase in selling, general and administrative and R&D expenses as a percentage of sales was primarily due to the decline in sales noted above and adjustments made to accruals for certain performance-based compensation programs.

Losses associated with plant shutdowns, asset impairments, restructurings and other charges in 2009 totaled \$2.9 million (\$2.3 million after taxes) and included:

- A fourth quarter charge of \$181,000 (\$121,000 after taxes) and a first quarter charge of \$1.1 million (\$806,000 after taxes) for severance and other employee-related costs in connection with restructurings in Film Products;
- A fourth quarter charge of \$1.0 million (\$1.0 million after taxes) for asset impairments in Film Products;
- A fourth quarter benefit of \$547,000 (\$340,000 after taxes), a third quarter charge of \$111,000 (\$69,000 after taxes), a second quarter charge of \$779,000 (\$484,000 after taxes), and a first quarter charge of \$609,000 (\$378,000 after taxes) for timing differences between the recognition of realized losses on aluminum futures contracts and related revenues from the delayed fulfillment by customers of fixed-price forward purchase commitments (included in "Cost of goods sold" in the consolidated statements of income, see Note 6 starting on page 59 for additional detail);

- A fourth quarter gain of \$640,000 (\$398,000 after taxes) related to the sale of land at our aluminum extrusions manufacturing facility in Newnan, Georgia (included in “Other income (expense), net” in the consolidated statements of income);
- A fourth quarter charge of \$64,000 (\$40,000 after taxes) and a first quarter charge of \$369,000 (\$232,000 after taxes) for severance and other employee-related costs in connection with restructurings in Aluminum Extrusions;
- A fourth quarter charge of \$218,000 (\$139,000 after taxes) and a first quarter charge of \$178,000 (\$113,000 after taxes) for severance and other employee-related costs in connection with restructurings at corporate headquarters (included in “Corporate expenses, net” in the segment operating profit table in Note 3 on page 57);
- A first quarter gain of \$275,000 (\$162,000 after taxes) on the sale of equipment (included in “Other income (expense), net” in the consolidated statements of income) from a previously shutdown films manufacturing facility in LaGrange, Georgia;
- A second quarter gain of \$175,000 (\$110,000 after taxes) on the sale of previously shutdown aluminum extrusions manufacturing facility in El Campo, Texas (included in “Other income (expense), net” in the consolidated statements of income);
- A second quarter gain of \$149,000 (\$91,000 after taxes) related to the reversal to income of certain inventory impairment accruals in Film Products; and
- A fourth quarter charge of \$345,000 (\$214,000 after taxes) and a second quarter benefit of \$276,000 (\$172,000 after taxes) related to adjustments of future environmental costs expected to be incurred by Aluminum Extrusions (included in “Cost of goods sold” in the consolidated statements of income).

The severance in Film Products includes reduction in workforce in 2009 (approximately 50 employees) that saved approximately \$2.0 million on an annual basis.

We recognized gains of \$1.8 million (\$1.2 million after taxes) from the receipt of a contractual earn-out payment and \$150,000 (\$96,000 after taxes) from a post-closing contractual adjustment from the sale in 2008 of our investments in Theken Spine and Therics, LLC. These gains are included in “Other income (expense), net” in the consolidated statements of income. AFBS Inc. (formerly Therics, Inc.) received these investments in 2005, when substantially all of the assets of AFBS, Inc., a wholly owned subsidiary of Tredegar, were sold or assigned to a newly created limited liability company, Therics, LLC, controlled and managed by an individual not affiliated with Tredegar.

Results in 2009 include unrealized gains from the write-up of an investment accounted for under the fair value method of \$5.1 million (\$3.2 million after taxes; see further discussion on page 22). Gains on the sale of corporate assets in 2009 include realized gains of \$404,000 (\$257,000 after taxes) from the sale of corporate real estate. The pretax amounts for each of these items are included in “Other income (expense), net” in the consolidated statements of income and separately shown in the segment operating profit table on page 16.

For more information on costs and expenses, see the executive summary beginning on page 19.

Interest Income and Expense. Interest income, which is included in “Other income (expense), net” in the consolidated statements of income, was \$806,000 in 2009, compared to \$1.0 million in 2008.

Interest expense, which includes the amortization of debt issue costs, was \$783,000 in 2009, a 67.3% decrease in comparison to \$2.4 million for 2008 due to lower average debt levels and lower average interest rates during 2009. Average debt outstanding and interest rates were as follows:

(In Millions)	2009	2008
Floating-rate debt with interest charged on a rollover basis at one-month LIBOR plus a credit spread:		
Average outstanding debt balance	\$ 5.0	\$ 47.7
Average interest rate	1.2%	3.8%
Fixed-rate and other debt:		
Average outstanding debt balance	\$ 1.5	\$ 1.8
Average interest rate	3.5%	4.1%
Total debt:		
Average outstanding debt balance	\$ 6.5	\$ 49.5
Average interest rate	1.8%	3.8%

Income Taxes. The effective tax rate used to compute income taxes from continuing operations was 107.8% in 2009 compared with 39.7% in 2008. The differences between the U.S. federal statutory rate and the effective tax rate for continuing operations are shown in the effective income tax rate reconciliation provided in Note 14 on page 71.

Financial Condition

Assets and Liabilities

Changes in assets and liabilities from continuing operations from December 31, 2009 to December 31, 2010 are summarized below:

- Accounts receivable increased \$10.1 million (13.6%).
 - Accounts receivable in Film Products increased by \$3.7 million due mainly to higher sales.
 - Accounts receivable in Aluminum Extrusions increased by \$4.6 million primarily due to higher sales prices and an increase in sales in the fourth quarter of 2010.
 - Accounts and other receivables in corporate and other segment businesses increased \$1.8 million due to timing of cash receipts.
- Inventories increased \$7.5 million (21.2%).
 - Inventories in Film Products increased by approximately \$8.7 million. The increase can be primarily attributed to efforts to meet a surge in customer demand during the second and third quarters of 2010.
 - Inventories in Aluminum Extrusions decreased by approximately \$1.3 million. Lower inventories at Aluminum Extrusions can be primarily attributed to efforts to effectively manage working capital balances in light of the uncertainty of the timing and the extent of the recovery in the nonresidential building and construction sector.
- Net property, plant and equipment decreased \$24.0 million (10.4%) due primarily to depreciation of \$43.1 million, a change in the value of the U.S. dollar relative to foreign currencies (a decrease of approximately \$3.3 million) and asset impairments and property disposals of \$1.1 million, partially offset by capital expenditures of \$20.4 million and equipment of \$3.1 million acquired as part of the Bright View asset acquisition.
- Goodwill and other intangibles increased by \$1.6 million (1.5%) primarily due to the acquisition of the assets of Bright View, partially offset by changes in the value of the U.S. dollar relative to foreign currencies (decrease of approximately \$646,000). Identifiable intangible assets purchased as part of the acquisition were \$2.4 million. There was no goodwill recorded from the acquisition of the assets of Bright View.
- Other assets increased by \$2.6 million (5.6%) primarily due to additional investments in mitigation banking properties and an increase in deferred debt issuance costs related to our new revolving credit facility, partially offset by cash received from the initial withdrawal proceeds from Harbinger and the write-down of our investment accounted for under the fair value method (see Note 2 on page 54 for additional detail).

- Accounts payable increased by \$4.4 million (8.3%).
 - Accounts payable in Film Products increased by \$5.8 million, or 20.9%, primarily due to higher sales volume, higher raw material costs and the timing of payments.
 - Accounts payable in Aluminum Extrusions decreased by \$2.4 million, or 9.1%, primarily due to the timing of aluminum purchases.
 - Accounts payable increased in corporate and the Other segment businesses by \$1.0 million due to the normal volatility associated with the timing of payments.
- Accrued expenses decreased by \$1.7 million (4.9%) from December 31, 2009 primarily due to lower restructuring accruals in the current year (see Note 7 on page 62 for additional detail).
- Other noncurrent liabilities increased by \$737,000 (4.0%) due primarily to the change in the funded status of our defined benefit plans. As of December 31, 2010, the funded status of our defined benefit pension plan was a net liability of \$8.3 million compared with \$6.0 million as of December 31, 2009, while the liability associated with our other post-employment benefits plan was \$7.4 million compared to \$8.7 million as of December 31, 2009.
- Net deferred income tax liabilities in excess of assets decreased by \$8.3 million primarily due to numerous changes between years in the balance of the components shown in the December 31, 2010 and 2009 schedule of deferred income tax assets and liabilities provided in Note 14 on page 72. Income taxes recoverable increased by \$2.6 million primarily due to timing of tax payments.

Net capitalization and indebtedness as defined under our revolving credit agreement as of December 31, 2010 were as follows:

Net Capitalization and Indebtedness as of December 31, 2010	
(In Thousands)	
Net capitalization:	
Cash and cash equivalents	\$ 73,191
Debt:	
\$300 million revolving credit agreement maturing June 21, 2014	-
Other debt	450
Total debt	<u>450</u>
Cash and cash equivalents net of debt	(72,741)
Shareholders' equity	<u>417,546</u>
Net capitalization	<u>\$ 344,805</u>
Indebtedness as defined in revolving credit agreement:	
Total debt	\$ 450
Face value of letters of credit	6,621
Liabilities relating to derivative financial instruments, net of cash deposits	223
Other	<u>106</u>
Indebtedness	<u>\$ 7,400</u>

Under the revolving credit agreement, borrowings are permitted up to \$300 million, and approximately \$263 million was available to borrow at December 31, 2010 based on the most restrictive covenants (no amounts borrowed at December 31, 2010). The credit spread and commitment fees charged on the unused amount under the revolving credit agreement at various indebtedness-to-adjusted EBITDA levels are as follows:

Pricing Under Revolving Credit Agreement (Basis Points)		
Indebtedness-to-Adjusted EBITDA Ratio	Credit Spread Over LIBOR	Commitment Fee
> 2.0x but <= 3.0x	250	40
> 1.0x but <=2.0x	225	35
<= 1.0x	200	30

At December 31, 2010, the interest rate on debt borrowed under the revolving credit agreement would have been priced at one-month LIBOR plus the applicable credit spread of 200 basis points.

The computations of adjusted EBITDA, adjusted EBIT, the leverage ratio and interest coverage ratio as defined in the credit agreement are presented below along with the related most restrictive covenants. Adjusted EBITDA and adjusted EBIT as defined in the credit agreement are not intended to represent net income or cash flow from operations as defined by GAAP and should not be considered as either an alternative to net income or to cash flow.

Computations of Adjusted EBITDA, Adjusted EBIT, Leverage Ratio and
Interest Coverage Ratio as Defined in Revolving Credit Agreement Along with Related Most
Restrictive Covenants

As of and for the Twelve Months Ended December 31, 2010 (In Thousands)

Computations of adjusted EBITDA and adjusted EBIT as defined in revolving credit agreement for the twelve months ended December 31, 2010:	
Net income	\$ 27,027
Plus:	
After-tax losses related to discontinued operations	-
Total income tax expense for continuing operations	13,756
Interest expense	1,136
Depreciation and amortization expense for continuing operations	43,588
All non-cash losses and expenses, plus cash losses and expenses not to exceed \$10,000, for continuing operations that are classified as unusual, extraordinary or which are related to plant shutdowns, asset impairments and/or restructurings (cash-related of \$565)	1,278
Charges related to stock option grants and awards accounted for under the fair value-based method	2,064
Losses related to the application of the equity method of accounting	-
Losses related to adjustments in the estimated fair value of assets accounted for under the fair value method of accounting	2,200
Minus:	
After-tax income related to discontinued operations	-
Total income tax benefits for continuing operations	-
Interest income	(709)
All non-cash gains and income, plus cash gains and income in excess of \$10,000, for continuing operations that are classified as unusual, extraordinary or which are related to plant shutdowns, asset impairments and/or restructurings	-
Income related to changes in estimates for stock option grants and awards accounted for under the fair value-based method	-
Income related to the application of the equity method of accounting	(242)
Income related to adjustments in the estimated fair value of assets accounted for under the fair value method of accounting	-
Plus cash dividends declared on investments accounted for under the equity method of accounting	267
Plus or minus, as applicable, pro forma EBITDA adjustments associated with acquisitions and asset dispositions	-
Adjusted EBITDA as defined in revolving credit agreement	<u>90,365</u>
Less: Depreciation and amortization expense for continuing operations (including pro forma for acquisitions and asset dispositions)	<u>(43,588)</u>
Adjusted EBIT as defined in revolving credit agreement	<u>\$ 46,777</u>
Shareholders' equity at December 31, 2010 as defined in revolving credit agreement	\$ 417,546
Computations of leverage and interest coverage ratios as defined in revolving credit agreement at December 31, 2010:	
Leverage ratio (indebtedness-to-adjusted EBITDA)	.08x
Interest coverage ratio (adjusted EBIT-to-interest expense)	41.18x
Most restrictive covenants as defined in revolving credit agreement:	
Maximum permitted aggregate amount of dividends that can be paid by Tredegar during the term of the revolving credit agreement (\$100,000 plus 50% of net income generated beginning January 1, 2010)	\$ 113,514
Minimum adjusted shareholders' equity permitted (\$300,000 plus 50% of net income generated, to the extent positive, beginning January 1, 2010)	\$ 313,514
Maximum leverage ratio permitted:	
Ongoing	3.00x
Pro forma for acquisitions	2.50x
Minimum interest coverage ratio permitted	2.50x

While we had no outstanding borrowings on our \$300 million credit facility as of December 31, 2010, noncompliance with any of the debt covenants may have a material adverse effect on financial condition or liquidity in the event such noncompliance cannot be cured or should we be unable to obtain a waiver from the lenders. Renegotiation of the covenant(s) through an amendment to the credit agreement may effectively cure the noncompliance, but may have an effect on financial condition or liquidity depending upon how the covenant is renegotiated.

We are obligated to make future payments under various contracts as set forth below:

(In Millions)	Payments Due by Period							Total
	2011	2012	2013	2014	2015	Remainder		
Debt	\$.2	\$.1	\$.1	\$ -	\$ -	\$ -	\$.4	
Operating leases:								
AFBS (formerly Therics)	.4	-	-	-	-	-	.4	
Other	1.3	1.7	1.6	1.7	1.1	3.2	10.6	
Estimated contributions required ⁽¹⁾ :								
Defined benefit plans	.2	1.9	.2	.2	.2	1.5	4.2	
Other postretirement benefits	.4	.5	.5	.5	.5	5.0	7.4	
Capital expenditure commitments ⁽²⁾	3.4	-	-	-	-	-	3.4	
Estimated obligations relating to uncertain tax positions ⁽³⁾	-	-	-	-	-	1.2	1.2	
Other ⁽⁴⁾	.5	-	-	-	.3	-	.8	
Total	\$ 6.4	\$ 4.2	\$ 2.4	\$ 2.4	\$ 2.1	\$ 10.9	\$ 28.4	

- (1) Estimated minimum required contributions for defined benefit plans and benefit payments for other postretirement plans are based on actuarial estimates using current assumptions for discount rates, long-term rate of return on plan assets, rate of compensation increases and health care cost trends. The expected defined benefit plan contribution estimates for 2011 through 2020 were determined under provisions of the Pension Protection Act of 2006 using the preliminary assumptions chosen by Tredegar for the 2010 plan year. Tredegar has determined that it is not practicable to present defined benefit contributions and other postretirement benefit payments beyond 2020. See Note 11 on page 65.
- (2) Represents contractual obligations for plant construction and purchases of real property and equipment. See Note 13 on page 70.
- (3) Amounts for which reasonable estimates about the timing of payments cannot be made are included in the remainder column.
- (4) Includes contractual severance and derivative settlement payments and the expected contingent earnout from our purchase of the assets of Bright View.

We believe that existing borrowing availability, our current cash balances and our cash flow from operations will be sufficient to satisfy our working capital, capital expenditure and dividend requirements for the foreseeable future.

From time to time, we enter into transactions with third parties in connection with the sale of assets or businesses in which we agree to indemnify the buyers or third parties involved in the sale for certain liabilities or risks related to the assets or business. Also, in the ordinary course of our business, we may enter into agreements with third parties for the sale of goods or services that may contain indemnification provisions. In the event that an indemnification claim is asserted, liability for indemnification would be subject to an assessment of the underlying facts and circumstances under the terms of the applicable agreement. Further, any indemnification payments may be limited or barred by a monetary cap, a time limitation, or a deductible or basket. For these reasons, we are unable to estimate the maximum potential amount of the potential future liability under the indemnity provisions of these agreements. We do, however, accrue for losses for any known contingent liability, including those that may arise from indemnification provisions, when future payment is probable and the amount is reasonably estimable. We disclose contingent liabilities if the probability of loss is reasonably possible and material.

Shareholders' Equity

At December 31, 2010, we had 31,883,173 shares of common stock outstanding and a total market capitalization of \$617.9 million, compared with 33,887,550 shares of common stock outstanding and a total market

capitalization of \$536.1 million at December 31, 2009.

We purchased 2.1 million shares in 2010, 105,497 shares in 2009 and 1.1 million shares in 2008 on the open market at an average price of \$16.54, \$14.44 and \$14.88 per share, respectively. See the issuer purchases of equity securities section of Item 5 on page 10 regarding purchases of our common stock and our standing authorization permitting additional purchases as of December 31, 2010.

Cash Flows

The discussion in this section supplements the information presented in the consolidated statements of cash flows on page 47. Cash flows for discontinued operations have not been separately disclosed in the consolidated statements of cash flows.

Cash provided by operating activities was \$46.4 million in 2010 compared with \$103.2 million in 2009. The decrease is due primarily to normal volatility of working capital components (see the assets and liabilities section beginning on page 28 for discussion of changes in working capital).

Cash used in investing activities was \$22.2 million in 2010 compared with \$31.7 million in 2009. Cash used in investing activities in 2010 includes capital expenditures and the purchase of the assets of Bright View, partially offset by the initial withdrawal proceeds from Harbinger.

Net cash flow used in financing activities was \$42.1 million in 2010, which is primarily due to the repurchase of 2.1 million shares of Tredegar common stock for \$35.1 million, the payment of regular quarterly dividends of \$5.1 million (4 cents per share per quarter) and the payment of debt issuance costs of \$2.1 million related to our new revolving credit facility.

Cash provided by operating activities was \$103.2 million in 2009 compared with \$75.4 million in 2008. The increase is due primarily to normal volatility of working capital components (see the assets and liabilities section beginning on page 28 for discussion of changes in working capital).

Cash used in investing activities was \$31.7 million in 2009 compared with cash provided by investing activities of \$3.5 million in 2008. The change between periods was primarily due to proceeds received in 2008 from the sale of our aluminum extrusions business in Canada of \$23.4 million and a \$16.6 million increase in capital expenditures. Capital expenditures in 2009 primarily included the expansion of capacity at our aluminum extrusion facility Carthage, Tennessee as well as the normal replacement of machinery and equipment.

Net cash flow used in financing activities was \$28.2 million in 2009 and was related to net repayments on our former revolving credit facility with excess cash flow of \$21.5 million, the payment of regular quarterly dividends of \$5.4 million (4 cents per share per quarter) and repurchase of 105,497 shares of Tredegar common stock for \$1.5 million.

Quantitative and Qualitative Disclosures about Market Risk

Tredegar has exposure to the volatility of interest rates, polyethylene and polypropylene resin prices, aluminum ingot and scrap prices, energy prices, foreign currencies and emerging markets. See the assets and liabilities section beginning on page 28 regarding credit agreement and interest rate exposures related to borrowings under the credit agreement.

Changes in resin prices, and the timing of those changes, could have a significant impact on profit margins in Film Products. Profit margins in Aluminum Extrusions are sensitive to fluctuations in aluminum ingot and scrap prices as well as natural gas prices (natural gas is the principal energy source used to operate our casting furnaces). There is no assurance of our ability to pass through higher raw material and energy costs to our customers.

See the executive summary beginning on page 19 and the business segment review beginning on page 36 for discussion regarding the impact of the lag in the pass-through of resin price changes. The volatility of average quarterly prices of low density polyethylene resin in the U.S. (a primary raw material for Film Products) is shown in the chart below.

Source: Quarterly averages computed by Tredegar using monthly data provided by Chemical Data Inc. ("CDI"). In January 2005, CDI reflected a 4 cents per pound non-market adjustment based on their estimate of the growth of discounts over the 2000 to 2003 period. The 4th quarter 2004 average rate of 67 cents per pound is shown on a pro forma basis as if the non-market adjustment was made in October 2004. In January 2010, CDI reflected a 15 cents per pound non-market adjustment based on their estimate of the growth of discounts over the 2005 to 2009 period. The 4th quarter 2009 average rate of 61 cents per pound is shown on a pro forma basis as if the non-market adjustment was made in October 2009.

Resin prices in Europe, Asia and South America have exhibited similar trends. The price of resin is driven by several factors including supply and demand and the price of oil, ethylene and natural gas. To address fluctuating resin prices, Film Products has index-based pass-through raw material cost agreements for the majority of its business. However, under certain agreements, changes in resin prices are not passed through for an average period of 90 days (see the executive summary on page 19 and the business segment review on page 36 for more information).

In the normal course of business, we enter into fixed-price forward sales contracts with certain customers for the sale of fixed quantities of aluminum extrusions at scheduled intervals. In order to hedge our exposure to aluminum price volatility (see the chart below) under these fixed-price arrangements, which generally have a duration of not more than 12 months, we enter into a combination of forward purchase commitments and futures contracts to acquire or hedge aluminum, based on the scheduled deliveries. See Note 6 on page 59 for more information. The volatility of quarterly average aluminum prices is shown in the chart below.

Source: Quarterly averages computed by Tredegar using daily closing data provided by Bloomberg.

In Aluminum Extrusions, we hedge from time-to-time a portion of our exposure to natural gas price volatility by entering into fixed-price forward purchase contracts with our natural gas suppliers. We estimate that, in an unhedged situation, every \$1 per mmBtu per month change in the market price of natural gas has a \$70,000 impact on the continuing monthly operating profit for our U.S. operations in Aluminum Extrusions. In September 2005, we announced an energy surcharge for our aluminum extrusions business in the U.S. to be applied when the previous quarter's NYMEX natural gas average settlement price is in excess of \$8.85 per mmBtu. The volatility of quarterly average natural gas prices is shown in the chart below.

Source: Quarterly averages computed by Tredegar using monthly NYMEX settlement prices.

We sell to customers in foreign markets through our foreign operations and through exports from U.S. plants. The percentage of sales and total assets for ongoing operations related to foreign markets for 2010, 2009 and 2008 are as follows:

Tredegar Corporation - Continuing Ongoing Operations									
Percentage of Net Sales and Total Assets Related to Foreign Markets									
	2010			2009			2008		
	% of Total Net Sales *		% Total Assets - Foreign	% of Total Net Sales *		% Total Assets - Foreign	% of Total Net Sales *		% Total Assets - Foreign
	Exports From U.S.	Foreign Oper- ations	Foreign Oper- ations *	Exports From U.S.	Foreign Oper- ations	Foreign Oper- ations *	Exports From U.S.	Foreign Oper- ations	Foreign Oper- ations *
Canada	7	-	-	6	-	-	5	-	-
Europe	1	16	15	1	19	14	1	18	15
Latin America	-	3	2	-	3	2	-	3	2
Asia	10	5	7	7	6	6	3	7	7
Total % exposure to foreign markets	18	24	24	14	28	22	9	28	24

* The percentages for foreign markets are relative to Tredegar's total net sales and total assets from ongoing operations (consolidated net sales and total assets from continuing operations excluding cash and cash equivalents and AFBS (formerly Therics)).

We attempt to match the pricing and cost of our products in the same currency and generally view the volatility of foreign currencies (see trends for the Euro and Chinese Yuan in the chart below) and emerging markets, and the corresponding impact on earnings and cash flow, as part of the overall risk of operating in a global environment. Exports from the U.S. are generally denominated in U.S. Dollars. Our foreign currency exposure on income from continuing foreign operations relates to the Euro, the Chinese Yuan, the Hungarian Forint, the Brazilian Real, and the Indian Rupee.

In Film Products, where we are typically able to match the currency of our sales and costs, we estimate that the change in value of foreign currencies relative to the U.S. Dollar had a negative impact on operating profit of approximately \$1.3 million in 2010 compared with 2009, \$1.9 million in 2009 compared with 2008 and a positive impact of \$3.6 million in 2008 compared with 2007.

Trends for the Euro and Chinese Yuan are shown in the chart below:

Source: Quarterly averages computed by Tredegar using daily closing data provided by Bloomberg.

Business Segment Review

Net sales (sales less freight) and operating profit from ongoing operations are the measures of sales and operating profit used by the chief operating decision maker for purposes of assessing performance.

Film Products

Net Sales. See the executive summary beginning on page 19 for the discussion of net sales (sales less freight) in Film Products in 2010 compared with 2009.

In Film Products, net sales were \$455.0 million in 2009, down 13.0% versus \$522.8 million in 2008. Volume decreased to 206.7 million pounds in 2009 from 221.2 million pounds in 2008. Net sales in 2009 declined compared to 2008 due to the impact on selling prices from the pass-through of lower resin costs, volume declines in personal care materials and packaging films and the unfavorable effect of changes in the U.S. dollar value of currencies for operations outside the U.S.

Operating Profit. See the executive summary beginning on page 19 for the discussion of operating profit in Film Products in 2010 compared with 2009.

Operating profit from ongoing operations was \$64.4 million in 2009, an increase of 19.4% compared with \$53.9 million in 2008. Operating profit from ongoing operations increased in 2009 compared to 2008 as cost reduction efforts, productivity gains, the positive impact of the change in product mix driven mostly by an increase in sales of high-value surface protection materials and the lag in the pass-through of reduced resin costs were partially offset by lower overall sales volumes and the unfavorable effects of foreign currency rates. The estimated impact of the lag in the pass-through of changes in average resin costs and year-end adjustments for inventories accounted for under LIFO was a positive \$1.7 million in 2009 and a negative \$600,000 in 2008. The estimated unfavorable impact from U.S. dollar value currencies for operations outside the U.S. was \$1.9 million in 2009 compared with 2008.

Identifiable Assets. Identifiable assets in Film Products decreased to \$363.3 million at December 31, 2010, from \$371.6 million at December 31, 2009, due primarily to depreciation of \$33.6 million, partially offset by capital

expenditures of \$15.7 million and higher accounts receivable (\$3.7 million) and inventory (\$8.7 million) balances. See the assets and liabilities section beginning on page 28 for further discussion on changes in assets and liabilities.

Identifiable assets in Film Products decreased to \$371.6 million at December 31, 2009, from \$399.9 million at December 31, 2008, due primarily to the depreciation of \$32.2 million, partially offset by capital expenditures of \$11.5 million, and a lower accounts receivable balance (\$4.2 million). See the assets and liabilities section beginning on page 28 for further discussion on changes in assets and liabilities.

Depreciation, Amortization and Capital Expenditures. Depreciation and amortization for Film Products was \$33.8 million in 2010, \$32.4 million in 2009 and \$34.6 million in 2008. The increase in depreciation in 2010 compared with 2009 is primarily related to capital expenditures in 2009 and 2010. The decrease in 2009 compared with 2008 is primarily due to the write-down of certain assets in prior years and lower than normal capital expenditures in the preceding years. We expect depreciation and amortization expense for Film Products will be approximately \$35 million in 2011.

Capital expenditures increased to \$15.7 million in 2010 from \$11.5 million in 2009 compared with \$11.1 million in 2008. Capital expenditures in 2010 include the construction of our new manufacturing facility in India as well as capital spending to support growth initiatives. Capital expenditures in 2009 and 2008 primarily included the normal replacement of machinery and equipment. Capital expenditures in 2011 are expected to be approximately \$27 million.

Aluminum Extrusions (Continuing Operations)

Net Sales and Operating Profit. See the executive summary beginning on page 19 for the discussion of net sales (sales less freight) and operating profit from ongoing U.S. operations of Aluminum Extrusions in 2010 compared with 2009.

Net sales from continuing operations in Aluminum Extrusions were \$177.5 million in 2009, down 47.8% from \$340.3 million in 2008. Operating losses from ongoing U.S. operations were \$6.5 million, a negative change of \$16.6 million from operating profits of \$10.1 million in 2008. Volume from continuing operations was 91.5 million pounds in 2009, down 32.8% from 136.2 million pounds in 2008.

The decrease in net sales for 2009 compared to 2008 was mainly due to lower sales volume and a decrease in average selling prices driven by lower average aluminum costs. Weak market conditions led to decreased shipments in most markets. Shipments in nonresidential construction, which comprised 71% of total volume in 2009, declined by approximately 34% in 2009 compared with 2008. Operating losses from ongoing U.S. operations in 2009 were primarily driven by lower sales volume.

Identifiable Assets. Identifiable assets in Aluminum Extrusions were \$81.7 million at December 31, 2010, \$82.4 million at December 31, 2009 and \$112.3 million at December 31, 2008. The decrease between December 31, 2010 and 2009 can be attributed to lower property, plant and equipment balances from higher depreciation expense due to the recently completed capacity expansion project at our Carthage, Tennessee manufacturing facility and a reduction in inventory balances in an effort to manage working capital in light of an uncertain economic environment, partially offset by an increase in accounts receivable balances as a result of higher volume in the latter half of 2010. The decline of \$29.9 million at the end of 2009 compared with 2008 is mainly due to the goodwill impairment charge of \$30.6 million in 2009 and lower accounts receivable balances of \$13.2 million, partially offset by higher property, plant and equipment balances from capital expenditures of \$22.5 million, net of depreciation expense of \$7.6 million.

Depreciation, Amortization and Capital Expenditures. Depreciation and amortization for Aluminum Extrusions was \$9.1 million in 2010, \$7.6 million in 2009 and \$8.0 million in 2008. The increase between 2010 compared to 2009 is primarily attributed to increased depreciation from the recent capacity expansion project at our Carthage, Tennessee manufacturing facility. We expect depreciation and amortization expense for Aluminum Extrusions to be approximately \$9 million in 2011.

Capital expenditures totaled \$4.3 million in 2010, \$22.5 million in 2009 and \$9.7 million in 2008. Capital expenditures of \$19.0 million in 2009 and \$5.7 million in 2008 reflect spending on the capacity expansion project at

our Carthage, Tennessee manufacturing facility. Capital expenditures are expected to be approximately \$5 million in 2011.

Other

Net Sales and Operating Profit. See the executive summary beginning on page 19 for the discussion of net sales (sales less freight) and operating profit for the continuing operations of the businesses in the Other segment in 2010 compared with 2009.

Identifiable Assets. Identifiable assets in the Other segment were \$19.7 million at December 31, 2010. Other assets primarily consist of investments in mitigation banking properties by Fallings Springs and intellectual property and machinery and equipment utilized by Bright View.

Depreciation, Amortization and Capital Expenditures. Depreciation and amortization expense for the Other segment was \$695,000 in 2010, and capital expenditures for the Other segment were \$179,000 in 2010. Capital expenditures are not expected to be material in 2011.

Item 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See discussion of quantitative and qualitative disclosures about market risk beginning on page 33 in Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

See the index on page 43 for references to the report of the independent registered public accounting firm, the consolidated financial statements and selected quarterly financial data.

Item 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

Item 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), we carried out an evaluation, with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of our disclosure controls and procedures (as defined under Rule 13a-15(e) under the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act, is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance to the Company's management and board of directors regarding the reliability of financial reporting and the preparation and fair presentation of published financial statements in accordance with U.S. generally accepted accounting principles and includes policies and procedures that:

- Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorization of our management and directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the consolidated financial statements.

Internal control over financial reporting includes the controls themselves, monitoring (including internal auditing practices) and actions taken to correct deficiencies as identified.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on their evaluation under the framework in *Internal Control — Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of December 31, 2010.

The effectiveness of our internal control over financial reporting as of December 31, 2010 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included on pages 43-44.

Changes in Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting during the quarter ended December 31, 2010, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. OTHER INFORMATION

None.

PART III

Item 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information concerning directors and persons nominated to become directors of Tredegar to be included in our Proxy Statement under the headings "Election of Directors" and "Tredegar's Board of Directors" is incorporated herein by reference.

The information concerning corporate governance to be included in the Proxy Statement under the heading "Board Meetings, Meetings of Non-Management Directors and the Board Committees" and "Corporate Governance" is incorporated herein by reference.

The information to be included in the Proxy Statement under the heading "Section 16(a) Beneficial Ownership Reporting Requirements" is incorporated herein by reference.

Set forth below are the names, ages and titles of our executive officers:

<u>Name</u>	<u>Age</u>	<u>Title</u>
Nancy M. Taylor	51	President and Chief Executive Officer
Duncan A. Crowdis	58	President, The William L. Bonnell Company and Corporate Vice President
A. Brent King	42	Vice President, General Counsel and Corporate Secretary
Monica Moretti	41	President, Tredegar Film Products Corporation and Corporate Vice President
Kevin A. O'Leary	52	Vice President, Chief Financial Officer and Treasurer
Larry J. Scott	60	Vice President, Audit

Nancy M. Taylor. Ms. Taylor was elected President and Chief Executive Officer effective February 1, 2010. Prior to February 1, 2010, Ms. Taylor was President of Tredegar Films Products Corporation and Executive Vice President. She was elected Executive Vice President effective January 1, 2009. She was elected President of Tredegar Film Products Corporation effective April 5, 2005. She was elected Senior Vice President effective November 1, 2004. Ms. Taylor served as Senior Vice President, Strategy and Special Projects from November 1, 2004 until April 5, 2005.

Duncan A. Crowdis. Mr. Crowdis was elected Vice President effective January 1, 2009. Mr. Crowdis was elected President of The William L. Bonnell Company, Inc. on June 13, 2005, and continues to serve in such capacity. Mr. Crowdis served as Plant Manager of The William L. Bonnell Company, Inc. from March 2005 until June 2005. He previously served as Chief Process Officer of The William L. Bonnell Company, Inc. from December 2002 until March 2005.

A. Brent King. Mr. King was elected Vice President, General Counsel and Corporate Secretary on October 20, 2008, the date that he joined Tredegar. From October 2005 until October 2008, he served as General Counsel at Hilb Rogal & Hobbs. Mr. King was Vice President and Assistant Secretary for Hilb Rogal & Hobbs from October 2001 to October 2008. He served as Associate General Counsel for Hilb Rogal & Hobbs from October 2001 to October 2005.

Kevin A. O'Leary. Mr. O'Leary was elected Vice President, Chief Financial Officer and Treasurer effective December 11, 2009. He was appointed Vice President, Finance, of Tredegar Film Products Corporation, effective January 1, 2009 until December 11, 2009 and served as Director, Finance, of Tredegar Film Products Corporation from October 2008 until January 2009. Mr. O'Leary previously served as Vice President, Finance – Mergers and

Acquisitions of the Avery Dennison Retail Information Services Group (“Avery Dennison RIS”), a division of Avery Dennison Corporation from March 2007 through August 2008. He served as General Manager of the Printer Systems division of Avery Dennison RIS from February 2006 through February 2007 and as Director, Finance, of Avery Dennison RIS from August 2004 through January 2006.

Monica Moretti. Ms. Moretti was elected Vice President on May 18, 2010. She was elected President of Tredegar Film Products Corporation and its subsidiaries effective February 1, 2010. She served as Vice President and General Manager, Consumer Care, of Tredegar Film Products Corporation from May 2008 until January 31, 2010 and as General Manager, Hygienics, of Tredegar Film Products Corporation from March 2008 until May 2008. Ms. Moretti served as Chief Marketing Officer and Vice President, Marketing and Technology, of H.B. Fuller Company from February 2007 until March 2008. She served as Group Vice President, Marketing and Technology, of H.B. Fuller Company from December 2005 until February 2007 and as Global Business Unit Manager, Assembly, of H.B. Fuller Company from December 2004 until December 2005.

Larry J. Scott. Mr. Scott was elected Vice President, Audit, on May 24, 2000.

We have adopted a Code of Conduct that applies to all of our directors, officers and employees (including our chief executive officer, chief financial officer and principal accounting officer) and have posted the Code of Conduct on our website. We intend to satisfy the disclosure requirement under Item 10 of Form 8-K relating to amendments to or waivers from any provision of our Code of Conduct applicable to the chief executive officer, chief financial officer and principal accounting officer by posting this information on our website. Our Internet address is www.tredegar.com. The information on or that can be accessed through our website is not, and shall not be deemed to be, a part of this report or incorporated into other filings we make with the SEC.

Item 11. EXECUTIVE COMPENSATION

The information to be included in the Proxy Statement under the headings “Compensation of Directors,” “Board Meetings of Non-Management Directors and Board Committees - Executive Compensation Committee Interlocks and Insider Participation,” “Compensation Discussion and Analysis,” “Executive Compensation Committee Report” and “Compensation of Executive Officers” is incorporated herein by reference.

Item 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information to be included in the Proxy Statement under the heading "Stock Ownership" is incorporated herein by reference. The following table summarizes information with respect to equity compensation plans under which securities are authorized for issuance as of December 31, 2010.

Column (a)	Column (b)	Column (c)	Column (d)
Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans, Excluding Securities Reflected in Column
Equity compensation plans approved by security holders	*1,262,050	\$16.64	3,151,868
Equity compensation plans not approved by security holders	-	-	-
Total	1,262,050	\$16.64	3,151,868

* Includes performance stock units that give the holder the right to receive shares of Tredegar common stock upon the satisfaction of certain performance criteria.

Item 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information to be included in the Proxy Statement under the headings "Certain Relationships and Related Transactions", "Tredegar's Board of Directors" and "Board Meetings, Meetings of Non-Management Directors and Board Committees" is incorporated herein by reference.

Item 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The following is incorporated herein by reference:

- Information on accounting fees and services to be included in the Proxy Statement under the heading "Audit Fees;" and
- Information on the Audit Committee's procedures for pre-approving certain audit and non-audit services to be included in the Proxy Statement under the heading "Board Meetings, Meetings of Non-Management Directors and Board Committees - Audit Committee Matters."

PART IV

Item 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

See Exhibit Index on pages 85-86.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Tredegar Corporation:

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Tredegar Corporation and its subsidiaries (the "Company") at December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2010 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal

control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO FINANCIAL STATEMENTS

Tredegar Corporation and Subsidiaries

1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Nature of Operations. Tredegar Corporation and subsidiaries (collectively “Tredegar,” “we,” “us” or “our”) are primarily engaged in the manufacture of plastic films and aluminum extrusions. See Note 15 regarding restructurings and Note 17 regarding discontinued operations.

Basis of Presentation. The consolidated financial statements include the accounts and operations of Tredegar and all of its majority-owned subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation. On February 12, 2008, we sold our aluminum extrusions business in Canada. All historical results for this business have been reflected as discontinued operations in these financial statements. Certain amounts for the prior years have been reclassified to conform to the current year’s presentation.

The preparation of financial statements in conformity with United States (“U.S.”) generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

Foreign Currency Translation. The financial statements of subsidiaries located outside the U.S., where the local currency is the functional currency, are translated into U.S. Dollars using exchange rates in effect at the period end for assets and liabilities and average exchange rates during each reporting period for results of operations. Adjustments resulting from the translation of these financial statements are reflected as a separate component of shareholders’ equity. We have no subsidiaries located outside the U.S. where the U.S. Dollar is the functional currency.

Transaction and remeasurement gains or losses included in income were not material in 2010, 2009 and 2008. These amounts do not include the effects between reporting periods that exchange rate changes have on income of our locations outside the U.S, that result from translation into U.S. Dollars.

Cash and Cash Equivalents. Cash and cash equivalents consist of cash on hand in excess of daily operating requirements and highly liquid investments with original maturities of three months or less. At December 31, 2010 and 2009, Tredegar had cash and cash equivalents of \$73.2 million and \$90.7 million, respectively, including funds held in locations outside the U.S. of \$35.7 million and \$34.2 million, respectively.

Our policy permits investment of excess cash in marketable securities that have the highest credit ratings and maturities of less than one year. The primary objectives of the policy are safety of principal and liquidity.

Accounts and Notes Receivable. Accounts receivable are stated at the amount invoiced to customers less allowances for doubtful accounts and sales returns. Accounts receivable are non-interest bearing and arise from the sale of product to customers under typical industry trade terms. Notes receivable are not significant. Past due amounts are determined based on established terms and charged-off when deemed uncollectible. The allowance for doubtful accounts is determined based on our assessment of probable losses taking into account past due amounts, customer credit profile, historical experience and current economic conditions. Other receivables include value-added taxes related to certain foreign subsidiaries and other miscellaneous receivables due within one year.

Inventories. Inventories are stated at the lower of cost or market, with cost determined on the last-in, first-out (“LIFO”) basis, the weighted average cost or the first-in, first-out basis. Cost elements included in work-in-process and finished goods inventories are raw materials, direct labor and manufacturing overhead.

Property, Plant and Equipment. Accounts include costs of assets constructed or purchased, related delivery and installation costs and interest incurred on significant capital projects during their construction periods. Expenditures for renewals and betterments also are capitalized, but expenditures for repairs and maintenance are expensed as incurred. The cost and accumulated depreciation applicable to assets retired or sold are removed from the respective

accounts, and gains or losses thereon are included in income.

Capital expenditures for property, plant and equipment include capitalized interest of \$37,000 in 2010, \$116,000 in 2009 and \$228,000 in 2008.

Depreciation is computed primarily by the straight-line method based on the estimated useful lives of the assets, which range from 10 to 25 years for buildings and land improvements and 2 to 11 years for machinery and equipment. The average depreciation period for machinery and equipment is approximately 10 years in Film Products and for the continuing operations of Aluminum Extrusions.

Investments in Private Entities with Less Than or Equal to 50% Voting Ownership Interest. We account for our investments in private entities where our voting ownership is less than or equal to 50% based on the facts and circumstances surrounding the investment. We are required to account for investments under the consolidation method in situations where we are the primary beneficiary of a variable interest entity. The primary beneficiary is the party that has a controlling financial interest in a variable interest entity. We are deemed to have a controlling financial interest if we have (i) the power to direct activities of the variable interest entity that most significantly impact its economic performance and (ii) the obligation to absorb losses or the right to receive benefits from the variable interest entity that could potentially be significant to its operations.

If we are not deemed the primary beneficiary in an investment in a private entity then we select either: (i) the fair value method or (ii) either (a) the cost method if we do not have significant influence over operating and financial policies of the investee or (b) the equity method if we do have significant influence.

U.S. generally accepted accounting principles requires disclosure of the level within the fair value hierarchy in which fair value measurements in their entirety fall, segregating fair value measurements using quoted prices in active markets for identical assets or liabilities (Level 1), significant other observable inputs (Level 2), and significant unobservable inputs (Level 3).

Goodwill and Other Intangibles. The excess of the purchase price over the fair value of identifiable net assets of acquired companies is allocated to goodwill. We assess goodwill for impairment when events or circumstances indicate that the carrying value may not be recoverable, or, at a minimum, on an annual basis (December 1st of each year). Our reporting units include, but are not limited to, Film Products and Aluminum Extrusions, each of which may have separately identifiable operating net assets (operating assets including goodwill and intangible assets net of operating liabilities). As of December 31, 2010, Film Products was the only reporting unit that carried a goodwill balance.

We estimate the fair value of our reporting units using discounted cash flow analysis and comparative enterprise value-to-EBITDA multiples. Based on the severity of the economic downturn and its impact on the sales volumes of our aluminum extrusions business (a 36.8% decline in sales volume in the first quarter of 2009 compared with the first quarter of 2008), the resulting operating loss in the first quarter of 2009, possible future losses and the uncertainty in the amount and timing of an economic recovery, we determined that impairment indicators existed in the first quarter of 2009. Upon completing the impairment analysis as of March 31, 2009, a goodwill impairment charge of \$30.6 million (\$30.6 million after tax) was recognized in Aluminum Extrusions. This impairment charge represented the entire amount of goodwill associated with the Aluminum Extrusions reporting unit, and it represents the only goodwill impairment recorded by Tredegar. The goodwill of Film Products continues to be tested for impairment at the annual testing date, with the estimated fair value of Film Products exceeding the carrying value of its net assets by a wide margin.

The components of goodwill and other intangibles at December 31, 2010 and 2009, and related amortization periods for continuing operations are as follows:

(In Thousands)	2010	2009	Amortization Periods
Carrying value of goodwill:			
Film Products	\$ 103,639	\$ 104,290	Not amortized
Carrying value of other intangibles:			
Film Products (cost basis of \$1,172 in 2010 and 2009)	137	252	Not more than 17 yrs.
Other (cost basis of \$2,687 in 2010)	2,341	-	Not more than 15 yrs.
Total carrying value of other intangibles	2,478	252	
Total carrying value of goodwill and other intangibles	\$ 106,117	\$ 104,542	

On February 3, 2010, we purchased the assets of Bright View Technologies Corporation (“Bright View”). The primary identifiable intangible assets purchased in the transaction were patented and unpatented technology, which are being amortized over a weighted average period of 12 years.

A reconciliation of the beginning and ending balances of goodwill and other intangibles for each of the three years in the period ended December 31, 2010 is as follows:

(In Thousands)	2010	2009	2008
Goodwill and other intangibles:			
Net carrying value, beginning of year	\$ 104,542	\$ 135,075	\$ 135,907
Acquisition	2,394	-	-
Amortization	(466)	(120)	(123)
Goodwill impairment charge	-	(30,559)	-
Increase (decrease) due to foreign currency translation and other	(353)	146	(709)
Total carrying value of goodwill and other intangibles	\$ 106,117	\$ 104,542	\$ 135,075

Impairment of Long-Lived Assets. We review long-lived assets for possible impairment when events indicate that an impairment may exist. For assets to be held and used in operations, if events indicate that an asset may be impaired, we estimate the future unlevered pre-tax cash flows expected to result from the use of the asset and its eventual disposition. Assets are grouped for this purpose at the lowest level for which there are identifiable and independent cash flows. If the sum of these undiscounted pre-tax cash flows is less than the carrying amount of the asset, an impairment loss is recognized. Measurement of the impairment loss is based on the estimated fair value of the asset, generally determined on a discounted after-tax cash flow basis.

Assets to be disposed of are reported at the lower of their carrying amount or estimated fair value less cost to sell, with an impairment loss recognized for any write-down required.

Pension Costs and Postretirement Benefit Costs Other than Pensions. Pension costs and postretirement benefit costs other than pensions are accrued over the period employees provide service to Tredegar. Liabilities and expenses for pension plans and other postretirement benefits are determined using actuarial methodologies and incorporate significant assumptions, including the rate used to discount the future estimated liability, the long-term rate of return on plan assets, and several assumptions relating to the employee workforce, and we recognize the funded status of our pension and other postretirement plans in the accompanying consolidated balance sheets. Our policy is to fund our pension plans at amounts not less than the minimum requirements of the Employee Retirement Income Security Act of 1974 and to fund postretirement benefits other than pensions when claims are incurred.

Postemployment Benefits. We periodically provide certain postemployment benefits purely on a discretionary basis. Related costs for these programs are accrued when it is probable that benefits will be paid and amounts can be reasonably estimated. All other postemployment benefits are either accrued under current benefit plans or are not material to our financial position or results of operations.

Revenue Recognition. Revenue from the sale of products, which is shown net of estimated sales returns and allowances, is recognized when title has passed to the customer, the price of the product is fixed and determinable, and collectability is reasonably assured. Amounts billed to customers related to freight have been classified as sales in the

accompanying consolidated statements of income. The cost of freight has been classified as a separate line in the accompanying consolidated statements of income. Taxes assessed by a governmental authority that are both imposed on and concurrent with a specific revenue-producing transaction between Tredegar and its customers (such as value-added taxes) are accounted for on a net basis and therefore excluded from revenues.

Research & Development (“R&D”) Costs. R&D costs are expensed as incurred and include primarily salaries, wages, employee benefits, equipment depreciation, facility costs and the cost of materials consumed relating to R&D efforts. R&D costs include a reasonable allocation of indirect costs.

Income Taxes. Income taxes are recognized during the period in which transactions enter into the determination of income for financial reporting purposes, with deferred income taxes being provided at enacted statutory tax rates on the differences between the financial reporting and tax bases of assets and liabilities (see Note 14). We accrue U.S. federal income taxes on unremitted earnings of our foreign subsidiaries. The benefit of an uncertain tax position is included in the accompanying financial statements when we determine that it is more likely than not that the position will be sustained, based on the technical merits of the position, if the taxing authority examines the position and the dispute is litigated. This determination is made on the basis of all the facts, circumstances and information available as of the reporting date.

Earnings Per Share. Basic earnings per share is computed using the weighted average number of shares of common stock outstanding. Diluted earnings per share is computed using the weighted average common and potentially dilutive common equivalent shares outstanding, determined as follows:

	2010	2009	2008
Weighted average shares outstanding used to compute basic earnings per share	32,291,556	33,861,171	33,976,833
Incremental shares attributable to stock options and restricted stock	280,565	-	216,887
Shares used to compute diluted earnings per share	32,572,121	33,861,171	34,193,720

Incremental shares attributable to stock options and restricted stock are computed using the average market price during the related period. During 2010, 2009 and 2008, the average out-of-the-money options to purchase shares that were excluded from the calculation of incremental shares attributable to stock options and restricted stock was 324,558, 545,450 and 507,982, respectively.

Stock-Based Employee Compensation Plans. Compensation expense is recorded on all share-based awards based upon its calculated fair value. The fair value of stock option awards was estimated as of the grant date using the Black-Scholes options-pricing model. The assumptions used in this model for valuing Tredegar stock options granted in 2010, 2009 and 2008 are as follows:

	2010	2009	2008
Dividend yield	0.9%	0.9%	1.0%
Weighted average volatility percentage	46.6%	39.9%	39.0%
Weighted average risk-free interest rate	2.7%	2.1%	3.0%
Holding period (years):			
Officers	6.0	6.0	6.0
Management	5.0	5.0	5.0
Weighted average exercise price at date of grant (also weighted average market price at date of grant):			
Officers	\$ 17.18	\$ 18.12	\$ 15.64
Management	17.13	17.81	15.81

The dividend yield is the dividend yield on our common stock at the date of grant, which we believe is a reasonable estimate of the expected yield during the holding period. We calculate expected volatility based on the historical volatility of our common stock using a sequential period of historical data equal to the expected holding period of the option. We have no reason to believe that future volatility for this period is likely to differ from the past. The assumed risk-free interest rate is based on observed interest rates (zero coupon U.S. Treasury debt securities) appropriate for the expected holding period. The expected holding period and forfeiture assumptions are based on historical experience. Estimated forfeiture assumptions are reviewed through the vesting period. Adjustments are made if actual forfeitures differ from previous estimates. The cumulative effect of a change in estimated forfeitures is recognized in the period of the change.

Tredegear stock options granted during 2010, 2009 and 2008, and related estimated fair value at the date of grant, are as follows:

	2010	2009	2008
Stock options granted (number of shares):			
Officers	190,000	99,600	220,000
Management	126,000	183,800	181,000
Total	316,000	283,400	401,000
Estimated weighted average fair value of options per share at date of grant:			
Officers	\$ 7.47	\$ 7.53	\$ 6.01
Management	7.00	6.93	5.48
Total estimated fair value of stock options granted (in thousands)	\$ 2,301	\$ 2,023	\$ 2,314

Additional disclosure of Tredegear stock options is included in Note 10.

Financial Instruments. We use derivative financial instruments for the purpose of hedging aluminum price volatility and currency exchange rate exposures that exist as part of ongoing business operations. Our derivative financial instruments are designated as and qualify as cash flow hedges and are recognized in the accompanying balance sheet at fair value. A change in the fair value of the derivative that is highly effective as and that is designated and qualifies as a cash flow hedge is recorded in other comprehensive income. Gains and losses reported in other comprehensive income are reclassified to earnings in the periods in which earnings are affected by the variability of cash flows of the hedged transaction. Such gains and losses are reported on the same line as the underlying hedged item, and the cash flows related to financial instruments are classified in the consolidated statements of cash flows in a manner consistent with those of the transactions being hedged. Any hedge ineffectiveness (which represents the amount by which the changes in the fair value of the derivative exceed the variability in the cash flows of the forecasted transaction) is recorded in current period earnings. The amount of gains and losses recognized for hedge ineffectiveness was immaterial in 2010, 2009 and 2008.

Our policy requires that we formally document all relationships between hedging instruments and hedged items, as well as our risk management objective and strategy for undertaking various hedge transactions. We also formally assess (both at the hedge's inception and on an ongoing basis) whether the derivatives that are used in hedging transactions have been highly effective in offsetting changes in the fair value or cash flows of hedged items and whether those derivatives may be expected to remain highly effective in future periods. When it is determined that a derivative is not (or has ceased to be) highly effective as a hedge, we discontinue hedge accounting prospectively.

As a policy, we do not engage in speculative or leveraged transactions, nor do we hold or issue financial instruments for trading purposes. Additional disclosure of our utilization of derivative hedging instruments is included in Note 6.

Comprehensive Income or Loss. Comprehensive income or loss, which is included in the consolidated statement of shareholders' equity, is defined as net income or loss and other comprehensive income or loss. Other comprehensive income or loss includes changes in foreign currency translation adjustments, unrealized gains and losses on derivative

financial instruments, prior service costs and net gains or losses from pension and other postretirement benefit plans arising during the period and amortization of these prior service costs and net gains or losses adjustments, all recorded net of deferred income taxes directly in shareholders' equity.

Recently Issued Accounting Standards. The Financial Accounting Standards Board ("FASB") Emerging Issues Task Force issued a consensus updating accounting standards for revenue recognition for multiple-deliverable arrangements in October 2009. The stated objective of the accounting standards update was to address the accounting for multiple-deliverable arrangements to enable vendors to account for products or services (deliverables) separately rather than as a combined unit. The revision of current FASB guidance provides amended methodologies for separating consideration in multiple-deliverable arrangements and expands disclosure requirements. The accounting standards update will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010, with early adoption permitted. We do not expect these FASB rules to have a material impact on our financial statements and disclosures.

The FASB issued guidance in January 2010 that requires new disclosures for fair value measurements and provides clarification for existing disclosure requirements. More specifically, this update will require (a) an entity to disclose separately the amounts of significant transfers in and out of Levels 1 and 2 fair value measurements and to describe the reasons for such transfers; and (b) information about purchases, sales, issuances and settlements to be presented separately (i.e. present the activity on a gross basis rather than net) in the reconciliation for fair value measurements using significant unobservable inputs (Level 3 inputs). This update also clarifies existing disclosure requirements for the level of disaggregation used for classes of assets and liabilities measured at fair value and requires disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements using Level 2 and Level 3 inputs. The new disclosures and clarifications of existing disclosures were effective for interim and annual reporting periods beginning after December 15, 2009, except for disclosures about the purchase, sale, issuance and settlement activity of Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for the interim periods in that year. The adoption of these new disclosures and clarifications of existing disclosures have not and are not expected to materially expand our current financial statement footnote disclosures.

In March 2010, the Patient Protection and Affordable Care Act (the "PPACA") was signed into law, as was the Health Care and Education Reconciliation Act of 2010, which amends certain aspects of the PPACA. Included in the provisions of these laws are changes to the taxation related to the federal subsidy available to companies that provide retiree health benefit plans that include a benefit that is at least actuarially equivalent to the benefits of Medicare Part D. Our retiree medical plan does not include prescription drug coverage for Medicare-eligible retirees, so we are not impacted by changes to the taxation of this federal subsidy. We will continue to assess the other potential long-term impacts, if any, that any related amendments or clarification of this legislation may have on future results of operations, cash flows or financial position related to our health care benefits and postretirement health care obligations, as events warrant.

2 INVESTMENTS

During the third quarter of 2007, we invested \$6.5 million in a privately held specialty pharmaceutical company. In the fourth quarter of 2008, we invested an additional \$1.0 million as part of a new round of equity financing completed by the investee. The company is developing and commercializing state of the art drug delivery systems designed to improve patient compliance and outcomes, and our ownership interest on a fully diluted basis is approximately 21%. The investment is accounted for under the fair value method. We elected the fair value option over the equity method of accounting since our investment objectives are similar to those of venture capitalists, which typically do not have controlling financial interests. In 2008, we recognized an unrealized gain of \$5.6 million (\$3.6 million after taxes) based on the valuation of our ownership interest implied from a new round of equity financing completed for the investee in the fourth quarter of 2008. We recognized an additional unrealized gain of \$5.1 million (\$3.2 million after taxes) in the fourth quarter of 2009 for the estimated appreciation of our ownership interest upon the investee entering into an exclusive licensing agreement that included an upfront payment, additional potential milestone payments and tiered royalties on sales of any products commercialized under the license. In the fourth

quarter of 2010, we recognized an unrealized loss of \$2.2 million (\$1.4 million after taxes) for the estimated changes in the fair value of our investment after the investee, which had its new drug application to the Food & Drug Administration (“FDA”) accepted for review during the quarter, reassessed its projected timeframe for obtaining final marketing approval from the FDA. Unrealized gains (losses) associated with this investment are included in “Other income (expense), net” in the consolidated statements of income and separately stated in the segment operating profit table in Note 3.

At December 31, 2010 and 2009, the estimated fair value of our investment (included in “Other assets and deferred charges” in the consolidated balance sheets) was \$16.0 million and \$18.2 million, respectively. On the date of our most recent investment (December 15, 2008), we believe that the amount we would be paid for our ownership interest and liquidation preferences was based on Level 2 inputs, including investments by other investors. Subsequent to December 15, 2008, and until the next round of financing, we believe fair value estimates drop to Level 3 inputs since there is no secondary market for our ownership interest. In addition, the specialty pharmaceutical company currently has no product sales. Accordingly, after the latest financing and until the next round of financing or any other significant financial transaction, value estimates will primarily be based on assumptions relating to meeting product development and commercialization milestones, cash flow projections (projections of development and commercialization milestone payments, sales, costs, expenses, capital expenditures and working capital investment) and discounting of these factors for the high degree of risk. As a result, any future changes in the estimated fair value of our ownership interest will likely be attributed to a new round of financing, a merger or initial public offering or adjustments to the timing or magnitude of cash flows associated with development and commercialization milestones. If the company does not meet its development and commercialization milestones and there are indications that the amount or timing of its projected cash flows or related risks are unfavorable versus our most recent valuation, or a new round of financing or other significant financial transaction indicates a lower enterprise value, then our estimate of the fair value of our ownership interest in the company is likely to decline. Adjustments to the estimated fair value of our investment will be made in the period upon which such changes can be quantified.

Had we not elected to account for our investment under the fair value method, we would have been required to use the equity method of accounting. On December 31, 2008, the privately held specialty pharmaceutical company was converted from a limited liability company taxed as a pass-through entity (partnership) to a corporation. Substantially all shareholder rights from the limited liability company carried over in the conversion. Our allocation of losses for tax purposes as a pass-through entity in 2008 was approximately \$4.8 million.

The condensed balance sheets for the specialty pharmaceutical company at December 31, 2010 and 2009 and related condensed statements of income for the last three years ended December 31, 2010, that were reported to us by the investee, are provided below:

(In Thousands)	December 31,		December 31,	
	2010	2009	2010	2009
<u>Assets:</u>				
Cash & cash equivalents	\$ 18,819	\$ 22,835

Total assets	\$ 26,569	\$ 28,150		
	2010	2009	2008	
<u>Revenues & Expenses:</u>				
Revenues	\$ 29,099	\$ 2,062	\$ -	
Expenses and other, net	(10,426)	(6,732)	(7,321)	
Income tax (expense) benefit	(6,584)	2,309	-	
Net income (loss)	\$ 12,089	\$ (2,361)	\$ (7,321)	

On April 2, 2007, we invested \$10.0 million in Harbinger Capital Partners Special Situations Fund, L.P. (“Harbinger”), a private investment fund that is subject to limitations on withdrawal. There is no secondary market for

interests in the fund. Our investment in Harbinger, which represents less than 2% of its total partnership capital, is accounted for under the cost method. The December 31, 2010 and 2009 carrying value in the consolidated balance sheets (included in "Other assets and deferred charges") was equal to our cost basis of \$6.4 million and \$10.0 million, respectively. The carrying value at December 31, 2010 reflected the receipt of the first installments of withdrawal proceeds, which started in August 2010. The timing and amount of future withdrawal proceeds were not known as of December 31, 2010. There were no gains or losses associated with our investment in Harbinger in 2010. Gains on our investment in Harbinger will be recognized when the amounts expected to be collected from our withdrawal from the investment are known, which will likely be when cash in excess of our remaining carrying value is received. Losses will be recognized if management believes it is probable that future withdrawal proceeds will not exceed the remaining carrying value.

At December 31, 2010 and 2009, our reported capital account value in Harbinger was \$9.6 million and \$14.5 million, respectively.

3 BUSINESS SEGMENTS

In February 2010, we added a fourth segment, Other, comprised of the start-up operations of Bright View and Falling Springs, LLC ("Falling Springs"). Bright View is a developer and producer of high-value microstructure-based optical films for the LED (light emitting diode) and fluorescent lighting markets. Falling Springs develops, owns and operates multiple mitigation banks. Through the establishment of perpetual easements to restore, enhance and preserve wetland, stream or other protected environmental resources, these mitigation banks create saleable credits that are used by the purchaser of credits to offset the negative environmental impacts from private and public development projects.

Information by business segment and geographic area for the last three years is provided below. For periods prior to 2010, net sales and income (loss) from ongoing operations for Falling Springs (which were immaterial) have been included in "Corporate expense, net" and identifiable assets for this business (which were immaterial) have been included in "General corporate" in order to reflect the strategic view and structure of operations during this time period. There are no accounting transactions between segments and no allocations to segments. Net sales (sales less freight) and operating profit from ongoing operations are the measures of sales and operating profit used by the chief operating decision maker for purposes of assessing performance. Film Products' net sales to The Procter & Gamble Company ("P&G") totaled \$273.1 million in 2010, \$253.5 million in 2009 and \$282.7 million in 2008. These amounts include plastic film sold to others that convert the film into materials used with products manufactured by P&G.

<i>Net Sales</i>

Income (loss) from discontinued operations (a)	-	-	(705)
Net income (loss)	\$ 27,027	\$ (1,353)	\$ 28,936

- (a) See Notes 1, 2 and 15 for more information on losses associated with plant shutdowns, asset impairments and restructurings, unusual items, gains or losses from sale of assets, gains or losses on an investment accounted for under the fair value method and other items.
- (b) We recognize in the balance sheets the funded status of each of our defined benefit pension and other postretirement plans. The funded status of our defined benefit pension plan was a net liability of \$8.3 million, \$6.0 million and \$17.1 million in "Other noncurrent liabilities" as of December 31, 2010, 2009 and 2008. See Note 11 for more information on our pension and other postretirement plans.
- (c) The difference between total consolidated sales as reported in the consolidated statements of income and segment and geographic net sales reported in this note is freight of \$17.8 million in 2010, \$16.1 million in 2009 and \$20.8 million in 2008.
- (d) Information on exports and foreign operations are provided on the next page. Cash and cash equivalents includes funds held in locations outside the U.S. of \$35.7 million, \$34.2 million and \$37.3 million at December 31, 2010, 2009 and 2008, respectively. Export sales relate almost entirely to Film Products. Operations outside the U.S. in The Netherlands, Hungary, China, Italy, Brazil and India also relate to Film Products. Sales from our locations in The Netherlands, Hungary and Italy are primarily to customers located in Europe. Sales from our locations in China (Guangzhou and Shanghai) are primarily to customers located in China, but also include other customers in Asia. Sales activity at the new film products manufacturing facility in India will begin in 2011.

4 ACCOUNTS AND NOTES RECEIVABLE

Accounts and notes receivable consist of the following:

(In Thousands)	2010	2009
Trade, less allowance for doubtful accounts and sales returns of \$5,286 in 2010 and \$5,299 in 2009	\$ 78,768	\$ 69,789
Other	5,308	4,225
Total	\$ 84,076	\$ 74,014

A reconciliation of the beginning and ending balances of the allowance for doubtful accounts and sales returns for the last three years in the period ended December 31, 2010 is as follows:

(In Thousands)	2010	2009	2008
Balance, beginning of year	\$ 5,299	\$ 3,949	\$ 5,198
Charges to expense	1,779	4,034	2,527
Recoveries	(1,633)	(1,522)	(1,494)
Write-offs	(25)	(1,411)	(2,171)
Foreign exchange and other	(134)	249	(111)
Balance, end of year	\$ 5,286	\$ 5,299	\$ 3,949

5 INVENTORIES

Inventories consist of the following:

(In Thousands)	2010	2009
Finished goods	\$ 7,373	\$ 6,080
Work-in-process	3,669	2,740
Raw materials	15,327	12,249
Stores, supplies and other	16,689	14,453
Total	\$ 43,058	\$ 35,522

Inventories stated on the LIFO basis amounted to \$18.4 million at December 31, 2010 and \$13.4 million at December 31, 2009, which are below replacement costs by approximately \$20.6 million at December 31, 2010 and \$21.5 million at December 31, 2009. During 2010 and 2009, certain inventories accounted for on a LIFO basis declined, which resulted in cost of goods sold being stated at below current replacement costs, by approximately \$2.6 million in 2010 (\$935,000 in Film Products and \$1.7 million in Aluminum Extrusions) and \$1.1 million in 2009 in Film Products.

6 FINANCIAL INSTRUMENTS

We use derivative financial instruments for the purpose of hedging margin exposure from fixed-price forward sales contracts in Aluminum Extrusions and currency exchange rate exposures that exist as part of ongoing business operations (primarily in Film Products). Our derivative financial instruments are designated as and qualify as cash flow hedges and are recognized in the consolidated balance sheet at fair value. The fair value of derivative instruments recorded on the consolidated balance sheets are based upon Level 2 inputs. If individual derivative instruments with the same counterparty can be settled on a net basis, we record the corresponding derivative fair values as a net asset or net liability.

In the normal course of business, we enter into fixed-price forward sales contracts with certain customers for the future sale of fixed quantities of aluminum extrusions at scheduled intervals. In order to hedge our margin exposure created from the fixing of future sales prices relative to volatile raw material (aluminum) costs, we enter into

a combination of forward purchase commitments and futures contracts to acquire or hedge aluminum, based on the scheduled purchases for the firm sales commitments. The fixed-price firm sales commitments and related hedging instruments generally have durations of not more than 12 months, and the notional amount of aluminum futures contracts that hedged future purchases of aluminum to meet fixed-price forward sales contract obligations was \$5.8 million (5.7 million pounds of aluminum) at December 31, 2010 and \$6.9 million (7.8 million pounds of aluminum) at December 31, 2009.

The table below summarizes the location and gross amounts of aluminum futures contract fair values in the consolidated balance sheets as of December 31, 2010 and 2009:

(In Thousands)	December 31, 2010		December 31, 2009	
	Balance Sheet Account	Fair Value	Balance Sheet Account	Fair Value
Derivatives Designated as Hedging Instruments				
Asset derivatives:	Prepaid expenses and other		Prepaid expenses and other	
Aluminum futures contracts		\$ 490		\$ 1,184
Liability derivatives:	Prepaid expenses and other		Prepaid expenses and other	
Aluminum futures contracts		\$ 36		\$ -
Derivatives Not Designated as Hedging Instruments				
Asset derivatives:	Prepaid expenses and other		Prepaid expenses and other	
Aluminum futures contracts		\$ -		\$ 614
Liability derivatives:	Prepaid expenses and other		Prepaid expenses and other	
Aluminum futures contracts		\$ -		\$ 614

In the event that a counterparty to an aluminum fixed-price forward sales contract chooses not to take delivery of its aluminum extrusions, the customer is contractually obligated to compensate us for any losses on the related aluminum futures and/or forward purchase contracts through the date of cancellation. The offsetting asset and liability positions for derivatives not designated as hedging instruments included in the table above are associated with the unwinding of aluminum futures contracts that relate to such cancellations.

Gains associated with the aluminum extrusions business of \$893,000 (\$555,000 after taxes) were recognized in 2010 for timing differences between the recognition of realized losses on aluminum futures contracts and related revenues from delayed fulfillment by customers of fixed-price forward purchase commitments. Such timing differences are included in "Plant shutdowns, assets impairments, restructurings and other" in the net sales and operating profit by segment table in Note 3. Losses of \$952,000 (\$592,000 after tax) were recognized in 2009 for timing differences between the recognition of realized losses on aluminum futures contracts and related revenues from delayed fulfillment by customers of fixed-price forward purchase commitments. Timing differences prior to 2009 were not significant.

We had future fixed Euro-denominated contractual payments for equipment being purchased as part of our capacity expansion at the Carthage, Tennessee aluminum extrusion manufacturing facility. We used a fixed rate Euro forward contract with various settlement dates to hedge exchange rate exposure on these obligations. The notional amount of this foreign currency forward was \$1.6 million at December 31, 2009. There were no foreign currency forward contracts outstanding at December 31, 2010.

The table below summarizes the location and gross amounts of foreign currency forward contract fair values in the consolidated balance sheets as of December 31, 2009 (none at December 31, 2010):

(In Thousands)	December 31, 2009	
	Balance Sheet Account	Fair Value
Derivatives Designated as Hedging Instruments		
Asset derivatives:	Prepaid expenses	
Foreign currency forward contracts	and other	\$ 35
Derivatives Not Designated as Hedging Instruments		
Liability derivatives:		
Foreign currency forward contracts	Accrued expenses	\$ 41

We receive Euro-based royalty payments relating to our operations in Europe. From time to time we use zero-cost collar currency options to hedge a portion of our exposure to changes in cash flows due to variability in U.S. Dollar and Euro exchange rates. There were no outstanding notional amounts on these collars at December 31, 2010 and 2009 as there were no derivatives outstanding at December 31, 2010 and 2009 related to the hedging of royalty payments with currency options.

Our derivative contracts involve elements of credit and market risk, including the risk of dealing with counterparties and their ability to meet the terms of the contracts. The counterparties to our forward purchase commitments are major aluminum brokers and suppliers, and the counterparties to our aluminum futures contracts are major financial institutions. Fixed-price forward sales contracts are only made available to our best and most credit-worthy customers. The counterparties to our foreign currency futures and zero-cost collar contracts are major financial institutions.

The pretax effect on net income (loss) and other comprehensive income (loss) of derivative instruments classified as cash flow hedges and described in the previous paragraphs for years ended December 31, 2010, 2009, and 2008 is summarized in the tables below:

(In Thousands)	Cash Flow Derivative Hedges					
	Aluminum Futures Contracts			Foreign Currency Forwards and Options		
	2010	2009	2008	2010	2009	2008
Years Ended December 31,						
Amount of pre-tax gain (loss) recognized in other comprehensive income	\$ (102)	\$ 1,762	\$ (9,771)	\$ (284)	\$ (336)	\$ 56
Location of gain (loss) reclassified from accumulated other comprehensive income into net income (effective portion)	Cost of sales	Cost of sales	Cost of sales	Selling, general and admin. exp.	Selling, general and admin. exp.	
Amount of pre-tax gain (loss) reclassified from accumulated other comprehensive income to net income (effective portion)	\$ 641	\$ (10,248)	\$ (760)	\$ (271)	\$ (315)	\$ -

Gains and losses on the ineffective portion of derivative instruments or derivative instruments that were not designated as hedging instruments were not significant in 2010, 2009 and 2008. For the years ended December 31, 2010 and 2009 (none in 2008), unrealized net losses from hedges that were discontinued were not significant. As of December 31, 2010, we expect \$280,000 of unrealized after-tax gains on derivative instruments reported in accumulated other comprehensive income to be reclassified to earnings within the next twelve months.

7 ACCRUED EXPENSES

Accrued expenses consist of the following:

(In Thousands)		2010		2009
Payrolls, related taxes and medical and other benefits	\$	6,642	\$	5,332
Incentive compensation		6,436		6,528
Vacation		5,995		5,665
Workers' compensation and disabilities		2,468		2,360
Plant shutdowns and divestitures		1,900		3,981
Futures contracts, net of cash deposits		223		255
Other		9,565		10,809
Total	\$	33,229	\$	34,930

A reconciliation of the beginning and ending balances of accrued expenses associated with asset impairments and costs associated with exit and disposal activities for each of the three years in the period ended December 31, 2010 is as follows:

(In Thousands)	Severance	Long-Lived Asset Impairments	Accelerated Depreciation (a)	Other (b)	Total
Balance at December 31, 2007	\$ 363	\$ -	\$ -	\$ 5,838	\$ 6,201
2008:					
Charges	2,662	6,994	1,649	-	11,305
Cash spent	(2,594)	-	-	(1,347)	(3,941)
Charged against assets	-	(6,994)	(1,649)	-	(8,643)
Balance at December 31, 2008	431	-	-	4,491	4,922
2009:					
Charges	2,094	1,005	-	-	3,099
Cash spent	(1,702)	-	-	(1,333)	(3,035)
Charged against assets	-	(1,005)	-	-	(1,005)
Balance at December 31, 2009	823	-	-	3,158	3,981
2010:					
Charges	165	608	-	-	773
Cash spent	(751)	-	-	(1,565)	(2,316)
Charged against assets	-	(608)	-	-	(608)
Balance at December 31, 2010	\$ 237	\$ -	\$ -	\$ 1,593	\$ 1,830

(a) Represents depreciation accelerated due to plant shutdowns based on a remaining useful life of less than one year.

(b) Other includes primarily accrued losses on a sub-lease at a facility in Princeton, New Jersey.

See Note 15 for more information on plant shutdowns, asset impairments and restructurings of continuing operations.

8 DEBT AND CREDIT AGREEMENTS

On June 21, 2010, we entered into a \$300 million four-year, unsecured revolving credit facility (the "Credit Agreement"), with an option to increase that amount by an additional \$75 million. The Credit Agreement replaces our previous five-year, unsecured revolving credit facility that was due to expire on December 15, 2010. There were no outstanding borrowings under the previous revolving credit facility when it was replaced.

Borrowings under the Credit Agreement bear an interest rate of LIBOR plus a credit spread and commitment fees charged on the unused amount under the Credit Agreement at various indebtedness-to-adjusted-EBITDA levels as follows:

Pricing Under Revolving Credit Agreement (Basis Points)		
Indebtedness-to-Adjusted EBITDA Ratio	Credit Spread Over LIBOR	Commitment Fee
> 2.0x but <= 3.0x	250	40
> 1.0x but <=2.0x	225	35
<= 1.0x	200	30

At December 31, 2010, the interest cost on debt, if amounts had been borrowed, was priced at one-month LIBOR plus the applicable credit spread of 200 basis points.

The most restrictive covenants in the Credit Agreement include:

- Maximum aggregate dividends over the term of the Credit Agreement of \$100 million plus, beginning with the fiscal quarter ending March 31, 2010, 50% of net income;
- Minimum shareholders' equity at any point during the term of the Credit Agreement of at least \$300 million increased on a cumulative basis at the end of each fiscal quarter, beginning with the fiscal quarter ending March 31, 2010, by an amount equal to 50% of net income (to the extent positive);
- Maximum indebtedness-to-adjusted EBITDA of 3.0x; and
- Minimum adjusted EBIT-to-interest expense of 2.5x.

At December 31, 2010, based upon the most restrictive covenants within the Credit Agreement, available credit under the Credit Agreement was approximately \$263 million. Total debt due and outstanding at December 31, 2010 is summarized below:

Debt Due and Outstanding at December 31, 2010 (In Thousands)			
Year Due	Credit Agreement	Other	Total Debt Due
2011	\$ -	\$ 222	\$ 222
2012	-	114	114
2013	-	114	114
2014	-	-	-
2015	-	-	-
Total	\$ -	\$ 450	\$ 450

We believe we were in compliance with all of our debt covenants as of December 31, 2010. Noncompliance with any of the debt covenants may have a material adverse effect on financial condition or liquidity in the event such noncompliance cannot be cured or should we be unable to obtain a waiver from the lenders. Renegotiation of the covenant through an amendment to the Credit Agreement may effectively cure the noncompliance, but may have an effect on financial condition or liquidity depending upon how the covenant is renegotiated.

9 SHAREHOLDER RIGHTS AGREEMENT

Pursuant to an Amended and Restated Rights Agreement, dated as of June 30, 2009, between Tredegar and National City Bank, N.A., as Rights Agent (essentially renewing and extending our Rights Agreement, dated as of June 30, 1999), as amended, one right is attendant to each share of our common stock ("Right"). All Rights outstanding under the previous Rights Plan remain outstanding under the Amended and Restated Rights Agreement.

Each Right entitles the registered holder to purchase from Tredegar one one-hundredth of a share of Participating Cumulative Preferred Stock, Series A (the “Preferred Stock”), at an exercise price of \$150 (the “Purchase Price”). The Rights will become exercisable, if not earlier redeemed, only if a person or group acquires 10% or more of the outstanding shares of our common stock (thereby becoming an “Acquiring Person”) or announces a tender offer that would result in ownership by a person or group of 10% or more of our common stock. Any action by a person or group whose beneficial ownership was reported on Amendment No. 4 to the Schedule 13D filed with respect to Tredegar on March 20, 1997, cannot cause such person or group to become an Acquiring Person and thereby cause the Rights to become exercisable.

Each holder of a Right, upon the occurrence of certain events, will become entitled to receive, upon exercise and payment of the Purchase Price, Preferred Stock (or in certain circumstances, cash, property or other securities of Tredegar or a potential acquirer) having a value equal to twice the amount of the Purchase Price.

The Rights are scheduled to expire on June 30, 2019.

10 STOCK OPTION AND STOCK AWARD PLANS

We have one stock option plan under which stock options may be granted to purchase a specified number of shares of common stock at a price no lower than the fair market value on the date of grant and for a term not to exceed 10 years. In addition, we have one other stock option plan under which there are options that remain outstanding, but no future grants can be made. Employee options ordinarily vest two years from the date of grant. The option plans also permit the grant of stock appreciation rights (“SARs”), stock, restricted stock, stock unit awards and incentive awards. Restricted stock grants ordinarily vest three years from the date of grant. No SARs have been granted since 1992 and none are currently outstanding.

A summary of our stock options outstanding at December 31, 2010, 2009 and 2008, and changes during those years, is presented below:

	Number of Options	Option Exercise Price/Share			Weighted Average
			Range		
Outstanding at December 31, 2007	702,983	\$ 13.95	to \$ 29.94	\$ 17.25	
Granted	401,000	14.06	to 19.25	15.72	
Forfeited and Expired	(161,515)	13.95	to 29.94	20.07	
Exercised	(248,118)	13.95	to 18.90	16.66	
Outstanding at December 31, 2008	694,350	13.95	to 19.52	15.92	
Granted	283,400	14.72	to 18.12	17.92	
Forfeited and Expired	(171,875)	13.95	to 19.52	17.59	
Exercised	(9,700)	13.95	to 15.11	14.37	
Outstanding at December 31, 2009	796,175	13.95	to 19.52	16.29	
Granted	316,000	16.66	to 17.54	17.15	
Forfeited and Expired	(29,325)	13.95	to 18.12	16.37	
Exercised	(65,575)	13.95	to 15.80	15.04	
Outstanding at December 31, 2010	1,017,275	\$ 13.95	to \$ 19.52	\$ 16.64	

The following table summarizes additional information about stock options outstanding and exercisable and non-vested restricted stock outstanding at December 31, 2010:

Range of Exercise Prices	Options Outstanding at December 31, 2010				Options Exercisable at December 31, 2010		
	Shares	Weighted Average Remaining Contractual Life		Aggregate Intrinsic Value (In Thousands)	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value (In Thousands)
		(Years)	Exercise Price				
\$ - to \$ 13.95	24,075	0.2	\$ 13.95	\$ 131	24,075	\$ 13.95	\$ 131
13.96 to 20.00	993,200	5.1	16.70	2,662	419,300	15.59	1,587
Total	1,017,275	5.0	\$ 16.64	\$ 2,793	443,375	\$ 15.51	\$ 1,718

	Non-vested Restricted Stock			Maximum Non-vested Restricted Stock Units Issuable Upon Satisfaction of Certain Performance Criteria		
	Number of Shares	Wgtd. Ave. Grant Date	Grant Date Fair Value (In Thousands)	Number of Shares	Wgtd. Ave. Grant Date	Grant Date Fair Value (In Thousands)
		Fair Value/Sh.			Fair Value/Sh.	
Outstanding at December 31, 2007	59,500	\$ 13.97	\$ 831	176,875	\$ 20.09	\$ 3,554
Granted	12,690	16.01	203	146,600	15.80	2,316
Vested	(8,190)	17.08	(140)	-	-	-
Forfeited	(10,500)	14.06	(148)	(115,694)	20.40	(2,360)
Outstanding at December 31, 2008	53,500	13.94	746	207,781	16.89	3,510
Granted	50,637	17.52	887	76,175	17.93	1,366
Vested	(58,387)	14.10	(823)	(66,731)	20.02	(1,336)
Forfeited	-	-	-	(145,050)	15.63	(2,267)
Outstanding at December 31, 2009	45,750	17.70	810	72,175	17.64	1,273
Granted	56,717	17.23	977	82,750	16.83	1,393
Vested	(8,284)	17.84	(148)	-	-	-
Forfeited	(333)	18.12	(6)	(4,000)	17.10	(68)
Outstanding at December 31, 2010	93,850	\$ 17.40	\$ 1,633	150,925	\$ 17.21	\$ 2,598

The total intrinsic value of stock options exercised was \$221,000 in 2010, \$14,000 in 2009 and \$653,000 in 2008. The grant-date fair value of stock option-based awards vested was \$1.9 million in 2010 and \$1.8 million in 2008 (none in 2009). As of December 31, 2010, there was unrecognized compensation cost of \$1.4 million related to stock option-based awards and \$1.5 million related to non-vested restricted stock and other stock-based awards. This cost is expected to be recognized over the remaining weighted average period of 0.7 years for stock option-based awards and 1.1 years for non-vested restricted stock and other stock-based awards.

Stock options exercisable totaled 443,375 shares at December 31, 2010 and 199,775 shares at December 31, 2009. Stock options available for grant totaled 3,151,868 shares at December 31, 2010.

11 RETIREMENT PLANS AND OTHER POSTRETIREMENT BENEFITS

We have noncontributory defined benefit (pension) plans covering most employees. The plans for salaried and hourly employees currently in effect are based on a formula using the participant's years of service and compensation or using the participant's years of service and a dollar amount.

In addition to providing pension benefits, we provide postretirement life insurance and health care benefits for certain groups of employees. Tredegar and retirees share in the cost of postretirement health care benefits, with employees hired on or before January 1, 1993, receiving a fixed subsidy to cover a portion of their health care premiums. On December 8, 2003, the Medicare Prescription Drug Improvement and Modernization Act of 2003 (the "Act") was signed into law. We eliminated prescription drug coverage for Medicare-eligible retirees as of January 1, 2006. Consequently, we are not eligible for any federal subsidies.

Assumptions used for financial reporting purposes to compute net benefit income or cost and benefit obligations for continuing operations, and the components of net periodic benefit income or cost for continuing operations, are as follows:

(In Thousands)	Pension Benefits		Other Post-Retirement Benefits	
	2010	2009	2010	2009
Change in benefit obligation:				
Benefit obligation, beginning of year	\$ 235,015	\$ 211,685	\$ 8,687	\$ 8,124
Service cost	3,315	3,077	76	70
Interest cost	13,071	13,287	467	495
Effect of actuarial (gains) losses related to the following:				
Discount rate change	8,587	18,758	307	656
Retirement rate assumptions and mortality table adjustments	1,175	462	25	(3)
Retiree medical participation rate change	-	-	(1,424)	-
Other	(1,853)	(1,436)	(477)	(373)
Benefits paid	(11,341)	(10,818)	(311)	(282)
Benefit obligation, end of year	\$ 247,969	\$ 235,015	\$ 7,350	\$ 8,687
Change in plan assets:				
Plan assets at fair value, beginning of year	\$ 228,984	\$ 194,538	\$ -	\$ -
Actual return on plan assets	21,896	45,135	-	-
Employer contributions	167	129	311	282
Benefits paid	(11,341)	(10,818)	(311)	(282)
Plan assets at fair value, end of year	\$ 239,706	\$ 228,984	\$ -	\$ -
Funded status of the plans	\$ (8,263)	\$ (6,031)	\$ (7,350)	\$ (8,687)
Amounts recognized in the consolidated balance sheets:				
Prepaid benefit cost	\$ -	\$ -	\$ -	\$ -
Accrued benefit liability	(8,263)	(6,031)	(7,350)	(8,687)
Net amount recognized	\$ (8,263)	\$ (6,031)	\$ (7,350)	\$ (8,687)

The following tables reconcile the changes in benefit obligations and plan assets in 2010 and 2009, and reconcile the funded status to prepaid or accrued cost at December 31, 2010 and 2009:

(In Thousands, Except Percentages)	Pension Benefits			Other Post-Retirement Benefits		
	2010	2009	2008	2010	2009	2008
Weighted-average assumptions used to determine benefit obligations:						
Discount rate	5.45%	5.70%	6.50%	5.35%	5.75%	6.50%
Rate of compensation increases	n/a	n/a	n/a	4.00%	4.00%	4.00%
Weighted-average assumptions used to determine net periodic benefit cost:						
Discount rate	5.70%	6.50%	6.25%	5.75%	6.50%	6.25%
Rate of compensation increases	n/a	n/a	n/a	4.00%	4.00%	4.00%
Expected long-term return on plan assets, during the year	8.25%	8.25%	8.50%	n/a	n/a	n/a
Rate of increase in per-capita cost of covered health care benefits:						
Indemnity plans, end of year	n/a	n/a	n/a	6.00%	6.00%	6.00%
Managed care plans, end of year	n/a	n/a	n/a	6.00%	6.00%	6.00%
Components of net periodic benefit income (cost):						
Service cost	\$ (3,315)	\$ (3,077)	\$ (3,447)	\$ (76)	\$ (70)	\$ (71)
Interest cost	(13,071)	(13,287)	(12,909)	(467)	(495)	(484)
Expected return on plan assets	20,530	20,680	21,965	-	-	-
Amortization of prior service costs and gains or losses	(4,806)	(1,224)	(675)	79	127	47
Net periodic benefit income (cost)	\$ (662)	\$ 3,092	\$ 4,934	\$ (464)	\$ (438)	\$ (508)

Net benefit income or cost is determined using assumptions at the beginning of each year. Funded status is determined using assumptions at the end of each year. Pension and other postretirement liabilities for continuing operations of \$15.6 million and \$14.7 million are included in "Other noncurrent liabilities" in the consolidated balance sheets at December 31, 2010 and 2009, respectively. The amount of our accumulated benefit obligation is the same as our projected benefit obligation.

At December 31, 2010, the effect of a 1% change in the health care cost trend rate assumptions would be immaterial.

Expected benefit payments for continuing operations over the next five years and in the aggregate for 2016-2020 are as follows:

(In Thousands)	Other Post-Retirement Benefits	
	Pension Benefits	Retirement Benefits
2011	\$ 12,904	\$ 441
2012	13,517	461
2013	14,126	483
2014	14,731	494
2015	15,365	506
2016 - 2020	84,604	2,602

Amounts recognized in 2010, 2009 and 2008 before related deferred income taxes in accumulated other comprehensive income consist of:

(In Thousands)	Pension			Other Post-Retirement		
	2010	2009	2008	2010	2009	2008
Prior service cost (benefit)	\$ (2,966)	\$ (4,035)	\$ (5,092)	\$ -	\$ -	\$ -
Net actuarial (gain) loss	102,037	101,368	110,319	(2,598)	(1,107)	(1,514)

The amounts before related deferred income taxes in accumulated other comprehensive income that are expected to be recognized as components of net periodic benefit or cost during 2011 are as follows:

(In Thousands)	Pension	Other Post-Retirement
Prior service cost (benefit)	\$ (1,078)	\$ -
Net actuarial (gain) loss	7,579	(267)

The percentage composition of assets held by pension plans for continuing operations at December 31, 2010, 2009 and 2008, and the current expected long-term return on assets are as follows:

	% Composition of Plan Assets at December 31,			Expected Long-term Return %
	2010	2009	2008	
Pension plans related to continuing operations:				
Low-risk fixed income securities	1.9 %	3.5 %	10.3 %	3.9 %
Large capitalization equity securities	22.3	21.7	19.9	9.0
Small-capitalization equity securities	6.7	5.8	4.1	11.0
International and emerging market equity securities	21.6	21.4	18.6	10.8
Total equity securities	50.6	48.9	42.6	10.0
Hedge and private equity funds	42.7	42.9	43.8	8.7
Other assets	4.8	4.7	3.3	2.8
Total for continuing operations	100.0 %	100.0 %	100.0 %	8.3 %

Our targeted allocation percentage for pension plan assets is in the general range of the percentage composition that existed at December 31, 2010, with the exception of the targeted future range for low-risk fixed income securities being higher than actual allocations in 2009 and 2010. Expected long-term returns are estimated by asset class and generally are based on inflation-adjusted historical returns, volatilities, risk premiums and managed asset premiums. The portfolio of fixed income securities is structured with maturities that generally match estimated benefit payments over the next 1-2 years. Other assets are primarily comprised of cash and contracts with insurance companies. Our primary investment objective is to maximize total return with a strong emphasis on the preservation of capital. We believe that over the long term a diversified portfolio of equity securities, hedge funds and private equity funds has a better risk-return profile than fixed income securities. The average remaining duration of benefit payments for our pension plans is about 12 years. We expect our required contributions to approximate \$174,000 in 2011.

Estimates of the fair value of assets held by our pension plans are provided by third parties not affiliated with Tredegar. At December 31, 2010, the pension plan assets are categorized by level within the fair value measurement hierarchy as follows:

(In Thousands)		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2010	Total			
Large capitalization equity securities	\$ 53,543	\$ 39,827	\$ 13,716	\$ -
Small-capitalization equity securities	16,170	16,170	-	-
International and emerging market equity securities	51,840	51,840	-	-
Hedge and private equity funds	102,309	-	94,267	8,042
Low-risk fixed income securities	4,469	1,613	2,856	-
Other assets	2,290	2,290	-	-
Total plan assets at fair value	<u>\$ 230,621</u>	<u>\$ 111,740</u>	<u>\$ 110,839</u>	<u>\$ 8,042</u>
Contracts with insurance companies	9,085			
Total plan assets, December 31, 2010	<u>\$ 239,706</u>			
December 31, 2009				
Large capitalization equity securities	\$ 49,655	\$ 35,545	\$ 14,110	\$ -
Small-capitalization equity securities	13,272	13,272	-	-
International and emerging market equity securities	49,078	49,078	-	-
Hedge and private equity funds	98,204	-	86,567	11,637
Low-risk fixed income securities	8,069	4,047	4,022	-
Other assets	451	451	-	-
Total plan assets at fair value	<u>\$ 218,729</u>	<u>\$ 102,393</u>	<u>\$ 104,699</u>	<u>\$ 11,637</u>
Contracts with insurance companies	10,255			
Total plan assets, December 31, 2009	<u>\$ 228,984</u>			

For fair value measurements of plan assets using significant unobservable inputs (Level 3), a reconciliation of the balances from January 1, 2009 to December 31, 2010 are as follows:

(In Thousands)	Hedge and private equity funds
Balance at December 31, 2008	\$ 6,064
Purchases, sales, and settlements	(447)
Actual return on plan assets still held at year end	855
Transfers in and/or out of Level 3	<u>5,165</u>
Balance at December 31, 2009	\$ 11,637
Purchases, sales, and settlements	(2,927)
Actual return on plan assets still held at year end	(668)
Transfers in and/or out of Level 3	-
Balance at December 31, 2010	<u>\$ 8,042</u>

We also have a non-qualified supplemental pension plan covering certain employees. Effective December 31, 2005, further participation in this plan was terminated and benefit accruals for existing participants were frozen. The

plan was designed to restore all or a part of the pension benefits that would have been payable to designated participants from our principal pension plans if it were not for limitations imposed by income tax regulations. The projected benefit obligation relating to this unfunded plan was \$2.5 million at December 31, 2010 and \$2.9 million at December 31, 2009. Pension expense recognized for this plan was \$178,000 in 2010, \$202,000 in 2009 and \$185,000 in 2008. This information has been included in the preceding pension benefit tables.

Approximately 113 employees at our films manufacturing facility in Kerkrade, The Netherlands are covered by a collective bargaining agreement that includes participation in a multi-employer pension plan. Pension expense recognized for participation in this plan, which is equal to required contributions, was \$613,000 in 2010, \$807,000 in 2009 and \$1.0 million in 2008. This information has been excluded from the preceding pension benefit tables.

12 SAVINGS PLAN

We have a savings plan that allows eligible employees to voluntarily contribute a percentage of their compensation up to Internal Revenue Service (“IRS”) limitations. Effective January 1, 2007, and in conjunction with certain pension plan changes (see Note 11), the provisions of the savings plan provided the following benefits for salaried and certain hourly employees:

- The company makes matching contributions to the savings plan of \$1 for every \$1 of employee contribution. The maximum matching contribution is 6% of base pay for 2007-2009 and 5% of base pay thereafter.
- The savings plan includes immediate vesting for active employees of past matching contributions as well as future matching contributions when made (compared with the previous 5-year graded vesting) and automatic enrollment at 3% of base pay unless the employee opts out or elects a different percentage.

We also have a non-qualified plan that restores matching benefits for employees suspended from the savings plan due to certain limitations imposed by income tax regulations. Charges recognized for these plans were \$2.6 million in 2010, \$2.5 million in 2009 and \$3.1 million in 2008. Our liability under the restoration plan was \$1.3 million at December 31, 2010 (consisting of 67,313 phantom shares of common stock) and \$1.3 million at December 31, 2009 (consisting of 79,088 phantom shares of common stock) valued at the closing market price on those dates.

The Tredegar Corporation Benefits Plan Trust (the “Trust”) purchased 7,200 shares of our common stock in 1998 for \$192,000 and 46,671 shares of our common stock in 1997 for \$1.0 million, as a partial hedge against the phantom shares held in the restoration plan. There have been no shares purchased since 1997 except for re-invested dividends. The cost of the shares held by the Trust is shown as a reduction to shareholders’ equity in the consolidated balance sheets.

13 RENTAL EXPENSE AND CONTRACTUAL COMMITMENTS

Rental expense for continuing operations was \$2.9 million in 2010, \$2.9 million in 2009 and \$3.5 million in 2008. Rental commitments under all non-cancelable operating leases for continuing operations as of December 31, 2010, are as follows:

Year	Amount (In Thousands)
2011	\$ 1,681
2012	1,741
2013	1,617
2014	1,655
2015	1,131
Remainder	3,209
Total	\$ 11,034

AFBS, Inc. (formerly known as Therics, Inc), a wholly-owned subsidiary of Tredegar, has future rental commitments under noncancelable operating leases through 2011 (most of which contain sublease options) totaling

approximately \$400,000. These future rental commitments are included in the above table. Sublease rental commitments relating to excess space at AFBS total \$27,000 (excluded from the above table).

Contractual obligations for plant construction and purchases of real property and equipment amounted to \$3.4 million at December 31, 2010.

14 INCOME TAXES

Income from continuing operations before income taxes and income taxes are as follows:

(In Thousands)	2010	2009	2008
Income from continuing operations before income taxes:			
Domestic	\$ 30,723	\$ 2,098	\$ 31,838
Foreign	10,060	15,212	17,289
Total	\$ 40,783	\$ 17,310	\$ 49,127
Current income taxes:			
Federal	\$ 14,431	\$ 7,624	\$ 1,494
State	1,414	(335)	1,126
Foreign	4,308	4,399	6,038
Total	20,153	11,688	8,658
Deferred income taxes:			
Federal	(6,225)	6,088	9,672
State	(771)	831	114
Foreign	599	56	1,042
Total	(6,397)	6,975	10,828
Total income taxes	\$ 13,756	\$ 18,663	\$ 19,486

Income from continuing operations before income taxes for domestic operations in 2009 varies from that for 2010 and 2008 primarily due to the 2009 goodwill impairment charge of \$30.6 million in Aluminum Extrusions.

The significant differences between the U.S. federal statutory rate and the effective income tax rate for continuing operations are as follows:

	Percent of Income Before Income Taxes for Continuing Operations		
	2010	2009	2008
Income tax expense at federal statutory rate	35.0	35.0	35.0
Write-off of tax receivable from indemnification	1.8	-	-
Unremitted earnings from foreign operations	1.3	8.1	6.7
Valuation allowance for foreign operating loss carry-forwards	1.3	(1.0)	3.2
State taxes, net of federal income tax benefit	.9	2.2	1.6
Reversal of income tax contingency accruals and tax settlements	.6	(.9)	(.3)
Valuation allowance for capital loss carry-forwards	.5	12.2	(2.2)
Non-deductible expenses	.3	-	.2
Remitted earnings from foreign operations	-	3.0	-
Goodwill impairment charge	-	61.8	-
Research and development tax credit	(.8)	(2.1)	(.4)
Domestic Production Activities Deduction	(1.1)	-	-
Foreign rate differences	(1.8)	(6.5)	(4.2)
Changes in estimates related to prior year tax provision	(4.1)	(.6)	(.2)
Other	(.2)	(3.4)	.3
Effective income tax rate	33.7	107.8	39.7

Deferred tax liabilities and deferred tax assets at December 31, 2010 and 2009, are as follows:

(In Thousands)	2010	2009
Deferred tax liabilities:		
Depreciation	\$ 26,238	\$ 30,308
Amortization of goodwill	26,151	23,637
Foreign currency translation gain adjustment	10,068	14,023
Derivative financial instruments	174	461
Other	362	127
Total deferred tax liabilities	62,993	68,556
Deferred tax assets:		
Employee benefits	10,428	9,222
Asset write-offs, divestitures and environmental accruals	4,512	4,098
Excess capital losses and book/tax basis differences on investments	4,405	3,230
Tax benefit on state and foreign NOL and credit carryforwards	4,112	4,720
Pensions	3,014	2,182
Inventory	1,973	1,279
Allowance for doubtful accounts and sales returns	1,298	1,343
Timing adjustment for unrecognized tax benefits on uncertain tax positions, including portion relating to interest and penalties	279	543
Other	-	317
Deferred tax assets before valuation allowance	30,021	26,934
Less: Valuation allowance	11,983	11,680
Total deferred tax assets	18,038	15,254
Net deferred tax liability	\$ 44,955	\$ 53,302
Included in the balance sheet:		
Noncurrent deferred tax liabilities in excess of assets	\$ 51,879	\$ 59,052
Current deferred tax assets in excess of liabilities	6,924	5,750
Net deferred tax liability	\$ 44,955	\$ 53,302

Except as noted below, we believe that it is more likely than not that future taxable income will exceed future tax deductible amounts thereby resulting in the realization of deferred tax assets. A valuation allowance of \$3.0 million and \$3.6 million at December 31, 2010 and 2009, respectively, is provided against the tax benefit on state and foreign net operating loss carryforwards for possible future tax benefits on domestic state and foreign operating losses generated by certain foreign and domestic subsidiaries that may not be recoverable in the carry-forward period. In addition, the valuation allowance for excess capital losses from investments and other related items was increased from \$6.7 million at December 31, 2009 to \$7.4 million at December 31, 2010 due to changes in the relative amounts of capital gains and losses generated during the year. The amount of the deferred tax asset considered realizable, however, could be adjusted in the near term if estimates of the fair value of certain investments during the carryforward period change. The valuation allowance for asset impairments in foreign jurisdictions where we believe it is more likely than not that the deferred tax asset will not be realized increased from \$1.4 million in 2009 to \$1.6 million in 2010.

A reconciliation of our unrecognized uncertain tax positions since January 1, 2008, is shown below:

(In Thousands)	Years Ended December 31,		
	2010	2009	2008
Balance at beginning of period	\$ 996	\$ 2,553	\$ 3,268
Increase (decrease) due to tax positions taken in:			
Current period	184	68	105
Prior period	493	208	(392)
Increase (decrease) due to settlements with taxing authorities	(375)	(1,543)	(31)
Reductions due to lapse of statute of limitations	(233)	(290)	(397)
Balance at end of period	\$ 1,065	\$ 996	\$ 2,553

Additional information related to our unrecognized uncertain tax positions since January 1, 2008 is summarized below:

(In Thousands)	Years Ended December 31,		
	2010	2009	2008
Gross unrecognized tax benefits on uncertain tax positions (reflected in current income tax and other noncurrent liability accounts in the balance sheet)	\$ 1,065	\$ 996	\$ 2,553
Deferred income tax assets related to unrecognized tax benefits on uncertain tax positions for which ultimate deductibility is highly certain but for which the timing of the deduction is uncertain (reflected in deferred income tax accounts in the balance sheet)	(234)	(348)	(1,828)
Net unrecognized tax benefits on uncertain tax positions, which would impact the effective tax rate if recognized	831	648	725
Interest and penalties accrued on deductions taken relating to uncertain tax positions (approximately \$(400), \$(800) and \$100 reflected in income tax expense in the income statement in 2010, 2009 and 2008, respectively, with the balance shown in current income tax and other noncurrent liability accounts in the balance sheet)	125	537	1,303
Related deferred income tax assets recognized on interest and penalties	(46)	(195)	(476)
Interest and penalties accrued on uncertain tax positions net of related deferred income tax benefits, which would impact the effective tax rate if recognized	79	342	827
Total net unrecognized tax benefits on uncertain tax positions reflected in the balance sheet, which would impact the effective tax rate if recognized	\$ 910	\$ 990	\$ 1,552

We claimed an ordinary loss on the write-off of our investment in our aluminum extrusions operations in Canada, which was sold in February 2008, on our 2008 consolidated tax return (included in discontinued operations in the consolidated statement of income in 2007). The Internal Revenue Service ("IRS") has recently challenged the ordinary nature of such deduction, asserting that the deduction should be re-characterized as capital in nature. We plan to vigorously defend our position related to this matter and believe that we will prevail but there can be no assurance of such a result. If the Company were not to prevail in final, non-appealable determinations, it is possible that the matter would result in additional tax payments of up to \$12 million, plus any interest and penalties.

In the second quarter of 2009, we settled several disputed issues raised by the IRS during its examination of our

U.S. income tax returns for 2001-2003, the most significant of which regards the recognition of our captive insurance subsidiary as an insurance company for U.S. income tax purposes. The settlement with the IRS for the disputed issues cost us approximately \$1.0 million, which is lower than the previous estimate of \$1.3 million and was applied against the balance of unrecognized tax benefits.

Tredegar and its subsidiaries file income tax returns in the U.S., various states and jurisdictions outside the U.S. Generally, except for refund claims and amended returns, Tredegar is no longer subject to U.S. federal income tax examinations by tax authorities for years before 2006. With few exceptions, Tredegar and its subsidiaries are no longer subject to state or non-U.S. income tax examinations by tax authorities for years before 2007. We believe that it is reasonably possible that approximately \$235,000 of the balance of unrecognized state tax positions may be recognized within the next twelve months as a result of a lapse of the statute of limitations.

15 LOSSES ASSOCIATED WITH PLANT SHUTDOWNS, ASSET IMPAIRMENTS AND RESTRUCTURINGS, UNUSUAL ITEMS, GAINS FROM SALE OF ASSETS AND OTHER ITEMS

Losses associated with plant shutdowns, asset impairments, restructurings and other charges for continuing operations in 2010 (as shown in the segment operating profit table in Note 3) totaled \$265,000 (\$297,000 after taxes), and unless otherwise noted below, are also included in "Asset impairments and costs associated with exit and disposal activities" in the consolidated statements of income. Results in 2010 included:

- A fourth quarter benefit of \$413,000 (\$257,000 after taxes), a third quarter benefit of \$14,000 (\$9,000 after taxes), a second quarter benefit of \$23,000 (\$14,000 after taxes), and a first quarter benefit of \$443,000 (\$275,000 after taxes) for timing differences between the recognition of realized losses on aluminum futures contracts and related revenues from the delayed fulfillment by customers of fixed-price forward purchase commitments (included in "Cost of goods sold" in the consolidated statements of income, see Note 6 for additional detail);
- Fourth quarter charges of \$253,000 (\$155,000 after taxes) for asset impairments in the Other segment and a second quarter charge of \$355,000 (\$355,000 after taxes) for an asset impairment in Film Products and;
- A fourth quarter charge of \$400,000 (\$249,000 after taxes) related to expected future environmental costs at our aluminum extrusions manufacturing facility in Newnan, Georgia (included in "Cost of goods sold" in the consolidated statements of income);
- A third quarter charge of \$109,000 (\$69,000 after taxes) and a first quarter charge of \$56,000 (\$35,000 after taxes) for severance and other employee-related costs in connection with restructurings in Film Products;
- A second quarter gain of \$120,000 (\$73,000 after taxes) related to the sale of previously impaired equipment (included in "Other income (expense), net" in the consolidated statements of income) at our film products manufacturing facility in Pottsville, Pennsylvania; and
- A second quarter loss of \$44,000 (\$26,000 after taxes) and a first quarter loss of \$61,000 (\$36,000 after taxes) on the disposal of equipment (included in "Other income (expense), net" in the consolidated statements of income) from a previously shutdown films manufacturing facility in LaGrange, Georgia.

Results in 2010 include an unrealized loss from the write-down of an investment accounted for under the fair value method of \$2.2 million (\$1.4 million after taxes). See Note 2 for additional information on this investment, which is accounted for under the fair value method. The impairment charges in Film Products and the Other segment were recognized to write down the machinery and equipment to the lower of their carrying value or estimated fair value. The estimated fair value of machinery and equipment that was evaluated for impairment was primarily based on our estimates of the proceeds that we would receive if and/or when assets are sold. Our estimates of the remaining fair value for the related machinery and equipment were based on both Level 2 and 3 inputs as defined under U.S generally accepted accounting principles.

Losses associated with plant shutdowns, asset impairments, restructurings and other charges for continuing operations in 2009 (as shown in the segment operating profit table in Note 3) totaled \$2.9 million (\$2.3 million after taxes), and unless otherwise noted below, are also included in "Asset impairments and costs associated with exit and disposal activities" in the consolidated statements of income. Results in 2009 included:

- A fourth quarter charge of \$181,000 (\$121,000 after taxes) and a first quarter charge of \$1.1 million (\$806,000 after taxes) for severance and other employee-related costs in connection with restructurings in Film Products;

- A fourth quarter charge of \$1.0 million (\$1.0 million after taxes) for asset impairments in Film Products;
- A fourth quarter benefit of \$547,000 (\$340,000 after taxes), a third quarter charge of \$111,000 (\$69,000 after taxes), a second quarter charge of \$779,000 (\$484,000 after taxes), and a first quarter charge of \$609,000 (\$378,000 after taxes) for timing differences between the recognition of realized losses on aluminum futures contracts and related revenues from the delayed fulfillment by customers of fixed-price forward purchase commitments (included in "Cost of goods sold" in the consolidated statements of income, see Note 6 for additional detail);
- A fourth quarter gain of \$640,000 (\$398,000 after taxes) related to the sale of land at our aluminum extrusions manufacturing facility in Newnan, Georgia (included in "Other income (expense), net" in the consolidated statements of income);
- A fourth quarter charge of \$64,000 (\$40,000 after taxes) and a first quarter charge of \$369,000 (\$232,000 after taxes) for severance and other employee-related costs in connection with restructurings in Aluminum Extrusions;
- A fourth quarter charge of \$218,000 (\$139,000 after taxes) and a first quarter charge of \$178,000 (\$113,000 after taxes) for severance and other employee-related costs in connection with restructurings at corporate headquarters (included in "Corporate expenses, net" in the segment operating profit table in Note 3);
- A first quarter gain of \$275,000 (\$162,000 after taxes) on the sale of equipment (included in "Other income (expense), net" in the consolidated statements of income) from a previously shutdown films manufacturing facility in LaGrange, Georgia;
- A second quarter gain of \$175,000 (\$110,000 after taxes) on the sale of a previously shutdown aluminum extrusions manufacturing facility in El Campo, Texas (included in "Other income (expense), net" in the consolidated statements of income);
- A second quarter gain of \$149,000 (\$91,000 after taxes) related to the reversal to income of certain inventory impairment accruals in Film Products; and
- A fourth quarter charge of \$345,000 (\$214,000 after taxes) and a second quarter benefit of \$276,000 (\$172,000 after taxes) related to adjustments of future environmental costs expected to be incurred by Aluminum Extrusions (included in "Cost of goods sold" in the consolidated statements of income).

We recognized a gain of \$1.8 million (\$1.2 million after taxes) from the receipt of a contractual earn-out payment and a gain of \$150,000 (\$96,000 after taxes) from a post-closing contractual adjustment from the sale of our investments in Theken Spine and Therics, LLC. AFBS Inc. (formerly Therics, Inc.) received these investments in 2005, when substantially all of the assets of AFBS, Inc., a wholly owned subsidiary of Tredegar, were sold or assigned to a newly created limited liability company, Therics, LLC, controlled and managed by an individual not affiliated with Tredegar. Results in 2009 also include unrealized gains from the write-up of an investment accounted for under the fair value method of \$5.1 million (\$3.2 million after taxes). Gains on the sale of corporate assets in 2009 include realized gains of \$404,000 (\$257,000 after taxes) from the sale of corporate real estate. The pretax amount for each of these items is included in "Other income (expense), net" in the consolidated statements of income. Income taxes for 2009 include the recognition of a valuation allowance of \$2.1 million related to expected limitations on the utilization of assumed capital losses on certain investments.

The severance in Film Products includes a reduction in workforce in the first and fourth quarters of 2009 (approximately 50 employees) that saved approximately \$2.0 million on an annual basis. The impairment charge in Film Products was recognized to write down the machinery and equipment to the lower of their carrying value or estimated fair value. The estimated fair value of machinery and equipment that was evaluated for impairment was primarily based on our estimates of the proceeds that we would receive if and/or when assets are sold. Our estimates of the remaining fair value for the related machinery and equipment were based on both Level 2 and 3 inputs as defined under U.S generally accepted accounting principles.

Losses associated with plant shutdowns, asset impairments, restructurings and other charges for continuing operations in 2008 (as shown in the segment operating profit table in Note 3) totaled \$12.0 million (\$8.4 million after taxes), and unless otherwise noted below, are also included in "Asset impairments and costs associated with exit and disposal activities" in the consolidated statements of income. Results in 2008 included:

- A fourth quarter charge of \$7.2 million (\$5.0 million after taxes), a second quarter charge of \$854,000 (\$717,000 after taxes) and a first quarter charge of \$1.7 million (\$1.2 million after taxes) for asset impairments in Film Products;

- A second quarter charge of \$90,000 (\$83,000 after taxes) and a first quarter charge of \$2.1 million (\$1.4 million after taxes) for severance and other employee-related costs in connection with restructurings in Film Products;
- A second quarter charge of \$275,000 (\$169,000 after taxes) and a first quarter charge of \$235,000 (\$145,000 after taxes) for severance and other employee-related costs in connection with restructurings in Aluminum Extrusions;
- A fourth quarter gain of \$583,000 (\$437,000 after taxes) related to the sale of land rights and related improvements at the Film Products facility in Shanghai, China (included in "Other income (expense), net" in the consolidated statements of income); and
- A fourth quarter charge of \$72,000 (\$44,000 after taxes) and a second quarter charge of \$105,000 (\$65,000 after taxes) related to expected future environmental costs at the Aluminum Extrusions facility in Newnan, Georgia (included in "Cost of goods sold" in the consolidated statements of income).

A gain of \$1.5 million (\$965,000 after taxes) from the sale of our investments in Theken Spine and Therics, LLC is included in "Other income (expense), net" in the consolidated statements of income. Results in 2008 also include unrealized gains from the write-up of an investment in a privately held drug company of \$5.6 million (\$3.6 million after taxes). See Note 2 for additional information on this investment, which is accounted for under the fair value method. Gains on the sale of corporate assets in 2008 include realized gains of \$509,000 (\$310,000 after taxes) from the sale of equity securities and \$492,000 (\$316,000 after taxes) from the sale of corporate real estate. The pretax amounts for each of these items are included in "Other income (expense), net" in the consolidated statements of income. Income taxes for 2008 include the reversal of a valuation allowance recognized in the third quarter of 2007 of \$1.1 million that originally related to expected limitations on the utilization of assumed capital losses on certain investments.

The severance in Film Products includes a reduction in workforce in the first quarter of 2008 (approximately 90 or 6% of Film Products' total employees) that saved approximately \$4 million on an annual basis. The impairment charges in Film Products were recognized to write down the machinery and equipment for certain product groups to the lower of their carrying value or estimated fair value. The estimated fair value of machinery and equipment that was evaluated for impairment was primarily based on our estimates of the proceeds that we would receive if and/or when assets are sold. Our estimates of the remaining fair value for the related machinery and equipment were based on both Level 2 and 3 inputs as defined under U.S generally accepted accounting principles.

16 CONTINGENCIES

We are involved in various stages of investigation and remediation relating to environmental matters at certain current and former plant locations. Where we have determined the nature and scope of any required environmental remediation activity, estimates of cleanup costs have been obtained and accrued. As we continue efforts to maintain compliance with applicable environmental laws and regulations, additional contingencies may be identified. If additional contingencies are identified, our practice is to determine the nature and scope of those contingencies, obtain and accrue estimates of the cost of remediation, and perform remediation. We do not believe that additional costs that could arise from those activities will have a material adverse effect on our financial position. However, those costs could have a material adverse effect on quarterly or annual operating results at that time.

We are involved in various other legal actions arising in the normal course of business. After taking into consideration information we deemed relevant, we believe that we have sufficiently accrued for probable losses and that the actions will not have a material adverse effect on our financial position. However, the resolution of the actions in a future period could have a material adverse effect on quarterly or annual operating results at that time.

From time to time, we enter into transactions with third parties in connection with the sale of assets or businesses in which we agree to indemnify the buyers or third parties involved in the sale for certain liabilities or risks related to the assets or business. Also, in the ordinary course of our business, we may enter into agreements with third parties for the sale of goods or services that may contain indemnification provisions. In the event that an indemnification claim is asserted, liability for indemnification would be subject to an assessment of the underlying facts and circumstances under the terms of the applicable agreement. Further, any indemnification payments may be limited or barred by a monetary cap, a time limitation, or a deductible or basket. For these reasons, we are unable to estimate the maximum potential amount of the potential future liability under the indemnity provisions of these agreements. We do, however, accrue for losses for any known contingent liability, including those that may arise from indemnification provisions, when future payment is probable and the amount is reasonably estimable. We disclose

contingent liabilities if the probability of loss is reasonably possible and material.

17 DISCONTINUED OPERATIONS

On February 12, 2008, we sold our aluminum extrusions business in Canada for approximately \$25.0 million to an affiliate of H.I.G. Capital. We realized cash income tax benefits in 2008 from the sale of approximately \$12.0 million.

The sale of our aluminum extrusions business in Canada, which was suffering from operating losses driven by lower volume and higher conversion costs from appreciation of the Canadian dollar, allowed us to focus on our U.S. aluminum extrusions operations where we have more control over costs and profitability. The business was classified as held for sale at the end of December 2007 when it became probable that the business would be sold. All historical results for this business have been reflected as discontinued operations; however, cash flows for discontinued operations have not been separately disclosed in the consolidated statements of cash flows.

We recognized losses of \$1.1 million (\$430,000 after taxes) in the first quarter of 2008 and \$207,000 (\$207,000 after taxes) in the second quarter of 2008, which were in addition to the asset impairment charges recognized in 2007, to adjust primarily for differences in the carrying value of assets and liabilities and related tax benefits associated with the business sold since December 31, 2007. We also recognized \$225,000 in the fourth quarter of 2008 for additional income tax benefits relating to the worthless stock deduction for the business. The remaining after-tax loss for discontinued operations in 2008 of \$293,000 relates to the loss recognized in the first quarter from operations up through the date of sale.

The statements of income for 2008 for the aluminum extrusions business in Canada are shown below:

Aluminum Extrusions Business in Canada	
Statements of Income	
(In Thousands)	Jan. 1, 2008 to Feb. 12, 2008
Revenues	\$ 18,756
Costs and expenses:	
Cost of goods sold	17,913
Freight	744
Selling, general and administrative	490
Asset impairments and costs associated with exit and disposal activities	1,337
Total	20,484
Income (loss) before income taxes	(1,728)
Income taxes	(1,023)
Net income (loss)	\$ (705)

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

TREDEGAR CORPORATION
(Registrant)

Dated: March 4, 2011

By /s/ Nancy M. Taylor
Nancy M. Taylor
President and Chief Executive
Officer

Pursuant to the requirements of the Securities Exchange Act of 1934, this report has been signed below by the following persons on behalf of the registrant and in the capacities indicated on March 4, 2011.

<u>Signature</u>	<u>Title</u>
<u>/s/ Nancy M. Taylor</u> (Nancy M. Taylor)	President, Chief Executive Officer and Director (Principal Executive Officer)
<u>/s/ Kevin A. O'Leary</u> (Kevin A. O'Leary)	Vice President, Chief Financial Officer and Treasurer (Principal Financial Officer)
<u>/s/ Frasier W. Brickhouse, II</u> (Frasier W. Brickhouse, II)	Controller (Principal Accounting Officer)
<u>/s/ R. Gregory Williams</u> (R. Gregory Williams)	Chairman of the Board of Directors
<u>/s/ N. A. Scher</u> (Norman A. Scher)	Vice Chairman of the Board of Directors
<u>/s/ Austin Brockenbrough, III</u> (Austin Brockenbrough, III)	Director
<u>/s/ Donald T. Cowles</u> (Donald T. Cowles)	Director

/s/ John D. Gottwald

(John D. Gottwald) Director

/s/ Richard L. Morrill

(Richard L. Morrill) Director

/s/ George A. Newbill

Section 302 Certification

I, Nancy M. Taylor, certify that:

- (1) I have reviewed this Annual Report on Form 10-K for the year ended December 31, 2010, of Tredegar Corporation;
- (2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- (3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- (4) The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting;
- (5) The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

APPENDIX – FOOTNOTES

- 1 The after-tax effects of plant shutdowns, asset impairments and restructurings, gains or losses from the sale of assets and other items (which includes unrealized gains and losses for an investment accounted for under the fair value method) and a goodwill impairment in 2009 related to our aluminum extrusions business have been presented separately and removed from income (loss) and earnings (loss) per share from continuing operations as reported under U.S. generally accepted accounting principles (GAAP) to determine Tredegar's presentation of income and earnings per share from ongoing operations. Income and earnings per share from ongoing operations are key financial and analytical measures used by Tredegar to gauge the operating performance of its ongoing operations. They are not intended to represent the stand-alone results for Tredegar's ongoing operations under GAAP and should not be considered as an alternative to net income or earnings per share as defined by GAAP. They exclude items that we believe do not relate to Tredegar's ongoing operations.

Income and earnings per share from manufacturing operations, both non-GAAP financial measures, were previously used by management to gauge the operation performance of its ongoing manufacturing operations. With the addition of the Other segment (which is comprised of the start-up operations of Bright View Technologies Corporation and Falling Springs, LLC), the key financial and analytical measure used by management to assess operating performance has been adjusted to include the operating results of this new segment.

- 2 Net sales represent sales less freight. Net sales is a non-GAAP financial measure that is not intended to represent sales as defined by GAAP. Net sales is a key measure used by the chief operating decision maker of each segment for purposes of assessing performance. A reconciliation of net sales to sales is shown below.

(In Millions)

	2008	2009	2010
Film Products	\$ 522.8	\$ 455.0	\$ 520.5
Aluminum Extrusions	340.3	177.5	199.6
Other	-	-	2.6
Total net sales	863.1	632.5	722.7
Add back freight	20.8	16.1	17.8
Sales as shown in consolidated statements of income	\$ 883.9	\$ 648.6	\$ 740.5

- 3 Adjusted EBITDA represents income (loss) from continuing operations before interest, taxes, depreciation, amortization, unusual items, a goodwill impairment in 2009 related to our aluminum extrusions business, losses associated with plant shutdowns, asset impairments and restructurings, gains or losses from the sale of assets, investment write-downs or write-ups, charges related to stock option awards accounted for under the fair value-based method and other items. Adjusted EBITDA is a non-GAAP financial measure that is not intended to represent net income (loss) or cash flow from operations as defined by GAAP and should not be considered as either an alternative to net income (loss) (as an indicator of operating performance) or to cash flow (as a measure of liquidity). Tredegar uses Adjusted EBITDA as a measure of unlevered (debt-free) operating cash flow. We also use it when comparing relative enterprise values of manufacturing companies and when measuring debt capacity. When comparing the valuations of a peer group of manufacturing companies, we express enterprise value as a multiple of Adjusted EBITDA. We believe Adjusted EBITDA is preferable to operating profit and other GAAP measures when applying a comparable multiple approach to enterprise valuation because it excludes the items noted above, measures of which may vary among peer companies.

APPENDIX – FOOTNOTES, CONTINUED

A reconciliation of ongoing operating profit (loss) from continuing operations to Adjusted EBITDA is shown below. Amounts relating to corporate overhead for the prior years have been reclassified to conform with the current year's presentation.

(In Millions)

	Film Products	Aluminum Extrusions	Other	Total
2010				
Operating profit (loss) from ongoing operations	\$ 71.2	\$ (4.2)	\$ (4.2)	\$ 62.8
Add back depreciation & amortization	33.8	9.1	.7	43.6
				106.4
Corporate overhead	-	-	-	(16.2)
Adjusted EBITDA	\$ 105.0	\$ 4.9	\$ (3.5)	\$ 90.2
2009				
Operating profit (loss) from ongoing operations	\$ 64.4	\$ (6.5)	\$ -	\$ 57.9
Add back depreciation & amortization	32.4	7.6	-	40.0
				97.9
Corporate overhead	-	-	-	(13.9)
Adjusted EBITDA	\$ 96.8	\$ 1.1	\$ -	\$ 84.0
2008				
Operating profit (loss) from ongoing operations	\$ 53.9	\$ 10.1	\$ -	\$ 64.0
Add back depreciation & amortization	34.6	8.0	-	42.6
				106.6
Corporate overhead	-	-	-	(8.6)
Adjusted EBITDA	\$ 88.5	\$ 18.1	\$ -	\$ 98.0

- 4 Total return to shareholders is defined as the change in the stock price during the year plus dividends per share, divided by the stock price at the beginning of the year.
- 5 Free cash flow represents cash flows from operations less capital expenditures. Free cash flow is a non-GAAP measure that is not intended to represent cash flow from operations as defined by GAAP. Free cash flow is a financial measurement used by management in evaluating the company's overall net cash flow generation before net cash flows from investments and other non-recurring investing activities and financing activities for a period.
- 6 Economic Profit Added (EPA) is a financial measurement tool that allows us to measure profitability and how efficiently we use our operating capital. EPA is defined as after-tax operating profit minus a cost of capital charge for the use of operating capital. Operating profit used to calculate EPA does not include earnings from unusual items, goodwill impairments, losses from plant shutdowns, asset impairments and restructurings, gains or losses from the sale of assets, investment write-downs or write-ups, earnings or losses from the Other segment, charges related to stock option awards accounted for under the fair value-based method, pension income or expense for the Retirement Income Plan and other special items that may be recognized or accrued under GAAP. The cost of capital charge represents the average monthly operating capital employed multiplied by our cost of capital percentage.
- 7 Net debt or cash is a non-GAAP financial measure that is not intended to represent debt or cash as defined by GAAP, but is utilized by management in evaluating financial leverage and equity valuation. We believe that investors also may find net debt or cash helpful for the same purposes. A calculation of net debt or cash is shown below.

(In Millions)

	2010
Cash and cash equivalents	\$ 73.2
Less: Debt	(.5)
Net (debt) cash	\$ 72.7
