

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2010

Commission File Number: 001-13103

CIBER, INC.

(Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization) 6363 South Fiddler's Green Circle, Suite 1400, Greenwood Village, Colorado (Address of Principal Executive Offices)

38-2046833 (I.R.S. Employer Identification No.) 80111 (Zip Code)

Registrant's telephone number, including area code: (303) 220-0100

Securities registered pursuant to Section 12(b) of the Act:

Table with 2 columns: Title of class, Name of exchange on which registered. Row 1: Common Stock, \$0.01 par value; New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. [] Yes [X] No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. [] Yes [X] No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. [X] Yes [] No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). [] Yes [] No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. []

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer [] Accelerated filer [X] Non-accelerated filer [] Smaller reporting company [] (Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). [] Yes [X] No

The aggregate market value of the outstanding voting stock held by non-affiliates of the registrant as of June 30, 2010, was \$174,785,449, based on the closing price of the registrant's Common Stock of \$2.77 per share reported on the New York Stock Exchange on such date.

As of February 11, 2011, there were 70,965,048 shares of the registrant's Common Stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for the Registrant's 2011 Annual Meeting of Shareholders to be held on May 18, 2011, are incorporated by reference into Part III of this Report.

Disclosure Regarding Forward-Looking Statements

This Annual Report on Form 10-K contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 relating to our operations, results of operations and other matters that are based on our current expectations, estimates, forecasts and projections. Words, such as “anticipate,” “believe,” “could,” “expect,” “estimate,” “intend,” “may,” “opportunity,” “plan,” “potential,” “project,” “should,” and “will” and similar expressions, are intended to identify forward-looking statements. For example, we make certain forward-looking statements regarding our current estimates for revenue and profitability for certain of our business units for 2011. These statements reflect a number of risks, uncertainties and other factors that could cause actual results to differ materially from those expressed or implied by our forward-looking statements. These risks include, without limitation, risks that: (1) economic and political conditions, including regulatory or legislative action, adversely affect us or our clients’ businesses and levels of business activity; (2) we cannot expand and develop our services and solutions in response to changes in technology and client demand; (3) we cannot compete effectively in the highly competitive consulting, systems integration and technology and outsourcing markets; (4) our work in the government contracting environment exposes us to additional risks; (5) our clients may terminate their contracts with us or they may be unable or unwilling to pay us for our services, which may impact our accounting assumptions; (6) our outsourcing services subject us to operational and financial risk; (7) the type and level of technology spending by our clients may change; (8) we cannot maintain favorable pricing and utilization rates; (9) legal liability may result from solutions or services we provide; (10) we cannot anticipate the cost and complexity of performing our work or we are not able to control our costs; (11) our global operations are subject to complex risks, some of which might be beyond our control, including, but not limited to, fluctuations in foreign exchange rates; (12) we cannot balance our resources with client demand or hire sufficient employees with the required skills and background; (13) we may incur liability from our subcontractors’ or other third parties’ failure to deliver their project contributions on time or at all; (14) we cannot manage the organizational challenges associated with our size or our business strategy; (15) consolidation in the industries that we serve could adversely affect our business; (16) our ability to attract and retain business depends on our reputation in the marketplace; (17) our share price could fluctuate due to numerous factors, including variability in revenues, operating results and profitability; and/or (18) other factors discussed from time to time in the Company’s news releases and public statements, as well as the risks, uncertainties and other factors discussed under the “Risk Factors” heading in this Form 10-K and other documents filed with or furnished to the Securities and Exchange Commission. Most of these factors are beyond our ability to predict or control. Forward-looking statements are not guarantees of performance and speak only as of the date they are made, and we undertake no obligation to publicly update any forward-looking statements in light of new information or future events. Readers are cautioned not to put undue reliance on forward-looking statements.

In this Annual Report on Form 10-K, references to “we,” “our,” “us,” “the Company” or “CIBER,” refer to CIBER, Inc. and its subsidiaries. All references to years, unless otherwise noted, refer to our fiscal year, which ends on December 31.

Item 1. Business

Overview

CIBER is a global information technology (“IT”) consulting, services and outsourcing company applying practical innovation through services and solutions that deliver tangible results for both commercial and government clients. We compete in a large and growing marketplace offering services that include application development and management, enterprise resource planning (“ERP”) implementation, change management, project management, systems integration, infrastructure management and end-user computing, as well as strategic business and technology consulting. For more

than 35 years, CIBER has been helping clients by understanding their goals, recommending the right solutions and delivering on our commitments. We primarily serve Global 2000 blue-chip companies and government agencies from our operations across 18 countries.

CIBER's approximately 8,600 employees, billable consultants and supplemental subcontractors have extensive tenure, deep industry knowledge and a rich history of helping clients achieve their business goals by building, integrating and supporting mission-critical applications and systems for optimized quality, increased business value, faster time to market and reduced total cost of operations.

CIBER's objective is to improve financial performance utilizing a refined strategic approach, improved operational regimens and increased, as well as narrowed focus, on higher margin, well-developed offerings. In 2010, CIBER underwent an extensive strategic review and planning process aimed at delivering sustained, predictable performance. The cornerstone of achieving this objective is to focus on three key initiatives and to operate with increased operational regimens.

1) Tighter focus on our market approach

We are in the process of tightening our focus on a smaller number of higher-value offerings, and on serving a more select group of industry verticals. Our offerings are focused on the highest growth areas in the marketplace and where we have and are developing intellectual property and repeatable delivery processes. Our offerings are in the areas of application development and management, testing and quality assurance, business analytics and IT outsourcing. We are increasing our presence and focus in key verticals including healthcare, manufacturing, utilities, retail, financial services, U.S. federal government, as well as public sector and higher education.

Additionally, we are rigorously analyzing existing and potential customers to assess their long-term financial and strategic importance for CIBER. Our goal is to identify those customer engagements that are likely to yield increased financial returns for us so that we are allocating our resources to the best potential opportunities.

2) Development of a world-class sales force

We have begun intense professional development programs for our sales force globally including demand creation management, sales pipeline management and individual account management training. A main focus of the sales team is to sell more to our existing customers and to increase sales of CIBER's core offerings. We have modified the sales compensation structure to drive the desired sales behavior and results.

3) Enhancing our information technology infrastructure

We are investing to enhance our management information systems so that we can allocate resources more effectively, improve project profitability, strengthen sales productivity and increase the predictability of our financial results.

Services and Operations

We organize our operations by the nature of their services, client base and geography. In 2010, we operated in five reportable segments, which were our primary operating divisions. In 2011, we are combining operations and management of the Custom Solutions and U.S. ERP divisions and will report

them as a single unit called CIBER North America going forward. For the year ended December 31, 2010, our percentage of total revenue by division was as follows:

	<u>2010 Revenue %</u>
International	36%
Custom Solutions	34%
U.S. ERP	12%
Federal	11%
IT Outsourcing	7%

International

Our CIBER International division, headquartered in the Netherlands, delivers a mix of enterprise and custom solutions. CIBER International is a full-line service provider, able to offer a range of services covering the full IT solution lifecycle to clients in both commercial enterprises and public sector organizations. Key geographies for our International division include the Netherlands, the United Kingdom (“UK”), Germany and the Scandinavian region consisting of Norway, Sweden and Denmark.

The International division’s enterprise solutions focus primarily on providing services related to ERP and Customer Relationship Management (“CRM”) software products. Our major partner relationships include SAP and Microsoft, with SAP-related solutions and services accounting for approximately 60% to 65% of the International division’s total revenue in 2010. We have “Special Expertise” status in SAP Industry Solutions such as retail, automotive and chemicals, and we are a value-added reseller of SAP software in some international geographies. We also work closely with Microsoft to deliver ERP and CRM solutions in selected international geographies.

Additionally, our International division builds custom solutions based on leading technologies such as Microsoft and Oracle to develop web services applications, implement workflow solutions, integrate legacy systems as part of an extended enterprise and build sophisticated information infrastructures through the use of Business Intelligence technologies.

Custom Solutions

CIBER’s Custom Solutions division focuses on providing application development, integration and support to U.S.-based commercial, and state and local government clients. The Custom Solutions division provides the full range of application portfolio management support, including analysis, design, development, testing, implementation, outsourcing and maintenance of business applications. Custom Solutions’ delivery capabilities span service-oriented architectures, including J2EE and .NET, as well as traditional client/server and mainframe development. The division also offers portal development, wireless and mobility applications and content delivery.

The Custom Solutions division has developed expertise in a variety of commercial verticals, including the healthcare, manufacturing, retail, financial and telecommunications industries. The division’s practices include IT Strategy, Architecture, Business Intelligence/Data Warehousing, Collaborative Solutions, Customer Relationship Management and Supply Chain.

In 2010, the Custom Solutions division’s previous branch delivery model was re-designed into a delivery model that better employs the use of our Global Solution Centers. Our Global Solution Centers are local domestic and offshore solution centers designed to provide a high value, lower-cost alternative for our clients. Strategically located in both the U.S. and India, they are focused on providing application development and management and IT operations support on either an individual or comprehensive integrated basis. Our domestic centers are located in Tampa, Florida, and Detroit,

Michigan. We have continued to significantly grow our Global Solutions Center in Bangalore, India and had approximately 1,000 consultants there at December 31, 2010, up from 500 consultants at December 31, 2009.

U.S. ERP

Our U.S. ERP division provides consulting services to support multi-package ERP solutions for customers in the U.S. from vendors including Oracle (including E-Business Suite, PeopleSoft and JD Edwards), SAP and Lawson, as well as several education management products. The U.S. ERP division is highly focused on industry solutions for vertical markets such as the public sector, higher education, K-12 education, healthcare, retail, grower management, food and beverage and manufacturing. The U.S. ERP division frequently works with our Custom Solutions division, leveraging the relationships of each division to cross-sell opportunities in ERP solutions along with Custom Solutions division services. As noted above, these divisions will be combined as one reporting unit in 2011. The U.S. ERP division's ability to offer cost-effective solutions from leading software vendors, in partnership with our other divisions, positions CIBER as a valued partner to our clients.

The U.S. ERP division is an Oracle Platinum Partner, which is the highest level of partnership in the Oracle Partner Network Specialized Program and a strategic partner to Oracle in several key industries such as the public sector, higher education and food and beverage. Our Oracle, PeopleSoft and JD Edwards solutions involve building, integrating and supporting mission critical systems for real-time enterprises.

In addition to being an SAP gold channel partner, our U.S. ERP division also is an SAP-certified global provider of application management services. The U.S. ERP division's comprehensive SAP solutions support their customers throughout the life cycle and include implementations and upgrades, extensions, integrations and customizations. The U.S. ERP division has organized its SAP Practice to serve multiple vertical markets. In its SAP Commercial Practice, the U.S. ERP division focuses on customers in retail, apparel and footwear, mining, metals, manufacturing, financial services and aerospace and defense industries. In its SAP Public Sector Practice, the U.S. ERP division focuses on delivering solutions to state and local governments.

The U.S. ERP division is a Certified Lawson Consulting Partner, providing full-scale business transformation projects in Lawson's target vertical markets through business process, change management and functional and technical services around Lawson technology. These target markets are healthcare, public sector, food and beverage and general manufacturing, for which we offer budgeting, financial processing and analysis, human capital management, sales order processing and manufacturing systems solutions.

The U.S. ERP division's Technology Solutions Group Practice focuses on providing customers with the best infrastructure products and architecture. Offerings include enterprise servers, storage, middleware, integration services, assessments and related products required to support critical business applications. Strategic relationships with IBM, NetApp, Dell, HP and other leading manufacturers allow us to architect and deploy the right solutions for our customers' environments.

Federal

Our Federal division provides a range of custom support services for U.S. federal government projects, including infrastructure support, systems integration, mission support and enterprise security. We provide these services to defense and civilian agencies, both domestic and abroad, including all branches of the U.S. military. Our employees, infrastructure, management processes and certifications meet stringent contracting requirements essential to success in the federal government prime contract market, which differentiates us from smaller competitors. In the aggregate, the various agencies of the

U.S. federal government represent our largest client and accounted for approximately 11% of our total revenue in 2010.

The practices within the Federal division are organized with a customer focus to allow each practice to provide a full set of capabilities to customers with common missions, goals and requirements. The Federal division’s customer-focused practices consist of Defense Technology Systems, Defense and Intelligence and Civilian Technology Solutions. The Defense Technology Systems Practice focuses on the U.S. Army and Navy and provides specialized expertise in telephony, network operations and call center support across the federal business base. The Defense and Intelligence Practice focuses on supporting the Joint Military Commands, the intelligence community and the Air Force, where we occupy a special niche by providing mission operations support and highly skilled staff to meet specialized requirements to help ensure our nation’s security. The Civilian Technology Solutions Practice provides an array of services ranging from enterprise architecture development to financial management for its clients, which include the following agencies: Homeland Security, U.S. Courts, Education, Transportation, Commerce, Agriculture, Energy, Interior, the Center for Medicare and Medicaid Services and the Centers for Disease Control. Within the Civilian Technology Solutions Practice is our Enterprise Security Solutions group, which provides engineering and system integration solutions for federally-funded, enterprise level security and risk management programs protecting ports, the shipping industry and other critical infrastructure environments.

IT Outsourcing

Our IT Outsourcing division is a global and expanding business with domestic headquarters in Edison, New Jersey, and international presence throughout Europe. The division offers outsourced enterprise infrastructure management solutions, including managed hosted infrastructure, service desk and desktop outsourcing and remote application support services. The IT Outsourcing division’s data centers, service desk centers, and global operations are located in the U.S., UK, Poland, Spain, the Netherlands and India.

Financial Information about Segments and Geographic Areas

Please refer to “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and Note 15 of the Notes to our Consolidated Financial Statements included under “Financial Statements and Supplementary Data” of this Annual Report for a discussion of financial information by segment and geographic areas.

Clients

Our clients consist primarily of Global 2000 blue-chip companies across most major industries, as well as governmental agencies in the U.S. and abroad. These organizations typically have significant IT budgets and frequently depend on outside consultants to help achieve their business and IT objectives. In 2010, our approximate percentage of total revenue by client industry was:

Government	23%
Manufacturing/high tech	17%
Financial	10%
Healthcare/pharmaceutical	10%
Retail	8%
Energy & Utilities	7%
Automotive	6%
Education	4%
Telecommunications	4%
Services and other	11%

Certain clients account for a significant portion of our revenue. Our largest client, the various agencies of the U.S. federal government, collectively accounted for approximately 11% of total revenue in each of 2010, 2009 and 2008. No other client accounted for more than 4% of our total revenue in 2010. Our IT Outsourcing division had a client in 2010 that accounted for 19% of total division revenue. Substantially all of our Federal divisions' revenue is funded by the U.S. federal government, including our contracts with several federal government prime contractors.

Client retention and turnover is highly dependent upon the type of solution we are providing. Many of our client relationships in which we are providing a custom solution have continued for many years. Each year, most of the services revenue in our Custom Solutions, IT Outsourcing and Federal divisions comes from clients for whom we have previously provided services. Both our IT Outsourcing and Federal divisions typically contract with their clients for periods ranging from three to five years. With services related to package software solutions, which includes our U.S. ERP division, as well as a large part of our International division, client engagements most typically involve a large enterprise software implementation over a period of six to eighteen months. Typically, once package software implementations are completed, future consulting services revenues from that client are minimal and, as a result, client turnover, with respect to these services, is high.

Typically, both our commercial and government clients may cancel their contracts or reduce their use of our services on short notice. If any significant client terminates its relationship with us or substantially decreases its use of our services, it could have a material adverse affect on our financial condition and results of operations.

Competition

The IT services industry is extremely competitive and characterized by continuous changes in customer requirements and improvements in technologies. Our competition varies significantly from city to city, as well as by the type of service provided. Our principal competitors include Accenture plc, Cognizant Technology Solutions Corp, Infosys Technologies Limited, Perficient, Inc., Sapien Corp and The Hackett Group, Inc. We also compete with privately-held local and regional IT consulting firms, as well as the service divisions of various software developers. In addition, a client may choose to use its own resources rather than to engage an outside firm for the type of services that we provide.

Our industry is being impacted by the growing use of lower-cost offshore delivery capabilities. There can be no assurance that we will be able to continue to compete successfully with existing or future competitors, or that competition will not have a material adverse effect on our results of operations and financial condition. To improve our ability to compete we are moving additional work to our lower-cost, offshore Global Solutions Centers and, specifically expanding our presence in India and integrating India into our services delivery. We plan to approximately double the scope of our operations in India over the next 12-18 months.

Our Competitive Strengths

We believe that our corporate strengths, identified below, position us to respond to the long-term trends, changing demands and competition within our principal markets.

- *Long-term Client Relationships*—We have been in business since 1974. We continually achieve high client satisfaction and have great success renewing client relationships. In fact, a prominent client from our first year in business, Ford Motor Company, remains one of our top five clients today in terms of annual revenue. This relationship exemplifies the kind of long-term commitment that we have toward our clients and speaks to the quality and breadth of the services that we provide.

- *Scale of Operations*—The competitive landscape for the delivery of IT services is highly fragmented. In almost every major market we compete with larger national and international publicly-held firms, as well as a host of smaller regional and local privately-held firms. For the past several years, large clients have attempted to consolidate the purchasing of IT services and work with fewer firms. Because of the relatively large scale of our operations, we have been able to compete effectively to remain a vendor to some of these large clients. Our successes have come at the expense of local and regional competitors that currently lack the scale to compete successfully for this work.
- *Balanced Business Model*—We have developed a business model that allows us to provide superior, leading-edge services that are routinely updated to meet the current needs of our clients. We have developed a reputation for thought leadership in industry verticals within each of our divisions.
- *Valued Service Offerings*—We offer services to our clients in both the private and public sectors, including staff supplementation services, custom application development services, implementation of ERP packages, application maintenance outsourcing services, resale of certain hardware and software products, managed hosting and call center support. We believe that having these valued service offerings is often a competitive advantage, particularly when competing against smaller local and regional firms.
- *Software Delivery Methodology*—CIBER has developed a comprehensive delivery methodology that, when coupled with our project management methodology, enables us to deliver custom solutions effectively, in accordance with industry best practices. CIBER's Software Delivery Methodology ("CSDM") is a set of repeatable, measurable processes that guide software development and allow us to evaluate our performance and manage all facets of the software delivery process. CSDM leverages IT industry knowledge and practices to ensure that our projects meet client requirements and quality expectations. CSDM fits within CIBER's larger ISO 9001 quality framework of policies and procedures that direct our business processes from initial client contact through final product delivery. By consistently adhering to these methods, we offer our clients high quality performance, high value and reduced risk.

Employees

As of December 31, 2010, we had approximately 7,500 employees, including billable consultants and support staff. We routinely supplement our employee consulting staff with the use of subcontractors, which totaled approximately 1,100 at December 31, 2010, most of which are from other services firms. None of our employees are subject to a collective bargaining arrangement. We have employment agreements with our executive officers and certain other employees. We believe our relations with our employees are good.

Seasonality

We experience a moderate amount of seasonality. Typically, our billable hours, which directly affect our revenue and profitability, decrease in the second half of the year, especially during the fourth quarter, due to the large number of holidays and vacation time taken by our billable consultants. As a result, our operating income as a percentage of total revenue is generally the lowest in the fourth quarter of each calendar year.

Available Information

Our website address is <http://www.ciber.com>. On the Investor Relations section of our website, we make available free of charge our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and any amendments to those reports, as soon as reasonably practicable after such reports are electronically filed with or furnished to the Securities and Exchange Commission (the "SEC") pursuant to Section 13(a) or 15(d) of the Exchange Act.

Item 1A. Risk Factors

We operate in a dynamic and rapidly changing economic and technological environment that involves numerous risks and uncertainties, many of which are driven by factors that we cannot control or predict. The following section describes some, but not all, of the factors that could have a material adverse effect on our business, financial condition, results of operations and the market price of our common stock.

Our results of operations may be adversely affected if we are unable to execute on the key elements of our new strategic plan.

The key initiatives of our new strategic plan include: (i) focusing on high-value, tightly-defined core offerings with a well-developed portfolio of reusable solution sets; (ii) developing a world-class sales organization; (iii) developing world-class management information systems to provide us with crucial project-specific financial information; and (iv) operating with increased operational regimes.

To tighten focus on our market approach, we are re-aligning our sales and delivery functions with our global markets and refining our offerings into our practices and verticals. This involves analyzing and better qualifying our customer base, as well as identifying those customers that represent greater opportunity for selling services of strategic value. If we fail to properly analyze and classify our customers or refine our offerings, we may not focus on the optimal customer group or service offerings to help us achieve our desired objectives and, as a consequence, our results may not meet the forecasted levels.

To improve our revenue and profitability, we are transitioning to a collaborative sales force that is driven by global account management. In addition, we are improving the training of our sales force in consultative selling techniques. This transition and training will require the investment of both time and capital. If we are unable to effectively transition to a globally-integrated, effective sales force, we may be less effective in generating revenue and profit than our competitors.

Our success depends in part on sophisticated telecommunications and information systems that we use to conduct and manage our operations. As part of our new strategic plan, we plan to recruit a Chief Information Officer and enhance our information management systems to enhance forecasting capabilities, develop management and sales tools and unify our systems globally over a period of several years. This enhancement may require a significant investment of capital and other resources, the development of new software programs and the implementation of complex software and equipment upgrades. Any delay or unforeseen difficulty in implementing our system enhancements may cause us to suffer operational interruptions or fail to realize the anticipated operational improvements and cost savings from these initiatives.

To improve our delivery execution, resource utilization, decision making process and cash collection cycle, we are changing our internal operational regimes. As with any organization with over 8,600 employees and contractors, effecting significant changes in operational regimes and corporate culture can be challenging. If we are unable to instill the appropriate operational regimes and gain the anticipated improvements, we may not be able to increase our profitability, improve our cash flow and strengthen our balance sheet.

Implementing the new strategic plan will require, among other things, expending capital, developing and adopting new technologies, recruiting talented employees and changing our corporate culture. If we are unable to successfully execute any or all of the initiatives of our new strategic plan, our revenues, operating results and profitability may be adversely affected. Even if we successfully implement our new strategic plan, we cannot guarantee that our revenues, operating results and profitability will improve.

Our results of operations can be adversely affected by economic conditions and the impacts of economic conditions on our clients' operations and technology spending.

Our results of operations are affected by the level of business activity of our clients, which in turn is affected by the regional and global economic conditions in which they operate. The uncertainty of global economic conditions has affected, and may continue to affect, demand for our services. These circumstances have caused some of our clients to delay, cancel or scale back their IT projects or IT spending, to seek lower pricing or extended payment terms, to delay payments due to us and, as occurred with several clients, to enter into bankruptcy or liquidation. Reduced demand for IT services has also resulted in reductions in the growth of new business and led to increased price competition for our services and increased the likelihood of entering into contracts that produce lower profit margins. In the event our clients continue to be negatively affected by economic conditions, our revenues, results of operations and financial condition may be materially adversely affected.

The IT services industry is highly competitive, and we may not be able to compete effectively.

We operate in a highly competitive industry that includes a large number of participants. We currently compete principally with other IT professional services firms and technology vendors, including a variety of large multinational providers and large off-shore service providers that offer some or all of the services that we offer, as well as many niche solution or service providers that compete with us in a specific geographic market, industry segment or service area. In addition, a client may choose to use its own resources rather than to engage an outside firm for the type of services that we provide. Many of the companies that provide services in our industry have significantly greater financial, technical and marketing resources than we do. Additionally, some of our competitors, particularly those located in regions with lower costs of doing business, may be able to provide services and solutions to clients at lower costs or on more attractive terms. Increased competition has, and may continue to, put downward pressure on the prices we can charge for our services. In particular, our ability to improve our profitability is related to our ability to move additional work to our lower-cost, offshore Global Solutions Centers and, specifically, to expanding our presence in India and integrating India into our services delivery.

Our marketplace is experiencing rapid changes in its competitive landscape. Some of our competitors have sought access to public and private capital and others have merged or consolidated. A possible consequence of the consolidation activity among hardware manufacturers, software developers and vendors and IT service providers may be greater convergence of products and services that were once offered separately by independent vendors. This possible integration of products and services could adversely affect our competitive position.

We may be unable to compete successfully with current or future competitors, and our revenue and profitability may be adversely affected.

Termination of a contract by a significant client and/or cancellation with short notice could adversely affect our results of operations.

Our five largest clients accounted for approximately 22% of our total revenue in 2010. The various agencies of the U.S. federal government represent our largest client, accounting for approximately 11% of our total revenue in 2010, while no other client accounted for more than 4% of our total revenue in 2010. Our clients typically retain us on a non-exclusive, engagement-by-engagement basis. Most individual client assignments are from three to twelve months; however, many of our client relationships have continued for many years. Although they may be subject to penalty provisions, clients may generally cancel a contract with short notice. Under many contracts, clients may reduce or delay their use of our services without penalty. These terminations, reductions or delays could result from factors unrelated to our work product or the progress of the project, such as factors related to business

or financial conditions of the client, changes in client strategies or the economy generally. When contracts are terminated, for whatever reason, we lose the associated revenues, and we may not be able to eliminate associated costs in a timely manner. There is a risk, especially given the uncertainty of global economic conditions, that we could experience a significant number of contract terminations. Consequently, our revenue and profit margins may be adversely affected.

We may experience declines in revenue and profitability if we do not accurately estimate the cost of a large engagement conducted on a fixed-price basis.

Although the percentage may vary from year to year, approximately 20-25% of our total services revenue in 2010 was from engagements performed in accordance with fixed-price contracts. When making a proposal or managing a fixed-price engagement, we rely on our estimates of costs and timing for delivering our services, which might be based on limited data and could turn out to be inaccurate. These estimates reflect our best judgment regarding the efficiencies of our methodologies and consultants as we plan to apply them to the engagement. If we do not accurately estimate our costs and timing for completion of projects, our contract could prove unprofitable or yield a profit margin that is lower than expected.

Some fixed-price engagements are long-term contracts of three to five years and estimating future year costs on such engagements is extremely difficult and subject to additional risks. Often our cost estimates and pricing from outsourcing projects anticipate long-term cost savings from transformational and other initiatives that we expect to benefit from over the term of the outsourcing contract. There is a risk that we will fail to accurately estimate the costs of performing our services, and that we will under price our contracts causing an adverse effect on our profits.

Losses, if any, on fixed-price contracts are recognized when the loss is determined. Any increased or unexpected costs or unanticipated delays in connection with the performance of fixed-price contracts, including delays caused by factors outside of our control, could make these contracts less profitable or unprofitable and may affect the amount of revenue reported in any period.

Our business could be adversely affected if our clients are not satisfied with our services, and we could face damage to our professional reputation and/or legal liability.

As a professional services firm, we depend largely on our relationships with our clients and our reputation for high-quality professional services and integrity to attract and retain clients. Additionally, many of our engagements involve projects that are critical to the operations of our clients' businesses. If a client is not satisfied with the quality of work performed by us or a subcontractor, or with the type of services or solutions delivered, we could incur additional costs to address the situation, the profitability of that work might be impaired, and the client's dissatisfaction with our services could damage our ability to obtain additional work from that client. Clients that are not satisfied may also seek to terminate our contracts. In addition, negative publicity related to our client relationships, regardless of its accuracy, may further damage our business by affecting our ability to compete for new contracts with current and prospective clients.

If we do not meet our contractual obligations to a client, we could be subject to legal liability. Our contracts typically include provisions to limit our exposure to legal claims relating to our services and the applications we develop; however, these provisions may not protect us, or may not be enforceable under some circumstances or under the laws of some jurisdictions. We may enter into non-standard agreements because we perceive an important economic opportunity or because our personnel did not adequately adhere to our guidelines. We may find ourselves committed to providing services that we are unable to deliver or whose delivery will cause us financial loss. If we cannot or do not fulfill our obligations, we could face legal liability. Although we maintain professional liability insurance, the policy limits may not be adequate to provide protection against all potential liabilities. In addition, if

we were to fail to properly deliver on a project, we may not be able to collect any related accounts receivable or could even be required to refund amounts paid by the client.

If we are not able to anticipate and keep pace with rapid changes in technology, our business will be negatively affected.

Our success depends on our ability to develop and implement technology services and solutions that anticipate and keep pace with rapid and continuing changes in technology, industry standards and client preferences. We may not be successful in anticipating or responding to these developments on a timely basis, and our services and solutions may not be successful in the marketplace. In addition, services, solutions and technologies developed by current or future competitors may make our service or solution offerings uncompetitive or obsolete. Any one of these circumstances could adversely affect our ability to obtain and successfully complete client engagements.

Our current level of indebtedness places restrictions upon our business, and we face the risk of breaching the financial covenants in our Senior Credit Facility.

We have a senior credit agreement with several financial institutions as lenders and Bank of America, N.A. as administrative agent (the "Senior Credit Facility") that matures on August 20, 2012. We had borrowed a total of \$87.2 million under the Senior Credit Facility at December 31, 2010. The Senior Credit Facility provides for an \$85 million revolving line of credit and a term loan. The term loan balance at December 31, 2010, was \$37.5 million. The term loan requires quarterly principal reductions of \$2.5 million, and therefore \$10 million of our total obligation is classified as a current liability. CIBER's remaining obligation under the Senior Credit Facility is classified as long-term debt on our consolidated balance sheet. While we intend to amend, extend or replace this facility, unless we are able to do so through bank financing or another form of cash infusion such as stock issuance or issuance of debentures, the obligations under the Senior Credit Facility would need to be reclassified to short-term debt as of September 30, 2011. We believe that other sources of credit or financing would be available to us; however, we cannot predict at this time what types of credit or financing will be available in the future, or the costs of such credit or financing.

CIBER's obligations under the Senior Credit Facility are secured by all of our present and future domestic tangible and intangible assets, as well as a pledge of 66% of the capital stock of our direct foreign subsidiaries. The terms of the Senior Credit Facility, as amended, include among other provisions, specific limitations on the incurrence of additional indebtedness and liens, stock repurchases, investments, guarantees, mergers, dispositions and acquisitions, and a prohibition on the payment of any dividends. Additionally, the Senior Credit Facility also requires us to maintain certain financial covenants, including a maximum consolidated total leverage ratio, a minimum consolidated fixed charge coverage ratio, a minimum EBITDA and an asset coverage test. On occasion, we have experienced instances of covenant non-compliance under our bank borrowings that were either waived by our lenders or required amendment of the covenants. The failure to comply with any of these debt covenants in the future would cause a default under the Senior Credit Facility. A default, if not waived or cured by amendment, could cause our debt to become immediately due and payable and terminate our ability to draw upon our revolving line of credit. In such a situation, we may not be able to repay our debt or borrow sufficient funds to refinance it, and even if new financing is available, it may not contain terms acceptable to us. Additionally, if we needed to obtain a waiver under, or an amendment to, the Senior Credit Facility in the future, or if we seek other financing, if available, our cost of borrowing could significantly increase (including higher interest rates) and we could face more restrictive covenants. This could materially adversely affect our results of operations and financial condition and our ability to stay in compliance with our debt covenants. In addition, we could experience significant covenant non-compliance if we are unable to amend, extend or replace our

Senior Credit Facility prior to September 30, 2011, related to the reclassification of our entire obligation under the Senior Credit Facility to long-term debt.

Given the current global economic conditions, fluctuations in exchange rates versus the U.S. dollar and other factors, there is an increased risk regarding our ability to maintain compliance with these debt covenants due to potential variances in our revenues, operating results and profitability, which may also cause increased volatility in our stock price.

In the past, we have been successful in generating sufficient cash flow from operations to reduce our indebtedness; however, that does not mean that we will be successful in doing so in the future. If we are unable to repay outstanding balances that exceed our maximum credit available as the aggregate commitments under the Senior Credit Facility are reduced, we will be in default unless we can obtain a waiver or amendment.

Our international operations are susceptible to different financial and operational risks than our domestic operations.

We have continued to expand our international operations and estimate that our foreign offices currently represent approximately 37% of our total revenue. We operate in 17 foreign countries. Due to our international operations, we are subject to a number of financial and operational risks that may adversely affect our revenue and profitability, including:

- the costs and difficulties related to managing geographically diverse operations;
- foreign currency exchange rate fluctuations (discussed in more detail below);
- differences in, and uncertainties arising from, changes in foreign business culture and practices;
- restrictions on the movement of cash and the repatriation of earnings;
- multiple and possibly overlapping or conflicting tax laws;
- the costs of complying with a wide variety of national and local laws;
- operating losses incurred in certain countries and the non-deductibility of those losses for tax purposes; and
- differences in, and uncertainties arising from, changes in legal, labor, political and economic conditions, as well as international trade regulations and restrictions, and tariffs.

The revenues and expenses of our international operations generally are denominated in local currencies. Accordingly, we are subject to exchange rate fluctuations between such local currencies and the U.S. dollar. These exchange rate fluctuations subject us to currency translation risk with respect to the reported results of our international operations and the cost of potential acquisitions. There can be no assurance that we will not experience fluctuations in financial results from our operations outside of the U.S., and there can be no assurance that we will be able, contractually or otherwise, to reduce the currency risks associated with our international operations. We manage our exposure to changes in foreign currency exchange rates through our normal operating and financing activities and, when deemed appropriate, with derivative financial instruments. There is no assurance that we will continue to use such financial instruments in the future or that any such use will be successful in managing or controlling foreign currency risks.

We have experienced and may continue to experience material impacts to revenues and earnings due to fluctuations in foreign currency rates, and in addition, these impacts may cause material fluctuations in our revenues and earnings from period to period. Significant strengthening or weakening of the U.S. dollar against currencies like the Great Britain Pound and the Euro may materially impact our revenue and profits. As we expand our presence in India, we will have increased exposure to

fluctuations between the Indian Rupee and the U.S. dollar. In addition, we have transactions with clients, as well as inter-company transactions between our subsidiaries, that cross currencies and expose us to foreign currency gains and losses. These types of events are difficult to predict and may recur.

We intend to increase our presence in India, which may expose us to operational risks.

To enhance our global offshore delivery structure, we plan to approximately double the scope of our operations in India over the next 12-18 months. As of December 31, 2010, we had approximately 1,100 employees in India. Concentrating our global offshore delivery structure in India presents a number of operational risks, many of which are beyond our control. India has experienced severe weather, political instability, worker strikes and terrorist attacks. These types of events may impair the ability of our people to safely travel to, and work in, our facilities in India. Our business continuity and disaster recovery plans may not be effective, particularly if catastrophic events occur. If any of these circumstances occurs, it may impact our ability to communicate with our personnel and clients in other locations. In addition, down-time in any processes operated for clients may adversely affect our operations and reputation.

Our revenues, operating results and profitability will vary from quarter to quarter, which may impact our ability to remain in compliance with our debt covenants, and may also result in increased volatility in the price of our stock.

Our quarterly revenues, operating results and profitability have varied significantly in the past, making them difficult to predict. This has led to volatility in the price of our stock. Our goal is to deliver more sustained, predictable performance in the future; however, there are factors that have caused and may continue to cause variations in our revenues, operating results and profitability, such as:

- the business decisions of our clients regarding the use of our services;
- the stage of completion of existing projects and/or their termination;
- client satisfaction with our services;
- our clients' financial ability to pay for our services;
- our ability to properly manage and execute client projects, especially those under fixed-price arrangements;
- our ability to properly price fixed-price contracts to provide for adequate profits;
- our ability to maintain our profit margins and manage costs, including those for personnel and support services;
- acquisition and integration costs related to possible acquisitions of other businesses;
- changes in, or the application of changes in, accounting principles or pronouncements under U.S. generally accepted accounting principles;
- changes in significant accounting estimates;
- changes in interest rates on our debts;
- currency exchange rate fluctuations;
- changes in estimates, accruals or payments of variable compensation to our employees; and
- global, regional and local economic and political conditions and related risks.

Our profit margin, and therefore our profitability, is a function of the rates we charge for our services and the utilization rate, or chargeability, of our consultants. Accordingly, if we are not able to maintain the rates we charge for our services or an appropriate utilization rate for our consultants, we will not be able to sustain our profit margin and our profitability will suffer. A number of factors affect the rates we charge for our services, including:

- our clients' perception of our ability to add value through our services;
- changes in our pricing policies or those of our competitors;
- the introduction of new products or services by us or our competitors;
- the use of globally-sourced, lower-cost service delivery capabilities by our competitors and our clients; and
- economic conditions in the U.S. and abroad.

Additionally, a number of factors affect our utilization rates, such as:

- seasonality, including number of workdays, holidays and vacations;
- our ability to transition consultants quickly from completed projects to new engagements;
- our ability to forecast demand for our services and thereby maintain an appropriately balanced and sized workforce; and
- our ability to manage employee turnover.

As a services business, our largest expense is salaries and payroll-related expenses. However, it is our skilled employees that generate our revenues. Balancing our workforce levels against the demands for our services is extremely difficult in troubled economic times. Delays or cutbacks in projects or delays in finding new projects increase the non-productive time of our consultants which decrease our utilization levels and our margins. We generally cannot reduce our labor costs as quickly as negative changes in revenue can occur. In addition, in a number of the foreign countries in which we operate, the local labor regulations make it very expensive to involuntarily terminate employees. As a result, our foreign operations will often retain underutilized employees for longer periods than our domestic operations.

A data security or privacy breach could adversely affect our business.

The protection of client, employee and company data is critical to the Company. The regulatory environment surrounding information security and privacy is increasingly demanding, with the frequent imposition of new and constantly changing requirements. In addition, our clients have a high expectation that we will adequately protect their confidential information. We are required at times to manage, utilize and store sensitive or confidential client or employee data. As a result, we are subject to numerous U.S. and foreign jurisdiction laws and regulations designed to protect this information, such as the European Union Directive on Data Protection and various U.S. federal and state laws governing the protection of health or other individually identifiable information. If any person, including any of our employees, negligently disregards or intentionally breaches our established controls with respect to such data or otherwise mismanages or misappropriates that data, we could be subject to monetary damages, fines and/or criminal prosecution. Unauthorized disclosure of sensitive or confidential client or employee data, whether through systems failure, employee negligence, fraud or misappropriation, could damage our reputation and cause us to lose clients. Similarly, unauthorized access to or through our information systems or those we develop for our clients, whether by our employees or third parties, could result in negative publicity, legal liability and damage to our reputation.

If we are unable to collect our receivables, our results of operations and cash flows could be adversely affected.

Our business depends on our ability to successfully obtain payment from our clients for the amounts they owe us for work performed. We evaluate the financial condition of our clients and usually bill and collect on relatively short cycles. We maintain allowances against receivables, but actual losses on client balances could differ from those that we currently anticipate and as a result, we might need to adjust our allowances. There is no guarantee that we will accurately assess the creditworthiness of our clients. In addition, timely collection of client balances depends on our ability to complete our contractual commitments and bill and collect our contracted revenues. Recent global economic conditions and other factors resulted in financial difficulties for a number of our clients and, consequentially, we experienced a greater amount of bad debt expense.

If we are unable to meet our contractual requirements, we might experience delays in the collection of, and/or be unable to collect, our client balances and, if this occurs, our results of operations and cash flows could be adversely affected.

Our future success depends on our ability to continue to retain and attract qualified sales, delivery and technical employees.

Our business involves the delivery of professional services and is highly labor intensive. Our future success depends upon our ability to continue to attract, train, effectively motivate and retain highly-skilled technical, managerial, sales and marketing personnel. Although we invest significant resources in recruiting and retaining employees, there is often considerable competition for certain personnel in the IT services industry and as a result, employee turnover is generally high. From time to time, we have trouble locating enough highly-qualified candidates that are in our desired geographic locations, with the required specific expertise or at the desired compensation levels. The inability to attract and retain qualified employees in sufficient numbers could have a serious negative effect on us, including our ability to obtain and successfully complete important client engagements and thus, maintain or increase our revenues. Such conditions could also force us to resort to the use of higher-priced subcontractors, which would adversely affect the profitability of the related engagement. Our ability to attract and retain qualified personnel in India will become increasingly important as we implement our plans to expand our Global Solutions Center in India and increase the number of employees working there.

In addition, we believe that there are certain key employees within the organization, primarily in the senior management team, who are important for us to meet our objectives. Due to the competitive employment nature of our industry, there is a risk that we will not be able to retain these key employees. As part of our new strategic plan, we are recruiting a Chief Information Officer. The loss of one or more key employees could adversely affect our continued growth. In addition, uncertainty created by turnover of key employees could result in reduced confidence in our financial performance, which could cause fluctuations in the price of our securities and result in further turnover of our employees.

We could incur additional losses due to further impairment in the carrying value of our goodwill.

We have recorded a significant amount of goodwill on our consolidated balance sheet as a result of numerous acquisitions. At December 31, 2010, the carrying value of our goodwill was \$338.9 million. The carrying value of goodwill represents the fair value of an acquired business in excess of identifiable assets and liabilities as of the acquisition date. We are required to test goodwill for impairment annually and do so during the second quarter of each year, as well as on an interim basis to the extent that factors or indicators become apparent that could reduce the fair value of any of our reporting units below its book value. These determinations are based in part on several factors, including our judgments regarding the cash flow potential of each of our business units and involve projections that are inherently subject to change based on future events. A significant downward revision in the fair value of one or more of our business units that causes the carrying value to exceed the fair value, as

determined based on discounted future cash flows of the related business, will cause goodwill to be considered impaired, and would result in a non-cash impairment charge in our consolidated statement of operations.

In June 2010, we performed our annual test for goodwill impairment and as a result, we recorded a goodwill impairment charge of \$112.0 million related to our Custom Solutions and Federal divisions. The forecasts utilized in the discounted cash flow analysis as part of our impairment test assume future revenue and profitability growth in each of our divisions during the next five years and beyond. If our operating divisions cannot obtain, or we determine at a later date that we no longer expect them to obtain the projected levels of profitability, future goodwill impairment tests may also result in an impairment charge. There can be no assurances that our operating divisions will be able to achieve our estimated levels of profitability. Given fluctuations in the global economic conditions affecting our industry and impacting our customers and their use of our services, we cannot be certain that goodwill impairment will not be required during future periods. Additionally, if a goodwill impairment charge related to any one of our operating divisions were required, it would likely trigger a violation of the financial covenants under our Senior Credit Facility.

We depend on contracts with various federal, state and local government agencies for a significant portion of our revenue and, if the spending policies or budget priorities of these agencies change, we could lose revenue.

In 2010, approximately 23% of our total revenue was from public sector clients, including federal, state, local and foreign governments and agencies. The market for our services depends largely on federal and state legislative programs and the budgetary capability to support programs, including the continuance of existing programs. These programs can be modified or amended at any time by acts of such governments. The various agencies of the U.S. federal government collectively represent our largest customer accounting for 11% of our total revenue in 2010. In addition, changes in federal initiatives or in the level of federal spending due to budgetary or deficit considerations may have a significant impact on our future financial performance, as may curtailment of the federal government's use of consulting and technology services firms, the adoption of new laws or regulations that affect companies providing services to the federal government and potential delays in the government appropriation process. Moreover, a number of state and local governments and agencies are suffering from significant budget shortfalls, which may result in curtailment of spending on consulting and technology services. A reduction in spending at the federal, state or local level could negatively impact our operations, revenue and profitability.

Additionally, government contracts contain provisions and are subject to laws and regulations that provide government clients with rights and remedies not typically found in commercial contracts. Among other things, governments may terminate contracts with short notice for convenience, as well as for default, and may cancel multi-year contracts if funds become unavailable. Cancellation or reduction in price or scope could limit our ability to recover incurred costs, reimbursable expenses and profits on work completed prior to the termination. If insufficient funding is appropriated to the government entity to cover termination costs, we may not be able to fully recover our investments.

Unfavorable government audits could require us to adjust previously reported operating results, to forego anticipated revenue and subject us to penalties and sanctions.

The government agencies we contract with generally have the authority to audit and review our contracts with them. As part of that process, the government agency reviews our performance on the contract, our pricing practices, our cost structure and our compliance with applicable laws, regulations and standards. An audit of our work, including an audit of work performed by companies we have acquired or may acquire, could result in a substantial adjustment to our previously reported operating results. For example, any costs that were originally reimbursed could be subsequently disallowed. In this case, cash we have already collected may have to be refunded and operating margins may be reduced.

If a government audit uncovers improper or illegal activities by us, or we otherwise determine that these activities have occurred, we may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines and suspension or disqualification from doing business with the government. Any unfavorable determination could adversely affect our ability to bid for new work with one or more jurisdictions.

Our services or solutions could infringe upon the intellectual property rights of others, or we might lose our ability to utilize rights we claim in intellectual property or the intellectual property of others.

We cannot be sure that our services and solutions, or the solutions of others that we offer to our clients, do not infringe on the intellectual property rights of third parties, and we could have infringement claims asserted against us or against our clients. These claims could harm our reputation, cost us money and prevent us from offering some services or solutions. In a number of our contracts, we agree to indemnify our clients for expenses or liabilities resulting from claimed infringements of the intellectual property rights of third parties. In some instances, the amount of these indemnities could be greater than the revenues we receive from the client. Any claims or litigation in this area, whether we ultimately win or lose, could be time-consuming and costly, injure our reputation or require us to enter into royalty or licensing arrangements. We might not be able to enter into these royalty or licensing arrangements on acceptable terms. If a claim of infringement were successful against us or our clients, an injunction might be ordered against our clients or our own services or operations, causing further damages. We could lose our ability to utilize the intellectual property of others. Third-party suppliers of software, hardware or other intellectual property assets could be acquired or sued, and this could disrupt use of their products or services by us and our clients. If our ability to provide services and solutions to our clients is impaired, our operating results could be adversely affected.

In addition, if we are unable to capture the intellectual capital developed by our employees and convert such intellectual capital into reusable and commercially marketable intellectual property, our costs of delivering our services may increase, our development efforts may be duplicated and we may lose the economic advantage of owning and licensing CIBER intellectual property.

We have adopted anti-takeover defenses that could make it difficult for another company to acquire control of CIBER or limit the price investors might be willing to pay for our stock, thus affecting the market price of our securities.

We have adopted a Rights Agreement, commonly known as a “poison pill,” under which each shareholder of the Company holds one share purchase right, which we refer to as a “Right,” for each share of Company common stock held. The Rights become exercisable upon the occurrence of certain events and may make the acquisition of our Company more difficult and expensive. In addition, our certificate of incorporation and bylaws each contain provisions that may make the acquisition of our Company more difficult without the approval of our board of directors, including a provision that gives our board of directors the ability to issue preferred stock and determine the rights and designations of the preferred stock at any time without shareholder approval. The rights of the holders of our common stock will be subject to, and may be adversely affected by, the rights of the holders of any preferred stock that may be issued in the future. The issuance of preferred stock by our board of directors pursuant to our certificate of incorporation could have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from acquiring, a majority of the outstanding voting stock of CIBER.

In addition, the staggered terms of our board of directors could have the effect of delaying or deferring a change in control. These provisions could limit the price that investors might be willing to pay in the future for our securities and as a result, the price of our securities could decline.

The above factors and certain provisions of the Delaware General Corporation Law may have the effect of deterring hostile takeovers or otherwise delaying or preventing changes in the control or

management of CIBER; this could adversely affect transactions in which our shareholders might otherwise receive a premium over the then-current market price for their CIBER securities.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our corporate office is located at 6363 South Fiddler's Green Circle, Suite 1400, Greenwood Village, Colorado 80111, where we, along with our Denver area operations, occupy approximately 77,000 square feet under a lease that expires in December 2018. Generally, we provide our services at client locations and therefore, our office locations are primarily used for sales and other administrative functions. At December 31, 2010, we had lease obligations for approximately 760,000 square feet of office space in approximately 90 locations. We believe our facilities are adequate for our current level of operations.

Item 3. Legal Proceedings

The Company is involved in legal proceedings, audits, claims and litigation arising in the ordinary course of business. Although the outcome of such matters is not predictable, we do not expect that the ultimate outcome of any of these matters, individually or in the aggregate, will have a material adverse effect on our financial condition, results of operations or cash flows.

Notwithstanding the foregoing, the Company is engaged in legal proceedings in Germany in connection with our acquisition of a controlling interest in Novasoft AG (now know as CIBER AG) in 2004. In August 2006, we completed a buy-out of the remaining minority shareholders of Novasoft; however, certain of those former minority shareholders challenged the adequacy of the buy-out consideration in a German court. The court appointed independent experts to evaluate the consideration and claims of the minority shareholders and their evaluations are expected sometime during 2011. At this time, the Company is unable to predict the outcome of these proceedings although, if the court awards additional consideration, such consideration will increase the goodwill associated with the acquisition and the Company will be liable for that additional consideration, as well as the costs associated with these proceedings.

CamSoft, Inc., a Louisiana corporation, claims that it had a role in an alleged joint venture that developed a wireless network for video camera surveillance systems to be deployed to municipal governments. The lawsuit, CamSoft Data Systems, Inc. v. Southern Electronics, et al., was filed initially in October 2009 in Louisiana state court against numerous defendants, including CIBER. The lawsuit was subsequently removed to federal court in the Middle District of Louisiana and the complaint amended to include additional defendants and causes of action including antitrust claims, civil RICO claims, unfair trade practices, trade secret, fraud, unjust enrichment and conspiracy claims. The suit has many of the same parties that were involved in related litigation in state court in New Orleans, which was concluded in 2009 when CIBER settled with the plaintiffs, Active Solutions and Southern Electronics, in the New Orleans suit, who are now co-defendants in the current lawsuit and CamSoft's former alleged joint venturers. CIBER is vigorously defending the allegations and plans to file a comprehensive motion to dismiss all claims, state and federal. However, given the complexity of the litigation, it is likely that CIBER's motion and those of other defendants will not be decided for a significant period of time.

Item 4. Removed and Reserved

Part II

Item 5. Market for Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities

Market Information, Holders and Dividends

Our common stock is listed on the New York Stock Exchange under the symbol "CBR." The table below sets forth, for the periods indicated, the low and high sales price per share of our common stock.

	Price Range	
	Low	High
<i>Fiscal 2009</i>		
First Quarter	\$2.03	\$5.66
Second Quarter	2.64	3.69
Third Quarter	2.99	4.50
Fourth Quarter	2.88	4.08
<i>Fiscal 2010</i>		
First Quarter	3.16	4.24
Second Quarter	2.51	4.41
Third Quarter	2.52	3.52
Fourth Quarter	2.99	4.84

On February 11, 2011, the closing price of our common stock was \$4.39 and there were 2,653 registered shareholders of record.

Our policy is to retain our earnings to support the growth of our business. Accordingly, we have never paid cash dividends on our common stock. Additionally, dividend payments on our common stock are not permitted under our amended Senior Credit Facility.

Securities Authorized for Issuance under Equity Compensation Plans

Information regarding securities authorized for issuance under our equity compensation plans can be found under "Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters."

Recent Sales of Unregistered Securities and Use of Proceeds from Registered Securities

None.

Purchases of Equity Securities by the Issuer

The Company did not repurchase any of our common stock during the quarter ended December 31, 2010. Repurchases of our common stock are not permitted under our amended Senior Credit Facility.

Performance Graph

The following graph compares the cumulative five year total return provided to shareholders on CIBER, Inc.'s common stock relative to the cumulative total returns of the S&P 500 index and two customized peer groups of companies that includes an old peer group of nine companies which are: Accenture plc, Atos Origin SA, CACI International Inc, Cap Gemini SA, CGI Group Inc., Cognizant Technology Solutions Corp, Logica PLC, Maximus, Inc. and Tieto Corporation; and another new peer group of six companies which are: Accenture plc, Cognizant Technology Solutions Corp, Infosys Technologies Limited, Perficient, Inc., Sapient Corp and The Hackett Group, Inc. The Company utilizes

self-constructed peer groups to better align itself with industry competition. An investment of \$100 (with reinvestment of all dividends) is assumed to have been made in our common stock, in each of the peer groups, and in the indices on December 31, 2005, and its relative performance is tracked through December 31, 2010.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Among CIBER, Inc., the S&P 500 Index,
and Old Peer Group and a New Peer Group

* \$100 invested on 12/31/05 in stock or index, including reinvestment of dividends. Fiscal year ending December 31.

- (1) During the second quarter of 2010, we recorded a goodwill impairment charge of \$112.0 million to write-down the goodwill associated with certain segments. The goodwill impairment charge is only partially tax-affected and resulted in a \$30.8 million (27.5%) deferred tax benefit. Refer to Note 7 to the Consolidated Financial Statements included herein for additional discussion.
- (2) During 2009, we sold nine million shares of our common stock, for proceeds of \$23.2 million, net of issuance costs, which were used to repay a portion of the outstanding borrowings under our then-outstanding senior secured reducing revolving credit facility.
- (3) On January 1, 2009, we were required to retrospectively apply new accounting guidance related to convertible debt and noncontrolling interests to our previously reported results for 2007 and 2008. Our results for 2006 have not been adjusted for this retrospective application. The required retrospective applications of the above guidance had the following impact on our net income,

diluted earnings per share and presentation of the consolidated statement of operations for the 2007 and 2008 annual periods and the adjusted amounts are reflected in the table above:

	<u>2008</u>	<u>2007</u>
Net income attributable to CIBER, Inc., as previously reported . . .	\$29,956	\$29,026
Impact of convertible debenture adjustment	<u>(3,072)</u>	<u>(5,075)</u>
Net income attributable to CIBER, Inc., as adjusted	26,884	23,951
Net income attributable to noncontrolling interests	929	1,566
Consolidated net income	<u>\$27,813</u>	<u>\$25,517</u>
Earnings per share—basic and diluted:		
Net income attributable to CIBER, Inc., as previously reported	\$ 0.50	\$ 0.47
Impact of convertible debenture adjustment	<u>(0.05)</u>	<u>(0.08)</u>
Net income attributable to CIBER, Inc., as adjusted	<u>\$ 0.45</u>	<u>\$ 0.39</u>

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with our Consolidated Financial Statements and related Notes included elsewhere in this Annual Report on Form 10-K. This discussion and analysis also contains forward-looking statements and should also be read in conjunction with the disclosures and information contained in “Disclosure Regarding Forward-Looking Statements” and “Risk Factors” in this Annual Report on Form 10-K. References to “we,” “our,” “us,” “the Company” or “CIBER” in this Annual Report on Form 10-K refer to CIBER, Inc. and its subsidiaries. All references to years, unless otherwise noted, refer to our fiscal year, which ends on December 31.

We use the phrase “constant currency adjusted” to indicate that we are comparing certain financial results after removing the impact of foreign currency exchange rate fluctuations, thereby allowing for the comparison of business performance between periods. Financial results that are “constant currency adjusted” are calculated by restating current period activity into U.S. dollars using the comparable prior period’s foreign currency exchange rates. This approach is used for all results where the functional currency is not the U.S. dollar.

Business and Industry Overview

CIBER is a global IT consulting, services and outsourcing company primarily serving Global 2000 blue-chip companies and government agencies. We compete in a large and growing marketplace offering services that include application development and management, ERP implementation, change management, project management, systems integration, infrastructure management and end-user computing, as well as strategic business and technology consulting. To a lesser extent, we also resell certain IT hardware and software products.

Our reportable segments are our operating divisions, which are organized internally primarily by the nature of their services, client base and geography. In 2010, we operated in five reportable segments, which were our primary operating divisions and consisted of our International division, which includes Europe, Eastern Asia, Australia and New Zealand, and our Custom Solutions, U.S. ERP, Federal and IT Outsourcing divisions. In 2011, we are combining operations and management of the Custom Solutions and U.S. ERP divisions and will report them as a single unit called CIBER North America going forward. Our International division provides a broad range of IT consulting services, including package software implementation, application development, systems integration and support services, with SAP-related solutions and services accounting for 60% to 65% of its total revenue in 2010. Our Custom Solutions division provides application development, integration and support services. Our India-based operations are considered part of our Custom Solutions division. Our U.S. ERP division primarily provides enterprise software implementation services, including ERP software from software vendors such as Oracle, SAP and Lawson. Our Federal division provides a range of custom support services, including infrastructure support, systems integration, mission support and enterprise security. Our IT Outsourcing division offers outsourced enterprise infrastructure management solutions, including managed hosted infrastructure, service desk and desktop outsourcing, and remote application support services.

We recognize the majority of our services revenue under time-and-material contracts as hours and costs are incurred. Under fixed-price contracts, which currently make up approximately 20-25% of our services revenue, our revenue is fixed under the contract, while our costs to complete our obligations under the contract are variable. As a result, our profitability on fixed-price contracts can vary significantly and occasionally can even be a loss. Changes in our services revenue are primarily a function of hours worked on revenue-generating activities and, to a lesser extent, changes in our average rate per hour and changes in contract mix. Hours worked on revenue-producing activities vary with the number of consultants employed and their utilization level. Utilization represents the percentage of time worked on revenue-producing engagements divided by the standard hours available (i.e., 40 hours per week). Our average utilization rates are higher in our Custom Solutions and Federal divisions (typically around 85% to 90%) as compared to our International and U.S. ERP divisions (typically around 75% to 85%). With time-and-materials contracts, higher consultant utilization results in increased revenue; however, with fixed-price contracts, it may result in higher costs and lower gross profit margins because our revenue is fixed. We actively manage both our number of consultants and our overall utilization levels. If we determine we have excess available resources that we cannot place on billable assignments in the near future, we consider reducing those resources. As a result, during the last three years, most of our consultant turnover has been from involuntary termination of employment.

The hourly rate we charge for our services varies based on the level of the consultant involved, the particular expertise of the consultant and the geographic area. Our typical time-and-materials hourly rates range from \$20 to \$200 per hour and, on average, are generally highest in our U.S. ERP division and lowest in our Federal division. As India-based resources become more significant, our average hourly rates will decrease. For projects which are fixed-price, cost plus or level-of-effort, where our revenue is not directly based on hours incurred, our realized rate per hour will vary significantly depending on success or overages on such projects, as well as the blend of estimated resources used to deliver projects.

Selling, general and administrative ("SG&A") costs as a percentage of revenue vary by business segment. Close to 60% of our overall SG&A expenses are typically for personnel costs for our operations management, sales and recruiting personnel and administrative staff, as well as our corporate office support staff and executive management personnel. Although these costs are not immediately affected by changes in revenue, there is often a relatively short-term correlation between these SG&A salary expenses and revenue. Additionally, as we bid on larger and longer-term projects, the sales cycle and related sales costs have been increasing. As a result of the above, we analyze

changes in our SG&A expenses in terms of the relationship between these costs and revenue (expressed as a percentage of revenue) rather than total dollars or percentage change in the total dollars.

Other revenue includes resale of third-party IT hardware and software products, sales of proprietary software and commissions on sales of IT products. Our sales of IT hardware and software generally involve IT network infrastructure. The gross profit margin on consolidated other revenues is typically in the range of 30% to 50%. This is a blend of low-margin hardware sales (typically a 5% to 10% gross margin), mid-margin software sales (typically a 20% to 40% gross margin) and higher-margin product commissions and proprietary software sales. Depending on the mix of these business activities, gross profit margin on other revenue will fluctuate.

The market demand for CIBER's services is heavily dependent on IT spending by major corporations, organizations and government entities in the markets and regions that we serve. The pace of technological advancement and changes in business requirements and practices of our clients all have a significant impact on the demand for the services that we provide.

Representing more than one-third of our consolidated revenues, our International division operates primarily in Western Europe, but also has offices in China, Russia, Australia and New Zealand. As such, these operations transact business in local currencies of the countries in which they operate. In recent years, generally 50% to 55% of our International division's revenue has been denominated in Euros, 15% to 20% has been denominated in Great Britain Pounds ("GBP") and the balance has come from a number of other currencies. Changes in the exchange rates between these foreign currencies and the U.S. dollar affect the reported amounts of our assets, liabilities, revenues and expenses. For financial reporting purposes, the assets and liabilities of our foreign operations are translated into U.S. dollars at current exchange rates at period end and revenues and expenses are translated at average exchange rates for the period.

Our results of operations are affected by economic conditions, including macroeconomic conditions, credit market conditions and levels of business confidence. Revenue is driven by our ability to secure new contracts and deliver solutions and services that add value relevant to our clients' current needs and challenges. In recent quarters and ongoing for the foreseeable future, we have been affected by significant efforts by our clients (both current and potential) to implement cost-savings initiatives. These initiatives have included going to vendor management systems, taking their business to larger, pure-play offshore vendors and vendor consolidation. In some cases, these initiatives have benefited CIBER, but in others we have lost our revenue stream entirely or seen a decline in our level of revenues with particular clients. The pricing environment continues to be extremely competitive. A number of our competitors are structuring more offshore services into their bids, thereby lowering their pricing to help clients reduce costs, and making it more difficult for us to compete on pricing. We also have global delivery options to offer to our current and potential clients as possible cost savings, and we are expanding our offshore capabilities and increasing the usage of these resources; however, they are on a smaller scale than the offshore offerings of some of our competitors. Another issue which has had and continues to have an impact on our revenues and profitability, involves a much longer sales cycle than we have seen historically, which has been driven by a much slower decision-making process in starting new projects in a variety of industries that we currently serve, or in which we are currently bidding for work. The longer sales cycle increases the cost of our sales efforts and pushes potential revenues and profitability further into the future. Some clients remain cautious, seeking flexibility by shifting to a more phased approach to contracting for work. In connection with our extensive strategic review completed in 2010, we have tightened our standards governing the quality of engagements that we will accept with the goal of growing revenue, increasing margins, improving collectability of receivables and delivering sustained, predictable performance. However, there can be no assurances that we will be successful with such actions. Economic conditions and other factors continue to impact the business operations of many of our clients, their ability to continue to use our services and their

financial ability to pay for our services in full. The impact of project cancellations cannot be accurately predicted and bad debt expense will differ from our estimates, and any such events may negatively impact our results of operations.

During the second quarter of 2010, based on a combination of factors, including the current economic environment, our operating results and a sustained decline in our market capitalization, we recorded a \$112.0 million non-cash goodwill impairment charge as a result of our annual goodwill impairment test. In the same quarter, CIBER also expensed \$6.1 million, \$5.0 million of which was for executive charges pertaining to the retirement of our former chief executive officer and the continuing benefits for our founder and former non-executive chairman of the board, as well as \$1.1 million of additional costs incurred related to the leadership changes. Additionally, during the fourth quarter of 2010, we incurred higher than usual bad debt expenses, and we reversed a large amount of project revenue previously recognized under the percentage-of-completion method due to revised estimates of project completion. These items, along with costs recorded for a few smaller legal matters, totaled \$9.9 million during the fourth quarter and impacted our division operating income as follows: U.S. ERP—\$4.2 million; Federal—\$2.6 million; Custom Solutions \$0.1 million; plus a \$3.0 million impact to corporate expense. Of the \$9.9 million, \$2.7 million impacted revenue and gross profit, \$5.6 million represented bad debt expense and the remainder comprised other various SG&A costs.

Results of Operations—Comparison of the Years Ended December 31, 2010 and 2009—Consolidated

The following table sets forth certain Consolidated Statement of Operations data in dollars and expressed as a percentage of revenue:

	Year Ended December 31,			
	2010		2009	
	(Dollars in thousands)			
Consulting services	\$1,025,056	95.7%	\$ 992,779	95.7%
Other revenue	46,287	4.3	44,921	4.3
Total revenues	<u>\$1,071,343</u>	<u>100.0%</u>	<u>\$1,037,700</u>	<u>100.0%</u>
Gross profit—consulting services	\$ 244,701	23.9%	\$ 242,615	24.4%
Gross profit—other revenue	17,919	38.7	16,678	37.1
Gross profit—total	262,620	24.5	259,293	25.0
SG&A expenses	249,341	23.3	225,643	21.7
Goodwill impairment	112,000	10.4	—	—

Net income (loss) attributable to CIBER, Inc.	<u>\$ (77,160)</u>	<u>(7.2)%</u>	<u>\$ 14,958</u>	<u>1.4%</u>
Consultant utilization	86%		86%	
Average billable headcount	7,575		7,130	

Revenues. Total revenues increased \$33.6 million, or 3%, for 2010 compared with 2009. Constant currency adjusted revenues were approximately \$9 million higher than our reported revenues, representing a 4% increase over 2009. Our June 2010 acquisition of Segmenta A/S (“Segmenta”) increased our current year revenues by \$10 million. The primary contributions to the increase in current year revenue growth were from our International and U.S. ERP divisions.

Revenue by segment was as follows:

	Year Ended December 31,		% change
	2010	2009	
	(In thousands)		
International	\$ 385,155	\$ 349,834	10.1%
Custom Solutions	368,682	372,168	(0.9)
U.S. ERP	133,662	126,443	5.7
Federal	117,545	117,613	(0.1)
IT Outsourcing	76,947	76,341	0.8
Total segment revenues	1,081,991	1,042,399	3.8
Corporate/Inter-segment	(10,648)	(4,699)	n/m
Total revenues	<u>\$1,071,343</u>	<u>\$1,037,700</u>	<u>3.2%</u>

n/m = not meaningful

- Constant currency adjusted International division revenues improved 13%. Approximately half of the International division's constant currency adjusted revenue growth related to revenues from our new German-based managed services practice and the Segmenta acquisition completed in June 2010. The remaining improvement was generally due to increased revenues from SAP software related services, particularly in several central European countries. Constant currency adjusted revenues, excluding the impact of acquisition-related revenues, increased 10% between the comparable periods.
- The decline in Custom Solutions' revenues generally related to the ongoing financial impact from a variety of economic issues, such as customer pricing pressures, the implementation of cost-saving initiatives at a number of clients, including vendor management systems, offshore services alternatives, vendor consolidation, the attrition of placements at a few larger customer accounts and the completion of several sizable projects. All of the above resulted in either a decrease in the fees we receive for our services, or decreases in the use of our services. Additionally, we have experienced challenges in obtaining new state and local government contracts and budget issues with new projects in this sector due to the current economic climate. Increased revenues related to recently awarded new or additional work, as well as increasing demand in the healthcare vertical and related to expansion of our global delivery model, all helped to offset most of the overall revenue decrease.
- The overall improvement in total revenues for our U.S. ERP division related to growth in Oracle and SAP projects, particularly due to strong demand in both the public and higher education sectors, as well as an increase in other product revenues related to commissions earned on the sale of IT hardware plus software resales. Projected overruns on a couple of fixed-price projects that are in process at year-end and a project for a financially-distressed client where we stopped recognizing revenue for services being delivered, both negatively impacted our current year revenue growth.
- Increases in sales related to low-margin materials offset the declines in the Federal division's services revenues from the ongoing erosion of revenue related to expired contracts, keeping total revenues basically flat between the comparable years.
- Current year account wins more than offset account losses and decreased product sales to maintain positive revenue growth for our IT Outsourcing division in the current year.

Gross Profit. In total, our gross profit margin decreased 50 basis points to 24.5% for 2010, compared to 25.0% for 2009. Gross margin improvements in our Custom Solutions and IT Outsourcing

divisions came from better margins on new projects, plus the completion of several low-margin Custom Solutions' projects. These improvements partially offset the declines in gross profit margin in the remaining divisions related primarily to start up of a new German-based managed services practice, the increased usage of higher-priced subcontractors and overruns on fixed-price projects.

Selling, general and administrative costs. Our SG&A costs increased 160 basis points to 23.3% of revenue for 2010, from 21.7% for 2009. Included in 2009 were costs of \$2.2 million to settle litigation, which represented 20 basis points of SG&A as a percentage of revenue. Excluding these 2009 litigation costs, our SG&A costs increased 180 basis points in 2010 compared with 2009. \$6.1 million, or approximately 60 basis points of the increase, related to executive charges of \$5.0 million accrued in the second quarter of 2010 pertaining to the retirement of our former chief executive officer and the continuing benefits for our founder and former non-executive chairman of the board, as well as \$1.1 million of additional costs incurred related to the leadership changes. Higher bad debt expense in 2010 also accounted for 60 basis points of the increase. Additionally, expansion in our domestic and offshore delivery centers, including India, additional expenses from organizational transition items resulting from the recently adopted strategy of combining North American branch offices, consolidation of the sales and delivery organizations, and investments in sales training and infrastructure, as well as higher management salaries resulting from senior leadership changes, also contributed to the increase in SG&A as a percentage of revenue in 2010.

Operating income (loss). During the second quarter of 2010, based on a combination of factors, including the current economic environment, our operating results and a sustained decline in our market capitalization, we recorded a \$112.0 million non-cash goodwill impairment charge following our annual goodwill impairment test. After the goodwill impairment charge, CIBER had an operating loss of \$103.2 million for 2010, which also included \$6.1 million related to executive charges and leadership transition costs also recorded in the second quarter of 2010, as well as \$9.9 million of items recorded during the fourth quarter of 2010 primarily related to higher than usual bad debt expenses, the reversal of a large amount of project revenue previously recognized under the percentage-of-completion method and several small legal matters. Costs of \$2.2 million to settle litigation were included in our operating results for 2009. Excluding the 2010 and 2009 specific charges, operating income was \$24.9 million, or 2.3% of total revenue for 2010, compared with \$30.0 million, or 2.9% of total revenue for 2009. The decrease in operating income, excluding these specific charges between the comparable periods, was due to increased corporate expenses and decreased segment profitability, primarily in our International, U.S. ERP and Federal divisions.

Operating income (loss) by segment was as follows:

	Year Ended December 31,		% change	2010 % of revenue*	2009 % of revenue*
	2010	2009			
	(In thousands)				
International	\$ 19,842	\$ 20,107	(1.3)%	5.2%	5.7%
Custom Solutions	25,002	24,125	3.6	6.8	6.5
U.S. ERP	3,445	9,764	(64.7)	2.6	7.7
Federal	1,979	5,994	(67.0)	1.7	5.1
IT Outsourcing	<u>(1,407)</u>	<u>(1,823)</u>	<u>22.8</u>	<u>(1.8)</u>	<u>(2.4)</u>
Total segment operating income	48,861	58,167	(16.0)	4.5	5.6
Corporate expenses	(35,582)	(24,517)		(3.3)	(2.4)
Goodwill impairment	(112,000)	—		(10.4)	—
Amortization of intangible assets	<u>(4,429)</u>	<u>(5,891)</u>		<u>(0.4)</u>	<u>(0.5)</u>
Total operating income (loss)	<u>\$ (103,150)</u>	<u>\$ 27,759</u>		<u>(9.6)%</u>	<u>2.7%</u>

* Segments calculated as a % of segment revenue, all other calculated as a % of total revenue

- International operating income declined primarily due to increased usage of higher-priced subcontractors and a \$3.1 million operating loss in 2010 related to the start up of a new German-based managed services practice, both of which impacted the division's gross profit margin. The gross margin decreases were partially offset by a reduction in SG&A expenses as a percentage of revenue mainly related to reduced costs for facilities and equipment.
- Custom Solutions' operating income improved between the comparable periods due to an improvement in gross profit margin stemming from reduced work on a few large, low-margin projects, new higher-margin business and continued growth in lower-cost offshore delivery. The gross profit margin improvement was partially offset by increased SG&A costs primarily related to our expansion in India and also in our domestic delivery centers.
- U.S. ERP operating income decreased primarily due to situations involving two specific problem clients. Gross profit margin was reduced by \$2.0 million related to the reversal of project revenue previously recognized under the percentage-of-completion method due to revised estimates of project completion. Also, we did not recognize \$1.1 million of revenue on a project for a client whose financial condition deteriorated significantly, although we had continued to provide our services. We also recorded \$2.2 million of bad debt expense to provide a full allowance for unpaid accounts receivable related to this financially-distressed client. Overruns on some fixed-price projects and increased usage of higher-priced subcontractors also contributed to the lower 2010 operating income.
- Federal operating income was lower in 2010 due to a reduced gross profit margin resulting from lower margins on renewal business and increased revenue from lower-margin material sales. In addition, our Federal division had \$2.0 million of bad debt expense for a non-government project in 2010.
- IT Outsourcing operating loss improved due to better gross margins related to increased volume in some accounts and higher usage of lower-priced offshore resources.
- Corporate expenses increased in 2010 mainly due to \$6.1 million of executive charges and leadership transition costs recorded during the second quarter, plus \$3.0 million of fourth quarter expenses that were primarily related to an additional bad debt allowance recorded for our City of New Orleans receivable. Included in 2009 was a \$2.2 million one-time charge for the

settlement of litigation. Excluding these 2010 and 2009 charges, corporate expenses increased by approximately \$4.1 million, or 30 basis points, primarily due to increases in salary expense related to management changes and other organization transition-related expenses, as well as increased professional and consulting fees, employee benefit costs and added corporate support services.

Interest expense. Interest expense increased \$0.9 million during 2010 compared to 2009. Interest charges related to the estimated contingent consideration for our Segmenta acquisition accounted for \$0.5 million of the increase. The remaining \$0.4 million related to higher interest costs under our Senior Credit Facility that was put into place in mid-2009.

Other income, net. Other income, net was \$0.1 million in 2010, down from \$0.3 million in 2009. A small foreign exchange loss in the current year compared with a gain of \$0.3 million in the prior year accounted for all of the decrease.

Income taxes. In 2010, we had a consolidated tax benefit of \$31.8 million relating to our pre-tax loss of \$109.5 million, with an effective tax benefit rate of 29%. In 2009, we had consolidated tax expense of \$7.8 million relating to our pre-tax income of \$22.9 million, with an effective tax expense rate of 34%. Our effective tax rate is significantly impacted by the changes in the amount and the geographic mix of our income and loss. Our 2010 tax rate was impacted by the goodwill impairment charge and lower domestic operating results. In 2010, our domestic pre-tax loss was \$130.7 million and our foreign pre-tax profit was \$21.2 million. Our domestic loss included the \$112.0 million goodwill impairment charge, which was only partially subject to taxation and resulted in a \$30.8 million (27.5%) tax benefit. Our fourth quarter 2010 tax rate also had a \$1.0 million benefit from the utilization of carried forward net operating losses in Europe, which were previously reserved. We estimate our blended Federal and state rate to be approximately 40%. For our significant foreign operations, the local tax rates range from approximately 20% to 33%. Our actual tax expense is also impacted by the amount of non-deductible expenses, which also increases our effective tax rate. For 2011, we are estimating an effective tax rate of 33% to 37%; however, this rate could fluctuate based on the factors discussed above, as well as other items.

For interim periods, we base our tax provision on forecasted book and taxable income for the entire year. As the forecast for the year changes, we adjust our year-to-date tax provision. Our provision for income taxes is based on many factors and is subject to volatility from year to year.

Results of Operations—Comparison of the Years Ended December 31, 2009 and 2008—Consolidated

We translate the results of our foreign operations into U.S. dollars from the relevant local currencies. In periods when the U.S. dollar is weaker, this results in a proportionately larger number of U.S. dollars, and thus helps our results. In U.S. dollar terms, currency rates were favorable for CIBER during the first 3 quarters of 2008. During the fourth quarter of 2008, we saw significant declines in foreign exchange rates as compared to the U.S. dollar. The strength of the U.S. dollar remained fairly consistent throughout the first half of 2009, only to weaken against foreign currencies during the second half of the year, making for a more favorable currency environment for CIBER once again by the end of 2009, as compared to the end of 2008. The negative impact on our financial results related to the strength of the U.S. dollar during the first half of 2009 was partially offset by a weaker U.S. dollar in the second half of the year, resulting in an overall decrease in revenue of approximately \$41 million in 2009 compared to 2008.

The following table sets forth certain Consolidated Statement of Operations data in dollars and expressed as a percentage of revenue:

	Year Ended December 31,			
	2009		2008	
	(Dollars in thousands)			
Consulting services	\$ 992,779	95.7%	\$1,133,233	95.1%
Other revenue	44,921	4.3	58,334	4.9

Revenues. Total revenues decreased \$153.9 million, or 13%, for 2009 compared to 2008. Poor economic conditions and the strength of the U.S. dollar against many currencies between the comparable periods were primarily responsible for the decline. Foreign currency rate changes resulted in a reduction in 2009 reported revenue of approximately \$41 million, or 4%, compared with 2008. Constant currency adjusted revenue decreased 9% for 2009 compared to 2008. The global economic downturn, which began late in 2008, led to lower overall demand for IT services and products. Over much of the period from late 2008 and throughout most of 2009, many of our clients and prospects were focused on initiatives to deliver near- and medium-term cost savings, and they continued to exercise caution in launching new IT projects, especially larger ones, during this time frame. Many clients and prospects reduced, delayed or cancelled IT spending over this same time period. We also experienced pricing pressures from existing clients and prospects that were working hard to manage their costs.

Revenue by segment was as follows:

	Year Ended December 31,		
	2009	2008	% change
	(In thousands)		
International	\$ 349,834	\$ 406,071	(13.8)%
Custom Solutions	372,168	466,208	(20.2)
U.S. ERP	126,443	122,163	3.5
Federal	117,613	127,391	(7.7)
IT Outsourcing	76,341	72,453	5.4
Total segment revenues	1,042,399	1,194,286	(12.7)
Corporate/Inter-segment	(4,699)	(2,719)	n/m
Total revenues	<u>\$1,037,700</u>	<u>\$1,191,567</u>	<u>(12.9)%</u>

n/m = not meaningful

- Unfavorable foreign currency fluctuations accounted for a 10% decline in our International division's current year revenue results. Constant currency adjusted International division revenue decreased by approximately 4%. Completed projects and delays in customer decisions on new projects slowed revenue contributions in 2009. Client bankruptcy and financial constraints also caused cancellation of, or reductions in some client contracts which negatively impacted the 2009 results.
- Custom Solutions' revenues decreased primarily due to the successful completion of the very large Pennsylvania Turnpike Commission ("PTC") project in mid-2008, plus the normal completion of other projects, as well as a number of canceled or delayed projects and staffing reductions on other projects resulting from economic conditions during this period of time. Most significantly, some large clients cut back on the use of our services in 2009 due to strategy decisions. We were unable to close sufficient new contracts, especially larger ones, to offset these reductions.
- U.S. ERP revenues improved over 3% in 2009 compared with 2008. Several large contract wins in late 2008 and early 2009 in our Oracle and SAP practices were primarily responsible for the increase. Partially offsetting these contributions was the successful completion of the implementation phase of the very large PTC project (mentioned above) in mid-2008. We continued to provide support services to the PTC, but at considerably less revenue than during the implementation phase. Additionally, our Technology Solutions group incurred a \$1.7 million reduction in current year revenue due to slower hardware sales related to the weak economy.
- Federal revenues were down in 2009 as compared to 2008 related to expired contracts that have yet to be replaced. Federal had a large contract that expired at the end of 2008 and was then awarded to a qualified small business. The Federal division was successful in 2009 at winning a number of its expiring contracts where we were eligible to re-compete, but delays in new contract awards have continued to push out improvements in Federal revenues.
- IT Outsourcing revenues increased in 2009 due to account growth at existing customers, plus the addition of several new clients in late 2008 and in 2009, all of which combined more than offset a client bankruptcy, canceled project and reduced scope and spending at several other clients.

Gross Profit. In total, our gross profit margin decreased 220 basis points to 25.0% for 2009 compared with 27.2% for 2008. Gross profit margin on consulting services revenue accounted for all of the decrease, with sizable consulting services margin decreases in all but our U.S. ERP division, which had a significant improvement over 2008 due to the turnaround in our SAP practice from its poor performance in 2008. The significant declines in consulting services gross margins were primarily due to pricing pressures, which reduced pricing on our existing work, as well as lowered pricing for new competitive awards. As customers have reduced, delayed or canceled projects, it was difficult to maintain our normal levels of consultant utilization, which also contributed to the reduction in our gross margin. Our International division also incurred an approximate 2.5% employee wage increase at the beginning of 2009 that we were not able to recover through increased billing rates due to the pricing pressures mentioned above.

Selling, general and administrative costs. We began a number of cost reduction initiatives in the fall of 2008 in response to the deteriorating economic conditions. As a result, our SG&A costs for 2009 declined by \$38.6 million, or 15%, compared with 2008. As a percentage of revenue, SG&A costs were down 50 basis points between the comparable annual periods. Significant cost reductions resulted from the combination of our former Commercial and State & Local Government divisions (now the Custom Solutions division) in 2009; however, reductions were made in all divisions other than IT Outsourcing, which experienced increases in SG&A costs primarily related to additional infrastructure to support revenue growth within that division. Overall, salary reductions represented approximately half of the annual SG&A costs savings, and the remainder was achieved primarily through reductions in a number

of other categories such as recruiting, training and meeting expenses and travel costs, in addition to a \$4.7 million decrease in bad debt expense, primarily from fewer client bankruptcies in 2009 compared with 2008.

Operating income. The 220 basis point reduction in our gross profit margin, partially offset by a 50 basis point savings in our SG&A costs, resulted in a decrease in our operating income margin to 2.7% for 2009 compared to 4.5% for 2008.

Operating income by segment was as follows:

	Year Ended December 31,		% change	2009 % of revenue*	2008 % of revenue*
	2009	2008			
	(In thousands)				
International	\$ 20,107	\$ 30,795	(34.7)%	5.7%	7.6%
Custom Solutions	24,125	45,170	(46.6)	6.5	9.7
U.S. ERP	9,764	1,196	716.4	7.7	1.0
Federal	5,994	8,682	(31.0)	5.1	6.8
IT Outsourcing	(1,823)	(244)	(647.1)	(2.4)	(0.3)
Total segment operating income	58,167	85,599	(32.0)	5.6	7.1
Corporate expenses	(24,517)	(25,387)		(2.4)	(2.1)
Amortization of intangible assets	(5,891)	(6,274)		(0.5)	(0.5)
Total operating income	<u>\$ 27,759</u>	<u>\$ 53,938</u>		<u>2.7%</u>	<u>4.5%</u>

* Segments calculated as a % of segment revenue, all other calculated as a % of total revenue

- International operating income declined due to the significant reduction in services gross profit margins stemming from lower consultant utilization and increased consultant wages, as well as some customer-induced pricing pressures. A considerable reduction in SG&A costs due to lower overhead personnel costs, plus lower recruiting and travel expenses, as well as reduced bad debt expense helped to partially offset the gross margin decline.
- Custom Solutions' operating income decreased due to a substantial reduction in consulting services gross margin resulting primarily from higher-margin projects that ended or were canceled and downward pricing pressure from both existing customers and new clients. In addition, some lower-margin, fixed-price projects also contributed to the margin decrease. Additionally, although SG&A costs decreased \$14.0 million in this division between the comparable years as we successfully reduced direct and overhead labor costs, we could not adjust these costs as quickly as our revenue was adjusting downward. Therefore, SG&A costs as a percentage of revenue increased between the comparable periods, in part due to labor costs not reducing quickly enough, as well as increased costs for bad debt expense and higher rent expense in India.
- The U.S. ERP division had significantly improved operating income in 2009 over 2008 related to improvements in both consulting services gross profit margin and reduced SG&A expenses in total dollars and as a percentage of revenue. The gross profit margin increase was led by a significant turnaround in our SAP practice related to improved consultant utilization, cost reductions and completion of a large, low-margin fixed-price contract.
- Federal's operating income was down due to the erosion of gross profit margin as revenues and consultant utilization decreased and new and re-compete projects were priced at lower margins than the projects they were replacing due to competitive market conditions. Additionally, the

division was not able to fully offset its decreased revenue with reductions in costs as it continued to build the infrastructure required to compete for major prime contracts.

- IT Outsourcing's operating loss increased due to both a reduction in consulting services gross profit margin, as well as an increase in SG&A costs as a percentage of revenue. This division had some fixed-cost utilization issues following a late 2008, large customer bankruptcy that prevented it from reducing its costs when the related revenue was lost. Additional infrastructure costs to accommodate future revenue growth caused most of the increase in SG&A costs.
- Corporate expenses decreased 3% as primarily salary-related cost-cutting measures were partially offset by significantly increased expenses related to the \$2.2 million paid in the third quarter to settle a lawsuit, including attorney fees, as well as increased share-based compensation expenses and increased costs related to our new corporate headquarters.

Interest expense. Interest expense decreased \$7.7 million during 2009, compared to 2008; \$4.3 million of which related to our convertible debt, which was fully retired in December 2008. The remaining decrease was primarily due to lower average borrowings during 2009 and, to a lesser extent, due to lower average interest rates.

Other income (expense), net. Other income, net was \$0.3 million in 2009, compared to other expense, net of \$1.4 million in 2008. Our foreign exchange transaction gains/losses accounted for a \$2.8 million improvement between the comparable periods. Offsetting the improvement from foreign exchange results was a \$1.3 million gain on the retirement of our convertible debentures during 2008 with no similar gain in 2009.

Income taxes. Our effective tax rate increased to 34.0% for 2009, compared to 30.3% for 2008, primarily due to additional U.S. taxes of approximately \$1 million on a one-time repatriation of cash to the U.S.

Liquidity and Capital Resources

At December 31, 2010, we had working capital of \$132.4 million and a current ratio of 1.6:1, compared to working capital of \$136.9 million and a current ratio of 1.8:1 at December 31, 2009. Historically, we have used our operating cash flows, available cash reserves and borrowings, as well as periodic sales of our common stock to finance ongoing operations and business combinations. We believe that our cash and cash equivalents, our expected operating cash flow and our available Senior Credit Facility will be sufficient to finance our working capital needs through at least the next year.

	Year Ended December 31,		
	2010	2009	2008
	(In thousands)		
Net cash provided by (used in):			
Operating activities	\$ 35,121	\$ 81,547	\$ 92,171
Investing activities	(17,570)	(13,389)	(22,237)
Financing activities	(13,379)	(52,583)	(49,932)
Effect of foreign exchange rates on cash	(2,267)	3,000	(2,870)
Net increase in cash and cash equivalents	<u>\$ 1,905</u>	<u>\$ 18,575</u>	<u>\$ 17,132</u>

Our balance of cash and cash equivalents was \$69.3 million at December 31, 2010, compared to a balance of \$67.4 million at December 31, 2009. Typically, most of our cash balance is maintained by our foreign subsidiaries and such cash is not readily available for use by our domestic operations. Any return of cash from our foreign subsidiaries is not planned for the foreseeable future and would likely

result in significant tax consequences. Our domestic cash balances are used daily to reduce our outstanding balance on our Senior Credit Facility.

Operating activities. Cash provided by operating activities was \$35.1 million in 2010, compared with \$81.5 million and \$92.2 million in 2009 and 2008, respectively. Reduced earnings and changes in normal short-term working capital items, primarily accounts receivable, contributed to the overall reduction in cash from operations during 2010 as compared to the prior years. Our working capital fluctuates significantly due to changes in accounts receivable (discussed below), as well as due to the timing of our domestic payroll and accounts payable processing cycles with regard to month-end dates and other seasonal factors. During 2010 and 2009, our domestic operations generated \$19.2 million and \$45.0 million, respectively, of cash from operations while our International operations generated cash from operations of \$15.9 million and \$36.5 million in 2010 and 2009, respectively. Typically, the seasonality of our business in many European countries results in negative cash from operations in the early part of the year with improvements in the second half of the year. Cash flow from European receivables and payables are typically maximized in the fourth quarter, and annual bonuses are paid during the first quarter.

Total accounts receivable increased to \$239.2 million at December 31, 2010, from \$213.1 million at December 31, 2009. Total accounts receivable day's sales outstanding ("DSO") was 62 days at December 31, 2010, compared to 61 days at December 31, 2009. Increased revenues during the fourth quarter of 2010, primarily from domestic product sales on which we record net commission revenue, as well as from our International division, helped increase our accounts receivable balance at December 31, 2010, as compared to the prior year. During 2010, our domestic accounts receivable was negatively impacted by the timing of billing milestones on certain larger, fixed-priced contracts. We have experienced several delays in customer acceptance of applicable milestones, thereby limiting our ability to bill for our services. At December 31, 2010, our unbilled accounts receivable for costs and earnings in excess of billings totaled \$31.5 million, which was an increase of \$15.7 million from the prior year. In addition, economic conditions and other factors have negatively affected the business conditions of many of our clients, including those in the public sector, resulting in payment delays and, in some cases, increased bad debt provisions for CIBER. Our International division typically experiences slower receivable payments during the first half of the year with improvement in the second half of the year, and with their lowest DSO levels typically occurring in December. Changes in accounts receivable have a significant impact on our cash flow. Items that can affect our accounts receivable DSO include: contractual payment terms, client payment patterns (including approval or processing delays and cash management), client mix (public vs. private), fluctuations in the level of IT product sales and the effectiveness of our collection efforts. Many of the individual reasons are outside of our control and, as a result, it is normal for our DSO to fluctuate from period to period, affecting our liquidity.

Accrued compensation and related liabilities fluctuate from period to period based on a couple of primary factors, including the timing of our normal bi-weekly U.S. payroll cycle and the timing of variable compensation payments. Our annual bonuses are typically accrued throughout the year and paid in the first quarter of the following year, causing some fluctuation from quarter to quarter. Accounts payable and other accrued liabilities typically fluctuate based on when we receive actual vendor invoices and when they are paid. The largest of such items typically relates to vendor payments for IT hardware and software products that we resell and payments to services-related subcontractors.

Investing activities. Investing activities are primarily comprised of cash paid for acquisitions and purchases of property and equipment. In 2010, we acquired Segmenta A/S, located in Denmark, for \$3.5 million, plus we have accrued contingent consideration of \$5.1 million related to this acquisition at December 31, 2010. In 2009, we acquired India-based Iteamic Pvt. Ltd. for \$4.3 million and in 2008 we spent \$7.8 million primarily for the acquisition of a Norwegian SAP consultancy and a noncontrolling interest in one of our European subsidiaries. Spending on property and equipment was \$14.0 million

during 2010, compared with \$9.1 million in 2009 and \$14.7 million in 2008. Generally, our capital spending is primarily for technology equipment and software and to support our global employee base, as well as our management and corporate support infrastructure. Larger capital spending projects typically relate to periodic investments in our client support-based infrastructure for our domestic and offshore delivery centers and data center operations, and such investments will fluctuate from period to period. In 2011, we plan to expand our delivery center operations in India, which we estimate will cost up to \$5 million, as well as make other capital investments to begin enhancing our information management systems, develop management and sales tools and work on unifying our systems globally.

Financing activities. Typically, our most significant financing activities consist of the borrowings and payments under the revolving credit portion of our Senior Credit Facility. This fluctuates based on cash provided by, or used in, our domestic operations during the period as our cash receipts and disbursements are linked to the revolving credit facility. During 2010, we had net payments on our long-term debt of \$11.1 million compared to net payments of \$69.5 million in 2009 and net borrowings of \$109.0 million in 2008. In 2009, we used the cash proceeds of \$23.2 million from the sale of our common stock, as well as the positive cash flow generated by our operating activities and existing cash balances to pay down our long-term debt balance. The net borrowings in 2008 were primarily used to retire our convertible debentures. During the year ended December 31, 2008, we used \$149.5 million of cash for this purpose, resulting in gains on retirement of debt of approximately \$2.1 million. In 2008, we also had an outflow of \$4.3 million related to the settlement of cross-currency interest rate swaps.

Senior Credit Facility. CIBER has a senior credit agreement with several financial institutions as lenders and Bank of America, N.A. as administrative agent (the "Senior Credit Facility") that matures on August 20, 2012. The credit available under the Senior Credit Facility may be used for the working capital needs and general corporate purposes of the Company. The Senior Credit Facility provides for an \$85 million revolving line of credit and a term loan. The term loan balance at December 31, 2010, was \$37.5 million. The term loan requires quarterly principal reductions of \$2.5 million, and therefore \$10 million of our total obligation is classified as a current liability. CIBER's remaining obligation under the Senior Credit Facility is classified as long-term debt on our consolidated balance sheets. While we intend to amend, extend or replace this facility, unless we are able to do so through bank financing or another form of cash infusion such as stock issuance or issuance of debentures, the obligations under the Senior Credit Facility would need to be reclassified to short-term debt as of September 30, 2011. The Senior Credit Facility was subsequently amended on February 18, 2011, to modify certain financial covenants effective as of December 31, 2010, as well as modify other provisions. A summary of the material provisions of the amended Senior Credit Facility follows.

The Senior Credit Facility is subject to mandatory prepayments (and commitment reductions) in amounts equal to the net cash proceeds of any asset disposition, event of loss, extraordinary receipts, issuance or incurrence of indebtedness and issuance of equity, subject in each case as appropriate to thresholds and other exceptions and definitions as specified in the credit agreement. CIBER's obligations under the Senior Credit Facility are secured by all of CIBER's present and future domestic tangible and intangible assets, as well as a pledge of 66% of the capital stock of CIBER's direct foreign subsidiaries.

Subject to applicable conditions, we may elect interest rates on our Senior Credit Facility borrowings calculated by reference to either the Bank of America prime lending rate ("Prime") plus a margin that ranges from 1.75% to 2.50%, or a London Interbank Offered Rate ("LIBOR") for one, three or six month maturities, plus a margin that ranges from 2.75% to 3.50%. The applicable margins on our Prime loans and LIBOR loans are determined by reference to our current consolidated total leverage ratio. We are also required to pay a commitment fee of 0.50% per annum on the unused portion of the Senior Credit Facility. The Senior Credit Facility and the related loan documents provide for the payment of other specified recurring fees and expenses, including administrative agent fees, letter of credit and other fees. We currently have an interest rate swap that matures on March 31, 2012,

which converts \$25.0 million of our borrowings under our Senior Credit Facility from a variable-rate instrument into a 1.77% fixed-rate instrument, plus the applicable margin. At December 31, 2010, our weighted average interest rate on our outstanding borrowings under the Senior Credit Facility, including the interest swap, was 4.17%.

The terms of the Senior Credit Facility, as amended, include among other provisions, specific limitations on the incurrence of additional indebtedness and liens, stock repurchases, investments, guarantees, mergers, dispositions and acquisitions, and a prohibition on the payment of any dividends. The Senior Credit Facility also contains certain financial covenants, including: 1) a maximum consolidated total leverage ratio; 2) a minimum consolidated fixed charge coverage ratio; 3) a minimum EBITDA; and 4) an asset coverage test. A summary of these financial covenants is as follows:

- The maximum consolidated total leverage ratio (Funded Debt divided by EBITDA) may not be greater than 2.25 to 1.00 on December 31, 2010. The maximum leverage ratio increases to 2.50 to 1.00 on March 31, 2011, reduces to 2.25 to 1.00 on December 31, 2011, and reduces to 2.00 to 1.00 on June 30, 2012.
- The minimum consolidated fixed charge coverage ratio (EBITDA minus capital expenditures divided by the sum of tax expense plus interest expense plus scheduled funded debt payments plus any restricted payments) must be not less than 1.25 to 1.00. Capital expenditures for 2011 exclude up to \$5 million in connection with the expansion of our India facilities.
- We must maintain twelve-month consolidated EBITDA of at least \$44 million on December 31, 2010, at least \$40 million on March 31, 2011 and June 30, 2011, and at least \$45 million thereafter.
- Under the asset coverage test, the aggregate amount of loans advanced under the Senior Credit Facility shall, at any time, not exceed an amount equal to 80% of all of our net accounts receivable.

Certain elements of these ratios are defined below:

- Funded Debt includes borrowings under our Senior Credit Facility, any other bank debt plus the face amount of any outstanding Letters of Credit, as well as any earn-out and capitalized lease arrangements.
- EBITDA represents the sum of net income (or net loss), net interest expense, income tax expense, depreciation expense, amortization expense, share-based compensation expense, cash separation costs (not to exceed \$6.4 million) and other cash transitional costs (not to exceed \$1.0 million) related to the departure of our former Chief Executive Officer and former non-executive Chairman of the Board of Directors, non-cash goodwill impairment charges not to exceed \$112.0 million in the aggregate, plus up to \$10.0 million of charges taken during the quarter ended December 31, 2010, primarily related to accounts receivable and unbilled revenue balances, as well as several other legal settlement items, measured over the twelve-month period ending as of the end of each fiscal quarter.

We are required to be in compliance with the financial covenants at the end of each calendar quarter, and we were in compliance with these financial covenants as of December 31, 2010, with the following calculations for our financial covenant ratios:

Consolidated total leverage ratio—2.08 to 1.00 (maximum permitted—2.25 to 1.00)
Consolidated fixed charge coverage ratio—1.47 to 1.00 (minimum permitted—1.25 to 1.00)
Consolidated EBITDA—\$45.3 million (minimum permitted—\$44 million)
Asset Coverage Test—\$93.1 million (not to exceed \$191.4 million)

Based on management's current estimates, we do not currently believe a covenant violation to be probable of occurring for at least the next 12 months. However, given the current volatile economic conditions, there can be no assurance that we will continue to be in compliance with these bank covenants. If a covenant violation were to occur, we believe that we would be able to obtain a waiver or amendment from our credit group. Any such waiver or amendment would come at additional costs to CIBER and such costs could be material. We believe that other sources of credit or financing would be available to us; however, we cannot predict at this time what types of credit or financing will be available in the future, or the costs of such credit or financing.

At December 31, 2010, we had outstanding borrowings of \$87.2 million under the Senior Credit Facility.

Off-Balance Sheet Arrangements

We do not have any reportable off-balance sheet arrangements.

Contractual Obligations

The contractual obligations presented in the table below represent our estimates of future payments under fixed contractual obligations and commitments. Changes in our business needs, cancellation provisions, changing interest rates and other factors may result in actual payments differing from these estimates. We cannot provide certainty regarding the timing and amounts of payments. We have presented below a summary of the most significant assumptions used in our information within the context of our consolidated financial position, results of operations and cash flows.

The following table is a summary of our contractual obligations as of December 31, 2010:

	<u>Total</u>	<u>Payments due by period</u>			<u>Thereafter</u>
		<u>2011</u>	<u>2012 - 2013</u>	<u>2014 - 2015</u>	
			<u>(In thousands)</u>		
Principal payments on long-term debt	\$ 88,352	\$10,473	\$ 77,875	\$ 4	\$ —
Interest payments on long-term debt(1)	5,486	3,482	2,004	—	—
Operating leases(2)	88,201	26,755	35,855	13,542	12,049
Purchase obligations	37	35	2	—	—
Total(3)	<u>\$182,076</u>	<u>\$40,745</u>	<u>\$115,736</u>	<u>\$13,546</u>	<u>\$12,049</u>

- (1) Interest payments were calculated based on terms of the related agreements and effective interest rates as of December 31, 2010, for our borrowings.
- (2) Includes operating leases for all office locations, automobiles and office equipment.
- (3) At December 31, 2010, we had gross unrecognized tax benefits of \$7.4 million. We are unable to make a reasonably reliable estimate as to when a cash settlement, if any, with the appropriate taxing authority may occur; as such, our unrecognized tax benefits are not included in the table above.

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements, as well as the reported amounts of revenue and expenses during the periods presented. We continually evaluate our estimates, judgments and assumptions based on available information and experience. We believe that our estimates, judgments and assumptions are reasonable based on information available to

us at the time they are made. To the extent there are differences between our estimates, judgments and assumptions and actual results, our financial statements will be affected. Such differences may be material to our financial statements. The accounting policies that reflect our more significant estimates, judgments and assumptions are described below.

Revenue recognition—CIBER earns revenue primarily from providing IT services to its clients, and to a much lesser extent, from the sale and resale of IT hardware and software products. CIBER's consulting services revenue comes from three primary sources: (1) technology integration services where we design, build and implement new or enhanced system applications and related processes; (2) general IT consulting services, such as system selection or assessment, feasibility studies, training and staffing; and (3) outsourcing and managed IT services in which we manage, staff, maintain, host or otherwise run solutions and/or systems provided to our customers. Contracts for these services have different terms based on the scope, deliverables and complexity of the engagement, which requires management to make judgments and estimates in recognizing revenue. Fees for these contracts may be in the form of time-and-materials or fixed-price billings. The majority of our consulting services revenue is recognized under time-and-materials contracts as hours and costs are incurred. Consulting services revenue also includes project-related reimbursable expenses for travel and other out-of-pocket expenses separately billed to clients.

Revenue for technology integration consulting services where we design/redesign, build and implement new or enhanced systems applications and related processes for our clients is generally recognized based on the percentage-of-completion method. Under the percentage-of-completion method, management estimates the percentage of completion based upon the contract costs incurred to date as a percentage of the total estimated contract costs. If the total cost estimate exceeds revenue, we accrue for the estimated loss immediately. The use of the percentage-of-completion method requires significant judgment relative to estimating total contract revenue and costs, including assumptions as to the length of time to complete the project, the nature and complexity of the work to be performed and anticipated changes in estimated costs. Estimates of total contract costs are continuously monitored during the term of the contract and recorded revenues and costs are subject to revision as the contract progresses. Such revisions may result in increases or decreases to revenue and income and are reflected in the consolidated financial statements in the periods in which they are first identified.

Revenue for general IT consulting services is recognized as work is performed and amounts are earned. We consider amounts to be earned once evidence of an arrangement has been obtained, services are delivered, fees are fixed or determinable and collectability is reasonably assured. For contracts with fees based on time-and-materials or cost-plus, we recognize revenue over the period of performance. For fixed-price contracts, depending on the specific contractual provisions and nature of the deliverables, revenue may be recognized on a proportional performance model based on level-of-effort, as milestones are achieved or when final deliverables have been provided.

Outsourcing and managed IT services arrangements typically span several years. Revenue from time-and-materials contracts is recognized as the services are performed. Revenue from unit-priced contracts is recognized as transactions are processed based on objective measures of output. Revenue from fixed-price contracts is recognized on a straight-line basis, unless revenues are earned and obligations are fulfilled in a different pattern. Costs related to delivering outsourcing and managed services are expensed as incurred, with the exception of labor and other direct costs related to the set-up of processes, personnel and systems, which are deferred during the transition period and expensed evenly over the period services are provided. Amounts billable to the client for transition or set-up activities, which do not have standalone value, are also deferred and recognized as revenue evenly over the period that the managed services are provided.

We sometimes enter into arrangements (excluding software license arrangements) with customers that purchase multiple services, or a combination of services and IT hardware products, from us at the

same time, referred to as multiple-element arrangements. Each element within a multiple-element arrangement is accounted for as a separate unit of accounting provided that the delivered services or products have value to the customer on a standalone basis. We consider a deliverable element to have standalone value if the service or product is sold separately by us or another vendor or could be resold by the customer. For our multiple-element arrangements, the arrangement consideration is allocated at the inception of the arrangement to all deliverable elements on the basis of their relative selling price (the relative selling price method). When applying the relative selling price method, the selling price for each deliverable is determined using vendor-specific objective evidence (“VSOE”) of selling price if it exists; otherwise, third-party evidence (“TPE”) of selling price is used. If neither VSOE nor TPE of selling price exists for a deliverable, then we use our best estimate of the selling price (“ESP”) for that deliverable when applying the relative selling price method. Since our services are typically customized to each client’s specific needs, VSOE and TPE are generally not available. We determine ESP for purposes of allocating the arrangement by considering several external and internal factors including, but **not** limited to, pricing practices, margin objectives, competition, geographies in which we offer our products and services, and internal costs. As the result of new accounting guidance, we adopted the use of ESP in 2010 and this change was not material to our financial results. We limit the amount of revenue recognized for delivered elements to an amount that is not contingent upon future delivery of additional services or products.

Other revenue primarily includes resale of third-party IT hardware and software products, commissions on sales of IT products and, to a lesser extent, sales of proprietary software products. Revenue related to the sale of IT products is generally recognized when the products are shipped or if applicable, when delivered and installed in accordance with the terms of the sale. Where we are the re-marketer of certain IT products, commission revenue is recognized when the products are drop-shipped from the vendor to the customer. Our commission revenue represents the sales price to the customer less the cost paid to the vendor. Some software license arrangements also include implementation services and/or post-contract customer support. In such multi-element software arrangements, if the criteria are met, revenue is recognized based on the VSOE of the fair value of each element. If a software license arrangement containing multiple elements does not qualify for separate accounting for the implementation services, then the software license revenue and the related costs of third-party software products are generally recognized together with the software implementation services using the percentage-of-completion method. Revenue for software post-contract support is recognized ratably over the term of the related agreement.

Unbilled accounts receivable represent amounts recognized as revenue based on services performed in advance of billings in accordance with contract terms. Under our typical time-and-materials billing arrangement, we bill our customers on a regularly scheduled basis, such as biweekly or monthly. At the end of each accounting period, we accrue revenue for services performed since the last billing cycle. These unbilled amounts are generally billed the following month. Unbilled accounts receivable also arise when percentage-of-completion accounting is used and costs plus estimated contract earnings exceed billings. Such amounts are billed at specific milestone dates or at contract completion. Management expects all unbilled accounts receivable to be collected within one year of the balance sheet date. Billings in excess of revenue recognized are recorded as deferred revenue and are primarily comprised of deferred software support revenue.

Goodwill—We perform our annual impairment analysis of goodwill as of June 30 each year or more often if there are indicators of impairment present. We test each of our reporting units for goodwill impairment. Our reporting units are the same as our operating divisions and reporting segments. The goodwill impairment test requires a two-step process. The first step consists of comparing the estimated fair value of each reporting unit with its carrying amount, including goodwill. If the estimated fair value of a reporting unit exceeds its carrying value, then it is not considered impaired and no further analysis is required. If step one indicates that the estimated fair value of a

reporting unit is less than its carrying value, then impairment potentially exists and the second step is performed to measure the amount of goodwill impairment. Goodwill impairment exists when the estimated implied fair value of a reporting unit's goodwill is less than its carrying value.

We compared the carrying value of each of our five reporting units to its estimated fair value at June 30, 2010. We estimated the fair value of each of our reporting units based on a weighting of both the income approach and the market approach. The discounted cash flows for each reporting unit that served as the primary basis for the income approach were based on discrete financial forecasts developed by management. Cash flows beyond the discrete forecast period of five years were estimated using the perpetuity growth method calculation. The average annual revenue growth rates forecasted for each reporting unit for the first five years of our projections ranged between 5% and 20%, with an overall weighted average of 7%. We project operating profit margins to return to historical norms by 2012 in the individual reporting units as we expect the IT industry to recover over the next few years, and we expect to obtain margin benefits from a number of internal initiatives. The terminal value was calculated assuming projected growth rates of 3% after five years, which reflects our estimate of minimum long-term growth in IT spending. The income approach valuations also included reporting unit cash flow discount rates, which represented each reporting unit's estimated weighted average cost of capital and ranged from 12% to 14%. The market approach applied pricing multiples derived from publicly-traded companies that are comparable to the respective reporting unit to determine its value. We utilized enterprise value/revenue multiples ranging from 0.3 to 0.7 and enterprise value/EBITDA multiples ranging from 4.2 to 6.8 in order to value each of our reporting units under the market approach. Also, the fair value under the market approach included a control premium of 30%. The control premium was determined based on a review of comparative market transactions. Publicly-available information regarding our market capitalization was also considered in assessing the reasonableness of the cumulative fair values of our reporting units.

As a result of the first step of our goodwill impairment test as of June 30, 2010, we estimated that the fair value for our International, U.S. ERP and IT Outsourcing reporting units exceeded their carrying amounts by 79%, 31% and 41%, respectively, thus no impairment was indicated. We also determined that the estimated fair values of our Custom Solutions and Federal reporting units were less than their respective carrying amounts by 3% and 23%, respectively, indicating impairment may exist for these divisions.

Because indicators of impairment existed for our Custom Solutions and Federal reporting units, we performed the second step of the test to determine the implied fair value of goodwill for each reporting unit. The estimated implied fair value of goodwill was determined in a consistent manner utilized to estimate the amount of goodwill recognized in a business combination. As a result, we calculated the estimated fair value of certain non-recorded assets, including customer relationships and trade name. The implied fair value of goodwill was measured as the excess of the estimated fair value of each reporting unit over the amounts assigned to its assets and liabilities. The impairment loss for each reporting unit was measured by the amount that the carrying value of goodwill exceeded the implied fair value of the goodwill. Based on this assessment, we recorded an impairment charge of \$112.0 million (\$82.0 million for Custom Solutions and \$30.0 million for Federal) in 2010, which represented 50% of the Custom Solutions and 40% of the Federal reporting units' goodwill prior to the impairment charge, respectively.

The impairment charge is primarily a result of the impact that the depressed economic environment had on overall equity values and its negative impact on our operations and forecasted cash flows, as well as the sustained decline in our market capitalization. We have adjusted our forecasted cash flows and the other assumptions used to calculate the estimated fair value of our reporting units to account for our beliefs and expectations of the current macro-economic environment. While we believe our estimates are appropriate based on our view of current business trends, as discussed further

below, no assurance can be provided that additional impairment charges will not be required in the future.

We currently have a remaining goodwill balance of \$338.9 million at December 31, 2010. The process of evaluating the potential impairment of goodwill is subjective and requires significant judgment at many points during the analysis. In estimating the fair value of the reporting units for the purpose of our annual or periodic goodwill impairment analysis, we make estimates and judgments about the future cash flows of the reporting units, including estimated growth rates and assumptions about the economic environment. Although our cash flow forecasts are based on assumptions that are consistent with the plans and estimates we are using to manage the underlying reporting units, there is significant judgment in determining the cash flows attributable to these reporting units. In addition, we make certain judgments about allocating shared assets, such as cash and property and equipment, to the balance sheet for the reporting units. We also consider our market capitalization, adjusted for unallocated monetary assets such as cash, debt, a control premium and other factors determined by management. As a result, several factors could result in the impairment of a material amount of our goodwill balance in future periods, including, but not limited to:

- (1) Further weakening of the global economy, continued weakness in the IT services industry, or failure of CIBER to reach our internal forecasts could impact our ability to achieve our forecasted levels of cash flows and reduce the estimated discounted cash flow value of our reporting units;
- (2) A decline in our stock price and resulting market capitalization, if we determine that the decline is sustained and is indicative of a reduction in the fair value of any of our reporting units below their carrying values.

Adverse changes in our market capitalization, long-term forecasts and industry growth rates could result in additional impairment charges being recorded in future periods for goodwill attributed to our Custom Solutions, Federal or other reporting units. Any future impairment charges would adversely affect our results of operations for those periods.

Income taxes—Significant judgment is required in determining our worldwide income tax provision. As a global company, we calculate and provide for income taxes in each of the tax jurisdictions in which we operate. This involves estimating current tax exposures in each jurisdiction, as well as making judgments regarding the recoverability of deferred tax assets. We calculate our current and deferred tax provision based on estimates and assumptions that could differ from the actual results reflected in income tax returns filed during the subsequent year. Adjustments based on filed returns are generally recorded in the period when the tax returns are filed. We apply an estimated annual effective tax rate to our quarterly operating results to determine the provision for income tax expense. In the event there is a significant unusual or infrequent item recognized in our quarterly operating results, the tax attributable to that item is recorded in the interim period in which it occurs. Changes in the geographic mix or estimated level of annual income before taxes will affect our overall effective tax rate.

We are regularly audited by various taxing authorities, and sometimes these audits result in proposed assessments where the ultimate resolution may result in us owing additional taxes plus interest and possible penalties. Tax exposures can involve complex issues and may require an extended period to resolve. We establish reserves when, despite our belief that our tax return positions are appropriate and supportable under local tax law, we believe it is more likely than not that all or some portion of a tax benefit will not be realized as the result of an audit. We evaluate these reserves each quarter and adjust the reserves and the related interest in light of changing facts and circumstances regarding the estimates of tax benefits to be realized, such as the progress of a tax audit or the expiration of a statute of limitations. We believe the estimates and assumptions used to support our evaluation of tax benefit realization are reasonable. However, final determinations of prior-year tax liabilities, either by settlement with tax authorities or expiration of statutes of limitations, could be

materially different from estimates reflected in assets and liabilities and historical income tax provisions. The outcome of these final determinations could have a material effect on our income tax provision, net income or cash flows in the period in which that determination is made. We believe our tax positions comply with applicable tax law and that we have adequately provided for any known tax contingencies.

No taxes have been provided on undistributed foreign earnings that are planned to be indefinitely reinvested. If future events, including material changes in estimates of cash, working capital and long-term investment requirements, necessitate that these earnings be distributed, an additional provision for withholding taxes may apply, which could materially affect our future effective tax rate.

Allowance for doubtful accounts receivable—We maintain an allowance for doubtful accounts at an amount we estimate to be sufficient to cover the risk of collecting less than full payment on our receivables. At December 31, 2010, we had gross accounts receivable of \$248.6 million and our allowance for doubtful accounts was \$9.4 million. Our allowance for doubtful accounts is based upon specific identification of probable losses. We review our accounts receivable and reassess our estimates of collectability each quarter. Historically, our bad debt expense has been a very small percentage of our total revenue, as most of our revenues are from large, credit-worthy Global 2000 blue-chip companies and government agencies. Since 2008, as global economic conditions worsened, and we have taken on certain riskier clients, we have experienced a higher number of client bankruptcies, clients with financial difficulties and clients refusing to pay for services. Our bad debt expense was \$8.4 million, \$2.3 million and \$7.0 million in 2010, 2009 and 2008, respectively. In 2010, five clients accounted for 82% of our total bad debt expense. If our clients' financial condition or liquidity were to deteriorate, resulting in an impairment of their ability to make payments, or if customers were to express dissatisfaction with the services we have provided, additional allowances may be required. Such items are very difficult to predict and require significant management judgment.

Accrued compensation and certain other accrued liabilities—Employee compensation costs are our largest expense category. We have several different variable compensation programs, which are highly dependent on estimates and judgments, particularly at interim reporting dates. Some programs are discretionary, while others have quantifiable performance metrics. Certain programs are annual, while others are quarterly or monthly. Often actual compensation amounts cannot be determined until after our results are reported. We believe we make reasonable estimates and judgments using all significant information available. In addition, the process to estimate the fair value of share-based compensation also involves various assumptions, inputs and judgments. We estimate the amounts required for incurred but not reported health claims under our self-insured employee benefit programs. Our accrual for health costs is based on historical experience and specific claim activity and actual amounts may vary. In connection with an acquisition, we have agreed to certain possible future contingent consideration to be paid to the sellers based upon the financial performance of the acquired operations during the 36-month period after the acquisition. We are required to estimate the value of such contingent consideration. We estimate the contingent consideration liability based on a probability-weighted approach derived from management's own estimates of profitability and sales targets. In the ordinary course of business, we are currently involved in various claims and legal proceedings. We periodically review the status of each significant matter and assess our potential financial exposure. If the potential loss from any claim or legal proceeding is considered probable and the amount can be reasonably estimated, we accrue a liability for the estimated loss. We use significant judgment in both the determination of probability and the determination as to whether an exposure is reasonably estimable. Because of uncertainties related to these matters, accruals are based only on the best information at that time. As additional information becomes available, we reassess the potential liability related to our pending claims and litigation and may revise our estimates. Such revisions in the estimates of potential liabilities could have a material impact on our financial position and results of operations. We expense legal fees as incurred.

Other intangible assets—In connection with our acquisitions, we are required to recognize other intangible assets separate and apart from goodwill, if such assets arise from contractual or other legal rights or if such assets are separable from the acquired business. Other intangible assets primarily include, among other things, customer-related assets such as order backlog, customer contracts and customer relationships. Determining a fair value for such items requires a high degree of judgment, assumptions and estimates. We often use third parties to assist us with such valuations. In addition, these intangible assets are amortized over our best estimate of their useful life.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to market risks related to changes in foreign currency exchange rates and interest rates. We believe our exposure to other market risks is immaterial.

During 2010, approximately 37.2%, or \$398 million of our total revenue was attributable to our foreign operations. Using sensitivity analysis, a hypothetical 10% increase or decrease in the value of the U.S. dollar against all currencies would change total revenue by 3.7%, or \$40 million. A portion of this fluctuation would be offset by expenses incurred in local currency. Additionally, we have exposure to changes in foreign currency rates related to short-term inter-company transactions with our foreign subsidiaries and from client receivables in different currencies. Foreign sales are mostly made by our foreign subsidiaries in their respective countries and are typically denominated in the local currency of each country. Our foreign subsidiaries incur most of their expenses in their local currency as well, which helps minimize our risk of exchange rate fluctuations.

Our exposure to changes in interest rates arises primarily because our indebtedness under our Senior Credit Facility has a variable interest rate. At December 31, 2010, our outstanding borrowings under our Senior Credit Facility were \$87.2 million. We currently have an interest rate swap that matures on March 31, 2012, which converts \$25.0 million of our borrowings under our Senior Credit Facility from a variable-rate instrument into a 1.77% fixed-rate instrument, plus the applicable margin. At December 31, 2010, our weighted average interest rate on our outstanding borrowings under the Senior Credit Facility, including the interest swap, was 4.17%. Assuming \$87.2 million of outstanding borrowings, of which \$25.0 million is fixed-rate due to the interest rate swap, a 1% increase in interest rates would result in approximately \$0.6 million of additional interest expense.

Item 8. Financial Statements and Supplementary Data

The following consolidated financial statements and supplementary data are included as part of this Annual Report on Form 10-K:

Report of Independent Registered Public Accounting Firm	47
Consolidated Statements of Operations—Years Ended December 31, 2010, 2009 and 2008	48
Consolidated Balance Sheets—December 31, 2010 and 2009	49
Consolidated Statements of Shareholders' Equity—Years Ended December 31, 2010, 2009 and 2008	50
Consolidated Statements of Cash Flows—Years Ended December 31, 2010, 2009 and 2008	51
Notes to Consolidated Financial Statements	52

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of CIBER, Inc.

We have audited the accompanying consolidated balance sheets of CIBER, Inc. and subsidiaries (the Company) as of December 31, 2010 and 2009, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2010. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company at December 31, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 25, 2011, expressed an unqualified opinion thereon.

Cash and cash equivalents, end of period	<u>\$ 69,329</u>	<u>\$ 67,424</u>	<u>\$ 48,849</u>

See accompanying notes to consolidated financial statements.

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements

(1) Summary of Significant Accounting Policies

(a) Description of Business

CIBER is a global information technology (“IT”) consulting, services and outsourcing company applying practical innovation through services and solutions that deliver tangible results for both commercial and government clients. We compete in a large and growing marketplace offering services that include application development and management, enterprise resource planning (“ERP”) implementation, change management, project management, systems integration, infrastructure management and end-user computing, as well as strategic business and technology consulting. For more than 35 years, CIBER has been helping clients by understanding their goals, recommending the right solutions and delivering on our commitments. We primarily serve Global 2000 blue-chip companies and government agencies from our operations across 18 countries.

(b) Principles of Consolidation

The Consolidated Financial Statements include the accounts of CIBER, Inc. and all of its majority-owned subsidiaries (together “CIBER,” “the Company,” “we,” “our,” or “us”). All material inter-company balances and transactions have been eliminated.

The shares of our foreign subsidiaries that are owned by persons other than CIBER are referred to as noncontrolling interests in these Consolidated Financial Statements. The noncontrolling shareholders’ proportionate share of the equity of these subsidiaries is reflected as “noncontrolling interests” in the Consolidated Balance Sheets. The noncontrolling shareholders’ proportionate share of the net income or loss of these subsidiaries is reflected as “net income (loss) attributable to noncontrolling interests” in the Consolidated Statements of Operations. In accounting for the acquisition of a noncontrolling interest, any consideration paid in excess of the book value of the noncontrolling interest is recorded as a reduction of CIBER shareholders’ equity. In 2010, we purchased certain noncontrolling interests in foreign subsidiaries for cash of approximately \$1.6 million. In 2009, we issued 782,584 shares of our common stock, valued at approximately \$2.4 million, in exchange for the noncontrolling interests in one of our foreign subsidiaries. In 2008, we paid \$2.8 million to purchase certain noncontrolling interests in the same foreign subsidiary.

(c) Use of Estimates

The preparation of our Consolidated Financial Statements in conformity with U.S. generally accepted accounting principles (“GAAP”) requires management to make estimates and assumptions that affect amounts reported in the Consolidated Financial Statements and accompanying disclosures. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances. Actual results could differ from those estimates.

(d) Revenue Recognition

CIBER earns revenue primarily from providing IT services to its clients, and to a much lesser extent, from the sale and resale of IT hardware and software products. CIBER’s consulting services revenue comes from three primary sources: (1) technology integration services where we design, build and implement new or enhanced system applications and related processes; (2) general IT consulting services, such as system selection or assessment, feasibility studies, training and staffing; and (3) outsourcing and managed IT services in which we manage, staff, maintain, host or otherwise run solutions and/or systems provided to our customers. Contracts for these services have different terms

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(1) Summary of Significant Accounting Policies (Continued)

based on the scope, deliverables and complexity of the engagement, which requires management to make judgments and estimates in recognizing revenue. Fees for these contracts may be in the form of time-and-materials or fixed-price billings. The majority of our consulting services revenue is recognized under time-and-materials contracts as hours and costs are incurred. Consulting services revenue also includes project-related reimbursable expenses for travel and other out-of-pocket expenses separately billed to clients.

Revenue for technology integration consulting services where we design/redesign, build and implement new or enhanced systems applications and related processes for our clients is generally recognized based on the percentage-of-completion method. Under the percentage-of-completion method, management estimates the percentage of completion based upon the contract costs incurred to date as a percentage of the total estimated contract costs. If the total cost estimate exceeds revenue, we accrue for the estimated loss immediately. The use of the percentage-of-completion method requires significant judgment relative to estimating total contract revenue and costs, including assumptions as to the length of time to complete the project, the nature and complexity of the work to be performed and anticipated changes in estimated costs. Estimates of total contract costs are continuously monitored during the term of the contract and recorded revenues and costs are subject to revision as the contract progresses. Such revisions may result in increases or decreases to revenue and income and are reflected in the Consolidated Financial Statements in the periods in which they are first identified.

Revenue for general IT consulting services is recognized as work is performed and amounts are earned. We consider amounts to be earned once evidence of an arrangement has been obtained, services are delivered, fees are fixed or determinable and collectability is reasonably assured. For contracts with fees based on time-and-materials or cost-plus, we recognize revenue over the period of performance. For fixed-price contracts, depending on the specific contractual provisions and nature of the deliverables, revenue may be recognized on a proportional performance model based on level-of-effort, as milestones are achieved or when final deliverables have been provided.

Outsourcing and managed IT services arrangements typically span several years. Revenue from time-and-materials contracts is recognized as the services are performed. Revenue from unit-priced contracts is recognized as transactions are processed based on objective measures of output. Revenue from fixed-price contracts is recognized on a straight-line basis, unless revenues are earned and obligations are fulfilled in a different pattern. Costs related to delivering outsourcing and managed services are expensed as incurred, with the exception of labor and other direct costs related to the set-up of processes, personnel and systems, which are deferred during the transition period and expensed evenly over the period services are provided. Amounts billable to the client for transition or set-up activities, which do not have standalone value, are also deferred and recognized as revenue evenly over the period that the managed services are provided.

We sometimes enter into arrangements (excluding software license arrangements) with customers that purchase multiple services, or a combination of services and IT hardware products, from us at the same time, referred to as multiple-element arrangements. Each element within a multiple-element arrangement is accounted for as a separate unit of accounting provided that the delivered services or products have value to the customer on a standalone basis. We consider a deliverable element to have standalone value if the service or product is sold separately by us or another vendor or could be resold by the customer. For our multiple-element arrangements, the arrangement consideration is allocated at the inception of the arrangement to all deliverable elements on the basis of their relative selling price

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(1) Summary of Significant Accounting Policies (Continued)

(the relative selling price method). When applying the relative selling price method, the selling price for each deliverable is determined using vendor-specific objective evidence (“VSOE”) of selling price if it exists; otherwise, third-party evidence (“TPE”) of selling price is used. If neither VSOE nor TPE of selling price exists for a deliverable, then we use our best estimate of the selling price (“ESP”) for that deliverable when applying the relative selling price method. Since our services are typically customized to each client’s specific needs, VSOE and TPE are generally not available. We determine ESP for purposes of allocating the arrangement by considering several external and internal factors including, but not limited to, pricing practices, margin objectives, competition, geographies in which we offer our products and services, and internal costs. As the result of new accounting guidance, we adopted the use of ESP in 2010 and this change was not material to our financial results. We limit the amount of revenue recognized for delivered elements to an amount that is not contingent upon future delivery of additional services or products.

Other revenue primarily includes resale of third-party IT hardware and software products, commissions on sales of IT products and, to a lesser extent, sales of proprietary software products. Revenue related to the sale of IT products is generally recognized when the products are shipped or if applicable, when delivered and installed in accordance with the terms of the sale. Where we are the re-marketer of certain IT products, commission revenue is recognized when the products are drop-shipped from the vendor to the customer. Our commission revenue represents the sales price to the customer less the cost paid to the vendor. Some software license arrangements also include implementation services and/or post-contract customer support. In such multi-element software arrangements, if the criteria are met, revenue is recognized based on the VSOE of the fair value of each element. If a software license arrangement containing multiple elements does not qualify for separate accounting for the implementation services, then the software license revenue and the related costs of third-party software products are generally recognized together with the software implementation services using the percentage-of-completion method. Revenue for software post-contract support is recognized ratably over the term of the related agreement.

Unbilled accounts receivable represent amounts recognized as revenue based on services performed in advance of billings in accordance with contract terms. Under our typical time-and-materials billing arrangement, we bill our customers on a regularly scheduled basis, such as biweekly or monthly. At the end of each accounting period, we accrue revenue for services performed since the last billing cycle. These unbilled amounts are generally billed the following month. Unbilled accounts receivable also arise when percentage-of-completion accounting is used and costs plus estimated contract earnings exceed billings. Such amounts are billed at specific milestone dates or at contract completion. Management expects all unbilled accounts receivable to be collected within one year of the balance sheet date. Billings in excess of revenue recognized are recorded as deferred revenue and are primarily comprised of deferred software support revenue.

(e) Cash and Cash Equivalents

Cash and cash equivalents includes bank demand and time deposits, money market funds and all other highly liquid investments with maturities of three months or less when purchased. Substantially all of our cash balance at December 31, 2010 and 2009 was held by our foreign subsidiaries.

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(1) Summary of Significant Accounting Policies (Continued)

(f) Accounts Receivable and Allowance for Doubtful Accounts

We record accounts receivable at their face amount less an allowance for doubtful accounts. On a regular basis, we evaluate our client receivables, especially receivables that are past due, and we establish an allowance for doubtful accounts based on specific client collection issues.

(g) Property and Equipment

Property and equipment, which primarily consists of computer equipment and software, furniture and leasehold improvements, is stated at cost. Depreciation is computed using straight-line and accelerated methods over the estimated useful lives, ranging primarily from three to seven years, or the related lease term, if shorter. Direct costs of time and materials incurred for the development of software for internal use are capitalized as property and equipment.

(h) Long-Lived Assets (excluding Goodwill)

Long-lived assets are reviewed for impairment whenever events or circumstances indicate that the carrying amount of an asset may not be fully recoverable. An impairment loss is recognized only if the carrying amount of a long-lived asset is not recoverable from its undiscounted cash flows and is measured as the difference between the carrying amount and fair value of the asset.

(i) Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and for operating loss carryforwards. Deferred tax amounts are based on enacted tax rates expected to be in effect during the year in which the differences reverse. The effect on deferred tax assets and liabilities due to a change in tax rates is recognized in income tax expense in the period that includes the enactment date. Deferred tax assets and liabilities are classified as current and non-current amounts based on the financial statement classification of the related asset and liability. A valuation allowance is provided when it is more likely than not that a deferred tax asset will not be realized. We use a two-step approach to recognize and measure uncertain tax positions taken or expected to be taken in an income tax return. We first determine if the weight of available evidence indicates that it is more likely than not that the tax position will be sustained on audit, including resolution of any related appeals or litigation processes. The second step involves measuring the tax benefit as the largest amount that is more than 50% likely to be realized upon ultimate settlement.

The provision for income taxes represents the estimated amounts for federal, state and foreign taxes. The determination of the provision for income tax expense, deferred tax assets and liabilities and related valuation allowance requires us to assess uncertainties, make judgments regarding possible outcomes and utilize estimates. As a global company, we are required to calculate and provide for income taxes in each of the tax jurisdictions where we operate. Our global operations are subject to complex tax regulations in numerous taxing jurisdictions, resulting at times in tax audits, disputes and potential litigation, the outcome of which is uncertain. We must make judgments currently about such uncertainties and determine estimates of our tax assets and liabilities. To the extent the final outcome differs, future adjustments to our tax assets and liabilities will be necessary. As a result, our effective tax rate may vary significantly from period to period. In addition, changes in the geographic mix and/or estimated levels of pre-tax income affect the overall effective tax rate. Interim-period tax expense is

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(1) Summary of Significant Accounting Policies (Continued)

recorded based upon our best estimate of the effective tax rate expected to be applicable for the full fiscal year. Interest expense on tax liabilities is included in interest expense while any tax penalties are included in income tax expense.

(j) Foreign Currency

The assets and liabilities of our foreign operations are translated into U.S. dollars at current exchange rates and revenues and expenses are translated at average exchange rates for the period. The resulting translation adjustments are included in “accumulated other comprehensive income” on the Consolidated Balance Sheets. Gains and losses arising from inter-company international transactions that are of a long-term investment nature are reported in the same manner as translation adjustments.

All foreign currency transaction gains and losses, including foreign currency gains and losses on short-term inter-company loans and advances, are included in “other income (expense), net” in the Consolidated Statements of Operations as incurred.

(k) Share-Based Compensation

We record share-based compensation expense for awards of equity instruments to employees based on the estimated grant-date fair value of these awards, over the period the employees are required to provide services to earn the awards. Share-based compensation cost is recognized, as appropriate, in either “cost of consulting services” or in “selling, general and administrative expense” in the Consolidated Statements of Operations.

(l) Other Income (Expense), Net

Other income (expense), net consisted of the following:

	Year Ended December 31,		
	2010	2009	2008
	(In thousands)		
Foreign exchange gains (losses), net	\$(37)	\$296	\$(2,459)
Gain on retirement of convertible debentures	—	—	1,264
Other	102	42	(249)
Other income (expense), net	<u>\$ 65</u>	<u>\$338</u>	<u>\$(1,444)</u>

(m) Business and Credit Concentrations

Financial instruments that are potentially subject to concentrations of credit risk are cash and cash equivalents and accounts receivable. Our cash and cash equivalents are in high-credit quality short-term investments and held by financial institutions. Accounts receivable are reviewed on a periodic basis and an allowance for bad debts is recorded where such amounts are determined to be uncollectible. We do not require collateral from our customers. Our revenue and accounts receivable are principally concentrated with large companies across several industries and governmental entities located throughout the United States and Europe.

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(1) Summary of Significant Accounting Policies (Continued)

(n) Contingencies

We are routinely involved in legal proceedings, audits, claims and litigation arising in the ordinary course of business. Although, the outcome of such matters is not predictable with assurance, we do not expect that the ultimate outcome of any of these matters, individually or in the aggregate, will have a material adverse effect on our financial condition. However, depending on the amount and timing, an unfavorable outcome of any such matters could possibly materially affect our future results of operations or cash flow in any particular period.

(2) Acquisitions

We have acquired certain businesses, as set forth below, that we have accounted for using the purchase method of accounting for business combinations and, accordingly, the accompanying Consolidated Financial Statements include the results of operations of each acquired business since the date of acquisition.

Acquisitions—2010

In June 2010, our International division acquired the assets of Denmark-based SAP consulting company Segmenta A/S (“Segmenta”). The acquisition was completed to strengthen our European presence and expand our Danish operations. We paid \$3.5 million in cash at closing and we may make a future cash payment (contingent consideration) at the end of the 36-month period ending on May 31, 2013. The contingent consideration payment is based upon a multiple of the average annual earnings before interest and taxes achieved for the Segmenta business over the specified 36-month period. There is no limit to the amount that may be paid out. As part of our purchase price allocation, we recorded an initial liability of \$4.2 million for the present value of the estimated contingent consideration. In allocating the purchase price based on estimated fair values, we recorded goodwill and other intangible assets of \$7.1 million and \$1.6 million, respectively, and recorded net liabilities of \$1.0 million. We estimate the contingent consideration liability based on a probability-weighted approach derived from management’s own estimates of profitability and sales targets. Changes in the estimated liability subsequent to the acquisition date fair value, including interest charges, are recognized in earnings in the period in which the change occurs. If our earnings forecast increases or decreases by 20%, the estimate of undiscounted future consideration would range from \$6.0 million to \$9.0 million. At December 31, 2010, the present value of the estimated contingent consideration liability was \$5.1 million.

Acquisitions—2009

In January 2009, we acquired Iteamic Private Ltd. (“Iteamic”) of Bangalore, India. Iteamic specialized in application development of offshore projects, primarily with companies in North America, and became part of our Custom Solutions division. The acquisition added leadership and delivery skills depth to our India Global Solutions Center. The purchase price was \$4.7 million, and was allocated as follows: \$0.8 million to net tangible assets acquired and \$3.9 million to goodwill.

Acquisitions—2008

On April 15, 2008, our International division acquired a Norwegian SAP consultancy for a total purchase price of \$6.5 million. We paid cash of \$4.8 million during 2008 and approximately \$1.7 million

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(2) Acquisitions (Continued)

is expected to be paid in the future. In connection with the acquisition, we recorded goodwill of \$5.5 million and acquired other net assets of \$1.0 million.

(3) Earnings (Loss) Per Share

Our computation of earnings (loss) per share—basic and diluted is as follows:

	Year Ended December 31,		
	2010	2009	2008
	(In thousands, except per share amounts)		
Numerator:			
Net income (loss) attributable to CIBER, Inc.	\$(77,160)	\$14,958	\$26,884
Denominator:			
Basic weighted average shares outstanding	69,626	67,996	60,092
Dilutive effect of employee stock plans	—	111	297
Diluted weighted average shares outstanding	69,626	68,107	60,389
Earnings (loss) per share:			
Basic	\$ (1.11)	\$ 0.22	\$ 0.45
Diluted	\$ (1.11)	\$ 0.22	\$ 0.45

Dilutive securities are excluded from the diluted weighted average shares outstanding computation in periods in which they have an anti-dilutive effect, such as when we report a net loss or when stock options have an exercise price that is greater than the average market price of CIBER common stock during the period. The approximate average number of anti-dilutive securities omitted from the computation of diluted weighted average shares outstanding was 8,957,000, 9,149,000 and 6,256,000 for 2010, 2009 and 2008, respectively.

(4) Executive Charges

On August 2, 2010, we entered into an Executive Transition Agreement with our former President/Chief Executive Officer in connection with his separation from CIBER as its president and chief executive officer and his resignation as a director in April 2010. Under this agreement, our former President/Chief Executive Officer remained a non-officer employee of CIBER through the end of 2010 to assist with certain management transition matters and continued to receive his base salary during this period. We have also agreed to: make cash payments to him in 2011 of \$5.4 million; accelerate vesting on certain stock options and restricted stock units; and provide certain insurance and other miscellaneous benefits. Also in connection with the agreement, CIBER terminated his previous retirement plan agreement for which we had already accrued a liability of \$1.9 million. As a result, in the second quarter of 2010, we recorded a one-time pre-tax separation charge of \$4.4 million, of which \$0.5 million was non-cash stock compensation. During 2010, we paid out \$0.3 million related to these accrued charges, leaving an accrued liability balance of \$5.5 million at December 31, 2010, which is included in “other accrued expenses and liabilities” on the Consolidated Balance Sheets.

In connection with the change in our non-executive Chairman of our Board of Directors in April 2010, we also accrued \$0.6 million during the second quarter of 2010, for our current estimated value

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(4) Executive Charges (Continued)

of benefits to be provided to our Founder and former non-executive Chairman of the Board. The related accrued liability balance at December 31, 2010, was \$0.4 million.

(5) Accounts Receivable

Accounts receivable consists of the following:

	December 31,	
	2010	2009
	(In thousands)	
Billed accounts receivable	\$175,373	\$159,895
Unbilled—scheduled billings	41,725	40,578
Costs and estimated earnings in excess of billings	31,529	15,819
	248,627	216,292
Less allowance for doubtful accounts	9,413	3,192
Accounts receivable, net	\$239,214	\$213,100

The activity in the allowance for doubtful accounts consists of the following:

	Balance at beginning of period	Additions Charge to cost and expense	Deductions Write-offs	Effect of foreign exchange rate changes	Balance at end of period
	(In thousands)				
Year ended December 31, 2008	\$2,058	6,965	(4,337)	(275)	\$4,411
Year ended December 31, 2009	\$4,411	2,260	(3,528)	49	\$3,192
Year ended December 31, 2010	\$3,192	8,423	(2,129)	(73)	\$9,413

(6) Property and Equipment

Property and equipment consist of the following:

	December 31,	
	2010	2009
	(In thousands)	
Computer equipment and software	\$66,498	\$63,447
Furniture and fixtures	10,464	9,922
Leasehold improvements, buildings and other	10,213	9,419
	87,175	82,788
Less accumulated depreciation	60,732	57,958
Property and equipment, net	\$26,443	\$24,830

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(7) Goodwill and Other Intangible Assets

We perform our annual impairment analysis of goodwill as of June 30 each year or more often if there are indicators of impairment present. We test each of our reporting units for goodwill impairment. Our reporting units are the same as our operating divisions and reporting segments. The goodwill impairment test requires a two-step process. The first step consists of comparing the estimated fair value of each reporting unit with its carrying amount, including goodwill. If the estimated fair value of a reporting unit exceeds its carrying value, then it is not considered impaired and no further analysis is required. If step one indicates that the estimated fair value of a reporting unit is less than its carrying value, then impairment potentially exists and the second step is performed to measure the amount of goodwill impairment. Goodwill impairment exists when the estimated implied fair value of a reporting unit's goodwill is less than its carrying value.

We compared the carrying value of each of our five reporting units to its estimated fair value at June 30, 2010. We estimated the fair value of each of our reporting units based on a weighting of both the income approach and the market approach. The discounted cash flows for each reporting unit that served as the primary basis for the income approach were based on discrete financial forecasts developed by management. Cash flows beyond the discrete forecast period of five years were estimated using the perpetuity growth method calculation. The average annual revenue growth rates forecasted for each reporting unit for the first five years of our projections ranged between 5% and 20%, with an overall weighted average of 7%. We project operating profit margins to return to historical norms by 2012 in the individual reporting units as we expect the IT industry to recover over the next few years, and we expect to obtain margin benefits from a number of internal initiatives. The terminal value was calculated assuming projected growth rates of 3% after five years, which reflects our estimate of minimum long-term growth in IT spending. The income approach valuations also included reporting unit cash flow discount rates, which represented each reporting unit's estimated weighted average cost of capital and ranged from 12% to 14%. The market approach applied pricing multiples derived from publicly-traded companies that are comparable to the respective reporting unit to determine its value. We utilized enterprise value/revenue multiples ranging from 0.3 to 0.7 and enterprise value/EBITDA multiples ranging from 4.2 to 6.8 in order to value each of our reporting units under the market approach. Also, the fair value under the market approach included a control premium of 30%. The control premium was determined based on a review of comparative market transactions. Publicly-available information regarding our market capitalization was also considered in assessing the reasonableness of the cumulative fair values of our reporting units.

As a result of the first step of our goodwill impairment test as of June 30, 2010, we estimated that the fair value for our International, U.S. ERP and IT Outsourcing reporting units exceeded their carrying amounts by 79%, 31% and 41%, respectively, thus no impairment was indicated. We also determined that the estimated fair values of our Custom Solutions and Federal reporting units were less than their respective carrying amounts by 3% and 23%, respectively, indicating impairment may exist for these divisions.

Because indicators of impairment existed for our Custom Solutions and Federal reporting units, we performed the second step of the test to determine the implied fair value of goodwill for each reporting unit. The estimated implied fair value of goodwill was determined in a consistent manner utilized to estimate the amount of goodwill recognized in a business combination. As a result, we calculated the estimated fair value of certain non-recorded assets, including customer relationships and trade name. The implied fair value of goodwill was measured as the excess of the estimated fair value of each reporting unit over the amounts assigned to its assets and liabilities. The impairment loss for

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(7) Goodwill and Other Intangible Assets (Continued)

each reporting unit was measured by the amount that the carrying value of goodwill exceeded the implied fair value of the goodwill. Based on this assessment, we recorded an impairment charge of \$112.0 million (\$82.0 million for Custom Solutions and \$30.0 million for Federal) in 2010, which represented 50% of the Custom Solutions and 40% of the Federal reporting units' goodwill prior to the impairment charge, respectively.

The impairment charge is primarily a result of the impact that the depressed economic environment had on overall equity values and its negative impact on our operations and forecasted cash flows, as well as the sustained decline in our market capitalization. We have adjusted our forecasted cash flows and the other assumptions used to calculate the estimated fair value of our reporting units to account for our beliefs and expectations of the current macro-economic environment. While we believe our estimates are appropriate based on our view of current business trends, no assurance can be provided that additional impairment charges will not be required in the future.

The changes in the carrying amount of goodwill are as follows:

	<u>International</u>	<u>Custom Solutions</u>	<u>U.S. ERP</u>	<u>Federal</u>	<u>IT Outsourcing</u>	<u>Total</u>

We are engaged in legal proceedings in Germany with certain former minority shareholders of Novasoft AG (now known as CIBER AG), which we acquired a controlling interest in during 2004. In August 2006, we completed a buy-out of the remaining minority shareholders of Novasoft; however, certain of those former minority shareholders challenged the adequacy of the buy-out consideration in a German court. The court appointed independent experts to evaluate the consideration and claims of the minority shareholders. At this time, the Company is unable to predict the outcome of these proceedings, although if the court awards additional consideration, such consideration will increase the goodwill associated with the acquisition.

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(7) Goodwill and Other Intangible Assets (Continued)

Other intangible assets are amortized over periods of up to seven years and arise from business combinations. Other intangible assets are comprised of the following:

	<u>Cost</u>	<u>Accumulated Amortization</u>	<u>Intangible Assets, Net</u>
	(In thousands)		
December 31, 2010			
Customer relationships	<u>\$23,916</u>	<u>\$(21,559)</u>	<u>\$2,357</u>
December 31, 2009			
Customer relationships	<u>\$37,542</u>	<u>\$(32,383)</u>	<u>\$5,159</u>

At December 31, 2010, our customer relationships have a weighted average remaining life of 1.3 years. Amortization expense for future periods as estimated at December 31, 2010, consists of the following:

	<u>Estimated Amortization Expense</u>
	(In thousands)
Year ended December 31, 2011	\$1,688
Year ended December 31, 2012	669

(8) Operating Leases

We have non-cancelable operating leases primarily for our office space, automobiles and office equipment. Expense for operating leases totaled approximately \$28.1 million, \$25.7 million and \$25.4 million in 2010, 2009 and 2008, respectively.

Future minimum operating lease payments as of December 31, 2010, are:

	<u>Rental Payments</u>
	(In thousands)
2011	\$26,755
2012	21,105
2013	14,750
2014	8,499
2015	5,043
Thereafter	<u>12,049</u>
	<u>\$88,201</u>

(9) Borrowings

Senior Credit Facility—CIBER has a senior credit agreement with several financial institutions as lenders and Bank of America, N.A. as administrative agent (the “Senior Credit Facility”) that matures on August 20, 2012. The credit available under the Senior Credit Facility may be used for the working capital needs and general corporate purposes of the Company. The Senior Credit Facility provides for an \$85 million revolving line of credit and a term loan. The term loan balance at December 31, 2010,

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(9) Borrowings (Continued)

was \$37.5 million. The term loan requires quarterly principal reductions of \$2.5 million, and therefore \$10 million of our total obligation is classified as a current liability. CIBER's remaining obligation under the Senior Credit Facility is classified as long-term debt on our Consolidated Balance Sheets. The Senior Credit Facility was subsequently amended on February 18, 2011, to modify certain financial covenants effective as of December 31, 2010, as well as modify other provisions.

The Senior Credit Facility is subject to mandatory prepayments (and commitment reductions) in amounts equal to the net cash proceeds of any asset disposition, event of loss, extraordinary receipts, issuance or incurrence of indebtedness and issuance of equity, subject in each case as appropriate to thresholds and other exceptions and definitions as specified in the credit agreement. CIBER's obligations under the Senior Credit Facility are secured by all of CIBER's present and future domestic tangible and intangible assets, as well as a pledge of 66% of the capital stock of CIBER's direct foreign subsidiaries.

Subject to applicable conditions, we may elect interest rates on our Senior Credit Facility borrowings calculated by reference to either the Bank of America prime lending rate ("Prime") plus a margin that ranges from 1.75% to 2.50%, or a London Interbank Offered Rate ("LIBOR") for one, three or six month maturities, plus a margin that ranges from 2.75% to 3.50%. The applicable margins on our Prime loans and LIBOR loans are determined by reference to our current consolidated total leverage ratio. We are also required to pay a commitment fee of 0.50% per annum on the unused portion of the Senior Credit Facility. The Senior Credit Facility and the related loan documents provide for the payment of other specified recurring fees and expenses, including administrative agent fees, letter of credit and other fees. We currently have an interest rate swap that matures on March 31, 2012, which converts \$25.0 million of our borrowings under our Senior Credit Facility from a variable-rate instrument into a 1.77% fixed-rate instrument, plus the applicable margin. At December 31, 2010, our weighted average interest rate on our outstanding borrowings under the Senior Credit Facility, including the interest swap, was 4.17%.

The terms of the Senior Credit Facility, as amended, include among other provisions, specific limitations on the incurrence of additional indebtedness and liens, stock repurchases, investments, guarantees, mergers, dispositions and acquisitions, and a prohibition on the payment of any dividends. The Senior Credit Facility also contains certain financial covenants, including: 1) a maximum consolidated total leverage ratio; 2) a minimum consolidated fixed charge coverage ratio; 3) a minimum EBITDA; and 4) an asset coverage test.

Total upfront and arrangement fees and related expenses for completing the Senior Credit Facility in 2009, as well as any subsequent amendment fees are typically amortized to interest expense over the remaining term of the credit agreement.

At December 31, 2010, we had outstanding borrowings of \$87.2 million under the Senior Credit Facility. We are required to be in compliance with the financial covenants at the end of each calendar quarter, and we were in compliance with these financial covenants as of December 31, 2010.

CIBER, Inc. and Subsidiaries

	\$77,879	\$87,500
Long-term bank debt	\$77,879	\$87,500

Maturities—Maturities of long-term bank debt were determined to be as follows:

	Amount Maturing
	(In thousands)
2011	\$10,473
2012	77,788
2013	87
2014	4
	\$88,352
	\$88,352

(10) Financial Instruments

We recognize all derivative instruments as either assets or liabilities on our Consolidated Balance Sheets at fair value. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated and qualifies as part of a hedging relationship and further, on the type of hedging relationship. All hedging instruments must be designated, based on the exposure being hedged, as a fair value hedge, a cash flow hedge or a hedge of a net investment in a foreign operation.

CIBER is exposed to certain risks related to its ongoing business operations. From time to time, CIBER may choose to use derivative instruments to manage certain risks related to foreign currency exchange rates and interest rates.

For derivative instruments that are designated and qualify as a cash flow hedge, the gain or loss on the effective hedge portion of the derivative instrument is reported as a component of “accumulated other comprehensive income (loss)” on the Consolidated Balance Sheets and is reclassified into earnings in the same period during which the hedged transaction affects earnings. The gain or loss is classified in the same statement of operations line item as the associated item being hedged.

We have entered into an interest rate swap with a financial institution, for which we have elected hedge accounting and have designated it as a cash flow hedge. This interest rate swap helps us manage our interest rate risk under our Senior Credit Facility by converting a portion of our floating-rate debt to a fixed-rate basis, thus reducing the impact of interest rate changes on future interest expense. This agreement involves the receipt of floating-rate amounts in exchange for fixed-rate payments over the

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(10) Financial Instruments (Continued)

life of the agreement without any exchange of underlying principal amounts. Interest is net settled monthly with the financial institution counterparty. The interest rate swap, which matures on March 31, 2012, converts \$25.0 million of our borrowings under our Senior Credit Facility from a variable-rate instrument into a fixed-rate instrument at 1.77% plus our current credit margin of 3.25% at December 31, 2010, for a total rate of 5.02%. At December 31, 2010, the estimated unrealized loss on our interest rate swap, net of taxes of \$174,000, reflected in “accumulated other comprehensive income” was approximately \$284,000. The liability for the unrealized loss on the swap of \$458,000 is presented with “other accrued expenses and liabilities” on the Consolidated Balance Sheets and is expected to be recognized in earnings over the remaining term of the swap.

From time to time, CIBER will also enter into foreign currency forward contracts related to customer agreements or intercompany transactions denominated in a foreign currency or related to certain forecasted foreign operating results. We generally have not elected hedge accounting for these derivatives. At December 31, 2010 and 2009, we did not have any material outstanding foreign currency forward contracts.

(11) Income Taxes

Income tax expense (benefit) consists of the following:

	Year Ended December 31,		
	2010	2009	2008
	(In thousands)		
Current:			
Federal	\$ 1,521	\$ (436)	\$ 1,520

Income tax expense (benefit)	\$(31,822)	\$ 7,795	\$12,080

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(11) Income Taxes (Continued)

The components of the net deferred tax asset or liability are as follows:

	December 31,	
	2010	2009
	(In thousands)	
Deferred tax assets:		
Accounts receivable	\$ 3,170	\$ 604
Accrued expenses	8,547	6,069
Federal tax credit carryforwards	6,707	8,597
U.S. net operating loss ("NOL") carryforwards	8,362	1,346
Foreign NOL carryforwards	9,114	7,753
Other	2,059	2,195
Total gross deferred tax assets	37,959	26,564
Less valuation allowance for foreign NOL carryforwards	(7,721)	(7,753)
Deferred tax assets, net	<u>30,238</u>	<u>18,811</u>
Deferred tax liabilities:		
Intangible assets	(23,215)	(47,828)
Other	(2,966)	(1,157)
Total gross deferred tax liabilities	(26,181)	(48,985)
Net deferred tax asset (liability)	<u>\$ 4,057</u>	<u>\$(30,174)</u>
Balance sheet classification of deferred taxes:		
Deferred tax asset—current	\$ 11,373	\$ 6,627
Deferred tax liability—current	(1,157)	(315)
Deferred tax liability—long-term	(6,159)	(36,486)
Net deferred tax asset (liability)	<u>\$ 4,057</u>	<u>\$(30,174)</u>

We are required to assess the realizability of deferred tax assets, taking into consideration our forecast of future taxable income, the reversal of other existing temporary differences, available net operating loss carryforwards and available tax planning strategies that could be implemented to realize the deferred tax assets. Based on this assessment, we must evaluate the need for, and amount of, valuation allowances against deferred tax assets. To the extent facts and circumstances change in the future, adjustments to the valuation allowances will be required. Based on our evaluation of current and anticipated future taxable income, we believe sufficient taxable income will be generated to realize the net deferred tax assets.

At December 31, 2010, we have approximately \$22 million of NOL carryforwards for U.S. tax purposes. Of this total, \$3 million of U.S. NOL carryforwards are subject to annual usage limitations under U.S. tax rules; however, they do not begin to expire until 2022. The remaining U.S. NOL's do not begin to expire until 2030. Our Federal tax credit carryforwards are subject to annual usage limits but do not begin to expire until 2025. There is no valuation allowance for our U.S. NOL and Federal tax credit carryforwards as we expect to fully utilize them. At December 31, 2010, we also have approximately \$35 million of foreign NOL carryforwards. We have recorded a valuation allowance for approximately 85% of the foreign NOL carryforwards, as we do not believe it is more likely than not

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(11) Income Taxes (Continued)

that we will utilize them. Less than 30% of the foreign NOL carryforwards may expire. The net change in the total valuation allowance for deferred tax assets was a decrease of \$32,000 in 2010 and an increase of \$1.8 million in 2009.

We do not provide for U.S. income taxes on the undistributed earnings of our foreign subsidiaries, as we consider these to be permanently reinvested in the operations of such subsidiaries. At December 31, 2010, these undistributed earnings totaled approximately \$205 million. If some of these earnings were distributed, some countries may impose withholding taxes. In addition, as foreign taxes have previously been paid on these earnings, we would expect to be entitled to a U.S. foreign tax credit that would reduce the U.S. taxes owed on such distribution. As such, it is not practicable to determine the net amount of the related unrecognized U.S. deferred tax liability.

A portion of the operations of our India subsidiary are not subject to taxes under a tax holiday that expires in 2011. The income tax benefit attributable to this tax holiday was approximately \$1.1 million, \$0.5 million and \$0.4 million in 2010, 2009 and 2008, respectively.

We account for uncertain tax positions by recognizing the financial statement effects of a tax position only when based upon the technical merits, it is “more-likely-than-not” that the tax position will be sustained upon examination. The changes in the balance of our unrecognized tax benefits were as follows:

	<u>Unrecognized Tax Benefits</u> (In thousands)
Balance at January 1, 2009	\$4,419
Increases related to current year tax positions	676
Lapse of statute of limitations	<u>(210)</u>
Balance at December 31, 2009	4,885
Increases related to current year tax positions	2,567
Lapse of statute of limitations	<u>(44)</u>
Balance at December 31, 2010	<u>\$7,408</u>

Our unrecognized tax benefits totaled \$7.4 million at December 31, 2010. If recognized, these benefits would affect our effective tax rate. It is reasonably possible that the total of unrecognized tax benefits could decrease by as much as \$3 million as a result of settlement with the tax authorities or expiration of the statute of limitations within the next 12 months. Any settlement amount is likely to differ from the amount of the related unrecognized tax benefit as previously estimated, and such difference would affect our effective tax rate.

We file a U.S. Federal income tax return and tax returns in nearly all U.S. states, as well as in numerous foreign jurisdictions. We are routinely subject to examination by various domestic and foreign tax authorities. The outcome of tax audits is always uncertain and could result in cash tax payments that could be material. Additionally, tax audits may take long periods of time to ultimately resolve. We do not believe the outcome of any tax audits at December 31, 2010, will have a material adverse effect on our consolidated financial position or results of operations. Our U.S. Federal income tax returns dating back to 2007 are open to possible examination. We currently have a tax audit in process in the Netherlands related to the years since 2004. Our most significant foreign operations and the most

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(11) Income Taxes (Continued)

recent year for which they are no longer subject to tax examination are as follows: Germany—2007; India—2003; Netherlands—2004; Norway—2000; and the UK—2008.

(12) Fair Value Measurements

The Company is required to disclose the fair value of all assets and liabilities subject to fair value measurement and the nature of the valuation techniques, including their classification within the fair value hierarchy, utilized by the Company in performing these measurements.

The FASB provides a fair value framework which requires the categorization of assets and liabilities into three levels based upon the assumptions (or inputs) used to price the assets or liabilities, which are as follows:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2: Unadjusted quoted prices in active markets for similar assets or liabilities, or unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability.
- Level 3: Unobservable inputs for the asset or liability that reflect the reporting entity's own assumptions.

The Company's financial assets and liabilities subject to fair value measurements and the necessary disclosures are as follows:

<u>Description</u>	<u>Total Fair Value as of December 31, 2010</u>	<u>Fair Value Measurements as of December 31, 2010 Using Fair Value Hierarchy</u>		
		<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
		(In thousands)		
Interest rate swap liability	\$ 458	\$—	\$458	\$ —
Acquisition-contingent consideration liability .	\$5,062	\$—	\$ —	\$5,062

The fair values of these financial liabilities are recorded in "other long-term liabilities" on the Consolidated Balance Sheets.

The carrying values of our cash and cash equivalents, accounts receivable and accounts payable approximate their fair values due to their short-term nature. The fair value of derivative instruments such as interest rate swaps is determined utilizing market-based information such as LIBOR-based yield curves. Our interest rate swap matures on March 31, 2012, and converts \$25.0 million of our borrowings under our Senior Credit Facility from a variable-rate instrument into a 1.77% fixed-rate instrument, plus the applicable margin. The book values of the borrowings under our Senior Credit Facility and our other bank debt approximate their fair values due to their interest rates approximating current market rates.

The estimated fair value of the acquisition-related contingent consideration was based on a probability-weighted approach derived from management's own estimates of profitability and sales targets, as well as the discount rate of 15% used to determine the present value of the liability. There

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(12) Fair Value Measurements (Continued)

has been no change to management's estimates of profitability and sales targets between the acquisition date and December 31, 2010, and the value of the liability changed by \$0.9 million related to \$0.5 million of interest charges and \$0.4 million of foreign-exchange adjustments, which have been recorded as a component of other comprehensive income.

The fair value of our reporting units utilized in our annual goodwill impairment assessment, which utilizes unobservable inputs that reflect management's own assumptions, is discussed in Note 7.

(13) 401(k) Savings Plan

Almost all of our U.S. employees are eligible to participate in our 401(k) savings plan. We match a portion of the employees' contribution. Beginning in 2009, the Company's match was reduced to a maximum of one and one-half percent of an employee's compensation, with a limit of \$1,500 per calendar year, from a maximum of three percent of an employee's contribution, with a \$3,000 limit per calendar year in 2008. Vesting in CIBER's matching contribution occurs over six years. Forfeitures reduce our matching contributions. We record forfeitures when a participant's employment ends. We recorded expense of \$1.5 million, \$1.4 million and \$4.8 million in 2010, 2009 and 2008, respectively, related to this plan.

(14) Shareholders' Equity

Share-Based Compensation—On April 27, 2004, our shareholders approved the adoption of the CIBER, Inc. 2004 Incentive Plan (the "2004 Plan"). To date, 10,000,000 shares of CIBER, Inc. common stock have been authorized for issuance under the 2004 Plan. The plan administrators may grant restricted stock, stock options, performance units or any combination thereof, to officers, employees and consultants. The Compensation Committee of the Board of Directors determines the number, nature and vesting of such awards. As of December 31, 2010, there are approximately 3,023,000 shares available for future grants under the 2004 Plan.

The 2004 Plan also implements a formula award plan for non-employee directors. Under the formula plan and effective until December 31, 2009, each non-employee director received a non-statutory option to purchase 20,000 shares of common stock upon election to the Board of Directors and an option to purchase 5,000 shares of common stock on each anniversary of election to the Board of Directors. On February 23, 2010, a one-time grant of \$50,000 in Company common stock was granted to non-employee directors as of that date. Such common stock grant vested quarterly beginning on the date of the grant and continuing for the next three calendar quarters at 90 day intervals. Prior to October 1, 2009, non-employee directors received shares of CIBER common stock as compensation for attending Board, Annual and committee meetings, as well as for serving as committee chairpersons. Subsequent to October 1, 2009, non-employee directors instead receive cash payments for above-mentioned purposes. Compensation expense for grants of common stock to non-employee directors was \$300,000, \$131,000 and \$153,000 for the years ended December 31, 2010, 2009 and 2008, respectively, and is included in our total recorded share-based compensation costs.

In July 2010, CIBER made an inducement grant of 1,400,000 CIBER stock options to our new president and chief executive officer with an exercise price equal to the market value of our common stock on the date of issuance. These options were granted outside of the 2004 Plan. These options are subject to graded vesting over four years and expire after seven years.

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(14) Shareholders' Equity (Continued)

The table below summarizes the amounts recorded in the Consolidated Statements of Operations for share-based compensation:

	Year Ended December 31,		
	2010	2009	2008
	(In thousands)		
Total share-based compensation costs included in consolidated net income (loss)	\$4,090	\$3,763	\$3,439
Estimated income tax benefit related to share-based compensation included in consolidated net income (loss)	889	829	833

Options granted under the 2004 Plan generally have an exercise price that is at least equal to the market value of our common stock on the date of issuance. Options currently being granted under the 2004 Plan are subject to cliff or graded vesting or performance-based conditions in combination with graded vesting. Graded vesting generally ranges from one to four years, as determined at the date of grant by the Board of Directors, with the exception of some options granted to employees of our International division, which may be fully vested on the grant date. Additionally, options granted under the 2004 Plan have contractual terms ranging from four to 10 years, but all 2004 Plan options must expire no later than 10 years from the grant date. Options granted during 2010 and 2009 under the 2004 Plan had contractual terms of five years.

The fair value of each option award is estimated on the date of grant using the Black-Scholes option pricing method. Compensation costs related to options with graded vesting are recognized on a straight-line basis over the vesting period. The expected life for options with a contractual life of 10 years is derived from historical data pertaining to option exercises and employee terminations. The expected life for options with a contractual life of less than 10 years is derived using the SEC's "simplified method," as we did not have sufficient historical data pertaining to options with contractual lives of less than 10 years upon which to base an expected term assumption. Expected volatilities are based on historical volatility of our common stock. The risk-free interest rate is derived from the U.S. Treasury yields in effect at the time of grant and the dividend yield is based on historical experience and expected future changes.

A summary of the weighted average assumptions used to value options granted and the grant date fair value follows:

	Year Ended December 31,		
	2010	2009	2008
Expected life (in years)	4.2	3.4	3.4
Risk-free interest rate	1.59%	1.72%	2.25%
Expected volatility	63%	54%	41%
Dividend yield	0%	0%	0%
Fair value	\$1.47	\$1.37	\$1.81

Outstanding at December 31, 2010	<u>9,198</u>	\$5.31	3.4	\$5,706
Vested and expected to vest at December 31, 2010	<u>8,885</u>	\$5.39	3.4	\$5,161
Exercisable at December 31, 2010	<u>6,151</u>	\$6.34	2.7	\$ 861

The total intrinsic value of options exercised (which is the amount by which the stock price exceeded the exercise price of the options on the date of exercise) was immaterial during the years ended December 31, 2010 and 2009 and was \$584,000 during the year ended December 31, 2008.

Restricted stock units ("RSUs") currently being granted under the 2004 Plan are generally subject to vesting over a period of three years, varying from graded vesting or performance-based conditions in combination with graded vesting, as well as other possible vesting schedules as determined at the date of grant by the Board of Directors. The fair value of the RSUs, equivalent to the Company's stock price at the date of grant, is expensed over the vesting term.

A summary of RSU activity for 2010 is presented below:

	Number of RSUs	Weighted Average Grant Date Fair Value
	(RSUs in thousands)	
Nonvested shares outstanding at January 1, 2010	436	\$3.40
Granted	783	\$3.44
Vested	(168)	\$3.99
Forfeited	(32)	\$3.46
Nonvested shares outstanding at December 31, 2010	<u>1,019</u>	\$3.39

The total fair value of RSUs that vested during the years ended December 31, 2010 and 2009, was \$658,000 and \$307,000, respectively. No RSUs vested during the year ended December 31, 2008.

As of December 31, 2010, there was approximately \$4.9 million of total unrecognized compensation cost related to the nonvested stock options and RSUs disclosed in the tables above. That cost is expected to be recognized over a weighted average period of 2.4 years.

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(14) Shareholders' Equity (Continued)

At December 31, 2010, there were approximately 13,241,000 shares of CIBER common stock reserved for share-based awards outstanding and available future grants under our share-based plans.

Through December 31, 2010, our Employee Stock Purchase Plan ("ESPP"), which is a non-qualified plan, allowed eligible employees to purchase shares of our common stock at a price equal to 85% of the lesser of the fair market value on the first or last day of the applicable offering period, which is equal to three months. Under this plan, substantially all employees may elect to contribute up to \$6,000 of their compensation during one calendar year. In 2010, 2009 and 2008, we issued approximately 1,060,000, 1,030,000 and 475,000 shares, respectively, under our ESPP and the related compensation cost recorded was approximately \$814,000 for 2010, \$900,000 for 2009 and \$740,000 for 2008. We modified our ESPP such that beginning in 2011, eligible employees will be allowed to purchase shares of our common stock at a price equal to 95% of fair market value on the last day of the applicable three-month offering period. Due to these changes, the Company will have no related compensation cost for our ESPP in 2011.

Sale of Common Stock—During the year ended December 31, 2009, we sold nine million shares of our common stock, for proceeds of \$23.2 million, net of issuance costs, which were used to repay a portion of the outstanding borrowings under our then-outstanding senior secured reducing revolving credit facility.

Repurchase Program—CIBER has had a common stock share repurchase program since 1999 that has been amended from time to time by our Board of Directors to increase the authorized shares available for repurchase. Under the most recent authorization in October 2009, the Board approved an additional \$5 million for future repurchases of our common stock. Under the program in 2010, we repurchased approximately 656,000 shares of common stock at a cost of \$2.4 million. At December 31, 2010, there was approximately \$3.1 million remaining for future repurchases under this program, however, the Company is currently not permitted to make additional repurchases under the terms of our amended Senior Credit Facility.

Shelf Registration Statements on Form S-4—At December 31, 2010, we have two effective registration statements on Form S-4, under which together approximately 13,469,000 shares of our common stock remain available. The shares available under either one of these registration statements may be used by CIBER from time to time in connection with future business combinations.

Shelf Registration Statement on Form S-3—At December 31, 2010, we have an effective registration statement on Form S-3, under which up to \$100 million of debt securities, shares of our common stock, shares of our preferred stock and warrants may be sold in the future. This registration statement enables us to raise funds from the offering of such instruments described above from time to time, subject to market conditions and our capital needs.

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(14) Shareholders' Equity (Continued)

Stock Purchase Rights—Pursuant to our Rights Agreement, dated August 31, 1998, CIBER, Inc. paid a dividend of one preferred stock purchase right (a “Right”) for each outstanding share of CIBER, Inc. common stock (“Common Stock”) on September 21, 1998. A Right is also attached to all shares of Common Stock issued after the dividend date. On May 2, 2008, we amended and restated our original Rights Agreement. Under the Amended Rights Agreement, each shareholder of the Company holds one Right for each share of Common Stock held. The Rights generally become exercisable only in the event that an acquiring party accumulates 15% or more of our outstanding Common Stock. Each Right entitles the registered holder to purchase one one-thousandth of a share of Series A Junior Participating Preferred Stock of CIBER, Inc., par value \$0.01, at a purchase price of thirty-seven dollars, subject to the conditions set forth in the Amended Rights Agreement. If this were to occur, subject to certain exceptions, each Right (except for the Rights held by the acquiring party) would allow its holder to purchase Common Stock with a value equal to twice the exercise price of the Right. In the event that, after an acquiring party has accumulated 15% or more of our outstanding Common Stock, the Company is acquired in a merger or other business combination transaction or 50% or more of its consolidated assets, cash flow or earning power are sold, each unexercised Right (except for the Rights held by the acquiring party) would thereafter allow its holder to purchase stock of the acquiring company (or our Common Stock if it is the surviving company to the transaction) with a value equal to twice the purchase price of the Right. If the Rights were fully exercised, the shares issued would cause substantial dilution to the acquiring party or the shareholders of the acquiring company. The Amended Rights Agreement provides a period of time during which we may redeem the Rights, in whole or in part at a price of \$0.001 per Right, such that this period will end on the earlier of (i) the tenth business day following the date a person or group becomes the beneficial owner of 15% or more of the Common Stock or (ii) the final expiration date of the Rights, which is May 2, 2018.

Comprehensive Income (Loss)—Comprehensive income (loss) includes changes in the balances of items that are reported directly as separate components of shareholders' equity. Comprehensive income (loss) includes net income plus changes in cumulative foreign currency translation adjustment and gains or losses on foreign subsidiary net investment hedges, net of taxes.

The components of comprehensive income (loss) were as follows:

	Year Ended December 31,		
	2010	2009	2008
	(In thousands)		
Comprehensive income (loss):			
Consolidated net income (loss)	\$(77,690)	\$15,116	\$ 27,813
Gain (loss) on hedging activity, net of tax	(86)	(198)	89
Foreign currency translation adjustments	<u>(11,462)</u>	<u>13,397</u>	<u>(31,938)</u>
Comprehensive income (loss)	(89,238)	28,315	(4,036)
Comprehensive income (loss) attributable to noncontrolling interests	<u>(546)</u>	<u>181</u>	<u>646</u>
Comprehensive income (loss) attributable to CIBER, Inc.	<u><u>\$ (88,692)</u></u>	<u><u>\$ 28,134</u></u>	<u><u>\$ (4,682)</u></u>

CIBER, Inc. and Subsidiaries
Notes to Consolidated Financial Statements (Continued)

(14) Shareholders' Equity (Continued)

The balance of "accumulated other comprehensive income" reflected on the Consolidated Balance Sheets was comprised of the following:

	<u>Foreign Currency Translation</u>	<u>Hedge Loss</u>	<u>Total</u>
	(In thousands)		
Balance at January 1, 2009	\$ (983)	\$ —	\$ (983)
Change in foreign currency translation	13,374	—	13,374
Change in fair value of net investment hedges, net of tax	—	(198)	(198)
Balance at December 31, 2009	<u>12,391</u>	<u>(198)</u>	<u>12,193</u>
Change in foreign currency translation	(11,446)	—	(11,446)
Change in fair value of cash flow hedges, net of tax . .	—	(86)	(86)
Balance at December 31, 2010	<u>\$ 945</u>	<u>\$(284)</u>	<u>\$ 661</u>

In 2010 and 2009, we had losses of \$481,000 and \$479,000, respectively, on our interest rate swaps (cash flow hedges) that were reclassified to interest expense.

(15) Segment Information

Our reportable segments are our operating divisions, which are organized internally primarily by the nature of their services, client base and geography, and consist of our International division, which includes Europe, Eastern Asia, Australia and New Zealand, and our Custom Solutions, U.S. ERP, Federal and IT Outsourcing divisions. Our International division provides a broad range of IT consulting services, including package software implementation, application development, systems integration and support services, with SAP-related solutions and services accounting for 60% to 65% of its total revenue in 2010. Our Custom Solutions division provides application development, integration and support services. Our India-based operations are considered part of our Custom Solutions division. Our U.S. ERP division primarily provides enterprise software implementation services, including ERP software from software vendors such as Oracle, SAP and Lawson. Our Federal division provides a range of custom support services, including infrastructure support, systems integration, mission support and enterprise security. Our IT Outsourcing division offers outsourced enterprise infrastructure management solutions, including managed hosted infrastructure, service desk and desktop outsourcing, and remote application support services.

We evaluate our divisions' results of operations based on operating income before amortization of intangible assets. The accounting policies of our divisions are the same as those disclosed in the Summary of Significant Accounting Policies in Note 1, except for share-based compensation. Share-based compensation is not charged to operating divisions, but rather is recorded as part of corporate expenses.

Our largest client, the various agencies of the U.S. federal government, collectively accounted for approximately 11% of total revenue in each of 2010, 2009 and 2008. No other client accounted for more than 4% of our total revenue in 2010. Our IT Outsourcing division had a client in 2010 that accounted for 19% of total division revenue. Substantially all of our Federal divisions' revenue is

CIBER, Inc. and Subsidiaries

Earnings per share—basic and diluted	0.07	0.07	0.05	0.04	0.22

- (1) During the second quarter of 2010, we recorded a goodwill impairment charge of \$112.0 million to write-down the goodwill associated with certain segments. The goodwill impairment charge is only partially tax-affected and resulted in a \$30.8 million (27.5%) deferred tax benefit.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures—During the fiscal period covered by this report, our management, with the participation of our principal executive officer and principal financial officer, carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based upon this evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports we file or submit under the Exchange Act is (1) recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and (2) accumulated and communicated to our management, including our principal executive officer and principal financial officer, to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting—Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). CIBER's internal control systems were designed to provide reasonable assurance to the Company's management and Board of Directors regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of December 31, 2010, based on the framework in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in Internal Control—Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2010.

The attestation report on our internal control over financial reporting as of December 31, 2010, issued by Ernst & Young LLP, the independent registered public accounting firm who also audited our consolidated financial statements, is included following this Item 9A.

Changes in Internal Controls—There were no changes in our internal control over financial reporting that occurred during our most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

We continue to monitor the effectiveness of our internal controls and make necessary modifications to our processes and testing as appropriate on an on-going basis.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of CIBER, Inc.

We have audited CIBER, Inc. and subsidiaries' (the Company) internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of December 31, 2010 and 2009, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2010 of the Company and our report dated February 25, 2011 expressed an unqualified opinion thereon.

/s/ Ernst & Young LLP

Denver, Colorado
February 25, 2011

Item 9B. Other Information

Item 5.02(e). Departure of Directors or Certain Officers; Election of Directors, Appointment of Certain Officers; Compensatory Arrangements of Certain Officers.

The compensation committee of the board of directors of CIBER, Inc., has approved forms of employment and confidentiality agreements for the Company's executive vice presidents, senior vice presidents and vice presidents, which detail compensation, benefits, termination conditions, including severance and change in control payments, and non-compete and non-solicitation provisions. Certain of our Section 16 officers, including Tony Hadzi and Marcia M. Kim, will be subject to these agreements.

The foregoing description of the employment and confidentiality agreements for the Company's executive vice presidents, senior vice presidents and vice presidents is qualified in its entirety by reference to the forms of these agreements attached as Exhibit 10.21, Exhibit 10.22 and Exhibit 10.23, respectively, to this Annual Report on Form 10-K, which is incorporated herein by reference.

Item 9.01(d). Exhibits

- 10.21 Form of Employment and Confidentiality Agreement (Executive Vice Presidents)
- 10.22 Form of Employment and Confidentiality Agreement (Senior Vice Presidents)
- 10.23 Form of Employment and Confidentiality Agreement (Vice Presidents)

Part III

The information required by Part III is omitted from this Report on Form 10-K because the Registrant will file a definitive proxy statement for its 2011 Annual Meeting of Shareholders scheduled for May 18, 2011 (the "2011 Proxy Statement"), within 120 days after December 31, 2010, and certain information included therein is incorporated herein by reference.

Item 10. Directors, Executive Officers and Corporate Governance

Corporate Governance Matters

We have a Code of Business Conduct and Ethics (the "Code") that applies to our principal executive officer, principal financial officer, principal accounting officer, or persons performing similar functions. The code can be found on our website at <http://www.ciber.com>. We also have Corporate Governance Guidelines and charters for the Audit, Compensation and Nominating/Corporate Governance Committees of our Board of Directors. These Guidelines and Charters can also be found on our website. Any amendments or waivers to our Code will be disclosed as necessary on our website. Additionally, copies of our Code and Corporate Governance Guidelines, as well as the Charters for the various Committees of the Board of Directors are available in print, free of charge, to any shareholder that requests them.

As required by Section 303A.12(a) of the Listed Company Manual of the New York Stock Exchange ("NYSE"), the Company has filed with the NYSE the chief executive officer's annual certification regarding compliance with the NYSE's corporate governance listing standards. Additionally, the Company's chief executive officer and chief financial officer certifications required by Section 302 of the Sarbanes-Oxley Act are included as Exhibits 31.1 and 31.2 in this Annual Report on Form 10-K.

The additional information required by this item is incorporated by reference from the sections captioned "Directors and Executive Officers," "Section 16(a) Beneficial Ownership Reporting Compliance" and "Corporate Governance Practices" in CIBER's 2011 Proxy Statement.

Item 11. Executive Compensation

The information required by this item is incorporated by reference from the sections captioned “Executive Compensation” and “Corporate Governance Practices” in CIBER’s 2011 Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters*Securities Authorized for Issuance under Equity Compensation Plans*

The following table provides information as of December 31, 2010, regarding compensation plans under which our equity securities are authorized for issuance.

	<u>Number of securities to be issued upon exercise of outstanding options, warrants and rights</u>	<u>Weighted-average exercise price of outstanding options, warrants and rights</u>	<u>Number of securities remaining available for future issuance under equity compensation plans(1)</u>
Equity compensation plans/arrangements approved by shareholders	8,745,433(2)	\$5.73	3,937,151(3)
Equity compensation plans/arrangements not approved by shareholders(4)	<u>1,471,941</u>	\$3.10	<u>—</u>
Total	<u><u>10,217,374</u></u>		<u><u>3,937,151</u></u>

(1) Excludes securities reflected in 1st column.

(2) Consists of 7,726,181 stock options with a weighted average exercise price of \$5.73 and 1,019,252 restricted stock units.

(3) Includes 3,023,311 shares remaining available for future grants at December 31, 2010, under our 2004 Incentive Plan, plus 913,840 shares available for future sales to employees under our Employee Stock Purchase Plan.

(4) Represents 1,400,000 shares issued under the Inducement Plan for our new chief executive officer and 71,941 shares issued under the SCB Employee Inducement Award Plan.

The additional information required by this item is incorporated by reference from the section captioned “Security Ownership of Certain Beneficial Owners and Management” in CIBER’s 2011 Proxy Statement.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this item is incorporated by reference from the sections captioned “Certain Relationships and Related Party Transactions” and “Corporate Governance Practices” in CIBER’s 2011 Proxy Statement.

Item 14. Principal Accountant Fees and Services

The information required by this item is incorporated by reference from the section captioned “Independent Registered Public Accounting Firm” in CIBER’s 2011 Proxy Statement.

Part IV

Item 15. Exhibits and Financial Statement Schedules

(a) (1) Financial Statements

The following financial statements are filed as part of this report:

Report of Independent Registered Public Accounting Firm

Consolidated Statements of Operations—Years Ended December 31, 2010, 2009 and 2008

Consolidated Balance Sheets—December 31, 2010 and 2009

Consolidated Statements of Shareholders' Equity—Years Ended December 31, 2010, 2009 and 2008

Consolidated Statements of Cash Flows—Years Ended December 31, 2010, 2009 and 2008

Notes to Consolidated Financial Statements

(2) Financial Statement Schedules

All schedules are omitted, either because they are not applicable or because the required information is shown in the consolidated financial statements or notes thereto.

(3) Exhibits

The Exhibits filed as part of this Annual Report on Form 10-K are listed on the Exhibit Index immediately preceding such Exhibits, which Exhibit Index is incorporated herein by reference.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, as amended, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

DIVIDENDS

Our policy is to retain our earnings to support the growth of our business. Accordingly, we have never paid cash dividends on our common stock. Additionally, dividend payments on our common stock are not permitted under our amended Senior Credit Facility.

TRADEMARKS, SERVICE MARKS AND TRADE NAMES

The CIBER, Inc. name, logo and related trademarks and service marks, owned by CIBER, Inc. are registered and/or used in the U.S. and many foreign countries.

DESIGN: 50,000feet PRINTING: Sandy Alexander

The papers, paper mills and printer utilized in the production of this Annual Report are all certified for Forest Stewardship Council (FSC) standards, which promote environmentally appropriate, socially beneficial and economically viable management of the world's forest. The report is printed on Mohawk Options, manufactured with certified, nonpolluting, wind-generated electricity. This report was printed by Sandy Alexander, Inc. which uses 100% renewable wind energy. Additionally, Sandy Alexander has implemented technologies and processes to substantially reduce the volatile organic compound (VOC) content in inks, coatings and solution, and invested in equipment to capture and recycle virtually all VOC emissions from its press operations.

**AND SO WE LOOKED
CAREFULLY AT THE WORLD...**

***AND DECIDED
TO GROW THE COMPANY.***

FELLOW SHAREHOLDERS,

SOME HAVE MISTAKEN CIBER'S TRANSFORMATION AS A TURNAROUND STORY. *IT IS A GROWTH STORY, ONE POISED ON A COMPELLING CHOICE:*

Do we settle for underperformance? Or do we realign and reinvigorate the entire organization in seizing the opportunity before us? So we chose the latter, but in doing so faced-up to some time-honored business truths. Whoever defined success as the point where preparation meets opportunity wasn't kidding. CIBER possesses several core attributes on which to build a more effective and valuable corporation. There is ample opportunity for us in a large and growing market. CIBER also enjoys a blue chip customer base, and employees with special skills and enduring experience.

By way of preparation, in the last six months, we've developed a comprehensive strategic plan, implemented significant operating regimens, as well as attracted complementary strength to the management team and the board of directors.

So we change course, and then we change behavior. A responsive strategic plan is in place. Senior management is gaining new expertise, and we've strengthened the board of directors with regard to capitalizing on our core business potential. The main challenge, as I see it, is to concentrate the company's core capabilities (*mass*) and its sales strategy (*force*) in ways that

best capture new growth and better financial performance. In a recent speech I characterized CIBER as being a hundred miles wide and about one micron thick. I want CIBER to go deep into a smaller number of high-quality opportunities.

And so we're rapidly integrating our sales and delivery organizations so they can concentrate and leverage CIBER's expertise in those markets and service lines where we excel. It's a work in progress, but progress is underway and already making a difference.

DAVID C. PETERSCHMIDT
President and Chief Executive Officer

FOUR KEY INITIATIVES TO DRIVE GROWTH:

- 1 Create a tighter focus on specific market verticals
 - 2 Develop a world-class sales force
 - 3 Enhance our IT infrastructure
 - 4 Instill operating regimens
-

Year-end results show steady improvement. That doesn't in any way slacken our impatience to grow profits, improve margins and increase operating revenue. We've sparked four key initiatives to drive growth. First, we've tightened our focus on specific market verticals. We're developing a world-class sales force. We're also enhancing our IT infrastructure, and as mentioned, we're instilling operating regimens that will increase productivity and performance. There are good signs despite some lagging financials. Revenue continues to grow, but year-end profitability and cash flow were not strong. We aim for sustained, predictable financial performance, and I am confident the factors for success are set in place. Those factors include winning more high-quality deals in the right markets, improving cash collection, gaining

higher gross and operating margins, expanding our presence in India while overall increasing our global delivery capability. We're saying no to problematic deals, and by sharpening attention to fundamentals, we're improving operational execution.

Overall, consolidated revenue growth was 3% in 2010 led by 10% growth at our largest division, International at 36% of CIBER's revenue. Custom Solutions, which comprised 34% of CIBER revenues, climbed out of a 20% revenue decline in 2009, to a 1% decline in 2010. Yet in the fourth quarter we witnessed 6% growth. So things are looking up. Improvements in our operating discipline, as well as greater organizational unity, will lead to improvements in financial metrics, especially profitability, cash flow and shareholder value.

Our goals are plain and straightforward. Capture growth, improve financial performance, instill operating disciplines for efficiency and effectiveness, sharpen sales initiatives toward high-value projects and profitable relationships.

WE THINK IN TERMS OF PRACTICAL INNOVATIONS.
AND WE SEE OUR VALUE IN THE ABILITY
TO IDENTIFY AND SOLVE COMPLEX, CONFOUNDING
PROBLEMS. *AND WHY NOT?*

Global demand for IT services is rapidly increasing. \$763 billion in 2009, the market is expected to reach \$907 billion in 2014. CIBER has plenty of headroom and opportunity to capture market share. Currently, we have a slim 0.14% of the global market.

907,

000,000,000

*In 2014, the global demand for IT services is expected to reach \$907 billion.
CIBER's growth opportunity is immense.*

GLOBAL MARKET SHARE: IT SERVICE

- Global IT Market
- CIBER (0.14%)

OUR FIVE CORE OFFERINGS INCLUDE:

- 1 Application Development and Management
- 2 Business Analytics
- 3 Digital Marketing
- 4 Mobility
- 5 Testing and Quality Assurance

By streamlining, by coherently unifying our global assets, we have toppled the silos, wrung out redundancies and redirected individual teams toward new, more strategic objectives.

A key ingredient is formation of a world-class sales team. I'm of the belief that sales is more science than art, and that to grow business you have to systematically create opportunities. So we're focusing on a smaller number of markets. And we're competing for higher-margin projects. To deepen existing relationships, win better engagements and increase our value, the sales team has to be integrated, collaborative and highly responsive in bringing capability and talent to bear in meeting our clients' needs.

And so we're investing resources and energy in efforts to develop our sales organization into a truly world-class operation. Training, marketing support and concentrated focus on high-value, high-profit engagements will make a big difference in our growth profile.

At the same time we've established a deal review committee to scrutinize, on a weekly basis, significant deals to make sure they pass muster in terms of our strategic focus, profitability, risk tolerance and upside potential. I mention this committee, in particular, as an example of how we've centralized decision-making, and unified the company's pursuit of performance benchmarks.

We've created a global account management team to support sales by strengthening our business relationships and promoting awareness of CIBER as being cohesive and effective in deploying talent and delivering assets. A strong indicator of where we're going is evident in the recent success of CIBER Managed Services (CMS). Already profitable, changes at CMS are emblematic of internal realignments to create and capitalize on repeatable opportunities in higher margin practices and solutions.

Extremely important in these early stages is ongoing expansion of our global delivery capability, which is why we are increasing operating capacity in India. Now we have 1,100 professionals on staff. By the end of 2011 we will have doubled that number.

Closer to home, we've reorganized our North American operating division making it more responsive in amassing talent and intellectual assets to solve client needs. In fact, we have arranged the global practice areas under senior leaders and supported them with subject experts, sales and account managers to better respond to opportunities and changing demands. We're looking for more operational unity and coordination, what you'd expect to see from an integrated, billion-dollar global corporation. So we're creating IT infrastructures to better support more disciplined and strategic decision-making.

↓
BUSINESS FOCUS:
CIBER's concentration of force and mass translates to an increased focus on high-quality, tightly defined offerings and a disciplined approach to resource allocation. We are directing 65% of our resources to our Core verticals and practices, 30% to Near Core, and only 5% to those identified as Outfield.

- Core
- Near Core
- Outfield

NEW OPERATIONAL DISCIPLINES SPARK *CHANGE IN PERSONAL BEHAVIOR* AND *CORPORATE CULTURE*.

Where CIBER has traditionally accepted degrees of underperformance as a price for independence, we've got to achieve competitive effectiveness by concentrating what we have behind each and every well-considered initiative.

There is no doubt we have to improve on financial performance, but the way forward in that area is to focus on operational improvements, sales discipline and strategy aimed at more profitable long-term deals. As we improve market performance we're confident in seeing margin improvement as well.

Our goals are simple and straightforward: There is ample opportunity for growth. We must take the best steps to capture that growth. We must also significantly improve financial performance by instilling, throughout the global organization, higher levels of operating efficiency and effectiveness. And finally, we must concentrate on high-value offerings in selected market verticals such as energy and utilities, healthcare and manufacturing. On that point specifically, I would point out initiatives such as mobile solutions that bring real-time sales and account information to managers and sales executives in the field. This is noteworthy because up until now our value is largely realized in the back office where technology helps our clients reduce costs and maximize efficiency. Now we're taking our abilities to the front office to help those same clients identify opportunities and realize growth.

As we make continued progress in these efforts I expect to see more sustained and predictable financial performance. Of course you will expect to see it, too. And so with your interests in mind I thank you again for the confidence you've instilled not only in this management team, but also in the employees and partners of this good company.

DAVID C. PETERSCHMIDT
President and Chief Executive Officer

We've positioned the company to fulfill its promise of practical innovation. More than a slogan, the phrase indicates a way of thinking, a way of doing business. For us that means perceiving and solving complex, confounding problems for our clients.

FINANCIAL HIGHLIGHTS

CIBER, INC. AND SUBSIDIARIES

(\$ in thousands, except per share amounts—year ended Dec. 31)	2010 ⁽¹⁾	2009 ⁽²⁾	2008 ⁽³⁾	2007 ⁽³⁾	2006 ⁽³⁾

Diluted	(1.11)	0.22	0.45	0.39	0.40
WEIGHTED AVERAGE SHARES OUTSTANDING					
Basic	69,626	67,996	60,092	61,207	61,925
Diluted	69,626	68,107	60,389	61,924	62,357
BALANCE SHEET DATA					
Working capital	\$ 132,364	\$ 136,854	\$ 165,233	\$ 173,924	\$ 140,757
Total assets	722,364	803,256	797,520	848,931	779,679
Long-term debt, current portion	10,473	10,697	2,002	9,108	3,602
Long-term debt, noncurrent portion	77,879	87,500	165,710	193,978	192,092
Total shareholders' equity	419,500	506,246	453,324	459,939	416,122
Shares outstanding, net of treasury	70,124	69,482	60,085	60,747	61,753

(1) During the second quarter of 2010, we recorded a goodwill impairment charge of \$112.0 million to write-down the goodwill associated with certain segments. The goodwill impairment charge is only partially tax-affected and resulted in a \$30.8 million (27.5%) deferred tax benefit.

(2) During 2009, we sold nine million shares of our common stock, for proceeds of \$23.2 million, net of issuance costs, which were used to repay a portion of the outstanding borrowings under our then-outstanding senior secured revolving credit facility.

(3) On January 1, 2009, we were required to retrospectively apply new accounting guidance related to convertible debt and noncontrolling interests to our previously reported results for 2007 and 2008. Our results for 2006 have not been adjusted for this retrospective application. The required retrospective applications of the above guidance had the following impact on our net income, diluted earnings per share and presentation of the consolidated statement of operations for the 2007 and 2008 annual periods and the adjusted amounts are reflected in the table above.

REVENUE

(\$ in billions)

Revenue growth was 3% in 2010 led by 10% growth at our largest division, International at 36% of CIBER's revenue. Custom Solutions, which comprised 34% of CIBER revenues, climbed out of a 20% revenue decline in 2009, to a 1% decline in 2010.

OPERATING INCOME

(\$ in millions)

*CIBER presents a number of non-GAAP measurements because management believes that these metrics provide meaningful supplemental information in addition to the GAAP metrics and provide comparability and consistency to prior periods. Full-year 2010 GAAP operating loss was \$103.2 million including \$9.9 million (pre-tax) of bad debt and project write-off charges, and \$118.1 million (pre-tax) goodwill impairment and executive transition charges. Excluding these items, 2010 operating income was \$24.8.

Reconciliations of non-GAAP to comparable GAAP measures are available in the Investor Relations section of the Company's website at www.ciber.com/cbr.

AT A GLANCE

CIBER IS WELL ON THE WAY TO TRANSFORMING ITSELF INTO A UNIFIED AND COHESIVE GLOBAL PROVIDER OF INTEGRATED IT SOLUTIONS AND BUSINESS-CHANGING PROCESSES.

CIBER has provided integrated IT solutions for the changing world over the past 36 years. With over 8,600 employees and subcontractors in 19 countries CIBER generates more than \$1 billion in yearly revenue. Aspiring to realize our potential as a creator of practical innovations, CIBER has instigated a comprehensive, intensely practical, reorganization and realignment.

Our objective to improve financial performance will be attained by utilizing our refined strategic approach, improved operational regimens, and increased, as well as narrowed focus on higher margin, well-developed offerings. As an organization we need to focus on creating high-value, tightly defined core offerings for our clients. Ultimately, to fuel our world-class management information systems offerings we need to become a world-class sales organization.

WHO WE ARE

For more than 35 years, CIBER has been a global information technology consulting services and outsourcing company.

- ▶ Founded in 1974
- ▶ Our very first client is still our client
- ▶ \$1.1 billion in revenue: "Big enough to matter, small enough to care"
- ▶ 8,600+ employees and subcontractors in 19 countries
- ▶ Named one of the Top Ten "Best Managed" Global Outsourcers
- ▶ Expertise in application development, integration and management in both custom and ERP environments, with flexible, robust and fully integrated infrastructure support options

KEY SUCCESS FACTORS FOR 2011

Sustained, predictable performance will translate to growth for CIBER in this thriving IT market.

- ▶ Higher-quality deal wins in key verticals
- ▶ Improvement in Days Sales Outstanding and cash collection
- ▶ Gross and operating margin improvement
- ▶ Expanded India presence and increased global delivery
- ▶ Decrease in problematic deals
- ▶ Improved operational execution
