Green Bankshares, Inc.
2010 Annual Report

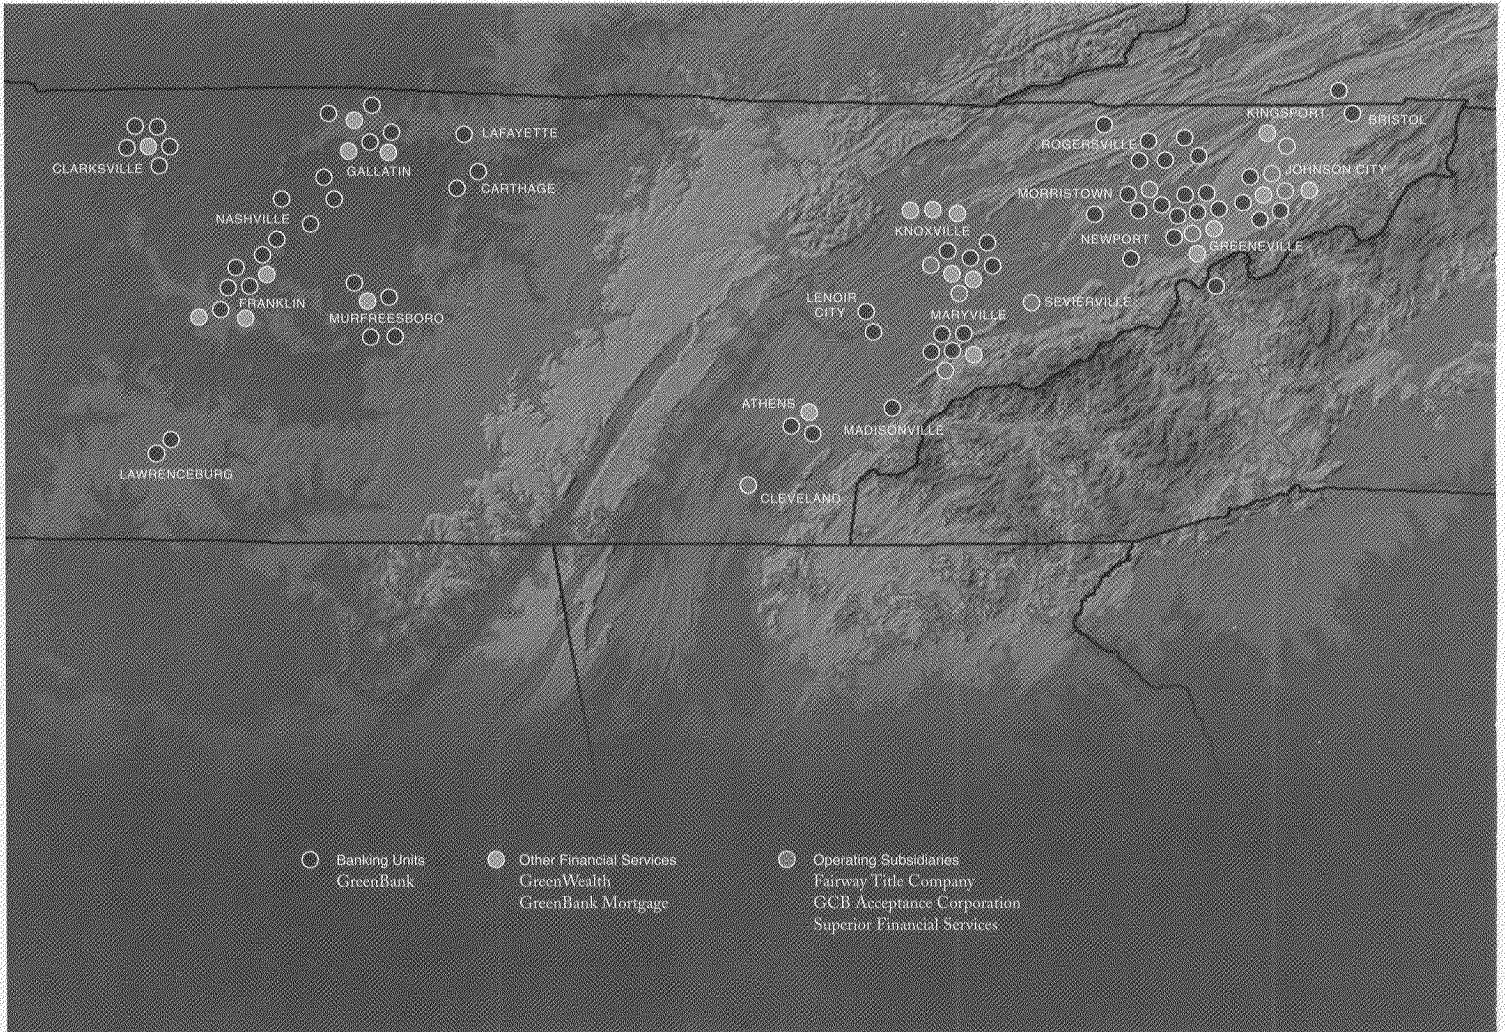

GreenBank

New Leadership. New Direction.

COMPANY PROFILE

Greenville, Tennessee-based Green Bankshares, Inc., with total assets of approximately \$2.4 billion, is the holding company for GreenBank. GreenBank, which traces its origin to 1890, has 63 branches across East and Middle Tennessee, and one branch each in Bristol, Virginia, and Hot Springs, North Carolina. It also provides wealth management services through its GreenWealth Division and residential mortgage lending through its Mortgage Division. In addition, GreenBank conducts separate businesses through three wholly owned subsidiaries: Superior Financial Services, Inc., a consumer finance company; GCB Acceptance Corporation, a consumer finance company specializing in automobile lending; and Fairway Title Co., a title insurance company.

FINANCIAL HIGHLIGHTS

(dollars in thousands, except per share amounts)

	2010	2009
Financial position at December 31,		
Total assets	\$ 2,406,040	\$ 2,619,139
Loans, net of unearned interest	1,745,378	2,043,807
Total deposits	1,976,854	2,084,096
Total shareholders' equity	143,897	226,769
Common book value per share	5.75	12.15
Tangible common book value per share*	5.23	11.44
Operations for the year ended December 31,		
Net interest income	\$ 83,593	\$ 80,525
Provision for loan losses	71,107	50,246
Net interest income after provision for loan losses	12,486	30,279
Noninterest income	32,544	31,578
Noninterest expense	110,815	229,587
Loss before income taxes	(65,785)	(167,730)
Income tax benefit	14,910	(17,036)
Loss before preferred stock dividends	(80,695)	(150,694)
Preferred stock dividends	5,001	4,982
Net loss available to common shareholders	\$ (85,696)	\$ (155,676)
Comprehensive loss	\$ (79,885)	\$ (149,842)
Loss per share:		
Basic	\$ (6.54)	\$ (11.91)
Diluted	\$ (6.54)	\$ (11.91)

* Tangible common book value per share excludes goodwill, intangible assets and preferred stock.

Reconciliation of loss before income taxes to adjusted pre-tax loss

Full year results for 2010 included tax expense of \$14,910 or \$1.14 per diluted share despite the pre-tax loss before income taxes, primarily reflecting non-cash charges to record a valuation allowance for deferred tax assets under accounting rules. The year ended December 31, 2009, included a non-recurring, non-cash goodwill impairment charge of \$143,389 million recorded in the second quarter of 2009. In light of these charges, the Company believes that the most meaningful year-to-year performance comparison can be made on the basis of pre-tax income, and excluding the impact of the goodwill impairment charge. On this basis, the Company's adjusted pre-tax loss for 2010 was \$65,785 million versus a pre-tax loss of \$24,341 million for 2009. See reconciliation below of loss before income taxes to adjusted pre-tax loss, a non-GAAP financial measure.

Loss before income taxes	\$ (65,785)	\$ (167,730)
Goodwill impairment charge, pre-tax	-	143,389
Adjusted pre-tax loss	\$ (65,785)	\$ (24,341)

TO OUR SHAREHOLDERS

The past year was a tough one for banks. The deep and far-reaching impact of the economic downturn has continued to weigh heavily on real estate values and, in turn, on the credit quality of many borrowers. Facing these strong headwinds for a third straight year, a period framed by arguably the most difficult business conditions since the Great Depression, many banks have reported strained earnings and diminished capital strength.

Considering that commercial real estate lending was a significant element of our past growth strategy, we have been particularly affected by the downturn and have experienced substantial credit costs. These challenges translated into a net loss to our common shareholders of \$85.7 million or \$6.54 per diluted share for 2010 compared with a net loss to common shareholders of \$155.7 million or \$11.91 per diluted share for 2009. Eliminating special charges, our adjusted pre-tax loss for 2010 increased to \$65.8 million from a pre-tax loss of \$24.3 million for 2009. Clearly, 2010 was a very difficult year for us.

Although it's easy to blame the economy or forces beyond our control for these losses, it does not change the facts or our disappointment with these results. Our Board and management are taking actions to place the Company on a solid path back to profitability and reduce our exposure to future real estate downturns. Challenging times such as these also provide us with an opportunity to rethink other aspects of our operations to promote efficiency and flexibility, and to reduce costs.

When Stan Puckett retired as Chairman and Chief Executive Officer of Green Bankshares and GreenBank effective March 31, 2010, the change in leadership that occurred also naturally brought with it a change in perspective. I am deeply appreciative

of the confidence the Board placed in me as Stan's successor and grateful to our dedicated management team and highly committed employees for their support as we made this transition. From day one, our primary focus has been to intensify a focus on uncovering our strengths, determining what we need to do to improve our performance, and developing new strategies that will strengthen our franchise over the long term.

In terms of our strengths, I believe GreenBank has an incredible footprint across attractive markets that stretch from Middle Tennessee into the boundaries of Virginia and North Carolina. Of even more importance is the fact that we have deep roots in the communities we serve. Unlike many bank start-ups in recent years that seemed "built to sell," GreenBank has a strong heritage and reputation as a community bank that spans 12 decades and runs five generations deep with some of our customers. I have been impressed by the legacy and loyalty the Bank has created since 1890 and look forward to building on the tremendous franchise value inherent in our banking operations.

As to the problems we have encountered in recent years, most of that reflects the increasing amount of commercial real estate loans that we developed in our portfolio. We continue to deal aggressively with asset quality issues and have segregated problem loans and repossessed properties into our Special Assets Group. This action ensures that the loan relationships most at risk receive the exclusive attention of a dedicated team focused on appropriate resolution on a case-by-case basis.

Confronting these challenges and recognizing the opportunities that lie ahead, we have begun to reengineer GreenBank for the future so that we

can continue to provide a high level of service to our customers and once again grow our business. First, we have been and plan to continue shrinking our exposure to commercial real estate loans throughout 2011. Thereafter, we will remain very selective with regard to commercial real estate lending as the economy recovers. Simultaneously, we plan to broaden our products for the retail consumer, including a greater emphasis on brokerage and other fee-driven services, while also increasing our focus on commercial lending. These efforts, which in effect represent a new business model for GreenBank, should result in more balanced operations in the future due to greater diversity in both revenue sources and risk. At the same time, we will "Go Green" – investing in our future with technology to drive more efficient operations, allowing our customers greater flexibility, and reducing our costs of operations.

In my 30 years in banking, I have found that promises of outstanding service and personal attention are only realized when our people are close to the customer. As such, we will continue to flatten our organization in the coming year and place decision-making closer to our clients.

Speaking of our organization, we will be naming a new Chief Financial Officer in the near future to replace Jim Adams, who has decided to retire on May 16, 2011, at the age of 66. Jim has served the Company well for the past five years and has been instrumental in upgrading and improving our financial systems and navigating an increasingly complex regulatory environment. We also will be naming a new Chief Credit Officer along with a new Director of Human Resources. Filling these major roles with strong leaders who have "been where we are going" will be a key driver of our success.

In conclusion, please know that your Board of Directors and management are working diligently to return the Company to profitability and improve our capital position in the wake of three years of losses. This will not be an easy feat, nor will it be quickly accomplished; still, we are encouraged about the prospects for moving the Company along the path toward improved performance. This optimism reflects the fundamental core profitability of our operations – which under more normal conditions would translate into a healthier bottom line. Our confidence also is based on the intrinsic value of our franchise and the potential we see to strengthen it further as we successfully implement our new strategies and change the focus of the Bank. We appreciate your continued support during these challenging times and are grateful for your ongoing interest in Green Bankshares.

MARKET AND DIVIDEND INFORMATION

The Company's shares trade on the NASDAQ Global Select Market under the symbol GRNB. As of March 17, 2011, the Company estimates that it had approximately 5,600 shareholders, including approximately 3,100 beneficial owners holding shares in nominee or "street" name. The adjacent table sets forth the high and low bid price information for the Company's common stock in 2010 and 2009, along with the amount of cash dividends paid per share during those years.

	High	Low	Dividends Paid Per Share ¹
2010:			
Fourth quarter	\$ 7.73	\$ 2.39	\$ 0.00
Third quarter	13.11	6.58	0.00
Second quarter	15.04	7.96	0.00
First quarter	9.48	3.52	0.00
2009:			
Fourth quarter	\$ 5.48	\$ 3.51	\$ 0.00
Third quarter	6.83	3.25	0.00
Second quarter	9.73	4.14	0.00
First quarter	14.71	4.51	0.13
			<u>\$ 0.13</u>

¹ Facing an uncertain economic environment caused by the recession, the Company suspended the payment of cash dividends to common shareholders in the second quarter of 2009 in order to prudently preserve capitals levels.

For information regarding restrictions on the payment of dividends by the Bank to the Company, see "Management's Discussion and Analysis of Financial Condition and Results of Operation – Liquidity and Capital Resources" in the Form 10-K included with this annual report. See also Note 12 of Notes to Consolidated Financial Statements.

The adjacent graph shows the cumulative total return on the common stock of the Company over the last five years compared with the Russell 3000 Index and the SNL Bank NASDAQ Index. Cumulative total return on the stock or the index equals the total increase in value since December 31, 2005, assuming reinvestment of all dividends paid into the stock or the index, respectively. The graph was prepared assuming that \$100 was invested in the common stock on December 31, 2005, and also in the securities included in the indices used for comparison purposes. The shareholder returns shown on the performance graph are not necessarily indicative of the future performance of the common stock of the Company or particular index.

PART I

Forward-Looking Statements

The information contained herein contains forward-looking statements that involve a number of risks and uncertainties. A number of factors, including those discussed herein, could cause results to differ materially from those anticipated by such forward-looking statements which are within the meaning of that term in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. In addition, such forward-looking statements are necessarily dependent upon assumptions, estimates and data that may be incorrect or imprecise. Accordingly, any forward-looking statements included herein do not purport to be predictions of future events or circumstances and may not be realized. Forward-looking statements can be identified by, among other things, the use of forward-looking terminology such as “trends,” “assumptions,” “target,” “guidance,” “outlook,” “opportunity,” “future,” “plans,” “goals,” “objectives,” “expectations,” “near-term,” “long-term,” “projection,” “may,” “will,” “would,” “could,” “expect,” “intend,” “estimate,” “anticipate,” “believe,” “potential,” “regular,” or “continue” or the negatives thereof, or other variations thereon of comparable terminology, or by discussions of strategy or intentions. Such statements may include, but are not limited to, projections of revenue, income or loss, expenditures, acquisitions, plans for future operations, financing needs or plans relating to services of the Company, as well as assumptions relating to the foregoing. The Company’s actual results may differ materially from the results anticipated in forward-looking statements due to a variety of factors, including, but not limited to those identified in “Item 1A. Risk Factors” in this Form 10-K and (1) deterioration in the financial condition of borrowers resulting in significant increases in loan losses and provisions for those losses; (2) continuation of the historically low short-term interest rate environment; (3) changes in loan underwriting, credit review or loss reserve policies associated with economic conditions, examination conclusions, or regulatory developments; (4) increased levels of non-performing and repossessed assets and the ability to resolve these may result in future losses; (5) greater than anticipated deterioration or lack of sustained growth in the national or local economies; (6) rapid fluctuations or unanticipated changes in interest rates; (7) the impact of governmental restrictions on entities participating in the Capital Purchase Program (the “CPP”) of the United States Department of the Treasury (the “Treasury”); (8) changes in state and federal legislation, regulations or policies applicable to banks or other financial service providers, including regulatory or legislative developments, like the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), arising out of current unsettled conditions in the economy (9) the results of regulatory examinations; (10) the remediation efforts related to the Company’s material weakness in its internal control over financial reporting; (11) increased competition with other financial institutions in the markets that the Bank serves; (12) the Company recording a further valuation allowance related to its deferred tax asset; (13) exploring alternatives available for the future repayment or conversion of the preferred stock issued in the CPP; (14) further deterioration in the valuation of other real estate owned (“OREO”); (15) inability to comply with regulatory capital requirements and to secure any required regulatory approvals for capital actions to raise capital if necessary to comply with any regulatory capital requirements; and (16) the loss of key personnel. The Company undertakes no obligation to update forward-looking statements.

Readers are cautioned not to place undue reliance on forward-looking statements made in this document, since the statements speak only as of the document’s date. All forward-looking statements included in this Annual Report on Form 10-K are expressly qualified in their entirety by the cautionary statements in this section and to the more detailed risk factors included below under Part I, Item 1A “Risk Factors”. The Company has no obligation and does not intend to publicly update or revise any forward-looking statements contained in or incorporated by reference into this Annual Report on Form 10-K, to reflect events or circumstances occurring after the date of this document or to reflect the occurrence of unanticipated events. Readers are advised, however, to consult any further disclosures the Company may make on related subjects in its documents filed with or furnished to the Securities and Exchange Commission (“SEC”) or in its other public disclosures.

ITEM 1. BUSINESS.

Presentation of Amounts

All dollar amounts set forth below, other than share and per-share amounts, are in thousands unless otherwise noted. Unless this Form 10-K indicates otherwise or the context otherwise requires, the terms “we,” “our,” “us,” “the Company” or “Green Bankshares” as used herein refer to Green Bankshares, Inc. and its subsidiaries, including GreenBank, which we sometimes refer to as “GreenBank,” “the Bank” or “our Bank”.

Green Bankshares, Inc.

We are the third-largest bank holding company headquartered in Tennessee, with \$2.4 billion in assets as of December 31, 2010. Incorporated in 1985, Green Bankshares is the parent of GreenBank (the “Bank”) and owns 100% of the capital stock of the Bank. The primary business of the Company is operating the Bank.

As a bank holding company, we are subject to regulation by the Board of Governors of the Federal Reserve System, or the Federal Reserve Board (the “FRB”). We are required to file reports with the Federal Reserve Bank of Atlanta (the “FRB-Atlanta”) and are subject to regular examinations by that agency. Shares of our common stock are traded on the NASDAQ Global Select Market under the trading symbol “GRNB.”

At December 31, 2010, the Company maintained a main office in Greeneville, Tennessee and 64 full-service bank branches (of which eleven are leased operating premises), a location for mortgage banking and nine separate locations operated by the Bank’s subsidiaries.

The Company’s assets consist primarily of its investment in the Bank and liquid investments. Its primary activities are conducted through the Bank. At December 31, 2010, the Company’s consolidated total assets were \$2,406,040, its consolidated net loans were \$1,745,378, its total deposits were \$1,976,854 and its total shareholders’ equity was \$143,897.

The Company’s net income, or net loss, is dependent primarily on the earnings, or loss, of its wholly-owned subsidiary, GreenBank and its level of net income, or net loss. GreenBank’s net income, or net loss, is dependent upon its level of net interest income, which is the difference between the interest income earned on its loans and other interest-earning assets and the interest paid on deposits and other interest-bearing liabilities plus the Bank’s non-interest income, the sum of which is either partially, or fully, offset by the amount of the Bank’s loan loss provision plus the Bank’s total operating expenses.

Lending Activities:

General: The Bank’s lending activities reflect its community banking philosophy, emphasizing secured loans to individuals and businesses in its primary market areas.

Commercial Real Estate Lending: Commercial real estate loans are loans originated by the Bank that are secured by commercial real estate and includes commercial real estate construction loans to developers, mainly to borrowers based in its primary markets.

Residential Real Estate Lending: The Bank originates traditional one-to-four family, owner occupied, residential mortgages secured by property located in its primary market area. Further detail on consumer residential real estate lending may be found on page 7 of this report.

Commercial Business Lending: Commercial business loans are loans originated by the Bank that are generally secured by various types of business assets including inventory, receivables, equipment, financial instruments and commercial real estate. In limited cases, loans may be made on an unsecured basis. Commercial business loans are used for a variety of purposes including working capital and financing the purchase of equipment.

The Bank concentrates on originating commercial business loans to middle-market companies with borrowing requirements of less than \$25 million. Substantially all of the Bank's commercial business loans outstanding at December 31, 2010, were to borrowers based in its primary markets.

Consumer Lending: The Bank makes consumer loans for personal, family or household purposes, such as debt consolidation, automobiles, vacations and education. Consumer lending loans are typically secured by personal property but may also be unsecured personal loans. They may also be made on a revolving line of credit or fixed-term basis.

Investment Activities:

The Bank has authority to invest in various types of liquid assets, including U.S. Treasury obligations and securities of various federal agencies and U.S. Government sponsored enterprises, deposits of insured banks and federal funds. The Bank's investments do not include commercial paper, asset-backed commercial paper, asset-backed securities secured by credit cards, or car loans. The Bank also does not participate in structured investment vehicles. Liquidity may increase or decrease depending upon the availability of funds and comparative yields on investments in relation to the returns on loans and leases. The Bank must also meet reserve requirements of the FRB, which are imposed based on amounts on deposit in various deposit categories.

Sources of Funds:

Deposits: Deposits are the primary source of the Bank's funds for use in lending and for other general business purposes. Deposit inflows and outflows are significantly influenced by economic and competitive conditions, interest rates, money market conditions and other factors, including depositor confidence. Consumer, small business and commercial deposits are attracted principally from within the Bank's primary market areas through the offering of a broad selection of deposit instruments including consumer, small business and commercial demand deposit accounts, interest-bearing checking accounts, money market accounts, regular savings accounts, certificates of deposit and retirement savings plans.

The Bank's marketing strategy emphasizes attracting core deposits held in checking, savings, money-market and certificate of deposit accounts. These accounts are a source of low-interest cost funds and in some cases, provide significant fee income. The composition of the Bank's deposits has a significant impact on the overall cost of funds. At December 31, 2010, interest-bearing deposits comprised 92% of total deposits, as compared with 91% at December 31, 2009.

Borrowings: Borrowings may be used to compensate for reductions in deposit inflows or net deposit outflows, or to support expanded lending activities. These borrowings include Federal Home Loan Bank ("FHLB") advances, repurchase agreements, federal funds and other borrowings.

The Bank, as a member of the FHLB system, is required to own a minimum level of FHLB stock and is authorized to apply for advances on the security of such stock, mortgage-backed securities, loans secured by real estate and other assets (principally securities which are obligations of, or guaranteed by, the United States Government), provided certain standards related to creditworthiness have been met. FHLB advances are made pursuant to several different credit programs. Each credit program has its own interest rates and range of maturities. The FHLB prescribes the acceptable uses to which the advances pursuant to each program may be made as well as limitations on the size of advances. In addition to the program limitations, the amounts of advances for which an institution may be eligible are generally based on the FHLB's assessment of the institution's creditworthiness.

As an additional source of funds, the Bank may sell securities subject to its obligation to repurchase these securities (repurchase agreements) with major customers utilizing government securities or mortgage-backed

securities as collateral. Generally, securities with a value in excess of the amount borrowed are required to be maintained as collateral to a repurchase agreement.

Information concerning the Bank's FHLB advances, repurchase agreements, junior subordinated notes (trust preferred) and other borrowings is set forth in "Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources" and in Note 8 of Notes to Consolidated Financial Statements.

We are significantly impacted by prevailing economic conditions, competition and the monetary, fiscal and regulatory policies of governmental agencies. Lending activities are influenced by the general credit needs of individuals and small and medium-sized businesses in the Company's market areas, competition among lenders, the level of interest rates and the availability of funds. Deposit flows and costs of funds are influenced by prevailing market rates of interest, primarily the rates paid on competing funding alternatives, account maturities and the levels of personal income and savings in the Company's market areas.

Our principal executive offices are located at 100 North Main Street, Greeneville, Tennessee 37743-4992 and our telephone number at these offices is (423) 639-5111. Our internet address is www.greenbankusa.com. Please note that our website is provided as an inactive textual reference and the information on our website is not incorporated by reference herein.

GreenBank and its Subsidiaries

Our Bank is a Tennessee-chartered commercial bank established in 1890 which has its principal executive offices in Greeneville, Tennessee. The principal business of the Bank consists of attracting deposits from the general public and investing those funds, together with funds generated from operations and from principal and interest payments on loans, primarily in commercial and residential real estate loans, commercial loans and installment consumer loans. At December 31, 2010, the Bank had 63 Tennessee-based full-service banking offices located in Greene, Blount, Cocke, Hamblen, Hawkins, Knox, Loudon, McMinn, Monroe, Sullivan, and Washington Counties in East Tennessee and in Davidson, Lawrence, Macon, Montgomery, Rutherford, Smith, Sumner and Williamson Counties in Middle Tennessee. The Bank also operates two other full service branches—one located in nearby Madison County, North Carolina and the other in nearby Bristol, Virginia. Further, the Bank operates a mortgage banking operation in Knox County, Tennessee.

Our Bank also offers other financial services through three wholly-owned subsidiaries. Through Superior Financial Services, Inc. ("Superior Financial"), the Bank operates eight consumer finance company offices located in Greene, Blount, Hamblen, Washington, Sullivan, Sevier, Knox and Bradley Counties, Tennessee. Through GCB Acceptance Corporation ("GCB Acceptance"), the Bank operates a sub-prime automobile lending company with a sole office in Johnson City, Tennessee. Through Fairway Title Co., the Bank operates a title company headquartered in Knox County, Tennessee. At December 31, 2010, these three subsidiaries had total combined assets of \$42,995 and total combined loans, net of unearned interest and loan loss reserve, of \$40,671.

As described in more detail below, deposits of our Bank are insured by the Deposit Insurance Fund ("DIF") of the Federal Deposit Insurance Corporation ("FDIC"). Our Bank is subject to comprehensive regulation, examination and supervision by the Tennessee Department of Financial Institutions (the "TDFI"), the FRB and the FDIC.

Business Strategy

In 2011, the Company expects that its primary business strategy will be on managing through the current asset quality issues affecting the Company's performance and strengthening the Company's capital position, including, if necessary, through the issuance of additional equity securities. Accordingly, the Company expects that over the short term, given the current economic environment and high levels of nonperforming assets, there will be little to no loan growth until the current economic environment in the Company's markets stabilizes and the economy begins to improve.

The Company's intermediate term prospects depend principally on the Company's ability to deal with the asset quality issues currently facing the Company and the Company's ability to raise capital in amounts sufficient to allow the Company and the Bank to achieve capital levels in excess of those required by federal banking regulations and the informal commitments that the Bank has made to the TDFI and FDIC described in more detail below.

The Bank had historically operated under a single bank charter while conducting business under 18 bank brands with a distinct community-based brand in almost every market. On March 31, 2007 the Bank announced that it had changed all brand names to GreenBank throughout all the communities it serves to better enhance recognition and customer convenience. The Bank continues to offer local decision making through the presence of its regional executives in each of its markets, while maintaining a cost effective organizational structure in its back office and support areas.

The Bank focuses its lending efforts predominately on individuals and small to medium-sized businesses while it generates deposits primarily from individuals in its local communities. To aid in deposit generation efforts, the Bank offers its customers extended hours of operation during the week as well as Saturday and Sunday banking in many of its markets. The Bank also offers free online banking along with its High Performance Checking Program which since its inception has generated a significant number of core transaction accounts.

In addition to the Company's business model, which is described herein, the Company is continuously investigating and analyzing other lines and areas of business. Conversely, the Company frequently evaluates and analyzes the profitability, risk factors and viability of its various business lines and segments and, depending upon the results of these evaluations and analyses, may conclude to exit certain segments and/or business lines. Further, in conjunction with these ongoing evaluations and analyses, the Company may decide to sell, merge or close certain branch facilities.

Lending Activities

General. The loan portfolio of the Company is comprised of commercial real estate, residential real estate, commercial and consumer loans. Such loans are primarily originated within the Company's market areas of East and Middle Tennessee and are generally secured by residential or commercial real estate or business or personal property located in its market footprint.

Loan Composition. Given the on-going challenging economic environment which began during the second half of 2007 as the recession emerged and the resulting precipitous decline in residential real estate construction values through 2010, the Company significantly reduced its commercial real estate concentration levels, as noted in the table below for each of the periods presented at December 31:

	<u>2010</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Commercial real estate.....	\$ 1,080,805	\$ 1,306,398	\$ 1,430,225	\$ 1,549,457	\$ 921,190
Residential real estate	378,783	392,365	397,922	398,779	281,629
Commercial	222,927	274,346	315,099	320,264	258,998
Consumer.....	75,498	83,382	89,733	97,635	87,111

Other	<u>1,629</u>	<u>236</u>	<u>48</u>	<u>1,913</u>
Total.....	<u>\$ 649,439</u>	<u>\$ 821,797</u>	<u>\$ 274,142</u>	<u>\$ 1,745,378</u>

⁽¹⁾ Net of unearned interest

The following table sets forth the dollar amount of the loans maturing subsequent to the year ended December 31, 2011 distinguished between those with predetermined interest rates and those with floating, or variable, interest rates.

	<u>Fixed Rate</u>	<u>Variable Rate</u>	<u>Total</u>
Commercial real estate.....	\$ 432,141	\$ 211,290	\$ 643,431
Residential real estate	111,198	218,269	329,467
Commercial	46,740	27,687	74,427
Consumer.....	47,696	634	48,330
Other.....	<u>236</u>	<u>48</u>	<u>284</u>
Total.....	<u>\$ 638,011</u>	<u>\$ 457,928</u>	<u>\$ 1,095,939</u>

Commercial Real Estate Loans. The Company has significantly curtailed the origination of residential real estate construction and development loans over the past three years as noted in the higher risk loan migration table above. The Company had historically originated commercial real estate loans, including residential real estate construction and development loans, generally to existing business customers, secured by real estate located in the Company's market area. At December 31, 2010, commercial real estate loans totaled \$1,080,805, or 62%, of the Company's net loan portfolio. Commercial real estate loans were generally underwritten by addressing cash flow (debt service coverage), primary and secondary source of repayment, financial strength of any guarantor, and strength of the tenant (if any), liquidity, leverage, management experience, ownership structure, economic conditions and

collateral. Generally, the Company would loan up to 80-85% of the value of improved property, 65% of the value of raw land and 75% of the value of land to be acquired and developed. A first lien on the property and assignment of lease is required if the collateral is rental property, with second lien positions considered on a case-by-case basis.

Residential Real Estate. The Company also originates one-to-four family, owner-occupied residential mortgage loans secured by property located in the Company's primary market areas. The majority of the Company's residential mortgage loans consists of loans secured by owner-occupied, single-family residences. At December 31, 2010, the Company had \$378,783, or 21%, of its net loan portfolio in residential real estate loans, net of unearned income. Residential real estate loans generally have a loan-to-value ratio of 85% or less. These loans are underwritten by giving consideration to the ability to pay, stability of employment, source of income, credit history and loan-to-value ratio. Home equity loans make up approximately 52% of residential real estate loans. Home equity loans may have higher loan-to-value ratios when the borrower's repayment capacity and credit history conform to underwriting standards. Superior Financial extends sub-prime mortgages to borrowers who generally have a higher risk of default than mortgages extended by the Bank. Sub-prime mortgages totaled \$11,742, or 3%, of the Company's residential real estate loans, net of unearned income, at December 31, 2010.

The Company sells most of its one-to-four family mortgage loans in the secondary market to Freddie Mac and other mortgage investors through the Bank's mortgage banking operation. Sales of such loans to Freddie Mac and other mortgage investors totaled \$47,881 and \$43,050 during 2010 and 2009, respectively, and the related mortgage servicing rights were sold together with the loans. All mortgage loans sales are without recourse and all notes are endorsed to the investor stating without recourse. Certain contingencies do come into play for early prepayment or early payment defaults and would involve a refund of the yield spread premium earned on the transaction given certain events of default. During 2010, no refunds or events of default occurred.

Commercial Loans. Commercial loans are made for a variety of business purposes, including working capital, inventory and equipment and capital expansion. At December 31, 2010, commercial loans outstanding totaled \$222,927, or 13%, of the Company's net loan portfolio. Such loans are usually amortized over one to seven years and generally mature within five years. Commercial loan applications must be supported by current financial information on the borrower and, where appropriate, by adequate collateral. Commercial loans are generally underwritten by addressing cash flow (debt service coverage), primary and secondary sources of repayment, financial strength of any guarantor, liquidity, leverage, management experience, ownership structure, economic conditions and industry-specific trends and collateral. The loan to value ratio depends on the type of collateral. Generally speaking, accounts receivable are financed between 70% and 80% of accounts receivable less than 90 days past due. If other collateral is taken to support the loan, the loan to value of accounts receivable may approach 85%. Inventory financing will range between 50% and 60% depending on the borrower and nature of the inventory. The Company requires a first lien position for such loans. These types of loans are generally considered to be a higher credit risk than other loans originated by the Company.

Consumer Loans. At December 31, 2010, the Company's consumer loan portfolio, net of unearned income, totaled \$67,440, or 4%, of the Company's total net loan portfolio. The Company's consumer loan portfolio is composed of secured and unsecured loans originated by the Bank, Superior Financial and GCB Acceptance. The consumer loans of the Bank generally have a higher risk of default than other loans originated by the Bank. Further, consumer loans originated by Superior Financial and GCB Acceptance, which are finance companies rather than banks, generally have a greater risk of default than such loans originated by commercial banks and, accordingly, carry a higher interest rate. Superior Financial and GCB Acceptance consumer loans totaled approximately \$32,194, or 48%, of the Company's installment consumer loans, net of unearned income, at December 31, 2010. The performance of consumer loans will be affected by the local and regional economy as well as the rates of personal bankruptcies, job loss, divorce and other individual-specific characteristics.

Past Due, Special Mention, Classified and Nonaccrual Loans. The Company classifies its loans of concern into three categories: past due loans, special mention loans and classified loans (both accruing and non-accruing interest).

When management determines that a loan is no longer performing and that collection of interest appears doubtful, the loan is placed on nonaccrual status. All loans that are 90 days past due are considered nonaccrual unless they are adequately secured and there is reasonable assurance of full collection of principal and interest. Management

closely monitors all loans that are contractually 90 days past due, treated as “special mention” or otherwise classified or on nonaccrual status. Nonaccrual loans that are 120 days past due without assurance of repayment are charged off against the allowance for loan losses.

The Company may elect to formally restructure a loan due to the weakening credit status of a borrower so that the restructuring may facilitate a repayment plan that minimizes the potential losses that the Company may have to otherwise incur. At December 31, 2010 and 2009, the Company had \$49,537 and \$16,061 of restructured loans of which \$9,597 and \$4,429 were classified as non-accrual and the remaining were performing.

The following table sets forth information with respect to the Company’s nonperforming assets at the dates indicated.

	At December 31,				
	2010	2009	2008	2007	2006
Loans accounted for on a non-accrual basis	\$ 143,707	\$ 75,411	\$ 30,926	\$ 32,060	\$ 3,479
Accruing loans which are contractually past due 90 days or more as to interest or principal payments.....	<u>2,112</u>	<u>147</u>	<u>509</u>	<u>18</u>	<u>28</u>
Total non-performing loans	145,819	75,558	31,435	32,078	3,507
Real estate owned:					
Foreclosures.....	59,965	56,952	44,964	4,401	1,445
Other real estate held and repossessed assets	<u>130</u>	<u>216</u>	<u>407</u>	<u>458</u>	<u>243</u>
Total non-performing assets	<u>\$ 205,914</u>	<u>\$ 132,726</u>	<u>\$ 76,806</u>	<u>\$ 36,937</u>	<u>\$ 5,195</u>
Restructured loans not included above	<u>\$ 39,940</u>	<u>\$ 11,632</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>

Total non-performing assets increased by \$73,188 from December 31, 2009 to December 31, 2010. This increase was principally driven by deterioration in the economy during 2010 which was reflected principally in the Company’s residential real estate construction and development portfolio. In 2010, the Company devoted significant attention to our asset quality issues, including having segregated these assets within our Special Assets Group so that we may diligently work through the resolution of each on an asset-by-asset basis. The Special Assets Group meets monthly to discuss the performance of the portfolio and specific relationships with emphasis on the underperforming assets. The Special Assets Group is responsible for the resolution of problem credits by creating action plans, which could include foreclosure, restructuring the loan, issuing demand letters or other actions. If nonaccrual loans at December 31, 2010 had been current according to their original terms and had been outstanding throughout 2010, or since origination if originated during the year, interest income on these loans in 2010 would have been approximately \$5,948. Interest actually recognized on these loans during 2010 was \$4,843. Interest income not recognized on restructured loans was not significant for 2010.

OREO increased by \$2,927 from December 31, 2009 to December 31, 2010. The real estate consists of 122 properties, of which 49 are 1-4 family residential properties with a carrying value of \$3,966; 38 are construction development of 1-4 residential properties with a carrying value of \$37,481; two are multi-family residential properties with a carrying value of \$648; four are parcels of commercial vacant land with a carrying value of \$3,192; 23 are vacant 1-4 family residential lots with a carrying value of \$7,038; five are commercial buildings with a carrying value of \$5,321; and one is a commercial construction project with a carrying value of \$2,318. Management has recorded these properties at estimated fair market value, based on current appraisals, less estimated selling costs. Other repossessed assets decreased from \$216 at December 31, 2009 to \$130 at December 31, 2010. The decrease is due primarily to the disposition of repossessed automobiles at one of the Company’s subsidiaries.

The recorded investment of impaired loans, defined under Accounting Standards Codification (“ASC”) Topic ASC 310 as loans which, based upon current information and events, it is considered probable that the Company will be unable to collect all amounts of contractual interest and principal as scheduled in the loan agreement, increased by \$70,753 from \$115,238 at December 31, 2009 to \$185,991 at December 31, 2010. The related allowance on the recorded investment of impaired loans also increased by \$19,097 from \$5,737 at

December 31, 2009 to \$24,834 at December 31, 2010. Under accounting guidance for impaired loans, the impairment is probable if the future events indicate that the Bank will not collect principal and interest in accordance with contractual terms. Impaired loans are included in non-performing loans. This increase is primarily attributable to the continued deterioration throughout 2010 in residential real estate construction loans located in the Company's urban markets. The recorded investment of impaired loans of \$185,991 at December 31, 2010 and \$115,238 at December 31, 2009 are net of balances previously charged-off of \$36,574 and \$27,937 respectively.

Allowance for Loan Losses. The allowance for loan losses is maintained at a level which management believes is adequate to absorb all probable losses on loans then present in the loan portfolio. The amount of the allowance is affected by: (1) loan charge-offs, which decrease the allowance; (2) recoveries on loans previously charged-off, which increase the allowance; and (3) the provision for possible loan losses charged against income, which increases the allowance. In determining the provision for possible loan losses, it is necessary for management to monitor fluctuations in the allowance resulting from actual charge-offs and recoveries, and to periodically review the size and composition of the loan portfolio in light of current and anticipated economic conditions, including residential real estate prices and transaction volume in the Company's market areas, in an effort to evaluate portfolio risks. In evaluating residential real estate market conditions, the Company's internal policies require new appraisals on adversely rated collateral dependent loans to be obtained at least annually. On a quarterly basis, the Company receives a written report from an independent nationally recognized organization which provides updated valuation trends, by price point and by zip code, for each of the major markets in which the Company is conducting business. The information is then used in the Company's impairment analysis of collateral dependent loans. If actual losses exceed the amount of the allowance for loan losses, earnings of the Company could be adversely affected. The amount of the provision is based on management's judgment of those risks. During the year ended December 31, 2010, the Company's provision for loan losses increased by \$20,861 to \$71,107 from \$50,246 for the year ended December 31, 2009 and the allowance for loan losses increased by \$16,669 to \$66,830 at December 31, 2010 from \$50,161 at December 31, 2009.

The elevated allowance for loan losses was attributable primarily to continuing weakened economic conditions experienced in the Company's urban markets, principally the Nashville and Knoxville markets, beginning in the fourth quarter of 2007 and continuing through 2010, accompanied by deteriorating credit quality associated primarily with residential real estate construction and development loans in these markets. The allowance for loan losses as a percentage of total loans was 3.83% at the end of 2010 versus 2.45% at December 31, 2009. The loan loss reserves reflected the higher level of non-performing banking assets, and losses inherent in this segment of the Company's business, as noted in Notes 3 and 17 of Notes to Consolidated Financial Statements. Although Management believes that the allowance for loan losses is adequate to cover estimated losses inherent in the portfolio, there can be no assurances that additional reserves may not be required in the future.

The following is a summary of activity in the allowance for loan losses for the periods indicated:

	Year Ended December 31,				
	2010	2009	2008	2007	2006
Balance at beginning of year.....	\$ 50,161	\$ 48,811	\$ 34,111	\$ 22,302	\$ 19,739

Investment Activities

General. The Company maintains a portfolio of investments for general liquidity purposes and to cover minimum pledging requirements for municipal deposits and borrowings.

Securities by Category. The following table sets forth the carrying value of the securities, by major categories, held by the Company at December 31, 2010, 2009 and 2008:

	At December 31,		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
Securities Held to Maturity:			
State and political subdivisions	\$ 215	\$ 251	\$ 404
Other securities	<u>250</u>	<u>375</u>	<u>253</u>
Total	<u>\$ 465</u>	<u>\$ 626</u>	<u>\$ 657</u>
Securities Available for Sale:			
U.S. government agencies	\$ 83,299	\$ 52,048	\$ 98,806
State and political subdivisions	31,501	32,192	31,804
Collateralized mortgage obligations.....	67,575	44,677	68,373
Mortgage-backed securities.....	17,964	16,892	2,086
Trust preferred securities.....	<u>1,663</u>	<u>1,915</u>	<u>2,493</u>
Total	<u>\$ 202,002</u>	<u>\$ 147,724</u>	<u>\$ 203,562</u>

Maturity Distributions of Securities. The following table sets forth the distributions of maturities of securities at amortized cost as of December 31, 2010:

	<u>Due in One Year or Less</u>	<u>Due After One Year through Five Years</u>	<u>Due After Five Years through 10 Years</u>	<u>Due After 10 Years</u>	<u>Total</u>
Securities Held to Maturity:					
State and political subdivisions	\$ 215	\$ —	\$ —	\$ —	\$ 215
Other securities.....	250	—	—	—	250
Securities Available for Sale:					
U.S. government agencies	—	—	39,004	45,102	84,106
State and political subdivisions	1,005	4,067	21,986	4,133	31,191
Collateralized mortgage obligations	—	651	1,584	63,809	66,044
Mortgage-backed securities.....	—	5,989	4,012	7,167	17,168
Trust preferred securities.....	<u>—</u>	<u>—</u>	<u>—</u>	<u>1,850</u>	<u>1,850</u>
Subtotal.....	\$ 1,470	\$ 10,707	\$ 66,586	\$ 122,061	\$ 200,824
Market value adjustment on available for sale securities	<u>3</u>	<u>535</u>	<u>554</u>	<u>553</u>	<u>1,645</u>
Total.....	<u>\$ 1,473</u>	<u>\$ 11,242</u>	<u>\$ 67,140</u>	<u>\$ 122,614</u>	<u>\$ 202,469</u>
Weighted average yield (a)	<u>7.08%</u>	<u>4.83%</u>	<u>3.94%</u>	<u>3.44%</u>	<u>3.75%</u>

(a) Weighted average yields on tax-exempt obligations have been computed on a fully taxable-equivalent basis using a tax rate of 35%.

Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Deposits

Deposits are the primary source of funds for the Company. Such deposits consist of noninterest bearing and interest-bearing demand deposit accounts, regular savings deposits, Money Market accounts and market rate certificates of deposit. Deposits are attracted from individuals, partnerships and corporations in the Company's market areas. In addition, the Company obtains deposits from state and local entities and, to a lesser extent, U.S. Government and other depository institutions. The Company's Asset/Liability Management Policy permits the acceptance of limited amounts of brokered deposits. At December 31, 2010 the percentage of the Company's brokered deposits to total deposits was 0.07%, which was within the limits of the Asset/Liability Management Policy. The Company's brokered deposits were also within the limits of the Asset/Liability Management Policy at December 31, 2009 and 2008, respectively.

The following table sets forth the average balances and average interest rates based on daily balances for deposits for the periods indicated:

	Year Ended December 31,					
	2010		2009		2008	
	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid	Average Balance	Average Rate Paid
Types of deposits (all in domestic offices):						
Noninterest bearing demand deposits....	\$ 166,814	—	\$ 162,765	—	\$ 187,058	—
Interest-bearing demand deposits	881,978	1.01%	700,586	1.30%	577,024	1.57%
Savings deposits	98,900	1.02%	83,549	1.13%	68,612	.77%
Time deposits	<u>841,458</u>	2.20%	<u>1,166,640</u>	3.06%	<u>1,317,362</u>	3.68%
Total deposits	<u>\$1,989,150</u>		<u>\$2,113,540</u>		<u>\$2,150,056</u>	

The following table indicates the amount of the Company's certificates of deposit and brokered certificates of deposit of \$100 or more by time remaining until maturity as of December 31, 2010:

Maturity Period	Certificates of Deposits
Three months or less	\$ 41,190
Over three through six months	43,741
Over six through twelve months	112,097
Over twelve months	<u>112,673</u>
Total	<u>\$309,701</u>

Competition

The Company seeks to compete effectively through its reliance on local commercial activity; personal contacts by its directors, officers, other employees and shareholders; personalized services; and its reputation in the communities it serves.

According to data as of June 30, 2010 published by SNL Financial LC and using information from the FDIC, the Bank ranked as the largest independent commercial bank headquartered in East Tennessee, and its major market areas include Greene, Blount, Davidson, Hamblen, Hawkins, Knox, Lawrence, Loudon, Macon, McMinn, Montgomery, Rutherford, Smith, Sullivan, Sumner, Washington and Williamson Counties, Tennessee and portions of Cocke and Monroe Counties, Tennessee. In Greene County, in which the Company enjoyed its largest deposit share as of June 30, 2010, there were seven commercial banks and one savings bank, operating 26 branches and holding an aggregate of approximately \$1.0 billion in deposits as of June 30, 2010. The following table sets forth the Bank's deposit share, excluding credit unions, in each county in which it has a full-service branch(s) as of June 30, 2010, according to data published by the FDIC:

<u>County</u>	<u>Deposit Share</u>
Greene, TN	28.72%
Hawkins, TN	19.36%
Lawrence, TN	17.53%
Smith, TN	10.58%
Sumner, TN	10.12%
Hamblen, TN	8.78%
Blount, TN	8.15%
Cocke, TN	8.15%
Macon, TN	7.10%
Madison, NC	6.66%
Montgomery, TN	6.36%
Loudon, TN	6.00%
Washington, TN	5.91%
McMinn, TN	5.63%
Bristol, VA ¹	4.39%
Sullivan, TN	2.82%
Williamson, TN	2.80%
Rutherford, TN	2.62%
Monroe, TN	1.49%
Knox, TN	0.82%
Davidson, TN	0.79%

¹ Bristol, VA is deemed a city.

Employees

As of December 31, 2010 the Company employed 730 full-time equivalent employees. None of the Company's employees are presently represented by a union or covered under a collective bargaining agreement. Management considers relations with employees to be good.

Regulation, Supervision and Governmental Policy

The following is a brief summary of certain statutes, rules and regulations affecting the Company and the Bank. A number of other statutes and regulations have an impact on their operations. These laws and regulations are generally intended to protect depositors and borrowers, not shareholders. The following discussion describes the material elements of the regulatory framework that currently apply. In July 2010, the Dodd-Frank Act was signed into law, incorporating numerous financial institution regulatory reforms. Many of these reforms will be implemented over the course of 2011 through regulations to be adopted by various federal banking and securities regulations. The following summary of applicable statutes and regulations does not purport to be complete and is qualified in its entirety by reference to such statutes and regulations.

The Dodd-Frank Wall Street Reform and Consumer Protection Act

On July 21, 2010, the Dodd-Frank Act was signed into law. The Dodd-Frank Act implements far-reaching reforms of major elements of the financial landscape, particularly for larger financial institutions. Many of its most far-reaching provisions do not directly impact community-based institutions like the Company. For instance, provisions that regulate derivative transactions and limit derivatives trading activity of federally-insured institutions, enhance supervision of “systemically significant” institutions, impose new regulatory authority over hedge funds, limit proprietary trading by banks, and phase-out the eligibility of trust preferred securities for Tier 1 capital are among the provisions that do not directly impact the Company either because of exemptions for institutions below a certain asset size or because of the nature of the Company’s operations. Those provisions that will impact the Company include the following:

- Changing the assessment base for federal deposit insurance from the amount of insured deposits to consolidated assets less tangible capital, eliminating the ceiling and increasing the size of the floor of the DIF, and offsetting the impact of the increase in the minimum floor on institutions with less than \$10 billion in assets;
- Making permanent the \$250,000 limit for federal deposit insurance, increasing the cash limit of Securities Investor Protection Corporation protection to \$250,000 and providing unlimited federal deposit insurance until December 31, 2012 for non-interest bearing demand transaction accounts at all insured depository institutions;
- Repealing the federal prohibition on payment of interest on demand deposits, thereby permitting depositing institutions to pay interest on business transaction and other accounts;
- Centralizing responsibility for consumer financial protection by creating a new agency, the Consumer Financial Protection Bureau, responsible for implementing federal consumer protection laws, although banks below \$10 billion in assets will continue to be examined and supervised for compliance with these laws by their federal banking regulator;
- Restricting the preemption of state law by federal law and disallowing national bank subsidiaries from availing themselves of such preemption;
- Imposing new requirements for mortgage lending, including new minimum underwriting standards, prohibitions on certain yield-spread compensation to mortgage originators, special consumer protections for mortgage loans that do not meet certain provision qualifications, prohibitions and limitations on certain mortgage terms and various new mandated disclosures to mortgage borrowers;
- Applying the same leverage and risk based capital requirements that apply to insured depository institutions to holding companies, although the Company’s currently outstanding subordinated debentures (but not new issuances) will continue to qualify as Tier 1 capital, subject to existing limitations on the amount that may so qualify;
- Permitting national and state banks to establish de novo interstate branches at any location where a bank based in that state could establish a branch, and requiring that bank holding companies and banks be well capitalized and well managed in order to acquire banks located outside their home state;

- Imposing new limits on affiliated transactions and causing derivative transactions to be subject to lending limits; and
- Implementing corporate governance revisions, including with regard to executive compensation and proxy access to shareholders, that apply to all public companies not just financial institutions.

Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, and their impact on the Company or the financial industry is difficult to predict before such regulations are adopted.

Bank Holding Company Regulation. The Company is registered as a bank holding company under the Bank Holding Company Act (the “Holding Company Act”) and, as such, is subject to supervision, regulation and examination by the Board of Governors of the FRB.

Acquisitions and Mergers. Under the Holding Company Act, a bank holding company must obtain the prior approval of the FRB before (1) acquiring direct or indirect ownership or control of any voting shares of any bank or bank holding company if, after such acquisition, the bank holding company would directly or indirectly own or control more than 5% of such shares; (2) acquiring all or substantially all of the assets of another bank or bank holding company; or (3) merging or consolidating with another bank holding company. Also, any company must obtain approval of the FRB prior to acquiring control of the Company or the Bank. For purposes of the Holding Company Act, “control” is defined as ownership of more than 25% of any class of voting securities of a bank holding company or bank, the ability to control the election of a majority of the directors, or the exercise of a controlling influence over management or policies of the a bank holding company or bank. Control is rebuttably presumed to exist if a person or company acquires 10% or more, but less than 25%, of any class of voting securities and either:

- The bank holding company has registered securities under Section 12 of the Securities Exchange Act of 1934; or
- No other person owns a greater percentage of that class of voting securities immediately after the transaction.

Our common stock is registered under Section 12 of the Securities Exchange Act of 1934. The regulations provide a procedure for challenge of the rebuttable control presumption.

The Change in Bank Control Act and the related regulations of the FRB require any person or persons acting in concert (except for companies required to make application under the Holding Company Act), to file a written notice with the FRB before such person or persons may acquire control of a bank holding company or bank. The Change in Bank Control Act defines “control” as the power, directly or indirectly, to vote 25% or more of any voting securities or to direct the management or policies of a bank holding company or an insured bank.

Bank holding companies like the Company are currently prohibited from engaging in activities other than banking and activities so closely related to banking or managing or controlling banks as to be a proper incident thereto. The FRB’s regulations contain a list of permissible nonbanking activities that are closely related to banking or managing or controlling banks. A bank holding company must file an application or notice with the FRB prior to acquiring more than 5% of the voting shares of a company engaged in such activities. The Gramm-Leach-Bliley Act of 1999 (the “GLB Act”), however, greatly broadened the scope of activities permissible for bank holding companies. The GLB Act permits bank holding companies, upon election and classification as financial holding companies, to engage in a broad variety of activities “financial” in nature. The Company has not filed an election with the FRB to be a financial holding company, but may choose to do so in the future.

Capital Requirements. The Company is also subject to FRB guidelines that require bank holding companies to maintain specified minimum ratios of capital to total assets and capital to risk-weighted assets. The Dodd-Frank Act extended additional capital requirements to bank holding companies on a consolidated basis. See “Capital Requirements.”

Dividends. The FRB has the power to prohibit dividends by bank holding companies if their actions constitute unsafe or unsound practices. The FRB has issued a policy statement expressing its view that a bank holding company should pay cash dividends only to the extent that the company’s net income for the past year is

sufficient to cover both the cash dividends and a rate of earnings retention that is consistent with the company's capital needs, asset quality, and overall financial condition.

The Company is a legal entity separate and distinct from the Bank. Over time, the principal source of the Company's cash flow, including cash flow to pay interest to its holders of trust preferred securities and dividends to holders of the Series A preferred stock the Company issued to the U.S. Treasury in connection with the Capital Purchase Program ("CPP") and to the Company's common stock shareholders, will be dividends that the Bank pays to the Company as its sole shareholder. Under Tennessee law, the Company is not permitted to pay dividends if, after giving effect to such payment, the Company would not be able to pay its debts as they become due in the normal course of business or the Company's total assets would be less than the sum of its total liabilities plus any amounts needed to satisfy any preferential rights if the Company were dissolving. In addition, in deciding whether or not to declare a dividend of any particular size, the Company's board of directors must consider the Company's current and prospective capital, liquidity, and other needs.

In addition to the limitations on the Company's ability to pay dividends under Tennessee law, the Company's ability to pay dividends on its common stock is also limited by the Company's participation in the CPP, by certain statutory or regulatory limitations and by an informal commitment the Company has made to the FRB-Atlanta that it will not pay dividends on its common or preferred stock (or interest on its subordinated debentures) without the prior approval of the FRB-Atlanta. The Company also informally committed to the FRB-Atlanta that it will not incur any indebtedness or repurchase any shares of its capital stock without the prior approval of the FRB-Atlanta. Prior to December 23, 2011, unless the Company has redeemed the Series A preferred stock issued to the U.S. Treasury in the CPP or the U.S. Treasury has transferred the Series A preferred stock to a third party, the consent of the U.S. Treasury must be received before the Company can declare or pay any dividend or make any distribution on the Company's common stock in excess of \$0.13 per quarter. Furthermore, if the Company is not current in the payment of quarterly dividends on the Series A preferred stock, it cannot pay dividends on its common stock. These dividend restrictions resulting from the Company's participation in the CPP are in addition to those resulting from the Company's informal commitment to the FRB-Atlanta.

Statutory and regulatory limitations also apply to the Bank's payment of dividends to the Company. Under Tennessee law, the Bank can only pay dividends to the Company in an amount equal to or less than the total amount of its net income for that year combined with retained net income for the preceding two years. Payment of dividends in excess of this amount requires the consent of the Commissioner of the TDFI (the "Commissioner"). Because the Bank incurred a loss in both 2010 and 2009, dividends from the Bank to the Company, including, if necessary, dividends to support the Company's payment of interest on its subordinated debt and dividends on the Series A preferred stock it sold to the U.S. Treasury will require prior approval by the Commissioner.

The payment of dividends by the Bank and the Company may also be affected by other factors, such as the requirement to maintain adequate capital above regulatory guidelines. The federal banking agencies have indicated that paying dividends that deplete a depository institution's capital base to an inadequate level would be an unsafe and unsound banking practice. Under the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), a depository institution may not pay any dividend if payment would cause it to become undercapitalized or if it already is undercapitalized. Moreover, the federal agencies have issued policy statements that provide that bank holding companies and insured banks should generally only pay dividends out of current operating earnings. Recent supervisory guidance from the FRB indicates that bank holding companies that are participants in the CPP that are experiencing financial difficulty generally should eliminate, reduce or defer dividends on Tier 1 capital instruments including trust preferred securities, preferred stock or common stock, if the holding company needs to conserve capital for safe and sound operation and to serve as a source of strength to its subsidiaries.

On November 9, 2010, following consultation with the FRB-Atlanta, the Company notified the U.S. Treasury that the Company was suspending the payment of regular quarterly cash dividends on the Series A preferred stock issued to the U.S. Treasury. The dividends, which are cumulative, will continue to be reported as a preferred dividend requirement that is deducted from net income for financial statement purposes. Additionally, following consultation with the FRB-Atlanta, the Company has exercised its rights to defer regularly scheduled interest payments on all of its issues of junior subordinated notes having an outstanding principal amount of \$88.6 million, relating to outstanding trust preferred securities ("TRUPS"). Under the terms of the trust documents, the Company

may defer payments of interest for up to 20 consecutive quarterly periods without triggering an event of default. During a deferral period, the Company may not pay dividends on its common or preferred stock or interest on indebtedness that ranks *pari passu* or junior to the subordinated debentures. The regular scheduled interest payments will continue to be accrued for payment in the future and reported as an expense for financial statement purposes. Together, the deferral of interest payments on TRUPs and suspension of dividend payments to the U.S. Treasury will preserve about \$5.1 million per year in cash flow.

Support of Banking Subsidiaries. Under the Dodd-Frank Act, and previously under FRB policy, the Company is expected to act as a source of financial strength to the Bank and, where required, to commit resources to support the Bank. This support can be required at times when it would not be in the best interest of the Company's shareholders or creditors to provide it. Further, if the Bank's capital levels were to fall below minimum regulatory guidelines, the Bank would need to develop a capital plan to increase its capital levels and the Company would be required to guarantee the Bank's compliance with the capital plan in order for such plan to be accepted by the federal regulatory authority. In the event of the Company's bankruptcy, any commitment by the Company to a federal bank regulatory agency to maintain the capital of the Bank would be assumed by the bankruptcy trustee and entitled to a priority of payment.

Under the "cross guarantee" provisions of the Federal Deposit Insurance Act (the "FDI Act"), any FDIC-insured subsidiary of the Company such as the Bank could be liable for any loss incurred by, or reasonably expected to be incurred by, the FDIC in connection with (i) the default of any other FDIC-insured subsidiary also controlled by the Company or (ii) any assistance provided by the FDIC to any FDIC-insured subsidiary of the Company in danger of default.

Transactions with Affiliates. The Federal Reserve Act, as amended by Regulation W, imposes legal restrictions on the quality and amount of credit that a bank holding company or its non-bank subsidiaries ("affiliates") may obtain from bank subsidiaries of the holding company. For instance, these restrictions generally require that any such extensions of credit by a bank to its affiliates be on non-preferential terms and be secured by designated amounts of specified collateral. Further, a bank's ability to lend to its affiliates is limited to 10% per affiliate (20% in the aggregate to all affiliates) of the bank's capital and surplus.

Bank Regulation. As a federally-insured, Tennessee banking institution, the Bank is subject to regulation, supervision and regular examination by the TDFI and the FDIC. Tennessee and federal banking laws and regulations control, among other things, required reserves, investments, loans, mergers and consolidations, issuance of securities, payment of dividends, and establishment of branches and other aspects of the Bank's operations. Supervision, regulation and examination of the Company and the Bank by the bank regulatory agencies are intended primarily for the protection of depositors rather than for the Company's security holders.

Extensions of Credit. Under joint regulations of the federal banking agencies, including the FDIC, banks must adopt and maintain written policies that establish appropriate limits and standards for extensions of credit that are secured by liens or interests in real estate or are made for the purpose of financing permanent improvements to real estate. These policies must establish loan portfolio diversification standards, prudent underwriting standards, including loan-to-value limits that are clear and measurable, loan administration procedures and documentation, approval and reporting requirements. A bank's real estate lending policy must reflect consideration of the Interagency Guidelines for Real Estate Lending Policies (the "Interagency Guidelines") that have been adopted by the federal banking regulators. The Interagency Guidelines, among other things, call upon depository institutions to establish internal loan-to-value limits for real estate loans that are not in excess of the loan-to-value limits specified in the Interagency Guidelines for the various types of real estate loans. The Interagency Guidelines state that it may be appropriate in individual cases to originate or purchase loans with loan-to-value ratios in excess of the supervisory loan-to-value limits. The aggregate amount of loans in excess of the supervisory loan-to-value limits, however, should not exceed 100% of total capital, and the total of such loans secured by commercial, agricultural, multifamily and other non-one-to-four family residential properties should not exceed 30% of total capital.

Federal Deposit Insurance. The deposits of the Bank are insured by the FDIC to the maximum extent provided by law, and the Bank is subject to FDIC deposit insurance assessments. The FDIC has adopted a risk-based

assessment system for insured depository institutions that takes into account the risks attributable to different categories and concentrations of assets and liabilities. In early 2006, Congress passed the Federal Deposit Insurance Reform Act of 2005, which made certain changes to the Federal deposit insurance program. These changes included merging the Bank Insurance Fund and the Savings Association Insurance Fund, increasing retirement account coverage to \$250,000 and providing for inflationary adjustments to general coverage beginning in 2010, providing the FDIC with authority to set the fund's reserve ratio within a specified range, and requiring dividends to banks if the reserve ratio exceeds certain levels. The statute grants banks an assessment credit based on their share of the assessment base on December 31, 1996, and the amount of the credit can be used to reduce assessments in any year subject to certain limitations.

Under the Dodd-Frank Act, the FDIC was required to adopt regulations that would base deposit insurance assessments on total assets less capital rather than deposit liabilities and to include off-balance sheet liabilities of institutions and their affiliates in risk-based assessments.

The Emergency Economic Stabilization Act of 2008 ("EESA") provided for a temporary increase in the basic limit on federal deposit insurance coverage from \$100,000 to \$250,000 per depositor. This increased level of basic deposit insurance was made permanent by the Dodd-Frank Act. In addition, on October 14, 2008, the FDIC instituted temporary unlimited FDIC coverage of non-interest bearing deposit transaction accounts. Following passage of the Dodd-Frank Act, an institution can provide full coverage on non-interest bearing transaction accounts until December 31, 2012. The Dodd-Frank Act also repealed the prohibition on paying interest on demand transaction accounts, but did not extend unlimited insurance protection for these accounts.

The FDIC may terminate its insurance of deposits if it finds that the institution has engaged in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations, or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC.

Safety and Soundness Standards. The FDICIA required the federal bank regulatory agencies to prescribe, by regulation, non-capital safety and soundness standards for all insured depository institutions and depository institution holding companies. The FDIC and the other federal banking agencies have adopted guidelines prescribing safety and soundness standards pursuant to FDICIA. The safety and soundness guidelines establish general standards relating to internal controls and information systems, internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, and compensation, fees and benefits. Among other things, the guidelines require banks to maintain appropriate systems and practices to identify and manage risks and exposures identified in the guidelines.

Participation in the Capital Purchase Program of the Troubled Asset Relief Program. On October 3, 2008, the EESA became law. Under the Troubled Asset Relief Program ("TARP") authorized by EESA, the U.S. Treasury established the CPP providing for the purchase of senior preferred shares of qualifying U.S. controlled banks, savings associations and certain bank and savings and loan holding companies. On December 23, 2008, the Company sold 72,278 shares of Series A preferred stock and warrants to acquire 635,504 shares of common stock to the U.S. Treasury pursuant to the CPP for aggregate consideration of \$83 million. As a result of the Company's participation in the CPP, the Company agreed to certain limitations on executive compensation. On February 17, 2009, President Obama signed into law The American Recovery and Reinvestment Act of 2009 ("ARRA"), more commonly known as the economic stimulus or economic recovery package. ARRA, which amends EESA, includes a wide variety of programs intended to stimulate the economy and provide for extensive infrastructure, energy, health, and education needs. Under ARRA, the Company is subject to additional and more extensive executive compensation limitations and corporate governance requirements. ARRA also permits the Company to redeem the preferred shares it sold to the U.S. Treasury without penalty and without the need to raise new capital, subject to the U.S. Treasury's consultation with the Company's and the Bank's appropriate regulatory agency.

For as long as the U.S. Treasury owns any debt or equity securities of the Company issued in connection with the CPP, the Company will be required to take all necessary action to ensure that its benefit plans with respect to its senior executive officers comply in all respects with Section 111(b) of the EESA, as amended by the ARRA, and the regulations issued and in effect thereunder, including the interim final rule related to executive compensation and corporate governance issued by the U.S. Treasury on June 15, 2009 (the "IFR"). This means that, among other things, while the U.S. Treasury owns debt or equity securities issued by the Company in connection with the CPP, the Company must:

- Ensure that the incentive compensation programs for its senior executive officers do not encourage unnecessary and excessive risks that threaten the value of the Company;
- Implement a required clawback of any bonus or incentive compensation paid to the Company's senior executive officers and the next twenty most highly compensated employees based on materially inaccurate financial statements or any other materially inaccurate performance metric;
- Not make any bonus, incentive or retention payment to any of the Company's five most highly compensated employees, except as permitted under the IFR;
- Not make any "golden parachute payment" (as defined in the IFR) to any of the Company's senior executive officers or next five most highly compensated employees; and
- Agree not to deduct for tax purposes executive compensation in excess of \$500,000 in any one fiscal year for each of the Company's senior executive officers.

Capital Requirements. Both the Company and the Bank are required to comply with the capital adequacy standards established by the FRB, in the Company's case, and the FDIC, in the case of the Bank. The FRB has established a risk-based and a leverage measure of capital adequacy for bank holding companies, like the Company. The Bank is also subject to risk-based and leverage capital requirements adopted by the FDIC, which are substantially similar to those adopted by the FRB for bank holding companies. In addition, the FDIC and TDFI may require state banks that are not members of the FRB, like the Bank, to maintain capital at levels higher than those required by general regulatory requirements.

The risk-based capital standards are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks and bank holding companies, to account for off-balance-sheet exposure, and to minimize disincentives for holding liquid assets. Assets and off-balance-sheet items, such as letters of credit and unfunded loan commitments, are assigned to broad risk categories, each with appropriate risk weights. The resulting capital ratios represent capital as a percentage of total risk-weighted assets and off-balance-sheet items.

The minimum statutory guideline for the ratio of total capital to risk-weighted assets is 8%. Total capital consists of two components, Tier 1 capital and Tier 2 capital. Tier 1 capital generally consists of common stock, minority interests in the equity accounts of consolidated subsidiaries, noncumulative perpetual preferred stock, and a limited amount of cumulative perpetual preferred stock, less goodwill and other specified intangible assets. The Series A preferred stock that the Company sold to the U.S. Treasury in connection with the CPP and the TRUPs each qualifies as Tier 1 capital, and as described below will continue to qualify as Tier 1 capital following passage of the Dodd-Frank Act. Under statutory guidelines, Tier 1 capital must equal at least 4% of risk-weighted assets. Tier 2 capital generally consists of subordinated debt, other preferred stock, and a limited amount of loan loss reserves. The total amount of Tier 2 capital is limited to 100% of Tier 1 capital.

In addition, the FRB has established minimum leverage ratio guidelines for bank holding companies. These guidelines provide for a minimum ratio of Tier 1 capital to average assets, less goodwill and other specified intangible assets, of 3% for bank holding companies that meet specified criteria, including having the highest regulatory rating and implementing the FRB's risk-based capital measure for market risk. All other bank holding companies generally are required to maintain a leverage ratio of at least 4%. The guidelines also provide that bank holding companies experiencing high internal growth or making acquisitions will be expected to maintain strong capital positions substantially above the minimum supervisory levels. Furthermore, the FRB has indicated that it will consider a bank holding company's Tier 1 capital leverage, after deducting all intangibles, and other indicators of capital strength in evaluating proposals for expansion or new activities.

In late 2010, the Basel Committee on Banking Supervision issued Basel III, a new capital framework for banks and bank holding companies. If implemented in the United States, Basel III will impose a stricter definition of capital, with more focus on common equity. At this time, the Company does not know whether Basel III will be implemented in the United States, and if so implemented whether it will be applicable to the Company and the Bank, because by its terms it is applicable only to internationally active banks. But, if Basel III is implemented in the United States and becomes applicable to the Company, the Company and the Bank would likely be subject to higher minimum capital ratios than those to which the Company and the Bank are currently subject.

Failure to meet statutorily mandated capital guidelines or more restrictive ratios separately established for a financial institution (like those that the Bank has informally agreed with the TDFI and FDIC that it will maintain) could subject a bank or bank holding company to a variety of enforcement remedies, including issuance of a capital directive, the termination of deposit insurance by the FDIC, a prohibition on accepting or renewing brokered deposits, limitations on the rates of interest that the institution may pay on its deposits and other restrictions on its business. As described above, significant additional restrictions can be imposed on FDIC-insured depository institutions that fail to meet applicable capital requirements.

Additionally, the Federal Deposit Insurance Corporation Improvement Act of 1991 establishes a system of prompt corrective action to resolve the problems of undercapitalized financial institutions. Under this system, the federal banking regulators have established five capital categories (well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized) into one of which all institutions are placed. Federal banking regulators are required to take various mandatory supervisory actions and are authorized to take other discretionary actions with respect to institutions in the three undercapitalized categories. The severity of the action depends upon the capital category in which the institution is placed. Generally, subject to a narrow exception, the banking regulator must appoint a receiver or conservator for an institution that is critically undercapitalized. The federal banking agencies have specified by regulation the relevant capital level for each category.

An institution that is categorized as undercapitalized, significantly undercapitalized, or critically undercapitalized is required to submit an acceptable capital restoration plan to its appropriate federal banking agency. A bank holding company must guarantee that a subsidiary depository institution meets its capital restoration plan, subject to various limitations. The controlling holding company's obligation to fund a capital restoration plan is limited to the lesser of 5% of an undercapitalized subsidiary's assets or the amount required to meet regulatory capital requirements. An undercapitalized institution is also generally prohibited from increasing its average total assets, making acquisitions, establishing any branches or engaging in any new line of business, except under an accepted capital restoration plan or with FDIC approval. The regulations also establish procedures for downgrading an institution and a lower capital category based on supervisory factors other than capital. As of December 31, 2010, the Bank would be considered "well capitalized" under the FDIC's prompt corrective action provisions; however, the Bank has informally committed to the TDFI and the FDIC that it will maintain a Tier 1 leverage ratio of not less than 10% and a Total risk-based capital ratio of not less than 14%. Because of the significant losses that the Bank incurred in the second half of 2010, the Bank's capital levels fell below these required minimum levels at December 31, 2010. At December 31, 2010, the Bank's Tier 1 leverage ratio was 8.88% and its ratio of Total capital to risk-weighted assets was 13.22%.

Because the Bank's capital levels at December 31, 2010 were below those that the Bank had informally committed to its primary regulators that it would maintain, the Bank was required to submit a Capital Action Plan to its primary regulators.

The Dodd-Frank Act contains a number of provisions dealing with capital adequacy of insured depository institutions and their holding companies, and for the most part will result in insured depository institutions and their holding companies being subject to more stringent capital requirements. Under the so-called Collins Amendment to the Dodd-Frank Act, federal regulators were directed to establish minimum leverage and risk-based capital requirements for, among other entities, banks and bank holding companies on a consolidated basis. These minimum requirements can't be less than the generally applicable leverage and risk-based capital requirements established for insured depository institutions nor quantitatively lower than the leverage and risk-based capital requirements established for insured depository institutions that were in effect as of the date that the Dodd-Frank Act was enacted. These requirements in effect create capital level floors for bank holding companies similar to those in place currently for insured depository institutions. The Collins Amendment also excludes trust preferred securities issued after May 19, 2010 from being included in Tier 1 capital unless the issuing company is a bank holding company with less than \$500 million in total assets. Trust preferred securities issued prior to that date will continue to count as Tier 1 capital for bank holding companies with less than \$15 billion in total assets, and such securities will be phased out of Tier 1 capital treatment for bank holding companies with over \$15 billion in total assets over a three-year period beginning in 2013. The Collins Amendment did not exclude preferred stock issued to the U.S. Treasury through the CPP from Tier 1 capital treatment. Accordingly, the Company's TRUPs and Series A preferred stock issued to the U.S. Treasury through the CPP will continue to qualify as Tier 1 capital.

More information concerning the Company's, and the Bank's, regulatory capital ratios at December 31, 2010 is included in Note 12 to the "Notes to Consolidated Financial Statements" included elsewhere in this Annual Report on Form 10-K.

Legislative, Legal and Regulatory Developments. The banking industry is generally subject to extensive regulatory oversight. The Company, as a publicly held bank holding company, and the Bank, as a state-chartered bank with deposits insured by the FDIC, are subject to a number of laws and regulations. Many of these laws and regulations have undergone significant change in recent years. In July 2010, the U.S. Congress passed, and President Obama signed into law, the Dodd-Frank Act, which includes significant consumer protection provisions related to residential mortgage loans that is likely to increase our regulatory compliance costs. These laws and regulations impose restrictions on activities, minimum capital requirements, lending and deposit restrictions and numerous other requirements. Future changes to these laws and regulations, and other new financial services laws and regulations, are likely and cannot be predicted with certainty. With the enactments of EESA, AARA and the Dodd-Frank Act and the significant amount of regulations that are to come from the passage of that legislation, the nature and extent of the future legislative and regulatory changes affecting financial institutions and the resulting impact on those institutions is very unpredictable at this time. The Dodd-Frank Act, in particular, will require that a significant number of new regulations be adopted by various financial regulatory agencies over 2011 and 2012.

USA Patriot Act. The President of the United States signed the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act (the "Patriot Act"), into law on October 26, 2001. The Patriot Act establishes a wide variety of new and enhanced ways of combating international terrorism. The provisions that affect banks (and other financial institutions) most directly are contained in Title III of the act. In general, Title III amended existing law - primarily the Bank Secrecy Act - to provide the Secretary of U.S. Treasury and other departments and agencies of the federal government with enhanced authority to identify, deter, and punish international money laundering and other crimes.

Among other things, the Patriot Act prohibits financial institutions from doing business with foreign "shell" banks and requires increased due diligence for private banking transactions and correspondent accounts for foreign banks. In addition, financial institutions will have to follow new minimum verification of identity standards for all new accounts and will be permitted to share information with law enforcement authorities under circumstances that were not previously permitted. These and other provisions of the Patriot Act became effective at varying times and the Treasury and various federal banking agencies are responsible for issuing regulations to implement the new law.

Additional Information

The Company maintains a website at www.greenbankusa.com and is not including the information contained on this website as a part of, or incorporating it by reference into, this Annual Report on Form 10-K. The Company makes available free of charge (other than an investor's own internet access charges) through its website its Annual Report on Form 10-K, quarterly reports on Form 10-Q, and current reports on Form 8-K, and amendments to these reports, as soon as reasonably practicable after the Company electronically files such material with, or furnishes such material to, the SEC.

ITEM 1A. RISK FACTORS.

Investing in our common stock involves various risks which are particular to our company, our industry and our market area. Several risk factors regarding investing in our common stock are discussed below. This listing should not be considered as all-inclusive. If any of the following risks were to occur, we may not be able to conduct our business as currently planned and our financial condition or operating results could be negatively impacted. These matters could cause the trading price of our common stock to decline in future periods.

We could sustain additional losses if our asset quality declines further.

Our earnings are affected by general economic conditions, economic conditions within our markets, loan concentrations and our ability to properly originate, underwrite and service loans. We could sustain additional losses if we incorrectly assess the creditworthiness of our borrowers or fail to detect or respond to deterioration in asset quality in a timely manner. Recent problems with asset quality, particularly within the commercial real estate segment of our loan portfolio, have caused, and could continue to cause, our interest income and net interest margin to decrease and our provisions for loan losses and noninterest expenses to increase, which could continue to adversely affect our results of operations and financial condition. Further increases in non-performing loans would reduce net interest income below levels that would exist if such loans were performing.

Our loan portfolio includes an elevated, although shrinking level, of residential construction and land development loans, which loans have a greater credit risk than residential mortgage loans.

The Company engages in both traditional single-family residential lending and residential construction and land development lending to developers. The percentage of speculative 1-4 family loans to developers plus construction and land development loans to developers in the Bank's portfolio was approximately 21.9% at December 31, 2010 compared to 31.1% of total loans at December 31, 2009. This type of lending is generally considered to have relatively high credit risks because the principal is concentrated in a limited number of loans with repayment dependent on the successful completion and operation of the related real estate project. Consequently, the credit quality of many of these loans have deteriorated as a result of the current adverse conditions in the real estate market within our markets. These loans are generally less predictable and more difficult to evaluate and monitor and collateral may be difficult to dispose of in a market decline. A continued reduction in residential real estate market prices and demand could result in further price reductions in home and land values adversely affecting the value of collateral securing the construction and development loans that we hold. These adverse economic and real estate market conditions may lead to further increases in non-performing loans and other real estate owned, increased losses and expenses from the management and disposition of non-performing assets, increases in provision for loan losses, and increases in operating expenses as a result of the allocation of management time and resources to the collection and work out of these loans, all of which would negatively impact our financial condition and results of operations.

Furthermore, during adverse general economic conditions, such as we believe are now being experienced in residential real estate construction nationwide, borrowers involved in the residential real estate construction and development business may suffer above normal financial strain. Throughout 2010, the number of newly constructed homes or lots sold in our market areas has continued to decline, but at a lesser rate than experienced in 2009, negatively affecting collateral values. As the residential real estate development and construction market in our markets has deteriorated, our borrowers in this segment have experienced difficulty repaying their obligations to us. As a result, our loans to these borrowers have deteriorated and may deteriorate further and may result in additional charge-offs negatively impacting our results of operations.

Additionally, to the extent repayment is dependent upon the sale of newly constructed homes or of lots, such sales are likely to be at lower prices or at a slower rate than as expected when the loan was made, which may result in such loans being placed on non-accrual status and subject to higher loss estimates even if the borrower keeps interest payments current. These adverse economic and real estate market conditions may lead to further increases in non-performing loans and other real estate owned, increased charge-offs from the disposition of non-performing assets, and increases in provision for loan losses, all of which would negatively impact our financial condition and results of operations.

Negative developments in the U.S. and local economy and in local real estate markets have adversely impacted our operations and results and may continue to adversely impact our results in the future.

Economic conditions in the markets in which we operate deteriorated significantly between early 2008 and the second half of 2010. As a result, we incurred significant losses in 2008, 2009 and 2010. These challenges resulted primarily from provisions for loan losses related to declining collateral values in our construction and development loan portfolio plus rising OREO related costs associated with the holding and disposition of these assets. Although the FRB has issued statements that economic data suggests strongly that the recession ended in the latter half of 2009, we believe that this difficult economic environment will continue at least into the second half of 2011, and we expect that

our results of operations will continue to be negatively impacted as a result. There can be no assurance that the economic conditions that have adversely affected the financial services industry, and the capital, credit and real estate markets generally or us in particular, will improve materially, or at all, in the near future, or thereafter, in which case we could continue to experience significant losses and write-downs of assets, and could face capital and liquidity constraints or other business challenges.

Negative developments in the financial services industry and U.S. and global credit markets may adversely impact our operations and results.

Negative developments beginning in 2008 and continuing into 2010 in the capital markets have resulted in uncertainty in the financial markets in general with the expectation of the general economic downturn continuing into 2011. Loan portfolio performances have deteriorated at many institutions resulting from, amongst other factors, a weak economy and a decline in the value of the collateral supporting their loans. The competition for our deposits has increased significantly due to liquidity concerns at many of these same institutions. Stock prices of bank holding companies have been negatively affected by the current condition of the financial markets, as has our ability, if needed, to raise capital at reasonable prices or borrow in the debt markets compared to recent years.

Our business is subject to the success of the local economies where we operate.

Our success significantly depends upon the growth in population, income levels, deposits, residential real estate stability and housing starts in our market areas. If the communities in which we operate do not grow or if prevailing economic conditions locally or nationally are unfavorable, our business may not succeed. Adverse economic conditions in our specific market areas could cause us to continue to experience negative, or limited, growth, affect the ability of our customers to repay their loans to us and generally affect our financial condition and results of operations. Moreover, we cannot give any assurance that we will benefit from any market growth or favorable economic conditions in our primary market areas if they do occur.

Continued adverse market or economic conditions in the state of Tennessee generally, and in our markets specifically, may increase the risk that our borrowers will be unable to timely make their loan payments. In addition, the market value of the real estate securing loans as collateral has been and may continue to be adversely affected by continued unfavorable changes in market and economic conditions. As of December 31, 2010, approximately 47% of our loans held for investment were secured by non-owner occupied commercial real estate. Of this amount, approximately 26% were speculative 1-4 residential construction and land development loans to developers, 21% were commercial construction and development loans and 53% were non-owner occupied commercial real estate loans. We experienced increased payment delinquencies with respect to these loans throughout 2009 and 2010 which negatively impacted our results of operations and a sustained period of increased payment delinquencies, foreclosures or losses caused by continuing adverse market or economic conditions in the state of Tennessee generally, and in our markets specifically, could adversely affect the value of our assets, revenues, results of operations and financial condition.

An inadequate allowance for loan losses would reduce our earnings.

The risk of credit losses on loans varies with, among other things, general economic conditions, the type of loan being made, the creditworthiness of the borrower over the term of the loan and, in the case of a collateralized loan, the value and marketability of the collateral for the loan. Management maintains an allowance for loan losses based upon, among other things, historical experience, an evaluation of economic conditions and regular reviews of delinquencies and loan portfolio quality. Based upon such factors, management makes various assumptions and judgments about the ultimate collectability of the loan portfolio and provides an allowance for loan losses based upon a percentage of the outstanding balances and takes a charge against earnings with respect to specific loans when their ultimate collectability is considered questionable.

If management's assumptions and judgments prove to be incorrect and the allowance for loan losses is inadequate to absorb losses, or if the bank regulatory authorities require us to increase our allowance for loan losses as

a part of their examination process additional provision expense would be incurred and our earnings and capital could be significantly and adversely affected. Moreover, additions to the allowance may be necessary based on changes in economic and real estate market conditions, new information regarding existing loans or borrowers, identification of additional problem loans and other factors, both within and outside of our management's control. These additions may require increased provision expense which would negatively impact our results of operations.

The Company's policy requires new appraisals on adversely rated collateral dependent loans to be obtained at least annually. On a quarterly basis, the Company receives a written report from an independent nationally recognized organization which provides updated valuation trends, by price point and by zip code, for each of the major markets in which the Company is conducting business. The information obtained is then used in the Company's impaired loan analysis of collateral dependent loans and potentially could impact the allowance for loan losses.

We, or our bank subsidiary, may become subject to supervisory actions and/or enhanced regulation that could have an additional material negative effect on our business, operating flexibility, financial condition and the value of our common stock. In addition, addressing regulatory concerns in this market environment will require significant time and attention from our management team, which may increase our costs, impede the efficiency of our internal business processes and adversely affect our profitability in the near-term.

Under federal and state laws and regulations pertaining to the safety and soundness of insured depository institutions, the FRB (for bank holding companies), the TDFI (for Tennessee-chartered banks) and, separately, the FDIC (as the insurer of bank deposits), have the authority to compel or restrict certain actions on our part, or the part of the Bank, if they determine that we, or the Bank, have insufficient capital or are otherwise operating in a manner that may be deemed to be inconsistent with safe and sound banking practices. Under this authority, our, and the Bank's regulators can require us to enter into informal or formal enforcement orders, including board resolutions, memoranda of understanding, written agreements and consent or cease and desist orders, pursuant to which we, or the Bank, would be required to take identified corrective actions to address cited concerns and to refrain from taking certain actions. For additional information relating to the extensive regulation, supervision and legislation that govern most aspects of our operations and limit the businesses in which we engage, please see "Regulation, Supervision and Governmental Policy" beginning on page 14.

In light of declining asset quality and earnings in 2010, the Bank informally committed to the TDFI and the FDIC that, among other things, it would maintain a Tier 1 leverage ratio of at least 10% and Total risk-based capital ratio of at least 14%, and the Company informally committed to the FRB-Atlanta that, among other things, we would not incur any additional indebtedness, pay dividends on our common or preferred stock or pay interest on our TRUPs, without, in each case, the prior approval of the FRB-Atlanta.

During the third quarter of 2010, the Bank was subject to a joint examination by the FDIC and the TDFI. Based on initial findings presented to the Bank's management, the Bank expects that either the FDIC or the TDFI or both will require the Bank to agree to certain improvements in its operations, particularly in relation to asset quality matters. We also believe that the Bank will be required to agree to maintain or increase capital to levels above those required to be considered well capitalized. We do not know at this time what minimum levels of capital the regulators will require. If the requirement to maintain higher capital levels than those required to be well capitalized under the prompt corrective action provisions of the FDICIA is contained in a formal enforcement action of the FDIC, the Bank may be subject to additional limitations on its operations including its ability to pay interest on deposits above proscribed rates, which could adversely affect the Bank's liquidity and/or operating results. The terms of any such supervisory action that goes beyond the steps we have already taken may have a significant negative effect on our business, operating flexibility, results of operations, financial condition and the value of our common stock.

If we, or our bank subsidiary, are unable to maintain capital levels above those that we, or the bank subsidiary, are required to maintain either as a result of federal regulations or as a result of commitments or agreements that we, or our bank subsidiary, have made to, or with, our regulators, we would likely need to raise additional capital, but that capital may not be available when it is needed.

We, and the Bank, are required by federal and state regulatory authorities to maintain adequate levels of capital to support our, and the Bank's, operations. In addition, the Bank has informally committed to the TDFI and the FDIC that it will maintain a Tier 1 leverage ratio of at least 10% and a Total risk-based capital ratio of at least 14%. At December 31, 2010, the Bank's Tier 1 leverage ratio and Total risk-based capital ratio were each below the levels that the Bank had committed to maintain and a Capital Action Plan was submitted to our regulators. At December 31, 2010, the Company did not have sufficient capital available to contribute to the Bank to aid the Bank in meeting its commitment. If the Bank is unable to generate sufficient earnings or reduce the size of its assets to achieve the capital levels that it has informally committed to maintain, the Company will likely have to raise additional capital and contribute that capital to the Bank. We can give you no assurance that we will be able to raise this additional capital on terms acceptable to us and given our current stock price and recent financial performance, it is likely that the price at which we could raise such capital, if at all, would result in significant dilution to our existing shareholders. Further, our ability to raise common equity is limited by the number of authorized, but unissued shares reserved under our charter. If we were to raise capital through a common stock offering, we would likely need to increase our authorized common stock, which would require approval of our shareholders. We cannot assure you that our shareholders would approve such a request.

Liquidity needs could adversely affect our results of operations and financial condition.

We rely on dividends from the Bank as our primary source of funds. The primary source of funds of the Bank, are customer deposits and loan repayments. While scheduled loan repayments are a relatively stable source of funds, they are subject to the ability of borrowers to repay the loans which may be more difficult in economically challenging environments like those currently being experienced. The ability of borrowers to repay loans can be adversely affected by a number of factors, including changes in economic conditions, adverse trends or events affecting business industry groups, reductions in real estate values or markets, business closings or lay-offs, inclement weather, natural disasters and international instability. Additionally, deposit levels may be affected by a number of factors, including rates paid by competitors, general interest rate levels, customer confidence levels and the Bank's financial strength, returns available to customers on alternative investments, our financial condition and general economic conditions. Accordingly, we may be required from time to time to rely on secondary sources of liquidity to meet withdrawal demands or otherwise fund operations. Such sources include FHLB advances and federal funds lines of credit from correspondent banks. While we believe that these sources are currently adequate, there can be no assurance they will be sufficient to meet future liquidity demands. We may be required to continue to reduce our asset size, slow or discontinue capital expenditures or other investments or liquidate assets should such sources not be adequate.

We rely on dividends from our bank subsidiary as our primary source of liquidity and payment of these dividends is limited under Tennessee law.

Under Tennessee law, the amount of dividends that may be declared by the Bank in a year without approval of the Commissioner is limited to net income for that year combined with retained net income for the two preceding years. Because of the losses incurred by the Bank in 2009 and 2010, dividends from the Bank to us, including, if necessary, dividends to support our payment of interest on our subordinated debt and dividends on our preferred stock, including the preferred stock we issued to the U.S. Treasury, would have required prior approval by the Commissioner. During the fourth quarter of 2010, we elected to defer the interest payments on our subordinated debt and dividends on the preferred stock that we issued to the U.S. Treasury as disclosed in our third quarter 2010 Form 10-Q.

Our ability to maintain required capital levels and adequate sources of funding and liquidity could be impacted by changes in the capital markets and deteriorating economic and market conditions.

We, and the Bank, are required to maintain certain capital levels established by banking regulations or specified by bank regulators or to which we have committed or agreed to maintain. We must also maintain adequate

funding sources in the normal course of business to support our operations and fund outstanding liabilities. Our ability to maintain capital levels, sources of funding and liquidity could be impacted by changes in the capital markets and deteriorating economic and market conditions. Failure by the Bank to meet applicable capital guidelines (including those higher levels that the Bank has committed, or may commit in the future, to maintain) or to satisfy certain other regulatory requirements could subject the Bank to a variety of enforcement remedies available to the federal regulatory authorities.

We have increased levels of other real estate, primarily as a result of foreclosures, and we anticipate higher levels of foreclosed real estate expense.

As we have begun to resolve non-performing real estate loans, we have increased the level of foreclosed properties primarily those acquired from builders and from residential land developers. Foreclosed real estate expense consists of three types of charges: maintenance costs, valuation adjustments due to new appraisal values and gains or losses on disposition. As levels of other real estate increase and also as local real estate values decline these charges will likely increase, negatively affecting our results of operations.

Environmental liability associated with commercial lending could result in losses.

In the course of business, the Bank may acquire, through foreclosure, properties securing loans it has originated or purchased which are in default. Particularly in commercial real estate lending, there is a risk that hazardous substances could be discovered on these properties. In this event, we, or the Bank, might be required to remove these substances from the affected properties at our sole cost and expense. The cost of this removal could substantially exceed the value of affected properties. We may not have adequate remedies against the prior owner or other responsible parties and could find it difficult or impossible to sell the affected properties. These events could have an adverse effect on our business, results of operations and financial condition.

Changes in interest rates could adversely affect our results of operations and financial condition.

Changes in interest rates may affect our level of interest income, the primary component of our gross revenue, as well as the level of our interest expense. Interest rates are highly sensitive to many factors that are beyond our control, including general economic conditions and the policies of various governmental and regulatory authorities. Accordingly, changes in interest rates could decrease our net interest income. Changes in the level of interest rates also may negatively affect our ability to originate real estate loans, the value of our assets and our ability to realize gains from the sale of our assets, all of which ultimately affects our earnings.

National or state legislation or regulation may increase our expenses and reduce earnings.

Federal bank regulators are increasing regulatory scrutiny, and additional restrictions (including those originating from the Dodd-Frank Act) on financial institutions have been proposed or adopted and signed into law by the President, regulators and Congress. Changes in federal legislation, regulation or policies, such as bankruptcy laws, deposit insurance, consumer protection laws, and capital requirements, among others, can result in significant increases in our expenses and/or charge-offs, which may adversely affect our earnings. Changes in state or federal tax laws or regulations can have a similar impact. Furthermore, financial institution regulatory agencies are expected to continue to be very aggressive in responding to concerns and trends identified in examinations, including the continued issuance of additional formal or informal enforcement or supervisory actions. These actions, whether formal or informal, could result in our, or the Bank, agreeing to limitations or to take actions that limit our operational flexibility, restrict our growth or increase our capital or liquidity levels. Failure to comply with any formal or informal regulatory restrictions, including informal commitments like those we and the Bank have made to our primary regulators, could lead to further regulatory enforcement actions. Negative developments in the financial services industry and the impact of recently enacted or new legislation in response to those developments could negatively impact our operations by restricting our business operations, including our ability to originate or sell loans, and

adversely impact our financial performance. In addition, industry, legislative or regulatory developments may cause us to materially change our existing strategic direction, capital strategies, compensation or operating plans.

Competition from financial institutions and other financial service providers may adversely affect our profitability.

The banking business is highly competitive and we experience competition in each of our markets from many other financial institutions. We compete with commercial banks, credit unions, savings and loan associations, mortgage banking firms, consumer finance companies, securities brokerage firms, insurance companies, money market funds, and other mutual funds, as well as other community banks and super-regional and national financial institutions that operate offices in our primary market areas and elsewhere.

Additionally, we face competition from de novo community banks, including those with senior management who were previously affiliated with other local or regional banks or those controlled by investor groups with strong local business and community ties. These de novo community banks may offer higher deposit rates or lower cost loans in an effort to attract our customers, and may attempt to hire our management and employees.

We compete with these other financial institutions both in attracting deposits and in making loans. In addition, we have to attract our customer base from other existing financial institutions and from new residents. We expect competition to increase in the future as a result of legislative, regulatory and technological changes and the continuing trend of consolidation in the financial services industry. Our profitability depends upon our continued ability to successfully compete with an array of financial institutions in our market areas.

We reported a material weakness in our internal control over financial reporting, and if we are unable to improve our internal controls, our financial results may not be accurately reported.

Management's assessment of the effectiveness of our internal control over financial reporting as of December 31, 2010 identified a material weakness in its internal control over financial reporting, as described in "Item 9A. Controls and Procedures." This material weakness, or difficulties encountered in implementing new or improved controls or remediation, could prevent us from accurately reporting our financial results, result in material misstatements in our financial statements or cause us to fail to meet our reporting obligations. Failure to comply with Section 404 of the Sarbanes-Oxley Act of 2002 could negatively affect our business, the price of our common stock and market confidence in our reported financial information.

We have a deferred tax asset and cannot assure you that it will be fully realized.

We had net deferred tax assets ("DTA") of \$45.7 million as of December 31, 2010 and established a valuation allowance against our federal net deferred tax assets of \$43.5 million. A valuation allowance is recognized for a net DTA if, based on the weight of available evidence, it is more-likely-than-not that some portion or the entire DTA will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. In making such judgments, significant weight is given to evidence that can be objectively verified.

As a result of the increased credit losses, the Company entered into a three-year cumulative pre-tax loss position (excluding the goodwill impairment charge recognized in the second quarter of 2009) as of June 30, 2010. A cumulative loss position is considered significant negative evidence in assessing the realizability of a deferred tax asset which is difficult to overcome. The Company's estimate of the realization of its net DTA was based on the scheduled reversal of deferred tax liabilities and taxable income available in prior carry back years, and tax planning strategies. Once profitability has been restored for a reasonable time and such profitability is considered sustainable, the valuation allowance would be reversed. Reversal of the valuation allowance requires a great deal of judgment and will be based on the circumstances that exist as of that future date.

We are subject to lawsuits as a result of the losses we incurred in the third quarter of 2010.

In the third quarter of 2010, we recognized significant losses as a result of higher costs related to loan charge-offs, coupled with losses incurred on OREO resulting from sales completed and updated property appraisals received during that quarter. As a result, various plaintiffs filed class action lawsuits, which have subsequently been

consolidated into one class action, alleging, among other things, disclosure violations regarding our collateral valuations, the timing of our impairment charges and our accounting for loan charge-offs. The defense of this matter has and will continue to entail considerable cost and will be time-consuming for our management. Unfavorable outcomes in this matter could have an adverse effect on our business, financial condition, results of operations and cash flows.

We rely heavily on the services of key personnel.

We are dependent on certain key officers who have important customer relationships or are instrumental to our operations. Changes in key personnel and their responsibilities may be disruptive to our business and could have a material adverse effect on our business, financial condition and results of operations. We believe that our future results will also depend in part upon our attracting and retaining highly skilled and qualified management and sales and marketing personnel, particularly in those areas where we may open new branches. Competition for such personnel is intense, and we cannot assure you that we will be successful in attracting or retaining such personnel.

On February 16, 2011, we announced that James E. Adams, our Chief Financial Officer, will be retiring on May 16, 2011 after the Annual Shareholders Meeting on May 12, 2011. We have commenced a search for a replacement for Mr. Adams, but there can be no assurance that we will have found a suitable replacement prior to that date.

The limitations on bonuses, retention awards, severance payments and incentive compensation contained in ARRA may adversely affect our ability to retain our highest performing employees.

For so long as any equity securities that we issued to the U.S. Treasury under the CPP remain outstanding, ARRA and regulations issued thereunder, including the IFR, severely restrict bonuses, retention awards, severance and change in control payments and other incentive compensation payable to our most highly compensated employees including our five senior executive officers. It is possible that we may be unable to create a compensation structure that permits us to retain such officers or other key employees or recruit additional employees, especially if we are competing against institutions that are not subject to the same restrictions. Failure to retain our key employees could materially adversely affect our business and results of operations.

We are subject to extensive regulation that could limit or restrict our activities.

We operate in a highly regulated industry and are subject to examination, supervision, and comprehensive regulation by various federal and state agencies including the FRB, the FDIC and the TDFI. Our regulatory compliance is costly and restricts certain of our activities, including payment of dividends, mergers and acquisitions, investments, loans and interest rates charged, interest rates paid on deposits and locations of offices. We are also subject to capitalization guidelines established by our regulators, which require us to maintain adequate capital to support our operations.

The laws and regulations applicable to the banking industry could change at any time, and we cannot predict the effects of these changes on our business and profitability. Because government regulation greatly affects the business and financial results of all commercial banks and bank holding companies, our cost of compliance could adversely affect our ability to operate profitably.

The Sarbanes-Oxley Act of 2002, and the related rules and regulations promulgated by the Securities and Exchange Commission and the Nasdaq Stock Market that are applicable to us, have increased the scope, complexity and cost of corporate governance, reporting and disclosure practices. We expect that the Dodd-Frank Act will similarly result in increases in our compliance costs. As a result, we have experienced, and may continue to experience, greater compliance costs.

Our long-term business strategy includes the continuation of growth plans, and our financial condition and results of operations could be affected if our long-term business strategies are not effectively executed.

Although our primary focus in the near term will be on strengthening our asset quality and improving our capital position, we intend, over the longer term, to continue pursuing a growth strategy for our business through acquisitions and de novo branching. Our prospects must be considered in light of the risks, expenses and difficulties occasionally encountered by financial services companies in growth stages, which may include the following:

- Maintaining loan quality;
- Maintaining adequate management personnel and information systems to oversee such growth; and,
- Maintaining adequate control and compliance functions.

Operating Results: There is no assurance that existing offices or future offices will maintain or achieve deposit levels, loan balances or other operating results necessary to avoid losses or produce profits. Our growth and de novo branching strategy necessarily entails growth in overhead expenses as it routinely adds new offices and staff. Our historical results may not be indicative of future results or results that may be achieved as we continue to increase the number and concentration of our branch offices.

Development of Offices: There are considerable costs involved in opening branches, and new branches generally do not generate sufficient revenues to offset their costs until they have been in operation for at least a year or more. Accordingly, our de novo branches may be expected to negatively impact our earnings during this period of time until the branches reach certain economies of scale.

Expansion into New Markets: Much of our growth over the last five years has been focused in the highly competitive Nashville, Knoxville and Clarksville metropolitan markets. The customer demographics and financial services offerings in these markets are unlike those found in the smaller, more rural East Tennessee markets that we historically served. In the Nashville, Knoxville and Clarksville markets, we face competition from a wide array of financial institutions. Our expansion efforts in these new markets may be impacted if we are unable to meet customer demands or compete effectively with the financial institutions operating in these markets.

Regulatory and Economic Factors: Our growth and expansion plans may be adversely affected by a number of regulatory and economic developments or other events. Failure to obtain required regulatory approvals, changes in laws and regulations or other regulatory developments and changes in prevailing economic conditions or other unanticipated events may prevent or adversely affect our continued growth and expansion.

Failure to successfully address the issues identified above could have a material adverse effect on our business, future prospects, financial condition or results of operations, and could adversely affect our ability to successfully implement our longer term business strategy.

We may face risks with respect to future expansion.

From time to time we may engage in additional de novo branch expansion as well as the acquisition of other financial institutions or parts of those institutions. We may also consider and enter into new lines of business or offer new products or services. Acquisitions and mergers involve a number of risks, including:

- the time and costs associated with identifying and evaluating potential acquisitions and merger partners;
- inaccuracies in the estimates and judgments used to evaluate credit, operations, management and market risks with respect to the target institution;
- the time and costs of evaluating new markets, hiring experienced local management and opening new offices, and the time lags between these activities and the generation of sufficient assets and deposits to support the costs of the expansion;
- our ability to finance an acquisition and possible dilution to our existing shareholders;
- the diversion of our management's attention to the negotiation of a transaction, and the integration of the operations and personnel of the combining businesses;
- entry into new markets where we lack experience;

- the introduction of new products and services into our business;
- the incurrence and possible impairment of goodwill associated with an acquisition and possible adverse short-term effects on our results of operations; and
- the risk of loss of key employees and customers.

We may incur substantial costs to expand. There can be no assurance that integration efforts for any future mergers or acquisitions will be successful. Also, we may issue equity securities, including common stock and securities convertible into shares of our common stock in connection with future acquisitions, which could cause ownership and economic dilution to our shareholders. There is no assurance that, following any future mergers or acquisitions, our integration efforts will be successful or we, after giving effect to the acquisition, will achieve profits comparable to or better than our historical experience.

We are subject to Tennessee anti-takeover statutes and certain charter provisions which could decrease our chances of being acquired even if the acquisition is in our shareholders' best interests.

As a Tennessee corporation, we are subject to various legislative acts which impose restrictions on and require compliance with procedures designed to protect shareholders against unfair or coercive mergers and acquisitions. These statutes may delay or prevent offers to acquire us and increase the difficulty of consummating any such offers, even if the acquisition of us would be in our shareholders' best interests. Our amended and restated charter also contains provisions which may make it difficult for another entity to acquire us without the approval of a majority of the disinterested directors on our board of directors.

The success and growth of our business will depend on our ability to adapt to technological changes.

The banking industry and the ability to deliver financial services is becoming more dependent on technological advancement, such as the ability to process loan applications over the Internet, accept electronic signatures, provide process status updates instantly and on-line banking capabilities and other customer expected conveniences that are cost efficient to our business processes. As these technologies are improved in the future, we may, in order to remain competitive, be required to make significant capital expenditures.

Even though our common stock is currently traded on The Nasdaq Global Select Market, the trading volume in our common stock has been thin and the sale of substantial amounts of our common stock in the public market could depress the price of our common stock.

We cannot say with any certainty when a more active and liquid trading market for our common stock will develop or be sustained. Because of this, our shareholders may not be able to sell their shares at the volumes, prices, or times that they desire.

We cannot predict the effect, if any, that future sales of our common stock in the market, or availability of shares of our common stock for sale in the market, will have on the market price of our common stock. We, therefore, can give no assurance that sales of substantial amounts of our common stock in the market, or the potential for large amounts of sales in the market, would not cause the price of our common stock to decline or impair our ability to raise capital through sales of our common stock.

The market price of our common stock may fluctuate in the future, and these fluctuations may be unrelated to our performance. General market price declines or overall market volatility in the future could adversely affect the price of our common stock, and the current market price may not be indicative of future market prices.

We may issue additional common stock or other equity securities in the future which could dilute the ownership interest of existing common shareholders.

In order to maintain our capital at desired levels or required regulatory levels, or to fund future growth, our board of directors may decide from time to time to issue additional shares of common stock, preferred stock or securities convertible into, exchangeable for or representing rights to acquire shares of our common stock. The sale of these shares may significantly dilute our shareholders' ownership interest and the per share book value of our

common stock. New investors in the future may also have rights, preferences and privileges senior to our current shareholders which may adversely impact our current shareholders.

Our ability to declare and pay dividends is limited by law, by commitments we have made to our regulators and by the terms of the Series A preferred stock that we have issued to the U.S. Treasury, and we may be unable to pay future dividends.

We derive our income solely from dividends on the shares of common stock of the Bank. The Bank's ability to declare and pay dividends to us is limited by its obligations to maintain sufficient capital and by other general restrictions on its dividends that are applicable to banks that are regulated by the FDIC and the TDFI. In addition, the terms of the Series A preferred stock impose restrictions on our ability to pay dividends on our common stock and we have informally committed to the FRB-Atlanta that we will not pay dividends on our common or preferred stock without the FRB-Atlanta's prior approval. On November 9, 2010, following consultation with the FRB-Atlanta, we notified the U.S. Treasury that we were suspending the payment of regular quarterly cash dividends on preferred stock that we had issued to the U.S. Treasury in the CPP. We do not know when we will receive permission from the FRB-Atlanta to resume paying dividends on our common or preferred stock. We cannot assure our shareholders that we will declare or pay dividends on shares of our common stock in the future.

Holders of our junior subordinated debentures have rights that are senior to those of our common and Series A preferred shareholders.

We had supported our previous growth through the issuance of trust preferred securities from special purpose trusts and accompanying junior subordinated debentures. This financing vehicle is no longer an attractive source for funding acquisitions as a result of the changing characteristics of trust preferred securities and their limited attributes towards qualifying as primary regulatory capital. At December 31, 2010, we had outstanding trust preferred securities and accompanying junior subordinated debentures totaling \$88.7 million. Payments of the principal and interest on the trust preferred securities of these trusts are conditionally guaranteed by us. Further, the accompanying junior subordinated debentures we issued to the trusts are senior to our shares of common stock and the Series A preferred stock that we issued to the U.S. Treasury in the CPP. As a result, we must make payments on the junior subordinated debentures before any dividends can be paid on our common stock or the Series A preferred stock and, in the event of our bankruptcy, dissolution or liquidation, the holders of the junior subordinated debentures must be satisfied before any distributions can be made on our common stock or Series A preferred stock. We have the right to defer distributions on our junior subordinated debentures (and the related trust preferred securities) for up to five years, during which time no dividends may be paid on our common stock or our Series A preferred stock.

As described above, we have informally committed to the FRB-Atlanta that we will not pay interest on the subordinated debentures without the prior approval of the FRB-Atlanta. In the fourth quarter of 2010, following consultation with the FRB-Atlanta, we notified the trustees with respect to each series of our subordinated debentures, of our intent to defer interest payments on the subordinated debentures beginning with the interest payments due in the fourth quarter of 2010.

The Series A preferred stock impacts net income available to our common shareholders and our earnings per share.

As long as shares of our Series A preferred stock are outstanding, no dividends may be paid on our common stock unless all dividends on the Series A preferred stock have been paid in full. Additionally, prior to December 23, 2011, unless we redeem the Series A preferred stock or the U.S. Treasury has transferred the Series A preferred stock to a third party, we are not permitted to pay cash dividends on our common stock in excess of \$0.13 per quarter without the U.S. Treasury's consent. The dividends declared on shares of our Series A preferred stock will reduce the net income available to common shareholders and our earnings per common share. Additionally, warrants to purchase our common stock issued to the Treasury, in conjunction with the issuance of the Series A preferred stock, may be dilutive to our earnings per share. The shares of our Series A preferred stock will also receive preferential treatment in the event of our liquidation, dissolution or winding up.

Holders of the Series A preferred stock have rights that are senior to those of our common shareholders.

The Series A preferred stock that we have issued to the U.S. Treasury is senior to our shares of common stock, and holders of the Series A preferred stock have certain rights and preferences that are senior to holders of our common stock. The Series A preferred stock will rank senior to our common stock and all other equity securities of ours designated as ranking junior to the Series A preferred stock. So long as any shares of the Series A preferred stock remain outstanding, unless all accrued and unpaid dividends on shares of the Series A preferred stock for all prior dividend periods have been paid or are contemporaneously declared and paid in full, no dividend whatsoever shall be paid or declared on our common stock or other junior stock, other than a dividend payable solely in common stock. Prior to December 23, 2011, unless we redeem the Series A preferred stock or the U.S. Treasury has transferred the Series A preferred stock to a third party we and our subsidiaries also may not, with certain limited exceptions, purchase, redeem or otherwise acquire any shares of our common stock or other junior stock without the U.S. Treasury's consent. During that three-year period, and thereafter, we and our subsidiaries may not purchase, redeem or otherwise acquire for consideration any shares of our common stock or other junior stock unless we have paid in full all accrued and unpaid dividends on the Series A preferred stock, other than in certain circumstances. Furthermore, the Series A preferred stock is entitled to a liquidation preference over shares of our common stock in the event of our liquidation, dissolution or winding up.

Holders of the Series A preferred stock may, under certain circumstances, have the right to elect two directors to our board of directors.

As described above, on November 9, 2010, we notified the U.S. Treasury that we were suspending the payment of dividends on the Series A preferred stock beginning with the dividend payment due in the fourth quarter of 2010. In the event that we fail to pay dividends on the Series A preferred stock for an aggregate of six quarterly dividend periods or more (whether or not consecutive), the authorized number of directors then constituting our board of directors will be increased by two. Holders of the Series A preferred stock, together with the holders of any outstanding parity stock with like voting rights, referred to as voting parity stock, voting as a single class, will be entitled to elect the two additional members of our board of directors, referred to as the preferred stock directors, at the next annual meeting (or at a special meeting called for the purpose of electing the preferred stock directors prior to the next annual meeting) and at each subsequent annual meeting until all accrued and unpaid dividends for all past dividend periods have been paid in full.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

At December 31, 2010, the Company maintained a main office in Greeneville, Tennessee in a building it owns, 65 full-service bank branches (of which 54 are owned premises and 11 are leased premises) and a building for mortgage lending operations which it owns. In addition, the Bank's subsidiaries operate from nine separate locations, all of which are leased.

ITEM 3. LEGAL PROCEEDINGS.

On November 18, 2010 a shareholder of the Company filed a putative class action lawsuit (styled *Bill Burgraff v. Green Bankshares, Inc., et al., U.S. District Court, Eastern District of Tennessee, Northeastern Division, Case No. 2:10-cv-00253*) against the Company and certain of its current and former officers in the United States District Court for the Eastern District of Tennessee in Greeneville, Tennessee on behalf of all persons that acquired shares of the Company's common stock between January 19, 2010 and November 9, 2010. On January 18, 2011, a separate shareholder of the Company filed a putative class action lawsuit (styled *Brian Molnar v. Green Bankshares, Inc., et al., U.S. District Court, Eastern District of Tennessee, Northeastern Division, Case No. 2:11-cv-00014*) against the Company and certain of its current and former officers in the same court on behalf of all persons that acquired shares of the Company's common stock between January 19, 2010 and October 20, 2010. These lawsuits

were filed following, and relate to the drop in value of the Company's common stock price after, the Company announced its third quarter performance results on October 20, 2010. The Burgraff case also complains of the Company's decision on November 9, 2010, to suspend payment of certain quarterly cash dividends.

The plaintiffs allege that defendants made false and/or misleading statements or failed to disclose that the Company was purportedly overvaluing collateral of certain loans; failing to timely take impairment charges of these certain loans; failing to properly account for loan charge-offs; lacking adequate internal and financial controls; and providing false and misleading financial results. The plaintiffs have asserted federal securities laws claims against all defendants for alleged violations of Section 10(b) of the Securities Exchange Act of 1934 (the "Exchange Act") and Rule 10b-5 promulgated thereunder. The plaintiffs have also asserted control person liability claims against the individual defendants named in the complaints pursuant to Section 20(a) of the Exchange Act.

The two cases were consolidated on February 4, 2011. Plaintiffs have 60 days from that date within which to file an amended and consolidated complaint. On February 11, 2011, the Court appointed movant Jeffrey Blomgren as lead plaintiff.

The Company and the individual named defendants collectively intend to vigorously defend themselves against these allegations.

The Company and its subsidiaries are subject to claims and suits arising in the ordinary course of business. In the opinion of management, the ultimate resolution of these pending claims and legal proceedings will not have a material adverse effect on the Company's results of operations.

ITEM 4. REMOVED AND RESERVED

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

On February 28, 2011, Green Bankshares had 13,188,896 shares of common stock outstanding. The Company's shares are traded on The Nasdaq Global Select Market, under the symbol "GRNB". As of February 28, 2011, the Company estimates that it had approximately 5,200 shareholders, including approximately 2,600 shareholders of record and approximately 2,600 beneficial owners holding shares in nominee or "street" name.

The following table shows the high and low sales price and closing price for the Company's common stock as reported by The Nasdaq Global Select Market for 2010 and 2009. The table also sets forth the dividends per share paid each quarter during 2010 and 2009.

	High/Low Sales Price During Quarter	Closing Price	Dividends Paid Per Share
2010:			
First quarter	\$ 9.48 / 3.52	\$ 8.16	\$ -
Second quarter	15.04 / 7.96	12.77	-
Third quarter	13.11 / 6.58	6.79	-
Fourth quarter	7.73 / 2.39	3.20	-
			<u>\$ -</u>
2009:			
First quarter	\$14.71 / 4.51	\$8.80	\$0.13
Second quarter	9.73 / 4.14	4.48	-
Third quarter	6.83 / 3.25	5.00	-
Fourth quarter	5.48 / 3.51	3.55	-
			<u>\$0.13</u>

Holders of the Company's common stock are entitled to receive dividends when, as and if declared by the Company's board of directors out of funds legally available for dividends. Historically, the Company has paid quarterly cash dividends on its common stock. On June 2, 2009 the Company announced that due to the uncertain nature of the current economic environment that it was suspending the payment of cash dividends to common shareholders in order to prudently preserve capital levels. In the fourth quarter of 2010, the Company informally committed to the FRB-Atlanta that it would not pay dividends on its common or preferred stock without the prior approval of the FRB-Atlanta. The Company's ability to pay dividends to its shareholders in the future will depend on its earnings and financial condition, liquidity and capital requirements, the general economic and regulatory climate, the Company's ability to service any equity or debt obligations senior to its common stock, including its outstanding trust preferred securities and accompanying junior subordinated debentures, and other factors deemed relevant by the Company's board of directors. In addition, in order to pay dividends to shareholders, the Company must receive cash dividends from the Bank. As a result, the Company's ability to pay future dividends will depend upon the earnings of the Bank, its financial condition and its need for funds.

Moreover, there are a number of federal and state banking policies and regulations that restrict the Bank's ability to pay dividends to the Company and the Company's ability to pay dividends to its shareholders. In particular, because the Bank is a depository institution and its deposits are insured by the FDIC, it may not pay dividends or distribute capital assets if it is in default on any assessment due to the FDIC. In addition, the Tennessee Banking Act prohibits the Bank from declaring dividends in excess of net income for the calendar year in which the dividend is declared plus retained net income for the preceding two years without the approval of the Commissioner of the Tennessee Department of Financial Institutions. Because of the losses incurred by the Bank in 2010 and 2009, the Bank will need to receive the approval of the Commissioner of the TDFI before if pays dividends to the Company. Also, the Bank is subject to regulations which impose certain minimum regulatory capital and minimum state law earnings requirements that affect the amount of cash available for distribution to the Company.

In addition, as long as shares of Series A preferred stock are outstanding, no dividends may be paid on our common stock unless all dividends on the Series A preferred stock have been paid in full and in no event may dividends on our common stock exceed \$0.13 per quarter without the consent of the U.S. Treasury for the first three years following our sale of Series A preferred stock to the U.S. Treasury. Lastly, under Federal Reserve policy, the Company is required to maintain adequate regulatory capital, is expected to serve as a source of financial strength to the Bank and to commit resources to support the Bank. These policies and regulations may have the effect of reducing or eliminating the amount of dividends that the Company can declare and pay to its shareholders in the future. For

information regarding restrictions on the payment of dividends by the Bank to the Company, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources” and “Business – Regulation, Supervision and Governmental Policy – Dividends” in this Annual Report. See also Note 12 of Notes of Consolidated Financial Statements.

The Company made no repurchases of its common stock during the quarter ended December 31, 2010.

¹ Information for the 2007 fiscal year includes the operations of CVBG, with which the Company merged on May 18, 2007.

² Common shareholders' equity is shareholders' equity less preferred stock.

³ Tangible common shareholders' equity is shareholders' equity less goodwill, other intangible assets and preferred stock.

⁴ Tangible shareholders' equity is shareholders' equity less goodwill and other intangible assets.

⁵ Tangible assets is total assets less goodwill and other intangible assets.

⁶ Net interest margin is the net yield on interest earning assets and is the difference between the Fully Taxable Equivalent yield earned on interest-earning assets less the effective cost of supporting liabilities.

⁷ Please refer to the "GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures" section following "Selected Financial Data" for more information, including a reconciliation of this non-GAAP financial measure.

GAAP Reconciliation and Management Explanation of Non-GAAP Financial Measures

Certain financial information included in the selected financial data is determined by methods other than in accordance with accounting principles generally accepted within the United States ("GAAP"). These non-GAAP financial measures are "net income (loss) per share assuming dilution adjusted for goodwill impairment charge," "common shareholders' equity," "tangible assets," "tangible shareholders' equity," "tangible common book value per share," "tangible common shareholders' equity," "return on average common equity," and "return on average common tangible equity." The Company's management, the entire financial services sector, bank stock analysts, and bank regulators use these non-GAAP measures in their analysis of the Company's performance.

- "Net income (loss) per share available to common shareholders assuming dilution adjusted for goodwill impairment charge" is defined as net income (loss) per share available to common shareholders reduced by goodwill impairment charge, net of tax.
- "Common shareholders' equity" is shareholders' equity less preferred stock.
- "Tangible assets" are total assets less goodwill and other intangible assets.
- "Tangible shareholders' equity" is shareholders' equity less goodwill and other intangible assets.
- "Tangible common book value per share" is defined as total equity reduced by recorded goodwill, other intangible assets and preferred stock divided by total common shares outstanding. This measure discloses changes from period-to-period in book value per share exclusive of changes in intangible assets and preferred stock. Goodwill, an intangible asset that is recorded in a purchase business combination, has the effect of increasing total book value while not increasing the tangible assets of a company. Companies utilizing purchase accounting in a business combination, as required by GAAP, must record goodwill related to such transactions.
- "Tangible common shareholders' equity" is shareholders' equity less goodwill, other intangible assets and preferred stock.
- "Return on average common equity" is defined as net income (loss) available to common shareholders' for the period divided by average equity reduced by average preferred stock.
- "Return on average common tangible equity" is defined as net income (loss) available to common shareholders' for the period divided by average equity reduced by average goodwill, other intangible assets and preferred stock.

These disclosures should not be viewed as a substitute for results determined in accordance with GAAP, and are not necessarily comparable to non-GAAP performance measures which may be presented by other companies.

The following reconciliation table provides a more detailed analysis of these non-GAAP performance measures:

The table below presents computations and other financial information excluding the goodwill impairment charge that the Company incurred in 2009. The goodwill impairment charge is included in the financial results presented in accordance with GAAP. The Company believes that the exclusion of the goodwill impairment in expressing net operating income (loss), operating expenses and earnings (loss) per diluted share data provides a more meaningful base for period to period comparisons which will assist investors in analyzing the operating results of the Company. The Company utilizes these non-GAAP financial measures to compare the operating performance with comparable periods in prior years and with internally prepared projections. Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied and are not audited. To mitigate these limitations, the Company has policies in place to address goodwill impairment from other normal operating expenses to ensure that the Company's operating results are properly reflected for period to period comparisons.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

The Company reported a net loss available to common shareholders of \$85,696 for the full year 2010 compared with a net loss available to common shareholders of \$155,676 for the full year 2009. The loss for the year 2010 was primarily attributable to an increase in credit costs, including both a higher loan loss provision and elevated costs associated with the disposition and revaluation of OREO related assets along with the effects of the continued weaknesses in the economy through 2010. This weakness was manifested primarily in the Company's residential real estate construction and development portfolio. As a result, the Company's provision for loan losses for the full year 2010 remained elevated at \$71,107 compared to \$50,246 in 2009 and \$52,810 in 2008. Additionally, Other Real Estate Owned ("OREO") charges totaled \$29,895 in 2010 compared with \$8,156 for 2009 and \$7,028 in 2008. As the economy in the Company's market areas continued to struggle to improve during 2010, net loan charge-offs rose to \$54,438 in 2010 compared with net loan charge-offs of \$48,896 in 2009 and \$38,110 in 2008. On a diluted per share basis, the net operating loss available to common shareholders in 2010 was \$6.54 compared with a net operating loss in 2009, excluding the goodwill impairment charge, of \$1.40 (please see "ITEM 6 – GAAP Reconciliation and Management Explanations of Non-GAAP Financial Measures" above for more information) and a net operating loss available to common shareholders of \$0.42 for 2008. The net loss available to common shareholders on a diluted per share basis for 2010 was \$6.54 and including the goodwill impairment charge, on a diluted per share basis the net loss available to common shareholders for 2009 was \$11.91 compared with a net loss available to common shareholders of \$0.42 for 2008.

Net interest income for 2010 was \$83,593 compared with \$80,525 in 2009 including the impact of interest reversals of \$2,965 in 2010 and \$2,606 in 2009. Despite the decline in average earning assets, the improvement in net interest income was due to the Company experiencing the benefit of interest rate floors built into loan agreements beginning in 2009 plus the re-pricing of interest bearing liabilities in a lower market interest rate environment in 2010. As a result, the Company experienced a widening in its net interest margin from 3.34% in 2009 to 3.86% in 2010. Noninterest income improved modestly from \$31,578 in 2009 to \$32,544 in 2010 principally as a result of higher fee income generated from the sales of annuity and investment products. Operating expenses for 2010 totaled \$110,815 in 2010 compared with \$229,587 in 2009, or \$86,198, excluding the goodwill impairment charge of \$143,389 (please see "ITEM 6 – GAAP Reconciliation and Management Explanations of Non-GAAP Financial Measures" above for more information). The increase in operating expenses of \$24,617 (excluding the goodwill impairment charge taken in 2009 of \$143,389) was principally driven by the increased costs associated with the losses incurred on the revaluations and dispositions of OREO related assets.

Critical Accounting Policies and Estimates

The Company's consolidated financial statements and accompanying notes have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported periods.

Management continually evaluates the Company's accounting policies and estimates it uses to prepare the consolidated financial statements. In general, management's estimates are based on current and projected economic conditions, historical experience, information from regulators and third party professionals and various assumptions that are believed to be reasonable under the then existing set of facts and circumstances. Actual results could differ from those estimates made by management.

The Company believes its critical accounting policies and estimates include the valuation of the allowance for loan losses and the fair value of financial instruments and other accounts, including OREO. Based on management's calculation, an allowance of \$66,830, or 3.83%, of total loans, net of unearned interest was an adequate estimate of losses inherent in the loan portfolio as of December 31, 2010. This estimate resulted in a provision for loan losses on the income statement of \$71,107 during 2010. If the mix and amount of future charge-off percentages differ significantly from those assumptions used by management in making its determination, the allowance for loan losses and provision for loan losses on the income statement could be materially affected. For further discussion of the allowance

for loan losses and a detailed description of the methodology management uses in determining the adequacy of the allowance, see “ITEM 1. Business – Lending Activities – Allowance for Loan Losses” located above, and “Changes in Results of Operations – Provision for Loan Losses” located below.

The consolidated financial statements include certain accounting and disclosures that require management to make estimates about fair values. Estimates of fair value are used in the accounting for securities available for sale, loans held for sale, goodwill, other intangible assets, OREO and acquisition purchase accounting adjustments. Estimates of fair values are used in disclosures regarding securities held to maturity, stock compensation, commitments, and the fair values of financial instruments. Fair values are estimated using relevant market information and other assumptions such as interest rates, credit risk, prepayments and other factors. The fair values of financial instruments are subject to change as influenced by market conditions.

The Company believes its critical accounting policies and estimates also include the valuation of the allowance for the net DTA. A valuation allowance is recognized for a net DTA if, based on the weight of available evidence, it is more-likely-than-not that some portion or the entire DTA will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. In making such judgments, significant weight is given to evidence that can be objectively verified. As a result of the increased credit losses, the Company entered into a three-year cumulative pre-tax loss position (excluding the goodwill impairment charge recognized in the first quarter of 2009) as of December 31, 2010. A cumulative loss position is considered significant negative evidence in assessing the realizability of a deferred tax asset which is difficult to overcome.

The Company’s estimate of the realization of its net DTA was based on the scheduled reversal of deferred tax liabilities and taxable income available in prior carry back years, and tax planning strategies. Based on management’s calculation, a valuation allowance of \$43,455, or 95.2% of the net DTA, was an adequate estimate as of December 31, 2010. This estimate resulted in a valuation allowance for the net DTA in the income statement of \$43,455 for the period ended December 31, 2010. Once profitability has been restored for a reasonable time, generally considered four consecutive quarters, and such profitability is considered sustainable, the valuation allowance would be reversed. Reversal of the valuation allowance requires a great deal of judgment and will be based on the circumstances that exist as of that future date.

The consolidated financial statements include certain accounting disclosures that require management to make estimates about fair values. Independent third party valuations are used for securities available for sale and securities held to maturity as well as acquisition purchase accounting adjustments. Third party valuations are inputs, but are not solely determinative of value. Estimates of fair value are used in the accounting for loans held for sale, goodwill and other intangible assets. Estimates of fair values are used in disclosures regarding stock compensation, commitments, and the fair values of financial instruments. Fair values are estimated using relevant market information and other assumptions such as interest rates, credit risk, prepayments and other factors. The fair values of financial instruments are subject to change as influenced by market conditions.

Changes in Results of Operations

Net loss. The net loss available to common shareholders was \$85,696 in 2010 and \$155,676 for 2009. The net loss for the year 2009 was primarily attributable to a non-cash charge taken for the impairment of goodwill of \$137,414, net of tax of \$5,975 and the continued weaknesses in the economy through 2009. Excluding the goodwill impairment charge, net of tax, of \$137,414 the Company’s net operating loss was \$18,262 for 2009 (please see “ITEM 6 – GAAP Reconciliation and Management Explanations of Non-GAAP Financial Measures” above for more information). When comparing the net operating loss of \$85,696 in 2010 to the net operating loss of \$18,262, excluding the goodwill impairment charge, for 2009 the principal reasons for the increased loss in 2010 were credit related costs that continued to escalate in 2010 driven by both a higher loan loss provision coupled with rising costs associated with the maintenance, disposition and revaluation of OREO along with continued deterioration in economic conditions in our markets. These costs were partially offset by improvements in both net interest income and non-interest income.

The net loss available to common shareholders' for 2009 was \$155,676 compared to a net loss of \$5,452 in 2008. The net loss for the year 2009 was primarily attributable to a non-cash charge taken for the impairment of goodwill of \$137,414, net of tax of \$5,975 and the continued weaknesses in the economy through 2009. Excluding the goodwill impairment charge, net of tax, of \$137,414 the Company's net operating loss was \$18,262 for 2009 (please see "ITEM 6 – GAAP Reconciliation and Management Explanations of Non-GAAP Financial Measures" above for more information). The increase in the net operating loss between 2009 and 2008 was primarily attributable to a decline in net interest income of \$14,500 from \$95,025 in 2008 to \$80,525 in 2009 due to narrowing interest rate spreads and deteriorating economic conditions throughout 2009 impacting residential real estate construction lending plus a decline in net securities gains of \$2,222 between periods due to higher other-than-temporary impairment charges taken in 2009.

Net Interest Income. The largest source of earnings for the Company is net interest income, which is the difference between interest income on earning assets and interest paid on deposits and other interest-bearing liabilities. The primary factors that affect net interest income are changes in volumes and rates on earning assets and interest-bearing liabilities, which are affected in part by management's anticipatory responses to changes in interest rates through asset/liability management. Despite deleveraging average earning assets of the Company by \$247,978 from 2009 to 2010, net interest income improved from \$80,525 in 2009 to \$83,593 in 2010 as interest rate floors were triggered in loan agreements and interest-bearing liabilities were re-priced in a lower interest rate market environment. As a result of the repricing characteristics of the balance sheet plus a modest increase of \$4,049 in average non-interest bearing demand deposits, the Company's net interest margin rose from 3.34% in 2009 to 3.86% in 2010. Average loan balances in 2010 were \$1,833,865 compared with \$2,096,181 in 2009 and this reduction was principally responsible for the decline in average earning assets, partially offset by an increase in short-term investments as liquidity levels increased. Simultaneously, the Company reduced its large certificates of deposit as average balances declined by \$325,182 and further eliminated \$55,764 in borrowed funds.

During 2009, net interest income was \$80,525 as compared to \$95,025 in 2008. The Company experienced a decline in average balances of interest-earning assets, with average total interest-earning assets decreasing by \$156,713, or 6%, to \$2,433,476 in 2009 from \$2,590,189 in 2008. Most of the decline occurred in loans, with average loan balances decreasing by \$202,724, or 9%, to \$2,096,181 in 2009 from \$2,298,905 in 2008. The decrease was primarily due to the continued downturn in economic conditions throughout 2009 that resulted in lower loan demand and heightened levels of loan charge-offs. Average investment securities also decreased \$83,966, or 31%, to \$189,377 in 2009 from \$273,343 in 2008 as the Company focused on de-levering the balance sheet and reducing excess liquidity. Average balances of total interest-bearing liabilities also decreased in 2009 from 2008, with average total interest-bearing deposit balances decreasing by \$12,223, or 1%, to \$1,950,775 in 2009 from \$1,962,998 in 2008, and average securities sold under repurchase agreements and short-term borrowings, and subordinated debentures and FHLB advances and notes payable decreased by \$111,132, or 25%, to \$337,993 in 2009 from \$449,125 in 2008. These decreases are primarily related to the reduction in securities sold under repurchase agreements and short-term borrowings along with the maturities and early payoffs of FHLB advances.

Average Balances, Interest Rates and Yields. Net interest income is affected by (i) the difference between yields earned on interest-earning assets and rates paid on interest-bearing liabilities ("interest rate spread") and (ii) the relative amounts of interest-earning assets and interest-bearing liabilities. The Company's interest rate spread is affected by regulatory, economic and competitive factors that influence interest rates, loan demand and deposit flows. When the total of interest-earning assets approximates or exceeds the total of interest-bearing liabilities, any positive interest rate spread will generate net interest income. An indication of the effectiveness of an institution's net interest income management is its "net yield on interest-earning assets," which is net interest income on a fully taxable equivalent basis divided by average interest-earning assets.

The following table sets forth certain information relating to the Company's consolidated average interest-earning assets and interest-bearing liabilities and reflects the average fully taxable equivalent yield on assets and average cost of liabilities for the periods indicated. Such yields and costs are derived by dividing income or expense by the average daily balance of assets or liabilities, respectively, for the periods presented.

¹ Average loan balances exclude nonaccrual loans.

² Installment loans are stated net of unearned income.

³ The average balance of and the related yield associated with securities available for sale is based on the cost of such securities.

⁴ Fully Taxable Equivalent ("FTE") at the rate of 35%. The FTE basis adjusts for the tax benefits of income on certain tax-exempt loans and investments using the federal statutory rate of 35% for each period presented. The Company believes this measure to be the preferred industry measurement of net interest income and provides relevant comparison between taxable and non-taxable amounts.

Rate/Volume Analysis. The following table analyzes net interest income in terms of changes in the volume of interest-earning assets and interest-bearing liabilities and changes in yields and rates. The table reflects the extent to which changes in the interest income and interest expense are attributable to changes in volume (changes in volume multiplied by prior year rate) and changes in rate (changes in rate multiplied by prior year volume). Changes attributable to the combined impact of volume and rate have been separately identified.

	2010 vs. 2009				2009 vs. 2008			
	Volume	Rate	Rate/ Volume	Total Change	Volume	Rate	Rate/ Volume	Total Change
Interest income:

At December 31, 2010, loans outstanding, net of unearned income, were \$1,745,378 compared to \$2,043,807 at 2009 year end. The decrease is primarily due to weak loan demand resulting from the continued economic pressures experienced within our markets throughout 2010, loan foreclosures resulting in loan balances being transferred to OREO and repossessed assets and increased loan charge-offs. Average outstanding loans, net of unearned interest, for 2010 were \$1,833,865, a decrease of 13% from the 2009 average of \$2,096,181. Average outstanding loans for 2008 were \$2,298,905.

Average investment securities for 2010 were \$180,681 compared to \$189,377 in 2009 and \$273,343 in 2008. The decreases of \$8,696 and \$83,966, or 5% and 31%, from 2009 to 2010 and 2008 to 2009 primarily reflect the elimination of excess liquidity in the balance sheet through de-levering. In 2010, the average yield on investments was 4.08%, a decrease from the 5.04% yield in 2009 and from the 5.64% yield in 2008. The declining investment yields since 2008 represent the reinvestment of proceeds of maturing securities in a lower interest rate environment. Fully taxable equivalent income provided by the investment portfolio in 2010 was \$7,376 as compared to \$9,546 in 2009 and \$15,412 in 2008.

Provision for Loan Losses. Management assesses the adequacy of the allowance for loan losses by considering a combination of regulatory and credit risk criteria. The entire loan portfolio is graded and potential loss factors are assigned accordingly. The potential loss factors for impaired loans are assigned based on independent valuations of underlying collateral and management's judgment. The potential loss factors associated with unimpaired loans are based on a combination of both internal and industry net loss experience, as well as management's review of trends within the portfolio and related industries.

Generally, commercial real estate, residential real estate and commercial loans are assigned a level of risk at inception. Thereafter, these loans are reviewed on an ongoing basis. The review includes loan payment and collateral status, borrowers' financial data and borrowers' internal operating factors such as cash flows, operating income, liquidity, leverage and loan documentation, and any significant change can result in an increase or decrease in the loan's assigned risk grade. Aggregate dollar volume by risk grade is monitored on an ongoing basis. The establishment of and any changes to risk grades for consumer loans are generally based upon payment performance.

The Bank's loan loss allowance is increased or decreased based on management's assessment of the overall risk of its loan portfolio. A portion of the allowance may be allocated to specific loans reflecting unusual circumstances.

Management reviews certain key loan quality indicators on a monthly basis, including current economic conditions, historical charge-offs, delinquency trends and ratios, portfolio mix changes and other information management deems necessary. This review process provides a degree of objective measurement that is used in conjunction with periodic internal evaluations. To the extent that this process yields differences between estimated and actual observed losses, adjustments are made to provisions and/or the level of the allowance for loan losses.

Increases and decreases in the allowance for loan losses due to changes in the measurement of impaired loans are reviewed monthly given the current economic environment. To the extent that impairment is deemed probable, an adjustment is reflected in the provision for loan losses, if necessary, to reflect the losses inherent in the loan portfolio. Loans continue to be classified as impaired unless payments are brought fully current and satisfactory performance is observed for a period of at least six months and management further considers the collection of scheduled interest and principal to be probable.

The Company's provision for loan losses increased for the year 2010 by \$20,861 to \$71,107 from \$50,246 in 2009 while the total loan loss reserve increased from \$50,161 at December 31, 2009 to \$66,830 at December 31, 2010. The impact of the continuing challenging economic environment, elevated net charge-offs and increased non-performing assets were the primary reasons for the increase in provision expense in 2010. Net charge-offs were \$54,438 in 2010 compared with net charge-offs of \$48,896 in 2009 and \$38,110 in 2008. Management continually evaluates the existing portfolio in light of loan concentrations, current general economic conditions and economic trends. On a monthly basis, the Company undertakes an extensive review of every loan in excess of \$1 million that is adversely risk graded and every loan regardless of amount graded substandard.

Appraisals received by the Company during the second half of 2010 on existing OREO and targeted loans reflected further significant deterioration in the value of the underlying properties from the prior year, which along with the deterioration of previously performing relationships, triggered increased charge-offs during this period of time. Management believes that the economic slowdown in the Company's markets occurring throughout 2008, 2009 and 2010 will continue into at least the first half of 2011. Based on its evaluation of the allowance for loan loss calculation and review of the loan portfolio, management believes the allowance for loan losses is adequate at December 31, 2010. However, the provision for loan losses could further increase throughout 2011 if the general economic trends continue to weaken or the residential real estate markets in Nashville or Knoxville or the financial conditions of borrowers deteriorate beyond management's current expectations.

The ratio of nonperforming assets to total assets reached 8.56% at December 31, 2010 compared with 5.07% at December 31, 2009 and 2.61% at December 31, 2008 reflecting not only the challenging economic environment but also the rise in non-performing asset levels combined with a shrinking Balance Sheet. Total nonperforming assets increased to \$205,914 in 2010 from \$132,726 in 2009 from \$76,806 at year-end 2008. Nonaccrual loans, included in non-performing assets, increased to \$143,707 as of December 31, 2010 compared to \$75,411 at December 31, 2009 and \$30,926 at December 31, 2008. Further reflecting the economic downturn, OREO and repossessed assets

increased from \$45,371 at the end of 2008 to \$57,168 at year-end 2009 and \$60,095 at December 31, 2010. Management believes that, based upon recent appraisals, these assets have been appropriately written down based on current economic conditions. The recorded investment of impaired loans, which include substandard loans as well as nonaccrual loans, increased from \$47,215 at December 31, 2008 to \$115,238 at December 31, 2009 and \$185,991 at December 31, 2010. The related allowance on the investment of impaired loans also increased from \$2,651 at December 31, 2008 to \$5,737 at December 31, 2009 and \$24,834 at December 31, 2010. The Company records a risk allocation allowance for loan losses on impaired loans where the risk of loss is deemed to be probable and the amount can be reasonably estimated. Further, the Company specifically records additional allowance amounts for individual loans when the circumstances so warrant. For further discussion of nonperforming assets as it relates to foreclosed real estate and impaired loans, see "ITEM 1. Business – Lending Activities – Past Due, Special Mention, Classified and Nonaccrual Loans" located above.

To further manage its credit risk on loans, the Company maintains a "watch list" of loans that, although currently performing, have characteristics that require closer supervision by management. At December 31, 2010 "watch list" loans totaled \$88,130 declining from \$212,288 identified at year end 2009. At December 31, 2008 "watch list" loans totaled \$182,984. If, and when, conditions are identified that would require additional loan loss reserves to be established due to potential losses inherent in these loans, action would then be taken.

Non-interest Income. The generation of non-interest income, which is income that is not related to interest-earning assets and consists primarily of service charges, commissions and fees, has become more important as increases in levels of interest-bearing deposits and other liabilities continually challenge interest rate spreads.

Total non-interest income for 2010 increased slightly to \$32,544 compared to \$31,578 in 2009 and declined modestly from \$33,614 in 2008. The largest components of non-interest income are service charges on deposit accounts, which totaled \$24,179 in 2010, \$23,738 in 2009 and \$23,176 in 2008. The increase in total non-interest income in 2010 primarily reflects higher service charges on deposit accounts, trust and investment services income and lower other-than-temporary impairment charges on investments. The decrease in total non-interest income from 2008 to 2009 reflected a reduction in net securities gains of \$2,222 to \$439 in 2009 from \$2,661 in 2008. This decrease is a result of lower realized gains on the sale of securities of \$1,415 in 2009 compared to \$2,661 in 2008 coupled with additional charges taken in 2009 of \$976 for other-than-temporary impairment on certain investment portfolio securities. Deposit service charges are fees generated from the higher volume of deposit-related products, specifically fees associated with the continued success of the Bank's High Performance Checking Program. From the inception of this new product during the first quarter of 2005, the Company experienced "net" new checking account growth of 7,665 in 2005 to net new checking account growth of 14,269 during 2010.

Non-interest Expense. Control of non-interest expense also is an important aspect in generating earnings. Non-interest expense includes, among other expenses, personnel, occupancy, goodwill impairment charges, write downs and net losses from the sales on OREO and expenses such as data processing, printing and supplies, legal and professional fees, postage and FDIC assessments. Total non-interest expense was \$110,815 in 2010 compared to \$229,587 in 2009 and \$85,837 in 2008. The decline in 2010 of \$118,772 from 2009 principally reflects the one-time non-cash charge taken for goodwill impairment of \$143,389. During 2010, the Company incurred \$29,895 in costs associated with losses and revaluations on OREO properties held for sale compared with \$8,156 incurred in 2009 and \$7,028 in 2008.

Employee compensation and employee benefit costs are the primary element of the Company's non-interest expenses, excluding the one-time, non-cash write-off of goodwill in 2009. For the years ended December 31, 2010 and 2009, compensation and benefits represented \$35,368, or 32% and \$34,446, or 40% (excluding the goodwill impairment charge of \$143,389 - see "ITEM 6 – GAAP Reconciliation and Management Explanations of Non-GAAP Financial Measures" above for more information), respectively, of total non-interest expense. Including Bank branches and non-Bank office locations, the Company had 65 locations at December 31, 2010 and 2009, and the number of full-time equivalent employees totaled 730 at December 31, 2010 and 716 at December 31, 2009.

Income Taxes. The Company's effective income tax rate (benefit) was 22.7% in 2010 compared to (10.2%) in 2009 and (46.4%) in 2008. The effective tax rate for the year ended December 31, 2010 was significantly impacted by the DTA valuation allowance of \$43,455. A valuation allowance is recognized for a net DTA if, based on the weight of available evidence, it is more-likely-than-not that some portion or the entire DTA will not be realized. The ultimate

realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. In making such judgments, significant weight is given to evidence that can be objectively verified. As a result of the increased credit losses, the Company entered into a three-year cumulative pre-tax loss position (excluding the goodwill impairment charge recognized in the second quarter of 2009) as of June 30, 2010. A cumulative loss position is considered significant negative evidence in assessing the realizability of a deferred tax asset which is difficult to overcome.

The Company's estimate of the realization of its net DTA was based on the scheduled reversal of deferred tax liabilities and taxable income available in prior carry back years, and tax planning strategies.

Changes in Financial Condition

Total assets at December 31, 2010 were \$2,406,040 compared with \$2,619,139 at December 31, 2009 a decrease of \$213,099. Major changes in the balance sheet categories reflect a decline in loan balances of \$298,429 from the prior year comprised of loan charge-offs of \$54,438 and transfers to foreclosures of \$54,613 accompanied with a decline in lending associated with the current challenging conditions in the economy. These decreases were offset by an increase of \$83,720 in cash and cash equivalents and interest earning deposits in banks. Average assets for 2010 also decreased to \$2,511,446, a reduction of \$271,209, or 10%, from the average asset balance of \$2,782,655 for 2009. This decrease in average assets was also due primarily to the items mentioned previously. The Company's return on average assets was (3.41%) in 2010 and (5.59%) in 2009, principally as a result of significant provisioning expense and OREO expenses in 2010 and the goodwill impairment charge in 2009.

Total assets at December 31, 2009 were \$2,619,139, a decrease of \$325,532 from total assets of \$2,944,671 at December 31, 2008. Major changes in the balance sheet categories reflect a decline in loan balances of \$179,583 from the prior year comprised of loan charge-offs of \$48,896 and transfers to foreclosures of \$75,545 accompanied with a decline in lending associated with recessionary conditions in the economy. An increase of \$23,136 in cash and cash equivalents from year-end 2008 was driven principally by the deleveraging of the balance sheet through reducing investment portfolio holdings, partially offset by liquidating borrowed funds. Average assets for 2009 declined to \$2,782,655 from \$2,956,280 in 2008, a decrease of \$173,625. This decrease in average assets was due primarily to the decline in average loan volume of \$202,724.

Earning assets consist of loans, investment securities and short-term investments that earn interest. Average earning assets during 2010 were \$2,185,498 compared with \$2,433,476 in 2009, a decrease of 10%. The decrease in average earnings assets was due primarily to the reduction of loan and investment securities balances throughout 2010 as the Company de-levered the Balance Sheet plus the general decline in demand for loans associated with challenging conditions in the economy.

Nonperforming loans include nonaccrual loans and loans past due 90 days and still on accrual. The Company has a policy of placing loans 90 days delinquent in nonaccrual status and charging them off at 120 days past due. Other loans past due that are well secured and in the process of collection continue to be carried on the Company's balance sheet. For further information, see Notes 1 and 3 of the Notes to Consolidated Financial Statements. The Company has aggressive collection practices in which senior management is significantly and directly involved.

The Company maintains an investment portfolio to primarily cover pledging requirements for deposits and borrowings and secondarily as a source of liquidity while modestly adding to earnings. Investments at December 31, 2010 had an amortized cost of \$200,824 and a market value of \$202,469 compared with investments at December 31, 2009 which had an amortized cost of \$148,040 and a market value of \$148,362. As excess balance sheet liquidity continued to build throughout 2010, the Company increased its investment portfolio accordingly. The Company invests principally in callable federal agency securities. These callable federal agency securities will provide a higher yield than non-callable securities with similar maturities. The primary risk involved in callable securities is that they may be called prior to maturity and the call proceeds received would be re-invested at lower yields. In 2010, the Company purchased \$137,297 of callable federal agency securities, which have a high likelihood of being called on the first call date, \$31,538 of collateralized mortgage obligations, and \$2,985 of mortgage-backed securities. Also in 2010, the Company received \$9,095 from the pay down of collateralized mortgage obligations, \$2,233 from the pay down of mortgage-backed securities, \$105,890 on the maturity or call of various U.S. agency securities, and \$1,025 from the maturity or call of municipal securities.

The Company's deposits totaled \$1,976,854 at December 31, 2010, which represents a decrease of \$107,242, or 5%, from \$2,084,096 at December 31, 2009. Non-interest bearing demand deposit balances declined to \$152,752 at December 31, 2010 from \$177,602 at December 31, 2009. The decrease in total deposits was due primarily to the reduction of \$83,155 in Certificates of Deposits in excess of \$100,000. Average interest-bearing deposits decreased \$128,439, or 7%, to \$1,822,336 from \$1,950,775 at December 31, 2009. In 2009, average interest-bearing deposits decreased \$12,223, or 1%, to \$1,950,775 from \$1,962,998 at December 31, 2008.

Interest paid on deposits in 2010 was \$28,434 at an effective rate of 1.56% compared with \$45,768 in 2009 at an average cost of 2.35% as market interest rates declined throughout 2010. In 2008, interest of \$58,090 was paid at a cost of 2.96% on average deposits of \$1,962,998.

Liquidity and Capital Resources

Liquidity. Liquidity refers to the ability or the financial flexibility to manage future cash flows to meet the needs of depositors and borrowers and fund operations. Maintaining appropriate levels of liquidity allows the Company to have sufficient funds available for reserve requirements, customer demand for loans, withdrawal of deposit balances and maturities of deposits and other liabilities. The Company's primary source of liquidity is dividends paid by the Bank. Applicable Tennessee statutes and regulations impose restrictions on the amount of dividends that may be declared by the Bank. Under Tennessee law, the Bank can only pay dividends to the Company in an amount equal to or less than the total amount of its net income for that year combined with retained net income for the preceding two years. Payment of dividends in excess of this amount requires the consent of the Commissioner of the Tennessee Department of Financial Institutions ("TDFI"), FDIC, and the Federal Reserve Bank of Atlanta ("FRB-Atlanta"). Further, any dividend payments are subject to the continuing ability of the Bank to maintain compliance with minimum federal regulatory capital requirements, or any higher requirements that the Bank may be subject to, (like those that the Bank has informally committed to the TDFI and FDIC that it will maintain), and to retain its characterization under federal regulations as a "well-capitalized" institution. Because of the Bank's losses in 2009 and 2010, dividends from the Bank to the Company, including funds for payment of dividends on preferred stock and trust preferred, including the preferred stock issued to the U.S. Treasury, and interest on trust preferred securities to the extent that the Company does not have sufficient cash available at the holding company level, will require prior approval of the TDFI, FDIC and FRB.

Supervisory guidance from the FRB indicates that bank holding companies that are experiencing financial difficulties generally should eliminate, reduce or defer dividends on Tier 1 capital instruments including trust preferred securities, preferred stock or common stock, if the holding company needs to conserve capital for safe and sound operation and to serve as a source of strength to its subsidiaries. The Company has informally committed to the FRB that it will not (1) declare or pay dividends on the Company's common or preferred stock, including the preferred shares owned by the U.S. Treasury (2) make any distributions on subordinated debentures or trust preferred securities or (3) incur any additional indebtedness without in each case, the prior written approval of the FRB. On November 9, 2010, following consultation with the FRB-Atlanta, the Company notified the U.S. Treasury that the Company was suspending the payment of regular quarterly cash dividends on the Series A preferred stock issued to the U.S. Treasury. The dividends, which are cumulative, will continue to be accrued for payment in the future and reported as a preferred dividend requirement that is deducted from net income for financial statement purposes. Additionally, following consultation with the FRB-Atlanta, the Company has exercised its rights to defer regularly scheduled interest payments on all of its issues of junior subordinated notes having an outstanding principal amount of \$88.6 million, relating to outstanding trust preferred securities ("TRUPs"). In addition, the Company maintains borrowing availability with the FHLB which was fully utilized at December 31, 2010. The Company also maintains federal funds lines of credit totaling \$70,000 at four correspondent banks of which \$70,000 was available at December 31, 2010, and \$10,000 of the federal funds lines of credit is secured by cash on deposit. The Company believes it has sufficient liquidity to satisfy its current operating needs.

In 2010, operating activities of the Company provided \$44,842 of cash flows. Cash flows from operating activities were positively affected by various non-cash items, including (i) \$71,107 in provision for loan losses, (ii) \$7,152 of depreciation and amortization, (iii) \$29,895 net loss on OREO and repossessed assets, and (iv) \$26,739 in deferred tax expense. This was offset in part by (i) a net loss of \$80,695, (ii) a decrease in other assets of \$4,139 and (iii) a reduction in accrued interest payable and other liabilities of \$5,505. In addition, cash flows from operating

activities were increased by the proceeds from the sale of held-for-sale loans of \$47,881, offset by cash used to originate held-for-sale loans of \$46,994.

Investing activities, including lending, provided \$167,213 of the Company's cash flows in 2010. Cash flows from investing activities increased from (i) the sale of OREO in the amount of \$16,136, (ii) the net decrease in interest-bearing deposits with banks of \$11,000 and (iii) the net decrease in loans of \$195,847. Investments from the purchase of securities in excess of maturities from securities available for sale over in the amount of \$53,414 and premises and equipment of \$1,551 in 2010 reduced cash provided from investing activities.

Net cash flows of \$128,335 were used by financing activities. The financing cash flow activity in 2010 with respect to notes payable reflected a repayment of funds in the amount of \$13,346 and a repayment of funds of \$57,350 during 2009. The Company elected to repay FHLB advances by the overall contraction of the balance sheet. In addition, federal funds purchased and repurchase agreements were reduced by \$5,036 during 2009. Cash flows used by the net change in total deposits reduced deposits by \$107,242, as the continued to reduce the size of the balance sheet. The Company's cash flow from financing activities was also decreased by the Company's dividend payments during 2010 of \$2,711 on preferred stock.

Capital Resources. The Company's regulatory capital position is reflected in its shareholders' equity, subject to certain adjustments for regulatory purposes. Shareholders' equity, or capital, is a measure of the Company's net worth, soundness and viability. The Company's capital continued to exceed the regulatory definition of a "well capitalized" financial institution at December 31, 2010, but fell below the levels that the Bank informally committed to the TDFI and FDIC that it would maintain. Management believes the capital base of the Company allows it to consider business opportunities while maintaining the level of resources deemed appropriate by management of the Company to address business risks inherent in the Company's daily operations.

On September 25, 2003, the Company issued \$10,310 of subordinated debentures, as part of a privately placed pool of trust preferred securities. The securities, due in 2033, bear interest at a floating rate of 2.85% above the three-month LIBOR rate, reset quarterly, and are currently callable by the Company without penalty. The Company used the proceeds of the offering to support its acquisition of Independent Bankshares Corporation, and the capital raised from the offering qualified as Tier 1 capital for regulatory purposes.

On June 28, 2005, the Company issued an additional \$3,093 of subordinated debentures, as part of a privately placed pool of trust preferred securities. The securities, due in 2035, bear interest at a floating rate of 1.68% above the three-month LIBOR rate, reset quarterly, and are callable by the Company five years from the date of issuance without penalty. The Company used the proceeds to augment its capital position in connection with its significant asset growth, and the capital raised from the offering qualifies as Tier 1 capital for regulatory purposes.

On May 16, 2007, the Company issued \$57,732 of subordinated debentures, as part of a privately placed pool of trust preferred securities. The securities, due in 2037, bear interest at a floating rate of 1.65% above the three-month LIBOR rate, reset quarterly, and are callable by the Company five years from the date of issuance without penalty. The Company used the proceeds of the offering to support its acquisition of CVBG, and the capital raised from the offering qualified as Tier I capital for regulatory purposes.

On May 18, 2007 the Company assumed the obligations of the following two trusts in the CVBG acquisition.

- On December 28, 2005, CVBG issued \$13,403 of subordinated debentures, as part of a privately placed pool of trust preferred securities. The securities, due in 2036, bear interest at a floating rate of 1.54% above the three-month LIBOR rate, reset quarterly, and are callable five years from the date of issuance without penalty.
- On July 31, 2001, CVBG issued \$4,124 of subordinated debentures, as part of a privately placed pool of trust preferred securities. The securities, due in 2031, bear interest at a floating rate of 3.58% above the three-month LIBOR rate, reset quarterly, and are currently callable without penalty.

During 2007 the FRB issued regulations which allow continued inclusion of outstanding and prospective issuances of trust preferred securities as Tier 1 capital subject to stricter quantitative and qualitative limits than allowed under prior regulations. The new limits will phase in over a five-year transition period and would permit the Company's trust preferred securities, including those obligations assumed in the CVBG acquisition, to continue to be treated as Tier 1 capital. Under the Dodd-Frank Act, the Company's trust preferred securities should continue to qualify as Tier I capital.

The Company's ability to repurchase the trust preferred securities or pay dividends on the trust preferred securities, may be limited as a result of the Company's participation in the CPP, as described above and is limited by the informal commitment the Company made to the FRB-Atlanta in 2010, also as described above.

Shareholders' equity on December 31, 2010 was \$143,897, a decrease of \$82,872, or 37%, from \$226,769 on December 31, 2009. The decrease in shareholders' equity was primarily driven by the net loss available to common shareholders of \$85,696 in 2010.

On December 23, 2008 the Company entered into a definitive agreement with the U.S. Treasury. Pursuant to the Agreement, we sold to the U.S. Treasury 72,280 shares of Series A preferred stock, having a liquidation amount equal to \$1,000 per share, with an attached warrant (the "Warrant") to purchase 635,504 shares of our common stock, par value \$2.00 per share, for \$17.06 per share.

The preferred stock qualifies as Tier 1 capital and pays cumulative dividends at a rate of 5% per year, for the first five years, and 9% per year thereafter. The Warrant has a 10-year term and an exercise price, subject to anti-dilution adjustments, equal to \$17.06 per share of common stock.

The Company is permitted to redeem the Series A preferred stock at any time without penalty subject to the U.S. Treasury's consultation with the Company's and the Bank's appropriate regulatory agency.

Risk-based capital regulations adopted by the FRB and the FDIC require both bank holding companies and banks to achieve and maintain specified ratios of capital to risk-weighted assets. The risk-based capital rules are designed to measure "Tier 1" capital (consisting of stockholders' equity and trust preferred securities, less goodwill) and total capital in relation to the credit risk of both on- and off-balance sheet items. Under the guidelines, one of four risk weights is applied to the different on-balance sheet items. Off-balance sheet items, such as loan commitments, are also subject to risk weighting after conversion to balance sheet equivalent amounts. All bank holding companies and banks must maintain a minimum total capital to total risk-weighted assets ratio of 8.00%, at least half of which must be in the form of core, or Tier 1, capital. At December 31, 2010, the Company and the Bank each satisfied their respective minimum regulatory capital requirements, and the Bank was "well-capitalized" within the meaning of federal regulatory requirements. In light of declining asset quality and earnings in 2010, the Bank informally committed to the TDFI and the FDIC that, among other things, it would maintain a Tier 1 leverage ratio (Tier 1 Capital to Average Assets) of at least 10% and Total risk-based capital ratio (Total Capital to Risk Weighted Assets) of at least 14%.

As reflected in the table below, the Bank did not satisfy these higher ratio requirements at December 31, 2010. Actual capital levels and minimum levels (in millions) were:

	<u>Actual</u>		<u>Minimum Required for Capital Adequacy Purposes</u>		<u>Minimum Amounts to be Well Capitalized Under Prompt Corrective Action Provisions</u>	
	<u>Actual</u>	<u>Ratio (%)</u>	<u>Actual</u>	<u>Ratio (%)</u>	<u>Actual</u>	<u>Ratio (%)</u>
<u>2010</u>						
Total Capital (to Risk Weighted Assets)

Bank	290.4	10.7	108.6	4.0	135.7	5.0

Off-Balance Sheet Arrangements

At December 31, 2010, the Company had outstanding unused lines of credit and standby letters of credit totaling \$227,647 and unfunded loan commitments outstanding of \$6,291. Because these commitments generally have fixed expiration dates and many will expire without being drawn upon, the total commitment level does not necessarily represent future cash requirements. If needed to fund these outstanding commitments, the Company has the ability to liquidate federal funds sold or securities available-for-sale or, on a short-term basis, to borrow or purchase federal funds from other financial institutions. At December 31, 2010, the Company had accommodations with upstream correspondent banks for unsecured federal funds lines. These accommodations have various covenants related to their term and availability, and in most cases must be repaid within less than a month. The following table presents additional information about the Company's commitments as of December 31, 2010, which by their terms has contractual maturity dates subsequent to December 31, 2010:

	<u>Less than 1 Year</u>	<u>1-3 Years</u>	<u>3-5 Years</u>	<u>More than 5 Years</u>	<u>Total</u>
Commitments to make loans – fixed	\$ 3,827	\$ -	\$ -	\$ -	\$ 3,827
Commitments to make loans – variable.....	2,464	-	-	-	2,464
Unused lines of credit.....	101,145	14,460	13,457	72,911	201,973
Letters of credit	<u>17,632</u>	<u>8,042</u>	<u>-</u>	<u>-</u>	<u>25,674</u>
Total	<u>\$ 125,068</u>	<u>\$ 22,502</u>	<u>\$ 13,457</u>	<u>\$ 72,911</u>	<u>\$ 233,938</u>

Asset/Liability Management

The Company's Asset/Liability Committee ("ALCO") actively measures and manages interest rate risk using a process developed by the Bank. The ALCO is also responsible for recommending the Company's asset/liability management policies to the Board of Directors for approval, overseeing the formulation and implementation of

strategies to improve balance sheet positioning and earnings, and reviewing the Company's interest rate sensitivity position.

The primary tool that management uses to measure short-term interest rate risk is a net interest income simulation model prepared by an independent national consulting firm and reviewed by another separate and independent national consulting firm. These simulations estimate the impact that various changes in the overall level of interest rates over one- and two-year time horizons would have on net interest income. The results help the Company develop strategies for managing exposure to interest rate risk.

Like any forecasting technique, interest rate simulation modeling is based on a large number of assumptions. In this case, the assumptions relate primarily to loan and deposit growth, asset and liability prepayments, interest rates and balance sheet management strategies. Management believes that both individually and in the aggregate the assumptions are reasonable. Nevertheless, the simulation modeling process produces only a sophisticated estimate, not a precise calculation of exposure.

The Company's current guidelines for interest rate risk management call for preventive measures if a gradual 200 basis point increase or decrease in short-term rates over the next 12 months would affect net interest income over the same period by more than 18.5%. The Company has been operating well within the guidelines. As of December 31, 2010 and 2009, based on the results of the independent consulting firm's simulation model, the Company could expect net interest income to increase by approximately 6.31% and 12.75%, respectively, if short-term interest rates immediately increase by 200 basis points. Conversely, if short-term interest rates immediately decrease by 200 basis points, net interest income could be expected to decrease by approximately 5.40% and 14.20%, respectively.

The scenario described above, in which net interest income increases when interest rates increase and decreases when interest rates decline, is typically referred to as being "asset sensitive" because interest-earning assets exceed interest-bearing liabilities. At December 31, 2010, approximately 43% of the Company's gross loans had adjustable rates. While management believes, based on its asset/liability modeling, that the Company is liability sensitive as measured over the one year time horizon, it also believes that a rapid, significant and prolonged increase or decrease in rates could have a substantial adverse impact on the Company's net interest margin.

The Company's net interest income simulation model incorporates certain assumptions with respect to interest rate floors on certain deposits and other liabilities. Further, given the relatively low interest rates on some deposit products, a 200 basis point downward shock could very well reduce the costs on some liabilities below zero. In these cases, the Company's model incorporates constraints which prevent such a shock from simulating liability costs to zero.

The Company also uses an economic value of equity model, prepared and reviewed by the same independent national consulting firm, to complement its short-term interest rate risk analysis. The benefit of this model is that it measures exposure to interest rate changes over time frames longer than the two-year net interest income simulation. The economic value of the Company's equity is determined by calculating the net present value of projected future cash flows for current asset and liability positions based on the current yield curve.

Economic value analysis has several limitations. For example, the economic values of asset and liability balance sheet positions do not represent the true fair values of the positions, since economic values reflect an analysis at one particular point in time and do not consider the value of the Company's franchise. In addition, we must estimate cash flow for assets and liabilities with indeterminate maturities. Moreover, the model's present value calculations do not take into consideration future changes in the balance sheet that will likely result from ongoing loan and deposit activities conducted by the Company's core business. Finally, the analysis requires assumptions about events which span several years. Despite its limitations, the economic value of equity model is a relatively sophisticated tool for evaluating the long term effect of possible interest rate movements.

The Company's current guidelines for risk management call for preventive measures if an immediate 200 basis point increase or decrease in interest rates would reduce the economic value of equity by more than 23%. The Company operated well within the upper guideline but did not operate within the lower guideline for this ratio as of December 31, 2010. As of December 31, 2010 and 2009, based on the results of an independent

national consulting firm's simulation model and reviewed by a separate independent national consulting firm, the Company could expect its economic value of equity to increase by approximately 16.71% and 10.48%, respectively, if short-term interest rates immediately increased by 200 basis points. Conversely, if short-term interest rates immediately decrease by 200 basis points, economic value of equity could be expected to decrease by approximately 27.85% and 21.94%, at December 31, 2010 and 2009, respectively. The down 200 basis point scenario came in below the Company's minimum operating guideline of 23% as a result of loan transfers to OREO and non-accrual status thus reducing the impact of the down 200 basis point scenario from the asset side of our balance sheet.

Disclosure of Contractual Obligations

In the ordinary course of operations, the Company enters into certain contractual obligations. Such obligations include the funding of operations through debt issuances as well as leases for premises and equipment. The following table summarizes the Company's significant fixed and determinable contractual obligations as of December 31, 2010:

	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years	Total
Certificate of deposits.....	\$ 531,829	\$ 192,743	\$ 55,068	\$ 3,446	\$ 783,086
Repurchase agreements	19,413	-	-	-	19,413
FHLB advances and notes payable.....	15,288	65,566	30,605	47,194	158,653
Subordinated debentures.....	-	-	-	88,662	88,662
Operating lease obligations	1,243	2,294	1,226	734	5,497
Deferred compensation.....	1,543	-	256	475	2,274
Purchase obligations	1,611	-	-	-	1,611
Total	<u>\$ 570,927</u>	<u>\$ 260,603</u>	<u>\$ 87,155</u>	<u>\$ 140,511</u>	<u>\$ 1,059,196</u>

Additionally, the Company routinely enters into contracts for services. These contracts may require payment for services to be provided in the future and may also contain penalty clauses for early termination of the contract. Management is not aware of any additional commitments or contingent liabilities which may have a material adverse impact on the liquidity or capital resources of the Company.

Inflation

The effect of inflation on financial institutions differs from its impact on other types of businesses. Since assets and liabilities of banks are primarily monetary in nature, they are more affected by changes in interest rates than by the rate of inflation.

Inflation generates increased credit demand and fluctuation in interest rates. Although credit demand and interest rates are not directly tied to inflation, each can significantly impact net interest income. As in any business or industry, expenses such as salaries, equipment, occupancy, and other operating expenses also are subject to the upward pressures created by inflation.

Since the rate of inflation has been stable during the last several years, the impact of inflation on the earnings of the Company has been insignificant.

Effect of New Accounting Standards

FASB – ASU – 2010-06 – In January 2010, the FASB issued additional guidance on fair value disclosures. The new guidance clarifies two existing disclosure requirements and requires two new disclosures as follows: (1) a “gross” presentation of activities (purchases, sales, and settlements) within the Level 3 rollforward reconciliation, which will replace the “net” presentation format; and (2) detailed disclosures about the transfers in and out of Level 1 and 2 measurements. This guidance is effective for the first interim or annual reporting period beginning after December 15, 2009, except for the gross presentation of the Level 3 rollforward information, which is required for annual reporting periods beginning after December 15, 2010, and for interim reporting periods within those years.

The Company adopted the fair value disclosures guidance on January 1, 2010, except for the gross presentation of the Level 3 rollforward information which is not required to be adopted by the Company until January 1, 2011.

FASB – ASC – 810 and amended by FASB ASU – 2010-10 became effective on January 1, 2010, and was amended to change how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity’s purpose and design and a company’s ability to direct the activities of the entity that most significantly impact the entity’s economic performance. The new authoritative accounting guidance requires additional disclosures about the reporting entity’s involvement with variable-interest entities and any significant changes in risk exposure due to that involvement as well as its affect on the entity’s financial statements. The new authoritative accounting guidance under ASC 810 was effective January 1, 2010 and did not have a significant impact on the Company’s financial statements.

FASB – ASU – 2010-20 - “Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses” The new standard governing the disclosures associated with credit quality and the allowance for loan losses. This standard requires additional disclosures related to the allowance for loan loss with the objective of providing financial statement users with greater transparency about an entity’s loan loss reserves and overall credit quality. Additional disclosures include showing on a disaggregated basis the aging of receivables, credit quality indicators, and troubled debt restructures with its effect on the allowance for loan loss. The provisions of this standard were effective for interim and annual periods ending on or after December 15, 2010. The adoption of this standard did not have a material impact on the Company’s financial position and results of operations, but did increase the amount and quality of the credit disclosures in the notes to the consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information set forth on pages 52 through 54 of Item 7, “MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS – Asset/Liability Management” is incorporated herein by reference.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Management's Annual Report on Internal Control Over Financial Reporting

The Company's management is responsible for establishing and maintaining effective internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. GAAP. The Company's internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2010. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework.

As a result of management's evaluation of the Company's internal controls over financial reporting, management identified deficiencies, that when evaluated in combination, lead to the determination that there is a reasonable possibility that the Company's internal controls could fail to prevent or detect a material misstatement on a timely basis as of December 31, 2010. Accordingly, as a result of this material weakness, management has concluded that the Company's internal control over financial reporting was not effective as of December 31, 2010. This material weakness relates to controls surrounding the valuation, documentation and review of impaired loans and other real estate owned at December 31, 2010. As a result of this material weakness, management has adopted a specific action plan to address these deficiencies in internal controls which are discussed in more detail below in Item 9A. Controls and Procedures.

The Company's independent registered public accounting firm has issued a report on the effectiveness of the Company's internal control over financial reporting. That report appears on pages 57 and 58 of this Report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

BOARD OF DIRECTORS AND SHAREHOLDERS
GREEN BANKSHARES, INC.

We have audited Green Bankshares, Inc. and subsidiaries' (the "Company") internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. A combination of deficiencies noted as of December 31, 2010 give rise to the following material weakness which is included in management's assessment. As of December 31, 2010, the Company did not have adequate internal controls surrounding the valuation, documentation and review of impaired loans and other real estate owned. This material weakness was considered in determining the nature, timing and extent of audit tests applied in our audit of the 2010 consolidated financial statements, and this report does not affect our report dated March 15, 2011 on those consolidated financial statements.

In our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, Green Bankshares, Inc. and subsidiaries has not maintained effective internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of Green Bankshares, Inc. and subsidiaries as of December 31, 2010 and 2009 and for each of the years in the three-year period ended December 31, 2010, and our report dated March 15, 2011, expressed an unqualified opinion on those consolidated financial statements. Our report on the consolidated financial statements referred to above refers to the adoption of a new accounting standard in relation to accounting for other-than-temporary impairments of debt securities in 2009.

Atlanta, Georgia
March 15, 2011

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

BOARD OF DIRECTORS AND SHAREHOLDERS
GREEN BANKSHARES, INC.

We have audited the accompanying consolidated balance sheets of Green Bankshares, Inc. and subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of income, changes in shareholders' equity and cash flows for each of the years in the three-year period ended December 31, 2010. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by Management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Green Bankshares, Inc. and subsidiaries as of December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2010, in conformity with accounting principles generally accepted in the United States of America.

Effective January 1, 2009, the Company changed its method of accounting for other-than-temporary impairments of debt securities in connection with the adoption of revised accounting guidance issued by the Financial Accounting Standards Board.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Green Bankshares, Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 15, 2011 expressed an adverse opinion on the effectiveness of the Company's internal control over financial reporting.

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation: The consolidated financial statements include the accounts of Green Bankshares, Inc. (the "Company") and its wholly owned subsidiary, GreenBank (the "Bank"), and the Bank's wholly owned subsidiaries, Superior Financial Services, Inc., GCB Acceptance Corp., Inc., Fairway Title Company, Inc, and GB Holdings, LLC. All significant inter-company balances and transactions have been eliminated in consolidation.

Nature of Operations: The Company primarily provides financial services through its offices in Eastern, Middle and Southeastern Tennessee, Western North Carolina and Southwestern Virginia. Its primary deposit products are checking, savings, and term certificate accounts, and its primary lending products are residential mortgage, commercial, and installment loans. Substantially all loans are secured by specific items of collateral including business assets, consumer assets and real estate. Commercial loans are expected to be repaid from cash flow from operations of businesses. Real estate loans are secured by both residential and commercial real estate.

Use of Estimates: To prepare financial statements in conformity with accounting principles generally accepted in the United States of America, management makes estimates and assumptions based on available information. These estimates and assumptions impact the amounts reported in the financial statements and the disclosures provided, and future results could differ. The allowance for loan losses, deferred tax asset valuation, OREO valuation and fair values of financial instruments are significant items based on estimates and assumptions.

Cash Flows: Cash and cash equivalents include cash, deposits with other financial institutions under 90 days, and federal funds sold. Net cash flows are reported for loan, deposit and other borrowing transactions.

Securities: Securities are classified as held to maturity and carried at amortized cost when management has the positive intent and ability to hold them to maturity. Securities are classified as available for sale when they might be sold before maturity. Securities available for sale are carried at fair value, with unrealized holding gains and losses reported in accumulated other comprehensive income.

Interest income includes amortization of purchase premium or discount and is recognized based upon the level-yield method. Gains and losses on sales are based on the amortized cost of the security sold. Securities are written down to fair value when a decline in fair value is other than temporary.

Investments in Equity Securities Carried at Cost: Investment in Federal Home Loan Bank ("FHLB") stock, which is carried at cost because it can only be redeemed at par, is a required investment based on membership requirements. The Bank also carries certain other equity investments at cost, which approximates fair value.

Loans: Loans are reported at the principal balance outstanding, net of unearned interest, deferred loan fees and costs.

Interest income is reported on the interest method over the loan term. Loan origination fees, net of certain direct origination costs, are deferred and recognized in interest income using the level-yield method. Interest income includes amortization of purchase premiums or discounts on loans purchased. Premiums and discounts are amortized on the level yield-method. Interest income on mortgage and commercial loans is discontinued at the time the loan is 90 days delinquent unless the loan is well secured and in process of collection. Most consumer loans are charged off no later than 120 days past due. In all cases, loans are placed on nonaccrual or charged off at an earlier date if collection of principal and interest is doubtful. Interest accrued but not collected is reversed against interest income when a loan is placed on nonaccrual status.

(Continued)

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Interest received is recognized on the cash basis or cost recovery method until qualifying for return to accrual status. Accrual is resumed when all contractually due payments are brought current, six months of payment performance can be measured, and future payments are reasonably assured.

Allowance for Loan Losses: The allowance for loan losses is a valuation allowance for probable incurred credit losses, increased by the provision for loan losses and decreased by charge-offs less recoveries. Management estimates the allowance balance required using past loan loss experience, known and inherent risks in the nature and volume of the portfolio, information about specific borrower situations and estimated collateral values, economic conditions, and other factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged-off. Loan losses are charged against the allowance when management believes the uncollectibility of a loan is confirmed.

The Bank uses several factors in determining if a loan is impaired. The internal asset classification procedures include a thorough review of significant loans and lending relationships and include the accumulation of related data. This data includes loan payment and collateral status, borrowers' financial data and borrowers' operating factors such as cash flows, operating income, liquidity, leverage and loan documentation, and any significant changes. A loan is considered impaired, based on current information and events, if it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Uncollateralized loans are measured for impairment based on the present value of expected future cash flows discounted at the historical effective interest rate, while all collateral-dependent loans are measured for impairment based on the fair value of the collateral. Larger groups of smaller balance, homogeneous loans, such as consumer and residential real estate loans, are collectively evaluated for impairment, and accordingly, they are not separately identified for impairment disclosures.

Foreclosed Assets: Assets acquired through or instead of loan foreclosure are initially recorded at fair value less estimated cost to sell when acquired, establishing a new cost basis. If fair value declines, a valuation allowance is recorded through expense. Costs after acquisition are expensed.

Premises and Equipment: Premises and equipment are stated at cost less accumulated depreciation. Depreciation is computed over an asset's useful life on a straight-line basis. Buildings and related components have useful lives ranging from 10 to 40 years, while furniture, fixtures and equipment have useful lives ranging from 3 to 10 years. Leasehold improvements are amortized over the lesser of the life of the asset or lease term.

Mortgage Banking Activities: Mortgage loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or market value. The Company controls its interest rate risk with respect to mortgage loans held for sale and loan commitments expected to close by usually entering into agreements to sell loans. The Company records loan commitments related to the origination of mortgage loans held for sale as derivative instruments. The Company's commitments for fixed rate mortgage loans, generally last 60 to 90 days and are at market rates when initiated. The Company had \$4,813 in outstanding loan commitment derivatives at December 31, 2010. The aggregate market value of mortgage loans held for sale takes into account the sales prices of such agreements. The Company also provides currently for any losses on uncovered commitments to lend or sell. The Company sells mortgage loans servicing released.

Bank Owned Life Insurance: The Company has purchased life insurance policies on certain key executives. Company owned life insurance is recorded at its cash surrender value or the amount that can be realized.

(Continued)

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Goodwill, Core Deposit Intangibles and Other Intangible Assets: Goodwill results from prior business acquisitions and represents the excess of the purchase price over the fair value of acquired tangible assets and liabilities and identifiable intangible assets. Goodwill is assessed at least annually for impairment and any such impairment is recognized in the period identified. During the second quarter of 2009 the Company identified impairment in its goodwill resulting from a prolonged decline in the market value of its stock price relative to book value, and took the appropriate actions. This is explained further in “*Note 6 – Goodwill and Other Intangible Assets*”.

Core deposit intangible assets arise from whole bank and branch acquisitions. They are initially measured at fair value and then are amortized on a straight line method over their estimated useful lives, which range from seven to 15 years and are determined by an independent consulting firm. Core deposit intangible assets are assessed at least annually for impairment and any such impairment is recognized in the period identified.

Other intangible assets consist of mortgage servicing rights (“MSR’s”). MSR’s represent the cost of acquiring the rights to service mortgage loans. MSR’s are amortized based on the principal reduction of the underlying loans. The Company is obligated to service the unpaid principal balances of these loans, which were approximately \$33 million and \$43 million as of December 31, 2010 and 2009, respectively. The Company pays a third party subcontractor to perform servicing and escrow functions with respect to loans sold with retained servicing. MSR’s are assessed at least annually for impairment. The Company does not intend to further pursue this line of business.

Long-term Assets: Premises and equipment and other long-term assets are reviewed for impairment when events indicate their carrying amount may not be recoverable from future undiscounted cash flows. If impaired, the assets are recorded at fair value.

Repurchase Agreements: All repurchase agreement liabilities represent secured borrowings from existing Bank customers and are not covered by federal deposit insurance.

Benefit Plans: Retirement plan expense is the amount contributed to the plan as determined by Board decision. Deferred compensation expense is recognized during the year the benefit is earned.

Stock Compensation: Compensation cost for stock-based payments is measured based on the fair value of the award, which most commonly includes restricted stock (i.e., unvested common stock), stock options, and stock appreciation rights at the grant date and is recognized in the consolidated financial statements on a straight-line basis over the requisite service period for service-based awards. The fair value of restricted stock is determined based on the price of the Company’s common stock on the date of grant. The fair value of stock options is estimated at the date of grant using a Black-Scholes option pricing model and related assumptions.

Income Taxes: Income tax expense is the total of the current year income tax due or refundable and the change in deferred tax assets and liabilities. Deferred tax assets and liabilities are the expected future tax amounts for the temporary differences between carrying amounts and tax bases of assets and liabilities, computed using enacted tax rates. A valuation allowance reduces deferred tax assets to the amount expected to be realized and as of December 31, 2010 the Company had recorded a deferred tax valuation allowance of \$43,455.

Loan Commitments and Related Financial Instruments: Financial instruments include credit instruments, such as commitments to make loans and standby letters of credit, issued to meet customer financing needs. The face amount for these items represents the exposure to loss before considering customer collateral or ability to repay. Such financial instruments are recorded when they are funded. Instruments such as standby letters of credit are considered financial guarantees in accordance with applicable accounting standards. The fair value of these financial guarantees is not material.

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Earnings (loss) Per Common Share: Basic earnings (loss) per common share are net income (loss) available to common shareholders divided by the weighted average number of common shares outstanding during the period. Diluted earnings available to common shareholders per common share includes the dilutive impact of additional potential common shares issuable under stock options, unvested restricted stock awards and stock warrants issued to the U.S. Treasury in connection with the Capital Purchase Program.

Comprehensive Income: Comprehensive income consists of net income and other comprehensive income. Other comprehensive income includes unrealized gains and losses on securities available for sale which are also recognized as a separate component of equity. Comprehensive income is presented in the consolidated statements of changes in shareholders' equity.

Recent Accounting Pronouncements: FASB – ASU – 2010-06 – In January 2010, the FASB issued additional guidance on fair value disclosures. The new guidance clarifies two existing disclosure requirements and requires two new disclosures as follows: (1) a “gross” presentation of activities (purchases, sales, and settlements) within the Level 3 rollforward reconciliation, which will replace the “net” presentation format; and (2) detailed disclosures about the transfers in and out of Level 1 and 2 measurements. This guidance is effective for the first interim or annual reporting period beginning after December 15, 2009, except for the gross presentation of the Level 3 rollforward information, which is required for annual reporting periods beginning after December 15, 2010, and for interim reporting periods within those years. The Company adopted the fair value disclosures guidance on January 1, 2010, except for the gross presentation of the Level 3 rollforward information which is not required to be adopted by the Company until January 1, 2011.

FASB – ASC – 810 and amended by FASB ASU – 2010-10 became effective on January 1, 2010, and was amended to change how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. The determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. The new authoritative accounting guidance requires additional disclosures about the reporting entity's involvement with variable-interest entities and any significant changes in risk exposure due to that involvement as well as its affect on the entity's financial statements. The new authoritative accounting guidance under ASC 810 was effective January 1, 2010 and did not have a significant impact on the Company's financial statements.

FASB – ASU – 2010-20 - “Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses. The Company adopted the new standard governing the disclosures associated with credit quality and the allowance for loan losses. This standard requires additional disclosures related to the allowance for loan loss with the objective of providing financial statement users with greater transparency about an entity's loan loss reserves and overall credit quality. Additional disclosures include showing on a disaggregated basis the aging of receivables, credit quality indicators, and troubled debt restructures with its effect on the allowance for loan loss. The provisions of this standard were effective for interim and annual periods ending on or after December 15, 2010. The adoption of this standard did not have a material impact on the Company's financial position and results of operations, but did increase the amount and quality of the credit disclosures in the notes to the consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Loss Contingencies: Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. In the third quarter of 2010, we recognized significant losses as a result of higher costs related to loan charge-offs, coupled with losses incurred on OREO resulting from sales completed and updated property appraisals received during that quarter. As a result, various plaintiffs filed class action lawsuits, which have subsequently been consolidated into one class action, alleging, among other things, disclosure violations regarding our collateral valuations, the timing of our impairment charges and our accounting for loan charge-offs. The defense of this matter has and will continue to entail considerable cost and will be time-consuming for our management. Unfavorable outcomes in this matter could have an adverse effect on our business, financial condition, results of operations and cash flows.

Restrictions on Cash: Cash on hand or on deposit with the Federal Reserve Bank of \$14,457 and \$19,245 was required to meet regulatory reserve and clearing requirements at year-end 2010 and 2009. These balances do not earn interest.

Segments: Internal financial reporting is primarily reported and aggregated in five lines of business: banking, mortgage banking, consumer finance, subprime automobile lending, and title insurance. Banking accounts for 93.6% of revenues for 2010.

Fair Value of Financial Instruments: Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in a separate note. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments, and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates.

Reclassifications: Certain items in prior year financial statements have been reclassified to conform to the 2010 presentation. These reclassifications had no effect on net income or shareholders' equity as previously reported.

December 31, 2010, 2009 and 2008

NOTE 2 - SECURITIES (Continued)

Contractual maturities of securities at year-end 2010 are shown below. Securities not due at a single maturity date, collateralized mortgage obligations and mortgage-backed securities are shown separately.

	<u>Available for Sale</u>		<u>Held to Maturity</u>	
	<u>Fair</u> <u>Value</u>		<u>Carrying</u> <u>Amount</u>	<u>Fair</u> <u>Value</u>
Due in one year or less	\$ 979		\$ 465	\$ 467
Due after one year through five years	4,226		-	-
Due after five years through ten years	61,208		-	-
Due after ten years	50,050		-	-
Collateralized mortgage obligations	67,575		-	-
Mortgage-backed securities	<u>17,964</u>		<u>-</u>	<u>-</u>
Total maturities	<u>\$ 202,002</u>		<u>\$ 465</u>	<u>\$ 467</u>

Gross gains of \$0, \$1,415 and \$2,661 were recognized in 2010, 2009 and 2008, respectively, from proceeds of \$0, \$36,266, and \$123,701, respectively, on the sale of securities available for sale.

Securities with a fair value of \$135,692 and \$125,005 at year-end 2010 and 2009 were pledged for public deposits and securities sold under agreements to repurchase and to the Federal Reserve Bank. The balance of pledged securities in excess of the pledging requirements was \$7,983 and \$9,135 at year-end 2010 and 2009, respectively.

The Company held 200 and 168 securities in its portfolio as of December 31, 2010 and 2009, respectively, and of these securities 53 and 35 had an unrealized loss. Unrealized losses on securities are due to changes in interest rates and not due to credit quality issues.

Securities with unrealized losses at year-end 2010 and 2009 not recognized in income are as follows:

	<u>Less than 12 months</u>		<u>12 months or more</u>		<u>Total</u>

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 2 - SECURITIES (Continued)

The Company reviews its investment portfolio on a quarterly basis judging each investment for other-than-temporary impairment (“OTTI”). Management does not have the intent to sell any of the temporarily impaired investments and believes it is more likely than not that the Company will not have to sell any such securities before a recovery of cost. The OTTI analysis focuses on the duration and amount a security is below book value and assesses a calculation for both a credit loss and a non credit loss for each measured security considering the security’s type, performance, underlying collateral, and any current or potential debt rating changes. The OTTI calculation for credit loss is reflected in the income statement while the non credit loss is reflected in other comprehensive income (loss).

The Company holds a single issue trust preferred security issued by a privately held bank holding company. Based upon available but limited information we have estimated that the likelihood of collecting the security’s principal and interest payments is approximately 50%. In addition, the bank holding company deferred its interest payments beginning in the second quarter of 2009, and we have placed the security on non-accrual. The Federal Reserve Bank of St. Louis entered into an agreement with the bank holding company on October 22, 2009 which was made public on October 30, 2009. Among other provisions of the regulatory agreement, the bank holding company must strengthen its management of operations, strengthen its credit risk management practices, and submit a capital plan. As of December 31, 2010 no other communications between the bank holding company and the Federal Reserve Bank of St. Louis have been made public.

The Company valued the security by projecting estimated cash flows given the assumption of collecting approximately 50% of the security’s principal and interest and then discounting the amount back to the present value using a discount rate of 3.50% plus three month LIBOR. As of December 31, 2010, our best estimate for the three month LIBOR over the next twenty years (the remaining life of the security) is 3.17%. The difference in the present value and the carrying value of the security was the OTTI credit portion. Due to the illiquid trust preferred market for private issuers and the absence of a credible pricing source, we calculated a 15% illiquidity premium for the security to calculate the OTTI non credit portion. The security is currently booked at a fair value of \$638 at December 31, 2010 and during the twelve months ended December 31, 2010 the Company recognized a write-down of \$75 through non-interest income representing other-than-temporary impairment on the security.

The Company holds a private label class A21 collateralized mortgage obligation that was analyzed for the year ended December 31, 2010 with multiple stress scenarios using conservative assumptions for underlying collateral defaults, loss severity, and prepayments. The average principal at risk given the stress scenarios was calculated at 4.37%, and then analyzed using the present value of the future cash flows using the fixed rate of the security of 5.5% as the discount rate. The difference in the present value and the carrying value of the security was the OTTI credit portion. The security is currently booked at a fair value of \$2,699 at December 31, 2010 and during the twelve months ended December 31, 2010 the Company recognized a write-down of \$18 through non-interest income representing other-than-temporary impairment on the security.

The Bank manages the loan portfolio by assigning one of nine credit risk ratings based on an internal assessment of credit risk. The credit risk categories are prime, desirable, satisfactory I or pass, satisfactory II, acceptable with care, management watch, substandard, and loss.

Prime credit risk rating: Assets of this grade are the highest quality credits of the Bank. They exceed substantially all the Bank's underwriting criteria, and provide superior protection for the Bank through the paying capacity of the borrower and value of the collateral. The Bank's credit risk is considered to be negligible. Included in this section are well-established borrowers with significant, diversified sources of income and net worth, or borrowers with ready access to alternative financing and unquestioned ability to meet debt obligations as agreed. A loan secured by cash or other highly liquid collateral, where the Bank holds such collateral, may be assigned this grade.

Desirable credit risk rating: Assets of this grade also exceed substantially all of the Bank's underwriting criteria; however, they may lack the consistent long-term performance of a Prime rated credit. The credit risk to the Bank is considered minimal on these assets. Paying capacity of the borrower is still very strong with favorable trends and

(Continued)

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 3 – LOANS (Continued)

the value of the collateral is considered more than adequate to protect the Bank. Unsecured loans to borrowers with above-average earnings, liquidity and capital may be assigned this grade.

Satisfactory I credit risk rating or pass credit rating: Assets of this grade conform to all of the Bank's underwriting criteria and evidence a below-average level of credit risk. Borrower's paying capacity is strong, with stable trends. If the borrower is a company, its earnings, liquidity and capitalization compare favorably to typical companies in its industry. The credit is well structured and serviced. Secondary sources of repayment are considered to be good. Payment history is good, and borrower consistently complies with all major covenants.

Satisfactory II credit risk rating: Assets of this grade conform to substantially all of the Bank's underwriting criteria and evidence an average level of credit risk. However, such assets display more susceptibility to economic, technological or political changes since they lack the above-average financial strength of credits rated Satisfactory Tier I. Borrower's repayment capacity is considered to be adequate. Credit is appropriately structured and serviced; payment history is satisfactory.

Acceptable with care credit risk rating: Assets of this grade conform to most of the Bank's underwriting criteria and evidence an acceptable, though higher than average, level of credit risk. However, these loans have certain risk characteristics that could adversely affect the borrower's ability to repay, given material adverse trends. Therefore, loans in this category require an above-average level of servicing or show more reliance on collateral and guaranties to preclude a loss to the Bank, should material adverse trends develop. If the borrower is a company, its earnings, liquidity and capitalization are slightly below average, when compared to its peers.

Management watch credit risk rating: Assets included in this category are currently protected but are potentially weak. These assets constitute an undue and unwarranted credit risk but do not presently expose the Bank to a sufficient degree of risk to warrant adverse classification. However, Management Watch assets do possess credit deficiencies deserving management's close attention. If not corrected, such weaknesses or deficiencies may expose the Bank to an increased risk of loss in the future. Management Watch loans represent assets where the Bank's ability to substantially affect the outcome has diminished to some degree, and thus it must closely monitor the situation to determine if and when a downgrade is warranted.

Substandard credit risk rating: Substandard assets are inadequately protected by the current net worth and financial capacity of the borrower or of the collateral pledged, if any. Assets so classified must have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets classified as Substandard.

Loss credit rating: These assets are considered uncollectible and of such little value that their continuance as assets is not warranted. This classification does not mean that an asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off a basically worthless asset even though partial recovery may be affected in the future. Losses should be taken in the period in which they are identified as uncollectible.

Substandard	<u>217</u>	<u>39</u>	<u>474</u>
Total	<u><u>35,246</u></u>	<u><u>13,132</u></u>	<u><u>19,062</u></u>

A substantial portion of commercial real estate loans are secured by real estate in markets in which the Company is located. These loans are often structured with interest reserves to fund interest costs during the construction and development period. Additionally, certain of these loans are structured with interest-only terms. A portion of the consumer mortgage and commercial real estate portfolios originated through the permanent financing of construction, acquisition and development loans. The prolonged economic downturn has negatively impacted many borrowers' and guarantors' ability to make payments under the terms of the loans as their liquidity has been depleted. Accordingly, the ultimate collectability of a substantial portion of these loans and the recovery of a substantial portion of the carrying amount of other real estate owned are susceptible to changes in real estate values in these areas. Continued economic distress could negatively impact additional borrowers' and guarantors' ability to repay their debt which will make more of the Company's loans collateral dependent.

Age analysis of past due loans by class are presented below as of December 31, 2010:

	30-59 Days Past Due	60-89 Days Past Due	Greater Than 90 Days	Total Past Due	Current	Total Loans	Recorded Investment > 90 Days and Accruing
Commercial real estate:							
Speculative 1-4 Family	\$22,267	\$1,777	\$30,802	\$54,846	\$151,130	\$205,976	\$1,758

December 31, 2010, 2009 and 2008

NOTE 3 – LOANS (Continued)

Non-accrual loans by class as of December 31, 2010 are presented below:

Commercial real estate:	
Speculative 1-4	\$ 63,298
Family	
Construction	41,789
Owner Occupied	5,511
Non-owner Occupied	18,772
Other	1,865
Residential real estate:	
HELOC	1,668
Mortgage-Prime	3,350
Mortgage-Subprime	254
Other	957
Commercial	5,813
Consumer:	
Prime	130
Subprime	107
Auto-Subprime	193
Other	-
Total	<u>143,707</u>

Nonperforming loans at December 31 were as follows:

	<u>2010</u>	<u>2009</u>
Loans past due 90 days still on accrual	\$ 2,112	\$ 147
Nonaccrual loans	<u>143,707</u>	<u>75,411</u>
Total	<u>\$ 145,819</u>	<u>\$ 75,558</u>

Nonperforming loans and impaired loans are defined differently. Nonperforming loans are loans that are 90 days past due and still accruing interest and nonaccrual loans. Impaired loans are loans that based upon current information and events it is considered probable that the Company will be unable to collect all amounts of contractual interest and principal as scheduled in the loan agreement. Some loans may be included in both categories, whereas other loans may only be included in one category.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 3 – LOANS (Continued)

The Company may elect to formally restructure a loan due to the weakening credit status of a borrower so that the restructuring may facilitate a repayment plan that minimizes the potential losses that the Company may have to otherwise incur. At December 31, 2010, the Company had \$49,537 of restructured loans of which \$9,597 was classified as non-accrual and the remaining were performing. The Company had taken charge-offs of \$843 on the restructured non-accrual loans as of December 31, 2010. At December 31, 2009, the Company had \$16,061 of restructured loans of which \$4,429 was classified as non-accrual and the remaining were performing. The Company had taken charge-offs of \$1,743 on the restructured non-accrual loans as of December 31, 2009.

The aggregate amount of loans to executive officers and directors of the Company and their related interests was approximately \$7,848 and \$4,936 at year-end 2010 and 2009, respectively. During 2010 and 2009, new loans aggregating approximately \$22,124 and \$10,545, respectively, and amounts collected of approximately \$19,212 and \$23,964, respectively, were transacted with such parties.

NOTE 4 – FAIR VALUE DISCLOSURES

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Accounting principles generally accepted in the United States of America (“GAAP”), also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1

Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as certain U.S. Treasury, other U.S. Government and agency mortgage-backed debt securities that are highly liquid and are actively traded in over-the-counter markets.

Level 2

Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes certain U.S. Government and agency mortgage-backed debt securities, corporate debt securities, derivative contracts and residential mortgage loans held-for-sale.

Level 3

Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. This category generally includes certain private equity investments, retained residual interests in securitizations, residential mortgage servicing rights, and highly structured or long-term derivative contracts.

NOTE 4 – FAIR VALUE DISCLOSURES (continued)

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value.

Investment Securities Available-for-Sale

Investment securities available-for-sale are recorded at fair value on a recurring basis. Fair value measurement is based upon quoted prices of like or similar securities, if available and these securities are classified as Level 1 or Level 2. If quoted prices are not available, fair values are measured using independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating, prepayment assumptions and other factors such as credit loss assumptions and are classified as Level 3.

Loans Held for Sale

Loans held for sale are carried at the lower of cost or market value. The fair value of loans held for sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, the Company classifies loans held for sale subjected to nonrecurring fair value adjustments as Level 2.

Impaired Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment in accordance with GAAP. The fair value of impaired loans is estimated using one of several methods, including collateral value, market value of similar debt, enterprise value, liquidation value, and discounted cash flows. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At December 31, 2010, substantially all of the impaired loans were evaluated based on either the fair value of the collateral or its liquidation value. In accordance with GAAP, impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the impaired loan as nonrecurring Level 3.

Other Real Estate

Other real estate, consisting of properties obtained through foreclosure or in satisfaction of loans and requiring subsequent charge-offs, is reported at fair value, determined on the basis of current appraisals, comparable sales, and other estimates of value obtained principally from independent sources, adjusted for estimated selling costs. At the time of foreclosure, any excess of the loan balance over the fair value of the real estate held as collateral is treated as a charge against the allowance for loan losses. Gains or losses on sale and any subsequent adjustments to the value are recorded as a component of foreclosed real estate expense. Other real estate is included in Level 3 of the valuation hierarchy.

Loan Servicing Rights

Loan servicing rights are subject to impairment testing. A valuation model, which utilizes a discounted cash flow analysis using interest rates and prepayment speed assumptions currently quoted for comparable instruments and a discount rate determined by management, is used in the completion of impairment testing. If the valuation model reflects a value less than the carrying value, loan servicing rights are adjusted to fair value through a valuation allowance as determined by the model. As such, the Company classifies loan servicing rights subjected to nonrecurring fair value adjustments as Level 3.

Mortgage-backed securities	-	16,892	-	16,892	16,892
Trust preferred securities	-	1,277	638	1,915	1,915

Level 3 Valuations

Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. Level 3 financial instruments also include those for which the determination of fair value requires significant management judgment or estimation.

Currently the Company has one trust preferred security that is considered Level 3. For more information on this security please refer to Note 2 – Securities.

NOTE 4 – FAIR VALUE DISCLOSURES (continued)

The following table shows a reconciliation of the beginning and ending balances for assets measured at fair value for the periods ended December 31, 2010 and 2009 on a recurring basis using significant unobservable inputs.

	<u>2010</u>	<u>2009</u>
Beginning balance	\$ 638	\$ -
Total gains or (loss) (realized/unrealized)		
Included in earnings	(75)	(778)
Included in other comprehensive income	75	(112)
Paydowns and maturities	-	-
Transfers into Level 3	-	1,528
Ending balance	<u>\$ 638</u>	<u>\$ 638</u>

Assets and Liabilities Recorded at Fair Value on a Nonrecurring Basis

The Company may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with GAAP. These include assets that are measured at the lower of cost or market that were recognized at fair value below cost at the end of the period. Assets measured at fair value on a nonrecurring basis are included in the table below.

<u>Description</u>	<u>Fair Value Measurement Using</u>			<u>Total Carrying Amount in Balance Sheet</u>	<u>Assets/Liabilities Measured at Fair Value</u>
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>		
2010

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 4 – FAIR VALUE DISCLOSURES (Continued)

The carrying value and estimated fair value of the Company's financial instruments are as follows at year-end 2010 and 2009.

	<u>2010</u>		<u>2009</u>	
	<u>Carrying Value</u>	<u>Fair Value</u>	<u>Carrying Value</u>	<u>Fair Value</u>
Financial assets:				
Cash and cash equivalents	\$ 294,214	\$ 294,214	\$ 221,494	\$ 221,494
Securities available for sale	202,002	202,002	147,724	147,724
Securities held to maturity	465	467	626	638
Loans held for sale	1,299	1,317	1,533	1,552
Loans, net	1,678,548	1,664,126	1,993,646	1,950,684
FHLB and other stock	12,734	12,734	12,734	12,734
Cash surrender value of life insurance	31,479	31,479	30,277	30,277
Accrued interest receivable	7,845	7,845	9,130	9,130
Financial liabilities:				
Deposit accounts	\$ 1,976,854	\$ 1,987,105	\$ 2,084,096	\$ 2,095,611
Federal funds purchased and repurchase agreements	19,413	19,413	24,449	24,449
FHLB Advances and notes payable	158,653	166,762	171,999	176,602
Subordinated debentures	88,662	64,817	88,662	70,527
Accrued interest payable	2,140	2,140	2,561	2,561

The following methods and assumptions were used to estimate the fair values for financial instruments that are not disclosed previously in this note. The carrying amount is considered to estimate fair value for cash and short-term instruments, demand deposits, liabilities for repurchase agreements, variable rate loans or deposits that reprice frequently and fully, and accrued interest receivable and payable. For fixed rate loans or deposits and for variable rate loans or deposits with infrequent repricing or repricing limits, the fair value is estimated by discounted cash flow analysis using current market rates for the estimated life and credit risk. No adjustment has been made for illiquidity in the market on loans as there is no information from which to reasonably base this estimate. Liabilities for FHLB advances and notes payable are estimated using rates of debt with similar terms and remaining maturities. The fair value of off-balance sheet items is based on the current fees or costs that would be charged to enter into or terminate such arrangements, which is not material. The fair value of commitments to sell loans is based on the difference between the interest rates at which the loans have been committed to sell and the quoted secondary market price for similar loans, which is not material.

NOTE 6 – GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill

The change in the amount of goodwill is as follows:

	<u>2010</u>	<u>2009</u>
Beginning of year	\$ -	\$ 143,389
Impairment	-	(143,389)
End of year	<u>\$ -</u>	<u>\$ -</u>

In conjunction with significant acquisitions, the Company recognized goodwill impairment in 2009 of \$143,389. The Company's goodwill since the 2009 goodwill impairment remains at \$0.

Core deposit and other intangible

The change in core deposit and other intangibles is as follows:

<u>Core deposit intangibles</u>	<u>2010</u>	<u>2009</u>
Gross carrying amount	\$ 19,796	\$ 19,796
Accumulated amortization, beginning of year	(10,803)	(8,304)
Amortization	<u>(2,495)</u>	<u>(2,499)</u>
Accumulated amortization, end of year	<u>(13,298)</u>	<u>(10,803)</u>
End of year	<u>\$ 6,498</u>	<u>\$ 8,993</u>

<u>Other intangibles</u>	<u>2010</u>	<u>2009</u>
Gross carrying amount	\$ 745	\$ 745
Accumulated amortization, beginning of year	(403)	(152)
Amortization	<u>(89)</u>	<u>(251)</u>
Accumulated amortization, end of year	<u>(492)</u>	<u>(403)</u>
End of year	<u>\$ 253</u>	<u>\$ 342</u>

Estimated amortization expense for each of the next five years is as follows:

2011	\$ 2,531
2012	2,401
2013	1,701
2014	118
2015	-
Total	<u>\$ 6,751</u>

NOTE 7 – DEPOSITS

Deposits at year-end were as follows:

	<u>2010</u>	<u>2009</u>
Noninterest-bearing demand deposits	\$ 152,752	\$ 177,602
Interest-bearing demand deposits	939,091	837,268
Savings deposits	101,925	86,166
Brokered deposits	1,399	6,584
Time deposits	<u>781,687</u>	<u>976,476</u>
Total deposits	<u>\$ 1,976,854</u>	<u>\$ 2,084,096</u>

Brokered and time deposits of \$100 or more were \$309,701 and \$395,595 at year-end 2010 and 2009, respectively.

Scheduled maturities of brokered and time deposits for the next five years and thereafter were as follows:

2011	\$ 531,829
2012	139,812
2013	52,931
2014	14,822
2015	40,246
Thereafter	3,446

The aggregate amount of deposits of executive officers and directors of the Company and their related interests was approximately \$3,679 and \$3,611 at year-end 2010 and 2009, respectively.

December 31, 2010, 2009 and 2008

NOTE 8 - BORROWINGS

Federal funds purchased, securities sold under agreements to repurchase and treasury tax and loan deposits are financing arrangements. Securities involved with the agreements are recorded as assets and are held by a safekeeping agent and the obligations to repurchase the securities are reflected as liabilities. Securities sold under agreements to repurchase consist of short-term excess funds and overnight liabilities to deposit customers arising from a cash management program.

Information concerning securities sold under agreements to repurchase at year-end 2010, 2009 and 2008 is as follows:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Average balance during the year	\$ 22,342	\$ 28,008	\$ 74,881
Average interest rate during the year	0.10%	0.10%	1.57%
Maximum month-end balance during the year	\$ 26,161	\$ 35,935	\$ 98,925
Weighted average interest rate at year-end	0.10%	0.10%	0.10%

FHLB advances and notes payable consist of the following at year-end:

	<u>2010</u>	<u>2009</u>
<u>Short-term borrowings</u>		
Fixed rate FHLB advance, 4.44% Matures December 2011	\$ 15,000	\$ -
Variable rate FHLB advances at 5.00% to 5.31% Matured December 2010	-	12,000
Total short-term borrowings	<u>15,000</u>	<u>12,000</u>
<u>Long-term borrowings</u>		
Fixed rate FHLB advances, from 1.50% to 3.36%, Various maturities through June 2023	51,327	50,766
Fixed rate FHLB advances from 4.18% to 6.35%, Various maturities through 2020	92,326	109,233
Total long term borrowings	<u>143,653</u>	<u>159,999</u>
 Total borrowings	 <u>\$ 158,653</u>	 <u>\$ 171,999</u>

Each advance is payable at its maturity date; however, prepayment penalties are required if paid before maturity. The fixed rate advances include \$155,000 of advances that are callable by the FHLB under certain circumstances. The advances are collateralized by a required blanket pledge of qualifying mortgage, commercial, agricultural and home equity lines of credit loans and securities totaling \$500,354 and \$552,721 at year-end 2010 and 2009, respectively.

GREEN BANKSHARES, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 8 - BORROWINGS (Continued)

Scheduled maturities of FHLB advances and notes payable over the next five years and thereafter are as follows:

	<u>Total</u>
2011	\$ 15,288
2012	65,278
2013	288
2014	10,296
2015	20,309
Thereafter	<u>47,194</u>
	<u>\$158,653</u>

At year-end 2010, the Company had approximately \$70,000 of federal funds lines of credit available from correspondent institutions of which \$10,000 was secured.

In September 2003, the Company formed Greene County Capital Trust I ("GC Trust I"). GC Trust I issued \$10,000 of variable rate trust preferred securities as part of a pooled offering of such securities. The Company issued \$10,310 subordinated debentures to the GC Trust I in exchange for the proceeds of the offering, which debentures represent the sole asset of GC Trust I. The debentures pay interest quarterly at the three-month LIBOR plus 2.85% adjusted quarterly (3.14% and 3.13% at year-end 2010 and 2009, respectively). Subject to the limitations on repurchases resulting from the Company's participation in the CPP, the Company may redeem the subordinated debentures, in whole or in part, at a price of 100% of face value. The subordinated debentures must be redeemed no later than 2033.

In June 2005, the Company formed Greene County Capital Trust II ("GC Trust II"). GC Trust II issued \$3,000 of variable rate trust preferred securities as part of a pooled offering of such securities. The Company issued \$3,093 subordinated debentures to the GC Trust II in exchange for the proceeds of the offering, which debentures represent the sole asset of GC Trust II. The debentures pay interest quarterly at the three-month LIBOR plus 1.68% adjusted quarterly (1.98% and 1.93% at year-end 2010 and 2009, respectively). Subject to the limitations on repurchases resulting from the Company's participation in the CPP, the Company may redeem the subordinated debentures, in whole or in part, beginning September 2010 at a price of 100% of face value. The subordinated debentures must be redeemed no later than 2035.

In May 2007, the Company formed GreenBank Capital Trust I ("GB Trust I"). GB Trust I issued \$56,000 of variable rate trust preferred securities as part of a pooled offering of such securities. The Company issued \$57,732 subordinated debentures to the GB Trust I in exchange for the proceeds of the offering, which debentures represent the sole asset of GB Trust I. The debentures pay interest quarterly at the three-month LIBOR plus 1.65% adjusted quarterly (1.95% and 1.90% at year-end 2010 and 2009). Subject to the limitations on repurchases resulting from the Company's participation in the CPP, the Company may redeem the subordinated debentures, in whole or in part, beginning June 2012 at a price of 100% of face value. The subordinated debentures must be redeemed no later than 2037.

Also in May 2007 the Company assumed the liability for two trusts affiliated with the acquisition of Franklin, Tennessee-based Civitas Bankgroup, Inc. ("CVBG") that the Company acquired on May 18, 2007, Civitas Statutory Trust I ("CS Trust I") and Cumberland Capital Statutory Trust II ("CCS Trust II").

NOTE 8 - BORROWINGS (Continued)

In December 2005 CS Trust I issued \$13,000 of variable rate trust preferred securities as part of a pooled offering of such securities. CVBG issued \$13,403 subordinated debentures to the CS Trust I in exchange for the proceeds of the offering, which debentures represent the sole asset of CS Trust I. The debentures pay interest quarterly at the three-month LIBOR plus 1.54% adjusted quarterly (1.84% and 1.79% at year-end 2010 and 2009). Subject to the limitations on repurchases resulting from the Company's participation in the CPP, the Company may redeem the subordinated debentures, in whole or in part, beginning March 2011 at a price of 100% of face value. The subordinated debentures must be redeemed no later than March 2036.

In July 2001 CCS Trust II issued \$4,000 of variable rate trust preferred securities as part of a pooled offering of such securities. CVBG issued \$4,124 subordinated debentures to the CCS Trust II in exchange for the proceeds of the offering, which debentures represent the sole asset of CCS Trust II. The debentures pay interest quarterly at the three-month LIBOR plus 3.58% adjusted quarterly (3.87% and 3.86% at year-end 2010 and 2009). Subject to the limitations on repurchases resulting from the Company's participation in the CPP, the Company may redeem the subordinated debentures, in whole or in part, at a price of 100% of face value. The subordinated debentures must be redeemed no later than July 2031.

Following consultation with the FRB, the Company gave notice on November 9, 2010 to the U.S. Treasury Department that the Company is suspending the payment of regular quarterly cash dividends on the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series A issued to the U.S. Treasury. Since the dividends are cumulative, the dividends will be reported for the duration of the deferral period as a preferred dividend requirement that is deducted from net income for financial statement purposes.

Additionally the Company, following consultation with the FRB, has also exercised its rights to defer regularly scheduled interest payments on all of its issues of junior subordinated debentures having an outstanding principal amount of \$88,662, relating to outstanding trust preferred securities (TRUPs). Under the terms of the trust documents associated with these debentures, the Company may defer payments of interest for up to 20 consecutive quarterly periods without default. During the period that the Company is deferring payments of interest on these debentures, it may not pay dividends on its common or preferred stock. The regular scheduled interest payments will continue to be accrued for payment in the future and reported as an expense for financial statement purposes.

In accordance with ASC 810, GC Trust I, GC Trust II, GB Trust I, CS Trust I and CCS Trust II are not consolidated with the Company. Accordingly, the Company does not report the securities issued by GC Trust I, GC Trust II, GB Trust I, CS Trust I and CCS Trust II as liabilities, and instead reports as liabilities the subordinated debentures issued by the Company and held by each Trust. However, the Company has fully and unconditionally guaranteed the repayment of the variable rate trust preferred securities. These trust preferred securities currently qualify as Tier 1 capital for regulatory capital requirements of the Company, subject to certain limitations and the Company expects that a portion of the trust preferred securities will continue to qualify as Tier 1 capital with the residual qualifying as Tier 2 capital following passage of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act").

NOTE 9 - BENEFIT PLANS

The Company has a profit sharing plan which allows employees to contribute from 1% to 20% of their compensation. The Company contributes an additional amount at a discretionary rate established annually by the Board of Directors. Company contributions to the Plan were \$0, \$409 and \$1,535 for 2010, 2009 and 2008, respectively. Effective July 2009 the Company suspended contributions to the profit sharing plan and will reevaluate re-instating these contributions in the future when the Company returns to a sustained level of profitability.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(Amounts in thousands, except share and per share data)
December 31, 2010, 2009 and 2008

NOTE 9 - BENEFIT PLANS (Continued)

Directors have deferred some of their fees for future payment, including interest. The amount accrued for deferred compensation was \$2,274 and \$2,637 at year-end 2010 and 2009. Amounts expensed under the Plan were \$133, \$27 and \$207 during 2010, 2009, and 2008, respectively. During 2009 the Company modified the annual earning crediting rate formula as follows; The annual crediting rate will be 100% of the annual return on stockholders' equity with a 4% floor and a 12% ceiling, for the year then ended, on balances in the Plan until the director experiences a separation from services, and, thereafter, at a earnings crediting rate based on 75% of the Company's return on average stockholders' equity for the year then ending with a 3% floor and a 9% ceiling. During 2008 the Company used a formula which provided an annual earnings crediting rate based on 75% of the annual return on average stockholders' equity, for the year then ended, on balances in the Plan until the director experiences a separation from service, and, thereafter, at an earnings crediting rate of 56.25% of the Company's return on average stockholders' equity for the year then ending. The return on annual shareholders' equity was negative in 2008 and no earnings were credited for 2008. Also certain officers of the Company are participants under a Supplemental Executive Retirement Plan. The amount accrued for future payments under this Plan was \$1,568 and \$1,409 at year-end 2010 and 2009, respectively. Amounts expensed under the Plan were \$259, \$312 and \$283 during 2010, 2009 and 2008, respectively. Related to these plans, the Company purchased single premium life insurance contracts on the lives of the related participants. The cash surrender value of these contracts is recorded as an asset of the Company.

NOTE 10 - INCOME TAXES

Income tax expense (benefit) is summarized as follows:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Current – federal	\$ (10,054)	\$ (12,906)	\$ (221)
Current – state	(1,775)	(2,476)	(53)
Deferred – federal	(13,870)	(1,397)	(3,649)
Deferred – state	(2,846)	(257)	(725)
Deferred tax asset – valuation allowance	<u>43,455</u>	<u>-</u>	<u>-</u>
	<u>\$ 14,910</u>	<u>\$ (17,036)</u>	<u>\$ (4,648)</u>

Deferred income taxes reflect the effect of “temporary differences” between values recorded for assets and liabilities for financial reporting purposes and values utilized for measurement in accordance with tax laws. The tax effects of the primary temporary differences giving rise to the Company’s net deferred tax assets and liabilities are as follows:

	<u>2010</u>		<u>2009</u>	
	<u>Assets</u>	<u>Liabilities</u>	<u>Assets</u>	<u>Liabilities</u>
Allowance for loan losses	\$ 26,214	\$ -	\$ 19,675	\$ -
Deferred compensation	2,129	-	1,973	-
REO basis	12,175	-	-	-
Purchase accounting adjustments	-	(1,424)	672	-
Depreciation	-	(1,998)	-	(2,129)
FHLB dividends	-	(1,658)	-	(1,658)
Core deposit intangible	2,189	-	-	(4,860)
Unrealized (gain) loss on securities	-	(645)	-	(122)
NOL carry forward	10,192	-	-	(122)
Other	-	(1,542)	49	-
Deferred tax asset – valuation allowance	<u>-</u>	<u>(43,455)</u>	<u>-</u>	<u>-</u>
Total deferred income taxes	<u>\$ 52,899</u>	<u>\$ (50,722)</u>	<u>\$ 22,369</u>	<u>\$ (8,769)</u>

A valuation allowance is recognized for a net DTA if, based on the weight of available evidence, it is more-likely-than-not that some portion or the entire DTA will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. In making such judgments, significant weight is given to evidence that can be objectively verified. As a result of the increased credit losses, the Company entered into a three-year cumulative pre-tax loss position (excluding the goodwill impairment charge recognized in the second quarter of 2009) as of June 30, 2010.

A cumulative loss position is considered significant negative evidence in assessing the realizability of a deferred tax asset which is difficult to overcome. The Company’s estimate of the realization of its net DTA was based on the scheduled reversal of deferred tax liabilities and taxable income available in prior carry back years and tax planning strategies. Based on management’s calculation, a valuation allowance of \$43,455, or 95% of the net DTA, was an adequate estimate as of December 31, 2010. This estimate resulted in a valuation allowance for the net DTA in the income statement of \$43,455 for the period end 2010.

December 31, 2010, 2009 and 2008

NOTE 10 – INCOME TAXES (Continued)

A reconciliation of expected income tax expense (benefit) at the statutory federal income tax rate of 35% with the actual effective income tax rates is as follows:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Statutory federal tax rate	(35.0%)	(35.0%)	(35.0%)
State income tax, net of federal benefit	(4.6)	(1.1)	(5.2)
Tax exempt income	(2.0)	(0.5)	(8.0)
Goodwill impairment	-	26.4	-
Deferred tax asset – valuation allowance	66.1	-	-
Other	(1.8)	(0.5)	-
	<u>(22.7%)</u>	<u>(10.2%)</u>	<u>(46.4%)</u>

The Company recognizes accrued interest and penalties related to uncertain tax positions in tax expense. The Company's Federal returns are open and subject to examination for the years of 2007, 2008 and 2009. The Company's State returns are open and subject to examination for the years of 2007, 2008, and 2009.

At December 31, 2010 the Company had gross federal net operating loss carry-forwards of \$24,118. The carry-forwards begin to expire in 2031. At December 31, 2010 the Company had gross state net operating loss carry-forwards of \$41,433. Of the total \$41,433 in carry-forwards, \$18,490 begin to expire in 2025 while the remaining \$22,943 begin to expire in 2026.

NOTE 11 - COMMITMENTS AND FINANCIAL INSTRUMENTS WITH OFF-BALANCE-SHEET RISK

Some financial instruments, such as loan commitments, credit lines, letters of credit, and overdraft protection, are issued to meet customer-financing needs. These are agreements to provide credit or to support the credit of others, as long as conditions established in the contract are met, and usually have expiration dates. Commitments may expire without being used. Off-balance-sheet risk to credit loss exists up to the face amount of these instruments, although material losses are not anticipated. The same credit policies are used to make such commitments as are used for loans, including obtaining collateral at exercise of the commitment.

Financial instruments with off-balance-sheet risk were as follows at year-end:

	<u>2010</u>	<u>2009</u>
Commitments to make loans – fixed	\$ 3,827	\$ 1,202
Commitments to make loans – variable	2,464	4,718
Unused lines of credit	201,973	239,374
Letters of credit	25,674	30,107

The fixed rate loan commitments have interest rates ranging from 5.49% to 8.75% and maturities ranging from one to fifteen years. Letters of credit are considered financial guarantees under ASC 460.

NOTE 12 - CAPITAL REQUIREMENTS AND RESTRICTIONS ON RETAINED EARNINGS

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet capital requirements can initiate regulatory action.

Prompt corrective action regulations provide five classifications: well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized, and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and capital restoration plans are required.

Based on the most recent notifications from its regulators, the Bank is well capitalized under the regulatory framework for prompt corrective action. However, the Bank has informally committed to its primary regulators that it will maintain a Tier 1 leverage ratio (Tier 1 Capital to Average Assets) in excess of 10% and a Total risk-based capital ratio (Total Capital to Risk Weighted Assets) in excess of 14%.

During the third quarter of 2010, the Bank was subject to a joint examination by the FDIC and the TDFI. Based on initial findings presented to the Bank's management, the Bank expects that either the FDIC or the TDFI or both will require the Bank to agree to certain improvements in its operations, particularly in relation to asset quality matters. We also believe that the Bank will be required to agree to maintain or increase capital to levels above those required to be considered well capitalized. We do not know at this time what minimum levels of capital the regulators will require. If the requirement to maintain higher capital levels than those required to be well capitalized under the prompt corrective action provisions of the FDICIA is contained in a formal enforcement action of the FDIC, the Bank may be subject to additional limitations on its operations including its ability to pay interest on deposits above proscribed rates, which could adversely affect the Bank's liquidity and/or operating results. The terms of any such supervisory action that goes beyond the steps we have already taken may have a significant negative effect on our business, operating flexibility and results of operations. Failure by the Bank to meet applicable capital guidelines or to satisfy certain other regulatory requirements could subject the Bank to a variety of enforcement remedies available to the federal regulatory authorities.

NOTE 12 - CAPITAL REQUIREMENTS AND RESTRICTIONS ON RETAINED EARNINGS
(continued)

As reflected in the table below, the Bank did not satisfy these higher ratio requirements at December 31, 2010. Actual capital levels and minimum required levels (in millions) were as follows. Because the Bank's capital levels at December 31, 2010 were below those that the Bank had informally committed to its primary regulators that it would maintain, the Bank was required to submit a Capital Action Plan to its primary regulators.

	<u>Actual</u>		<u>Minimum Required for Capital Adequacy Purposes</u>		<u>Minimum Amounts to be Well Capitalized Under Prompt Corrective Action Provisions</u>	
	<u>Actual</u>	<u>Ratio (%)</u>	<u>Actual</u>	<u>Ratio (%)</u>	<u>Actual</u>	<u>Ratio (%)</u>

December 31, 2010, 2009 and 2008

NOTE 12- CAPITAL REQUIREMENTS AND RESTRICTIONS ON RETAINED EARNINGS (continued)

The Company's primary source of funds to pay dividends to shareholders is the dividends it receives from the Bank. Applicable state laws and the regulations of the Federal Reserve Bank and the Federal Deposit Insurance Corporation regulate the payment of dividends. Under the state regulations, the amount of dividends that may be paid by the Bank to the Company without prior approval of the Commissioner of the Tennessee Department of Financial Institutions is limited in any one year to an amount equal to the net income in the calendar year of declaration plus retained net income for the preceding two years; however, future dividends will be dependent on the level of earnings, capital and liquidity requirements and considerations of the Bank and Company.

In general, the Bank may not declare or pay a dividend to the Company in excess of 100% of its net retained profits for the current year combined with its net retained profits for the preceding two calendar years without prior approval of the Commissioner of the Tennessee Department of Financial Institutions. The Bank's ability to make capital distributions in the future may require regulatory approval and may be restricted by its regulatory authorities. The Bank's ability to make any such distributions will also depend on its earnings and ability to meet minimum regulatory capital requirements in effect during future periods. These capital adequacy standards may be higher in the future than existing minimum regulatory capital requirements. The FDIC also has the authority to prohibit the payment of dividends by a bank when it determines such payments would constitute an unsafe and unsound banking practice. In addition, income tax considerations may limit the ability of the Bank to make dividend payments in excess of its current and accumulated tax "earnings and profits" ("E&P"). Annual dividend distributions in excess of E&P could result in a tax liability based on the amount of excess earnings distributed and current tax rates. The Company has informally committed to the FRB-Atlanta that it will not pay dividends on its common or preferred stock (or interest on its subordinated debentures) without the prior approval of the FRB-Atlanta. The Company also informally committed to the FRB-Atlanta that it will not incur any indebtedness without the prior approval of the FRB-Atlanta.

On November 9, 2010, the Company following consultation with the FRB announced that it had suspended preferred stock dividends and interest payments on its junior subordinated debentures associated with its trust preferred securities in order to preserve capital.

On December 23, 2008 the Company entered into a definitive agreement (the "Agreement") with the U.S. Treasury to participate in the Capital Purchase Program ("CPP"). Pursuant to the Agreement, the Company sold 72,278 shares of Series A preferred stock with an attached warrant to purchase 635,504 shares of our common stock priced at \$17.06 per common share, to the U.S. Treasury for an aggregate consideration of \$83 million.

NOTE 13 – STOCK-BASED COMPENSATION

The Company maintains a 2004 Long-Term Incentive Plan, as amended (the "Plan"), whereby a maximum of 500,000 shares of common stock may be issued to directors and employees of the Company and the Bank. The Plan provides for the issuance of awards in the form of stock options, stock appreciation rights, restricted shares, restricted share units, deferred share units and performance awards. Stock options granted under the Plan are typically granted at exercise prices equal to the fair market value of the Company's common stock on the date of grant and typically have terms of ten years and vest at an annual rate of 20%. Shares of restricted stock awarded under the Plan have restrictions that expire within the vesting period of the award which range from 12 months to 60 months. At December 31, 2010, 170,324 shares remained available for future grant. The compensation cost related to options that has been charged against income for the Plan was approximately \$295, \$387 and \$456 for the years ended December 31, 2010, 2009 and 2008, respectively. The compensation cost related to restricted stock that has been charged against income for the Plan was approximately \$331, \$299, and \$303 for the years ended December 31, 2010, 2009, and 2008, respectively. As of December 31, 2010, there was \$678 of total unrecognized compensation cost related to non-vested share-based compensation arrangements, which is expected to be recognized over a weighted-average period of 2.3 years.

NOTE 13 – STOCK-BASED COMPENSATION (Continued)

Cash Settled Stock Appreciation Rights

During 2010, only non-employee Directors received cash-settled stock appreciation rights (“SAR’s”). During the years ended December 31, 2009 and 2008 the Company granted SAR’s awards to non-employee Directors, executive officers and select employees. During the year ended December 31, 2007 only select employees received SAR’s. Each award, when granted, provides the participant with the right to receive payment in cash, upon exercise of each SAR, for the difference between the appreciation in market value of a specified number of shares of the Company’s Common Stock over the award’s exercise price. The SAR’s vest over the same period as the stock option awards issued and the restricted stock grants and can only be exercised in tandem with the stock option awards or vesting of the restricted stock grants. The per-share exercise price of an SAR is equal to the closing market price of a share of the Company’s common stock on the date of grant. For the year ended December 31, 2010 the Company recorded an expense of \$15 and for the year ended December 31, 2009 the Company recognized a recovery in expense of \$24 related to outstanding awarded SAR’s. As of December 31, 2010, there was no unrecognized compensation cost related to SAR’s. The cost is measured at each reporting period until the award is settled. As of December 31, 2010, no cash settled SAR’s had been exercised and as such, no share-based liabilities were paid.

A summary of the SAR activity during years ended December 31, 2010, 2009, and 2008 is presented below.

	SAR’s	Weighted Average Price Per Share
Balance at January 1, 2008	19,000	34.63
Granted:		
Non-employee Directors	7,852	16.56
Executive officers & management	62,015	19.20
Cancelled/Expired:		
Non-employee Directors	-	-
Executive officers & management	(8,960)	19.44
Balance at December 31, 2008	79,907	\$ 22.58
Granted:		
Non-employee Directors	7,060	7.08
Non-executive officers & management	56,934	7.08
Cancelled/Expired:		
Non-employee Directors	(7,852)	16.56
Non-executive officers & management	(15,817)	17.78
Balance at December 31, 2009	120,232	\$ 15.36
Granted:		
Non-employee Directors	6,548	6.11
Non-executive officers & management	-	-
Cancelled/Expired:		
Non-employee Directors	(7,060)	7.08
Non-executive officers & management	(27,777)	12.75
Balance at December 31, 2010	91,943	\$ 16.12

Note 13 – Stock-Based Compensation (CONTINUED)

Weighted-average fair value of cash-settled SAR's granted during the year ended December 31,

2010	\$ 6.11
2009	\$ 7.08
2008	\$ 18.93

The following table illustrates the assumptions for the Black-Scholes model used in determining the fair value of the SAR's at the time of grant for the periods ending December 31.

	2010	2009	2008
Risk-free interest rate	0.307%	0.67% – 1.89%	3.81% – 3.85%
Volatility	57.06%	40.18%	29.46% - 32.81%
Expected life	1 year	1 - 5 years	1 - 5 years
Dividend yield	0.00%	7.34%	3.54%

Cash-settled SAR's awarded in stock-based payment transactions are accounted for under ASC 718 which classifies these awards as liabilities. Accordingly, the Company records these awards as a component of other non-current liabilities on the balance sheet. For liability awards, the fair value of the award, which determines the measurement of the liability on the balance sheet, is remeasured at each reporting period until the award is settled. Fluctuations in the fair value of the liability award are recorded as increases or decreases in compensation cost, either immediately or over the remaining service period, depending on the vested status of the award.

The risk-free interest rate is based upon a U.S. Treasury instrument with a life that is similar to the expected life of the SAR. Expected volatility is based upon the historical volatility of the Company's common stock based upon prior year's trading history. The expected term of the SAR is based upon the average life of previously issued stock options and restricted stock grants. The expected dividend yield is based upon current yield on the date of grant. These SAR's can only be settled in tandem with the vesting of restricted stock awards and only if the value at settlement date is greater than the value at award date.

NOTE 14 - EARNINGS (LOSS) PER SHARE

A reconciliation of the numerators and denominators of the earnings (loss) per common share and earnings (loss) per common share assuming dilution computations are presented below.

	<u>2010</u>	<u>2009</u>	<u>2008</u>
<u>Basic Earnings (Loss) Per Share</u>			
Net income (loss)	\$ (80,695)	\$ (150,694)	\$ (5,360)
Less: preferred stock dividends and accretion of discount on warrants	<u>5,001</u>	<u>4,982</u>	<u>92</u>
Net income (loss) available to common shareholders	<u>\$ (85,696)</u>	<u>\$ (155,676)</u>	<u>\$ (5,452)</u>
Weighted average common shares outstanding	<u>13,093,847</u>	<u>13,068,407</u>	<u>12,932,576</u>
Basic earnings (loss) per share	<u>\$ (6.54)</u>	<u>\$ (11.91)</u>	<u>\$ (0.42)</u>
<u>Diluted Earnings (Loss) Per Share</u>			
Net income (loss)	\$ (80,695)	\$ (150,694)	\$ (5,360)
Less: preferred stock dividends and accretion of discount on warrants	<u>5,001</u>	<u>4,982</u>	<u>92</u>
Net income (loss) available to common shareholders	<u>\$ (85,696)</u>	<u>\$ (155,676)</u>	<u>\$ (5,452)</u>
Weighted average common shares outstanding	13,093,847	13,068,407	12,932,576
Add: Dilutive effects of assumed conversions of restricted stock and exercises of stock options and warrants	<u>-</u>	<u>-</u>	<u>58,214</u>
Weighted average common and dilutive potential common shares outstanding ⁽¹⁾⁽²⁾	<u>13,093,847</u>	<u>13,068,407</u>	<u>12,990,790</u>
Diluted earnings (loss) per common share ⁽¹⁾⁽²⁾	<u>\$ (6.54)</u>	<u>\$ (11.91)</u>	<u>\$ (0.42)</u>

¹Diluted weighted average shares outstanding for 2010 and 2009 excludes 92,979 and 96,971 shares of unvested restricted stock because they are anti-dilutive and is equal to weighted average common shares outstanding.

²Stock options and warrants of 1,017,645, 1,058,992 and 387,121 were excluded from the 2010, 2009 and 2008 diluted earnings per share because their impact was anti-dilutive.

NOTE 17 - SEGMENT INFORMATION

The Company's operating segments include banking, mortgage banking, consumer finance, subprime automobile lending and title insurance. The reportable segments are determined by the products and services offered, and internal reporting. Loans, mortgage banking, investments, and deposits provide the revenues in the banking operation, loans and fees provide the revenues in consumer finance and subprime lending and insurance commissions provide revenues for the title insurance company. Consumer finance, subprime automobile lending and title insurance do not meet the quantitative threshold for disclosure on an individual basis, and are therefore shown below in "other". All operations are domestic.

The accounting policies used are the same as those described in the summary of significant accounting policies. Segment performance is evaluated using net interest income and noninterest income. Income taxes are allocated based on income before income taxes and indirect expenses (includes management fees) are allocated based on time spent for each segment. Transactions among segments are made at fair value. Information reported internally for performance assessment follows.

	<u>Banking</u>	<u>Other Segments</u>	<u>Holding Company</u>	<u>Eliminations</u>	<u>Total Segments</u>
<u>2010</u>					
Net interest income	\$ 77,246	\$ 8,327	\$ (1,980)	\$ -	\$ 83,593

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

None.

ITEM 9A. CONTROLS AND PROCEDURES.

Evaluation of Disclosure Controls and Procedures

The Company, with the participation of its management, including the Company's Chief Executive Officer and Chief Financial Officer, carried out an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a-15 and 15d-15 under the Exchange Act) as of the end of the period covered by this Report.

Based upon that evaluation and as of the end of the period covered by this Report, the Company's Chief Executive Officer and Chief Financial Officer concluded that, as a result of the deficiencies identified in internal controls that when evaluated in combination give rise to a material weakness as described above under the caption entitled "Management's Report on Internal Control Over Financial Reporting" in Item 8 of this Report, the Company's disclosure controls and procedures were not effective to ensure that information required to be disclosed in its reports that the Company files or submits to the Securities and Exchange Commission under the Exchange Act is recorded, processed, summarized and reported on a timely basis. In light of this material weakness, in preparing the Company's Consolidated Financial Statements included in this Report, the Company performed a thorough review of credit quality, focusing especially on the timely receipt and review of updated appraisals from outside independent third parties and internal supporting documentation to ensure that the Company's Consolidated Financial Statements included in this Report have been prepared in accordance with U.S. GAAP.

The Company's Chief Executive Officer and Chief Financial Officer have certified that, based on their knowledge, the Company's Consolidated Financial Statements included in this Report fairly present in all material respects the Company's financial condition, results of operations and cash flows for the periods presented in this Report.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, the Company has included a report of management's assessment of the design and operating effectiveness of its internal controls as part of this Report.

Changes In Internal Control Over Financial Reporting

Management's assessment of the Company's internal control over financial reporting identified deficiencies in the Company's internal control over financial reporting at December 31, 2010 related to: 1) the timely receipt and review of updated appraisals received from outside independent third parties. The increased volume of impaired and nonperforming assets requiring updated valuations during the second half of 2010 resulted in an internal control deficiency related to the timely acquisition and review of these appraisals. 2) A new process was implemented with the establishment of the Special Assets Group where appraisals, once received, are sent to an independent external appraisal review service. Controls surrounding this process in regards to the potential impairment of an asset prior to the completion of our review process are in the process of being documented. 3) Documentation and review of supporting documentation relating to impaired loans and other real estate owned. Areas were identified where the documentation supporting certain impaired loans and other real estate owned charge-offs were lacking in sufficient detail and did not provide adequate evidence of secondary review. Other than the remediation plan identified below for these deficiencies, there were no changes in the Company's internal control over financial reporting that occurred during the fourth quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Remediation plan for significant deficiencies in internal control over financial reporting:

Prior to and subsequent to December 31, 2010, and following management's identification of the above-referenced deficiencies, management began taking steps to remediate those identified. These ongoing efforts that commenced during 2010 and continuing on in 2011 included the following:

- During the fourth quarter and as of December 31, 2010 all appraisals on impaired assets are, and will continue to be, ordered 90 days prior to the annual appraisal date, or when evidence of impairment has occurred, and submitted to the independent third party for review upon completion, in order to assure that appraisals on impaired assets are received in accordance with the Company's internal policies;
- Pre-reviewed appraisals indicating evidence that impairment has occurred will be separately reviewed and discussed in the monthly valuation meeting held between the Special Assets Group, Loan Review and Accounting to ensure that there is adequate documentation of the consideration for recording a potential impairment when the review process is not 100% complete but it is probable that a loss has been incurred; and
- Controls evidencing adequate secondary review and approval of impaired loan valuations and other real estate owned will be appropriately documented and evident within the Special Assets Group.

Management anticipates that these remedial actions will strengthen the Company's internal control over financial reporting and will address the individual deficiencies identified as of December 31, 2010. Because some of these remedial actions will take place on a quarterly basis, their successful implementation will continue to be evaluated before management is able to conclude that the deficiencies have been remediated.

Management Report on Internal Control Over Financial Reporting

The report of the Company's management on the effectiveness of the Company's internal control over financial reporting is set forth on page 56 of this Annual Report on Form 10-K. The attestation of the Company's independent registered public accounting firm related to the Company's internal control over financial reporting is set forth on pages 57 and 58 of this Annual Report on Form 10-K.

ITEM 9B. OTHER INFORMATION.

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE.

The information required by this item is incorporated herein by reference to the sections captioned “Proposal 2 – Election of Directors”; “Corporate Governance – Section 16(a) Beneficial Ownership Reporting Compliance”; “Corporate Governance – Code of Conduct”; “Corporate Governance – Meetings and Committees of the Board”; and “Executive Officers of Green Bankshares” in the Company’s definitive Proxy Statement for the 2011 Annual Meeting of Shareholders (the “Proxy Statement”).

ITEM 11. EXECUTIVE COMPENSATION.

The information required by this item is incorporated herein by reference to the sections captioned “Executive Compensation” and “Corporate Governance – Compensation Committee Interlocks and Insider Participation” of the Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

- (a) Security Ownership of Certain Beneficial Owners.
Information required by this item is incorporated herein by reference to the section captioned “Security Ownership of Certain Beneficial Owners and Management” in the Proxy Statement.
- (b) Security Ownership of Management.
Information required by this item is incorporated herein by reference to the section captioned “Security Ownership of Certain Beneficial Owners and Management” in the Proxy Statement.
- (c) Changes in Control.
Management of the Company knows of no arrangements, including any pledge by any person of securities of the Company, the operation of which may at a subsequent date result in a change in control of the registrant.
- (d) Equity Compensation Plan Information.
The following table sets forth certain information with respect to securities to be issued under the Company’s equity compensation plans as of December 31, 2010.

Plan Category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plan (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	345,710	\$ 27.13	170,324
Equity compensation plans not approved by security holders	36,000	\$ 16.33	*
Total	381,710	\$ 25.96	170,324

*R. Stan Puckett, was the sole participant under this plan, which was a part of Mr. Puckett’s employment agreement. This employment agreement was amended during 2005 to provide that future option grants to the key executive would be made at no less than fair market value on the date of grant in order to comply with Section 409A of the Internal Revenue Code of 1986, as amended.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE.

The information required by this item is incorporated herein by reference to the sections captioned “Proposal 2 – Election of Directors” and “Corporate Governance – Certain Transactions” in the Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

The responses to this Item are incorporated herein by reference to the section captioned "Proposal 5 – Ratification of the Appointment of the Independent Registered Public Accounting Firm" in the Proxy Statement.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES.

- (a)(1) The following consolidated financial statements of the Company included in the Company's 2010 Annual Report to the Shareholders (the "Annual Report") are incorporated herein by reference from Item 8 of this Form 10-K. The remaining information appearing in the Annual Report is not deemed to be filed as part of this Form 10-K, except as expressly provided herein.
1. Report of Independent Registered Public Accounting Firm.
 2. Consolidated Balance Sheets – December 31, 2010 and 2009.
 3. Consolidated Statements of Income for the Years Ended December 31, 2010, 2009 and 2008.
 4. Consolidated Statements of Changes in Shareholders' Equity for the Years Ended December 31, 2010, 2009 and 2008.
 5. Consolidated Statements of Cash Flows for the Years Ended December 31, 2010, 2009 and 2008.
 6. Notes to Consolidated Financial Statements.
- (a)(2) All schedules for which provision is made in the applicable accounting regulations of the Securities and Exchange Commission are not required under the related instructions or are inapplicable and therefore have been omitted.

* Management contract or compensatory plan.

The Company is a party to certain agreements entered into in connection with the offering by Greene County Capital Trust I, Greene County Capital Trust II, GreenBank Capital Trust I, Civitas Statutory Trust I and Cumberland Capital Statutory Trust II of an aggregate of \$86 million of variable rate trust preferred securities, as more fully described in this Annual Report on Form 10-K. In accordance with Item 601(b)(4)(iii) of Regulation

S-K, and because the total amount of the trust preferred securities is not in excess of 10% of the Company's total assets, the Company has not filed the various documents and agreements associated with certain of these trust preferred securities herewith. The Company has, however, agreed to furnish copies the various documents and agreements associated with the trust preferred securities to the SEC upon request.

- (b) Exhibits. The exhibits required by Item 601 of Regulation S-K are either filed as part of this Annual Report on Form 10-K or incorporated herein by reference.
- (c) Financial Statements and Financial Statement Schedules Excluded From Annual Report. There are no financial statements and financial statement schedules which were excluded from the Annual Report pursuant to Rule 14a-3(b)(1) which are required to be included herein.
