2010 Annual Report

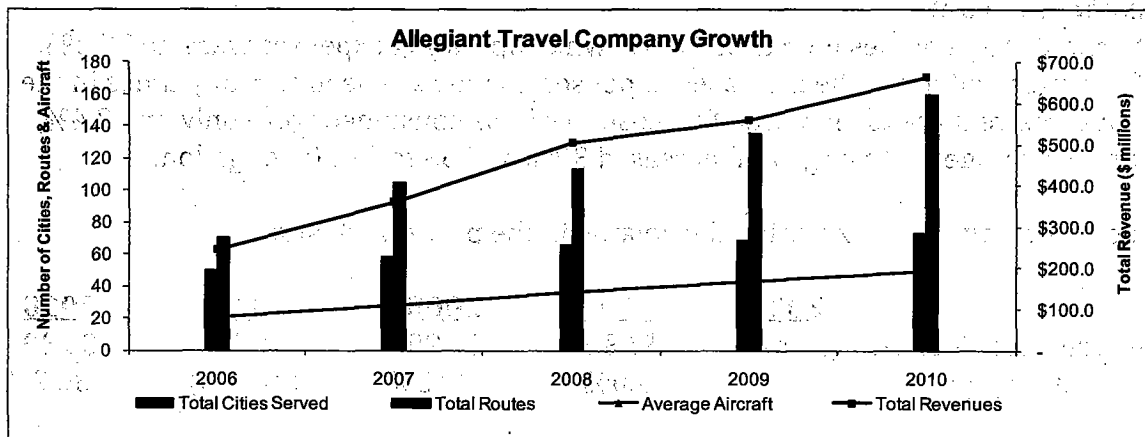

May 2011

Dear Allegiant Shareholder:

2010 was another excellent year for your company. We finished the year with a 16% operating margin, generating \$664M of top line revenue and \$105M of operating profits. We earned \$3.32 per share on a fully diluted basis, down slightly from 2009's \$3.76 per share earnings. We had another safe year as well, a tribute to our dedicated personnel and team members who have been so important to our success.

2010 Growth

2010 was another growth year. Departures were up just shy of 10% while available seat miles (ASMs) increased 14.6%. Our fleet size increased almost 15% during the year to an average of 49 aircraft during the year. We ended the year with 73 cities, up four from 2009. The total includes 62 small cities and 11 destinations. We had 160 routes by yearend, up 24 during the year. During the past few years, we have been able to increase our routes by "connecting the dots," namely connecting our small cities to more and more of our 11 leisure destinations. As an example, our Mesa/Williams Gateway destination in southeast Phoenix has tripled in size from nine cities served at the end of the third quarter of 2008 to 27 cities served at the end of 2010. During this same period, the number of our small cities served only increased by eight cities.

Ancillary Revenues

Our ancillary revenues continue to be one of the critical contributors to our success. Since 2005, we have increased the revenue from our ancillary air products and third-party hotel, rental cars and other products from \$11M to \$194M last year with a \$31M increase last year alone. This represents a more than 1600% increase during this time while scheduled service passengers have increased by 392%.

\$24M of our \$194M ancillary sales last year was from our third-party products, namely hotel rooms, rental cars and other vacation-related products. These are powerful contributors to our overall profitability. The \$24M of third-party revenues in 2010 represented 23.3% of our operating profits. Going forward we want to continue to emphasize the growth in our third-party revenues. Las Vegas is the clear leader in our third-party product sales. We are focused on growing contributions from our other leisure destinations in Florida, Arizona and Southern California.

Expenses - Fuel

During 2010 revenues increased 18.9% while operating expenses were up 28.3%. The biggest culprit in the increased expenses, as we have seen so many times in the past three years, was increased fuel costs. Gallons consumed were only up 13.4%, but the average cost per gallon increased 30% or \$.53 to \$2.30 per gallon.

Fuel costs have been exceptionally volatile in the past four years:

	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>
Average Cost/Gallon	\$2.12	\$2.31	\$2.98	\$1.76	\$2.30
Percent Change		9.0%	29.3%	(40.9%)	30.2%

The above chart summarizes the volatile changes in our cost per gallon with a backdrop of increasing gallons used since 2006. You can see the violent increase and decrease that occurred during the back half of 2007 and 2008.

Volatility in basic everyday commodities has become a way of life. While financial markets seem to thrive and prosper on these high levels of volatility, the same cannot be said of individuals and businesses dependent on these commodities. Management challenges in this environment are substantial.

In our particular instance, we have developed a number of strategies to combat this volatility. In the case of non-controllable expenses such as fuel, clearly revenues must be managed closely to offset these rapid increases. The best revenue management tool, particularly in quickly increasing fuel environments, is to limit capacity, as we did beginning in the second quarter of 2008 and late last year. Eliminating the marginal seat allows us to increase fares accordingly.

Our second tactic is to fill our aircraft with as many passengers as possible. We targeted a 90% load factor as our primary driver, adjusting our scheduled service fare to drive the load. We discovered as we increased our passengers per departure, we were still able to maintain our ancillary unit revenue. Additionally, higher loads spread our costs across more passengers thereby reducing per passenger fixed costs, including fuel. The combination of these tactics has worked well for us since 2008.

Late last year we were again reacting to increasing fuel prices. From June through December, the average cost per gallon increased \$.46 from \$2.20 to \$2.66, a 21% increase in six months. Beginning in Q4 and into 2011, we have been trimming capacity in an effort to increase our unit revenues.

This aggressive management of our capacity and associated revenues has been key to our success over the years. We are comfortable we can profitably manage our business in any reasonably stable fuel environment. What is difficult, and hence requires capacity growth restraint, is managing in quickly increasing expense

environments. We will continue to actively follow these tactics in the coming months and years. Maintaining our industry leading profit margins is a key corporate goal for your company.

Investments

2010 has been an investment year for your company. Last year we had capital expenditures of \$98M compared to \$31M in 2009. The majority of these dollars were used to purchase future capacity including 757s and MD80s. We are fortunate we have a strong balance sheet (see below) and substantial cash reserves. This combination provides us with ready reserves to move quickly when good deals present themselves.

We will continue this high rate of investment in 2011 as well with another \$100M of expected capital expenditures to acquire the remaining 757s, additional MD80s and begin the conversion of our MD80 interiors to a uniform 166-seat configuration.

Investments - 757s

Early last year we announced we would be purchasing up to six Boeing 757 aircraft with the express intention of using the aircraft to serve Hawaii from the western United States. This effort is a continuation of our strategy to serve world-class leisure destinations from small cities. Hawaii is one of the premier vacation destinations in the world. Our model, we believe, is well suited to serve Hawaii.

We are currently working with the FAA to obtain the operating authority for the 757. We expect to begin operations in some of our current markets during the second half of 2011 and service to Hawaii in late 2012.

To date we have purchased four of the six 757s we have under contract. Three of the aircraft are generating revenues via sub-leases to other operators while we work our way through the necessary approvals from the FAA.

Investments - 166 Seat Program

Late last year your Board of Directors approved the company investing up to \$50M to standardize the interiors of the company's MD80 fleet (51 aircraft at this time) including increasing the seats per aircraft from 150 to 166, a 10% increase in capacity per aircraft. These additional seats will lower our unit costs as well as provide additional revenue opportunities, particularly on peak travel days. Delivery of converted aircraft is scheduled to begin in mid-2011 and continue through 2012.

Balance Sheet

I am pleased to report the company's balance sheet is in excellent condition. We have one of the strongest financial positions in the industry. We finished the year with \$297M of stockholder's equity and minimal debt (we completed a \$125M debt transaction during March, 2011 which increased our cash to over \$300M and our outstanding debt to 45% of equity). Since our public offering in late 2006 we have added more than \$190M of earnings to the company. Additionally, last year we

purchased \$54M of stock or 1.2M shares. Lastly, in 2010, our return on equity, after tax, was 22.3%.

Future

These investments in capacity will provide us with excellent growth during 2012 and beyond. Given the current run-up in fuel prices, which began in late 2010 and is continuing as this letter is written, we have chosen to limit our growth to allow us to increase our unit revenues. We have the capacity to add more service, but as in past times, have chosen to limit our activity to a level necessary to provide appropriate returns. Profitability trumps growth.

However, we will continue to grow. We have our investment plans and commitments in place for our 2012 and 2013 growth, namely the MD80 cabin upgrades and the addition of the 757s.

We are excited about our prospects. We continue to look left while others in this industry look right. Our successes during the past 10 years are directly attributable to our differences, particularly our focus on underserved markets. This has resulted in a critical differentiator, direct competition on only eight out of 160 routes, or 5%. The 757 will provide us with additional capabilities to tap underserved markets, a hallmark of our successful strategy. We are also mindful we must maintain our industry-leading cost structure. Leisure traffic is the most price sensitive travel sector. Without low costs, which translate into low fares and associated profits, our ability to stimulate our leisure travel customers will be suspect.

Lastly, our team members have been and will continue to be key to our success. Once again they have performed exceptionally well this past year. Their support of the company, their willingness to take care of the customer and their dedication to operating a safe, reliable, fun and leisure-focused company have been critical to our success.

PART I

Item 1. Business

Business Overview

We are a leisure travel company focused on providing travel services to residents of small, underserved cities in the United States. We operate a low-cost passenger airline marketed to leisure travelers in small cities, allowing us to sell air travel both on a stand-alone basis and bundled with hotel rooms, rental cars and other travel related services. Our route network, pricing philosophy, advertising and diversified product offering built around relationships with premier leisure companies are all intended to appeal to leisure travelers and make it attractive for them to purchase air travel and related services from us.

Our business model provides for diversified revenue streams, which we believe distinguishes us from other U.S. airlines and travel companies:

- *Scheduled service revenue* consists of air fare from our limited frequency nonstop flights between our small city markets and our leisure destinations.
- *Ancillary revenue* is generated from air-related charges and third party products. Air-related charges are generated through fees for use of our website to purchase tickets, checked bags, advance seat assignments, priority boarding and other services provided in conjunction with our scheduled air service. We also generate revenue from the sale of third party products such as hotel rooms, ground transportation (rental cars and hotel shuttle products) and attraction and show tickets. We recognize our ancillary revenue net of amounts paid to service providers, travel agent commissions and credit card processing fees.
- *Fixed fee contract revenue* consists largely of fixed fee flying agreements with affiliates of Caesars Entertainment, Inc. (formerly Harrah's Entertainment Inc.) that provide for a predictable revenue stream. We also provide charter service on a seasonal and ad hoc basis for other customers.

Our strategy is to develop the leisure travel market in small cities by offering nonstop low fare scheduled service to leisure destinations at low prices. We currently provide service to Las Vegas, Nevada, Orlando, Florida, Phoenix, Arizona, Tampa/St. Petersburg, Florida, Los Angeles, California and Ft. Lauderdale, Florida. We also currently provide limited service to other leisure destinations of Punta Gorda, Florida, San Diego, California, Palm Springs, California and the San Francisco Bay Area, California, along with seasonal service to Myrtle Beach, South Carolina.

Our business strategy has evolved as our experienced management team has looked differently at the traditional way business has been conducted in the airline and travel industry. We have consciously developed a different business model:

<u>Traditional Airline Approach</u>	<u>Allegiant Approach</u>
<ul style="list-style-type: none">• Focus on business traveler• Provide high frequency service• Use smaller aircraft to provide connecting service from smaller markets through hubs• Sell through various intermediaries• Offer flight connections• Use frequent flyer programs and code-share arrangements to increase passenger traffic	<ul style="list-style-type: none">• Focus on leisure traveler• Provide low frequency service from small cities• Use larger jet aircraft to provide nonstop service from small cities direct to leisure destinations• Sell only directly to travelers without participation in global distribution systems• No connecting flights offered• Do not use frequent flyer programs or code-share arrangements

Our Competitive Strengths

We have developed a unique business model that focuses on leisure travelers in small cities. We believe the following strengths allow us to maintain a competitive advantage in the markets we serve:

Focus on Transporting Travelers From Small Cities to Leisure Destinations. As of March 1, 2011, we provide nonstop low fare scheduled air service from 62 small cities (including seasonal service) primarily to the leisure destinations of Las Vegas, Nevada, Orlando, Florida, Phoenix, Arizona, Tampa/St. Petersburg, Florida, Los Angeles, California and Ft. Lauderdale, Florida. Generally, when we enter a new market, there is no existing nonstop service to our leisure destinations. We believe this nonstop service, along with our low prices and premier leisure company relationships, makes it attractive for leisure travelers to purchase air travel and related services from us.

By focusing on small cities, we believe we avoid the intense competition in high traffic domestic air corridors. In our typical small city market, travelers faced high airfares and cumbersome connections or long drives to major airports to reach our leisure destinations before we started providing service. As of March 1, 2011, we face mainline competition on only ten of our 161 routes. Based on published data from the U.S. Department of Transportation ("DOT"), we believe the initiation of our service stimulates demand as there has been a substantial increase in traffic after we have begun service on new routes. We believe our market strategy has had the benefit of not appearing hostile to either legacy carriers, whose historical focus has been connecting small cities to business markets, or traditional low cost carriers or LCCs, which have tended to focus more on larger markets than the small city markets we serve.

Low Operating Costs. We believe low costs are essential to competitive success in the airline industry. Our operating expense per available seat mile ("ASM") or operating CASM was 8.95¢ and 8.00¢ in 2010 and 2009, respectively. Excluding the cost of fuel, our operating CASM was 5.05¢ for 2010 and 4.97¢ for 2009.

Our low operating costs are the result of our focus on the following:

- *Cost-Driven Schedule.* We design our flight schedule to concentrate our aircraft each night in our crew bases. This concentration allows us to better utilize personnel, airport facilities, aircraft, spare parts inventories, and other assets. We can do this because we believe leisure travelers are generally less concerned about departure and arrival times than business travelers. Therefore, we are able to schedule flights at times that enable us to reduce our costs.
- *Low Aircraft Ownership Costs.* We believe we properly balance low aircraft ownership costs and low operating costs to minimize our total costs. As of March 1, 2011, our operating fleet consists of 51 MD-80 series aircraft. MD-80 aircraft are substantially less expensive to acquire than Airbus A320 and Boeing 737 aircraft and have been highly reliable aircraft. As of March 1, 2011, we also own eight MD-80 aircraft in long-term storage and three Boeing 757-200 aircraft, two of which have been leased out to third parties, with outstanding purchase agreements to acquire an additional three Boeing 757-200 aircraft. We expect to introduce these aircraft into our fleet through 2012. We believe the Boeing 757-200 aircraft will allow us to serve longer haul routes which could not be reached with the MD-80 aircraft, while maintaining low aircraft ownership costs consistent with our business model.
- *Highly Productive Workforce.* We believe we have one of the most productive workforces in the U.S. airline industry with approximately 32 full-time equivalent employees per operating aircraft as of March 1, 2011. We believe this compares favorably with the same ratio for other airlines based on recent publicly available industry data for other airlines. Our high level of employee productivity is created by cost-driven scheduling and the effective use of automation and part-time employees. We benefit from a motivated, enthusiastic workforce committed to high standards of friendly and reliable service. We invest a significant amount of time and resources

into carefully developing our training practices and selecting individuals to join our team who share our focus on ingenuity and continuous improvement. We conduct ongoing training programs to incorporate industry best practices and encourage strong and open communication channels among all of the members of our team so we can continue to improve the quality of the services we provide.

- *Simple Product.* We believe offering a simple product is critical to achieving low operating costs. As such, we sell only nonstop flights; we do not code-share or interline with other carriers; we have a single class cabin; we do not provide any free catered items—everything on board is for sale; we do not overbook our flights; we do not provide cargo or mail services; and we do not offer other perks such as airport lounges.
- *Low Distribution Costs.* Our nontraditional approach results in very low distribution costs. We do not sell our product through outside sales channels and, as such, avoid the fees charged by travel web sites (such as Expedia, Orbitz or Travelocity) and the traditional global distribution systems (“GDS”) (such as Sabre or Worldspan). Our customers can only purchase travel at our airport ticket counters or, for a fee, through our telephone reservation center or website. We actively encourage sales on our website. This is the least expensive form of distribution and accounted for 88.8% of our scheduled service revenue during 2010. We believe our percentage of website sales is among the highest in the U.S. airline industry. Further, we are 100% ticketless, which saves printing, postage, and back-office processing expenses.
- *Small Cities.* Our business model focuses on residents of small cities in the United States. Typically these airports have lower costs for carriers providing service. Our route network provides us the ability to take advantage of these lower costs with the majority of airports in our route network being in small cities, compared to our leisure destinations we serve which are larger and more expensive airports. In addition, these small city markets, along with the structure of our arrangements with airports which serve these small cities, result in lower marketing costs.

Strong Ancillary Revenues. We earn ancillary revenue in conjunction with the sale of scheduled air service which represents a significant percentage of our total operating revenue. Our ancillary revenues have grown from \$114.6 million in 2008, to \$162.7 million in 2009, and \$194.0 million in 2010, representing 22.7%, 29.2% and 29.2% of total operating revenues, respectively. On a per scheduled service passenger basis, our ancillary revenues increased from \$29.43 per scheduled service passenger in 2008 to \$33.07 in 2009 and \$34.58 in 2010. We believe ancillary revenue will continue to be a key component in our total average fare and we have proven during 2010 we can sustain high ancillary revenue per passenger levels in a difficult revenue environment.

Capacity Management. We actively manage our capacity in our routes to match the supply of seats to the demand existing in a given market, considering any seasonal shifts in demand that may exist. With strong ancillary revenue generated per passenger and the ability to spread out our costs over a larger number of passengers, we price our fares and actively manage our capacity to seek to achieve 90% load factors which has allowed us to operate profitably throughout a changing environment. Our low cost aircraft facilitate our ability to adjust service levels quickly and maintain profitability during difficult economic times.

Strong Financial Position. We have a strong financial position with significant cash balances. As of December 31, 2010, we had \$150.3 million of unrestricted cash, cash equivalents and short-term investments. As of December 31, 2010, our total debt was \$28.1 million and our debt to total capitalization ratio was 8.6%. We also have grown profitably with generation of net income in eight consecutive years. On March 10, 2011, we borrowed \$125.0 million under a senior secured term loan facility (“Term Loan”). We believe the Term Loan will further strengthen our financial position and

provide us greater financial flexibility to grow the business and weather sudden industry disruptions or U.S. macro events.

Proven Management Team. We have a strong stable management team comprised of experienced and motivated individuals. Our management team is led by Maurice J. Gallagher, Jr. and Andrew C. Levy, each of whom has an extensive background in the airline industry. Mr. Gallagher was the president of WestAir Holdings, Inc. and built WestAir into one of the largest regional airlines in the U.S. prior to its sale in 1992 to Mesa Air Group. He was also one of the founders of ValuJet, Inc., which is known today as AirTran Holdings, Inc. Mr. Levy was a former manager of ValuJet where he quickly advanced into roles of increasing responsibility and later worked for an airline investment and advisory firm. Each of these executives has been with us since 2001.

Our Business Strategy

To continue the growth of our business and increase our profitability, our strategy will be to continue to offer a single class of air travel service at low fares and expand our travel offerings, while maintaining high quality standards, keeping our operating costs low and pursuing ways to make our operations more efficient. We intend to grow by adding flights on existing routes, entering additional small cities, connecting our existing small cities to more of our leisure destinations, providing service to more leisure destinations and expanding our relationships with premier leisure companies.

The following are the key elements of our strategy:

Capitalize on Significant Growth Opportunities in Transporting Travelers from Small Cities to Leisure Destinations. We believe small cities represent a large untapped market, especially for leisure travel. We believe small city travelers have limited options to leisure destinations as existing carriers are generally focused on connecting the small city "spokes" to their business hubs. We aim to become the premier travel brand for leisure travelers in the small cities served by us.

Since the beginning of 2004, we have expanded our scheduled air service from six to 62 small cities as of March 1, 2011, including seasonal service. These 62 small cities have an aggregate population in excess of 50 million people within a 50-mile radius of the airports in those cities. In most of these cities, we provide service to more than one of our leisure destinations. We expect to grow our service to leisure destinations by adding frequency from some existing small city markets and initiating service from additional small cities. We believe our business model would be suitable for approximately 100 small cities in the U.S., Canada and Mexico.

We also believe there are several other major leisure destinations that share many of the same characteristics as Las Vegas, Orlando, Phoenix, Tampa/St. Petersburg, Los Angeles and Ft. Lauderdale. These potential markets include Hawaii, several other popular vacation destinations in the U.S. (including the possible expansion of our current limited service to destinations such as Punta Gorda, Florida and San Diego, California), Mexico and the Caribbean.

Develop New Sources of Revenue. We have identified three key areas where we have built and believe we can grow our ancillary revenues:

- *Unbundling the Traditional Airline Product.* We believe most leisure travelers are concerned primarily with purchasing air travel for the least expensive price. As such, we have created new sources of revenue by charging fees for services many U.S. airlines historically bundled in their product offering. We believe by offering a simple base product at an attractive low fare we can stimulate demand and generate incremental revenue as customers pay additional amounts for conveniences they value. For example, we do not offer complimentary advance seat assignments; however, any customer can purchase advance seat assignments for a small incremental cost. We also sell snacks and beverages on board the aircraft so our customers can pay for only the items

they value. We aim to continue to increase ancillary revenue by further unbundling our air travel product.

- *Expand and Add Partnerships with Premier Leisure Companies.* We currently work with many premier leisure companies in our leisure destinations that provide ancillary products and services we sell to our customers. For example, we have contracts with Caesars Entertainment Inc. (formerly Harrah's Entertainment Inc.) and MGM MIRAGE, among others, that allow us to provide hotel rooms sold in packages to our customers. During 2010, we generated revenue from the sale of more than 500,000 hotel rooms. By expanding our existing relationships and seeking additional partnerships with premier leisure companies, car rental companies and other travel providers, we believe we can increase the number of products and services offered to our customers and generate more ancillary revenue. We continue to emphasize and focus on revenue growth from third party products. We believe our efforts to enhance software capabilities and provide additional offerings, along with our loyal customer base, could result in meaningful long-term revenue growth.
- *Leverage Direct Relationships With Our Customers.* Since approximately 89% of our scheduled service revenue was purchased directly through our website in 2010, we are able to establish direct relationships with our customers by capturing their email addresses for our database. This information provides us multiple cost effective opportunities to market products and services, including at the time they purchase their travel, between the time they purchase and initiate their travel, and after they have completed their travel. In addition, we market products and services to our customers during the flight. We believe the breadth of options we can offer them allows us to provide a "one-stop" shopping solution to enhance their travel experience.

Continue to Focus on Reducing Our Operating Costs. We intend to continue to focus on reducing our costs to remain one of the lowest cost airlines in the world, which we believe is instrumental to increasing profitability. We expect to drive operational efficiency and reduce costs in part by growing our network. We will expand our network by increasing the frequency of our flights in existing small city markets, expanding the number of small cities we serve, and increasing the number of leisure destinations, all of which permits us to increase the utilization of our employees and assets, spreading our fixed costs over a larger number of departures and passengers.

Minimize Fixed Costs to Increase Strategic Flexibility. We believe our low aircraft ownership costs and the lower costs associated with our small city market strategy provide us with a lower level of fixed costs than other U.S. airlines. We believe our low level of fixed costs provides us with added flexibility in scheduling our services and controlling our profitability. For example, with lower fixed costs we are better able to quickly adjust capacity to suit market, fuel or economic conditions, enter or exit markets and match the size and utilization of our fleet to limit unprofitable flying and increase profitability.

Routes and Schedules

Our current scheduled air service predominantly consists of limited frequency, nonstop flights into Las Vegas, Orlando, Phoenix, Tampa/St. Petersburg, Los Angeles and Ft. Lauderdale from small cities (including seasonal service) across the continental United States. As of March 1, 2011, we offered scheduled service from 62 small cities on 161 routes in 35 states. We believe our route network expansion has provided us geographic diversity which provides protection from competitive influences in the markets we serve and continued growth in our customer base.

We attempt to match the frequency of flights with market demand. We rarely have daily flights in our markets, nor do we generally offer multiple flights per day. In most cases, we offer several flights per week in each of our markets. We regularly adjust frequency in our markets as demand warrants. In periods of high fuel costs, we tend to reduce capacity to help support the higher airfares necessary to cover the higher fuel costs and to generate profits.

In addition, we temporarily suspend flying some of our Florida, Phoenix, Arizona and Los Angeles, California routes for varying periods (depending on the route) between the middle of August and the beginning of November as leisure demand to these destinations tends to be quite weak during this time. We schedule crew training, aircraft maintenance and additional charter flying to coincide with these periods. We also fly on a seasonal basis routes to Myrtle Beach, South Carolina during the summer months when demand is stronger.

We generally begin our route selection process by identifying markets in which there is no nonstop service to our leisure destinations, which have a large enough population in the airport's catchment area to support at least two weekly flights, and which are typically no more than eight hours round-trip flight time from the destination. The eight hour limit permits one flight crew to perform the mission, avoiding costly crew overnight expenses and increasing crew utilization and efficiency. We then study publicly available data from the DOT showing the historical number of passengers, capacity, and average fares over time in the identified markets. We also study general demographic information about the population base for the targeted market area to assist in our determination whether we believe a service from a particular market would likely be successful.

We forecast the level of demand in a particular market that will result from the introduction of our service as well as our judgment of the likely competitive response of other airlines. We focus on markets where competitors are unlikely to initiate service and we prioritize routes that can be started at low marginal crew and ground operations costs.

Once a market is classified as attractive, we begin a rigorous analysis of the costs of providing service to that market. The major costs under consideration would be the initial and ongoing advertising costs to gain and maintain name recognition, airport charges, ground handling and fuel costs. The demand for nonstop air service in our small city markets often gives us leverage to attract financial support from the cities and airports we serve in the form of shared advertising costs or abatement or reduction of airport fees.

Our fixed fee flying predominately consists of flying under an agreement with Caesars Entertainment Inc. (formerly Harrah's Entertainment Inc.) with one aircraft based in Tunica, Mississippi and two aircraft in Laughlin, Nevada. In February 2011, we began flying under an agreement with Peppermill Resorts Inc. with one aircraft based in Wendover, Nevada. We are a participant in the Civil Reserve Air Fleet ("CRAF") which allows us to bid on and be awarded peacetime airlift contracts with the military. During periods when aircraft are not utilized for scheduled service flying, we typically seek out additional charter service and ad hoc flying.

Sales and Distribution

We sell air transportation that may be packaged, at the passenger's discretion, with other products such as hotels, rental cars, and tickets to popular tourist attractions in our leisure destinations. We have chosen to maintain full control over our inventory and only distribute our product through our website, our call center, or at our airport ticket counters. We do not sell through Expedia, Travelocity, Orbitz or any other internet travel agencies nor is our product displayed and sold through the global distribution systems which include Sabre, Galileo, Worldspan and Amadeus. This distribution strategy results in reduced expenses by avoiding the fees associated with the use of GDS distribution points and also permits us to closely manage ancillary product offerings and pricing and develop and maintain a direct relationship with our customers. The direct relationship enables us to engage continuously in

communications with our customers which we believe will result in substantial benefits over time. With our own automation system, we have the ability to continually change our ancillary product offerings and pricing points which allows us to experiment to find the optimal pricing levels for our various offerings. We believe this would be difficult and impractical to achieve through the use of the GDS systems.

We market our services through advertising and promotions in newspapers, magazines, television and radio and through targeted public relations and promotional efforts in our small city markets. We currently advertise in more than 400 print circulations. We also rely on public relations and word-of-mouth to promote our brand. We generally run special promotions in coordination with the inauguration of service into new markets. Starting approximately 60 days before the launch of a new route, we undertake a major advertising campaign in the target market and local media attention frequently focuses on the introduction of our new service.

We have a database of more than one million email addresses from past customers and visitors to our website, and use blast emails to communicate special offers to this group. The heaviest concentration of air-only sales occurs in the period 30 to 60 days before departure, and occurs 30 to 90 days before departure for air-hotel package sales. We commonly use email promotions directed toward the customers in our database as a vehicle for selling unsold seats in the period two to three weeks before departure.

All of our bookings must be made on our website, through our call center or at our airport ticket counters, even if booked through travel agents. The percentage of our scheduled service bookings on our website has exceeded 86% in each of the last five years. This distribution mix creates significant cost savings for us and enables us to continue to build loyalty with our customers through increased interaction with them. We expect the development of our website and other automation enhancements to allow us to take further advantage of our customer loyalty with additional product offerings.

Pricing, Revenue Management and Air-Related Ancillary Revenue

Our low fares are designed to stimulate demand from price-sensitive leisure travelers who might not have traveled to our leisure destinations due to the expense and inconvenience involved prior to our initiation of non-stop service. Our fare structure generally comprises six "buckets," with prices generally increasing as the number of days prior to travel decreases. Prices in the highest bucket are typically less than three times the prices in the lowest bucket. All our fares are one-way and non-refundable, although they may be changed for a \$50 charge per segment. Customers may avoid change fees by buying our travel protection product (Trip-Flex) at the time of purchase.

We try to maximize the overall revenue of our flights by watching inherent demand on a given route on any given day and managing the number of seats we offer for sale in these six "buckets". The number of seats offered at each fare is established through a continual process of forecasting, optimization and competitive analysis. Generally, past booking history and seasonal trends are used to forecast anticipated demand. These historical forecasts are combined with current bookings, upcoming events, competitive pressures and other factors to establish a mix of fares designed to maximize revenue. The ability to accurately adjust prices based on fluctuating demand patterns allows us to balance loads and capture more revenue from existing capacity. We believe effective yield management has contributed to our strong financial operating performance and is a key to our continued success.

Ancillary revenue is derived from third party products and air-related charges associated with the trip of our customer. Air-related charges include fees for using our reservation center or website to purchase air travel; checked bags and overweight bags; unlimited changes to reservations (our Trip-Flex product); seat selection; priority boarding; and several other aspects of air travel. Pricing of certain air-related charges such as our customer convenience fee and booking fee is based on an established

fixed price. Other air-related charges such as baggage fees and priority boarding fees are adjusted market to market based on customer demand to seek to increase revenue potential.

Third Party Ancillary Revenue

Along with our air-related charges, the sale of third party products is the other component of our ancillary revenue. We offer our customers the opportunity to purchase hotels, rental cars, show tickets, night club packages and other attractions packaged with air travel and have recently employed a low price guarantee ensuring we maintain the most cost effective form of leisure travel in the industry. Our third party offerings are available to customers based on our agreements with various premier travel and leisure companies. As of March 1, 2011, we have agreements to offer rooms from approximately 260 hotels and tickets to over 50 attractions in our leisure destinations. In addition, we have an exclusive agreement with one rental car operator for the sale of rental cars packaged with air travel at all of our major leisure destinations and most of our other leisure destinations. Pricing of attractions, shows and tours are based on a net-pricing model. The pricing of each product can be adjusted market to market based on customer demand and take rate.

During 2010, we entered into an amendment of an agreement with one of our key Las Vegas hotel partners for access to hotel rooms for sale. Under the amendment, we prepaid \$25.0 million in exchange for discounted room rates and commitments on inventory levels available for sale by us. Over the term of the agreement, we are not required to purchase any amount of rooms. The agreement is not exclusive in nature and allows us to be repaid any unused portion of the prepayment upon termination or expiration of the agreement.

Competition

The airline industry is highly competitive. Passenger demand and fare levels have historically been influenced by, among other things, the general state of the economy, international events, industry capacity and pricing actions taken by other airlines. The principal competitive factors in the airline industry are fare pricing, customer service, routes served, flight schedules, types of aircraft, safety record and reputation, code-sharing relationships and frequent flyer programs.

Our competitors and potential competitors include legacy airlines, LCCs, regional airlines and new entrant airlines. Many of these airlines are larger, have significantly greater financial resources and serve more routes than we do. In a limited number of cases, competitors have chosen to add service, reduce their fares or both, in some of our markets following our entry. In a few cases, other airlines have entered after we have developed a market.

We believe a key to our initial and long-term success is that we seek to offer customers in our markets a better alternative for airline travel. We offer a simple, affordable product with excellent customer service and reliability using clean and comfortable aircraft. We sell only nonstop flights. We do not require Saturday night stays or the purchase of round-trip travel. We do not overbook our flights. We understand that our leisure customer only has a limited number of vacation days and relies on us to get them to their destination and back in a timely manner.

Our 150-seat MD-80 aircraft, with an average seat pitch of 31 to 32 inches, offer a comfortable alternative to the 37 to 86 seat regional jets that secondary market travelers are accustomed to flying as part of the hub and spoke networks of the legacy carriers. Additionally, we believe the MD-80's three-by-two seating configuration is well liked by the traveling public because 80% of all seats are window or aisle seats. We adhere to the successful model pioneered by Southwest by offering a single class of service. We also offer advance seat assignments and priority boarding for a fee which depends on the route served and location of the seat in the aircraft.

Our small city strategy has reduced the intensity of competition we might otherwise face. As of March 1, 2011, we are the only domestic scheduled carrier operating out of the Orlando Sanford International Airport, the only scheduled carrier operating out of Phoenix-Mesa Gateway Airport in Phoenix and one of only three carriers serving the St. Petersburg-Clearwater International Airport. Virtually all U.S. airlines serve Las Vegas, Orlando, Phoenix, Tampa/St. Petersburg, Los Angeles and Ft. Lauderdale and could become more competitive in the future.

As of March 1, 2011, we face mainline competition on only ten of our 161 routes. We compete with AirTran on six routes into Orlando and one route into Tampa/St. Petersburg. We compete with Jetblue Airways on one route to Las Vegas (Long Beach) and with Spirit Airlines on one route to Ft. Lauderdale (Plattsburgh). We also compete with Alaska Airlines on one route to Las Vegas (Bellingham). In addition, we compete with smaller regional jet aircraft on our Fresno to Las Vegas route (United Express and US Airways) and with Horizon Air on our Medford to Los Angeles route.

Indirectly, we compete with Southwest, US Airways, AirTran, Delta and other carriers that provide nonstop service to our leisure destinations from airports near our small city markets. For example, we fly to Bellingham, Washington, which is a two-hour drive from Seattle-Tacoma International Airport, where travelers can access nonstop service to Las Vegas on Alaska Airlines, Southwest or US Airways. We also face indirect competition from legacy carriers offering hub-and-spoke connections to our markets. For example, travelers can travel to Las Vegas from Peoria on United, American or Delta, although all of these legacy carriers currently utilize regional aircraft to access their hubs and then mainline jets to access Las Vegas. Legacy carriers offering these segments with connecting flights and use of regional aircraft, tend to charge higher and restrictive fares. In addition, these alternatives to our direct flight service have a much longer elapsed time of travel.

We also face indirect competition from automobile travel in our short-haul flights, primarily to our Florida leisure destinations. We believe our low cost pricing model, customer service, and the convenience of air transportation help us compete favorably against automobile travel.

In our fixed fee operations, we compete with the aircraft of other scheduled airlines as well as with independent passenger charter airlines such as Xtra. We also compete with aircraft owned or controlled by large tour companies. The basis of competition in the fixed fee market is cost, equipment capabilities, service and reputation.

People

We believe our growth potential and the achievement of our corporate goals are directly linked to our ability to attract and retain some of the best professionals available in the airline business. Full-time equivalent employees at February 1, 2011 consisted of 326 pilots, 384 flight attendants, 265 airport operations personnel, 272 mechanics, 114 reservation agents, and 242 management and other personnel. As of February 1, 2011, we employed 1,427 full-time and 399 part-time employees, which we consider to be 1,603 full-time equivalent employees.

We place great emphasis on the selection and training of enthusiastic employees with potential to add value to our business and who we believe fit in with and contribute to our business culture. The recruiting and training process begins with an evaluation and screening process, followed by multiple interviews and experience verification. We provide extensive training intended to meet all Federal Aviation Administration ("FAA") requirements for security, safety and operations for our pilots, flight attendants and customer service agents.

To help retain talented and highly motivated employees, we offer competitive compensation packages as well as affordable health and retirement savings options. We offer medical, dental and 401(k) plans to full-time employees. Other salaried benefits include paid time off, as well as supplemental life insurance and long-term disability. We do not have a defined benefit pension plan for

any employees. We review our compensation packages on a regular basis in an effort to ensure that we remain competitive and are able to hire and retain the best people possible.

In addition to offering competitive compensation and benefits, we take a number of steps to make our company an attractive place to work and build a career such as maintaining various employee recognition programs and consistently communicating our vision and mission statement to our employees. We believe creating a great place for our people to work motivates them to treat our customers beyond their expectations.

We have never experienced an organized work stoppage or strike. We have an in-house pilot association which we meet with on a regular basis to address relevant issues and matters of concern. In February 2010, we agreed with the association on a new compensation and benefits arrangement for our pilots. The terms of the arrangement became effective in May 2010, will become amendable in November 2013 and include base pay scale variability based on operating margin production. The base pay scale is determined twice a year based on a rolling twelve month operating margin ranging up to and above 20%.

In December 2010, our flight attendant employee group voted for representation from the Transport Workers Union (TWU). We are currently in negotiations with TWU for a labor agreement and look to maintain a mutually satisfactory arrangement consistent with the compensation arrangement negotiated with the flight attendant in-house association in 2010 and which became effective in July 2010.

Aircraft and Fleet

Our operating fleet of 51 aircraft consists of 39 MD-83, two MD-87, four MD-82 aircraft, and six MD-88 aircraft as of March 1, 2011. We generally utilize our 130-seat aircraft (MD-87) for our fixed fee flying and our 150-seat aircraft (MD-82/83/88) for our scheduled service. In addition, we have eight MD-80 aircraft in long-term storage. In January 2011, we permanently removed one MD-87 aircraft from service.

We believe conditions in the market for high quality used MD-80 class aircraft are favorable for buyers and believe there is ample availability of suitable aircraft to permit growth well beyond the aircraft currently owned. However, MD-80 series aircraft and Pratt & Whitney JT8D-200 series engines are no longer manufactured. This could cause a shortage of additional suitable aircraft, engines or spare parts over the long term. In January 2011, the FAA adopted new regulations to address aging aircraft. These new regulations may impact the timing of when we seek a replacement for our current aircraft fleet.

Our operating MD-80 aircraft range from 15 to 25 years old with an average age of 21.4 years as of March 1, 2011. As of March 1, 2011, the average number of cycles on our fleet was approximately 32,500 cycles and the highest number of cycles on any of our aircraft was approximately 47,700. A cycle is defined as one take-off and landing and is a measure often used by regulators in determining the applicability of aging aircraft requirements. We historically operate approximately 1,000 cycles per aircraft per year.

We have committed to a seat reconfiguration program for our MD-80 aircraft which will increase revenue opportunities for our scheduled service fleet. All our MD-80 aircraft (excluding our MD-87 aircraft) will be reconfigured from 150 seats to 166 seats by standardizing the passenger layout accommodations which will be made possible by removing galleys, relocating lavatories and installing slim line, lightweight seats. We expect this project to start in the third quarter 2011 and take approximately 12 months to complete.

In March 2010, we entered into a purchase contract for six Boeing 757-200 aircraft with delivery dates from 2010 to 2012. These aircraft will provide us the ability to serve longer haul markets,

including the expectation to serve Hawaii after we receive regulatory approval for extended over water operations. As of March 1, 2011, we have taken ownership of three of these aircraft, leased out two of them to a third party, and expect to operate the third by the third quarter of 2011 for fixed fee flying services and possibly long haul domestic scheduled service routes. We expect to take ownership of a fourth aircraft during March 2011 which we will also be leasing out to a third party. We expect the two leased out aircraft, and the third aircraft we intend to lease out, to be on lease through the summer of 2012. In the fourth quarter of 2011, we expect to take ownership of the remaining two aircraft under the purchase contract.

From time to time, we consider the acquisition of a newer aircraft type to replace our existing fleet or to expand our operations. Before making any decision to acquire a newer aircraft type, we carefully evaluate its effect on our cost structure and the potential additional revenue to be generated.

Maintenance

We have an FAA-approved maintenance program, which is administered by our maintenance department headquartered in Las Vegas. Consistent with our core value of safety, all mechanics and avionics specialists employed by us have appropriate training and experience and hold required licenses issued by the FAA. We provide them with comprehensive training and maintain our aircraft and associated maintenance records in accordance with FAA regulations. The maintenance performed on our aircraft can be divided into three general categories: line maintenance, heavy maintenance, and component and engine overhaul and repair. Scheduled line maintenance is generally performed by our personnel. We contract with outside organizations to provide heavy maintenance and component and engine overhaul and repair. We have chosen not to invest in facilities or equipment to perform our own heavy maintenance, engine overhaul or component work. Our management closely supervises all maintenance functions performed by our personnel and contractors employed by us, and by outside organizations. We closely supervise the outsourced work performed by our heavy maintenance and engine overhaul contractors.

Line maintenance consists of routine daily and weekly scheduled maintenance checks on our aircraft, including pre-flight, daily, weekly and overnight checks and any diagnostics and routine repairs. We perform this work at our maintenance bases in Las Vegas, Orlando, Phoenix, Tampa/St. Petersburg, Los Angeles, Ft. Lauderdale, Bellingham (Washington), Grand Rapids (Michigan), Tunica (Mississippi), and Laughlin (Nevada) with the Laughlin and Tunica bases supporting our fixed fee flying services. In February 2011, we opened a maintenance base in Wendover, Nevada, which has one aircraft based there and supports fixed fee flying services. For unscheduled requirements that arise away from our maintenance bases, we subcontract our line maintenance to outside organizations under customary industry terms.

Heavy maintenance checks consist of more complex inspections and servicing of the aircraft that cannot be accomplished during an overnight visit. These checks occur approximately every 18 months on each aircraft and can range in duration from two to six weeks, depending on the magnitude of the work prescribed in the particular check. AAR Corp., one of the largest maintenance, repair and overhaul facilities, performs our airframe heavy maintenance checks under a contract with a term through the end of 2015. We also utilize AAR Corp., along with Flight Star, another FAA approved airframe heavy maintenance vendor, for induction services to ready newly acquired aircraft to enter our operating fleet.

Component and engine overhaul and repair involves sending certain parts, such as engines, landing gear and avionics, to FAA-approved maintenance repair stations for repair and overhaul. We presently utilize Pratt & Whitney controlled Christchurch Engine Centre, TIMCO Aviation Services, Inc. and ITR for overhaul and repair of our engines on a non-exclusive basis.

We also have a non-exclusive general terms agreement with Avioserv for the consignment of engine parts.

In addition to the maintenance contractors we presently utilize, we believe there are sufficient qualified alternative providers of maintenance services that we can use to satisfy our ongoing maintenance needs.

Aircraft Fuel

Fuel is our largest operating expense. The cost of fuel is volatile, as it's subject to many economic and geopolitical factors we can neither control nor predict. Significant increases in fuel costs could materially affect our operating results and profitability. We do not currently use financial derivative products to hedge our exposure to jet fuel price volatility.

In an effort to reduce our fuel costs, we have sought to become involved at an earlier stage in the fuel distribution channels. In this regard, we formed a wholly-owned subsidiary which entered into a limited liability company operating agreement with an affiliate of Orlando Sanford International Airport to engage in contract fueling transactions for the provision of aviation fuel to airline users at that airport. In addition, we have invested in fuel storage units and fuel transportation facilities involved in the fuel distribution process. These efforts could result in the creation of additional joint ventures to further our involvement in the fuel distribution process. By reason of these activities, we could potentially incur material liabilities, including possible environmental liabilities, to which we would not otherwise be subject.

Government Regulation

We are subject to regulation by the DOT, FAA and other governmental agencies.

DOT. The DOT primarily regulates economic issues affecting air transportation such as certification and fitness of carriers, insurance requirements, consumer protection, competitive practices and statistical reporting. The DOT also regulates requirements for accommodation of passengers with disabilities. The DOT has the authority to investigate and institute proceedings to enforce its regulations and may assess civil penalties, suspend or revoke operating authority and seek criminal sanctions. The DOT also has authority to restrict or prohibit a carrier's cessation of service to a particular community if such cessation would leave the community without scheduled airline service.

We hold a DOT certificate of public convenience and necessity authorizing us to engage in: (i) scheduled air transportation of passengers, property and mail within the United States, its territories and possessions and between the United States and all countries that maintain a liberal aviation trade relationship with the United States (known as "open skies" countries), and (ii) charter air transportation of passengers, property and mail on a domestic and international basis.

FAA. The FAA primarily regulates flight operations and safety, including matters such as airworthiness and maintenance requirements for aircraft, pilot, mechanic, dispatcher and flight attendant training and certification, flight and duty time limitations and air traffic control. The FAA requires each commercial airline to obtain and hold an FAA air carrier certificate. This certificate, in combination with operations specifications issued to the airline by the FAA, authorizes the airline to operate at specific airports using aircraft certificated by the FAA. We have and maintain in effect FAA certificates of airworthiness for all of our aircraft, and we hold the necessary FAA authority to fly to all of the cities we currently serve. Like all U.S. certificated carriers, providing scheduled service to certain destinations may require governmental authorization. The FAA has the authority to investigate all matters within its purview and to modify, suspend or revoke our authority to provide air transportation, or to modify, suspend or revoke FAA licenses issued to individual personnel, for failure to comply with FAA regulations. The FAA can assess civil penalties for such failures and institute proceedings for the

collection of monetary fines after notice and hearing. The FAA also has authority to seek criminal sanctions. The FAA can suspend or revoke our authority to provide air transportation on an emergency basis, without notice and hearing, if, in the FAA's judgment, safety requires such action. A legal right to an independent, expedited review of such FAA action exists. Emergency suspensions or revocations have been upheld with few exceptions. The FAA monitors our compliance with maintenance, flight operations and safety regulations on an ongoing basis, maintains a continuous working relationship with our operations and maintenance management personnel, and performs frequent spot inspections of our aircraft, employees and records.

The FAA also has the authority to promulgate rules and regulations and issue maintenance directives and other mandatory orders relating to, among other things, inspection, repair and modification of aircraft and engines, increased security precautions, aircraft equipment requirements, noise abatement, mandatory removal and replacement of aircraft parts and components, mandatory retirement of aircraft and operational requirements and procedures. Such rules, regulations and directives are normally issued with the opportunity to comment, however, they may be issued without advance notice or opportunity for comment if, in the FAA's judgment, safety requires such action.

We believe we are operating in compliance with applicable DOT and FAA regulations, interpretations and policies and we hold all necessary operating and airworthiness authorizations, certificates and licenses.

Security. Within the United States, civil aviation security functions, including review and approval of the content and implementation of air carriers' security programs, passenger and baggage screening, cargo security measures, airport security, assessment and distribution of intelligence, threat response, and security research and development are the responsibility of the TSA of the Department of Homeland Security. The TSA has enforcement powers similar to DOT's and FAA's described above. It also has the authority to issue regulations, including in cases of emergency, the authority to do so without advance notice, including issuance of a grounding order as occurred on September 11, 2001.

Environmental. We are subject to various federal, state and local laws and regulations relating to the protection of the environment and affecting matters such as aircraft engine emissions, aircraft noise emissions, and the discharge or disposal of materials and chemicals, which laws and regulations are administered by numerous state and federal agencies. These agencies have enforcement powers similar to DOT's and FAA's described above. In addition, we may be required to conduct an environmental review of the effects projected from the addition of service at airports.

Federal law recognizes the right of airport operators with special noise problems to implement local noise abatement procedures so long as those procedures do not interfere unreasonably with interstate and foreign commerce and the national air transportation system. These restrictions can include limiting nighttime operations, directing specific aircraft operational procedures during takeoff and initial climb, and limiting the overall number of flights at an airport. Of the airports we serve, only Long Beach, California, currently restricts the number of flights or hours of operation, although it is possible one or more other such airports may do so in the future with or without advance notice.

Foreign Ownership. To maintain our DOT and FAA certificates, our airline operating subsidiary and we (as the airline's holding company) must qualify continuously as a citizen of the United States within the meaning of U.S. aeronautical laws and regulations. This means we must be under the actual control of U.S. citizens and we must satisfy certain other requirements, including that our president and at least two-thirds of our board of directors and other managing officers must be U.S. citizens, and that not more than 25% of our voting stock may be owned or controlled by non-U.S. citizens. The amount of non-voting stock that may be owned or controlled by non-U.S. citizens is strictly limited as well. We believe we are in compliance with these ownership and control criteria.

Other Regulations. Air carriers are subject to certain provisions of federal laws and regulations governing communications because of their extensive use of radio and other communication facilities, and are required to obtain an aeronautical radio license from the Federal Communications Commission ("FCC"). To the extent we are subject to FCC requirements, we will continue to comply with those requirements.

The quality of water used for drinking and hand-washing aboard aircraft is subject to regulation by the Environmental Protection Agency ("EPA"), and by April 2011 and October 2011, we will have to implement new EPA-required procedures relating thereto. To the extent we are subject to EPA requirements, we will continue to comply with those requirements.

We are responsible for collection and remittance of federally imposed and federally approved taxes and fees applicable to air transportation passengers. We believe we are in compliance with these requirements, and we will continue to comply with them.

Our operations may become subject to additional federal requirements in the future under certain circumstances. For example, our labor relations are covered under Title II of the Railway Labor Act of 1926, as amended, and are subject to the jurisdiction of the National Mediation Board. During a period of past fuel scarcity, air carrier access to jet fuel was subject to allocation regulations promulgated by the Department of Energy.

We are also subject to state and local laws, regulations and ordinances at locations where we operate and to the rules and regulations of various local authorities that operate airports we serve. None of the airports in the small cities in which we operate have slot control, gate availability or curfews that pose meaningful limitations on our operations. However, some small city airports have short runways that require us to operate some flights at less than full capacity.

International air transportation, whether provided on a scheduled or charter basis, is subject to the laws, rules and regulations of the foreign countries to, from and over which the international flights operate. Foreign laws, rules and regulations governing air transportation are generally similar, in principle, to the regulatory scheme of the United States as described above, although in some cases foreign requirements are comparatively less onerous and in others, more onerous. We must comply with the laws, rules and regulations of each country to, from or over which we operate. International flights are also subject to U.S. Customs and Border Protection, Immigration and Agriculture requirements and the requirements of equivalent foreign governmental agencies.

Future Regulation. Congress, the DOT, the FAA, the EPA and other governmental agencies have under consideration, and in the future may consider and adopt, new laws, regulations, interpretations and policies regarding a wide variety of matters that could affect, directly or indirectly, our operations, ownership and profitability. We cannot predict what other matters might be considered in the future by the FAA, the DOT, the EPA, other agencies or Congress, nor can we judge what impact, if any, the implementation of any of these proposals or changes might have on our business.

Civil Reserve Air Fleet. In February 2009 we received approval to become a participant in the Civil Reserve Air Fleet (CRAF) Program which affords the U.S. Department of Defense the right to charter our aircraft during national emergencies when the need for military airlift exceeds the capability of available military resources. During the Persian Gulf War of 1990-91 and on other occasions, CRAF carriers were required to permit the military to use their aircraft in this manner. As a result of our CRAF approval, we are eligible to bid on and be awarded peacetime airlift contracts with the military.

Insurance

We maintain insurance policies we believe are of types customary in the industry and as required by the DOT and in amounts we believe are adequate to protect us against material loss. The policies principally provide coverage for public liability, passenger liability, baggage and cargo liability, property

damage, including coverages for loss or damage to our flight equipment and workers' compensation insurance. There is no assurance, however, that the amount of insurance we carry will be sufficient to protect us from material loss.

General Information

Our principal executive offices are located at 8360 South Durango Drive, Las Vegas, Nevada 89113. Our telephone number is (702) 851-7300. Our website addresses are <http://www.allegiant.com> and <http://www.allegianttravelcompany.com>. We have not incorporated by reference into this annual report the information on our websites and you should not consider it to be a part of this document. Our website addresses are included in this document for reference only. Our annual report, quarterly reports, current reports and amendments to those reports are made available free of charge through our website at ir.allegiant.com, as soon as reasonably practicable after electronically filed with or furnished to the Securities and Exchange Commission ("SEC").

Item 1A. Risk Factors

An investment in our common stock involves a high degree of risk. Investors should carefully consider the risks described below before making an investment decision. Our business, financial condition or results of operations could be materially and adversely affected by any of these risks. The trading price of our common stock could decline due to any of these risks, and investors may lose all or part of their investment.

Risks Related to Allegiant

Increases in fuel prices or unavailability of fuel would harm our business and profitability.

Fuel costs constitute a significant portion of our total operating expenses, representing approximately 43.6% and 37.9% during 2010 and 2009, respectively. Our average cost per gallon increased sequentially in all quarters of 2009 and 2010 except for one and continues to increase with the widespread unrest in the Middle East and North Africa. The cost of fuel cannot be predicted with any degree of certainty and further fuel cost volatility could significantly affect our future results of operations. Significant increases in fuel costs have negatively affected our operating results in the past and future price increases could harm our financial condition and results of operations.

Aircraft fuel availability is also subject to periods of market surplus and shortage and is affected by demand for heating oil, gasoline and other petroleum products. Because of the effect of these events on the price and availability of aircraft fuel, the price and future availability of fuel cannot be predicted with any degree of certainty. A fuel supply shortage or higher fuel prices could result in curtailment of our service.

Current negative economic conditions may adversely affect travel from our small city markets to our leisure destinations.

The U.S. economy continues to be impacted by high unemployment and other factors which may reduce the wealth and tighten spending of consumers. Leisure travel is aligned with discretionary spending and it is uncertain to what extent these economic conditions will affect consumers and leisure travel. These conditions could impact demand for airline travel in our small city markets or to our leisure destinations.

Our reputation and financial results could be harmed in the event of an accident or new regulations affecting our aircraft or other MD-80 aircraft.

An accident or incident involving one of our aircraft, even if fully insured, could cause a public perception that we are less safe or reliable than other airlines, which would harm our business. Because

we are smaller than most airlines, an accident would likely adversely affect us to a greater degree than a larger, more established airline.

Additionally, our current dependence on this single type of aircraft and engine for all of our flights makes us particularly vulnerable to any problems that might be associated with, or aging aircraft requirements affecting, this aircraft type or these engines. Our business would be significantly harmed if a mechanical problem with the MD-80 series aircraft or the Pratt & Whitney JT8D-200 series engine were discovered causing our aircraft to be grounded while any such problem is being corrected, assuming it could be corrected at all. The Federal Aviation Administration (“FAA”) could also suspend or restrict the use of our aircraft in the event of any actual or perceived mechanical problems, whether involving our aircraft or another U.S. or foreign airline’s aircraft, while it conducts its own investigation. Our business would also be significantly harmed if the public avoids flying our aircraft due to an adverse perception of the MD-80 series aircraft or the Pratt & Whitney JT8D-200 series engine because of safety concerns or other problems, whether real or perceived, or in the event of an accident involving an MD-80 aircraft.

Covenants in our senior secured term loan facility could limit how we conduct our business, which could affect our long-term growth potential.

On March 10, 2011, we borrowed \$125.0 million under a senior secured term loan facility (the “Term Loan”). The Term Loan contains restrictive covenants that, among other things, limit:

- Capital expenditures
- Indebtedness
- Mergers and acquisitions
- Certain investments

As a result of these restrictive covenants, we may be limited in how we conduct business, and we may be unable to raise additional debt or equity financing to operate during general economic or business downturns or to take advantage of new business opportunities.

The addition of a new aircraft type could increase our costs and a satisfactory return on that investment is uncertain.

As of March 1, 2011, we have taken ownership of three Boeing 757-200 aircraft under a contract for the purchase of six Boeing 757-200 aircraft. The addition of a second aircraft type will increase our costs and increase the complexity of our operations with crews, flight schedules, parts provisioning and maintenance and repair.

We intend to operate these aircraft on longer-haul routes, particularly to Hawaii. Before beginning to serve Hawaii, we will need to obtain regulatory approval for extended over water operations. There is no assurance that we will be able to secure such authority in order to allow us to begin service when planned or at all.

We do not currently serve the longer-haul markets which we intend to serve with the Boeing 757-200 aircraft. Generally speaking, there is intense competition on routes to Hawaii. There is no assurance we will be able to operate our Boeing 757-200 aircraft as profitably as our MD-80 aircraft fleet.

We rely heavily on automated systems to operate our business and any failure of these systems could harm our business.

We depend on automated systems to operate our business, including our computerized airline reservation system, our telecommunication systems, our website and other automated systems. Our continuing work on enhancing the capabilities of our automation systems and the migration of data to a new platform could increase the risk of automation failures during the process. Any failure by us to handle our automation needs could negatively affect our Internet sales and customer service and result in increased costs.

Our website and reservation system must be able to accommodate a high volume of traffic and deliver important flight information. Substantial or repeated website, reservations system or telecommunication systems failures could reduce the attractiveness of our services. Any disruption in these systems could result in the loss of important data, loss of revenue, increase our expenses and generally harm our business.

In the processing of our customer transactions, we receive and store credit card and other identifiable personal data. This data is increasingly subject to legislation and regulation typically intended to protect the privacy of personal data that is collected, processed and transmitted. We could be adversely affected if legislation or regulations are expanded to require changes in our business practices in ways that negatively affect our business, financial condition or results of operations. As privacy and data protection become more sensitive issues, we may also become exposed to potential liability. These and other privacy developments are difficult to anticipate and could adversely affect our business, financial condition and results of operations.

Our maintenance costs will increase as our fleet ages.

Our MD-80 aircraft range from 15 to 25 years old, with an average age of 21.4 years as of March 1, 2011. In general, the cost to maintain aircraft increases as they age and exceeds the cost to maintain new aircraft. FAA regulations require additional and enhanced maintenance inspections for older aircraft. These regulations include Aging Aircraft Airworthiness Directives, which typically increase as an aircraft ages and vary by aircraft or engine type depending on the unique characteristics of each aircraft and/or engine.

In addition, we may be required to comply with any future law changes, regulations or airworthiness directives. We cannot assure you our maintenance costs will not exceed our expectations.

We believe our aircraft are and will continue to be mechanically reliable. We cannot assure our aircraft will continue to be sufficiently reliable over longer periods of time. Furthermore, given the age of our fleet, any public perception that our aircraft are less than completely reliable could have an adverse effect on our bookings and profitability.

Increased labor costs could result from unionization and labor-related disruptions.

Labor costs constitute a significant percentage of our total operating costs. In December 2010, our flight attendant employee group voted for representation from the Transport Workers Union (TWU). We are currently in negotiations with TWU for a labor agreement which could result in increased labor costs. If we are unable to reach agreement with our flight attendant employee group in current negotiations or future negotiations regarding the terms of labor agreements or if additional segments of our workforce become unionized, we may be subject to work interruptions or stoppages. Any strike or labor dispute with organized employees may adversely affect our ability to conduct business.

Our pilot employee group is represented by an in-house association to negotiate matters of concern with us. Unionization of our pilots or any other employee groups could result in demands that may increase our operating expenses and adversely affect our profitability. Although we have

negotiated a mutually acceptable arrangement with our pilot group, our costs could be adversely affected by the cumulative results of discussions with pilots or other employee groups in the future.

Our business is heavily dependent on the attractiveness of our leisure destinations and a reduction in demand for air travel to these markets could harm our business.

A substantial proportion of our scheduled flights have Las Vegas, Orlando, Phoenix, Tampa/St. Petersburg, Los Angeles or Ft. Lauderdale as either their destination or origin. Our business could be harmed by any circumstances causing a reduction in demand for air transportation to one or more of these markets, such as adverse changes in local economic conditions, negative public perception of the particular city, significant price increases, or the impact of future terrorist attacks.

Our business could be harmed if we lose the services of our key personnel.

Our business depends upon the efforts of our chief executive officer, Maurice J. Gallagher, Jr., our president, Andrew C. Levy, and a small number of management and operating personnel. We do not currently maintain key-man life insurance on Mr. Gallagher or Mr. Levy. We may have difficulty replacing management or other key personnel who leave and, therefore, the loss of the services of any of these individuals could harm our business.

Risks Associated with the Airline and Travel Industry

The airline industry is highly competitive and future competition in our small city markets could harm our business.

The airline industry is highly competitive. The small cities we serve on a scheduled basis have traditionally attracted considerably less attention from our potential competitors than larger markets, and in most of our markets, we are the only provider of nonstop service to our leisure destinations. It is possible other airlines will begin to provide nonstop services to and from these markets or otherwise target these markets. An increase in the amount of direct or indirect competition could harm our business.

A future act of terrorism, the threat of such acts or escalation of U.S. military involvement overseas could adversely affect our industry.

Even if not directed at the airline industry, a future act of terrorism, the threat of such acts or escalation of U.S. military involvement overseas could have an adverse effect on the airline industry. In the event of a terrorist attack, the industry would likely experience significantly reduced demand for travel services. These actions, or consequences resulting from these actions, would likely harm our business and the airline and travel industry.

Changes in government regulations imposing additional requirements and restrictions on our operations could increase our operating costs.

Airlines are subject to extensive regulatory and legal compliance requirements, both domestically and internationally, that involve significant costs. In the last several years, the FAA has issued a number of directives and other regulations relating to the maintenance and operation of aircraft that have required us to make significant expenditures. FAA requirements cover, among other things, retirement of older aircraft, security measures, collision avoidance systems, airborne windshear avoidance systems, noise abatement, weight and payload limits, assumed average passenger weight, and increased inspection and maintenance procedures to be conducted on aging aircraft. The future cost of complying with these and other laws, rules and regulations, including new DOT regulatory requirements in the consumer-protection area, cannot be predicted and could significantly increase our costs of doing business.

In January 2011, the FAA adopted new regulations applying to aging aircraft. These rules obligate aircraft design approval holders (typically the aircraft manufacturer or its successor) to establish a limit of validity (LOV) of the engineering data that supports the aircraft's structural maintenance program, demonstrate that widespread fatigue damage will not occur in aircraft of that type prior to reaching LOV, and establish or revise airworthiness limitations applicable to that aircraft type to include LOV. According to the FAA, establishment of LOVs is necessary because structural fatigue characteristics of airplanes are understood only up to the point where analyses and testing of the structure are valid. Once an LOV has been established, commercial operation of the aircraft beyond that value will be prohibited, unless an extended LOV has been obtained for the aircraft and incorporated into the operator's maintenance program. The operator or any other person, such as the aircraft manufacturer, would be eligible to apply for an extended LOV. It is not currently possible to predict the LOV-based life limitations that will apply to our aircraft, nor is it possible to predict the future cost of our complying with aging aircraft requirements and/or replacing any aircraft that must be retired. In the event an LOV has not been developed and incorporated into our maintenance program for MD80-series aircraft by July 2013, we would be required to cease operating all such aircraft until compliance was achieved. In the case of our B757-series aircraft, the similar compliance deadline is January 2016.

Federal legislation requires that by August 2011, the FAA adopt updated regulations addressed to flight crewmember duty and rest requirements. In September 2010, the FAA issued proposed new rules in response to this legislative mandate; according to the FAA, its proposal took account of current scientific knowledge and understanding of fatigue factors, rest requirements and other relevant data. The proposal drew thousands of pages of comment from interested parties, which the FAA is obligated to consider before issuing new regulations. It is not currently possible to predict the outcome of the FAA analytical process, the phase-in period the FAA presumably will provide for compliance with new rules, or the compliance cost to us, except to state that based on the September 2010 proposal, additional cost will result.

In June 2010, the DOT proposed to make revisions to a variety of its consumer-protection regulations. Among other changes, the new rules, if adopted as proposed, would substantially reduce the flexibility inherent in the rules governing airline advertising practices, including websites, and could curtail our ability to price and advertise our services in the particular manner we have developed and found most advantageous. The proposal drew extensive comment from interested parties, which the DOT is obligated to consider before issuing new regulations. It is not currently possible to predict the outcome of the DOT analytical process or the actual content of new rules, except to state that based on the June 2010 proposal, we could incur additional costs and our revenues could be adversely impacted. Nor is it possible to predict when the new regulations might become effective, although the DOT has indicated informally that the process could be completed as early as Spring 2011.

Legislation to address climate change issues has been introduced in the U.S. Congress, including a proposal to require transportation fuel producers and importers to acquire market-based allowances to offset the emissions resulting from combustion of their fuels. We cannot predict if this or any similar legislation will pass the Congress or, if passed and enacted into law, how it would apply to the airline industry. In addition, the Administrator of the Environmental Protection Agency (EPA) recently issued an announcement concluding that current and projected concentrations of greenhouse gases in the atmosphere threaten public health and welfare. Although legal challenges and legislative proposals are expected, the finding could ultimately result in EPA regulation of commercial aircraft emissions. These developments and any additional legislation or regulations addressing climate change are likely to increase our costs of doing business in the future and the increases could be material.

In respect of aging aircraft, crewmember duty and rest, consumer protection and climate change, increased costs will adversely affect our profitability if we are unable to pass the costs on to our customers.

Airlines are often affected by factors beyond their control, including air traffic congestion, weather conditions, increased security measures and the outbreak of disease, any of which could harm our operating results and financial condition.

Like other airlines, we are subject to delays caused by factors beyond our control, including air traffic congestion at airports and en route, adverse weather conditions, increased security measures and the outbreak of disease. Delays frustrate passengers and increase costs, which in turn could affect profitability. During periods of fog, snow, rain, storms or other adverse weather conditions, flights may be cancelled or significantly delayed. Cancellations or delays due to weather conditions, traffic control problems and breaches in security could harm our operating results and financial condition. An outbreak of a disease that affects travel behavior, such as severe acute respiratory syndrome (SARS) or H1N1 virus (swine flu), could have a material adverse impact on the airline industry. Any general reduction in airline passenger traffic as a result of an outbreak of disease or other travel advisories could dampen demand for our services even if not applicable to our markets. Resulting decreases in passenger volume would harm our load factors, could increase our cost per passenger and adversely affect our profitability.

Risks Related to Our Stock Price

The market price of our common stock may be volatile, which could cause the value of an investment in our stock to decline.

The market price of our common stock may fluctuate substantially due to a variety of factors, many of which are beyond our control, including:

- fuel price volatility, and the effect of economic and geopolitical factors and worldwide oil supply consumption on fuel availability
- announcements concerning our competitors, the airline industry or the economy in general
- strategic actions by us or our competitors, such as acquisitions or restructurings
- media reports and publications about the safety of our aircraft or the aircraft type we operate
- new regulatory pronouncements and changes in regulatory guidelines
- announcements concerning our business strategy
- general and industry-specific economic conditions
- changes in financial estimates or recommendations by securities analysts
- sales of our common stock or other actions by investors with significant shareholdings
- general market conditions.

The stock markets in general have experienced substantial volatility that has often been unrelated to the operating performance of particular companies. These types of broad market fluctuations may adversely affect the trading price of our common stock.

In the past, stockholders have sometimes instituted securities class action litigation against companies following periods of volatility in the market price of their securities. Any similar litigation against us could result in substantial costs, divert management's attention and resources, and harm our business or results of operations.

Other companies may have difficulty acquiring us, even if doing so would benefit our stockholders, due to provisions under our corporate charter, bylaws and option plans, as well as Nevada law.

Provisions in our articles of incorporation, our bylaws, and under Nevada law could make it more difficult for other companies to acquire us, even if doing so would benefit our stockholders. Our articles of incorporation and bylaws contain the following provisions, among others, which may inhibit an acquisition of our company by a third party:

- advance notification procedures for matters to be brought before stockholder meetings
- a limitation on who may call stockholder meetings
- the ability of our board of directors to issue up to 5,000,000 shares of preferred stock without a stockholder vote.

We are also subject to provisions of Nevada law that prohibit us from engaging in any business combination with any “interested stockholder,” meaning generally that a stockholder who beneficially owns more than 10% of our stock cannot acquire us for a period of time after the date this person became an interested stockholder, unless various conditions are met, such as approval of the transaction by our board of directors.

Under U.S. laws and the regulations of the DOT, U.S. citizens must effectively control us. As a result, our president and at least two-thirds of our board of directors must be U.S. citizens and not more than 25% of our voting stock may be owned by non-U.S. citizens (although subject to DOT approval, the percent of foreign economic ownership may be as high as 49%). Any of these restrictions could have the effect of delaying or preventing a change in control.

Our corporate charter and bylaws include provisions limiting voting by non-U.S. citizens.

To comply with restrictions imposed by federal law on foreign ownership of U.S. airlines, our articles of incorporation and bylaws restrict voting of shares of our capital stock by non-U.S. citizens. The restrictions imposed by federal law currently require no more than 25% of our stock be voted, directly or indirectly, by persons who are not U.S. citizens, and that our president and at least two-thirds of the members of our board of directors be U.S. citizens. Our bylaws provide no shares of our capital stock may be voted by or at the direction of non-U.S. citizens unless such shares are registered on a separate stock record, which we refer to as the foreign stock record. Our bylaws further provide no shares of our capital stock will be registered on the foreign stock record if the amount so registered would exceed the foreign ownership restrictions imposed by federal law. Registration on the foreign stock record is made in chronological order based on the date we receive a written request for registration. Non-U.S. citizens will be able to own and vote shares of our common stock only if the combined ownership by all non-U.S. citizens does not violate these requirements.

The value of our common stock may be negatively affected by additional issuances of common stock or preferred stock by us and general market factors.

Future issuances or sales of our common stock or convertible preferred stock by us will likely be dilutive to our existing common stockholders. Future issuances or sales of common or preferred stock by us, or the availability of such stock for future issue or sale, could have a negative impact on the price of our common stock prevailing from time to time. Sales of substantial amounts of our common stock in the public or private market, a perception in the market that such sales could occur, or the issuance of securities exercisable or convertible into our common stock, could also adversely affect the prevailing price of our common stock.

Substantial sales of our common stock could cause our stock price to fall.

If our existing stockholders sell a large number of shares of our common stock or the public market perceives existing stockholders might sell shares of common stock, the market price of our common stock could decline significantly. All of our outstanding shares are either freely tradable, without restriction, in the public market or eligible for sale in the public market at various times, subject, in some cases, to volume limitations under Rule 144 of the Securities Act of 1933, as amended.

We cannot predict whether future sales of our common stock or the availability of our common stock for sale will adversely affect the market price for our common stock or our ability to raise capital by offering equity securities.

Item 1B. Unresolved Staff Comments

Not Applicable.

Item 2. Properties

Aircraft

As of December 31, 2010, our total fleet consisted of 52 MD-80 aircraft currently in revenue service. In addition, we owned eight MD-80 aircraft and two Boeing 757-200 aircraft at December 31, 2010, which we expect to place into revenue service in the future. The following table summarizes our total aircraft fleet as of December 31, 2010:

<u>Aircraft Type</u>	<u>Owned</u>	<u>Leased</u>	<u>Total</u>	<u>Seating Capacity (per aircraft)</u>	<u>Average Age in Years</u>
MD-88/82/83	47	2	49	150	21.0
MD-87	3	—	3	130	21.9
Total aircraft in service	50	2	52		21.4
MD-88/82/83	8	—	8	150	23.1
B757-200	2	—	2	217	18.7
Total aircraft not in service	10	—	10		
Total aircraft	60	2	62		

As of December 31, 2010, we owned 50 of our operating aircraft—33 owned free and clear, and 17 owned subject to financing. We lease two aircraft under operating leases which expire on or before June 2014. In March 2011, all of our MD-80 aircraft have been pledged to secure payment of a senior secured term loan facility. Refer to “Item 8—Financial Statements and Supplementary Data—Notes to Consolidated Financial Statements—Note 16—Subsequent Events” for a discussion of this senior secured term loan facility.

Ground Facilities

We lease facilities at each of our leisure destinations and several of the other airports we serve. Our leases for our terminal passenger services facilities, which include ticket counter and gate space, and operations support areas, generally have terms of less than two years in duration and can generally be terminated with a 30 to 60 day notice. We have also entered into use agreements at each of the airports we serve that provide for non-exclusive use of runways, taxiways and other facilities. Landing fees under these agreements are based on the number of landings and weight of the aircraft.

We have operational bases at airports at each of the major leisure destinations we serve and additionally at two airports in small cities we serve, Bellingham, Washington and Grand Rapids, Michigan. In February 2011, we consolidated our Orlando operations back to our original operational base at Orlando Sanford International Airport. The consolidation involved shifting routes and moving aircraft we had based at Orlando International Airport.

We use leased facilities at our operational bases to perform line maintenance, overnight parking of aircraft, and other operations support. We lease additional space in cargo areas at the McCarran International Airport and Orlando Sanford International Airport for our main line maintenance operations. We also lease additional warehouse space in Las Vegas for aircraft parts and supplies warehouse. The following table below details the airport locations we utilize as operational bases:

<u>Airport</u>	<u>Location</u>
McCarran International Airport	Las Vegas, Nevada
Orlando Sanford International Airport	Orlando, Florida
Orlando International Airport (base closed February 2011)	Orlando, Florida
Phoenix-Mesa Gateway Airport	Mesa, Arizona
Los Angeles International Airport	Los Angeles, California
St. Petersburg-Clearwater International Airport	St. Petersburg, Florida
Ft. Lauderdale-Hollywood International Airport	Ft. Lauderdale, Florida
Bellingham International Airport	Bellingham, Washington
Gerald R. Ford International Airport	Grand Rapids, Michigan
Tunica Airport	Tunica, Mississippi
Laughlin Bullhead International Airport	Bullhead City, Arizona

The Bellingham International Airport has begun construction on an expansion project which we believe will allow for sufficient gate space for long-term growth. We believe we have sufficient access to gate space for current and presently contemplated future operations at all other airports we serve.

Our primary corporate offices are located in Las Vegas, where we lease approximately 65,000 square feet of space under a lease that expires in April 2019. We also lease approximately 10,000 square feet of office space in a building adjacent to our corporate offices which is utilized for training and other corporate purposes. The corporate office lease has two five-year renewal options, but we have the right to terminate the lease after the seventh year in April 2015 and the right to purchase the building from the landlord after the third year of the lease in April 2011. We are also responsible for our share of common area maintenance charges. In both leases, the landlord is a limited liability company in which certain of our officers and directors own significant interests as non-controlling members.

Item 3. Legal Proceedings

We are subject to certain legal and administrative actions we consider routine to our business activities. We believe the ultimate outcome of any pending legal or administrative matters will not have a material adverse effect on our financial position, liquidity or results of operations.

Item 4. Reserved

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters, and Issuer Purchases of Equity Securities

Market for our common stock

Our common stock is quoted on the Nasdaq Global Select Market. On March 1, 2011, the last sale price of our common stock was \$41.01 per share. The following table sets forth the range of high and low sale prices for our common stock for the periods indicated.

<u>Period</u>	<u>High</u>	<u>Low</u>
2010		
1st Quarter	\$59.04	\$47.17
2nd Quarter	\$58.12	\$42.04
3rd Quarter	\$46.37	\$37.05
4th Quarter	\$52.95	\$38.12
2009		
1st Quarter	\$48.98	\$32.07
2nd Quarter	\$57.52	\$33.20
3rd Quarter	\$47.45	\$37.21
4th Quarter	\$48.99	\$34.88

As of March 1, 2011, there were approximately 205 holders of record of our common stock. We believe that a substantially larger number of beneficial owners hold shares of our common stock in depository or nominee form.

Securities Authorized for Issuance under Equity Compensation Plans

The following table provides information regarding options, stock appreciation rights (“SARs”), warrants or other rights to acquire equity securities under our equity compensation plans as of December 31, 2010:

	<u>Number of Securities to be Issued upon Exercise of Outstanding Options, SARs, Warrants and Rights</u>	<u>Weighted-Average Exercise Price of Outstanding Options, SARs, Warrants and Rights</u>	<u>Number of Securities Remaining Available for Future Issuance under Equity Compensation Plans</u>
Equity compensation plans approved by security holders(a) . . .	568,833	\$33.18	1,603,408
Equity compensation plans not approved by security holders . .	None	N/A	None
Total	568,833	\$33.18	1,603,408

(a) The shares shown as being issuable under equity compensation plans approved by our security holders excludes restricted stock awards as these shares are deemed to have been issued. In addition to the above, there were 106,270 shares of nonvested restricted stock as of December 31, 2010.

Dividend Policy

On April 26, 2010, the Company's Board of Directors declared a one-time cash dividend of \$0.75 per share on its outstanding common stock payable to stockholders of record on May 14, 2010. On June 1, 2010, the Company paid cash dividends of \$14.9 million to these stockholders. Future payments of cash dividends, if any, will depend on our financial condition, results of operations, cash from operations, business conditions, capital requirements, debt covenants and other factors deemed relevant to our Board of Directors.

Our Repurchases of Equity Securities

The following table reflects our repurchases of our common stock during the fourth quarter of 2010. All stock repurchases during this period were made from employees who received restricted stock grants. All stock repurchases were made at the election of each employee pursuant to an offer to repurchase by us. In each case, the shares repurchased constituted the portion of vested shares necessary to satisfy withholding tax requirements.

ISSUER PURCHASES OF EQUITY SECURITIES

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u>	<u>Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs(1)</u>
October 2010	3,693	\$41.00	None	\$46,426,175
November 2010	None	N/A	None	\$46,426,175
December 2010	None	N/A	None	\$46,426,175
Total	<u>3,693</u>	<u>\$41.00</u>	<u>None</u>	<u>\$46,426,175</u>

(1) Represents the remaining dollar value of open market purchases of the Company's common stock which has been authorized by the Board of Directors under a share repurchase program.

During the first three quarters of 2010, we repurchased 1,206,689 shares for a total of \$53.6 million. We did not make any open market stock repurchases during the fourth quarter of 2010.

Stock Price Performance Graph

The following graph compares the cumulative total stockholder return on our common stock with the cumulative total return on the Nasdaq Composite Index and the AMEX Airline Index for the period beginning on December 8, 2006 (the date our common stock was first traded) and ending on the last day of 2010. The graph assumes an investment of \$100 in our stock and the two indices, respectively, on December 8, 2006, and further assumes the reinvestment of all dividends. The December 8, 2006 stock price used for our stock is the initial public offering price. Stock price performance, presented for the period from December 8, 2006 to December 31, 2010, is not necessarily indicative of future results.

	<u>12/08/06</u>	<u>12/31/06</u>	<u>12/31/07</u>	<u>12/31/08</u>	<u>12/31/09</u>	<u>12/31/10</u>
ALGT	\$100.00	\$155.89	\$178.56	\$269.83	\$262.06	\$277.72
Nasdaq Composite Index	\$100.00	\$ 99.09	\$108.82	\$ 64.70	\$ 93.10	\$108.84
AMEX Airline Index	\$100.00	\$ 99.23	\$ 58.39	\$ 41.30	\$ 57.54	\$ 80.05

The stock price performance graph shall not be deemed incorporated by reference by any general statement incorporating by reference this annual report on Form 10-K into any filing under the Securities Act of 1933 or under the Securities Exchange Act of 1934, except to the extent that we specifically incorporate this information by reference, and shall not otherwise be deemed filed under such Acts.

Item 6. Selected Financial Data

The following financial information for each of the five years ended December 31, 2010, has been derived from our consolidated financial statements. You should read the selected consolidated financial data set forth below along with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our consolidated financial statements and related notes. Certain

presentation changes and reclassifications have been made to prior year consolidated financial information to conform to 2010 classifications.

	For the year ended December 31,				
	2010	2009	2008	2007	2006
	(in thousands, except per share data)				
STATEMENT OF INCOME DATA:					
Operating revenue:					
Scheduled service revenue	\$427,825	\$346,222	\$330,969	\$258,943	\$178,349
Ancillary revenue:					
Air-related charges	169,640	143,001	95,490	48,333	19,950
Third party products	24,366	19,715	19,106	16,694	9,912
Total ancillary revenue	194,006	162,716	114,596	65,027	29,862
Fixed fee contract revenue	40,576	43,162	52,499	35,339	33,716
Other revenue	1,234	5,840	5,948	1,264	1,423
Total operating revenue	663,641	557,940	504,012	360,573	243,350
Operating expenses:					
Aircraft fuel	243,671	165,000	229,640	152,149	101,561
Salary and benefits	108,000	90,006	72,007	55,593	37,453
Station operations	62,620	53,993	43,476	33,724	24,866

(1) The Company's unvested restricted stock awards are considered participating securities as they receive non-forfeitable rights to cash dividends at the same rate as common stock. The Basic and Diluted earnings per share for the periods presented reflect the two-class method mandated by accounting guidance for the calculation of earnings per share. The two-class method adjusts both the net income and shares used in the calculation. Application of the two-class method did not have a significant impact on the Basic and Diluted earnings per share for the periods presented.

(2) The dilutive effect of common stock subject to unvested restricted stock for 2006 is not material.

* Various components of these measures do not have a direct correlation to ASMs. These figures are provided on a per ASM basis so as to facilitate comparisons with airlines reporting revenues on a per ASM basis.

The following terms used in this section and elsewhere in this annual report have the meanings indicated below:

“Available seat miles” or *“ASMs”* represents the number of seats available for passengers multiplied by the number of miles the seats are flown.

“Average fuel cost per gallon” represents total aircraft fuel expense for our total system or in scheduled service divided by the total number of fuel gallons consumed in our total system or in scheduled service, as applicable.

“Average stage length” represents the average number of miles flown per flight.

“Load factor” represents the percentage of aircraft seating capacity that is actually utilized (revenue passenger miles divided by available seat miles).

“Operating expense per ASM” or *“CASM”* represents operating expenses divided by available seat miles.

“Operating CASM, excluding fuel” represents operating expenses, less aircraft fuel, divided by available seat miles. Although Operating CASM, excluding fuel is not a calculation based on generally accepted accounting principles and should not be considered as an alternative to Operating Expenses as an indicator of our financial performance, this statistic provides management and investors the ability to measure and monitor our cost performance absent fuel price volatility. Both the cost and availability of fuel are subject to many economic and political factors and therefore are beyond our control.

“Operating revenue per ASM” or *“RASM”* represents operating revenue divided by available seat miles.

“Revenue passengers” represents the total number of passengers flown on all flight segments.

“Revenue passenger miles” or *“RPMs”* represents the number of miles flown by revenue passengers.

“Total revenue per ASM” or *“TRASM”* represents scheduled service revenue and total ancillary revenue divided by available seat miles.

“Yield” represents scheduled service revenue divided by scheduled service revenue passenger miles.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis presents factors that had a material effect on our results of operations during the years ended December 31, 2010, 2009 and 2008. Also discussed is our financial position as of December 31, 2010 and 2009. You should read this discussion in conjunction with our consolidated financial statements, including the notes thereto, appearing elsewhere in this annual report. This discussion and analysis contains forward-looking statements. Please refer to the section entitled "Special Note About Forward-Looking Statements" for a discussion of the uncertainties, risks and assumptions associated with these statements.

2010 Results

The year 2010 proved to be another highly successful year for the Company. For the eighth straight year we remained profitable, with net income of \$65.7 million (\$3.32 per share, diluted), compared to net income of \$76.3 million (\$3.76 per share, diluted) in 2009. We remain very pleased with the strength and flexibility of our model. Our continued focus on capacity management, the ability to drive additional ancillary revenues and the execution of our low fixed, high variable cost model has allowed us to weather the high energy price environment in 2008 and the financial crisis/recession in 2009.

During 2010 we began to see a slow return of our scheduled service average base fare to pre-recession levels. Our achievement of a 15.8% operating margin on \$663.6 million in operating revenue was driven by a 14.0% increase in scheduled service passengers and a \$5.89 or 8.4% increase in our scheduled service average base fare to \$76.26. Although business and international traffic rebounded nicely in the airline industry during the year, both in the terms of demand and average fare for other domestic carriers, the leisure segment continued to lag behind as high unemployment and rising commodity prices continued to impact the U.S. economy. Although we did see strength in our base airfares compared to 2009, we also experienced an increase in energy prices during 2010 which was the primary factor in the overall decrease in profits. Our fuel expense increased \$78.6 million or 47.7% to \$243.7 million during 2010 as compared with 2009. These increases were a result of the rebound of crude oil prices from the late 2008 and early 2009 lows, along with the expansion of crack spreads due to refining constraints. Our average cost per gallon increased 30.7% to \$2.30 in 2010 in addition to a 13.4% increase in gallons consumed over 2009.

Ancillary revenues continued to be a primary focus during 2010 as our total ancillary revenues increased 19.2% or \$31.3 million to \$194.0 million. On the air-related side, we implemented an open seating policy during the fourth quarter, which drove the take rate and additional revenue on priority boarding and assigned seat assignments since its implementation. We were particularly pleased with the ancillary revenue production of our third party products which increased \$4.7 million or 23.6% to \$24.4 million in 2010. We continued to add strategic hotel, ski resort, cruise line and other product partners to enhance our offerings to our leisure customer base. In addition, we were successful in negotiating attractive unit cost rates by amending certain long term agreements with key hotel partners in Las Vegas. The Company launched a rebranding effort in 2010 which included a marketing campaign for a new "low price guarantee". We now provide customers with a guarantee if they are able to find bundled air-hotel packages at a lower price than the offered price on our website.

During 2010, our operating expense per passenger, excluding fuel, increased \$2.61 or 5.1% to \$53.41. Overall our costs remained in line with our capacity growth and passenger production with the exception of salary and benefits expense and station operations expense. Cost pressure within salary and benefits expense was primarily related to new pilot and flight attendant agreements put into place in the second and third quarters of 2010, respectively. The station operations expense increase was attributable to increased costs per turn within our leisure destinations which tend to be more expensive

to operate than at our small cities. As capacity is reduced by other carriers within the leisure destinations we serve, airport fixed costs are spread among existing operators.

Operating Fleet

We reached a company milestone during 2010 with the introduction of our 50th aircraft into our fleet. We ended the year with 52 aircraft in our operating fleet and took delivery of 14 MD-80 aircraft and two Boeing 757-200 aircraft under existing purchase agreements. During 2010, we placed seven MD-80 aircraft into service along with the permanent withdrawal of one MD-80 aircraft (130-seat MD-87), which increased our operating fleet to 52 aircraft at December 31, 2010. The following table sets forth the number and type of aircraft in service and operated by us at the dates indicated:

	December 31, 2010			December 31, 2009			December 31, 2008		
	Own(a)	Lease(c)	Total	Own(a)(b)	Lease	Total	Own(a)(b)	Lease	Total
MD82/83/88s.....	47	2	49	38	4	42	32	2	34
MD87s(d).....	3	0	3	4	0	4	4	0	4
Total	<u>50</u>	<u>2</u>	<u>52</u>	<u>42</u>	<u>4</u>	<u>46</u>	<u>36</u>	<u>2</u>	<u>38</u>

- (a) Does not include aircraft owned, but not added to our operating fleet as of the date indicated.
- (b) Includes two aircraft subject to capital leases as of December 31, 2009 and December 31, 2008. In September 2010, we exercised early purchase options and took ownership of these two aircraft.
- (c) In February 2010, we exercised purchase options on two aircraft under operating leases. In October 2010, we took ownership of these aircraft.
- (d) Used almost exclusively for fixed fee flying.

Network

We were able to significantly grow our network and extend our national footprint during 2010. We have increased the number of routes into our leisure destinations from 136 at December 31, 2009 to 160 routes at December 31, 2010. We now serve 73 cities (including small cities and destinations) through our route network which serves 35 states. Our national footprint is well balanced and is not dependent on one particular market or geographic region. During 2010, we initiated service on seven routes to Phoenix, six routes to the Los Angeles market (includes three routes to Long Beach which commenced in July 2010) and expanded our service into Las Vegas by five routes. We also expanded our service to Myrtle Beach by four routes and Punta Gorda by three routes, which we serve on a limited basis. These additional routes, along with other network changes resulted in expansion of our route network by 24 routes (a 17.6% increase) compared to the end of 2009. The following shows the

number of destinations and small cities served as of the dates indicated (includes cities served seasonally):

	As of December 31, 2010	As of December 31, 2009	As of December 31, 2008
Major leisure destinations	6	6	5
Other leisure destinations	5	5	4
Small cities served	62	58	57
Total cities served	<u>73</u>	<u>69</u>	<u>66</u>
Routes to Las Vegas	45	40	39
Routes to Orlando airports(a)	29	31	29
Routes to Phoenix	27	20	15
Routes to Tampa Bay/St. Petersburg	20	20	20
Routes to Los Angeles (includes Long Beach)	17	11	0
Routes to Ft. Lauderdale	7	5	6
Other routes	15	9	4
Total routes	<u>160</u>	<u>136</u>	<u>113</u>

(a) In February 2011, we have consolidated our Orlando operations back to our original operational base at Orlando Sanford International Airport.

Trends and Uncertainties

Global crude oil supply concerns and political unrest in oil producing countries continue to drive up energy prices. Uncertainties surrounding the political structure in Egypt and Libya have driven crude oil prices up by more than \$20 per barrel in early 2011. We believe energy costs will continue to rise and we will continue to try to offset high fuel prices by managing our capacity to seek to increase base fares. Given the low fixed, high variable cost structure of our model, we are able to flex up our aircraft utilization to maximize profitability during peak periods and flex down when we experience revenue softness or in extremely high fuel cost environments. As fuel cost fluctuates, we will continue to refine our market mix and adjust capacity as required to seek to achieve desired levels of profitability.

Looking ahead, 2011 is expected to be a transition year as we continue to invest significant capital into aircraft and aircraft improvements. In February 2011, we completed the purchase of our third Boeing 757-200 aircraft under the purchase agreement we have for six Boeing 757-200 aircraft. Of the remaining three Boeing 757-200 aircraft under this purchase agreement, we expect to purchase one aircraft in March 2011 and purchase the other two aircraft during the fourth quarter of 2011. We continue to work on the completion of the certification process to bring on a second fleet type onto our operating certificate. We have amended our approach to the certification process and plan to enter one Boeing 757-200 aircraft into revenue service during the third quarter 2011. Initially, we expect this aircraft to be used for charters and possibly long haul scheduled service routes. Subsequently, we plan to refocus our efforts on gaining flag carrier status and completing the ETOPS certification process in order to launch service to Hawaii in late 2012.

We have entered into lease agreements with third parties to lease two Boeing 757-200 aircraft we have acquired as of March 1, 2011. The lease term of these agreements are 12 to 15 months.

We have committed to a seat reconfiguration program which will affect our scheduled service revenue fleet. All our MD-80 aircraft (excluding our MD-87 aircraft) will be reconfigured from 150 seats to 166 seats by standardizing the passenger layout accommodations which will be made possible by removing galleys, relocating lavatories and installing slim line, lightweight seats. We expect this project to start in the third quarter of 2011 and take approximately 12 months to complete. We believe these additional 16 seats will be accretive to earnings as they will allow us to grow capacity without adding incremental aircraft into our operating fleet. In addition we will realize material costs savings for the addition of these seats in the form of reduced per passenger costs and cost per available seat mile. We currently have eight MD-80 aircraft in storage to provide capacity during the seat reconfiguration project and to facilitate future growth during 2012 and 2013.

On March 10, 2011, we borrowed \$125.0 million under a senior secured term loan facility (the "Term Loan"). The Term Loan matures on March 10, 2017 and bears interest based on the London Interbank Offered Rate ("LIBOR") or prime rate with interest payable quarterly or more frequently until maturity. In addition to the early payments made on existing debt obligations secured by MD-80 aircraft and general corporate purposes, proceeds from the Term Loan will be used to fund future capital expenditure needs, including the acquisition of the three remaining Boeing 757-200 aircraft under purchase agreement and our MD-80 aircraft seat reconfiguration program.

Our Operating Revenue

Our operating revenue comprises of both air travel on a stand-alone basis and bundled with hotels, rental cars and other travel-related services. We believe our diversified revenue streams distinguish us from other U.S. airlines and other travel companies.

- *Scheduled service revenue.* Scheduled service revenue consists of air fare for nonstop flights between our small city markets and our leisure destinations.
- *Ancillary revenue.* Our ancillary revenue is generated from air-related charges and third party products. Air-related revenue is generated through charges for use of our website to purchase tickets, checked bags, advance seat assignments, priority boarding and other services provided in conjunction with our scheduled air service. We also generate revenue from third party products through the sale of hotel rooms, ground transportation (rental cars and hotel shuttle products), attraction and show tickets and fees we receive from other merchants selling products through our website. We recognize our ancillary revenues net of amounts paid to wholesale providers, travel agent commissions and credit card processing fees.
- *Fixed fee contract revenue.* Our fixed fee contract revenue consists largely of fixed flying agreements with affiliates of Caesars Entertainment Inc. (formerly Harrah's Entertainment Inc.) that provide for a predictable revenue stream. We also provide charter service on a seasonal and ad hoc basis to the Department of Defense and other customers.
- *Other revenue.* Other revenue is primarily generated from aircraft and flight equipment leased to third parties.

Seasonality. Our business is seasonal in nature with traffic demand historically being weaker in the third quarter and stronger in the first quarter. Our operating revenue is largely driven by perceived product value, advertising and promotional activities and can be adversely impacted during periods with reduced leisure travel spending, such as the back-to-school season.

Our Operating Expenses

A brief description of the items included in our operating expense line items follows.

Aircraft fuel expense. Aircraft fuel expense includes the cost of aircraft fuel, fuel taxes, into plane fees and airport fuel flowage, storage or through-put fees. Under the majority of our fixed fee contracts, our customer reimburses us for fuel costs. These amounts are netted against our fuel expense.

Salary and benefits expense. Salary and benefits expense includes wages, salaries, and employee bonuses, sales commissions for in-flight personnel, as well as expenses associated with employee benefit plans and employer payroll taxes.

Station operations expense. Station operations expense includes the fees charged by airports for the use or lease of airport facilities and fees charged by third party vendors for ground handling services, commissary expenses and other related services such as deicing of aircraft.

Maintenance and repairs expense. Maintenance and repairs expense includes all parts, materials and spares required to maintain our aircraft. Also included are fees for repairs performed by third party vendors.

Sales and marketing expense. Sales and marketing expense includes all advertising, promotional expenses, travel agent commissions and credit card discount fees associated with the sale of scheduled service and air-related charges.

Aircraft lease rentals expense. Aircraft lease rentals expense consists of the cost of leasing aircraft under operating leases with third parties. Also included are maintenance deposits when not considered part of maintenance and repair expense as discussed under "Critical Accounting Policies and Estimates" below.

Depreciation and amortization expense. Depreciation and amortization expense includes the depreciation of all fixed assets, including aircraft that we own and amortization of aircraft that we operated under capital leases.

Other expense. Other expense includes the cost of passenger liability insurance, aircraft hull insurance and all other insurance policies except for employee welfare insurance. Additionally, this expense includes loss on disposals of aircraft and other equipment disposals, travel and training expenses for crews and ground personnel, facility lease expenses, professional fees, personal property taxes and all other administrative and operational overhead expenses not included in other line items above.

RESULTS OF OPERATIONS

2010 Compared to 2009

The table below presents our operating expenses as a percentage of operating revenue for the periods presented:

	Year Ended December 31,	
	2010	2009
Total operating revenue	100.0%	100.0%
Operating expenses:		
Aircraft fuel	36.6	29.6
Salary and benefits	16.3	16.1
Station operations	9.4	9.7
Maintenance and repairs	9.1	9.5
Sales and marketing	2.6	2.9
Aircraft lease rentals	0.3	0.3
Depreciation and amortization	5.3	5.3
Other	4.6	4.6
Total operating expenses	84.2%	78.1%
Operating margin	15.8%	21.9%

Operating Revenue

Our operating revenue increased 18.9% to \$663.6 million in 2010 from \$557.9 million in 2009 primarily due to a 23.6% increase in scheduled service revenue and a 19.2% increase in ancillary revenue. Scheduled service revenue and ancillary revenue increases were primarily driven by a 14.0% increase in scheduled service passengers on a 13.1% increase in scheduled service departures. Increased passenger demand from what we believe to be an overall strengthening in the U.S. economy allowed us to increase our average base airfare \$5.88 or 8.4% to \$76.26 in 2010 from 2009.

System available seat miles ("ASMs") increased by 14.6% as a result of a 9.6% increase in system departures and a 4.5% increase in system average stage length. Operating revenue per ASM ("RASM") increased from 10.24¢ during 2009 to 10.62¢ during 2010 as the rate of increase in total operating revenue slightly exceeded the increase in our capacity.

Scheduled service revenue. Scheduled service revenue increased 23.6% to \$427.8 million for 2010, up from \$346.2 million in 2009. The increase was primarily driven by a 14.0% increase in the number of scheduled service passengers, along with an 8.4% increase in the scheduled service average base fare for 2010 compared to 2009. Passenger growth was driven by a 13.1% increase in the number of scheduled service departures and a slight increase in scheduled service load factor, up 0.4 percentage points to 90.8%. The increase in departure growth was driven by the increase in routes to our Phoenix market, Los Angeles market (with commencement of flying to Long Beach in July 2010) and route expansion of our seasonal service during 2010 to Myrtle Beach and Punta Gorda. Overall, our route network expanded from 136 routes served at December 31, 2009 to 160 served at December 31, 2010.

Ancillary revenue. Ancillary revenue increased 19.2% to \$194.0 million in 2010 up from \$162.7 million in 2009, driven by a 14.0% increase in scheduled service passengers and a 4.6% increase

in ancillary revenue per scheduled passenger from \$33.07 to \$34.58. The following table details ancillary revenue per scheduled service passenger from air-related charges and third party products:

	Year Ended December 31,		Percentage Change
	2010	2009	
Air-related charges	\$30.24	\$29.06	4.1%
Third party products	4.34	4.01	8.2%
Total ancillary revenue per scheduled service passenger	<u>\$34.58</u>	<u>\$33.07</u>	4.6%

The increase in air-related charges per-passenger was primarily attributable to higher baggage fees and booking fees in the comparable periods. We increased baggage fees, which currently range between \$15 and \$30 per checked bag, depending on the flight segment, to comparable industry levels. In addition, we transitioned to an open seating model for customers who do not purchase our assigned seat product. This resulted in an increase in take rates and overall revenue production for our priority boarding and assigned seat products. Ancillary revenue from third party products increased in 2010 on a per-passenger basis as a result of increased volume of sales per passenger and increased margins on the sale of hotel rooms compared to 2009.

The following table details the calculation of ancillary revenue from third party products. Third party products consist of revenue from the sale of hotel rooms, ground transportation (rental cars and hotel shuttle products), attraction and show tickets and fees we receive from other merchants selling products through our website:

(in thousands)	Year Ended December 31,		Change
	2010	2009	
Gross ancillary revenue—third party	\$ 89,258	\$ 73,188	22.0%
Cost of goods sold	(60,860)	(50,014)	21.7%
Transaction costs(a)	(4,032)	(3,459)	16.6%
Ancillary revenue—third party products	<u>\$ 24,366</u>	<u>\$ 19,715</u>	23.6%
As percent of gross ancillary revenue—third party	27.3%	26.9%	0.4pp

(a) Includes credit card fees and travel agency commissions

Fixed fee contract revenue. Fixed fee contract revenue decreased 6.0% to \$40.6 million during 2010 from \$43.2 million for 2009. Increased flying for the Department of Defense during 2010 was more than offset by the cessation in 2009 of fixed fee flying under the Cuban Family Charter Program and under an agreement with Beau Rivage Resorts, Inc. Fixed fee flying under our agreement with Caesars Entertainment Inc. (formerly Harrah's Entertainment Inc.) partially offset this decrease as the number of block hours flown under the agreement increased by 4.2% for 2010 compared to 2009.

Other revenue. We generated other revenue of \$1.2 million for 2010 compared to \$5.8 million for 2009 during which other revenue was primarily from flight equipment leased to third parties. All of these leases were terminated by the end of third quarter 2010.

Operating Expenses

Our operating expenses increased 28.3% to \$559.0 million for 2010 compared to \$435.7 million in 2009. We primarily evaluate our expense management by comparing our costs per passenger and per ASM across different periods which enable us to assess trends in each expense category.

The following table presents Operating expense per passenger for the indicated periods (“per-passenger costs”). The table also presents Operating expense per passenger, excluding fuel, which represents operating expenses, less aircraft fuel expense, divided by the number of passengers carried. This statistic provides management and investors the ability to measure and monitor our cost performance absent fuel price volatility. Both the cost and availability of fuel are subject to many economic and political factors beyond our control.

	Year ended December 31,		Percentage Change
	2010	2009	
Aircraft fuel	\$41.28	\$30.97	33.3%
Salaries and benefits	18.30	16.89	8.3
Station operations	10.61	10.13	4.7
Maintenance and repairs	10.26	9.93	3.3
Sales and marketing	2.89	3.09	(6.4)
Aircraft lease rentals	0.29	0.36	(19.3)
Depreciation and amortization	5.92	5.56	6.5
Other	5.14	4.83	6.5
Operating expense per passenger	\$94.69	\$81.77	15.8%
Operating expense per passenger, excluding fuel	\$53.41	\$50.80	5.1%

Despite an increase of 4.5% in system average stage length and a 3.6% reduction in average daily departures per aircraft, operating expense per passenger, excluding fuel, increased only 5.1% from \$50.80 in 2009 to \$53.41 in 2010. An increase in salary and benefits expense per passenger was the principal contributor to the increase. The increase in average fuel cost per gallon of 30.7% and the longer stage length resulted in a \$10.31 increase in fuel expense per passenger from \$30.97 to \$41.28.

The following table presents unit costs, defined as Operating expense per ASM (“CASM”), for the indicated periods. The table also presents Operating CASM, excluding fuel, which represents operating expenses, less aircraft fuel expense, divided by available seat miles. As on a per passenger basis, excluding fuel on an ASM basis provides management and investors the ability to measure and monitor our cost performance absent fuel price volatility.

	Year Ended December 31,		Percentage Change
	2010	2009	
Aircraft fuel	3.90¢	3.03¢	28.7%
Salary and benefits	1.73	1.65	4.8
Station operations	1.00	0.99	1.0
Maintenance and repairs	0.97	0.97	—
Sales and marketing	0.27	0.30	(10.0)
Aircraft lease rentals	0.03	0.04	(25.0)
Depreciation and amortization	0.56	0.54	3.7
Other	0.49	0.47	4.3
Operating expense per ASM (CASM)	8.95¢	8.00¢	11.9%
CASM, excluding fuel	5.05¢	4.97¢	1.6%

Aircraft fuel expense. Aircraft fuel expense increased \$78.7 million or 47.7% to \$243.7 million for 2010, up from \$165.0 million in 2009, primarily driven by a 30.7% increase in the system average cost per gallon from \$1.76 to \$2.30. System departure growth of 9.6% and a 4.5% increase in system average stage length for 2010 resulted in a 13.4% increase in gallons consumed, which increased from 93.5 million to 106.1 million.

Salary and benefits expense. Salary and benefits expense increased 20.0% to \$108.0 million for 2010 up from \$90.0 million for 2009. Excluding accrued employee bonus expense and stock compensation expense, salary and benefits expense increased 26.8% attributable to a 23.2% increase in salary and benefits expense per full-time equivalent employee and a 2.9% increase in the number of full-time equivalent employees from December 31, 2009 to December 31, 2010. We entered into new compensation agreements with our pilots and flight attendants which went into effect in May and July 2010 respectively. These new compensation arrangements accounted for the majority of the salary and benefits expense per full-time equivalent employees year-over-year change. In addition to these agreements, we experienced higher medical premiums and increased 401(k) contributions which are offset by a reduction in employee accrued bonus expense due to a lower level of profitability compared to 2009.

Station operations expense. Station operations expense increased 16.0% to \$62.6 million in 2010 compared to \$54.0 million in 2009 as a result of a 9.6% in system departures and a 5.9% increase in station operations expense per departure. Our expense per departure increase is primarily attributable to increased airport and common use fees at some of our leisure destination airports. As capacity is reduced at these airports, which has been the case over the past two years, airports reallocate costs among remaining carriers. In addition we operated out of Orlando International Airport since the first quarter 2010 which has approximately 25.0% higher operating costs than those at Orlando Sanford International Airport.

Maintenance and repairs expense. Maintenance and repairs expense increased 14.4% to \$60.6 million for 2010 compared to \$52.9 million in 2009 as the average number of aircraft in service increased 14.8% from 42.7 aircraft during 2009 to 49.0 during the 2010. The timing of maintenance events may cause our maintenance and repairs expense to vary significantly from period to period.

Sales and marketing expense. Sales and marketing expense increased 3.7% to \$17.1 million in 2010 compared to \$16.5 million in 2009 due to higher credit card transaction costs associated with the 22.1% increase in scheduled service and ancillary revenue. The increase in transaction costs were partially offset by reductions in credit card rates and small city advertising expenses.

Aircraft lease rentals expense. Aircraft lease rentals expense decreased 10.6%, from \$1.9 million for 2009 to \$1.7 million in 2010. For all of 2009 and a majority of 2010, we operated four leased aircraft. In October 2010 we took ownership of two of our leased aircraft through the exercise of purchase options. We continue to have two aircraft under operating leases remaining in our fleet at the end of 2010.

Depreciation and amortization expense. Depreciation and amortization expense increased to \$35.0 million for 2010 from \$29.6 million for 2009, an increase of 18.0%, driven by a 13.0% increase in the number of operating aircraft. We ended 2010 with 52 aircraft in revenue service as compared with 46 in 2009. Additionally, depreciation and amortization expense excluding aircraft and aircraft related parts increased as we continued to invest in our ground service equipment and information technology infrastructure.

Other expense. Other expense increased 18.0% to \$30.4 million for 2010 compared to \$25.7 million for 2009, attributable to an increase in administrative expenses associated with our growth, such as facility rent for our corporate headquarters and aircraft insurance. In addition, we incurred pre-operating expenses associated with the certification process for the Boeing 757-200 aircraft type which began in the first quarter of 2010. Expenses related to this process were approximately \$1.5 million in 2010. These increases were offset by a lower loss from the disposal of assets which were \$4.9 million in 2009 and \$2.9 million in 2010.

Other (Income) Expense

Other (income) expense decreased from a net other expense of \$1.7 million for 2009, to a net other expense of \$1.3 million for 2010. The change is primarily attributable to a reduction in interest expense due to lower debt balances partially offset by a reduction of interest income earned on cash balances in 2010 compared to 2009.

Income Tax Expense

Our effective income tax rate was 36.4% for 2010 compared to 36.7% for 2009. The lower effective tax rate for 2010 was largely due to the geographic mix of our flying and the impact this had on the state income tax portion of the tax provision. While we expect our tax rate to be fairly consistent in the near term, it will tend to vary depending on recurring items such as the amount of income we earn in each state and the state tax rate applicable to such income. Discrete items particular to a given year may also affect our effective tax rates.

2009 Compared to 2008

The table below presents our operating expenses as a percentage of operating revenue for the periods presented:

	Year Ended December 31,	
	2009	2008
Total operating revenue	100.0%	100.0%
Operating expenses:		
Aircraft fuel	29.6	45.6
Salary and benefits	16.1	14.3
Station operations	9.7	8.6
Maintenance and repairs	9.5	8.2
Sales and marketing	2.9	2.8
Aircraft lease rentals	0.3	0.6
Depreciation and amortization	5.3	4.7
Other	4.6	4.1
Total operating expenses	78.1%	88.9%
Operating margin	21.9%	11.1%

We recorded total operating revenue of \$557.9 million, income from operations of \$122.2 million and net income of \$76.3 million for 2009. By comparison, in 2008, we recorded total operating revenue of \$504.0 million, income from operations of \$55.8 million and net income of \$35.4 million. We achieved a 21.9% operating margin for 2009 with system growth in departures of 22.2% and ASMs of 22.7%, despite a reduction in scheduled service revenue of \$14.60 per passenger year-over-year.

Operating Revenue

Our operating revenue increased 10.7% to \$557.9 million in 2009 from \$504.0 million in 2008 primarily due to a 49.8% increase in ancillary revenue from air-related charges and a 4.6% increase in scheduled service revenue, partially offset by a 17.8% decrease in fixed fee contract revenue. The ancillary revenue from air-related charges and scheduled service revenue increases were primarily driven by a 26.3% increase in the number of scheduled service passengers.

System ASMs increased by 22.7% as a result of a 22.2% increase in system departures. RASM decreased by 9.8% from 11.35 cents during 2008 to 10.24 cents during 2009. The decrease was mainly attributable to a 17.2% reduction in our scheduled service average base fare offset by an increase in ancillary revenue per passenger. We decreased scheduled service base fares to maintain load factor in the face of industry wide lower fares and adverse economic conditions.

Scheduled service revenue. Scheduled service revenue increased 4.6% to \$346.2 million for 2009, from \$331.0 million in 2008. The increase was a result of a 26.3% increase in the number of scheduled service passengers offset by a decrease in the scheduled service average base fare of \$14.60 from \$84.97 in 2008 to \$70.37 in 2009. Passenger growth was driven primarily as a result of a 25.6% increase in departures from 29,548 to 37,115 in 2009. Significant contributors to the departure growth were the addition of 1,699 departures attributable to our new service to Los Angeles not operated in 2008 and an increase of 1,637 departures from route expansion to our Phoenix market. We offered service into Phoenix on 20 routes at December 31, 2009 compared to 15 routes at December 31, 2008. Remaining departure growth is a result of increased frequency of flying to our other major leisure destinations and departures to new limited service destinations. Our route network consisted of 136 routes at December 31, 2009, an increase from 113 routes at December 31, 2008.

Ancillary revenue. Ancillary revenue increased 42.0% to \$162.7 million in 2009 up from \$114.6 million in 2008, driven by a 26.3% increase in scheduled service passengers and a 12.4% increase in ancillary revenue per scheduled passenger from \$29.43 to \$33.07. The following table details ancillary revenue per scheduled service passenger from air-related charges and third party products:

	Year Ended December 31,		Percentage Change
	2009	2008	
Air-related charges	\$29.06	\$24.52	18.5%
Third party products	4.01	4.91	(18.3)%
Total ancillary revenue per scheduled service passenger	<u>\$33.07</u>	<u>\$29.43</u>	12.4%

On a per-passenger basis, 87.8% and 83.3% of our total ancillary revenues consist of air-related charges for 2009 and 2008, respectively. The increase in air-related charges per-passenger was primarily attributable to higher baggage fees as we increased fees to comparable industry levels, an increase in our customer convenience fee, and the effect of a full year of our priority boarding product rolled out in October 2008. We increased our customer convenience fee from \$11.50 to \$13.50 in January 2009 and to \$14.00 in July 2009. Third party products declined on a per passenger basis (but increased slightly in absolute terms) due to Las Vegas contributing a smaller percentage of our total passengers. Our third party products revenue per passenger for Las Vegas is higher than our other destinations due to large volume of hotel rooms we sell in Las Vegas.

The following table details the calculation of ancillary revenue from third party products. Third party products consist of revenue from the sale of hotel rooms, ground transportation (rental cars and hotel shuttle products), attraction and show tickets and fees we receive from other merchants selling products through our website:

(in thousands)	Year Ended December 31,		Change
	2009	2008	
Gross ancillary revenue—third party	\$ 73,188	\$ 72,982	0.3%
Cost of goods sold	(50,014)	(50,143)	(0.3)%
Transaction costs(a)	(3,459)	(3,733)	(7.3)%
Ancillary revenue—third party products	\$ 19,715	\$ 19,106	3.2%
<i>As percent of gross ancillary revenue—third party</i>	<i>26.9%</i>	<i>26.2%</i>	<i>0.7pp</i>

(a) Includes credit card fees and travel agency commissions

During 2009, we generated gross revenue of \$73.2 million from third party products, which resulted in net revenue of \$19.7 million. The majority of the gross revenue was generated from the sale of over 500,000 hotel room nights at our leisure destinations packaged to our customers with scheduled air service.

Fixed fee contract revenue. Fixed fee contract revenue decreased 17.8% to \$43.2 million during 2009 from \$52.5 million for 2008 as we had 9,636 block hours of fixed fee flying in 2009 compared to 10,181 in 2008. The decrease is primarily due to a decline in block hours flown under the Caesars Entertainment Inc. (formerly Harrah's Entertainment Inc.) fixed fee agreement partially offset by a 21.5% increase in other fixed fee flying programs for 2009. Reduction in the Caesars fixed fee revenues was also attributable to the impact of a new contract which went into effect January 1, 2009. Under the modified Caesars contract, Caesars reimburses us for the entire amount of fuel costs incurred. The per-block hour rate we charge Caesars is therefore reduced from the rate we charged under the previous Caesars contracts under which we had been responsible for a portion of the fuel expenses. The Reno program with Caesars was closed in November 2009. New fixed fee flying for 2009 included agreements for the Cuban Family Charter Program, which began in June 2009, flying under an agreement with Beau Rivage Resorts, Inc., and fixed fee flying for the Department of Defense which began in April 2009. The Cuban Family Charter Program fixed fee flying was permanently ceased in October 2009 and the agreement with Beau Rivage Resorts, Inc. ended in December 2009.

Other revenue. We generated other revenue of \$5.8 million and \$5.9 million during 2009 and 2008, respectively. The revenue was primarily generated as a result of our April 2008 purchase of six MD-80 aircraft and three engines on lease to another airline. The six purchased aircraft have since been returned to us, with all of these aircraft having been placed in service as of December 31, 2009. With the return of all of these aircraft, we are not presently generating significant other revenue.

Operating Expenses

Despite a significant increase in departures, our operating expenses decreased by 2.8% to \$435.7 million in 2009 compared to \$448.2 million in 2008 as the reduction in fuel expense more than offset expense increases in other line items resulting from increased service and other factors.

The following table presents Operating expense per passenger and Operating expense per passenger, excluding fuel for the indicated periods (“per-passenger costs”).

	Year ended December 31,		Percentage Change
	2009	2008	
Aircraft fuel	\$30.98	\$ 53.43	(42.0)%
Salaries and benefits	16.89	16.75	0.8
Station operations	10.13	10.11	0.2
Maintenance and repairs	9.93	9.65	2.9
Sales and marketing	3.09	3.34	(7.5)
Aircraft lease rentals	0.36	0.65	(44.6)
Depreciation and amortization	5.56	5.46	1.8
Other	4.83	4.86	(0.6)
Operating expense per passenger	\$81.77	\$104.25	(21.6)%
Operating expense per passenger, excluding fuel	\$50.80	\$ 50.83	(0.5)%

Our per-passenger costs decreased 21.6% primarily due to a 42.0% decrease in fuel expense per passenger as a result of a 24.0% increase in the number of system passengers and a 40.9% reduction in system average cost per gallon for 2009 compared to 2008.

The following table presents the unit costs of CASM and Operating CASM, excluding fuel for the indicated periods.

	Year Ended December 31,		Percentage Change
	2009	2008	
Aircraft fuel	3.04¢	5.17¢	(41.2)%
Salary and benefits	1.65	1.62	1.9
Station operations	0.99	0.98	1.0
Maintenance and repairs	0.97	0.93	4.3
Sales and marketing	0.30	0.32	(6.3)
Aircraft lease rentals	0.04	0.06	(33.3)
Depreciation and amortization	0.54	0.53	1.9
Other	0.47	0.48	(2.1)
Operating expense per ASM (CASM)	8.00¢	10.09¢	(20.7)%
CASM, excluding fuel	4.97¢	4.92¢	1.0%

Aircraft fuel expense. Despite our significant year-over-year expansion of service, aircraft fuel expense decreased 28.1% to \$165.0 million for 2009, down from \$229.6 million for 2008, driven by a 40.9% decrease in the system average cost per gallon to \$1.76 from \$2.98. System gallons consumed increased to 93.5 million from 77.0 million attributable to our 22.2% system departure growth.

Salary and benefits expense. Salary and benefits expense increased 25.0% to \$90.0 million for 2009 up from \$72.0 million for 2008 mainly as a result of a significant increase in accrued employee bonus expense and an increase in the number of full-time equivalent employees. The increase in accrued employee bonus expense was driven by the significant year-over-year increase in operating income. We employed approximately 1,569 full-time equivalent employees at December 31, 2009 compared to 1,348 at December 31, 2008, a 16.4% increase in line with our fleet growth from an average number of aircraft in service of 36.4 in 2008 to 42.7 in 2009. Excluding accrued employee bonus expense, stock compensation expense and other incentives, our salary and benefits expense per average full-time equivalent employee increased by only 2.8% year-over-year.

Station operations expense. Station operations expense increased 24.2% to \$54.0 million in 2009 compared to \$43.5 million in 2008 principally attributable to the impact of increased scheduled service departures of 25.6%. Our station operations expense on a per-departure basis increased by only 1.6% year-over-year.

Maintenance and repairs expense. Maintenance and repairs expense increased 27.7%, to \$52.9 million for 2009 up from \$41.5 million for 2008 as the average number of aircraft in service increased 17.3% from 36.4 in 2008 to 42.7 in 2009. The increase is primarily attributable to scheduled heavy aircraft maintenance checks performed and impact of the growth in our fleet on the repair of rotatable aircraft parts for 2009 compared to 2008, a non-recurring inventory adjustment related to low-value usage expendables during the first quarter of 2009, offset by a decrease in the engine maintenance expense from less expensive engine maintenance events. In comparison with 2008, our scheduled heavy aircraft maintenance checks increased both in the number of events and average expense per event, with percentage increases of 47.6% and 28.0%, respectively. Our average maintenance and repairs expense per aircraft per month increased 8.9% from approximately \$95,000 in 2008 to approximately \$103,000 in 2009.

Sales and marketing expense. Sales and marketing expense increased 14.6% to \$16.5 million in 2009 compared to \$14.4 million in 2008 as a result of advertising expenses associated with entrance into new markets including the new major leisure destination of Los Angeles which launched service in May 2009.

Aircraft lease rentals expense. Aircraft lease rentals expense decreased by 31.6% to \$1.9 million in 2009 down from \$2.8 million in 2008. In each of 2009 and 2008, we had four aircraft under operating lease agreements. In 2009, the average expense per aircraft was lower due to the purchase in 2008 of two aircraft under lease being replaced by two less expensive aircraft which we began leasing in 2009.

Depreciation and amortization expense. Depreciation and amortization expense increased to \$29.6 million for 2009 from \$23.5 million for 2008, an increase of 26.2%, as the number of aircraft owned (including those leased to a third party) or subject to capital lease, increased from 36 as of December 31, 2008 to 42 as of December 31, 2009. The increase was also attributable to the impact of lowering the depreciable lives of our engines at the beginning of 2009 and additional depreciation related to non-aircraft equipment purchases during 2009.

Other expense. Other expense increased 23.0% to \$25.7 million for 2009 compared to \$20.9 million for 2008. The increase is due to an increase of \$2.7 million in losses attributable to dispositions of engines and a reduction in the value of engines held on consignment. Another contributing factor to the increase is from other expenses associated with our growth, such as rent for our Company headquarters and aircraft insurance.

Other (Income) Expense

Other (income) expense increased, from a net other expense of \$0.6 million for 2008, to a net other expense of \$1.7 million for 2009. The increased expense is primarily attributable to a reduction of interest income earned on cash balances in 2009 compared to the same period of 2008 partially offset by a reduction in interest expense due to lower debt balances.

Income Tax Expense

Our effective income tax rate was 36.7% for 2009 compared to 35.9% for 2008. The higher effective tax rate for 2009 was largely due to the geographic mix from our flying and the impact this had on the state income tax portion of the tax provision. While we expect our tax rate to be fairly consistent in the near term, it will tend to vary depending on recurring items such as the amount of income we earn in each state and the state tax rate applicable to such income. Discrete items particular to a given year may also affect our tax rates.

LIQUIDITY AND CAPITAL RESOURCES

During 2010, our primary source of funds was cash generated by our operations. Our operating cash flows have allowed us to maintain a high level of liquidity while growing our fleet and meeting our short term obligations. Our future capital needs are generally for the purchase of additional aircraft for which we had \$44.5 million of obligations as of December 31, 2010 under existing aircraft purchase agreements. In addition, our capital needs include a seat reconfiguration program for our MD-80 aircraft fleet which is expected to start in the third quarter of 2011. On March 10, 2011, we borrowed \$125.0 million under a senior secured term loan facility ("Term Loan"). In addition to the early payments made on existing debt obligations secured by MD-80 aircraft, proceeds from the Term Loan will be used for funding of future capital expenditure programs and general corporate purposes. We believe we have adequate liquidity resources through our operating cash flows and the proceeds from the Term Loan to meet our future capital obligations.

Current Liquidity

Our total cash, including cash and cash equivalents, restricted cash and short-term investments, totaled \$171.6 million, \$249.3 million and \$190.8 million at December 31, 2010, 2009 and 2008, respectively. Restricted cash represents credit card deposits, cash collateral against notes payable, escrowed funds under our fixed fee flying contracts, and cash collateral against letters of credit required by hotel partners for guaranteed room availability, airports and certain other parties. Short-term investments represent marketable securities which are available-for-sale. During 2010, our restricted cash balance increased by \$3.4 million primarily from the cash collateral associated with the loan secured by two Boeing 757-200 aircraft. An increase in the number of letters of credit and higher amounts on a number of existing letters of credit issued to our hotel vendors and some airports resulted in an increase in the restricted cash balance at December 31, 2009.

Under our fixed fee flying contracts, we require our customers to prepay for flights to be provided by us. The prepayments are escrowed until the flight is completed. Prepayments are recorded as restricted cash and a corresponding amount is recorded as air traffic liability.

Sources and Uses of Cash

Operating activities. During 2010, our operating activities provided \$98.0 million of cash compared to \$131.7 million during 2009. We generated more cash from operating activities in 2009 than 2010 as a result of higher net income and a higher increase in our air traffic liability (compared to the previous year end). In addition, cash from operating activities in 2010 was reduced by the prepayment of \$25.0 million for access to hotel rooms for sale through an agreement with one of our key Las Vegas hotel partners.

Investing activities. During 2010, our investing activities provided \$6.8 million compared to the use of \$97.2 million during 2009. Cash provided in investing activities of \$6.8 million during 2010 was primarily due to the proceeds of \$104.1 million from maturities of short-term investments, net of purchases, offset by \$98.5 million of cash used in the purchase of property and equipment, including pre-delivery deposits. Purchases of property and equipment during 2010 consisted of cash purchases of

aircraft and induction costs associated with aircraft including payment of pre-delivery deposits on four undelivered Boeing 757-200 aircraft. During 2009, we used \$64.1 million for the purchase of short-term investments, net of maturities, and another \$31.7 million for the purchase of property and equipment.

Financing activities. During 2010, we used \$81.7 million in cash for financing activities compared to the use of \$41.4 million during 2009. We primarily used cash for the repurchase of our common stock in open market purchases of \$53.8 million, payment on our debt and capital lease obligations of \$31.7 million and the payment of cash dividends to shareholders of \$14.9 million during 2010. During 2009, we used \$25.4 million to repurchase our common stock and \$25.9 million for payment of our debt and capital lease obligations. The cash used in financing activities for both periods was offset by proceeds from the issuance of notes payable associated with a \$14.0 million secured loan during the third quarter of 2010 and a \$7.0 million secured loan during the second quarter of 2009.

Debt

Our long-term debt obligations declined from \$45.8 million as of December 31, 2009 to \$28.1 million as of December 31, 2010. As of December 31, 2010, we had secured debt financing on 17 in-service MD-80 aircraft and two Boeing 757-200 aircraft which have yet to be added to our in-service fleet. Refer to “Item 8—Financial Statements and Supplementary Data—Notes to Consolidated Financial Statements—Note 16—Subsequent Events” for discussion of increased debt under a senior secured term loan facility, which closed on March 10, 2011.

COMMITMENTS AND CONTRACTUAL OBLIGATIONS

The following table discloses aggregate information about our contractual cash obligations as of December 31, 2010 and the periods in which payments are due (in thousands):

	<u>Total</u>	<u>Less than 1 year</u>	<u>1 - 3 years</u>	<u>3 to 5 years</u>	<u>More than 5 years</u>
Long-term debt obligations(1)	\$ 30,492	\$17,945	\$ 9,573	\$2,974	\$ —
Operating lease obligations(2)	24,989	4,709	11,533	5,116	3,631
Aircraft purchase obligations(3)	<u>44,527</u>	<u>44,527</u>	—	—	—
Total future payments on contractual obligations	<u>\$100,008</u>	<u>\$67,181</u>	<u>\$21,286</u>	<u>\$8,090</u>	<u>\$3,631</u>

- (1) Long-term debt obligations include scheduled interest payments. Refer to “Item 8—Financial Statements and Supplementary Data—Notes to Consolidated Financial Statements—Note 16—Subsequent Events” for discussion of the incurrence of \$125.0 million in debt under a senior secured term loan facility in March 2011 and the repayment of existing debt secured by our aircraft.
- (2) Operating lease obligations include aircraft operating leases and leases of office space and airport station property.
- (3) Aircraft purchase obligations under existing aircraft purchase agreements.

OFF-BALANCE SHEET ARRANGEMENTS

We have obligations for aircraft that are classified as operating leases and therefore are not reflected on our balance sheet. As of December 31, 2010, we operated two of our aircraft under operating lease agreements. The operating leases for the two aircraft have terms extending through June 2014.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The discussion and analysis of our financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amount of assets and liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of our financial statements. Note 2 to our Consolidated Financial Statements provides a detailed discussion of our significant accounting policies.

Critical accounting policies are defined as those policies that reflect significant judgments about matters that are inherently uncertain. These estimates and judgments affect the reported amount of assets and liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of our financial statements. Our actual results may differ from these estimates under different assumptions or conditions. We believe our critical accounting policies are limited to those described below.

Revenue Recognition. Scheduled service revenue consists of passenger revenue involving limited frequency nonstop flights between our leisure destinations and small cities recognized when the travel-related service or transportation is provided or when the itinerary expires unused. Nonrefundable scheduled itineraries expire on the date of the intended flight, unless the date is extended by notification from the customer in advance. Itineraries sold for transportation, but not yet used, as well as unexpired credits, are included in air traffic liability.

Various taxes and fees assessed on the sale of tickets to end customers are collected by us as an agent and remitted to taxing authorities. These taxes and fees have been presented on a net basis in our consolidated statements of income and recorded as a liability until remitted to the appropriate taxing authority.

Fixed fee contract revenue consists largely of long-term agreements to provide charter service on a seasonal and ad hoc basis to affiliates of Caesars Entertainment Inc. (formerly Harrah's Entertainment Inc.), Department of Defense ("DOD") and others. Fixed fee contract revenue is recognized when the transportation is provided.

Ancillary revenue consists of passenger revenue from air-related charges and third party products. Air-related charges include optional services provided to passengers such as the use of our website to purchase scheduled service transportation, advance seat assignments, priority boarding, unlimited changes to nonrefundable itineraries and other services. Revenues from air-related charges are recognized when the transportation is provided if the product is not deemed independent of the scheduled service. Revenues from change fees for charges imposed on passengers for making changes to nonrefundable itineraries are recognized as they occur. Ancillary revenue is also generated from third party products such as the sale of hotel rooms, rental cars, ticket attractions and other items. Revenues from the sale of third party products are recognized at the time the product is utilized, such as the time a purchased hotel room is occupied. The amount of revenues attributed to each element of a bundled sale involving air-related charges and third party products in addition to airfare is determined in accordance with accounting standards for revenue arrangements with multiple deliverables. The sale of ancillary revenue products is recorded net of amounts paid to wholesale providers, travel agent commissions and credit card processing fees in accordance with revenue reporting accounting standards.

Other revenue is generated from leased out aircraft and flight equipment and other miscellaneous sources. Lease revenue is recognized on a straight-line basis over the lease term.

Accounting for Long-Lived Assets. When appropriate, we evaluate our long-lived assets for impairment. We record impairment losses on long-lived assets used in operations when events or

circumstances indicate that the assets may be impaired and the undiscounted cash flows estimated to be generated by those assets are less than the net book value of those assets. In making these determinations, we utilize certain assumptions, including, but not limited to: (i) estimated fair market value of the assets; and (ii) estimated future cash flows expected to be generated by these assets, which are based on additional assumptions such as asset utilization, length of service the asset will be used in our operations, and estimated salvage values.

Aircraft maintenance and repair costs. We account for aircraft maintenance activities under the direct expense method. Under this method, maintenance and repair costs for owned and leased aircraft, including major aircraft maintenance activities, are charged to operating expenses as incurred. As a lessee, we may be required under provisions of our lease agreements to make payments to the lessor in advance of the performance of major maintenance activities. These payments of maintenance deposits are calculated based on a performance measure, such as flight hours or cycles, and are available for reimbursement to us upon the completion of the maintenance of the leased aircraft. Accounting guidance for maintenance deposits requires these payments to be accounted for as an asset until reimbursed for incurred maintenance costs or until it is determined that any portion of the estimated total of the deposit is less than probable of being returned. In addition, payments of maintenance deposits that are not “substantially and contractually related to the maintenance of the leased asset” are expensed as incurred. The Company had no maintenance deposits as of December 31, 2010 and \$2.0 million as of December 31, 2009.

Short-term Investments. We maintain a liquid portfolio of investments that are available for current operations and to satisfy on-going obligations. We have classified our short-term investments as “available for sale” and accordingly, unrealized gains or losses are reported as a component of comprehensive income in stockholders’ equity.

Share-based compensation. We have issued common stock, restricted stock, stock options and stock appreciation rights (“SARs”) to executives and employees pursuant to our long-term incentive plan and warrants to the placement agent involved in our May 2005 issuance of redeemable convertible preferred shares. For the years ended December 31, 2010, 2009 and 2008, we recorded \$4.4 million, \$3.1 million and \$1.7 million, respectively, of compensation expense in the consolidated statements of income related to stock options, SARs and restricted stock.

We recognize stock-based compensation expense over the requisite service period using a fair value approach. Determining the fair value requires judgment, and we use the Black-Scholes valuation model for stock options and SARs issued. Significant judgment is required to establish the assumptions to be used in the Black-Scholes valuation model. These assumptions are for the volatility of our common stock, estimated term over which our stock options and SARs will be outstanding, and interest rate to be applied. Expected volatilities are based on the historical volatilities from publicly traded airline companies of our peer group due to our lack of historical information. Expected term represents the weighted average time between the option’s grant date and its exercise date. We used the simplified method from accounting guidance for companies with a limited trading history to estimate the expected term on 2009 and 2008 award grants. No stock options or SARs were granted during 2010. The risk-free interest rate for periods equal to the expected term of the stock option is based on a blended historical rate using Federal Reserve rates for U.S. Treasury securities. We use our closing share price on the grant date as the fair value for issuances of restricted stock.

RECENT ACCOUNTING PRONOUNCEMENTS

See related disclosure at “Item 8—Financial Statements and Supplementary Data—Notes to Consolidated Financial Statements—Note 2—Summary of Significant Accounting Policies.”

SPECIAL NOTE ABOUT FORWARD-LOOKING STATEMENTS

We have made forward-looking statements in this annual report on Form 10-K, and in this section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations," that are based on our management's beliefs and assumptions and on information currently available to our management. Forward-looking statements include the information concerning our possible or assumed future results of operations, business strategies, financing plans, competitive position, industry environment, potential growth opportunities, future service to be provided and the effects of future regulation and the effects of competition. Forward-looking statements include all statements that are not historical facts and can be identified by the use of forward-looking terminology such as the words "believe," "expect," "anticipate," "intend," "plan," "estimate," "project" or similar expressions.

Forward-looking statements involve risks, uncertainties and assumptions. Actual results may differ materially from those expressed in the forward-looking statements. Important risk factors that could cause our results to differ materially from those expressed in the forward-looking statements may be found in Item 1A of this annual report on Form 10-K and generally may be found in our periodic reports and registration statements filed with the Securities and Exchange Commission at www.sec.gov. These risk factors include, without limitation, increases in fuel prices, the effect of the economic downturn on leisure travel, the introduction of a second fleet type, terrorist attacks, risks inherent to airlines, demand for air services to our leisure destinations from the markets served by us, our ability to implement our growth strategy, unionization efforts, our dependence on our leisure destination markets, our ability to add, renew or replace gate leases, the competitive environment, problems with our aircraft, dependence on fixed fee customers, our reliance on our automated systems, economic and other conditions in markets in which we operate, aging aircraft and other governmental regulation, our ability to obtain regulatory approvals, increases in maintenance costs and cyclical and seasonal fluctuations in our operating results.

Any forward-looking statements are based on information available to us today and we undertake no obligation to update publicly any forward-looking statements, whether as a result of future events, new information or otherwise.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We are subject to certain market risks, including commodity prices (specifically, aircraft fuel). The adverse effects of changes in these markets could pose a potential loss as discussed below. The sensitivity analysis does not consider the effects that such adverse changes may have on overall economic activity, nor does it consider additional actions we may take to mitigate our exposure to such changes. Actual results may differ. See the Notes to the consolidated financial statements for a description of our financial accounting policies and additional information.

Aircraft Fuel

Our results of operations can be significantly impacted by changes in the price and availability of aircraft fuel. Aircraft fuel expense for the years ended December 31, 2010 and 2009 represented approximately 43.6% and 37.9% of our operating expenses, respectively. Increases in fuel prices or a shortage of supply could have a material effect on our operations and operating results. Based on our 2010 fuel consumption, a hypothetical ten percent increase in the average price per gallon of aircraft fuel would have increased fuel expense by approximately \$24.7 million for the year ended December 31, 2010. While we do not currently hedge fuel price risk, prior to 2008, we entered into forward contracts or other financial products to reduce our exposure to fuel price volatility. As of December 31, 2010, we had no fuel derivative contracts outstanding.

Interest Rates

We have market risk associated with changing interest rates due to the short-term nature of our invested cash and cash equivalents, which totaled \$113.3 million, and short term investments of \$37.0 million at December 31, 2010. We invest available cash in money market funds, certificates of deposit, investment grade commercial paper and other highly rated financial instruments. Because of the short-term nature of these investments, the returns earned closely parallel short-term floating interest rates. A hypothetical 100 basis point change in interest rates for the years ended December 31, 2010 and 2009, would have affected interest income from cash and investments by \$0.1 million and \$0.2 million, respectively.

Our long-term debt has consisted of fixed rate notes payable and capital lease arrangements, but all of our capital lease arrangements were terminated by our acquisition of the related aircraft during 2010. A hypothetical 100 basis point change in market interest rates as of December 31, 2010, would not have a material effect on the fair value of our fixed rate debt instruments. Also, a hypothetical 100 basis point change in market rates during the years ended December 31, 2010 and 2009, would not have materially impacted our earnings or cash flow associated with our fixed-rate debt.

Item 8. Financial Statements and Supplementary Data

The following consolidated financial statements as of December 31, 2010 and 2009 and for each of the three years in the period ended December 31, 2010 are included below.

Reports of Independent Registered Public Accounting Firm	53
Consolidated Balance Sheets	55
Consolidated Statements of Income	56
Consolidated Statements of Stockholders' Equity and Comprehensive Income ..	57
Consolidated Statements of Cash Flows	59
Notes to Consolidated Financial Statements	60

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of
Allegiant Travel Company

We have audited the accompanying consolidated balance sheets of Allegiant Travel Company and subsidiaries (the "Company") as of December 31, 2010 and 2009, and the related consolidated statements of income, stockholders' equity and comprehensive income, and cash flows for each of the three years in the period ended December 31, 2010. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company as of December 31, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Allegiant Travel Company's internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 11, 2011, expressed an unqualified opinion thereon.

Las Vegas, Nevada
March 11, 2011

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of
Allegiant Travel Company

We have audited Allegiant Travel Company and subsidiaries' (the "Company") internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Allegiant Travel Company and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of December 31, 2010 and 2009, and the related consolidated statements of income, stockholders' equity and comprehensive income, and cash flows for each of the three years in the period ended December 31, 2010 and our report dated March 11, 2011, expressed an unqualified opinion thereon.

ALLEGIANT TRAVEL COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

1. Organization and Business of Company

Allegiant Travel Company (the "Company") is a leisure travel company focused on providing travel services to residents of small, underserved cities in the United States. The Company operates a low-cost passenger airline marketed primarily to leisure travelers in small cities, allowing it to sell air travel both on a stand-alone basis and bundled with hotel rooms, rental cars and other travel related services. The Company also provides charter air service under long-term contracts as well as on a seasonal and ad-hoc basis. Because scheduled and chartered air services have similar operating margins, economic characteristics, "production processes" involving check-in, baggage handling and flight services which target the same class of customers and are subject to the same regulatory environment, the Company believes it operates in one reportable segment. Additionally, the Company does not separately track expenses for the scheduled and chartered air services.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements include the accounts of Allegiant Travel Company and its wholly-owned operating subsidiaries. Investments in affiliates in which ownership interest ranges from 20 to 50 percent and provides the Company the ability to exercise significant influence over operating and financial policies are accounted for under the equity method. All intercompany balances and transactions have been eliminated.

Certain reclassifications have been made to the prior period's financial statements to conform to 2010 classifications. These reclassifications had no effect on the previously reported net income.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Due to the prospective nature of these estimates, actual results could differ from those estimates.

Cash and Cash Equivalents and Restricted Cash

Cash and cash equivalents include investments and interest bearing instruments with maturities of three months or less at the date of acquisition. Such investments are carried at cost which approximates market value. Restricted cash represents credit card deposits, cash collateral against notes payable, escrowed funds under fixed fee flying contracts and cash collateral against letters of credit required by hotel properties for guaranteed room availability, airports and certain other parties.

Short-term Investments

The Company's investments in marketable debt and equity securities are classified as available-for-sale and are reported at fair market value with the net unrealized gain or (loss) reported

ALLEGIANT TRAVEL COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

2. Summary of Significant Accounting Policies (Continued)

as a component of accumulated comprehensive income in stockholders' equity. Short-term investments consisted of the following:

	<u>As of December 31, 2010</u>				<u>As of December 31, 2009</u>			
	<u>Cost</u>	<u>Gross Unrealized</u>		<u>Market Value</u>	<u>Cost</u>	<u>Gross Unrealized</u>		<u>Market Value</u>
		<u>Gains</u>	<u>(Losses)</u>			<u>Gains</u>	<u>(Losses)</u>	
Debt securities issued by states of the United States and political subdivisions of the states	\$32,140	\$ 2	\$(10)	\$32,132	\$ 76,599	\$ 44	\$(21)	\$ 76,622
Debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies	—	—	—	—	64,477	132	—	64,609
Corporate debt securities	4,870	—	(2)	4,868	—	—	—	—
Total	<u>\$37,010</u>	<u>\$ 2</u>	<u>\$(12)</u>	<u>\$37,000</u>	<u>\$141,076</u>	<u>\$176</u>	<u>\$(21)</u>	<u>\$141,231</u>

The cost of marketable securities sold is determined by the specific identification method with any realized gains or losses reflected in income. The Company recognized no realized gains or losses for the years ended December 31, 2010 and 2009 and \$307 of realized gains for the year ended December 31, 2008.

The Company believes that the unrealized losses related to debt securities are not other-than-temporary. Debt securities in an unrealized loss position related primarily to investments in municipal bonds.

Short-term investments had the following maturities as of December 31, 2010:

<u>Maturities</u>	<u>Amount</u>
Year 2011	\$35,695
Year 2012	1,305
Thereafter	—
Total	<u>\$37,000</u>

Expendable Parts, Supplies and Fuel

Expendable parts, supplies and fuel inventories are valued at cost using the first-in, first-out method. An allowance for obsolescence has been recorded based upon historical results and management's expectations of future operations. Such inventories are charged to expense as they are used in operations.

ALLEGIANT TRAVEL COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

2. Summary of Significant Accounting Policies (Continued)

Software capitalization

The Company capitalizes certain costs related to the development of internal use software during the application development stages of projects. The Company amortizes these costs using the straight-line method over the estimated useful life of three years. The Company capitalized software development costs of \$0.5 million and \$0.1 million during the years ended December 31, 2010 and 2009, respectively. The Company capitalized no software development costs during 2008. Costs incurred during the preliminary and post-implementation stages of software development are expensed as incurred.

Property and Equipment

Property and equipment are recorded at cost and depreciated using the straight-line method to their estimated residual values over their estimated useful lives as follows:

Aircraft and engines	3 - 10 years
Rotable parts	7 years
Equipment and leasehold improvements	3 - 7 years

Aircraft and engines have an estimated average residual value of 20.5% of original cost; other property and equipment are assumed to have no residual value.

Aircraft under capital lease arrangements are depreciated over the shorter of the useful life of the aircraft or remaining lease term. Depreciation for these aircraft is included in depreciation and amortization expense in the Company's consolidated statements of income.

Investment in unconsolidated affiliates

The Company uses the equity method to account for AFH Inc.'s, a wholly-owned subsidiary, investment in a fuel joint venture. AFH, Inc. has a 50% interest in a joint venture agreement with OSI (an affiliate of the Orlando Sanford International Airport) to handle certain fuel operations for the Orlando Sanford International Airport. The joint venture, SFB Fueling LLC, is responsible for the purchase and transport of jet fuel to a fuel farm facility owned and operated by OSI, and for the sale of jet fuel to air carriers. In addition, AFH, Inc. is responsible for the administrative functions for the joint venture. The Company's proportionate allocation of net income or loss from this investment and an investment in an aviation services company are reported in the Company's consolidated statements of income in other (income) expense, with an adjustment to the recorded investment in the Company's consolidated balance sheet. These investments treated under the equity method are not material to the financial position or results of operations of the Company.

Capitalized Interest

Interest attributable to funds used to finance the refurbishment of aircraft prior to revenue service is capitalized as an additional cost of the related asset provided the refurbishment is extensive or requires an extended period of time to complete, generally longer than 90 days. Interest is capitalized

(Dollars in thousands except share and per share amounts)

2. Summary of Significant Accounting Policies (Continued)

at the Company's average interest rate on long-term debt and ceases when the asset is ready for service. The Company had no capitalized interest during 2010, 2009 or 2008.

Measurement of Impairment of Long-Lived Assets

The Company records impairment losses on long-lived assets used in operations, consisting principally of property and equipment, when events or changes in circumstances indicate, in management's judgment, that the assets might be impaired and the undiscounted cash flows estimated to be generated by those assets are less than the carrying amount of those assets. Cash flow estimates are based on historical results adjusted to reflect the Company's best estimate of future market and operating conditions. The net carrying value of assets not recoverable is reduced to fair value if lower than carrying value. Estimates of fair value represent the Company's best estimate based on industry trends, recent transactions involving sales of similar assets and, if necessary, estimates of future discounted cash flows. The Company had no impairment losses on long-lived assets used in operations for the years ended December 31, 2010, 2009 or 2008.

Revenue Recognition

Scheduled service revenue consists of passenger revenue generated from limited frequency nonstop flights between our leisure destinations and small cities recognized when the travel-related service or transportation is provided or when the itinerary expires unused. Nonrefundable scheduled itineraries expire on the date of the intended flight, unless the date is extended by notification from the customer in advance. Itineraries sold for transportation, but not yet used, as well as unexpired credits, are included in air traffic liability.

Various taxes and fees assessed on the sale of tickets to end customers are collected by the Company as an agent and remitted to taxing authorities. These taxes and fees are presented on a net basis in the Company's consolidated statements of income and recorded as a liability until remitted to the appropriate taxing authority.

Fixed fee contract revenue consists largely of long-term agreements to provide charter service on a seasonal and ad hoc basis to affiliates of Caesars Entertainment Inc. (formerly Harrah's Entertainment Inc.), Department of Defense ("DOD") and others. Fixed fee contract revenue is recognized when the transportation is provided.

Ancillary revenue consists of passenger revenue from air-related charges and third party products. Air-related charges include optional services provided to passengers such as the use of its website to purchase scheduled service transportation, advance seat assignments, priority boarding, unlimited changes to nonrefundable itineraries and other services. Revenues from air-related charges are recognized when the transportation is provided if the product is not deemed independent of the scheduled service. Revenues from change fees for charges imposed on passengers for making changes to nonrefundable itineraries are recognized as they occur. Ancillary revenue is also generated from third party products such as the sale of hotel rooms, rental cars, ticket attractions and other items. Revenues from the sale of third party products are recognized at the time the product is utilized, such as the time a purchased hotel room is occupied. The amount of revenues attributed to each element of

ALLEGIANT TRAVEL COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

2. Summary of Significant Accounting Policies (Continued)

a bundled sale involving air-related charges and third party products in addition to airfare is determined in accordance with accounting standards for revenue arrangements with multiple deliverables. The sale of third party products is recorded net of amounts paid or payable to wholesale providers, travel agent commissions and credit card processing fees in accordance with revenue reporting accounting standards.

Other revenue is generated from leased out aircraft and flight equipment and other miscellaneous sources. Lease revenue is recognized on a straight-line basis over the lease term.

Maintenance and Repair Costs

Aircraft maintenance and repair costs. The Company accounts for aircraft maintenance activities under the direct expense method. Under this method, maintenance and repair costs for owned and leased aircraft, including major aircraft maintenance activities, are charged to operating expenses as incurred. As a lessee, the Company may be required under provisions of the Company's lease agreements to make payments to the lessor in advance of the performance of major maintenance activities. These payments of maintenance deposits are calculated based on a performance measure, such as flight hours or cycles, and are available for reimbursement to the Company upon the completion of the maintenance of the leased aircraft. Accounting guidance for maintenance deposits requires these payments to be accounted for as an asset until reimbursed for incurred maintenance costs or until it is determined that any portion of the estimated total of the deposit is less than probable of being returned. In addition, payments of maintenance deposits that are not "substantially and contractually related to the maintenance of the leased asset" are expensed as incurred. The Company had no maintenance deposits as of December 31, 2010 and \$1,982 as of December 31, 2009.

Advertising Costs

Advertising costs are charged to expense in the period incurred. Advertising expense was \$4,742, \$6,456 and \$4,849 for the years ended December 31, 2010, 2009 and 2008, respectively.

Earnings per Share

Basic and diluted earnings per share are computed pursuant to the two-class method. Under this method, the Company attributes net income to two classes, common stock and unvested restricted stock awards. Unvested restricted stock awards granted to employees under the Company's Long-Term Incentive Plan are considered participating securities as they receive non-forfeitable rights to cash dividends at the same rate as common stock.

Diluted net income per share is calculated using the more dilutive of two methods. Under both methods, the exercise of employee stock options, stock purchase warrants and stock appreciation rights ("SARs") are assumed using the treasury stock method. The assumption of vesting of restricted stock, however, differs:

1. Assume vesting of restricted stock using the treasury stock method.

ALLEGIANT TRAVEL COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

2. Summary of Significant Accounting Policies (Continued)

2. Assume unvested restricted stock awards are not vested, and allocate earnings to common shares and unvested restricted stock awards using the two-class method.

For the years ended December 31, 2010 and 2008, the second method above which assumes unvested awards are not vested was used in the computation because it was more dilutive than the first method above which assumes vesting of awards using the treasury stock method. Both methods resulted in the same diluted net income per share for the year ended December 31, 2009. The following table sets forth the computation of net income per share on a basic and diluted basis for the periods indicated (shares in table below in thousands):

	Year Ended December 31,		
	2010	2009	2008
Basic:			
Net income	\$65,702	\$76,331	\$35,407
Less: Net income allocated to participating securities	(402)	(101)	(91)

Adjusted weighted-average shares outstanding under treasury stock method	<u>19,712</u>	<u>20,278</u>	<u>20,488</u>
Participating securities excluded under two-class method	(54)	N/A	(11)
Adjusted weighted-average shares outstanding under two-class method	<u>19,658</u>	<u>N/A</u>	<u>20,477</u>

Stock-Based Compensation

The Company accounts for stock-based compensation in accordance with accounting standards which require the compensation cost relating to share-based payment transactions be recognized in the Company's consolidated statements of income. The cost is measured at the grant date, based on the calculated fair value of the award using the Black-Scholes option pricing model for stock options and SARs, and based on the closing share price of the Company's stock on the grant date for restricted stock awards. The cost is recognized as an expense over the employee's requisite service period (the

(Dollars in thousands except share and per share amounts)

2. Summary of Significant Accounting Policies (Continued)

vesting period of the equity award). The vesting period of the Company's equity awards is generally three years. The Company's stock-based employee compensation plan is more fully discussed in Note 13—Employee Benefit Plans.

Income Taxes

The Company's provision for income taxes is based on estimated effective annual income tax rates. The provision differs from income taxes currently payable because certain items of income and expense are recognized in different periods for financial statement purposes than for tax return purposes. A valuation allowance for net deferred tax assets is provided unless realizability is judged by the Company to be more likely than not. The Company has determined that all of its deferred tax assets are more likely than not to be realized. The Company determines the net current and non-current deferred tax assets or liabilities separately for federal, state, and other local jurisdictions.

The Company's income tax returns are subject to examination by the Internal Revenue Service ("IRS") and other tax authorities in the locations where the Company operates. The Company assesses potentially unfavorable outcomes of such examinations based on the criteria set forth in uncertain tax position accounting standards. The accounting standards prescribe a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements.

Accounting standards for income taxes, utilize a two-step approach for evaluating tax positions. Recognition (Step I) occurs when the Company concludes that a tax position, based on its technical merits, is more likely than not to be sustained upon examination. Measurement (Step II) is only addressed if the position is deemed to be more likely than not to be sustained. Under Step II, the tax benefit is measured as the largest amount of benefit that is more likely than not to be realized upon settlement. Accounting for income taxes standards generally identify the term "more likely than not" to represent the likelihood of occurrence to be greater than 50%.

The tax positions failing to qualify for initial recognition, are to be recognized in the first subsequent interim period that they meet the "more likely than not" standard. If it is subsequently determined that a previously recognized tax position no longer meets the "more likely than not" standard, it is required that the tax position be derecognized. Accounting for income taxes standards specifically prohibit the use of a valuation allowance as a substitute for derecognition of tax positions. As applicable, the Company will recognize accrued penalties and interest related to unrecognized tax benefits in the provision for income taxes. During the years ended December 31, 2010, 2009 and 2008, the Company recognized no amounts for interest or penalties related to unrecognized tax benefits.

Newly Issued Accounting Pronouncements

In September 2009, the Financial Accounting Standards Board ("FASB") ratified Emerging Issues Task Force Issue No. 08-01, "Revenue Arrangements with Multiple Deliverables" ("EITF 08-1"). EITF 08-1 updates the current guidance pertaining to multiple-element revenue arrangements included in ASC Topic 605 and changes the allocation methods used in determining how to account for multiple payment streams. It also results in the ability to separately account for more deliverables and potentially less revenue deferrals. This accounting standard is effective for new revenue arrangements

(Dollars in thousands except share and per share amounts)

2. Summary of Significant Accounting Policies (Continued)

entered into by the Company after January 1, 2011. The Company has evaluated the accounting guidance and does not expect a material impact on its consolidated financial statements.

In January 2010, the FASB issued Accounting Standards Update No. 2010-06, "Fair Value Measurements Disclosures," which amends Subtopic 820-10 of the FASB Accounting Standards Codification to require new disclosures for fair value measurements and provides clarification for existing disclosure requirements. More specifically, this update requires (a) an entity to disclose separately the amounts of significant transfers in and out of Level 1 and 2 fair value measurements and to describe the reasons for the transfers; and (b) information about purchases, sales, issuances and settlements to be presented separately (i.e., present the activity on a gross basis rather than net) in the reconciliation for fair value measurements using significant unobservable inputs (Level 3 inputs). This update clarifies existing disclosure requirements for the level of disaggregation used for classes of assets and liabilities measured at fair value, and requires disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements using Level 2 and Level 3 inputs. In 2010, the Company adopted those additional disclosure requirements which became effective for interim and annual reporting periods beginning after December 15, 2009. Certain provisions, which contain disclosures regarding information about purchases, sales, issuances and settlements in the Level 3 reconciliation, will be effective for the Company beginning in the quarter ending March 31, 2011.

3. Property and Equipment

At December 31, 2010, the Company's fleet consisted of 52 MD-80 series aircraft in revenue service, and eight MD-80 aircraft and two Boeing 757-200 aircraft to be placed into revenue service in the future. The Company owns 60 of these aircraft—43 owned free and clear, and 17 owned subject to financing scheduled to be fully paid over the next four years. The Company leases two aircraft under operating leases which expire on or before June 2014. Refer to Note 16—Subsequent Events" for discussion of the pledge of all of the Company's MD-80 aircraft to secure payment in connection with the borrowings under a senior secured term loan facility. At December 31, 2009, the Company's fleet consisted of 46 MD-80 aircraft with all aircraft in revenue service. The Company owned 42 of these aircraft, including two subject to capital leases, with the remaining four subject to operating lease agreements.

Property and equipment consist of the following:

	As of December 31, 2010	As of December 31, 2009
Flight equipment	\$ 364,075	\$273,680
Ground property and equipment	20,712	15,573
Total property and equipment	384,787	289,253
Less accumulated depreciation and amortization	(117,489)	(84,720)
Property and equipment, net	<u>\$ 267,298</u>	<u>\$204,533</u>

5. Long-Term Debt (Continued)

In August 2010, the Company borrowed \$14,000 under a loan agreement secured by two previously unencumbered Boeing 757-200 aircraft. The notes payable issued under the loan agreement bear interest at 6.26% per annum and are payable in monthly installments through August 2014. The Company applied a portion of the proceeds to make payment on existing debt obligations of \$7,219 secured by four MD-80 aircraft due in June 2011 and June 2014. In accordance with the loan agreement, collateral is held on deposit until certain terms are met.

In September 2010, the Company exercised early purchase options on two aircraft subject to capital leases and retired the outstanding capital lease obligations for these aircraft.

6. Leases

The Company leases aircraft and other assets, including office facilities, airport and terminal facilities and office equipment with terms extending through 2019.

As of December 31, 2010, the Company was party to operating lease agreements for two aircraft with terms extending through June 2014. In February 2010, the Company exercised purchase options on two aircraft under operating leases and took ownership of the aircraft in October 2010.

The office facilities under lease include approximately 65,000 square feet of space for the Company's primary corporate offices. The lease has two five-year renewal options, but the Company has the right to terminate after the seventh year of the lease in April 2015 and the right to purchase the building from the landlord after the third year of the lease in April 2011. The initial base rental is approximately \$1,528 per year and is subject to escalation. The Company is also responsible for its share of common area maintenance charges.

Airport and terminal facility leases are entered into with a number of local governments and other third parties. These lease arrangements have a variety of terms and conditions. Leasehold improvements made at these facilities are not material.

Total rental expense for aircraft and non-aircraft operating leases for the years ended December 31, 2010, 2009 and 2008 was \$8,742, \$8,204 and \$7,373, respectively.

At December 31, 2010, scheduled future minimum lease payments under operating leases with initial or remaining noncancelable lease terms in excess of one year are as follows:

	<u>Operating Leases</u>
2011	\$ 4,709
2012	4,470
2013	4,166
2014	2,900
2015	2,696
Thereafter	<u>6,048</u>
Total	<u>\$24,989</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

6. Leases (Continued)

During 2010, the Company purchased two aircraft under lease agreements which were classified as capital leases under lease accounting standards. As a result, the Company has no remaining aircraft under capital lease as of December 31, 2010. The amounts applicable to these two aircraft under capital leases included in property and equipment were as follows:

	As of December 31,	
	2010	2009
Aircraft	\$—	\$ 7,726
Less: Accumulated depreciation	—	(1,238)
Aircraft, net	\$—	\$ 6,488

7. Stockholders' Equity

In March 2009, Allegiant Information Systems, Inc., a wholly owned subsidiary of the Company, completed a plan of merger with an organization that owned the exclusive rights to the travel applications of the software operating system the Company has used since its inception. In consideration for the acquisition, the Company issued 41,450 shares of its unregistered common stock.

In May 2009, the Company completed a secondary offering for the sale of shares from certain existing stockholders. The Company did not sell any shares in this underwritten offering.

On April 26, 2010, the Company's Board of Directors declared a one-time cash dividend of \$0.75 per share on its outstanding common stock payable to stockholders of record on May 14, 2010. On June 1, 2010, the Company paid cash dividends of \$14,942 to these stockholders.

On May 3, 2010, 162,500 shares of our common stock were issued through the exercise of warrants. These warrants were issued to a placement agent in connection with the private placement of equity in 2005. The Company received \$715 in proceeds from the exercise of these warrants.

The Company is authorized by the Board of Directors to acquire the Company's stock through open market purchases under its share repurchase program. During 2010, the Board of Directors increased authority in January by an additional \$25,000, in July by an additional \$25,000 and in September by an additional \$50,000. During 2010, the Company repurchased 1,206,689 shares through open market purchases at an average cost of \$44.40 per share for a total expenditure of \$53,574. During 2009, the Company repurchased 637,902 shares at an average cost of \$38.26 per share for a total expenditure of \$24,407. As of December 31, 2010, the Company had \$46,426 of unused stock repurchase authority remaining under the plan.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

8. Comprehensive Income

The components of comprehensive income included the following:

	Year Ended December 31,	
	2010	2009
Net income	\$65,702	\$76,331
Other comprehensive income (loss):		
Unrealized loss on short-term investments, net of tax	(101)	(474)
Total comprehensive income	\$65,601	\$75,857

9. Fair Value Measurements

Fair value measurements accounting standards define fair value, establish a consistent framework for measuring fair value, and require disclosures for each major asset and liability category measured at fair value on either a recurring or a nonrecurring basis. Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, a three-tier fair value hierarchy is established in accounting standards. The hierarchy prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

As of December 31, 2010, the Company held cash equivalents and short term investments that are required to be measured at fair value on a recurring basis. Cash equivalents and short term investments consist of short-term, highly liquid, income-producing investments including money market funds, debt securities issued by U.S. Treasury and other U.S. government corporations and agencies. Cash equivalents have maturities of three months or less, while the short-term investments have maturities of greater than three months. These assets are classified within Level 1 or Level 2 because the Company values these assets using quoted market prices or alternative pricing sources and models utilizing market observable inputs.

10. Income Taxes

The Company is subject to income taxation in the United States and various state jurisdictions in which it operates. In accordance with income tax reporting accounting standards, the Company recognizes tax benefits or expense on the temporary differences between the financial reporting and tax bases of its assets and liabilities.

The components of the provision (benefit) for income taxes are as follows:

	<u>Year Ended December 31,</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
Current:			
Federal	32,082	35,905	13,326
State	<u>2,607</u>	<u>1,613</u>	<u>606</u>
Total Current	34,689	37,518	13,932
Deferred:			
Federal	3,030	6,195	6,060
State	<u>(89)</u>	<u>520</u>	<u>(147)</u>
Total Deferred	<u>2,941</u>	<u>6,715</u>	<u>5,913</u>
Total Income Tax Provision	<u>37,630</u>	<u>44,233</u>	<u>19,845</u>

The Company recorded \$821, \$1,157 and \$1,602 as an increase to additional paid in capital for certain tax benefits from employee stock-based compensation for the years ended December 31, 2010, 2009 and 2008, respectively.

Reconciliations of the statutory income tax rate and the Company's effective tax rate for 2010, 2009, and 2008 are as follows:

	<u>Year Ended</u> <u>December 31,</u>		
	<u>2010</u>	<u>2009</u>	<u>2008</u>
Federal statutory rate	35.0%	35.0%	35.0%
State income taxes, net of federal income tax benefit	1.2%	1.6%	0.7%
Other	<u>0.2%</u>	<u>0.1%</u>	<u>0.2%</u>
Effective tax rate	<u>36.4%</u>	<u>36.7%</u>	<u>35.9%</u>

For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

10. Income Taxes (Continued)

The major components of the Company's net deferred tax assets and liabilities are as follows:

	<u>As of December 31,</u> 2010		<u>As of December 31,</u> 2009	
	<u>Assets</u>	<u>Liabilities</u>	<u>Assets</u>	<u>Liabilities</u>
Current				
Accrued Vacation	\$ 688	\$ —	\$ 540	\$ —
Prepaid expenses	—	(2,718)	—	(2,313)
State taxes	691	—	886	—
Accrued property taxes	386	—	452	—
Other	707	—	704	—
Total current	<u>2,472</u>	<u>(2,718)</u>	<u>2,582</u>	<u>(2,313)</u>
Noncurrent:				
Depreciation	—	(27,964)	—	(28,382)
Goodwill	931	—	1,049	—
Stock-based compensation expense	1,642	—	699	—
Other	77	0	68	—
Total noncurrent	<u>2,650</u>	<u>(27,964)</u>	<u>1,816</u>	<u>(28,382)</u>
Total	<u>\$5,122</u>	<u>\$(30,682)</u>	<u>\$4,398</u>	<u>\$(30,695)</u>

The Company paid income taxes, net of refunds, of \$36,986, \$36,952 and \$4,623 in 2010, 2009 and 2008, respectively.

Effective January 1, 2007, the Company adopted the accounting standards for uncertain tax positions. Accounting standards for income taxes utilize a two-step approach for evaluating tax positions. A tax position is recognized if it is more likely than not to be sustained upon examination and measured as the largest amount of benefit that is more likely than not (greater than 50%) to be realized upon settlement.

If it is subsequently determined that a previously recognized tax position no longer meets the "more likely than not" standard, it is required that the tax position be derecognized. Accounting for income taxes standards specifically prohibit the use of a valuation allowance as a substitute for derecognition of tax positions. As applicable, the Company will recognize accrued penalties and interest related to unrecognized tax benefits in the provision for income taxes.

ALLEGIANT TRAVEL COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

10. Income Taxes (Continued)

A reconciliation of the beginning and ending amount of unrecognized tax benefit is as follows:

	As of December 31,	
	2010	2009
Beginning Balance	\$ —	\$—
Increases for tax positions of prior years	3,277	
Increases for tax positions of current year	342	
Decreases for tax positions of prior years	—	
Settlements	—	
Decreases for lapses in statute of limitations	—	
Ending Balance	<u>\$3,619</u>	<u>\$—</u>

For the years ended December 31, 2010 and 2009, the Company has recognized a liability for uncertain tax positions of \$3,619 and \$0, respectively. The Company's unrecognized tax benefits relate to timing differences. The Company estimates that the unrecognized tax benefit will decrease by \$0 - \$3,619 within the next twelve months. As of December 31, 2010 and 2009, no amount of the uncertain tax benefit, if recognized, would impact the effective tax rate.

The Company's policy is to recognize interest and penalties accrued on any unrecognized tax benefits as a component of income tax expense. During the years ended December 31, 2010 and 2009, the Company recognized no interest and penalties.

The Company files income tax returns in the U.S. federal jurisdiction as well as multiple state jurisdictions. The Company is not currently under examination by the IRS. Various federal, state and local tax returns remain open to examination. The Company believes that any potential assessment would be immaterial.

11. Related Party Transactions

The building in which the Company maintains its headquarters is leased from a limited liability company in which the Chief Executive Officer, two other Directors and one other former officer own significant interests as non-controlling members. In June 2008, additional office space was obtained by the Company in the leased building through an amendment to the existing lease agreement with the landlord. In June 2008, the Company entered into a lease agreement for additional office space to be used as its training facility which is located in a building adjacent to the Company's headquarters. The second building is also owned by a limited liability company in which the Chief Executive Officer, two other Directors and one other former officer own significant interests as non-controlling members. Under the terms of this agreement, the Company made rent payments of \$2,361, \$2,016, and \$974 in 2010, 2009, and 2008, respectively.

ALLEGIANT TRAVEL COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

12. Financial Instruments and Risk Management

The Company's debt with a carrying value of \$28,136 and \$42,324 as of December 31, 2010 and 2009, respectively, approximates fair value. These fair value estimates were based on the discounted amount of future cash flows using the Company's current incremental rate of borrowing for similar liabilities.

The carrying amounts of cash, cash equivalents, restricted cash, accounts receivable and accounts payable approximate fair value due to their short term nature.

13. Employee Benefit Plans

401(k) Plan

The Company has a defined contribution plan covering substantially all eligible employees. Under the Plan, employees may contribute up to 90% of their eligible annual compensation with the Company matching up to 5% of eligible employee wages. The Company recognized expense under this plan of \$1,650, \$908 and \$748 for the years ended December 31, 2010, 2009 and 2008, respectively.

Stock-based employee compensation

In 2006, the Board of Directors adopted, and the stockholders approved, a Long-Term Incentive Plan (the "2006 Plan") and reserved 3,000,000 shares of common stock for the Company to grant stock options, restricted stock, SARs and other stock-based awards to certain officers, directors, employees, and consultants of the Company. The 2006 Plan is administered by the Company's compensation committee of the Board of Directors. Upon the merger of Allegiant Travel Company, LLC into Allegiant Travel Company (a Nevada corporation) immediately prior to the Company's initial public offering, all outstanding stock options under the previously adopted share option program (the "Share Option Program") were transferred to the 2006 Plan. In addition, no further option grants may be made under the predecessor company's Share Option Program. The transferred options continue to be governed by their existing terms, unless the compensation committee elects to extend one or more features of the 2006 Plan to those options. The shares of common stock reserved for issuance of stock-based awards under the 2006 Plan include 500,000 shares that were transferred from the Share Option Program.

For the years ended December 31, 2010, 2009 and 2008, the Company recorded \$4,437, \$3,109 and \$1,702, respectively, of compensation expense in the consolidated statements of income related to stock options, SARs and restricted stock. As of December 31, 2010, there was \$2,140 of unrecognized compensation cost related to nonvested stock options and SARs, net of estimated forfeitures of 2.0%. As of December 31, 2010, there was \$3,602 of unrecognized compensation cost, net of estimated forfeitures of 5.0%, related to nonvested restricted stock. The cost related to nonvested stock options and SARs is expected to be recognized over a weighted-average period of 1.88 years. The cost related to nonvested restricted stock is expected to be recognized over a weighted-average period of 2.38 years.

ALLEGIANT TRAVEL COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

13. Employee Benefit Plans (Continued)

Stock options and SARs

The fair value of stock options and SARs granted was estimated as of the grant date using the Black-Scholes option-pricing model with assumptions noted in the table below. No stock options or SARs were granted during 2010.

	<u>2009</u>	<u>2008</u>
Weighted-average volatility	42.34%	32.79%
Expected term (in years)	3.5	3.5
Risk-free interest rate	1.33%	2.56%
Expected dividends	—	—

Expected volatilities for the awards issued in 2009 and 2008 were based on the historical volatilities from publicly traded airline companies of the Company's peer group due to the Company's lack of historical information. Expected term represents the weighted average time between the award's grant date and its exercise date. The Company used the simplified method from accounting guidance for companies with a limited trading history, to estimate the expected term of the 2009 and 2008 award grants. The risk-free interest rate for periods equal to the expected term of the award is based on a blended historical rate using Federal Reserve rates for U.S. Treasury securities. The contractual terms of the Company's stock option and SAR awards granted range from five to ten years.

A summary of option and SARs activity under the 2006 Plan as of December 31, 2010, and changes during the year then ended is presented below:

	<u>Options and SARs</u>	<u>Weighted Average Exercise Price</u>	<u>Weighted Average Remaining Contractual Life (Years)</u>	<u>Aggregate Intrinsic Value</u>
Outstanding at January 1, 2010	745,000	\$32.07		
Granted	—	\$ —		
Exercised	(118,834)	\$26.14		
Forfeited	(57,333)	\$32.39		
Outstanding at December 31, 2010	<u>568,833</u>	<u>\$33.18</u>	3.49	\$9,135,458
Fully vested and expected to vest at December 31, 2010	<u>558,956</u>	<u>\$33.20</u>	3.49	\$8,965,660
Exercisable at December 31, 2010	<u>235,502</u>	<u>\$31.90</u>	3.88	\$4,083,605

No options or SARs were granted during the year ended December 31, 2010. The weighted average fair value per share of awards granted during the years ended December 31, 2009 and 2008 was \$12.44 and \$5.80, respectively. During the years ended December 31, 2009 and 2008, the total intrinsic value of options exercised was \$2,917 and \$4,330, respectively. Cash received from option exercises for the years ended December 31, 2010, 2009 and 2008, was \$3,157, \$1,742 and \$1,040, respectively. The actual tax benefit realized for the tax deductions from these option exercises totaled \$1,081, \$1,067 and \$1,568, respectively.

13. Employee Benefit Plans (Continued)

Restricted stock awards

A summary of the status of the Company's nonvested restricted stock grants during the year ended December 31, 2010 is presented below:

	<u>Shares</u>	<u>Weighted Average Grant Date Fair Value</u>
Nonvested at January 1, 2010	42,076	\$36.09
Granted	94,000	\$52.44
Vested	(21,473)	\$34.55
Forfeited	<u>(8,333)</u>	<u>\$52.96</u>
Nonvested at December 31, 2010	<u>106,270</u>	<u>\$49.60</u>

The weighted average grant date fair value per share of restricted stock grants during the years ended December 31, 2010, 2009 and 2008 was \$52.44, \$38.31 and \$22.43, respectively. The total fair value of restricted stock vested during the year ended December 31, 2010, 2009 and 2008, was \$899, \$1,605 and \$1,382, respectively. The actual tax benefit realized from the tax deductions from the restricted stock vested totaled \$327, \$587 and \$500, respectively.

14. Selected Quarterly Financial Data (Unaudited)

Quarterly results of operations for the years ended December 31, 2010 and 2009 are summarized below.

	<u>March 31</u>	<u>June 30</u>	<u>September 30</u>	<u>December 31</u>
2010				
Operating revenues	\$169,637	\$168,350	\$163,621	\$162,033
Operating income	36,245	28,081	19,480	20,850

(Dollars in thousands except share and per share amounts)

14. Selected Quarterly Financial Data (Unaudited) (Continued)

The sum of the quarterly earnings per share amounts does not equal the annual amount reported since per share amounts are computed independently for each quarter and for the full year based on respective weighted-average common shares outstanding and other dilutive potential common shares.

15. Commitments and Contingencies

The Company is subject to certain legal and administrative actions which management considers routine to its business activities. Management believes after consultation with legal counsel, the ultimate outcome of any pending legal matters will not have a material adverse impact on the Company's financial position, liquidity or results of operations.

The Company entered into purchase agreements for 20 MD-80 aircraft during the fourth quarter of 2009. As of December 31, 2010, the Company had placed seven of these aircraft into revenue service. The Company expects to place eight of the remaining aircraft into revenue service to support growth through 2013. As of December 31, 2010, the remaining contractual obligations under these purchase agreements totaled \$5,427. In January and February 2011, the Company made payment of \$4,127 on aircraft purchase obligations under these purchase agreements for MD-80 aircraft. As of March 1, 2011, the Company took possession of all the MD-80 aircraft under purchase agreements with the remaining obligations of \$1,300 to be paid later in 2011 in accordance with the terms of these agreements.

In March 2010, the Company entered into a purchase contract for six Boeing 757-200 aircraft with delivery dates in 2010 and 2011. The Company expects these aircraft to be added to the Company's operating fleet in 2011 and 2012. As of December 31, 2010, the remaining contractual obligations under the purchase agreement was \$39,100. In February 2011, the Company made payment for one Boeing 757-200 aircraft under the existing purchase agreement. As a result of this purchase, the remaining obligations under this purchase contract is \$29,325, to be paid upon delivery of the remaining aircraft during 2011. In conjunction with taking ownership of the aircraft, the Company leased out the aircraft to a third party. The lease term commenced with delivery of the aircraft to the third party at the time payment was made by the Company. The Company intends to take possession of the aircraft at the end of the lease term in the summer of 2012.

16. Subsequent Events

In March 2011, the Company borrowed \$7,000 under a loan agreement secured by one Boeing 757-200 aircraft purchased in February 2011. The note payable issued under the loan agreement bears interest at 6.28% per annum and is payable in monthly installments through March 2015. The Company's contractual obligations for principal payments and scheduled interest payments attributable to the issued note payable are \$1,487 in 2011, \$1,982 in 2012, \$1,982 in 2013, \$1,982 in 2014 and \$496 in 2015.

On March 10, 2011, the Company borrowed \$125,000 under a senior secured term loan facility (the "Term Loan"). The Term Loan matures on March 10, 2017 and bears interest based on the London Interbank Offered Rate ("LIBOR") or prime rate with interest payable quarterly or more frequently until maturity. The Term Loan is secured by all property and assets of the Company with

ALLEGIANT TRAVEL COMPANY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)
For the years ended December 31, 2010, 2009 and 2008
(Dollars in thousands except share and per share amounts)

16. Subsequent Events (Continued)

certain exceptions. The Term Loan contains a maximum leverage covenant for the Company. Affirmative and negative covenants also relate to maximum annual capital expenditures and limitations on indebtedness, liens, sale and leaseback transactions, guarantees, mergers and acquisitions, asset sales, restricted payments, transactions with affiliates and investments. In addition to quarterly principal payments equal to 0.25% of the initial loan, the Term Loan also provides for mandatory and optional prepayment provisions. The Company's contractual obligations for principal payments on the Term Loan are \$938 in 2011, \$1,250 in 2012, \$1,250 in 2013, \$1,250 in 2014, \$1,250 in 2015 and \$119,062 thereafter. In connection with the borrowing under the Term Loan, the Company made early payment in February 2011 of all existing debt obligations secured by its MD-80 aircraft. These payments consisted of \$6,101 in debt obligations secured by eight aircraft due in April 2012, \$6,253 in debt obligations secured by three aircraft due in November 2011, \$1,398 in debt obligations secured by two aircraft due in June 2011 and \$329 in debt obligations secured by four aircraft due in February 2011. Proceeds from the Term Loan will also be used for the funding of future capital expenditure programs and general corporate purposes.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Evaluation of disclosure controls and procedures. As of the end of the period covered by this report, under the supervision and with the participation of our management, including our chief executive officer (“CEO”) and chief financial officer (“CFO”), we evaluated the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended, or the “Exchange Act”). Based on this evaluation, our management, including our CEO and CFO, has concluded that our disclosure controls and procedures are designed, and are effective, to give reasonable assurance that the information we are required to disclose is recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms. Based upon this evaluation, the CEO and CFO concluded that our disclosure controls and procedures are effective in providing reasonable assurance that information required to be disclosed in our reports filed with or submitted to the SEC under the Exchange Act is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

Management’s Annual Report on Internal Control over Financial Reporting. Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- 1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- 2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- 3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

The effectiveness of our or any system of controls and procedures is subject to certain limitations, including the exercise of judgment in designing, implementing and evaluating the controls and procedures, the assumptions used in identifying the likelihood of future events, and the inability to eliminate misconduct completely. Our management, including our CEO and CFO, does not expect that our disclosure controls and procedures or our internal controls will prevent all errors and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within our company have been detected.

Our management has assessed the effectiveness of our internal control over financial reporting as of December 31, 2010. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO”) in Internal

Control—Integrated Framework. Based on our assessment, management has concluded that, as of December 31, 2010, our internal control over financial reporting was effective based on those criteria.

Ernst & Young, LLP, the independent registered public accounting firm who audited our consolidated financial statements included in this Form 10-K, has issued a report on the Company's internal control over financial reporting, which is included herein.

Changes in internal controls. There were no changes in our internal control over financial reporting that occurred during the fourth quarter of our year ended December 31, 2010, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

Not applicable.

PART III

Item 10. Directors, Executive Officers, and Corporate Governance

The information required by this Item is incorporated herein by reference to the data under the headings "ELECTION OF DIRECTORS," "EXECUTIVE OFFICERS" and "Section 16(a) Beneficial Ownership Reporting Compliance" in the Proxy Statement to be used in connection with the solicitation of proxies for our annual meeting of stockholders to be held June 14, 2011, which Proxy Statement is to be filed with the Commission.

Item 11. Executive Compensation

The information required by this Item is incorporated herein by reference to the data under the headings "EXECUTIVE COMPENSATION" and "REPORT OF THE COMPENSATION COMMITTEE" in the Proxy Statement to be used in connection with the solicitation of proxies for our annual meeting of stockholders to be held June 14, 2011, which Proxy Statement is to be filed with the Commission.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item is incorporated herein by reference to the data under the heading "STOCK OWNERSHIP" in the Proxy Statement to be used in connection with the solicitation of proxies for our annual meeting of stockholders to be held June 14, 2011, which Proxy Statement is to be filed with the Commission. The information required by this item with respect to securities authorized for issuance under our equity compensation plans is included in Part II, Item 5 of this Annual Report on Form 10-K.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item is incorporated herein by reference to the data under the heading "RELATED PARTY TRANSACTIONS" and "Director Independence" in the Proxy Statement to be used in connection with the solicitation of proxies for our annual meeting of stockholders to be held June 14, 2011, which Proxy Statement is to be filed with the Commission.

Item 14. Principal Accountant's Fees and Services

The information required by this Item is incorporated herein by reference to the data under the heading "PRINCIPAL ACCOUNTANT FEES AND SERVICES" in the Proxy Statement to be used in connection with the solicitation of proxies for our annual meeting of stockholders to be held June 14, 2011, which Proxy Statement is to be filed with the Commission.

PART IV
