

11007233

MINERALS TECHNOLOGIES INC.

GROWTH & PERFORMANCE

New Markets, New Technology

MTI

Minerals Technologies Inc. is a resource- and technology-based company that develops, produces and markets worldwide a broad range of specialty mineral, mineral-based and synthetic mineral products and related systems and services. The Company has two reportable segments: Specialty Minerals and Refractories. The Specialty Minerals segment produces and sells the synthetic mineral product precipitated calcium carbonate (PCC) and the processed mineral product quicklime (lime), and mines, processes and sells other natural mineral products, primarily limestone and talc. This segment's products are used principally in the paper, building materials, paint and coatings, glass, ceramic, polymer, food and pharmaceutical industries. The Refractories segment produces and markets monolithic and shaped refractory materials and specialty products, services and application equipment used primarily by the steel, non-ferrous metal and glass industries.

The Company emphasizes research and development. By developing and introducing technologically advanced new products, the Company has been able to anticipate and satisfy changing customer requirements, and to create market opportunities through new product development and product application innovations.

Millions of Dollars, Except Per Share Data	December 31, 2010	December 31, 2009

D: Canada/Latin America	6.9%	\$ 68.9

Dear Shareholders:

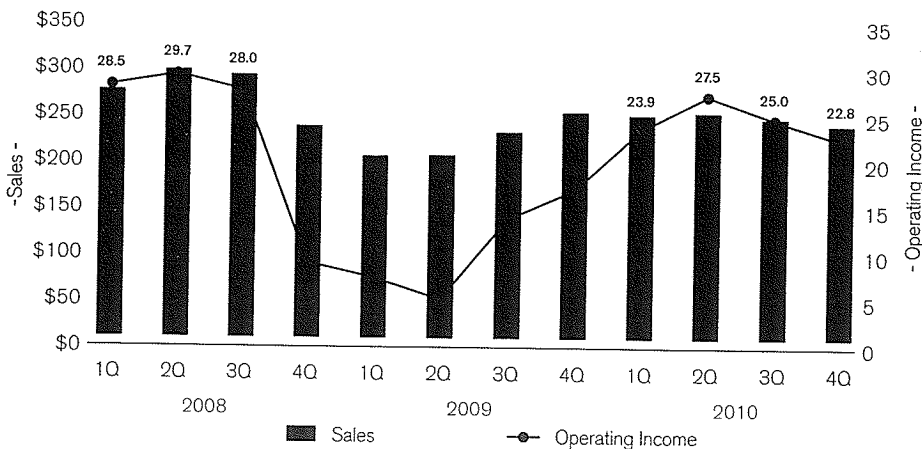

In 2010, Minerals Technologies achieved, thanks to the hard work and full engagement of all employees, the highest earnings in its eighteen year history. Our operating income was \$99 million, a more than 120-percent increase over 2009, and our earnings per share were \$3.58. We also returned to the \$1 billion level in sales—a more than 10-percent increase.

Two-thousand ten was clearly a turnaround year for MTI. After the downturn in late 2008 and the recession of 2009, we benefited in 2010 through some improvement in the economic environment in our major end markets of paper, steel, construction and automotive. Although the recovery was somewhat sluggish and our end markets in paper and steel remained 15 to 20 percent below pre-recession levels, we were able to make improvements on almost all fronts.

The most dramatic turnarounds came from our Refractories and Processed Minerals product lines, both of which showed impressive profitability after suffering losses in 2009. These operating units benefitted from some economic expansion, however, significant productivity improvements through our Operational Excellence/Lean initiatives, along with solid expense control and the full impact of our restructuring in 2009, also contributed to their rebound.

During the year we also continued to execute our key strategies of growth through geographic expansion, new product development and M&A. We were able to ramp up production of a new PCC satellite in India and also secured four new satellite contracts, three of which were also in India.

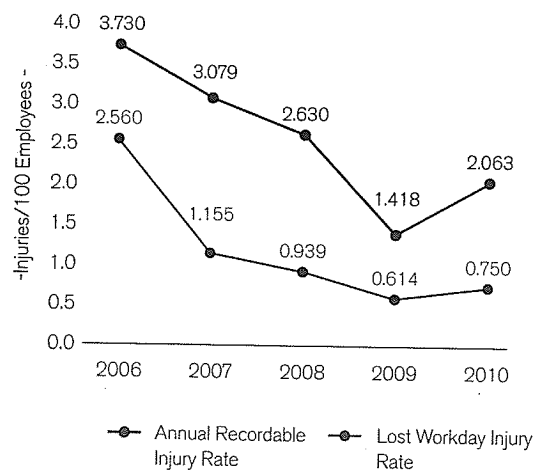

Expansions were also announced in Thailand and Brazil. More than 300,000 tons of new business will be brought in over time through these developments.

Growth in our Paper PCC business—particularly in Asia—has been a major point of focus for us, and the 2010 successes are clear and tangible evidence of our potential there as our efforts over the last several years are gaining solid traction. We continued to put major emphasis on Asia by adding technical and development resources there as well as redeploying North American and European personnel to capture these growth opportunities.

Safety: Historical Injury Rates
(Injuries/100 Employees)

Our reinvigorated new product development pipeline also yielded new successes and wins as we announced in October that we were launching a new product platform called Fullfill™—a portfolio of new PCC products, one of which, Fullfill™ E-325 was commercialized in Asia. This technology provides papermakers with the opportunity to increase filler levels of between three to five points which translates into a 15- to 25-percent PCC usage increase and significantly reduces their costs as proportionately less fiber is used. The Fullfill™ portfolio of high filler technologies offers papermakers a wide range of products and options to increase filler content and reduce cost while achieving their targeted paper quality and specification requirements. During 2011, we will be targeting paper companies at more than 20 of our 50-plus satellites to introduce and trial these new products. Our Filler-Fiber Composite product is also a part of the Fullfill™ platform under the name Fullfill™ F Series. This product remains under development with an Asian papermaker as we also continue commercialization discussions with a European papermaker.

In addition to the new offerings we are introducing through the Paper PCC business, we have clearly also reinvigorated the new product development

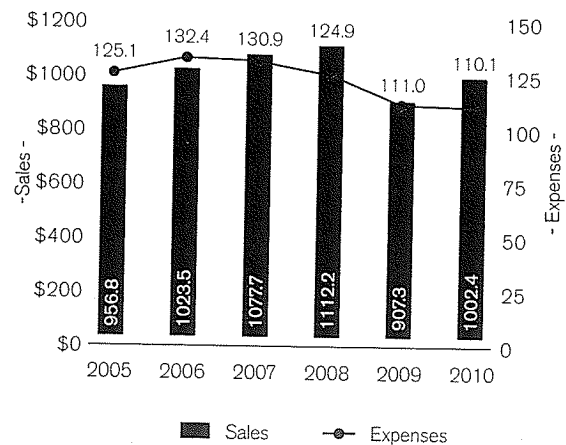

process across all product lines. Today we have about 50 new ideas in various stages of development company-wide with a number of them now in the commercialization stage. Our new product pipeline is healthy and we continue to add to it.

Our efforts in Operational Excellence and safety have also been an integral part of MTI's transformation and overall turnaround. Our manufacturing base is much stronger and as a result, we are able to make changes, introduce new products, as well as expand and grow in a much faster and effective manner. Continuous improvement is clearly becoming a norm of our MTI culture as evidenced by the more than 600 Kaizen events held in 2010 across the globe. Kaizens are learning, change and standardization events where our employees engage as teams to intensely review a process and develop more efficient and safer ways to run and manage it. More than 130,000 employee hours (60 hours per employee) were involved in this learning and improving process last year. The result in improved productivity is evidenced by the more than 20-percent increase in sales per employee per year over the last three years—from \$370,000 in 2007 to \$450,000 in 2010.

Return on Capital*

* Bloomberg Method (Annualized)
 Excludes special items

Expense reduction continued to be a point of focus for us through the year, as well. We were able to increase our sales by almost \$100 million while holding expenses relatively flat. Over the last four years the company has been able to reduce expenses by \$40 million.

Making MTI a very safe place to work has been a major objective since I have been with the company, and although 2010 safety performance was not quite as strong as 2009, we still had relatively good performance as it was the second best in company history as measured by injuries per 200,000 hours worked. In 2010, we had 55 locations with no recordable injuries and over the last four years we have reduced our lost workday injury rate by 75 percent. This is a continuous improvement effort for everyone in the company as we strive towards a zero-injury environment.

Our balance sheet remained solid, with \$385 million in cash and short-term investments and just less than \$100 million of debt. Cash flow from operations was \$142 million and we continued to improve our working capital efficiencies. The company also repurchased \$30 million, or 529,620 shares, during the year. Most significantly, we were also able to increase our Return on Capital to 8.3 percent, the highest the company has recorded in eight years.

In summary, 2010 was a year of not only a strong financial-performance rebound but one in which we continued with transforming the company. Today, we truly are a different company. We have become a strong operating company that is better focused and more disciplined with a very aligned and results-oriented leadership team. We are closer to our customers today and we are providing them with more value by improving our manufacturing efficiencies and quality as well as by offering more value-added products. From a shareholder value standpoint, we are well positioned for future growth through our key growth strategies of geographic expansion, new products and acquisitions. We are also committed to continued effective use of our strong cash position and projected strong

future cash flow through a balanced approach to maximizing shareholder value, which includes our share repurchase program in addition to funding future organic growth and acquisitions.

2011 and Beyond: Growth Targets

With the company now operating from a stronger foundation from which to grow, I would like to share what we are targeting for growth over the next five years. Our strategic objectives include increasing sales from our current levels to between \$1.4 to \$1.5 billion, which represents a compound growth rate of eight percent per year. We are also targeting to improve our operating margins by 20 percent and bringing our Return on Capital up to 12 percent by 2015.

The path and strategies for achieving these objectives are based upon four avenues of organic growth:

- Geographic Expansion of Paper PCC
- New PCC Products
- New Products for Refractories and Performance Minerals
- Economic Recovery in the Base Business

Asia is the primary focus for geographic growth in our PCC business. We are targeting \$150 to \$200 million in sales growth in the region by 2015, which represents two-and-half to three times current sales of a little more than \$100 million. Today, Asia represents 11 percent of the company's sales, and we expect it to become closer to 20 percent of our sales.

We believe that growth there will be enabled by two major factors:

1. The rate of GDP growth in China and India
2. The rate of PCC penetration in China and India paper production.

The ongoing economic growth in both China and India will continue to drive higher per-capita paper consumption. Given that PCC usage in paper is relatively low in those countries, seven percent and four percent respectively, when compared to the US and Europe, which are in the high teens, we expect that as papermakers there respond to not only increased demand levels but also to increased domestic consumer quality requirements and export quality specifications, the need for our products will also increase. Our PCC products are designed to help papermakers achieve world class level quality at the lowest possible cost.

We expect the contribution from our new PCC products to be significant as the new Fulfill™ product platform should provide more than \$200 million in annual revenue in five years. The breakdown is for series E to contribute \$75 million, Series V another \$50 million and the Fulfill™ F series (our Filler-Fiber Composite) at around \$100-plus million. We also have other products in our development pipeline that have the potential to yield \$100 million in revenue over time.

Organic Growth Potential

	2010		2015 Targets
Revenue	\$1.0B	7.0-8.5% CAGR	\$1.4B-\$1.5B
Operating Margin	10%	40 bps/yr	12%
EBITDA%	16%	40 bps/yr	18%
ROC	8.3%	75 bps/yr	12%+

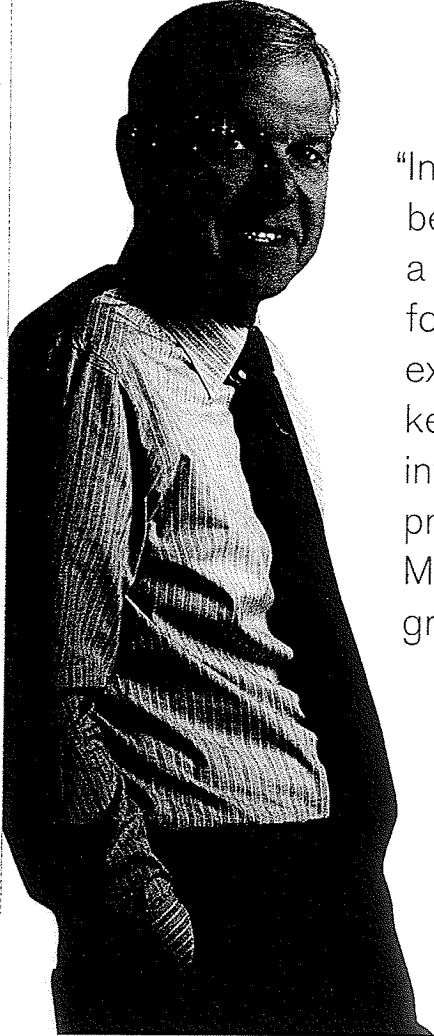

"Our PCC products are
designed to help papermakers
achieve world-class level quality
at the lowest possible cost."

In addition to our PCC products, we have new products in the Refractories segment and our Performance Minerals business unit that will contribute to our growth. In Refractories, our solid-core calcium wire has significant potential to grow in China and India and the segment also has new laser measuring devices that are being commercialized. The Performance Minerals business has begun penetrating new markets for talc, ground calcium carbonate, and Specialty PCC products. In addition, we believe that our Refractories and Performance Minerals businesses will return to pre-recession levels, which are expected to add \$100 million in revenue to our current sales.

We do not anticipate that this projected growth will be linear. In the early years, the rate of new PCC product introductions is expected to be slow and the growth curve somewhat shallow because of the trials needed at each paper mill. Increasing PCC penetration in China also requires significant missionary and development work with papermakers, similar to what we have been doing in India. Successes and experience in both of these areas over the next 12 to 18 months will give us a much better sense of how fast we can actually penetrate, which will determine the actual shape of that growth curve.

With these targets and initiatives in mind, it is clear that 2011 will be a pivotal year for MTI. We will continue to face many challenges within the worldwide economic and social environment. However, we do see a relatively stable, although not necessarily a strong recovery in the U.S. and European markets. In addition to our organic growth strategies we will also continue to pursue our acquisition strategy, which primarily targets technology-based minerals companies that are in less cyclical industries and market segments such as environmental, energy and consumer products. In 2011, we will be operating from a much stronger foundation to execute our key initiatives, introduce our new products and put MTI back onto a growth track. With a rejuvenated new product pipeline, growing strength in Asia, combined with strong operating leadership, employee engagement, and continued customer focus, I expect us to be on a strong upward track in 2012.

"In 2011, we will be operating from a much stronger foundation to execute our key initiatives, introduce our new products and put MTI back onto a growth track."

Joseph C. Muscari
Chairman & Chief Executive Officer

Growth & Performance: New Markets, New Technology

With our major businesses serving the paper, steel, construction, and automotive industries, it's fair to say that Minerals Technologies' growth is closely tied to, and to some degree reflects, the growth of the world's infrastructure and the vitality of global industry sectors. While closely aligned with these sectors, we will not rely on their growth for our own. Each of the company's three businesses pursues its own unique strategy of expanding market share and expanding markets within its client industries and catalyzing growth through the aggressive marketing of leading-edge products and services. This is truer today than at any time in MTI's history.

The top-to-bottom transformation we started four years ago has converted a loose framework of disconnected business units into a high-performance company with three well-oiled moving parts: Paper PCC, Performance Minerals, and Minteq. In 2010, we continued to transform the organization that leverages corporate resources, eliminates unproductive silos and allows underutilized assets from one business unit to be used elsewhere. Today, standard work, a critical aspect of our companywide Operational Excellence/Lean deployment, is the norm for all major processes at MTI's three businesses.

Our business lines benefit from a strong, experienced management team with clear alignment on corporate objectives; MTI managers recognize that growth is not just a matter of finding new markets, but of finding more efficient platforms for penetrating and serving those markets. Advanced metrics expedite decisions about fast-arising opportunities. We have also developed a tighter discipline around spending: Investment is concentrated in business areas where we have clear sight-lines to enhanced and added value. The net effect is, simply, a more productive, transparent company.

Thanks to a holistic emphasis on "voice of the customer," each of our business units has grown more intimately familiar with its customers' needs, and focuses on competitive differentiators that target those needs at a high level. This superior market knowledge drives the customized Research & Development that has once again emerged as the backbone of the company: Today, there are almost 50 new projects in various stages of development in a rejuvenated product pipeline that, three years ago, had nearly run dry.

Collectively our businesses are coming off a record year in which they rebounded strongly despite the lingering aftershocks of the recession. All three were effective at finding profitable opportunities within generally weak global economies. Combined with an unrelenting emphasis on Operational Excellence/Lean principles, their untiring sales efforts enabled MTI to triple operating income, and provide ample reason for optimism about future growth.

Paper PCC

Since revolutionizing the way paper was made in North America nearly three decades ago, MTI's Paper PCC business has built itself into a key industry partner. By taking on the papermaker's challenges as its own and animating the industry's quest for enhanced performance at reduced cost, Paper PCC's in-house innovation is at the vanguard of paper-filling technology. The company has more than three dozen crystal morphologies to satisfy the individual papermaker's filling and coating requirements.

Minerals Technologies is the world's leading supplier of precipitated calcium carbonate, a specialty pigment for filling and coating high-quality papers. By substituting PCC for more expensive wood pulp, customers can produce better, brighter paper at lower cost, and also can more easily provide specific characteristics to the paper sheet.

The satellite concept for manufacturing and delivering PCC on-site at paper plants was developed in 1982 and launched at a paper mill in Wisconsin in 1986. Today, the satellite business model has grown into a network of more than 50 dedicated facilities at the world's premier paper companies in 17 countries.

During the past year, MTI's Paper PCC business secured four new satellite contracts—three in the fast-emerging market in India and one in the United States—while also committing to plant expansions in Brazil and Thailand. Over time, these projects will bring in 300,000 tons of new business, 100,000 tons of which should be realized by 2012. Once on line, these ventures will bring MTI's total Asia presence to 12 satellites.

Major points of focus for our growth strategy are geographic expansion of our PCC product line—especially in Asia—and new products.

The upside potential afforded by the Asian market, primarily China and India, is impressive, as measured by the anticipated GDP growth that will drive higher paper consumption and the penetration of PCC usage in paper.

GDP growth: Today the per capita consumption rate of paper is 60 kilograms in China and nine kilograms in India. As the economies of these two countries grow, they will begin to approach the higher paper consumption in developed countries like the United States, where per capita paper consumption is 260 kilograms, or Japan's at 240 kilograms.

PCC penetration: In China, the total ratio of filler to pulp in all freesheet paper now produced is about seven percent, while it is about four percent in India—both well below North America's approximate 18 percent. MTI projects that the Chinese filler-to-pulp ratio will grow from seven percent to between 10 and 14 percent, while that growth in India is expected to be from four percent to between seven and 11 percent.

The combination of GDP growth and PCC penetration would represent about 1.9 million tons of additional PCC used annually in China and 400,000 tons in India. MTI expects to capture half of that growth.

Moreover, a good deal of current Chinese paper capacity still resides in smaller, local mills. China will be shutting down these older, smaller machines and phasing in massive, modern ones. As a rule, the larger the mill, the more it benefits from high-quality filling products, and the more it lends itself to the satellite mode of delivery. Today in Asia, MTI PCC competes against other filler pigments such as ground calcium carbonate, kaolin clay and chalk. These are the types of fillers MTI has been able to displace with PCC as we grew our business during the 90's.

China's modernization thus makes MTI's value proposition attractive on two levels, providing the basis for increasing our presence in Asia and targeting high levels of sales there in the coming years. Paper PCC will provide the majority of an expected tripling of company sales into Asia by 2015.

Minerals Technologies is the world's leading supplier of precipitated calcium carbonate, a specialty pigment for filling and coating high-quality papers.

Aggregating all forms of expected PCC revenue in Asia, we project sales increases of between \$150 million and \$200 million over five years, driven not just by GDP growth but also by the increased ratios of PCC to pulp that we expect from the Fulfill™ brand at full roll-out.

Another part of the company strategy is to use geographical expansion as a natural vehicle for introducing technological breakthroughs as they emerge from our revitalized product pipeline. Accordingly, one of our Asian agreements represents the first commercialization of the new Fulfill™ technology platform of PCC products, announced in October 2010.

A critical cornerstone objective is to generate greater savings for our papermaking customers by increasing the amount of PCC filler used, especially in uncoated freesheet paper. At full commercialization, the Fulfill™ brand will provide a twin profitability boost, enabling us to supply papermakers with higher fill percentages of a higher-margin product. These higher fill amounts range from incremental gains of 15- to 25-percent to a potential doubling in the percentage of filler.

The products under the Fulfill™ umbrella are:

Fulfill™ A, which offers minor modifications in size, shape, and application methods to the current PCC technology, delivering one or two points of additional filler while maintaining or improving paper quality.

The **Fulfill™ E** series is based on a chemistry and formulation engineered to deliver three to five points, or 15- to 25-percent, of added PCC volume to the paper sheet. The product that we have commercialized with an Asian customer is a specific technology known as Fulfill™ E-325, which incorporates a unique chemical additive of which MTI is the exclusive global licensee.

Minerals Technologies anticipates trialing the **Fulfill™ V** series of products in 2011, which has demonstrated the potential to produce acceptable paper at PCC levels up to nine points higher or 15- to 25-percent in increased PCC usage.

Products in Fulfill™ series A, E and V should have relatively quick ramp-ups.

Our filler-fiber composite program—now rolled into the Fulfill platform as **Fulfill™ F**—is in trials with an Asian papermaker and remains under commercial discussion with a European customer. Fulfill™ F is a truly disruptive technology that could nearly double the amount of PCC in paper—for example, from a current average of 15 to 18 percent to more than 30 percent. Further, the F series shows promise for use in combination with other technologies in the Fulfill™ platform.

MTI expects the more revolutionary elements of the Fulfill™ portfolio to yield in excess of \$200 million in annual revenue within five years with series E contributing \$75 million; series V, \$50 million; and series F an estimated \$100 million or more by 2015.

In addition to the Fulfill™ series of PCC products, MTI's revitalized new product pipeline has other products in final stages of development that could provide additional PCC sales. These new products will be announced when they are commercialized. The company expects its new PCC products to provide sufficient growth to largely offset any attrition in the mature markets of the US and Europe: penetration-by-innovation, if you will.

In addition to the Fulfill™ series of PCC products, MTI's revitalized new product pipeline has other products in final stages of development that could provide additional PCC sales.

Minteq

Since its inception, MTI's refractory business, Minteq, has worked from a straightforward premise: In a capital-intensive, equipment-driven business like steel making, excessive downtime is an unacceptable drain on a manufacturer's bottom line. Through an innovative and ever-improving menu of products and services, the Refractories business simplifies and streamlines repairs and maintenance, thus keeping steel makers online longer. Minteq's minerals-based monolithic refractory materials offer exceptional resistance to high-operating temperatures. Minteq's Ferrotron laser measuring equipment facilitates more exacting metrics in refractory-lining maintenance along with improved steel-worker safety. Minteq solid-core metallurgical wire offers a complete and unrivaled system to optimize steel making when injected into ladles through its proprietary lance feeder technology. The latter method offers improved steel quality and more effective thin-slab steel casting through industry-high calcium recovery percentages along with the lowest cost-per-ton of any such treatment available. Minteq is constantly exploring new products and services that can be spun off established competencies.

Minteq achieved a strong comeback in 2010, generating operating income of \$28 million—an overall income swing of \$35 million from 2009.

Steel utilization rates tracked higher than during the recessionary trough, and sales in metallurgical wire were particularly strong, jumping 36 percent over 2009. Minteq also derived the full-year benefits from 2009's restructuring as well as productivity gains above 10 percent linked to MTI's aggressive, company-wide initiatives in Operational Excellence.

These efficiencies helped Minteq post significant progress in operating income despite lagging markets in construction and automotive manufacturing. Recent improvements aside, North American steel production remains 21 percent below pre-recession levels; European rates are off by about 17 percent.

Still, we are optimistic that as the global recovery takes its course, volumes in refractory and metallurgical product lines will improve, as will sales of Ferrotron equipment. Minteq holds a very strong position in North American basic oxygen furnaces, a foothold that gives us a solid platform from which to launch expansions through a broader array of complementary products and services.

Minteq achieved a strong comeback in 2010, generating operating income of \$28 million—an overall income swing of \$35 million from 2009.

As is true throughout MTI, Minteq strives for steady improvement in processes and standard work in order to continuously remove waste from our operations. Every resource is brought to bear to ensure repeatability of product with minimal variation.

Recognizing that pricing stability, market share and ultimate profitability are all linked to the containment of materials costs, Minteq assigns a top priority to finding a long-term solution to the cost of magnesium oxide (MgO) in particular, the primary raw material in refractory production. For 2011, Minteq has signed a supply agreement with an alternative MgO source outside China to limit exposure to the extreme volatility of Chinese pricing. The company continues to explore long-term supplier relationships with others worldwide

while also upgrading the efficiency and output of its Turkish kilns. In the meantime, Minteq is taking proactive steps to mitigate exposure to price increases through product reformulation.

MTI is confident that Minteq plans to use its established and profitable beachhead in India—where steel production is expected to double over the next five years—for further developing its growth model across all product lines. Despite some prior setbacks at implementing its value-added model in China, Minteq, in 2010, enjoyed success across all product lines and in cost-per-ton contracts. Minteq also saw growth in China in other iron and steel applications, such as blast-furnace repairs and maintenance.

Metallurgical wire products are a special bright spot in Minteq's reinvigorated Asian campaign. During 2010, Minteq developed a distribution agreement with a Chinese company that stands to generate a baseline of \$25 million in incremental sales penetration over the next three years.

Minteq also plans to achieve greater geographic reach with its Ferrotron equipment, especially by targeting adjacencies in the casting and forging segments. Between Minteq's core refractory strengths and the growing diversity of its product lines, the company is confident that Minteq will regain and surpass pre-recession profitability levels.

Performance Minerals

In terms of public visibility, Performance Minerals might be considered MTI's stealth business—low key but delivering an impressive payload. The typical consumer would be surprised at how often in the course of daily living he or she encounters a product that depends on Performance Minerals' materials: from the calcium in foods and antacids, to the plastic bags in which those purchases are placed, to the dashboards and interior panels of the cars in which the bags are driven home, to the cement inside the garages where the cars are parked, and so on. Performance Minerals mines, processes and sells customized formulations of limestone, talc and specialty PCC products for use in construction, automotive, glass and ceramics, and foods and pharmaceuticals, as well as a burgeoning roster of opportunistic applications.

In 2010, Performance Minerals managed its best showing in over a decade and its second-best in MTI history. Sales surpassed 2009 levels by 17 percent, or about \$25 million, and operating income improved by approximately \$18 million from the previous year. Sparking the dramatic turnaround was a 31-percent year-over-year growth in talc sales and a seven-percent productivity improvement stemming from achievements in Operational Excellence. Moreover, an impressive 25 percent of Performance Minerals' volume growth came from share gain.

In 2010, Performance Minerals managed its best showing in over a decade and its second-best in MTI history.

Operational Excellence is also critical to the growth and success of Performance Minerals. Internal economies directly fuel market penetration as well as share gain in North America by enabling the business unit to market successfully at greater shipping distances from the plant. It is impossible to discuss the growth of this business as separate from the Lean practices that have become the company's foundation in recent years. Not only did Performance Minerals' 10-percent improvement in efficiency translate directly to \$1.4 million in incremental operating income in 2010, but such initiatives were a prime factor in the \$3 million in new business it booked in late 2009 and 2010.

Kaizen event deployment has proved invaluable at breaking production bottlenecks and improving processes at Performance Minerals. (Kaizen events—during which employees intensely review a process to make it more efficient, safe, more reliable and lower cost—are an integral part of Operational Excellence at MTI.)

Performance Minerals' confidence in the integrity of its internal controls, manufacturing processes and standard work practices enables it to seize opportunities where others might be hesitant to step in.

The business unit has made particular inroads in such staple products as baby formula and chewing

Not only did Performance Minerals' 10-percent improvement in efficiency translate directly to \$1.4 million in incremental operating income in 2010, but such initiatives were a prime factor in the \$3 million in new business it booked in late 2009 and 2010.

gum. The bulk of the technical leadership in this area is provided by facilities at Adams, Massachusetts, Lifford, England, and Barretts, Montana.

Performance Minerals also strives to capitalize on the growing cultural and legislative traction of global green initiatives. For example, EMforce Bio® and UltraTalc® 609, are intended for bioplastics applications. Bioplastics contain materials produced from naturally occurring renewable sources, such as corn, where the finished parts are biodegradable or compostable. Bioplastics are green alternatives for conventional consumer disposables and packaging applications. EMforce Bio® offers excellent impact resistance and toughness, while UltraTalc® 609 provides stiffness and improves processability. Our minerals provide solutions for bioplastics to maintain performance levels of conventional plastics.

Performance Minerals has demonstrated that the growing diversification of its product pipeline and its ability to adapt advantageously to market changes serve as natural hedges against disruptions in one or more of its traditional markets.

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act.

Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer

Accelerated Filer

Non-accelerated Filer

Smaller Reporting Company

(Do not check if smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes No

The aggregate market value of the voting stock held by non-affiliates of the Registrant, based upon the closing price at which the stock was sold as of June 30, 2010, was approximately \$737 million. Solely for the purposes of this calculation, shares of common stock held by officers, directors and beneficial owners of 10% or more of the outstanding common stock have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes.

As of February 4, 2011, the Registrant had outstanding 18,263,192 shares of common stock, all of one class.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement for its 2011 Annual Meeting of Stockholders are incorporated herein by reference in Part III of this Annual Report on Form 10-K.

PART I

Item 1. Business

Minerals Technologies Inc. (the "Company") is a resource- and technology-based company that develops, produces and markets worldwide a broad range of specialty mineral, mineral-based and synthetic mineral products and supporting systems and services. The Company has two reportable segments: Specialty Minerals and Refractories. The Specialty Minerals segment produces and sells the synthetic mineral product precipitated calcium carbonate ("PCC") and processed mineral product quicklime ("lime"), and mines mineral ores then processes and sells natural mineral products, primarily limestone and talc. This segment's products are used principally in the paper, building materials, paint and coatings, glass, ceramic, polymer, food, automotive and pharmaceutical industries. The Refractories segment produces and markets monolithic and shaped refractory materials and specialty products, services and application and measurement equipment, and calcium metal and metallurgical wire products. Refractories segment products are primarily used in high-temperature applications in the steel, non-ferrous metal and glass industries.

The Company maintains a research and development focus. The Company's research and development capability for developing and introducing technologically advanced new products has enabled the Company to anticipate and satisfy changing customer requirements, creating market opportunities through new product development and product application innovations.

Specialty Minerals Segment

PCC Products and Markets

The Company's PCC product line net sales were \$554.6 million, \$534.7 million and \$605.7 million for the years ended December 31, 2010, 2009 and 2008, respectively. The Company's sales of PCC have been, and are expected to continue to be, made primarily to the printing and writing papers segment of the paper industry. The Company also produces PCC for sale to companies in the polymer, food and pharmaceutical industries.

PCC Products - Paper

In the paper industry, the Company's PCC is used:

- As a filler in the production of coated and uncoated wood-free printing and writing papers, such as office papers;
- As a filler for coated and uncoated groundwood (wood-containing) paper such as magazine and catalog papers; and
- As a coating pigment for both wood-free and groundwood papers.

The Company's Paper PCC product line net sales were \$496.6 million, \$484.6 million and \$547.2 million for the years ended December 31, 2010, 2009 and 2008, respectively.

Approximately 45% of the Company's sales consist of PCC sold to papermakers from "satellite" PCC plants. A satellite PCC plant is a PCC manufacturing facility located near a paper mill, thereby eliminating costs of transporting PCC from remote production sites to the paper mill. The Company believes the competitive advantages offered by improved economics and superior optical characteristics of paper produced with PCC manufactured by the Company's satellite PCC plants resulted in substantial growth in the number of the Company's satellite PCC plants since the first such plant was built in 1986. For information with respect to the locations of the Company's PCC plants as of December 31, 2010, see Item 2, "Properties," below.

The Company currently manufactures several customized PCC product forms using proprietary processes. Each product form is designed to provide optimum balance of paper properties including brightness, opacity, bulk, strength and improved printability. The Company's research and development and technical service staffs focus on expanding sales from its existing and potential new satellite PCC plants as well as developing new technologies for new applications. These technologies include, among others, acid-tolerant ("AT[®]") PCC, which allows PCC to be introduced to the large wood-containing segment of the printing and writing paper market, OPACARB[®] PCC, a family of products for paper coating, and our recently launched Fulfill[™] family of products, a system of high-filler technologies that offers papermakers a variety of efficient, flexible solutions which decrease dependency on natural fibers.

The Company owns, staffs, operates and maintains all of its satellite PCC facilities, and owns or licenses the related technology. Generally, the Company and its paper mill customers enter into long-term evergreen agreements, initially ten years in length, pursuant to which the Company supplies substantially all of the customer's precipitated calcium carbonate filler requirements. The Company is generally permitted to sell to third-parties PCC produced at a satellite plant in excess of the host paper mill's requirement.

The Company also sells a range of PCC products to paper manufacturers from production sites not associated with paper mills. These merchant facilities are located at Adams, Massachusetts; Lifford, England; and Walsum, Germany.

Uncoated Wood-Free Printing and Writing Papers – North America. Beginning in the mid-1980's, as a result of a concentrated research and development effort, the Company's satellite PCC plants facilitated the conversion of a substantial percentage of North American uncoated wood-free printing and writing paper producers to lower-cost alkaline papermaking technology. The Company estimates that during 2010, more than 90% of North American uncoated wood-free paper was produced employing alkaline technology. Presently, the Company owns and operates 17 commercial satellite PCC plants located at paper mills that produce uncoated wood-free printing and writing papers in North America.

Uncoated Wood-Free Printing and Writing Papers – Outside North America. The Company estimates the amount of uncoated wood-free printing and writing papers produced outside of North America at facilities that can be served by satellite and merchant PCC plants is more than twice as large (measured in tons of paper produced) as the North American uncoated wood-free paper market currently served by the Company. The Company believes that the superior brightness, opacity and bulking characteristics offered by its PCC products allow it to compete with suppliers of ground limestone and other filler products outside of North America. Presently, the Company owns and operates 21 commercial satellite PCC plants located at paper mills that produce uncoated wood-free printing and writing papers outside of North America.

Uncoated Groundwood Paper. The uncoated groundwood paper market, including newsprint, represents approximately 20% of worldwide paper production. Paper mills producing wood-containing paper still generally employ acid papermaking technology. The conversion to alkaline technology by these mills has been hampered by the tendency of wood-containing papers to darken in an alkaline environment. The Company has developed proprietary application technology for the manufacture of high-quality groundwood paper in an acidic environment using PCC (AT[®] PCC). Furthermore, as groundwood or wood-containing paper mills use larger quantities of recycled fiber, there is a trend toward the use of neutral papermaking technology in this segment for which the Company presently supplies traditional PCC chemistries. The Company now supplies PCC at about 12 groundwood paper mills around the world and licenses its technology to a ground calcium carbonate producer to help accelerate the conversion from acid to alkaline papermaking.

Coated Paper. The Company continues to pursue satellite PCC opportunities in coated paper markets where our products provide unique performance and/or cost reduction benefits to papermakers and printers. Our Opacarb product line is designed to create value to the papermaker and can be used alone or in combination with other coating pigments. PCC coating products are produced at 8 of the Company's PCC plants worldwide.

Specialty PCC Products and Markets

The Company also produces and sells a full range of dry PCC products on a merchant basis for non-paper applications. The Company's Specialty PCC product line net sales were \$58.0 million, \$50.1 million and \$58.5 million for the years ended December 31, 2010, 2009 and 2008, respectively. The Company sells surface-treated and untreated grades of PCC to the polymer industry for use in automotive and construction applications, and to the adhesives and printing inks industries. The Company's PCC is also used by the food and pharmaceutical industries as a source of bio-available calcium in tablets and food applications, as a buffering agent in tablets, and as a mild abrasive in toothpaste. The Company produces PCC for specialty applications from production sites at Adams, Massachusetts and Lifford, England.

Processed Minerals - Products and Markets

The Company mines and processes natural mineral products, primarily limestone and talc. The Company also manufactures lime, a limestone-based product. The Company's net sales of processed mineral products were \$110.4 million, \$93.7 million and \$110.7 million for the years ended December 31, 2010, 2009 and 2008, respectively. Net sales of talc products were \$44.0 million, \$32.3 million and \$35.9 million for the years ended December 31, 2010, 2009 and 2008, respectively. Net sales of ground calcium carbonate ("GCC") products, which are principally lime and limestone, were \$66.4 million, \$61.4 million and \$74.8 million for the years ended December 31, 2010, 2009 and 2008, respectively.

The Company mines and processes GCC products at its reserves in the eastern and western parts of the United States. GCC is used and sold in the construction, automotive and consumer markets.

Lime produced at the Company's Adams, Massachusetts, and Lifford, United Kingdom, facilities is used primarily as a raw material for the manufacture of PCC at these sites and at some satellite PCC plants, and is sold commercially to various chemical and other industries.

The Company mines, beneficiates and processes talc at its Barretts site, located near Dillon, Montana. Talc is sold worldwide in finely ground form for ceramic applications and in North America for paint and coatings and polymer applications. Because of the exceptional chemical purity of the Barretts ore, a significant portion of worldwide automotive catalytic converter ceramic substrates contain the Company's Barretts talc.

The Company's natural mineral products are supported by the Company's limestone reserves located in the western and eastern parts of the United States, and talc reserves located in Montana. The Company estimates these reserves, at current usage levels, to be in excess of 30 years at its limestone production facilities and in excess of 20 years at its talc production facility. See Item 2, "Properties," for more information with respect to those facilities.

Our high quality limestone, dolomitic limestone, and talc products are defined primarily by the chemistry and color characteristics of the ore bodies. Ore samples are analyzed by x-ray fluorescence (XRF) and other techniques to determine purity and more generally by Hunter brightness measurement to determine dry brightness and the Hunter yellowness (b) value. We serve multiple markets from each of our operations, each of which has different requirements relating to a combination of chemical and physical properties.

Refractories Segment

Refractory Products and Markets

Refractories Products

The Company offers a broad range of monolithic and pre-cast refractory products and related systems and services. The Company's Refractory segment net sales were \$337.4 million, \$278.9 million and \$395.8 million for the years ended December 31, 2010, 2009 and 2008, respectively.

Refractory product sales are often supported by Company-supplied proprietary application equipment and on-site technical service support. The Company's proprietary application equipment is used to apply refractory materials to the walls of steel-making furnaces and other high temperature vessels to maintain and extend their useful life. Net sales of refractory products, including those for non-ferrous applications, were \$264.5 million, \$225.4 million and \$320.8 million for the years ended December 31, 2010, 2009 and 2008. The Company's proprietary application system, such as its MINSCAN[®], allow for remote-controlled application of the Company's refractory products in steel-making furnaces, as well as in steel ladles and blast furnaces. Since the steel-making industry is characterized by intense price competition, which results in a continuing emphasis on increased productivity, these application systems and the technologically advanced refractory materials developed in the Company's research laboratories have been well accepted by the Company's customers. These products allow steel makers to improve their performance through, among other things, the application of monolithic refractories to furnace linings while the furnace is at operating temperature, thereby eliminating the need for furnace cool-down periods and steel-production interruption. The result is a lower overall cost for steel produced by steel makers.

The Company's experienced technical service staff and advanced application equipment provide customers assurance that they will achieve their desired productivity objectives. The Company's technicians are also able to conduct laser measurement of refractory wear, sometimes in conjunction with robotic application tools, to improve refractory performance at many customer locations. The Company believes that these services, together with its refractory product offerings, provide it with a strategic marketing advantage.

Over the past several years the Refractories segment has continued to reformulate its products and application technology to maintain its competitive advantage in the market place. Some of the new products the Company has introduced in the past few years include:

- HOTCRETE[®]: High durability shotcrete products for applications at high temperatures in ferrous applications such as steel ladles, electric arc furnaces (EAF) and basic oxygen furnaces (BOF) furnaces;
- FASTFIRE[®]: High durability castable and shotcrete products in the non-ferrous and ferrous industries with the added benefit of rapid dry-out capabilities;
- OPTIFORM[®]: A system of products and equipment for the rapid continuous casting of refractories for applications such as steel ladle safety linings;
- ENDURATEQ[®]: A high durability refractory shape for glass contact applications such as plungers and orifice rings; and
- DECTEQ[™]: A system for the automatic control of electrical power feeding electrodes used in electric arc steel making furnaces.

Refractories Markets

The principal market for the Company's refractory products is the steel industry. Management believes that certain trends in the steel industry will provide growth opportunities for the Company. These trends include growth and quality improvements in select geographic regions (e.g., China, Eastern Europe and India) the development of improved manufacturing processes such as thin-slab casting, the trend in North America to shift production from integrated mills to electric arc furnaces (mini-mills) and the ever-increasing need for improved productivity and longer lasting refractories.

The Company sells its refractory products in the following markets:

Steel Furnace. The Company sells gunnable monolithic refractory products and application systems to users of basic oxygen furnaces and electric furnaces for application on furnace walls to prolong the life of furnace linings.

Other Iron and Steel. The Company sells monolithic refractory materials and pre-cast refractory shapes for iron and steel ladles, vacuum degassers, continuous casting tundishes, blast furnaces and reheating furnaces. The Company offers a full line of materials to satisfy most continuous casting refractory applications. This full line consists of gunnable materials, refractory shapes and permanent linings.

Industrial Refractory Systems. The Company sells refractory shapes and linings to non-steel refractories consuming industries including glass, cement, aluminum and petrochemicals, power generation and other non-steel industries. The Company also produces a specialized line of carbon composites and pyrolytic graphite primarily sold under the PYROID® trademark, primarily to the aerospace and electronics industries.

Metallurgical Products and Markets

The Company produces a number of other technologically advanced products for the steel industry, including calcium metal, metallurgical wire products and a number of metal treatment specialty products. Net sales of metallurgical products were \$72.9 million, \$53.5 million and \$75.0 million for the years ended December 31, 2010, 2009 and 2008. The Company manufactures calcium metal at its Canaan, Connecticut, facility and purchases calcium in international markets. Calcium metal is used in the manufacture of the Company's PFERROCAL® solid-core calcium wire, and is also sold for use in the manufacture of batteries and magnets. We also manufacture cored wires at our Canaan, Connecticut and Hengelo, Netherlands, manufacturing sites. The Company sells metallurgical wire products and associated wire-injection equipment for use in the production of high-quality steel. These metallurgical wire products are injected into molten steel to improve castability and reduce imperfections. The steel produced is used for high-pressure pipeline and other premium-grade steel applications.

Marketing and Sales

The Company relies principally on its worldwide direct sales force to market its products. The direct sales force is augmented by technical service teams that are familiar with the industries to which the Company markets its products, and by several regional distributors. The Company's sales force works closely with the Company's technical service staff to solve technical and other issues faced by the Company's customers. The Company's technical service staff assists paper producers in ongoing evaluations of the use of PCC for paper coating and filling applications. In the Refractory segment, the Company's technical service personnel advise on the use of refractory materials, and, in many cases pursuant to service agreements, apply the refractory materials to the customers' furnaces and other vessels. Continued use of skilled technical service teams is an important component of the Company's business strategy.

The Company works closely with its customers to ensure that their requirements are satisfied, and it often trains and supports customer personnel in the use of the Company's products. The Company oversees domestic marketing and sales activities from Bethlehem, Pennsylvania, and from regional sales offices in the eastern and western United States. The Company's international marketing and sales efforts are directed from regional centers located in Brussels, Belgium; Sao Jose Dos Campos, Brazil; and Shanghai, China. The Company believes its processed minerals are at regional locations that satisfy the stringent delivery requirements of the industries they serve. The Company also believes that its worldwide network of sales personnel and manufacturing sites facilitates the continued international expansion.

Raw Materials

The Company depends in part on having an adequate supply of raw materials for its manufacturing operations, particularly lime and carbon dioxide for the PCC product line, magnesia and alumina for its Refractory operations, and on having adequate access to ore reserves at its mining operations.

The Company uses lime in the production of PCC and is a significant purchaser of lime worldwide. Generally, lime is purchased under long-term supply contracts from unaffiliated suppliers located in close geographic proximity to the Company's PCC plants. Generally, the lime utilized in our business is readily available from numerous sources, including, to a small extent, from our Adams, Massachusetts facility. Carbon dioxide is readily available in exhaust gas from the host paper mills, or other operations at our merchant facilities.

The principal raw materials used in the Company's monolithic refractory products are refractory-grade magnesia and various forms of alumina silicates. The Company purchases a significant portion of its magnesia requirements from sources in China. The price and availability of bulk raw materials from China are subject to fluctuations that could affect the Company's sales to its customers. In addition, the volatility of transportation costs have also affected the delivered cost of raw materials imported from China to North America and Europe. The Company continues to work on developing alternate sources of magnesia. The alumina we utilize in our business is readily available from numerous sources. The Company also purchases calcium metal, calcium silicide, graphite, calcium carbide and various alloys for use in the production of metallurgical wire products and uses lime and aluminum in the production of calcium metal.

Competition

The Company is continually engaged in efforts to develop new products and technologies and refine existing products and technologies in order to remain competitive and to position itself as a market leader.

With respect to its PCC products, the Company competes for sales to the paper industry with other minerals, such as GCC and kaolin, based in large part upon technological know-how, patents and processes that allow the Company to deliver PCC that it believes imparts gloss, brightness, opacity and other properties to paper on an economical basis. The Company is the leading manufacturer and supplier of PCC to the paper industry.

The Company competes in sales of its limestone and talc based primarily upon quality, price, and geographic location.

With respect to the Company's refractory products, competitive conditions vary by geographic region. Competition is based upon the performance characteristics of the product (including strength, consistency and ease of application), price, and the availability of technical support.

Research and Development

Many of the Company's product lines are technologically advanced. Our expertise in inorganic chemistry, crystallography and structural analysis, fine particle technology and other aspects of materials science apply to and support all of our product lines. The Company's business strategy for growth in sales and profitability depends, to a large extent, on the continued success of its research and development activities. Among the significant achievements of the Company's research and development efforts have been: the satellite PCC plant concept; PCC crystal morphologies for paper coating; AT[®] PCC for wood-containing papers; Fulfill[™] high filler technology systems; the development of FASTFIRE[®] and OPTIFORM[®] shotcrete refractory products; LACAM[®] laser-based refractory measurement systems; the MINSCAN[®] and HOTCRETE[®] application systems and EMforce[®] for the Processed Minerals and Specialty PCC product lines.

Under the Fulfill[™] platform of products, the Company continues to develop its filler-fiber composite material, which could increase filler levels in uncoated freesheet paper to upwards of 30%. This product remains in development. The Company is in commercialization discussions with a company in Europe and also conducting large-scale trials in Asia. The Company will also continue to reformulate its refractory materials to be more competitive, and will also continue development of unique calcium carbonates for use in novel biopolymers.

For the years ended December 31, 2010, 2009 and 2008, the Company spent approximately \$19.6 million, \$19.9 million and \$23.1 million, respectively, on research and development. The Company's research and development spending for 2010, 2009 and 2008 was approximately 2.0%, 2.2% and 2.1% of net sales, respectively.

The Company maintains its primary research facilities in Bethlehem and Easton, Pennsylvania. It also has research and development facilities in China, Finland, Germany, Ireland, Japan and Turkey. Approximately 79 employees worldwide are engaged in research and development. In addition, the Company has access to some of the world's most advanced papermaking and paper coating pilot facilities.

Patents and Trademarks

The Company owns or has the right to use approximately 241 patents and approximately 820 trademarks related to its business. Our patents expire between 2011 and 2028. Our trademarks continue indefinitely. The Company believes that its rights under its existing patents, patent applications and trademarks are of value to its operations, but no one patent, application or trademark is material to the conduct of the Company's business as a whole.

Insurance

The Company maintains liability and property insurance and insurance for business interruption in the event of damage to its production facilities and certain other insurance covering risks associated with its business. The Company believes such insurance is adequate for the operation of its business. There is no assurance that in the future the Company will be able to maintain the coverage currently in place or that the premiums will not increase substantially.

Employees

At December 31, 2010, the Company employed 2,132 persons, of whom 1,070 were employed outside of the United States.

Environmental, Health and Safety Matters

The Company's operations are subject to federal, state, local and foreign laws and regulations relating to the environment and health and safety. Certain of the Company's operations involve and have involved the use and release of substances that have been

and are classified as toxic or hazardous within the meaning of these laws and regulations. Environmental operating permits are, or may be, required for certain of the Company's operations and such permits are subject to modification, renewal and revocation. The Company regularly monitors and reviews its operations, procedures and policies for compliance with these laws and regulations. The Company believes its operations are in substantial compliance with these laws and regulations and that there are no violations that would have a material effect on the Company. Despite these compliance efforts, some risk of environmental and other damage is inherent in the Company's operations, as it is with other companies engaged in similar businesses, and there can be no assurance that material violations will not occur in the future. The cost of compliance with these laws and regulations is not expected to have a material adverse effect on the Company.

Laws and regulations are subject to change. See Item 1A, Risk Factors, for information regarding the possible effects that compliance with new environmental laws and regulations, including those relating to climate change, may have on our businesses and operating results.

Under the terms of certain agreements entered into in connection with the Company's initial public offering in 1992, Pfizer Inc ("Pfizer") and its wholly-owned subsidiary Quigley Company, Inc. ("Quigley") agreed to indemnify the Company against certain liabilities being retained by Pfizer and its subsidiaries including, but not limited to, pending lawsuits and claims, and any lawsuits or claims brought at any time in the future alleging damages or injury from the use, handling of or exposure to any product sold by Pfizer's specialty minerals business prior to the closing of the initial public offering. During 2008, agreement was reached with Pfizer providing for reimbursement by Pfizer of past costs of defense, and direct payment of such costs going forward, for cases alleging damages from exposure to product sold prior to the formation of the Company and Pfizer reimbursed the Company in the amount of \$0.1 million for past defense costs.

Pfizer and Quigley also agreed to indemnify the Company against any liability arising from claims for remediation, as defined in the Agreement, of on-site environmental conditions relating to activities prior to the closing of the initial public offering. Further, Pfizer and Quigley agreed to indemnify the Company for 50% of the liabilities in excess of \$1 million up to \$10 million in liabilities that may have arisen or accrued within ten years after the closing of the initial public offering with respect to such remediation of on-site conditions. The Company is responsible for the first \$1 million of such liabilities, 50% of all such liabilities in excess of \$1 million up to \$10 million, and all such liabilities in excess of \$10 million.

Available Information

The Company maintains an internet website located at <http://www.mineralstech.com>. Its reports on Forms 10-K, 10-Q and 8-K, and amendments to those reports, as well as its Proxy Statement and filings under Section 16 of the Securities Exchange Act of 1934 are available free of charge through the Investor Relations page of its website, as soon as reasonably practicable after they are filed with the Securities and Exchange Commission ("SEC"). Investors may access these reports through the Company's website by navigating to "Investor Relations" and then to "SEC Filings."

Financial information concerning our business segments and the geographical areas in which we operate appears in the Notes to the Consolidated Financial Statements.

Item 1A. Risk Factors

Our business faces significant risks. These risks include those described below and may include additional risks and uncertainties not presently known to us. Our business, financial condition and results of operations could be materially adversely affected by any of these risks. These risks should be read in conjunction with the other information in this Annual Report on Form 10-K.

- ***Worldwide general economic, business, and industry conditions has had, and may continue to have, an adverse effect on the Company's results.***

The global economic downturn has caused, among other things, declining consumer and business confidence, volatile raw material prices, instability in credit markets, high unemployment, fluctuating interest rates and exchange rates, and other challenges. The Company's business and operating results have been and may continue to be adversely affected by these global economic conditions. The Company's customers and potential customers may experience deterioration of their businesses, cash flow shortages, and difficulty obtaining financing. As discussed below, the industries we serve, primarily paper, steel, construction and automotive, have been particularly adversely affected by the uncertain global economic climate due to the cyclical nature of their businesses. As a result, existing or potential customers may reduce or delay their growth and investments and their plans to purchase products, and may not be able to fulfill their obligations in a timely fashion. Further, suppliers could experience similar conditions, which could affect their ability to fulfill their obligations to the Company. Adversity within capital markets may impact future return on pension assets, thus resulting in greater future pension costs that impact the company's results. The timing, strength or duration of any recovery in the global economic markets remains uncertain, and there can be no assurance that market conditions will improve in the near future or that our results will not continue to be materially and adversely affected.

- ***The Company's operations are subject to the cyclical nature of its customers' businesses and we may not be able to mitigate that risk.***

The majority of the Company's sales are to customers in industries that have historically been cyclical: paper, steel, construction, and automotive. These industries had been particularly adversely affected by the uncertain global economic climate in late 2008 and in 2009. Our Refractories segment primarily serves the steel industry. North American and European steel production improved in 2010 from 2009, but was approximately 20% below pre-recession levels. In the paper industry, which is served by our Paper PCC product line, production levels for printing and writing papers within North America and Europe, our two largest markets improved in 2010 but were approximately 15% below pre-recession levels. In addition, our Processed Minerals and Specialty PCC product lines are affected by the domestic building and construction markets and the automotive market. Housing starts in 2010 averaged approximately 585 thousand units, a 6% improvement over 2009. Housing starts were at a peak rate of 2.1 million units in 2005. In the automotive industry, North American car and truck production was up 38% in 2010, but remains well below pre-recession levels. Demand for our products is subject to these trends. The Company has taken steps to reduce its exposure to variations in its customers' businesses, including by diversifying its portfolio of products and services; through geographic expansion, and by structuring most of its long-term satellite PCC contracts to provide a degree of protection against declines in the quantity of product purchased, since the price per ton of PCC generally rises as the number of tons purchased declines. In addition, many of the Company's product lines lower its customers' costs of production or increase their productivity, which should encourage them to use its products. However, there can be no assurance that these efforts will mitigate the risks of our dependence on these industries. Continued weakness in the industries we serve has had, and may in the future have, an adverse effect on sales of our products and our results of operations. A continued or renewed economic downturn in one or more of the industries or geographic regions that the Company serves, or in the worldwide economy, could cause actual results of operations to differ materially from historical and expected results.

- ***The Company's results could be adversely affected if it is unable to effectively achieve and implement its growth initiatives.***

Sales and income growth of the Company depends upon a number of uncertain events, including the outcome of the Company's strategies of increasing its penetration into geographic markets such as the BRIC (Brazil, Russia, India, China) countries and other Asian and Eastern European countries; increasing its penetration into product markets such as the market for papercoating pigments and the market for groundwood paper pigments; increasing sales to existing PCC customers by increasing the amount of PCC used per ton of paper produced; developing, introducing and selling new products such as the Fulfill™ family of products for the paper industry. Difficulties, delays or failure of any of these strategies could affect the future growth rate of the Company. Our strategy also anticipates growth through future acquisitions. However, our ability to identify and consummate any future acquisitions on terms that are favorable to us may be limited by the number of attractive acquisition targets, internal demands on our resources and our ability to obtain financing. Our success in integrating newly acquired businesses will depend upon our ability to retain key personnel, avoid diversion of management's attention from operational matters, and integrate general and administrative services. In addition, future acquisitions could result in the incurrence of additional debt, costs and contingent liabilities. Integration of acquired operations may take longer, or be more costly or disruptive to our business, than originally anticipated, and it is also possible that expected synergies from future acquisitions may not materialize. We also may incur costs and divert management attention with regard to potential acquisitions that are never consummated.

- ***The Company's sales of PCC could be adversely affected by our failure to renew or extend long term sales contracts for our satellite operations.***

The Company's sales of PCC to paper customers are typically pursuant to long-term evergreen agreements, initially ten years in length, with paper mills where the Company operates satellite PCC plants. Sales pursuant to these contracts represent a significant portion of our worldwide Paper PCC sales, which were \$496.6 million in 2010, or approximately 49.5% of the Company's net sales. The terms of many of these agreements have been extended or renewed in the past, often in connection with an expansion of the satellite plant. However, failure of a number of the Company's customers to renew or extend existing agreements on terms as favorable to the Company as those currently in effect, or at all, could have a substantial adverse effect on the Company's results of operations, and could also result in impairment of the assets associated with the PCC plant.

- ***The Company's sales could be adversely affected by consolidation in customer industries, principally paper and steel.***

Several consolidations in the paper industry have taken place in recent years. These consolidations could result in partial or total closure of some paper mills where the Company operates PCC satellites. Such closures would reduce the Company's sales of PCC, except to the extent that they resulted in shifting paper production and associated purchases of PCC to another location served by the Company. Similarly, consolidations have occurred in the steel industry. Such consolidations in the two major industries we serve concentrate purchasing power in the hands of a smaller number of papermakers and steel manufacturers, enabling them to increase pressure on suppliers, such as the Company. This increased pressure could have an adverse effect on the Company's results of operations in the future.

- ***The Company is subject to stringent regulation in the areas of environmental, health and safety, and tax, and may incur unanticipated costs or liabilities arising out of claims for various legal, environmental and tax matters.***

The Company's operations are subject to international, federal, state and local governmental environmental, health and safety, tax and other laws and regulations. We have expended, and may be required to expend in the future, substantial funds for compliance with such laws and regulations. In addition, future events, such as changes to or modifications of interpretations of existing laws and regulations, or enforcement policies, or further investigation or evaluation of the potential environmental impacts of operations or health hazards of certain products, may give rise to additional compliance and other costs that could have a material adverse effect on the Company. State, national, and international governments and agencies have been evaluating climate-related legislation and regulation that would restrict emissions of greenhouse gases in areas in which we conduct business, and some such legislation and regulation have already been enacted or adopted. Enactment of climate-related legislation or adoption of regulation that restrict emissions of greenhouse gases in areas in which we conduct business could have an adverse effect on our operations or demand for our products. Our manufacturing processes, particularly the manufacturing process for PCC, use a significant amount of energy and, should energy prices increase as a result of such legislation or regulation, we may not be able to pass these increased costs on to purchasers of our products. We cannot predict if or when currently proposed or additional laws and regulations regarding climate change or other environmental or health and safety concerns will be enacted or adopted. Moreover, changes in tax regulation and international tax treaties could reduce the financial performance of our foreign operations.

The Company is currently a party in various litigation matters and tax and environmental proceedings, and may be subject to claims in the future. While the Company carries liability insurance, which it believes to be appropriate to its businesses, and has provided reserves for current matters, which it believes to be adequate, an unanticipated liability, arising out of such a litigation matter or a tax or environmental proceeding could have a material adverse effect on the Company's financial condition or results of operations.

- ***Delays or failures in new product development could adversely affect the Company's operations.***

The Company's future business success will depend in part upon its ability to maintain and enhance its technological capabilities, to respond to changing customer needs, and to successfully anticipate or respond to technological changes on a cost-effective and timely basis. The Company is engaged in a continuous effort to develop new products and processes in all of its product lines. Difficulties, delays or failures in the development, testing, production, marketing or sale of such new products could cause actual results of operations to differ materially from our expected results.

- ***The Company's ability to compete is dependent upon its ability to defend its intellectual property against infringement.***

The Company's ability to compete is based in part upon proprietary knowledge, both patented and unpatented. The Company's ability to achieve anticipated results depends in part on its ability to defend its intellectual property against inappropriate disclosure as well as against infringement. In addition, development by the Company's competitors of new products or technologies that are more effective or less expensive than those the Company offers could have a material adverse effect on the Company's financial condition or results of operations.

- ***The Company's operations could be impacted by the increased risks of doing business abroad.***

The Company does business in many areas internationally. Approximately 47% of our sales in 2010 were derived from outside the United States and we have significant production facilities which are located outside of the United States. We have in recent years expanded our operations in emerging markets, and we plan to continue to do so in the future, particularly in China, India and Eastern Europe. Some of our operations are located in areas that have experienced political or economic instability, including Indonesia, Brazil, Thailand, China and South Africa. As the Company expands its operations overseas, it faces increased risks of doing business abroad, including inflation, fluctuation in interest rates, changes in applicable laws and regulatory requirements, export and import restrictions, tariffs, nationalization, expropriation, limits on repatriation of funds, civil unrest, terrorism, unstable governments and legal systems, and other factors. Adverse developments in any of the areas in which we do business could cause actual results to differ materially from historical and expected results. In addition, a significant portion of our raw material purchases and sales outside the United States are denominated in foreign currencies, and liabilities for non-U.S. operating expenses and income taxes are denominated in local currencies. Our financial results therefore will be affected by changes in foreign currency rates. Accordingly, reported sales, net earnings, cash flows and fair values have been and in the future will be affected by changes in foreign exchange rates. Our overall success as a global business depends, in part, upon our ability to succeed in differing legal, regulatory, economic, social and political conditions. We cannot assure you that we will implement policies and strategies that will be effective in each location where we do business.

- ***The Company's operations are dependent on the availability of raw materials and increases in costs of raw materials or energy could adversely affect our financial results.***

The Company depends in part on having an adequate supply of raw materials for its manufacturing operations, particularly lime and carbon dioxide for the PCC product line, and magnesia and alumina for its Refractory operations and on having adequate access to ore reserves of appropriate quality at its mining operations. Purchase prices and availability of these critical raw materials are subject to volatility. At any given time, we may be unable to obtain an adequate supply of these critical raw materials on a timely basis, on price and other terms, or at all.

While most such raw materials are readily available, the Company purchases a significant portion of its magnesia requirements from sources in China. The price and availability of magnesia have fluctuated in the past and they may fluctuate in the future. Price increases for certain other of our raw materials, as well as increases in energy prices, have also affected our business. Our ability to recover increased costs is uncertain. The Company and its customers will typically negotiate reasonable price adjustments in order to recover a portion of these rapidly escalating costs. While the contracts pursuant to which we construct and operate our satellite PCC plants generally adjust pricing to reflect increases in costs resulting from inflation, there is a time lag before such price adjustments can be implemented. In 2008, increased raw materials affected our Specialty Minerals segment by \$24 million, partially offset by recovery of raw material costs through price increases of \$16 million, while raw material prices affected our Refractories segment by \$34 million, partially offset by recovery of raw material costs through price increases of \$31 million. In 2009 and 2010, however, the impact of such price increased was not material.

We cannot predict whether, and how much, prices for our key raw materials will increase in the future. Changes in the costs or availability of such raw materials, to the extent we cannot recover them in price increases to our customers, could adversely affect the Company's results of operations.

- ***The Company operates in very competitive industries, which could adversely affect our profitability.***

The Company has many competitors. Some of our principal competitors have greater financial and other resources than we have. Accordingly, these competitors may be better able to withstand changes in conditions within the industries in which we operate and may have significantly greater operating and financial flexibility than we do. As a result of the competitive environment in the markets in which we operate, we currently face and will continue to face pressure on the sales prices of our products from competitors, which could reduce profit margins.

- ***Production facilities are subject to operating risks and capacity limitations that may adversely affect the Company's financial condition or results of operations.***

The Company is dependent on the continued operation of its production facilities. Production facilities are subject to hazards associated with the manufacturing, handling, storage, and transportation of chemical materials and products, including pipeline leaks and ruptures, explosions, fires, inclement weather and natural disasters, mechanical failure, unscheduled downtime, labor difficulties, transportation interruptions, and environmental risks. We maintain property, business interruption and casualty insurance but such insurance may not cover all risks associated with the hazards of our business and is subject to limitations, including deductibles and maximum liabilities covered. We may incur losses beyond the limits, or outside the coverage, of our insurance policies. Further, from time to time, we may experience capacity limitations in our manufacturing operations. In addition, if we are unable to effectively forecast our customers' demand, it could affect our ability to successfully manage operating capacity limitations. These hazards, limitations, disruptions in supply and capacity constraints could adversely affect financial results.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Set forth below is the location of, and the main customer served by, each of the Company's satellite PCC plants in operation as of December 31, 2010. Generally, the land on which each satellite PCC plant is located is leased at a nominal amount by the Company from the host paper mill pursuant to a lease, the term of which generally runs concurrently with the term of the PCC production and sale agreement between the Company and the host paper mill.

¹ This plant is owned through a joint venture.

² This plant is leased to another company.

³ Leased by the Company. The facilities in Cork, Ireland, are operated pursuant to a 99-year lease, the term of which commenced in 1963. The Company's headquarters in New York, New York, were held under a lease which expired in 2010. The Company entered into a new lease agreement for its corporate headquarters in New York, New York which expires in 2021.

The following sets forth, for each of the quarries or mines we own or operate, as set forth above, our current estimate as to the amount of reserves such quarry or mine holds, based on the most recent mine plan, and its usage rate in 2010.

Millions of tons

<u>Location</u>	<u>Reserves</u>	<u>2010 Usage</u>
Arizona, Pima County	9.00	0.09
California, Lucerne Valley	49.90	0.81
Connecticut, Canaan	19.77	0.46
Massachusetts, Adams	25.10	0.65
Montana, Dillon	3.94	0.15

The Company believes that its facilities, which are of varying ages and are of different construction types, have been satisfactorily maintained, are in good condition, are suitable for the Company's operations and generally provide sufficient capacity to meet the Company's production requirements. Based on past loss experience, the Company believes it is adequately insured with respect to these assets and for liabilities likely to arise from its operations.

Item 3. Legal Proceedings

Certain of the Company's subsidiaries are among numerous defendants in a number of cases seeking damages for exposure to silica or to asbestos containing materials. The Company currently has 305 pending silica cases and 27 pending asbestos cases. To date, 1,160 silica cases and 5 asbestos cases have been dismissed. Most of these claims do not provide adequate information to assess their merits, the likelihood that the Company will be found liable, or the magnitude of such liability, if any. Additional claims of this nature may be made against the Company or its subsidiaries. At this time management anticipates that the amount of the Company's liability, if any, and the cost of defending such claims, will not have a material effect on its financial position or results of operations.

The Company has not settled any silica or asbestos lawsuits to date. We are unable to state an amount or range of amounts claimed in any of the lawsuits because state court pleading practices do not require identifying the amount of the claimed damage. The aggregate cost to the Company for the legal defense of these cases since inception was approximately \$0.2 million, the majority of which has been reimbursed by Pfizer Inc. pursuant to the terms of certain agreements entered into in connection with the Company's initial public offering in 1992. Our experience has been that the Company is not liable to plaintiffs in any of these lawsuits and the Company does not expect to pay any settlements or jury verdicts in these lawsuits.

Environmental Matters

On April 9, 2003, the Connecticut Department of Environmental Protection ("DEP") issued an administrative consent order relating to our Canaan, Connecticut, plant where both our Refractories segment and Specialty Minerals segment have operations. We agreed to the order, which includes provisions requiring investigation and remediation of contamination associated with historic use of polychlorinated biphenyls ("PCBs") at a portion of the site. The following is the present status of the remediation efforts:

- *Building Decontamination.* We have completed the investigation of building contamination and submitted several reports characterizing the contamination. We are awaiting review and approval of these reports by the regulators. Based on the results of this investigation, we believe that the contamination may be adequately addressed by means of encapsulation through painting of exposed surfaces, pursuant to the Environmental Protection Agency's ("EPA") regulations and have accrued such liabilities as discussed below. However, this conclusion remains uncertain pending completion of the phased remediation decision process required by the regulations.
- *Groundwater.* We have completed investigations of potential groundwater contamination and have submitted a report on the investigations finding that there is no PCB contamination, but some oil contamination of the groundwater. We expect the regulators to require confirmatory long term groundwater monitoring at the site.
- *Soil.* We have completed the investigation of soil contamination and submitted a report characterizing contamination to the regulators. Based on the results of this investigation, we believe that the contamination may be left in place and monitored, pursuant to a site-specific risk assessment, which is underway. However, this conclusion is subject to completion of a phased remediation decision process required by applicable regulations.

We believe that the most likely form of remediation will be to leave existing contamination in place, encapsulate it, and monitor the effectiveness of the encapsulation.

We estimate that the cost of the likely remediation above would approximate \$400,000, and that amount has been recorded as a liability on our books and records.

The Company is evaluating options for upgrading the wastewater treatment facilities at its Adams, Massachusetts plant. This work has been undertaken pursuant to an administrative Consent Order originally issued by the Massachusetts Department of Environmental Protection (DEP) on June 18, 2002. This Order was amended on June 1, 2009 and on June 2, 2010. The amended Order required the installation of a groundwater containment system following DEP review and approval of certain items submitted by the Company prior to July 1, 2010, which was installed by the Company in 2010. The amended Order also includes the investigation

by January 1, 2022 of options for ensuring that the facility's wastewater treatment ponds will not result in unpermitted discharge to groundwater. Additional requirements of the amendment include the submittal by July 1, 2022 of a plan for closure of a historic lime solids disposal area. Preliminary engineering reviews completed in 2005 indicate that the estimated cost of wastewater treatment upgrades to operate this facility beyond 2024 may be between \$6 million and \$8 million. The groundwater containment system, required to allow continued operation of the wastewater treatment ponds pending the required upgrades, will be up to \$3 million. The Company estimates that the remaining remediation costs would approximate \$400,000, which has been accrued as of December 31, 2010.

The Company and its subsidiaries are not party to any other material pending legal proceedings, other than routine litigation incidental to their businesses.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Securities

The Company's common stock is traded on the New York Stock Exchange under the symbol "MTX."

Information on market prices and dividends is set forth below

<u>2010 Quarters</u>	<u>First</u>	<u>Second</u>	<u>Third</u>	<u>Fourth</u>
Market Price Range Per Share of Common Stock

Issuer Purchases of Equity Securities

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid Per Share</u>	<u>Total Number of Shares Purchased as Part of the Publicly Announced Program</u>	<u>Dollar Value of Shares That May Yet be Purchased Under the Program</u>
October 4 – October 31	200	\$ 55.69	299,420	\$ 59,445,532
November 1 – November 28	85,400	\$ 58.74	384,820	\$ 54,428,714
November 29 - December 31	144,800	\$ 65.05	529,620	\$ 45,008,764
Total	230,400	\$ 62.71		

On February 22, 2010 the Company's Board of Directors authorized the Company's management to repurchase, at its discretion, up to \$75 million of shares over a two-year period. As of December 31, 2010, 529,620 shares have been repurchased under this program at an average price of approximately \$56.63 per share.

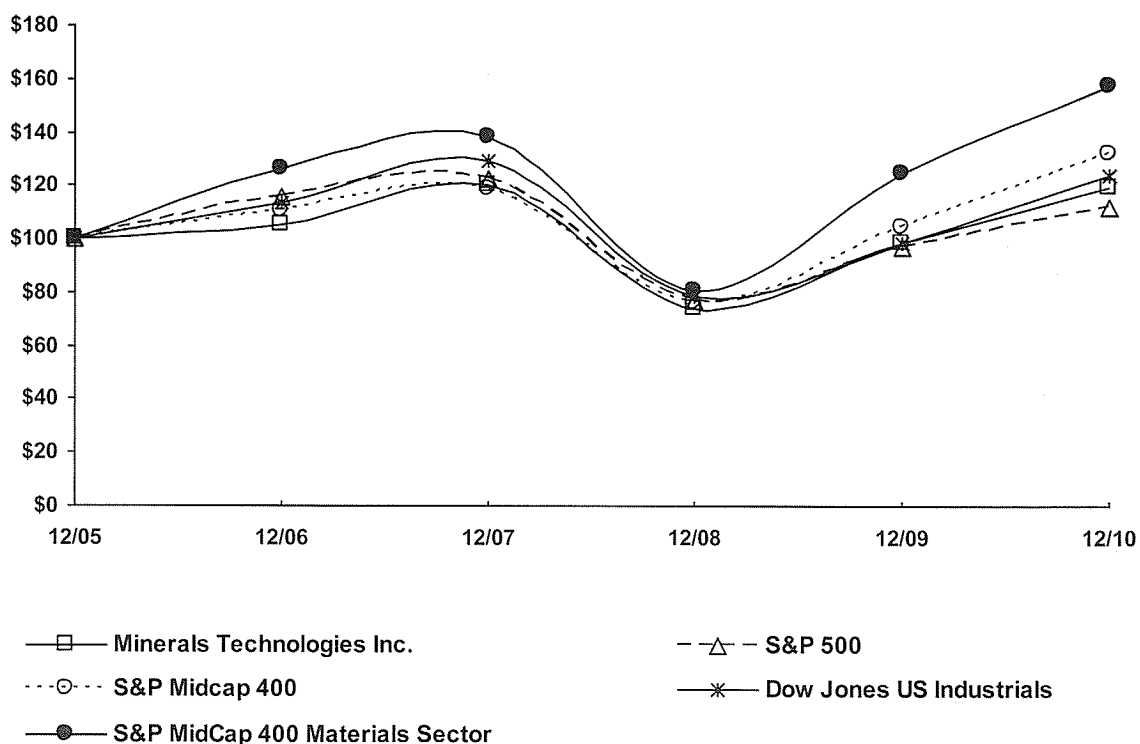

On January 26, 2011, the Company's Board of Directors declared a regular quarterly dividend on its common stock of \$0.05 per share. No dividend will be payable unless declared by the Board and unless funds are legally available for payment thereof.

On February 4, 2011, the last reported sales price on the NYSE was \$65.25 per share. As of February 4, 2011, there were approximately 182 holders of record of the common stock.

The following graph compares the cumulative 5-year total return provided shareholders of Minerals Technologies Inc.'s common stock relative to the cumulative total returns of the S & P 500 index, the S&P Midcap 400, the S&P Mid Cap 400 Materials Sector index, and the Dow Jones Industrial Average. An investment of \$100 (with reinvestment of all dividends) is assumed to have been made in our common stock and in each of the indices on 12/31/2005 and its relative performance is tracked through 12/31/10.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN*

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statement for "Safe Harbor" Purposes under the Private Securities Litigation Reform Act of 1995

The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements made by or on behalf of the Company. This report contains statements that the Company believes may be "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, particularly statements relating to the Company's objectives, plans or goals, future actions, future performance or results of current and anticipated products, sales efforts, expenditures, and financial results. From time to time, the Company also provides forward-looking statements in other publicly-released materials, both written and oral. Forward-looking statements provide current expectations and forecasts of future events such as new products, revenues and financial performance, and are not limited to describing historical or current facts. They can be identified by the use of words such as "believes," "expects," "plans," "intends," "anticipates," and other words and phrases of similar meaning.

Forward-looking statements are necessarily based on assumptions, estimates and limited information available at the time they are made. A broad variety of risks and uncertainties, both known and unknown, as well as the inaccuracy of assumptions and estimates, can affect the realization of the expectations or forecasts in these statements. Many of these risks and uncertainties are difficult to predict or are beyond the Company's control. Consequently, no forward-looking statement can be guaranteed. Actual future results may vary materially. Significant factors affecting the expectations and forecasts are set forth under "Item 1A — Risk Factors" in this Annual Report on Form 10-K.

The Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances that arise after the date hereof. Investors should refer to the Company's subsequent filings under the Securities Exchange Act of 1934 for further disclosures.

Executive Summary

Earnings per share for 2010 were \$3.58 per share, the highest in the Company's 18-year history. The Company rebounded strongly as it saw improvement in all of the end markets it serves, particularly in steel, automotive and construction, returning the Company to the \$1 billion sales level. In the prior year, weaknesses in the aforementioned markets, due to the worldwide economic recession which began in the fourth quarter of 2008 and continued for most of 2009, resulted in a significant drop in demand for our products. In the current year, improvement in these underlying markets resulted in increased volumes, which, coupled with the benefits derived from our restructuring programs, productivity improvements, and cost savings initiatives, have led to improved operating performance in all of our product lines.

Worldwide net sales for 2010 were \$1.002 billion, an increase of 10% from 2009 sales of \$907.3 million. Foreign exchange had a favorable impact on sales of approximately \$5.7 million, or less than 1 percentage point of growth. Income from operations was \$98.3 million in 2010 as compared with a loss from operations of \$17.1 million in the prior year. Included in operating income in 2010 were restructuring charges of \$0.8 million. Included in the operating loss of the prior year were restructuring charges of \$22.0 million and impairment charges of \$39.8 million, respectively.

In 2010, the Company continued the execution of its growth strategies of geographic expansion and new product development. During the year, we ramped up production of our first satellite in India, began construction of two additional satellite PCC plants, one in India and one in the U.S., expanded two of our PCC satellite plants in Thailand and Brazil, and launched FulFill™, a new portfolio of PCC products. In addition, in January 2011, we announced the signing of contracts for the construction of two new satellite PCC plants in India.

The Company's balance sheet as of December 31, 2010 continues to be very strong. Cash, cash equivalents and short-term investments at December 31, 2010 were approximately \$385 million. Our cash flows from operations were in excess of \$140 million in 2010. In addition, we have available lines of credit of \$180 million, our debt to equity ratio was very low at 11%, and our current ratio was 4.4.

We face some significant risks and challenges in the future:

- The industries we serve, primarily paper, steel, construction and automotive, have been adversely affected by the uncertain global economic climate. Our global business could be adversely affected by decreases in economic activity. Our Refractories segment primarily serves the steel industry. North American and European steel production improved in 2010 from 2009, but was approximately 20% below pre-recession levels. In the paper industry, which is served by our Paper PCC product line, production levels for printing and writing papers within North America and Europe, our two largest markets improved in 2010 but were approximately 15% below pre-recession levels. In addition, our Processed Minerals and Specialty PCC product lines are affected by the domestic building and construction markets and the automotive market. Housing starts in 2010 averaged at approximately 585 thousand units, a 6% improvement over 2009. Housing starts were at a peak rate of 2.1 million units in 2005. In the automotive industry, North American car and truck production was up 38% in 2010, but remains well below pre-recession levels.
- Some of our customers may experience shutdowns due to further consolidations, or, may face liquidity issues, which could deteriorate the aging of our accounts receivable, increase our bad debt exposure and possibly trigger impairment of assets or realignment of our businesses.
- Consolidations and rationalizations in the paper and steel industries concentrate purchasing power in the hands of fewer customers, increasing pricing pressure on suppliers such as Minerals Technologies Inc.
- Most of our Paper PCC sales are subject to long-term contracts that may be terminated pursuant to their terms, or may be renewed on terms less favorable to us.
- We are subject to volatility in pricing and supply availability of our key raw materials used in our Paper PCC product line and Refractory product line.
- We continue to rely on China for a significant portion of our supply of magnesium oxide in the Refractories segment, which may be subject to uncertainty in availability and cost.
- Fluctuations in energy costs have an impact on all of our businesses.
- Changes in the fair market value of our pension assets, rates of return on assets, and discount rates could have a significant impact on our net periodic pension costs as well as our funding status.
- As we expand our operations abroad we face the inherent risks of doing business in many foreign countries, including foreign exchange risk, import and export restrictions, and security concerns.
- The Company's operations, particularly in the mining and environmental areas (discharges, emissions and greenhouse gases), are subject to regulation by federal, state and foreign authorities and may be subject to, and presumably will be required to comply with, additional laws, regulations and guidelines which may be adopted in the future.

The Company will continue to focus on innovation and new product development and other opportunities for continued growth as follows:

- Develop multiple high-filler technologies, such as filler-fiber, under the Fulfill™ platform of products, to increase the fill rate in freesheet paper and continue to progress with commercial discussions and full-scale paper machine trials.
- Increase our sales of PCC for paper by further penetration of the markets for paper filling at both freesheet and groundwood mills, particularly in emerging markets.
- Expand the Company's PCC coating product line using the satellite model.
- Promote the Company's expertise in crystal engineering, especially in helping papermakers customize PCC morphologies for specific paper applications.
- Expand PCC produced for paper filling applications by working with industry partners to develop new methods to increase the ratio of PCC for fiber substitutions.
- Develop unique calcium carbonates and talc products used in the manufacture of novel biopolymers, a new market opportunity.
- Deploy value-added formulations of refractory materials that not only reduce costs but improve performance and expand our solid core wire line into BRIC and other Asian countries.
- Deploy operational excellence principles into all aspects of the organization, including system infrastructure and lean principles.
- Explore selective acquisitions to fit our core competencies in minerals and fine particle technology.

However, there can be no assurance that we will achieve success in implementing any one or more of these opportunities.

Net sales	\$ 1,002.4	100.0 %	10 %	\$ 907.3	100.0 %	(18) %	\$ 1,112.2	100.0 %

Worldwide net sales in 2010 increased 10% from the previous year to \$1.002 billion. Foreign exchange had a favorable impact on sales of \$5.7 million or less than 1 percentage point of growth. Sales in the Specialty Minerals segment, which includes the PCC and Processed Minerals product lines, increased 6% to \$665.0 million from \$628.4 million for the same period in 2009. Sales in the Refractories segment grew 21% to \$337.4 from \$278.9 in the previous year. In 2009, worldwide net sales decreased 18% to \$907.3 million from \$1,112.2 billion in the prior year. In 2009, Specialty Minerals segment sales declined 12% and Refractories segment sales declined 30% from 2008 levels.

In 2010, worldwide net sales of PCC, which is primarily used in the manufacturing process of the paper industry, increased 4% to \$554.6 million from \$534.7 million in the prior year. Foreign exchange had a favorable impact on sales of approximately \$3.5 million or less than 1 percentage point of growth. Worldwide net sales of Paper PCC increased 2% to \$496.6 million from \$484.6 million in the prior year. Total Paper PCC volumes increased 3% from prior year levels with moderate volume increases with the exception of Asia where there was an 18% increase in volumes due to the startup of our new Indian satellite facility and increase of volumes at other facilities. Volume increases of approximately \$18.2 million were partially offset by approximately \$10 million in contractual price decreases. Sales of Specialty PCC increased 16% to \$58.0 million from \$50.1 million in 2009. This increase was primarily attributable to higher volumes.

In 2009, worldwide net sales of PCC decreased 12% to \$534.7 million from \$605.7 million in the prior year. Worldwide net sales of Paper PCC decreased 11% to \$484.6 million from \$547.2 million. Total Paper PCC volumes declined 11% from 2008 levels. Volume declines of \$65.0 million were partially offset by \$19.0 million in contractual price increases. Approximately \$17.0 million was due to the unfavorable effects of foreign exchange. Sales of Specialty PCC also declined 14% in 2009 to \$50.1 million from \$58.5 million in the prior year. This decline was primarily attributable to lower volumes.

Net sales of Processed Minerals products in 2010 increased 18% to \$110.4 million from \$93.7 million in 2009. GCC products and talc products increased 8% and 36% to \$66.4 million and \$44.0 million, respectively. The increases in the Processed Minerals product line was primarily attributable to increased volumes due to stronger sales and price increases within our talc product line, as well as improvements in the residential and commercial construction markets and the automotive market as compared to the depressed conditions in the prior year. Volumes increased 9% from the prior year.

Net sales of Processed Minerals products in 2009 decreased 15% to \$93.7 million from \$110.7 million in 2008. GCC products and talc products decreased 18% and 10% to \$61.4 million and \$32.3 million, respectively. The decrease in the Processed Minerals product line was attributable to further weakness in the residential and commercial construction markets as well as the automotive markets. As a result, volumes had declined 17% from the prior year.

Net sales in the Refractories segment in 2010 increased 21% to \$337.4 million from \$278.9 million in the prior year. Foreign exchange had a favorable impact on sales of \$2.3 million, or approximately 1 percentage point. Sales of refractory products and

systems to steel and other industrial applications increased 17% to \$264.5 million from \$225.4 million. Sales of metallurgical products within the Refractories segment increased 36% to \$72.9 million as compared with \$53.5 million in the same period last year. The increases in all product lines within this segment are driven by higher worldwide volumes due to improved market conditions in the steel industry as compared to significant weaknesses in the prior year.

Net sales in the Refractories segment in 2009 decreased 30% to \$278.9 million from \$395.8 million in the prior year. Foreign exchange had an unfavorable impact on sales of \$7.3 million, or 2 percentage points of the decline. This segment had been affected negatively by the significant downturn in global steel production which accelerated in the fourth quarter of 2008 and continued through the first three quarters of 2009. The markets showed some sign of stabilization in the fourth quarter of 2009. Sales of refractory products and systems to steel and other industrial applications decreased 30% to \$225.4 million, from \$320.8 million. Volumes declined approximately 32% as compared with prior year. Sales of metallurgical products within the Refractories segment decreased 29% to \$53.5 million from \$75.0 million in the prior year on volume declines of 25%.

Net sales in the United States grew approximately 12% to \$534.3 million in 2010 and represented approximately 53.3% of consolidated net sales. International sales increased approximately 9% to \$468.1 million from \$428.9. The increase in sales was primarily due to higher worldwide volumes.

Operating Costs and Expenses (Dollars in millions)

	<u>2010</u>	<u>Growth</u>	<u>2009</u>	<u>Growth</u>	<u>2008</u>

Restructuring charges.....	\$ 0.8	(96)%	\$ 22.0	64%	\$ 13.4

* Percentage not meaningful

Cost of goods sold in 2010 was 79.1% of sales compared with 82.8% in the prior year. Production margin increased \$53.3 million, or 34% as compared with a 10% increase in sales. Volumes increased in all product lines as economic conditions improved from prior year levels. The businesses also increased their productivity levels and derived continued benefits from our announced restructuring programs. In the Specialty Minerals segment, production margin increased 18%, or \$20.1 million, as compared with a 6% increase in sales. Volume had a favorable impact on production margin of \$18.1 million as compared to prior year in both the PCC and Processed Minerals product lines. This segment also reflected cost savings of \$2.9 million, incremental benefits derived from our announced restructuring programs of \$2.6 million, and lower net raw material and energy costs of \$5.3 million. This was partially offset by net price concessions of \$9.3 million. In the Refractories segment, production margin increased over 79%, or \$33.2 million as compared with a 21% increase in sales. Production margin was favorably affected by increased volumes of \$28.0 million and restructuring savings of \$4.6 million.

Cost of goods sold in 2009 was 82.8% of sales compared with 80.2% in the prior year. Our cost of goods sold declined 16% as compared with 18% lower sales resulting in a 29% decrease in production margin. This reduction was attributable to lower volumes in all product lines related to the weak market conditions experienced in 2009. This was partially offset by expense savings through cost reduction initiatives and the benefits derived from our restructuring programs. In the Specialty Minerals segment, production margin decreased 12%, or \$14.9 million from the prior year. This is attributable to lower volumes of \$26 million in both the PCC and Processed Minerals product lines, as a result of market conditions as well as permanent and temporary shutdowns in the Paper PCC product line. This was partially offset by manufacturing and expense cost savings of \$6 million and the benefits derived from our restructuring programs of approximately \$4 million. In the Refractories segment, production margin declined 54%, or \$49.7 million from 2008. This was attributable to volume decreases of \$53 million. This was partially offset by cost and expense savings of \$3 million and the benefits derived from our restructuring programs of \$5 million.

Marketing and administrative costs declined 1% to \$90.5 million in 2010 from \$91.1 million in the prior year, and represented 9.0% of net sales as compared with 10.1% in the prior year. This reduction was due to the benefits of the restructuring program and other cost saving initiatives. In 2009, marketing and administrative expenses were 11% lower than in the prior year.

Research and development expenses decreased 2% in 2010 to \$19.6 million from \$19.9 million and represented 2.0% of net sales. This decline was primarily attributable to the operating efficiencies achieved through our cost savings initiatives. In addition, in 2009, the Company incurred \$1.0 million in freight costs to move mobile trial equipment to Asia to support our new products development efforts. In 2009, research and development expense decreased 14% and represented 2.2% of net sales.

Restructuring and other costs during 2010 were \$0.8 million and primarily related to railcar lease early termination costs associated with the announced plant closures of our Franklin, Virginia, and Plymouth, North Carolina, satellite facilities and additional net provisions for severance and other employee benefits.

In 2009, the Company recorded restructuring charges of \$22.0 million and impairment of assets charges of \$39.8 million in 2009. Approximately \$9.4 million of the restructuring charge related to a pension settlement loss in our defined benefit plan in the United States. The remainder of the charge related to provisions for severance and other employee benefits as part of our restructuring program initiated in the second quarter of 2009 as well as additional charges for our restructuring program initiated in 2008.

Restructuring and other costs (2008 program):

In the fourth quarter of 2008, as a result of the worldwide economic downturn and the resulting impact on the Company's sales and operating profits, the Company initiated a restructuring program in which it reduced its workforce by approximately 14% through a combination of permanent reductions and temporary layoffs. The Company recorded a charge of \$3.9 million in the fourth quarter of 2008 associated with this program. Additional charges were recorded in 2009 associated with this program.

Restructuring costs incurred in 2010, 2009 and 2008 relating to the 2008 restructuring program were as follows:

(millions of dollars)

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Severance and other employee benefits.....	\$ 0.0	\$ 0.9	\$ 3.9
Other exit costs	0.0	0.1	--
	<u>\$ 0.0</u>	<u>\$ 1.0</u>	<u>\$ 3.9</u>

The Company expected annualized savings of \$11.0 million as it relates to this program. The Company realized \$11.2 million and \$9.1 million in 2010 and 2009, respectively. Approximately \$4.2 million in severance payments were paid in 2009. This program has been completed.

Restructuring and other costs (2009 program):

In the second quarter of 2009, as a result of the continuation of the severe downturn in the worldwide steel industry, the Company initiated an additional restructuring program, primarily in the Refractories segment, to improve efficiencies through consolidation of manufacturing operations and reduction of costs. This realignment resulted in impairment of asset charges and restructuring charges in the second quarter of 2009 of \$37.5 million and \$8.9 million, respectively.

Restructuring costs incurred in 2010 and 2009 related to the 2009 restructuring program were as follows:

(millions of dollars)

	<u>2010</u>	<u>2009</u>
Severance and other employee benefits.....	\$ 0.5	\$ 10.1
Contract termination costs	(0.4)	0.4
Pension settlement costs	0.0	9.4
Other exit costs.....	0.0	0.2
	<u>\$ 0.1</u>	<u>\$ 20.1</u>

As a result of the workforce reduction associated with the restructuring program and the related distribution of benefits, included in restructuring costs for 2009 are non-cash pension settlement costs of \$9.4 million for some of our pension plans in the U.S.

The restructuring program reduced the workforce by approximately 200 employees worldwide. This reduction in force related to plant consolidations as well as a streamlining of corporate and divisional management structures to operate more efficiently. The Company expected to realize annualized pre-tax cost savings of approximately \$16 million to \$20 million upon completion of the program, of which \$10 million relates to lower compensation and related expenses and \$5 million relates to annualized pre-tax depreciation savings on the write-down of fixed assets. The Company realized compensation and related expense savings of approximately \$20.9 million and \$6.5 million in 2010 and 2009, respectively, which was higher than expected. Depreciation savings were realized upon write down of the assets. Approximately \$3.5 million and \$5.1 million in severance payments were paid in 2010 and 2009, respectively. The Company expects to pay the remaining \$2.0 million liability by the second half of 2011. The payments will be funded from operating cash flows.

The Company recorded an impairment of assets charge of \$37.5 million in the second quarter of 2009 as a result of this realignment. Major components of this realignment, which was primarily in the Refractories segment, were as follows:

Americas Refractories

- The Company consolidated its refractory operations at Old Bridge, New Jersey, into its facilities in Bryan, Ohio, and Baton Rouge, Louisiana, thereby improving operating efficiencies and reducing logistics for key raw materials. The Company recorded an impairment charge of \$4.3 million for this facility.
- The Company rationalized its North American specialty shapes product line and recorded an impairment charge of \$1.5 million.

- The Company also recorded an impairment of assets charge of \$3.7 million for refractory application equipment as a result of underutilized assets at customer locations under depressed volume conditions.

Asia Refractories

- The Company recorded impairment charges of \$10.0 million for its Asian refractory operations as a result of continued difficulties in market penetration from its Chinese and other Asian manufacturing facilities. To take advantage of its strong technological capability in refractories, the Company consolidated its Asian operations and is actively seeking a regional alliance to aid in the marketing of its high value products.

Europe Refractories

- The Company rationalized some of its European operations and recorded an impairment of assets charge of \$2.2 million.
- The Company also recorded an impairment of assets charge of \$3.3 million for refractory application equipment as a result of underutilized assets at customer locations experiencing depressed volume conditions.
- The Company recorded an impairment of assets charge of \$6.0 million for certain intangible assets from its 2006 acquisition of a business in Turkey.

North America Paper PCC

- In the Paper PCC business, the Company recorded an impairment of asset charge of \$6.5 million relating to its satellite PCC facility in Millinocket, Maine. This facility has been idle since September 2008 when the host paper company indefinitely shut one of its paper machines due to rising operational costs. The potential for the startup of our satellite at this facility is unlikely.

Other Assets

- In addition, the Company recorded impairment charges of \$5.6 million to recognize the lower market value of its Mt. Vernon, Indiana, operation, which had been held for sale since October of 2007 and was included in discontinued operations. This business was sold in the fourth quarter of 2009.

The remaining carrying value of the impaired assets was determined by estimating marketplace participant views of the discounted cash flows of the asset groups and, in the case of tangible assets, by estimating the market value of the assets, which due to the specialized and limited use nature of our equipment, is primarily driven by the value of the real estate. As the estimated discounted cash flows were determined to be negative under multiple scenarios, the highest and best use of the tangible asset groups was determined to be a sale of the underlying real estate. The fair value of the significant real estate holdings was based on independent appraisals.

The Company realized, beginning in the third quarter of 2009, annualized pre-tax depreciation savings of approximately \$5 million related to the write-down of fixed assets, of which approximately \$2.4 million was recognized in depreciation savings in 2009.

In the fourth quarter of 2009, the Company also recorded an impairment of assets charge of \$2.0 million and contract termination costs of \$0.9 million for its satellite facility at Franklin, Virginia due to the announced closure of the host mill at that location.

**Income (Loss) from Operations
(Dollars in millions)**

	<u>2010</u>	<u>Growth</u>	<u>2009</u>	<u>Growth</u>	<u>2008</u>
Income (loss) from operations	\$ 98.3	*%	\$ (17.0)	*%	\$ 82.0

* Percentage not meaningful

The Company recorded income from operations in 2010 of \$98.3 million as compared with a loss from operations of \$17.0 million in the prior year. Included in income from operations in 2010 were restructuring charges of \$0.8 million. Included in the 2009 loss from operations were restructuring charges of \$22.0 million and an impairment of assets charge of \$39.8 million.

The Specialty Minerals segment recorded income from operations of \$74.7 million in 2010 as compared with \$34.2 million in the prior year. Included in income from operations in 2010 are restructuring charges of \$0.5 million. Included in income from operations for the prior year are impairment of assets charges of \$8.5 million and restructuring and other exit costs of \$11.5 million.

The Refractories segment recorded income from operations of \$28.0 million in 2010 as compared with a loss from operations of \$48.8 in the previous year. Included in income from operations in 2010 are restructuring costs of \$0.3 million. Included in the loss

from income from operations in the prior year were restructuring charges of \$10.5 million and an impairment of assets charge of \$31.3 million.

In 2009, the Specialty Minerals segment recorded income from operations of \$34.2 million as compared \$57 million in the prior year. The Refractories segment recorded a loss from operations of \$48.8 million as compared with income from operations of \$26.3 million in the previous year.

Non-Operating Income (Deductions)
(Dollars in millions)

	<u>2010</u>	<u>Growth</u>	<u>2009</u>	<u>Growth</u>	<u>2008</u>
Non-operating income (deductions), net	\$ 0.6	* %	\$ (6.1)	* %	\$ 0.3

* Percentage not meaningful

The Company recorded non-operating income of \$0.6 million in 2010 as compared with non-operating deduction of \$6.1 million in the prior year. Included in the non-operating income 2010 was a gain on the sale of previously impaired assets of \$0.2 million and a settlement relating to a customer contract termination of \$0.8 million.

The Company recorded non-operating deductions of \$6.1 million in 2009 as compared with non-operating income of \$0.3 million in 2008. Included in net non-operating deductions in 2009 were foreign currency translation losses of \$2.3 million recognized upon the Company's liquidation of its plant in Gomez Palacio, Mexico. The remaining increase in non-operating deductions as compared with the prior year is primarily related to foreign exchange losses in 2009 as compared to foreign exchange gains in the prior year.

Provision (Benefit) for Taxes on Income
(Dollars in millions)

	<u>2010</u>	<u>Growth</u>	<u>2009</u>	<u>Growth</u>	<u>2008</u>
Provision for taxes on income	\$ 29.0	* %	\$ (5.4)	* %	\$ 24.1

* Percentage not meaningful

The Company recorded provision for taxes on income of \$29.0 million in 2010 as compared to a benefit of \$5.4 million in the previous year. The effective tax rate for 2010 was 29.3% as compared with a tax benefit of 23.3% in the previous year.

The increase in the tax rate in the current year primarily relates to the decrease in the tax benefit of depletion as a percentage of earnings as well as the geographical mix of earnings.

The factors having the most significant impact on our effective tax rates for the three periods are percentage depletion, restructuring and impairments, and the rate differential related to foreign earnings indefinitely invested.

Percentage depletion allowances (tax deductions for depletion that may exceed our tax basis in our mineral reserves) are available to us under the income tax laws of the United States for operations conducted in the United States. The tax benefits from percentage depletion were \$3.7 million in 2010, \$3.2 million in 2009, and \$3.4 million in 2008.

We operate in various countries around the world that have tax laws, tax incentives and tax rates that are significantly different than those of the United States. Many of these differences combine to move our overall effective tax rate higher or lower than the United States statutory rate depending on the mix of income relative to income earned in the United States. The effects of foreign earnings and the related foreign rate differentials resulted in a decrease of income tax of \$3.1 million in 2010, an increase in income tax expense of \$1.0 million in 2009 and a decrease of income tax expense of \$3.7 million in 2008. The increase of income tax benefits in 2010 as compared with 2009 results from the restructuring losses in the foreign jurisdictions in 2009 and the income tax rate differential in the foreign jurisdictions. The decrease of income tax benefits in 2009 as compared to 2008 results from the restructuring losses in foreign jurisdictions and the income tax rate differential in the foreign jurisdictions.

The Company recorded a benefit for taxes on income in 2009 of \$5.4 million as compared to a provision for taxes of \$24.1 million in 2008. The effective rate in 2009 was a benefit of 23.3% as compared with a tax of 29.3% in 2008. This decrease primarily relates to the increase in the tax benefit of depletion as a percentage of the decreased earnings. The tax benefit on the restructuring and impairments charge was \$14.7 million, or, an effective tax benefit of 22.9% on such charge.

In December of 2009, Mexico amended the tax law to require the recapture of certain tax benefits previously recognized from filing a Mexican consolidated tax return. The effect on the Company of this new law was to recognize an additional \$1.5 million in income tax expense.

During 2009, tax expense increased by \$6.2 million due to the establishment of valuation allowances. The valuation allowances were established primarily as a result of the restructuring as it is more likely than not that the deferred tax assets would not be recognized as they relate to the restructured entities.

Income (Loss) from Continuing Operations
(Dollars in millions)

	<u>2010</u>	<u>Growth</u>	<u>2009</u>	<u>Growth</u>	<u>2008</u>
Income (loss) from continuing operations.....	\$ 69.9	*%	\$ (17.7)	*%	\$ 58.2

* Percentage not meaningful

The Company recognized income from continuing operations of \$69.9 million in 2010 as compared to a loss of \$17.7 million in 2009. The loss in 2009 was attributable to the aforementioned impairment of assets and restructuring charges. The Company recorded income from continuing operations of \$58.2 million in 2008.

Income (loss) from Discontinued Operations
(Dollars in millions)

	<u>2010</u>	<u>Growth</u>	<u>2009</u>	<u>Growth</u>	<u>2008</u>
Income (loss) from discontinued operations	\$ --	*%	\$ (3.2)	*%	\$ 10.3

* Percentage not meaningful

In 2009, the Company recognized a loss from discontinued operations of \$3.2 million as compared with income from discontinued operations in the prior year of \$10.3 million. Included in the loss from discontinued operations for 2009 was impairment of assets charge of \$5.6 million, net of tax. The Company recorded this impairment charge to reflect the lower market value of its Mt. Vernon, Indiana, facility which was sold in the fourth quarter of 2009. Proceeds approximated the net book value.

Included in the 2008 income from discontinued operations was a pre-tax gain on sale of idle facilities previously written down of \$13.9 million.

Noncontrolling Interests
(Dollars in millions)

	<u>2010</u>	<u>Growth</u>	<u>2009</u>	<u>Growth</u>	<u>2008</u>
Noncontrolling interests	\$ 3.0	3%	\$ 2.9	(10)%	\$ 3.2

The increase in the income attributable to non-controlling interests is due to the higher profitability in our joint ventures.

Net Income (Loss) attributable to Minerals Technologies Inc. (MTI)
(Dollars in millions)

	<u>2010</u>	<u>Growth</u>	<u>2009</u>	<u>Growth</u>	<u>2008</u>
Net income (loss) attributable to MTI.....	\$ 66.9	*%	\$ (23.8)	*%	\$ 65.3

* Percentage not meaningful

The Company recorded net income of \$66.9 million in 2010 as compared with a net loss of \$23.8 million in 2009. The loss in 2009 was attributable to impairment of assets and restructuring charges.

The Company recorded a net income of \$65.3 million in 2008.

Outlook

Looking forward, we remain cautious about the state of the global economy and the impact it will have on our product lines. Although we saw some market stabilization and improvement in 2010, there remains uncertainty as to the sustainability of the upturn.

In 2011, we plan to focus on the following growth strategies:

- Continue development of multiple high-filler technologies, such as filler-fiber, under the Fulfill™ platform of products, to increase the fill rate in freesheet paper.
- Increase market penetration of PCC for paper filling at both freesheet and groundwood mills, particularly in emerging markets.
- Further expansion of the Company's PCC coating product line using the satellite model.
- Emphasize higher value specialty products and application systems to increase market penetration in the Refractories segment and expand our solid core wire line into BRIC and other Asian countries.
- Expand regionally into emerging markets, particularly to China and India.
- Development of unique calcium carbonates used in the manufacture of biopolymers, a new market opportunity.
- Continue to improve our cost competitiveness in all product lines.
- Explore selective acquisitions to fit our core competencies in minerals and fine particle technology.

However, there can be no assurances that we will achieve success in implementing any one or more of these strategies.

Liquidity and Capital Resources

Cash flows provided from operations in 2010 were used principally to fund \$34.5 million of capital expenditures, repay short term and long-term debt of \$5.9 million, and repurchase \$27.9 million in treasury shares. Cash provided from operating activities totaled \$142.4 million in 2010 as compared with \$160.8 million in 2009. The decrease in cash from operating activities was primarily due to changes in working capital, primarily relating to a small increase in inventory levels in 2010 as compared a large decrease in 2009, partially offset by higher accounts payable balances. Included in cash flow from operations was pension plan funding of approximately \$8.5 million, \$7.8 million and \$3.2 million for the years ended December 31, 2010, 2009 and 2008, respectively.

Working capital is defined as trade accounts receivable, trade accounts payable and inventories. Working capital increased approximately 4% from December 2009. Our total days of working capital remained even at 59 days in 2010 from 2009. The Company's days of inventory on hand increased to 40 days in 2010 from 38 days in 2009. Our days of sales outstanding increased to 61 days in 2010 from 59 days in 2009. Our accounts receivable balances increased in December 2010 when compared with December 2009 primarily due to higher sales levels in the fourth quarter of 2010 as compared with the fourth quarter of 2009.

The Company's pension plans are over 85% funded, and presently there are no minimum funding requirements necessary.

On February 22, 2010 the Company's Board of Directors authorized the Company's management to repurchase, at its discretion, up to \$75 million of shares over a two-year period. As of December 31, 2010, 529,620 shares have been repurchased under this program at an average price of approximately \$56.63 per share.

On January 26, 2011, the Company's Board of Directors declared a regular quarterly dividend on its common stock of \$0.05 per share. No dividend will be payable unless declared by the Board and unless funds are legally available for payment thereof.

The following table summarizes our contractual obligations as of December 31, 2010:

Contractual Obligations

(millions of dollars)	Total	Payments Due by Period			
		Less Than 1 Year	1-3 Years	3-5 Years	After 5 Years
Debt.....	\$ 92.6	\$ --	\$ 8.0	\$ 84.6	\$ --
Operating lease obligations	19.8	5.0	4.5	3.6	6.7
Total contractual obligations.....	\$ 112.4	5.0	12.5	88.2	6.7

We have \$184.5 million in uncommitted short-term bank credit lines, of which \$4.3 million was in use at December 31, 2010. The credit lines are primarily in the US, with approximately \$14 million or 8% outside the US. The credit lines are generally one year in term at competitive market rates at large well-established institutions. The Company typically uses its available credit lines to fund working capital requirements or local capital spending needs. At the present time, we have no indication that the financial institutions would be unable to commit to these lines of credit should the need arise. We anticipate that capital expenditures for 2011 should be between \$60 million to \$75 million, principally related to the construction of PCC plants and other opportunities that meet our strategic growth objectives. We expect to meet our other long-term financing requirements from internally generated funds, uncommitted bank credit lines and, where appropriate, project financing of certain satellite plants. The aggregate maturities of long-term debt are as follows: 2011 - \$-- million; 2012 - \$8.0 million; 2013 - \$76.4 million; 2014 - \$8.2 million; 2015 - \$-- million; thereafter - \$-- million.

The Company's debt to capital ratio is 11%, which is well below the only financial covenant ratio in its debt agreements.

The Company has contingent obligations associated with unrecognized tax benefits, including interest and penalties, of approximately \$6.5 million.

Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities.

On an ongoing basis, we evaluate our estimates and assumptions, including those related to revenue recognition, allowance for doubtful accounts, valuation of inventories, valuation of long-term assets, goodwill and other intangible assets, pension plan assumptions, income taxes, asset retirement obligations, income tax valuation allowances, stock-based compensation, and litigation and environmental liabilities. We base our estimates on historical experience and on other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that cannot readily be determined from other sources. There can be no assurance that actual results will not differ from those estimates.

We believe the following critical accounting policies require us to make significant judgments and estimates in the preparation of our consolidated financial statements:

- Revenue recognition: Revenue from sale of products is recognized at the time the goods are shipped and title passes to the customer. In most of our PCC contracts, the price per ton is based upon the total number of tons sold to the customer during the year. Under those contracts, the price billed to the customer for shipments during the year is based on periodic estimates of the total annual volume that will be sold to the customer. Revenues are adjusted at the end of each year to reflect the actual volume sold. There were no significant revenue adjustments in the fourth quarter of 2010 and 2009, respectively. We have consignment arrangements with certain customers in our Refractories segment. Revenues for these transactions are recorded when the consigned products are consumed by the customer. Revenues from sales of equipment are recorded upon completion of installation and receipt of customer acceptance. Revenues from services are recorded when the services are performed.
- Allowance for doubtful accounts: Substantially all of our accounts receivable are due from companies in the paper, construction and steel industries. Accounts receivable are reduced by an allowance for amounts that may become uncollectible in the future. Such allowance is established through a charge to the provision for bad debt expenses. We recorded bad debt expenses (recoveries) of \$0.1 million, \$1.2 million and \$0.2 million in 2010, 2009 and 2008, respectively. In addition to specific allowances established for bankrupt customers, we also analyze the collection history and financial condition of our other customers considering current industry conditions and determine whether an allowance needs to be established or adjusted.
- Property, plant and equipment, goodwill, intangible and other long-lived assets: Property, plant and equipment are depreciated over their useful lives. Useful lives are based on management's estimates of the period that the assets can generate revenue, which does not necessarily coincide with the remaining term of a customer's contractual obligation to purchase products made using those assets. Our sales of PCC are predominately pursuant to long-term evergreen contracts, initially ten years in length, with paper mills at which we operate satellite PCC plants. The terms of many of these agreements have been extended, often in connection with an expansion of the satellite PCC plant. Failure of a PCC customer to renew an agreement or continue to purchase PCC from our facility could result in an impairment of assets or accelerated depreciation at such facility.
- Valuation of long-lived assets, goodwill and other intangible assets: We assess the possible impairment of long-lived assets and identifiable amortizable intangibles whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Goodwill is reviewed for impairment at least annually. Factors we consider important that could trigger an impairment review include the following:
 - Significant under-performance relative to historical or projected future operating results;
 - Significant changes in the manner of use of the acquired assets or the strategy for the overall business;
 - Significant negative industry or economic trends;
 - Market capitalization below invested capital.

The Company conducts its goodwill impairment testing for each Reporting Unit as of the beginning of the fourth quarter with the assistance of valuation specialists. There is a two-step process for testing of goodwill impairment and measuring the magnitude of any impairment. Step One involves a) developing the fair value of total invested capital of each Reporting Unit in which goodwill is assigned; and b) comparing the fair value of total invested capital for each Reporting Unit to its carrying amount, to determine if there is goodwill impairment. Should the carrying amount for a Reporting Unit exceed its fair value, then the Step One test is failed, and the magnitude of any goodwill impairment is determined under Step Two. The amount of impairment loss is determined in Step Two by comparing the implied fair value of Reporting Unit goodwill with the carrying amount of goodwill.

The Company has three Reporting Units, PCC, Processed Minerals and Refractories. We identify our reporting units by assessing whether the components of our operating segments constitute businesses for which discrete financial information is available and management regularly reviews the operating results of those components.

The Company performed its annual goodwill impairment test for all reporting units in the fourth quarter of 2010. The fair value of each reporting unit materially exceeded the carrying value of each reporting unit.

The goodwill balance for each reporting unit as of December 31, 2010 and 2009, respectively, was as follows:

(\$ in millions)	December 31, 2010	December 31, 2009
PCC	\$ 9.2	\$ 9.5
Processed Minerals	4.6	4.6
Refractories	53.3	54.0
Total	\$ 67.2	\$ 68.1

The Invested Capital for each reporting units as of October 4, 2010 were as follows:

(\$ in millions)	<u>Invested Capital</u>
PCC	\$ 430.5
Processed Minerals	\$ 136.5
Refractories	\$ 321.2

The fair value of each of its reporting units were materially in excess of the carrying value.

The Company had approximately \$375 million in cash and short term investments as of October 4, 2010, which would increase both the Invested Capital and Estimated Fair Values by the same amounts.

We estimate fair value of our reporting units by applying information available at the time of the valuation to industry accepted models using an income approach and market approach. The income approach incorporates the discounted cash flow method and focuses on the expected cash flow of the Reporting Unit. Under the market approach, the Guideline Company Method was utilized. The Guideline Company Method focuses on comparing the Reporting Units' risk profile and growth prospects to selected similar publicly traded companies. We believe the income and market approaches are equally relevant to the determination of reporting unit fair value and we therefore assigned equal weighting to each method.

The key assumptions we used in the income approach included revenue growth rates and profit margins based upon forecasts derived from available industry market data, a terminal growth rate and estimated weighted-average cost of capital based on market participants for which the discount rates were determined.

For the Refractories reporting unit, our compound annual sales growth assumption from 2010 to 2015 is 5%. Our gross profit margin is forecast at between 23% and 24% over the next five years. The 2010 gross profit margin was 22.5%. The terminal growth rates were projected at 3% after five years, which reflects our estimate of long-term market and gross domestic product growth. We utilized discount rates of 12% and 13% in the valuation and, in addition, incorporated a company specific risk premium.

For the PCC and Processed Minerals reporting units, our compound annual sales growth assumptions from 2010 to 2015 are 5.8% and 3.6% respectively. Our gross profit margin is forecast at between 18% and 20% over the next five years. The 2010 gross profit percentages for PCC and Processed Minerals was 20% and 19%, respectively. The terminal growth rates were projected at 3% after five years, which reflects our estimate of long-term market and gross domestic product growth. We utilized discount rates of 12% and 13% in the valuation and, in addition, incorporated a company specific risk premium.

The key assumptions we used in the market approach represent multiples of Sales and EBITDA and were derived from comparable publicly traded companies with similar operating characteristics as the reporting units. The market multiples used in our assumptions ranged from 1.0 to 1.3 times 2011 forecasted Sales and ranged from 5.0 to 8.0 times 2011 forecasted EBITDA.

The impairment testing involves the use of accounting estimates and assumptions. Actual results different from such estimates and assumptions could materially impact our financial condition or operating performance.

- Accounting for income taxes: As part of the process of preparing our consolidated financial statements, we are required to estimate our income taxes in each of the jurisdictions in which we operate. This process involves estimating current tax expense together with assessing temporary differences resulting from differing treatments of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in the consolidated balance sheet. We must then assess the likelihood that our deferred tax assets will be recovered from future taxable income, and to the extent we believe that recovery is not likely, we must establish a valuation allowance. To the extent we establish a valuation allowance or

increase this allowance in a period, we must include an expense within the tax provision in the Consolidated Statements of Operations.

Deferred income tax assets represent amounts available to reduce income taxes payable on taxable income in future years. Such assets arise because of temporary differences between the financial reporting and tax bases of assets and liabilities, as well as from net operating loss. We evaluate the recoverability of these future tax deductions by assessing the adequacy of future expected taxable income from all sources, including reversal of taxable temporary differences and forecasted operating earnings. These sources of income inherently rely heavily on estimates. We use our historical experience and business forecasts to provide insight. Amounts recorded for deferred tax assets, net of valuation allowances, were \$28.9 million and \$28.5 million at December 31, 2010 and 2009, respectively. Such year-end 2010 amounts are expected to be fully recoverable within the applicable statutory expiration periods. To the extent we do not consider it more likely than not that a deferred tax asset will be recovered, a valuation allowance is established.

The application of income tax law is inherently complex. Laws and regulations in this area are voluminous and are often ambiguous. As such, we are required to make many subjective assumptions and judgments regarding our income tax exposures. Interpretations of and guidance surrounding income tax laws and regulations change over time. As such, changes in our subjective assumptions and judgments can materially affect amounts recognized in the consolidated balance sheets and statements of operations. See Note 5 to the condensed consolidated financial statements, "Income Taxes," for additional detail on our uncertain tax positions.

- **Pension Benefits:** We sponsor pension and other retirement plans in various forms covering the majority of employees who meet eligibility requirements. Several statistical and actuarial models which attempt to estimate future events are used in calculating the expense and liability related to the plans. These models include assumptions about the discount rate, expected return on plan assets and rate of future compensation increases as determined by us, within certain guidelines. Our assumptions reflect our historical experience and management's best judgment regarding future expectations. In addition, our actuarial consultants also use subjective factors such as withdrawal and mortality rates to estimate these assumptions. The actuarial assumptions used by us may differ materially from actual results due to changing market and economic conditions, higher or lower withdrawal rates or longer or shorter life spans of participants, among other things. Differences from these assumptions may result in a significant impact to the amount of pension expense/liability recorded by us follows:

A one percentage point change in our major assumptions would have the following effects.

Effect on Expense

(millions of dollars)	Discount Rate	Salary Scale	Return on Asset
1% increase.....	\$ (2.7)	\$ 0.4	\$ (1.2)
1% decrease	\$ 3.2	\$ (0.3)	\$ 1.2

Effect on Projected Benefit Obligation

(millions of dollars)	Discount Rate	Salary Scale
1% increase.....	\$ (22.6)	\$ 2.0
1% decrease	\$ 28.1	\$ (1.8)

The investment strategy for pension plan assets is to maintain a broadly diversified portfolio designed to achieve our target of an average long-term rate of return of 7.4%. While we believe we can achieve a long-term average rate of return of 7.4%, we can not be certain that the portfolio will perform to our expectations. From inception through October 31, 2008, assets were strategically allocated among equity, debt and other investments to achieve a diversification level that dampens fluctuations in investment returns. The Company's long-term investment strategy had an investment portfolio mix of approximately 65% in equity securities and 35% in fixed income securities. The Company's 16-year average rate of return on assets through December 31, 2010 was over 9% on its investment assets despite the significant losses realized in 2008. During the fourth quarter of 2008, the Company adopted a capital conservation strategy as a result of the severe market volatility experienced in the latter part of 2008. As part of this strategy, the Company temporarily invested its pension assets in fixed income securities due to the uncertainty in the markets but had not changed its long-term investment strategy. During the third quarter of 2009, we began a program of systematically moving funds back into equities. As of December 31, 2010, the Company had approximately 70% of its pension assets in equity securities and 30% in fixed income securities.

- **Asset Retirement Obligations:** We currently record the obligation for estimated asset retirement costs at a fair value in the period incurred. Factors such as expected costs and expected timing of settlement can affect the fair

value of the obligations. A revision to the estimated costs or expected timing of settlement could result in an increase or decrease in the total obligation which would change the amount of amortization and accretion expense recognized in earnings over time.

A one-percent increase or decrease in the discount rate would change the total obligation by approximately \$0.1 million.

A one-percent increase or decrease in the inflation rate would change the total obligation by approximately \$0.3 million.

- The Company uses the Black-Scholes option pricing model to determine the fair value of stock options on their date of grant. This model is based upon assumptions relating to the volatility of the stock price, the life of the option, risk-free interest rate and dividend yield. Of these, stock price volatility and option life require greater levels of judgment and are therefore critical accounting estimates.

We used a stock price volatility assumption based upon the historical and implied volatility of the Company's stock. We believe this is a good indicator of future, actual and implied volatilities. For stock options granted in the period ended December 31, 2010, the Company used a volatility assumption of 28.75%.

The expected life calculation was based upon the observed and expected time to post-vesting forfeiture and exercise. For stock options granted during the fiscal year ended December 31, 2010, the Company used a 6.3 year life assumption.

The Company believes the above critical estimates are based upon outcomes most likely to occur, however, were we to simultaneously increase or decrease the option life by one year and the volatility by 100 basis points, recognized compensation expense would have changed approximately \$0.1 million in either direction for the year ended December 31, 2010.

For a detailed discussion on the application of these and other accounting policies, see "Summary of Significant Accounting Policies" in the "Notes to the Consolidated Financial Statements" in Item 15 of this report, beginning on page F-6. This discussion and analysis should be read in conjunction with the consolidated financial statements and related notes included elsewhere in this report.

Inflation

Historically, inflation has not had a material adverse effect on us. However, in recent years both business segments have been affected by rapidly rising raw material and energy costs. The Company and its customers will typically negotiate reasonable price adjustments in order to recover a portion of these rapidly escalating costs. As the contracts pursuant to which we construct and operate our satellite PCC plants generally adjust pricing to reflect increases in costs resulting from inflation, there is a time lag before such price adjustments can be implemented.

Cyclical Nature of Customers' Businesses

The bulk of our sales are to customers in the paper manufacturing, steel manufacturing and construction industries, which have historically been cyclical. The pricing structure of some of our long-term PCC contracts makes our PCC business less sensitive to declines in the quantity of product purchased. However, we cannot predict the economic outlook in the countries in which we do business, nor in the key industries we serve.

Recently Issued Accounting Standards

In December 2010, the FASB issued authoritative guidance that updates existing disclosure requirements related to supplementary pro forma information for business combinations. Under the updated guidance, a public entity that presents comparative financial statements should disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The guidance also expands the supplemental pro forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. This guidance will be effective for fiscal years beginning after December 31, 2010.

In January 2010, the FASB issued guidance that requires new disclosures, and clarifies existing disclosure requirements, about fair value measurements. The clarifications and the requirement to separately disclose transfers of instruments between level 1 and level 2 of the fair value hierarchy was effective for interim reporting periods in 2010; however, the requirement to provide purchases, sales, issuances and settlements in the level 3 roll forward on a gross basis becomes effective in 2011.

In October 2009, the FASB amended the accounting and disclosure requirements for revenue recognition. These amendments, effective in 2011, modify the criteria for recognizing revenue in multiple element arrangements and the scope of what constitutes a

non-software deliverable. The implementation of this guidance is not expected to have a material impact on our consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

Market risk represents the risk of loss that may have an impact on our financial position, results of operations or cash flows due to adverse changes in market prices and foreign currency and interest rates. We are exposed to market risk because of changes in foreign currency exchange rates as measured against the U.S. dollar. We do not anticipate that near-term changes in exchange rates will have a material impact on our future earnings or cash flows. However, there can be no assurance that a sudden and significant change in the value of foreign currencies would not have a material adverse effect on our financial condition and results of operations. Approximately 47% of our bank debt bears interest at variable rates; therefore our results of operations would only be affected by interest rate changes to such bank debt outstanding. An immediate 10% change in interest rates would not have a material effect on our results of operations over the next fiscal year.

We do not enter into derivatives or other financial instruments for trading or speculative purposes. When appropriate, we enter into derivative financial instruments, such as forward exchange contracts and interest rate swaps, to mitigate the impact of foreign exchange rate movements and interest rate movements on our operating results. The counterparties are major financial institutions. Such forward exchange contracts and interest rate swaps would not subject us to additional risk from exchange rate or interest rate movements because gains and losses on these contracts would offset losses and gains on the assets, liabilities, and transactions being hedged. We had open forward exchange contracts to purchase approximately \$ 3.2 million and \$4.6 million of foreign currencies as of December 31, 2010 and 2009, respectively. These contracts mature between January and July of 2011. The fair value of these instruments at December 31, 2010 and December 31, 2009 was a liability of \$0.2 million and \$0.1 million, respectively.

In 2008, the Company entered into forward contracts to sell 30 million Euros as a hedge of its net investment in Europe. These contracts mature in October 2013. The fair value of these instruments at December 31, 2010 was an asset of \$2.7 million. The fair value of these instruments at December 31, 2009 was a liability of \$0.6 million.

Item 8. Financial Statements and Supplementary Data

The financial information required by Item 8 is contained in Item 15 of Part IV of this report.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Disclosure Controls and Procedures

As of the end of the period covered by this report, and under the supervision and with participation of the Company's management, including the Chief Executive Officer and the Chief Financial Officer, the Company carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures, pursuant to Exchange Act Rule 13a-15(b). Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of December 31, 2010.

Pursuant to Section 404 of the Sarbanes-Oxley Act of 2002, we have included a report of management's assessment of the design and operating effectiveness of our internal controls as part of this report. Management's report is included in our consolidated financial statements beginning on page F-1 of this report under the caption entitled "Management's Report on Internal Control Over Financial Reporting."

The Company has substantially completed the implementation of a global enterprise resource planning ("ERP") system to manage its business operations. As of December 31, 2010, all of our domestic and European locations were using the new systems. The transition to the new system has proceeded to date without any adverse effects to internal controls. We believe that the controls as modified are appropriate and functioning effectively.

Changes in Internal Control Over Financial Reporting

There was no change in the Company's internal control over financial reporting during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Reform Act") was enacted. Section 1503 of the Reform Act contains new reporting requirements regarding coal or other mine safety. The Company, through its

subsidiaries Specialty Minerals Inc. and Barretts Minerals Inc., operates four mines or mine complexes in the United States. The operation of our mines is subject to regulation by the federal Mine Safety and Health Administration (“MSHA”) under the Federal Mine Safety and Health Act of 1977 (the “Mine Act”). MSHA inspects our mines on a regular basis and issues various citations and orders when it believes a violation has occurred under the Mine Act.

The following table sets forth the information required by the Reform Act with respect to each mine or mine complex for which we are the operator for the period October 4, 2010 to December 31, 2010 (number of occurrences, except for proposed assessment dollar values):

<u>Mining Complex</u>	<u>Section 104(a) – S&S</u> (A)	<u>Section 104(b)</u> (B)	<u>Section 104(d)</u> (C)	<u>Section 110(b)(2)</u> (D)	<u>Section 107(a)</u> (E)	<u>Proposed Assessments</u> (F)	<u>Fatalities</u> (G)
Lucerne Valley, CA	0	0	0	0	0	0	0
Canaan, CT	0	0	0	0	0	0	0
Adams, MA	0	0	0	0	0	0	0
Dillon, MT*	0	0	0	0	0	0	0

The following table sets forth the information required by the Reform Act with respect to each mine or mine complex for which we are the operator for the period January 1, 2010 to December 31, 2010 (number of occurrences, except for proposed assessment dollar values):

<u>Mining Complex</u>	<u>Section 104(a) – S&S</u> (A)	<u>Section 104(b)</u> (B)	<u>Section 104(d)</u> (C)	<u>Section 110(b)(2)</u> (D)	<u>Section 107(a)</u> (E)	<u>Proposed Assessments</u> (F)	<u>Fatalities</u> (G)
Lucerne Valley, CA	1	0	0	0	0	\$2,066.00	0
Canaan, CT	0	0	0	0	0	\$517.00	0
Adams, MA	5	0	0	0	0	\$6,319.00	0
Dillon, MT*	1	0	0	0	0	\$1,707.00	0

* Our mining complex at Dillon, MT consists of three mines separately identified by MSHA.

- (A) The total number of violations of mandatory health or safety standards that could significantly and substantially contribute to the cause and effect of a mine safety or health hazard under section 104 of the Mine Act for which we received a citation from MSHA.
- (B) The total number of orders issued under section 104(b) of the Mine Act.
- (C) The total number of citations and orders for unwarrantable failure of the Company to comply with mandatory health or safety standards under section 104(d) of the Mine Act.
- (D) The total number of flagrant violations under section 110(b)(2) of the Mine Act.
- (E) The total number of imminent danger orders issued under section 107(a) of the Mine Act.
- (F) The total dollar value of proposed assessments from MSHA under the Mine Act.
- (G) The total number of mining-related fatalities.

During the period October 4, 2010 to December 31, 2010, and for the full year January 1, 2010 to December 31, 2010, we did not receive any written notice from MSHA, with respect to any mine or mine complex for which we are the operator, of (A) a pattern of violations of mandatory health or safety standards that are of such nature as could have significantly and substantially contributed to the cause and effect of mine health and safety hazards under section 104(e) of the Mine Act or (B) the potential to have such a pattern.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Set forth below are the names and ages of all Executive Officers of the Registrant indicating all positions and offices with the Registrant held by each such person, and each such person's principal occupations or employment during the past five years.

<u>Name</u>	<u>Age</u>	<u>Position</u>
Joseph C. Muscari.....	64	Chairman of the Board and Chief Executive Officer
Douglas T. Dietrich,.....	41	Senior Vice President, Finance, and Chief Financial Officer
D. Randy Harrison	59	Senior Vice President, Supply Chain
D.J. Monagle, III.....	48	Senior Vice President and Managing Director, Paper PCC
William J.S. Wilkins	54	Senior Vice President and Managing Director, Minteq International
Michael A. Cipolla.....	53	Vice President, Corporate Controller and Chief Accounting Officer
J. Michael Harley.....	50	Vice President, Corporate Development and Treasury
Douglas W. Mayger.....	53	Vice President and Managing Director, Performance Minerals
Thomas J. Meek.....	53	Vice President, General Counsel and Secretary
Janet L. Walsh	56	Vice President, Human Resources

Joseph C. Muscari was elected Chairman of the Board and Chief Executive Officer effective March 1, 2007. Prior to that, he was Executive Vice President and Chief Financial Officer of Alcoa Inc. He has served as a member of the Board of Directors since 2005.

Douglas T. Dietrich was elected Senior Vice President, Finance and Chief Financial Officer effective January 1, 2011. Prior to that, he was appointed Vice President, Corporate Development and Treasury effective August 2007. He had been Vice President, Alcoa Wheel Products since 2006 and President, Latin America Extrusions and Global Rod and Bar Products since 2002.

D. Randy Harrison was elected Senior Vice President, Supply Chain effective November 2010. Prior to that, he was elected Senior Vice President, Organization and Human Resources effective January 1, 2008. Prior to that, he had been Vice President and Managing Director, Performance Minerals since January 2002.

D.J. Monagle, III was elected Senior Vice President and Managing Director, Paper PCC, effective October 1, 2008. In November 2007, he was appointed Vice President and Managing Director - Performance Minerals. He joined the Company in January of 2003 and held positions of increasing responsibility including Vice President, Americas, Paper PCC and Global Marketing Director, Paper PCC.

William J.S. Wilkins was elected Senior Vice President and Managing Director, Minteq International in November 2007. He joined the Company in June 2007 as Vice President, Global Supply Chain and Logistics. Prior to that, he had founded Management Services, a consulting firm. Before starting his consultancy, he was President and Chief Executive Officer of Sermatech International Inc.; Vice President and Chief Financial Officer of the Teleflex Aerospace Group; and head of finance and administration at Howmet Castings, a business unit of Alcoa, which he joined in 1994.

Michael A. Cipolla was elected Vice President, Corporate Controller and Chief Accounting Officer in July 2003. Prior to that, he served as Corporate Controller and Chief Accounting Officer of the Company since 1998. From 1992 to 1998 he served as Assistant Corporate Controller.

J. Michael Harley was elected Vice President, Corporate Development and Treasury effective November 2010. Prior to that he was founder of GrowthPhases, LLC and GrowthPhases® Alliance, a consulting and interim management alliance with members in Asia, Europe, and the Americas. Prior to establishing GrowthPhases, he served as Director of Mergers and Acquisitions at Monsanto Company.

Douglas W. Mayger was elected Vice President and Managing Director, Performance Minerals which encompasses the Processed Minerals product line and the Specialty PCC product line, effective October 1, 2008. Prior to that, he was General Manager-Carbonates West, Performance Minerals and Business Manager - Western Region. Before joining the Company as plant manager in Lucerne Valley in 2002, he served as Vice President of Operations for Aggregate Industries.

Thomas J. Meek was elected Vice President, General Counsel and Secretary of the Company effective September 1, 2009. Prior to that, he served as Deputy General Counsel at Alcoa. Before joining Alcoa in 1999, Mr. Meek worked with Koch Industries, Inc. of Wichita, Kansas, where he held numerous supervisory positions. His last position there was Interim General Counsel. From 1985 to 1990, Mr. Meek was an Associate/Partner in the Wichita, Kansas law firm of McDonald, Tinker, Skaer, Quinn & Herrington, P.A.

Janet L. Walsh was elected Vice President, Human Resources effective November 2010. Prior to that, she founded Birchtree Global, LLC in 1999, a consulting firm that provided management expertise in human resources, financial, tax, legal and immigration

management to clients worldwide. Prior to that, she served as Director, Global Human Resources for the Mead Corporation. She also served as Senior Adjunct Professor and curriculum author at the Keller Graduate School of DeVry University from 1994 to 2010.

The information appearing in the Company's Proxy Statement under the caption "Principal Accountant Fees and Services" is incorporated herein by reference.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) The following documents are filed as part of this report:

1. Financial Statements. The following Consolidated Financial Statements of Mineral Technologies Inc. and subsidiary companies and Reports of Independent Registered Public Accounting Firm are set forth on pages F-2 to F-35.

- Consolidated Balance Sheets as of December 31, 2010 and 2009
- Consolidated Statements of Operations for the years ended December 31, 2010, 2009 and 2008
- Consolidated Statements of Cash Flows for the years ended December 31, 2010, 2009 and 2008
- Consolidated Statements of Shareholders' Equity for the years ended December 31, 2010, 2009 and 2008
- Notes to the Consolidated Financial Statements
- Reports of Independent Registered Public Accounting Firm
- Management's Report on Internal Control Over Financial Reporting

2. Financial Statement Schedule. The following financial statement schedule is filed as part of this report:

	<u>Page</u>
Schedule II - Valuation and Qualifying Accounts	S-1

All other schedules for which provision is made in the applicable accounting regulations of the SEC are not required under the related instructions or are inapplicable and, therefore, have been omitted.

3. Exhibits. The following exhibits are filed as part of, or incorporated by reference into, this report.

- 3.1 - Restated Certificate of Incorporation of the Company (1)
- 3.2 - By-Laws of the Company as amended and restated effective May 25, 2005 (2)
- 3.3 - Certificate of Designations authorizing issuance and establishing designations, preferences and rights of Series A Junior Preferred Stock of the Company (1)
- 4.1 - Specimen Certificate of Common Stock (1)
- 10.1 - Asset Purchase Agreement, dated as of September 28, 1992, by and between Specialty Refractories Inc. and Quigley Company Inc. (3)
- 10.1(a) - Agreement dated October 22, 1992 between Specialty Refractories Inc. and Quigley Company Inc., amending Exhibit 10.1 (4)
- 10.1(b) - Letter Agreement dated October 29, 1992 between Specialty Refractories Inc. and Quigley Company Inc., amending Exhibit 10.1 (4)
- 10.2 - Reorganization Agreement, dated as of September 28, 1992, by and between the Company and Pfizer Inc (3)
- 10.3 - Asset Contribution Agreement, dated as of September 28, 1992, by and between Pfizer Inc and Specialty Minerals Inc. (3)
- 10.4 - Asset Contribution Agreement, dated as of September 28, 1992, by and between Pfizer Inc and Barretts Minerals Inc. (3)
- 10.4(a) - Agreement dated October 22, 1992 between Pfizer Inc, Barretts Minerals Inc. and Specialty Minerals Inc., amending Exhibits 10.3 and 10.4 (4)
- 10.5 - Employment Agreement, dated November 27, 2006, between the Company and Joseph C. Muscari (5) (+)
- 10.5(a) - Second to Employment Agreement, dated July 21, 2010, between the Company and Joseph C. Muscari (29) (+)
- 10.6 - Form of Employment Agreement between the Company and each of Michael A. Cipolla, Douglas T. Dietrich, J. Michael Harley, D. Randy Harrison, Douglas W. Mayger, Thomas J. Meek, D.J. Monagle, III, Janet L. Walsh and William J.S. Wilkins (6) (+)
- 10.6(a) - Form of amendment to Employment Agreement between the Company and each of Joseph C. Muscari, Michael A. Cipolla, Douglas T. Dietrich, J. Michael Harley, D. Randy Harrison, Douglas W. Mayger, Thomas J. Meek, D.J. Monagle, III, Janet L. Walsh and William J.S. Wilkins (7) (+)
- 10.7 - Form of Severance Agreement between the Company and each of Joseph C. Muscari, Michael A. Cipolla, Douglas T. Dietrich, J. Michael Harley, D. Randy Harrison, Douglas W. Mayger, Thomas J. Meek, D.J. Monagle, III, Janet L. Walsh and William J.S. Wilkins (8) (+)
- 10.7(a) - Form of amendment to Severance Agreement between the Company and each of Joseph C. Muscari, Michael A. Cipolla, Douglas T. Dietrich, J. Michael Harley, D. Randy Harrison, Douglas W. Mayger, Thomas J. Meek, D.J. Monagle, III, Janet L. Walsh and William J.S. Wilkins (9) (+)

- 10.8 - Form of Indemnification Agreement between the Company and each of Joseph C. Muscari, Michael A. Cipolla, Douglas T. Dietrich, J. Michael Harley, D. Randy Harrison, Douglas W. Mayger, Thomas J. Meek, D.J. Monagle, III, Janet L. Walsh and William J.S. Wilkins (10) (+)
- 10.9 - Company Employee Protection Plan, as amended August 27, 1999 (11) (+)
- 10.10 - Company Nonfunded Deferred Compensation and Unit Award Plan for Non-Employee Directors, as amended and restated effective January 1, 2008 (12) (+)
- 10.11 - 2001 Stock Award and Incentive Plan of the Company, as amended and restated as of March 18, 2009 (13) (+)
- 10.12 - Company Retirement Plan, as amended and restated effective as of January 1, 2006 (14) (+)
- 10.12(a) - First Amendment to the Company Retirement Plan, effective as of January 1, 2008 (15) (+)
- 10.12(b) - Second Amendment to the Company Retirement Plan, dated December 22, 2008 (16) (+)
- 10.12(c) - Third Amendment to the Company Retirement Plan, dated October 9, 2009 (17) (+)
- 10.12(d) - Fourth Amendment to the Company Retirement Plan, dated December 11, 2009 (18) (+)
- 10.12(e) - Fifth Amendment to the Company Retirement Plan, dated December 18, 2009 (19) (+)
- 10.12(f) - Sixth Amendment to the Company Retirement Plan, dated December 17, 2010 (*) (+)
- 10.13 - Company Supplemental Retirement Plan, amended and restated effective December 31, 2008 (20) (+)
- 10.14 - Company Savings and Investment Plan, as amended and restated as of September 14, 2007 (21) (+)
- 10.14(a) - First Amendment to the Company Savings and Investment Plan, dated December 22, 2008 (22) (+)
- 10.14(b) - Second Amendment to the Company Savings and Investment Plan, dated December 18, 2009 (23) (+)
- 10.14(c) - Third Amendment to the Company Savings and Investment Plan, dated December 17, 2010 (*) (+)
- 10.15 - Company Supplemental Savings Plan, amended and restated effective December 31, 2008 (24) (+)
- 10.16 - Company Health and Welfare Plan, effective as of April 1, 2003 and amended and restated as of January 1, 2006 (25)(+)
- 10.16(a) - Amendment to the Company Health and Welfare Plan, dated May 19, 2009 (26) (+)
- 10.17 - Company Retiree Medical Plan, effective as of January 1, 2011 (*) (+)
- 10.18 - Amended and Restated Grantor Trust Agreement, dated as of April 1, 2010, by and between the Company and the Wilmington Trust Company (27)(+)

See Notes to Consolidated Financial Statements, which are an integral part of these statements.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying consolidated financial statements include the accounts of Minerals Technologies Inc. (the "Company") and its wholly and majority-owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Certain reclassifications were made to prior year amounts to conform to current year presentation.

Use of Estimates

The Company employs accounting policies that are in accordance with U.S. generally accepted accounting principles and require management to make estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reported period. Significant estimates include those related to allowance for doubtful accounts, valuation of inventories, valuation of long-lived assets, goodwill and other intangible assets, pension plan assumptions, income tax, valuation allowances, and litigation and environmental liabilities. Actual results could differ from those estimates.

Business

The Company is a resource- and technology-based company that develops, produces and markets on a worldwide basis a broad range of specialty mineral, mineral-based products and related systems and technologies. The Company's products are used in the manufacturing processes of the paper and steel industries, as well as by the building materials, polymers, ceramics, paints and coatings, and other manufacturing industries.

Cash Equivalents and Short-term Investments

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. Short-term investments consist of financial instruments with original maturities beyond three months, but less than twelve months. Short-term investments amounted to \$16.7 million and \$8.9 million at December 31, 2010 and 2009, respectively.

Trade Accounts Receivable

Trade accounts receivables are recorded at the invoiced amount and do not bear interest. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in the Company's existing accounts receivable. The Company determines the allowance based on historical write-off experience and specific allowances for bankrupt customers. The Company also analyzes the collection history and financial condition of its other customers, considering current industry conditions and determines whether an allowance needs to be established. The Company reviews its allowance for doubtful accounts monthly. Past due balances over 90 days based on payment terms are reviewed individually for collectability. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. The Company does not have any off-balance-sheet credit exposure related to its customers.

Inventories

Inventories are valued at the lower of cost or market. Cost is determined by the first-in, first-out (FIFO) method.

Additionally, items such as idle facility expense, excessive spoilage, freight handling costs, and re-handling costs are recognized as current period charges. The allocation of fixed production overheads to the costs of conversion are based upon the normal capacity of the production facility. Fixed overhead costs associated with idle capacity are expensed as incurred.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost. Significant improvements are capitalized, while maintenance and repair expenditures are charged to operations as incurred. The Company capitalizes interest cost as a component of construction in progress. In general, the straight-line method of depreciation is used for financial reporting purposes. The annual rates of depreciation are 3% - 6.67% for buildings, 6.67% - 12.5% for machinery and equipment, 8% - 12.5% for furniture and fixtures and 12.5% - 25% for computer equipment and software-related assets. The estimated useful lives of our PCC production facilities and machinery and equipment pertaining to our natural stone mining and processing plants and our chemical plants are 15 years.

Property, plant and equipment are depreciated over their useful lives. Useful lives are based on management's estimates of the period that the assets can generate revenue, which does not necessarily coincide with the remaining term of a customer's contractual obligation to purchase products made using those assets. The Company's sales of PCC are predominantly pursuant to long-term evergreen contracts, initially ten years in length, with paper mills at which the Company operates satellite PCC plants. The terms of many of these agreements have been extended, often in connection with an expansion of

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

the satellite PCC plant. Failure of a PCC customer to renew an agreement or continue to purchase PCC from a Company facility could result in an impairment of assets charge or accelerated depreciation at such facility.

Depletion of mineral reserves is determined on a unit-of-extraction basis for financial reporting purposes, based upon proven and probable reserves, and on a percentage depletion basis of tax purposes.

Stripping Costs Incurred During Production

Stripping costs are those costs incurred for the removal of waste materials for the purpose of accessing ore body that will be produced commercially. Stripping costs incurred during the production phase of a mine are variable costs that are included in the costs of inventory produced during the period that the stripping costs are incurred.

Accounting for the Impairment of Long-Lived Assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable, the Company estimates the undiscounted future cash flows (excluding interest), resulting from the use of the asset and its ultimate disposition. If the sum of the undiscounted cash flows (excluding interest) is less than the carrying value, the Company recognizes an impairment loss, measured as the amount by which the carrying value exceeds the fair value of the asset, determined principally using discounted cash flows.

Goodwill and Other Intangible Assets

Goodwill represents the excess of purchase price and related costs over the value assigned to the net tangible and identifiable intangible assets of businesses acquired. Goodwill and other intangible assets with indefinite lives are not amortized, but instead tested for impairment at least annually. Intangible assets with estimable useful lives are amortized over their respective estimated lives to the estimated residual values, and reviewed for impairment.

The Company evaluates the recoverability of goodwill using a two-step impairment test approach at the reporting unit level. In the first step, the fair value for the reporting unit is compared to its book value including goodwill. In the case that the fair value of the reporting unit is less than book value, a second step is performed which compares the fair value of the reporting unit's goodwill to the book value of the goodwill. The fair value for the goodwill is determined based on the difference between the fair values of the reporting unit and the net fair values of the identifiable assets and liabilities of such reporting unit. If the fair value of the goodwill is less than the book value, the difference is recognized as an impairment.

Accounting for Asset Retirement Obligations

The Company provides for obligations associated with the retirement of long-lived assets and the associated asset retirement costs. The fair value of a liability for an asset retirement obligation is recognized in the period in which it is incurred if a reasonable estimate of fair value can be made. The associated asset retirement costs are capitalized as part of the carrying amount of the long-lived asset. The Company also provides for legal obligations to perform asset retirement activities where timing or methods of settlement are conditional on future events.

Fair Value of Financial Instruments

The recorded amounts of cash and cash equivalents, receivables, short-term borrowings, accounts payable, accrued interest, and variable-rate long-term debt approximate fair value because of the short maturity of those instruments or the variable nature of underlying interest rates. Short-term investments are recorded at cost, which approximates fair market value.

Derivative Financial Instruments

The Company records derivative financial instruments which are used to hedge certain foreign exchange risk at fair value on the balance sheet. See Note 11 for a full description of the Company's hedging activities and related accounting policies.

Revenue Recognition

Revenue from sale of products is recognized at the time the goods are shipped and title passes to the customer. In most of the Company's PCC contracts, the price per ton is based upon the total number of tons sold to the customer during the year. Under those contracts the price billed to the customer for shipments during the year is based on periodic estimates of the total annual volume that will be sold to such customer. Revenues are adjusted at the end of each year to reflect the actual volume sold. The Company also has consignment arrangements with certain customers in our Refractories segment. Revenues for these transactions are recorded when the consigned products are consumed by the customer.

Revenues from sales of equipment are recorded upon completion of installation and receipt of customer acceptance. Revenues from services are recorded when the services have been performed.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Foreign Currency

The assets and liabilities of the Company's international subsidiaries are translated into U.S. dollars using exchange rates at the respective balance sheet date. The resulting translation adjustments are recorded in accumulated other comprehensive income (loss) in shareholders' equity. Income statement items are generally translated at monthly average exchange rates prevailing during the period. International subsidiaries operating in highly inflationary economies translate non-monetary assets at historical rates, while net monetary assets are translated at current rates, with the resulting translation adjustments included in net income. At December 31, 2010, the Company had no international subsidiaries operating in highly inflationary economies.

Income Taxes

Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company operates in multiple taxing jurisdictions, both within the U.S. and outside the U.S. In certain situations, a taxing authority may challenge positions that the Company has adopted in its income tax filings. The Company regularly assesses its tax position for such transactions and includes reserves for those differences in position. The reserves are utilized or reversed once the statute of limitations has expired or the matter is otherwise resolved.

The application of income tax law is inherently complex. Laws and regulations in this area are voluminous and are often ambiguous. As such, we are required to make many subjective assumptions and judgments regarding our income tax exposures. Interpretations of and guidance surrounding income tax laws and regulations change over time. As such, changes in our subjective assumptions and judgments can materially affect amounts recognized in the consolidated balance sheets and statements of operations. The Company's accounting policy is to recognize interest and penalties as part of its provision for income taxes. See Note 5 to the consolidated financial statements, "Income Taxes," for additional detail on our uncertain tax positions.

The accompanying financial statements generally do not include a provision for U.S. income taxes on international subsidiaries' unremitted earnings, which are expected to be permanently reinvested overseas.

Research and Development Expenses

Research and development expenses are expensed as incurred.

Accounting for Stock-Based Compensation

The Company recognizes compensation expense for share-based awards based upon the grant date fair value over the vesting period.

Pension and Post-retirement Benefits

The Company has defined benefit pension plans covering the majority of its employees. The benefits are generally based on years of service and an employee's modified career earnings.

The Company also provides post-retirement healthcare benefits for the majority of its retirees and employees in the United States. The Company measures the costs of its obligation based on its best estimate. The net periodic costs are recognized as employees render the services necessary to earn the post-retirement benefits.

Environmental

Expenditures that relate to current operations are expensed or capitalized as appropriate. Expenditures that relate to an existing condition caused by past operations and which do not contribute to current or future revenue generation are expensed. Liabilities are recorded when it is probable the Company will be obligated to pay amounts for environmental site evaluation, remediation or related costs, and such amounts can be reasonably estimated.

Earnings Per Share

Basic earnings per share have been computed based upon the weighted average number of common shares outstanding during the period.

Diluted earnings per share have been computed based upon the weighted average number of common shares outstanding during the period assuming the issuance of common shares for all potentially dilutive common shares outstanding.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Subsequent events

The Company has evaluated for subsequent events through February 25, 2011, which is the date of issuance of its financial statements.

Noncontrolling Interests

In 2009, the Company adopted the provisions of a standard issued by the Financial Accounting Standards Board ("FASB") on Noncontrolling Interests. The income statement was revised to separately present consolidated net income, which now includes the amounts attributable to the Company plus noncontrolling interests and net income attributable solely to the Company. Additionally, noncontrolling interests are considered a component of equity for all periods presented. Prior year presentations have been restated to conform with the new statement. All income attributable to noncontrolling interests for the periods presented was from continuing operations and there were no changes in MTI's ownership interest.

Note 2. Stock-Based Compensation

The Company has a 2001 Stock Award and Incentive Plan (the "Plan"), which provides for grants of incentive and non-qualified stock options, restricted stock, stock appreciation rights, stock awards or performance unit awards. The Plan is administered by the Compensation Committee of the Board of Directors. Stock options granted under the Plan generally have a ten year term. The exercise price for stock options are at prices at or above the fair market value of the common stock on the date of the grant, and each award of stock options will vest ratably over a specified period, generally three years.

Stock-based compensation expense is recognized in the consolidated financial statements for stock options based on the grant date fair value.

Net income (loss) for years ended 2010, 2009 and 2008 include \$2.0 million, \$2.2 million and \$2.0 million pretax compensation costs, respectively, related to stock option expense as a component of marketing and administrative expenses. All stock option expense is recognized in the consolidated statements of operations. The related tax benefit included in the statement of operations on the non-qualified stock options is \$0.8 million, \$0.9 million and \$0.7 million for 2010, 2009 and 2008, respectively.

The benefits of tax deductions in excess of the tax benefit from compensation costs that were recognized or would have been recognized are classified as financing inflows on the consolidated statement of cash flows.

Stock Options

The fair value of options granted is estimated on the date of grant using the Black-Scholes valuation model. Compensation expense is recognized only for those options expected to vest, with forfeitures estimated at the date of grant based on the Company's historical experience and future expectations. The forfeiture rate assumption used for the period ended December 31, 2010 was approximately 8.8%.

The weighted average grant date fair value for stock options granted during the years ended December 31, 2010, 2009 and 2008 was \$16.32, \$11.86 and \$19.11, respectively. The weighted average grant date fair value for stock options vested during 2010, 2009 and 2008 was \$17.01, \$20.15 and \$21.12, respectively. The total intrinsic value of stock options exercised during the years ended December 31, 2010, 2009 and 2008 was \$0.5 million, \$0.1 million and \$5.9 million, respectively.

The fair value for stock awards was estimated at the date of grant using the Black-Scholes option valuation model with the following weighted average assumptions for the years ended December 31, 2010, 2009 and 2008:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Expected life (years).....	6.3	6.3	6.3
Interest rate	2.92%	1.87%	2.50%
Volatility.....	28.80%	28.01%	25.20%
Expected dividend yield	0.41%	0.50%	0.34%

The expected term of the options represents the estimated period of time until exercise and is based on historical experience of similar awards, based upon contractual terms, vesting schedules, and expectations of future employee behavior. The expected stock-price volatility is based upon the historical and implied volatility of the Company's stock. The interest rate is based upon the implied yield on U.S. Treasury bills with an equivalent remaining term. Estimated dividend yield is based upon historical dividends paid by the Company.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table summarizes stock option activity for the year ended December 31, 2010:

	<u>Shares</u>	<u>Weighted Average Exercise Price Per Share</u>	<u>Weighted Average Remaining Contractual Life (Years)</u>	<u>Aggregate Intrinsic Value (in thousands)</u>
Balance January 1, 2009	787,530	\$ 52.54		
Granted	141,140	49.12		
Exercised.....	(31,697)	44.88		
Canceled	(76,943)	54.42		
Balance December 31, 2010.....	<u>820,030</u>	<u>\$ 52.11</u>	<u>6.28</u>	<u>\$ 10,917</u>
Exercisable, December 31, 2010	<u>550,715</u>	<u>\$ 54.54</u>	<u>4.99</u>	<u>\$ 5,991</u>

The aggregate intrinsic value above is calculated before applicable income taxes, based on the Company's closing stock price of \$65.41 as of the last business day of the period ended December 31, 2010 had all options been exercised on that date. The weighted average intrinsic value of the options exercised during 2010, 2009 and 2008 was \$16.06, \$18.50 and \$22.47 per share, respectively. As of December 31, 2010, total unrecognized stock-based compensation expense related to nonvested stock options was approximately \$2.7 million, which is expected to be recognized over a weighted average period of approximately three years.

The Company issues new shares of common stock upon the exercise of stock options.

Non-vested stock option activity for the year ended December 31, 2010 is as follows:

	<u>Shares</u>	<u>Weighted Average Exercise Price Per Share</u>
Nonvested options outstanding at December 31, 2009	321,517	\$ 49.96
Options granted	141,140	49.12
Options vested	(148,130)	52.78
Options forfeited.....	(45,212)	53.90
Nonvested options outstanding, December 31, 2010	<u>269,315</u>	<u>\$ 47.13</u>

The following table summarizes additional information concerning options outstanding at December 31, 2010:

	<u>Options Outstanding</u>			<u>Options Exercisable</u>		
	<u>Range of Exercise Prices</u>	<u>Number Outstanding at 12/31/10</u>	<u>Weighted Average Remaining Contractual Term (Years)</u>	<u>Weighted Average Exercise Price</u>	<u>Number Exercisable at 12/31/10</u>	<u>Weighted Average Exercise Price</u>
\$ 34.825 - \$ 44.360	167,291	7.7	\$ 39.59	61,871	\$ 39.12	
\$ 46.625 - \$ 54.225	398,704	4.9	\$ 50.84	263,464	\$ 51.72	
\$ 55.870 - \$ 69.315	254,035	6.2	\$ 62.35	225,380	\$ 62.08	
\$ 34.825 - \$ 69.315	<u>820,030</u>	<u>6.3</u>	<u>\$ 52.11</u>	<u>550,715</u>	<u>\$ 54.54</u>	

Restricted Stock

The Company has granted certain corporate officers rights to receive shares of the Company's common stock under the Company's 2001 Stock Award and Incentive Plan (the "Plan"). The rights will be deferred for a specified number of years of service, subject to restrictions on transfer and other conditions. Compensation expense for these shares is recognized over the vesting period. The Company granted 78,320 shares, 101,400 shares and 68,600 shares for the periods ended December 31, 2010, 2009 and 2008, respectively. The fair value was determined based on the market value of unrestricted shares. As of December 31, 2010, there was unrecognized stock-based compensation related to restricted stock of \$3.9 million, which will be recognized over approximately the next three years. The compensation expense amortized with respect to all units was approximately \$3.8 million, \$4.2 million and \$3.6 million for the periods ended December 31, 2010, 2009 and 2008, respectively. In addition, the Company recorded reversals of \$0.1 million, \$0.6 million and \$0.1 million for periods ended December 31, 2010, 2009 and 2008, respectively, related to restricted stock forfeitures. Such costs and reversals are included in marketing and administrative expenses. There were 59,087 restricted stock shares that vested as of December 31, 2010.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table summarizes the restricted stock activity for the Plan:

	<u>Shares</u>	<u>Weighted Average Grant Date Fair Value</u>

Diluted earnings (loss) per share from discontinued operations	--	(0.17)	0.54
Diluted earnings (loss) per share	<u>\$ 3.58</u>	<u>\$ (1.27)</u>	<u>\$ 3.47</u>

Options to purchase 96,801 shares, 322,933 shares and 603,828 shares of common stock for the years ended December 31, 2010, December 31, 2009 and December 31, 2008, respectively, were not included in the computation of diluted earnings per share because they were anti-dilutive, as the exercise prices of the options were greater than the average market price of the common shares. Additionally, the weighted average diluted common shares outstanding for the year ended December 31, 2009 excludes the dilutive effect of stock options and restricted stock, as inclusion of these would be anti-dilutive. Approximately, 55,000 common share equivalents were not included in the computation of diluted earnings per share for the period ended December 31, 2009 as they would be anti-dilutive.

Note 4. Discontinued Operations

In the third quarter of 2007, as a result of a change in management and deteriorating financial performance, the Company conducted an in-depth review of all of its operations and developed a new strategic focus. The Company initiated a plan to realign its business operations to improve profitability and increase shareholder value by exiting certain businesses and consolidating some product lines. As a part of this restructuring, during the fourth quarter of 2007, the Company classified its Synsil operations and its plants at Mount Vernon, Indiana and Wellsville, Ohio as discontinued operations. These operations were part of the Company's Specialty Minerals segment. During 2008, the Company sold its idle Synsil facilities in Chester, South Carolina and Woodville, Ohio, and Cleburne, Texas. This resulted in a pre-tax gain of \$13.7 million (\$8.6 million after tax). During the second quarter of 2009, the Company recorded impairment of asset charges of \$5.6 million, net of tax, to recognize the lower market value of its Mt. Vernon, Indiana facility. On October 26, 2009, the Company completed the sale of this facility for the approximate amount of the net book value of the assets.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements for all prior periods presented have been reclassified to reflect these businesses in discontinued operations.

The following table details selected financial information for the discontinued operations in the consolidated statements of operations for fiscal years ended December 31, 2009 and 2008. There were no discontinued operations in the fiscal year ended December 31, 2010. The amounts exclude general corporate overhead and interest expense which were previously allocated to the entities comprising discontinued operations.

Thousands of Dollars	<u>2009</u>	<u>2008</u>
Net sales	\$ 15,600	\$ 23,148
Production margin	1,148	3,278
Expenses	582	850
Impairment of assets	5,778	--
Restructuring and other costs	--	74
Gain on sale of assets	<u>239</u>	<u>13,897</u>
Income (loss) from operations.....	\$ <u>(4,973)</u>	\$ <u>16,251</u>
Other income.....	<u>--</u>	<u>--</u>
Foreign currency translation loss from liquidation of investment	<u>--</u>	<u>--</u>
Provision (benefit) for taxes on income.....	<u>(1,822)</u>	<u>5,969</u>
Income (loss) from discontinued operations, net of tax	\$ <u>(3,151)</u>	\$ <u>10,282</u>

Note 5. Income Taxes

Income (loss) from continuing operations before provision (benefit) for taxes and discontinued operations by domestic and foreign source is as follows:

Thousands of Dollars	<u>2010</u>	<u>2009</u>	<u>2008</u>
Domestic	\$ 49,484	\$ (29,766)	\$ 36,512
Foreign.....	<u>49,365</u>	<u>6,626</u>	<u>45,755</u>
Income (loss) from continuing operations before provision (benefit) for income taxes	\$ <u>98,849</u>	\$ <u>(23,140)</u>	\$ <u>82,267</u>

The provision (benefit) for taxes on income consists of the following:

Thousands of Dollars	<u>2010</u>	<u>2009</u>	<u>2008</u>
Domestic			
Taxes currently payable			
Federal	\$ 12,287	\$ 7,628	\$ 10,199
State and local	1,861	68	2,090
Deferred income taxes	411	(23,722)	(724)
Domestic tax provision (benefit)	<u>14,559</u>	<u>(16,026)</u>	<u>11,565</u>
Foreign			
Taxes currently payable	13,043	10,906	14,791
Deferred income taxes	1,361	(267)	(2,277)
Foreign tax provision (benefit).....	<u>14,404</u>	<u>10,639</u>	<u>12,514</u>
Total tax provision (benefit).....	\$ <u>28,963</u>	\$ <u>(5,387)</u>	\$ <u>24,079</u>

The provision for taxes on income shown in the previous table is classified based on the location of the taxing authority, regardless of the location in which the taxable income is generated.

The major elements contributing to the difference between the U.S. federal statutory tax rate and the consolidated effective tax rate are as follows:

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Percentages	2010	2009	2008
U.S. statutory tax rate.....	35.0%	(35.0)%	35.0%
Depletion.....	(3.8)	(13.9)	(4.2)
Difference between tax provided on foreign earnings and the U.S. statutory rate	(3.1)	4.3	(4.6)
Change in Mexican law.....	0.3	6.4	
State and local taxes, net of Federal tax benefit.....	1.2	(12.1)	1.3
Tax credits and foreign dividends.....	(0.1)	(1.4)	(0.5)
Decrease in valuation allowance.....	(0.1)	27.0	0.3
Impact of uncertain tax positions.....	(1.5)	0.1	0.9
Other	1.4	1.3	1.1
Consolidated effective tax rate	<u>29.3%</u>	<u>(23.3)%</u>	<u>29.3%</u>

The Company believes that its accrued liabilities are sufficient to cover its U.S. and foreign tax contingencies. The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities are presented below:

Thousands of Dollars	2010	2009
Deferred tax assets:		
State and local taxes.....	\$ --	\$ 1,827
Accrued expenses	13,890	10,926
Net operating loss carry forwards.....	10,725	10,397
Pension and post-retirement benefits costs.....	19,857	19,791
Other	10,990	21,176
Valuation allowance.	(6,276)	(6,477)
Total deferred tax assets.....	<u>\$ 49,186</u>	<u>\$ 57,640</u>

In 2009, there was a decrease in deferred tax assets of \$6.2 million due to the establishment of valuation allowances primarily in China, Japan, Mexico, and the United Kingdom. These allowances were established as a result of restructuring activities as it is more likely than not that the deferred tax assets associated with the restructuring would not be recognized as they relate to these entities.

Thousands of Dollars	2010	2009
Deferred tax liabilities:		
Plant and equipment, principally due to differences in depreciation.....	\$ 6,203	\$ 13,534
Intangible assets	10,527	9,218
Mexican tax recapture.....	1,549	1,476
Other	2,000	4,911
Total deferred tax liabilities	<u>20,279</u>	<u>29,139</u>
Net deferred tax (assets) liabilities.....	<u>\$ (28,907)</u>	<u>\$ (28,501)</u>

The current and long-term portion of net deferred tax (assets) liabilities is as follows:

Thousands of Dollars	2010	2009
Net deferred tax assets, current.....	\$ (8,378)	\$ (6,745)
Net deferred assets, long term	<u>(20,529)</u>	<u>(21,756)</u>
	<u>\$ (28,907)</u>	<u>\$ (28,501)</u>

The current portion of the net deferred tax assets is included in prepaid expenses and other current assets. The long-term portion of the net deferred tax assets are included in other assets and deferred charges.

The Company has \$6.3 million of deferred tax assets arising from tax loss carry forwards which will be realized through future operations. Carry forwards of approximately \$2.4 million expire over the next 20 years, and \$3.9 million can be utilized over an indefinite period.

On December 31, 2010, the Company had \$6.5 million of total unrecognized tax benefits. Included in this amount were a total of \$4.4 million of unrecognized income tax benefits that, if recognized, would affect the Company's effective tax rate.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

While it is expected that the amount of unrecognized tax benefits will change in the next 12 months, we do not expect the change to have a significant impact on the results of operations or the financial position of the Company.

The following table summarizes the activity related to our unrecognized tax benefits:

(Thousands of Dollars)	<u>2010</u>	<u>2009</u>
Balance as of January 1,.....	\$ 8,496	\$ 10,948
Increases related to current year positions.....	329	723
Increases (decreases) related to new judgments.....	--	(877)
Decreases related to audit settlements and statute expirations...	(2,234)	(2,315)
Other	(118)	17
Balance as of December 31,	<u>\$ 6,473</u>	<u>\$ 8,496</u>

The Company's accounting policy is to recognize interest and penalties accrued, relating to unrecognized income tax benefits as part of its provision for income taxes. The Company had a net reversal of \$0.7 million of interest and penalties during 2010 and had a total accrued balance on December 31, 2010 of \$1.7 million.

The Company operates in multiple taxing jurisdictions, both within and outside the U.S. In certain situations, a taxing authority may challenge positions that the Company has adopted in its income tax filings. The Company, with a few exceptions (none of which are material), is no longer subject to U.S. federal, state, local, and European income tax examinations by tax authorities for years prior to 2003.

Net cash paid for income taxes were \$24.9 million, \$14.1 million and \$19.6 million for the years ended December 31, 2010, 2009 and 2008, respectively.

The Company has not provided for U.S. federal and foreign withholding taxes on \$217.9 million of foreign subsidiaries' undistributed earnings as of December 31, 2010 because such earnings are intended to be permanently reinvested overseas. To the extent the parent company has received foreign earnings as dividends; the foreign taxes paid on those earnings have generated tax credits, which have substantially offset related U.S. income taxes. However, in the event that the entire \$217.9 million of foreign earnings were to be repatriated, incremental taxes may be incurred. We do not believe this amount would be more than \$28.6 million.

Note 6. Inventories

The following is a summary of inventories by major category:

Thousands of Dollars	<u>2010</u>	<u>2009</u>
Raw materials.....	\$ 34,862	\$ 32,838
Work in process.....	6,448	6,065
Finished goods.....	25,757	24,412
Packaging and supplies.....	19,397	19,168

Construction in progress	13,438	16,874
Furniture and fixtures and other	95,256	94,567
	<u>1,238,422</u>	<u>1,223,710</u>
Less: Accumulated depreciation and depletion	(905,625)	(864,332)
Property, plant and equipment, net	<u>\$ 332,797</u>	<u>\$ 359,378</u>

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Depreciation and depletion expense for the years ended December 31, 2010, 2009 and 2008 was \$61.2 million, \$69.0 million and \$76.2 million, respectively.

Note 8. Restructuring Costs

2007 Restructuring Program

In the third quarter of 2007, as a result of a change in management and deteriorating financial performance, the Company conducted an in-depth review of all its operations and developed a new strategic focus. The Company initiated a plan to realign its business operations to improve profitability and increase shareholder value by exiting certain businesses and consolidating some product lines. As part of this program, the Company reduced its workforce by approximately 7 percent to better control operating expenses and to improve efficiencies and recorded a pre-tax charge of \$16.0 million for restructuring and other exit costs during the second half of 2007. This charge consists of severance and other employee benefit costs of \$13.5 million, contract termination costs of \$1.8 million and other exit costs of \$0.7 million. Additional restructuring costs of \$9.5 million were recorded in 2008 related to this program, including a pension settlement loss of approximately \$6.8 million related to the distribution of benefits to terminated employees. The restructuring resulted in a total workforce reduction of approximately 250, which was completed as of December 31, 2009.

A reconciliation of the restructuring liability for this program, as of December 31, 2010, is as follows:

(millions of dollars)	Balance as of December 31, 2009	Additional Provisions	Cash Expenditures	Balance as of December 31, 2010
Severance and other employee benefits	\$ 0.1	\$ --	\$ (0.1)	\$ --
Contract termination costs	1.6	--	(0.3)	1.3
	<u>\$ 1.7</u>	<u>\$ --</u>	<u>\$ (0.4)</u>	<u>\$ 1.3</u>

Approximately \$0.4 million and \$1.6 million in severance payments were paid in 2010 and 2009, respectively. A restructuring liability of \$1.3 million remains at December 31, 2010. Such amounts will be funded from operating cash flows.

2008 Restructuring Program

In the fourth quarter of 2008, as a result of the worldwide economic downturn and the resulting impact on our sales and operating profits, the Company initiated an additional restructuring program by reducing its workforce by approximately 14% through a combination of permanent reductions and temporary layoffs. The Company recorded a charge of \$3.9 million associated with this program. Additional restructuring costs of \$1.0 million were recorded in 2009 related to this program.

A reconciliation of the restructuring liability for this program, as of December 31, 2010, is as follows:

(millions of dollars)	Balance as of December 31, 2009	Additional Provisions	Cash Expenditures	Balance as of December 31, 2010
Severance and other employee benefits	\$ 0.1	--	(0.1)	--
	<u>\$ 0.1</u>	<u>\$ --</u>	<u>\$ (0.1)</u>	<u>\$ --</u>

Approximately \$0.1 million and \$4.2 million in severance payments were paid in 2010 and 2009, respectively. This program was completed in 2010.

2009 Restructuring Program

In the second quarter of 2009, the Company initiated a program to improve efficiencies through the consolidation of manufacturing operations and reduction of costs.

The restructuring program reduced the current workforce by approximately 200 employees worldwide. This reduction in force relates to plant consolidations as well as a streamlining of the corporate and divisional management structures to operate more efficiently.

The Company recorded \$21.1 million in restructuring charges as associated with this program. Included in the restructuring costs was a pension settlement charge of \$9.4 million as a result of the workforce reduction associated with this program.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

A reconciliation of the restructuring liability for this program, as of December 31, 2010, is as follows:

(millions of dollars)	Balance as of December 31, 2009	Additional Provisions	Cash Expenditures	Other	Balance as of December 31, 2010
Severance and other employee benefits ...	\$ 5.0	\$ 0.5	\$ (3.5)	\$ --	\$ 2.0
Contract termination costs	0.4	(0.4)	--	--	--
Other exit costs.....	0.1	--	--	(0.1)	--
	<u>\$ 5.5</u>	<u>\$ 0.1</u>	<u>\$ (3.5)</u>	<u>\$ (0.1)</u>	<u>\$ 2.0</u>

The liability of \$2.0 million will be paid from cash flows from operations, and the program is expected to be completed by the second half of 2011.

Other Restructuring

In the fourth quarter of 2009, the Company recorded restructuring charges for the shutdown of its Franklin, Va. satellite facility in connection with the announced closure of the paper mill at that location.

A reconciliation of the restructuring liability for this closure, as of December 31, 2010, is as follows:

(millions of dollars)	Balance as of December 31, 2009	Additional Provisions	Cash Expenditures	Other	Balance as of December 31, 2010
Severance and other employee benefits ...	\$ 0.1	\$ --	\$ --	\$ --	\$ 0.1
Contract termination costs	0.9	--	--	(0.9)	--
Other exit costs.....	0.0	0.8	(0.8)	--	--
	<u>\$ 1.0</u>	<u>\$ 0.8</u>	<u>\$ (0.8)</u>	<u>\$ (0.9)</u>	<u>\$ 0.1</u>

The remaining liability of \$0.1 million will be funded from cash flows from operations, and the program is expected to be completed in 2011.

Note 9. Accounting for Impairment of Long-Lived Assets

The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In such instances, the Company estimates the undiscounted future cash flows (excluding interest) resulting from the use of the asset and its ultimate disposition. If the sum of the undiscounted cash flows (excluding interest) is less than the carrying value, the Company recognizes an impairment loss, measured as the amount by which the carrying value exceeds the fair value of the asset.

In the second quarter of 2009, the Company initiated a restructuring program to improve efficiencies through the consolidation of operations and rationalization of certain product lines, and through the reduction of costs. As part of this program, the Company consolidated its Old Bridge, New Jersey operation into Bryan, Ohio and Baton Rouge, Louisiana, in order to improve operational efficiencies and reduce logistics for key raw materials, which resulted in an impairment of assets charge of \$4.3 million; rationalized its North American specialty shapes product line resulting in an impairment of assets charge of \$1.5 million; rationalized some of its European operations resulting in an impairment of assets charge of \$2.2 million; recorded further impairment charges of \$10.0 million related to its Asian refractory operations as a result of continued difficulties in market penetration and plans to consolidate its Asian operations and actively seek a regional alliance to aid in marketing its high value products; recognized impairment charges for refractory application equipment in North America of \$3.7 million and Europe of \$3.3 million due to customer underutilized assets under depressed volume conditions; recognized an impairment of \$6.5 million related to the Company's PCC facility in Millinocket, Maine, which has been idle since September 2008 and where the start-up of the satellite facility became unlikely. As a result of this realignment, the Company recorded an impairment of assets charge of \$37.5 million.

In the fourth quarter of 2009, the Company recorded an impairment of assets charge of \$2.0 million for its satellite facility in Franklin, Virginia, due to the announced closure of the host mill at that location.

The following table reflects the major components of the impairment of assets charge recorded in 2009:

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Impairment of assets:

(millions of dollars)	2009	Remaining Carrying Value Upon Impairment of Assets
Americas Refractories	\$ 9.5	\$ 0.3
European Refractories	11.8	0.8
Asian Refractories	10.0	11.6
North America Paper PCC	8.5	--
Total impairment	<u>\$ 39.8</u>	<u>\$ 12.7</u>

Included in the impairment of assets charge for Europe Refractories was a \$6.0 million charge for certain intangible assets from its 2006 acquisition of a business in Turkey.

The remaining carrying value of the impaired assets was determined by estimating marketplace participant views of the discounted cash flows of the asset groups and, in the case of tangible assets, by estimating the market value of the assets, which due to the specialized and limited use nature of our equipment, is primarily driven by the value of the real estate. As the estimated discounted cash flows were determined to be negative under multiple scenarios, the highest and best use of the tangible asset groups was determined to be a sale of the underlying real estate. The fair value of the significant real estate holdings was based on independent appraisals.

The Company expected to realize annualized pre-tax depreciation savings of approximately \$5 million related to the write-down of fixed assets. The Company recognized approximately \$5.0 million and \$2.4 million in depreciation savings in 2010 and 2009, respectively associated with this program.

During the fourth quarter of 2008, the Company recorded an impairment of assets of \$0.2 million for the closure of its satellite facility at Dryden, Canada.

Note 10. Goodwill and Other Intangible Assets

The carrying amount of goodwill was \$67.2 million and \$68.1 million as of December 31, 2010 and December 31, 2009, respectively. The net change in goodwill since December 31, 2009 was attributable to the effects of foreign exchange.

Acquired intangible assets subject to amortization included in other assets and deferred charges as of December 31, 2010 and December 31, 2009 were as follows:

(Millions of Dollars)	December 31, 2010		December 31, 2009	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Patents and trademarks	\$ 6.2	\$ 3.5	\$ 6.2	\$ 3.1
Customer lists	2.7	1.2	2.7	1.1
	<u>\$ 8.9</u>	<u>\$ 4.7</u>	<u>\$ 8.9</u>	<u>\$ 4.2</u>

The weighted average amortization period for acquired intangible assets subject to amortization is approximately 15 years. Amortization expense was approximately \$0.5 million, \$0.9 million and \$1.4 million for the years ended December 31, 2010, 2009 and 2008, respectively. The estimated amortization expense is \$0.6 million for each of the next five years through 2015.

Included in other assets and deferred charges is an additional intangible asset of approximately \$1.3 million which represents the non-current unamortized amount paid to a customer in connection with contract extensions at eight satellite PCC facilities. In addition, a current portion of \$0.7 million is included in prepaid expenses and other current assets. Such amounts will be amortized as a reduction of sales over the remaining lives of the customer contracts. Approximately \$1.0 million, \$1.5 million and \$1.8 million was amortized in 2010, 2009 and 2008, respectively. Estimated amortization as a reduction of sales is as follows: 2011 - \$0.7 million; 2012 - \$0.4 million; 2013 - \$0.4 million; 2014 - \$0.4 million; 2014 - \$0.1 million.

Note 11. Derivative Financial Instruments and Hedging Activities

The Company is exposed to foreign currency exchange rate fluctuations. As part of its risk management strategy, the Company uses forward exchange contracts (FEC) to manage its exposure to foreign currency risk on certain raw material

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

purchases. The Company's objective is to offset gains and losses resulting from these exposures with gains and losses on the derivative contracts used to hedge them. The Company has not entered into derivative instruments for any purpose other than to hedge certain expected cash flows. The Company does not speculate using derivative instruments.

By using derivative financial instruments to hedge exposures to changes in interest rates and foreign currencies, the Company exposes itself to credit risk and market risk. Credit risk is the risk that the counterparty will fail to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes the Company, which creates credit risk for the Company. When the fair value of a derivative contract is negative, the Company owes the counterparty, and therefore, it does not face any credit risk. The Company minimizes the credit risk in derivative instruments by entering into transactions with major financial institutions.

Market risk is the adverse effect on the value of a financial instrument that results from a change in interest rates, currency exchange rates, or commodity prices. The market risk associated with interest rate and forward exchange contracts is managed by establishing and monitoring parameters that limit the types and degree of market risk that may be undertaken.

Based on established criteria, the Company designated its derivatives as cash flow hedges. The Company uses FEC's designated as cash flow hedges to protect against foreign currency exchange rate risks inherent in its forecasted inventory purchases. The Company had 13 open foreign exchange contracts as of December 31, 2010.

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain or loss on the derivative instrument is initially recorded in accumulated other comprehensive income (loss) as a separate component of shareholders' equity and subsequently reclassified into earnings in the period during which the hedged transaction is recognized in earnings. The gains and losses associated with these forward exchange contracts are recognized into cost of sales. Gains and losses and hedge ineffectiveness associated with these derivatives were not significant.

Note 12. Short-term Investments

The composition of the Company's short-term investments are as follows:

<u>(in millions of dollars)</u>	<u>2010</u>	<u>2009</u>
Short-term Investments		
Short-term bank deposits	\$ <u>16.7</u>	\$ <u>8.9</u>

There were no unrealized holding gains and losses on the short-term bank deposits held at December 31, 2010.

Note 13: Fair Value of Financial Instruments

Fair value is an exchange price that would be received for an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. The Company utilizes market data or assumptions that market participants would use in pricing the asset or liability. The Company follows a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs about which little or no market data exists, therefore requiring an entity to develop its own assumptions.

Assets and liabilities measured at fair value are based on one or more of three valuation techniques. The three valuation techniques are as follows:

- Market approach - prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.
- Cost approach - amount that would be required to replace the service capacity of an asset or replacement cost.
- Income approach - techniques to convert future amounts to a single present amount based on market expectations, including present value techniques, option-pricing and other models.

The Company primarily applies the income approach for foreign exchange derivatives for recurring fair value measurements and attempts to utilize valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

As of December 31, 2010, the Company held certain financial assets and liabilities that were required to be measured at fair value on a recurring basis. These consisted of the Company's derivative instruments related to foreign exchange rates and certain investment in money market funds. The fair values of foreign exchange rate derivatives are determined based on inputs that are readily available in public markets or can be derived from information available in publicly quoted markets and are categorized as Level 2. The fair values of investments in money market funds are determined by quoted prices in active markets and are categorized as level 1. The Company does not have any financial assets or liabilities measured at fair value on a recurring basis categorized as Level 3 and there were no transfers in or out of Level 3 during the year ended December 31, 2010. There were also no changes to the Company's valuation techniques used to measure asset and liability fair values on a recurring basis.

The following table sets forth by level within the fair value hierarchy the Company's financial assets and liabilities accounted for at fair value on a recurring basis as of December 31, 2010. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement requires judgment, and may affect the valuation of fair value assets and liabilities and their placement within the fair value hierarchy levels.

(in millions of dollars)	Assets (Liabilities) at Fair Value as of December 31, 2010		
	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Forward exchange contracts	\$ --	\$ 2.6	\$ --
Money market funds	\$ 172.1	\$ --	\$ --
Total	<u>\$ 172.1</u>	<u>\$ 2.6</u>	<u>\$ --</u>

The following table sets forth by level within the fair value hierarchy the Company's financial assets and liabilities accounted for at fair value on a recurring basis as of December 31, 2009

(in millions of dollars)	Assets (Liabilities) at Fair Value as of December 31, 2009		
	Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Forward exchange contracts	\$ --	\$ (0.8)	\$ --
Money market funds	\$ 122.6	\$ --	\$ --
Total	<u>\$ 122.6</u>	<u>\$ (0.8)</u>	<u>\$ --</u>

Note 14. Financial Instruments and Concentrations of Credit Risk

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Cash and cash equivalents, short-term investments, accounts receivable and payable: The carrying amounts approximate fair value because of the short maturities of these instruments.

Short-term debt and other liabilities: The carrying amounts of short-term debt and other liabilities approximate fair value because of the short maturities of these instruments.

Long-term debt: The fair value of the long-term debt of the Company is estimated based on the quoted market prices for that debt or similar debt and approximates the carrying amount.

Forward exchange contracts: The fair value of forward exchange contracts (used for hedging purposes) is based on information derived from active markets. If appropriate, the Company would enter into forward exchange contracts to mitigate the impact of foreign exchange rate movements on the Company's operating results. It does not engage in speculation. Such foreign exchange contracts would offset losses and gains on the assets, liabilities and transactions being hedged. At December 31, 2010, the Company had open foreign exchange contracts with a financial institution to purchase approximately \$3.2 million of foreign currencies. These contracts range in maturity from January 2011 to July 2011. The fair value of these instruments was a liability of \$0.2 and \$0.1 million, respectively, at both December 31, 2010 and December 31, 2009.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Additionally, the Company entered into forward contracts to sell 30 million Euros as a hedge of its net investment in Europe. These contracts mature in October 2013. The fair value of these instruments at December 31, 2010 was an asset of \$2.7 million. The fair value of these instruments at December 31, 2009 was a liability of \$0.6 million.

Credit risk: Substantially all of the Company's accounts receivables are due from companies in the paper, construction and steel industries. Credit risk results from the possibility that a loss may occur from the failure of another party to perform according to the terms of the contracts. The Company regularly monitors its credit risk exposures and takes steps to mitigate the likelihood of these exposures resulting in actual loss. The Company's extension of credit is based on an evaluation of the customer's financial condition and collateral is generally not required.

The Company's bad debt expense for the years ended December 31, 2010, 2009 and 2008 was \$0.1 million, \$1.3 million and \$0.2 million, respectively.

Note 15. Long-Term Debt and Commitments

The following is a summary of long term debt:

(thousands of dollars)	Dec. 31, 2010	Dec. 31, 2009
5.53% Series 2006A Senior Notes		
Due October 5, 2013	\$ 50,000	\$ 50,000
Floating Rate Series 2006A Senior Notes		
Due October 5, 2013	25,000	25,000
Economic Development Authority Refunding		
Revenue Bonds Series 1999 Due 2010	--	4,600
Variable/Fixed Rate Industrial		
Development Revenue Bonds Due August 1, 2012	8,000	8,000
Variable/Fixed Rate Industrial		
Development Revenue Bonds Series 1999 Due November 1, 2014 ...	8,200	8,200
Installment obligations		
Due 2013	1,421	1,421
Total	92,621	97,221
Less: Current maturities	--	4,600
Long-term debt	\$ 92,621	\$ 92,621

The Economic Development Authority Refunding Revenue Bonds due 2010 were issued on February 23, 1999 to refinance the bonds issued in connection with the construction of a PCC plant in Eastover, South Carolina. The bonds bear interest at either a variable rate or fixed rate, at the option of the Company. Interest is payable semi-annually under the fixed rate option and monthly under the variable rate option. The Company selected the variable rate option on these borrowings and the average interest rates were approximately 0.45% and 0.70% for the years ended December 31, 2010 and 2009, respectively. These bonds were repaid in September 2010.

The Variable/Fixed Rate Industrial Development Revenue Bonds due August 1, 2012 are tax-exempt 15-year instruments that were issued on August 1, 1997 to finance the construction of a PCC plant in Courtland, Alabama. The bonds bear interest at either a variable rate or fixed rate, at the option of the Company. Interest is payable semi-annually under the fixed rate option and monthly under the variable rate option. The Company selected the variable rate option on these borrowings and the average interest rates were approximately 0.45% and 0.70% for the years ended December 31, 2010 and 2009, respectively.

The Variable/Fixed Rate Industrial Development Revenue Bonds due November 1, 2014 are tax-exempt 15-year instruments and were issued on November 30, 1999 to refinance the bonds issued in connection with the construction of a PCC plant in Jackson, Alabama. The bonds bear interest at either a variable rate or fixed rate at the option of the Company. Interest is payable semi-annually under the fixed rate option and monthly under the variable rate option. The Company selected the variable rate option on these borrowings and the average interest rates were approximately 0.45% and 0.70% for the years ended December 31, 2010 and 2009, respectively.

On May 31, 2003, the Company acquired land and limestone ore reserves from the Cushenbury Mine Trust for approximately \$17.5 million. Approximately \$6.1 million was paid at the closing and \$11.4 million was financed through an installment obligation. The interest rate on this obligation is approximately 4.25%. The remaining principal payment of \$1.4 million will be made in 2013.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

On October 5, 2006, the Company, through private placement, entered into a Note Purchase Agreement and issued \$75 million aggregate principal amount unsecured senior notes. These notes consist of two tranches: \$50 million aggregate principal amount 5.53% Series 2006A Senior Notes (Tranche 1 Notes); and \$25 million aggregate principal amount Floating Rate Series 2006A Senior Notes (Tranche 2 Notes). Tranche 1 Notes bear interest of 5.53% per annum, payable semi-annually. Tranche 2 Notes bear floating rate interest, payable quarterly. The average interest rate on Tranche 2 for the years ended December 31, 2010 and December 31, 2009 was 0.79% and 1.36%, respectively. The principal payment for both tranches is due on October 5, 2013.

The aggregate maturities of long-term debt are as follows: 2011 - \$-- million; 2012 - \$8.0 million; 2013 - \$76.4 million; 2014 - \$8.2 million; 2015 - \$-- million; thereafter - \$---- million.

The Company had available approximately \$184.5 million in uncommitted, short-term bank credit lines, of which \$4.3 million was in use at December 31, 2010.

Short-term borrowings as of December 31, 2010 and 2009 were \$4.6 million and \$6.9 million, respectively. The weighted average interest rate on short-term borrowings outstanding as of December 31, 2010 and 2009 was 3.27% and 3.39%, respectively.

During 2010, 2009 and 2008, respectively, the Company incurred interest costs of \$3.5 million, \$3.7 million and \$5.3 million including \$0.2 million, \$0.2 million and \$0.1 million, respectively, which were capitalized. Interest paid approximated the incurred interest cost.

Note 16. Benefit Plans

Pension Plans and Other Postretirement Benefit Plans

The Company and its subsidiaries have pension plans covering the majority of eligible employees on a contributory or non-contributory basis.

Benefits under defined benefit plans are generally based on years of service and an employee's career earnings. Employees generally become fully vested after five years.

The Company provides postretirement health care and life insurance benefits for the majority of its U.S. retired employees. Employees are generally eligible for benefits upon retirement and completion of a specified number of years of creditable service. The Company does not pre-fund these benefits and has the right to modify or terminate the plan in the future.

The funded status of the Company's pension plans and other postretirement benefit plans at December 31, 2010 and 2009 is as follows:

Obligations and Funded Status

Millions of Dollars	Pension Benefits		Post-retirement Benefits	
	2010	2009	2010	2009
Change in benefit obligation				
Benefit obligation at beginning of year	\$ 210.2	\$ 184.7	\$ 13.2	\$ 41.9
Service cost	6.6	7.1	0.7	1.1
Interest cost	11.5	11.3	0.8	1.5
Actuarial (gain) loss	10.9	23.6	1.4	(1.4)
Benefits paid	(11.4)	(3.8)	(0.5)	(1.3)
Plan amendments	--	--	--	(29.0)
Settlements	--	(16.3)	--	--
Foreign exchange impact	(1.7)	3.5	--	--
Other	0.4	0.1	--	0.4
Benefit obligation at end of year	<u>\$ 226.5</u>	<u>\$ 210.2</u>	<u>\$ 15.6</u>	<u>\$ 13.2</u>

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Millions of Dollars	Pension Benefits		Post-retirement Benefits	
	2010	2009	2010	2009
Change in plan assets				
Fair value of plan assets beginning of year	\$ 176.7	\$ 173.5	\$ --	\$ --
Actual return on plan assets	19.9	12.2	--	--
Employer contributions	8.0	7.8	0.5	0.9
Plan participants' contributions	0.4	0.4	--	0.4
Benefits paid	(11.9)	(3.8)	(0.5)	(1.3)
Settlements.....	--	(16.6)	--	--
Foreign exchange impact.....	(1.5)	3.2	--	--
Fair value of plan assets at end of year	<u>\$ 191.6</u>	<u>\$ 176.7</u>	<u>\$ --</u>	<u>\$ --</u>
Funded status	<u>\$ (34.9)</u>	<u>\$ (33.5)</u>	<u>\$ (15.6)</u>	<u>\$ (13.2)</u>

Amounts recognized in the consolidated balance sheet consist of:

Millions of Dollars	Pension Benefits		Post-retirement Benefits	
	2010	2009	2010	2009
Non-current asset	\$ 0.1	\$ --	\$ --	\$ --
Current liability	(0.5)	(0.4)	(1.5)	(1.3)
Non-current liability	(34.5)	(33.1)	(14.1)	(11.9)
Recognized liability.....	<u>\$ (34.9)</u>	<u>\$ (33.5)</u>	<u>\$ (15.6)</u>	<u>\$ (13.2)</u>

The current portion of pension liabilities is included in accrued compensation and related items.

Amounts recognized in accumulated other comprehensive income consist of:

Millions of Dollars	Pension Benefits		Post-retirement Benefits	
	2010	2009	2010	2009
Net actuarial loss	\$ 58.8	\$ 62.2	\$ 2.8	\$ 2.2
Prior service cost	3.8	4.7	(13.6)	(15.4)
Amount recognized end of year	<u>\$ 62.6</u>	<u>\$ 66.9</u>	<u>\$ (10.8)</u>	<u>\$ (13.2)</u>

The accumulated benefit obligation for all defined benefit pension plans was \$206.0 million and \$188.4 million at December 31, 2010 and 2009, respectively.

Changes in the Plan assets and benefit obligations recognized in other comprehensive income:

(Millions of Dollars)	Pension	Post
	Benefits	Retirement Benefits
Current year actuarial gain (loss)	\$ (2.0)	\$ (0.8)
Amortization of actuarial loss	5.5	0.2
Amortization of prior service credit(gain) loss.....	0.8	(1.8)
Total recognized in other comprehensive income	<u>\$ (4.3)</u>	<u>\$ (2.4)</u>

The components of net periodic benefit costs are as follows:

Millions of Dollars	Pension Benefits			Post-retirement Benefits		
	2010	2009	2008	2010	2009	2008
Service cost	\$ 6.6	\$ 7.1	\$ 7.1	\$ 0.7	\$ 1.1	\$ 2.1
Interest cost	11.5	11.3	11.1	0.8	1.5	2.4
Expected return on plan assets.....	(12.6)	(12.5)	(17.5)	--	--	--
Amortization of prior service cost	1.4	2.1	1.5	(3.1)	(1.6)	0.6
Recognized net actuarial loss.....	8.4	7.3	2.3	0.4	0.2	0.2
Settlement /curtailment loss.....	--	9.4	7.1	--	--	--
Net periodic benefit cost	<u>\$ 15.3</u>	<u>\$ 24.7</u>	<u>\$ 11.6</u>	<u>\$ (1.2)</u>	<u>\$ 1.2</u>	<u>\$ 5.3</u>

Unrecognized prior service cost is amortized over the average remaining service period of each active employee.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

In 2009, as a result of the workforce reduction associated with the restructuring program and associated distribution of benefits, the Company recorded a pre-tax pension settlement charge of \$9.4 million relating to lump-sum distributions to employees.

In 2008, the Company recorded a pre-tax pension settlement charge of \$7.1 million relating to employees that received lump-sum distributions in connection with the restructuring program initiated in 2007. Approximately \$0.3 million of this charge was included in discontinued operations.

The Company's funding policy for U.S. plans generally is to contribute annually into trust funds at a rate that provides for future plan benefits and maintains appropriate funded percentages. Annual contributions to the U.S. qualified plans are at least sufficient to satisfy regulatory funding standards and are not more than the maximum amount deductible for income tax purposes. The funding policies for the international plans conform to local governmental and tax requirements. The plans' assets are invested primarily in stocks and bonds.

The 2011 estimated amortization of amounts in other comprehensive income are as follows:

(Millions of Dollars)	Pension Benefits	Post Retirement Benefits
Amortization of prior service cost	\$ 1.3	\$ (3.1)
Amortization of net loss	8.1	0.3
Total costs to be recognized	<u>\$ 9.4</u>	<u>\$ (2.8)</u>

Additional Information

The weighted average assumptions used to determine net periodic benefit cost in the accounting for the pension benefit plans and other benefit plans for the years ended December 31, 2010, 2009 and 2008 are as follows:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Discount rate.....	5.75%	6.00%	6.30%
Expected return on plan assets.....	7.40%	7.15%	8.00%
Rate of compensation increase.....	3.50%	3.20%	3.50%

The weighted average assumptions used to determine benefit obligations for the pension benefit plans and other benefit plans at December 31, 2010, 2009 and 2008 are as follows:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Discount rate.....	5.70%	5.70%	6.20%
Rate of compensation increase.....	3.20%	3.20%	3.50%

For 2010, 2009 and 2008, the discount rate was based on a Citigroup yield curve of high quality corporate bonds with cash flows matching our plans' expected benefit payments. The expected return on plan assets is based on our asset allocation mix and our historical return, taking into account current and expected market conditions. The actual return (loss) on pension assets was approximately 7% in 2010, 7% in 2009 and (19%) in 2008.

The Company maintains a self-funded health insurance plan for its retirees. This plan provided that the maximum health care cost trend rate would be 5%. Effective June 2009, the Company amended its plan to change the eligibility requirement for retirees and revised its plan so that increases in expected health care costs would be borne by the retiree.

Plan Assets

The Company's pension plan weighted average asset allocation percentages at December 31, 2010 and 2009 by asset category are as follows:

<u>Asset Category</u>	<u>2010</u>	<u>2009</u>
Equity securities.....	69.3%	46.2%
Fixed income securities.....	28.4%	50.9%
Real estate.....	0.1%	0.1%
Other.....	2.2%	2.8%
Total.....	<u>100.0%</u>	<u>100.0%</u>

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The Company's pension plan fair values at December 31, 2010 and 2009 by asset category are as follows:

Million of Dollars

Asset Category	2010	2009
Equity securities.....	\$ 132.7	\$ 81.6
Fixed income securities	54.5	89.9
Real estate.....	0.2	0.2
Other.....	4.2	5.0
Total.....	<u>\$ 191.6</u>	<u>\$ 176.7</u>

During 2008, due to the economic crisis, the assets for all of the U.S. pension plans were moved to fixed income securities. During 2009, the Company began a program of systematically moving funds back into equities. The Company has since rebalanced its investment portfolio to adhere to its long-term investment strategy.

The following table presents domestic and foreign pension plan assets information at December 31, 2010, 2009 and 2008 (the measurement date of pension plan assets):

Millions of Dollars	U.S. Plans			International Plans		
	2010	2009	2008	2010	2009	2008
Fair value of plan assets.....	\$ 138.1	\$ 126.4	\$ 132.8	\$ 53.5	\$ 50.3	\$ 40.7

Contributions

The Company expects to contribute \$9 million to its pension plans and \$1.5 million to its other postretirement benefit plan in 2011.

Estimated Future Benefit Payments

The following benefit payments, which reflect expected future service, as appropriate, are expected to be paid:

Millions of Dollars	<u>Pension Benefits</u>	<u>Other Benefits</u>
2011	\$ 9.7	\$ 1.6
2012	\$ 10.6	\$ 1.4
2013	\$ 12.4	\$ 1.2
2014	\$ 13.7	\$ 1.2
2015	\$ 14.8	\$ 1.2
2016-2020	\$ 88.6	\$ 6.2

Investment Strategies

The investment strategy for pension plan assets is to maintain a broadly diversified portfolio designed to achieve our target of an average long-term rate of return of 7.4%. While we believe we can achieve a long-term average rate of return of 7.4%, we can not be certain that the portfolio will perform to our expectations. From inception through October 31, 2008, assets were strategically allocated among equity, debt and other investments to achieve a diversification level that dampens fluctuations in investment returns. The Company's long-term investment strategy has an investment portfolio mix of approximately 65% in equity securities and 35% in fixed income securities. The Company's 16-year average rate of return on assets through December 31, 2010 was over 9% on its investment assets despite the significant losses realized in 2008. During the fourth quarter of 2008, the Company adopted a capital conservation strategy as a result of the severe market volatility experienced in the latter part of 2008. As part of this strategy, the Company temporarily invested its pension assets in fixed income securities due to the uncertainty in the markets but has not changed its long-term investment strategy. During the third quarter 2009, we began a program of systematically moving funds back into equities. As of December 31, 2010, the Company had approximately 70% of its pension assets in equity securities and 30% in fixed income securities.

Savings and Investment Plans

The Company maintains a voluntary Savings and Investment Plan for most non-union employees in the U.S. Within prescribed limits, the Company bases its contribution to the Plan on employee contributions. The Company's contributions amounted to \$2.7 million, \$2.7 million and \$3.2 million for the years ended December 31, 2010, 2009 and 2008, respectively.

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Notes 17. Leases

The Company has several non-cancelable operating leases, primarily for office space and equipment. Rent expense amounted to approximately \$6.0 million, \$6.7 million and \$7.1 million for the years ended December 31, 2010, 2009 and 2008, respectively. Total future minimum rental commitments under all non-cancelable leases for each of the years 2011 through 2015 and in aggregate thereafter are approximately \$5.2 million, \$2.6 million, \$2.2 million, \$2.0 million, \$1.8 million, respectively, and \$10.7 million thereafter. Total future minimum rentals to be received under non-cancelable subleases were approximately \$1.7 million at December 31, 2010.

Total future minimum payments to be received under direct financing leases for each of the years 2011 through 2015 and the aggregate thereafter are approximately: \$3.5 million, \$1.8 million, \$1.2 million, \$0.9 million, \$0.8 million and \$0.9 million thereafter.

Note 18. Litigation

Certain of the Company's subsidiaries are among numerous defendants in a number of cases seeking damages for exposure to silica or to asbestos containing materials. The Company currently has 305 pending silica cases and 27 pending asbestos cases. To date, 1,160 silica cases and 5 asbestos cases have been dismissed. Most of these claims do not provide adequate information to assess their merits, the likelihood that the Company will be found liable, or the magnitude of such liability, if any. Additional claims of this nature may be made against the Company or its subsidiaries. At this time management anticipates that the amount of the Company's liability, if any, and the cost of defending such claims, will not have a material effect on its financial position or results of operations.

The Company has not settled any silica or asbestos lawsuits to date. We are unable to state an amount or range of amounts claimed in any of the lawsuits because state court pleading practices do not require identifying the amount of the claimed damage. The aggregate cost to the Company for the legal defense of these cases since inception was approximately \$0.2 million, the majority of which has been reimbursed by Pfizer Inc. pursuant to the terms of certain agreements entered into in connection with the Company's initial public offering in 1992. Our experience has been that the Company is not liable to plaintiffs in any of these lawsuits and the Company does not expect to pay any settlements or jury verdicts in these lawsuits.

Environmental Matters

On April 9, 2003, the Connecticut Department of Environmental Protection ("DEP") issued an administrative consent order relating to our Canaan, Connecticut, plant where both our Refractories segment and Specialty Minerals segment have operations. We agreed to the order, which includes provisions requiring investigation and remediation of contamination associated with historic use of polychlorinated biphenyls ("PCBs") at a portion of the site. The following is the present status of the remediation efforts:

- *Building Decontamination.* We have completed the investigation of building contamination and submitted several reports characterizing the contamination. We are awaiting review and approval of these reports by the regulators. Based on the results of this investigation, we believe that the contamination may be adequately addressed by means of encapsulation through painting of exposed surfaces, pursuant to the Environmental Protection Agency's ("EPA") regulations and have accrued such liabilities as discussed below. However, this conclusion remains uncertain pending completion of the phased remediation decision process required by the regulations.
- *Groundwater.* We have completed investigations of potential groundwater contamination and have submitted a report on the investigations finding that there is no PCB contamination, but some oil contamination of the groundwater. We expect the regulators to require confirmatory long term groundwater monitoring at the site.
- *Soil.* We have completed the investigation of soil contamination and submitted a report characterizing contamination to the regulators. Based on the results of this investigation, we believe that the contamination may be left in place and monitored, pursuant to a site-specific risk assessment, which is underway. However, this conclusion is subject to completion of a phased remediation decision process required by applicable regulations.

We believe that the most likely form of remediation will be to leave existing contamination in place, encapsulate it, and monitor the effectiveness of the encapsulation.

We estimate that the cost of the likely remediation above would approximate \$400,000, and that amount has been recorded as a liability on our books and records.

The Company is evaluating options for upgrading the wastewater treatment facilities at its Adams, Massachusetts plant. This work has been undertaken pursuant to an administrative Consent Order originally issued by the Massachusetts Department of Environmental Protection (DEP) on June 18, 2002. This Order was amended on June 1, 2009 and on June 2,

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2010. The amended Order required the installation of a groundwater containment system following DEP review and approval of certain items submitted by the Company prior to July 1, 2010, which the Company installed in 2010. The amended Order also includes the investigation by January 1, 2022 of options for ensuring that the facility's wastewater treatment ponds will not result in unpermitted discharge to groundwater. Additional requirements of the amendment include the submittal by July 1, 2022 of a plan for closure of a historic lime solids disposal area. Preliminary engineering reviews completed in 2005 indicate that the estimated cost of wastewater treatment upgrades to operate this facility beyond 2024 may be between \$6 million and \$8 million. The groundwater containment system, required to allow continued operation of the wastewater treatment ponds pending the required upgrades, will be up to \$3 million. The Company estimates that the remaining remediation costs would approximate \$400,000, which has been accrued as of December 31, 2010.

The Company and its subsidiaries are not party to any other material pending legal proceedings, other than routine litigation incidental to their businesses.

Note 19. Stockholders' Equity

Capital Stock

The Company's authorized capital stock consists of 100 million shares of common stock, par value \$0.10 per share, of which 18,298,551 shares and 18,740,616 shares were outstanding at December 31, 2010 and 2009, respectively, and 1,000,000 shares of preferred stock, none of which were issued and outstanding.

Cash Dividends

Cash dividends of \$3.7 million or \$0.20 per common share were paid during 2010. In January 2011, a cash dividend of approximately \$0.9 million or \$0.05 per share, was declared, payable in the first quarter of 2011.

Stock Award and Incentive Plan

The Company has adopted its 2001 Stock Award and Incentive Plan (the "Plan"), which provides for grants of incentive and non-qualified stock options, stock appreciation rights, stock awards or performance unit awards. The Plan is administered by the Compensation Committee of the Board of Directors. Stock options granted under the Plan have a term not in excess of ten years. The exercise price for stock options will not be less than the fair market value of the common stock on the date of the grant, and each award of stock options will vest ratably over a specified period, generally three years.

The following table summarizes stock option and restricted stock activity for the Plan:

	Shares Available for Grant	Stock Options		Restricted Stock	
		Shares	Weighted Average Exercise Price Per Share (\$)	Shares	Weighted Average Exercise Price Per Share (\$)

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 20. Comprehensive Income

Comprehensive income includes changes in the fair value of certain financial derivative instruments that qualify for hedge accounting to the extent they are effective, the recognition of deferred pension costs, and cumulative foreign currency translation adjustments.

The following table reflects the accumulated balances of other comprehensive income (loss):

(Millions of Dollars)	Currency Translation Adjustment	Unrecognized Pension Costs	Net Gain (Loss) On Cash Flow Hedges	Accumulated Other Comprehensive Income (Loss)
Balance at January 1, 2008	\$ 81.7	\$ (36.2)	\$ (0.1)	\$ 45.4
Current year net change	(49.4)	(28.8)	1.2	(77.0)
Balance at December 31, 2008	32.3	(65.0)	1.1	(31.6)
Current year net change	23.4	12.8	(1.4)	34.8
Balance at December 31, 2009	\$ 55.7	\$ (52.2)	\$ (0.3)	\$ 3.2
Current year net change	(9.2)	0.3	2.1	(6.8)
Balance at December 31, 2010	<u>\$ 46.6</u>	<u>\$ (51.9)</u>	<u>\$ 1.7</u>	<u>\$ (3.6)</u>

The income tax expense (benefit) associated with items included in other comprehensive income (loss) was approximately \$1.9 million, \$10.0 million and \$(18.0) million for the years ended December 31, 2010, 2009 and 2008, respectively.

Note 21. Accounting for Asset Retirement Obligations

The Company records asset retirement obligations in which the Company will be required to retire tangible long-lived assets. These are primarily related to its PCC satellite facilities and mining operations. The Company has also recorded the provisions related to conditional asset retirement obligations at its facilities. The Company has recorded asset retirement obligations at all of its facilities except where there are no contractual or legal obligations. The associated asset retirement costs are capitalized as part of the carrying amount of the long-lived asset.

The following is a reconciliation of asset retirement obligations as of December 31, 2010 and 2009:

(Millions of Dollars)	2010	2009
Asset retirement liability, beginning of period.....	\$ 14.0	\$ 13.0
Accretion expense	0.8	0.7
Additional obligations	0.1	--
Payments.....	(0.1)	--
Foreign currency translation	(0.1)	0.3
Asset retirement liability, end of period.....	<u>\$ 14.7</u>	<u>\$ 14.0</u>

The current portion of the liability of approximately \$0.4 million is included in other current liabilities. The long-term portion of the liability of approximately \$14.3 million is included in other non-current liabilities.

Accretion expense is included in cost of goods sold in the Company's Consolidated Statements of Operations.

Note 22. Non-Operating Income and Deductions

(Millions of dollars)	Year Ended December 31,		
	2010	2009	2008
Interest income.....	\$ 2.7	\$ 2.9	\$ 4.9
Interest expense.....	(3.3)	(3.5)	(5.2)
Foreign exchange gains (losses).....	0.3	(2.4)	1.7
Foreign currency translation loss upon liquidation.....	--	(2.3)	--
Gain on sale of previously impaired assets	0.2	--	--
Settlement for customer contract terminations.....	0.8	--	--
Other income (deductions).....	(0.1)	(0.8)	(1.1)
Non-operating income (deductions), net.....	<u>\$ 0.6</u>	<u>\$ (6.1)</u>	<u>\$ 0.3</u>

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

During the second quarter of 2010, the Company recognized income of \$0.8 million for a settlement related to a customer contract termination.

During the second quarter of 2009, the Company recognized foreign currency translation losses of \$2.3 million upon liquidation of the Company's operations at Gomez Palacio, Mexico.

Note 23. Segment and Related Information

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. The Company's operating segments are strategic business units that offer different products and serve different markets. They are managed separately and require different technology and marketing strategies.

The Company has two reportable segments: Specialty Minerals and Refractories. The Specialty Minerals segment produces and sells precipitated calcium carbonate and lime, and mines, processes and sells the natural mineral products limestone and talc. This segment's products are used principally in the paper, building materials, paints and coatings, glass, ceramic, polymers, food, automotive, and pharmaceutical industries. The Refractories segment produces and markets monolithic and shaped refractory products and systems used primarily by the steel, cement and glass industries as well as metallurgical products used primarily in the steel industry.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies. The Company evaluates performance based on the operating income of the respective business units. Depreciation expense related to corporate assets is allocated to the business segments and is included in their income from operations. However, such corporate depreciable assets are not included in the segment assets. Intersegment sales and transfers are not significant.

Segment information for the years ended December 31, 2010, 2009 and 2008 was as follows:

(Millions of Dollars)	2010		
	Specialty Minerals	Refractories	Total
Net sales	\$ 665.0	\$ 337.4	\$ 1,002.4
Income from operations.....	74.7	28.0	102.7
Restructuring and other charges.....	0.5	0.3	0.8
Depreciation, depletion and amortization	52.6	11.4	64.0
Segment assets	585.7	340.5	926.2
Capital expenditures.....	23.3	8.2	31.5
	2009		
(Millions of Dollars)	Specialty Minerals	Refractories	Total
Net sales	\$ 628.4	\$ 278.9	\$ 907.3
Income (loss) from operations.....	34.2	(48.8)	(14.6)

Capital expenditures.....	18.2	11.5	29.7

MINERALS TECHNOLOGIES INC. AND SUBSIDIARY COMPANIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

A reconciliation of the totals reported for the operating segments to the applicable line items in the consolidated financial statements is as follows:

(Millions of Dollars)

Income (loss) from continuing operations before provision (benefit) for taxes:

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Income (loss) from operations for reportable segments.....	\$ 102.7	\$ (14.6)	\$ 83.3
Unallocated corporate expenses	(4.5)	(2.5)	(1.3)
Interest income.....	2.7	2.9	4.9
Interest expense.....	(3.3)	(3.5)	(5.2)
Other income (deductions).....	<u>1.2</u>	<u>(5.4)</u>	<u>0.6</u>
Income (loss) from continuing operations before provision (benefit) for taxes	<u>\$ 98.8</u>	<u>\$ (23.1)</u>	<u>\$ 82.3</u>

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Total assets			
Total segment assets	\$ 926.2	\$ 957.9	\$ 1,028.5
Corporate assets	<u>189.9</u>	<u>114.2</u>	<u>39.1</u>
Consolidated total assets	<u>\$ 1,116.1</u>	<u>\$ 1,072.1</u>	<u>\$ 1,067.6</u>

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Capital expenditures			
Total segment capital expenditures	\$ 31.5	\$ 24.7	\$ 29.7
Corporate capital expenditures.....	<u>3.0</u>	<u>1.9</u>	<u>1.3</u>
Consolidated total capital expenditures	<u>\$ 34.5</u>	<u>\$ 26.6</u>	<u>\$ 31.0</u>

The carrying amount of goodwill by reportable segment as of December 31, 2010 and December 31, 2009 was as follows:

	<u>Goodwill</u>	
	<u>December 31,</u> <u>2010</u>	<u>December 31,</u> <u>2009</u>
(Millions of Dollars)		
Specialty Minerals.....	\$ 13.8	\$ 14.1
Refractories.....	<u>53.3</u>	<u>54.0</u>
Total	<u>\$ 67.1</u>	<u>\$ 68.1</u>

The net change in goodwill since December 31, 2009 is attributable to the effect of foreign exchange.

Financial information relating to the Company's operations by geographic area was as follows:

(Millions of Dollars)

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Net Sales			
United States.....	\$ 534.3	\$ 478.4	\$ 586.5
Canada/Latin America.....	68.9	60.2	83.8
Europe/Africa.....	288.4	283.9	352.7
Asia	<u>110.8</u>	<u>84.8</u>	<u>89.2</u>
Total International.....	<u>468.1</u>	<u>428.9</u>	<u>525.7</u>
Consolidated total net sales	<u>\$ 1,002.4</u>	<u>\$ 907.3</u>	<u>\$ 1,112.2</u>

(Millions of Dollars)

	<u>2010</u>	<u>2009</u>	<u>2008</u>
Long-lived assets			
United States.....	\$ 239.9	\$ 253.5	\$ 296.9
Canada/Latin America.....	14.9	13.5	13.3
Europe/Africa.....	89.9	105.7	130.4
Asia	<u>59.4</u>	<u>59.5</u>	<u>67.1</u>
Total International.....	<u>164.2</u>	<u>178.7</u>	<u>210.8</u>
Consolidated total long-lived assets	<u>\$ 404.1</u>	<u>\$ 432.2</u>	<u>\$ 507.7</u>

Net sales and long-lived assets are attributed to countries and geographic areas based on the location of the legal entity. No individual foreign country represents more than 10% of consolidated net sales or consolidated long-lived assets.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Minerals Technologies Inc.:

We have audited the accompanying consolidated balance sheets of Minerals Technologies Inc. and subsidiary companies as of December 31, 2010 and 2009, and the related consolidated statements of operations, shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2010. In connection with our audits of the consolidated financial statements, we also have audited the related financial statement schedule. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Minerals Technologies Inc. and subsidiary companies as of December 31, 2010 and 2009, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Mineral Technologies Inc. and subsidiary companies' internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 25, 2011 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

New York, New York
February 25, 2011

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Minerals Technologies Inc.:

We have audited Minerals Technologies Inc. and subsidiary companies' internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Minerals Technologies Inc. and subsidiary companies' management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Minerals Technologies Inc. and subsidiary companies maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Minerals Technologies Inc. and subsidiary companies as of December 31, 2010 and 2009, and the related consolidated statements of operations, shareholders' equity, and cash flows and related financial statement schedule for each of the years in the three-year period ended December 31, 2010, and our report dated February 25, 2011 expressed an unqualified opinion on those consolidated financial statements and financial statement schedule.

New York, New York
February 25, 2011

Management's Report On Internal Control Over Financial Reporting

Management of Minerals Technologies Inc. is responsible for the preparation, integrity and fair presentation of its published consolidated financial statements. The financial statements have been prepared in accordance with U.S. generally accepted accounting principles and, as such, include amounts based on judgments and estimates made by management. The Company also prepared the other information included in the annual report and is responsible for its accuracy and consistency with the consolidated financial statements.

Management is also responsible for establishing and maintaining effective internal control over financial reporting. The Company's internal control over financial reporting includes those policies and procedures that pertain to the Company's ability to record, process, summarize and report reliable financial data. The Company maintains a system of internal control over financial reporting, which is designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation of reliable published financial statements and safeguarding of the Company's assets. The system includes a documented organizational structure and division of responsibility, established policies and procedures, including a code of conduct to foster a strong ethical climate, which are communicated throughout the Company, and the careful selection, training and development of our people.

The Board of Directors, acting through its Audit Committee, is responsible for the oversight of the Company's accounting policies, financial reporting and internal control. The Audit Committee of the Board of Directors is comprised entirely of outside directors who are independent of management. The Audit Committee is responsible for the appointment and compensation of the independent registered public accounting firm. It meets periodically with management, the independent registered public accounting firm and the internal auditors to ensure that they are carrying out their responsibilities. The Audit Committee is also responsible for performing an oversight role by reviewing and monitoring the financial, accounting and auditing procedures of the Company in addition to reviewing the Company's financial reports. The independent registered public accounting firm and the internal auditors have full and unlimited access to the Audit Committee, with or without management, to discuss the adequacy of internal control over financial reporting, and any other matters which they believe should be brought to the attention of the Audit Committee.

Management recognizes that there are inherent limitations in the effectiveness of any system of internal control over financial reporting, including the possibility of human error and the circumvention or overriding of internal control. Accordingly, even effective internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation and may not prevent or detect misstatements. Further, because of changes in conditions, the effectiveness of internal control over financial reporting may vary over time.

The Company assessed its internal control system as of December 31, 2010 in relation to criteria for effective internal control over financial reporting described in "Internal Control - Integrated Framework" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its assessment, the Company has determined that, as of December 31, 2010, its system of internal control over financial reporting was effective.

The consolidated financial statements have been audited by the independent registered public accounting firm, which was given unrestricted access to all financial records and related data, including minutes of all meetings of stockholders, the Board of Directors and committees of the Board. Reports of the independent registered public accounting firm, which includes the independent registered public accounting firm's attestation of the effectiveness of the Company's internal control over financial reporting are also presented within this document.

RULE 13a-14(a)/15d-14(a) CERTIFICATION

I, Joseph C. Muscari, certify that:

1. I have reviewed this Annual Report on Form 10-K of Minerals Technologies Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors:
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

SECTION 1350 CERTIFICATION

Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (subsections (a) and (b) of Section 1350 of Chapter 63 of Title 18, United States Code), each of the undersigned officers of Minerals Technologies Inc., a Delaware corporation (the "Company"), does hereby certify that:

The Annual Report on Form 10-K for the year ended December 31, 2010 (the "Form 10-K") of the Company fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934, and information contained in the Form 10-K fairly presents, in all material respects, the financial condition and results of operations of the Company.

Dated: February 25, 2011

/s/ Joseph C. Muscari
Joseph C. Muscari
Chairman of the Board and
Chief Executive Officer

Dated: February 25, 2011

/s/ Douglas T. Dietrich
Douglas T. Dietrich
Senior Vice President-Finance and
Chief Financial Officer

The foregoing certification is being furnished solely pursuant to Exchange Act Rule 13a-14(b); is not deemed to be "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, or otherwise subject to the liability of that section; and is not deemed to be incorporated by reference into any filing under the Securities Act of 1933 or the Exchange Act of 1934.

Additional Information Regarding Non-GAAP Financial Measures (unaudited)

The letter to shareholders and other information set forth in the front part of this Annual Report present financial measures of the Company that exclude certain special items, and are therefore not in accordance with GAAP. The following is a presentation of the Company's non-GAAP income (loss) and operating income (loss), excluding special items, for the twelve month periods ended December 31, 2010 and December 31, 2009 and a reconciliation to GAAP net income (loss) and operating income (loss), respectively, for such periods. The Company's management believes these non-GAAP measures provide meaningful supplemental information regarding its performance as inclusion of such special items are not indicative of the ongoing operating results and thereby affect the comparability of results between periods. The Company feels inclusion of these non-GAAP measures also provides consistency in its financial reporting and facilitates investors' understanding of historic operating trends.
