KEWAUNEE®

2011 ANNUAL REPORT

Corporate Profile

Kewaunee Scientific Corporation is a recognized leader in the design, manufacture, and installation of laboratory, technical, and laminate furniture products. Laboratory furniture products include both steel and wood cabinetry, fume hoods, adaptable modular systems, moveable workstations, environmentally friendly casework, biological safety cabinets, and epoxy resin counters and sinks. Technical furniture products include column systems, slotted-post systems, pedestal systems, and stand-alone benches. Laminate furniture includes laminate casework and related products for educational, healthcare, and industrial applications.

The Company's corporate headquarters are located in Statesville, North Carolina. Three manufacturing facilities are located in Statesville, NC serving the domestic and international markets. One manufacturing facility is located in Bangalore, India serving the local and Asian markets. The Company has subsidiaries in Singapore and India. Kewaunee Scientific Corporation's website is located at <http://www.kewaunee.com>.

KEWAUNEE
Scientific
Corporation

Dear Stockholder:

July 15, 2011

Fiscal year 2011 was a year of progress for our Company, although much of the progress was not reflected in our earnings. Despite the year's many challenges, I feel Kewaunee is stronger today than a year ago. We brought to the marketplace outstanding new products, a renewed domestic and international sales network, and energetic, talented people working in an efficient management structure. The full impact of the recession was felt in the second half of the year as the number of construction projects available in the marketplace declined and we faced increased competition and aggressive pricing across all of our markets. We were further challenged by higher costs paid for steel and epoxy resin raw materials and building construction delays.

Sales for fiscal year 2011 were \$100,003,000, up 1% from sales of \$99,093,000 in the prior year, and the second highest in the Company's history. Net earnings for the year were \$1,850,000, or \$0.72 per diluted share, down from net earnings of \$3,572,000, or \$1.39 per diluted share, in the prior year. The Company's order backlog was \$65.7 million at April 30, 2011, down slightly from \$68.9 million at April 30, 2010.

Sales from domestic operations were \$84,121,000, down 4% from sales of \$87,561,000 in the prior year. The demand for larger domestic laboratory projects continued to hold up relatively well during the year, as owners often moved forward with projects to take advantage of aggressive pricing in the marketplace that reduced the overall building cost for a project. However, spending for small and mid-sized laboratory projects continued to be well below pre-recession levels and has yet to sustain any noticeable improvement. Lower prices occurred as the uncertainty of the economic recovery caused companies to aggressively bid for projects in order to maintain order backlogs and market share.

Our domestic sales network was significantly strengthened during the year with the addition of ISEC. As one of the largest interior specialty contractors in the United States, ISEC has been a major player in the laboratory furniture marketplace for many years. Based on their past success, we estimate this new relationship will increase our domestic sales by 15% to 20% within the next two years, as we begin to ship their orders at ISEC's historical pace. Although they are our exclusive dealer only for the Rocky Mountain States, their expected role is much broader, as their strong financial position, bonding capacity, and sales and project management capabilities will position them to quote our products in other regions of the country when the projects are too large or complex for our local dealer. We also opened a new direct sales office in California, a very significant marketplace for our products, where we determined our coverage needed to be strengthened. We are already experiencing positive results from this new office.

Sales from international operations were \$15,882,000, up 38% from sales of \$11,532,000 in the prior year. The international laboratory furniture marketplace continued its gradual recovery from the economic slowdown. We experienced increased sales, earnings, and quotation activity from the Asian and Middle East markets. We made a number of additions to our international sales network. Our sales representation in Kuwait was strengthened with the addition of a significant new dealer, Advanced Technology Company. Advanced Technology is well-established in the area as a full-service sales company for products in the laboratory and healthcare industries. We also continue to look for new channels to distribute our products in the global marketplace. During the year, a distribution agreement was signed with the ITS Group, which has a network of facilities and warehouses across Asia, to distribute Kewaunee fume hoods, biological safety cabinets, flammable storage cabinets, and acid safety cabinets in the countries of Indonesia, Malaysia, the Philippines, Vietnam, and Thailand. Additionally, B.J. Synergy, our dealer in China, has agreed to be a stocking distributor for our flammable storage cabinets and acid safety cabinets for the China market.

Until now, we have placed the majority of our international sales efforts in India and the Middle East, areas where we are well-established in presence and reputation. We think there are huge opportunities for our products in China, and we are now seriously looking at this market for expansion. The marketplace in China for laboratory investment is very healthy and growing at a rate exceeding 9% per year. Major investments are planned by the Chinese government for Centers for Disease Control, Food and Drug testing laboratories, and energy utility plants. We must have operations in China to take advantage of these opportunities. As our first

step, we are actively investigating specific locations within China to locate an assembly operation for our products. This will allow us to enter the market without a significant capital investment, which can be followed over time with more aggressive expansion efforts.

Our strategy to enter the healthcare furniture market with a full line of laminate furniture and architectural millwork products made good progress during the year. This market is estimated to be much larger than the laboratory furniture market, and sales of these products are a significant part of our long-term growth plans. *F.W. Dodge* and *Reed Construction* both estimate the domestic healthcare industry will continue its growth for the foreseeable future, as the baby boomer population advances toward retirement age. This advance is expected to provide many opportunities for our new products, as demand increases for outpatient care, clinics, hospitals, elderly housing, nursing homes, and other services. To lead the development of this important new business, we recently named David R. Rausch as the General Manager of a new Laminate Furniture Division. During the year, we completed the designs for our full product line of these products, and we now have several important orders in our backlog that will be shipping in the third and fourth quarters of fiscal year 2012.

We continue to look for new product offerings that have higher profit margins than our traditional furniture products. Many of these new products give us the opportunity to bundle the product with our furniture products and to sell them in new distribution channels. Our new biological safety cabinets fall into this category. The market for these products is well established and is estimated to be larger than the market for steel furniture or fume hoods. Designing our biological safety cabinets from scratch has proven to be a big advantage for us. Our new products include state-of-the-art technology, innovative and ergonomic designs, and other features that make them more appealing to customers and easier to install and service.

We began marketing and selling our biological safety cabinets to our traditional customers, and they were extremely well received. We have aggressive strategies in place to expand sales and distribution of these products, including taking these products to customers outside of our normal sales channels. For example, we recently added a major distributor for these products in Canada, and we are in serious discussions with major distributors for the United States market and the Australian market.

As a follow-up to the biological safety cabinets, we have completed designs for a full laminar flow hood product line and are nearing completion of several ductless fume hood products. The products are designed to protect the laboratory researcher when performing specific tasks, while reducing the amount of energy used and providing ease of service. We are also nearing National Safety Foundation approval for our new Class B fume hood, which will complete our biological safety cabinet product line.

The expansion of our epoxy resin facility in Statesville completed in the second quarter of the year has allowed us to increase sales of these products. We now have the ability to offer additional colors as demanded in the marketplace, as well as a host of other new epoxy products. This expansion also gives us the opportunity to continue growing and expanding this business.

We are continuing strategies to reduce manufacturing costs, with a goal of offsetting all material and labor cost increases. Our cost reduction teams continue to identify significant savings in our manufacturing operations. We also continue to look for ways to increase manufacturing efficiencies, including focusing on our manufacturing strengths and identifying certain processes that can be done more efficiently by others.

The Company's financial condition remains strong. Working capital increased to \$22.1 million at April 30, 2011, up from \$20.1 million at the end of the prior year. Cash on hand at the end of the year was \$3.0 million, as compared to \$2.3 million at the end of the prior year. Short term borrowings under the bank line of credit were \$6.6 million, as compared to \$4.9 million at the end of the prior year, and total bank borrowings and capital lease obligations were \$10.6 million, as compared to \$5.1 million at the end of the prior year. Total bank borrowings increased as a result of \$4 million in long-term financing related to the expansion of our Statesville operations. The debt-to-equity ratio was .34-to-1 at year-end, as compared to .17-to-1 at the end of the prior year.

Board Changes

In May 2011, John Russell was elected to our Board of Directors. Mr. Russell brings valuable expertise in management and manufacturing to our Board obtained from serving as the Chief Executive Officer of several companies, the most recent of which was a metal fabricating company. We are looking forward to his valuable advice and insight in the years ahead.

Two of our directors have chosen not to stand for re-election, and the annual meeting in August will mark the end of their distinguished service to our Board and Company. Wiley N. Caldwell was elected to the Kewaunee Board in 1988, while serving as President of W.W. Grainger, Inc., a position he held for eight years. Silas Keehn joined our Board in 2001 following a distinguished 13-year term as President of The Federal Reserve Bank of Chicago. Our Company and shareholders have been served remarkably well by the deep expertise in manufacturing, distribution, and finance that Mr. Caldwell and Mr. Keehn have brought to our Board deliberations. I am grateful to them for their conscientious execution of their responsibilities and the guidance and leadership they have provided to the Company and me.

Outlook

I remain optimistic about Kewaunee's long-term growth and profitability. My optimism is based on a number of factors, including our strong order backlog, the strengthening of our sales and distribution network, our expansion into the healthcare furniture market, the expected continuing recovery of the economy, and the success of our new products, such as our biological safety cabinets, laminar flow hoods, ductless fume hoods, and Class B fume hood. Additionally, we continue to see many global opportunities for growth in India, the Middle East, and in China. Regarding fiscal year 2012, we expect our sales and earnings to be improved over fiscal year 2011, with the second half of the year stronger than the first.

I would like to take this opportunity to thank all of you who have supported our Company and management team during the difficulties of the current recession. Your ongoing support, combined with the wise counsel of our Board of Directors, has been key to our growth and success the past years. I also want to thank our Kewaunee Associates, sales dealer network, and VWR, our stocking distributor, for their continuing support and many contributions.

As we move forward, our priorities remain to provide our stockholders a good return on investment, serve our customers with the best quality service, and provide our Associates with rewarding jobs and opportunities for advancement. We pledge our enduring efforts to achieve these goals.

Sincerely,

William A. Shumaker
Chairman of the Board,
President, Chief Executive Officer

See page 5 of this Annual Report for a discussion of factors that could significantly impact results or achievements expressed or implied by forward-looking statements made in this letter.

PART I

Item 1. Business

GENERAL

Our principal business is the design, manufacture, and installation of laboratory, technical and laminate furniture products. Laboratory furniture products include both steel and wood cabinetry, fume hoods, adaptable modular systems, moveable workstations, environmentally friendly casework, biological safety cabinets and epoxy resin counters and sinks. Technical furniture products include column systems, slotted-post systems, pedestal systems and stand-alone benches. Laminate furniture includes laminate casework, systems and related products for educational, healthcare and industrial applications.

Our products are sold primarily through purchase orders and contracts submitted by customers through our dealers and commissioned agents and a national distributor, as well as through competitive bids submitted by us and our subsidiaries in India and Singapore. Products are sold principally to pharmaceutical, biotechnology, industrial, chemical, and commercial research laboratories, educational institutions, healthcare institutions, governmental entities, manufacturing facilities, and users of networking furniture. We consider the markets in which we compete to be highly competitive, with a significant amount of the business involving competitive public bidding.

It is common in the laboratory furniture industry for customer orders to require delivery at extended future dates, as products are frequently to be installed in buildings yet to be constructed. Changes or delays in building construction may cause delays in delivery of the orders and our recognition of the sale. Since prices are normally quoted on a firm basis in the industry, we bear the burden of possible increases in labor and material costs between quotation of an order and delivery of the product. The impact of such possible increases is considered when determining the sales price.

Our need for working capital and our credit practices are comparable to those of other companies manufacturing, selling, and installing similar products in similar markets. Since our products are used in building construction projects, in many cases payments for our laboratory products are received over longer periods of time than payments for many other types of manufactured products, thus requiring increased working capital. In addition, payment terms associated with certain projects provide for a retention amount until completion of the project, thus also increasing required working capital. On average, payments for our products are received during the quarter following shipment, with the exception of the retention amounts which are collected at the completion of the project.

The principal raw materials and products manufactured by others and used by us in our products are cold-rolled carbon and stainless steel, hardwood lumber and plywood, paint, chemicals, resins, hardware, plumbing, and electrical fittings. Such materials and products are purchased from multiple suppliers and are typically readily available.

We hold various patents and patent rights, but do not consider that our success or growth is dependent upon our patents or patent rights. Our business is not dependent upon licenses, franchises, concessions, trademarks, royalty agreements, or labor contracts.

Our business is not generally cyclical, although sales are sometimes lower during our third quarter because of slower construction activity in certain areas of the country during the winter months. Our business is not dependent on any one or a few customers; however, sales to our national distributor, VWR International, LLC, represented approximately 14%, 10%, and 13% of sales in each of fiscal years 2011, 2010, and 2009, respectively.

Our order backlog at April 30, 2011 was \$65.7 million, as compared to \$68.9 million at April 30, 2010 and \$62.7 million at April 30, 2009. All but \$14.3 million of the backlog at April 30, 2011 was scheduled for shipment during fiscal year 2012; however, it may reasonably be expected that delays in shipments will occur because of customer rescheduling or delay in completion of projects which involve the installation of our products. Based on scheduled shipment dates and past experience, we estimate that more than 70 percent of our order backlog at April 30, 2011 will be shipped during fiscal year 2012.

SEGMENT INFORMATION

See Note 9 of the Notes to Consolidated Financial Statements included in Item 8 of this Annual Report on Form 10-K for information concerning our Domestic and International business segments.

COMPETITION

We consider the industries in which we compete to be highly competitive and believe that the principal competitive factors are price, product performance, and customer service. A significant portion of our business is based upon competitive public bidding.

RESEARCH AND DEVELOPMENT

The amount spent and expensed by us during the fiscal year ended April 30, 2011 on research and development activities related to new or redesigned products was \$1,181,000. The amounts spent for similar purposes in the fiscal years ended April 30, 2010 and 2009 were \$1,296,000 and \$1,108,000, respectively.

ENVIRONMENTAL COMPLIANCE

In the last three fiscal years, compliance with federal, state, or local provisions enacted or adopted regulating the discharge of materials into the environment has had no material effect on us. There is no material capital expenditure anticipated for such purposes, and accordingly, such regulation is not expected to have a material effect on our earnings or competitive position.

EMPLOYEES

At April 30, 2011, we had 475 domestic and 123 international full-time employees.

OTHER INFORMATION

Our Internet address is www.kewaunee.com. We make available, free of charge through this web site, our annual report to stockholders. Our Form 10-K and 10-Q financial reports may be obtained by stockholders by writing the Secretary of the Company, Kewaunee Scientific Corporation, P.O. Box 1842, Statesville, NC 28687-1842. The public may also obtain information on our reports, proxy, and information statements at the SEC Internet site www.sec.gov. The reference to our website does not constitute incorporation by reference of any information contained at that site.

SAFE HARBOR STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

Certain statements included and referenced in this report, including Management's Discussion and Analysis of Financial Condition and Results of Operations, constitute "forward-looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Reform Act"). Such forward-looking statements involve known and unknown risks, uncertainties, and other factors that could significantly impact results or achievements expressed or implied by such forward-looking statements. These factors include, but are not limited to, economic, competitive, governmental, and technological factors affecting our operations, markets, products, services, and prices, as well as prices for certain raw materials and energy. The cautionary statements made by us pursuant to the Reform Act herein and elsewhere should not be construed as exhaustive. We cannot always predict what factors would cause actual results to differ materially from those indicated by the forward-looking statements. In addition, readers are urged to consider statements that include the terms "believes," "belief," "expects," "plans," "objectives," "anticipates," "intends" or the like to be uncertain and forward-looking.

EXECUTIVE OFFICERS OF THE REGISTRANT

Included in Part III, Item 10(b) of this Annual Report on Form 10-K.

Item 1A. Risk Factors

You should carefully consider the following risks before you decide to buy shares of our common stock. If any of the following risks actually occur, our business, results of operations, or financial condition would likely suffer. In such case, the trading price of our common stock would decline, and you may lose all or part of the money you paid to buy our stock.

This and other public reports may contain forward-looking statements based on current expectations, assumptions, estimates, and projections about us and our industry. These forward-looking statements involve risks and uncertainties. Our actual results could differ materially from those forward-looking statements as a result of many factors, as more fully described below and elsewhere in our public reports. We do not undertake to update publicly any forward-looking statements for any reasons, even if new information becomes available or other events occur in the future.

Disruptions in the financial markets have created uncertainty and deteriorating economic conditions may adversely affect our customers and our business.

The financial markets in the United States, Europe, and Asia continue to be volatile. The tightening of credit in financial markets, continuation or worsening of the current economic conditions, a prolonged global, national or regional economic recession or other similar events could have a material adverse effect on the demand for our products and on our sales, pricing and profitability. We are unable to predict the likely duration of these adverse economic conditions and the impact these events may have on our operations and the laboratory furniture industry in general.

If we fail to compete effectively, our revenue and profit margins could decline.

We face a variety of competition in all of the markets in which we participate. Competitive pricing, including price competition or the introduction of new products, could have material adverse effects on our revenues and profit margins.

Our ability to compete effectively depends to a significant extent on the specification or approval of our products by architects, engineers, and customers. If a significant segment of those communities were to decide that the design, materials, manufacturing, testing, or quality control of our products is inferior to that of any of our competitors, our sales and profits would be materially and adversely affected.

If we lose a large customer, our sales and profits would decline.

We have substantial sales to one large customer. That distributor accounted for approximately 14% of our net sales in fiscal year 2011. Loss of all or a part of our sales to a large customer would have a material effect on our revenues and profits.

An increase in the price of raw materials and energy could negatively affect our sales and profits.

It is common in the laboratory furniture industry for customers to require delivery at extended future dates, as products are frequently to be installed in buildings yet to be constructed. Since prices are normally quoted on a firm basis in the industry, we bear the burden of possible increases in labor, material, and energy costs between the quotation of an order and the delivery of the products. Our principal raw materials are steel, including stainless steel, wood, and epoxy resin. Numerous factors beyond our control, such as general economic conditions, competition, worldwide demand, labor costs, energy costs, and import duties and other trade restrictions, influence prices for our raw materials. We have not always been able, and in the future we might not be able, to increase our product prices in amounts that correspond to increases in costs of raw materials, without materially and adversely affecting our sales and profits. Where we are not able to increase our prices, increases in our raw material costs will adversely affect our profitability.

Our future growth may depend on our ability to penetrate new international markets.

International laws and regulations, construction customs, standards, techniques, and methods differ from those in the United States. Significant challenges of conducting business in foreign countries include, among other factors, local acceptance of our products, political instability, currency controls, changes in import and export regulations, changes in tariff and freight rates, and fluctuations in foreign exchange rates.

Events outside our control may affect our operating results.

We have little control over the timing of our customer shipments. Shipments that we anticipate in one quarter may occur in another quarter, affecting both quarters' results. Weather conditions, such as unseasonably warm, cold, or wet weather, can affect and sometimes delay projects. Political and economic events can also affect our revenues. When sales do not meet our expectations, our operating results will be reduced for the relevant quarters.

Our principal markets are in the laboratory building construction industry. This industry is subject to significant volatility due to various factors, none of which is within our control. Declines in construction activity or demand for our products could materially and adversely affect our business and financial condition.

We depend on key management and technical personnel, the loss of whom could harm our business.

We depend on certain key management and technical personnel. The loss of one or more key employees may materially and adversely affect us. Our success also depends on our ability to attract and retain additional highly qualified technical, marketing, and management personnel necessary for the maintenance and expansion of our activities. We might not be able to attract or retain such personnel.

Our stock price is likely to be volatile and could drop.

The trading price of our Common Stock could be subject to wide fluctuations in response to quarter-to-quarter variation in operating results, announcement of technological innovations or new products by us or our competitors, general conditions in the construction and construction materials industries, relatively low trading volume in our common stock, and other events or factors. In addition, in recent years, the stock market has experienced extreme price fluctuations. This volatility has had a substantial effect on the market prices of securities issued by many companies for reasons unrelated to the operating performance of those companies. Securities market fluctuations may adversely affect the market price of our common stock.

We are subject to a number of significant risks that might cause our actual results to vary materially from our forecasts, targets, or projections, including:

- Failing to anticipate, appropriately invest in and effectively manage the human, information technology, and logistical resources necessary to support our business, including managing the costs associated with such resources;
- Failing to generate sufficient future positive operating cash flows and, if necessary, secure adequate external financing to fund our growth; and
- Interruptions in service by common carriers that ship goods within our distribution channels.

Item 2. Properties

We own and operate three adjacent manufacturing facilities in Statesville, North Carolina. These facilities also house our corporate offices, as well as sales and marketing, administration, engineering and drafting personnel. These facilities together comprise approximately 413,000 square feet and are located on approximately 20 acres of land. In addition, at April 30, 2011, we leased our primary distribution facility and other warehouse facilities totaling 220,000 square feet in Statesville, North Carolina. In Bangalore, India we also lease and operate a manufacturing facility comprising 55,000 square feet, a warehouse facility comprising 11,000 square feet, and a facility comprising 7,000 square feet that houses sales and administrative offices. The Company's real property and equipment located in Statesville, North Carolina are pledged as collateral for the Company's \$4 million seven-year term loan. We believe our facilities are suitable for their respective uses and are adequate for our current needs.

Item 3. Legal Proceedings

From time to time, we are involved in disputes and litigation relating to claims arising out of our operations in the ordinary course of business. Further, we are periodically subject to government audits and inspections. We believe that any such matters presently pending will not, individually or in the aggregate, have a material adverse effect on our results of operations or financial condition.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is traded in the NASDAQ Global Market, under the symbol KEQU. The following table sets forth the quarterly high and low prices reported on the NASDAQ Global Market.

	<u>First Quarter</u>	<u>Second Quarter</u>	<u>Third Quarter</u>	<u>Fourth Quarter</u>
2011				
High	\$14.89	\$12.25	\$14.17	\$14.25
Low	\$10.54	\$10.33	\$10.89	\$11.00
Close	\$11.31	\$11.21	\$13.72	\$11.10
2010				
High	\$12.60	\$16.00	\$15.88	\$16.42
Low	\$ 9.20	\$12.00	\$12.80	\$13.01
Close	\$11.90	\$13.25	\$14.37	\$13.19

As of July 11, 2011, we estimate there were approximately 1,000 stockholders of our common shares, of which 205 were stockholders of record. We paid cash dividends of \$0.40, \$0.38, and \$0.32 for fiscal years 2011, 2010, and 2009, respectively. We expect to pay dividends in the future in line with our actual and anticipated future operating results.

SECURITIES AUTHORIZED FOR ISSUANCE UNDER EQUITY COMPENSATION PLAN

See Item 12 in this Form 10-K for a discussion of securities authorized for issuance under our equity compensation plans.

Item 6. Selected Financial Data

The following table sets forth our selected consolidated financial information for each of the years ended April 30, 2011, 2010, 2009, 2008, and 2007; this information is derived from our audited Consolidated Financial Statements, the most recent three years of which appear elsewhere herein. The data presented below should be read in conjunction with the Consolidated Financial Statements and related Notes thereto and "Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Operations" included elsewhere herein.

	Years Ended April 30				
	2011	2010	2009	2008	2007

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this document constitute "forward-looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the "Reform Act"). Such forward-looking statements involve known and unknown risks, uncertainties, and other factors that could significantly impact results or achievements expressed or implied by such forward-looking statements. These factors include, but are not limited to, economic, competitive, governmental, and technological factors affecting our operations, markets, products, services, and prices. The cautionary statements made pursuant to the Reform Act herein and elsewhere by us should not be construed as exhaustive. We cannot always predict what factors would cause actual results to differ materially from those indicated by the forward-looking statements. In addition, readers are urged to consider statements that include the terms "believes," "belief," "expects," "plans," "objectives," "anticipates," "intends," or the like to be uncertain and forward-looking. Over time, our actual results, performance, or achievements will likely differ from the anticipated results, performance or achievements that are expressed or implied by our forward-looking statements, and such difference might be significant and harmful to our stockholders' interest. Many important factors that could cause such a difference are described under the caption "Risk Factors," in Item 1A of this Annual Report, which you should review carefully.

MANAGEMENT'S DISCUSSION AND ANALYSIS

INTRODUCTION

Kewaunee Scientific Corporation is a recognized leader in the design, manufacture, and installation of scientific laboratory, technical and laminate furniture. The Company's corporate headquarters are located in Statesville, North Carolina. The Company's manufacturing facilities are located in Statesville and Bangalore, India. The Company has subsidiaries in Singapore and Bangalore that serve the Asian and Middle East markets. Kewaunee Scientific's website is located at www.kewaunee.com.

Our products are primarily sold through purchase orders and contracts submitted by customers through our dealers and commissioned agents, a national distributor, and through competitive bids submitted by us and our subsidiaries. Products are sold principally to pharmaceutical, biotechnology, industrial, chemical, and commercial research laboratories, educational institutions, healthcare institutions, governmental entities, manufacturing facilities, and users of networking furniture. We consider the markets in which we compete to be highly competitive, with a significant amount of the business involving competitive public bidding.

It is common in the laboratory and laminate furniture industries for customer orders to require delivery at extended future dates, as products are frequently to be installed in buildings yet to be constructed. Changes or delays in building construction may cause delays in delivery of the orders and our recognition of the sale. Since prices are normally quoted on a firm basis in the industry, we bear the burden of possible increases in labor and material costs between quotation of an order and delivery of the product. The impact of such possible increases is considered when determining the sales price. The principal raw materials and products manufactured by others used in our products are cold-rolled carbon and stainless steel, hardwood lumbers and plywood, paint, chemicals, resins, hardware, plumbing and electrical fittings. Such materials and products are purchased from multiple suppliers and are typically readily available.

CRITICAL ACCOUNTING POLICIES

In the ordinary course of business, we have made a number of estimates and assumptions relating to the reporting of results of operations and financial position in the preparation of our consolidated financial statements in conformity with generally accepted accounting principles in the United States of America. Actual results could differ significantly from those estimates. We believe that the following discussion addresses our most critical accounting policies, which are those that are most important to the portrayal of our financial condition and results of operations, and require management's most difficult, subjective, and complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain.

Revenue Recognition

A portion of our product sales result from fixed-price construction contracts. We are usually in the role of a subcontractor, but in some cases may enter into a contract directly with the end-user of the products. Our contract arrangements normally do not contain a general right of return relative to the delivered items. Product sales resulting from fixed-price construction contracts are generated from multiple-element arrangements that require separate units of accounting and estimates regarding the fair value of individual elements. The Company has determined that its multiple-element arrangements that qualify as separate units of accounting are (1) product sales and (2) installation services. There is objective and reliable evidence of fair value for both the product sales and installation services,

and allocation of arrangement consideration for each of these units is based on their relative fair values. Each of these elements represents individual units of accounting, as the delivered item has value to a customer on a stand-alone basis. The Company's products are regularly sold on a stand-alone basis to customers which provides vendor-specific objective evidence of fair value. The fair value of installation services is separately calculated using expected costs of installation services. Many times the value of installation services is calculated using price quotations from subcontractors to the Company, who perform installation services on a stand-alone basis. Assuming all other criteria for revenue recognition have been met, we recognize revenue for product sales at the date of shipment. Product sales resulting from purchase orders involve a purchase order received by us from our dealers or our stocking distributor. This category includes product sales for standard products, as well as products which require some customization. These sales are recognized under the terms of the purchase order which generally are freight on board ("FOB") shipping point and do not include rights of return. Accordingly, these sales are recognized at the time of shipment.

Allowance for Doubtful Accounts

Evaluation of the allowance for doubtful accounts involves management judgments and estimates. We evaluate the collectability of our trade accounts receivable based on a number of factors. In circumstances where management is aware of a customer's inability to meet its financial obligations to us, or a project dispute makes it unlikely that all of the receivable owed by a customer will be collected, a specific reserve for bad debts is estimated and recorded to reduce the recognized receivable to the estimated amount we believe will ultimately be collected. In addition to specific customer identification of potential bad debts, a general reserve for bad debts is estimated and recorded based on our recent past loss history and an overall assessment of past due trade accounts receivable amounts outstanding.

Inventories

The majority of inventories are valued at the lower of cost or market under the last-in, first-out ("LIFO") method. The LIFO method allocates the most recent costs to cost of products sold, and, therefore, recognizes into operating results fluctuations in raw materials and other inventory costs more quickly than other methods. Inventories at our international subsidiaries are measured on the first-in, first-out ("FIFO") method.

Pension Benefits

We sponsor pension plans covering all employees who met eligibility requirements as of April 30, 2005. In February 2005, our pension plans were amended as of April 30, 2005. No further benefits have been, or will be, earned under the plans subsequent to the amendment date, and no additional participants have been, or will be, added to the plans. Several statistical and other factors, which attempt to anticipate future events, are used in calculating the expense and liability related to the pension plans. These factors include assumptions about the discount rate used to calculate and determine benefit obligations and expected return on plan assets within certain guidelines. The actuarial assumptions used by us may differ materially from actual results due to changing market and economic conditions, higher or lower withdrawal rates, or longer or shorter life spans of participants. These differences may significantly affect the amount of pension income or expense recorded by us in future periods.

RESULTS OF OPERATIONS

Sales for fiscal year 2011 were \$100.0 million, an increase of 1% from fiscal year 2010 sales of \$99.1 million. Domestic Operations sales for fiscal year 2011 were \$84.1 million, a decrease of 4% from the prior year. Sales in the domestic marketplace reflect lower sales of small and mid-sized projects due to the economic slowdown. International Operations sales for fiscal year 2011 were \$15.9 million, an increase of 38% from the prior year, as the international marketplace continued to recover from the economic slowdown.

Sales for fiscal year 2010 were \$99.1 million, a decrease of 4.7% from fiscal year 2009 sales of \$104.0 million. Domestic Operations sales for the year were \$87.6 million, a decrease of 3.0% from the prior year. The sales decline resulted from lower sales of small and mid-sized projects, as customers deferred placing these orders due to the recession, and lower sales from International Operations. International Operations sales for the year were \$11.5 million, a decrease of 16.0% from the prior year. The international laboratory furniture marketplace was hit particularly hard by the economic slowdown, but appeared to show signs of recovery late in the year as quotation activity increased.

Our order backlog was \$65.7 million at April 30, 2011, as compared to \$68.9 million at April 30, 2010, and \$62.7 million at April 30, 2009.

Gross profit represented 19.3%, 21.6%, and 20.6% of sales in fiscal years 2011, 2010, and 2009, respectively. The decrease in gross profit margin for fiscal year 2011 was primarily due to increased competitive pricing in the marketplace and higher costs for

steel and epoxy resin raw materials. The increase in gross profit margin in fiscal year 2010 from fiscal year 2009 was primarily due to savings from alternative sources of raw materials and components, cost improvements, and increased manufacturing efficiencies in the first half of the year associated with higher production volumes.

Operating expenses were \$16.1 million, \$15.6 million, and \$14.3 million in fiscal years 2011, 2010, and 2009, respectively, and 16.1%, 15.7%, and 13.7% of sales, respectively. The increase in operating expenses in fiscal year 2011 as compared to fiscal year 2010 resulted primarily from an increase in operating expenses of \$433,000 for expanded international operations, an increase of \$189,000 in sales and marketing expenses, an increase of \$129,000 in depreciation expense, and an increase of \$104,000 in stock option expense. These increases were partially offset by a decrease in pension expense of \$251,000 and a decrease in bad debt expense of \$101,000. The increase in operating expenses for fiscal year 2010 as compared to fiscal year 2009 resulted primarily from an increase of \$1.0 million in pension expense, an increase of \$219,000 in sales and marketing expenses, and an increase of \$98,000 in depreciation expense. The impact of these items was partially offset by a decrease of \$596,000 in compensation earned under performance incentive plans.

Other income was \$4,000 and \$1,000 in fiscal years 2011 and 2010, respectively. Other expense was \$28,000 in fiscal year 2009.

Interest expense was \$199,000, \$157,000, and \$280,000 in fiscal years 2011, 2010, and 2009, respectively. The increase in interest expense for fiscal year 2011 was due to higher levels of bank borrowings. The decrease in interest expense for fiscal year 2010 from fiscal year 2009 was primarily from lower levels of bank borrowings.

Income tax expense of \$864,000, or 29.2% of pretax earnings, was recorded for fiscal year 2011. Income tax expense of \$1,921,000, or 33.9% of pretax earnings, was recorded for fiscal year 2010. Income tax expense of \$2,264,000, or 33.4% of pretax earnings, was recorded in fiscal year 2009. The effective tax rate for each of these years is lower than the statutory rate due to the favorable impact of tax rates for the Company's international subsidiaries and the impact of state and federal tax credits. The lower effective tax rate for fiscal year 2011 also reflects the fact that a greater portion of pretax earnings were attributable to international subsidiaries which have lower rates.

Net earnings attributable to the noncontrolling interest related to our two subsidiaries that are not 100% owned by the Company were \$248,000, \$178,000, and \$265,000, for fiscal years 2011, 2010, and 2009, respectively. The changes in the net earnings attributable to the noncontrolling interest for each year were due to changes in the levels of net income of the subsidiaries.

Net earnings in fiscal year 2011 were \$1,850,000, or \$0.72 per diluted share. Net earnings in fiscal year 2010 were \$3,572,000, or \$1.39 per diluted share. Net earnings in fiscal year 2009 were \$4,247,000, or \$1.66 per diluted share.

LIQUIDITY AND CAPITAL RESOURCES

Our principal sources of liquidity have historically been funds generated from operating activities, supplemented as needed by borrowings under our revolving credit facility. Additionally, certain machinery and equipment are financed by non-cancelable operating leases or capital leases. We believe that these sources of funds will be sufficient to support ongoing business requirements, including capital expenditures, through fiscal year 2012.

At April 30, 2011, we had advances of \$6.6 million outstanding under our unsecured \$14 million revolving credit facility. The credit facility matures in July 2012. See Note 3 of the Notes to Consolidated Financial Statements included in Item 8 of this Annual Report for additional information concerning our credit facility.

The following table summarizes the cash payment obligations for our lease arrangements and long-term loan as of April 30, 2011:

PAYMENTS DUE BY PERIOD (\$ in thousands)

<u>Contractual Obligations</u>	<u>Total</u>	<u>1 Year</u>	<u>2-3 Years</u>	<u>4-5 Years</u>	<u>After 5 years</u>
Operating Leases	\$ 7,473	\$2,091	\$2,423	\$1,590	\$ 1,369
Capital Leases, including interest	126	89	37	—	—
Long-term Loan	3,867	200	400	400	2,867
Total Contractual Cash Obligations	<u>\$11,466</u>	<u>\$2,380</u>	<u>\$2,860</u>	<u>\$1,990</u>	<u>\$ 4,236</u>

Most of our leases are for machinery and equipment and provide us with renewal and purchase options and certain early cancellation rights. We do not have any off balance sheet arrangements at April 30, 2011.

Operating activities provided cash of \$1.3 million in fiscal year 2011, primarily from operating earnings and an increase in accounts payable, partially offset by increases in accounts receivable and inventory. Operating activities provided cash of \$4.5 million in fiscal year 2010, primarily from operating earnings and an increase in accounts payable and other accrued expenses, partially offset by increases in accounts receivable and inventory. Operating activities provided cash of \$2.1 million in fiscal year 2009, primarily from operating earnings and a decrease in prepaid income taxes, partially offset by increases in accounts receivable and inventory. The majority of the April 30, 2011 accounts receivable balances are expected to be collected during the first quarter of fiscal year 2012, with the exception of retention amounts on fixed-price contracts which are collected when the entire construction project is completed and all retention funds are paid by the owner.

As discussed above, no further benefits have been, or will be, earned under our pension plans after April 30, 2005, and no additional participants have been, or will be, added to the plans. We made contributions to the plans in fiscal year 2011 in the amount of \$719,000, and we expect to make contributions to the plans in fiscal year 2012 in the amount of \$402,000. We did not make any contributions to the plans in fiscal years 2010 and 2009.

Capital expenditures were \$5.2 million, \$4.2 million, and \$1.5 million in fiscal years 2011, 2010, and 2009, respectively. The increase in capital expenditures in fiscal year 2011 was primarily attributable to the completion of the expansion and remodeling of our Statesville facilities. The increase in expenditures in fiscal year 2010 as compared to fiscal year 2009 was primarily attributable to the expansion of the Company's India operations and Statesville facilities. Capital expenditures in fiscal year 2011 were primarily funded by long-term bank financing. Capital expenditures in fiscal years 2010 and 2009 were funded primarily from cash generated by operating activities. Fiscal year 2012 capital expenditures are anticipated to be approximately \$1.5 million, with the majority of these expenditures for manufacturing equipment. The fiscal year 2012 expenditures are expected to be funded primarily by operating activities, supplemented as needed by borrowings under our revolving credit facility.

Working capital increased to \$22.1 million at April 30, 2011, from \$20.1 million at April 30, 2010, and the ratio of current assets to current liabilities was 2.1-to-1.0 at April 30, 2011 and 2010. The increase in working capital for fiscal year 2011 was primarily due to proceeds from long-term debt and cash flow from operations.

We paid cash dividends of \$0.40, \$0.38, and \$0.32 per share in fiscal years 2011, 2010, and 2009, respectively. We expect to pay dividends in the future in line with our actual and anticipated future operating results.

RECENT ACCOUNTING STANDARDS

New Accounting Standards In December 2008, the Financial Accounting Standards Board ("FASB") issued new guidance regarding disclosures about plan assets of defined benefit pension or other postretirement plans. This guidance, which is now part of FASB Accounting Standards Codification ("ASC") 715, "Compensation – Retirement Benefits," is effective for financial statements issued for fiscal years ending after December 15, 2009, and was adopted by the Company effective April 30, 2010. See Note 8, "Retirement Benefits" for the new disclosures required by this guidance.

In April 2009, the FASB issued new guidance related to the disclosure of the fair value of financial instruments. The new guidance, which is now part of FASB ASC 825, "Financial Instruments," requires disclosure of the fair value of financial instruments in all interim financial statements. The adoption of this standard did not have a significant impact on the Company's consolidated financial position or results of operations.

In June 2009, the FASB issued Statement of Financial Accounting Standards ("SFAS") 168, "The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles – a replacement of FASB Statement 162." This statement modified the GAAP hierarchy by establishing only two levels of GAAP, authoritative and nonauthoritative. SFAS 168 also established the FASB Accounting Standards Codification™ as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP in the United States. All guidance contained in the Codification carries an equal level of authority. Effective July 1, 2009, the Codification superseded all then-existing non-SEC accounting and reporting standards. All other nongrandfathered non-SEC accounting literature not included in the Codification is nonauthoritative. SFAS 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009. All accounting references in this Annual Report on Form 10-K have been updated and, accordingly, references to prior accounting standards have been replaced with FASB ASC references as appropriate.

In August 2009, the FASB issued Accounting Standards Update (“ASU”) 2009-05, “Fair Value Measurements and Disclosures (Topic 820) – Measuring Liabilities at Fair Value.” The revised guidance provides clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, a reporting entity is required to measure fair value using one or more of the following techniques: (i) the quoted price of the identical liability when traded as an asset, (ii) quoted prices for similar liabilities or similar liabilities when traded as assets, or (iii) other valuation technique that is consistent with the principles of “Topic 820.” ASU 2009-05 was effective for reporting periods beginning after issuance. The adoption of this standard did not have a significant impact on the Company’s consolidated financial position or results of operations.

In October 2009, the FASB issued ASU 2009-13, “Revenue Recognition (Topic 605) – Multiple-Deliverable Revenue Arrangements – a consensus of the FASB Emerging Issues Task Force.” It updates the existing multiple-element revenue arrangements guidance currently included under FASB ASC 605-25, “Revenue Recognition, Multiple-element Arrangements.” The revised guidance primarily provides two significant changes: (i) eliminates the need for objective and reliable evidence of fair value for the undelivered element in order for a delivered item to be treated as a separate unit of accounting, and (ii) eliminates the residual method to allocate the arrangement consideration. In addition, the guidance expands the disclosure requirements for revenue recognition. ASU 2009-13 is effective for fiscal years beginning on or after June 15, 2010. The Company adopted this standard effective May 1, 2011. The Company does not expect the adoption of this standard to have a significant impact on the Company’s consolidated financial position or results of operations.

In January 2010, the FASB issued ASU 2010-06, “Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements.” This update requires the following new disclosures: (i) the amounts of significant transfer in and out of Level 1 and Level 2 fair value measurements and a description of the reasons for the transfer; and (ii) a reconciliation for fair value measurements using significant unobservable inputs (Level 3), including separate information about purchases, sales, issuance, and settlements. The update also clarifies existing requirements about fair value measurement disclosures and disclosures about inputs and valuation techniques. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods, beginning after December 15, 2009, except for the reconciliation of Level 3 activity, which is effective for fiscal years beginning after December 15, 2010. The Company adopted this guidance effective May 1, 2010. The adoption of this standard did not have a significant impact on the Company’s consolidated financial position or results of operations.

In April 2010, the FASB issued ASU 2010-17, “Revenue Recognition – Milestone Method (Topic 605).” This update provides guidance on defining a milestone and determining when it may be appropriate to apply the milestone method of revenue recognition for research or development transactions. Research or development arrangements frequently include payment provisions whereby a portion or all of the consideration is contingent upon milestone events such as successful completion of phases in a study or achieving a specific result from the research or development efforts. An entity often recognizes these milestone payments as revenue in their entirety upon achieving the related milestone, commonly referred to as the milestone method. The amendments in ASU 2010-17 are effective on a prospective basis for milestones achieved in fiscal years, and interim periods within those years, beginning on or after June 15, 2010. Early adoption is permitted. The Company adopted this standard effective May 1, 2011. The Company does not expect the adoption of this standard to have a significant impact on the Company’s consolidated financial position or results of operations.

OUTLOOK

Our current expectations are that fiscal year 2012 will again be profitable for the Company. However, we are unable to predict the timing and strength of the global economic recovery and its short-term and long-term impact on our operations and the markets in which we compete. The future demand for our products also continues to be limited given the Company’s role as subcontractor or supplier to dealers for subcontractors. In addition to the above factors affecting the Company and our markets, demand for our products is also dependent upon the number of laboratory construction projects planned and/or current progress in projects already under construction. Our earnings are also impacted by increased costs of raw materials, including stainless steel, wood, and epoxy resin, and whether we are able to increase product prices to customers in amounts that correspond to such increases without materially and adversely affecting sales. Additionally, since prices are normally quoted on a firm basis in the industry, we bear the burden of possible increases in labor and material costs between the quotation of an order and delivery of a product.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk in the area of interest rates. This exposure is associated with advances outstanding under our bank line of credit and certain lease obligations for production machinery, all of which are priced on a floating rate basis. Advances outstanding under the bank line of credit were \$6.6 million at April 30, 2011. In June 2010, the Company entered into an interest rate swap agreement whereby the interest rate payable by the Company on the \$4 million term loan was effectively converted to a fixed rate of 4.875% effective August 2, 2010. In July 2009, the Company entered into an interest rate swap agreement whereby the interest rate payable by the Company on \$2 million of outstanding advances under the revolving credit facility effectively converted to a fixed interest rate of 3.9% for the period beginning August 3, 2009, and ending August 1, 2012. The Company entered into this interest rate swap to mitigate future interest rate risk associated with advances under the credit facility. We believe that our exposure to market risk is not material.

**REPORT OF MANAGEMENT ON INTERNAL CONTROL OVER FINANCIAL REPORTING
TO THE STOCKHOLDERS AND BOARD OF DIRECTORS
OF KEWAUNEE SCIENTIFIC CORPORATION**

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with accounting principles generally accepted in the United States.

The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures of the Company are being made only in accordance with authorizations of Management and Directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management conducted an evaluation of the effectiveness of internal control over financial reporting based on the framework in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, Management concluded the Company maintained effective internal control over financial reporting as of April 30, 2011.

Chief Financial Officer

July 15, 2011

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
TO THE SHAREHOLDERS AND BOARD OF DIRECTORS
OF KEWAUNEE SCIENTIFIC CORPORATION
STATESVILLE, NORTH CAROLINA**

We have audited the accompanying consolidated balance sheets of Kewaunee Scientific Corporation and subsidiaries (the "Company") as of April 30, 2011 and 2010, and the related consolidated statements of operations, stockholders' equity and cash flows for each of the three years in the period ended April 30, 2011. Our audits also included the financial statement schedule listed in the index at Item 15(a). These consolidated financial statements and the financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and the financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company as of April 30, 2011 and 2010, and the consolidated results of their operations and their cash flows for each of the three years in the period ended April 30, 2011, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the related financial statement schedule when considered in relation to the consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We were not engaged to examine management's assertion about the effectiveness of the Company's internal control over financial reporting as of April 30, 2011 included in the accompanying "Report of Management on Internal Control over Financial Reporting," and, accordingly, we do not express an opinion thereon.

/s/ CHERRY, BEKAERT & HOLLAND, L.L.P.
Charlotte, North Carolina

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1—Summary of Significant Accounting Policies

Kewaunee Scientific Corporation (the “Company”) is a manufacturer of laboratory, technical, and laminate furniture products. Products include steel and wood cabinetry, fume hoods, flexible systems, worksurfaces, workstations, workbenches, computer enclosures, and laminate casework. The Company’s sales are made through purchase orders and contracts submitted by customers, dealers and agents, a national stocking distributor, competitive bids submitted by the Company, and its subsidiaries located in Singapore and Bangalore, India. The majority of the Company’s products are sold to customers located in North America, primarily within the United States. The Company’s laboratory products are used in chemistry, physics, biology, and other general science laboratories in the pharmaceutical, biotechnology, industrial, chemical, commercial, educational, government, and health care markets. Technical products are used in facilities manufacturing computers and light electronics, and by users of computer and networking furniture. Laminate casework is used in educational, healthcare, and industrial applications.

Principles of Consolidation The Company’s consolidated financial statements include the accounts of Kewaunee Scientific Corporation and its four international subsidiaries. A brief description of each subsidiary, along with the amount of the Company’s controlling financial interests, is as follows: (1) Kewaunee Labway Asia Pte. Ltd., a dealer for the Company’s products in Singapore, is 51% owned by the Company; (2) Kewaunee Labway India Pvt. Ltd., a dealer for the Company’s products in Bangalore, India, is 90% owned by Kewaunee Labway Asia, Pte. Ltd.; (3) Kewaunee Scientific Corporation India Pvt. Ltd. in Bangalore, India, a manufacturing and assembly operation, is 100% owned by the Company, and (4) Kewaunee Scientific Corporation Singapore Pte. Ltd., a holding company in Singapore, is 100% owned by the Company. All intercompany balances, transactions, and profits have been eliminated. Included in the consolidated financial statements are net assets of \$7,580,000 and \$6,906,000 at April 30, 2011 and 2010, respectively, of the Company’s subsidiaries. Net sales by the Company’s subsidiaries in the amount of \$15,882,000, \$11,532,000, and \$13,728,000 were included in the consolidated statements of operations for fiscal years 2011, 2010, and 2009, respectively.

Cash and Cash Equivalents Cash and cash equivalents consist of cash on hand and highly liquid investments with original maturities of three months or less. During the years ended April 30, 2011 and 2010, the Company had cash deposits in excess of FDIC insured limits. The Company has not experienced any losses from such deposits.

Restricted Cash Restricted cash includes bank deposits of a subsidiary used for performance guarantees against customer orders.

Allowance for Doubtful Accounts The Company evaluates the collectability of its trade accounts receivable based on a number of factors. In circumstances where management is aware of a customer’s inability to meet its financial obligations to the Company, or a project dispute makes it unlikely that all of the receivable owed by a customer will be collected, a specific reserve for bad debts is estimated and recorded to reduce the recognized receivable to the estimated amount the Company believes will ultimately be collected. In addition to specific customer identification of potential bad debts, a general reserve for bad debts is estimated and recorded based on the customer’s recent past loss history and an overall assessment of past due trade accounts receivable amounts outstanding. Accounts are written off when it is clearly established that the receivable is a bad debt. Recoveries of receivables previously written off are recorded when received.

Inventories The majority of inventories are valued at the lower of cost or market under the last-in, first-out (“LIFO”) method. The LIFO method allocates the most recent costs to cost of products sold; and, therefore, recognizes into operating results fluctuations in costs of raw materials more quickly than other methods. Inventories at our international subsidiaries are measured on the first-in, first-out (“FIFO”) method.

Property, Plant and Equipment Property, plant and equipment are stated at cost less accumulated depreciation. Depreciation is determined for financial reporting purposes principally on the straight-line method over the estimated useful lives of the individual assets or, for leaseholds, over the terms of the related leases, if shorter. Property, plant and equipment consisted of the following at April 30:

<u>\$ in thousands</u>	<u>2011</u>	<u>2010</u>	<u>Useful Life</u>
Land	\$ 41	\$ 41	N/A
Building and improvements	14,390	10,321	10-40 years
Machinery and equipment	28,285	32,838	5-10 years
Total	42,716	43,200	
Less accumulated depreciation	(26,141)	(29,385)	
Net property, plant and equipment	<u>\$ 16,575</u>	<u>\$ 13,815</u>	

At April 30, 2011 and 2010, equipment financed under capital leases with a cost of \$307,000 and \$477,000, respectively, was included in machinery and equipment. Management reviews the carrying value of property, plant and equipment for impairment whenever changes in circumstances or events indicate that such carrying value may not be recoverable. If projected undiscounted cash flows are not sufficient to recover the carrying value of the potentially impaired asset, the carrying value is reduced to estimated fair value. There were no impairments in fiscal years 2011 and 2010.

Other Assets Other assets at April 30, 2011 and 2010 included \$3,504,000 and \$3,461,000, respectively, of assets held in a trust account for non-qualified benefit plans and \$71,000 and \$100,000, respectively, of cash surrender values of life insurance policies. Life insurance policies are recorded at the amount that could be realized under the insurance contract as of the date of the Company's consolidated balance sheet with the change in cash surrender or contract value being recorded as income or expense during each period. Other assets at April 30, 2011 also included \$131,000 for the noncurrent portion of notes receivable.

Use of Estimates The presentation of consolidated financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from these estimates. Significant estimates impacting the accompanying consolidated financial statements include the allowance for uncollectible accounts receivable, inventory valuation, and pension liabilities.

Fair Value of Financial Instruments A financial instrument is defined as cash equivalents, evidence of an ownership interest in an entity, or a contract that creates a contractual obligation or right to deliver or receive cash or another financial instrument from another party. The Company's financial instruments consist primarily of cash and equivalents, notes receivable, mutual funds, cash surrender value of life insurance policies, capital lease obligations, and short-term borrowings. The carrying value of these assets and liabilities approximate their fair value.

Effective May 1, 2008, the Company adopted Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") 820 which provides a framework for measuring fair value under accounting principles generally accepted in the United States ("GAAP"). The adoption of this statement had an immaterial impact on our consolidated financial statements. The Company also adopted the deferral provisions, which delayed the effective date of ASC 820 for all nonrecurring fair value measurements of non-financial assets and liabilities until our fiscal year ended April 30, 2010.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also expands disclosures about instruments measured at fair value and establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value as follows:

- Level 1 Quoted prices in active markets for identical assets or liabilities as of the reporting date.
- Level 2 Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities as of the reporting date.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The following tables summarize the Company's fair value hierarchy for its financial assets and liabilities measured at fair value on a recurring and nonrecurring basis as of April 30, 2011 and 2010 (in thousands):

	2011			
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Financial Assets				
Trading securities held in deferred compensation plan (1)	\$ 3,504	\$ —	\$ —	\$ 3,504
Cash surrender value of life insurance policies (1)	—	71	—	71
Note receivable (3)	—	—	238	238
Total	\$ 3,504	\$ 71	\$ 238	\$ 3,813
Financial Liabilities				
Deferred compensation plans (2)	\$ —	\$ 3,726	\$ —	\$ 3,726
Interest rate swap derivative	—	221	—	221
Total	\$ —	\$ 3,947	\$ —	\$ 3,947
2010				
Financial Assets				
Trading securities held in deferred compensation plan (1)	\$3,461	\$ —	\$—	\$3,461
Cash surrender value of life insurance policies (1)	—	100	—	100
Note receivable (3)	—	—	314	314
Total	\$3,461	\$ 100	\$314	\$3,875
Financial Liabilities				
Deferred compensation plans (2)	\$ —	\$3,667	\$—	\$3,667
Interest rate swap derivative	—	49	—	49
Total	\$ —	\$3,716	\$—	\$3,716

- (1) The Company maintains an executive compensation plan which includes investment assets in a rabbi trust. These assets consist of marketable securities, which are valued using quoted market prices multiplied by the number of shares owned, and the cash surrender value of life insurance policies.
- (2) The deferred compensation plan liability is equal to the individual participants' account balances under the plan.
- (3) Measured on a non-recurring basis.

Revenue Recognition Product sales and installation revenue are recognized when all of the following criteria have been met: (1) products have been shipped, or customers have purchased and accepted title to the goods, but because of construction delays, have requested that the Company temporarily store the finished goods on the customer's behalf; service revenue for installation of products sold is recognized as the installation services are performed, (2) persuasive evidence of an arrangement exists, (3) the price to the customer is fixed, and (4) collectability is reasonably assured.

Deferred revenue consists of customer deposits and advance billings of the Company's products where sales have not yet been recognized. Accounts receivable includes retainage in the amounts of \$3,081,000 and \$2,557,000 at April 30, 2011 and 2010, respectively. Shipping and handling costs are included in cost of sales. Because of the nature and quality of the Company's products, any warranty issues are determined in a relatively short period after the sale and are infrequent in nature, and as such, warranty costs are immaterial to the Company's consolidated financial position and results of operations and are expensed as incurred.

Product sales resulting from fixed-price construction contracts involve a signed contract for a fixed price to provide the Company's laboratory furniture and fume hoods for a construction project. The Company is usually in the role of a subcontractor, but in some cases may enter into a contract directly with the end-user of the products. Contract arrangements normally do not contain a general right of return relative to the delivered items. Product sales resulting from fixed-price construction contracts are generated from multiple-element arrangements that require separate units of accounting and estimates regarding the fair value of individual elements. The Company has determined that its multiple-element arrangements that qualify as separate units of accounting are (1) product sales and (2) installation services. There is objective and reliable evidence of fair value for both the product sales and

installation services, and allocation of arrangement consideration for each of these units is based on their relative fair values. Each of these elements represent individual units of accounting, as the delivered item has value to a customer on a stand-alone basis. The Company's products are regularly sold on a stand-alone basis to customers which provides vendor-specific objective evidence of fair value. The fair value of installation services is separately calculated using expected costs of installation services. Many times the value of installation services is calculated using price quotations from subcontractors to the Company who perform installation services on a stand-alone basis.

Product sales resulting from purchase orders involve a purchase order received by the Company from its dealers or its stocking distributor. This category includes product sales for standard products, as well as products which require some customization. Any customization requirements are approved by the customer prior to manufacture of the customized product. Sales from purchase orders are recognized under the terms of the purchase order which generally are freight on board ("FOB") shipping point and do not include rights of return. Accordingly, these sales are recognized at the time of shipment.

Credit Concentration Credit risk is generally not concentrated with any one customer or industry, although the Company does enter into large contracts with individual customers from time to time. The Company performs credit evaluations of its customers. Revenues from the Company's national stocking distributor, VWR International, LLC, represented approximately 14%, 10%, and 13% of the Company's total sales in fiscal years 2011, 2010 and 2009, respectively.

Income Taxes In accordance with ASC 740, "Income Taxes," the Company uses the liability method in measuring the provision for income taxes and recognizing deferred tax assets and liabilities on the balance sheet. ASC 740 clarifies the financial statement recognition threshold and measurement attribute of a tax position taken or expected to be taken in a tax return. Under ASC 740, the Company applies a more-likely-than-not recognition threshold for all tax uncertainties. ASC 740 only allows the recognition of those tax benefits that have a greater than 50% likelihood of being sustained upon examination by the taxing authorities.

Research and Development Costs Research and development costs are charged to expense in the periods incurred. Expenditures for research and development costs were \$1,181,000, \$1,296,000, and \$1,108,000 for the fiscal years ended April 30, 2011, 2010, and 2009, respectively.

Advertising Costs Advertising costs are expensed as incurred, and include trade shows, training materials, sales samples, and other related expenses. Advertising costs for the years ended April 30, 2011, 2010, and 2009 were \$398,000, \$347,000, and \$249,000, respectively.

Derivative Financial Instruments The Company records derivatives on the balance sheet at fair value and establishes criteria for designation and effectiveness of hedging relationships. The nature of the Company's business activities involves the management of various financial and market risks, including those related to changes in interest rates. The Company does not enter into derivative instruments for speculative purposes. In June 2010, the Company entered into an interest rate swap agreement whereby the interest rate payable by the Company on the term loan was effectively converted to a fixed rate of 4.875% beginning August 2, 2010. In July 2009, the Company entered into an interest rate swap agreement whereby the interest rate payable by the Company on \$2 million of outstanding advances under the revolving credit facility was effectively converted to a fixed interest rate of 3.9% for the period beginning August 3, 2009, and ending August 1, 2012. The Company entered into these interest rate swap arrangements to mitigate future interest rate risk associated with its loan balances. (See Note 3.)

Foreign Currency Translation The financial statements of subsidiaries located outside the United States are measured using the local currency as the functional currency. Assets and liabilities of the Company's foreign subsidiaries are translated into United States dollars at year-end exchange rates. Sales, expenses, and cash flows are translated at weighted average exchange rates for each period. Net translation gains or losses are included in other comprehensive income, a separate component of stockholders' equity. The Company does not provide for U.S. income taxes on foreign currency translation adjustments, since it does not provide for taxes on undistributed earnings of foreign subsidiaries. Gains and losses from foreign currency transactions of these subsidiaries are included in net earnings.

Earnings Per Share Basic earnings per share is based on the weighted average number of common shares outstanding during the year. Diluted earnings per share reflects the assumed exercise and conversion of outstanding options under the Company's stock option plans, except when options have an antidilutive effect. Accordingly, options to purchase shares of 118,900, 73,725, and 153,050 at April 30, 2011, 2010, and 2009, respectively were not included in earnings per share. These options were not included in the computation of diluted earnings per share because the option exercise prices were greater than the average market price of the common shares at that date, and accordingly, such options would have an antidilutive effect.

The following is a reconciliation of basic to diluted weighted average common shares outstanding (in thousands):

	<u>2011</u>	<u>2010</u>	<u>2009</u>
Weighted average common shares outstanding			
Basic	2,575	2,564	2,555
Dilutive effect of stock options	<u>10</u>	<u>11</u>	<u>6</u>
Weighted average common shares outstanding—diluted	<u>2,585</u>	<u>2,575</u>	<u>2,561</u>

Accounting for Stock Options Compensation costs related to all stock awards granted by the Company are charged against income during their vesting period, under ASC 718, “Compensation – Stock Compensation,” for stock options. The Company granted stock options for 136,400, 47,200 and 38,500 shares during fiscal years 2011, 2010 and 2009, respectively. (See Note 5.)

Reclassifications Certain 2010 and 2009 amounts have been reclassified to conform with the 2011 presentation in the consolidated statements of operations and statements of cash flows. Such reclassifications had no impact on net earnings.

New Accounting Standards In December 2008, the Financial Accounting Standards Board (“FASB”) issued new guidance regarding disclosures about plan assets of defined benefit pension or other postretirement plans. This guidance, which is now part of FASB Accounting Standards Codification (“ASC”) 715, “Compensation – Retirement Benefits,” is effective for financial statements issued for fiscal years ending after December 15, 2009, and was adopted by the Company effective April 30, 2010. See Note 8, “Retirement Benefits” for the new disclosures required by this guidance.

In April 2009, the FASB issued new guidance related to the disclosure of the fair value of financial instruments. The new guidance, which is now part of FASB ASC 825, “Financial Instruments,” requires disclosure of the fair value of financial instruments in all interim financial statements. The adoption of this standard did not have a significant impact on the Company’s consolidated financial position or results of operations.

In June 2009, the FASB issued Statement of Financial Accounting Standards (“SFAS”) 168, “The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles – a replacement of FASB Statement 162.” This statement modified the GAAP hierarchy by establishing only two levels of GAAP, authoritative and nonauthoritative. SFAS 168 also established the FASB Accounting Standards Codification™ as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP in the United States. All guidance contained in the Codification carries an equal level of authority. Effective July 1, 2009, the Codification superseded all then-existing non-SEC accounting and reporting standards. All other nongrandfathered non-SEC accounting literature not included in the Codification is nonauthoritative. SFAS 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009. All accounting references in this Annual Report on Form 10-K have been updated and, accordingly, references to prior accounting standards have been replaced with FASB ASC references as appropriate.

In August 2009, the FASB issued Accounting Standards Update (“ASU”) 2009-05, “Fair Value Measurements and Disclosures (Topic 820) – Measuring Liabilities at Fair Value.” The revised guidance provides clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, a reporting entity is required to measure fair value using one or more of the following techniques: (i) the quoted price of the identical liability when traded as an asset, (ii) quoted prices for similar liabilities or similar liabilities when traded as assets, or (iii) other valuation technique that is consistent with the principles of “Topic 820.” ASU 2009-05 was effective for reporting periods beginning after issuance. The adoption of this standard did not have a significant impact on the Company’s consolidated financial position or results of operations.

In October 2009, the FASB issued ASU 2009-13, “Revenue Recognition (Topic 605) – Multiple-Deliverable Revenue Arrangements – a consensus of the FASB Emerging Issues Task Force.” It updates the existing multiple-element revenue arrangements guidance currently included under FASB ASC 605-25, “Revenue Recognition, Multiple-element Arrangements.” The revised guidance primarily provides two significant changes: (i) eliminates the need for objective and reliable evidence of fair value for the undelivered element in order for a delivered item to be treated as a separate unit of accounting, and (ii) eliminates the residual method to allocate the arrangement consideration. In addition, the guidance expands the disclosure requirements for revenue recognition. ASU 2009-13 is effective for fiscal years beginning on or after June 15, 2010. The Company adopted this standard effective May 1, 2011. The Company does not expect the adoption of this standard to have a significant impact on the Company’s consolidated financial position or results of operations.

In January 2010, the FASB issued ASU 2010-06, “Fair Value Measurements and Disclosures (Topic 820) – Improving Disclosures about Fair Value Measurements.” This update requires the following new disclosures: (i) the amounts of significant transfer in and

out of Level 1 and Level 2 fair value measurements and a description of the reasons for the transfer; and (ii) a reconciliation for fair value measurements using significant unobservable inputs (Level 3), including separate information about purchases, sales, issuance, and settlements. The update also clarifies existing requirements about fair value measurement disclosures and disclosures about inputs and valuation techniques. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods, beginning after December 15, 2009, except for the reconciliation of Level 3 activity, which is effective for fiscal years beginning after December 15, 2010. The Company adopted this guidance effective May 1, 2010. The adoption of this standard did not have a significant impact on the Company's consolidated financial position or results of operations.

In April 2010, the FASB issued ASU 2010-17, "Revenue Recognition – Milestone Method (Topic 605)." This update provides guidance on defining a milestone and determining when it may be appropriate to apply the milestone method of revenue recognition for research or development transactions. Research or development arrangements frequently include payment provisions whereby a portion or all of the consideration is contingent upon milestone events such as successful completion of phases in a study or achieving a specific result from the research or development efforts. An entity often recognizes these milestone payments as revenue in their entirety upon achieving the related milestone, commonly referred to as the milestone method. The amendments in ASU 2010-17 are effective on a prospective basis for milestones achieved in fiscal years, and interim periods within those years, beginning on or after June 15, 2010. Early adoption is permitted. The Company adopted this standard effective May 1, 2011. The Company does not expect the adoption of this standard to have a significant impact on the Company's consolidated financial position or results of operations.

Note 2—Inventories

Inventories consisted of the following at April 30:

<u>\$ in thousands</u>	<u>2011</u>	<u>2010</u>
Finished goods	\$ 2,887	\$2,199
Work-in-process	1,697	1,237
Materials and components	5,882	4,914
Total inventories	<u>\$10,466</u>	<u>\$8,350</u>

At April 30, 2011 and 2010, the Company's international subsidiaries inventories were \$824,000 and \$1,394,000, respectively, measured using the first-in, first-out ("FIFO") method. If all of the Company's inventories had been determined using the FIFO method at April 30, 2011 and 2010, reported inventories would have been \$1.5 million and \$1.7 million greater, respectively. During fiscal years 2011 and 2010, the LIFO index was less than 100% due to lower prices paid for certain materials. This reduction resulted in a liquidation of LIFO inventory quantities carried at higher costs prevailing in prior years as compared with the cost of purchases in fiscal years 2011 and 2010, the effect of which decreased the cost of sales by \$216,000 and \$248,000, respectively.

Note 3—Long-term Debt and Other Credit Arrangements

On August 2, 2010, the Company amended its existing bank agreement covering its unsecured \$14 million revolving credit facility to provide for an additional \$4 million seven-year term loan secured by the Company's real property and equipment located in Statesville, North Carolina. The term loan requires monthly principal payments of \$17,000, plus interest calculated at the 30-day LIBOR Market Index Rate plus 1.575%, with payment of the outstanding principal balance and any unpaid interest at the term loan maturity date. In June 2010, the Company entered into an interest rate swap agreement whereby the interest rate payable by the Company on the term loan was effectively converted to a fixed rate of 4.875% beginning August 2, 2010. Scheduled annual principal payments for the term loan are \$200,000 for fiscal years 2012 through 2017, and \$2,667,000 for fiscal year 2018.

In July 2009, the Company amended its unsecured \$14 million revolving credit facility to extend the facility's expiration date to July 31, 2012, and modify the variable rate component of the interest calculation. Monthly interest payments under the facility, as amended, are payable calculated at the 30-day LIBOR Market Interest Rate plus a variable rate ranging from 1.575% to 2.175%. The borrowing rate at April 30, 2011 was 1.786%, including a variable rate adjustment of 1.575%. At April 30, 2011, there were advances of \$6,588,000 outstanding under the facility. The credit facility includes financial covenants with respect to certain ratios, including (a) debt-to-net worth, (b) fixed charge coverage, and (c) asset coverage. At April 30, 2011 and 2010, the Company was in compliance with all of the financial covenants. In July 2009, the Company entered into an interest rate swap agreement whereby the interest rate payable by the Company on \$2 million of outstanding advances under the revolving credit facility effectively converted to a fixed rate of 3.9% for the period beginning August 3, 2009 and ending August 1, 2012.

Obligations for leases classified as capital leases were \$119,000 at April 30, 2011; scheduled lease payments for the capital leases, including interest, are \$89,000 and \$37,000 for fiscal years 2012 and 2013, respectively.

Note 4—Income Taxes

Income tax expense consisted of the following:

<u>\$ in thousands</u>	<u>2011</u>	<u>2010</u>	<u>2009</u>
Current tax expense (benefit):			
Federal	\$ 300	\$1,680	\$1,072
State and local	124	419	233
Foreign	185	226	413
Total current tax expense	<u>609</u>	<u>2,325</u>	<u>1,718</u>
Deferred tax expense (benefit):			
Federal	170	(611)	420
State and local	83	78	111
Foreign	2	129	15
Total deferred tax expense	<u>255</u>	<u>(404)</u>	<u>546</u>
Net income tax expense	<u>\$ 864</u>	<u>\$1,921</u>	<u>\$2,264</u>

The reasons for the differences between the above net income tax expense and the amounts computed by applying the statutory federal income tax rates to earnings before income taxes are as follows:

<u>\$ in thousands</u>	<u>2011</u>	<u>2010</u>	<u>2009</u>
Income tax expense at statutory rate	\$1,007	\$1,928	\$2,304
State and local taxes, net of federal income tax benefit (expense)	96	234	189
Tax credits (state, net of federal benefit)	(122)	(227)	(265)
Effects of differing US and foreign tax rates	(155)	48	(36)
Decrease in valuation allowance	—	—	(8)
Other items, net	38	(62)	80
Net income tax expense	<u>\$ 864</u>	<u>\$1,921</u>	<u>\$2,264</u>

Significant items comprising deferred tax assets and liabilities as of April 30 were as follows:

<u>\$ in thousands</u>	<u>2011</u>	<u>2010</u>
Deferred tax assets:		
Accrued employee benefit expenses	\$ 366	\$ 254
Allowance for doubtful accounts	97	101
Deferred compensation	1,449	1,426
Tax credits	423	481
Unrecognized actuarial loss, defined benefit plans	3,075	3,109
Other	(25)	(69)
Total deferred tax assets	<u>5,385</u>	<u>5,302</u>
Deferred tax liabilities:		
Book basis in excess of tax basis of property, plant and equipment	(2,370)	(2,149)
Prepaid pension	(2,161)	(2,072)
Other	(24)	(28)
Total deferred tax liabilities	<u>(4,555)</u>	<u>(4,249)</u>
Net deferred tax assets (liabilities)	<u>\$ 830</u>	<u>\$ 1,053</u>
Deferred tax assets classified in the balance sheet:		
Current	\$ 431	\$ 390
Long-term	399	663
Net deferred tax assets (liabilities)	<u>\$ 830</u>	<u>\$ 1,053</u>

At April 30, 2011, the Company had federal tax credit carryforwards in the amount of \$63,000 expiring beginning in 2020 and state tax credit carryforwards in the amount of \$359,000, net of federal benefit, expiring beginning in 2012. Due to the expiration schedule of the tax credits and a review of future taxable income required to utilize such credits before their expiration, no valuation allowance was recorded at April 30, 2011.

Note 5—Stock Options and Share-Based Compensation

During fiscal year 2011, the stockholders approved the 2010 Stock Option Plan for Directors (the “2010 Plan”), which allowed the Company to grant options on 100,000 shares of the Company’s common stock. Under this plan each eligible director will be granted options to purchase 10,000 shares at the fair market value at the date of grant for a term of five years. These options will be exercisable in four equal installments, one-fourth becoming exercisable on the next August 1 following the date of grant, and one-fourth becoming exercisable on August 1 of each of the next three years. At April 30, 2011, there were 20,000 shares available for future grants under the 2010 Plan.

During fiscal year 2009, the stockholders approved the 2008 Key Employee Stock Option Plan (the “2008 Plan”), which allowed the Company to grant options on 300,000 shares of the Company’s common stock. This plan replaced the Company’s previous stock option plans, but certain unexercised options previously granted under the old plans remain outstanding. Under both plans, options were granted at not less than the fair market value at the date of grant and options are exercisable in such installments, for such terms (up to 10 years), and at such times, as the Board of Directors may determine at the time of the grant. At April 30, 2011, there were 165,300 shares available for future grants under the 2008 Plan.

The Company recorded stock-based compensation expense in accordance with ASC 718. In order to determine the fair value of stock options on the date of grant, the Company applied the Black-Scholes option pricing model. Inherent in the model are assumptions related to expected stock-price volatility, option life, risk-free interest rate, and dividend yield. For stock options granted during the fiscal years 2011, 2010, and 2009, the Company believes that its historical share option experience does not provide a reasonable basis upon which to estimate expected term. The stock options granted have the “plain-vanilla” characteristics as defined in SEC Staff Accounting Bulletin No. 107 (SAB 107). The Company utilized the Safe Harbor option “Simplified Method” to determine the expected term of these options in accordance with the guidance of SAB 107 for options granted. The Company intends to continue to utilize the “Simplified Method” for future grants in accordance with the guidance of SAB 110 until such time that the Company believes that its historical share option experience will provide a reasonable basis to estimate expected term. The fair value of the options granted as shown below was estimated using the Black-Scholes model with the following assumptions:

	<u>2011</u>		<u>2010</u>	<u>2009</u>
	<u>2008 Plan</u>	<u>2010 Plan</u>		
Options granted	56,400	80,000	47,200	38,500
Weighted average expected stock price volatility	47.53%	57.63%	46.02%	39.04%
Expected option life	6.25 years	3.75 years	6.25 years	6.25 years
Average risk-free interest rate	1.80%	0.95%	2.76%	2.81%
Average dividend yield	2.95%	2.95%	3.22%	1.82%
Estimated fair value of each option	\$3.79	\$3.83	\$4.42	\$5.16

The stock-based compensation expense is recorded over the vesting period (4 years) for the options granted, net of tax. The Company recorded \$139,000, \$70,000 and \$46,000 compensation expense net of \$86,000, \$51,000 and \$24,000 deferred income tax benefit in fiscal years 2011, 2010, and 2009, respectively. The remaining compensation expense of \$384,000, net of \$244,000 deferred income tax benefit, will be recorded over the remaining vesting periods.

The Company utilized treasury stock to satisfy stock options exercised during fiscal years 2011, 2010, and 2009. Stock option activity and weighted average exercise price is summarized as follows:

	2011		2010		2009	
	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price
Outstanding at beginning of year	158,925	\$12.86	153,050	\$12.25	136,550	\$11.50
Granted	136,400	10.64	47,200	12.66	38,500	14.69
Canceled	(1,675)	11.83	(3,825)	11.77	(1,000)	12.00
Exercised	(13,850)	9.71	(37,500)	10.22	(21,000)	11.86
Outstanding at end of year	279,800	11.94	158,925	12.86	153,050	12.25
Exercisable at end of year	81,588	12.86	66,656	11.67	87,475	10.35

The number of options outstanding, exercisable, and their weighted average exercise prices were within the following price ranges at April 30, 2011:

	Exercise Price Range	
	\$9.10-\$12.66	\$14.69-\$14.90
Options outstanding	206,450	73,350
Weighted average exercise price	\$ 10.93	\$ 14.79
Weighted average remaining contractual life (years)	8.11	6.84
Aggregate intrinsic value	\$ 107,000	\$ —
Options exercisable	35,888	45,700
Weighted average exercise price	\$ \$10.37	\$ \$14.81
Aggregate intrinsic value	\$ 44,000	\$ —

Note 6—Accumulated Other Comprehensive Income (Loss)

The Company's other comprehensive income (loss) consists of unrealized gains and losses on the translation of the assets, liabilities, and equity of its foreign subsidiaries, changes in the fair value of its cash flow hedges, and additional minimum pension liability adjustments, net of income taxes. The before tax income (loss), related income tax effect, and accumulated balances are as follows:

\$ in thousands	Cash Flow Hedge	Foreign Currency Translation Adjustment	Minimum Pension Liability Adjustment	Total Accumulated Other Comprehensive Income (Loss)
Balance at April 30, 2008	\$ —	\$ 343	\$(2,384)	\$(2,041)
Foreign currency translation adjustment	—	(633)	—	(633)
Change in unrecognized actuarial loss, defined benefit plans	—	—	(4,568)	(4,568)
Income tax effect	—	—	1,721	1,721
Balance at April 30, 2009	—	(290)	(5,231)	(5,521)
Foreign currency translation adjustment	—	307	—	307
Change in fair value of cash flow hedges	(49)	—	—	(49)
Change in unrecognized actuarial loss, defined benefit plans	—	—	377	377
Income tax effect	18	—	(30)	(12)
Balance at April 30, 2010	(31)	17	(4,884)	(4,898)
Foreign currency translation adjustment	—	21	—	21
Change in fair value of cash flow hedges	(172)	—	—	(172)
Change in unrecognized actuarial loss, defined benefit plans	—	—	88	88
Income tax effect	65	—	(34)	31
Balance at April 30, 2011	\$ (138)	\$ 38	\$(4,830)	\$(4,930)

Note 7—Commitments and Contingencies

The Company entered into a 10-year operating lease for a new distribution center in fiscal year 2003. During fiscal years 2009 and 2007, the Company entered into several leases related to a new Enterprise Resource Planning System (ERP) that were classified as capital leases. The Company also leases some of its machinery and equipment under non-cancelable operating leases. Most of these leases provide the Company with renewal and purchase options, and most leases of machinery and equipment have certain early cancellation rights. Rent expense for these operating leases was \$2,323,000, \$2,380,000, and \$1,928,000 in fiscal years 2011, 2010, and 2009, respectively. Future minimum payments under the above non-cancelable lease arrangements for the years ended April 30 are as follows:

<u>\$ in thousands</u>	<u>Operating</u>	<u>Capital</u>
2012	\$2,091	\$ 89
2013	1,440	37
2014	983	—
2015	858	—
2016	732	—
Thereafter	<u>1,369</u>	<u>—</u>
Total minimum lease payments	7,473	126
Less: amount representing interest	<u>—</u>	<u>(7)</u>
Capital lease obligation	<u>\$7,473</u>	<u>\$ 119</u>

The Company is involved in certain claims and legal proceedings in the normal course of business which management believes will not have a material adverse effect on the Company's consolidated financial condition or results of operations.

Note 8—Retirement Benefits

Defined Benefit Plans

The Company has non-contributory defined benefit pension plans covering a significant number of salaried and hourly employees. These plans were amended as of April 30, 2005; no further benefits have been, or will be, earned under the plans subsequent to the amendment date, and no additional participants will be added to the plans. The defined benefit plan for salaried employees provides pension benefits that are based on each employee's years of service and average annual compensation during the last 10 consecutive calendar years of employment as of April 30, 2005. The benefit plan for hourly employees provides benefits at stated amounts based on years of service as of April 30, 2005. The Company uses an April 30 measurement date for its defined benefit plans. The change in projected benefit obligations and the change in fair value of plan assets for the non-contributory defined benefit pension plans for each of the years ended April 30 are summarized as follows:

<u>\$ in thousands</u>	<u>2011</u>	<u>2010</u>
Accumulated Benefit Obligation, April 30	<u>\$17,328</u>	<u>\$15,775</u>
Change in Projected Benefit Obligations		
Projected benefit obligations, beginning of year	\$15,775	\$13,421
Interest cost	959	951
Actuarial loss	1,328	2,122
Actual benefits paid	<u>(734)</u>	<u>(719)</u>
Projected benefit obligations, end of year	<u>17,328</u>	<u>15,775</u>
Change in Plan Assets		
Fair value of plan assets, beginning of year	13,110	11,086
Actual return (loss) on plan assets	1,884	2,743
Employer contributions	719	—
Actual benefits paid	<u>(734)</u>	<u>(719)</u>
Fair value of plan assets, end of year	<u>14,979</u>	<u>13,110</u>
Funded status – over (under)	<u>\$ (2,349)</u>	<u>\$ (2,665)</u>

<u>\$ in thousands</u>	<u>2011</u>	<u>2010</u>
Amounts Recognized in the Consolidated Balance Sheets consist of:		
Noncurrent assets	\$ —	\$ —
Noncurrent liabilities	<u>(2,349)</u>	<u>(2,665)</u>
Net amount recognized	<u>\$ (2,349)</u>	<u>\$ (2,665)</u>

Amounts recognized in accumulated other comprehensive income (loss) consist of:		
Net actual loss	\$ 7,905	\$ 7,993
Deferred tax benefit	<u>(3,075)</u>	<u>(3,109)</u>
After-tax actuarial loss	<u>\$ 4,830</u>	<u>\$ 4,884</u>

Weighted-Average Assumptions Used to Determine Benefit Obligations at April 30		
Discount rate	5.60%	6.00%
Rate of compensation increase	N/A	N/A

Weighted-Average Assumptions Used to Determine Net Periodic Benefit Cost for Years Ended April 30		
Discount rate	6.00%	7.04%
Expected long-term return on plan assets	8.75%	8.75%
Rate of compensation increase	N/A	N/A

The components of the net periodic pension cost (income) for each of the fiscal years ended April 30 are as follows:

<u>\$ in thousands</u>	<u>2011</u>	<u>2010</u>	<u>2009</u>
Interest cost	\$ 959	\$ 951	\$ 895
Expected return on plan assets	<u>(1,155)</u>	<u>(938)</u>	<u>(1,353)</u>
Recognition of net loss	<u>687</u>	<u>694</u>	<u>161</u>
Net periodic pension cost (income)	<u>\$ 491</u>	<u>\$ 707</u>	<u>\$ (297)</u>

The estimated net actuarial loss for the defined benefit pension plans that will be amortized from accumulated other comprehensive income into net periodic benefit cost during the fiscal year 2012 is \$632,000.

The Company's funding policy is to contribute to the plans when pension laws and economics either require or encourage funding. Contributions of \$719,000 were made to the plan in fiscal year 2011. No contributions were made to the plans in fiscal years 2010 and 2009. The Company anticipates that contributions in the amount of \$402,000 will be required for fiscal year 2012.

The following benefit payments are expected to be paid from the benefit plans in the fiscal years ended April 30:

<u>\$ in thousands</u>	<u>Amount</u>
2012	\$ 908
2013	\$ 969
2014	\$1,037
2015	\$1,094
2016	\$1,158
2017-2021	\$6,211

The Company employs a building block approach in determining the long-term rate of return for plan assets. Historical markets are studied and long-term historical relationships between equities and fixed-income securities are preserved consistent with the widely accepted capital market principle that assets with higher volatility generate a greater return over the long-term. Current market factors such as inflation and interest rates are evaluated before long-term capital market assumptions are determined. The expected long-term portfolio return is established via a building block approach with proper consideration of diversification and rebalancing. Peer data and historical returns are also reviewed to check for reasonability and appropriateness.

In fiscal years 2011, 2010, and 2009 the Company used a Yield Curve technique methodology to determine its GAAP discount rate. Under this approach, future benefit payment cash flows are projected from the pension plan on a projected benefit obligation basis. The payment stream is discounted to a present value using an interest rate applicable to the timing of each respective cash flow. The graph of these time-dependent interest rates is known as a yield curve. For the 2011 and 2010 fiscal years, the interest rates comprising the Yield Curve are determined through a statistical analysis performed by the IRS and issued each month in the form of a pension discount curve. For this purpose, the universe of possible bonds consists of a set of bonds which are designated as corporate, have high quality ratings (AAA, AA, or A) from nationally recognized statistical rating organizations, and have at least \$250 million in par amount outstanding on at least one day during the reporting period. A 1% increase/decrease in the discount rate for fiscal years 2011 and 2010 would decrease/increase pension expense by approximately \$212,000 and \$108,000, respectively.

The Company employs a total return investment approach, whereby a mix of equities and fixed-income investments are used to attempt to maximize the long-term return on plan assets for a prudent level of risk. Risk tolerance is established through careful consideration of plan liabilities, plan funded status, and corporate financial condition. The investment portfolio contains a diversified blend of equity and fixed-income investments. Furthermore, equity investments are diversified across U.S. and non-U.S. stocks, as well as growth, value, and small and large capitalizations. The target allocations based on the Company's investment policy was 70% in equity securities and 30% in fixed-income securities at April 30, 2011 and 65% in equity securities and 35% in fixed income securities at April 30, 2010. A 1% increase/decrease in the expected return on assets for fiscal years 2011 and 2010 would decrease/increase pension expense by approximately \$132,000 and \$107,000, respectively.

Plan assets by asset categories as of April 30, 2011 and 2010 were as follows:

<u>\$ in thousands</u> <u>Asset Category</u>	<u>2011</u>		<u>2010</u>	
	<u>Amount</u>	<u>%</u>	<u>Amount</u>	<u>%</u>
Equity Securities	\$11,342	76	\$ 8,827	67
Fixed Income Securities	3,458	23	3,994	30
Cash and Cash Equivalents	179	1	289	3
Totals	\$14,979	100	\$13,110	100

The following tables present the fair value of the assets in our defined benefit pension plans at April 30, 2011 and 2010:

<u>Asset Category</u>	<u>2011</u>		
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
Large Cap	\$ 6,382	\$ —	—
Small/Mid Cap	1,603	—	—
International	1,492	—	—
Emerging Markets	1,278	—	—
Real Estate/Commodities	587	—	—
Fixed Income	3,458	—	—
Cash and Cash Equivalents	179	—	—
Totals	\$14,979	\$ —	\$ —

<u>Asset Category</u>	<u>2010</u>		
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
Large Cap	\$ 4,810	\$ —	\$ —
Small/Mid Cap	1,308	—	—
International	1,275	—	—
Emerging Markets	1,068	—	—
Real Estate/Commodities	366	—	—
Fixed Income	3,994	—	—
Cash and Cash Equivalents	289	—	—
Totals	\$13,110	\$ —	\$ —

Level 1 retirement plan assets include United States currency held by a designated trustee and equity funds of common and preferred securities issued by domestic and foreign corporations. These equity funds are traded actively on exchanges and price quotes for these shares are readily available.

Defined Contribution Plan

The Company has a defined contribution plan covering substantially all salaried and hourly employees. The plan provides benefits to all employees who have attained age 21, completed three months of service, and who elect to participate. The plan provides that the Company make matching contributions equal to 100% of the employee's qualifying contribution up to 3% of the employee's compensation, and make matching contributions equal to 50% of the employee's contributions between 3% and 5% of the employee's compensation, resulting in a maximum employer contribution equal to 4% of the employee's compensation. Additionally, the plan provides that the Company may elect to make a non-matching contribution for participants employed by the Company on December 31 of each year up to 1% of the participant's qualifying compensation for that calendar year. The Company's contributions to the plan in fiscal years 2011, 2010, and 2009 were \$847,000, \$862,000, and \$853,000, respectively.

Note 9—Segment Information

The Company's operations are classified into two business segments: Domestic Operations and International Operations. The Domestic Operations segment principally designs, manufactures, and installs scientific and technical furniture, including steel and wood laboratory cabinetry, fume hoods, laminate casework, flexible systems, worksurfaces, workstations, workbenches, and computer enclosures. The International Operations segment, which consists of four foreign subsidiaries as identified in Note 1, provides both the Company's products and services, including facility design, detailed engineering, construction, and project management from the planning stage through testing and commissioning of laboratories.

Intersegment transactions are recorded at normal profit margins. All intercompany balances and transactions have been eliminated. Certain corporate expenses shown below have not been allocated to the business segments.

The following table shows revenues, earnings, and other financial information by business segment for each of the three years ended April 30:

<u>\$ in thousands</u>	<u>Domestic Operations</u>	<u>International Operations</u>	<u>Corporate</u>	<u>Total</u>
Fiscal Year 2011				
Revenues from external customers	\$84,121	\$15,882	\$ —	\$100,003

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are intended to ensure that the information required to be disclosed in our filings under the Securities Exchange Act of 1934 (the "Exchange Act") is properly and timely recorded, processed, summarized, and reported. Our management, including the Chief Executive Officer and Chief Financial Officer, have conducted an evaluation of the effectiveness of disclosure controls and procedures as of April 30, 2011 pursuant to Exchange Act Rule 13a-14. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures are effective to provide reasonable assurance that we are able to collect, process, record, and disclose, within the required time periods, the information we are required to disclose in the reports filed with the Securities and Exchange Commission. In designing disclosure controls and procedures, we recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving desired control objectives, and that management necessarily is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Nevertheless, we believe that our disclosure controls and procedures are effective.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States. Management conducted an evaluation of the effectiveness of internal control over financial reporting based on the framework in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation, Management concluded the Company maintained effective internal control over financial reporting as of April 30, 2011.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

This annual report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to rules of the Securities and Exchange Commission that permit us to provide only management's report in this Annual Report.

Changes in Internal Control Over Financial Reporting

There have been no significant changes in our internal controls over financial reporting that occurred during our fourth fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors and Executive Officers of the Registrant

- (a) The information appearing in the sections entitled “Election of Directors” and “Meetings and Committees of the Board” included in our Proxy Statement for use in connection with our annual meeting of stockholders to be held on August 24, 2011 (the “Proxy Statement”) is incorporated herein by reference. The Proxy Statement will be filed with the SEC within 120 days of our most recently completed fiscal year.
- (b) The names and ages of our executive officers as of July 1, 2011 and their business experience during the past five years are set forth below:

<u>Executive Officers</u>		
<u>Name</u>	<u>Age</u>	<u>Position</u>
William A. Shumaker	63	President and Chief Executive Officer
D. Michael Parker	59	Senior Vice President, Finance, Chief Financial Officer, Treasurer and Secretary
David M. Rausch	52	Senior Vice President, Construction Services General Manager, Laminate Furniture Division
K. Bain Black	65	Vice President, General Manager Technical Furniture Group
Dana L. Dahlgren	55	Vice President, Sales and Marketing Laboratory Products Group
Elizabeth D. Phillips	34	Vice President, Human Resources
Kurt P. Rindoks	53	Vice President, Engineering and Product Development
Keith D. Smith	42	Vice President, Manufacturing
Sudhir K. (Steve) Vadehra	64	Vice President, International Operations

William A. Shumaker has served as President of the Company since August 1999 and Chief Executive Officer since September 2000. He was elected a director of the Company in February 2000 and Chairman of the Board in February 2010. He served as the Chief Operating Officer from August 1998, when he was also elected as Executive Vice President, until September 2000. Mr. Shumaker served as Vice President and General Manager of the Laboratory Products Group from February 1998 to August 1998. He joined the Company in December 1993 as Vice President of Sales and Marketing.

D. Michael Parker joined the Company in November 1990 as Director of Financial Reporting and Accounting and was promoted to Corporate Controller in November 1991. Mr. Parker has served as Chief Financial Officer, Treasurer and Secretary since August 1995. He was elected Vice President of Finance in August 1995 and Senior Vice President of Finance in August 2000.

David M. Rausch joined Kewaunee Scientific in March 1994 as Manager of Estimating and was promoted to Southeast Regional Sales Manager in December 1996, then to Director of Sales for Network Storage Systems products in May 2000. In August 2001, he was promoted to Project Sales Manager, and in this position, he also had direct management responsibility for the Estimating Department. Mr. Rausch was elected Vice President of Construction Services in June 2007. In June 2011, he was elected Senior Vice President of Construction Services and General Manager of the Laminate Furniture Division.

K. Bain Black joined the Company in August 2004 as the General Sales Manager for the Technical Products Group. He was elected Vice President and General Manager of the Technical Products Group, effective July 1, 2005. Prior to joining the Company, Mr. Black was Director of Marketing for Newton Instrument Company, a manufacturer of products for the telecom industry, from 2001 to 2003. Prior thereto, he was a partner and President of TechMetals, LLC beginning in 1997.

Dana L. Dahlgren joined the Company in November 1989 as a Regional Sales Manager and was promoted to Director of Sales and Marketing of the Laboratory Products Group in September 1998. Mr. Dahlgren was elected Vice President of Sales and Marketing of the Laboratory Products Group in June 2004.

Elizabeth D. Phillips joined the Company in August 2006 as Human Resources and Training Manager. She was promoted to Director of Human Resources in June 2007 and was elected Vice President of Human Resources in June 2009. Prior to joining the Company, she was Director of Human Resources for Vanguard Furniture Co., Inc., a manufacturer of household furniture, from April 2004 until August 2006.

Kurt P. Rindoks joined the Company in January 1985 as an engineer. He was promoted to Director of Product Development in August 1991 and assumed the additional responsibilities of Director of Engineering in July 1995. He has served as Vice President of Engineering and Product Development since September 1996. Additionally, from May 1998 through October 2001, he served as General Manager of the Company's Resin Materials Division.

Keith D. Smith joined the Company in 1993 as a department supervisor in the Metal Plant and served as Resin Plant Manager from 1995 until April 2001 when he was promoted to Wood Plant Manager. He served as Wood Plant Manager until he assumed the position of Director of Manufacturing in November 2003, a position he held until he was promoted to Vice President of Manufacturing, effective July 1, 2005.

Sudhir K. (Steve) Vadehra joined the Company in October 1999. He was elected Vice President of International Operations in June 2004. He also has served as the Managing Director of Kewaunee Labway Asia Pte. Ltd., the Company's joint venture subsidiary in Singapore, since the subsidiary's formation in June 1998.
