## **Risk Factors**

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including but not limited to investments in currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Dealer, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition. Some or all of the risks highlighted below could adversely affect the trading price of the Notes or the rights of investors under the Notes and, as a result, investors could lose some or all of their investment.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below and the risk factors below should be read in conjunction with the risk factors appearing on pages 10 and 11 of the Base Prospectus as incorporated by reference on page 4 of the Registration Document.

### **Market, Liquidity and Yield Considerations**

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

### **Legal Investment Considerations**

#### *General*

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

### **Risk Warning**

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk and liquidity risk. Investors should consult their own financial, legal, accounting and tax advisers about the risks associated with an investment in these Notes, the appropriate tools to analyse that investment, and the suitability of the investment in each investor's particular circumstances. No investor should purchase the Notes unless that investor understands and has sufficient financial resources to bear the price, market liquidity, structure and other risks associated with an investment in these Notes (including, but not limited to, any political, economic and other factors which could affect the value of, and return on, the Notes).

Investors should be aware that the determination of any foreign exchange rate may result in a Fixed Interest Amount (payable pursuant to paragraph 16 of the Pricing Supplement), the Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated. Investors should also be aware that a Fixed Interest Date, the Maturity Date and/or the Early Redemption Date, as the case may be, may be postponed and that no additional amounts shall be payable by the Issuer in respect of any delay in payment resulting from such postponement.

### *Risks associated with Indonesia and the Indonesian economy*

There are a number of risks associated with Indonesia and the Indonesian economy in general which may cause the occurrence of a Price Source Disruption Event, which include, but are not limited to the following:

Indonesia is a Republic with a President, a Vice President and a Parliamentary form of government. From its independence in 1945 until 1998, there were only two Presidents in Indonesia. At the end of the term of each of these Presidents, Indonesia experienced political instability and many cities in Indonesia, including Jakarta, experienced rioting, unrest and destruction of property. Political and related social developments in Indonesia have been unpredictable in the past, and there can be no assurance that social and civil disturbances will not occur in the future, or that any such disturbances will not, directly or indirectly, cause the occurrence of a Price Source Disruption Event.

Since 2002, several bombing incidents have taken place in Indonesia, most significantly in Bali in October 2002 and in October 2005 and in the eastern Indonesian town of Tentena on the island of Sulawesi in May 2005, and further terrorist acts may occur in the future. Terrorist acts could destabilise Indonesia and increase internal divisions within the Government as it evaluates responses to that instability and unrest. Violent acts arising from, and leading to, instability and unrest have in the past had, and may continue to have, a material adverse effect on investment and confidence in, and the performance of, the Indonesian economy, which could cause the occurrence of a Price Source Disruption Event.

The economic crisis which affected Southeast Asia, including Indonesia, from mid-1997 was characterised in Indonesia by, among other effects, currency depreciation, negative economic growth, high interest rates, social unrest and extraordinary political developments. The economic crisis resulted in the failure of many Indonesian companies, through inability or otherwise, to repay their debts when due. A loss of investor confidence in the financial systems of emerging and other markets, or other factors, may cause increased volatility in the Indonesian financial markets and a slowdown in economic growth or negative economic growth in Indonesia.

There can be no assurance that: (i) the Indonesian rupiah will not be subject to depreciation or volatility; (ii) the current exchange rate policy will remain the same; or (iii) the Indonesian Government will act when necessary to stabilise, maintain or increase the value of the rupiah, or that any such action, if taken, will be successful. Depreciation or volatility of the rupiah against the U.S. dollar or other currencies could adversely affect general economic conditions in Indonesia. Changes in the current exchange rate policy may result in significantly higher domestic interest rates, liquidity shortages and capital or exchange controls.

### *Risk Factors relating to the Issuer*

The Issuer makes loans and equity investments and issues guarantees primarily to the private sector in its countries of operation. Changes in the macroeconomic environment and financial markets in these countries may affect the creditworthiness of the Issuer's clients. Even severe changes in the macroeconomic and financial climate should, however, not affect the Issuer's ability to repay its borrowings, which is assured above all through the Issuer's prudent provisioning policy, ample liquidity, and limitations in the Agreement on its outstanding loans, equity investment and guarantees to the total amount of its subscribed capital, reserves and surpluses.

As at the date of this Securities Note, the Issuer has authorised share capital totalling €30 billion, of which €6 billion is paid-in. The Issuer's subscribed capital that has not been paid in ranks among the highest quality callable capital of any multilateral development bank. It is therefore unlikely that a call on the Issuer's shareholders will not be honoured.

Since the second half of 2008, disruption to the global financial markets, the re-pricing of credit risk and increased volatility have created challenging global market conditions and adversely affected the economies of many countries. It is difficult to predict how long these conditions will continue to exist and the effectiveness of measures taken by many countries to reduce their budget deficits and bring about recovery. The operations and financial position of the Issuer may be affected by any lengthy continuation of such conditions.

### **Investor Suitability**

*The purchase of the Notes involves substantial risks and is not suitable for all investors*

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it. None of the Issuer, the Dealer or the Calculation Agent acts as an investment adviser, or assumes any fiduciary obligation, to any prospective purchaser of the Notes.

In particular, but without prejudice to the generality of the above paragraph, prospective investors should note that an investment in the Notes is only suitable for investors who:

- (i) have the requisite knowledge and experience in financial and business matters to evaluate the merits and risks of an investment in the Notes;
- (ii) are capable of bearing the economic risk of an investment in the Notes for an indefinite period of time;
- (iii) are acquiring the Notes for their own account for investment, not with a view to resale, distribution or other disposition of the Notes (subject to any applicable law requiring that the disposition of the investor's property be within its control); and
- (iv) recognise that it may not be possible to make any transfer of the Notes for a substantial period of time, if at all.

*Understanding and appropriateness of the investment*

Each investor (a) should be an investor with substantial knowledge of and/or experience in financial and business matters that it is capable of evaluating the merits and risks (including tax, legal, regulatory and accounting) of an investment in the Notes because the Notes are not an appropriate investment for investors who are unsophisticated with respect to such transactions; (b) should be financially able to bear such risks; (c) in making such investment shall not rely on any advice or recommendations of or any information, representation or warranty provided by the Dealer, the Calculation Agent and/or any of their respective affiliates, the Issuer or any of their respective representatives (other than, in the case of the Issuer and its representatives, the information contained in, or incorporated by reference into, this Securities Note, the Registration Document and the Summary Note); (d) should recognise that it may not be possible to make any transfer of the Notes for a substantial period of time; and (e) should seek advice from such advisers as such investor considers necessary and appropriate, to enable such investor to make its own independent decision with regard to the suitability and appropriateness of the Notes as an investment for its own account. Each investor should be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes. None of the Issuer, the Dealer or any of their respective representatives makes any representation and has given, nor will give, any advice concerning the appropriate accounting treatment or possible tax consequences of purchasing the Notes. Each investor should consult its own financial, tax, accounting and legal advisers about risks associated with an investment in the Notes and the suitability of investing in such Notes in light of the investor's particular circumstances.

Any information communicated (in any manner) to investors by the Issuer or the Dealer should not be relied upon as investment advice or as a recommendation to invest in the Notes, which shall include, amongst other things, any such information, explanations or discussions concerning the terms and conditions of the Notes, or related features.

Investment in the Notes should comply, and be fully consistent, with all investment policies, guidelines and restrictions applicable to an investor. It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Dealer should not be relied upon, nor shall such information be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes. Each investor should be aware that any return on the Notes may not exceed or even

equal the return that might have been achieved had the amount of its initial investment been placed on deposit for the same period.

Each investor should be aware that none of the Issuer, the Dealer or the Calculation Agent is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

*Investment considerations relating to the Notes*

Investment in the Notes carries with it a degree of risk including, but not limited to, the risks referred to below. The level of the IDR/USD foreign exchange rate may go down as well as up. Prospective investors may receive an amount less than their initial investment.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security. Such risks include, without limitation, changes in the level or value of the IDR/USD foreign exchange rate and the possibility that a holder of the Notes will receive a lower amount of interest or other consideration than the holder expected. Depending on the exchange rate to be determined by the Calculation Agent upon a Price Source Disruption Event, such amount may even be zero. The Issuer has no control over a number of matters that are important in determining the existence, magnitude and longevity of such risks and their results, including economic, financial and political events.

Past performance of the IDR/USD foreign exchange rate is not necessarily indicative of future performance.

J.P. Morgan Chase Bank, N.A. may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes including, without limitations, in relation to the role of the Calculation Agent in determining the occurrence of a Price Source Disruption Event and in determining the exchange rate for converting IDR into USD upon the occurrence of a Price Source Disruption Event. J.P. Morgan Chase Bank, N.A. is required to carry out its duties as Calculation Agent in good faith and using its reasonable judgement. However each investor should be aware that any such determination may potentially adversely affect the amount payable to Noteholders under the Notes and that potential conflicts of interest could arise.

No assurances can be made that any meaningful secondary market will develop in the Notes. The Dealer may, but is not obligated to, make a market in the Notes. The Dealer may discontinue any market-making activities at any time without notice. In addition, the Notes may not be transferred except to qualified investors in accordance with applicable private offering rules. If an active public market for the Notes does not develop, the market prices and liquidity of the Notes may be adversely affected.

Volatility is the term used to describe the size and frequency of price and/or market fluctuations. If the volatility, or anticipated volatility, of the IDR/USD foreign exchange rate increase or decrease, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes. In general, if interest rates increase, it is expected that the trading value of the Notes will increase and, conversely, if interest rates decrease, it is expected that the trading value of the Notes will decrease. If interest rates increase or decrease in markets based on the Indonesian rupiah, the trading value of the Notes may be adversely affected. Interest rates may also affect the economies of Indonesia or the United States, and, in turn, the exchange rates and therefore the value of the IDR/USD foreign exchange rate.

If the Calculation Agent determines that a Price Source Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

**THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" ON PAGES 10 TO 11 OF THE BASE PROSPECTUS AS INCORPORATED BY REFERENCE ON PAGE 4 OF THE REGISTRATION DOCUMENT.**

## Annex A

# Calculation of Fixed Interest Amount, Early Redemption Amount and Final Redemption Amount

The Early Redemption Amount and Final Redemption Amount per Calculation Amount will be payable in USD and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

Calculation Amount *divided by* Reference Rate,

Provided that the resultant amount shall be rounded to the nearest USD with 0.5 USD being rounded up.

The Fixed Interest Amount per Calculation Amount will be payable in USD and determined by the Calculation Agent as follows, on the Rate Fixing Date:

IDR720,000 *divided by* Reference Rate,

Provided that the resultant amount shall be rounded to the nearest USD with 0.5 USD being rounded up.

The Calculation Agent shall notify the Issuer, the Agent and the Noteholders of its determination of the Final Redemption Amount (payable on the Maturity Date), the Early Redemption Amount (payable on the Early Redemption Date) and the Fixed Interest Amount (payable on the relevant Fixed Interest Date) (as applicable), as soon as practicable after such determination (but in no event later than the Business Day immediately following the relevant Rate Fixing Date).

If the Reference Rate is not available for any reason on Reuters Page ABSIRFIX01 or on any successor page on any Rate Fixing Date, the Calculation Agent shall determine that a Price Source Disruption Event (a “**Price Source Disruption Event**”) has occurred, and shall promptly inform the Issuer and Agent of such occurrence. Following the determination of the occurrence of a Price Source Disruption Event, Noteholders will not be entitled to any amounts in respect of the Notes until the earlier to occur of (i) the day falling five Business Days after the day on which the Issuer is notified by the Calculation Agent that a Price Source Disruption Event no longer subsists and (ii) the Postponed Fixed Interest Date (as defined below), the Postponed Maturity Date (as defined below) or the Postponed Early Redemption Date (as defined below), as the case may be. If on the 10th Business Day following the determination of the occurrence of a Price Source Disruption Event Reuters Page ABSIRFIX01 (or successor page) is still unavailable then the IDR/USD Rate (the “**IDR/USD Rate**”) shall be the average of such firm quotes (expressed as the number of IDR per one USD) from the Reference Dealers as the Calculation Agent is able to obtain for the sale of IDR and the purchase of USD at or about 11:30 am Singapore time on the applicable Rate Fixing Date for settlement two Singapore Business Days thereafter, provided, however that if fewer than four (but at least two) Reference Dealers provide such firm quotes then the IDR/USD Rate shall be the average of the quotes actually obtained. If none of the Reference Dealers provides such a firm quote, the IDR/USD Rate shall be determined by the Calculation Agent in its discretion, acting in good faith and in a commercially reasonable manner.

For the purposes of these provisions:

“**Business Day**” means any day (other than a Saturday or Sunday) on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealings in foreign exchange and foreign currency deposits) in the business centre(s) specified or, if no business centre is specified, in London, New York City, Singapore and Jakarta;

“**Calculation Agent**” means J.P. Agency Agreement. In performing its duties under the Notes, the Calculation Agent shall act in accordance with the Calculation Agency Agreement;

**“Reference Dealers”** means four leading dealers, banks or banking corporations in the Singapore interbank market which regularly deal in the IDR/USD exchange market, as selected by the Calculation Agent in its sole discretion, acting in good faith and in a commercially reasonable manner; and

**“Reference Rate”** means, in respect of a Rate Fixing Date, the IDR/USD Reference Rate as published to the right of the caption “Spot” under the column “IDR” on the Reuters page “ABSIRFIX01” (or such other page or service as may replace any such page for the purposes of displaying the IDR/USD reference rate) at or about 11:30 a.m. Singapore local time on such Rate Fixing Date, expressed as the amount of IDR per one USD, for settlement in two Singapore Business Days, reported by the Association of Banks in Singapore.

Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure, under the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Dealer, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below.

### **Risk Factors relating to the Notes**

#### **Market, Liquidity and Yield Considerations**

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

#### **Legal Investment Considerations**

##### *General*

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

#### **Risk Factors relating to the Issuer**

The Issuer makes loans and equity investments and issues guarantees primarily to the private sector in its countries of operation. Changes in the macroeconomic environment and financial markets in these countries may affect the creditworthiness of the Issuer's clients. Even severe changes in the macroeconomic and financial climate should, however, not affect the Issuer's ability to repay its borrowings, which is assured above all through the Issuer's prudent provisioning policy, ample liquidity, and limitations in the Agreement on its outstanding loans, equity investment and guarantees to the total amount of its subscribed capital, reserves and surpluses.

As at the date of this Summary Note, the Issuer has authorised share capital totalling €30 billion, of which €6 billion is paid-in. The Issuer's subscribed capital that has not been paid in ranks among the highest quality callable capital

of any multilateral development bank. It is therefore unlikely that a call on the Issuer's shareholders will not be honoured.

Since the second half of 2007, disruption to the global financial markets, the re-pricing of credit risk and increased volatility have created challenging global market conditions and adversely affected the economies of many countries. It is difficult to predict how long these conditions will continue to exist and the effectiveness of measure taken by many countries to reduce their budget deficits and bring about recovery. The operations and financial position of the Issuer may be affected by any lengthy continuation of such conditions.

### **Risk Warning**

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk and liquidity risk.

Investors should be aware that the Fixed Interest Amount, Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated.

There are certain risks associated with Indonesia and the Indonesian economy in general, which may have effects upon the Notes, and in particular the IDR/USD exchange rate.

### **Investor Suitability**

*The purchase of the Notes involves substantial risks and is not suitable for all investors*

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it.

*Understanding and appropriateness of the investment*

Each investor should have the knowledge and experience to evaluate material risks and be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes.

Any information communicated (in any manner) to investors by the Issuer or the Dealer should not be relied upon as investment advice or as a recommendation to invest in the Notes

It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Dealer should not be relied upon, nor shall such be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes.

Each investor should be aware that none of the Issuer, the Dealer nor JPMorgan Chase Bank N.A. acting as Calculation Agent (the "Calculation Agent") is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

*Investment considerations relating to the Notes*

The level of the IDR/USD foreign exchange rate may go down as well as up.

If the Calculation Agent determines that a Price Source Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security.

Past performance of the IDR/USD foreign exchange rate is not necessarily indicative of future performance.

The Calculation Agent may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes.

No assurances can be made that any meaningful secondary market will develop in the Notes.

If the volatility, or anticipated volatility, of the IDR/USD foreign exchange rate increases or decreases, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes.

**THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" IN THE BASE PROSPECTUS.**

## Annex A

### Calculation of Fixed Interest Amount, Early Redemption Amount and Final Redemption Amount

The Early Redemption Amount and Final Redemption Amount per Calculation Amount will be payable in USD and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

Calculation Amount *divided by* Reference Rate,

Provided that the resultant amount shall be rounded to the nearest USD with 0.5 USD being rounded up.

The Fixed Interest Amount per Calculation Amount will be payable in USD and determined by the Calculation Agent as follows, on the Rate Fixing Date:

IDR720,000 *divided by* Reference Rate,

Provided that the resultant amount shall be rounded to the nearest USD with 0.5 USD being rounded up.

The Calculation Agent shall notify the Issuer, the Agent and the Noteholders of its determination of the Final Redemption Amount (payable on the Maturity Date), the Early Redemption Amount (payable on the Early Redemption Date) and the Fixed Interest Amount (payable on the relevant Fixed Interest Date) (as applicable), as soon as practicable after such determination (but in no event later than the Business Day immediately following the relevant Rate Fixing Date).

If the Reference Rate is not available for any reason on Reuters Page ABSIRFIX01 or on any successor page on any Rate Fixing Date, the Calculation Agent shall determine that a Price Source Disruption Event (a "Price Source Disruption Event") has occurred, and shall promptly inform the Issuer and Agent of such occurrence. Following the determination of the occurrence of a Price Source Disruption Event, Noteholders will not be entitled to any amounts in respect of the Notes until the earlier to occur of (i) the day falling five Business Days after the day on which the Issuer is notified by the Calculation Agent that a Price Source Disruption Event no longer subsists and (ii) the Postponed Fixed Interest Date (as defined below), the Postponed Maturity Date (as defined below) or the Postponed Early Redemption Date (as defined below), as the case may be. If on the 10th Business Day following the determination of the occurrence of a Price Source Disruption Event Reuters Page ABSIRFIX01 (or successor page) is still unavailable then the IDR/USD Rate (the "IDR/USD Rate") shall be the average of such firm quotes (expressed as the number of IDR per one USD) from the Reference Dealers as the Calculation Agent is able to obtain for the sale of IDR and the purchase of USD at or about 11:30 am Singapore time on the applicable Rate Fixing Date for settlement two Singapore Business Days thereafter, provided, however that if fewer than four (but at least two) Reference Dealers provide such firm quotes then the IDR/USD Rate shall be the average of the quotes actually obtained. If none of the Reference Dealers provides such a firm quote, the IDR/USD Rate shall be determined by the Calculation Agent in its discretion, acting in good faith and in a commercially reasonable manner.

For the purposes of these provisions:

"Business Day" means any day (other than a Saturday or Sunday) on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealings in foreign exchange and foreign currency deposits) in the business centre(s) specified or, if no business centre is specified, in London, New York City, Singapore and Jakarta;

"Calculation Agent" means J.P. Morgan Chase Bank, N.A. in accordance with the provisions of the Calculation Agency Agreement entered into between the Issuer and the Calculation Agent dated 9 February 2007 (as amended and/or supplemented from time to time). The determination by the Calculation Agent of any amount or of any state of affairs, circumstance, event or other matter, or the formation of any opinion or the exercise of any discretion required or permitted to be determined, formed or exercised by the Calculation Agent under the Notes and pursuant to the Calculation Agency Agreement shall (in the absence of manifest error) be final and binding on all parties (including, but not limited to, the Issuer and the Noteholders) and shall be made in its sole discretion in good faith and in a commercially reasonable manner in accordance with the Calculation

Agency Agreement. In performing its duties under the Notes, the Calculation Agent shall act in accordance with the Calculation Agency Agreement;

**“Reference Dealers”** means four leading dealers, banks or banking corporations in the Singapore interbank market which regularly deal in the IDR/USD exchange market, as selected by the Calculation Agent in its sole discretion, acting in good faith and in a commercially reasonable manner; and

**“Reference Rate”** means, in respect of a Rate Fixing Date, the IDR/USD Reference Rate as published to the right of the caption “Spot” under the column “IDR” on the Reuters page “ABSIRFIX01” (or such other page or service as may replace any such page for the purposes of displaying the IDR/USD reference rate) at or about 11:30 a.m. Singapore local time on such Rate Fixing Date, expressed as the amount of IDR per one USD, for settlement in two Singapore Business Days, reported by the Association of Banks in Singapore.

("Fitch"). As defined by S&P, an "AAA" rating means that the ability of the Issuer to meet its financial commitment on its obligations is extremely strong. As defined by Moody's, an "Aaa" rating means that the Issuer's ability to meet its financial obligations is judged to be of the highest quality, with minimal credit risk. As defined by Fitch, an "AAA" rating denotes the lowest expectation of credit risk and means that the Issuer has an exceptionally strong capacity for timely payment of its financial commitments.

Whether or not a rating in relation to any Tranche of Notes (to the extent any such Tranche will be rated) will be treated as having been issued by a credit rating agency established in the European Union and registered under the CRA Regulation will be disclosed in the relevant Pricing Supplement."

In addition, the section entitled "Ratings" on page 59 (Form of Pricing Supplement) of the Prospectus shall be replaced in its entirety with the following:

"The Issuer and/or its debt obligations have been assigned an AAA credit rating from Standard & Poor's Credit Market Services Europe Limited ("S&P"), an Aaa credit rating from Moody's Investors Service Limited ("Moody's") and an AAA credit rating from Fitch France S.A.S. ("Fitch"). As defined by S&P, an "AAA" rating means that the ability of the Issuer to meet its financial commitment on its obligations is extremely strong. As defined by Moody's, an "Aaa" rating means that the Issuer's ability to meet its financial obligations is judged to be of the highest quality, with minimal credit risk. As defined by Fitch, an "AAA" rating denotes the lowest expectation of credit risk and means that the Issuer has an exceptionally strong capacity for timely payment of its financial commitments.

Credit ratings included or referred to in this Pricing Supplement have been issued by S&P, Moody's and Fitch, each of which is established in the European Union and is not registered but has applied to be registered under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies."

To the extent that there is any inconsistency between (a) any statement in this Supplement and (b) any other statement in or incorporated by reference in the Prospectus, the statements in (a) above will prevail.

Save as disclosed in this Supplement, no other significant new factor, material mistake or inaccuracy relating to information included in the Prospectus has arisen or been noted, as the case may be, since the publication of the Prospectus and the Supplementary Prospectus dated 24 May 2011.

## **Risk Factors**

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including but not limited to investments in currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Dealer, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition. Some or all of the risks highlighted below could adversely affect the trading price of the Notes or the rights of investors under the Notes and, as a result, investors could lose some or all of their investment.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below and the risk factors below should be read in conjunction with the risk factors appearing on pages 10 and 11 of the Base Prospectus as incorporated by reference on page 4 of the Registration Document.

### **Market, Liquidity and Yield Considerations**

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

### **Legal Investment Considerations**

#### *General*

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

### **Risk Warning**

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk and liquidity risk. Investors should consult their own financial, legal, accounting and tax advisers about the risks associated with an investment in these Notes, the appropriate tools to analyse that investment, and the suitability of the investment in each investor's particular circumstances. No investor should purchase the Notes unless that investor understands and has sufficient financial resources to bear the price, market liquidity, structure and other risks associated with an investment in these Notes (including, but not limited to, any political, economic and other factors which could affect the value of, and return on, the Notes).

Investors should be aware that the determination of any foreign exchange rate may result in a Fixed Interest Amount (payable pursuant to paragraph 16 of the Pricing Supplement), the Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated. Investors should also be aware that a Fixed Interest Date, the Maturity Date and/or the Early Redemption Date, as the case may be, may be postponed and that no additional amounts shall be payable by the Issuer in respect of any delay in payment resulting from such postponement.

### *Risks associated with Indonesia and the Indonesian economy*

There are a number of risks associated with Indonesia and the Indonesian economy in general which may cause the occurrence of a Price Source Disruption Event, which include, but are not limited to the following:

Indonesia is a Republic with a President, a Vice President and a Parliamentary form of government. From its independence in 1945 until 1998, there were only two Presidents in Indonesia. At the end of the term of each of these Presidents, Indonesia experienced political instability and many cities in Indonesia, including Jakarta, experienced rioting, unrest and destruction of property. Political and related social developments in Indonesia have been unpredictable in the past, and there can be no assurance that social and civil disturbances will not occur in the future, or that any such disturbances will not, directly or indirectly, cause the occurrence of a Price Source Disruption Event.

Since 2002, several bombing incidents have taken place in Indonesia, most significantly in Bali in October 2002 and in October 2005 and in the eastern Indonesian town of Tentena on the island of Sulawesi in May 2005, and further terrorist acts may occur in the future. Terrorist acts could destabilise Indonesia and increase internal divisions within the Government as it evaluates responses to that instability and unrest. Violent acts arising from, and leading to, instability and unrest have in the past had, and may continue to have, a material adverse effect on investment and confidence in, and the performance of, the Indonesian economy, which could cause the occurrence of a Price Source Disruption Event.

The economic crisis which affected Southeast Asia, including Indonesia, from mid-1997 was characterised in Indonesia by, among other effects, currency depreciation, negative economic growth, high interest rates, social unrest and extraordinary political developments. The economic crisis resulted in the failure of many Indonesian companies, through inability or otherwise, to repay their debts when due. A loss of investor confidence in the financial systems of emerging and other markets, or other factors, may cause increased volatility in the Indonesian financial markets and a slowdown in economic growth or negative economic growth in Indonesia.

There can be no assurance that: (i) the Indonesian rupiah will not be subject to depreciation or volatility; (ii) the current exchange rate policy will remain the same; or (iii) the Indonesian Government will act when necessary to stabilise, maintain or increase the value of the rupiah, or that any such action, if taken, will be successful. Depreciation or volatility of the rupiah against the U.S. dollar or other currencies could adversely affect general economic conditions in Indonesia. Changes in the current exchange rate policy may result in significantly higher domestic interest rates, liquidity shortages and capital or exchange controls.

### *Risk Factors relating to the Issuer*

The Issuer makes loans and equity investments and issues guarantees primarily to the private sector in its countries of operation. Changes in the macroeconomic environment and financial markets in these countries may affect the creditworthiness of the Issuer's clients. Even severe changes in the macroeconomic and financial climate should, however, not affect the Issuer's ability to repay its borrowings, which is assured above all through the Issuer's prudent provisioning policy, ample liquidity, and limitations in the Agreement on its outstanding loans, equity investment and guarantees to the total amount of its subscribed capital, reserves and surpluses.

As at the date of this Securities Note, the Issuer has authorised share capital totalling €30 billion, of which €6 billion is paid-in. The Issuer's subscribed capital that has not been paid in ranks among the highest quality callable capital of any multilateral development bank. It is therefore unlikely that a call on the Issuer's shareholders will not be honoured.

Since the second half of 2008, disruption to the global financial markets, the re-pricing of credit risk and increased volatility have created challenging global market conditions and adversely affected the economies of many countries. It is difficult to predict how long these conditions will continue to exist and the effectiveness of measures taken by many countries to reduce their budget deficits and bring about recovery. The operations and financial position of the Issuer may be affected by any lengthy continuation of such conditions.

### **Investor Suitability**

*The purchase of the Notes involves substantial risks and is not suitable for all investors*

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it. None of the Issuer, the Dealer or the Calculation Agent acts as an investment adviser, or assumes any fiduciary obligation, to any prospective purchaser of the Notes.

In particular, but without prejudice to the generality of the above paragraph, prospective investors should note that an investment in the Notes is only suitable for investors who:

- (i) have the requisite knowledge and experience in financial and business matters to evaluate the merits and risks of an investment in the Notes;
- (ii) are capable of bearing the economic risk of an investment in the Notes for an indefinite period of time;
- (iii) are acquiring the Notes for their own account for investment, not with a view to resale, distribution or other disposition of the Notes (subject to any applicable law requiring that the disposition of the investor's property be within its control); and
- (iv) recognise that it may not be possible to make any transfer of the Notes for a substantial period of time, if at all.

*Understanding and appropriateness of the investment*

Each investor (a) should be an investor with substantial knowledge of and/or experience in financial and business matters that it is capable of evaluating the merits and risks (including tax, legal, regulatory and accounting) of an investment in the Notes because the Notes are not an appropriate investment for investors who are unsophisticated with respect to such transactions; (b) should be financially able to bear such risks; (c) in making such investment shall not rely on any advice or recommendations of or any information, representation or warranty provided by the Dealer, the Calculation Agent and/or any of their respective affiliates, the Issuer or any of their respective representatives (other than, in the case of the Issuer and its representatives, the information contained in, or incorporated by reference into, this Securities Note, the Registration Document and the Summary Note); (d) should recognise that it may not be possible to make any transfer of the Notes for a substantial period of time; and (e) should seek advice from such advisers as such investor considers necessary and appropriate, to enable such investor to make its own independent decision with regard to the suitability and appropriateness of the Notes as an investment for its own account. Each investor should be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes. None of the Issuer, the Dealer or any of their respective representatives makes any representation and has given, nor will give, any advice concerning the appropriate accounting treatment or possible tax consequences of purchasing the Notes. Each investor should consult its own financial, tax, accounting and legal advisers about risks associated with an investment in the Notes and the suitability of investing in such Notes in light of the investor's particular circumstances.

Any information communicated (in any manner) to investors by the Issuer or the Dealer should not be relied upon as investment advice or as a recommendation to invest in the Notes, which shall include, amongst other things, any such information, explanations or discussions concerning the terms and conditions of the Notes, or related features.

Investment in the Notes should comply, and be fully consistent, with all investment policies, guidelines and restrictions applicable to an investor. It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Dealer should not be relied upon, nor shall such information be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes. Each investor should be aware that any return on the Notes may not exceed or even

equal the return that might have been achieved had the amount of its initial investment been placed on deposit for the same period.

Each investor should be aware that none of the Issuer, the Dealer or the Calculation Agent is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

*Investment considerations relating to the Notes*

Investment in the Notes carries with it a degree of risk including, but not limited to, the risks referred to below. The level of the IDR/USD foreign exchange rate may go down as well as up. Prospective investors may receive an amount less than their initial investment.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security. Such risks include, without limitation, changes in the level or value of the IDR/USD foreign exchange rate and the possibility that a holder of the Notes will receive a lower amount of interest or other consideration than the holder expected. Depending on the exchange rate to be determined by the Calculation Agent upon a Price Source Disruption Event, such amount may even be zero. The Issuer has no control over a number of matters that are important in determining the existence, magnitude and longevity of such risks and their results, including economic, financial and political events.

Past performance of the IDR/USD foreign exchange rate is not necessarily indicative of future performance.

J.P. Morgan Chase Bank, N.A. may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes including, without limitations, in relation to the role of the Calculation Agent in determining the occurrence of a Price Source Disruption Event and in determining the exchange rate for converting IDR into USD upon the occurrence of a Price Source Disruption Event. J.P. Morgan Chase Bank, N.A. is required to carry out its duties as Calculation Agent in good faith and using its reasonable judgement. However each investor should be aware that any such determination may potentially adversely affect the amount payable to Noteholders under the Notes and that potential conflicts of interest could arise.

No assurances can be made that any meaningful secondary market will develop in the Notes. The Dealer may, but is not obligated to, make a market in the Notes. The Dealer may discontinue any market-making activities at any time without notice. In addition, the Notes may not be transferred except to qualified investors in accordance with applicable private offering rules. If an active public market for the Notes does not develop, the market prices and liquidity of the Notes may be adversely affected.

Volatility is the term used to describe the size and frequency of price and/or market fluctuations. If the volatility, or anticipated volatility, of the IDR/USD foreign exchange rate increase or decrease, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes. In general, if interest rates increase, it is expected that the trading value of the Notes will increase and, conversely, if interest rates decrease, it is expected that the trading value of the Notes will decrease. If interest rates increase or decrease in markets based on the Indonesian rupiah, the trading value of the Notes may be adversely affected. Interest rates may also affect the economies of Indonesia or the United States, and, in turn, the exchange rates and therefore the value of the IDR/USD foreign exchange rate.

If the Calculation Agent determines that a Price Source Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

**THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" ON PAGES 10 TO 11 OF THE BASE PROSPECTUS AS INCORPORATED BY REFERENCE ON PAGE 4 OF THE REGISTRATION DOCUMENT.**

## Annex A

### Calculation of Fixed Interest Amount, Early Redemption Amount and Final Redemption Amount

The Early Redemption Amount and Final Redemption Amount per Calculation Amount will be payable in USD and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

Calculation Amount *divided by* Reference Rate,

Provided that the resultant amount shall be rounded to the nearest USD with 0.5 USD being rounded up.

The Fixed Interest Amount per Calculation Amount will be payable in USD and determined by the Calculation Agent as follows, on the Rate Fixing Date:

IDR720,000 *divided by* Reference Rate,

Provided that the resultant amount shall be rounded to the nearest USD with 0.5 USD being rounded up.

The Calculation Agent shall notify the Issuer, the Agent and the Noteholders of its determination of the Final Redemption Amount (payable on the Maturity Date), the Early Redemption Amount (payable on the Early Redemption Date) and the Fixed Interest Amount (payable on the relevant Fixed Interest Date) (as applicable), as soon as practicable after such determination (but in no event later than the Business Day immediately following the relevant Rate Fixing Date).

If the Reference Rate is not available for any reason on Reuters Page ABSIRFIX01 or on any successor page on any Rate Fixing Date, the Calculation Agent shall determine that a Price Source Disruption Event (a “**Price Source Disruption Event**”) has occurred, and shall promptly inform the Issuer and Agent of such occurrence. Following the determination of the occurrence of a Price Source Disruption Event, Noteholders will not be entitled to any amounts in respect of the Notes until the earlier to occur of (i) the day falling five Business Days after the day on which the Issuer is notified by the Calculation Agent that a Price Source Disruption Event no longer subsists and (ii) the Postponed Fixed Interest Date (as defined below), the Postponed Maturity Date (as defined below) or the Postponed Early Redemption Date (as defined below), as the case may be. If on the 10th Business Day following the determination of the occurrence of a Price Source Disruption Event Reuters Page ABSIRFIX01 (or successor page) is still unavailable then the IDR/USD Rate (the “**IDR/USD Rate**”) shall be the average of such firm quotes (expressed as the number of IDR per one USD) from the Reference Dealers as the Calculation Agent is able to obtain for the sale of IDR and the purchase of USD at or about 11:30 am Singapore time on the applicable Rate Fixing Date for settlement two Singapore Business Days thereafter, provided, however that if fewer than four (but at least two) Reference Dealers provide such firm quotes then the IDR/USD Rate shall be the average of the quotes actually obtained. If none of the Reference Dealers provides such a firm quote, the IDR/USD Rate shall be determined by the Calculation Agent in its discretion, acting in good faith and in a commercially reasonable manner.

For the purposes of these provisions:

“**Business Day**” means any day (other than a Saturday or Sunday) on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealings in foreign exchange and foreign currency deposits) in the business centre(s) specified or, if no business centre is specified, in London, New York City, Singapore and Jakarta;

“**Calculation Agent**” means J.P. Agency Agreement. In performing its duties under the Notes, the Calculation Agent shall act in accordance with the Calculation Agency Agreement;

**“Reference Dealers”** means four leading dealers, banks or banking corporations in the Singapore interbank market which regularly deal in the IDR/USD exchange market, as selected by the Calculation Agent in its sole discretion, acting in good faith and in a commercially reasonable manner; and

**“Reference Rate”** means, in respect of a Rate Fixing Date, the IDR/USD Reference Rate as published to the right of the caption “Spot” under the column “IDR” on the Reuters page “ABSIRFIX01” (or such other page or service as may replace any such page for the purposes of displaying the IDR/USD reference rate) at or about 11:30 a.m. Singapore local time on such Rate Fixing Date, expressed as the amount of IDR per one USD, for settlement in two Singapore Business Days, reported by the Association of Banks in Singapore.

## **Risk Factors**

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including, but not limited to, investments in currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure, under the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Dealer, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below.

### **Risk Factors relating to the Notes**

#### **Market, Liquidity and Yield Considerations**

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

#### **Legal Investment Considerations**

##### *General*

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

#### **Risk Factors relating to the Issuer**

The Issuer makes loans and equity investments and issues guarantees primarily to the private sector in its countries of operation. Changes in the macroeconomic environment and financial markets in these countries may affect the creditworthiness of the Issuer's clients. Even severe changes in the macroeconomic and financial climate should, however, not affect the Issuer's ability to repay its borrowings, which is assured above all through the Issuer's prudent provisioning policy, ample liquidity, and limitations in the Agreement on its outstanding loans, equity investment and guarantees to the total amount of its subscribed capital, reserves and surpluses.

As at the date of this Summary Note, the Issuer has authorised share capital totalling €30 billion, of which €6 billion is paid-in. The Issuer's subscribed capital that has not been paid in ranks among the highest quality callable capital

of any multilateral development bank. It is therefore unlikely that a call on the Issuer's shareholders will not be honoured.

Since the second half of 2007, disruption to the global financial markets, the re-pricing of credit risk and increased volatility have created challenging global market conditions and adversely affected the economies of many countries. It is difficult to predict how long these conditions will continue to exist and the effectiveness of measure taken by many countries to reduce their budget deficits and bring about recovery. The operations and financial position of the Issuer may be affected by any lengthy continuation of such conditions.

### **Risk Warning**

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk and liquidity risk.

Investors should be aware that the Fixed Interest Amount, Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated.

There are certain risks associated with Indonesia and the Indonesian economy in general, which may have effects upon the Notes, and in particular the IDR/USD exchange rate.

### **Investor Suitability**

*The purchase of the Notes involves substantial risks and is not suitable for all investors*

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it.

*Understanding and appropriateness of the investment*

Each investor should have the knowledge and experience to evaluate material risks and be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes.

Any information communicated (in any manner) to investors by the Issuer or the Dealer should not be relied upon as investment advice or as a recommendation to invest in the Notes

It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Dealer should not be relied upon, nor shall such be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes.

Each investor should be aware that none of the Issuer, the Dealer nor JPMorgan Chase Bank N.A. acting as Calculation Agent (the "Calculation Agent") is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

*Investment considerations relating to the Notes*

The level of the IDR/USD foreign exchange rate may go down as well as up.

If the Calculation Agent determines that a Price Source Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security.

Past performance of the IDR/USD foreign exchange rate is not necessarily indicative of future performance.

The Calculation Agent may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes.

No assurances can be made that any meaningful secondary market will develop in the Notes.

If the volatility, or anticipated volatility, of the IDR/USD foreign exchange rate increases or decreases, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes.

**THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" IN THE BASE PROSPECTUS.**

## Annex A

### Calculation of Fixed Interest Amount, Early Redemption Amount and Final Redemption Amount

The Early Redemption Amount and Final Redemption Amount per Calculation Amount will be payable in USD and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

Calculation Amount *divided by* Reference Rate,

Provided that the resultant amount shall be rounded to the nearest USD with 0.5 USD being rounded up.

The Fixed Interest Amount per Calculation Amount will be payable in USD and determined by the Calculation Agent as follows, on the Rate Fixing Date:

IDR720,000 *divided by* Reference Rate,

Provided that the resultant amount shall be rounded to the nearest USD with 0.5 USD being rounded up.

The Calculation Agent shall notify the Issuer, the Agent and the Noteholders of its determination of the Final Redemption Amount (payable on the Maturity Date), the Early Redemption Amount (payable on the Early Redemption Date) and the Fixed Interest Amount (payable on the relevant Fixed Interest Date) (as applicable), as soon as practicable after such determination (but in no event later than the Business Day immediately following the relevant Rate Fixing Date).

If the Reference Rate is not available for any reason on Reuters Page ABSIRFIX01 or on any successor page on any Rate Fixing Date, the Calculation Agent shall determine that a Price Source Disruption Event (a "Price Source Disruption Event") has occurred, and shall promptly inform the Issuer and Agent of such occurrence. Following the determination of the occurrence of a Price Source Disruption Event, Noteholders will not be entitled to any amounts in respect of the Notes until the earlier to occur of (i) the day falling five Business Days after the day on which the Issuer is notified by the Calculation Agent that a Price Source Disruption Event no longer subsists and (ii) the Postponed Fixed Interest Date (as defined below), the Postponed Maturity Date (as defined below) or the Postponed Early Redemption Date (as defined below), as the case may be. If on the 10th Business Day following the determination of the occurrence of a Price Source Disruption Event Reuters Page ABSIRFIX01 (or successor page) is still unavailable then the IDR/USD Rate (the "IDR/USD Rate") shall be the average of such firm quotes (expressed as the number of IDR per one USD) from the Reference Dealers as the Calculation Agent is able to obtain for the sale of IDR and the purchase of USD at or about 11:30 am Singapore time on the applicable Rate Fixing Date for settlement two Singapore Business Days thereafter, provided, however that if fewer than four (but at least two) Reference Dealers provide such firm quotes then the IDR/USD Rate shall be the average of the quotes actually obtained. If none of the Reference Dealers provides such a firm quote, the IDR/USD Rate shall be determined by the Calculation Agent in its discretion, acting in good faith and in a commercially reasonable manner.

For the purposes of these provisions:

"Business Day" means any day (other than a Saturday or Sunday) on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealings in foreign exchange and foreign currency deposits) in the business centre(s) specified or, if no business centre is specified, in London, New York City, Singapore and Jakarta;

Agency Agreement. In performing its duties under the Notes, the Calculation Agent shall act in accordance with the Calculation Agency Agreement;

“**Rate Fixing Date**” means the date which is five Business Days prior to the applicable Fixed Interest Date, Maturity Date or Early Redemption Date, as the case may be. If a Price Source Disruption Event occurs or otherwise subsists on such day, the Rate Fixing Date shall be the earlier of (i) the Business Day on which the Issuer is notified by the Calculation Agent that a Price Source Disruption Event no longer subsists and (ii) the tenth Business Day following the original Rate Fixing Date;

“**Reference Dealers**” means four leading dealers, banks or banking corporations in the Singapore interbank market which regularly deal in the IDR/USD exchange market, as selected by the Calculation Agent in its sole discretion, acting in good faith and in a commercially reasonable manner; and

“**Reference Rate**” means, in respect of a Rate Fixing Date, the IDR/USD Reference Rate as published to the right of the caption “Spot” under the column “IDR” on the Reuters page “ABSIRFIX01” (or such other page or service as may replace any such page for the purposes of displaying the IDR/USD reference rate) at or about 11:30 a.m. Singapore local time on such Rate Fixing Date, expressed as the amount of IDR per one USD, for settlement in two Singapore Business Days, reported by the Association of Banks in Singapore.

Terms defined in the Prospectus have the same meaning when used in this Supplement.

This Supplement is supplemental to, and should be read in conjunction with, the Prospectus and any other supplements to the Prospectus issued by the Issuer.

The Issuer accepts responsibility for the information contained in this Supplement. To the best of the knowledge of the Issuer (which has taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information.

The purpose of this Supplement is to update the description of the Issuer contained in the Prospectus, as set out in the following paragraphs.

#### **Issuer's Region of Operations**

The following additional paragraph shall be added to the section headed "Purpose and Functions of the Issuer" on page 65 of the Prospectus, as the second paragraph of that section:

"At its Annual Meeting in May 2011, the Issuer's Board of Governors tasked the Board of Directors to make recommendations on whether to amend the Agreement to provide for an extension of the Issuer's region of operations to the Middle East and North Africa, and what appropriate mechanisms there should be for according recipient country status within such an extended region. The Board of Directors is to submit its recommendations by 31 July 2011."

#### **Sources of Funding**

The increase in the Issuer's authorised share capital by the remaining €9 billion, as described in the section headed "Sources of Funding" on page 66 of the Prospectus, has become effective, resulting in an authorised share capital of €30 billion. As at 27 May 2011, subscribed share capital was €27.5 billion, which includes €6 billion paid-in and €21.5 billion callable capital.

## **Credit Ratings**

The paragraph beginning "The Issuer and/or its debt obligations..." which is set out on the front cover of the Prospectus and the first paragraph in the section entitled "Ratings" on page 9 (Summary of the Programme) of the Prospectus shall be replaced in their entirety with the following:

"The Issuer and/or its debt obligations have been assigned an AAA credit rating from Standard & Poor's Credit Market Services Europe Limited ("S&P"), an Aaa credit rating from Moody's Investors Service Limited ("Moody's") and an AAA credit rating from Fitch France S.A.S. ("Fitch"). As defined by S&P, an "AAA" rating means that the ability of the Issuer to meet its financial commitment on its obligations is extremely strong. As defined by Moody's, an "Aaa" rating means that the Issuer's ability to meet its financial obligations is judged to be of the highest quality, with minimal credit risk. As defined by Fitch, an "AAA" rating denotes the lowest expectation of credit risk and means that the Issuer has an exceptionally strong capacity for timely payment of its financial commitments.

Credit ratings included or referred to in this Prospectus have been issued by S&P, Moody's and Fitch, each of which is established in the European Union and is not registered but has applied to be registered under Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 on credit rating agencies (the "CRA Regulation").

Whether or not a rating in relation to any Tranche of Notes (to the extent any such Tranche will be rated) will be treated as having been issued by a credit rating agency established in the European Union and registered under the CRA Regulation will be disclosed in the relevant Pricing Supplement."

In addition, the section entitled "Ratings" on page 59 (Form of Pricing Supplement) of the Prospectus shall be replaced in its entirety with the following:

"The Issuer and/or its debt obligations have been assigned an AAA credit rating from Standard & Poor's Credit Market Services Europe Limited ("S&P"), an Aaa credit rating from Moody's Investors Service Limited ("Moody's") and an AAA credit rating from Fitch France S.A.S. ("Fitch"). As defined by S&P, an "AAA" rating means that the ability of the Issuer to meet its financial commitment on its obligations is extremely strong. As defined by Moody's, an "Aaa" rating means that the Issuer's ability to meet its financial obligations is judged to be of the highest quality, with minimal credit risk. As defined by Fitch, an "AAA" rating denotes the lowest expectation of credit risk and means that the Issuer has an exceptionally strong capacity for timely payment of its financial commitments.
