In consideration of the Issuer appointing the New Dealers as Dealers in respect of the Notes under the Programme Agreement, each New Dealer hereby undertakes, for the benefit of the Issuer and each of the other Dealers, that, in relation to the Issue of the Notes, it will perform and comply with all the duties and obligations expressed to be assumed by a Dealer under the Programme Agreement, a copy of which it acknowledges it has received.

The Issuer hereby confirms that the New Dealers shall be vested with all authority, rights, powers, duties and obligations of a Dealer in relation to the issue of the Notes as if originally named as a Dealer under the Programme Agreement provided that following the Issue Date (as defined in Clause 3) the New Dealers shall have no further such authority, rights, powers, duties and obligations except such as may have accrued or been incurred prior to or in connection with the Issue Date.

- 2 Subject to the terms and conditions of the Programme Agreement and this Agreement, the Issuer hereby agrees to issue the Notes and the Joint Lead Managers jointly and severally agree to purchase the Notes at a purchase price of 99.1385 per cent. of the principal amount of the Notes, being the issue price of 100.5135 per cent. less a selling concession of 1.1875 per cent. of such principal amount and a management and underwriting fee of 0.1875 per cent. of such principal amount (the "Purchase Price").
- 3 The settlement procedures set out in Part 2 of Annex A of the Procedures Memorandum shall apply as if set out in this Agreement provided that, for the purposes of this Agreement:
 - (i) the sum payable on the Issue Date shall be INR 1,982,770,000.00 (payable in USD in the amount of USD 43,861,740.96) (representing the Purchase Price) which should be paid to the account of the Issuer with Citibank, New York, CITIUS 33, account number 36125585, in favour of European Bank for Reconstruction and Development, London (EBRDGB2L);
 - (ii) "Issue Date" means 6 June 2011, or at such other time and/or date as the Issuer and the Joint Lead Managers may agree; and

- 4 The Joint Lead Managers shall bear and pay legal and other out-of-pocket expenses, all costs and expenses incurred in or in connection with the printing of the Notes, this Agreement and the Pricing Supplement prepared in connection with the issue of the Notes, the listing of the Notes on the Official List and the admission of the Notes to trading on the London Stock Exchange's Regulated Market and making initial delivery of the Notes.

 - 5.2 the delivery to the Joint Lead Managers on the Payment Instruction Date of (i) a legal opinion addressed to the Joint Lead Managers dated the Payment Instruction Date in such

form and with such contents as the Joint Lead Managers may reasonably require from Linklaters LLP, legal advisers to the Joint Lead Managers in England; (ii) a certificate dated as at the Payment Instruction Date signed by a duly authorised officer of the Issuer to the effect stated in sub-paragraph 5.1 of this Clause with regard to the Issuer and further to the effect that the Prospectus and the Supplementary Prospectuses (when read together with the Pricing Supplement) contains all material information relating to the Notes and to the assets and liabilities, financial position and profits and losses of the Issuer and nothing has happened or is expected to happen which would require the Prospectus to be further supplemented or updated and (iii) such other conditions precedent as the Joint Lead Managers may reasonably require.

If any of the foregoing conditions is not satisfied on or before the Payment Instruction Date, this Agreement shall terminate on such date and the parties hereto shall be under no further liability arising out of this Agreement (except for the liability of the Issuer in relation to expenses as provided in Clause 4 and except for any liability arising before or in relation to such termination), provided that the Joint Lead Managers may in their discretion waive any of the aforesaid conditions or any part of them.

6

- 6.1** HSBC, on behalf of the Joint Lead Managers, may, by notice to the Issuer, and the Issuer may, by notice to HSBC, on behalf of the Joint Lead Managers, terminate this Agreement at any time prior to payment of the net subscription moneys to the Issuer if in the opinion of the Joint Lead Managers or the Issuer, as the case may be, there shall have been such a change in national or international financial, political or economic conditions or currency exchange rates or exchange controls as would in the view of the Joint Lead Managers or the Issuer, as the case may be, be likely to prejudice materially the success of the distribution of the Notes or dealings in the Notes in the secondary market.
- 6.2** Upon such notice being given, this Agreement shall terminate and no party shall be under any liability to any other in respect thereof except for the liability of the Issuer for the payment of costs and expenses as provided in Clause 4 of this Agreement (but only to the extent of amounts actually incurred), the obligations of the Joint Lead Managers under Clause 8 of the Programme Agreement and the respective obligations of the parties under Clause 6 of the Programme Agreement.
- 7** Clause 16 of the Programme Agreement shall also apply to this Agreement as if expressly incorporated herein.

Annex A

Calculation of Fixed Interest Amount, Early Redemption Amount and Final Redemption Amount

The Final Redemption Amount or the Early Redemption Amount, as applicable, per Calculation Amount will be payable in USD on the Maturity Date or Early Redemption Date, as applicable, and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

Calculation Amount *divided by* the Reference Rate on the applicable Rate Fixing Date rounded up to the nearest cent.

The Fixed Interest Amount per Calculation Amount will be payable in USD on each Fixed Interest Date and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

The relevant Fixed Interest Amount *divided by* Reference Rate on the applicable Rate Fixing Date rounded up to the nearest cent.

The Calculation Agent shall notify the Issuer, the Agent and the Noteholders of its determination of the Final Redemption Amount, the Early Redemption Amount and Fixed Interest Amount payable per Calculation Amount on the Maturity Date, Early Redemption Date or relevant Fixed Interest Date (as applicable), as soon as practicable after such determination (but in no event later than four Business Days prior to the Maturity Date, Early Redemption Date and/or relevant Fixed Interest Date).

If the Reference Rate is not available for any reason on Reuters page "RBIB" or on any successor page on any Rate Fixing Date, then the Calculation Agent shall determine that a Price Source Disruption Event (a "Price Source Disruption Event") has occurred, and shall promptly inform the Issuer and Agent of such occurrence. Following the determination of the occurrence of a Price Source Disruption Event, Noteholders will not be entitled to any amounts in respect of the Notes until the earlier to occur of (i) the day falling five Business Days after the day on which the Issuer is notified by the Calculation Agent that a Price Source Disruption Event no longer subsists and (ii) the Postponed Fixed Interest Date (as defined below), Postponed Early Redemption Date (as defined below) or the Postponed Maturity Date (as defined below), as the case may be. If on the tenth Business Day following the original Rate Fixing Date, Reuters page RBIB (or successor page) is still unavailable then the Reference Rate shall be the average of such firm quotes (expressed as the number of INR per one USD) from the Reference Dealers as the Calculation Agent is able to obtain for the sale of INR and the purchase of USD at or about 14:30 hours Mumbai time on the Rate Fixing Date for settlement two Mumbai Business Days thereafter, provided, however that if fewer than four (but at least two) Reference Dealers provide such firm quote then the average of the quotes actually obtained shall apply, and if none, or only one, of the Reference Dealers provides such a firm quote, the Reference Rate will be determined by the Calculation Agent in its sole discretion, acting in good faith and in a commercially reasonable manner.

For the purposes of these provisions:

"Business Day" means any day on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealings in foreign exchange and foreign currency deposits) in the business centre(s) specified or, if no business centre is specified, in London, New York City, and Mumbai;

The determination by the Calculation Agent of any amount or of any state of affairs, circumstance, event or other matter, or the formation of any opinion or the exercise of any discretion required or permitted to be determined, formed or exercised by the Calculation Agent under the Notes and pursuant to the Calculation Agency Agreement shall (in the absence of manifest error) be final and binding on all parties (including,

but not limited to, the Issuer and the Noteholders) and shall be made in its sole discretion in good faith and in a commercially reasonable manner in accordance with the Calculation Agency Agreement. The Joint Lead Managers expressly do not undertake to review the financial condition or affairs of the Issuer during the life of the Notes. Investors should review, *inter alia*, the most recent financial statements of the Issuer when deciding whether or not to purchase any of the Notes.

Risk Factors

A12.2.1

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including but not limited to investments in currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Joint Lead Managers, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition. Some or all of the risks highlighted below could adversely affect the trading price of the Notes or the rights of investors under the Notes and, as a result, investors could lose some or all of their investment.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below and the risk factors below should be read in conjunction with the section headed “Risk Factors” on pages 10 to 11 of the Base Prospectus incorporated by reference in the Registration Document at page 4.

Market, Liquidity and Yield Considerations

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

Legal Investment Considerations

General

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

Risk Warning

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk and liquidity risk. Investors should consult their own financial, legal, accounting and tax advisers about the risks associated with an investment in these Notes, the appropriate tools to analyse that investment, and the suitability of the investment in each investor’s particular circumstances. No investor should purchase the Notes unless that investor understands and has sufficient financial resources to bear the price, market liquidity, structure and other risks associated

with an investment in these Notes (including, but not limited to, any political, economic and other factors which could affect the value of, and return on, the Notes).

The Notes are U.S. dollar settled debt instruments. All amounts due under the Notes, including the coupon, the Early Redemption Amount and the final redemption price of the Notes, will be payable in U.S. dollars at the prevailing exchange rate between Indian Rupee and the U.S. dollar at the time of payment. Accordingly, the U.S. dollar return on the Notes, or yield to maturity, will depend on the principal amount and the coupon (or Early Redemption Amount) converted into U.S. dollars at the prevailing exchange rate. Any volatility of the exchange rate during the term of the Notes will affect the return on the Notes, or yield to maturity, in U.S. dollars. In particular, any devaluation of the Indian Rupee against the U.S. dollar during the term of the Notes will decrease the U.S. dollar return on the Notes and will result in the yield to maturity of the Notes in U.S. dollars being less than the stated yield to maturity of the Notes, which is calculated in Indian Rupee.

Investors should be aware that the methodology for determining any foreign exchange rate may result in a Fixed Interest Amount (payable pursuant to paragraph 16 of the Pricing Supplement), the Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated or even zero. Investors should also be aware that a Fixed Interest Date, the Maturity Date and/or the Early Redemption Date, as the case may be, may be postponed and that no additional amounts shall be payable by the Issuer in respect of any delay in payment resulting from such postponement.

The amount of any payment in U.S. dollars on the Notes will be affected by the exchange rate of INR to U.S. dollars, since the underlying amounts by reference to which U.S. dollar amounts are determined are in INR. The exchange rate between the Indian Rupee and the U.S. dollar will fluctuate during the term of the Notes and may affect the amount of any payment on the Notes. In recent years, the exchange rate of INR to U.S. dollars has been volatile and such volatility may occur in the future and could significantly affect the returns to the Noteholders. In addition, for investors whose investment currency is U.S. dollars, the movement of the currency exchange rates (including the INR/USD exchange rate) could result in any amount due under the Notes being less than the initial U.S. dollar amount paid for the Notes. As a result, a holder could lose a substantial amount of its investment in the Notes.

Prospective investors should note that it is a general feature of emerging markets that they are subject to rapid change and high volatility and that the risks involved also may change rapidly. Furthermore, several risks could have a simultaneous or compounding effect with respect to the INR/USD exchange rate and relative returns on securities denominated in INR or U.S. dollars. No assurance can be given about the effect that any combination of risks may have on an investor's return on the Notes. The amount of any payment on the Notes could be less than investments in other instruments.

Historical or prevailing rates of exchange of INR to U.S. dollars should not be taken as an indication of future exchange rates. No assurance can be given that the Indian Rupee will not depreciate as against the U.S. dollar and thereby reduce the amount of any payment in U.S. dollars due to the Noteholders under the Notes.

Risks associated with India and the Indian economy

There are a number of risks associated with India, including current political instability and the Indian economy in general, which may cause the occurrence of a Price Source Disruption Event. These also include, but are not limited to the following:

Since 1991, successive Indian governments have pursued policies of economic liberalisation. The present government of India, formed in May 2009, has announced policies and undertaken initiatives that support the continued economic liberalisation policies that have been pursued by previous governments. There is no assurance that these liberalisation policies will continue in the future. The rate of economic liberalisation could change, and specific laws and policies affecting currency exchange and other matters affecting investment in the Notes could change as well. Any

change in India's economic liberalisation and deregulation policies could adversely affect business and economic conditions in India generally.

India has been subject to a number of acts of terrorism in recent years. There can be no assurance that India will not be subject to further, or an increased number of, acts of terrorism in the future. Such acts, as well as other acts of violence, may have a material adverse effect on investment and confidence in, and the performance of, Indian financial markets, which could cause the occurrence of a Price Source Disruption Event.

According to the Reserve Bank of India website, India's foreign exchange reserves totalled approximately USD 297,334 million as of 31 December 2010. A decline in these reserves could impact the valuation of the Indian rupee and could result in reduced liquidity and higher interest rates, which could adversely affect the INR/USD Rate and the value of the Notes. The Indian government may from time to time intervene in the foreign exchange market and these interventions or other governmental actions could adversely affect the value of the Notes, as well as the yield (in U.S. dollar terms) on the Notes and the amount payable at maturity. Even in the absence of governmental action directly affecting exchange rates, political or economic developments in India or elsewhere could lead to significant and sudden changes in the exchange rate of INR to U.S. dollars.

Risk Factors relating to the Issuer

The Issuer makes loans and equity investments and issues guarantees primarily to the private sector in its countries of operation. Changes in the macroeconomic environment and financial markets in these countries may affect the creditworthiness of the Issuer's clients. Even severe changes in the macroeconomic and financial climate should, however, not affect the Issuer's ability to repay its borrowings, which is assured above all through the Issuer's prudent provisioning policy, ample liquidity, and limitations in the Agreement on its outstanding loans, equity investment and guarantees to the total amount of its subscribed capital, reserves and surpluses.

As at the date of this Securities Note, the Issuer has authorised share capital totalling €30 billion, of which €6 billion is paid-in. The Issuer's subscribed capital that has not been paid in ranks among the highest quality callable capital of any multilateral development bank. It is therefore unlikely that a call on the Issuer's shareholders will not be honoured.

Since the second half of 2008, disruption to the global financial markets, the re-pricing of credit risk and increased volatility have created challenging global market conditions and adversely affected the economies of many countries. It is difficult to predict how long these conditions will continue to exist and the effectiveness of measures taken by many countries to reduce their budget deficits and bring about recovery. The operations and financial position of the Issuer may be affected by any lengthy continuation of such conditions.

Investor Suitability

The purchase of the Notes involves substantial risks and is not suitable for all investors

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it. None of the Issuer, the Joint Lead Managers or the Calculation Agent acts as an investment adviser, or assumes any fiduciary obligation, to any prospective purchaser of the Notes.

In particular, but without prejudice to the generality of the above paragraph, prospective investors should note that an investment in the Notes is only suitable for investors who:

- (i) have the requisite knowledge and experience in financial and business matters to evaluate the merits and risks of an investment in the Notes;
- (ii) are capable of bearing the economic risk of an investment in the Notes for an indefinite period of time;
- (iii) are acquiring the Notes for their own account for investment, not with a view to resale, distribution or other disposition of the Notes (subject to any applicable law requiring that the disposition of the investor's property be within its control); and
- (iv) recognise that it may not be possible to make any transfer of the Notes for a substantial period of time, if at all.

Understanding and appropriateness of the investment

Each investor (a) should be an investor with substantial knowledge of and/or experience in financial and business matters that it is capable of evaluating the merits and risks (including tax, legal, regulatory and accounting) of an investment in the Notes because the Notes are not an appropriate investment for investors who are unsophisticated with respect to such transactions; (b) should be financially able to bear such risks; (c) in making such investment shall not rely on any advice or recommendations of or any information, representation or warranty provided by the Joint Lead Managers, the Calculation Agent and/or any of their respective affiliates, the Issuer or any of their respective representatives (other than, in the case of the Issuer and its representatives, the information contained in, or incorporated by reference into, this Securities Note, the Registration Document and the Summary Note); (d) shall recognise that it may not be possible to make any transfer of the Notes for a substantial period of time; and (e) should seek advice from such advisers as such investor considers necessary and appropriate, to enable such investor to make its own independent decision with regard to the suitability and appropriateness of the Notes as an investment for its own account. Each investor should be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes. None of the Issuer, the Joint Lead Managers or any of their respective representatives makes any representation and has given, nor will give, any advice concerning the appropriate accounting treatment or possible tax consequences of purchasing the Notes. Each investor should consult its own financial, tax, accounting and legal advisers about risks associated with an investment in the Notes and the suitability of investing in such Notes in light of the investor's particular circumstances.

Any information communicated (in any manner) to investors by the Issuer or the Joint Lead Managers should not be relied upon as investment advice or as a recommendation to invest in the Notes, which shall include, amongst other things, any such information, explanations or discussions concerning the terms and conditions of the Notes, or related features.

Investment in the Notes should comply, and be fully consistent, with all investment policies, guidelines and restrictions applicable to an investor. It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Joint Lead Managers should not be relied upon, nor shall such information be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes. Each investor should be aware

that any return on the Notes may not exceed or even equal the return that might have been achieved had the amount of its initial investment been placed on deposit for the same period.

Each investor should be aware that none of the Issuer, the Joint Lead Managers or the Calculation Agent is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

Investment considerations relating to the Notes

Investment in the Notes carries with it a degree of risk including, but not limited to, the risks referred to below. The level of the USD/INR foreign exchange rate may go down as well as up. Prospective investors may receive an amount less than their initial investment.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security. Such risks include, without limitation, changes in the level or value of the USD/INR foreign exchange rate and the possibility that a holder of the Notes will receive a lower amount of interest or other consideration than the holder expected. Depending on the exchange rate to be determined by the Calculation Agent upon a Price Source Disruption Event, such amount may even be zero. The Issuer has no control over a number of matters that are important in determining the existence, magnitude and longevity of such risks and their results, including economic, financial and political events.

Past performance of the USD/INR foreign exchange rate is not necessarily indicative of future performance.

The Toronto-Dominion Bank may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes including, without limitation, in relation to the role of the Calculation Agent in determining the occurrence of a Price Source Disruption Event and in determining the exchange rate for converting INR into USD upon the occurrence of a Price Source Disruption Event. The Toronto-Dominion Bank is required to carry out its duties as Calculation Agent in good faith and using its reasonable judgement. However, each investor should be aware that any such determination may potentially adversely affect the amount payable to Noteholders under the Notes and that potential conflicts of interest could arise.

No assurances can be made that any meaningful secondary market will develop in the Notes. The Joint Lead Managers may, but are not obligated to, make a market in the Notes. The Joint Lead Managers may discontinue any market-making activities at any time without notice. In addition, the Notes may not be transferred except to qualified investors in accordance with applicable private offering rules. If an active public market for the Notes does not develop, the market prices and liquidity of the Notes may be adversely affected.

Volatility is the term used to describe the size and frequency of price and/or market fluctuations. If the volatility, or anticipated volatility, of the USD/INR foreign exchange rate increase or decrease, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes. In general, if interest rates increase, it is expected that the trading value of the Notes will increase and, conversely, if interest rates decrease, it is expected that the trading value of the Notes will decrease. If interest rates increase or decrease in markets based on the Indian rupee, the trading value of the Notes may be adversely affected. Interest rates may also affect the economies of India or the United States, and, in turn, the exchange rates and therefore the value of the USD/INR foreign exchange rate.

If the Calculation Agent determines that a Price Source Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF PROSPECTIVE INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" ON PAGES 10 TO 11 OF THE BASE PROSPECTUS INCORPORATED BY REFERENCE IN THE REGISTRATION DOCUMENT AT PAGE 4.

Use of Proceeds

Risk Factors

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including but not limited to investments in currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Joint Lead Managers, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition. Prospective investors should also pay specific attention to the risks highlighted below.

Risk Factors relating to the Notes

Market, Liquidity and Yield Considerations

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

Legal Investment Considerations

General

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

Risk Factors relating to the Issuer

The Issuer makes loans and equity investments and issues guarantees primarily to the private sector in its countries of operation. Changes in the macroeconomic environment and financial markets in these countries may affect the creditworthiness of the Issuer's clients. Even severe changes in the macroeconomic and financial climate should, however, not affect the Issuer's ability to repay its borrowings, which is assured above all through the Issuer's prudent provisioning policy, ample liquidity, and limitations in the Agreement on its outstanding loans, equity investment and guarantees to the total amount of its subscribed capital, reserves and surpluses.

As at the date of this Securities Note, the Issuer has authorised share capital totalling €30 billion, of which €6 billion is paid-in. The Issuer's subscribed capital that has not been paid in ranks among the highest quality callable capital of any multilateral development bank. It is therefore unlikely that a call on the Issuer's shareholders will not be honoured.

Since the second half of 2008, disruption to the global financial markets, the re-pricing of credit risk and increased volatility have created challenging global market conditions and adversely affected the economies of many countries. It is difficult to predict how long these conditions will continue to exist and the effectiveness of measures taken by many countries to reduce their budget deficits and bring about recovery. The operations and financial position of the Issuer may be affected by any lengthy continuation of such conditions.

Risk Warning

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk and liquidity risk.

Investors should be aware that the Fixed Interest Amount, Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated.

There are certain risks associated with India, including current political instability and the Indian economy in general. These also include, but are not limited to, historic volatility of the Indian rupee, which may have effects upon the Notes, and in particular the USD/INR exchange rate. The Indian government may from time to time intervene in the foreign exchange market and these interventions or other governmental actions could adversely affect the value of the Notes, as well as the yield (in U.S. dollar terms) on the Notes and any amount payable.

Investor Suitability

The purchase of the Notes involves substantial risks and is not suitable for all investors.

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it.

Understanding and appropriateness of the investment

Each investor should have the knowledge and experience to evaluate material risks and be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes.

Any information communicated (in any manner) to investors by the Issuer or the Joint Lead Managers should not be relied upon as investment advice or as a recommendation to invest in the Notes.

It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Joint Lead Managers should not be relied upon, nor shall such be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes.

Each investor should be aware that none of the Issuer, the Joint Lead Managers nor the Calculation Agent is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

Investment considerations relating to the Notes

The level of the USD/INR foreign exchange rate may go down as well as up.

If the Calculation Agent determines that a Price Source Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security.

Past performance of the USD/INR foreign exchange rate is not necessarily indicative of future performance.

The Toronto-Dominion Bank may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes.

No assurances can be made that any meaningful secondary market will develop in the Notes.

If the volatility, or anticipated volatility, of the USD/INR foreign exchange rate increases or decreases, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes.

THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" IN THE BASE PROSPECTUS.

Annex A

Calculation of Fixed Interest Amount, Early Redemption Amount and Final Redemption Amount

The Final Redemption Amount or the Early Redemption Amount, as applicable, per Calculation Amount will be payable in USD on the Maturity Date or Early Redemption Date, as applicable, and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

Calculation Amount *divided by* the Reference Rate on the applicable Rate Fixing Date rounded up to the nearest cent.

The Fixed Interest Amount per Calculation Amount will be payable in USD on each Fixed Interest Date and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

The relevant Fixed Interest Amount *divided by* Reference Rate on the applicable Rate Fixing Date rounded up to the nearest cent.

The Calculation Agent shall notify the Issuer, the Agent and the Noteholders of its determination of the Final Redemption Amount, the Early Redemption Amount and Fixed Interest Amount payable per Calculation Amount on the Maturity Date, Early Redemption Date or relevant Fixed Interest Date (as applicable), as soon as practicable after such determination (but in no event later than four Business Days prior to the Maturity Date, Early Redemption Date and/or relevant Fixed Interest Date).

If the Reference Rate is not available for any reason on Reuters page "RBIB" or on any successor page on any Rate Fixing Date, then the Calculation Agent shall determine that a Price Source Disruption Event (a "Price Source Disruption Event") has occurred, and shall promptly inform the Issuer and Agent of such occurrence. Following the determination of the occurrence of a Price Source Disruption Event, Noteholders will not be entitled to any amounts in respect of the Notes until the earlier to occur of (i) the day falling five Business Days after the day on which the Issuer is notified by the Calculation Agent that a Price Source Disruption Event no longer subsists and (ii) the Postponed Fixed Interest Date (as defined below), Postponed Early Redemption Date (as defined below) or the Postponed Maturity Date (as defined below), as the case may be. If on the tenth Business Day following the original Rate Fixing Date, Reuters page RBIB (or successor page) is still unavailable then the Reference Rate shall be the average of such firm quotes (expressed as the number of INR per one USD) from the Reference Dealers as the Calculation Agent is able to obtain for the sale of INR and the purchase of USD at or about 14:30 hours Mumbai time on the Rate Fixing Date for settlement two Mumbai Business Days thereafter, provided, however that if fewer than four (but at least two) Reference Dealers provide such firm quote then the average of the quotes actually obtained shall apply, and if none, or only one, of the Reference Dealers provides such a firm quote, the Reference Rate will be determined by the Calculation Agent in its sole discretion, acting in good faith and in a commercially reasonable manner.

For the purposes of these provisions:

"Business Day" means any day on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealings in foreign exchange and foreign currency deposits) in the business centre(s) specified or, if no business centre is specified, in London, New York City, and Mumbai;

"Calculation Agent" means The Toronto-Dominion Bank in accordance with the provisions of the Calculation Agency Agreement entered into between the Issuer and the Calculation Agent dated 22 August 2007 (as amended and/or supplemented from time to time). All references to the Calculation Agent shall include any successor or successors to The Toronto-Dominion Bank as Calculation Agent in respect of the Notes. The determination by the Calculation Agent of any amount or of any state of affairs, circumstance, event or other matter, or the formation of any opinion or the exercise of any discretion required or permitted to be determined, formed or

exercised by the Calculation Agent under the Notes and pursuant to the Calculation Agency Agreement shall (in the absence of manifest error) be final and binding on all parties (including, but not limited to, the Issuer and the Noteholders) and shall be made in its sole discretion in good faith and in a commercially reasonable manner in accordance with the Calculation Agency Agreement. In performing its duties under the Notes, the Calculation Agent shall act in accordance with the Calculation Agency Agreement;

“Early Redemption Date” means the date on which the Notes become due and payable pursuant to Condition 5(d);

“Reference Dealers” means four leading dealers, banks or banking corporations which regularly deal in the INR/USD exchange market, as selected by the Calculation Agent in its sole discretion, acting in good faith and in a commercially reasonable manner; and

Annex A

Calculation of Fixed Interest Amount, Early Redemption Amount and Final Redemption Amount

The Final Redemption Amount or the Early Redemption Amount, as applicable, per Calculation Amount will be payable in USD on the Maturity Date or Early Redemption Date, as applicable, and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

Calculation Amount *divided by* the Reference Rate on the applicable Rate Fixing Date rounded up to the nearest cent.

The Fixed Interest Amount per Calculation Amount will be payable in USD on each Fixed Interest Date and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

The relevant Fixed Interest Amount *divided by* Reference Rate on the applicable Rate Fixing Date rounded up to the nearest cent.

The Calculation Agent shall notify the Issuer, the Agent and the Noteholders of its determination of the Final Redemption Amount, the Early Redemption Amount and Fixed Interest Amount payable per Calculation Amount on the Maturity Date, Early Redemption Date or relevant Fixed Interest Date (as applicable), as soon as practicable after such determination (but in no event later than four Business Days prior to the Maturity Date, Early Redemption Date and/or relevant Fixed Interest Date).

Following the determination of the occurrence of a Price Source Disruption Event, Noteholders will not be entitled to any amounts in respect of the Notes until the earlier to occur of (i) the day falling five Business Days after the day on which the Issuer is notified by the Calculation Agent that a Price Source Disruption Event no longer subsists and (ii) the Postponed Fixed Interest Date (as defined below), Postponed Early Redemption Date (as defined below) or the Postponed Maturity Date (as defined below), as the case may be. For the purposes of these provisions:

"Business Day" means any day on which commercial banks and foreign exchange markets settle payments and are open for general business (including dealings in foreign exchange and foreign currency deposits) in the business centre(s) specified or, if no business centre is specified, in London, New York City, and Mumbai;

but not limited to, the Issuer and the Noteholders) and shall be made in its sole discretion in good faith and in a commercially reasonable manner in accordance with the Calculation Agency Agreement. In performing its duties under the Notes, the Calculation Agent shall act in accordance with the Calculation Agency Agreement;

Risk Factors

A12.2.1

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including but not limited to investments in currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Joint Lead Managers, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition. Some or all of the risks highlighted below could adversely affect the trading price of the Notes or the rights of investors under the Notes and, as a result, investors could lose some or all of their investment.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition.

Prospective investors should also pay specific attention to the risks highlighted below and the risk factors below should be read in conjunction with the section headed “Risk Factors” on pages 10 to 11 of the Base Prospectus incorporated by reference in the Registration Document at page 4.

Market, Liquidity and Yield Considerations

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

Legal Investment Considerations

General

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

Risk Warning

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk and liquidity risk. Investors should consult their own financial, legal, accounting and tax advisers about the risks associated with an investment in these Notes, the appropriate tools to analyse that investment, and the suitability of the investment in each investor’s particular circumstances. No investor should purchase the Notes unless that investor understands and has sufficient financial resources to bear the price, market liquidity, structure and other risks associated

with an investment in these Notes (including, but not limited to, any political, economic and other factors which could affect the value of, and return on, the Notes).

The Notes are U.S. dollar settled debt instruments. All amounts due under the Notes, including the coupon, the Early Redemption Amount and the final redemption price of the Notes, will be payable in U.S. dollars at the prevailing exchange rate between Indian Rupee and the U.S. dollar at the time of payment. Accordingly, the U.S. dollar return on the Notes, or yield to maturity, will depend on the principal amount and the coupon (or Early Redemption Amount) converted into U.S. dollars at the prevailing exchange rate. Any volatility of the exchange rate during the term of the Notes will affect the return on the Notes, or yield to maturity, in U.S. dollars. In particular, any devaluation of the Indian Rupee against the U.S. dollar during the term of the Notes will decrease the U.S. dollar return on the Notes and will result in the yield to maturity of the Notes in U.S. dollars being less than the stated yield to maturity of the Notes, which is calculated in Indian Rupee.

Investors should be aware that the methodology for determining any foreign exchange rate may result in a Fixed Interest Amount (payable pursuant to paragraph 16 of the Pricing Supplement), the Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated or even zero. Investors should also be aware that a Fixed Interest Date, the Maturity Date and/or the Early Redemption Date, as the case may be, may be postponed and that no additional amounts shall be payable by the Issuer in respect of any delay in payment resulting from such postponement.

The amount of any payment in U.S. dollars on the Notes will be affected by the exchange rate of INR to U.S. dollars, since the underlying amounts by reference to which U.S. dollar amounts are determined are in INR. The exchange rate between the Indian Rupee and the U.S. dollar will fluctuate during the term of the Notes and may affect the amount of any payment on the Notes. In recent years, the exchange rate of INR to U.S. dollars has been volatile and such volatility may occur in the future and could significantly affect the returns to the Noteholders. In addition, for investors whose investment currency is U.S. dollars, the movement of the currency exchange rates (including the INR/USD exchange rate) could result in any amount due under the Notes being less than the initial U.S. dollar amount paid for the Notes. As a result, a holder could lose a substantial amount of its investment in the Notes.

Prospective investors should note that it is a general feature of emerging markets that they are subject to rapid change and high volatility and that the risks involved also may change rapidly. Furthermore, several risks could have a simultaneous or compounding effect with respect to the INR/USD exchange rate and relative returns on securities denominated in INR or U.S. dollars. No assurance can be given about the effect that any combination of risks may have on an investor's return on the Notes. The amount of any payment on the Notes could be less than investments in other instruments.

Historical or prevailing rates of exchange of INR to U.S. dollars should not be taken as an indication of future exchange rates. No assurance can be given that the Indian Rupee will not depreciate as against the U.S. dollar and thereby reduce the amount of any payment in U.S. dollars due to the Noteholders under the Notes.

Risks associated with India and the Indian economy

There are a number of risks associated with India, including current political instability and the Indian economy in general, which may cause the occurrence of a Price Source Disruption Event. These also include, but are not limited to the following:

Since 1991, successive Indian governments have pursued policies of economic liberalisation. The present government of India, formed in May 2009, has announced policies and undertaken initiatives that support the continued economic liberalisation policies that have been pursued by previous governments. There is no assurance that these liberalisation policies will continue in the future. The rate of economic liberalisation could change, and specific laws and policies affecting currency exchange and other matters affecting investment in the Notes could change as well. Any

change in India's economic liberalisation and deregulation policies could adversely affect business and economic conditions in India generally.

India has been subject to a number of acts of terrorism in recent years. There can be no assurance that India will not be subject to further, or an increased number of, acts of terrorism in the future. Such acts, as well as other acts of violence, may have a material adverse effect on investment and confidence in, and the performance of, Indian financial markets, which could cause the occurrence of a Price Source Disruption Event.

According to the Reserve Bank of India website, India's foreign exchange reserves totalled approximately USD 297,334 million as of 31 December 2010. A decline in these reserves could impact the valuation of the Indian rupee and could result in reduced liquidity and higher interest rates, which could adversely affect the INR/USD Rate and the value of the Notes. The Indian government may from time to time intervene in the foreign exchange market and these interventions or other governmental actions could adversely affect the value of the Notes, as well as the yield (in U.S. dollar terms) on the Notes and the amount payable at maturity. Even in the absence of governmental action directly affecting exchange rates, political or economic developments in India or elsewhere could lead to significant and sudden changes in the exchange rate of INR to U.S. dollars.

Risk Factors relating to the Issuer

The Issuer makes loans and equity investments and issues guarantees primarily to the private sector in its countries of operation. Changes in the macroeconomic environment and financial markets in these countries may affect the creditworthiness of the Issuer's clients. Even severe changes in the macroeconomic and financial climate should, however, not affect the Issuer's ability to repay its borrowings, which is assured above all through the Issuer's prudent provisioning policy, ample liquidity, and limitations in the Agreement on its outstanding loans, equity investment and guarantees to the total amount of its subscribed capital, reserves and surpluses.

As at the date of this Securities Note, the Issuer has authorised share capital totalling €30 billion, of which €6 billion is paid-in. The Issuer's subscribed capital that has not been paid in ranks among the highest quality callable capital of any multilateral development bank. It is therefore unlikely that a call on the Issuer's shareholders will not be honoured.

Since the second half of 2008, disruption to the global financial markets, the re-pricing of credit risk and increased volatility have created challenging global market conditions and adversely affected the economies of many countries. It is difficult to predict how long these conditions will continue to exist and the effectiveness of measures taken by many countries to reduce their budget deficits and bring about recovery. The operations and financial position of the Issuer may be affected by any lengthy continuation of such conditions.

Investor Suitability

The purchase of the Notes involves substantial risks and is not suitable for all investors

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it. None of the Issuer, the Joint Lead Managers or the Calculation Agent acts as an investment adviser, or assumes any fiduciary obligation, to any prospective purchaser of the Notes.

In particular, but without prejudice to the generality of the above paragraph, prospective investors should note that an investment in the Notes is only suitable for investors who:

- (i) have the requisite knowledge and experience in financial and business matters to evaluate the merits and risks of an investment in the Notes;
- (ii) are capable of bearing the economic risk of an investment in the Notes for an indefinite period of time;
- (iii) are acquiring the Notes for their own account for investment, not with a view to resale, distribution or other disposition of the Notes (subject to any applicable law requiring that the disposition of the investor's property be within its control); and
- (iv) recognise that it may not be possible to make any transfer of the Notes for a substantial period of time, if at all.

Understanding and appropriateness of the investment

Each investor (a) should be an investor with substantial knowledge of and/or experience in financial and business matters that it is capable of evaluating the merits and risks (including tax, legal, regulatory and accounting) of an investment in the Notes because the Notes are not an appropriate investment for investors who are unsophisticated with respect to such transactions; (b) should be financially able to bear such risks; (c) in making such investment shall not rely on any advice or recommendations of or any information, representation or warranty provided by the Joint Lead Managers, the Calculation Agent and/or any of their respective affiliates, the Issuer or any of their respective representatives (other than, in the case of the Issuer and its representatives, the information contained in, or incorporated by reference into, this Securities Note, the Registration Document and the Summary Note); (d) shall recognise that it may not be possible to make any transfer of the Notes for a substantial period of time; and (e) should seek advice from such advisers as such investor considers necessary and appropriate, to enable such investor to make its own independent decision with regard to the suitability and appropriateness of the Notes as an investment for its own account. Each investor should be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes. None of the Issuer, the Joint Lead Managers or any of their respective representatives makes any representation and has given, nor will give, any advice concerning the appropriate accounting treatment or possible tax consequences of purchasing the Notes. Each investor should consult its own financial, tax, accounting and legal advisers about risks associated with an investment in the Notes and the suitability of investing in such Notes in light of the investor's particular circumstances.

Any information communicated (in any manner) to investors by the Issuer or the Joint Lead Managers should not be relied upon as investment advice or as a recommendation to invest in the Notes, which shall include, amongst other things, any such information, explanations or discussions concerning the terms and conditions of the Notes, or related features.

Investment in the Notes should comply, and be fully consistent, with all investment policies, guidelines and restrictions applicable to an investor. It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Joint Lead Managers should not be relied upon, nor shall such information be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes. Each investor should be aware

that any return on the Notes may not exceed or even equal the return that might have been achieved had the amount of its initial investment been placed on deposit for the same period.

Each investor should be aware that none of the Issuer, the Joint Lead Managers or the Calculation Agent is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

Investment considerations relating to the Notes

Investment in the Notes carries with it a degree of risk including, but not limited to, the risks referred to below. The level of the USD/INR foreign exchange rate may go down as well as up. Prospective investors may receive an amount less than their initial investment.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security. Such risks include, without limitation, changes in the level or value of the USD/INR foreign exchange rate and the possibility that a holder of the Notes will receive a lower amount of interest or other consideration than the holder expected. Depending on the exchange rate to be determined by the Calculation Agent upon a Price Source Disruption Event, such amount may even be zero. The Issuer has no control over a number of matters that are important in determining the existence, magnitude and longevity of such risks and their results, including economic, financial and political events.

Past performance of the USD/INR foreign exchange rate is not necessarily indicative of future performance.

The Toronto-Dominion Bank may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes including, without limitation, in relation to the role of the Calculation Agent in determining the occurrence of a Price Source Disruption Event and in determining the exchange rate for converting INR into USD upon the occurrence of a Price Source Disruption Event. The Toronto-Dominion Bank is required to carry out its duties as Calculation Agent in good faith and using its reasonable judgement. However, each investor should be aware that any such determination may potentially adversely affect the amount payable to Noteholders under the Notes and that potential conflicts of interest could arise.

No assurances can be made that any meaningful secondary market will develop in the Notes. The Joint Lead Managers may, but are not obligated to, make a market in the Notes. The Joint Lead Managers may discontinue any market-making activities at any time without notice. In addition, the Notes may not be transferred except to qualified investors in accordance with applicable private offering rules. If an active public market for the Notes does not develop, the market prices and liquidity of the Notes may be adversely affected.

Volatility is the term used to describe the size and frequency of price and/or market fluctuations. If the volatility, or anticipated volatility, of the USD/INR foreign exchange rate increase or decrease, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes. In general, if interest rates increase, it is expected that the trading value of the Notes will increase and, conversely, if interest rates decrease, it is expected that the trading value of the Notes will decrease. If interest rates increase or decrease in markets based on the Indian rupee, the trading value of the Notes may be adversely affected. Interest rates may also affect the economies of India or the United States, and, in turn, the exchange rates and therefore the value of the USD/INR foreign exchange rate.

If the Calculation Agent determines that a Price Source Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF PROSPECTIVE INVESTORS IS ALSO DRAWN TO THE SECTION HEADED “RISK FACTORS” ON PAGES 10 TO 11 OF THE BASE PROSPECTUS INCORPORATED BY REFERENCE IN THE REGISTRATION DOCUMENT AT PAGE 4.

Use of Proceeds

The net proceeds of the issue of the Notes (which is expected to be INR 1,982,770,000.00 but payable in USD in the amount of USD 43,861,740.96) will be included in the ordinary capital resources of the Issuer and used in its ordinary operations.

Risk Factors

The Notes may involve substantial risks and are suitable only for investors who have the knowledge and experience in financial and business matters (including but not limited to investments in currency linked investments) necessary to enable them to evaluate the risks and the merits of an investment in the Notes. Prospective investors should ensure that they understand the nature of the risks posed by, and the extent of their exposure under, the Notes.

Prospective investors should make all pertinent inquiries they deem necessary without relying on the Issuer, the Joint Lead Managers, any Agent or any officers or employees of the Issuer. Prospective investors should consider the suitability of the Notes as an investment in light of their own circumstances, investment objectives, tax position and financial condition.

The factors described below represent the principal risks inherent in investing in the Notes. However, an investor may receive less than the expected amount for other reasons and the Issuer does not represent that the statements below regarding the risks of holding the Notes are exhaustive. Prospective purchasers of the Notes should ensure that they understand the nature of the Notes and the extent of their exposure to loss of their initial investment and that they consider the suitability of the Notes as an investment in the light of their own circumstances and financial condition. Prospective investors should also pay specific attention to the risks highlighted below.

Risk Factors relating to the Notes

Market, Liquidity and Yield Considerations

Notes may not have an established trading market when issued. There can be no assurance of a secondary market for any Notes or the liquidity of such market if one develops. Consequently, investors may not be able to sell their Notes readily or at prices that will enable them to realise a yield comparable to that of similar instruments, if any, with a developed secondary market.

Legal Investment Considerations

General

Investors should consult their own legal advisers in determining whether and to what extent Notes constitute legal investments for such investors and whether and to what extent Notes can be used as collateral for various types of borrowings. In addition, financial institutions should consult their legal advisers or regulators in determining the appropriate treatment of Notes under any applicable risk-based capital or similar rules.

Investors whose investment activities are subject to investment laws and regulations or to review or regulation by certain authorities may be subject to restrictions on investments in certain types of debt securities, which may include certain Notes. Investors should review and consider such restrictions prior to investing in any Notes.

Risk Factors relating to the Issuer

The Issuer makes loans and equity investments and issues guarantees primarily to the private sector in its countries of operation. Changes in the macroeconomic environment and financial markets in these countries may affect the creditworthiness of the Issuer's clients. Even severe changes in the macroeconomic and financial climate should, however, not affect the Issuer's ability to repay its borrowings, which is assured above all through the Issuer's prudent provisioning policy, ample liquidity, and limitations in the Agreement on its outstanding loans, equity investment and guarantees to the total amount of its subscribed capital, reserves and surpluses.

As at the date of this Securities Note, the Issuer has authorised share capital totalling €30 billion, of which €6 billion is paid-in. The Issuer's subscribed capital that has not been paid in ranks among the highest quality callable capital of any multilateral development bank. It is therefore unlikely that a call on the Issuer's shareholders will not be honoured.

Since the second half of 2008, disruption to the global financial markets, the re-pricing of credit risk and increased volatility have created challenging global market conditions and adversely affected the economies of many countries. It is difficult to predict how long these conditions will continue to exist and the effectiveness of measures taken by many countries to reduce their budget deficits and bring about recovery. The operations and financial position of the Issuer may be affected by any lengthy continuation of such conditions.

Risk Warning

There are significant risks associated with the Notes including, but not limited to, exchange rate risk, price risk and liquidity risk.

Investors should be aware that the Fixed Interest Amount, Final Redemption Amount or any Early Redemption Amount (as the case may be) of the Notes being significantly less than anticipated.

There are certain risks associated with India, including current political instability and the Indian economy in general. These also include, but are not limited to, historic volatility of the Indian rupee, which may have effects upon the Notes, and in particular the USD/INR exchange rate. The Indian government may from time to time intervene in the foreign exchange market and these interventions or other governmental actions could adversely affect the value of the Notes, as well as the yield (in U.S. dollar terms) on the Notes and any amount payable.

Investor Suitability

The purchase of the Notes involves substantial risks and is not suitable for all investors.

Each prospective investor must determine, based on its own independent review and such professional tax and accounting advice as it deems appropriate under the circumstances, that its acquisition and holding of the Notes is fully consistent with its financial needs, objectives and conditions, and complies and is fully consistent with, all investment policies, guidelines and restrictions applicable to it.

Understanding and appropriateness of the investment

Each investor should have the knowledge and experience to evaluate material risks and be capable of assessing and independently deciding, and should have assessed and independently decided, to assume the risks of an investment in the Notes.

Each investor in the Notes should consider the tax consequences of investing in the Notes.

Any information communicated (in any manner) to investors by the Issuer or the Joint Lead Managers should not be relied upon as investment advice or as a recommendation to invest in the Notes.

It is the responsibility of each investor to ensure that it is compliant with all regulations relevant to its acquisition of the Notes and that it is lawful for it to enter into such investment.

Any information communicated (in any manner) to investors by the Issuer or the Joint Lead Managers should not be relied upon, nor shall such be deemed to be an assurance or guarantee, as to the expected results of an investment in the Notes.

Each investor should be aware that none of the Issuer, the Joint Lead Managers nor the Calculation Agent is acting as a fiduciary or trustee for, or as an adviser to the investor with regard to the investment in the Notes.

Investment considerations relating to the Notes

The level of the USD/INR foreign exchange rate may go down as well as up.

If the Calculation Agent determines that a Price Source Disruption Event has occurred, this will lead to a delay in the payment of principal and/or interest.

An investment in the Notes will entail significant risks not associated with a conventional fixed rate or floating rate debt security.

Past performance of the USD/INR foreign exchange rate is not necessarily indicative of future performance.

The Toronto-Dominion Bank may face possible conflicts of interest in relation to its role as Calculation Agent for the Notes.

No assurances can be made that any meaningful secondary market will develop in the Notes.

If the volatility, or anticipated volatility, of the USD/INR foreign exchange rate increases or decreases, the trading value of the Notes may be adversely affected.

It is expected that changes in interest rates will affect the trading value of the Notes.

THE CONSIDERATIONS SET OUT ABOVE ARE NOT, AND ARE NOT INTENDED TO BE A COMPREHENSIVE LIST OF ALL CONSIDERATIONS RELEVANT TO A DECISION TO PURCHASE OR HOLD THE NOTES. THE ATTENTION OF INVESTORS IS ALSO DRAWN TO THE SECTION HEADED "RISK FACTORS" IN THE BASE PROSPECTUS.

The Final Redemption Amount or the Early Redemption Amount, as applicable, per Calculation Amount will be payable in USD on the Maturity Date or Early Redemption Date, as applicable, and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:

Calculation Amount *divided by* the Reference Rate on the applicable Rate Fixing Date rounded up to the nearest cent.

The Fixed Interest Amount per Calculation Amount will be payable in USD on each Fixed Interest Date and determined by the Calculation Agent as follows, on the corresponding Rate Fixing Date:
