Independent Auditor's Report

To the Board of Directors
Cambridge Investment Research, Inc.
Fairfield, Iowa

We have audited the accompanying statement of financial condition of Cambridge Investment Research, Inc. (the "Company"), a majority owned subsidiary of Cambridge Investment Group, Inc., as of December 31, 2010, and the related statements of operations, changes in shareholder's equity and cash flows for the year then ended that you are filing pursuant to Rule 17a-5 under the Securities Exchange Act of 1934. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Cambridge Investment Research, Inc. as of December 31, 2010, and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The information contained in Schedules I, II, and III is presented for purposes of additional analysis and is not a required part of the basic financial statements, but is supplementary information required by Rule 17a-5 under the Securities Exchange Act of 1934. These schedules are the responsibility of the Company's management. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Cambridge Investment Research, Inc.

Notes to Financial Statements

Note 1. Summary of Significant Accounting Policies

Organization and business: Cambridge Investment Research, Inc. (the "Company") was incorporated in Iowa on October 2, 1995. The Company is a wholly-owned subsidiary of Cambridge Investment Group, Inc. The Company is registered as a broker dealer in securities with the Securities and Exchange Commission; a member of the Financial Industry Regulatory Authority and also registered as an introducing broker dealer with the National Futures Association. In this capacity, it deals primarily in mutual funds, managed accounts and insurance related products. The company introduces its customers to clearing brokers on a fully disclosed basis. The Company also sells direct participation programs that may be organized as commodity pools.

The Company, under Rules 15c3-3(k)(2)(i) and 15c3-3(k)(2)(ii), is exempt from the reserve and possession or control requirements of Rule 15c3-3 of the Securities and Exchange Commission. Accordingly, all customer transactions are executed and cleared on behalf of the Company by its clearing brokers on a fully disclosed basis. The Company's agreements with its clearing brokers provide that as clearing brokers, these firms will make and keep such records of the transactions effected and cleared in the customer accounts as are customarily made and kept by a clearing broker pursuant to the requirements of Rules 17a-3 and 17a-4 of the Securities and Exchange Act of 1934, as amended (the Act).

Cash equivalents: The Company considers liquid investments with maturities of three months or less to be cash equivalents.

Receivables from clearing brokers and commissions: Receivables from clearing brokers and commissions receivable primarily consists of commission and transaction-related receivables.

Receivables from others: From time to time, the Company provides forgivable loans to certain registered representatives primarily for recruiting and retention purposes. These loans are recorded at face value at the time the loan is made. If the registered representative does not meet specific requirements or terminates his or her registration with the Company prior to the forgiveness of the loan, management will evaluate the collectability of the remaining loan amount. Forgivable loans to registered representatives totaled \$11,171,220 as of December 31, 2010. The loans are amortized to general and administrative expense for financial reporting purposes over the term of the loan. Loan amortization charged to expense was \$1,522,295 in 2010.

Some loans to registered representatives are not subject to a forgiveness contingency. These loans are repaid to the Company by deducting a portion of the representatives' commission and fee payouts throughout the compensation cycle until the loans are paid off. Interest charged on these loans to representatives ranges up to 7% annually.

Management performs periodic credit evaluations and provides an allowance based on our assessment of specifically identified unsecured receivables and other factors, including the representative's payment history. Once it is determined that it is both probable that a loan has been impaired and the amount of the loss can reasonably be estimated, the portion of the loan balance estimated to be uncollectible is so classified and written off. The allowance for receivables from others was none as of December 31, 2010. Loans written off to expense totaled \$96,118 in 2010.

Income taxes: The Company is recognized as a qualified subchapter S subsidiary by the Internal Revenue Service. The parent company's shareholders are liable for federal and state income taxes on its taxable income.

Note 1. Summary of Significant Accounting Policies (Continued)

When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. As of and for the year ended December 31, 2010, the Company had no material uncertain tax positions that are required to be recorded as a liability. The Company files income tax returns in U.S. federal jurisdiction and various states. With few exceptions, the Company is no longer subject to U.S. federal, state and local tax examinations by tax authorities for years before 2007.

Use of estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include the allowance for receivables from others, determination of litigation accruals and management fee allocation.

Revenue recognition: Commission revenue and related expenses arising from securities are recorded on trade-date basis. Revenue from fees is typically earned in accordance with the fee agreement and related fee platform cost. Other revenues primarily consist of fee platform revenue that is typically earned in accordance with agreements with registered representatives.

Securities owned or sold, but not yet purchased by the Company are recorded at market value and related changes in market value are reflected in income. The Company records securities transactions on a trade date basis. Securities owned and securities sold, not yet purchased, are valued using quoted market prices.

Fair value measurements: The Fair Value Measurements Topic of the FASB Codification defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and sets out a fair value hierarchy. This topic applies to all assets and liabilities that are measured and reported on a fair value basis. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Inputs are broadly defined under this topic as assumptions market participants would use in pricing an asset or liability.

The three levels of the fair value hierarchy under this topic are described below:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. The type of investments included in Level 1 include listed equities and listed derivatives.

Level 2: Inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly; and fair value is determined through the use of models or other valuation methodologies. Investments which are generally included in this category include corporate bonds and loans, less liquid and restricted equity securities and certain over-the-counter derivatives. A significant adjustment to a Level 2 input could result in the Level 2 measurement becoming a Level 3 measurement.

Cambridge Investment Research, Inc.

Notes to Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Level 3: Inputs are unobservable for the asset or liability and include situations where there is little, if any, market activity for the asset or liability. The inputs into the determination of fair value are based upon the best information in the circumstances and may require significant management judgment or estimation. Investments that are included in this category generally include equity and debt positions in private companies.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment. The following section describes the valuation techniques used by the Company to measure different financial instruments at fair value and includes the level within the fair value hierarchy in which the financial instrument is categorized.

Investments in securities traded on a national securities exchange are stated at the last reported sales price on the day of valuation. These financial instruments are classified as Level 1 in the fair value hierarchy.

Restricted certificates of deposit are carried at amounts that approximate fair value due to the short-term nature of these instruments. These financial instruments are classified as Level 2 in the fair value hierarchy.

There were no financial instruments classified as Level 3 in the fair value hierarchy as of December 31, 2010.

There have been no changes in valuation techniques used for any assets measured at fair value during the year ended December 31, 2010.

There were no significant transfers of assets between Levels 1, 2 and 3 of the fair value hierarchy during the year ended December 31, 2010.

Note 2. Securities Owned

Marketable securities owned, consist of trading and investment securities at market values, as follows:

Mutual funds, consisting of approximately 93% fixed income/bond funds with remaining invested in international and large cap funds (Level I)	\$ 1,044,170
Restricted certificate of deposit (Level II)	* 328,704
	<u>\$ 1,372,874</u>

*During 2005, the Company's parent entered into a note payable to an unrelated entity in the amount of \$500,000. The parent issued an irrevocable letter of credit to the lender in the same amount. The Company has collateralized the letter of credit with a certificate of deposit, which is considered a restricted asset and included in securities owned on the statement of financial condition.

Notes to Financial Statements

Note 3. Indemnifications

In the normal course of its business, the Company indemnifies and guarantees certain service providers, such as clearing and custody agents, trustees and administrators, against specified potential losses in connection with their acting as an agent of, or providing services to, the Company or its affiliates. The Company also indemnifies some clients against potential losses incurred in the event specified third-party service providers, including subcustodians and third-party brokers, improperly execute transactions. The maximum potential amount of future payments that the Company could be required to make under these indemnifications cannot be estimated. However, the Company believes that it is unlikely it will have to make material payments under these arrangements and has not recorded any contingent liability in the financial statements for these indemnifications.

The Company provides representations and warranties to counterparties in connection with a variety of commercial transactions and occasionally indemnifies them against potential losses caused by the breach of those representations and warranties. The Company may also provide standard indemnifications to some counterparties to protect them in the event additional taxes are owed or payments are withheld, due either to a change in or adverse application of certain tax laws. These indemnifications generally are standard contractual terms and are entered into in the normal course of business. The maximum potential amount of future payments that the Company could be required to make under these indemnifications cannot be estimated. However, the Company believes that it is unlikely it will have to make material payments under these arrangements and has not recorded any contingent liability in the financial statements for these indemnifications.

Note 4. Net Capital Requirements

The Company is subject to the Securities and Exchange Commission Uniform Net Capital Rule (SEC Rule 15c3-1), which requires the maintenance of a minimum amount of net capital and requires that the ratio of aggregate indebtedness to net capital, both as defined, shall not exceed 15 to 1. Rule 15c3-1 also provides that equity capital may not be withdrawn if the resulting net capital ratio would exceed 10 to 1. As of December 31, 2010, the Company had net capital of \$7,941,826, which was \$6,078,110 in excess of its required net capital of \$1,863,716. The Company's net capital ratio was 3.52 to 1.

Note 5. Related Party Transactions

The Company has a management agreement with an affiliated entity. Under the agreement, all normal administrative and overhead costs, including but not limited to salaries, rent, phone, postage, etc., will be paid by the affiliate. The Company pays the affiliate a portion of these costs monthly. The affiliate was paid management fees amounting to \$27,100,694 during the year ended December 31, 2010.

The Company has payables to affiliates of \$980,777 at December 31, 2010.

Forty-two of the Company's registered representatives are members of another affiliate that provides its members enhanced practice management, marketing, recruiting and succession planning consulting and access to financing for succession plan implementation and working capital for other growth strategies. The members of this affiliate have assigned a percent of their practices' commission and fee revenue earned through the Company to the affiliate which totaled \$1,116,375 for the year ended December 31, 2010.

Notes to Financial Statements

Note 6. Financial Instruments, Off-Balance Sheet Risks and Contingencies

Fair value of financial instruments: The Company's financial instruments including, cash, deposits, receivables, other assets, accounts payable and other liabilities are carried at amounts that approximate fair value due to the short-term nature of those instruments.

In the normal course of business, the Company's client activities through its clearing brokers involve the execution, settlement and financing of various client securities transactions. These activities may expose the Company to off-balance sheet risk. In the event a client fails to satisfy their obligations, the Company may be required to purchase or sell financial instruments at prevailing market prices in order to fulfill the client's obligations.

The Company bears the risk of financial failure by its clearing brokers. If the clearing brokers should cease doing business, the Company's receivables from the clearing brokers could be subject to forfeiture.

In the Company's trading activities, the Company has purchased securities for its own account and may incur losses if the market value of these securities decline subsequent to December 31, 2010. In addition, the Company has sold securities that it does not own and it will, therefore be obligated to purchase such securities at a future date. The Company has recorded this obligation in the financial statements at the December 31, 2010 market value of the securities, and may incur a loss if the market value of such securities increases subsequent to December 31, 2010.

The Company maintains its cash in bank deposit accounts which, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts and believes it is not exposed to any significant credit risk on cash and cash equivalents.

The Company is involved in litigation arising out of the normal course of business. In these matters, indeterminate amounts are sought. Management, after review and discussion with counsel, believes the Company has meritorious defenses and intends to vigorously defend itself in these matters, but it is not feasible to predict or determine the final outcome at the present.

Cambridge Investment Research, Inc.

Notes to Financial Statements

Note 7. Revolving Subordinated Loan

On July 20, 2010, the Company amended its previously approved revolving subordinated loan agreement to extend the scheduled draw termination date from September 1, 2010 to March 1, 2012 and to extend the scheduled maturity date from September 1, 2011 to March 1, 2013. The Company may borrow in up to two draws between July 20, 2010, the closing date, and March 1, 2012, a total of not more than \$6,000,000. During the number of months between the date of the draw and March 1, 2013, interest only payments are due on the principal amount outstanding. On March 1, 2013, all outstanding principal and any accrued and unpaid interest are due and payable.

Interest on borrowed amounts is either a base rate (defined as bank's prime rate or the fed funds rate plus 0.5%, whichever is greater) plus 3.00%, or one month LIBOR plus 5.00%. If one month LIBOR plus 5.00% is greater than the base rate plus 3.00%, then the applicable rate is one month LIBOR plus 5.00%. If one month LIBOR plus 5.00% is less than the base rate plus 3.00%, then the Company may choose either the base rate plus 3.00% or three month or six month LIBOR plus 5.00%. In the event the Company's total leverage ratio exceeds 1.25, the applicable interest rates increase by 0.25%.

The revolving loan carries an annual commitment fee of four tenths of one percent (0.40%) on the unused credit line, payable quarterly in arrears, during the period from the Closing Date until the Scheduled Draw Termination Date.

The amendment of the previously approved revolving subordinated loan agreement was accepted by the Financial Industry Regulatory Authority (FINRA) on August 20, 2010. The revolving loan is unsecured and was previously accepted by FINRA on September 21, 2009 as a satisfactory subordination agreement. As such, any amounts which are taken down in accordance with the agreement will be considered capital for the purpose of calculating the Company's net capital as defined under SEC Rule 15c3-1. There were no advances on the revolving loan for the year ended December 31, 2010 and no outstanding borrowings on the revolving loan as of December 31, 2010.

The loan is guaranteed by Cambridge Investment Group, Inc., the Company's parent, and by the following of its parent's other wholly owned subsidiaries: Eneric Petroleum Corp., Cambridge Investment Research Advisors, Inc., TBS Agency, Inc., and Continuity Management Group, L.L.C.

Cambridge Investment Research, Inc.

Schedule I. Computation of Net Capital Under Rule 15c3-1
December 31, 2010

**Schedule III. Information Relating to Possession or Control Requirements
Under Rule 15c3-3
December 31, 2010**

None. The Company is exempt from Rule 15c3-3 pursuant to the provisions of subparagraphs (k)(2)(i) and (k)(2)(ii) thereof.

Independent Auditor's Report on Internal Control

To the Board of Directors
Cambridge Investment Research, Inc.
Fairfield, Iowa

In planning and performing our audit of the financial statements of Cambridge Investment Research, Inc. (the "Company") as of and for the year ended December 31, 2010, in accordance with auditing standards generally accepted in the United States of America, we considered the Company's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Also, as required by Rule 17a-5(g)(1) of the Securities and Exchange Commission (SEC), we have made a study of the practices and procedures followed by the Company, including consideration of control activities for safeguarding securities. This study included tests of compliance with such practices and procedures that we considered relevant to the objectives stated in Rule 17a-5(g) in making the periodic computations of aggregate indebtedness and net capital under Rule 17a-3(a)(11) and for determining compliance with the exemptive provisions of Rule 15c3-3. Because the Company does not carry securities accounts for customers or perform custodial functions relating to customer securities, we did not review the practices and procedures followed by the Company in any of the following:

- (1) Making quarterly securities examinations, counts, verifications, and comparisons and recordation of differences required by Rule 17a-13
- (2) Complying with the requirements for prompt payment for securities under Section 8 of Federal Reserve Regulation T of the Board of Governors of the Federal Reserve System

In addition, as required by Regulation 1.16 of the Commodity Futures Trading Commission (CFTC), we have made a study of the practices and procedures followed by the Company, including consideration of control activities for safeguarding customer and firm assets. This study included tests of such practices and procedures that we considered relevant to the objectives stated in Regulation 1.16 in making the periodic computations of minimum financial requirements pursuant to Regulation 1.17. Because the Company does not carry customer accounts, we did not review the practices and procedures followed by the Company in any of the following:

- (1) The daily computations of the segregation requirements of Section 4d(a)(2) of the Commodity Exchange Act and the regulations thereunder, and the segregation of funds based on such computations
- (2) The daily computations of the foreign futures and foreign options secured amount requirements pursuant to Regulation 30.7 of the CFTC.

The management of the Company is responsible for establishing and maintaining internal control and the practices and procedures referred to in the preceding paragraphs. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of controls, and of the practices and procedures referred to in the preceding paragraphs, and to assess whether those practices and procedures can be expected to achieve the SEC's and the CFTC's above-mentioned objectives. Two of the objectives of internal control and the practices and procedures are to provide management with reasonable but not absolute assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in conformity with generally accepted accounting principles. Rule 17a-5(g) and Regulation 1.16(d)(2) list additional objectives of the practices and procedures listed in the preceding paragraphs.

Because of inherent limitations in internal control and the practices and procedures referred to above, error or fraud may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis.

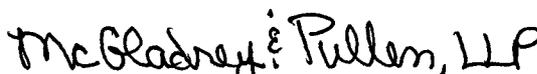

A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Company's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control was for the limited purpose described in the first, second and third paragraphs and was not designed to identify all deficiencies in internal control that might be material weaknesses and therefore, there can be no assurance that all material weaknesses have been identified. We did not identify any deficiencies in internal control and control activities for safeguarding securities that we consider to be material weaknesses, as defined above.

We understand that practices and procedures that accomplish the objectives referred to in the second and third paragraphs of this report are considered by the SEC and CFTC to be adequate for their purposes in accordance with the Securities Exchange Act of 1934, the Commodity Exchange Act, and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company's practices and procedures, as described in the second and third paragraphs of this report, were adequate at December 31, 2010, to meet the SEC's and CFTC's objectives.

This report is intended solely for the information and use of the Board of Directors, management, the SEC, the CFTC, the Financial Industry Regulatory Authority, and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 or Regulation 1.16 of the CFTC or both in their regulation of registered brokers and dealers and introducing brokers, and is not intended to be and should not be used by anyone other than these specified parties.
