<u>Asset</u>	<u>Useful Life</u>	<u>Estimated Principal Method</u>

NOTES TO FINANCIAL STATEMENT

(continued)

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Investment Advisory and Asset Management Income

Investment advisory and asset management fees are billed quarterly in advance and recognized on a pro-rata basis over the quarter to which they pertain.

Income Taxes

No provision for federal and state income taxes has been made for the Company, as it is a limited liability company and is not subject to income taxes. The Company's income or loss is reportable by its member on its tax returns. The Company has accrued its allocable share of New York City unincorporated business tax, which is paid at the parent's level.

The Company recognizes and measures its unrecognized tax benefits in accordance with ASC Topic 740, *Income Taxes*. Under that guidance the Company assesses the likelihood, based on their technical merit, that tax positions will be sustained upon examination based on the facts, circumstances and information available at the end of the period. The measurement of unrecognized tax benefits is adjusted when new information is available, or when an event occurs that requires a change.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fair Value Measurement – Definition and Hierarchy

Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, Fair Value Measurements and Disclosures establishes a framework for measuring fair value and expands disclosures about fair value measurements. ASC 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels explained below:

Level 1 Valuations based on quoted prices available in active markets for identical investments.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES (continued)

Fair Value Measurement – Definition and Hierarchy (continued)

Level 2 Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The availability of observable inputs can vary from instrument to instrument and is affected by a wide variety of factors. This includes the type of instrument, whether the instrument is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the instrument is reported in the lowest level that has a significant input. Even when inputs are not observable, the Company's own assumptions and methodologies are established to reflect those that market participants would use in pricing the asset or liability at the measurement date. In addition, during periods of market dislocation, the observability of inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified to a lower level within the fair value hierarchy.

NOTE 3. FAIR VALUE MEASUREMENTS

The Company's assets recorded at fair value are categorized below based upon a fair value hierarchy in accordance with (ASC) 820 at December 31, 2010. See Note 2 for a definition and discussion of the Company's policies regarding this hierarchy.

The Company held one, Level 1, security which had a fair value of \$2,903,884 as of December 31, 2010.
