This statement of financial condition is the responsibility of the Company's management. Our responsibility is to express an opinion on this statement of financial condition based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the statement of financial condition is free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the statement of financial condition, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall statement of financial condition presentation. We believe that our audit of the statement of financial condition provides a reasonable basis for our opinion.

In our opinion, the statement of financial condition referred to above presents fairly, in all material respects, the financial position of Blaylock Robert Van, LLC as of December 31, 2010, in conformity with accounting principles generally accepted in the United States of America.

BLAYLOCK ROBERT VAN, LLC

NOTES TO FINANCIAL STATEMENT

1. Nature of business and summary of significant accounting policies

Nature of Business

Blaylock Robert Van, LLC (the "Company") is a limited liability company organized under the laws of the state of California on March 26, 2007. The Company was approved as a broker-dealer by the Securities and Exchange Commission (the "SEC") and the Financial Industry Regulatory Authority ("FINRA") on December 21, 2007, and commenced operations on January 1, 2008. The Company was formed as the result of a merger between Blaylock & Company, Inc. ("B&Co") and Robert Van Securities, Inc. ("RVSI"), both were registered broker dealers with the SEC and FINRA. The Company's operations consist of distributing and underwriting equity and taxable fixed-income securities to institutional investors, with expertise in mortgage-backed, asset-backed, government agency, corporate and equity securities. Additional sources of revenue come from commissions from agency transactions in equity securities.

Basis of Presentation

The accompanying financial statements are presented in U.S. Dollars and have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP").

These financial statements were approved by management and available for issuance on February 28, 2011. Subsequent events have been evaluated through this date.

Cash and Cash Equivalents

The Company considers money market accounts maintained at financial institutions to be cash equivalents.

Receivables from Clearing Brokers

The Company has clearing agreements with Pershing LLC and Goldman Sachs Execution & Clearing, L.P. (collectively referred to as the "Clearing Brokers"). These Clearing Brokers clear all of the Company's security transactions for the Company. The Company is required to maintain certain deposit levels with these Clearing Brokers. Amounts due from brokers may be restricted to the extent that they serve as deposits for securities sold short.

Valuation of Securities Owned and Securities Sold, Not Yet Purchased, at Fair Value - Definition and Hierarchy

In accordance with GAAP, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (i.e., the "exit price") in an orderly transaction between market participants at the measurement date.

In determining fair value, the Company uses various valuation approaches. In accordance with GAAP, fair value hierarchy for inputs is used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Company. Unobservable inputs reflect the Company's assumptions about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

BLAYLOCK ROBERT VAN, LLC

NOTES TO FINANCIAL STATEMENT

1. Nature of business and summary of significant accounting policies (continued)

The fair value hierarchy is categorized into three levels based on the inputs as follows:

Level 1 - Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Valuation adjustments and block discounts are not applied to Level 1 securities. Since valuations are based on quoted prices that are readily and regularly available in an active market, valuation of these securities does not entail a significant degree of judgment.

Level 2 - Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement.

The availability of valuation techniques and observable inputs can vary from security to security and is affected by a wide variety of factors including, the type of security, whether the security is new and not yet established in the marketplace, and other characteristics particular to the transaction. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Those estimated values do not necessarily represent the amounts that may be ultimately realized due to the occurrence of future circumstances that cannot be reasonably determined. Because of the inherent uncertainty of valuation, those estimated values may be materially higher or lower than the values that would have been used had a ready market for the securities existed. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for securities categorized in Level 3. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement in its entirety falls, is determined based on the lowest level input that is significant to the fair value measurement.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. The Company uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

Valuation Techniques

The Company values securities owned and securities sold, not yet purchased, that are freely tradable and are listed on a national securities exchange or reported on the NASDAQ national market at their last sales price as of the last business day of the year.

Investment in Private Partnership

Investment in private partnership is valued based on the pro-rata share in the equity of private partnership. Investment in private partnership is included in Level 3 of the fair value hierarchy.

Commissions Revenue and Related Expenses

Commissions revenue and the related expenses on securities transactions are recorded on a trade-date basis. The Company may enter into principal securities transactions whereby the Company purchases securities and then sells them to customers on a net basis.

Income Taxes

The Company is a limited liability company, and treated as a disregarded entity for income tax reporting purposes. The Internal Revenue Code ("IRC") provides that any income or loss is passed through to the members for federal and state income tax purposes. Accordingly, the Company has not provided for federal or state income taxes.

At December 31, 2010, management has determined that the Company had no uncertain tax positions that would require financial statement recognition. Actual results could differ from those estimates.
