INDEPENDENT AUDITOR'S REPORT

Board of Directors
Arthur W. Wood Company, Inc. and Subsidiary
Boston, Massachusetts

I have audited the accompanying consolidated statement of financial condition of Arthur W. Wood Company, Inc. and Subsidiary (the Company) as of December 31, 2011. This statement of financial condition is the responsibility of the Company's management. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted my audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, I express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statements presentation. I believe that my audit provides a reasonable basis for my opinion.

In my opinion, the consolidated statement of financial condition referred to above present fairly, in all material respects, the financial position of Arthur W. Wood Company, Inc. and Subsidiary as of December 31, 2011, in conformity with accounting principles generally accepted in the United States of America.

The framework provides a value hierarchy that prioritizes the inputs to valuation techniques used to measure value. Fair value is the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset occurs in the principal market or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach, as specified by FASB ASC 820, are used to measure value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 inputs unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.

Level 2 inputs are inputs (other than quoted prices included within level 1) that are observable for the asset either directly or indirectly.

Level 3 are unobservable inputs and rely on managements own assumptions about the assumptions that market participants would use in pricing the asset.

The following table sets forth by level, within the fair value hierarchy, at fair value as of December 31, 2011.

	Level 1	Level 2	Level 3
Securities – not readily marketable	<u>\$ -0-</u>	<u>\$ -0-</u>	<u>\$ 1,500</u>
