**Report of Independent Registered Public Accounting Firm**

To the member of JMP Securities LLC:

In our opinion, the accompanying statement of financial condition presents fairly, in all material respects, the financial position of JMP Securities LLC (the "Company") at December 31, 2011, in conformity with accounting principles generally accepted in the United States of America. This financial statement is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement based on our audit. We conducted our audit of this statement in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

# **JMP Securities LLC**

## **Notes to Financial Statements**

### **December 31, 2011**

---

#### **1. Organization and Description of Business**

JMP Securities LLC (the "Company"), a wholly-owned subsidiary of JMP Group Inc. (the "Parent"), is a broker-dealer registered with the Securities and Exchange Commission ("SEC") and is a member of the Financial Industry Regulatory Authority ("FINRA"). The Company operates as an introducing broker and does not hold funds or securities for customers, does not owe any money or securities to customers, and does not carry customer accounts. All customer transactions are cleared through another broker-dealer on a fully-disclosed basis.

#### **2. Summary of Significant Accounting Policies**

##### **Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions that affect both the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

##### **Fair Value of Financial Instruments**

Substantially all of the Company's financial instruments are recorded at fair value or amounts that approximate fair value. Marketable securities owned, Other investments, and Marketable securities sold, but not yet purchased, are stated at fair value, with related changes in unrealized appreciation or depreciation reflected in the Company's earnings.

The Company adopted amended accounting principles related to fair value measurements as of January 1, 2008. This standard establishes a consistent framework for measuring fair value in accordance with generally accepted accounting principles ("GAAP") and expands disclosures with respect to fair value measurements. The amendment applies to all financial instruments that are being measured and reported on a fair value basis. This includes those items currently reported in marketable securities owned, at fair value, other investments and marketable securities sold, not yet purchased, at fair value on the Statement of Financial Condition. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. See Note 5 of the Notes to the Financial Statements for the disclosures related to the fair value of the Company's marketable securities and other investments.

Fair value of the Company's financial instruments is generally obtained from quoted market prices, broker or dealer price quotations, or alternative pricing methodologies that the Company believes offer reasonable levels of price transparency. Valuations obtained from broker or dealer price quotations are considered reflective of executable prices. Data obtained from multiple sources are compared for consistency and reasonableness. To the extent that certain financial instruments trade infrequently or are nonmarketable securities and, therefore, do not have readily determinable fair values, the Company estimates the fair value of these instruments using various pricing models and the information available to the Company that it deems most relevant. Among the factors considered by the Company in determining the fair value of financial instruments are discounted anticipated cash flows, the cost, terms and liquidity of the instrument, the financial condition, operating results and credit ratings of the issuer or underlying company, the quoted market price of publicly traded securities with similar duration and yield, the Black-Scholes Options Valuation methodology and other factors generally pertinent to the valuation of financial instruments.

# **JMP Securities LLC**

## **Notes to Financial Statements**

### **December 31, 2011**

---

Marketable securities owned and securities sold, but not yet purchased, consist of U.S. listed and OTC equity securities and quasi-government agency securities whose value is determined based on quoted market prices.

Other investments primarily consist of investments in warrants on public and private common stock. The warrants on public and private common stock are generally received as a result of investment banking transactions and are valued at estimated fair value as determined by management. Warrants owned are valued at the date of issuance and marked-to-market as of each reporting period. Estimated fair value is generally determined using the Black-Scholes Options Valuation methodology.

#### **Cash and Cash Equivalents**

The Company considers highly liquid investments with original maturities of three months or less to be cash equivalents. The Company holds cash in financial institutions in excess of FDIC insured limits. The Company periodically reviews the financial condition of the institutions and assesses the credit risk.

#### **Restricted Cash and Deposits**

Restricted cash consists of proceeds from short sales on deposit with brokers that cannot be removed unless the securities are delivered. Deposits consist of cash on deposit with the Company's clearing broker. At December 31, 2011, the Company had \$10,920,879 of restricted cash and \$255,336 of cash on deposit with its clearing broker.

#### **Investment Banking Fees Receivable**

Investment banking fees receivable include receivables relating to the Company's investment banking or advisory engagements. The Company records an allowance for doubtful accounts on these receivables on a specific identification basis. Investment banking fees receivable which are deemed to be uncollectible are charged off and the charged-off is deducted from the allowance. There were no activities in the allowance for doubtful account during the year ended December 31, 2011.

#### **Receivable From Clearing Broker and Other Broker-Dealers**

The Company clears customer transactions through another broker-dealer on a fully disclosed basis. Included in receivables are commissions related to securities transactions generated in December 2011 and paid in January 2012, net of clearing costs.

#### **Due From/to Affiliates**

Due from affiliates includes receivables from the Parent and other affiliates for certain operating expenses paid on their behalf. Due to affiliates mainly consists of payables to the Parent for rent and depreciation expenses as well as interest on the subordinated borrowing described in Note 6. Due from / to affiliates balances are settled through intercompany accounts.

#### **Income Taxes**

The Company is a single member limited liability company, which is treated as a disregarded entity for federal income tax purposes. As a result, the Company is effectively treated as a division of the Parent for federal income tax purposes. All tax liabilities or receivables accrued by the Company are settled by way of capital contributions or distributions from/to the Parent.

# **JMP Securities LLC**

## **Notes to Financial Statements**

### **December 31, 2011**

---

The Company adopted the accounting principles related to uncertainty in income taxes on May 16, 2007, the date the Parent became subject to federal and state income taxes. Its adoption did not have a material impact on the Company's financial condition or results of operations. Under the guidance, the Company recognizes a tax benefit from an uncertain position only if it is more likely than not that the position is sustainable, based solely on its technical merits and consideration of the relevant taxing authorities widely understood administrative practices and precedents. If this threshold is met, the Company measures the tax benefit as the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement.

The Company has analyzed its tax positions for all open tax years and does not anticipate any tax adjustments that will result in a material adverse effect on the Company's financial condition, results of operations, or cash flow. Therefore, the Company has not recorded any liabilities for uncertain income tax positions as of December 31, 2011.

### **3. Advances and Distributions From/to Parent**

For the year ended December 31, 2011, the Company recorded net advances from the Parent of \$1,938,377 which consists of cash distributions of \$1,214,613 and the settlement of the current year tax benefits of \$1,810,221 discussed in Note 2 above, offset by advances from the Parent of \$4,963,211 related to stock-compensation awards granted by the Parent to the employees of the Company.

### **4. Recent Accounting Pronouncements**

ASU 2011-04: Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in GAAP and IFRS. The adoption of ASU 2011-04 gives fair value the same meaning between GAAP and International Financial Reporting Standards (IFRS), and improves consistency of disclosures relating to fair value. As a result of this standard, an entity is required to add more robust disclosures regarding the sensitivity of fair value measurements categorized within Level 3 of the fair value hierarchy. The standard is effective for interim periods beginning after December 15, 2011. The adoption of ASU 2011-04 is expected to result in additional disclosures within the Company's financial statements.

### **5. Financial Instruments**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various methods including market, income and cost approaches. Based on these approaches, the Company often utilizes certain assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and or the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable firm inputs. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Based on the observability of the inputs used in the valuation techniques, the Company provides the following information according to the fair value hierarchy. The fair value hierarchy ranks the quality and reliability of the information used to determine fair values. Financial instrument assets and liabilities carried at fair value have been classified and disclosed in one of the following three categories:

Level 1 Quoted market prices in active markets for identical assets or liabilities.

**JMP Securities LLC**  
**Notes to Financial Statements**  
**December 31, 2011**

Level 2 Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3 Unobservable inputs that are not corroborated by market data.

Level 1 primarily consists of financial instruments whose value is based on quoted market prices such as U.S. listed and OTC equity securities, as well as quasi-government agency securities, all of which are carried at fair value.

Level 2 includes those financial instruments that are valued using models or other valuation methodologies. These models are primarily industry-standard models that consider various assumptions, including discounted anticipated cash flows, the cost, terms and liquidity of the instrument, the financial condition, operating results and credit ratings of the issuer or underlying company, the quoted market price of publicly traded securities with similar duration and yield, time value, yield curve, prepayment speeds, default rates, loss severity, as well as other measurements. Substantially all of these assumptions are observable in the marketplace, can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace. The Company did not own any Level 2 financial instruments at December 31, 2011.

Level 3 is comprised of financial instruments whose fair value is estimated based on internally developed models or methodologies utilizing significant inputs that are generally less readily observable from objective sources. A description of the valuation techniques utilized for the fair value of the financial instruments in this category is as follows:

- Warrants: determined by the Company using the Black-Scholes Options Valuation model.

The following tables provide fair value information related to the Company's financial assets and liabilities at December 31, 2011:

<b>Assets at Fair Value as of December 31, 2011</b>				
	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
<b>Financial instruments owned, at fair value</b>				
Marketable securities owned				
Equity securities	<u>\$ 20,057,916</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 20,057,916</u>
Other investments				
Private equity securities	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 2,605</u>	<u>\$ 2,605</u>
Warrants			<u>614,164</u>	<u>614,164</u>
	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 616,769</u>	<u>\$ 616,769</u>
<b>Liabilities at Fair Value as of December 31, 2011</b>				
	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
<b>Financial instruments sold, but not yet purchased, at fair value</b>				
Marketable securities sold, but not yet purchased	<u>\$ 10,920,879</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 10,920,879</u>

**JMP Securities LLC**  
**Notes to Financial Statements**  
**December 31, 2011**

The following tables provide a reconciliation of the beginning and ending balances for the assets at fair value using significant unobservable inputs (Level 3) for the year ended December 31, 2011:

	Balances of December 31, 2010	Purchases	Sales	Total Gains and (Losses) (Realized and Unrealized)	Transfers In (Out) of Level 3	Balance as of December 31, 2011	Unrealized Gains and (Losses) Included in Earnings Related to Assets Still Held at Reporting Date
Limited partner investment in private equity fund	\$ 3,063,476	\$ -	\$ (3,063,476)	\$ -	\$ -	\$ -	\$ -
Private equity securities	-	2,605	-	-	-	2,605	-
Warrants	<u>532,199</u>	<u>14,688</u>	-	<u>67,277</u>	-	<u>614,164</u>	<u>67,277</u>
Total Level 3	<u>\$ 3,595,675</u>	<u>\$ 17,293</u>	<u>\$ (3,063,476)</u>	<u>\$ 67,277</u>	<u>\$ -</u>	<u>\$ 616,769</u>	<u>\$ 67,277</u>

Total gains and losses represent the total gains and/or losses (realized and unrealized) recorded for the Level 3 assets.

Purchases/sales represent the net amount of Level 3 assets that were either purchased or sold during the period. The amounts were recorded at fair value at the date of the transaction. The Company's limited partner investment in a private equity fund was sold to the parent in 2011 at fair value on the date of sale with no resulting gain or loss.

Transfers between levels of the fair value hierarchy result from changes in the observability of fair value inputs used in determining fair values for different types of financial assets and are recognized at the beginning of the reporting period in which the event or change in circumstances that caused the transfer occurs.

There were no transfers in/out of Level 1 or Level 2 during the year ended December 31, 2011.

In addition, there were no transfers in/out of Level 3 during the year ended December 31, 2011.

**6. Liabilities Subordinated to Claims of General Creditors**

Borrowings under subordination agreements as of December 31, 2011, consisted of the following:

JMP Group LLC	
Interest at 20% matures on January 31, 2012	\$ 4,000,000
JMP Group LLC	
Interest at 20% matures on July 31, 2012	5,000,000
JMP Group LLC	
Interest at 20% matures on September 30, 2012	2,500,000
JMP Group LLC	
Interest at 20% matures on October 31, 2012	2,500,000
JMP Group LLC	
Interest at 20% matures on October 31, 2012	<u>1,000,000</u>
	<u>\$ 15,000,000</u>

The amendment extending the maturity date of the above referenced agreement from January 31, 2011 was approved and accepted by the FINRA.

**JMP Securities LLC**  
**Notes to Financial Statements**  
**December 31, 2011**

---

Liabilities subordinated to claims of general creditors are covered by agreements approved by the FINRA and qualify as equity capital in computing net capital under the SEC's Uniform Net Capital Rule ("Rule 15c3-1"). To the extent that the subordinated liability is required for the Company's continued compliance with minimum net capital requirements, it may not be repaid.

**7. Related Party Transactions**

During the year ended December 31, 2011, the Company paid certain operating expenses on behalf of the Parent and other affiliates. The Parent paid certain operating expenses on behalf of the Company. All amounts are settled through intercompany accounts.

The Parent has agreed to continue to provide the financial support to finance the Company's operations.

**8. Commitments and Contingencies**

On April 8, 2011, the Company entered into a \$20.0 million revolving line of credit with City National Bank to be used for regulatory capital purposes during its securities underwriting activities. Draws on the revolving line of credit bear interest at the rate of prime and are available through April 8, 2012 on which date, if there is an existing outstanding amount, it converts to a loan that matures on April 8, 2013. There was no borrowing on this line of credit as of December 31, 2011.

In connection with its underwriting activities, the Company enters into firm commitments for the purchase of securities in return for a fee. These commitments require the Company to purchase securities at a specified price. Securities underwriting exposes the Company to market and credit risk, primarily in the event that, for any reason, securities purchased by the Company cannot be distributed at anticipated price levels. At December 31, 2011, the Company had no open underwriting commitments.

The securities owned are on deposit with the clearing broker and, together with the cash held by the clearing broker, may be used to maintain margin requirements. Furthermore, the securities owned may be hypothecated or borrowed by the clearing broker.

**9. Litigation**

The Company is involved in a number of judicial, regulatory and arbitration matters arising in connection with our business. The outcome of matters the Company has been and currently is involved in cannot be determined at this time, and the results cannot be predicted with certainty. There can be no assurance that these matters will not have a material adverse effect on our results of operations in any future period and a significant judgment could have a material adverse impact on our financial condition, results of operations and cash flows. The Company may in the future become involved in additional litigation in the ordinary course of our business, including litigation that could be material to our business.

The Company reviews the need for any loss contingency reserves and establish reserves when, in the opinion of management, it is probable that a matter would result in liability and the amount of loss, if any, can be reasonably estimated. The Company was named as a defendant in purported securities class action complaints with respect to a company for which the Company served as an underwriter in a public offering, and recorded an accrual based on its portion of the estimated legal expenses. A loss contingency has not been booked as a range of loss cannot be reasonably estimated at this time. Generally, given the inherent difficulty of predicting the outcome of matters

**JMP Securities LLC**  
**Notes to Financial Statements**  
**December 31, 2011**

---

the Company is involved in, particularly cases in which claimants seek substantial or indeterminate damages, it is not possible to determine whether a liability has been incurred or to reasonably estimate the ultimate or minimum amount of that liability until the case is close to resolution. For these matters, no reserve is established until such time, other than for reasonably estimable legal fees and expenses. Management, after consultation with legal counsel, believes that the currently known actions or threats will not result in any material adverse effect on the Company's financial condition, results of operations or cash flows.

**10. Regulatory Requirements**

The Company is subject to Rule 15c3-1, which requires the maintenance of minimum net capital, as defined, and requires that the ratio of aggregate indebtedness to net capital, both as defined, shall not exceed 15 to 1. At December 31, 2011, the Company had net capital of \$38,013,476, which was \$37,013,476 in excess of its required net capital of \$1,000,000. The Company's ratio of aggregate indebtedness to net capital was 0.26 to 1.

All customer transactions are cleared through another broker-dealer on a fully disclosed basis. Therefore, the Company is not required to maintain a separate bank account for the exclusive benefit of customers or to segregate customer securities in accordance with Rule 15c3-3 of the SEC.

**11. Guarantees**

The Company has agreed to indemnify its clearing broker for losses that the clearing broker may sustain from the customer accounts introduced by the Company. Should a customer not fulfill its obligation on a transaction, the Company may be required to buy or sell securities at prevailing market prices in the future on behalf of its customer. The Company's obligation under the indemnification has no maximum amount. All unsettled trades at December 31, 2011 have settled with no resulting liability to the Company. During 2011, the Company did not have a loss due to counterparty failure, and has no obligations outstanding under the indemnification as of December 31, 2011.

The Company is engaged in various investment banking and brokerage activities whose counterparties primarily include broker-dealers, banks and other financial institutions. In the event counterparties do not fulfill their obligations, the Company may be exposed to risk. The risk of default depends on the creditworthiness of the counterparty or issuer of the instrument. It is the Company's policy to review, as necessary, the credit standing of each counterparty with which it conducts business.

**12. Financial Instruments With Off-balance Sheet Risk, Credit Risk or Market Risk**

The majority of the Company's transactions, and consequently the concentration of its credit exposure, is with its clearing broker, J.P. Morgan Clearing Corp. We changed our clearing broker from Penson Financial Services Inc. to J.P. Morgan Clearing Corp. effective February 23, 2011. The clearing broker is also the primary source of short-term financing for the Company, which is collateralized by cash and securities owned by the Company and held by the clearing broker. The Company's securities owned may be pledged by the clearing broker. The amount receivable from the clearing broker represents amounts receivable in connection with the trading of proprietary positions and commissions earned from customer transactions. As of December 31, 2011 the Company's cash on deposit with the clearing broker was not collateralizing any liabilities to the clearing broker.

**JMP Securities LLC**  
**Notes to Financial Statements**  
**December 31, 2011**

---

In addition to the clearing broker, the Company is exposed to credit risk from other brokers, dealers and other financial institutions with which it transacts business. In the event counterparties do not fulfill their obligations, the Company may be exposed to credit risk.

The Company's trading activities include providing securities brokerage services to institutional clients. To facilitate these customer transactions, the Company purchases proprietary securities positions ("long positions") in equity securities. The Company also enters into transactions to sell securities not yet purchased ("short positions"), which are recorded as liabilities on the statement of financial condition. The Company is exposed to market risk on these long and short securities positions as a result of decreases in market value of long positions and increases in market value of short positions. Short positions create a liability to purchase the security in the market at prevailing prices. Such transactions result in off-balance sheet market risk as the Company's ultimate obligation to satisfy the sale of securities sold, not yet purchased may exceed the amount recorded in the Statement of Financial Condition. To mitigate the risk of losses, these securities positions are marked to market daily and are monitored by management to assure compliance with limits established by the Company.

**13. Subsequent Events**

The Company has performed an evaluation of subsequent events through February 27, 2012, which is the date the financial statements were issued.
