#### INDEPENDENT AUDITORS' REPORT

To the Board of Directors Gary Goldberg & Co., Inc.

We have audited the accompanying statement of financial condition of Gary Goldberg & Co., Inc. as of July 31, 2012, and the related statements of income, changes in stockholder's equity (deficiency), changes in liabilities subordinated to claims of general creditors, and cash flows for the year then ended that are filed pursuant to Rule 17a-5 under the Securities Exchange Act of 1934. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

As disclosed in Note 4 to the financial statements, the Company has excluded the effects of consolidation of its wholly-owned subsidiaries, Gary Goldberg Planning Services, Inc. and Gary Goldberg Advisory Services, Inc. Generally accepted accounting principles require that a wholly-owned subsidiary be presented on a consolidated basis with that of the parent company. As disclosed in Note 15 to the financial statements, generally accepted accounting principles require that certain entities under common control be consolidated by the Company. The Company has not consolidated an entity that meets the criteria for consolidation. The effects of these departures from generally accepted accounting principles on the financial position, results of operations, and cash flows of the Company are not reasonably determinable.

In our opinion, except for the effects of not consolidating certain entities, as discussed in the preceding paragraph, the financial statements referred to above present fairly, in all material respects, the financial position of Gary Goldberg & Co., Inc. as of July 31, 2012 and the results of its operations and its cash flows for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Our audit was conducted for the purpose of forming an opinion on the financial statements as a whole. The supplementary information contained in Schedules I and II required by Rule 17a-5 under the Securities Exchange Act of 1934 is presented for purposes of additional analysis and is not a required part of the financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The information has been subjected to the auditing procedures applied in the audit of the financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the financial statements as a whole.

#### **Revenue Recognition**

Commission income received from a clearing organization from the sale of mutual fund shares is recorded on a settlement date basis. Commissions derived from the marketing of insurance investments and annuity investments are recorded on a trade date basis.

#### 13 - REGULATORY REQUIREMENTS

The Company earned commission revenue on sales from three annuity products offered by three major insurance providers, which accounted for 61%, 14% and 13% of sales for the year ended July 31, 2012. Related commissions receivable totaled \$127,806 at July 31, 2012.

#### 15 - CONSOLIDATION OF VARIABLE INTEREST ENTITIES

Under certain conditions, generally accepted accounting principles require the consolidation of entities where the usual condition (ownership of a majority voting interest) of consolidation does not apply. If a controlling financial interest exists through arrangements that do not involve voting interests, a company may have exposure (variable interest) to the economic risks and potential rewards from the activities of variable interest entities ("VIE"). If a company holds a majority of the variable interests of another entity, it is considered the primary beneficiary, and consolidation of the VIE is required.

Under the above guidelines, the Company has control over an entity that is considered to be a VIE. The entity owns real estate, a significant portion of which is leased to the Company and to GGPS. The Company is considered to be the primary beneficiary of the activities of this entity.

#### NOTES TO FINANCIAL STATEMENTS

# 15 - CONSOLIDATION OF VARIABLE INTEREST ENTITIES (Continued)

The Company has not consolidated the VIE, which represents a departure from generally accepted accounting principles. The effects of this departure from generally accepted accounting principles on the financial position, results of operations, and cash flows of the Company are not reasonably determinable.

# INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL STRUCTURE REQUIRED BY RULE 17a-5 OF THE SECURITIES AND EXCHANGE COMMISSION

To the Board of Directors Gary Goldberg & Co., Inc.

In planning and performing our audit of the financial statements of Gary Goldberg & Co., Inc. (the "Company"), as of and for the year ended July 31, 2012 in accordance with auditing standards generally accepted in the United States of America, we considered the Company's internal control over financial reporting (internal control) as a basis for designing our audit procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we do not express an opinion on the effectiveness of the Company's internal control.

Also, as required by Rule 17a-5(g)(1) of the Securities and Exchange Commission ("SEC"), we have made a study of the practices and procedures followed by the Company including consideration of control activities for safeguarding securities. This study included tests of such practices and procedures that we considered relevant to the objectives stated in Rule 17a-5(g) in making the periodic computations of aggregate indebtedness (or aggregate debits) and net capital under Rule 17a-3(a)(11) and for determining compliance with the exemptive provisions of Rule 15c3-3. Because the Company does not carry securities accounts for customers or perform custodial functions relating to customer securities, we did not review the practices and procedures followed by the Company in any of the following:

- 1. Making quarterly securities examinations, counts, verifications, and comparisons and recordation of differences required by Rule 17a-13.
- 2. Complying with the requirements for prompt payment for securities under Section 8 of Federal Reserve Regulation T of the Board of Governors of the Federal Reserve System.

The management of the Company is responsible for establishing and maintaining an internal control structure and the practices and procedures referred to in the preceding paragraph. In fulfilling this responsibility, estimates and judgments by management are required to assess the expected benefits and related costs of controls, and of the practices and procedures referred to in the preceding paragraph, and to assess whether those practices and procedures can be expected to achieve the SEC's above-mentioned objectives. Two of the objectives of internal control and the practices and procedures are to provide management with reasonable but not absolute assurance that assets for which the Company has responsibility are safeguarded against loss from unauthorized use or disposition, and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in conformity with generally accepted accounting principles. Rule 17a-5(g) lists additional objectives of the practices and procedures listed in the preceding paragraph.

Because of inherent limitations in internal control or the practices and procedures referred to above, errors or fraud may occur and not be detected. Also, projection of any evaluation of them to future periods is subject to the risk that they may become inadequate because of changes in conditions or that the effectiveness of their design and operation may deteriorate.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Company's financial statements will not be prevented or detected and corrected on a timely basis.

Our consideration of internal control was for the limited purpose described in the first and second paragraphs and would not necessarily identify all deficiencies in internal control that might be material weaknesses. However, we identified the following deficiency in internal control that we consider to be a material weakness, as defined above. The Company failed to record current income tax expense on a monthly basis which resulted in a decrease in net income of \$254,446 for the year ended July 31, 2012 and a material audit adjustment on the Company's year end focus filing. These conditions were considered in determining the nature, timing and extent of the procedures performed in our audit of the financial statements of the Company as of and for the year ended July 31, 2012 and this report does not affect our report thereon dated September 25, 2012.

We understand that practices and procedures that accomplish the objectives referred to in the second paragraph of this report are considered by the SEC to be adequate for its purposes in accordance with the Securities Exchange Act of 1934 and related regulations, and that practices and procedures that do not accomplish such objectives in all material respects indicate a material inadequacy for such purposes. Based on this understanding and on our study, we believe that the Company's practices and procedures, as described in the second paragraph of this report, were adequate at July 31, 2012, to meet the SEC's objectives.

This report is intended solely for the information and use of management, the SEC, the Financial Industry Regulatory Authority, Inc. and other regulatory agencies that rely on Rule 17a-5(g) under the Securities Exchange Act of 1934 in their regulation of registered brokers and dealers, and is not intended to be and should not be used by anyone other than these specified parties.
