Annual Report 2012

Letter to Shareholders

Dear Fellow Shareholders,

For Lexington Realty Trust, 2012 proved to be another very successful year. We continued to meet or exceed business plan objectives by raising occupancy, recycling capital through dispositions, reducing and refinancing debt and funding new growth initiatives. These achievements led to an increase of 20% in our quarterly common share dividend paid on October 15, 2012.

Our shares performed well as the economy slowly improved. Capital markets were favorable and investor interest in fixed income and equity investments with attractive dividends was exceptionally strong. Our total return (including reinvestment of dividends) on our common shares was 48% for the year, the highest of any net-lease REIT. This was a great result for our shareholders that reflected the numerous successes we achieved in the following areas:

- *Leasing.* We executed new and renewal leases totaling a record of approximately 7.4 million square feet and increased overall portfolio occupancy from 95.9% to 97.3%.

- *Debt Reduction and Refinancing.* We (1) reduced our debt and preferred stock from 49.7% to 46.8% of our gross assets and (2) obtained \$376 million of new fixed-rate financing at a weighted-average rate of 3.8% and retired \$472 million of debt and preferred stock with a weighted-average cost of 5.7%.

- *Capital Recycling.* We monetized properties for an aggregate price of approximately \$181 million and a weighted-average capitalization rate of 7.2%. Sale proceeds were primarily used to fund new investments and retire debt.

- *Investments.* We invested \$247 million in new investments, which helped extend our weighted-average lease term from 6.2 to 7.1 years. The weighted-average initial capitalization rate on these investments was approximately 8.4%.

- *Dividend Growth.* We increased our quarterly common share dividend rate by 20% from \$0.125 per share to \$0.15 per share beginning with the dividend paid on October 15, 2012, or \$0.50 per share to \$0.60 per share on an annualized basis.

Our two, three and four year total returns (including reinvestment of dividends) were 48%, 105% and 197%, respectively. We believe that this strong period of outperformance reflects the actions we have taken to strengthen our balance sheet, refine and focus our investment and portfolio strategies and improve our long-term growth prospects.

So far, we believe 2013 has been a good year. Through March 8, 2013, our common share price increased by 15%. We believe that we have viable strategies and opportunities to continue generating total returns that are attractive relative to other REITs, equity investments and fixed income alternatives.

As we look ahead, we are excited by the opportunities we have to build an even better company. As part of our continuing efforts to create shareholder value in 2013, we expect to:

- *Extend debt maturities and refinance on advantageous terms.* We intend to continue extending our debt maturities by refinancing in the current attractive interest rate environment. In the first quarter of 2013, we refinanced our secured credit facility with a \$550 million unsecured credit facility providing for term and revolving loans. We drew on this facility to retire \$138 million of mortgage debt which had a weighted-average interest rate of 5.3%. With \$641 million of debt maturing through 2015, we believe that substantial refinancing opportunities are still available.

- *Dispose of non-core assets.* We expect to continue to dispose of non-core and underperforming assets, including retail, multi-tenant and vacant properties. While we have disposed of a substantial portion of these non-core and underperforming assets since 2007, we are extremely sensitive to price. As a result, we continue to proceed methodically through this process to maximize value.

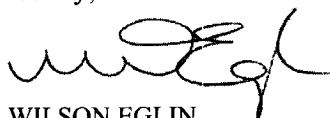

- *Increase occupancy and extend our portfolio weighted-average lease term.* Through March 8, 2013, we signed new and renewal leases for approximately 0.4 million square feet, which reduced our lease rollover in 2013 to just approximately 3.0% of our single-tenant revenue. We continue to have great success with respect to releasing our vacancies, maintaining high levels of occupancy and extending our portfolio weighted-average lease term. However, we expect a modest roll down in rental rates for lease renewals in 2013.

- *Acquire new, long-term single-tenant investments.* In addition to acquiring properties and structuring sale/leaseback transactions, we have continued to provide construction financing and take-out financing for build-to-suit transactions. We believe we are a market leader in the single-tenant area and, as of March 8, 2013, we had approximately \$265 million of new potential investments under letter of intent or contract. We anticipate that our acquisition volume will increase over the course of the year. We expect the new acquisitions to improve the overall quality of our portfolio, extend our weighted-average lease term and add to the cash flow that supports our dividend. We recently raised approximately \$258 million of growth capital and are well positioned to act on accretive investment opportunities.

In the past year, we have made meaningful progress towards simplifying our structure, adding long-term net-lease assets to our portfolio, selling non-core properties, strengthening our balance sheet and lowering our cost of capital. We believe these steps have created substantial shareholder value and improved our valuation. As always, we intend to execute our business plan with the goal of steady and dependable dividend growth for our shareholders. We believe that dividend yield and growth will continue to be meaningful components of total return in what continues to be an environment of low investment yields.

I would like to thank our shareholders for their continued support, our employees for another year of hard work and success and our tenants for the opportunity to meet their occupancy needs.

Sincerely,

T. WILSON EGLIN
Chief Executive Officer, President and a Trustee

PART I.

Introduction

When we use the terms “Lexington,” the “Company,” “we,” “us” and “our,” we mean Lexington Realty Trust and all entities owned by us, including non-consolidated entities, except where it is clear that the term means only the parent company or only the parent company and consolidated entities. All interests in properties are held through special purpose entities, which we refer to as property owner subsidiaries or lender subsidiaries, which are separate and distinct legal entities, but in some instances are consolidated for financial statement purposes and/or disregarded for income tax purposes.

References herein to this Annual Report are to this Annual Report on Form 10-K for the fiscal year ended December 31, 2012. When we use the term “REIT” we mean real estate investment trust. All references to 2012, 2011 and 2010 refer to our fiscal years ended, or the dates, as the context requires, December 31, 2012, December 31, 2011 and December 31, 2010, respectively.

Management of our interests in properties is generally conducted through Lexington Realty Advisors, Inc., a taxable REIT subsidiary, which we refer to as LRA, or through a property management joint venture subsidiary.

When we use the term “GAAP” we mean United States generally accepted accounting principles.

Cautionary Statements Concerning Forward-Looking Statements

This Annual Report, together with other statements and information publicly disseminated by us contain certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and include this statement for purposes of complying with these safe harbor provisions. Forward-looking statements, which are based on certain assumptions and describe our future plans, strategies and expectations, are generally identifiable by use of the words “believes,” “expects,” “intends,” “anticipates,” “estimates,” “projects,” “may,” “plans,” “predicts,” “will,” “will likely result” or similar expressions. Readers should not rely on forward-looking statements since they involve known and unknown risks, uncertainties and other factors which are, in some cases, beyond our control and which could materially affect actual results, performances or achievements. In particular, among the factors that could cause actual results, performances or achievements to differ materially from current expectations, strategies or plans include, among others, those risks discussed below under “Risk Factors” in Part I, Item 1A of this Annual Report and “Management's Discussion and Analysis of Financial Condition and Results of Operations” in Part II, Item 7 of this Annual Report. Except as required by law, we undertake no obligation to publicly release the results of any revisions to these forward-looking statements which may be made to reflect events or circumstances after the date hereof or to reflect occurrence of unanticipated events. Accordingly, there is no assurance that our expectations will be realized.

Item 1. *Business*

General

We are a self-managed and self-administered REIT formed under the laws of the state of Maryland. Our primary business is the investment in and acquisition, ownership, financing and management of a geographically diverse portfolio consisting of predominantly single-tenant office, industrial and retail properties. Our core assets primarily consist of general purpose, efficient, single-tenant office and industrial assets, in well-located and growing markets or critical to the tenant's business. A majority of these properties are subject to net or similar leases, where the tenant bears all or substantially all of the costs, including cost increases, for real estate taxes, utilities, insurance and ordinary repairs. In addition, we acquire, originate and hold investments in loan assets and debt securities related to single-tenant real estate.

As of December 31, 2012, we had equity ownership interests in approximately 220 consolidated real estate properties, located in 41 states and containing an aggregate of approximately 41.2 million square feet of space, approximately 97.3% of which was leased. In 2012, 2011 and 2010, no tenant/guarantor represented greater than 10.0% of our annual base rental revenue.

In addition to our shares of beneficial interest, par value \$0.0001 per share, classified as common stock, which we refer to as common shares, as of December 31, 2012, we had two outstanding classes of beneficial interest classified as preferred stock, which we refer to as preferred shares: (1) 6.50% Series C Cumulative Convertible Preferred Stock, par value \$0.0001 per share, which we refer to as our Series C Preferred Shares, and (2) 7.55% Series D Cumulative Redeemable Preferred Stock, par value \$0.0001 per share, which we refer to as our Series D Preferred Shares. Our common shares, Series C Preferred Shares and Series D Preferred Shares are traded on the New York Stock Exchange, or NYSE, under the symbols “LXP”, “LXPPRC” and “LXPPRD”, respectively.

We elected to be taxed as a REIT under Sections 856 through 860 of the Internal Revenue Code of 1986, as amended, which we refer to as the Code, commencing with our taxable year ended December 31, 1993. We intend to continue to qualify as a REIT. If we qualify for taxation as a REIT, we generally will not be subject to federal corporate income taxes on our net taxable income that is currently distributed to our common shareholders.

History

Our predecessor was organized in the state of Delaware in October 1993 upon the combination of two investment programs, Lepercq Corporate Income Fund L.P., which we refer to as LCIF, and Lepercq Corporate Income Fund II L.P., which we refer to as LCIF II, which were formed to acquire net-lease real estate assets providing current income. Our predecessor was merged into Lexington Corporate Properties Trust, a Maryland statutory REIT, on December 31, 1997. On December 31, 2006, Lexington Corporate Properties Trust changed its name to Lexington Realty Trust and was the successor in a merger with Newkirk Realty Trust, or Newkirk, which we refer to as the Newkirk Merger. All of Newkirk's operations were conducted, and all of its assets were held, through its master limited partnership, subsequently named The Lexington Master Limited Partnership, which we refer to as the MLP. As of December 31, 2008, the MLP was merged with and into us.

We are structured as an umbrella partnership REIT, or UPREIT, as a portion of our business is conducted through our two operating partnership subsidiaries: (1) LCIF and (2) LCIF II. On December 31, 2010, a third operating partnership subsidiary, Net 3 Acquisition L.P., was merged with and into us. We refer to these subsidiaries as our operating partnerships and to limited partner interests in these operating partnerships as OP units. We are party to funding agreements with our operating partnerships under which we may be required to fund distributions made on account of OP units. The UPREIT structure enables us to acquire properties through our operating partnerships by issuing OP units to a seller of property, as a form of consideration in exchange for the property. The outstanding OP units are generally redeemable for our common shares on a one OP unit for approximately 1.13 common shares basis, or, at our election in certain instances, cash. We believe that this structure facilitates our ability to raise capital and to acquire portfolio and individual properties by enabling us to structure transactions which may defer tax gains for a contributor of property. As of December 31, 2012, there were approximately 3.8 million OP units outstanding, other than OP units held directly or indirectly by us, that are currently redeemable for approximately 4.3 million common shares if we satisfy redemptions entirely with common shares.

Current Economic Uncertainty and Capital Market Volatility

Our business continues to be impacted in a number of ways by the continued uncertainty in the overall economy and volatility in the capital markets. We encourage you to read "Risk Factors" in Part I, Item 1A of this Annual Report for a discussion of certain risks we are facing and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of this Annual Report for a detailed discussion of the trends we believe are impacting our business.

Objectives and Strategy

General. We continue to implement strategies which we believe will provide shareholders with dividend growth and capital appreciation. We believe that having a strong balance sheet supports these objectives. Since 2008, we believe we have strengthened our balance sheet primarily by (1) repurchasing and retiring our debt and senior securities or by extending their maturity date, (2) financing our properties with non-recourse mortgage debt or corporate credit facilities and term loans at what we believe are favorable rates and using the proceeds to retire higher rate or shorter term debt, (3) issuing equity when market conditions are favorable and (4) selling non-core and underperforming assets. We have used proceeds from non-core and underperforming asset sales and issuances of common shares primarily to repurchase or retire our debt and acquire core assets.

Our core assets consist of general purpose, single-tenant net-leased office and industrial assets, in well-located and growing markets or which are critical to the tenant's business, but may also include other asset types subject to long-term net-leases, such as retail facilities, schools and medical facilities. We believe education and health care are growing sectors of the U.S. economy and we have seen demand for build-to-suit transactions involving charter schools, private schools and medical facilities. A component of our business strategy includes exploring these other asset types when they are subject to long-term leases that will extend the weighted-average lease term of our portfolio. We intend to mitigate residual value risk associated with such assets by acquiring such assets primarily through joint ventures or disposing of such assets when there is sufficient remaining lease term to generate favorable sale prices.

When opportunities arise, we intend to make investments in single-tenant assets, which we believe will generate favorable returns. We seek to grow our portfolio primarily by (1) engaging in, or providing funds to developers who are engaged in, build-to-suit projects for single-tenant corporate users, (2) providing capital to corporations by buying properties and leasing them back to the sellers under net or similar leases, (3) acquiring properties already subject to net or similar leases and (4) making mortgage and mezzanine loans generally secured by single-tenant properties subject to net or similar leases.

As part of our ongoing business efforts, we expect to continue to (1) recycle capital in compliance with regulatory and contractual requirements, (2) refinance or repurchase outstanding indebtedness when advisable, including converting secured debt to unsecured debt, (3) effect strategic transactions, portfolio and individual property acquisitions and dispositions, (4) expand existing properties, (5) execute new leases with tenants, (6) extend lease maturities in advance of or at expiration and (7) explore new business lines and operating platforms. Additionally, we may continue to enter into joint ventures and co-investment programs with third-party investors as a means of creating additional growth and expanding the revenue realized from advisory and asset management activities as situations warrant.

Portfolio diversification is central to our investment strategy as we seek to create and maintain an asset base that provides steady, predictable and growing cash flows while being insulated against rising property operating expenses, regional recessions, industry-specific downturns and fluctuations in property values and market rent levels. Regardless of capital market and economic conditions, we intend to stay focused on (1) enhancing operating results, (2) improving portfolio quality, (3) mitigating risks relating to interest rates and the real estate cycle and (4) implementing strategies where our management skills and real estate expertise can add value. We believe that our business strategy will continue to improve our liquidity and strengthen our overall balance sheet while creating meaningful shareholder value.

Capital Recycling. We began to dispose of our interests in non-core assets following the Newkirk merger, subject to regulatory and contractual requirements. During 2012 and 2011, we used the proceeds from dispositions to primarily make investments and retire debt and preferred securities. During 2010, we used the proceeds from dispositions to primarily retire debt. We continue to be focused on the disposition of our interests in non-core assets, including vacant and under-performing assets.

Occasionally, we provide seller financing as a means of efficiently disposing of an asset. As a result, if a buyer defaults under the seller financing, we will once again be the owner of the underlying asset.

Acquisition Strategies. When market conditions warrant, we seek to enhance our single-tenant property portfolio through acquisitions of interests in core assets, including build-to-suit transactions and investments in loan assets and debt securities directly or indirectly secured by core assets. Prior to effecting any acquisition, our underwriting includes analyzing the (1) property's design, construction quality, efficiency, functionality and location with respect to the immediate sub-market, city and region, (2) lease integrity with respect to term, rental rate increases, corporate guarantees and property maintenance provisions, (3) present and anticipated conditions in the local real estate market and (4) prospects for selling or re-leasing the property on favorable terms in the event of a vacancy. To the extent of information publicly available or made available to us, we also evaluate each potential tenant's financial strength, growth prospects, competitive position within its respective industry and a property's strategic location and function within a tenant's operations or distribution systems. We believe that our comprehensive underwriting process is critical to the assessment of long-term profitability of any investment by us.

Acquisitions of Individual Net-lease Properties. We seek to acquire individual properties from (1) creditworthy companies in sale/leaseback transactions for properties that are integral to the sellers'/tenants' ongoing operations, (2) developers of newly constructed properties built to suit the needs of a corporate tenant by financing the project during the construction phase and/or agreeing to purchase the property upon completion of construction and occupancy by the tenant, and (3) sellers of properties subject to an existing lease. We believe that our geographical diversification and acquisition experience will allow us to continue to compete effectively for the acquisition of such properties.

Strategic Transactions with Other Real Estate Investment Companies. We seek to capitalize on the unique investment experience of our management team as well as their network of relationships in the industry to achieve appropriate risk-adjusted yields through strategic transactions. Accordingly, we occasionally pursue the (1) acquisition of portfolios of assets and equity interests in companies with a significant number of single-tenant assets, including through mergers and acquisitions activity, and (2) participation in strategic partnerships, co-investment programs and joint ventures.

In connection with the Newkirk Merger, we acquired an interest in Concord Debt Holdings LLC, which we refer to as Concord, which owned real estate loan and bond assets. CDH CDO LLC, which we refer to as CDH CDO, was spun off of Concord to the members of Concord. In 2012, we sold our interest in these investments for \$7.0 million.

In 2007, we established Net Lease Strategic Assets Fund L.P., which we refer to as NLS, a co-investment program with a wholly-owned subsidiary of Inland American Real Estate Trust, Inc., which we refer to as Inland NLS, to invest in specialty net-leased real estate. In 2012, we acquired Inland NLS's interest in NLS for a cash payment of \$9.4 million and the assumption of all outstanding liabilities. As a result, we now control, including through one of our operating partnership subsidiaries, 100% of NLS. At acquisition, NLS had (1) 41 properties totaling 5.8 million square feet in 23 states, plus a 40% tenant-in-common interest in an office property, (2) cash balances of \$8.1 million and (3) approximately \$258.0 million of consolidated debt. NLS is now a consolidated subsidiary.

We received a waiver from the U.S. Securities and Exchange Commission, which we refer to as the SEC, to not provide the 2012 financial statements of NLS, which was consolidated as of September 1, 2012, required under Rule 3-09 of Regulation S-X, as long as we provide the audited financial statements of NLS for the years ended December 31, 2011, 2010 and 2009 and the unaudited financial statements of NLS for the six months ended June 30, 2012, which are filed as Exhibit 99.1 and 99.2, respectively, to this Annual Report.

In 2012, we formed two joint ventures in which we have minority ownership interests of 15% and 36%, respectively. The venture in which we have a 15% interest acquired an inpatient rehabilitation hospital in Humble, Texas for \$27.8 million and the venture in which we have a 36% interest acquired a retail property in Palm Beach Gardens, Florida for \$29.8 million. We are also a partner in six other partnerships, including an entity acquired in the NLS transaction, with ownership percentages ranging between 27% and 40%, which own primarily net-leased properties. All profits, losses and cash flows are distributed in accordance with the respective joint venture or partnership agreements. As of December 31, 2012, these joint ventures and partnerships had \$47.2 million in non-recourse mortgage debt (our proportionate share was \$13.3 million), with interest rates ranging from 4.7% to 10.6%, a weighted-average interest rate of 7.0% and maturity dates ranging from 2015 to 2017.

In 2011, we acquired a majority interest in a joint venture that acquired an office property in Aurora, Illinois for \$15.9 million, which was subject to a net-lease. We sold our interest in the joint venture in 2012 for \$13.2 million and continue to manage the investment for the buyer.

We believe that entering into co-investment programs and joint ventures with institutional investors and other real estate investment companies may mitigate our risk in certain assets and increase our return on equity to the extent we earn management or other fees. However, investments in co-investment programs and joint ventures limit our ability to make unilateral investment decisions relating to the assets and limit our ability to deploy capital. See Part I, Item 1A "Risk Factors", below.

Competition

Through our predecessor entities, certain members of our management have been in the net-lease real estate business since 1973. Over this period, our management established a broad network of contacts, including major corporate tenants, developers, brokers and lenders. In addition, our management is associated with and/or participates in many industry organizations. Notwithstanding these relationships, there are numerous commercial developers, real estate companies, financial institutions, such as banks and insurance companies, and other investors with greater financial or other resources that compete with us in seeking properties for acquisition and tenants who will lease space in these properties. Our competitors include other REITs, pension funds, banks, private companies and individuals.

Internal Growth and Effectively Managing Assets

Tenant Relations and Lease Compliance. We endeavor to maintain close contact with the tenants in the properties in which we have an interest in order to understand their financial status and future real estate needs. We monitor the financial, property maintenance and other lease obligations of the tenants in properties in which we have an interest, through a variety of means, including periodic reviews of financial statements that we have access to and physical inspections of the properties.

Extending Lease Maturities. Our property owner subsidiaries seek to extend tenant leases in advance of the lease expiration in order for us to maintain a balanced lease rollover schedule and high occupancy levels.

Revenue Enhancing Property Expansions. Our property owner subsidiaries undertake expansions of properties based on lease requirements, tenant requirements or marketing opportunities. We believe that selective property expansions can provide attractive rates of return.

Property Sales. Subject to regulatory and contractual requirements, we generally sell our interests in properties when we believe that the return realized from selling a property will exceed the expected return from continuing to hold such property and/or if there is a better use of capital such as repurchasing our debt and senior securities.

Conversion to Multi-Tenant. If one of our property subsidiaries is unable to renew a single-tenant lease or if it is unable to find a replacement single tenant, we either attempt to sell our interest in the property or the property owner may seek to market the property for multi-tenant use. When appropriate, we seek to sell our interests in these multi-tenant properties.

Property Management. From time to time, our property owner subsidiaries use property managers to manage certain properties. Our property management joint venture with an unaffiliated third party manages substantially all of these properties. We believe this joint venture provides us with (1) better management of our assets, (2) better tenant relationships, (3) revenue-enhancing opportunities and (4) cost efficiencies.

Financing Strategy

General. Since becoming a public company, our principal sources of financing have been the public and private equity and debt markets, property specific debt, revolving loans, corporate level term loans, issuance of OP units and undistributed cash flows.

Property Specific Debt. Our property owner subsidiaries historically financed their assets with non-recourse secured debt. However, beginning in 2008, the availability of single asset non-recourse financing became limited. As a result, we began to rely more on corporate level borrowings. Our property owner subsidiaries now seek non-recourse secured debt on a limited basis including when credit tenant lease financing is available. Credit tenant lease financing allows us to significantly or fully leverage the rental stream from an investment at, what we believe are, attractive rates.

Corporate Level Borrowings. As previously noted, we also use corporate level borrowings, such as revolving loans, term loans, and debt offerings. We expect to finance more of our operations with such corporate level borrowings as (1) non-recourse secured debt matures and (2) such borrowings are available on favorable terms.

Deleveraging and Interest Rate Reduction. In recent years, we have reduced our weighted-average interest rate or used our capital to deleverage our balance sheet by refinancing, satisfying and repurchasing indebtedness. From January 1, 2009 through December 31, 2011, we reduced our overall consolidated indebtedness by \$725.2 million. In 2012, our overall consolidated indebtedness increased by \$210.5 million primarily due to the acquisition of NLS. However, we reduced our consolidated weighted-average interest rate by approximately 34 basis points. In addition, since the fourth quarter of 2012 through the date of filing this Annual Report, we converted \$66.1 million aggregate principal amount of our 6.00% Convertible Guaranteed Notes due 2030, which we refer to as 6.00% Convertible Notes, into 9.5 million common shares, together with a cash payment of \$4.7 million, reducing the outstanding balance of the notes to \$48.9 million.

Common Share Issuances

During 2012 and 2011, we raised \$164.4 million and \$99.0 million, respectively, by issuing 18.3 million and 11.1 million common shares through public offerings and under our direct share purchase plan. The proceeds from these common share offerings were used for working capital, including to fund investments and to retire indebtedness.

In addition, we issued common shares upon conversion of our 6.00% Convertible Notes, as discussed above.

Preferred Share Repurchases

During 2012 and 2011, we repurchased and retired all outstanding shares of our 8.05% Series B Cumulative Redeemable Preferred Stock, par value \$0.0001 per share, which we refer to as Series B Preferred Shares, and an aggregate 0.2 million Series C Preferred Shares for \$85.5 million in the aggregate, or a \$1.5 million discount to the liquidation preferences of the preferred shares.

Advisory Contracts

Certain members of our management have been in the business of investing in single-tenant net-lease properties since 1973. This experience has enabled us to provide advisory services to various net-lease investors. With the termination of certain of our co-investment programs in 2007 and our acquisition of NLS in 2012, advisory fees have declined in recent years. If and when we increase our co-investment joint venture activity, we expect advisory fees to increase.

In 2012, LRA entered into an agreement to arrange for investments up to \$100.0 million on behalf of a third-party investor. Under the agreement, we will be a co-investor with a target to contribute 15% to each venture. We granted the third-party investor an exclusivity, until May 2015, on investment opportunities for (1) properties with a lease due to expire in less than 10 years, and (2) properties that are dedicated to non-office and non-warehouse/distribution uses, including properties with tenants in the medical, hospital and health care industries.

Environmental Matters

Under various federal, state and local environmental laws, statutes, ordinances, rules and regulations, an owner of real property may be liable for the costs of removal or remediation of certain hazardous or toxic substances at, on, in or under such property as well as certain other potential costs relating to hazardous or toxic substances. These liabilities may include government fines and penalties and damages for injuries to persons and adjacent property. Such laws often impose liability without regard to whether the owner knew of, or was responsible for, the presence or disposal of such substances. Although generally the tenants of the properties in which we have an interest are primarily responsible for any environmental damage and claims related to the leased premises, in the event of the bankruptcy or inability of a tenant of such premises to satisfy any obligations with respect to such environmental liability, a property owner subsidiary may be required to satisfy such obligations. In addition, as the owner of such properties, a property owner subsidiary may be held directly liable for any such damages or claims irrespective of the provisions of any lease.

From time to time, in connection with the conduct of our business and generally upon acquisition of a property and prior to surrender by a tenant, the property owner subsidiary authorizes the preparation of a Phase I and, when recommended, a Phase II environmental report with respect to its properties. Based upon such environmental reports and our ongoing review of the properties in which we have an interest, as of the date of this Annual Report, we are not aware of any environmental condition with respect to any of the properties in which we have an interest which we believe would be reasonably likely to have a material adverse effect on our financial condition and/or results of operations. There can be no assurance, however, that (1) the discovery of environmental conditions, the existence or severity of which were previously unknown, (2) changes in law, (3) the conduct of tenants or (4) activities relating to properties in the vicinity of the properties in which we have an interest, will not expose us to material liability in the future. Changes in laws increasing the potential liability for environmental conditions existing on properties or increasing the restrictions on discharges or other conditions may result in significant unanticipated expenditures or may otherwise adversely affect the operations of the tenants of properties in which we have an interest, which would adversely affect our financial condition and/or results of operations.

Impairment Charges

During 2012, 2011 and 2010, we incurred \$10.0 million, \$117.4 million and \$56.9 million, respectively, of non-cash impairment charges primarily related to (1) sales and other dispositions, or the possible sale or disposition, of assets at below book value and (2) vacancies of certain assets. In addition, we may continue to take similar non-cash impairment charges, which could be material in amount, due to (1) the current economic environment and (2) the implementation of our current business strategy, which may include sales of properties acquired in the Newkirk Merger that have a high cost basis because of our common share price at the time of the Newkirk Merger. Furthermore, we may take an impairment charge on a property subject to a non-recourse secured mortgage reducing the book value of such property to its estimated fair value which may be below the balance of the mortgage on our balance sheet. Upon foreclosure or other disposition of such property, we may recognize a gain on debt satisfaction equal to the difference between the fair value of the property and the balance of the mortgage.

Summary of 2012 Transactions and Recent Developments

The following summarizes certain of our transactions during 2012, including transactions disclosed above and in our other periodic reports.

Sales. With respect to sales activity, we:

- disposed of our interests in properties, including a non-consolidated property, to unaffiliated third parties for an aggregate gross disposition price of \$181.4 million; and
- sold our interest in Concord and CDH CDO for \$7.0 million.

Acquisitions/Investments. With respect to acquisitions/investments, we:

- purchased an industrial property in Missouri City, Texas for \$23.0 million and an office property in Phoenix, Arizona for \$53.2 million;
- completed eight build-to-suit transactions for an aggregate capitalized cost of \$107.3 million;
- formed a joint venture, in which we hold a 15% interest, which acquired an inpatient rehabilitation hospital in Humble, Texas for \$27.8 million;
- formed a joint venture, in which we hold a 36% interest, which acquired a retail property in Palm Beach Gardens, Florida for \$29.8 million and we made a \$12.0 million non-recourse mortgage loan to the joint venture, which was repaid in February 2013;
- closed on two construction loans for an aggregate commitment of \$40.6 million of which \$11.5 million was funded in 2012;
- received \$2.5 million in full satisfaction of a loan receivable;
- acquired Inland NLS's interest in NLS for \$9.4 million and the assumption of its liabilities;

- acquired 6.2 acres of land, which was previously leased, in Palm Beach Gardens, Florida for \$6.0 million, on which we own the multi-tenant improvements; and
- continued to fund four on-going build-to-suit transactions not yet completed at December 31, 2012 with an aggregate estimated cost of \$136.5 million of which \$68.9 million was invested as of December 31, 2012.

The 2012 property investments of \$241.1 million discussed above have a weighted-average lease term of approximately 16 years and an initial cap rate of 8.5%.

Leasing. Our property owner subsidiaries entered into 69 new leases and lease extensions encompassing an aggregate 7.4 million square feet and raised our overall portfolio occupancy by 140 basis points to 97.3% as of December 31, 2012.

Financing. In 2012, we procured a \$255.0 million secured term loan from Wells Fargo Bank, National Association, as agent, which matures in January 2019. The secured term loan requires regular payments of interest only at an interest rate, ranging from 2.00% to 2.85% over LIBOR depending on our leverage ratio, as defined therein. Upon the date when we obtain an investment grade debt rating from at least two of Standard & Poor's Rating Services, which we refer to as S&P, Moody's Investor Services, Inc., which we refer to as Moody's, and Fitch, Inc., which we refer to as Fitch, the interest rate under the secured term loan will be dependent on our debt rating. Prepayments are permitted after January 12, 2013 subject to a premium until January 12, 2016.

Also in 2012, we refinanced our \$300.0 million secured revolving credit facility with a new \$300.0 million secured revolving credit facility with a maturity date of January 2015 but could have been extended until January 2016 at our option.

We satisfied \$60.6 million of term loans procured in 2008, repurchased and retired \$62.2 million of original principal amount of 5.45% Exchangeable Guaranteed Notes and repaid \$57.5 million of debt assumed in the NLS transaction.

We converted an aggregate \$31.1 million original principal amount of 6.00% Convertible Notes into an aggregate 4.5 million common shares and made an aggregate cash payment of approximately \$2.4 million plus accrued and unpaid interest on the converted notes.

Our property owner subsidiaries:

- retired \$190.5 million in property non-recourse mortgage debt with a weighted-average interest rate of 5.9%; and
- obtained \$121.0 million in non-recourse mortgage financings with a weighted-average interest rate of 4.1%.

Capital. With respect to capital activities, we:

- issued an aggregate 18.3 million common shares in a public offering and under our direct share purchase plan, raising net proceeds of approximately \$164.4 million; and
- repurchased and retired all outstanding (approximately 2.7 million) Series B Preferred Shares and approximately 35 thousand Series C Preferred Shares for an aggregate purchase price of approximately \$70.0 million.

Subsequent to December 31, 2012, we:

- converted \$35.0 million original principal amount of 6.00% Convertible Notes for approximately 5.0 million common shares and a cash payment of \$2.3 million plus accrued and unpaid interest;
- implemented an At-The-Market or ATM offering program under which we may issue up to \$100.0 million in common shares over the term of the program. As of the date of this Annual Report, we issued 3.4 million common shares under this program raising gross proceeds of \$36.9 million;
- refinanced our \$300.0 million secured revolving credit facility with a \$300.0 million unsecured revolving credit facility with KeyBank National Association, which we refer to as KeyBank, as agent. The unsecured revolving credit facility matures in February 2017 but can be extended until February 2018 at our option. The unsecured revolving credit facility bears interest at LIBOR plus 1.50% to 2.05% based on our leverage ratio, as defined therein. Upon the date when we obtain an investment grade credit rating from at least two of S&P, Moody's or Fitch, the interest rate under the unsecured revolving credit facility will be dependent on our debt rating;

- in connection with the refinancing discussed above, we also procured a five-year \$250.0 million unsecured term loan facility from KeyBank as agent. The unsecured term loan matures in February 2018 and requires regular payments of interest only at interest rates ranging from LIBOR plus 1.45% to 2.00% dependent on our leverage ratio, as defined therein. Upon the date when we obtain an investment grade rating from at least two of S&P, Moody's or Fitch, the interest rate under the unsecured term loan will be dependent on our debt rating;
- amended our \$255.0 million secured term loan agreement to release the collateral securing such loan;
- conveyed in foreclosure our property in Suwanee, Georgia for full satisfaction of the related \$11.0 million non-recourse mortgage;
- obtained \$40.0 million of 15-year secured non-recourse mortgage debt on our property in Lenexa, Kansas and a joint venture obtained a \$15.3 million secured non-recourse mortgage on its property in Palm Beach Gardens, Florida; and
- gave notice to prepay \$137.9 million of secured non-recourse mortgage debt on March 1, 2013 with proceeds from our unsecured revolving credit facility.

Other

Employees. As of December 31, 2012, we had 50 full-time employees. Lexington Realty Trust is a master employer and employee costs are allocated to subsidiaries as applicable.

Industry Segments. We operate in primarily one industry segment, single-tenant real estate assets.

Web Site. Our Internet address is www.lxp.com. We make available, free of charge, on or through the investor relations section of our web site or by contacting our Investor Relations Department, Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act, as well as proxy statements, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Also posted on our web site, and available in print upon request of any shareholder to our Investor Relations Department, are our amended and restated declaration of trust and amended and restated by-laws, charters for the Audit Committee, Compensation Committee and Nominating and Corporate Governance Committee of our Board of Trustees, our Corporate Governance Guidelines, and our Code of Business Conduct and Ethics governing our trustees, officers and employees (which contains our whistle blower procedures). Within the time period required by the SEC and the NYSE, we will post on our web site any amendment to the Code of Business Conduct and Ethics and any waiver applicable to any of our trustees or executive officers. In addition, our web site includes information concerning purchases and sales of our equity securities by our executive officers and trustees as well as disclosure relating to certain non-GAAP financial measures (as defined in the SEC's Regulation G) that we may make public orally, telephonically, by webcast, by broadcast or by similar means from time to time. Information contained on our web site or the web site of any other person is not incorporated by reference into this Annual Report or any of our other filings with the SEC.

Our Investor Relations Department can be contacted at Lexington Realty Trust, One Penn Plaza, Suite 4015, New York, New York 10119-4015, Attn: Investor Relations, by telephone: (212) 692-7200, or by e-mail: ir@lxp.com.

Principal Executive Offices. Our principal executive offices are located at One Penn Plaza, Suite 4015, New York, New York 10119-4015; our telephone number is (212) 692-7200.

NYSE CEO Certification. Our Chief Executive Officer made an unqualified certification to the NYSE with respect to our compliance with the NYSE corporate governance listing standards in May 2012.

Item 1A. Risk Factors

Set forth below are material factors that may adversely affect our business and operations.

We are subject to risks involved in single-tenant leases.

We focus our acquisition activities on real estate properties that are net leased to single tenants. Therefore, the financial failure of, or other default by, a single tenant under its lease is likely to cause a significant or complete reduction in the operating cash flow generated by the property leased to that tenant and might decrease the value of that property and result in a non-cash impairment charge. In addition, our property owner subsidiary will be responsible for 100% of the operating costs following a vacancy at a single-tenant building.

We rely on revenues derived from major tenants.

Revenues from several tenants and/or their guarantors constitute a significant percentage of our base rental revenues. The default, financial distress or bankruptcy of any of the tenants and/or guarantors of these properties could cause interruptions in the receipt of lease revenues and/or result in vacancies, which would reduce the property owner subsidiary's revenues and increase operating costs until the affected property is re-let, and could decrease the ultimate sale value of that property. Upon the expiration or other termination of the leases that are currently in place with respect to these properties, the property owner subsidiary may not be able to re-lease the vacant property at a comparable lease rate, at all, or without incurring additional expenditures in connection with the re-leasing. See "Management's Discussion and Analysis of Financial Conditions and Results of Operations - Overview - Leasing Trends" in Part II, Item 7 of this Annual Report for further discussion.

You should not rely on the credit ratings of our tenants.

Some of our tenants are rated by Moody's, Fitch and/or S&P. Any such credit ratings are subject to ongoing evaluation by these credit rating agencies and we cannot assure you that any such ratings will not be changed or withdrawn by these rating agencies in the future if, in their judgment, circumstances warrant. If these rating agencies assign a lower-than-expected rating or reduce or withdraw, or indicate that they may reduce or withdraw the credit rating of a tenant, the value of our investment in any properties leased by such tenant could significantly decline. Furthermore, our investment with these tenants is through a lease which is treated differently than unsecured debt in a bankruptcy.

Our assets may be subject to impairment charges.

We periodically evaluate our real estate investments and other assets for impairment indicators. The judgment regarding the existence of impairment indicators is based on GAAP, which include a variety of factors such as market conditions, the status of significant leases, the financial condition of major tenants and other factors that could affect the cash flow or value of an investment. During 2012, 2011 and 2010, we incurred \$10.0 million, \$117.4 million and \$56.9 million, respectively, of non-cash impairment charges. A substantial portion of these impairments related to assets acquired in the Newkirk Merger that had a relatively high cost basis because of our common share price at the time of the Newkirk Merger. In addition, we may continue to take similar non-cash impairment charges, which could affect the implementation of our current business strategy. These impairments could have a material adverse effect on our financial condition and results of operations.

Furthermore, we may take an impairment charge on a property subject to a non-recourse secured mortgage which reduces the book value of such property to its fair value, which may be below the balance of the mortgage on our balance sheet. Upon foreclosure or other disposition, we may be required to recognize a gain on debt satisfaction equal to the difference between the fair value of the property and the balance of the mortgage.

Our interests in loans receivable are subject to delinquency, foreclosure and loss.

Our interests in loans receivable are generally non-recourse and secured by real estate properties owned by borrowers that were unable to obtain similar financing from a commercial bank. These loans are subject to many risks including delinquency. The ability of a borrower to repay a loan secured by a real estate property is typically and primarily dependent upon the successful operation of such property rather than upon the existence of independent income or assets of the borrower. If a borrower were to default on a loan, it is possible that we would not recover the full value of the loan as the collateral may be non-performing.

As of December 31, 2012, one of our loans receivable, which is secured by an office property in Schaumburg, Illinois, was in default. The loan had an outstanding balance of \$21.9 million (not including default interest and other penalties), which we believe is less than the fair value of the property. Also, as of December 31, 2012, the tenant of the property in Westmont, Illinois, which we sold in 2007 but issued a purchase mortgage to the buyer, exercised its option to terminate its lease effective November 2013. As of December 31, 2012, our note receivable was \$26.8 million.

We face uncertainties relating to lease renewals and re-letting of space.

Upon the expiration of current leases for space located in properties in which we have an interest, our property owner subsidiaries may not be able to re-let all or a portion of such space, or the terms of re-letting (including the cost of concessions to tenants and leasing commissions) may be less favorable than current lease terms or market rates. If our property owner subsidiaries are unable to promptly re-let all or a substantial portion of the space located in their respective properties, or if the rental rates a property owner subsidiary receives upon re-letting are significantly lower than current rates, our earnings and ability to make expected distributions to our shareholders may be adversely affected due to the resulting reduction in rent receipts and increase in property operating costs. There can be no assurance that our property owner subsidiaries will be able to retain tenants in any of our properties upon the expiration of leases.

Our inability to carry out our growth strategy could adversely affect our financial condition and results of operations.

Our growth strategy is based on the acquisition and development of additional properties and related assets. In the context of our business plan, “development” generally means an expansion or renovation of an existing property or the financing and/or acquisition of a newly constructed build-to-suit property. For newly constructed build-to-suit properties, we may (1) provide a developer with either a combination of financing for construction of a build-to-suit property or a commitment to acquire a property upon completion of construction of a build-to-suit property and commencement of rent from the tenant or (2) acquire a property subject to a lease and engage a developer to complete construction of a build-to-suit property as required by the lease.

Our plan to grow through the acquisition and development of new properties could be adversely affected by trends in the real estate and financing businesses. The consummation of any future acquisitions will be subject to satisfactory completion of an extensive valuation analysis and due diligence review and to the negotiation of definitive documentation. Our ability to implement our strategy may be impeded because we may have difficulty finding new properties and investments at attractive prices that meet our investment criteria, negotiating with new or existing tenants or securing acceptable financing. If we are unable to carry out our strategy, our financial condition and results of operations could be adversely affected. Acquisitions of additional properties entail the risk that investments will fail to perform in accordance with expectations, including operating and leasing expectations.

Redevelopment and new project development are subject to numerous risks, including risks of construction delays, cost overruns or force majeure events that may increase project costs, new project commencement risks such as the receipt of zoning, occupancy and other required governmental approvals and permits, and the incurrence of development costs in connection with projects that are not pursued to completion.

Some of our acquisitions and developments may be financed using the proceeds of periodic equity or debt offerings, lines of credit or other forms of secured or unsecured financing that may result in a risk that permanent financing for newly acquired projects might not be available or would be available only on disadvantageous terms. If permanent debt or equity financing is not available on acceptable terms to refinance acquisitions undertaken without permanent financing, further acquisitions may be curtailed, or cash available for distribution to shareholders may be adversely affected.

Acquisition activities may not produce expected results and may be affected by outside factors.

Acquisitions of commercial properties entail certain risks, such as (1) underwriting assumptions such as occupancy, rental rates and expenses may differ from estimates, (2) the properties may become subject to environmental liabilities that we were unaware of at the time we acquired the property despite any environmental testing, (3) we may have difficulty obtaining financing on acceptable terms or paying the operating expenses and debt service associated with acquired properties prior to sufficient occupancy and (4) projected exit strategies may not come to fruition due to a variety of factors such as market conditions at time of dispositions.

We may not be successful in identifying suitable real estate properties or other assets that meet our acquisition criteria. We may also fail to complete acquisitions or investments on satisfactory terms. Failure to identify or complete acquisitions could slow our growth, which could, in turn, have a material adverse effect on our financial condition and results of operations.

We face certain risks associated with our build-to-suit activities.

From time to time, we engage in, or provide capital to developers who are engaged in, build-to-suit activities. We face uncertainties, associated with a developer's performance and timely completion of a project, including the performance or timely completion by contractors and subcontractors. If a developer, contractor or subcontractor fails to perform, we may resort to legal action to compel performance, remove the developer or rescind the purchase or construction contract.

A developer's performance may also be affected or delayed by conditions beyond the developer's control. We attempt to mitigate such conditions by providing for penalties and related grace periods in the underlying lease.

We may incur additional risks when we make periodic progress payments or other advances to developers before completion of construction. These and other factors can result in increased costs of a project or loss of our investment. We also rely on third-party construction managers and/or engineers to monitor the construction activities.

We rely on rental income and expense projections and estimates of the fair market value of a property upon completion of construction when agreeing upon a purchase price at the time we acquire the property, which may be up to two years prior to the estimated date of completion. If our projections are inaccurate or markets change, we may pay more than the fair value of a property.

Our multi-tenant properties expose us to additional risks.

Our multi-tenant properties involve risks not typically encountered in real estate properties which are operated by a single tenant. The ownership of multi-tenant properties could expose us to the risk that a sufficient number of suitable tenants may not be found to enable the property to operate profitably and provide a return to us. This risk may be compounded by the failure of existing tenants to satisfy their obligations due to various factors, including the current or future economic crises. These risks, in turn, could cause a material adverse impact to our results of operations and business.

Multi-tenant properties are also subject to tenant turnover and fluctuation in occupancy rates, which could affect our operating results. Furthermore, multi-tenant properties expose us to the risk of potential "CAM slippage," which may occur when the actual cost of taxes, insurance and maintenance at the property exceeds the operating expenses paid by tenants and/or the amounts budgeted.

We use leverage, which increases the risk of default on our obligations and debt service requirements.

We are more leveraged than certain of our competitors. We have incurred, and may continue to incur, direct and indirect indebtedness in furtherance of our activities. Neither our amended and restated declaration of trust nor any policy statement formally adopted by our Board of Trustees limits either the total amount of indebtedness or the specified percentage of indebtedness that we may incur, and accordingly, we could become even more highly leveraged. High levels of leverage may result in an increased risk of default on our obligations and in an increase in debt service requirements, which could adversely affect our financial condition, results of operations and our ability to pay distributions.

Market interest rates could have an adverse effect on our borrowing costs, profitability and our share price.

We have exposure to market risks relating to increases in interest rates due to our variable-rate debt. An increase in interest rates may increase our costs of borrowing on existing variable-rate indebtedness, leading to a reduction in our earnings. As of December 31, 2012, we had no amounts outstanding in consolidated variable-rate indebtedness that were not subject to an interest-rate swap agreement. However, borrowings under our unsecured credit facility are subject to variable rates. The level of our variable-rate indebtedness, along with the interest rate associated with such variable-rate indebtedness, may change in the future and materially affect our interest costs and earnings. In addition, our interest costs on our fixed-rate indebtedness may increase if we are required to refinance our fixed-rate indebtedness upon maturity at higher interest rates.

Furthermore, the public valuation of our common shares is related primarily to the earnings that we derive from rental income with respect to the properties in which we have an interest and not from the underlying appraised value of the properties themselves. As a result, interest rate fluctuations and capital market conditions can affect the market value of our common shares. For instance, if interest rates rise, the market price of our common shares may decrease because potential investors seeking a higher dividend yield than they would receive from our common shares may sell our common shares in favor of higher rate interest-bearing securities.

Continued disruptions in the financial markets could affect our ability to obtain debt financing on reasonable terms and have other adverse effects on us.

Since 2008, the United States credit markets have experienced significant dislocations and liquidity disruptions which have caused the spreads on prospective debt financings to widen considerably. These circumstances have materially impacted liquidity in the debt markets, making financing terms for borrowers less attractive, and in certain cases have resulted in the unavailability of certain types of debt financing. Continued uncertainty in the credit markets may negatively impact our ability to access additional debt financing on reasonable terms, which may negatively affect our ability to make acquisitions. A prolonged downturn in the credit markets may cause us to seek alternative sources of potentially less attractive financing and may require us to adjust our business plan accordingly. In addition, these factors may make it more difficult for us to sell properties or may adversely affect the price we receive for properties that we do sell, as prospective buyers may experience increased costs of capital or difficulties in obtaining

capital. These events in the credit markets have also had an adverse effect on other financial markets in the United States, which may make it more difficult or costly for us to raise capital through the issuance of our common shares or preferred shares. These disruptions in the financial markets may have other adverse effects on us or the economy in general.

As of December 31, 2012, we have aggregate interest rate swap agreements on \$255.0 million of borrowings. The counterparties of these arrangements are major financial institutions; however, we are exposed to credit risk in the event of non-performance by the counterparties.

Covenants in certain of the agreements governing our debt could adversely affect our financial condition and our investment activities.

Our unsecured revolving credit facility, unsecured term loans and indenture governing our 6.00% Convertible Notes contain certain cross-default provisions as well as customary restrictions, requirements and other limitations on our ability to incur indebtedness. Our ability to borrow under both our unsecured revolving credit facility and our unsecured term loan is also subject to compliance with certain other covenants. In addition, failure to comply with our covenants could cause a default under the applicable debt instrument and we may then be required to repay such debt with capital from other sources. Under those circumstances other sources of capital may not be available to us or be available only on unattractive terms. Additionally, our ability to satisfy current or prospective lenders' insurance requirements may be adversely affected if lenders generally insist upon greater insurance coverage against acts of terrorism than is available to us in the marketplace or on commercially reasonable terms.

We rely on debt financing, including borrowings under our unsecured revolving credit facility, unsecured term loan and debt secured by individual properties, for working capital, including to finance our investment activities. If we are unable to obtain financing from these or other sources, or to refinance existing indebtedness upon maturity, our financial condition and results of operations could be adversely affected.

The trading price of our common shares has been, and may continue to be, subject to significant fluctuations.

Since January 1, 2008, the closing sale price of our common shares on the NYSE (composite) has ranged from \$17.22 to \$2.01 per share. The market price of our common shares may fluctuate in response to company-specific and securities market events and developments, including those described in this Annual Report. In addition, the amount of our indebtedness may impact investor demand for our common shares, which could have a material effect on the market price of our common shares.

We have engaged and may engage in hedging transactions that may limit gains or result in losses.

We have used derivatives to hedge certain of our liabilities and we currently have interest rate swap agreements in place. This has certain risks, including losses on a hedge position, which have in the past and may in the future reduce the return on our investments. Such losses may exceed the amount invested in such instruments. In addition, counterparties to a hedging arrangement could default on their obligations. We may have to pay certain costs, such as transaction fees or breakage costs, related to hedging transactions.

We face risks associated with refinancings.

A significant number of the properties in which we have an interest, as well as corporate level borrowings, are subject to mortgage or other secured notes with balloon payments due at maturity. In addition, our corporate level borrowings require interest only payments with all principal due at maturity.

As of December 31, 2012, the consolidated scheduled balloon payments, for the next five calendar years, are as follows:

Year	Non-Recourse Property-Specific Balloon Payments	Corporate Recourse Balloon Payments
2013	\$ 238.4 million	\$ —
2014	\$ 251.0 million	\$ —
2015	\$ 288.6 million	\$ —
2016	\$ 148.6 million	\$ —
2017	\$ 68.7 million	\$ 83.9 million ⁽¹⁾

(1) Assumes 6.00% Convertible Notes due in January 2030 are put to us in 2017. Subsequent to December 31, 2012, an additional \$35.0 million of these notes were converted and, as a result, \$48.9 million is the amount of the expected payment in 2017 as of the date of the filing of this Annual Report.

The ability to make the scheduled balloon payment on a non-recourse mortgage note will depend upon (1) in the event we determine to contribute capital, our cash balances and the amount available under our unsecured credit facility and (2) the property owner subsidiary's ability either to refinance the related mortgage debt or to sell the related property. If the property owner subsidiary is unable to refinance or sell the related property, the property may be conveyed to the lender through foreclosure or other means or the property owner subsidiary may declare bankruptcy. The failure to pay the balloon payment may strain relationships with lenders but we do not believe it will have a material adverse impact on our ability to obtain additional financings.

We face risks associated with returning properties to lenders.

A significant number of the properties in which we have an interest are subject to non-recourse mortgages, which generally provide that a lender's only recourse upon an event of default is to foreclose on the property. During 2012, a vacant property in each of Tulsa, Oklahoma and Clive, Iowa, in which we had an interest, were sold in foreclosure. As a result, we lost all of our interest in these properties and any future opportunities to re-tenant these properties. The loss of a significant number of properties to foreclosure or bankruptcy could adversely affect our financial condition and results of operations, relationships with lenders and ability to obtain additional financing in the future.

In addition, in instances not involving us, there are at least two cases in Michigan where a lender has been successful in triggering a carve out to the non-recourse nature of a mortgage loan because the value of the property declined below the balance of the mortgage. Although Michigan recently enacted laws preventing this and we believe this goes against the express intention of a non-recourse mortgage loan, to the extent these cases are not overturned on appeal or other courts grant similar relief to lenders, the ability of our property owner subsidiaries to return properties to lenders may be inhibited and we may be liable for all or a portion of such losses.

Certain of our properties are cross-collateralized, and certain of our indebtedness is cross-defaulted.

As of December 31, 2012, (1) the mortgages on three sets of two properties, one set of three properties and one set of four properties were cross-collateralized and (2) our unsecured revolving credit facility and our unsecured term loan were secured by ownership interest pledges in a borrowing base of properties. To the extent that any of the properties in which we have an interest are cross-collateralized, any default by the property owner subsidiary under the mortgage note relating to one property will result in a default under the financing arrangements relating to any other property that also provides security for that mortgage note or is cross-collateralized with such mortgage note.

In addition, substantially all of our corporate level borrowings contain cross-default provisions, which may be triggered if we default on certain indebtedness in excess of certain thresholds.

We face possible liability relating to environmental matters.

Under various federal, state and local environmental laws, statutes, ordinances, rules and regulations, as an owner of real property, our property owner subsidiaries may be liable for the costs of removal or remediation of certain hazardous or toxic substances at, on, in or under the properties in which we have an interest as well as certain other potential costs relating to hazardous or toxic substances. These liabilities may include government fines and penalties and damages for injuries to persons and adjacent property. These laws may impose liability without regard to whether we knew of, or were responsible for, the presence or disposal of those substances. This liability may be imposed on our property owner subsidiaries in connection with the activities of an operator of, or tenant at, the property. The cost of any required remediation, removal, fines or personal or property damages, and our liability therefore, could be significant and could exceed the value of the property and/or our aggregate assets. In addition, the presence of those substances, or the failure to properly dispose of or remove those substances, may adversely affect a property owner subsidiary's ability to sell or rent that property or to borrow using that property as collateral, which, in turn, would reduce our revenues and ability to make distributions.

A property can also be adversely affected either through physical contamination or by virtue of an adverse effect upon value attributable to the migration of hazardous or toxic substances, or other contaminants that have or may have emanated from other properties. Although the tenants of the properties in which we have an interest are primarily responsible for any environmental damages and claims related to the leased premises, in the event of the bankruptcy or inability of any of the tenants of the properties in which we have an interest to satisfy any obligations with respect to the property leased to that tenant, our property owner subsidiary may be required to satisfy such obligations. In addition, we may be held directly liable for any such damages or claims irrespective of the provisions of any lease.

From time to time, in connection with the conduct of our business, our property owner subsidiaries authorize the preparation of Phase I environmental reports and, when recommended, Phase II environmental reports, with respect to their properties.

There can be no assurance that these environmental reports will reveal all environmental conditions at the properties in which we have an interest or that the following will not expose us to material liability in the future:

- the discovery of previously unknown environmental conditions;
- changes in law;
- activities of tenants; or
- activities relating to properties in the vicinity of the properties in which we have an interest.

Changes in laws increasing the potential liability for environmental conditions existing on properties or increasing the restrictions on discharges or other conditions may result in significant unanticipated expenditures or may otherwise adversely affect the operations of the tenants of the properties in which we have an interest, which could adversely affect our financial condition or results of operations.

From time to time we are involved in legal proceedings arising in the ordinary course of our business.

Legal proceedings arising in the ordinary course of our business require time and effort. The outcomes of legal proceedings are subject to significant uncertainty. Certain legal proceedings that we were involved in during 2012 are described in note 19 to our Consolidated Financial Statements in Part II, Item 8 of this Annual Report. In the event that we are unsuccessful defending or prosecuting these proceedings, as applicable, we may incur a judgment or fail to realize an award of damages that could have an adverse effect on our financial condition.

Uninsured losses or a loss in excess of insured limits could adversely affect our financial condition.

We carry comprehensive liability, fire, extended coverage and rent loss insurance on certain of the properties in which we have an interest, with policy specifications and insured limits that we believe are customary for similar properties. However, with respect to those properties where the leases do not provide for abatement of rent under any circumstances, we generally do not maintain rent loss insurance. In addition, certain of our leases require the tenant to maintain all insurance on the property, and the failure of the tenant to maintain the proper insurance could adversely impact our investment in a property in the event of a loss. Furthermore, there are certain types of losses, such as losses resulting from wars, terrorism or certain acts of God, that generally are not insured because they are either uninsurable or not economically insurable. Should an uninsured loss or a loss in excess of insured limits occur, we could lose capital invested in a property as well as the anticipated future revenues from a property, while remaining obligated for any mortgage indebtedness or other financial obligations related to the property. Any loss of these types could adversely affect our financial condition and results of operations.

Future terrorist attacks, military conflicts and unrest in the Middle East could have a material adverse effect on general economic conditions, consumer confidence and market liquidity.

The types of terrorist attacks since 2001, on-going and future military conflicts and the continued unrest in the Middle East may affect commodity prices and interest rates, among other things. An increase in interest rates may increase our costs of borrowing, leading to a reduction in our earnings. The increase in the price of oil will also cause an increase in our operating costs, which may not be reimbursed by our tenants. Also, terrorist acts could result in significant damages to, or loss of, our properties or the value thereof.

We and the tenants of the properties in which we have an interest may be unable to obtain adequate insurance coverage on acceptable economic terms for losses resulting from acts of terrorism. Our lenders may require that we carry terrorism insurance even if we do not believe this insurance is necessary or cost effective. We may also be prohibited under the applicable lease from passing all or a portion of the cost of such insurance through to the tenant. Should an act of terrorism result in an uninsured loss or a loss in excess of insured limits, we could lose capital invested in a property as well as the anticipated future revenues from a property, while remaining obligated for any mortgage indebtedness or other financial obligations related to the property. Any loss of these types could adversely affect our financial condition.

Competition may adversely affect our ability to purchase properties.

There are numerous commercial developers, real estate companies, financial institutions, such as banks and insurance companies, and other investors, such as pension funds, private companies and individuals, with greater financial and other resources than we have that compete with us in seeking investments and tenants. Due to our focus on single-tenant properties located throughout the United States, and because most competitors are often locally and/or regionally focused, we do not always encounter the same competitors in each market. Our competitors include other REITs, financial institutions, insurance companies, pension funds, private companies and individuals. This competition may result in a higher cost for properties and lower returns and impact our ability to grow.

Our failure to maintain effective internal control over financial reporting could have a material adverse effect on our business, operating results and share price.

Section 404 of the Sarbanes-Oxley Act of 2002 requires annual management assessments of the effectiveness of our internal control over financial reporting. If we fail to maintain the adequacy of our internal control over financial reporting, as such standards may be modified, supplemented or amended from time to time, we will be required to disclose such failure and our financial reporting may not be relied on by most investors. Moreover, effective internal control, particularly related to revenue recognition, is necessary for us to produce reliable financial reports and to maintain our qualification as a REIT and is important in helping prevent financial fraud. If we cannot provide reliable financial reports or prevent fraud, our business and operating results could be harmed, our REIT qualification could be jeopardized, investors could lose confidence in our reported financial information and the trading price of our shares could drop significantly.

We may have limited control over our joint venture investments.

Our joint venture investments involve risks not otherwise present for investments made solely by us, including the possibility that our partner might, at any time, become bankrupt, have different interests or goals than we do, or take action contrary to our expectations, its previous instructions or our instructions, requests, policies or objectives, including our policy with respect to maintaining our qualification as a REIT. Other risks of joint venture investments include impasse on decisions, such as a sale, because neither we nor our partner has full control over the joint venture. Also, there is no limitation under our organizational documents as to the amount of funds that may be invested in joint ventures.

Certain of our trustees and officers may face conflicts of interest with respect to sales and refinancings.

E. Robert Roskind, our Chairman, beneficially owns a significant number of OP units, and as a result, may face different and more adverse tax consequences than our other shareholders will if we sell our interests in certain properties or reduce mortgage indebtedness on certain properties. Our Chairman may, therefore, have different objectives than our other shareholders regarding the appropriate pricing and timing of any sale of such properties or reduction of mortgage debt. In the event of an appearance of a conflict of interest, the conflicted trustee or officer is required to recuse himself or herself from any decision making or seek a waiver of our Code of Business Conduct and Ethics.

Our ability to change our portfolio is limited because real estate investments are illiquid.

Investments in real estate are relatively illiquid and, therefore, our ability to change our portfolio promptly in response to changed conditions is limited. Our Board of Trustees may establish investment criteria or limitations as it deems appropriate, but currently does not limit the number or type of properties in which we may seek to invest or on the concentration of investments in any one geographic region.

There can be no assurance that we will remain qualified as a REIT for federal income tax purposes.

We believe that we have met the requirements for qualification as a REIT for federal income tax purposes beginning with our taxable year ended December 31, 1993, and we intend to continue to meet these requirements in the future. However, qualification as a REIT involves the application of highly technical and complex provisions of the Code, for which there are only limited judicial or administrative interpretations. The Code provisions and income tax regulations applicable to REITs are more complex than those applicable to corporations. The determination of various factual matters and circumstances not entirely within our control may affect our ability to continue to qualify as a REIT. No assurance can be given that we have qualified or will remain qualified as a REIT. In addition, no assurance can be given that legislation, regulations, administrative interpretations or court decisions will not significantly change the requirements for qualification as a REIT or the federal income tax consequences of such qualification. If we do not qualify as a REIT, we would not be allowed a deduction for distributions to shareholders in computing our net taxable income. In addition, our income would be subject to tax at the regular corporate rates. We also could be disqualified from treatment as a REIT for the four taxable years following the year during which qualification was lost. Cash available for distribution to our shareholders would be significantly reduced or suspended for each year in which we do not qualify as a REIT. In that event, we would not be required to continue to make distributions. Although we currently intend to continue to qualify as a REIT, it is possible that future economic, market, legal, tax or other considerations may cause us, without the consent of the shareholders, to revoke the REIT election or to otherwise take action that would result in disqualification.

We may be subject to the REIT prohibited transactions tax, which could result in significant U.S. federal income tax liability to us.

In 2007, we announced a restructuring of our investment strategy, focusing on investing in core assets and the disposition of non-core assets. A REIT will incur a 100% tax on the net income from a prohibited transaction. Generally, a prohibited transaction includes a sale or disposition of property held primarily for sale to customers in the ordinary course of a trade or business. While we believe that the dispositions of our assets pursuant to the restructuring of our investment strategy should not be treated as prohibited transactions, whether a particular sale will be treated as a prohibited transaction depends on the underlying facts and circumstances. We have not sought and do not intend to seek a ruling from the Internal Revenue Service regarding any dispositions. Accordingly, there can be no assurance that our dispositions of such assets will not be subject to the prohibited transactions tax. If all or a significant portion of those dispositions were treated as prohibited transactions, we would incur a significant U.S. federal income tax liability, which could have a material adverse effect on our financial position, results of operations and cash flows.

Distribution requirements imposed by law limit our flexibility.

To maintain our status as a REIT for federal income tax purposes, we are generally required to distribute to our shareholders at least 90% of our taxable income for that calendar year. Our taxable income is determined without regard to any deduction for dividends paid and by excluding net capital gains. To the extent that we satisfy the distribution requirement but distribute less than 100% of our taxable income, we will be subject to federal corporate income tax on our undistributed income. In addition, we will incur a 4% nondeductible excise tax on the amount, if any, by which our distributions in any year are less than the sum of (i) 85% of our ordinary income for that year, (ii) 95% of our capital gain net income for that year and (iii) 100% of our undistributed taxable income from prior years. We intend to continue to make distributions to our shareholders to comply with the distribution requirements of the Code and to reduce exposure to federal income and nondeductible excise taxes. Differences in timing between the receipt of income and the payment of expenses in determining our taxable income and the effect of required debt amortization payments could require us to borrow funds on a short-term basis in order to meet the distribution requirements that are necessary to achieve the tax benefits associated with qualifying as a REIT.

There are certain limitations on a third party's ability to acquire us or effectuate a change in our control.

Limitations imposed to protect our REIT status. In order to protect against the loss of our REIT status, among other restrictions, our declaration of trust limits any shareholder from owning more than 9.8% in value of our outstanding equity shares, defined as common shares or preferred shares, subject to certain exceptions. These ownership limits may have the effect of precluding acquisition of control of us. Our Board of Trustees has granted limited waivers of the ownership limits to Vornado Realty, L.P., BlackRock, Inc. and Cohen & Steers Capital Management, Inc.

Severance payments under employment agreements. Substantial termination payments may be required to be paid under the provisions of employment agreements with certain of our executives upon a change of control and the subsequent termination of the executive. We have entered into employment agreements with four of our executive officers which provide that, upon the occurrence of a change in control of us (including a change in ownership of more than 50% of the total combined voting power of our outstanding securities, the sale of all or substantially all of our assets, dissolution, the acquisition, except from us, of 20% or more of our voting shares or a change in the majority of our Board of Trustees), if those executive officers are terminated without cause, as defined, those executive officers may be entitled to severance benefits based on their current annual base salaries and trailing average of recent annual cash bonuses as defined in the employment agreements. Accordingly, these payments may discourage a third party from acquiring us.

Our ability to issue additional shares. Our amended and restated declaration of trust authorizes 400,000,000 common shares, 100,000,000 preferred shares and 500,000,000 excess shares. Our Board of Trustees is authorized to cause us to issue these shares without shareholder approval. Our Board of Trustees is able to establish the preferences and rights of any such class or series of additional shares, which could have the effect of delaying or preventing someone from taking control of us, even if a change in control were in shareholders' best interests. At December 31, 2012, in addition to common shares, we had outstanding 1,935,400 Series C Preferred Shares and 6,200,000 Series D Preferred Shares. Our Series C and Series D Preferred Shares include provisions, such as increases in dividend rates or adjustments to conversion rates, that may deter a change of control. The establishment and issuance of shares of our existing series of preferred shares or a future class or series of shares could make a change of control of us more difficult.

Maryland Business Combination Act. The Maryland General Corporation Law, as applicable to Maryland REITs, establishes special restrictions against “business combinations” between a Maryland REIT and “interested shareholders” or their affiliates unless an exemption is applicable. An interested shareholder includes a person who beneficially owns, and an affiliate or associate of the trust who, at any time within the two-year period prior to the date in question was the beneficial owner of, 10% or more of the voting power of our then-outstanding voting shares, but a person is not an interested shareholder if the Board of Trustees approved in advance the transaction by which he otherwise would have become an interested shareholder, which approval may be conditioned by the Board of Trustees. Among other things, Maryland law prohibits (for a period of five years) a merger and certain other transactions between a Maryland REIT and an interested shareholder, or an affiliate of an interested shareholder. The five-year period runs from the most recent date on which the interested shareholder became an interested shareholder. Thereafter, any such business combination must be recommended by the Board of Trustees and approved by two super-majority shareholder votes unless, among other conditions, the common shareholders receive a minimum price (as defined in the Maryland General Corporation Law) for their shares and the consideration is received in cash or in the same form as previously paid by the interested shareholder for its shares. The statute permits various exemptions from its provisions, including business combinations that are exempted by the Board of Trustees prior to the time that the interested shareholder becomes an interested shareholder. The business combination statute could have the effect of discouraging offers to acquire us and of increasing the difficulty of consummating any such offers, even if such acquisition would be in shareholders' best interests. In connection with the Newkirk Merger, Vornado Realty Trust, which we refer to as Vornado, was granted a limited exemption from the definition of “interested shareholder.”

Maryland Control Share Acquisition Act. Maryland law provides that a holder of “control shares” of a Maryland REIT acquired in a “control share acquisition” has no voting rights with respect to such shares except to the extent approved by a vote of two-thirds of the votes entitled to be cast on the matter under the Maryland Control Share Acquisition Act. Shares owned by the acquirer, by our officers or by employees who are our trustees are excluded from shares entitled to vote on the matter. “Control Shares” means shares that, if aggregated with all other shares previously acquired by the acquirer or in respect of which the acquirer is able to exercise or direct the exercise of voting power (except solely by virtue of a revocable proxy), would entitle the acquirer to exercise voting power in electing trustees within one of the following ranges of voting power: one-tenth or more but less than one-third, one-third or more but less than a majority or a majority or more of all voting power. Control shares do not include shares the acquiring person is then entitled to vote as a result of having previously obtained shareholder approval. A “control share acquisition” means the acquisition of issued and outstanding control shares, subject to certain exceptions. If voting rights of control shares acquired in a control share acquisition are not approved at a shareholders meeting or if the acquiring person does not deliver an acquiring person statement as required under the statute, then, subject to certain conditions and limitations, the issuer may redeem any or all of the control shares for fair value. If voting rights of such control shares are approved at a shareholders meeting and the acquirer becomes entitled to vote a majority of the shares entitled to vote, all other shareholders may exercise appraisal rights. Any control shares acquired in a control share acquisition which are not exempt under our by-laws will be subject to the Maryland Control Share Acquisition Act. Our amended and restated by-laws contain a provision exempting from the Maryland Control Share Acquisition Act any and all acquisitions by any person of our shares. We cannot assure you that this provision will not be amended or eliminated at any time in the future.

Limits on ownership of our capital shares may have the effect of delaying, deferring or preventing someone from taking control of us.

For us to qualify as a REIT for federal income tax purposes, among other requirements, not more than 50% of the value of our outstanding capital shares may be owned, directly or indirectly, by five or fewer individuals (as defined for federal income tax purposes to include certain entities) during the last half of each taxable year, and these capital shares must be beneficially owned by 100 or more persons during at least 335 days of a taxable year of 12 months or during a proportionate part of a shorter taxable year (in each case, other than the first such year for which a REIT election is made). Our amended and restated declaration of trust includes certain restrictions regarding transfers of our capital shares and ownership limits.

Actual or constructive ownership of our capital shares in violation of the restrictions or in excess of the share ownership limits contained in our amended and restated declaration of trust would cause the violative transfer or ownership to be void or cause the shares to be transferred to a charitable trust and then sold to a person or entity who can own the shares without violating these limits. As a result, if a violative transfer were made, the recipient of the shares would not acquire any economic or voting rights attributable to the transferred shares. Additionally, the constructive ownership rules for these limits are complex, and groups of related individuals or entities may be deemed a single owner and consequently in violation of the share ownership limits.

However, these restrictions and limits may not be adequate in all cases to prevent the transfer of our capital shares in violation of the ownership limitations. The ownership limits discussed above may have the effect of delaying, deferring or preventing someone from taking control of us, even though a change of control could involve a premium price for the common shares or otherwise be in shareholders' best interests.

Legislative or regulatory tax changes could have an adverse effect on us.

At any time, the federal income tax laws governing REITs or the administrative interpretations of those laws may be amended. Any of those new laws or interpretations may take effect retroactively and could adversely affect us or you as a shareholder. REIT dividends generally are not eligible for the reduced rates currently applicable to certain corporate dividends (unless attributable to dividends from taxable REIT subsidiaries and otherwise eligible for such rates). As a result, investment in non-REIT corporations may be relatively more attractive than investment in REITs. This could adversely affect the market price of our shares.

Costs of complying with changes in governmental laws and regulations may adversely affect our results of operations.

We cannot predict what laws or regulations may be enacted in the future, how future laws or regulations will be administered or interpreted, or how future laws or regulations will affect our properties. Compliance with new laws or regulations, or stricter interpretation of existing laws, may require us or our tenants to incur significant expenditures, impose significant liability, restrict or prohibit business activities and could cause a material adverse effect on our results of operations.

Our reported financial results may be adversely affected by changes in accounting principles applicable to us and the tenants of properties in which we have an interest.

GAAP is subject to interpretation by various bodies formed to promulgate and interpret appropriate accounting principles such as the Financial Accounting Standards Board. A change in these principles or interpretations could have a significant effect on our reported financial results, could affect the reporting of transactions completed before the announcement of a change and could affect the business practices and decisions of the tenants of properties in which we have an interest.

We may change the dividend policy for our common shares in the future.

We currently expect to pay an aggregate annual dividend of \$0.60 per common share with respect to the 2013 taxable year. However, the decision to declare and pay dividends on our common shares in the future, as well as the timing, amount and composition of any such future dividends, will be at the sole discretion of our Board of Trustees in light of conditions then existing, including our earnings, financial condition, capital requirements, debt maturities, the availability of debt and equity capital, applicable REIT and legal restrictions and the general overall economic conditions and other factors. The actual dividend payable will be determined by our Board of Trustees based upon the circumstances at the time of declaration and the actual dividend payable may vary from such expected amount. Any change in our dividend policy could have a material adverse effect on the market price of our common shares.

Our Board of Trustees may change our investment policy without shareholders' approval.

Subject to our fundamental investment policy to maintain our qualification as a REIT and invest in core assets, our Board of Trustees will determine our investment and financing policies, growth strategy and our debt, capitalization, distribution, acquisition, disposition and operating policies.

Our Board of Trustees may revise or amend these strategies and policies at any time without a vote by shareholders. Changes made by our Board of Trustees may not serve the interests of shareholders and could adversely affect our financial condition or results of operations, including our ability to distribute cash to shareholders or qualify as a REIT. Accordingly, shareholders' control over changes in our strategies and policies is limited to the election of trustees.

The concentration of ownership by certain investors may limit other shareholders from influencing significant corporate decisions.

At December 31, 2012, Vornado beneficially owned approximately 18.5 million common shares, and E. Robert Roskind, our Chairman, beneficially owned approximately 1.1 million of our common shares (some of which are subject to restrictions under applicable award agreements) and approximately 1.5 million OP units, which are currently redeemable for approximately 1.7 million common shares, or with respect to a portion of the OP units, at our election, cash. Mr. Roskind and an employee of Vornado sit on our Board of Trustees as of the date of filing this Annual Report. Each of Vornado and Mr. Roskind may have substantial influence over us and on the outcome of any matters submitted to our shareholders for approval. In addition, certain decisions concerning our operations or financial structure may present conflicts of interest between each of Vornado and Mr. Roskind and our other equity or debt holders. In addition, Vornado engages in a wide variety of activities in the real estate business and may engage in activities that result in conflicts of interest with respect to matters affecting us, such as competition for properties and tenants.

Securities eligible for future sale may have adverse effects on our share price.

We have an unallocated universal shelf registration statement and a direct share purchase plan, pursuant to which we may issue additional common shares. In addition, as of December 31, 2012, an aggregate of approximately 7.8 million of our common shares were issuable upon the exercise of employee share options and upon the exchange of OP units. There were also 12.1 million common shares underlying our 6.00% Convertible Notes as of December 31, 2012, which is subject to increase upon certain events, including if we pay a quarterly common share dividend in excess of \$0.10 per common share. Depending upon the number of such securities issued, exercised or exchanged at one time, an issuance, exercise or exchange of such securities could be dilutive to or otherwise adversely affect the interests of holders of our common shares.

We are dependent upon our key personnel.

We are dependent upon key personnel whose continued service is not guaranteed. We are dependent on certain of our executive officers for business direction. We have employment agreements, which expire in January 2015, with each of T. Wilson Eglin, our Chief Executive Officer and President, E. Robert Roskind, our Chairman, Richard J. Rouse, our Vice Chairman and Chief Investment Officer, and Patrick Carroll, our Executive Vice President, Chief Financial Officer and Treasurer. However, an employment agreement does not itself prevent an employee from resigning.

Our inability to retain the services of any of our key personnel or our loss of any of their services could adversely impact our operations. We do not have key man life insurance coverage on our executive officers.

Item 1B. Unresolved Staff Comments

There are no unresolved written comments that were received from the SEC staff 180 days or more before the end of our fiscal year relating to our periodic or current reports under the Securities Exchange Act of 1934.

Item 2. Properties

Real Estate Portfolio

General. As of December 31, 2012, we had equity ownership interests in approximately 220 consolidated office, industrial and retail properties containing approximately 41.2 million square feet of rentable space, which were approximately 97.3% leased based upon net rentable square feet. Generally, all properties in which we have an interest are held through at least one property owner subsidiary.

The properties in which we have an interest are generally subject to net or similar leases; however, in certain leases, the property owner subsidiaries are responsible for roof, structural and other repairs. In addition, certain of the properties in which we have an interest are subject to leases in which the landlord is responsible for a portion of the real estate taxes, utilities and general maintenance. Furthermore, the property owner subsidiaries are or will be responsible for all operating expenses of any vacant properties, and the property owner subsidiaries may be responsible for a significant amount of operating expenses of multi-tenant properties.

Ground Leases. Certain of the properties in which we have an interest are subject to long-term ground leases where either the tenant of the building on the property or a third party owns and leases the underlying land to the property owner subsidiary. Certain of these properties are economically owned through the holding of industrial revenue bonds primarily for real estate tax abatement purposes and as such, neither ground lease payments nor bond interest payments are made or received, respectively. For certain of the properties held under a ground lease, the ground lessee has a purchase option. At the end of these long-term ground leases, unless extended or the purchase option exercised, the land together with all improvements thereon reverts to the landowner.

Leverage. As of December 31, 2012, we had interests in properties subject to outstanding mortgages and notes payable and corporate level debt of approximately \$1.9 billion with a weighted-average interest rate of approximately 5.4%.

Property Charts. The following tables list our properties by type, their locations, the primary tenant/guarantor, the net rentable square feet, the expiration of the primary lease term and percent leased, as applicable, as of December 31, 2012.

The 2012 net effective annual rent for the non-consolidated portfolio as of December 31, 2012 was \$12.32 per square foot and the weighted-average remaining lease term was 7.2 years.

The following chart sets forth certain information regarding lease expirations for the next ten years in our consolidated portfolio:

Year	Number of Lease Expirations	Square Feet	Annual Rent (\$000)	Percentage of Annual Rent
2013	35	1,368,416	\$ 10,508	3.4%
2014	44	3,718,157	37,914	12.1%
2015	34	3,904,154	26,508	8.5%
2016	29	3,332,923	20,567	6.6%
2017	19	3,662,665	19,170	6.1%
2018	35	3,990,002	27,892	8.9%
2019	22	4,215,544	35,865	11.5%
2020	14	1,992,442	14,907	4.8%
2021	15	2,841,597	26,869	8.6%
2022	6	663,922	6,374	2.0%

The following chart sets forth the 2012 annual GAAP base rent (\$000) based on the credit rating of our consolidated tenants at December 31, 2012⁽¹⁾:

	GAAP Base Rent	Percentage
Investment Grade	\$ 153,656	49.1%
Non-investment Grade	49,025	15.7%
Unrated	110,338	35.2%
	\$ 313,019	100.0%

(1) Credit ratings are based upon either tenant, guarantor or parent/sponsor. Generally, all multi-tenant assets are included in unrated. See Item 1A "Risk Factors", above.

Item 3. *Legal Proceedings*

From time to time we are directly and indirectly involved in legal proceedings arising in the ordinary course of our business. We believe, based on currently available information, and after consultation with legal counsel, that although the outcomes of those normal course proceedings are uncertain, the results of such proceedings, in the aggregate, will not have a material adverse effect on our business, financial condition and results of operations. See note 19 to the Consolidated Financial Statements in Part II, Item 8 for information on certain legal proceedings.

Item 4. *Mine Safety Disclosures*

Not applicable.

PART II.

Item 5. Market For Registrant's Common Equity, Related Stockholder Matters And Issuer Purchases of Equity Securities

Market Information. Our common shares are listed for trading on the NYSE under the symbol "LXP". The following table sets forth the high and low sales prices as reported by the NYSE (composite) for our common shares for each of the periods indicated below:

For the Quarters Ended:	High	Low
December 31, 2012	\$ 10.50	\$ 8.84
September 30, 2012	10.29	8.44
June 30, 2012	9.19	7.82
March 31, 2012	9.34	7.34
December 31, 2011	8.18	5.71
September 30, 2011	9.70	6.17
June 30, 2011	10.14	8.30
March 31, 2011	9.66	7.80

The per common share closing price on the NYSE (composite) was \$11.00 on February 21, 2013.

Holders. As of February 21, 2013, we had approximately 3,658 common shareholders of record.

Dividends. Since our predecessor's formation in 1993, we have made quarterly distributions without interruption.

The common share dividends paid in each quarter for the last five years are as follows:

Quarters Ended	2012	2011	2010	2009	2008
March 31,	\$ 0.125	\$ 0.115	\$ 0.10	\$ 0.18	\$ 2.475
June 30,	\$ 0.125	\$ 0.115	\$ 0.10	\$ 0.18 (1)	\$ 0.330
September 30,	\$ 0.125	\$ 0.115	\$ 0.10	\$ 0.18 (1)	\$ 0.330
December 31,	\$ 0.150	\$ 0.115	\$ 0.10	\$ 0.18 (1)	\$ 0.330

(1) Aggregate dividend paid 90% in our common shares and 10% in cash.

During the fourth quarter of 2007, we declared a special dividend of \$2.10 per common share which was paid in January 2008.

During 2009, we issued an aggregate 13,304,198 common shares in lieu of cash payments of common share dividends during the quarters ended June 30, September 30 and December 31, 2009 in accordance with Internal Revenue Service Revenue Procedure 2008-68.

While we intend to continue paying regular quarterly dividends to holders of our common shares, the authorization of future dividend declarations will be at the discretion of our Board of Trustees and will depend on our actual cash flow, our financial condition, capital requirements, the annual distribution requirements under the REIT provisions of the Code and such other factors as our Board of Trustees deems relevant. The actual cash flow available to pay dividends will be affected by a number of factors, including, among others, the risks discussed under "Risk Factors" in Part I, Item 1A and "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of this Annual Report.

We do not believe that the financial covenants contained in our debt instruments will have any adverse impact on our ability to pay dividends in the normal course of business to our common and preferred shareholders or to distribute amounts necessary to maintain our qualification as a REIT.

Direct Share Purchase Plan. We maintain a direct share purchase plan, which has two components, (i) a dividend reinvestment component and (ii) a direct share purchase component. Under the dividend reinvestment component, common shareholders and holders of OP units may elect to automatically reinvest their dividends and distributions to purchase our common shares free of commissions and other charges. We currently offer a 5.0% discount on the common shares purchased under the plan. We may, from time to time, either repurchase common shares in the open market or issue new common shares for the purpose of fulfilling our obligations under the dividend reinvestment program. Currently all of the common shares issued under this program are new common shares issued by us. Under the direct share purchase component, our current investors and new investors can make optional cash purchases of our common shares directly from us. In 2012, 2011 and 2010, we issued approximately 1.0 million, 1.1 million and 1.3 million common shares, respectively, under the plan, raising net proceeds of \$8.5 million, \$8.4 million and \$8.6 million, respectively.

ATM Program. In January 2013, we implemented an ATM program, under which we may, from time to time, sell up to \$100.0 million in common shares over the term of the program. As of the date of filing this Annual Report, we issued 3,409,927 common shares, under this ATM program, at a weighted average issue price of \$10.82 per common share, generating proceeds of approximately \$36.2 million after deducting approximately \$0.65 million of commissions. We intend to use the net proceeds from the ATM program for general working capital, which may include unspecified acquisitions and to repay indebtedness. As of the date of filing this Annual Report, we had approximately \$63.1 million in common shares available for issuance under the ATM program.

Equity Compensation Plan Information. The following table sets forth certain information, as of December 31, 2012, with respect to our 2011 Equity-Based Award Plan under which our equity securities are authorized for issuance as compensation.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	3,480,080	\$ 6.44	4,437,962
Equity compensation plans not approved by security holders	—	—	—
Total	3,480,080	\$ 6.44	4,437,962

Recent Sales of Unregistered Securities.

As previously disclosed, we issued an aggregate 4.5 million common shares upon conversion of \$31.1 million original principal amount of our 6.00% Convertible Notes at the stated conversion rate of 144.2599 common shares per \$1,000 principal amount of the notes during the fourth quarter of 2012. See Part I, Item 1 “Business”, above, for disclosure related to similar conversions subsequent to December 31, 2012.

Share Repurchase Program.

The following table summarizes common shares/OP units that were authorized to be repurchased during the fourth quarter of 2012 pursuant to publicly announced repurchase plans:

Period	Total number of shares/units purchased	Average price paid per share/unit (\$)	Total number of shares/units purchased as part of publicly announced plans or programs (1)	Maximum number of shares/units that may yet be purchased under the plans or programs (1)
October 1-31, 2012	—	\$ —	—	1,056,731
November 1-30, 2012	—	—	—	1,056,731
December 1-31, 2012	—	—	—	1,056,731
Fourth Quarter 2012	—	\$ —	—	1,056,731

(1) Share repurchase plan most recently announced on December 17, 2007, which plan has no expiration date.

In addition, during 2012, we repurchased and retired all outstanding (approximately 2.7 million) Series B Preferred Shares and 35 thousand Series C Preferred Shares for an aggregate purchase price of approximately \$70.0 million.

Item 6. Selected Financial Data

The following sets forth our selected consolidated financial data as of and for each of the years in the five-year period ended December 31, 2012. The selected consolidated financial data should be read in conjunction with Item 7 “Management's Discussion and Analysis of Financial Condition and Results of Operations” below, and the Consolidated Financial Statements and the related notes set forth in Item 8 “Financial Statements and Supplementary Data”, below. (\$000's, except per share data)

	2012	2011	2010	2009	2008

N/A - Ratio is below 1.0, deficit of \$25,454, \$64,877, \$49,287, \$12,049 and \$1,562 exists at December 31, 2012, 2011, 2010, 2009 and 2008, respectively.

All years have been adjusted to reflect the impact of (1) operating properties sold during the years ended December 31, 2012, 2011, 2010, 2009 and 2008, which are reflected in discontinued operations in the Consolidated Statements of Operations and (2) the 2008 basis adjustment to our equity invested in NLS as discussed in note 4 in the Consolidated Financial Statements.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

In this discussion, we have included statements that may constitute "forward-looking statements" within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are not historical facts but instead represent only our beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. These statements may relate to our future plans and objectives, among other things. By identifying these statements for you in this manner, we are alerting you to the possibility that our actual results may differ, possibly materially, from the anticipated results indicated in these forward-looking statements. Important factors that could cause our results to differ, possibly materially, from those indicated in the forward-looking statements include, among others, those discussed above in "Risk Factors" in Part I, Item 1A of this Annual Report and "Cautionary Statements Concerning Forward-Looking Statements" in Part I, of this Annual Report.

Overview

General. We are a self-managed and self-administered REIT formed under the laws of the state of Maryland. We operate primarily in one segment, single-tenant real estate assets, and our primary business is the investment in and acquisition, ownership, financing and management of a geographically diverse portfolio consisting of predominantly single-tenant office, industrial and retail properties.

As of December 31, 2012, we had equity ownership interests in approximately 220 consolidated real estate properties, located in 41 states and encompassing approximately 41.2 million square feet, approximately 97.3% of which was leased. A majority of these properties are subject to net or similar leases, where the tenant bears all or substantially all of the costs, including cost increases, for real estate taxes, utilities, insurance and ordinary repairs.

Our revenues and cash flows are generated predominantly from property rent receipts. As a result, growth in revenues and cash flows is directly correlated to our ability to (1) acquire income producing real estate assets, (2) re-lease properties that are vacant, or may become vacant, at favorable rental rates and (3) earn fee income.

Since 2010, we have seen an increase in acquisition opportunities and strengthening in the availability of capital. However, our business continues to be impacted in a number of ways by the uncertainty and volatility in the capital markets, including (1) a need to preserve capital, generate additional liquidity and improve our overall financial flexibility, (2) our ability to find attractive financing, (3) challenges in acquiring suitable property investments and (4) tenant uncertainty with respect to future space needs. However, it is difficult for us to predict when, or if, the economy will fully recover.

In an effort to diversify our risk, we invest across the United States in properties leased to tenants in various industries, including finance/insurance, technology, energy, automotive and consumer products. However, industry declines, to the extent we have concentration, and general economic declines could negatively impact our results of operations and cash flows.

In addition to corporate level borrowings, none of which matures in 2013 or 2014, as of the date of filing this Annual Report, we have consolidated property specific non-recourse mortgage debt with an aggregate of \$238.4 million and \$251.0 million in balloon payments that mature in 2013 and 2014, respectively.

Business Strategy. Our current business strategy is focused on maintaining a strong balance sheet and improving our long-term growth prospectus. See "Business" in Part I, Item 1 of this Annual Report for a detailed description of our current business strategy.

We believe a positive impact continues to result from our business strategy. In 2012, we increased our net assets by approximately \$163.0 million as compared to 2011. In 2012, we completed acquisitions/build-to-suit transactions for an aggregate capitalized cost of approximately \$247.0 million and reduced our weighted-average interest rate on outstanding consolidated indebtedness by approximately 34 basis points primarily by refinancing higher interest rate debt. In 2011 and 2010, we reduced our overall consolidated indebtedness by \$119.3 million and \$300.3 million, respectively, primarily (1) by repurchasing our 5.45% Exchangeable Guaranteed Notes and (2) through the sale, transfer or other disposition of properties to third parties and lenders.

We expect our business strategy will enable us to continue to improve our liquidity and strengthen our overall balance sheet. We believe liquidity and a strong balance sheet will allow us to take advantage of attractive investment opportunities as they arise, which will create meaningful shareholder value.

Investment Trends. Making investments in income producing single-tenant net-leased real estate assets is one of our primary focuses. The challenge we face is finding investments that will provide an attractive return without compromising our real estate underwriting criteria. We believe we have access to acquisition opportunities due to our relationships with developers, brokers, corporate users and sellers. When we acquire real estate assets, we look for general purpose office and industrial real estate assets subject to a long-term net-lease which have one or more of the following characteristics (1) a credit-worthy tenant, (2) adaptability to a variety of users, including multi-tenant use and (3) an attractive geographic location.

Commencing in 2008, acquisition activity decreased as we focused on retiring senior debt and preferred securities to improve our balance sheet. In response to the compression in capitalization rates for investment opportunities, we refocused our efforts into (1) repurchasing our senior debt at what we believe were attractive and secure yields to maturity and (2) disposing of real estate assets in compliance with regulatory and contractual requirements. Beginning in the fourth quarter of 2009, we began to see an increase in our acquisition activity.

Our acquisition volume for 2012 and 2011 consisted primarily of build-to-suit transactions whereby we (1) provide capital to developers who are engaged in build-to-suit transactions and/or commit to purchase the property from developers upon completion or (2) acquire a property subject to a single-tenant net-lease and engage a developer to complete construction of a build-to-suit property as required by the lease. We believe these arrangements offer developers and/or tenants access to capital while simultaneously providing us with attractive risk-adjusted projected yields.

We generally mitigate our cost exposure by requiring purchase agreements, development agreements and/or loan agreements to specify a maximum price and/or loan commitment amount prior to our investment. Cost overruns are generally the responsibility of the developer, or in some cases the prospective tenant. To further mitigate risk, we believe we perform stringent underwriting procedures such as, among other items, (1) requiring payment and performance bonds and/or completion guarantees from developers and/or contractors; (2) engaging third-party construction consultants and/or engineers to monitor construction progress and quality; (3) only hiring developers with a proven history of performance; (4) requiring developers to provide financial statements and in some cases personal guarantees from principals; (5) obtaining and reviewing detailed plans and constructions budgets; (6) requiring a long-term tenant lease to be executed prior to funding; and (7) securing liens on the property to the extent of construction funding.

The following is a summary of our property acquisitions and build-to-suit transactions for the year ended December 31, 2012:

Property Acquisitions

Location	Property Type	Square Feet (000's)	Capitalized Cost (millions)	Lease Term (Years)	Date Acquired
Missouri City, TX ⁽¹⁾	Industrial	—	\$ 23.0	20	2Q 2012
Phoenix, AZ	Office	252	\$ 53.2	17	4Q 2012
		<u>252</u>	<u>\$ 76.2</u>		

(1) Consists of a 152 acre industrial site with various structures, including storage areas and a rail spur.

Completed Build-to-Suit Transactions

Location	Property Type	Square Feet (000's)	Capitalized Cost (millions)	Lease Term (Years)	Date Acquired	Capitalized Cost Per Square Foot
Huntington, WV	Office	69	\$ 12.6	15	1Q 2012	\$ 182.81
Florence, SC	Office	32	\$ 5.1	12	1Q 2012	\$ 159.18
Shreveport, LA	Industrial	258	\$ 12.9	10	2Q 2012	\$ 50.19
Jessup, PA ⁽¹⁾	Office	150	\$ 24.9	15	3Q 2012	\$ 136.12
Saint Joseph, MO	Office	99	\$ 17.6	15	3Q 2012	\$ 177.76
Valdosta, GA ⁽²⁾	Retail	51	\$ 8.3	15	3Q 2012	\$ 161.69
Opelika, AL ⁽²⁾	Retail	52	\$ 8.3	15	4Q 2012	\$ 160.24
Eugene, OR	Office	80	\$ 17.6	15	4Q 2012	\$ 219.44
		<u>791</u>	<u>\$ 107.3</u>			

(1) Capitalized cost includes \$4.5 million funded by the tenant.

(2) Includes leasing costs of \$0.5 million for Valdosta and \$0.4 million for Opelika.

On-going Build-to-Suit Transactions

Location	Property Type	Square Feet (000's)	Expected Maximum Commitment/ Contribution (millions)	Lease Term (years)	Estimated Completion Date	Costs Incurred as of 12/31/12 ⁽¹⁾ (millions)
Long Island City, NY ⁽²⁾	Industrial	143	\$ 46.7	15	1Q 13	\$ 32.7
Denver, CO	Office	163	\$ 38.4	15	2Q 13	\$ 22.8
Tuscaloosa, AL	Retail	42	\$ 8.8	15	2Q 13	\$ 3.4
Rantoul, IL	Industrial	813	\$ 42.6	20	4Q 13	\$ 10.0
		<u>1,161</u>	<u>\$ 136.5</u>			<u>\$ 68.9</u>

(1) Balance includes equity credit received.

(2) Joint venture investment.

We can provide no assurance with respect to the completion, cost or timing of these on-going build-to-suit transactions.

Loan Investments. We invest in loan assets secured by single-tenant real estate assets, which (1) we feel comfortable owning for our investment should the borrower default for reasons other than an underlying tenant default or (2) are necessary for an efficient disposition of our equity interest in the property. During the the year ended December 31, 2012, we entered into an arrangement to fund the construction of a charter school in Homestead, Florida. The loan, which had an outstanding principal balance of approximately \$8.0 million as of December 31, 2012, matures in August 2014 and accrues interest at 7.5% per annum. During the fourth quarter of 2012, we contracted to lend up to \$32.6 million for the construction of a data center in Norwalk, Connecticut. The interest-only loan bears interest at 7.5% and matures in November 2014. The loan had an outstanding principal balance of \$3.5 million as of December 31, 2012.

During 2011, we loaned \$3.0 million to the buyer in connection with the sale of a vacant industrial property for \$3.7 million. The loan was secured by the property, bore interest at 7.8% and was satisfied in full in 2012. In 2011, we made a \$10.0 million mezzanine loan secured by a 100% pledge of all equity interests in the entities which owned two, to-be-constructed distribution facilities. The loan was scheduled to mature in June 2013 and had an interest rate of 15.0% for the first year and 18.5% for the second year. The loan was fully satisfied in November 2011 for a payment of \$11.5 million which included accrued interest and yield maintenance.

During 2011 and 2010, we made a 15.0% mortgage loan secured by an office building in Schaumburg, Illinois, which was scheduled to mature in January 2012 but could have been extended one additional year by the borrower for a 50 basis point fee. The mortgage loan had an outstanding balance of \$21.9 million at December 31, 2012. The property is leased through December 31, 2022 for an average annual rent of \$4.0 million. The tenant made a claim for a \$12.2 million tenant improvement allowance, which is being offset by withholding rent. The borrower defaulted on the mortgage loan and we have initiated foreclosure proceedings. If we are successful on the foreclosure proceedings we will be required to pay the balance of the tenant improvement allowance.

During 2010, we made a \$17.0 million loan secured by a combination of limited partner interests in entities that owned, and second mortgage liens or mortgage liens against, five medical facilities. This loan was guaranteed by a parent entity and principal and initially matured in December 2011 and required payments of interest only at a rate of 14.0% through February 2011 and 16.0% thereafter. The borrower prepaid an aggregate \$7.5 million in December 2010 and February 2011 in connection with the sale of certain collateral, and repaid the remaining \$9.5 million in December 2011.

Also as of December 31, 2012, the tenant of the property in Westmont, Illinois, which we sold in 2007 but issued a purchase mortgage to the buyer, exercised its option to terminate its lease effective November 2013. As of December 31, 2012, our note receivable was \$26.8 million.

Despite the current economic uncertainty, we have seen an increase in our acquisition pipeline, mostly consisting of build-to-suit transactions. We have several commitments and letters of intent for future acquisitions as of the first quarter of 2013, and we anticipate continued acquisition activity for 2013. However, we can provide no assurances that any of these transactions will be consummated or, if consummated, will be successful.

Leasing Trends. Re-leasing properties that are currently vacant or as leases expire at favorable effective rates is one of our primary asset management focuses. The primary risks associated with re-tenanting properties are (1) the period of time required to find a new tenant, (2) whether rental rates will be lower than previously received, (3) the significance of leasing costs such as commissions and tenant improvement allowances and (4) the payment of capital expenditures and operating costs such as real estate taxes, insurance and maintenance with no offsetting revenue.

Our property owner subsidiaries try to mitigate these risks by (1) staying in close contact with our tenants during the lease term in order to assess the tenant's current and future occupancy needs, (2) maintaining relationships with local brokers to determine the depth of the rental market and (3) retaining local expertise to assist in the re-tenanting of a property. However, no assurance can be given that once a property becomes vacant it will subsequently be re-let. Generally, a tenant in a single-tenant office property commences lease extension discussions well in advance of lease expiration. If the lease has a year or less remaining until expiration, there is a high likelihood that the tenant will not extend the lease.

If a property cannot be re-let to a single user and the property can be adapted to multi-tenant use, we determine whether the costs of adapting the property to multi-tenant use outweigh the benefit of funding operating costs while searching for a single-tenant.

Certain of the long-term leases on properties in which we have an ownership interest contain provisions that may mitigate the adverse impact of inflation on our operating results. Such provisions include clauses entitling us to receive (1) scheduled fixed base rent increases and (2) base rent increases based upon the consumer price index. In addition, a majority of the leases on the single-tenant properties in which we have an ownership interest require tenants to pay operating expenses, including maintenance, real estate taxes, insurance and utilities, thereby reducing our exposure to increases in costs and operating expenses. In addition, the leases on single-tenant properties in which we have an ownership interest are generally structured in a way that minimizes our responsibility for capital improvements.

Since 2008, tenants have been more aggressive in lease and lease renewal negotiations with respect to rental rate, tenant concessions and landlord responsibilities. As a result, the obligations of our property owner subsidiaries on new leases and newly renewed or extended leases have generally increased to include, among other items, some form of responsibility for capital repairs and replacements.

During 2012, we entered into 69 new leases and lease extensions encompassing approximately 7.4 million square feet. The average GAAP base rent on these extended leases was approximately \$7.22 per square foot compared to the average GAAP base rent on these leases before extension of \$7.62 per square foot. The weighted-average cost of tenant improvements and lease commissions was approximately \$9.40 per square foot for new leases and \$9.44 per square foot for extended leases. We expect renewal rents to be lower than expiring rents and tenant improvement allowance and leasing costs to remain at their current levels in the near future.

We continue to monitor the credit of tenants of properties in which we have an interest by (1) subscribing to S&P and Moody's, so that we can monitor changes in the ratings of our rated tenants, (2) reviewing financial statements that are publicly available or that are required to be delivered to us under the applicable lease, (3) monitoring news reports regarding our tenants and their respective businesses and (4) monitoring the timeliness of rent collections. Under current bankruptcy law, a tenant can generally assume or reject a lease within a certain number of days of filing its bankruptcy petition. If a tenant rejects the lease, a landlord's damages, subject to availability of funds from the bankruptcy estate, are generally limited to the greater of (1) one year's rent and (2) the rent for 15% of the remaining term of the lease not to exceed three years rent.

A vacant property in each of Tulsa, Oklahoma and Clive, Iowa in which we had an interest were disposed of in foreclosure in 2012. Our property owner subsidiaries may convey properties to lenders or the property owner subsidiary may declare bankruptcy in the future if a property owner subsidiary is unable to refinance, re-let or sell its vacated property or if a tenant renews at a lower rent or a new tenant pays a lower rent that does not justify a value of the property in excess of the mortgage balance.

Impairment charges. During 2012, 2011 and 2010, we incurred impairment charges on our assets of \$10.0 million, \$117.4 million and \$56.9 million, respectively, due primarily to the assets being sold below their carrying value and a deterioration in economic conditions since the acquisition of such assets. These real estate assets were primarily non-core assets including retail properties, under performing and multi-tenant properties.

Given the continued uncertainty in general economic conditions, we cannot estimate if we will incur, or the amount of, future impairment charges on our assets. See Part I, Item 1A "Risk Factors", of this Annual Report.

Critical Accounting Policies. Our accompanying consolidated financial statements have been prepared in accordance with GAAP, which require our management to make estimates that affect the amounts of revenues, expenses, assets and liabilities reported and related disclosures of contingent assets and liabilities. A summary of our significant accounting policies which are important to the portrayal of our financial condition and results of operations is set forth in note 2 to the Consolidated Financial Statements beginning on page 65 of this Annual Report and incorporated herein.

The following is a summary of our critical accounting policies, which require some of management's most difficult, subjective and complex judgments.

Basis of Presentation and Consolidation. Our consolidated financial statements are prepared on the accrual basis of accounting. The financial statements reflect our accounts and the accounts of our consolidated subsidiaries. We consolidate our wholly-owned subsidiaries, partnerships and joint ventures which we control through (1) voting rights or similar rights or (2) by means other than voting rights if we are the primary beneficiary of a variable interest entity, which we refer to as a VIE. Entities which we do not control and entities which are VIEs in which we are not the primary beneficiary are generally accounted for by the equity method. Significant judgments and assumptions are made by us to determine whether an entity is a VIE such as those regarding an entity's equity at risk, the entity's equity holders' obligations to absorb anticipated losses and other factors. In addition, the determination of the primary beneficiary of a VIE requires judgment to determine the party that has (1) power over the significant activities of the VIE and (2) an obligation to absorb losses or the right to receive benefits that could be potentially significant to the VIE.

Judgments and Estimates. Our management has made a number of estimates and assumptions relating to the reporting of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses to prepare our consolidated financial statements in conformity with GAAP. These estimates and assumptions are based on our management's best estimates and judgment. Our management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment. The current economic environment has increased the degree of uncertainty inherent in these estimates and assumptions. Our management adjusts such estimates when facts and circumstances dictate. The most significant estimates made include the recoverability of accounts receivable, allocation of property purchase price to tangible and intangible assets acquired and liabilities assumed, the determination of VIEs and entities that should be consolidated, the determination of impairment of long-lived assets, loans receivable and equity method investments, valuation and impairment of assets held by equity method investees, valuation of derivative financial instruments and the useful lives of long-lived assets.

Purchase Accounting and Acquisition of Real Estate. The fair value of the real estate acquired, which includes the impact of fair value adjustments for assumed mortgage debt related to property acquisitions, is allocated to the acquired tangible assets, consisting of land, building and improvements and identified intangible assets and liabilities, consisting of the value of above-market and below-market leases, other value of in-place leases and value of tenant relationships, based in each case on their fair values.

The fair value of the tangible assets of an acquired property (which includes land, building and improvements and fixtures and equipment) is determined by valuing the property as if it were vacant. The "as-if-vacant" value is then allocated to land and building and improvements based on our management's determination of relative fair values of these assets. Factors considered by our management in performing these analyses include an estimate of carrying costs during the expected lease-up periods considering current market conditions and costs to execute similar leases. In estimating carrying costs, our management includes real estate taxes, insurance and other operating expenses and estimates of lost rental revenue during the expected lease-up periods based on current market demand. Our management also estimates costs to execute similar leases including leasing commissions.

In allocating the fair value of the identified intangible assets and liabilities of an acquired property, above-market and below-market lease values are recorded based on the difference between the current in-place lease rent and management's estimate of current market rents. Below-market lease intangibles are recorded as part of deferred revenue and amortized into rental revenue over the non-cancelable periods and bargain renewal periods of the respective leases. Above-market leases are recorded as part of intangible assets and amortized as a direct charge against rental revenue over the non-cancelable portion of the respective leases.

The aggregate value of other acquired intangible assets, consisting of in-place leases and tenant relationship values, is measured by the excess of (1) the purchase price paid for a property over (2) the estimated fair value of the property as if vacant, determined as set forth above. This aggregate value is allocated between in-place lease values and tenant relationship values based on management's evaluation of the specific characteristics of each tenant's lease. The value of in-place leases is amortized to expense over the remaining non-cancelable periods and any bargain renewal periods of the respective leases. The value of tenant relationships is amortized to expense over the applicable lease term plus expected renewal periods.

Revenue Recognition. We recognize lease revenue on a straight-line basis over the term of the lease unless another systematic and rational basis is more representative of the time pattern in which the use benefit is derived from the leased property. Renewal options in leases with rental terms that are lower than those in the primary term are excluded from the calculation of straight line rent if the renewals are not reasonably assured. In those instances in which we fund tenant improvements and the improvements are deemed to be owned by us, revenue recognition will commence when the improvements are substantially completed and possession or control of the space is turned over to the tenant. When we determine that the tenant allowances are lease incentives, we commence revenue recognition when possession or control of the space is turned over to the tenant for tenant work to begin. The lease incentive is recorded as a deferred expense and amortized as a reduction of revenue on a straight-line basis over the respective lease term. Determining if a tenant allowance is a lease incentive requires significant judgment. We recognize lease termination payments as a component of rental revenue in the period received, provided that there are no further obligations under the lease; otherwise the lease termination payment is amortized on a straight-line basis over the remaining obligation period. All above-market lease assets, below-market lease liabilities and deferred rent assets or liabilities for terminated leases are charged against or credited to rental revenue in the period the lease is terminated. All other capitalized lease costs and lease intangibles are accelerated via amortization expense to the date of termination.

Gains on sales of real estate are recognized based on the specific timing of the sale as measured against various criteria related to the terms of the transactions and any continuing involvement associated with the properties. If the sales criteria are not met, the gain is deferred and the finance, installment or cost recovery method, as appropriate, is applied until the sales criteria are met. To the extent we sell a property and retain a partial ownership interest in the property, we recognize gain to the extent of the third-party ownership interest.

Accounts Receivable. We continuously monitor collections from our tenants and would make a provision for estimated losses based upon historical experience and any specific tenant collection issues that we have identified.

Impairment of Real Estate. We evaluate the carrying value of all tangible and intangible real estate assets for possible impairment when an event or change in circumstance has occurred that indicates its carrying value may not be recoverable. The evaluation includes estimating and reviewing anticipated future undiscounted cash flows to be derived from the asset. If such cash flows are less than the asset's carrying value, an impairment charge is recognized to the extent by which the asset's carrying value exceeds the estimated fair value. Estimating future cash flows is highly subjective and such estimates could differ materially from actual results.

Impairment of Equity Method Investments. We assess whether there are indicators that the value of our equity method investments may be impaired. An investment's value is impaired if we determine that a decline in the value of the investment below its carrying value is other-than-temporary. The assessment of impairment is highly subjective and involves the application of significant assumptions and judgments about our intent and ability to recover our investment given the nature and operations of the underlying investment, including the level of our involvement therein, among other factors. To the extent impairment has occurred, the loss is measured as the excess of the carrying amount of the investment over the estimated value of the investment.

Loans Receivable. We evaluate the collectability of both interest and principal of each of our loans, if circumstances warrant, to determine whether the loan is impaired. A loan is considered to be impaired, when based on current information and events, it is probable that we will be unable to collect all amounts due according to the existing contractual terms. Significant judgments are required in determining whether impairment has occurred. When a loan is considered to be impaired, the amount of the loss accrual is calculated by comparing the recorded investment to the value determined by discounting the expected future cash flows at the loan's effective interest rate, the loan's observable current market price or the fair value of the underlying collateral. Interest on impaired loans is recognized on a cash basis.

Acquisition, Development and Construction Arrangements. We evaluate loans receivable where we participate in residual profits through loan provisions or other contracts to ascertain whether we have the same risks and rewards as an owner or a joint venture partner. Where we conclude that such arrangements are more appropriately treated as an investment in real estate, we reflect such loan receivable as an equity investment in real estate under construction in the Consolidated Balance Sheets. In these cases, no interest income is recorded on the loan receivable and we record capitalized interest during the construction period. In arrangements where we engage a developer to construct a property or provide funds to a tenant to develop a property, we will capitalize the funds provided to the developer/tenant and internal costs of interest and real estate taxes, if applicable, during the construction period.

The accounting for these critical accounting policies and implementation of accounting guidance issued in the future involves the making of estimates based on current facts, circumstances and assumptions which could change in a manner that would materially affect management's future estimates with respect to such matters. Accordingly, future reported financial conditions and results could differ materially from financial conditions and results reported based on management's current estimates.

Liquidity

General. Since becoming a public company, our principal sources of liquidity have been (1) undistributed cash flows generated from our investments, (2) the public and private equity and debt markets, including issuances of OP units, (3) property specific debt, (4) corporate level borrowings, (5) commitments from co-investment partners and (6) proceeds from the sales of our investments.

Our ability to incur additional debt to fund acquisitions is dependent upon our existing leverage, the value of the assets we are attempting to leverage and general economic and credit market conditions, which may be outside of management's control or influence.

Cash Flows. We believe that cash flows from operations will continue to provide adequate capital to fund our operating and administrative expenses, regular debt service obligations and all dividend payments in accordance with REIT requirements in both the short-term and long-term. In addition, we anticipate that cash on hand, corporate level borrowings, capital recycling proceeds, issuances of equity, mortgage proceeds and our other principal sources of liquidity, will be available to provide the necessary capital required to fund our operations and allow us to grow.

Cash flows from operations as reported in the Consolidated Statements of Cash Flows totaled \$163.8 million for 2012, \$180.1 million for 2011 and \$164.8 million for 2010. Cash flows from operations in 2011 was primarily impacted by the receipt of a lease termination payment on our Lenexa, Kansas property. The underlying drivers that impact working capital and therefore cash flows from operations are the timing of (1) the collection of rents and tenant reimbursements, loan interest payments from borrowers, and advisory fees, and (2) the payment of interest on mortgage debt and operating and general and administrative costs. We believe the net-lease structure of the leases encumbering a majority of the properties in which we have an interest mitigates the risks of the timing of cash flows from operations since the payment and timing of operating costs related to the properties are generally borne directly by the tenant. Collection and timing of tenant rents is closely monitored by management as part of our cash management program.

Net cash used in investing activities totaled \$142.2 million in 2012, \$24.8 million in 2011 and \$24.8 million in 2010. Cash provided by investing activities related primarily to proceeds from the sale of properties, collection of loans receivable, distributions from non-consolidated entities in excess of accumulated earnings, proceeds from the sale of interests in non-consolidated properties and changes in escrow deposits and restricted cash. Cash used in investing activities related primarily to investments in real estate properties, co-investment programs and loans receivable, and an increase in deferred leasing costs, deposits and restricted cash. Therefore, the fluctuation in investing activities relates primarily to the timing of investments and dispositions.

Net cash used in financing activities totaled \$59.4 million in 2012, \$144.3 million in 2011 and \$141.2 million in 2010. Cash provided by financing activities was primarily attributable to net proceeds from the issuance of common shares, contributions from noncontrolling interests, non-recourse mortgages and corporate borrowings, offset by dividend and distribution payments, repurchases of equity interests, forward equity commitment payments, net, an increase in deferred financing costs and debt payments and repurchases.

Public and Private Equity and Debt Markets. We access the public and private equity and debt markets when we (1) believe conditions are favorable and (2) have a compelling use of proceeds. During 2012, 2011 and 2010, we raised net proceeds of approximately \$164.4 million, \$99.0 million and \$166.4 million, respectively, through the issuance of common shares. We primarily used these proceeds to retire indebtedness.

During 2007, we issued an aggregate \$450.0 million of 5.45% Exchangeable Guaranteed Notes due in 2027. Since 2008, we repurchased and retired all notes for \$358.1 million in cash and 1.6 million common shares having a value at issuance of \$23.5 million (or \$14.50 per share).

During 2010, we issued \$115.0 million aggregate principal amount of 6.00% Convertible Notes. The notes pay interest semi-annually in arrears and mature in January 2030. The holders of the notes may require us to repurchase their notes in January 2017, January 2020 and January 2025 for cash equal to 100% of the principal of the notes to be repurchased, plus any accrued and unpaid interest. We may not redeem any notes prior to January 2017, except to preserve our REIT status. Thereafter, we may redeem the notes for cash equal to 100% of the principal of the notes to be redeemed, plus any accrued and unpaid interest. As of the date of filing this Annual Report, the notes have a conversion rate of 144.2599 common shares per \$1,000 principal amount of the notes, representing a conversion price of approximately \$6.93 per common share. The conversion rate is subject to adjustment under certain circumstances, including increases in our dividend rate above a certain threshold and the issuance of stock dividends. The notes are convertible by the holders under certain circumstances for cash, common shares or a combination of cash and common shares at our election. During 2012, holders of the notes converted an aggregate \$31.1 million of notes for 4.5 million common shares and an aggregate cash payment by us of \$2.4 million plus accrued and unpaid interest.

During 2012 and 2011, we repurchased and retired all outstanding Series B Preferred Shares (approximately 3.2 million) and approximately 0.2 million Series C Preferred Shares for an aggregate purchase price of \$85.5 million, which was at a \$1.5 million discount to the liquidation preferences of the preferred shares.

During 2008, we entered into a forward equity commitment to purchase 3.5 million of our common shares at a price of \$5.60 per share and we agreed to make floating payments during the term of the forward purchase at LIBOR plus 250 basis points per annum and we retained all cash dividend payments. We prepaid \$15.6 million of the \$19.6 million purchase price during 2008 and 2009. We settled the commitment in October 2011 for a cash payment of approximately \$4.0 million and retired approximately 4.0 million common shares.

We may access these markets and other markets in the future to implement our business strategy and to fund future growth. However, the continued general economic uncertainty and the volatility in these markets makes accessing these markets challenging.

UPREIT Structure. Our UPREIT structure permits us to effect acquisitions by issuing OP units to a property owner as a form of consideration in exchange for the property. Substantially all outstanding OP units are redeemable by the holder at certain times on a one OP unit for approximately 1.13 common shares or, at our election, with respect to certain OP units, cash. Substantially all outstanding OP units require us to pay quarterly distributions to the holders of such OP units equal to the dividends paid to our common shareholders on an as redeemed basis and the remaining OP units have stated distributions in accordance with their respective partnership agreement. To the extent that our dividend per share is less than a stated distribution per unit per the applicable partnership agreement, the stated distributions per unit are reduced by the percentage reduction in our dividend. We are party to funding agreements with our operating partnerships under which we may be required to fund distributions made on account of OP units. No OP units have a liquidation preference. The number of common shares that will be outstanding in the future should be expected to increase, and income (loss) attributable to noncontrolling interests should be expected to decrease (increase), as such OP units are redeemed for our common shares.

As of December 31, 2012, there was a total of approximately 3.8 million OP units outstanding other than OP units held by us. Of this total, approximately 1.5 million are held by related parties.

As a result of the general deterioration in real estate values which commenced in 2008, few sellers of real estate are seeking OP units as a form of consideration.

Property Specific Debt. As of December 31, 2012, our property owner subsidiaries have related balloon payments of \$238.4 million and \$251.0 million maturing in 2013 and 2014, respectively. With respect to mortgages encumbering properties where the expected lease rental revenues are sufficient to provide an estimated property value in excess of the mortgage balance, we believe our property owner subsidiaries have sufficient sources of liquidity to meet these obligations through future cash flow from operations, the credit markets and, if determined appropriate by us, a capital contribution from us from either cash on hand (\$34.0 million at December 31, 2012), borrowing capacity on our primary credit facility (\$296.3 million as of December 31, 2012).

In the event that the estimated property value is less than the mortgage balance, the mortgages encumbering the properties in which we have an interest are generally non-recourse to us and the property owner subsidiaries, such that a property owner subsidiary may, if appropriate, satisfy a mortgage obligation by transferring title of the property to the lender or permitting a lender to foreclose. There are significant risks associated with conveying properties to lenders through foreclosure which are described in "Risk Factors" in Part I, Item 1A of this Annual Report.

We expect to continue to use property specific, non-recourse mortgages in certain situations as we believe that by properly matching a debt obligation, including the balloon maturity risk, with the terms of a lease, our cash-on-cash returns increase and the exposure to residual valuation risk is reduced. However, the current economic environment has impacted our ability to obtain property specific debt on favorable terms in many cases. In 2008, property specific mortgage lending nearly ceased. Since then, the number of lenders and available loan proceeds have diminished significantly. In addition, the required loan to value ratios have decreased and the covenants, including required reserve amounts, have increased. Accordingly, we expect to primarily use corporate level borrowings to finance our acquisitions and debt maturities.

In 2012 and 2011, we obtained, through consolidated property owner subsidiaries, \$121.0 million and \$15.0 million, respectively, in non-recourse mortgage loans with interest rates ranging from 4.0% to 4.7% and maturity dates ranging from 2016 to 2023.

Corporate Borrowings. In 2012, we procured a \$255.0 million secured term loan from Wells Fargo Bank, National Association, as agent. The secured term loan matures in January 2019 and requires regular payments of interest only at an interest rate dependent on our leverage ratio, as defined therein, ranging from 2.00% to 2.85% over LIBOR. Upon the date when we obtain an investment grade debt rating from at least two of S&P, Moody's and Fitch, the interest rate under the secured term loan will be dependent on our debt rating. We may not prepay any outstanding borrowings under the secured term loan facility through January 12, 2013, but may prepay outstanding borrowings anytime thereafter, however at a premium for the next three years. We entered into aggregate interest-rate swap agreements to fix LIBOR at an aggregate weighted-average rate of 1.42% on \$255.0 million of borrowings under the secured term loan for seven years. As of the date of filing of this Annual Report, \$255.0 million was outstanding, the collateral securing the term loan was released and we were in compliance with the financial covenants contained in the term loan agreement.

In addition, in 2012, we refinanced our secured \$300.0 million revolving credit facility procured in January 2011 with KeyBank, as agent, with a \$300.0 million secured revolving credit facility. The secured revolving facility required payments of interest at rates ranging from 1.625% to 2.375% over LIBOR depending on our leverage ratios, as defined therein. The secured revolving credit facility was to mature in January 2015, but could be extended to January 2016 at our option.

See Part I, Item 1 "Business", for disclosure relating to the refinancing of our secured credit facility with an unsecured credit facility and the amendment of our secured term loan to an unsecured term loan subsequent to December 31, 2012. As of the date of filing of this Annual Report, no amounts were outstanding on our unsecured credit facility and we were in compliance with the financial covenants contained in the credit agreement governing our unsecured credit facility.

In March 2008, we obtained \$25.0 million and \$45.0 million original principal amount secured term loans from KeyBank. The loans were fully satisfied in January 2012 with proceeds from the secured term loan and our credit facility. Also in January 2012, we fully satisfied the remaining \$62.2 million original principal amount outstanding of our 5.45% Exchangeable Guaranteed Notes due in 2027 obtained in 2007.

During 2007, we issued \$200.0 million in Trust Preferred Securities, which bear interest at a fixed rate of 6.804% through April 2017 and thereafter at a variable rate of three month LIBOR plus 170 basis points through maturity. These securities are (1) classified as debt, (2) due in 2037 and (3) currently redeemable by us. As of December 31, 2012 and 2011, there were \$129.1 million of these securities outstanding.

While property specific mortgages have become harder to obtain, corporate level borrowings have generally been available and we expect this to continue to be the case in the near future. We may seek a credit rating from certain credit agencies to improve the cost of our corporate level borrowings. However, no assurance can be given that we will seek such a rating or what rating we may receive.

Co-investment Programs and Joint Ventures. We believe that entering into co-investment programs and joint ventures with institutional investors and other real estate companies is a good way to access private capital while mitigating our risk in certain assets and increasing our return on equity to the extent we earn management or other fees. However, investments in co-investment programs and joint ventures limit our ability to make investment decisions unilaterally relating to the assets and limit our ability to deploy capital. If we continue to grow, we expect to enter into co-investment programs and joint ventures primarily with respect to assets that we ordinarily would not have invested in such, as non-core assets. We believe this mitigates our exposure to the risks inherent in non-core assets. In 2012, we entered into two joint ventures which invested in an inpatient rehabilitation hospital and a retail property.

Capital Recycling. Part of our strategy to effectively manage our balance sheet involves pursuing and executing well on property dispositions and recycling of capital. During 2012, we disposed of our interests in properties, including a non-consolidated property, for a gross price of \$181.4 million. These proceeds were used to retire indebtedness encumbering properties in which we have an interest and make investments.

Liquidity Needs. Our principal liquidity needs are the contractual obligations set forth under the heading "Contractual Obligations," below, and the payment of dividends to our shareholders and distributions to the holders of OP units.

As of December 31, 2012, we had approximately \$1.9 billion of indebtedness, consisting of mortgages and notes payable outstanding, 6.00% Convertible Notes and Trust Preferred Securities, with a weighted-average interest rate of approximately 5.4%. The ability of a property owner subsidiary to make debt service payments depends upon the rental revenues of its property and its ability to refinance the mortgage related thereto, sell the related property, or access capital from us or other sources. A property owner subsidiary's ability to accomplish such goals will be affected by numerous economic factors affecting the real estate industry, including the risks described under "Risk Factors" in Part I, Item 1A of this Annual Report.

If we are unable to satisfy our contractual obligations and other operating costs with our cash flow from operations, we intend to use borrowings and proceeds from issuances of equity or debt securities. If a property owner subsidiary is unable to satisfy its contractual obligations and other operating costs, it may default on its obligations and lose its assets in foreclosure or through bankruptcy proceedings.

We elected to be taxed as a REIT under Sections 856 through 860 of the Code, commencing with our taxable year ended December 31, 1993. If we qualify for taxation as a REIT, we generally will not be subject to federal corporate income taxes on our net taxable income that is currently distributed to shareholders.

In connection with our intention to continue to qualify as a REIT for federal income tax purposes, we expect to continue paying regular dividends to our shareholders. These dividends are expected to be paid from operating cash flows and/or from other sources. Since cash used to pay dividends reduces amounts available for capital investments, we generally intend to maintain a conservative dividend payout ratio, reserving such amounts as we consider necessary for the maintenance or expansion of properties in our portfolio, debt reduction, the acquisition of interests in new properties as suitable opportunities arise, and such other factors as our Board of Trustees considers appropriate.

We paid approximately \$103.3 million in cash dividends to our common and preferred shareholders in 2012. Although our property owner subsidiaries receive the majority of our base rental payments on a monthly basis, we intend to continue paying dividends quarterly. Amounts accumulated in advance of each quarterly distribution are invested by us in short-term money market or other suitable instruments.

Capital Resources

General. Due to the net-lease structure of a majority of our investments, our property owner subsidiaries historically have not incurred significant expenditures in the ordinary course of business to maintain the properties in which we have an interest. However, particularly since 2008, as leases have expired, our property owner subsidiaries have incurred costs in extending the existing tenant leases, re-tenanting the properties with a single-tenant, or converting the property to multi-tenant use. The amounts of these expenditures can vary significantly depending on tenant negotiations, market conditions and rental rates.

Single-Tenant Properties. We do not anticipate significant capital expenditures at the single-tenant properties in which we have an interest that are subject to net or similar leases since the tenants at these properties generally bear all or substantially all of the cost of property operations, maintenance and repairs. However, at certain properties subject to net leases, our property owner subsidiaries are responsible for replacement and/or repair of certain capital items, which may or may not be reimbursed. At certain single-tenant properties that are not subject to a net lease, our property owner subsidiaries have a level of property operating expense responsibility, which may or may not be reimbursed.

Multi-Tenant Properties. Primarily as a result of non-renewals at single-tenant net-lease properties, we have interests in multi-tenant properties in our consolidated portfolio. While tenants are generally responsible for increases over base year expenses, our property owner subsidiaries are generally responsible for the base-year expenses and capital expenditures at these properties.

Vacant Properties. To the extent there is a vacancy in a property, our property owner subsidiary would be obligated for all operating expenses, including real estate taxes and insurance. If a property is vacant for an extended period of time, our property owner subsidiary may incur substantial capital expenditure costs to re-tenant the property.

Property Expansions. Under certain leases, tenants have the right to expand the facility located on a property in which we have an interest. In the past, our property owner subsidiary has generally funded, and in the future our property owner subsidiary intends to generally fund, these property expansions with either additional secured borrowings, the repayment of which was, and will be, funded out of rental increases under the leases covering the expanded properties or capital contributions from us.

Ground Leases. The tenants of properties in which we have an interest generally pay the rental obligations on ground leases either directly to the fee holder or to our property owner subsidiary as increased rent. However, our property owner subsidiaries are responsible for these payments under certain leases and at vacant properties.

Environmental Matters. Based upon management's ongoing review of the properties in which we have an interest, management is not aware of any environmental condition with respect to any of these properties, which would be reasonably likely to have a material adverse effect on us. There can be no assurance, however, that (1) the discovery of environmental conditions, which were previously unknown, (2) changes in law, (3) the conduct of tenants or (4) activities relating to properties in the vicinity of the properties in which we have an interest, will not expose us to material liability in the future. Changes in laws increasing the potential liability for environmental conditions existing on properties or increasing the restrictions on discharges or other conditions may result in significant unanticipated expenditures or may otherwise adversely affect the operations of the tenants of properties in which we have an interest.

Results of Operations

Year ended December 31, 2012 compared with December 31, 2011. The increase in total gross revenues in 2012 of \$31.1 million was primarily attributable to an increase in rental revenue of \$32.7 million offset in part by a decrease in tenant reimbursements and advisory and incentive fees of \$1.4 million and \$0.2 million, respectively.

The increase in rental revenue was primarily due to (1) 2012 and 2011 property acquisition revenue of \$25.4 million, including \$14.2 million from NLS properties acquired on September 1, 2012, (2) increased occupancy revenue from the Transmerica Tower in Baltimore, Maryland of \$7.5 million and (3) \$3.3 million of revenue recognized on our office property in Orlando, Florida due to the commencement of a new lease. These increases were partially offset by a decrease in revenue of \$4.7 million from our office property in Farmington Hills, Michigan due to lease rollover.

The decrease in interest and amortization expense of \$7.7 million was primarily due to (1) a reduction in the weighted-average interest rate on outstanding indebtedness, (2) retirement of debt which had corresponding debt discount amortization, (3) lower deferred financing cost amortization and (4) greater interest capitalized.

Depreciation and amortization increased \$5.5 million primarily due to the acquisition of real estate properties in 2012 and 2011 offset by (1) the acceleration of amortization on certain lease intangible assets due to tenant lease terminations and (2) assets becoming fully amortized in 2012.

The increase in property operating expense of \$2.0 million was primarily due to an increase in occupancy at certain multi-tenant properties which had an increase in costs and the acquisition of properties with operating expense obligations.

The increase in general and administrative expense of \$1.8 million was primarily due to a \$2.1 million increase in personnel costs.

Non-operating income decreased \$6.1 million primarily due to the satisfaction of notes receivable resulting in less interest earned and reduced interest income earned on a note receivable currently in default secured by an office property in Schaumburg, Illinois.

The change in the value of our forward equity commitment of \$2.0 million was primarily due to the settlement of the commitment in October 2011.

The litigation reserve of \$2.8 million in 2012 relates to a litigation that has been settled with a payment by us of \$2.8 million.

The increase in debt satisfaction charges, net of \$9.5 million was primarily due to the conversion of \$31.1 million 6.00% Convertible Notes in 2012 and the write-off of deferred financing costs relating to the satisfaction of the \$60.6 million term loans during the first quarter of 2012.

The gain on acquisition of \$167.9 million primarily represents the gain recognized due to the increase in fair value of our investment in NLS at the date of acquisition of the remaining interest in NLS.

Impairment charges decreased by \$31.7 million due to the timing of triggering events on properties held and used in operations.

The increase in the provision for income taxes of \$1.8 million was primarily the result of the write-off of a deferred tax liability relating to the transfer of certain assets from our wholly-owned taxable REIT subsidiary to the REIT itself during the first quarter of 2011.

The decrease in equity in earnings of non-consolidated entities of \$8.8 million was primarily due to (1) a \$9.3 million decrease in earnings from NLS primarily due to the consolidation of NLS on September 1, 2012, (2) a \$1.4 million reduction due to the consolidation in 2012 of a previously non-consolidated property and (3) a reduction in earnings from various joint ventures of \$1.5 million, offset by a \$1.8 million increase in earnings recognized on our interests in Concord and CDH CDO and a \$1.6 million impairment charge recognized in 2011 on an investment in a non-consolidated entity.

Discontinued operations represent properties sold or held for sale. The increase in net income from discontinued operations of \$76.4 million was primarily due to a decrease in impairment charges of \$75.8 million, an increase in gains on sales of properties of \$6.7 million and a decrease in debt satisfaction charges of \$0.4 million, offset in part by a \$6.4 million increase in loss from discontinued operations.

The increase in net income attributable to noncontrolling interests of \$14.5 million was primarily due to a decrease in impairment charges incurred by non-wholly owned entities.

The increase in net income attributable to common shareholders of \$260.6 million was primarily due to the items discussed above.

The increase in net income or decrease in net loss in future periods will be closely tied to the level of acquisitions made by us. Without acquisitions, the sources of growth in net income are limited to index adjusted rents (such as the consumer price index), reduced interest expense on amortizing mortgages and variable rate indebtedness and by controlling other variable overhead costs. However, there are many factors beyond management's control that could offset these items including, without limitation, increased interest rates and tenant monetary defaults and the other risks described in this Annual Report.

Year ended December 31, 2011 compared with December 31, 2010. Of the increase in total gross revenues in 2011 of \$8.5 million, \$6.6 million is attributable to an increase in rental revenue and a \$1.0 million increase in tenant reimbursements due to an increase in acquisition and leasing activity and an increase in advisory and incentive fees of \$0.9 million primarily relating to third-party managed account return hurdles being met.

The increase in rental revenue was primarily due to (1) 2011 and 2010 property acquisition revenue of \$7.9 million, (2) increased occupancy revenue from the Transamerica Tower in Baltimore, Maryland of \$2.3 million and (3) \$2.1 million of revenue recognized on our Farmington Hills, Michigan property due to a tenant's lease termination. These increases were offset by a decrease of \$5.6 million due to lease rollover and amendments.

The decrease in interest and amortization expense of \$10.0 million is primarily due to the decrease in indebtedness.

Depreciation and amortization increased by \$6.9 million primarily due to the acquisition of real estate properties and the acceleration of amortization on certain lease intangible assets due to tenant lease terminations.

The decrease in property operating expense of \$1.0 million is primarily due to a decrease in the operating expenses at certain multi-tenant properties which had an increase in vacancy resulting in lower costs, and certain tenants taking direct responsibility for payments of operating costs in which our property owner subsidiaries have an interest.

Non-operating income increased \$1.2 million which is primarily due to investments made in 2011 and 2010.

The change in value of our forward equity commitment of \$6.9 million was primarily due to the period change in the per share price of our common shares.

The increase in impairment charges and loan losses of \$29.1 million was due to \$35.9 million in impairment charges recognized in 2011 relating to our non-core properties, including certain retail, underperforming and multi-tenanted properties. We explored the possible disposition of these properties and determined that the estimated undiscounted future cash flows were below the properties carrying values. During 2010, the charges related to loan loss reserves (\$3.9 million) on two investments and a \$3.0 million impairment charge due to operational considerations at a property.

The charge in the benefit (provisions) for income taxes of \$2.4 million was primarily the result of the write-off of a deferred tax liability relating to the transfer of certain assets from our wholly-owned taxable REIT subsidiary to the REIT itself.

The increase in equity in earnings of non-consolidated entities of \$8.6 million is primarily due to \$2.2 million earned from an investment in LW Sofi LLC, \$1.4 million earned on a new non-consolidated entity, Pemlex LLC, prior to consolidation and cash distributions of \$4.0 million received from our investments in Concord related entities.

Discontinued operations represents properties sold or held for sale. The total discontinued operations loss increased \$41.3 million due to an increase in impairment charges of \$31.4 million, a decrease in gains on sales of properties of \$8.1 million and an increase in debt satisfaction charges, net of \$3.5 million, offset by an increase in the income from discontinued operations of \$1.8 million.

Net loss attributable to noncontrolling interests increased \$5.7 million primarily due to an increase in impairment charges incurred on noncontrolling interest properties.

Net loss attributable to common shareholders increased \$45.6 million primarily due to the items discussed above.

Same-Store Results

Same-store results includes all consolidated properties except properties acquired and sold in 2012 and 2011. Our historical same-store occupancy was 97.0% at December 31, 2012 compared to 96.5% at December 31, 2011. The following presents our consolidated same-store net operating income, or NOI, for the years ended December 31, 2012 and 2011 (\$000):

	2012	2011
Total base rent	\$ 272,542	\$ 272,208
Tenant reimbursements and other	29,257	31,396
Property operating expenses	(58,169)	(57,788)
Same-store NOI - Cash basis	<u>\$ 243,630</u>	<u>\$ 245,816</u>

The change in our same-store NOI from 2011 to 2012 was a decrease of 0.9%. This was primarily due to a decrease in tenant reimbursements and an increase in property operating expenses due to the timing of new tenant leases and the establishment of base years for certain tenants.

Funds From Operations

We believe that Funds from Operations, or FFO, which is a non-GAAP measure, is a widely recognized and appropriate measure of the performance of an equity REIT. We believe FFO is frequently used by securities analysts, investors and other interested parties in the evaluation of REITs, many of which present FFO when reporting their results. FFO is intended to exclude GAAP historical cost depreciation and amortization of real estate and related assets, which assumes that the value of real estate diminishes ratably over time. Historically, however, real estate values have risen or fallen with market conditions. As a result, FFO provides a performance measure that, when compared year over year, reflects the impact to operations from trends in occupancy rates, rental rates, operating costs, development activities, interest costs and other matters without the inclusion of depreciation and amortization, providing perspective that may not necessarily be apparent from net income.

The National Association of Real Estate Investment Trusts, or NAREIT, defines FFO as “net income (or loss) computed in accordance with GAAP, excluding gains (or losses) from sales of property, plus real estate depreciation and amortization and after adjustments for unconsolidated partnerships and joint ventures.” NAREIT clarified its computation of FFO to exclude impairment charges on depreciable real estate owned directly or indirectly. FFO does not represent cash generated from operating activities in accordance with GAAP and is not indicative of cash available to fund cash needs.

We present Reported Company FFO, which differs from FFO as it includes our OP units, our Series C Preferred Shares, and our 6.00% Convertible Notes, because these securities are convertible, at the holder's option, into our common shares. Management believes this is appropriate and relevant to securities analysts, investors and other interested parties because we present Reported Company FFO on a company-wide basis as if all securities that are convertible, at the holder's option, into our common shares, are converted. We also present Company FFO, as adjusted, which adjusts Reported Company FFO for certain items which we believe are non-recurring and not indicative of the operating results of our real estate portfolio. We believe this is an appropriate presentation as it is frequently requested by security analysts, investors and other interested parties. Since others do not calculate funds from operations in a similar fashion, Reported Company FFO and Company FFO, as adjusted, may not be comparable to similarly titled measures as reported by others. Reported Company FFO and Company FFO, as adjusted, should not be considered as an alternative to net income as an indicator of our operating performance or as an alternative to cash flow as a measure of liquidity.

The following presents a reconciliation of net income (loss) attributable to Lexington Realty Trust shareholders to Reported Company FFO and Company FFO, as adjusted, for the the years ended December 31, 2012 and 2011 (unaudited and dollars in thousands, except per share amounts):

	2012	2011

Off-Balance Sheet Arrangements

As of December 31, 2012, we had investments in various real estate entities with varying structures. The real estate investments owned by these entities are generally financed with non-recourse debt. Non-recourse debt is generally defined as debt whereby the lenders' sole recourse with respect to borrower defaults is limited to the value of the assets collateralized by the debt. The lender generally does not have recourse against any other assets owned by the borrower or any of the members or partners of the borrower, except for certain specified exceptions listed in the particular loan documents. These exceptions generally relate to "bad boy" acts, including fraud and breaches of material representations. We have guaranteed such obligations for certain of our property owner subsidiaries. We have also agreed to indemnify a third-party for any draws on a letter of credit securing similar non-recourse exceptions with respect to an investment we formerly owned but now manage. Upon expiration of such letter of credit, we have agreed to deliver a replacement \$2.5 million letter of credit.

Contractual Obligations

The following summarizes our principal contractual obligations as of December 31, 2012 (\$000's):

	2013	2014	2015	2016	2017	2018 and Thereafter	Total
Notes payable ¹	\$ 272,192	\$ 283,460	\$ 313,474	\$ 167,312	\$ 171,058	\$ 676,481	\$ 1,883,977
Interest payable - fixed rate	91,722	80,571	60,233	48,939	31,000	61,323	373,788
Operating lease obligations ²	3,808	3,527	3,488	2,008	1,934	15,884	30,649
	<u>\$ 367,722</u>	<u>\$ 367,558</u>	<u>\$ 377,195</u>	<u>\$ 218,259</u>	<u>\$ 203,992</u>	<u>\$ 753,688</u>	<u>\$ 2,288,414</u>

1. Includes balloon payments. Amounts shown exclude a debt discount of \$5.8 million and exclude \$3.7 million in outstanding letters of credit.

2. Includes ground lease payments and office rents. Amounts disclosed do not include rents that adjust to fair market value. In addition certain ground lease payments due under bond leases allow for a right of offset between the lease obligation and the debt service and accordingly are not included.

In addition, we guarantee certain tenant improvement allowances and lease commissions on behalf of certain property owner subsidiaries when required by the related tenant or lender. However, we do not believe these guarantees are material to us as the obligations under and risks associated with such guarantees are priced into the rent under the lease or the value of the property.

Item 7A. Quantitative and Qualitative Disclosure about Market Risk

Our exposure to market risk relates primarily to our variable rate debt and fixed rate debt. As of December 31, 2012 and 2011, we had no consolidated variable rate indebtedness not subject to an interest rate swap agreement. During 2012 and 2011, our variable rate indebtedness had a weighted-average interest rate of 2.5% and 3.3%, respectively. Had the weighted-average interest rate been 100 basis points higher, our interest expense for 2012 and 2011 would have been increased by approximately \$0.6 million and \$17 thousand, respectively. As of December 31, 2012 and 2011, our consolidated fixed rate debt was approximately \$1.9 billion and \$1.7 billion, respectively, which represented 100.0% of total long-term indebtedness in each year.

For certain of our financial instruments, fair values are not readily available since there are no active trading markets as characterized by current exchanges between willing parties. Accordingly, we derive or estimate fair values using various valuation techniques, such as computing the present value of estimated future cash flows using discount rates commensurate with the risks involved. However, the determination of estimated cash flows may be subjective and imprecise. Changes in assumptions or estimation methodologies can have a material effect on these estimated fair values. The following fair values were determined using the interest rates that we believe our outstanding fixed rate debt would warrant as of December 31, 2012 and are indicative of the interest rate environment as of December 31, 2012, and do not take into consideration the effects of subsequent interest rate fluctuations. Accordingly, we estimate that the fair value of our fixed rate debt is \$1.8 billion as of December 31, 2012.

Our interest rate risk objectives are to limit the impact of interest rate fluctuations on earnings and cash flows and to lower our overall borrowing costs. To achieve these objectives, we manage our exposure to fluctuations in market interest rates through the use of fixed rate debt instruments to the extent that reasonably favorable rates are obtainable with such arrangements. We generally enter into derivative financial instruments such as interest rate swaps or caps to mitigate our interest rate risk on a related financial instrument or to effectively lock the interest rate on a portion of our variable rate debt. As of the date of filing this Annual Report, we have five interest rate swap agreements in our consolidated portfolio.

MANAGEMENT'S ANNUAL REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Our management is responsible for establishing and maintaining adequate internal control over financial reporting and for performing an assessment of the effectiveness of internal control over financial reporting as of December 31, 2012. Our system of internal control over financial reporting was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation and fair presentation of published financial statements in accordance with U.S. generally accepted accounting principles. Our system of internal control over financial reporting includes policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of our management and the members of our Board of Trustees; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance that financial statements are fairly presented in accordance with U.S. generally accepted accounting principles.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2012. In assessing the effectiveness of our internal control over financial reporting, management used as guidance the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based upon the assessment performed, management believes that our internal control over financial reporting is effective as of December 31, 2012.

Our independent registered public accounting firm, KPMG LLP, independently assessed the effectiveness of our internal control over financial reporting. KPMG LLP has issued a report which is included on page 57 of this Annual Report.

Report of Independent Registered Public Accounting Firm

The Trustees and Shareholders
Lexington Realty Trust:

We have audited the accompanying consolidated balance sheets of Lexington Realty Trust and subsidiaries (the "Company") as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive income (loss), changes in equity, and cash flows for each of the years in the three-year period ended December 31, 2012. In connection with our audits of the consolidated financial statements, we also have audited the accompanying financial statement schedule. These consolidated financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Lexington Realty Trust and subsidiaries as of December 31, 2012 and 2011, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Lexington Realty Trust's internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 25, 2013 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Trustees and Shareholders
Lexington Realty Trust:

We have audited Lexington Realty Trust's (the "Company's") internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and trustees of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2012, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Lexington Realty Trust and subsidiaries as of December 31, 2012 and 2011, and the related consolidated statements of operations, comprehensive income (loss), changes in equity, and cash flows for each of the years in the three-year period ended December 31, 2012 and the related financial statement schedule, and our report dated February 25, 2013 expressed an unqualified opinion on those consolidated financial statements and financial statement schedule.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

(1) The Company

Lexington Realty Trust (together with its consolidated subsidiaries, except when the context only applies to the parent entity, the "Company") is a self-managed and self-administered Maryland statutory real estate investment trust ("REIT") that invests in and acquires, owns, finances and manages a geographically diversified portfolio of predominately single-tenant office, industrial and retail properties. The Company also provides investment advisory and asset management services to investors in the single-tenant area. As of December 31, 2012, the Company had equity ownership interests in approximately 220 consolidated properties located in 41 states. As of December 31, 2011, the Company had equity ownership interests in approximately 185 consolidated properties in 39 states. A majority of the real properties in which the Company had an interest are generally subject to net leases or similar leases where the tenant pays all or substantially all of the cost, including cost increases, for real estate taxes, insurance, utilities and ordinary maintenance of the property. However, certain leases provide that the landlord is responsible for certain operating expenses.

The Company believes it has qualified as a REIT under the Internal Revenue Code of 1986, as amended (the "Code"). Accordingly, the Company will not be subject to federal income tax, provided that distributions to its shareholders equal at least the amount of its REIT taxable income as defined under the Code. The Company is permitted to participate in certain activities from which it was previously precluded in order to maintain its qualification as a REIT, so long as these activities are conducted in entities which elect to be treated as taxable REIT subsidiaries ("TRS") under the Code. As such, the TRS are subject to federal income taxes on the income from these activities.

The Company conducts its operations either directly or indirectly through (1) property owner subsidiaries and lender subsidiaries, (2) operating partnerships in which the Company is the sole unit holder of the general partner and the sole unit holder of the limited partner that holds a majority of the limited partner interests ("OP units") or (3) Lexington Realty Advisors, Inc. ("LRA"), a wholly-owned TRS. As of December 31, 2012, the Company controlled two operating partnerships: (1) Lepercq Corporate Income Fund L.P. ("LCIF") and (2) Lepercq Corporate Income Fund II L.P. ("LCIF II"). Property owner subsidiaries are landlords under leases for properties in which the Company has an interest and/or borrowers under loan agreements secured by properties in which the Company has an interest and lender subsidiaries are lenders under loan agreements where the Company made an investment in a loan asset, but in all cases are separate and distinct legal entities.

(2) Summary of Significant Accounting Policies

Basis of Presentation and Consolidation. The Company's consolidated financial statements are prepared on the accrual basis of accounting in accordance with U.S. generally accepted accounting principles ("GAAP"). The financial statements reflect the accounts of the Company and its consolidated subsidiaries. The Company consolidates its wholly-owned subsidiaries, partnerships and joint ventures which it controls (i) through voting rights or similar rights or (ii) by means other than voting rights if the Company is the primary beneficiary of a variable interest entity ("VIE"). Entities which the Company does not control and entities which are VIEs in which the Company is not the primary beneficiary are accounted for under appropriate GAAP.

If an investment is determined to be a VIE, the Company performs an analysis to determine if the Company is the primary beneficiary of the VIE. GAAP requires a VIE to be consolidated by its primary beneficiary. The primary beneficiary is the party that has a controlling financial interest in an entity. In order for a party to have a controlling financial interest in an entity, it must have (1) the power to direct the activities of a VIE that most significantly impact the entity's economic performance and (2) the obligation to absorb losses or the right to receive benefits of an entity that could potentially be significant to the VIE.

Consolidated Variable Interest Entity. The Company's consolidated VIE was determined to be a VIE primarily because the entity's equity holders' obligation to absorb losses is protected. The Company determined that it was the primary beneficiary of the VIE because it has a controlling financial interest in the entity.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

The Company's wholly-owned entity which owns an office building in Greenville, South Carolina is a VIE and is consolidated by the Company. The tenant has an option to purchase the property on December 31, 2014 at fair market value, but not for less than \$10,710 and not for greater than \$11,550. If the tenant does not exercise the purchase option, the Company has the right to require the tenant to purchase the property for \$10,710.

Non-Consolidated Variable Interest Entities. At December 31, 2012 and 2011, the Company held variable interests in certain non-consolidated VIEs; however, the Company was not the primary beneficiary of these VIEs as the Company does not have a controlling financial interest in the entities. The Company has certain acquisition commitments and/ or acquisition, development and construction arrangements with VIEs. The Company is obligated to fund certain amounts as discussed in note 4.

Earnings Per Share. Basic net income (loss) per share is computed by dividing net income (loss) reduced by preferred dividends and amounts allocated to certain non-vested share-based payment awards, if applicable, by the weighted-average number of common shares outstanding during the period. Diluted net income (loss) per share amounts are similarly computed but include the effect, when dilutive, of in-the-money common share options, OP units and put options of certain convertible securities.

Use of Estimates. Management has made a number of significant estimates and assumptions relating to the reporting of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses to prepare these consolidated financial statements in conformity with GAAP. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment. The current economic environment has increased the degree of uncertainty inherent in these estimates and assumptions. Management adjusts such estimates when facts and circumstances dictate. The most significant estimates made include the recoverability of accounts receivable, allocation of property purchase price to tangible and intangible assets acquired and liabilities assumed, the determination of VIEs and which entities should be consolidated, the determination of impairment of long-lived assets, loans receivable and equity method investments, valuation of derivative financial instruments and the useful lives of long-lived assets. Actual results could differ materially from those estimates.

Fair Value Measurements. The Company follows the guidance in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 820, Fair Value Measurements and Disclosures ("Topic 820"), to determine the fair value of financial and non-financial instruments. Topic 820 defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. Topic 820 establishes a fair value hierarchy that prioritizes observable and unobservable inputs used to measure fair value into three levels: Level 1 - quoted prices (unadjusted) in active markets that are accessible at the measurement date for assets or liabilities; Level 2 - observable prices that are based on inputs not quoted in active markets, but corroborated by market data; and Level 3 - unobservable inputs, which are used when little or no market data is available. The fair value hierarchy gives the highest priority to Level 1 inputs and the lowest priority to Level 3 inputs. In determining fair value, the Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible, as well as considering counterparty credit risk. The Company has formally elected to apply the portfolio exception within Topic 820 with respect to measuring counterparty risk for all of its derivative transactions subject to master netting arrangements.

Revenue Recognition. The Company recognizes lease revenue on a straight-line basis over the term of the lease unless another systematic and rational basis is more representative of the time pattern in which the use benefit is derived from the leased property. Renewal options in leases with rental terms that are lower than those in the primary term are excluded from the calculation of straight-line rent if the renewals are not reasonably assured. If the Company funds tenant improvements and the improvements are deemed to be owned by the Company, revenue recognition will commence when the improvements are substantially completed and possession or control of the space is turned over to the tenant. If the Company determines that the tenant allowances are lease incentives, the Company commences revenue recognition when possession or control of the space is turned over to the tenant for tenant work to begin. The lease incentive is recorded as a deferred expense and amortized as a reduction of revenue on a straight-line basis over the respective lease term. The Company recognizes lease termination fees as rental revenue in the period received and writes off unamortized lease-related intangible and other lease-related account balances, provided there are no further Company obligations under the lease. Otherwise, such fees and balances are recognized on a straight-line basis over the remaining obligation period with the termination payments being recorded as a component of rent receivable-deferred or deferred revenue on the Consolidated Balance Sheets.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

Gains on sales of real estate are recognized based upon the specific timing of the sale as measured against various criteria related to the terms of the transactions and any continuing involvement associated with the properties. If the sales criteria are not met, the gain is deferred and the finance, installment or cost recovery method, as appropriate, is applied until the sales criteria are met. To the extent the Company sells a property and retains a partial ownership interest in the property, the Company recognizes gain to the extent of the third-party ownership interest.

Accounts Receivable. The Company continuously monitors collections from tenants and makes a provision for estimated losses based upon historical experience and any specific tenant collection issues that the Company has identified. As of December 31, 2012 and 2011, the Company's allowance for doubtful accounts was not significant.

Purchase Accounting and Acquisition of Real Estate. The fair value of the real estate acquired, which includes the impact of fair value adjustments for assumed mortgage debt related to property acquisitions, is allocated to the acquired tangible assets, consisting of land, building and improvements and identified intangible assets and liabilities, consisting of the value of above-market and below-market leases, other value of in-place leases and value of tenant relationships, based in each case on their fair values. Acquisition costs are expensed as incurred and are included in property operating expense in the accompanying Consolidated Statement of Operations. Also, noncontrolling interests acquired are recorded at estimated fair market value.

The fair value of the tangible assets of an acquired property (which includes land, building and improvements and fixtures and equipment) is determined by valuing the property as if it were vacant. The "as-if-vacant" value is then allocated to land and building and improvements based on management's determination of relative fair values of these assets. Factors considered by management in performing these analyses include an estimate of carrying costs during the expected lease-up periods considering current market conditions and costs to execute similar leases. In estimating carrying costs, management includes real estate taxes, insurance and other operating expenses and estimates of lost rental revenue during the expected lease-up periods based on current market demand. Management also estimates costs to execute similar leases including leasing commissions.

In allocating the fair value of the identified intangible assets and liabilities of an acquired property, above-market and below-market lease values are recorded based on the difference between the current in-place lease rent and management's estimate of current market rents. Below-market lease intangibles are recorded as part of deferred revenue and amortized into rental revenue over the non-cancelable periods and bargain renewal periods of the respective leases. Above-market leases are recorded as part of intangible assets and amortized as a direct charge against rental revenue over the non-cancelable portion of the respective leases.

The aggregate value of other acquired intangible assets, consisting of in-place leases and tenant relationship values, is measured by the excess of (1) the purchase price paid for a property over (2) the estimated fair value of the property as if vacant, determined as set forth above. This aggregate value is allocated between in-place lease values and tenant relationship values based on management's evaluation of the specific characteristics of each tenant's lease. The value of in-place leases is amortized to expense over the remaining non-cancelable periods and any bargain renewal periods of the respective leases. The value of tenant relationships are amortized to expense over the applicable lease term plus expected renewal periods.

Depreciation is determined by the straight-line method over the remaining estimated economic useful lives of the properties. The Company generally depreciates its real estate assets over periods ranging up to 40 years.

Impairment of Real Estate. The Company evaluates the carrying value of all tangible and intangible real estate assets held for investment for possible impairment when an event or change in circumstance has occurred that indicates its carrying value may not be recoverable. The evaluation includes estimating and reviewing anticipated future undiscounted cash flows to be derived from the asset. If such cash flows are less than the asset's carrying value, an impairment charge is recognized to the extent by which the asset's carrying value exceeds the estimated fair value, which may be below the balance of any non-recourse financing. Estimating future cash flows and fair values is highly subjective and such estimates could differ materially from actual results.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

Investments in Non-Consolidated Entities. The Company accounts for its investments in 50% or less owned entities under the equity method, unless consolidation is required. If the Company's investment in the entity is insignificant and the Company has no influence over the control of the entity then the entity is accounted for under the cost method.

Impairment of Equity Method Investments. The Company assesses whether there are indicators that the value of its equity method investments may be impaired. An impairment charge is recognized only if the Company determines that a decline in the value of the investment below its carrying value is other-than-temporary. The assessment of impairment is highly subjective and involves the application of significant assumptions and judgments about the Company's intent and ability to recover its investment given the nature and operations of the underlying investment, including the level of the Company's involvement therein, among other factors. To the extent an impairment is deemed to be other-than-temporary, the loss is measured as the excess of the carrying amount of the investment over the estimated fair value of the investment.

Loans Receivable. Loans held for investment are intended to be held to maturity and, accordingly, are carried at cost, net of unamortized loan origination costs and fees, loan purchase discounts, and net of an allowance for loan losses when such loan is deemed to be impaired. Loan origination costs and fees and loan purchase discounts are amortized over the term of the loan. The Company considers a loan impaired when, based upon current information and events, it is probable that it will be unable to collect all amounts due for both principal and interest according to the contractual terms of the loan agreement. Significant judgments are required in determining whether impairment has occurred. The Company performs an impairment analysis by comparing either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's observable current market price or the fair value of the underlying collateral to the net carrying value of the loan, which may result in an allowance and corresponding loan loss charge. Interest income is recorded on a cash basis for impaired loans.

Acquisition, Development and Construction Arrangements. The Company evaluates loans receivable where the Company participates in residual profits through loan provisions or other contracts to ascertain whether the Company has the same risks and rewards as an owner or a joint venture partner. Where the Company concludes that such arrangements are more appropriately treated as an investment in real estate, the Company reflects such loan receivable as an equity investment in real estate under construction in the Consolidated Balance Sheets. In these cases, no interest income is recorded on the loan receivable and the Company records capitalized interest during the construction period. In arrangements where the Company engages a developer to construct a property or provide funds to a tenant to develop a property, the Company will capitalize the funds provided to the developer/tenant and internal costs of interest and real estate taxes, if applicable, during the construction period.

Properties Held For Sale. Assets and liabilities of properties that meet various held for sale criteria, including whether it is probable that a sale will occur within 12 months, are presented separately in the Consolidated Balance Sheets, with assets and liabilities being separately stated. The operating results of these properties are reflected as discontinued operations in the Consolidated Statements of Operations. Properties classified as held for sale are carried at the lower of net carrying value or estimated fair value less costs to sell and depreciation and amortization are no longer recognized. Properties that do not meet the held for sale criteria are accounted for as operating properties.

Deferred Expenses. Deferred expenses consist primarily of debt and leasing costs. Debt costs are amortized using the straight-line method, which approximates the interest method, over the terms of the debt instruments and leasing costs are amortized over the term of the related lease.

Derivative Financial Instruments. The Company accounts for its interest rate swap agreements in accordance with FASB ASC Topic 815, Derivatives and Hedging ("Topic 815"). In accordance with Topic 815, these agreements are carried on the balance sheet at their respective fair values, as an asset if fair value is positive, or as a liability if fair value is negative. If the interest rate swap is designated as a cash flow hedge, the effective portion of the interest rate swap's change in fair value is reported as a component of other comprehensive income (loss); the ineffective portion, if any, is recognized in earnings as an increase or decrease to interest expense.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

Upon entering into hedging transactions, the Company documents the relationship between the interest rate swap agreement and the hedged item. The Company also documents its risk-management policies, including objectives and strategies, as they relate to its hedging activities. The Company assesses, both at inception of a hedge and on an on-going basis, whether or not the hedge is highly effective. The Company will discontinue hedge accounting on a prospective basis with changes in the estimated fair value reflected in earnings when (1) it is determined that the derivative is no longer effective in offsetting cash flows of a hedged item (including forecasted transactions), (2) it is no longer probable that the forecasted transaction will occur or (3) it is determined that designating the derivative as an interest rate swap is no longer appropriate. The Company does and may continue to utilize interest rate swap and cap agreements to manage interest rate risk, but does not anticipate entering into derivative transactions for speculative trading purposes.

Stock Compensation. The Company maintains an equity participation plan. Non-vested share grants generally vest either based upon (1) time, (2) performance and/or (3) market conditions. Options granted under the plan in 2010 vest over a five-year period and expire ten years from the date of grant. Options granted under the plan in 2008 vest upon attainment of certain market performance measures and expire ten years from the date of grant. All share-based payments to employees, including grants of employee stock options, are recognized in the Consolidated Statements of Operations based on their fair values.

Tax Status. The Company has made an election to qualify, and believes it is operating so as to qualify, as a REIT for federal income tax purposes. Accordingly, the Company generally will not be subject to federal income tax, provided that distributions to its shareholders equal at least the amount of its REIT taxable income as defined under Sections 856 through 860 of the Code.

The Company is permitted to participate in certain activities from which it was previously precluded in order to maintain its qualification as a REIT, so long as these activities are conducted in entities which elect to be treated as taxable REIT subsidiaries under the Code. As such, the Company is subject to federal and state income taxes on the income from these activities.

Income taxes, primarily related to the Company's taxable REIT subsidiaries, are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and operating loss and tax credit carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled.

Cash and Cash Equivalents. The Company considers all highly liquid instruments with original maturities of three months or less from the date of purchase to be cash equivalents.

Restricted Cash. Restricted cash is comprised primarily of cash balances held in escrow with lenders.

Foreign Currency. The Company determined that the functional currency of its former foreign operation, which was sold in 2010, was the respective local currency. As such, assets and liabilities of the Company's former foreign operation was translated using the period-end exchange rates, and revenues and expenses were translated using the exchange rate as determined throughout the period. Unrealized gains or losses resulting from translation are included in accumulated other comprehensive income (loss) and as a separate component of the Company's shareholders' equity.

Environmental Matters. Under various federal, state and local environmental laws, statutes, ordinances, rules and regulations, an owner of real property may be liable for the costs of removal or remediation of certain hazardous or toxic substances at, on, in or under such property as well as certain other potential costs relating to hazardous or toxic substances. These liabilities may include government fines, penalties and damages for injuries to persons and adjacent property. Such laws often impose liability without regard to whether the owner knew of, or was responsible for, the presence or disposal of such substances. Although most of the tenants of properties in which the Company has an interest are primarily responsible for any environmental damage and claims related to the leased premises, in the event of the bankruptcy or inability of the tenant of such premises to satisfy any obligations with respect to such environmental liability, or if the tenant is not responsible, the Company's property owner subsidiary may be required to satisfy any such obligations, should they exist. In addition, the property owner subsidiary, as the owner of such a property, may be held directly liable for any such damages or claims irrespective of the provisions of any lease. As of December 31, 2012, the Company was not aware of any environmental matter relating to any of its investments that would have a material impact on the consolidated financial statements.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

Segment Reporting. The Company operates generally in one industry segment, single-tenant real estate assets.

Reclassifications. Certain amounts included in prior years' financial statements have been reclassified to conform to the current year presentation, including certain statement of operations captions including activities for properties sold during 2012, which are presented as discontinued operations.

(3) Earnings Per Share

A significant portion of the Company's non-vested share-based payment awards are considered participating securities and as such, the Company is required to use the two-class method for the computation of basic and diluted earnings per share. Under the two-class computation method, net losses are not allocated to participating securities unless the holder of the security has a contractual obligation to share in the losses. The non-vested share-based payment awards are not allocated losses as the awards do not have a contractual obligation to share in losses of the Company.

The following is a reconciliation of the numerators and denominators of the basic and diluted earnings per share computations for each of the years in the three-year period ended December 31, 2012:

	<u>2012</u>	<u>2011</u>	<u>2010</u>
BASIC			
Income (loss) from continuing operations attributable to common shareholders	\$ 152,808	\$ (44,703)	\$ (37,008)
Income (loss) from discontinued operations attributable to common shareholders	4,041	(59,018)	(21,088)
Net income (loss) attributable to common shareholders	<u>\$ 156,849</u>	<u>\$ (103,721)</u>	<u>\$ (58,096)</u>
Weighted-average number of common shares outstanding	<u>159,109,424</u>	<u>152,473,336</u>	<u>130,985,809</u>
Income (loss) per common share:			
Income (loss) from continuing operations	\$ 0.96	\$ (0.29)	\$ (0.28)
Income (loss) from discontinued operations	0.03	(0.39)	(0.16)
Net income (loss) attributable to common shareholders	<u>\$ 0.99</u>	<u>\$ (0.68)</u>	<u>\$ (0.44)</u>

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Net income (loss) attributable to common shareholders	<u>\$ 0.93</u>	<u>\$ (0.68)</u>	<u>\$ (0.44)</u>

For per common share amounts, all incremental shares are considered anti-dilutive for periods that have a loss from continuing operations attributable to common shareholders. In addition, other common share equivalents may be anti-dilutive in certain periods.

During 2012 and 2011, the Company repurchased and retired an aggregate 34,800 and 125,000 shares, respectively, of 6.50% Series C Cumulative Convertible Preferred Stock ("Series C Preferred") at a \$229 and \$833, discount to the historical cost basis, respectively. This discount constitutes a deemed negative dividend, offsetting other dividends, and is accretive to common shareholders. In addition, the Company repurchased and retired an aggregate of 2,740,874 and 419,126 shares, respectively, of 8.05% Series B Cumulative Redeemable Preferred Stock ("Series B Preferred") at a \$2,346 and \$95, premium to historical cost, respectively. This premium is treated as a deemed dividend. Accordingly, net income (loss) was adjusted for these dividends to arrive at net income (loss) attributable to common shareholders for 2012 and 2011.

(4) Investments in Real Estate and Real Estate Under Construction

The Company's real estate, net, consists of the following at December 31, 2012 and 2011:

	2012	2011
Real estate, at cost:		
Buildings and building improvements	\$ 2,969,050	\$ 2,638,626
Land, land estates and land improvements	581,199	522,039
Fixtures and equipment	7,705	7,525
Construction in progress	6,512	4,056
Real estate intangibles:		
In-place lease values	401,503	327,589
Tenant relationships	179,655	152,390
Above-market leases	104,756	66,939
Investments in real estate under construction	65,122	34,529
	<u>4,315,502</u>	<u>3,753,693</u>
Accumulated depreciation and amortization ⁽¹⁾	(1,150,417)	(1,006,717)
Real estate, net	<u>\$ 3,165,085</u>	<u>\$ 2,746,976</u>

(1) Includes accumulated amortization of real estate intangible assets of \$412,349 and \$368,349 in 2012 and 2011, respectively. The estimated amortization of the above real estate intangible assets for the next five years is \$58,797 in 2013, \$42,539 in 2014, \$32,799 in 2015, \$26,457 in 2016 and \$23,056 in 2017.

In addition, the Company had below-market leases, net of accretion, which are included in deferred revenue, of \$71,513 and \$78,806, respectively as of December 31, 2012 and 2011. The estimated accretion for the next five years is \$7,378 in 2013, \$5,901 in 2014, \$4,838 in 2015, \$3,729 in 2016 and \$3,285 in 2017.

The Company, through property owner subsidiaries, completed the following acquisitions and build-to-suit transactions during 2012 and 2011:

2012:

Property Type	Location	Acquisition/Completion Date	Initial Cost Basis	Lease Expiration	Land and Land Estate	Building and Improvements	Real Estate Intangibles	
							Lease in-place Value	Tenant Relationships Value
Office	Huntington, WV	January 2012	\$ 12,558	11/2026	\$ 1,368	\$ 9,527	\$ 1,405	\$ 258
Office	Florence, SC	February 2012	\$ 5,094	02/2024	\$ 774	\$ 3,629	\$ 505	\$ 186

- (1) The Company acquired the property from Net Lease Strategic Assets Fund L.P. pursuant to a purchase option.
(2) Obtained control of joint venture investment (see note 9).

The Company recognized aggregate acquisition expenses of \$947 and \$386 in 2012 and 2011, respectively, which are included in property operating expenses within the Company's Consolidated Statements of Operations.

The Company is engaged in various forms of build-to-suit development activities. The Company, through lender subsidiaries and property owner subsidiaries, may enter into the following acquisition, development and construction arrangements: (1) lend funds to construct build-to-suit projects subject to a single-tenant lease and agree to purchase the properties upon completion of construction and commencement of a single-tenant lease, (2) hire developers to construct built-to-suit projects on owned properties leased to single tenants, (3) fund the construction of build-to-suit projects on owned properties pursuant to the terms in single-tenant lease agreements or (4) enter into purchase and sale agreements with developers to acquire single-tenant build-to-suit properties upon completion. As of December 31, 2012, the Company had the following development arrangements outstanding:

Location	Property Type	Square Feet	Expected Maximum Commitment/ Contribution (\$ millions)	Estimated Purchase Price/ Completion Cost (\$ millions)	Lease Term (Years)	Estimated Completion Date
Long Island City, NY ⁽¹⁾	Industrial	143,000	\$ 46.7	\$ 55.5	15	1Q 13

		<u>1,161,000</u>	<u>\$ 136.5</u>	<u>\$ 145.3</u>		

- (1) Joint venture investment. The Company has guaranteed completion to the ground owner. The guarantee obligation was valued at \$1,500 and is included in accounts payable and other liabilities in the Consolidated Balance Sheet. In addition, the Company may loan a maximum of \$4,398 to the joint venture under certain circumstances. The difference between the Company's expected contribution and the estimated completion cost represents the joint venture partner's equity.

The Company has variable interests in certain developer entities constructing the facilities but is not the primary beneficiary of the entities as the Company does not have a controlling financial interest. As of December 31, 2012 and 2011, the Company's aggregate investment in development arrangements was \$65,122 and \$34,529, respectively, which includes \$1,291 and \$619 of interest capitalized during 2012 and 2011, respectively, and is presented as investments in real estate under construction in the accompanying Consolidated Balance Sheets.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

On September 1, 2012, the Company, together with an operating partnership subsidiary, acquired the remaining common equity interest in Net Lease Strategic Assets Fund L.P. ("NLS") from Inland American (Net Lease) Sub, LLC ("Inland") that the Company did not already own for a cash payment of \$9,438 and the assumption of all outstanding liabilities. Immediately prior to the acquisition, the Company owned 15% of NLS's common equity and 100% of NLS's preferred equity and its investment balance in NLS was \$40,047. At the date of acquisition, NLS owned 41 properties totaling 5.8 million square feet in 23 states, plus a 40% tenant-in-common interest in an office property. The Company's investment in NLS had previously been accounted for under the equity method and is now consolidated. The acquisition resulted in a remeasurement of the net assets acquired to fair value. The Company engaged an independent third party to determine the fair value of the assets acquired and liabilities assumed.

The following table summarizes the allocation of the fair value of amounts recognized for each major class of assets and liabilities:

Real estate assets	\$	325,310
Lease related intangible assets		124,330
Cash		8,107
Other assets		36,179
		<hr/>
Total acquired assets		493,926
		<hr/>
Secured debt		252,517
Other liabilities, including below-market leases		23,686
		<hr/>
Total assumed liabilities		276,203
		<hr/>
Fair value of acquired net assets (represents 100% interest)	\$	<u>217,723</u>

The Company recognized a gain on the transaction in the Consolidated Statement of Operations of \$167,864 primarily related to the revaluation of the Company's equity interest in NLS for the difference between its carrying value in NLS and the fair value of its ownership interest at acquisition. The noncontrolling interest share of the fair value of the net assets acquired was \$373.

In 2007 and 2008, the Company recognized \$19,422 and \$31,806, respectively, in gains on sales of properties relating to the transfer of properties to NLS. In 2012, the Company determined that these gains should have been deferred and recognized as a basis adjustment to the Company's equity investment in NLS. Accordingly, the Company has recorded an adjustment to increase accumulated distributions in excess of net income and decrease investment in and advances to non-consolidated entities in the prior period's balance sheet and statements of changes in equity presented in the accompanying Consolidated Financial Statements by \$51,228. The Company assessed the materiality of the adjustment and determined the amount was immaterial to previously reported financial statements. The adjustment has no impact on the Company's cash flows or liquidity.

Intangible assets and liabilities recorded in connection with the above acquisition are set forth as follows:

		Weighted Average Amortization Period (in Years)
In-place leases	\$ 59,819	6.2
Tenant relations	24,828	4.6
Above-market leases	<u>39,683</u>	8.4
Total intangible assets acquired	\$ 124,330	
	<hr/>	
Below-market leases	<u>1,529</u>	2.7

The Company recognized gross revenues from continuing operations of \$14,504 and a net loss of \$1,667 from NLS properties since consolidation of NLS properties on September 1, 2012.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

The following unaudited condensed consolidated pro forma information is presented as if the Company acquired the remaining equity in NLS on January 1, 2011. The information excludes activity that is non-recurring and not representative of future activity, primarily the gain on acquisition of \$167,864 and acquisition costs of \$230 for 2012. The information presented below is not necessarily indicative of what the actual results of operations would have been had the transaction been completed on January 1, 2011, nor does it purport to represent the Company's future operations:

	2012	2011
Gross revenues	\$ 372,603	\$ 356,918
Net income (loss) attributable to Lexington Realty Trust shareholders	\$ 8	\$ (111,787)
Net loss attributable to common shareholders	\$ (22,985)	\$ (135,924)
Net loss per common share - basic and diluted	\$ (0.14)	\$ (0.89)

(5) Sales of Real Estate and Discontinued Operations

The Company disposed of its interests in 14 properties (excluding its interest in Pemlex LLC - see note 9) and a 6.9-acre land parcel in 2012, 17 properties in 2011 and 13 properties in 2010. For the years ended December 31, 2012, 2011 and 2010, these sales generated aggregate net proceeds of \$142,022, \$124,039 and \$80,224, respectively, which resulted in gains on sales of \$13,291, \$6,557 and \$14,613, respectively. For the years ended December 31, 2012, 2011 and 2010, the Company recognized net debt satisfaction gains (charges) relating to these properties of \$(178), \$(606) and \$2,924, respectively. These gains (charges) are included in discontinued operations.

At December 31, 2012 and 2011, the Company had no properties classified as held for sale.

The following presents the operating results for the properties sold and held for sale during the years ended December 31, 2012, 2011 and 2010:

	Year Ending December 31,		
	2012	2011	2010
Total gross revenues	\$ 7,892	\$ 22,718	\$ 46,572
Pre-tax net income (loss), including gains on sales	\$ 5,943	\$ (70,591)	\$ (29,339)

(6) Impairment of Real Estate Investments

The Company assesses on a regular basis whether there are any indicators that the carrying value of real estate assets may be impaired. Potential indicators may include an increase in vacancy at a property, tenant reduction in utilization of a property, tenant financial instability and the potential sale of the property in the near future. An asset is determined to be impaired if the asset's carrying value is in excess of its estimated fair value.

During 2012, 2011 and 2010, the Company recognized aggregate impairment charges of \$4,262, \$35,946 and \$2,955, respectively, on real estate assets classified in continuing operations. The Company has explored the possible disposition of some non-core properties, including retail, underperforming and multi-tenant properties and determined that the expected undiscounted cash flows based upon revised estimated holding periods of certain of these properties were below the current carrying values. Accordingly, the Company reduced the carrying value of these properties to their estimated fair values.

During 2012, 2011 and 2010, the Company recognized \$5,707, \$81,497 and \$50,061, respectively, of impairment charges in discontinued operations, relating to real estate assets that were ultimately disposed of below their carrying value.

During 2010, the Company recognized an other-than-temporary impairment of \$168 on a bond investment secured by real estate assets.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

(7) Loans Receivable

As of December 31, 2012 and 2011, the Company's loans receivable, including accrued interest and net of origination fees and loan loss reserves are comprised primarily of first and second mortgage loans and mezzanine loans on real estate aggregating \$72,540 and \$66,619, respectively. The loans bear interest, including imputed interest, at rates ranging from 4.6% to 20.0% and mature at various dates through 2022.

The following is a summary of our loans receivable as of December 31, 2012 and 2011:

Loan	Loan carrying-value ⁽¹⁾		Interest Rate	Maturity Date
	12/31/2012	12/31/2011		
Norwalk, CT ⁽²⁾	\$ 3,479	\$ —	7.50%	11/2014
Homestead, FL	8,036	—	7.50%	08/2014
Schaumburg, IL ⁽³⁾	21,885	21,458	20.00%	01/2012
Westmont, IL	26,902	27,228	6.45%	10/2015
Southfield, MI	7,364	8,065	4.55%	02/2015
New Kingstown, PA	—	2,941	7.78%	01/2013
Austin, TX	2,038	1,738	16.00%	10/2018
Other	2,836	5,189	8.00%	2021-2022
	<u>\$ 72,540</u>	<u>\$ 66,619</u>		

(1) Loan carrying value includes accrued interest and is net of origination costs and fee eliminations, if any.

(2) The Company is committed to lend up to \$32,600.

(3) Loan is in default. The Company did not record interest of \$2,647 in 2012 representing the interest earned since default. The Company believes the office property collateral has an estimated fair value in excess of the Company's investment and the Company has initiated foreclosure proceedings.

The Company has two types of financing receivables: loans receivable and a capitalized financing lease. The Company determined that its financing receivables operate within one portfolio segment as they are both within the same industry and use the same impairment methodology. The Company's loans receivable are secured by commercial real estate assets and the capitalized financing lease is for a commercial office property located in Greenville, South Carolina. In addition, the Company assesses all financing receivables for impairment, when warranted, based on an individual analysis of each receivable.

The Company's financing receivables operate within one class of financing receivables as these assets are collateralized by commercial real estate and similar metrics are used to monitor the risk and performance of these assets. The Company's management uses credit quality indicators to monitor financing receivables such as quality of collateral, the underlying tenant's credit rating and collection experience. As of December 31, 2012, the financing receivables were performing as anticipated other than the Schaumburg loan as discussed above and there were no other significant delinquent amounts outstanding.

During 2010, the Company recorded a loan loss of \$3,756 on a loan receivable secured by the property in Wilsonville, Oregon. During 2011, the borrower defaulted on the loan and the Company completed a deed-in-lieu of foreclosure and sold the property in 2012.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

(8) Fair Value Measurements

The following tables present the Company's assets and liabilities from continuing operations measured at fair value on a recurring basis as of December 31, 2012 and 2011 and non-recurring basis during the year ended December 31, 2012 and 2011, aggregated by the level in the fair value hierarchy within which those measurements fall:

Description	2012	Fair Value Measurements Using		
		(Level 1)	(Level 2)	(Level 3)
Interest rate swap liability	\$ (6,556)	\$ —	\$ (6,556)	\$ —
Impaired real estate assets*	\$ 3,327	\$ —	\$ —	\$ 3,327

*Represents a non-recurring fair value measurement.

Description	2011	Fair Value Measurements Using		
		(Level 1)	(Level 2)	(Level 3)
Interest rate swap liability	\$ (3,236)	\$ —	\$ (3,236)	\$ —
Impaired real estate assets*	\$ 133,220	\$ —	\$ —	\$ 133,220

*Represents a non-recurring fair value measurement.

The table below sets forth the carrying amounts and estimated fair values of the Company's financial instruments as of December 31, 2012 and 2011:

	As of December 31, 2012		As of December 31, 2011	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
<u>Assets</u>				
Loans Receivable (Level 3)	\$ 72,540	\$ 61,734	\$ 66,619	\$ 54,179
<u>Liabilities</u>				
Debt (Level 3)	\$ 1,878,208	\$ 1,835,157	\$ 1,662,375	\$ 1,533,205

The majority of the inputs used to value the Company's interest rate swap liability fall within Level 2 of the fair value hierarchy, such as observable market interest rate curves; however, the credit valuation associated with the interest rate swap liability utilizes Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by the Company and its counterparties. As of December 31, 2012 and 2011, the Company determined that the credit valuation adjustment relative to the overall interest rate swap liability is not significant. As a result, the entire interest rate swap liability has been classified in Level 2 of the fair value hierarchy.

The Company estimates the fair value of its real estate assets by using income and market valuation techniques. The Company may estimate fair values using market information such as broker opinions of value, recent sales data for similar assets or discounted cash flow models, which primarily rely on Level 3 inputs. The cash flow models include estimated cash inflows and outflows over a specified holding period. These cash flows may include contractual rental revenues, projected future rental revenues and expenses and forecasted tenant improvements and lease commissions based upon market conditions determined through discussion with local real estate professionals, experience the Company has with its other owned properties in such markets and expectations for growth. Capitalization rates and discount rates utilized in these models are estimated by management based upon rates that management believes to be within a reasonable range of current market rates for the respective properties based upon an analysis of factors such as property and tenant quality, geographical location and local supply and demand observations. To the extent the Company under estimates forecasted cash outflows (tenant improvements, lease commissions and operating costs) or over estimates forecasted cash inflows (rental revenue rates), the estimated fair value of its real estate assets could be overstated.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

The Company estimates the fair values of its loans receivable by using an estimated discounted cash flow analysis consisting of scheduled cash flows and discount rate estimates to approximate those that a willing buyer and seller might use and/or the estimated value of the underlying collateral. The fair value of the Company's debt is estimated by using a discounted cash flow analysis, based upon estimates of market interest rates.

Fair values cannot be determined with precision, may not be substantiated by comparison to quoted prices in active markets and may not be realized upon sale. Additionally, there are inherent uncertainties in any fair value measurement technique, and changes in the underlying assumptions used, including discount rates, liquidity risks and estimates of future cash flows, could significantly affect the fair value measurement amounts.

Cash Equivalents, Restricted Cash, Accounts Receivable and Accounts Payable. The Company estimates that the fair value of cash equivalents, restricted cash, accounts receivable and accounts payable approximates carrying value due to the relatively short maturity of the instruments.

(9) Investment in and Advances to Non-Consolidated Entities

During 2012, the Company formed two joint ventures in which it has a minority interest. One joint venture acquired a 120,000 square foot retail property in Palm Beach Gardens, Florida for \$29,750 which is net-leased for an approximate 15-year term. The Company has a 36% interest in the venture and provided a \$12,000 non-recourse mortgage loan to the venture which, subsequent to December 31, 2012, was repaid in full.

A second joint venture, in which the Company has a 15% interest, acquired a 100% economic interest in an inpatient rehabilitation hospital in Humble, Texas for \$27,750, which is net-leased for an approximate 17-year term. The acquisition was partially funded by a non-recourse mortgage with an original principal amount of \$15,260, which bears interest at a fixed rate of 4.7% and matures in May 2017.

Pemlex LLC. In April 2011, the Company made a \$14,180 noncontrolling, preferred equity investment in a joint venture, Pemlex LLC, formed to acquire a 210,000 square foot office property in Aurora, Illinois. The Company was entitled to a 15.0% internal rate of return, including a 9.6% current annual preferred return, on its investment, subject to available cash proceeds. The Company recorded its investment under the equity method of accounting and during 2011, the Company recognized \$1,344 equity in income from non-consolidated entities relating to its share of income from Pemlex LLC based upon the hypothetical liquidation of book value method. The Company commenced consolidation of Pemlex LLC in October 2011, as the Company became the managing member of Pemlex LLC.

In July 2012, the Company sold its interest in Pemlex LLC for \$13,218 in connection with a restructuring of Pemlex LLC. In addition, the Company (1) entered into a management agreement with the purchaser that provides for a backstop guaranty to a third party who delivered a letter of credit in the amount of \$2,500 as security for "bad boy" acts under the purchaser's third-party acquisition financing and (2) agreed to deliver a replacement letter of credit, if necessary, in the amount of \$2,500 to the purchaser's lender during the term of the management agreement. No gain or loss was recognized in the transaction as the investment was sold at its cost basis.

Net Lease Strategic Assets Fund L.P. NLS was a co-investment program with Inland. NLS was established to acquire single-tenant net-lease specialty real estate in the United States. Inland and the Company owned 85% and 15%, respectively, of NLS's common equity, and the Company owned 100% of NLS's preferred equity.

During 2012, 2011 and 2010, the Company recognized \$12,902, \$21,572 and \$19,468, respectively, of equity in income relating to NLS based upon the hypothetical liquidation of book value method. The initial difference between the assets contributed to NLS and the fair value of the Company's initial equity investment in NLS was \$94,723 and was accreted into income over the estimated useful lives of NLS's assets. During 2012, 2011 and 2010, the Company recorded earnings of \$2,382, \$3,599 and \$3,636, respectively, related to this difference, which is included in equity in earnings of non-consolidated entities on the accompanying Consolidated Statements of Operations.

On September 1, 2012, the Company acquired the remaining common equity interest in NLS and the Company now consolidates NLS (see note 4).

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

Concord Debt Holdings LLC ("Concord"), Lex-Win Concord LLC ("Lex-Win Concord"), CDH CDO LLC and LW Sofi LLC. In connection with the Company's merger with Newkirk Realty Trust, Inc. ("Newkirk"), the Company acquired an interest in a co-investment program, Concord, which owned bonds and loans secured, directly and indirectly, by real estate assets. The Company contributed its interest in Concord to Lex-Win Concord. During 2009, the Company reduced its investment in Lex-Win Concord to zero through impairment charges. During 2011, Concord was restructured and as a result of the restructuring (i) Lex-Win Concord was dissolved and (ii) a new entity, CDH CDO LLC ("CDH CDO"), was created. The Company made no additional contributions and did not recognize any income or loss as a result of the restructuring. The Company's investment in these ventures was initially valued at zero and the Company recognized income on the cash basis. During 2012 and 2011, the Company received aggregate distributions of \$885 and \$3,954 from all Concord related entities, respectively, which were recorded as equity in earnings of non-consolidated entities. During 2012, the Company sold all of its interest in Concord and CDH CDO for \$7,000 cash, resulting in a \$7,000 gain on sale, which is included in equity in earnings of non-consolidated entities.

In June 2011, the Company formed an equally owned joint venture with Winthrop, LW Sofi LLC, to acquire the economic interest in a mezzanine loan owned by Concord. The Company recorded the \$5,760 contribution to the joint venture in investments in and advances to non-consolidated entities. In November 2011, the Company received \$7,937 upon full satisfaction of the mezzanine loan and dissolution of the joint venture.

Other. During 2011, the Company recognized an other-than-temporary impairment charge on a non-consolidated joint venture acquired in the merger with Newkirk due to a change in the Company's estimate of net proceeds to be received upon liquidation of the joint venture. Accordingly, the Company recognized a \$1,559 impairment charge in equity in earnings of non-consolidated entities and reduced the carrying value of the investment to \$719.

The Company's remaining equity method investments consist of interests in six partnerships, including an entity acquired in the NLS acquisition, with ownership percentages ranging between 27% and 40%, which own primarily net-leased properties. All profits, losses and cash flows are distributed in accordance with the respective partnership agreements. The partnerships are encumbered by \$32,039 in mortgage debt (the Company's proportionate share is \$11,034) with interest rates ranging from 5.2% to 10.6% with a weighted-average rate of 7.5% and maturity dates ranging from 2015 to 2016.

LRA earns advisory fees from certain of these non-consolidated entities, including NLS, for services related to acquisitions, asset management and debt placement. Advisory fees earned from these non-consolidated investments were \$875, \$804 and \$967 for the years ended December 31, 2012, 2011 and 2010, respectively.

(10) Mortgages and Notes Payable

The Company had outstanding mortgages and notes payable of \$1,415,961 and \$1,366,004 as of December 31, 2012 and 2011, respectively. Interest rates, including imputed rates on mortgages and notes payable, ranged from 3.6% to 8.5% at December 31, 2012 and the mortgages and notes payable mature between 2013 and 2031. Interest rates, including imputed rates, ranged from 3.6% to 7.8% at December 31, 2011. The weighted-average interest rate at December 31, 2012 and 2011 was approximately 5.6% and 5.7%, respectively.

In 2012, the Company procured a secured term loan from Wells Fargo Bank, National Association ("Wells Fargo"), as agent. The term loan was secured by ownership interest pledges by certain subsidiaries that collectively own a borrowing base of properties. The secured term loan matures in January 2019. The secured term loan requires regular payments of interest only at interest rates ranging from LIBOR plus 2.00% to 2.85% dependent on the Company's leverage ratio, as defined therein. Upon the date when the Company obtains an investment grade debt rating from at least two of Standard & Poor's Rating Services ("S&P"), Moody's Investor Services, Inc. ("Moody's") and Fitch, Inc. ("Fitch"), the interest rate under the secured term loan will be dependent on the Company's debt rating. The Company may not prepay any outstanding borrowings under the secured term loan facility through January 12, 2013, but may prepay outstanding borrowings thereafter at a premium through January 12, 2016 and at par thereafter. During 2012, the Company entered into interest-rate swap agreements to fix LIBOR at a weighted-average rate of 1.42% through January 2019 on the \$255,000 of outstanding LIBOR-based borrowings. At December 31, 2012, the Company had \$255,000 outstanding under the secured term loan (see note 22).

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

In addition, in 2012, the Company refinanced its secured revolving credit facility with a \$300,000 secured revolving credit facility with KeyBank N.A. (“KeyBank”), as agent. The \$300,000 secured revolving credit facility bore interest at LIBOR plus 1.625% to 2.375% based on the Company's leverage ratio, as defined therein. The secured revolving credit facility was scheduled to mature in January 2015 but could be extended to January 2016, at the Company's option subject to the satisfaction of certain conditions. The secured revolving credit facility had the same security as the secured term loan. With the consent of the lenders, the Company could increase the size of the secured revolving credit facility by \$225,000 (for a total facility size of \$525,000). The borrowing availability of the secured revolving credit facility was based upon the net operating income of the properties comprising the borrowing base as defined in the secured revolving credit facility. As of December 31, 2012, no amounts were outstanding under the secured revolving credit facility and the available borrowing under the secured revolving credit facility was \$300,000 less outstanding letters of credit of \$3,744. The secured revolving credit facility was subject to financial covenants which the Company was in compliance with at December 31, 2012. The secured revolving credit facility was refinanced in February 2013 (see note 22).

The Company had \$25,000 and \$35,551 secured term loans with KeyBank, which were satisfied in January 2012 and the Company recognized debt satisfaction charges of \$1,578 as a result of the satisfaction.

Included in the Consolidated Statements of Operations, the Company recognized debt satisfaction gains (charges), net, excluding discontinued operations, of \$(16), \$45 and \$972 for the years ended December 31, 2012, 2011 and 2010, respectively, due to the satisfaction of mortgages and notes payable other than those disclosed elsewhere in these financial statements. In addition, the Company capitalized \$3,062, \$1,792 and \$791 in interest for the years ended 2012, 2011 and 2010, respectively.

Mortgages payable and secured loans are generally collateralized by real estate and the related leases. Certain mortgages payable have yield maintenance or defeasance requirements relating to any prepayments. In addition, certain mortgages are cross-collateralized and cross-defaulted.

Scheduled principal and balloon payments for mortgages and notes payable for the next five years and thereafter are as follows:

Year ending December 31,	Total
2013	\$ 272,192
2014	283,460
2015	313,474
2016	167,312
2017	87,162
Thereafter	292,361
	<u>\$ 1,415,961</u>

(11) Convertible Notes, Exchangeable Notes and Trust Preferred Securities

During 2010, the Company issued \$115,000 aggregate principal amount of 6.00% Convertible Guaranteed Notes. The notes pay interest semi-annually in arrears and mature in January 2030. The holders of the notes may require the Company to repurchase their notes in January 2017, January 2020 and January 2025 for cash equal to 100% of the notes to be repurchased, plus any accrued and unpaid interest. The Company may not redeem any notes prior to January 2017, except to preserve its REIT status. As of the date of filing this Annual Report, the notes have a conversion rate of 144.2599 common shares per one thousand principal amount of the notes, representing a conversion price of approximately \$6.93 per common share. The conversion rate is subject to adjustment under certain circumstances, including increases in the Company's dividend rate above a certain threshold and the issuance of stock dividends. The notes are convertible by the holders under certain circumstances for cash, common shares or a combination of cash and common shares at the Company's election. The notes are convertible prior to the close of business on the second business day immediately preceding the stated maturity date, at any time beginning in January 2029 and also upon the occurrence of specified events. During 2012, \$31,104 aggregate principal amount of the notes were converted for 4,487,060 common shares and an aggregate cash payment of \$2,427 plus accrued and unpaid interest. The Company recognized an aggregate debt satisfaction charge of \$7,842 relating to the conversions. Additional notes were converted in January 2013 (see note 22).

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(\$000, except share/unit data)

During 2007, the Company issued an aggregate \$450,000 of 5.45% Exchangeable Guaranteed Notes due in 2027. These notes could be put to the Company commencing in 2012 and every five years thereafter through maturity. The notes were exchangeable by the holders into common shares at \$19.49 per share, subject to adjustment upon certain events, including increases in the Company's rate of dividends above a certain threshold and the issuance of stock dividends. Upon exchange, the holders of the notes would receive (1) cash equal to the principal amount of the note and (2) to the extent the conversion value exceeded the principal amount of the note, either cash or common shares at the Company's option. During 2012 and 2010, the Company repurchased and retired all outstanding original principal amount of the notes for cash payments of \$62,150 and \$25,493, respectively. This resulted in debt satisfaction charges, net of \$44 and \$760, respectively, including write-offs of \$20 and \$768, respectively, of the debt discount and deferred financing costs.

Below is a summary of additional disclosures related to the 6.00% Convertible Guaranteed Notes and the 5.45% Exchangeable Guaranteed Notes.

	6.00% Convertible Guaranteed Notes		5.45% Exchangeable Guaranteed Notes

During 2007, the Company issued \$200,000 original principal amount of Trust Preferred Securities. The Trust Preferred Securities, which are classified as debt, are due in 2037, were open for redemption at the Company's option commencing April 2012 and bear interest at a fixed rate of 6.804% through April 2017 and thereafter, at a variable rate of three month LIBOR plus 170 basis points through maturity. As of December 31, 2012 and 2011, there was \$129,120 original principal amount of Trust Preferred Securities outstanding.

	<u>\$ 207,247</u>

(1) Although the 6.00% Convertible Guaranteed Notes mature in 2030, the notes can be put to the Company in 2017. See note 22 for subsequent events.

(12) Derivatives and Hedging Activities

Risk Management Objective of Using Derivatives. The Company is exposed to certain risks arising from both its business operations and economic conditions. The Company principally manages its exposures to a wide variety of business and operational risks through management of its core business activities. The Company manages economic risks, including interest rate, liquidity, and credit risk primarily by managing the type, amount, sources, and duration of its debt funding and the use of derivative financial instruments. Specifically, the Company enters into derivative financial instruments to manage exposures that arise from business activities that result in the receipt or payment of future known and uncertain cash amounts, the value of which are determined by interest rates. The Company's derivative financial instruments are used to manage differences in the amount, timing, and duration of the Company's known or expected cash receipts and its known or expected cash payments principally related to the Company's investments and borrowings.

Cash Flow Hedges of Interest Rate Risk. The Company's objectives in using interest rate derivatives are to add stability to interest expense, to manage its exposure to interest rate movements and therefore manage its cash outflows as it relates to the underlying debt instruments. To accomplish these objectives the Company primarily uses interest rate swaps as part of its interest rate risk management strategy relating to certain of its variable rate debt instruments. Interest rate swaps designated as cash flow hedges involve the receipt of variable-rate amounts from a counterparty in exchange for the Company making fixed-rate payments over the life of the agreements without exchange of the underlying notional amount.

The effective portion of changes in the fair value of derivatives designated and that qualify as cash flow hedges is recorded in accumulated other comprehensive income (loss) and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. The ineffective portion of the change in fair value of the derivatives is recognized directly in earnings.

The Company has designated the interest-rate swap agreements with its counterparties as cash flow hedges of the risk of variability attributable to changes in the LIBOR swap rates on \$255,000 of LIBOR-indexed variable-rate secured term loans. Accordingly, changes in the fair value of the swaps are recorded in other comprehensive income (loss) and reclassified to earnings as interest becomes receivable or payable. In 2012, the Company settled the 2008 interest-rate swap agreement with KeyBank for \$3,539. The Company had a credit balance of \$1,837 in accumulated other comprehensive income at the settlement date which is being amortized into earnings on a straight-line basis through February 2013.

Amounts reported in accumulated other comprehensive income (loss) related to derivatives will be reclassified to interest expense as interest payments are made on the \$255,000 secured term loan. During the next 12 months, the Company estimates that an additional \$2,759 will be reclassified as an increase to interest expense if the swaps remain outstanding.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

As of December 31, 2012, the Company had the following outstanding interest rate derivatives that were designated as cash flow hedges of interest rate risk:

Interest Rate Derivative	Number of Instruments	Notional
Interest Rate Swaps	5	\$255,000

Derivatives Not Designated as Hedges. The Company does not use derivatives for trading or speculative purposes. During 2008, the Company entered into a forward purchase equity commitment with a financial institution to finance the repurchase of 3,500,000 common shares of the Company at \$5.60 per share under the Company's common share repurchase plan as approved by the Company's Board of Trustees. The Company recognized earnings during 2011 and 2010 of \$2,030 and \$8,906, respectively, primarily relating to the increase in the fair value of the common shares held as collateral. The Company settled this commitment in October 2011 through a cash payment of \$4,024 and retired 3,974,645 common shares.

The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the Consolidated Balance Sheets as of December 31, 2012 and 2011.

	As of December 31, 2012		As of December 31, 2011	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives designated as hedging instruments:				
Interest Rate Swap Liability	Accounts Payable and Other Liabilities	\$ (6,556)	Accounts Payable and Other Liabilities	\$ (3,236)

The tables below present the effect of the Company's derivative financial instruments on the Consolidated Statements of Operations for 2012 and 2011:

Derivatives in Cash Flow Hedging Relationships	Amount of Loss Recognized in OCI on Derivative (Effective Portion) December 31,		Location of Loss Reclassified from Accumulated OCI into Income (Effective Portion)	Amount of Loss Reclassified from Accumulated OCI into Income (Effective Portion) December 31,	
	2012	2011		2012	2011
Interest Rate Swap	\$ (8,886)	\$ (835)	Interest expense	\$ 724	\$ 2,879

Derivatives Not Designated as Hedging Instruments	Location of Gain Recognized in Income on Derivative		Amount of Gain Recognized in Income on Derivative December 31,	
	Change in value of forward equity commitment		2012	2011
Forward Purchase Equity Commitment			\$ —	\$ 2,030

The Company's agreements with the swap derivative counterparties contain provisions whereby if the Company defaults on the underlying indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default of the swap derivative obligation. As of December 31, 2012, the Company had not posted any collateral related to the agreements.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

(13) Leases

Lessor:

Minimum future rental receipts under the non-cancelable portion of tenant leases, assuming no new or re-negotiated leases, for the next five years and thereafter are as follows:

Year ending <u>December 31,</u>	Total
2013	\$ 335,434
2014	319,112
2015	276,155
2016	245,100
2017	222,542
Thereafter	1,111,022
	<u>\$ 2,509,365</u>

The above minimum lease payments do not include reimbursements to be received from tenants for certain operating expenses and real estate taxes and do not include early termination payments provided for in certain leases.

Certain leases allow for the tenant to terminate the lease if the property is deemed obsolete, as defined, and upon payment of a termination fee to the landlord, as stipulated in the lease. In addition, certain leases provide the tenant with the right to purchase the leased property at fair market value or a stipulated price.

Lessee:

The Company holds, through property owner subsidiaries, leasehold interests in various properties. Generally, the ground rents on these properties are either paid directly by the tenants to the fee holder or reimbursed to the Company as additional rent. Certain properties are economically owned through the holding of industrial revenue bonds and as such neither ground lease payments nor bond debt service payments are made or received, respectively. For certain of these properties, the Company has an option to purchase the fee interest.

Minimum future rental payments under non-cancelable leasehold interests, excluding leases held through industrial revenue bonds and lease payments in the future that are based upon fair market value, for the next five years and thereafter are as follows:

Year ending <u>December 31,</u>	Total
2013	\$ 2,572
2014	2,328
2015	2,300
2016	1,971
2017	1,924
Thereafter	15,885
	<u>\$ 26,980</u>

Rent expense for the leasehold interests, including discontinued operations, was \$1,198, \$776 and \$955 in 2012, 2011 and 2010, respectively.

The Company leases its corporate headquarters. The lease expires December 2015, with fixed rent of \$1,153 per annum. The Company is also responsible for its proportionate share of operating expenses and real estate taxes above a base year. As an incentive to enter the lease, the Company received a payment of \$845 which it is amortizing as a reduction of rent expense. In addition, the Company leases office space for its regional offices. The minimum lease payments for the Company's regional offices are \$82 for 2013, \$45 for 2014, \$36 for 2015 and 2016 and \$9 thereafter. Rent expense for 2012, 2011 and 2010 was \$1,029, \$1,392 and \$1,332, respectively.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

(14) Concentration of Risk

The Company seeks to reduce its operating and leasing risks through the geographic diversification of its properties, tenant industry diversification, avoidance of dependency on a single asset and the creditworthiness of its tenants. For the years ended December 31, 2012, 2011 and 2010, no single tenant represented greater than 10% of rental revenues.

Cash and cash equivalent balances at certain institutions may exceed insurable amounts. The Company believes it mitigates this risk by investing in or through major financial institutions.

(15) Equity

Shareholders' Equity:

During 2012, 2011 and 2010, the Company issued 18,289,557, 11,109,760 and 23,712,980 common shares, respectively, through public offerings and under its direct share purchase plan, raising net proceeds of approximately \$164,429, \$98,953 and \$166,427 respectively. The proceeds were primarily used for general working capital, to fund investments and retire indebtedness.

During the first quarter of 2010, the Company recorded \$13,134 in additional paid-in-capital, representing the conversion feature of the 6.00% Convertible Guaranteed Notes. During 2012, this amount was reduced to \$3,654 due to the issuance of 4,487,060 common shares upon the conversion of \$31,104 6.00% Convertible Guaranteed Notes.

Accumulated other comprehensive income (loss) as of December 31, 2012 and 2011 represented \$(6,224) and \$1,938, respectively, of unrealized gain (loss) on interest rate swaps.

The Company had 1,935,400 shares of Series C Preferred, outstanding at December 31, 2012. The shares have a dividend of \$3.25 per share per annum, have a liquidation preference of \$96,770, and the Company, if certain common share prices are achieved, can force conversion into common shares of the Company. As of the date of filing this Annual Report, the shares are currently convertible into 2.4339 common shares. This conversion ratio may increase over time if the Company's common share dividend exceeds certain quarterly thresholds.

If certain fundamental changes occur, holders may require the Company, in certain circumstances, to repurchase all or part of their shares of Series C Preferred. In addition, upon the occurrence of certain fundamental changes, the Company will, under certain circumstances, increase the conversion rate by a number of additional common shares or, in lieu thereof, may in certain circumstances elect to adjust the conversion rate upon the shares of Series C Preferred becoming convertible into shares of the public acquiring or surviving company.

The Company may, at the Company's option, cause shares of Series C Preferred to be automatically converted into that number of common shares that are issuable at the then prevailing conversion rate. The Company may exercise its conversion right only if, at certain times, the closing price of the Company's common shares equals or exceeds 125% of the then prevailing conversion price of the Series C Preferred.

Investors in shares of Series C Preferred generally have no voting rights, but will have limited voting rights if the Company fails to pay dividends for six or more quarters and under certain other circumstances. Upon conversion, the Company may choose to deliver the conversion value to investors in cash, common shares, or a combination of cash and common shares.

During 2012, 2011 and 2010, the Company issued 643,450, 609,182 and 361,320 of its common shares, respectively, to certain employees and trustees. Typically, trustee share grants vest immediately. Employee share grants generally vest ratably, on anniversaries of the grant date, however, in certain situations vesting is cliff-based after a specific number of years and/or subject to meeting certain performance criteria (see note 16).

During 2012 and 2011, the Company repurchased and retired all of its 3,160,000 shares of Series B Preferred for cash payments of \$68,539 and \$10,217, respectively.

Noncontrolling Interests:

In conjunction with several of the Company's acquisitions in prior years, sellers were issued OP units as a form of consideration. All OP units, other than OP units owned by the Company, are redeemable for common shares at certain times, at the option of the holders, and are generally not otherwise mandatorily redeemable by the Company. The OP units are classified as a component of permanent equity as the Company has determined that the OP units are not redeemable securities as defined by GAAP. Each OP unit is currently redeemable for approximately 1.13 common shares, subject to future adjustments.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

During 2012, 2011 and 2010, 257,427, 398,927 and 457,351 common shares, respectively, were issued by the Company, in connection with OP unit redemptions, for an aggregate value of \$1,343, \$2,187 and \$2,685, respectively.

As of December 31, 2012, there were approximately 3,797,000 OP units outstanding other than OP units owned by the Company. All OP units receive distributions in accordance with their respective partnership agreements. To the extent that the Company's dividend per common share is less than the stated distribution per OP unit per the applicable partnership agreement, the distributions per OP unit are reduced by the percentage reduction in the Company's dividend per common share. No OP units have a liquidation preference.

The following discloses the effects of changes in the Company's ownership interests in its noncontrolling interests:

	Net Income (Loss) Attributable to Shareholders and Transfers from Noncontrolling Interests		
	2012	2011	2010
Net income (loss) attributable to Lexington Realty Trust shareholders	\$ 180,316	\$ (79,584)	\$ (32,960)
Transfers from noncontrolling interests:			
Increase in additional paid-in-capital for redemption of noncontrolling OP units	1,343	2,187	2,685
Change from net income (loss) attributable to shareholders and transfers from noncontrolling interests	\$ 181,659	\$ (77,397)	\$ (30,275)

(16) Benefit Plans

The Company maintains an equity award plan pursuant to which qualified and non-qualified options may be issued. No common share options were issued in 2012 and 2011. The Company granted 1,248,501, 1,265,500 and 2,000,000 common share options on December 31, 2010 ("2010 options"), January 8, 2010 ("2009 options") and December 31, 2008 ("2008 options"), respectively, at an exercise price of \$7.95, \$6.39 and \$5.60, respectively. The 2010 options (1) vest 20% annually on each December 31, 2011 through 2015 and (2) terminate on the earlier of (x) six months of termination of service with the Company and (y) December 31, 2020. The 2009 options (1) vest 20% annually on each December 31, 2010 through 2014 and (2) terminate on the earlier of (x) six months of termination of service with the Company and (y) December 31, 2019. The 2008 options (1) vested 50% following a 20-day trading period where the average closing price of a common share of the Company on the New York Stock Exchange ("NYSE") is \$8.00 or higher and vest 50% following a 20-day trading period where the average closing price of a common share of the Company on the NYSE is \$10.00 or higher, and (2) terminate on the earlier of (x) termination of service with the Company or (y) December 31, 2018. As a result of the share dividends paid in 2009, each of the 2008 options is exchangeable for approximately 1.13 common shares at an exercise price of \$4.97 per common share.

The Company engaged third parties to value the options as of each option's respective grant date. The third parties determined the value to be \$2,422 and \$2,771 for the 2010 options and 2009 options, respectively, using the Black-Scholes model and \$2,480 for the 2008 options using the Monte Carlo model. The options are considered equity awards as they are settled through the issuance of common shares. As such, the options were valued as of the grant date and do not require subsequent remeasurement. There were several assumptions used to fair value the options including the expected volatility in the Company's common share price based upon the fluctuation in the Company's historical common share price. The more significant assumptions underlying the determination of fair value for options granted were as follows:

	2010 Options	2009 Options	2008 Options
Weighted-average fair value of options granted	\$ 1.94	\$ 2.19	\$ 1.24
Weighted-average risk-free interest rate	2.54%	3.29%	1.33%

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

The Company recognizes compensation expense relating to these options over an average of 5.0 years for the 2010 options and 2009 options and 3.6 years for the 2008 options. The Company recognized \$1,197, \$1,384 and \$1,824 in compensation expense in 2012, 2011 and 2010, respectively, relating to options, \$629 of the 2010 amount reflects the accelerated vesting of certain 2008 options, due to performance criteria being met. The Company has unrecognized compensation costs of \$2,559 relating to the outstanding options as of December 31, 2012. The intrinsic value of an option is the amount by which the market value of the underlying common share at the date the option is exercised exceeds the exercise price of the option. The total intrinsic value of options exercised for the years ended December 31, 2012, 2011 and 2010 were \$1,603, \$2,100 and \$1,145, respectively.

Share option activity during the years indicated is as follows:

	Number of Shares	Weighted-Average Exercise Price Per Share
Balance at December 31, 2009	2,252,000	\$ 4.97
Granted	2,514,001	7.16
Exercised	(352,628)	4.97
Forfeited	(23,768)	5.18
Balance at December 31, 2010	4,389,605	6.23
Exercised	(501,324)	5.16
Balance at December 31, 2011	3,888,281	6.36
Exercised	(408,201)	5.73
Balance at December 31, 2012	3,480,080	\$ 6.44

As of December 31, 2012, the aggregate intrinsic value of options that were outstanding and exercisable was \$3,930.

Non-vested share activity for the years ended December 31, 2012 and 2011, is as follows:

	Number of Shares	Weighted-Average Value Per Share
Balance at December 31, 2010	819,577	\$ 10.16
Granted	582,102	7.49
Vested	(211,954)	13.56
Forfeited	(10,140)	21.99
Balance at December 31, 2011	1,179,585	8.13
Granted	606,500	9.75
Vested	(320,639)	8.86
Balance at December 31, 2012	1,465,446	\$ 8.64

As of December 31, 2012, of the remaining 1,465,446 non-vested shares, 1,092,306 are subject to time-based vesting and 373,140 are subject to performance-based vesting. At December 31, 2012, there are 4,437,962 awards available for grant. The Company has \$9,648 in unrecognized compensation costs relating to the non-vested shares that will be charged to compensation expense over an average of approximately 2.6 years.

The Company has established a trust for certain officers in which vested common shares granted for the benefit of the officers are deposited. The officers exert no control over the common shares in the trust and the common shares are available to the general creditors of the Company. As of December 31, 2012 and 2011, there were 427,531 common shares in the trust.

The Company sponsors a 401(k) retirement savings plan covering all eligible employees. The Company makes a discretionary matching contribution on a portion of employee participant salaries and, based on its profitability, may make an additional discretionary contribution at each fiscal year end to all eligible employees. These discretionary contributions are subject to vesting under a schedule providing for 25% annual vesting starting with the first year of employment and 100% vesting after four years of employment. Approximately \$279, \$308 and \$311 of contributions are applicable to 2012, 2011 and 2010, respectively.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

During 2012, 2011 and 2010, the Company recognized \$3,030, \$2,062 and \$3,232, respectively, in compensation expense relating to scheduled vesting and issuance of common share grants.

(17) Related Party Transactions

In addition to related party transactions discussed elsewhere in this Annual Report, the Company has an indemnity obligation to Vornado Realty Trust, one of its significant shareholders, with respect to actions by the Company that affect Vornado Realty Trust's status as a REIT.

All related party acquisitions, sales and loans were approved by the independent members of the Company's Board of Trustees or the Audit Committee.

During 2011 and 2010, the Company advanced an aggregate \$20,077 and \$7,614, respectively, to NLS entities in the form of interest bearing, non-recourse mortgage notes to satisfy maturing non-recourse mortgages. These advances were satisfied in full in 2011.

The Company leases certain properties to entities in which Vornado Realty Trust, a significant shareholder, has an interest. During 2012, 2011 and 2010, the Company recognized \$842, \$864 and \$905, respectively, in rental revenue from these properties. The Company leases its corporate office from an affiliate of Vornado Realty Trust. Rent expense for this property was \$919, \$1,281 and \$1,272 in 2012, 2011 and 2010, respectively.

The Company's Board of Trustees granted a waiver of the Company's Code of Business Conduct and Ethics to allow the Company to enter into a joint venture with an affiliate of its Chairman, which intends to raise capital from foreign investors seeking entry into the United States of America. As of the date of filing this Annual Report, no joint venture agreement has been entered into by the Company with the affiliate of its Chairman.

(18) Income Taxes

The benefit (provision) for income taxes relates primarily to the taxable income of the Company's taxable REIT subsidiaries. The earnings, other than in taxable REIT subsidiaries, of the Company are not generally subject to federal income taxes at the Company level due to the REIT election made by the Company.

Income taxes have been provided for on the asset and liability method. Under the asset and liability method, deferred income taxes are recognized for the temporary differences between the financial reporting basis and the tax basis of assets and liabilities.

The Company's benefit (provision) for income taxes for the years ended December 31, 2012, 2011 and 2010 is summarized as follows:

	<u>2012</u>	<u>2011</u>	<u>2010</u>
Current:			
Federal	\$ (371)	\$ (440)	\$ —
State and local	(1,157)	(1,080)	(1,072)
NOL utilized	401	566	—
Deferred:			
Federal	141	1,399	(418)
State and local	45	400	(53)
	<u>\$ (941)</u>	<u>\$ 845</u>	<u>\$ (1,543)</u>

Net deferred tax assets of \$858 and \$672 are included in other assets on the accompanying Consolidated Balance Sheets at December 31, 2012 and 2011, respectively. These net deferred tax assets relate primarily to differences in the timing of the recognition of income (loss) between GAAP and tax and net operating loss carry forwards.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

The income tax benefit (provision) differs from the amount computed by applying the statutory federal income tax rate to pre-tax operating income as follows:

	2012	2011	2010
Federal provision at statutory tax rate (34%)	\$ (573)	\$ (580)	\$ (388)
State and local taxes, net of federal benefit	(110)	(100)	(31)
Other	(258)	1,525	(1,124)
	<u>\$ (941)</u>	<u>\$ 845</u>	<u>\$ (1,543)</u>

For the years ended December 31, 2012, 2011 and 2010, the "other" amount is comprised primarily of state taxes of \$1,043, \$954 and \$1,072, respectively, and the write-off of deferred tax liabilities of \$0, \$3,535 and \$0, respectively, relating to the transfer of certain assets of the Company's taxable subsidiaries.

As of December 31, 2012 and 2011, the Company has estimated net operating loss carry forwards for federal income tax reporting purposes of \$1,635 and \$2,735, respectively, which would begin to expire in tax year 2026. As of December 31, 2012 and 2011, a valuation allowance of \$0 and \$712, respectively, has been recorded against deferred tax assets based upon projected future taxable income.

A summary of the average taxable nature of the Company's common dividends for each of the years in the three-year period ended December 31, 2012, is as follows:

	2012	2011	2010
Total dividends per share	\$ 0.525	\$ 0.46	\$ 0.40

25% rate gain	—	—	—
	<u>100.00%</u>	<u>100.00 %</u>	<u>100.00 %</u>

(1) Of the total dividend paid in January 2011, \$0.12252 is allocated to 2010 and \$0.349355 is allocated to 2011.

(19) Commitments and Contingencies

In addition to the commitments and contingencies disclosed elsewhere, the Company has the following commitments and contingencies.

The Company is obligated under certain tenant leases, including its proportionate share for leases for non-consolidated entities, to fund the expansion of the underlying leased properties. The Company, under certain circumstances, may guarantee to tenants the completion of base building improvements and the payment of tenant improvement allowances and lease commissions on behalf of its subsidiaries. As of December 31, 2012, the Company had two outstanding guarantees for (1) the completion of the base building improvements and the payment of a related tenant improvement allowance for an office property in Orlando, Florida, which the unfunded amounts were estimated to be \$8,414 and (2) the payment of a tenant improvement allowance and related lease commission of \$5,567 for a property in Allen, Texas.

From time to time, the Company is directly or indirectly involved in legal proceedings arising in the ordinary course of the Company's business. Management believes, based on currently available information, and after consultation with legal counsel, that although the outcomes of those normal course proceedings are uncertain, the results of such proceedings, in the aggregate, will not have a material adverse effect on the Company's business, financial condition and results of operations. During the year ended December 31, 2012, the following two legal proceedings were resolved:

Deutsche Bank Securities, Inc. and SPCP Group LLC v. Lexington Drake, L.P., et al. (Supreme Court of the State of New York-Index No. 603051/08). On June 30, 2006, one of the Company's property owner subsidiaries and a property owner subsidiary of a then co-investment program respectively sold to Deutsche Bank Securities, Inc. ("Deutsche Bank"), (1) a \$7,680 bankruptcy damage claim against Dana Corporation for \$5,376 ("Farmington Hills claim") and (2) a \$7,727 bankruptcy damage claim against Dana Corporation for \$5,680 ("Antioch claim"). Under the terms of the agreements covering the sale of the claims, which were guaranteed by the Company, the property owner subsidiaries were obligated to reimburse Deutsche Bank should the claim ever be disallowed, subordinated or otherwise impaired, to the extent of such disallowance, subordination or impairment, plus interest at the rate of 10% per annum from the date of payment of the purchase price by Deutsche Bank. On October 12, 2007, Dana Corporation filed an objection to both claims. The Company assisted Deutsche Bank and the then holders of the claims in the preparation and filing of a response to the objection. Despite a belief by the Company that the objections were without merit, the holders of the claims, without the Company's consent, settled the allowed amount of the claims at \$6,500 for the Farmington Hills claim and \$7,200 for the Antioch claim in order to participate in a special settlement pool for allowed intangible unsecured claims and a preferred share rights offering having a value thought to be equal to, or greater than, the reduction of the claims. Deutsche Bank made a formal demand with respect to the Farmington Hills claim in the amount of \$826 plus interest, but did not make a formal demand with respect to the Antioch claim. Following a rejection of the demand by the Company, on December 11, 2009, Deutsche Bank and the then holders of the claims filed a summons and complaint with the Supreme Court of the State of New York, County of New York for the Farmington Hills and Antioch claims, and claimed damages of \$1,200 plus interest from the date of assignment at the rate of 10% per year and expenses.

LEXINGTON REALTY TRUST AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(\$000, except share/unit data)

Together with the property owner subsidiaries, the Company answered the complaint on November 26, 2008 and served numerous discovery requests. After almost a year of inactivity, on March 18, 2010, the defendants and the plaintiffs filed motions for summary judgment and related opposing and supporting motions. On November 22, 2010, the court ruled in favor of the plaintiffs on their motion for summary judgment. The court referred the issue of damages to a special referee to determine the value of plaintiffs' participation in the preferred share rights offering and a settlement pool for allowed intangible unsecured claims so as to be taken into consideration with respect to computation of damages, if any.

After motions before the special referee and discovery on July 11, 2012, the special referee recommended damages in favor of the plaintiffs as follows: (1) \$826 for the Farmington Hills claim as well as 10% interest as of April 27, 2012 in the sum of \$482 and additional prejudgment interest from April 28, 2012 to entry of judgment and thereafter statutory interest of 9%; (2) \$388 for the Antioch claim as well as 10% interest as of April 27, 2012 in the sum of \$226 and additional prejudgment interest from April 28, 2012 to entry of judgment and thereafter statutory interest of 9%; and (3) attorneys' fee and disbursements of \$827 together with statutory interest of 9% as to fees and disbursements to be calculated from July 11, 2012. The Company recorded a \$2,800 litigation reserve during the second quarter of 2012 relating to this litigation and settled the litigation in the third quarter of 2012 for \$2,775 and mutual releases.

Unified Government of Wyandotte County/Kansas City, Kansas v. United States General Services Administration (United States District Court for the District of Kansas-Case Number 11-2400-JTM-KMH). On April 4, 2011, one of the Company's property owner subsidiaries entered into a lease termination with Applebee's Services, Inc., pursuant to which Applebee's Services, Inc. made a lease termination payment of \$19,910 in October 2011 and vacated the Lenexa, Kansas facility in November 2011. Also on April 4, 2011, the Company's property owner subsidiary entered into a ten year lease with the United States General Services Administration ("GSA") for the same facility. On April 15, 2011, an unsuccessful bidder for the GSA lease filed a protest with the United States Government Accountability Office ("GAO") protesting the award of the lease to the Company's property owner subsidiary. On July 22, 2011, after a full briefing of the protest, the GAO denied the protest. However, prior to the GAO ruling on July 19, 2011, the Unified Government of Wyandotte County, Kansas City filed a claim against the GSA requesting, among other things, an injunction against the award of the ten year lease. On March 21, 2012, the District Court issued a memorandum opinion transferring the case to the United States Court of Federal Claims. The Company intervened in the action. On June 1, 2012, the plaintiff filed a notice of dismissal and the case was dismissed. The Company does not expect any further activity with respect to this litigation.

Other. Four of our executive officers have employment contracts and are entitled to severance benefits upon termination by the Company without cause or termination by the executive officer with good reason, in each case, as defined in the employment contract.

(20) Supplemental Disclosure of Statement of Cash Flow Information

In addition to disclosures discussed elsewhere, during 2012, 2011 and 2010, the Company paid \$101,262, \$103,427 and \$114,031, respectively, for interest and \$1,018, \$1,289 and \$1,019, respectively, for income taxes.

During 2012, the Company sold its interest in a property, which included the assumption of the related non-recourse mortgage debt of \$8,921.

During 2012, the Company conveyed its interests in two properties to lenders in full satisfaction of the aggregate \$12,409 non-recourse mortgage notes payable. The Company recognized aggregate net gains on debt satisfaction of \$317 relating to these transactions.

In October 2011, the Company acquired control of a joint venture, Pemlex LLC, and recorded land and building assets of \$9,006, lease intangible assets of \$6,294, other assets, net, of \$107 and a \$574 noncontrolling interest.

During 2011, the Company sold interests in three properties, which included the assumption of the aggregate related non-recourse debt of \$28,648 and \$3,003 in seller financing.

During 2010, the Company sold interests in three properties, which included the assumption of the aggregate related non-recourse mortgage debt of \$74,504.

Net income (loss) attributable to common shareholders - basic per share	\$ (0.16)	\$ (0.33)	\$ (0.24)	\$ 0.05
Net income (loss) attributable to common shareholders - diluted per share	\$ (0.16)	\$ (0.33)	\$ (0.24)	\$ 0.05

(1) All periods have been adjusted to reflect the impact of properties sold during the years ended December 31, 2012 and 2011, and properties classified as held for sale, which are reflected in discontinued operations in the Consolidated Statements of Operations.

The sum of the quarterly income (loss) attributable to common shareholders and per common share amounts may not equal the full year amounts primarily because the computations of amounts allocated to participating securities and the weighted-average number of common shares of the Company outstanding for each quarter and the full year are made independently.

(22) Subsequent Events

Subsequent to December 31, 2012 and in addition to disclosures elsewhere in the financial statements, the Company:

- conveyed to the lender its property in Suwanee, Georgia for full satisfaction of the related \$10,964 non-recourse mortgage;
- converted \$35,000 original principal amount of 6.00% Convertible Guaranteed Notes for 5,049,096 common shares and a cash payment of \$2,275 plus accrued and unpaid interest on the notes;
- implemented an At-The-Market offering program under which the Company may issue up to \$100,000 in common shares over the term of the program. The Company issued 3,409,927 common shares under this program as of the date of this Annual Report raising gross proceeds of \$36,884;
- amended the Company's \$255,000 secured term loan agreement to release the collateral securing the term loan;
- refinanced its \$300,000 secured revolving credit facility with a \$300,000 unsecured revolving credit facility with KeyBank, as agent. The unsecured revolving credit facility matures in February 2017 but can be extended until February 2018 at the Company's option. The unsecured revolving credit facility bears interest at LIBOR plus 1.50% to 2.05% based on the Company's leverage ratio, as defined therein. Upon the date when the Company obtains an investment grade rating from at least two of S&P, Moody's or Fitch, the interest rate under the unsecured revolving credit facility will be dependent on the Company's debt rating; and
- in connection with the refinancing discussed above, also procured a five-year \$250,000 unsecured term loan facility from KeyBank, as agent. The unsecured term loan matures in February 2018 and requires regular payments of interest only at interest rates ranging from LIBOR plus 1.45% to 2.00% dependent on the Company's leverage ratio, as defined therein. Upon the date when the Company obtains an investment grade rating from at least two of S&P, Moody's and Fitch, the interest rate under the unsecured term loan will be dependent on the Company's debt rating.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

An evaluation of the effectiveness of the design and operation of our “disclosure controls and procedures” (as defined in Rule 13a-15(e) or 15d-15(e) under the Exchange Act), as of the end of the period covered by this Annual Report was made under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer who are our Principal Executive Officer and our Principal Financial/Accounting Officer, respectively. Based upon this evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures (a) are effective to ensure that information required to be disclosed by us in reports filed or submitted under the Exchange Act is timely recorded, processed, summarized and reported and (b) include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in reports filed or submitted under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Management's Report on Internal Control Over Financial Reporting

Management's Report on Internal Control Over Financial Reporting, which appears on page 55 of this Annual Report, is incorporated herein by reference.

Attestation Report of our Independent Registered Public Accounting Firm

The Report of our Independent Registered Public Accounting Firm constituting the Attestation Report of our Independent Registered Public Accounting Firm, which appears on page 57 of this Annual Report, is incorporated herein by reference.

Changes in Internal Control Over Financial Reporting

There were no changes to our internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) during the fourth quarter ended December 31, 2012 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

Not applicable.

PART III.

Item 10. *Directors, Executive Officers and Corporate Governance*

Executive Officers of the Registrant

The following sets forth certain information relating to our executive officers:

<u>Name</u>	<u>Business Experience</u>
E. Robert Roskind Age 67	Mr. Roskind, our Chairman since March 2008, previously served as Co-Vice Chairman from December 2006 to March 2008, Chairman from October 1993 to December 2006 and Co-Chief Executive Officer from October 1993 to January 2003. He founded The LCP Group, L.P., a real estate advisory firm, in 1973 and has been its Chairman since 1976. Mr. Roskind also serves as Chairman of Crescent Hotels and Resorts and as a member of the Board of Directors of Consonant REIT Advisors, the external advisor to Invincible Investment Corporation, a Japanese REIT listed on the Tokyo Stock Exchange.
Richard J. Rouse Age 67	Mr. Rouse, our Vice Chairman since March 2008 and our Chief Investment Officer since January 2003, previously served as one of our trustees from October 1993 to May 2010, our Co-Vice Chairman from December 2006 to March 2008, our President from October 1993 to April 1996 and our Co-Chief Executive Officer from October 1993 to January 2003.
T. Wilson Eglin Age 48	Mr. Eglin has served as our Chief Executive Officer since January 2003, our President since April 1996 and as a trustee since May 1994. He served as one of our Executive Vice Presidents from October 1993 to April 1996 and our Chief Operating Officer from October 1993 to December 2010.
Patrick Carroll Age 49	Mr. Carroll has served as our Chief Financial Officer since May 1998, our Treasurer since January 1999 and one of our Executive Vice Presidents since January 2003. Prior to joining us, Mr. Carroll was, from 1986 to 1998, in the real estate practice of Coopers & Lybrand L.L.P., a public accounting firm that was one of the predecessors of PricewaterhouseCoopers LLP.
Paul R. Wood Age 52	Mr. Wood served as our Chief Accounting Officer from October 1993 to December 2010, and has served as one of our Vice Presidents and our Secretary since 1993 and our Chief Tax Compliance Officer since January 2011.

The information relating to our Code of Business Conduct and Ethics, is included in Part I, Item 1 of this Annual Report. The information relating to our trustees, including the audit committee of our Board of Trustees and our Audit Committee financial expert, and certain information relating to our executive officers will be in our Definitive Proxy Statement for our 2013 Annual Meeting of Shareholders, which we refer to as our Proxy Statement, and is incorporated herein by reference.

Item 11. *Executive Compensation*

The information required to be furnished pursuant to this item will be set forth under the appropriate captions in the Proxy Statement, and is incorporated herein by reference.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

The information required to be furnished pursuant to this item will be set forth under the appropriate captions in the Proxy Statement, and is incorporated herein by reference.

Item 13. *Certain Relationships and Related Transactions, and Director Independence*

The information required to be furnished pursuant to this item will be set forth under the appropriate captions in the Proxy Statement, and is incorporated herein by reference. In addition, certain information regarding related party transactions is set forth in note 17 to the Consolidated Financial Statements beginning on page 88 of this Annual Report.

Item 14. *Principal Accounting Fees and Services*

The information required to be furnished pursuant to this item will be set forth under the appropriate captions in the Proxy Statement, and is incorporated herein by reference.

**CHIEF EXECUTIVE OFFICER CERTIFICATION
PURSUANT TO SECTION 302 OF
THE SARBANES-OXLEY ACT OF 2002**

I, T. Wilson Eglin, certify that:

1. I have reviewed this report on Form 10-K of Lexington Realty Trust;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15(d)-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
