Report of Independent Auditors

The Board of Directors and Stockholder NASDAQ OMX BX, Inc. and Subsidiaries

We have audited the accompanying consolidated financial statements of NASDAQ OMX BX, Inc. and subsidiaries, which comprise the consolidated balance sheet as of December 31, 2012, and the related consolidated statements of income, changes in stockholder's equity, and cash flows for the year then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of NASDAQ OMX BX Inc. and subsidiaries at December 31, 2012, and the consolidated results of their operations and their cash flows for the year then ended in conformity with U.S. generally accepted accounting principles.

Notes to Consolidated Financial Statements

December 31, 2012

1. Nature of Operations

Established in 1834, NASDAQ OMX BX, Inc. ("BX" or the "Exchange") is a wholly-owned subsidiary of The NASDAQ OMX Group, Inc. ("NASDAQ OMX" or the "Parent"). As of December 31, 2012, BX is the parent of its wholly-owned subsidiaries: Boston Stock Exchange Clearing Corporation ("BSECC" or the "Clearing Corporation") and Boston Options Exchange Regulation LLC ("BOXR") (collectively the "Subsidiaries"). In addition, BX holds a majority ownership of approximately 53% in NASDAQ OMX BX Equities, LLC ("BSXL"), with the remaining ownership interest of approximately 47% held by the Parent.

The Exchange oversees and regulates all trading activities of BSXL, whose primary business includes operating the equities trading facilities. As a Self-Regulatory Organization ("SRO"), BX is committed to advancing market integrity through the enforcement of the Securities and Exchange Commission's ("SEC") Federal Securities Laws and Exchange Rules.

BSECC is a registered clearing agency but has no current existing operations or plans for operations. BOXR was utilized to exercise regulatory controls and provide regulatory oversight to the Boston Options Exchange ("BOX"), which the Exchange regulated through BOXR and collected certain regulatory fees on its behalf, but does not own. BOXR terminated its regulatory oversight of BOX in June 2012, and BOXR was merged into BX on June 8, 2012. Following the termination of this arrangement, BX began operating its own options trading facility, NASDAQ OMX BX Options ("NOBO"), on June 29, 2012. BX, BSECC, and BSXL are subject to regulatory oversight by the SEC.

2. Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements, which include the accounts of BX, its wholly-owned subsidiaries and other entities in which BX has a controlling financial interest, are prepared in accordance with accounting principles generally accepted in the United States ("U.S. GAAP"), as codified in the Accounting Standards Codification ("ASC") and set forth by the Financial Accounting Standards Board ("FASB"). All significant intercompany accounts and transactions have been eliminated in consolidation. The Exchange's significant accounting policies are as follows.

Notes to Consolidated Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Use of Estimates

The preparation of the consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts and the disclosures of contingent amounts in the consolidated financial statements and accompanying notes. Management believes that the estimates utilized in preparing its consolidated financial statements are reasonable and prudent. Actual results could differ from those estimates.

Recently Adopted Accounting Pronouncements

In September 2011, the FASB issued amended guidance relating to ASC 350, *Intangibles* – *Goodwill and Other* ("ASC 350"), which affects all entities that have goodwill reported in the financial statements. The amended guidance permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than the carrying amount as a basis for determining whether it is necessary to perform the two-step quantitative goodwill impairment test described in ASC 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If, after assessing the totality of events or circumstances, an entity determines that it is more likely than not that the fair value of a reporting unit exceeds its carrying amount, then performing the two-step impairment test is unnecessary. This accounting guidance is effective for BX on January 1, 2012 with early adoption permitted. BX adopted this guidance as of September 30, 2011 and used the qualitative assessment option for its annual goodwill impairment test performed for fiscal 2012. Since this guidance only changed the manner in which BX assesses goodwill for impairment, it did not affect BX's financial position or results of operations.

In July 2012, the FASB issued amended guidance relating to ASC 350, which permits an entity to first assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with ASC 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then no further action is required. This accounting guidance was effective for the Exchange on January 1, 2013 with early adoption permitted. We adopted this guidance during 2012 and used the qualitative assessment option for our annual indefinite-lived intangible asset impairment test performed for fiscal year 2012. Since this guidance only changed the manner in which we assess indefinite lived intangible assets for impairment, it did not affect BX's financial position or results of operations.

Notes to Consolidated Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Cash and Cash Equivalents

Cash and cash equivalents include cash held in banks and all non-restricted highly liquid investments with original maturities of three months or less at the time of purchase. Cash equivalents are carried at cost plus accrued interest, which approximates fair value due to the short term maturities of these investments. At December 31, 2012, the Exchange held no cash equivalents.

Revenue Recognition

Transaction Services

Cash Equity Trading: Cash equity trading revenues are variable, based on individual customer share volumes, and recognized as transactions occur. We charge transaction fees for executing cash equity trades in NASDAQ-listed and other listed securities on BX as well as on orders that are routed to other market venues for execution.

We record execution revenues from transactions on a gross basis in revenues and record related expenses as cost of revenues. Nasdaq Execution Services, LLC, an SEC registered broker-dealer and wholly owned subsidiary of NASDAQ OMX, operates as BX's routing broker-dealer for sending orders to other venues for execution in accordance with member order instructions and requirements. Cash equity trading revenues are recorded within transaction services on the Consolidated Statement of Income.

Under our Limitation of Liability Rule and procedures, we, subject to certain caps, provide compensation for losses directly resulting from the systems' actual failure to correctly process an order, quote, message or other data into our platform. We do not record a liability for any potential claims that may be submitted under the Limitation of Liability Rule unless they meet the provisions required in accordance with U.S. GAAP. As such, losses arising as a result of the rule are accrued and charged to expense only if the loss is probable and estimable. The Limitation of Liability Rule and procedures apply to both cash equity and derivative trading in the aggregate. See discussion of derivative trading below.

We credit a portion of the per share execution charge to the market participant that takes the liquidity and record these credits within transaction rebates on the Consolidated Statement of Income. These transaction rebates are paid on a monthly basis and the amounts due are included in accounts payable and accrued expenses on the Consolidated Balance Sheet. Transaction rebates related to cash equity trading were \$58.5 million for the year ended December 31, 2012.

Notes to Consolidated Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Also, we pay Section 31 fees to the SEC for supervision and regulation of securities markets. For equities, the fees are billed on a settlement date basis and collected by the National Securities Clearing Corporation. We pass these costs along to our customers through our cash equity trading fees. We collect the fees as a pass-through charge from organizations executing eligible trades on the BX platform and we recognize these amounts in brokerage, clearance, and exchange fees on the Consolidated Statement of Income when incurred. Section 31 fees received are included in Payable to affiliated companies, net on the Consolidated Balance Sheet, at the time of receipt and, as required by law, the amount due to the SEC is remitted semiannually and recorded within Section 31 fees payable to the SEC on the Consolidated Balance Sheet until paid. Since the amount recorded in revenues is equal to the amount recorded in cost of revenues, there is no impact on our revenues less transaction rebates, brokerage, clearance and exchange fees.

Derivative Trading: Derivative trading revenues are variable, based on traded and cleared volumes, and recognized when executed or when contracts are cleared. The principal types of derivative contracts traded on BX Options are equity options and index options. For BX Options, we record derivative trading revenues from transactions on a gross basis in revenues and record related expenses as cost of revenues, as we have certain risk associated with trade execution. Derivative trading revenues are recorded within transaction services on the Consolidated Statement of Income.

For derivative trading, we credit a portion of the per contract transaction charge to the market makers and specialists that execute trades with a specific trading strategy and record these credits as transaction rebates on the Consolidated Statement of Income. NASDAQ Options Services, LLC, an SEC registered broker-dealer and wholly owned subsidiary of NASDAQ OMX, operates as BX's routing broker-dealer for sending exchange-listed option orders from BX to other venues for execution in accordance with member order instructions and requirements. These transaction rebates are paid on a monthly basis and the amounts due from equity transaction rebates are included in accounts payable and accrued expenses and the amounts due from options transaction rebates are included as a reduction of receivables, net of reserve for uncollectible accounts on the Consolidated Balance Sheet. Transaction rebates related to derivative trading were \$2.9 million for the year ended December 31, 2012.

Notes to Consolidated Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Also, we pay Section 31 fees to the SEC for supervision and regulation of securities markets. For options, the fees are billed on a settlement date basis and collected by the Options Clearing Corporation ("OCC"). We pass these costs along to our customers through our derivative trading fees. We collect the fees as a pass-through charge from organizations executing eligible trades the BX Options platform and we recognize this amount in brokerage, clearance, and exchange fees on the Consolidated Statement of Income when incurred. Section 31 fees received are included in Payable to affiliated companies, net on the Consolidated Balance Sheet, at the time of receipt and, as required by law, the amount due to the SEC is remitted semiannually and recorded as Section 31 fees payable to the SEC on the Consolidated Balance Sheet until paid. Since the amount recorded in revenues is equal to the amount recorded in cost of revenues, there is no impact on our revenues less transaction rebates, brokerage, clearance and exchange fees.

As discussed above, our Limitation of Liability Rule and procedures apply to both cash equity and derivative trading in the aggregate. Under this rule, we, subject to certain caps, provide compensation for losses directly resulting from the systems' actual failure to correctly process an order, quote, message or other data into our platform.

Access Services

The Exchange generates revenues by providing market participants with several alternatives for accessing the Exchange's markets for a fee. The type of connectivity is determined by the level of functionality a customer needs. As a result, access revenues vary depending on the type of connection provided to customers. The Exchange also earns revenues from annual and monthly exchange membership and registration fees. Revenues from providing access to BX's markets and revenues from exchange membership and registration fees are recognized on a monthly basis as the service is provided. Revenues from annual fees for exchange membership and registration fees are recognized ratably over the following 12-month period. Access revenues are included on the Consolidated Statement of Income within access services.

Notes to Consolidated Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Market Data

Market data revenues include revenues earned from the Exchange's participation in the Consolidated Tape A and B as well as the Unlisted Trading Privileges ("UTP") revenue sharing plan ("UTP Plan"). The NASDAQ Stock Market, an affiliate of the Exchange, operates as the exclusive Securities Information Processor of the UTP Plan for the collection and dissemination of best bid and offer information and last transaction information from markets that quote and trade in NASDAQ-listed securities. The Exchange is one of many participants in the UTP Plan and shares in the net distribution of revenue according to the UTP Plan on the same terms as the other plan participants.

BX also collects, processes, and creates information and earns revenues as a distributor of its own data, as well as select third-party content. BX provides varying levels of quote and trade information to market participants and to data distributors, who in turn sell subscriptions for this information to the public. BX earns revenues primarily based on the number of data subscribers and distributors of its data. U.S. market data revenues are recognized on a monthly basis in market data revenues on the Consolidated Statement of Income. These revenues, which are subscription based, are recorded net of amounts due under revenue sharing arrangements with market participants.

Other

Other revenues primarily represent regulatory services provided by BX to BOX. BX, being the SRO license holder, pays certain regulatory fees on behalf of BOX. In addition, BX incurs other general and administrative expenses related to BOX such as fees related to Board of Directors, Corporate Secretary, Office of General Counsel, and market watch organizations. BX invoices BOX for regulatory fees and other related expenses. This arrangement ended in June 2012. The amounts billed to BOX are included within other revenues on the Consolidated Statement of Income.

Receivables, Net of Reserve for Uncollectible Accounts

The Exchange's receivables are primarily related to monthly transaction fees. Receivables are shown net of reserves for uncollectible accounts. The reserve for uncollectible accounts is maintained at a level that management believes to be sufficient to absorb estimated losses in the accounts receivable portfolio. The reserve is increased by the provision for bad debts which is charged against operating results and decreased by the amount of charge-offs, net of recoveries.

Notes to Consolidated Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

The amount charged against operating results is based on several factors including, but not limited to, a continuous assessment of the collectability of each account, the length of time a receivable is past due and the Exchange's historical experience with the particular customer. In circumstances where a specific customer's inability to meet its financial obligations is known (i.e., bankruptcy filings), we record a specific provision for bad debts against amounts due to reduce the receivable to the amount we reasonably believe will be collected. Due to changing economic, business and market conditions, the Exchange reviews the allowance for uncollectible accounts monthly and makes changes to the reserve through the provision for bad debts as appropriate. If circumstances change (i.e., higher than expected defaults or an unexpected material adverse change in a major customer's ability to pay), the Exchange's estimates of recoverability could be reduced by a material amount. The total allowance netted against receivables on the Consolidated Balance Sheet was a de minimis amount at December 31, 2012.

Deferred Revenue

Deferred revenue represents cash payments received for services not yet rendered and are yet to be recognized as revenue. Deferred revenue relates to membership dues and fees that are collected annually and amortized into income on a monthly basis over the applicable future year. The fees related to future periods are included in deferred revenue on the Consolidated Balance Sheet.

Goodwill

Goodwill represents the excess of purchase price and related costs over the value assigned to the net tangible and identifiable intangible assets of a business acquired. Goodwill is allocated to the reporting units based on the assignment of the fair values of each reporting unit of the acquired company. The Exchange is required to test goodwill for impairment at the reporting unit level annually, or in interim periods if certain events occur indicating that the carrying value may be impaired. The Exchange tests for impairment during the fourth quarter of the fiscal year using carrying amounts as of October 1st. In conducting the 2012 annual impairment test for goodwill, the Exchange first performed a qualitative assessment to determine whether it was more likely than not that the fair value of a reporting unit was less than the carrying amount as a basis for determining whether it was necessary to perform the two-step quantitative goodwill impairment test described in ASC 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent.

Notes to Consolidated Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

If, after assessing the totality of events or circumstances, the Exchange determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, then the two-step quantitative test for goodwill impairment is performed for the appropriate reporting units. Otherwise, the Exchange concludes that no impairment is indicated and the two-step quantitative test for goodwill impairment is not performed.

The Exchange utilized the qualitative assessment option for our annual goodwill impairment test performed for fiscal 2012. In conducting the initial qualitative assessment, the Exchange analyzed actual and projected growth trends, as well as historical performance versus plan and the results of prior quantitative tests performed. Additionally, the Exchange assessed critical areas that may impact the business, including macroeconomic conditions and the related impact, market related exposures, competitive changes, new or discontinued products, changes in key personnel, or any other potential risks to projected financial results.

If required, the quantitative goodwill impairment test is a two-step process performed at the reporting unit level. First, the fair value of each reporting unit is compared to its corresponding carrying amount, including goodwill. The fair value of each reporting unit is estimated using a combination of a discounted cash flow valuation, which incorporates assumptions regarding future growth rates, terminal values, and discount rates, as well as a guideline public company valuation, incorporating relevant trading multiples of comparable companies and other factors.

The estimates and assumptions used consider historical performance and are consistent with the assumptions used in determining future profit plans for each reporting unit, which are approved by BX's board of directors. If the first step results in the carrying amount exceeding the fair value of the reporting unit, then a second step must be completed in order to determine the amount of goodwill impairment that should be recorded, if any. In the second step, the implied fair value of the reporting unit's goodwill is determined by allocating the reporting unit's fair value to all of its assets and liabilities other than goodwill in a manner similar to a purchase price allocation. The implied fair value of the goodwill that results from the application of this second step is then compared to the carrying amount of the goodwill and an impairment charge is recorded for any difference.

Intangible Assets, Net of Accumulated Amortization

Intangible assets, net of accumulated amortization, primarily include customer relationships, an SRO license, and a clearing license. The SRO and clearing licenses have indefinite lives.

Notes to Consolidated Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Intangible assets with finite lives, such as customer relationships, are amortized on a straight-line basis over their average estimated useful lives as follows:

- Customer relationships: 10-30 years
- Other: 2-10 years

The estimated useful life of customer relationships is determined based on an analysis of the historical attrition rates of customers and an analysis of the legal, regulatory, contractual, competitive, economic, or other factors that limit the useful life of customer relationships.

For finite-lived intangible assets subject to amortization, impairment is assessed when there is evidence that events or changes in circumstances indicate that the carrying amount of an asset may not be recovered. An impairment loss is recognized when the carrying amount of the longlived asset exceeds its fair value and is not recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset.

Intangible assets deemed to have indefinite useful lives are not amortized but instead are tested for impairment at least annually and more frequently whenever events or changes in circumstances indicate that the fair value of the asset may be less than its carrying amount. Similar to goodwill impairment testing, we test for impairment of indefinite-lived intangible assets during the fourth quarter of our fiscal year using carrying amounts as of October 1.

In conducting the 2012 annual impairment test for indefinite lived intangible assets, we first performed a qualitative assessment to determine whether it was more likely than not that the fair value of an indefinite-lived intangible asset was less than the carrying amount as a basis for determining whether it was necessary to perform the quantitative impairment test described in ASC 350. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. If, after assessing the totality of events or circumstances, we determine that it is more likely than not that the fair value of an indefinite-lived intangible asset is less than its carrying amount, then the quantitative test for indefinite-lived intangible assets impairment is performed for the appropriate intangible assets. If the carrying amount of the indefinite-lived intangible asset exceeds its fair value, an impairment charge is recorded for the difference.

Notes to Consolidated Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

Income Taxes

The Exchange's operating results are included in the consolidated federal income tax return and certain state income tax returns filed by NASDAQ OMX. The Exchange also files separate tax returns in certain states. For financial reporting purposes, the provision for income taxes for the Exchange is determined as if the Exchange filed separate returns.

The Exchange uses the asset and liability method to provide income taxes on all transactions recorded in the consolidated NASDAQ OMX financial statements. Deferred tax assets and liabilities are determined based on differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities (i.e., temporary differences) and are measured at the enacted rates that will be in effect when these differences are realized. If necessary, a valuation allowance is established to reduce deferred tax assets to the amount that is more likely than not to be realized.

In order to recognize and measure the Exchange's unrecognized tax benefits, management determines whether a tax position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets the recognized on the consolidated financial statements. The Exchange's policy is to recognize interest and/or penalties related to income tax matters in provision for income taxes on the Consolidated Statement of Income.

Share-Based Compensation

The Exchange is part of a share-based compensation program that provides NASDAQ OMX's Board of Directors broad discretion in creating employee equity incentives. As such, share-based compensation is allocated to the Exchange from the Parent. Accounting for share-based compensation requires the measurement and recognition of compensation expense for all equity awards based on estimated fair values. BX recognizes compensation expense for equity awards on a straight-line basis over the requisite service period of the award.

BX estimates the fair value of employee stock options using the Black-Scholes valuation model. Assumptions used in the Black-Scholes valuation model include the expected life of the award, the weighted-average risk-free rate, the expected volatility, and the dividend yield. Our

Notes to Consolidated Financial Statements (continued)

2. Summary of Significant Accounting Policies (continued)

computation of expected life is based on historical exercise patterns. The risk-free interest rate for periods within the expected life of the award is based on the U.S. Treasury yield curve in effect at the time of grant. Our computation of expected volatility is based on a market-based implied volatility.

3. Related Party Transactions

BX engages in related party transactions with the Parent. Third party revenues earned by BX are collected on its behalf by the Parent resulting in receivables from affiliated companies. Additionally, expenses incurred by BX are settled on its behalf by the Parent or the Parent's other subsidiaries and allocated through intercompany charges resulting in payables to affiliated companies.

BX, its Parent, and affiliates share certain services such as accounting, finance, legal, and other administrative support. Expenses related to these shared services are allocated to the Exchange and its affiliates through intercompany charges based on an allocation model. These expenses represent amounts related to the Exchange's proportionate share of each expense incurred. Expenses allocated to the Exchange totaled \$1.9 million for the year ended December 31, 2012, and are included in general, administration, and other on the Consolidated Statement of Income.

For the year ended December 31, 2012, occupancy expense totaled \$0.02 million which represents a corporate allocation from NASDAQ OMX for NASDAQ OMX office space used by the Exchange's employees. This amount represents various occupancy expenses, including rent expense from leases and is included in general, administration, and other on the Consolidated Statement of Income. The Exchange incurs expenses relating to equities and options contracts routed to other venues on behalf of the Exchange by Nasdaq Execution Services, LLC ("NES") and NASDAQ Options Services, LLC ("NOS"), respectively, resulting in payables to affiliated companies. NES and NOS are SEC registered broker- dealer subsidiaries of the Parent. The Exchange also earns transaction and access fees from NES for equities shares and NOS for options contracts routed to BX, resulting in amounts receivable from affiliated companies. BX earned \$0.03 million in transaction and access fees, net from NOS for options contracts routed to BX.

Notes to Consolidated Financial Statements (continued)

3. Related Party Transactions (continued)

A Regulatory Services Agreement ("RSA") exists between BX, The NASDAQ Stock Market, LLC, and NASDAQ OMX PHLX LLC ("PHLX") that allows one SRO to use the regulatory services of another SRO and its staff. Services are provided without cost or expense to the individual SRO.

At December 31, 2012, BX is owed \$29.9 million from the Parent and affiliates, representing net revenues associated with operating the Exchange. This balance is presented as receivables from affiliated companies, net on the Consolidated Balance Sheet. Intercompany balances are settled on a periodic basis.

4. Goodwill and Intangible Assets

Goodwill

On August 29, 2008, NASDAQ OMX completed the acquisition of BX for approximately \$43.3 million, which included \$38.4 million cash paid plus \$4.9 million of other costs, subject to certain post-closing adjustments. The acquisition was treated as a purchase for accounting purposes. As a result, push-down accounting was applied for the associated intangibles, related deferred tax liabilities, and goodwill balances.

BX utilized the qualitative assessment option for its annual goodwill impairment test performed for fiscal 2012. In conducting the initial qualitative assessment, BX analyzed actual and projected growth trends, as well as historical performance versus plan and the results of prior quantitative tests performed. Additionally, BX assessed critical areas that may impact the business, including macroeconomic conditions and the related impact, market related exposures, competitive changes, new or discontinued products, changes in key personnel, or any other potential risks to projected financial results. At December 31, 2012, goodwill relating to the acquisition was \$31.0 million. There were no changes to goodwill during the year ended December 31, 2012.

The Exchange completed the required annual impairment test, which determined that goodwill was not impaired for the year ended December 31, 2012. However, events such as economic weakness and unexpected significant declines in operating results may result in goodwill impairment charges in the future. A significant impairment charge in the future could have a material adverse effect on our operating results.

Notes to Consolidated Financial Statements (continued)

4. Goodwill and Intangible Assets (continued)

Intangible Assets

The following table presents the details of the purchased intangible assets acquired in the Exchange acquisition. All purchased finite lived intangible assets are amortized using the straight-line method.

	Gross Carrying Amount	Weighted- Average Useful Life (in Years)	
Intangible assets:	(In Millions)		
SRO license	\$ 48.4	Indefinite	
Customer relationships	2.0	17 years	
Clearing license	1.4	Indefinite	
Total intangible assets	\$ 51.8		

The Exchange completed its annual impairment test during 2012 and determined that its indefinite-lived intangible assets were not impaired. Finite-lived intangible assets are assessed for impairment upon certain "triggering events" and impairment is recognized if the carrying amount is not recoverable and the carrying amount exceeds the fair value of the intangible asset. For the year ended December 31, 2012, no impairment was recorded with respect to finite-lived intangible assets.

Notes to Consolidated Financial Statements (continued)

4. Goodwill and Intangible Assets (continued)

The following table presents details of the Exchange's total purchased intangible assets, both finite- and indefinite-lived:

	December 31, 2012					
	С	Gross arrying mount		umulated ortization	In	Net tangible Assets
	(In Millions)					
Finite-lived intangible assets						
Customer relationships	\$	2.0	\$	(0.5)	\$	1.5
Total finite-lived intangible assets		2.0		(0.5)		1.5
Indefinite-lived intangible assets						
SRO license		48.4		_		48.4
Clearing license		1.4		-		1.4
Total indefinite-lived intangible assets		49.8	***			49.8
Total intangible assets	\$	51.8	\$	(0.5)	\$	51.3

Amortization expense for purchased finite-lived intangible assets was \$118 thousand for the year ended December 31, 2012, and is included in amortization of intangible assets on the Consolidated Statement of Income.

The estimated future amortization expense of purchased finite-lived intangible assets as of December 31, 2012 is as follows (in millions):

2013	\$ 0.1
2014	0.1
2015	0.1
2016	0.1
2017	0.1
2018 and thereafter	1.0
Total	\$ 1.5

5. Income Taxes

The Exchange is included in the consolidated federal income tax return and certain state tax returns of NASDAQ OMX. For financial reporting purposes, the provision for income taxes for the Exchange is determined as if the Exchange filed separate returns.

Notes to Consolidated Financial Statements (continued)

5. Income Taxes (continued)

The Exchange's income tax provision for the year ended December 31, 2012 consists of the following amounts (in thousands):

Current: Federal State and local	\$ 9,164 88
Total current income taxes	 9,252
Deferred:	
Federal	(277)
State and local	630
Total deferred income taxes	 353
Total provision for income taxes	\$ 9,605

A reconciliation of the U.S. federal statutory rate to the Exchange's effective tax rate for the year ended December 31, 2012, is as follows:

Reconciliation of statutory U.S. federal income tax rates:	
Federal	35.0%
State taxes	2.4
Non-controlling interest in partnership	(15.3)
Other	1.1
Effective tax rate	23.2%

Notes to Consolidated Financial Statements (continued)

5. Income Taxes (continued)

The temporary differences, which give rise to the Exchange's deferred tax assets and (liabilities) consisted of the following:

	December 31, 2012	
	(In Thousands)	
Deferred tax assets:		
State net operating loss	\$	8
Compensation and benefits		38
Sublease reserve		477
Other		174
Total gross deferred tax assets		697
Deferred tax liabilities:		
Acquired intangible assets	((20,305)
Investment in partnership		(999)
Other		(140)
Total gross deferred tax liabilities		(21,444)
Net deferred tax liabilities before valuation allowance	((20,747)
Less: valuation allowance		(8)
Net deferred tax liabilities	\$ ((20,755)

As of August 29, 2008, a \$0.1 million current deferred tax liability and a \$20.7 million noncurrent deferred tax liability (total deferred tax liability of \$20.8 million) had been established against the \$50.4 million value of BX's assets and total deferred tax liabilities of \$0.8 million had been established against the \$1.8 million value of Clearing Corporation's intangible assets. The deferred tax liabilities represent the tax effect of the difference between the estimated assigned fair value of the acquired intangible assets (\$52.3 million) and the tax basis (\$0) of such assets. The estimated amount of \$21.5 million is determined by multiplying the difference of \$52.3 million by the BX combined federal and state statutory tax rate of 41.2%. As of December 31, 2012, the total deferred tax liability with regards to intangible assets is \$20.3 million.

As of December 31, 2012, the Exchange established a valuation allowance against certain DTA's related to net operating loss carry forwards as it is not more likely than not that the deferred tax asset will be utilized in later years.

Notes to Consolidated Financial Statements (continued)

5. Income Taxes (continued)

For the periods after August 29, 2008, the Exchange's operating results are included in the consolidated federal income tax return and applicable state and local income tax returns filed by NASDAQ OMX. NASDAQ OMX federal income tax returns for the years 2008 through 2010 are currently under audit by the Internal Revenue Service and we are subject to examination for 2011. Several state tax returns are currently under examination by the respective tax authorities for the years 2005 through 2010 and are subject to examination for 2011.

At December 31, 2012, the Exchange has accrued no interest and/or penalties related to income tax matters.

6. Savings Plan

The Exchange also participates in a voluntary defined contribution 401(k) plan that covers substantially all of the Exchange and its subsidiaries' employees. Employer contributions to this 401(k) plan were \$0.01 million during the year ended December 31, 2012, and are included in compensation and benefit expense on the Consolidated Statement of Income.

7. Share-Based Compensation

BX is part of the Parent's share-based compensation program that provides the Parent's Board of Directors broad discretion in creating employee equity incentives. As such, share-based compensation is allocated to BX from NASDAQ OMX. Grants of stock options and restricted stock, which includes awards and units, are designed to reward employees for their long-term contributions to BX and provide incentives for them to remain with BX. Restricted stock is generally time-based and vests over two to five-year periods beginning on the date of the grant. Stock options are also generally time-based. Stock option awards generally include performance-based accelerated vesting features based on NASDAQ OMX achieving specific levels of performance and also expire 10 years from the grant date. If NASDAQ OMX exceeds the applicable performance parameters, the grants vest on the third anniversary of the grant date, if NASDAQ OMX meets the applicable performance parameters the grants vest on the fourth anniversary, and if NASDAQ OMX does not meet the applicable performance parameters, the grant date.

The Exchange estimates the fair value of employee stock options using the Black-Scholes valuation model. Assumptions used in the Black-Scholes valuation model include the expected life of the award, the weighted-average risk-free rate, the expected volatility, and the dividend yield. Our computation of expected life is based on historical exercise patterns.

22

Notes to Consolidated Financial Statements (continued)

7. Share-Based Compensation (continued)

The risk-free interest rate for periods within the expected life of the award is based on the U.S. Treasury yield curve in effect at the time of grant. Our computation of expected volatility is based on a market-based implied volatility.

Compensation expense for equity awards totaled \$0.1 million during the year ended December 31, 2012, and is included in compensation and benefits on the Consolidated Statement of Income.

8. Commitments and Contingencies

General Litigation and Regulatory Matters

Self- Regulatory Organizations ("SRO") in the securities industry are an essential component of the regulatory scheme of the Securities Exchange Act of 1934 (the "Exchange Act"), for providing fair and orderly markets and protecting investors. The Exchange Act and the rules thereunder impose on the SROs many regulatory and operational responsibilities, including the day-to-day responsibilities for market and broker-dealer oversight. In general, an SRO is responsible for regulating its members through the adoption and enforcement of rules and regulations governing the business conduct of its members. A Regulatory Services Agreement exists between NASDAQ OMX PHLX, LLC, The NASDAQ Stock Market, LLC, and BX that allows one SRO to use the services of another SRO and its staff. Services are provided without cost or expense to the individual SRO.

The Exchange is subject to SEC oversight, as prescribed by the Exchange Act, including periodic and special examinations by the SEC. The Exchange is also potentially subject to regulatory or legal action by the SEC or other interested parties at any time in connection with alleged regulatory violations. The Exchange is also subject to Section 17 of the Exchange Act, which imposes record-keeping requirements, including the requirement to make records available to the SEC for examination. We have been subject to a number of routine reviews and inspections by the SEC or other third parties in the ordinary course and because of settlements with the SEC. To the extent such actions or reviews and inspections result in regulatory or other changes, we may be required to modify the manner in which we conduct our business, which may adversely affect our business.

FINRA provides regulatory services to the markets operated or regulated by the Exchange, including the regulation of trading activity and surveillance and investigative functions. We have a limited direct regulatory role in conducting real-time market monitoring, certain options

Notes to Consolidated Financial Statements (continued)

8. Commitments and Contingencies (continued)

surveillance, rulemaking and some membership functions through NASDAQ OMX's MarketWatch department. We refer suspicious trading behavior discovered by our regulatory staff and all other employees of the markets operated or regulated by the Exchange to FINRA for further investigation.

BX may be involved in litigation arising in the normal course of business. At December 31, 2012, BX is not a party to any litigation that management believes could have a material adverse effect on BX's business, financial condition, or operating results. Consequently, no legal reserve has been recorded or is deemed necessary as of December 31, 2012. However, from time to time, BX has been threatened with, or named as a defendant in, lawsuits or involved in regulatory proceedings.

Operating Leases

BX has facility lease agreements for a property in Woburn, MA (the "Woburn Lease"), which is a non-cancelable lease, and another property in Boston, MA (the "Boston Lease"), a cancelable lease, both of which contain escalation clauses based on increases in property taxes and building operating costs. In March 2012, the Exchange terminated its Boston Lease. The Woburn Lease will expire in December 2015.

The Exchange's minimum future annual rental obligations, exclusive of insurance, maintenance, and other costs, applicable to existing operating leases with third parties, are as follows (in thousands):

 Year Ending December 31:
 \$ 270

 2013
 \$ 270

 2014
 270

 2015
 270

 Total
 \$ 810

9. Risks and Uncertainties

Our market participants operate in a highly regulated industry. The SEC and other regulatory authorities could impose regulatory changes that could adversely impact the ability of our market participants to use our markets. Regulatory changes by the SEC or other regulatory authorities could result in the loss of a significant number of market participants or a reduction in trading activity on the exchange.

Notes to Consolidated Financial Statements (continued)

9. Risks and Uncertainties (continued)

The markets in which we compete are characterized by rapidly changing technology, evolving industry standards, frequent enhancements to existing products and services, the adoption of new services and products and changing customer demands. We may not be able to keep up with rapid technological and other competitive changes affecting our industry. For example, we must continue to enhance our electronic trading platforms to remain competitive, and our business will be negatively affected if our electronic trading platforms fail to function as expected. If we are unable to develop our electronic trading platforms to include other products and markets, or if our electronic trading platforms to an the required functionality, performance, capacity, reliability and speed required by our business, as well as by our customers, we may not be able to compete successfully. Further, our failure to anticipate or respond adequately to changes in technology and customer preferences, especially in our market technology business, or any significant delays in product development efforts, could have a material adverse effect on our business, financial condition and operating results.

BX is exposed to credit risk related to transaction, access, and market data services that are billed to customers on a monthly basis, in arrears. BX's potential exposure to credit losses on these transactions is represented in the receivables, net of reserve for uncollectible accounts balance on the Consolidated Balance Sheet. BX's customers are financial institutions whose ability to satisfy their contractual obligations may be impacted by volatile securities markets. On an ongoing basis, management reviews and evaluates changes in the status of the counterparty's creditworthiness. Credit losses such as those described above could adversely affect BX's consolidated financial position and results of operations.

Our business is subject to extensive regulation. Under current U.S. federal securities laws, changes in the rules and operations of our markets, including our pricing structure, must be reviewed and in many cases explicitly approved by the SEC. The SEC may approve, disapprove, or recommend changes to proposals that we submit. In addition, the SEC may delay either the approval process or the initiation of the public comment process. Any delay in approving changes, or the altering of any proposed change, could have an adverse effect on our business, financial condition and operating results. We must compete not only with ATSs, known collectively as dark pools, that are not subject to the same SEC approval process but also with other exchanges that may have lower regulation and surveillance costs than us. There is a risk that trading will shift to exchanges that charge lower fees because, among other reasons, they spend significantly less on regulation.

Notes to Consolidated Financial Statements (continued)

10. Fair Value of Financial Instruments

The carrying amounts reported on the Consolidated Balance Sheet for cash and cash equivalents approximate fair value based on the on-demand nature. Other assets and liabilities with short and intermediate-term maturities and defined settlement amounts, including receivables, net of reserve for uncollectible accounts, receivables from affiliated parties, net, accounts payable and accrued expenses, Section 31 fees payable to the SEC and other accrued liabilities, are reported at their contractual amounts, which approximate fair value due to the short- term nature of these assets and liabilities.

11. Subsequent Events

The Exchange has evaluated subsequent events through the date the consolidated financial statements were available to be issued and has determined that there are no known events that require disclosure in the consolidated financial statements or accompanying notes in accordance with ASC 855, *Subsequent Events*.
