(h) Counsel for Issuer and Underwriters.

At this time of this filing there is no counsel or underwriter(s) in connection with this offering.

The Alternative Securities Market Group (ASM) maintains an online portal for investors to purchase into our offering, and performs certain services for us in connection with the offering such as but not limited to distributing ongoing reports about our company. ASM is exclusively an ancillary service provider that will be reimbursed for documented expenses. The Company will be selling these Securities directly, and no underwriter or dealer is responsible for the distribution of this offering.

Although both U.S. Grand Prix Championship Corporation and ASM believe ASM's web portal will be sufficient to ensure success of the offering, the Company's relation with ASM is non-exclusive and the Company both has and reserves the right to enlist the aid of FINRA registered broker dealers if it is necessary to ensure success of the Offering. If so an appropriate Amendment shall be filed in a timely fashion.

To facilitate Omega Creamery, Inc.'s liquidity at the onset of this Offering, in lieu of cash for its assistance in the obtaining a CIK No. and its assistance in the preparation of the registration statement, ASM has agreed to accept FIVE THOUSAND shares of common Stock in the Company, representing 5% (two percent) of outstanding common stock shares upon completion of this Offering.

ASM will not receive any selling commissions; nor will it receive any fixed percentage of the Offering Proceeds as might a FINRA registered broker dealer. ASM will only receive documented expenses. Although ASM's expenses are likely to be somewhat proportional to the amount raised as they will be incurred during the duration of the raise, reimbursement of such documented expenses is **capped at an expense amount not to exceed 5% of the Offering proceeds**. Hence ASM does not qualify as an underwriter.

This Offering Circular relates to the offering (the “Offering”) of up to 100,000 9% Convertible Stock Units in U.S. Grand Prix Championship Corporation. The Securities offered through this Offering have no voting rights until the securities are converted to Common Stock Shares of the Company per the terms and conditions detailed in this Offering. ITEM 3. SUMMARY INFORMATION, RISK FACTORS AND DILUTION

Investing in the Company's Securities is very risky. You should be able to bear a complete loss of your investment. You should carefully consider the following factors, including those listed in this Securities Offering.

Motorsports Risks

Motorsports Industry investments are subject to varying degrees of risk. The yields available from equity investments in Motorsports Industry companies depends on the amount of income earned and capital appreciation generated by the company as well as the expenses incurred in connection therewith. If any of the Company's products, services or assets does not generate income sufficient to meet operating expenses, the Company's Common Stock value could adversely be affected. Income from, and the value of, the Company's Products, Services and Assets may be adversely affected by the general economic climate, the Motorsports Entertainment Market conditions such as oversupply of related Motorsports Products or a reduction in demand for Motorsports Entertainment Products in the areas in which the Company's Products, Services and Assets are located, competition from other forms of Entertainment, and the Company's ability to provide adequate Motorsports Products and Services. Revenues from the Company's Products, Services and Assets are also affected by such factors such as the costs of production and the local entertainment market conditions.

Because Motorsports Industry investments are relatively illiquid, the Company's ability to vary its asset portfolio promptly in response to economic or other conditions is limited. The relative illiquidity of its holdings could impede the Company's ability to respond to adverse changes in the performance of its Products, Services and Assets. No assurance can be given that the fair market value of the Products Produced, Services Provided, or Assets Produced or Acquired by the Company will not decrease in the future. Investors have no right to withdrawal their equity commitment or require the Company to repurchase their respective Common Stock interests and the transferability of the Common Stock Units is limited. Accordingly, investors should be prepared to hold their investment interest until the Company is dissolved and its assets are liquidated.

Bad Weather could Adversely Affect us

We promote outdoor motorsports events. Weather conditions affect sales of, among other things, tickets, food, drinks and merchandise at our events. Poor weather conditions could have a negative effect on us, particularly as it relates to walk-up ticket sales.

Postponement and/or Cancellation of Motorsports Events could Adversely Affect Us

If an event scheduled at our facility is postponed because of weather or other reasons such as, for example, the general postponement of all major events in the United States following the September 11, 2001 terrorist attacks, we could incur increased expenses associated with conducting the rescheduled event, as well as possible decreased revenues from tickets, food, drinks and merchandise at the rescheduled event. If such an event is cancelled, we would incur the expenses associated with preparing to conduct the event as well as losing the revenues associated with the event, to the extent such losses were not covered by insurance.

Our Financial Results Depend Significantly on Consumer and Corporate Spending

Our financial results depend significantly upon a number of factors relating to discretionary consumer and corporate spending, including economic conditions affecting disposable consumer income and corporate budgets such as:

- Employment;
- Business Conditions;
- Interest Rates; and
- Taxation Rates

These factors can impact both attendance at our events and advertising and marketing dollars available from the motorsports industry's principal sponsors and potential sponsors. There can be no assurance that consumer and corporate spending will not be

affected adversely by economic and other lifestyle conditions, thereby impacting our growth, revenue and profitability. A weakened economic and business climate could adversely affect our financial results.

We May be Held Liable for Personal Injuries

Motorsports can be dangerous to participants and spectators. We will always maintain insurance policies that provide coverage within limits that we believe should generally be sufficient to protect us from a large financial loss due to liability for personal injuries sustained by persons on our property in the ordinary course of our business. There can be no assurance, however, that the insurance will be adequate or available at all times and in all circumstances. Our financial condition and results of operations could be affected negatively to the extent claims and expenses in connection with these injuries are greater than insurance recoveries or if insurance coverage for these exposures becomes unavailable or prohibitively expensive.

In addition, sanctioning bodies could impose stringent safety regulations. Such regulations could include, among other things, the installation of new retaining walls at our facility, which could increase our capital expenditures and/or expenses.

We are Subject to Changing Governmental Regulations that could Increase our Expenses

We believe that our operations are in material compliance with all applicable federal, state and local environmental, land use and other laws and regulations. Nonetheless, if it is determined that damage to persons or property or contamination of the environment has been caused or exacerbated by the operation or conduct of our business or by pollutants, substances, contaminants or wastes used, generated or disposed of by us, or if pollutants, substances, contaminants or wastes are found on property currently or previously owned or operated by us, we may be held liable for such damage and may be required to pay the cost of investigation and/or remediation of such contamination or any related damage. The amount also can include noise abatement laws that may be applicable to our racing events.

Our development of a new motorsports facility requires compliance with applicable Federal, State and Local land use planning, zoning and environmental regulations. Regulations governing the use and development of real estate may prevent us from acquiring or developing prime locations for our motorsports facility, substantially delay or complicate the process of building such a facility, and/or increase the cost of such development.

Continued Disruption in the Financial Markets could Negatively Affect the Company

The Company, its customers and suppliers rely on stable and efficient financial markets. Availability of financing depends on the lending practices of financial institutions, financial and credit markets, government policies, and economic conditions, all of which are beyond the control of the Company. A prolonged continuation of any adverse economic conditions and disrupted financial marketplace could compromise the financial condition of the Company's customers and suppliers. Customers may not be able to pay, or may delay payment of, accounts receivable that are owed due to liquidity and financial performance issues or concerns affecting them or due to their inability to secure financing. Suppliers may modify, delay or cancel projects and reduce their levels of business with the Company. In addition, weakened credit markets may also impact the ability of the builders and developers to obtain any needed financing to purchase the Company's products, resulting in a reduction in overall demand, and consequently negatively impact the Company's sales levels.

Development Stage Business

U.S. Grand Prix Championship Corporation commenced operations in January of 2012. The Company was originally formed as a California Limited Liability Corporation in January of 2012 under the name "USGPC, LLC". The Company was converted to a California Stock Corporation in July of 2014 and the name was changed to "U.S. Grand Prix Championship Corporation". Accordingly, the Company has only a limited history upon which an evaluation of its prospects and future performance can be made. The Company's proposed operations are subject to all business risks associated with new enterprises. The likelihood of the Company's success must be considered in light of the problems, expenses, difficulties, complications, and delays frequently encountered in connection with the expansion of a business, operation in a competitive industry, and the continued development of advertising, promotions and a corresponding customer base. There is a possibility that the Company could sustain losses in the future. There can be no assurances that U.S. Grand Prix Championship Corporation will operate profitably.

Inadequacy of Funds

Gross offering proceeds of a maximum of \$5,000,000 may be realized. Management believes that such proceeds will capitalize and sustain the Company sufficiently to allow for the implementation of the Company's Business Plans. If only a fraction of this Offering is sold, or if certain assumptions contained in Management's business plans prove to be incorrect, the Company may have inadequate funds to fully develop its business.

Competition

Competition exists for Live Entertainment Events in most markets, including all sectors in which the Company intends to operate. The Company may be competing for market share with entities that have substantial greater economic and personnel resources than the Company. These entities may also generally be able to accept more risk than the Company can manage. Competition from other Live Entertainment Companies in the same market may reduce the number of suitable prospective ticket sales, advertisers or event participants.

Dependence on Management

In the early stages of development the Company's business will be significantly dependent on the Company's Founder and Chief Executive Officer, Mr. Rick Kovacic.

Risks of Borrowing

Although the Company does not intend to incur any additional debt from the investment commitments provided in this offering, should the company obtain secure bank debt in the future, possible risks could arise. If the Company incurs additional indebtedness, a portion of the Company's cash flow will have to be dedicated to the payment of principal and interest on such new indebtedness. Typical loan agreements also might contain restrictive covenants, which may impair the Company's operating flexibility. Such loan agreements would also provide for default under certain circumstances, such as failure to meet certain financial covenants. A default under a loan agreement could result in the loan becoming immediately due and payable and, if unpaid, a judgment in favor of such lender which would be senior to the rights of members of the Company. A judgment creditor would have the right to foreclose on any of the Company's assets resulting in a material adverse effect on the Company's business, operating results or financial condition.

Unanticipated Obstacles to Execution of the Business Plan

The Company's business plans may change significantly. Many of the Company's potential business endeavors are capital intensive and may be subject to statutory or regulatory requirements. Management believes that the Company's chosen activities and strategies are achievable in light of current economic and legal conditions with the skills, background, and knowledge of the Company's principals and advisors. Management reserves the right to make significant modifications to the Company's stated strategies depending on future events.

Management Discretion as to Use of Proceeds

The net proceeds from this Offering will be used for the purposes described under "Use of Proceeds." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated which it deems to be in the best interests of the Company and its Investors in order to address changed circumstances or opportunities. As a result of the foregoing, the success of the Company will be substantially dependent upon the discretion and judgment of Management with respect to application and allocation of the net proceeds of this Offering. Investors for the Units offered hereby will be entrusting their funds to the Company's Management, upon whose judgment and discretion the investors must depend.

Minimum Amount of Capital to be Raised

The minimum amount of Securities that need to be sold in this offering for the Company to access the investment funds is \$1,000,000. After the Minimum Amount of Capital required to be reached, all Investor funds will be transferred from the Company's Investment Holding Account to the Company. The Company cannot assure you that subscriptions for the entire Offering will be obtained. The Company has the right to terminate this offering of Securities at any time, regardless of the number of Securities that have sold. If the Offering terminates before the offering minimum is achieved, or if any prospective

Investor's subscription is rejected, all funds received from such Investors will be returned without interest or deduction. The Company's ability to meet financial obligations, cash needs, and to achieve objectives, could be adversely affected if the entire offering of Securities is not fully subscribed.

The net proceeds from this Offering will be used for the purposes described under "Use of Proceeds." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated which it deems to be in the best interests of the Company and its Investors in order to address changed circumstances or opportunities. As a result of the foregoing, the success of the Company will be substantially dependent upon the discretion and judgment of Management with respect to application and allocation of the net proceeds of this Offering. Investors for the Units offered hereby will be entrusting their funds to the Company's Management, upon whose judgment and discretion the investors must depend.

Control by Management

As of July 1st, 2014 the Company's Managers owned approximately 100% of the Company's outstanding Common Stock Units and 0% of the Company's Preferred Stock Units. Upon completion of this Offering, The Company's Management will own approximately 95% of the outstanding Common Stock Units of the Company and 0% of the outstanding Preferred Stock Units of the Company. Investors will not have the ability to control either a vote of the Company's Managers or any appointed officers. See "COMPANY MANAGERS" section.

Return of Profits

The Company has never declared or paid any cash dividends on its Common Stock. The Company currently intends to retain future earnings, if any, to finance the expansion of the Company's Operations and Holdings. As a result, the Company does not anticipate paying any cash dividends to its Common Stock Holders for the foreseeable future.

No Assurances of Protection for Proprietary Rights; Reliance on Trade Secrets

In certain cases, the Company may rely on trade secrets to protect intellectual property, proprietary technology and processes, which the Company has acquired, developed or may develop in the future. There can be no assurances that secrecy obligations will be honored or that others will not independently develop similar or superior products or technology. The protection of intellectual property and/or proprietary technology through claims of trade secret status has been the subject of increasing claims and litigation by various companies both in order to protect proprietary rights as well as for competitive reasons even where proprietary claims are unsubstantiated. The prosecution of proprietary claims or the defense of such claims is costly and uncertain given the uncertainty and rapid development of the principles of law pertaining to this area. The Company, in common with other investment funds, may also be subject to claims by other parties with regard to the use of intellectual property, technology information and data, which may be deemed proprietary to others.

The Company's Continuing as a Going Concern Depends Upon Financing

If the Company does not raise sufficient working capital and continues to experience pre-operating losses, there will most likely be substantial doubt as to its ability to continue as a going concern. Because the Company has generated no revenue, all expenditures during the development stage have been recorded as pre-operating losses. Revenue operations have not commenced because the Company has not raised the necessary capital.

Broker – Dealer Sales of Units

The Company's Preferred Stock Units and Common Stock Units are not included for trading on any exchange, and there can be no assurances that the Company will ultimately be registered on any exchange. The NASDAQ Stock Market, Inc. has recently enacted certain changes to the entry and maintenance criteria for listing eligibility on the NASDAQ SmallCap Market. The entry standards require at least \$4 million in net tangible assets or \$750,000 net income in two of the last three years. The proposed entry standards would also require a public float of at least 1 million shares, \$5 million value of public float, a minimum bid price of \$2.00 per share, at least three market makers, and at least 300 shareholders. The maintenance standards (as opposed to entry standards) require at least \$2 million in net tangible assets or \$500,000 in net income in two of the last three years, a public float of at least 500,000 shares, a \$1 million market value of public float, a minimum bid price of \$1.00 per share, at least two market makers, and at least 300 shareholders.

No assurance can be given that the Preferred Stock or Common Stock Units of the Company will ever qualify for inclusion on the NASDAQ System or any other trading market until such time as the Managing Members deem it necessary. As a result, the Company's Preferred Stock Units and Common Stock Units are covered by a Securities and Exchange Commission rule that opposes additional sales practice requirements on broker-dealers who sell such securities to persons other than established customers and qualified investors. For transactions covered by the rule, the broker-dealer must make a special suitability determination for the purchaser and receive the purchaser's written agreement to the transaction prior to the sale. Consequently, the rule may affect the ability of broker-dealers to sell the Company's securities and will also affect the ability of members to sell their units in the secondary market.

Secondary Market

No application is currently being prepared for the Company's Securities to be admitted to the Official Listing and trading on any regulated market. No application is being prepared to include the Securities to trading on an "Over-the-Counter" or "Open Market", though the Company intends to submit an S-1 or Form 10 Filing within TWELVE MONTHS of the close of this securities offering. There can be no assurance that a liquid market for the Securities will develop or, if it does develop, that it will continue. If a market does develop, it may not be liquid. Therefore, investors may not be able to sell their Securities easily or at prices that will provide them with yield comparable to similar investments that have a developed secondary market. Illiquidity may have a **severely adverse effect on the market value of the Securities and investors wishing to sell the Securities might therefore suffer losses.**

Compliance with Securities Laws

The Company's Securities are being offered for sale in reliance upon certain exemptions from the registration requirements of the Securities Act, applicable California Securities Laws, and other applicable state securities laws. If the sale of Securities were to fail to qualify for these exemptions, purchasers may seek rescission of their purchases of Securities. If a number of purchasers were to obtain rescission, we would face significant financial demands, which could adversely affect the Company as a whole, as well as any non-rescinding purchasers.

Offering Price

The price of the Securities offered has been arbitrarily established by our current Managers, considering such matters as the state of the Company's business development and the general condition of the industry in which it operates. The Offering price bears little relationship to the assets, net worth, or any other objective criteria.

Lack of Firm Underwriter

The Securities are offered on a "best efforts" basis by the Company Managers, without compensation and on a "best efforts" basis through certain FINRA registered broker-dealers, which enter into Participating Broker-Dealer Agreements with the Company. Accordingly, there is no assurance that the Company, or any FINRA broker-dealer, will sell the maximum Securities offered or any lesser amount.

Projections: Forward Looking Information

Management has prepared projections regarding anticipated financial performance. The Company's projections are hypothetical and based upon a presumed financial performance of the Company, the addition of a sophisticated and well funded marketing plan, and other factors influencing the business. The projections are based on Management's best estimate of the probable results of operations of the Company and the investments made by management, based on present circumstances, and have not been reviewed by independent accountants and/or auditing counsel. These projections are based on several assumptions, set forth

therein, which Management believes are reasonable. Some assumptions, upon which the projections are based, however, invariably will not materialize due the inevitable occurrence of unanticipated events and circumstances beyond Management's control. Therefore, actual results of operations will vary from the projections, and such variances may be material. Assumptions regarding future changes in sales and revenues are necessarily speculative in nature. In addition, projections do not and cannot take into account such factors as general economic conditions, unforeseen regulatory changes, the entry into a market of additional competitors, the terms and conditions of future capitalization, and other risks inherent to the Company's business. While Management believes that the projections accurately reflect possible future results of operations, those results cannot be guaranteed.

ITEM 6. DESCRIPTION OF BUSINESS

Our business consists principally of motorcycle road racing events held at facilities throughout the United States and Canada. We anticipate attendance of some 120,000 spectators the first year of our championship, growing at an annual rate of 20% through the first three years of operations. The Company will generate income primarily from spectator ticket sales, television, social and ancillary media rights fees, sanctioning and sponsorship fees, series merchandise sales, royalties from licenses of our trademarks, and from any entertainment and related concession services held at facilities across North America.

In the United States, Grand Prix motorcycling is extremely popular. Twice a year the premiere international MotoGP™ World Championship holds two of its 18 races at facilities in Texas and Indianapolis.

- The Indianapolis Motor Speedway round of the MotorGP Championship began in 2008, boasting spectator attendance in its 3rd year of 134,766, with an economic impact on the region of some \$30 Million USD(i). This event was aired live nationally on SpeedVision TV.
- Circuit of Americas in Austin, Texas held a MotoGP event in 2013, boasted attendance of 131,082 fans at this event. The average out-of-state visitor spends \$1,500 USD per day (average stay of 4.6 days) at this circuit. Approximate economic impact on the region from the Gran Prix event was \$25 Million USD(ii). This event was aired nationally live on Fox1 Sports Network.

There are more than 200 countries and territories receiving live or same-day-delayed broadcasts of the Grand Prix, with the coverage delivered to more than 337 million households worldwide. Hundreds of millions of spectators enjoy MotoGP™ live on TV each race weekend, with a total of more than 13,000 media personnel attending Grand Prix throughout the season. At venues in Spain, England, the USA, France and Australia, over 100,000 spectators attend the weekend's proceedings in person, and at some there are more than double that figure, highlighting the passionate following the sport enjoys(iii). MotoGP is sanctioned by the Federation Internationale de Motorclisme (FIM), based in Switzerland.

The US Grand Prix Championship seeks to leverage this sport's popularity in a 6-to-9 event domestic championship. There are over 20 race facilities in North America, near major metro markets of some 52 million households, suitable for hosting USGPC events.

A similar standard is applicable in the case of derivative actions, except that indemnification only extends to expenses including attorneys' fees incurred in connection with the defense or settlement of such actions and the statute requires court approval before there can be any indemnification where the person seeking indemnification has been found liable to the corporation. The statute provides that it is not exclusive of other indemnification that may be granted by a corporation's certificate of incorporation, bylaws, agreement, and a vote of stockholders or disinterested directors or otherwise.
