PART II — OFFERING CIRCULAR

ITEM 3. SUMMARY INFORMATION, RISK FACTORS AND DILUTION

Investing in the Company's Securities is very risky. You should be able to bear a complete loss of your investment. You should carefully consider the following factors, including those listed in this Securities Offering.

Foreign Student Exchange Industry Risks

Foreign Student Exchange Industry investments are subject to varying degrees of risk. The yields available from equity investments in Foreign Student Exchange Industry Companies depends on the amount of income earned and capital appreciation generated by the company as well as the expenses incurred in connection therewith. If any of the Company's products or services does not generate income sufficient to meet operating expenses, the Company's Common Stock value could adversely be affected. Income from, and the value of, the Company's Products and Services may be adversely affected by the general economic climate, the Foreign Student Exchange market conditions such as oversupply of related products and services, or a reduction in demand for Foreign Student Exchange products and services in the areas in which the Company's Products and Services are located, competition from other Foreign Student Exchange Companies, and the Company's ability to provide adequate Foreign Student Exchange Products and Services. Revenues from the Company's Products and Services are also affected by such factors such as the costs of products and services and the local market conditions.

Because Foreign Student Exchange Industry investments are relatively illiquid, the Company's ability to vary its asset portfolio promptly in response to economic or other conditions is limited. The relative illiquidity of its holdings could impede the Company's ability to respond to adverse changes in the performance of its Products and Services. No assurance can be given that the fair market value of the Products Produced or Assets Acquired by, or produced by, the Company will not decrease in the future. Investors have no right to withdraw their equity commitment or require the Company to repurchase their respective Common Stock interests and the transferability of the Common Stock Units is limited. Accordingly, investors should be prepared to hold their investment interest until the Company is dissolved and its assets are liquidated.

If We Fail to Promote and Maintain our Brand in the Market, our Business, Operating Results, Financial Condition, and our Ability to Attract Customers will be Materially Adversely Affected

Our success depends on our ability to create and maintain brand awareness for our product and services offerings. This may require a significant amount of capital to allow us to market our products and services, and establish brand recognition and customer loyalty. Many of our competitors in this market are larger than us and have substantially greater financial resources. Additionally, many of the companies offering similar products have already established their brand identity within the marketplace. We can offer no assurances that we will be successful in establishing awareness of our brand allowing us to compete in this market. The importance of brand recognition will continue to increase because of low barriers of entry to the industries in which we operate may result in an increased number of direct competitors. To promote our brand, we may be required to continue to increase our financial commitment to creating and maintaining brand awareness. We may not generate a corresponding increase in revenue to justify these costs.

Development Stage Business

The Company was originally formed as a California Limited Liability Corporation in October of 2011 and converted to a California Stock Corporation in April of 2014. Accordingly, the Company has only a limited history upon which an evaluation of its prospects and future performance can be made. The Company's proposed operations are subject to all business risks associated with new enterprises. The likelihood of the Company's success must be considered in light of the problems, expenses, difficulties, complications, and delays frequently encountered in connection with the expansion of a business, operation in a competitive industry, and the continued development of advertising, promotions and a corresponding customer base. There is a possibility that the Company could sustain losses in the future. There can be no assurances that INTEX Program, Inc. will operate profitably.

Inadequacy of Funds

Gross offering proceeds of a maximum of \$525,000 may be realized. Management believes that such proceeds will capitalize and sustain the Company sufficiently to allow for the implementation of the Company's Business Plans. If only a fraction of this Offering is sold, or if certain assumptions contained in Management's business plans prove to be incorrect, the Company may have inadequate funds to fully develop its business.

Competition

Competition exists for Foreign Student Exchange Products and Services in most markets, including all sectors in which the Company intends to operate. The Company may be competing for assets with entities that have substantial greater economic and personnel resources than the Company or better relationships with suppliers and other Foreign Student Exchange Industry Related Professionals. These entities may also generally be able to accept more risk than the Company can manage. Competition from other Companies in the Foreign Student Exchange Industry may reduce the number of suitable prospective direct to customer sales opportunities.

Dependence on Management

In the early stages of development the Company's business will be significantly dependent on the Company's management team. The Company's success will be particularly dependent upon the services of Mr. Hafed Ikhlef, the Company's Chairman of the Board and Chief Executive Officer.

Risks of Borrowing

Although the Company does not intend to incur any additional debt from the investment commitments provided in this offering, should the company obtain secure bank debt in the future, possible risks could arise. If the Company incurs additional indebtedness, a portion of the Company's cash flow will have to be dedicated to the payment of principal and interest on such new indebtedness. Typical loan agreements also might contain restrictive covenants, which may impair the Company's operating flexibility. Such loan agreements would also provide for default under certain circumstances, such as failure to meet certain financial covenants. A default under a loan agreement could result in the loan becoming immediately due and payable and, if unpaid, a judgment in favor of such lender which would be senior to the rights of members of the Company. A judgment creditor would have the right to foreclose on any of the Company's assets resulting in a material adverse effect on the Company's business, operating results or financial condition.

Unanticipated Obstacles to Execution of the Business Plan

The Company's business plans may change significantly. Many of the Company's potential business endeavors are capital intensive and may be subject to statutory or regulatory requirements. Management believes that the Company's chosen activities and strategies are achievable in light of current economic and legal conditions with the skills, background, and knowledge of the Company's principals and advisors. Management reserves the right to make significant modifications to the Company's stated strategies depending on future events.

Management Discretion as to Use of Proceeds

The net proceeds from this Offering will be used for the purposes described under "Use of Proceeds." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated which it deems to be in the best interests of the Company and its Investors in order to address changed circumstances or opportunities. As a result of the foregoing, the success of the Company will be substantially dependent upon the discretion and judgment of Management with respect to application and allocation of the net proceeds of this Offering. Investors for the Units offered hereby will be entrusting their funds to the Company's Management, upon whose judgment and discretion the investors must depend.

Minimum Amount of Capital to be Raised

The minimum amount of Securities that need to be sold in this offering for the Company to access the investment funds is \$100,000. After the Minimum Amount of Capital required to be reached, all Investor funds will be transferred from the Company's Investment Holding Account to the Company. The Company cannot assure you that subscriptions for the entire

Offering will be obtained. The Company has the right to terminate this offering of Securities at any time, regardless of the number of Securities that have sold. The Company's ability to meet financial obligations, cash needs, and to achieve objectives, could be adversely affected if the entire offering of Securities is not fully subscribed.

Management Discretion as to Use of Proceeds

The net proceeds from this Offering will be used for the purposes described under "Use of Proceeds." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated which it deems to be in the best interests of the Company and its Investors in order to address changed circumstances or opportunities. As a result of the foregoing, the success of the Company will be substantially dependent upon the discretion and judgment of Management with respect to application and allocation of the net proceeds of this Offering. Investors for the Units offered hereby will be entrusting their funds to the Company's Management, upon whose judgment and discretion the investors must depend.

Unanticipated Obstacles to Execution of the Business Plan

The Company's business plans may change significantly. Many of the Company's potential business endeavors are capital intensive and may be subject to statutory or regulatory requirements. Management believes that the Company's chosen activities and strategies are achievable in light of current economic and legal conditions with the skills, background, and knowledge of the Company's principals and advisors. Management reserves the right to make significant modifications to the Company's stated strategies depending on future events.

Control by Management

As of June 1st, 2014 the Company's Managers owned approximately 95% of the Company's outstanding Common Stock Units and 0% of the Company's Preferred Stock Units. Upon completion of this Offering, The Company's Management will own approximately 95% of the outstanding Common Stock Units of the Company and 0% of the outstanding Preferred Stock Units of the Company. Investors will not have the ability to control either a vote of the Company's Managers or any appointed officers. See "COMPANY MANAGERS" section.

Return of Profits

The Company has never declared or paid any cash dividends on its Common Stock. The Company currently intends to retain future earnings, if any, to finance the expansion of the Company's Operations and Holdings. As a result, the Company does not anticipate paying any cash dividends to its Common Stock Holders for the foreseeable future.

No Assurances of Protection for Proprietary Rights; Reliance on Trade Secrets

In certain cases, the Company may rely on trade secrets to protect intellectual property, proprietary technology and processes, which the Company has acquired, developed or may develop in the future. There can be no assurances that secrecy obligations will be honored or that others will not independently develop similar or superior products or technology. The protection of intellectual property and/or proprietary technology through claims of trade secret status has been the subject of increasing claims and litigation by various companies both in order to protect proprietary rights as well as for competitive reasons even where proprietary claims are unsubstantiated. The prosecution of proprietary claims or the defense of such claims is costly and uncertain given the uncertainty and rapid development of the principles of law pertaining to this area. The Company, in common with other investment funds, may also be subject to claims by other parties with regard to the use of intellectual property, technology information and data, which may be deemed proprietary to others.

The Company's Continuing as a Going Concern Depends Upon Financing

If the Company does not raise sufficient working capital and continues to experience pre-operating losses, there will most likely be substantial doubt as to its ability to continue as a going concern. Because the Company has generated no revenue, all expenditures during the development stage have been recorded as pre-operating losses. Revenue operations have not commenced because the Company has not raised the necessary capital.

Broker - Dealer Sales of Units

The Company's Common Stock Units are not included for trading on any exchange, and there can be no assurances that the Company will ultimately be registered on any exchange. The NASDAQ Stock Market, Inc. has recently enacted certain changes to the entry and maintenance criteria for listing eligibility on the NASDAQ SmallCap Market. The entry standards require at least \$4 million in net tangible assets or \$750,000 net income in two of the last three years. The proposed entry standards would also require a public float of at least 1 million shares, \$5 million value of public float, a minimum bid price of \$2.00 per share, at least three market makers, and at least 300 shareholders. The maintenance standards (as opposed to entry standards) require at least \$2 million in net tangible assets or \$500,000 in net income in two of the last three years, a public float of at least 500,000 shares, a \$1 million market value of public float, a minimum bid price of \$1.00 per share, at least two market makers, and at least 300 shareholders.

No assurance can be given that the Common Stock Units of the Company will ever qualify for inclusion on the NASDAQ System or any other trading market until such time as the Managing Members deem it necessary. As a result, the Company's Common Stock Units are covered by a Securities and Exchange Commission rule that opposes additional sales practice requirements on broker-dealers who sell such securities to persons other than established customers and qualified investors. For transactions covered by the rule, the broker-dealer must make a special suitability determination for the purchaser and receive the purchaser's written agreement to the transaction prior to the sale. Consequently, the rule may affect the ability of broker-dealers to sell the Company's securities and will also affect the ability of members to sell their units in the secondary market.

Secondary Market

No application is currently being prepared for the Company's Securities to be admitted to the Official Listing and trading on any regulated market. No application is being prepared to include the Securities to trading on an "Over-the-Counter" or "Open Market", though the Company intends to submit an S-1 or Form 10 Filing within TWELVE MONTHS of the close of this securities offering. There can be no assurance that a liquid market for the Securities will develop or, if it does develop, that it will continue. If a market does develop, it may not be liquid. Therefore, investors may not be able to sell their Securities easily or at prices that will provide them with yield comparable to similar investments that have a developed secondary market. Illiquidity may have a **severely adverse effect on the market value of the Securities and investors wishing to sell the Securities might therefore suffer losses.**

Certain Factors Related to Our Common Stock

Because the Company's Common Stock may be considered a "penny stock," and a shareholder may have difficulty selling shares in the secondary trading market.

The Company's Common Stock Securities may be subject to certain rules and regulations relating to "penny stock" (generally defined as any equity security that has a price less than \$5.00 per share, subject to certain exemptions). Broker-dealers who sell penny stocks are subject to certain "sales practice requirements" for sales in certain nonexempt transactions (i.e., sales to persons other than established customers and institutional "qualified investors"), including requiring delivery of a risk disclosure document relating to the penny stock market and monthly statements disclosing recent price information for the penny stocks held in the account, and certain other restrictions. For as long as the Company's Common Stock is subject to the rules on penny stocks, the market liquidity for such securities could be significantly limited. This lack of liquidity may also make it more difficult for the Company to raise capital in the future through sales of equity in the public or private markets.

The price of the Company's Common Stock may be volatile, and a shareholder's investment in the Company's Common Stock could suffer a decline in value.

There could be significant volatility in the volume and market price of the Company's Common Stock, and this volatility may continue in the future. The Company's Common Stock may be listed on the OTCQB, OTCQX, OTCBB, The Bermuda BSX Exchange, the London Stock Exchange's AIM Market, the Canadian TSX Venture Exchange or TMX Exchange, the Irish Stock Exchange, the Frankfurt Stock Exchange and / or the Berlin Stock Exchange, where each has a greater chance for market volatility for securities that trade on these markets as opposed to a national exchange or quotation system. This volatility may be caused by a variety of factors, including the lack of readily available quotations, the absence of consistent administrative supervision of "bid" and "ask" quotations and generally lower trading volume. In addition, factors such as quarterly variations in our operating results, changes in financial estimates by securities analysts or our failure to meet our or their projected financial and operating results, litigation involving us, general trends relating to the Hair Growth, Hair Rejuvenation and Medical Technology Industry, actions by governmental agencies, national economic and stock market considerations as well as other

events and circumstances beyond our control could have a significant impact on the future market price of our Common Stock and the relative volatility of such market price.

Compliance with Securities Laws

The Company's Securities are being offered for sale in reliance upon certain exemptions from the registration requirements of the Securities Act, applicable Texas Securities Laws, and other applicable state securities laws. If the sale of Securities were to fail to qualify for these exemptions, purchasers may seek rescission of their purchases of Securities. If a number of purchasers were to obtain rescission, we would face significant financial demands, which could adversely affect the Company as a whole, as well as any non-rescinding purchasers.

Offering Price

The price of the Securities offered has been arbitrarily established by our current Managers, considering such matters as the state of the Company's business development and the general condition of the industry in which it operates. The Offering price bears little relationship to the assets, net worth, or any other objective criteria.

Lack of Firm Underwriter

The Securities are offered on a "best efforts" basis by the Company Managers, without compensation and on a "best efforts" basis through certain FINRA registered broker-dealers, which enter into Participating Broker-Dealer Agreements with the Company. Accordingly, there is no assurance that the Company, or any FINRA broker-dealer, will sell the maximum Securities offered or any lesser amount.

Projections: Forward Looking Information

Management has prepared projections regarding anticipated financial performance. The Company's projections are hypothetical and based upon a presumed financial performance of the Company, the addition of a sophisticated and well funded marketing plan, and other factors influencing the business. The projections are based on Management's best estimate of the probable results of operations of the Company and the investments made by management, based on present circumstances, and have not been reviewed by independent accountants and/or auditing counsel. These projections are based on several assumptions, set forth therein, which Management believes are reasonable. Some assumptions, upon which the projections are based, however, invariably will not materialize due the inevitable occurrence of unanticipated events and circumstances beyond Management's control. Therefore, actual results of operations will vary from the projections, and such variances may be material. Assumptions regarding future changes in sales and revenues are necessarily speculative in nature. In addition, projections do not and cannot take into account such factors as general economic conditions, unforeseen regulatory changes, the entry into a market of additional competitors, the terms and conditions of future capitalization, and other risks inherent to the Company's business. While Management believes that the projections accurately reflect possible future results of operations, those results cannot be guaranteed.

ITEM 6. DESCRIPTION OF BUSINESS ITEM

INTEX Program Corporation (“Company”, “We”, “Our” or “Us”) is a California Company that was originally formed in October of 2011 as a Limited Liability Corporation and converted to a California Stock Corporation in March of 2014.

The Company, streamlines the journey of international students looking for an internship in Los Angeles. We will also help US students participate in exchange programs through our partners abroad.

The business model will then be applied to all the major US cities by opening branches in New York, San Francisco, Miami, Chicago, Washington DC ...during the next five years.

The need of the newly established community of international students visiting the United States are diverse. We will provide a full package of services aimed at solving every problem encountered by the students and simplify the entire process.

Our goal is to gradually provide these services to more cities in the US while partnering with organizations around the world for US students traveling abroad. The partnering organizations are screened to ensure the same level and quality of services.

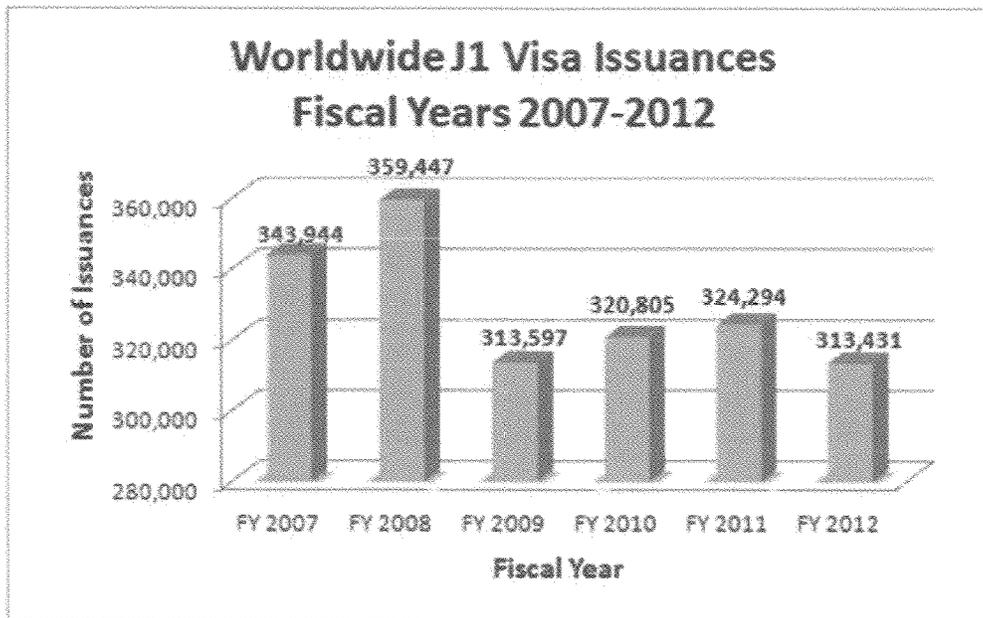

On January, 2014. INTEX Program secured partnership agreements with companies in Los Angeles and exchange program organization is Georgia, France and Hong Kong. Our database, shows students signing with INTEX Program from 19 different countries.

INTEX Program, LLC is the premier company for bringing employers and international students together. Devoted to cultivating international career training opportunities and customizing these prospects for both the individual student and each unique company, INTEX Program understands that not everyone or every entity requires the same services. International internships are all about providing individuals with first-hand, practical knowledge of the business practices, cultures, and traditions of other countries, because creating and supporting these opportunities strengthens the cooperation between countries, fostering an environment where individuals, businesses, organizations, and communities can reach a common understanding.

INTEX Program headquarter office will be located near Los Angeles international airport (LAX). The proximity with Car/Van Rentals, Restaurants and Hotels will be key for the success of the business. The Office will need a reception area, 2 executive offices, a conference room, 20 students training room (lab), Kitchen and an open space. The total Square footage should be between 1500 and 2000 sq. ft.

Business Model :

Each year more than 300,000 students travel to the United States to participate in a cultural exchange program (Intern, Trainee, Au pair, summer work, Language study...). In order to apply for these programs, the student need to obtain a J1 visa. This visa can only be delivered through a sponsor organization authorized by the US department of state. INTEX Program, will apply with the US department of state to be a sponsor organization upon first round of funding.

The government regulations (22 CFR Part 62) sets the requirements for the sponsor organizations that we will follow. However, our goal at INTEX Program is to provide a premium service package addressing every detail in order to encourage more companies and international students to engage in our exchange program without any worries.

Local companies will be assigned an INTEX Program coordinator and we will visit the main location of the internship. We do not charge employers but we encourage them to help students financially by offering a stipend, salary, add to crowd funding campaign and/or the option to pay INTEX Program fees on behalf of the students

The benefit for International students are well known specially by the European Union who offers grants to support the mobility of its students. The experience gained during our exchange program will boost the chances of every student to secure a job in their home country upon completion of our program.

Services :

From its inception, INTEX Program has strived to promote academic and real-life cross cultural educational experiences through international exchange programs with affordable, accessible, and supportive programs. Understanding that this is only possible when working with a select group of employers and potential interns, INTEX Program focuses its business in the Los Angeles area. For employers, INTEX Program provides a multitude of international students who are looking for high-quality, educational internships. For students, INTEX Program strives to match each individual with an opportunity that will advance his or her education and future career, all while making the temporary move to a foreign country easy and enjoyable.

For Employers:

INTEX Program, Inc. takes the guesswork out of bringing overseas students onboard, priding ourselves in our ability to connect the best candidates to the best companies.

For employers, the INTEX Program is absolutely free. This will allow companies to not only post internship offers, opening the company up to intelligent, eager students from all over the world, but also lets the company search through every student in the INTEX Program database, finding the best one for the job.

Every student in the INTEX Program database provides an accurate resume as well as a video presentation in English so that the company can gauge his or her English speaking skills: after all, we all know that writing in a foreign language is drastically different than speaking it, especially with today's translation software!

Hiring international interns through INTEX Program not only removes a lot of the paperwork and hassle of bringing over international students, but INTEX Program also brings the company one step closer to immersing itself in today's global market. In most cases, we suggest companies offer 6 month internships, as these tend to provide the most benefit for the student and the company; however, the company can do as little as 3 months or as long as a year.

Working with INTEX Program to hire international interns eliminates a lot of stress and paperwork so that the company can focus on "what the company does" while still ensuring that the company can find a quality individual to join the company temporarily.

For Students:

For Students, the INTEX Program registration is FREE! The student can create an online resume to attract companies that are looking for internship candidates in their field, as well as search through the INTEX Database and contact companies directly. Once the student has found his / her dream internship, INTEX Program can help them get everything set up.

As most of us know, moving to another country is rife with paperwork, which can be overwhelming for anyone. For the nominal fee of \$3500 USD (~2500 euros), INTEX Program will take care of just about everything so that the student can focus on preparing and working at their internship.

INTEX Program, Inc. Provides International Students:

A welcome packet, free smartphone, and an international student card that will provide the student with discounts on services such as rental cars and hotels.

- Health and accident insurance during the student's internship.
- Online English classes to prepare and pass the TOEFL exam at an INTEX Program location.
- J1 Visa processing and obtaining the proper identifications...and more.

As it can be difficult to look for a place to live from thousands of miles away, INTEX Program also helps students to get set up in a rental during their internship (in a safe neighborhood). Once the student arrives in Los Angeles, an INTEX Program professional will pick them up from the airport and provide them with unlimited access to a conference room so that the student can stay in touch with their supervisors or teachers back home.

Here at INTEX Program, our primary goal is to ensure that the student has everything they need to get the most out of their internship, as well as the most out of their experience in the United States. The International Student can just leave everything to us!

- **Students must be in good standing in their home educational institution**
- **Participants must be currently enrolled as undergraduate or graduate students or have graduated no more than 12 months prior to the start date of the internship.**

Competition:

The main competition is the sponsor organizations based in California (11). Most of the competition is nonprofit organizations with a very different business model. These companies offer a large catalog of visa processing throughout the United States. They do not concentrate on one specific segment. INTEX Program will cover the Intern/Training segment and start with the Los Angeles area. The business model offered by INTEX Program does not allow us to place students in a city without any branch. Our competition will process the visa and will have its students everywhere in the United States, thus, it cannot deliver the same premium services offered by INTEX Program.

As it can be difficult to look for a place to live from thousands of miles away, INTEX Program also helps students to get set up in a rental during their internship (in a safe neighborhood). Once the student arrives in Los Angeles, an INTEX Program professional will pick them up from the airport and provide them with unlimited access to a conference

- **Eliminate collection costs by establishing cash/credit/debit card only facilities**

The goal for INTEX Program is:

The management team will be scaled up as the customer base increases. The financial tasks will be outsourced in the beginning to our partner NOWCFO who will provide a CFO expertise as per needed base. The marketing plan will be processed by a Los Angeles based marketing agency and by INTEX Program agents. The student's cultural activities will be offered in "A la carte" bases by our tourism agency partner based in Los Angeles.

Pricing:

The pricing strategy includes all the costs for INTEX Program services. The main factor that can change is the insurance for internships longer than 6 months. Our goal is to provide a cultural exchange experience and avoid any wrong use of the J1 visa for immigration purposes. Thus we will encourage employers to limit the stay of the students to a 6 months program. The US department of state authorize the intern J1 visa student to stay up to 12 months.

We are confident that we can partner with some of the most prestigious companies in the world here in Los Angeles. The scalability of the business allows us to hire more agents as we grow.
