(g) Affiliates of the Issuer. None.

(h) Counsel and Underwriters for Company.

At this time of this filing there is no counsel for the Company or underwriter(s) in connection with this offering.

The Alternative Securities Market Group (ASM) maintains an online portal for investors to purchase into our offering, and performs certain services for us in connection with the offering such as but not limited to distributing ongoing reports about our company. ASM is exclusively an ancillary service provider that will be reimbursed for documented expenses. The Company will be selling these Securities directly, and no underwriter or dealer is responsible for the distribution of this offering.

Although both Cyber Holdings, Inc. and ASM believe ASM's web portal will be sufficient to ensure success of the offering, the Company's relation with ASM is non-exclusive and the Company both has and reserves the right to enlist the aid of FINRA registered broker dealers if it is necessary to ensure success of the Offering. If so an appropriate Amendment shall be filed in a timely fashion.

To facilitate Cyber Holdings, Inc.'s liquidity at the onset of this Offering, in lieu of cash for its assistance in the obtaining a CIK No. and its assistance in the preparation of the registration statement, ASM has agreed to accept FIVE HUNDRED SEVENTY-ONE THOUSAND THREE HUNDRED AND ONE shares of common Stock in the Company, representing 5% (five percent) of outstanding common stock shares upon completion of this Offering.

ASM will not receive any selling commissions; nor will it receive any fixed percentage of the Offering Proceeds as might a FINRA registered broker dealer. ASM will only receive documented expenses. Although ASM's expenses are likely to be somewhat proportional to the amount raised as they will be incurred during the duration of the raise, reimbursement of such documented expenses is **capped at an expense amount not to exceed 5% of the Offering proceeds**. Hence ASM does not qualify as an underwriter.

(i) through (m) None

Item 2. Application of Rule 262.

(a) (b) None of the persons identified in response to Item 1 are subject to any of the disqualification provisions set forth in Rule 262 and, as a result, no such application for a waiver if disqualification has been applied for, accepted or denied.

Item 3. Affiliate Sales.

None of the proposed offering involves the resale of securities by affiliates of the issuer.

Item 4. Jurisdictions in which Securities are to be offered.

(a) The Securities to be offered in connection with this proposed offering shall not be offered by underwriters, dealers or salespersons.

(b) The Securities in this proposed offering shall be offered in the following jurisdictions (but not limited to), subject to qualification in each State, as necessary:

- California
- New York
- Florida
- Illinois
- Texas
- New Jersey

Although the Company is not using a selling agent or finder in connection with this Offering, it will use a website as an online portal and information management tool in connection with the Offering. The Website is owned and operated by Alternative Securities Markets Group, a California Stock Corporation and an equity partner of the Company, can be viewed at <http://www.AlternativeSecuritiesMarket.com>.

This Offering Circular will be furnished to prospective Investors upon their request via electronic PDF format and will be available for viewing and download 24 hours per day, 7 days per week on the website.

In order to subscribe to purchase the Units, a prospective Investor must complete, sign and deliver the executed Subscription Agreement, Investor Questionnaire and Form W-9 to Cyber Holdings, Inc. and wire or mail funds for its subscription amount in accordance with the instructions included in the Subscription Package.

The Investing Section of the Website Hosting this Offering will be coded to only allow access to invest to those prospective Investors that reside in jurisdictions where the Offering is registered and meet any State-Specific Investor Suitability Standards.

Item 5. Unregistered Securities Issued or Sold Within One Year.

Within the past year the Company has issued 574,999 units of Common Stock and 574,999 warrants to purchase shares of Common Stock in conjunction with the sale of Units as described in Item 6 below. The total cash proceeds to the Company resulting from these activities are \$162,500.

Item 6. Other Present or Proposed Offerings.

In 2012, the Company secured \$112,000 via the sale of 14 Units. Each Unit provides to the purchasers thereof Common Stock, Warrants and Notes. In 2013, the Company secured (a) \$50,000 via the sale of 10 Units (separate and distinct from the first offering) and \$112,500 via the sale of 4.5 Units (separate and distinct from the second offering). Each Unit provides to the purchasers thereof Common Stock and Warrants.

Total shares issued from these financing rounds were as follows: 1,321,661 shares Common Stock, par value \$0.001 per share, and 1,578,337 Warrants to purchase 1,578,337 shares of Common stock, par value \$0.001 per share. The first seed offering of 14 Units also included a Unit Note that provides for re-payment of up to \$94,000 on or before 3Q 2015; however, based upon the parameters of the Unit Note, we believe that few, if any, Unit repayments will be

made as the Unit Note allows for use of the cash-repayment (plus additional incentives) for exercise of the warrants issued in that financing. On an as-issued, fully diluted basis, with 100% exercise of Warrants, these prior rounds would involve issuance of 2,899,998 shares of our Common Stock, \$0.001 par value. None of the Warrants from any of the prior raises have been exercised as of the date of this Memorandum.

In accordance with the Company agreement with Alternative Securities Markets Group ("ASM"), the Company shall place into escrow and issue to ASM up to 571,301 shares of Common Stock (the "Escrowed Common Stock") as follows:

- 20% of the Escrowed Common Stock Shares to be released to ASM fully diluted upon the successful capitalization of the Company to 20% of the \$2,100,000 (the "Company's Total Required Investment Capital").
- 20% of the Escrowed Common Stock Shares to be released to ASM fully diluted upon the successful capitalization of the Company to 40% of the Company's Total Required Investment Capital.
- 20% of the Escrowed Common Stock Shares to be released to ASM fully diluted upon the successful capitalization of the Company to 60% of the Company's Total Required Investment Capital.
- 20% of the Escrowed Common Stock Shares to be released to ASM fully diluted upon the successful capitalization of the Company to 80% of the Company's Total Required Investment Capital.
- 20% of the Escrowed Common Stock Shares to be released to ASM fully diluted upon successfully diluted upon the successful capitalization of the Company to 100% of the Company's Total Required Investment Capital.

The issuance of all the foregoing shares was in reliance of the exception from registration afforded by Section 4(2) of the Securities Act of 1933, as amended.

No application is currently being prepared for the Company's Securities to be admitted to the Official Listing and trading on any regulated market. No application is being prepared to include the Securities to trading on an "Over-the-Counter" or "Open Market", though the Company intends to submit an S-1 or Form 10 Filing within TWELVE MONTHS of the close of this securities offering. There can be no assurance that a liquid market for the Securities will develop or, if it does develop, that it will continue. If a market does develop, it may not be liquid. Therefore, investors may not be able to sell their Securities easily or at prices that will provide them with yield comparable to similar investments that have a developed secondary market. Illiquidity may have a severely adverse effect on the market value of the Securities and investors wishing to sell the Securities might therefore suffer losses.

Item 7. Marketing Arrangements.

There are no marketing arrangements with respects to this offering. The Offering is on a "Best Efforts" basis and is being offered directly by the Company through its Officers and Directors. There are no plans to stabilize the market for the securities to be offered. The Company will be selling these Securities directly, and no underwriter or dealer is responsible for the distribution of this offering.

Item 8. Relationship with Issuer of Experts Named in Offering Statement. None.

Item 9. Use of a Solicitation of Interest Document.

The Company has not used a publication, whether or not authorized by Rule 254, prior to the filing of this notification

Accordingly, all Investment Funds after the Investment Minimum has been achieved, will become immediately available to the Company and may be used as they are accepted. The Offering Price bears no relationship whatsoever to our assets, earnings, book value or other criteria of value. Among the factors considered were:

- The Company's lack of an operating history;
- The proceeds to be raised by this Offering;
- The amount of capital to be contributed by purchasers in this offering, the amount of capital contributed by purchasers of previous offerings, and the amount of stock to be retained by our existing Stockholders, and;
- The Company's relative cash requirements

Investment Highlights

Target Market and Customer Demographics. Over 5,000,000 online gamers currently play FPS matches. These participants are demographically diverse, with disposable income sufficient to participate in the Company's offerings. The average age of FPS Gamers is 35, with an average annual income of \$50,000. Forty-Seven percent (47%) of participants are female. These Gamers spend approximately six hours per week playing FPS matches.

Intellectual Property. The Company's anti-cheat technology includes one issued patent and one pending patent application that we believe provide for a robust, competitively defensible anti-cheat technology framework. To our knowledge, the Company offers the only PC-FPS tournament site with server-side anti-cheat software that does not require downloading and installation on participants' computers. Two of our trademarks have been registered in the United States, and the third is in condition for registration.

First-Mover Advantage. We believe that no other company currently offers online Gamers the ability to compete for cash prizes in a cheat-free environment.

Limited R&D Expenses. Research and Development expenses are projected to be less than 10% of gross revenue beginning in 2015. R&D spending is anticipated to be limited to enhancements in both our service offering by the addition of more game titles and to the anti-cheat technology, and the incremental cost of hosting matches and tournaments. The Company does not develop or market specific game titles.

Vendor Neutrality. The Company anticipates launching matches based upon the most popular game titles published by several different gaming vendors. New titles will be added and supported on a regular basis as determined by market demand.

Highly Scalable Business. The Company's anti-cheat algorithms can be leveraged across multiple game titles and tournament formats. The Company believes that the high degree of automation associated with our anti-cheat technology means that the incremental cost associated with adding additional titles is minimized.

Commercialization Risk. The Company's anti-cheat technology for the initial game titles has been fully developed and tested. The Company's websites have been fully developed. Beta testing has been completed. Live match beta testing has been conducted.

Partnerships. The Company's vendor-neutral platform provides for incremental opportunities to partner with PC hardware companies and vendor-sponsored tournaments (none of which are included in the Company's financial projections)¹

Executive Team and Board. The Company's executive team and Board include individuals with extensive experience in PC-based FPS gaming participation, FPS management site development, intellectual property creation, technology company commercialization, business operations, Initial Public Offerings and achieving successful exits for investors.

¹ In terms of our WarZone Girls asset, we have entered into a Joint Development partnership with an independent production company for marketing of this asset as a television show, Internet program and /or feature film.

ITEM 3. SUMMARY INFORMATION, RISK FACTORS AND DILUTION

Investing in the Company's Securities is very risky. You should be able to bear a complete loss of your investment. You should carefully consider the following factors, including those listed in this Securities Offering.

Online Gaming Technologies Industry Risks

Online Gaming Technologies Industry investments are subject to varying degrees of risk. The yields available from equity investments in Online Gaming Technologies Industry Companies depends on the amount of income earned and capital appreciation generated by the company as well as the expenses incurred in connection therewith. If any of the Company's products, services or assets does not generate income sufficient to meet operating expenses, the Company's Common Stock value could adversely be affected. Income from, and the value of, the Company's Products, Services and Assets may be adversely affected by the general economic climate, the General Online Gaming Market Conditions such as oversupply of related products or a reduction in demand for Online Gaming products in the areas in which the Company's Products, Services and Assets are located, competition from other Online Gaming Companies, and the Company's ability to provide adequate Online Gaming Products. Revenues from the Company's Products, Services and Assets are also affected by such factors such as the costs of product production and operations, as well as global and national market conditions.

Because Online Gaming Technology Industry investments are relatively illiquid, the Company's ability to vary its asset portfolio promptly in response to economic or other conditions is limited. The relative illiquidity of its holdings could impede the Company's ability to respond to adverse changes in the performance of its Products and Assets. No assurance can be given that the fair market value of the Products and Services Produced or Assets Acquired by, or produced by the Company will not decrease in the future. Investors have no right to withdrawal their equity commitment or require the Company to repurchase their respective Common Stock interests and the transferability of the Common Stock Units is limited. Accordingly, investors should be prepared to hold their investment interest until the Company is dissolved and its assets are liquidated.

Our Assumptions about Customer Retention via Free Credits May Not be Correct

While acquiring a customer is essential to any business, keeping the customer involved via continual purchasing is essential for our success. If we are unable to retain a significant number of our paying customer to buy Credits and play Matches, our financial projections may be subject to revision and may not prove to be as proposed.

We May Not be able to Commercially Develop our Technologies

We have concentrated our resources on development of our proprietary anti-cheat software and our WZS website. Our ability to generate revenue and operate profitably will depend on our being able to launch our WZS website, and attract, secure and retain paying players to and on the WZS website. We cannot guarantee that our anti-cheat software will be sufficient to warrant approval by those who try and use our WZS website and participate in the Matches that we offer. Even if our anti-cheat software performs as expected, there is no guarantee that it will be perceived as adding sufficient value to the gaming process relative to competing technologies, web-sites and Matches. Without adoption by those who play the types of games amenable to use on our WZS website, our WZS website will have limited commercial potential which will likely result in the loss of your entire investment.

Our Ability to Succeed Depends on our Ability to Grow our Business and Achieve Profitability

The introduction of new products and services, and expansion of our distribution channels will contribute significantly to our operational results, and we will continue to develop new and innovative ways to manufacture our products and expand our distribution in order to maintain our growth and achieve profitability. Our future operational success and profitability will depend on a number of factors, including, but not limited to:

- Our ability to manage costs;
- The increasing level of competition in the Online Gaming Technology Industry;
- Our ability to continuously offer new and improved products;
- Our ability to maintain efficient, timely and cost-effective production and delivery of our products;
- The efficiency and effectiveness of our sales and marketing efforts in building product and brand awareness;
- Our ability to identify and respond successfully to emerging trends in the Online Gaming Technology Industry;
- The level of consumer acceptance of our products;
- Regulatory compliance costs; and
- General economic conditions and consumer confidence.

We may not be successful in executing our growth strategy, and even if we achieve targeted growth, we may not be able to sustain profitability. Failure to successfully execute any material part of our growth strategy would significantly impair our future growth and our ability to attract and sustain investments in our business.

If We Fail to Promote and Maintain our Brand in the Market, our Business, Operating Results, Financial Condition, and our Ability to Attract Customers will be Materially Adversely Affected

Our success depends on our ability to create and maintain brand awareness for our product offerings. This may require a significant amount of capital to allow us to market our products and establish brand recognition and customer loyalty. Many of our competitors in this market are larger than us and have substantially greater financial resources. Additionally, many of the companies offering similar products have already established their brand identity within the marketplace. We can offer no assurances that we will be successful in establishing awareness of our brand allowing us to compete in this market. The importance of brand recognition will continue to increase because of low barriers of entry to the industries in which we operate may result in an increased number of direct competitors. To promote our brands, we may be required to continue to increase our financial commitment to creating and maintaining brand awareness. We may not generate a corresponding increase in revenue to justify these costs.

Development Stage Business

The Company was formed as a Delaware Stock Corporation in June of 2011. Accordingly, the Company has only a limited history upon which an evaluation of its prospects and future performance can be made. The Company's proposed operations are subject to all business risks associated with new enterprises. The likelihood of the Company's success must be considered in light of the problems, expenses, difficulties, complications, and delays frequently encountered in connection with the expansion of a business, operation in a competitive industry, and the continued development of advertising, promotions and a corresponding customer base. There is a possibility that the Company could sustain losses in the future. There can be no assurances that Cyber Holdings, Inc. will operate profitably.

Inadequacy of Funds

Gross offering proceeds of a maximum of \$2,100,000 may not be realized. Management believes that proceeds from a fully-subscribed Offering will capitalize and sustain the Company sufficiently to allow for the implementation of the Company's Business Plans. If only a fraction of this Offering is sold, or if certain assumptions contained in Management's business plans prove to be incorrect, the Company may have inadequate funds to fully develop its business.

Competition

Competition exists for Online Gaming Technology Products in most markets, including all sectors in which the Company intends to operate. The Company may be competing for sales with entities that have substantial greater economic and personnel resources than the Company. These entities may also generally be able to accept more risk than the Company can manage. Competition from other Companies in the Online Gaming Technology Industry may reduce the number of suitable prospective direct to consumer sales opportunities. See "COMPETITION/POTENTIAL PARTNERS."

Dependence on Management

In the early stages of development the Company's business will be significantly dependent on the Company's management team. The Company's success will be particularly dependent upon the services of Mr. Richard P. Burgoon, Jr., the Company's Chief Executive Officer; Mr. Phillip G. Plourde, the Company's Chief Operations Officer; and Mr. Michael G. Maguire, the Company's Chief Technology Officer.

Risks of Borrowing

Although the Company does not intend to incur any additional debt from the investment commitments provided in this offering, should the company obtain secure bank debt in the future, possible risks could arise. If the Company incurs additional indebtedness, a portion of the Company's cash flow will have to be dedicated to the payment of principal and interest on such new indebtedness. Typical loan agreements also might contain restrictive covenants, which may impair the Company's operating flexibility. Such loan agreements would also provide for default under certain circumstances, such as failure to meet certain financial covenants. A default under a loan agreement could result in the loan becoming immediately due and payable and, if unpaid, a judgment in favor of such lender which would be senior to the rights of members of the Company. A judgment creditor would have the right to foreclose on any of the Company's assets resulting in a material adverse effect on the Company's business, operating results or financial condition.

Unanticipated Obstacles to Execution of the Business Plan

The Company's business plans may change significantly. Many of the Company's potential business endeavors are capital intensive and may be subject to statutory or regulatory requirements. Management believes that the Company's chosen activities and strategies are achievable in light of current economic and legal conditions with the skills, background, and knowledge of the Company's principals and advisors. Management reserves the right to make significant modifications to the Company's stated strategies depending on future events.

Management Discretion as to Use of Proceeds

The net proceeds from this Offering will be used for the purposes described under "USE OF PROCEEDS." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated which it deems to be in the best interests of the Company and its Investors in order to address changed circumstances or opportunities. As a result of the foregoing, the success of the Company will be substantially dependent upon the discretion and judgment of Management with respect to application and allocation of the net proceeds of this Offering. Investors for the Units offered hereby will be entrusting their funds to the Company's Management, upon whose judgment and discretion the investors must depend.

Minimum Amount of Capital to be Raised

The minimum amount of Securities that need to be sold in this offering for the Company to access the investment funds is \$1,000,000. After the Minimum Amount of Capital required to be reached, all Investor funds will be transferred from the Company's Escrow Account with Bank of America to the Company's Business Account with

Bank of America. The Company cannot assure you that subscriptions for the entire Offering will be obtained. The Company has the right to terminate this offering of Securities at any time, regardless of the number of Securities that have sold. If the Offering terminates before the offering minimum is achieved, or if any prospective Investor's subscription is rejected, all funds received from such Investors will be returned without interest or deduction. The Company's ability to meet financial obligations, cash needs, and to achieve objectives, could be adversely affected if the entire offering of Securities is not fully subscribed.

Management Discretion as to Use of Proceeds

The net proceeds from this Offering will be used for the purposes described under "USE OF PROCEEDS." The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated which it deems to be in the best interests of the Company and its Investors in order to address changed circumstances or opportunities. As a result of the foregoing, the success of the Company will be substantially dependent upon the discretion and judgment of Management with respect to application and allocation of the net proceeds of this Offering. Investors for the Units offered hereby will be entrusting their funds to the Company's Management, upon whose judgment and discretion the investors must depend.

Unanticipated Obstacles to Execution of the Business Plan

The Company's business plans may change significantly. Many of the Company's potential business endeavors are capital intensive and may be subject to statutory or regulatory requirements. Management believes that the Company's chosen activities and strategies are achievable in light of current economic and legal conditions with the skills, background, and knowledge of the Company's principals and advisors. Control by Management

As of October 15, 2014 the Company's Managers own approximately 37.1% of the Company's outstanding Common Stock and 0% of the Company's Preferred Stock on a fully-diluted basis. Upon completion of this Offering, the Company's Management will own approximately 22.9% of the outstanding Common Stock of the Company and 0% of the outstanding Preferred Stock of the Company on a fully-diluted basis. Investors will have the ability to control either a vote of the Company's Managers or any appointed officers. See "COMPANY MANAGERS" section.

Return of Profits

The Company has never declared or paid any cash dividends on its Common Stock. The Company currently intends to retain future earnings, if any, to finance the expansion of the Company's Operations and Holdings. As a result, the Company does not anticipate paying any cash dividends to its Common Stock Holders for the foreseeable future.

No Assurances of Protection for Proprietary Rights; Reliance on Trade Secrets

In certain cases, the Company may rely on trade secrets to protect intellectual property, proprietary technology and processes, which the Company has acquired, developed or may develop in the future. There can be no assurances that secrecy obligations will be honored or that others will not independently develop similar or superior products or technology. The protection of intellectual property and/or proprietary technology through claims of trade secret status has been the subject of increasing claims and litigation by various companies both in order to protect proprietary rights as well as for competitive reasons even where proprietary claims are unsubstantiated. The prosecution of proprietary claims or the defense of such claims is costly and uncertain given the uncertainty and rapid development of the principles of law pertaining to this area. The Company, in common with other investment

funds, may also be subject to claims by other parties with regard to the use of intellectual property, technology information and data, which may be deemed proprietary to others.

The Company's Continuing as a Going Concern Depends Upon Financing

If the Company does not raise sufficient working capital and continues to experience pre-operating losses, there will most likely be substantial doubt as to its ability to continue as a going concern. Because the Company has generated no revenue, all expenditures during the development stage have been recorded as pre-operating losses. Revenue operations have not commenced because the Company has not raised the necessary capital.

Broker - Dealer Sales of Units

The Company's Common Stock Units are not included for trading on any exchange, and there can be no assurances that the Company will ultimately be registered on any exchange. The NASDAQ Stock Market, Inc. has recently enacted certain changes to the entry and maintenance criteria for listing eligibility on the NASDAQ SmallCap Market. The entry standards require at least \$4 million in net tangible assets or \$750,000 net income in two of the last three years. The proposed entry standards would also require a public float of at least 1 million shares, \$5 million value of public float, a minimum bid price of \$2.00 per share, at least three market makers, and at least 300 shareholders. The maintenance standards (as opposed to entry standards) require at least \$2 million in net tangible assets or \$500,000 in net income in two of the last three years, a public float of at least 500,000 shares, a \$1 million market value of public float, a minimum bid price of \$1.00 per share, at least two market makers, and at least 300 shareholders.

No assurance can be given that the Common Stock Units of the Company will ever qualify for inclusion on the NASDAQ System or any other trading market until such time as the Managers deem it necessary. As a result, the Company's Common Stock Units are covered by a Securities and Exchange Commission rule that opposes additional sales practice requirements on broker-dealers who sell such securities to persons other than established customers and qualified investors. For transactions covered by the rule, the broker-dealer must make a special suitability determination for the purchaser and receive the purchaser's written agreement to the transaction prior to the sale. Consequently, the rule may affect the ability of broker-dealers to sell the Company's securities and will also affect the ability of members to sell their units in the secondary market.

Secondary Market

No application is currently being prepared for the Company's Securities to be admitted to the Official Listing and trading on any regulated market. No application is being prepared to include the Securities to trading on an "Over-the-Counter" or "Open Market", though the Company intends to submit an S-1 or Form 10 Filing within TWELVE MONTHS of the close of this securities offering. There can be no assurance that a liquid market for the Securities will develop or, if it does develop, that it will continue. If a market does develop, it may not be liquid. Therefore, investors may not be able to sell their Securities easily or at prices that will provide them with yield comparable to similar investments that have a developed secondary market. Illiquidity may have a severely adverse effect on the market value of the Securities and investors wishing to sell the Securities might therefore suffer losses.

Certain Factors Related to Our Common Stock

Because the Company's Common Stock may be considered a "penny stock," a shareholder may have difficulty selling shares in the secondary trading market.

The Company's Common Stock Units may be subject to certain rules and regulations relating to "penny stock" (generally defined as any equity security that has a price less than \$5.00 per share, subject to certain exemptions). Broker-dealers who sell penny stocks are subject to certain "sales practice requirements" for sales in certain nonexempt transactions (i.e., sales to persons other than established customers and institutional "qualified

investors"), including requiring delivery of a risk disclosure document relating to the penny stock market and monthly statements disclosing recent price information for the penny stocks held in the account, and certain other restrictions. For as long as the Company's Common Stock is subject to the rules on penny stocks, the market liquidity for such securities could be significantly limited. This lack of liquidity may also make it more difficult for the Company to raise capital in the future through sales of equity in the public or private markets.

The price of the Company's Common Stock may be volatile, and a shareholder's investment in the Company's Common Stock could suffer a decline in value.

There could be significant volatility in the volume and market price of the Company's Common Stock, and this volatility may continue in the future. The Company's Common Stock may be listed on the OTCQB, OTCQX, OTCBB, The Bermuda BSX Exchange, the London Stock Exchange's AIM Market, the Canadian TSX Venture Exchange or TMX Exchange, the Irish Stock Exchange, the Frankfurt Stock Exchange and / or the Berlin Stock Exchange, where each has a greater chance for market volatility for securities that trade on these markets as opposed to a national exchange or quotation system. This volatility may be caused by a variety of factors, including the lack of readily available quotations, the absence of consistent administrative supervision of "bid" and "ask" quotations and generally lower trading volume. In addition, factors such as quarterly variations in our operating results, changes in financial estimates by securities analysts or our failure to meet our or their projected financial and operating results, litigation involving us, general trends relating to the Online Gaming Industry, actions by governmental agencies, national economic and stock market considerations as well as other events and circumstances beyond our control could have a significant impact on the future market price of our Common Stock and the relative volatility of such market price.

Compliance with Securities Laws

The Company's Securities are being offered for sale in reliance upon certain exemptions from the registration requirements of the Securities Act and other applicable state securities laws. If the sale of Securities were to fail to qualify for these exemptions, purchasers may seek rescission of their purchases of Securities. If a number of purchasers were to obtain rescission, we would face significant financial demands, which could adversely affect the Company as a whole, as well as any non-rescinding purchasers.

Offering Price

The price of the Securities offered has been arbitrarily established by our current Managers, considering such matters as the state of the Company's business development and the general condition of the industry in which it operates. The Offering price bears little relationship to the assets, net worth, or any other objective criteria.

Lack of Firm Underwriter

The Securities are offered on a "best efforts" basis by the Company's Managers, without compensation and on a "best efforts" basis through certain FINRA registered broker-dealers, which have entered into Participating Broker-Dealer Agreements with the Company. Accordingly, there is no assurance that the Company, or any FINRA broker-dealer, will sell the maximum Securities offered or any lesser amount.

Projections: Forward Looking Information

Management has prepared projections regarding anticipated financial performance. The Company's projections are hypothetical and based upon a presumed financial performance of the Company, the addition of a sophisticated and well funded marketing plan, and other factors influencing the business. The projections are based on Management's best estimate of the probable results of operations of the Company and the investments made by management, based on present circumstances, and have not been reviewed by independent accountants and/or auditing counsel. These projections are based on several assumptions, set forth therein, which Management believes are reasonable. Some

assumptions, upon which the projections are based, however, invariably will not materialize due the inevitable occurrence of unanticipated events and circumstances beyond Management's control. Therefore, actual results of operations will vary from the projections, and such variances may be material. Assumptions regarding future changes in sales and revenues are necessarily speculative in nature. In addition, projections do not and cannot take into account such factors as general economic conditions, unforeseen regulatory changes, the entry into a market of additional competitors, the terms and conditions of future capitalization, and other risks inherent to the Company's business. While Management believes that the projections accurately reflect possible future results of operations, those results cannot be guaranteed.

ITEM 6. DESCRIPTION OF BUSINESS

Business: Cyber Holdings, Inc. (“CHI” or the “Company”), a Delaware corporation operating and qualified to do business in California and formed in June 2011, is an internet-based commercialization-stage entertainment organization focused on the design and implementation of personal computer (PC) online, First-Person-Shooter (FPS) world-wide Matches for participants (PC Gamers) through its WarZone Secure™ (“WZS”) web site, located at <http://www.warzonesecure.com>.

The WZS website is configured for FPS games such as Electronic Art’s® “Battlefield” series². First-Person Shooter is a video game genre that allows the PC Gamer to experience combat through a first-person perspective; i.e., the PC Gamer experiences the action through the eyes of a protagonist-avatar. FPS games are a fast growing segment of the video-game market, with an estimated 5 million PC-based players worldwide.

We believe that the core demographics of FPS Gamers will drive the financial results of our business. While the stereotypical view of a Gamer is often a young teenage boy sitting alone on a Friday night in a basement playing these games, in actuality, the demographics are much more profound. The average age of a FPS Gamer is 30, with median income is about \$50,000, and the Male/Female breakdown is 53%/47%³. Critically, on average, *Gamers spend about 6 hours per week playing video games*. These Gamers also spend thousands of dollars per year on equipment. This is a market niche that is not only underappreciated, but all but ignored. We expect to change that with WZS.

CHI provides organized online PC FPS Matches where PC Gamers may compete as individuals, small teams or as Large, Organized Teams (sometimes referred to by Gamers as “Clans”⁴) in cheat-free competitions to win cash and prizes. To our knowledge, we are the only online site in the world that offers Matches in a cheat-free environment for both individuals/small teams and Clans⁵.

Matches held on the WZS website are provided via dedicated gaming servers which are housed in data centers located within the United States of America and Germany. PC Gamers who compete in WZS Matches can be located virtually anywhere in the world. Much in the same way that sports teams may pay a fee to use a playing field and hire referees to compete with other teams, regardless of the sport, CHI provides a virtual “playing field” and virtual “referees” where PC Gamers can compete online with other PC Gamers using games that they already own or possess.

Importantly, CHI is not providing the actual games themselves, but rather a safe, secure and cheat-free virtual arena (via our proprietary, patent-pending Win With Honor™ anti-cheat technology) on which these games can be played and prizes won. Our forum allows PC Gamers to compete for cash and other prizes with reduced concerns about cheating, a rampant cottage business in the gaming industry which has all but prevented any type of online Matches from being adopted by PC Gamers or actively promoted by the developers of the games. To our knowledge, other gaming sites require Gamers to own a console such as the Microsoft® “Xbox” or Sony® “PlayStation”. We do not. Our Matches can be played via a PC connected to the internet, with no need for any console device.

We also operate a companion website, WarZone Girls, located at <http://www.warzonegirls.com>. Based upon the demographics of PC Gamers, nearly half of whom are female, we provide online graphic novels (comic books) based upon a story-line and all- female protagonists that are intended to direct PC Gamers to our main website. We view the WarZone Girls graphic novel/comic book website as primarily a marketing tool for the WarZone Secure

² Electronic Arts is neither affiliated with, nor an investor in, CHI.

³ Data and related information cited in document.

⁴ “Clans” are large, coordinated groups of often very focused, dedicated and intense Gamers. Clans can range in size from 25 to several hundred members. In general, Clans exist to compete with other Clans. Clans often have their own dedicated websites and logos. Clans are no different than sport teams, for example the San Diego Chargers™ or the Boston Red Sox™.

⁵ Our Organized Team Matches are configured differently than our Individual and Small Team Matches, with different participation numbers, entry fees, prizes and fees.

site, and indeed, the last page of each issue is a full-page advertisement for WZS. If the series secures a following, our goal for WZG would be to out-license the characters for merchandising, as well as explore the potential for animated or live-action shorts or films. In 2014, we entered into a Joint Development Agreement with a New York City based production company to develop a “pitch reel” and pitch process for seeking third party development of WarZone Girls into a television, internet or theatrical release⁶.

Matches: CHI does not provide the PC games to the PC Gamers. The games are already owned or available to the PC Gamers. Rather, CHI, through its WZS website, provides a secure, virtual “arena” on which the games are played. Our commercial launch (April 2014) comprises over 100 different Match-types for 7 of the most popular FPS game titles, including both the CounterStrike™ and Battlefield™ series. Our WZS website is coded, such that we can readily add new titles to our system on a regular basis and apply our anti-cheat technology to the new titles. We plan on adding a few new titles approximately every six months. We segregate the Match-types into five competitive categories: FreeZone™, with no entry fee (intended to attract new users to try our website); Standard, with a \$0.25 entry fee per Gamer; Skill-Based, with a \$2.50 entry fee per Gamer; High-Value, with a \$5.00 entry fee per Gamer; and Organized Team-Match, with an \$4.00 entry fee per Team Member⁷. Our Matches are designed based upon the way FPS Gamers already compete, such as “King of the Hill” and “Capture the Flag.” Except for FreeZone and Standard (which provide no cash prizes and limited credits for winners), each Match provides up to three cash prizes (which can also be taken by the winner in the form of playing credits), with the cash prize (or credit equivalent) for 3rd place being no less than the Match entry fee, and with 2nd and 1st prizes being correspondingly greater. In addition, every Gamer who completes a WZS Match (except for FreeZone) receives free playing credits that can be accumulated and used for Match entry fees. On average, we expect to generate an approximate 48% margin on all Matches (gross Match fees, less cash prizes and the cash value of free participation credits).

Anti-Cheat Technology: Cheating is rampant in this sector. Indeed, custom or commercial PC-software that allows players to cheat and gain an unfair advantage over other players, commonly referred to as “cheats”, are often simultaneously released by third parties when the video games amenable for play on our website are released.

To prevent cheating and prevent the use of cheats, CHI utilizes proprietary and patent-pending multi-level algorithms for detecting, catching and deterring cheating during each Match. One such patent is owned by us and issued in September 2013; the second has been filed and is pending. We believe that our anti-cheat technology is the unique differentiator between CHI and all other tournament sites, the vast majority being console-based (using, for example, Xbox® and other proprietary platforms) and most often conducted in stadium-like settings where the players compete in physical proximity with one another where behavior can be physically monitored by proctors. To our knowledge, CHI is the only entity that provides server-side anti-cheat technology, meaning that our customers do not need to purchase, download or install any anti-cheat software in order to compete in our cheat-free environment. We believe that our anti-cheat technology is a key component of our service offering and is intended to ensure a level playing field for all WZS participants.

Revenue: We will derive revenue from WZS Matches based upon a pay-to-play revenue model. Each Match will consist of between 4 and 32 Gamers who can compete as individuals or small teams or organized teams⁸. Multiple Matches can be run simultaneously, and different Match types can also be run simultaneously⁹. Gamers need not

⁶ This agreement has not been publicly announced as of the date of this Memorandum.

⁷ The primary purpose of FreeZone™ and Standard matches are to drive demand to Skill and High-Value matches.

⁸ Team members are randomly assigned, or players can play as a defined small team or Clan. The FPS games are designed for multiple players on different “sides” for example, different countries, etc.

⁹ For example, one set of players can be playing “Insurgency” while another set is playing “Battlefield II”.

know each other, and Gamers can be located in different parts of the world. Matches can take place 365 days a year, 7 days a week, 24 hours a day.

Match costs are denominated in "Credits." Each Credit is valued at \$.005, i.e. 200 Credits per \$1.00. As delineated on our website, this allows a Gamer to play multiple types of Matches. We will not issue refunds for unused credits.

We believe that the barrier to entry for the purchase of credits is more than acceptable for the demographic of our customers, and indeed we expect that upon adoption, many of our customers will readily spend \$60-\$80 per month (\$15-\$20 per week or about 5 to 8 Matches per week) on our service offering. However, to even further reduce the barrier to entry, we have established two competitive levels, FreeZone™, which has no entry fee and minimal credit prizes (no cash), and Standard, which has a 50 Credit (\$0.25) entry fee, again with credit prizes but no cash prizes. We estimate that we will lose about \$0.09 on many of our FreeZone Matches, which we consider to be a marketing expense as the intent is to attract Gamers to the site via these free/reduced entry-fee levels, and then work to convert these Gamers to our Entry-Fee competitive levels where they can win larger Credit prizes as well as cash prizes.

We believe that one of our key differentiators is that every Gamer who completes a WZS Match will win Credits; for individuals and small Teams, top scorers who place (1st, 2nd or 3rd) win cash prizes that can also be converted into Credits, and the winning Team in an Organized Team Match wins cash prizes or Credits. Credits are used for Match entry fees and, in the future, to purchase products from the online WZS store (e.g. tee-shirts, caps, mugs, etc.). We sometimes issue free Credits as part of our customer retention initiatives.

In terms of the graphic novels which we provide on the WarZone Girls website and via reading devices such as the Amazon Kindle®, our initial objective is to use this opportunity for marketing for our WZS site and therefore not charge for downloading the graphic novels. The WarZone Girls also includes an online store to purchase merchandise.

Entertainment: We consider our service offering to be entertainment-based. By that we mean that we do not consider our competition limited to other similar video game tournament sites, but rather venues that provide alternative entertainment such as movie-theaters, television, concerts, sporting events, etc. Approximately one-third of all participants indicate that playing these games is their favorite entertainment activity. Gamers, particularly FPS Gamers, are highly competitive. In an era where a ticket for a 90-minute movie can cost in excess of \$12, where consumers readily pay \$100's per month to secure cable television, and with many in our market demographic spending much more than \$15 per week on coffee, the purchase of credits to secure several hours' worth of competitive FPS gaming experiences is considered by us to be both a value-add for our customers, and a more robust form of entertainment.

Market Opportunity: FPS games have a built-in customer base for our business. We estimate that the worldwide market of FPS Gamers is approximately 5,000,000. Based on increasing revenue and units of games sold by third party game developers, we believe that this customer base is amenable to the adoption and continued utilization of the WZS website. These Gamers are highly competitive, often placing community recognition above winning prizes. On average, Gamers spend approximately six hours per week playing video games. The demographics of the target market are not the stereotypical "skateboarding teenager." In addition, to our knowledge, no organization has targeted Clans as part of its marketing approach; we intend to make our WZS website as "Clan-Positive."

Skill/Chance and "Gambling": We believe that the games played on the WZS website involve "games of skill" and not "games of chance." "Chance" is one of the elements generally required to be present in order for a game to violate state anti-gambling statutes. We believe that our Matches are not classified as "online gambling" such that cash prizes awarded to Match winners are not designated as gambling proceeds or winnings. This belief is predicated upon the test used by most states to determine if a game is one of skill or chance, i.e., the "Dominant Factor Test."

Most states have concluded that where the elements of skill, whatever they may be, predominate over the elements of chance, whatever they may be, in determining outcome, then the "chance" element is lacking and the game involved does not violate that state's anti-gambling law. In all FPS games, skill is what determines outcome with

skill involving superior hand-eye coordination, intelligence, memory, strategic thinking, recall, etc. Chance is at best involved with “dumb luck” or “beginner’s luck.” Indeed, cheats reduce the need for skill, and in this context, we believe that in addition to the nature value of skill in these games over chance, our anti-cheat technology further reduces the chance for cheating and therefore enhances and increases the need for skill to win. The Company therefore believes that skill predominates over chance in these games¹⁰.

Business Strategy: Our business strategy is predicated upon what we believe to be an existing market enthusiasm for the types of competitive Matches that we intend to offer on our website. Our business model is predicated upon targeting these Gamers and attracting them to our WZS website based upon the ability to compete in Matches with games that our customers already own or have access to with other payers, with the opportunity to win cash and prizes, and with the understanding that our website has built-in parameters that reduce or eliminate cheating.

REMAINDER OF PAGE LEFT BLANK INTENTIONALLY.

¹⁰ In the United States, Gamers who desire to play online video games involving money must be over the age of 18, and the following States prohibit the payment of money to play online video games: Alaska, Arizona, Delaware, Iowa, Maryland, North Dakota, Tennessee and Vermont. Our system requires acknowledgement the Gamer is at least 18 years, and we do alert all Gamers that if they are in any of these states about the legal requirements regarding the prohibition for paying cash to play online video games.

Operations

We anticipate launching commercial operations of our WarZone Secure website in early 2Q2014. The WarZone Girls website and free comic books were launched in early 2013; we have begun what we anticipate to be the monetization of that asset by entering into a Joint Development Agreement with a New York City-based production company for development of the WarZone Girls intellectual property into what could be a live action series or feature film.

Our prior raises were conducted to secure proceeds to develop the WZS and WZG websites and fund initial marketing efforts. The technology for the WarZone Secure website has been both alpha (internal) and beta (external, third party) tested. Our WZS site has been reviewed by well-recognized industry organizations,¹¹ as well as WZG.¹² We believe that the technology risks have been substantially reduced based upon our prior raises and the use of those proceeds¹³, and we believe that we are now an execution-focused investment opportunity. We also own (on a fully-diluted basis) 20% of Super Mackerel, Inc., a Delaware Corporation based in Long Beach California that provides multimedia marketing for third parties; we will use the services of Super Mackerel to assist us in expansion for the WZS website as well as other marketing endeavors¹⁴.

Importantly, we have completed development of our anti-cheat/PC-FPS software. Our software includes a proprietary, algorithm-based platform from which all of our anti-cheat software derives functionality, and specific anti-cheat software for each FPS gamed for which we offer Matches based on parameters unique to the specific FPS games. The Company has initially introduced seven of the most popular PC-based FPS games that can be used by Gamers in Matches offered on our website. These titles will be increased as our business expands¹⁵.

We believe that we have assembled an experienced, knowledgeable, robust and dedicated team of managers, Board of Directors, and outside consultants. The Company's executive team and Board includes individuals with extensive experience in PC-based FPS gaming participation, FPS management site development,

¹³ During our three year technology and business development period, no member of the management team has received compensation (or commitment for deferred compensation).

¹⁴ No proceeds from the Offering will be used for the operations of Super Mackerel, Inc. Our ownership in this asset is opportunistic and based upon having access to a multi-media marketing organization for which we provide certain business-oriented services.

¹⁵ At commercial launch, we will support the following FPS titles: Battlefield 3; Battlefield: Bad Company; Battlefield 4; Counter Strike: Source; Counter Strike: GO; Insurgency; and Team Fortress 2. We anticipate adding new titles every 6 months.

intellectual property creation, technology company commercialization, business operations, initial public offerings and achieving successful exits for investors.

The launch of our WarZone Secure occurred in 2Q 2014. Our WarZone Girls website was launched in early 2013. We intend to enhance brand awareness for the WarZone Secure website using online descriptions and contests on the WarZone Girls website where our graphic novel series is made available for free¹⁶.

Beneficially, we believe that investors in this financing round are not investing in what we consider the significant initial risk associated with early-stage technology and intellectual property development. We believe that the technology risks and costs associated with development of our WarZone Secure and WarZone Girls websites and our proprietary anti-cheat software have been substantially mitigated.

The Company's executive team opted to forego cash compensation throughout this three-year development stage. Proceeds from the Company's prior financing rounds were used to fund development expenses, and the anticipated proceeds of this current financing round will be primarily used for marketing expenses and operating costs as we begin expansion of our service offerings. We believe that the projected compensation for the executive team is modest. The management team is dedicated in its desire to be aligned with the objective of the Company's investors in that we recognize that that value of the Company will be established by the Company's equity, and not in salaries and other cash-oriented benefits.

Our Customers Already Own/Possess the FPS Games That Our Website Supports: WarZone Secure Matches versus PC FPS Games

Our business model is not based on licensing, leasing, renting, or purchasing of the games played in our Matches. We currently do not plan to develop or offer such games to our customers¹⁷. Our business model is based upon providing Matches to Gamers who have already purchased or otherwise secured the games of interest. In this context, our business is not dependent on any one PC FPS game or vendor¹⁸.

¹⁶ Our brand awareness process began in 2012 with an online survey and contest, the winner of which being announced via a press-release, as well as announcing initiation of Beta testing of our website. See, for example, <http://www.marketwire.com/press-release/-1730019.htm>

¹⁷ However, and based upon the gender demographics of FPS players, our companion website, www.WarZoneGirls.com provides an online graphic novel ("comic-book") series based on five female warriors in a scenario that could, at some point, be out-licensed by us to a third-party for development as an FPS game and for merchandising material.

¹⁸ By developing a business model that is agnostic to the particular PC FPS game being played, we believe that we substantially increase our business offering to all PC FPS game players. While some software developers of particular PC FPS games may offer Matches, these are limited to the particular game that the developer offers.

Our business is focused on providing a “level playing field” to FPS competitors who desire to compete for cash and prizes against other players, with an enhanced sense that cheats will not be viably utilized by other players to secure an unfair advantage and victory. We believe that this approach, i.e., providing a venue for cheat-free Matches, increases the opportunity to secure multiple customers who play different PC FPS games.

Market Opportunity

In 2010, 500 million video games were sold worldwide, and, of this amount, more than half were sold in the United States¹⁹. The video-game industry generates \$25 billion in annual revenue²⁰. Seventy-two percent of all American households play video or computer games²¹. Perhaps surprisingly, in as much as video games are considered to be games for the young, the average game-player age is in the mid-30s. The breakdown by age-group for video-game players is as follows²²:

Age Range	Percentage of Video Game Players ²³
Under 18	32%
18-35	31%
36+	37%

Despite what our natural assumptions may indicate and what popular media may suggest, these “games” are not for the young – indeed, more than one-third of all video-game players are over the age of 36. The average age of game purchasers is 35²⁴. The majority of online gamers have an average income of between \$35,000 and \$75,000²⁵. This data drives home a key point – this is not an industry of limited-income, young, male-only participants.

To rebut a popular conception, young Gamers do not bypass their parents with respect to these games; 82% of the time, young Gamers receive parental permission before purchasing or renting a game.²⁶

Furthermore, and again against stereotype, women make up a significant percentage of these players, with 47% of all players being female – women age 18 or older represent a significantly greater portion of the game-playing population (37%) than boys age 17 or younger (13%)^{27 28}. This is one of the key drivers supporting the development of our WarZone Girls website. Thirty-three percent of all players indicate that playing these games are their favorite entertainment activity²⁹.

Nor are these games used on a casual basis. With respect to adult gamers, the average number of years that they have been playing video or computer games is 12. This is consistent between men and women: among most frequent gamers, males average 13 years of game playing and females average 10 years. Gamers who use personal computers to play games (our target market is focused on games played on personal computers) spend an average of about six hours per week playing PC-based games³⁰. In addition, studies are now suggesting that despite the stereotypical “slacker” vision of these players, these games actually enhance intelligence and brain function:

“Being immersed in a video game, and having your brain stimulated, can encourage creative solutions and adaptations. These beneficial ideas and thoughts can then be applied to real life situations. The results can be surprisingly positive for individuals, communities, and society as a whole.”

--Allen S. Weiss, M.D., President and CEO, NCH Healthcare System

--Jane McGonigal, PhD, author of Reality is Broken: Why Games Make Us Better and How They Can Change the World

“Kids play video games for fun with the goal of progressing to the next level and eventually conquering the opponent, whether that’s another player or the computer. What’s more, the social aspect—sharing tactics, experiences, and explanations—helps cement what they’ve learned.”

Niche Market Focus: PC-Based First Person Shooter (FPS) Games

Our WZS website is focused on FPS games played via the personal computer. The FPS genre is a subset of the action video game genre. The FPS computer game genre centers on combat through a first-person perspective. FPS is a type of three-dimensional (3D) game featuring a first-person point of view through which the player sees the action via the eyes of the player character. The primary design element is strategy, planning and coordination under combat-oriented scenarios. FPS games use conventional input devices such as a “joystick” for movement, as well as the computer keys and mouse. FPS involves an avatar (a graphical representation of the player or the player’s alter ego or character), one or more ranged weapons, and a varying number of opponents. Because they take place in a 3D environment, these games tend to be more realistic than 2-dimensional games, and have more accurate representations of gravity, lighting, sound and interactions. It is common to display the character’s hands and equipment in the main view, with a heads-up display showing health, ammunition and location details. It is often possible to overlay a map of the surrounding area.

FPS is one of the fastest growing segments of the video-game industry. For example, the “Call of Duty” series by Activision®, has over 30 million players who play the game online at least once a month.³² Of all computer games sold in 2011, 13% were FPS.³³ Of all the top selling computer games (i.e., not just FPS) based on units sold in 2011, one of the titles included in our initial offering was ranked in the Top 20, Battlefield III (rank = 6).³⁴

About 10% of all video games sold in the United States in 2010 were personal computer (PC) video games (i.e. about 25 Million were PC video games)³⁵ – in as much as the United States represents half of all video games sold worldwide in 2010, we believe that the 10% figure regarding the percentage of computer video games sold is

applicable to the world-wide market, i.e. 10% of the world-wide market of 500 million video games sold in 2010 were PC video games (50 Million).

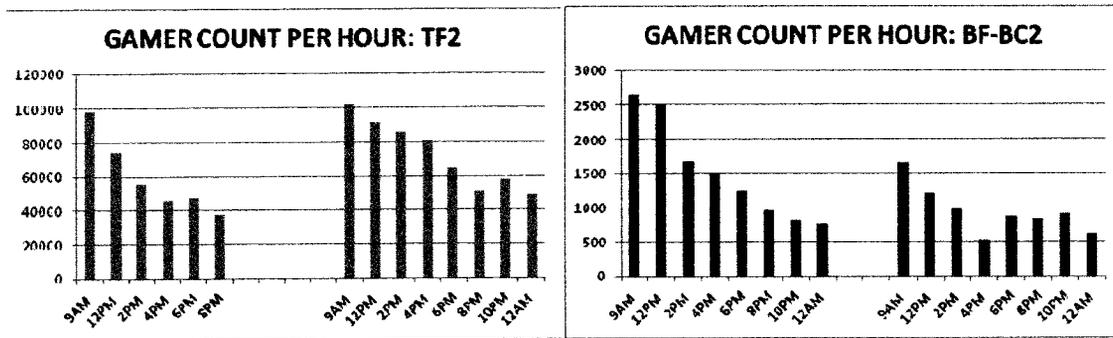

With respect to PC-based FPS – the focus of the WZS website – these sales represent 10% of the total PC video game market, i.e. about 2,500,000 (United States) and 5,000,000 (world-wide) PC video games sold in 2010 were PC-based FPS games.³⁶ This is the target market for our WZS website.

For purposes of our financial projections, we utilize a zero-growth rate for sales of PC video games. We believe that by utilizing a flat-growth projection with respect to PC video games sales during the period of our projections, those interested in CHI can gain a greater appreciation for the relatively small percentage of this market that we can project achieving burn rate neutrality and profitability from commercial launch. Therefore, our modeling and projections are based on a target market of 5,000,000 PC-based FPS video games throughout the Company's forecast period.³⁷

We note that our business is not dependent on growth in the PC-based FPS market. In addition, the 5,000,000 participant target market is based on units of PC-based FPS games sold, not people. Therefore, as an example, a family may own one PC FPS game, but several members may use that game to play the game at different times. In essence, we believe that our target market is growing and is larger than the number of units sold. However, and as noted, we have opted to use static market numbers for the foundation of our projections.

³⁶ http://www.theesa.com/facts/pdfs/ESA_EF_2011.pdf

³⁷ An important point about the target market: these numbers are based on units sold and not players. For example, a family of 4 may buy a game which would of course be one game – however 2 of the members of that family may use the game to compete on the WZS website. Accordingly, we do not endeavor to “bias” the projections based on overly optimistic numbers, and while an argument can be made and supported to increase the potential market size by adjusting the unit numbers based on, for example, average household size per purchase, and average number of players per household, our objective is to provide projections based on conservative estimates when estimates are required.

Game Title	Average Per Hour Data Collected Saturday August 31, 2013 9AM – 12AM	Average Per Hour Data Collected Sunday September 1, 2013 9AM – 12AM
Team Fortress 2	59,737	73,014
Battlefield Bad Company 2	1,513	949
<i>Average of Both Titles</i>	61,250	73,963

We believe that it is important to note that these games were being played simultaneously. A takeaway point is that over a 15 hour period on Saturday August 31, 2013, and over the same time period on Sunday September 1, 2013, *61 Thousand Gamers and 74 Thousand Gamers, respectively, were playing, per hour, only 2 of the FPS Games we support.* We believe that this demonstrates that our customer base exists; our goal is to move these Gamers to our WZS website to play these types of games within our secure, prize-based arena. In addition, and as is be detailed below, we need less than about 50,000 Gamers in total to play matches on our site and spend approximately \$20 per month (about 5-8 Matches per month) to achieve our financial projections.

In terms of the difference between console-based video games and PC-based video games, it is noteworthy that a basis for the development of consoles such as the Xbox® was based on the enhanced memory, graphics and sound that can be devoted to a console compared with a PC. However, astute users of PCs know and appreciate that the memory, graphic and sound capabilities of PCs are improving and will continue to improve. The Company believes that, in time, Gamers will be less inclined to stay with console-based games.

As the capability of a PC increases, the we believe that the justification to purchase a separate device, such as an X-Box® console, just to play FPS games will wane.

A Significant Problem for FPS: Cheats

A significantly negative aspect of FPS video games is cheating. Increasingly, in a desire to artificially enhance the skill set of a player or players to defeat those who are skilled and do not require an artificial advantage, there are always players who wish to gain an unfair advantage over others by using game exploits or external programs which offer an artificial advantage over other, more skilled, players. These exploits and external programs (also referred to as “cheats”) are analogous to professional athletes who use steroids to enhance their performance, thus creating an unfair advantage over players who rely solely on their own skills, talents and knowledge of the athletic contest.

In FPS games, cheats come in many forms, including “wall-hacks” which overlay a “heads-up” type display over the user’s screen—highlighting or placing a virtual box over their opponents and also allowing the user to literally see their opponents through solid objects such as walls and buildings, which gain the user a large tactical, and unfair, advantage. Another cheat example is commonly known as an “aimbot”, which in FPS games automatically aims and directs the user’s combat tools at opponents without requiring any skill on the part of the user. Yet another cheat overlays a virtual map for the user of the entire battlefield and shows all players (team members as well as opponents), allowing the user a large tactical, and yet again unfair, advantage over opponents. These are only a few examples of the many hundreds of cheats and variations of cheats widely available as paid programs created by professional companies, privately created and used and those in the hacking community and distributed free in public gaming forums.

Cheats allow for an unfair advantage over skilled players who compete based on a presumed “level playing field.” As with any competition, cheating not only reduces the ability of true competitors to know how they lost but also allows the cheater to gain an improper status and advantage over legitimate players. In the environment of online gaming, detecting such cheaters is often difficult. Importantly, the development of cheat-enabling software has rendered the ability to make the competitions less robust, time consuming and expensive – unless a player can be assured that all reasonable steps have been taken to prevent the use of cheats, it is difficult to assume a level playing field. This not only reduces the ability to make the competitions more enjoyable, but also weakens the allure of skill and the requirement of fair play.

Of equal importance is the significant damage that can be done to the reputations of game developers and sales of their products under which cheating has become rampant. Matthew Pritchard, a developer at Ensemble Studios, aptly summarizes this problem:

“Cheating hit closer to home for me while I was working on the final stages of *Age of Empires II: The Age of Kings*. Cheating online became a widespread problem with the original *Age of Empires*. Matches had to be cancelled due to a lack of credibility, the number of online players fell, and the reputation of my company took a direct hit from frustrated users. Unable to spare the resources to fix the game properly until

after *Age of Kings* was done, we just had to endure our users turning their anger upon us -- probably the most personally painful thing I've experienced as a developer."³⁸

Players using these widely-available cheats have become a widespread epidemic for the online gaming world. Large and established gaming companies such as Activision, Electronic Arts and even Microsoft are constantly playing a game of "cat-and-mouse" with cheating players, combating whichever cheats they can detect and releasing game updates and actively banning players that are caught cheating. This method of releasing updates to block the cheat or catch cheating players has been the primary approach game makers have been taking to address this phenomenon. The problem with this method is that in order for a counter-cheating agent to be created, game makers must first detect and then devise a method to anti-cheat the hack—all of which takes time, sometimes up to weeks and months in total. In addition, the cost can be staggering: if the cheating is not stopped, players will abandon one game for another, causing significant loss in revenue, coupled with what requires significant time and effort to block the cheating with software changes to the original game program.

Cheats are widely available and those that provide the cheat-software do not hide in the shadows. Indeed, they offer their services with impunity and evidence the "cat-and-mouse" nature of the problem -- the game-software company puts out a patch to stop one cheat, and the cheat puts out an update to overcome the patch³⁹. One example is as follows:

We have just updated our Call of Duty 4 Cheats to work with the new COD4 [Call of Duty 4] Patch v1.7. Our COD4 Cheats feature over 70 different options in the hack. You can set the hacks up in minutes once you become a member of our site. If you want the best cheats, hacks, aimbots and exploits for COD4 visit us online now. **DOWNLOAD OUR CHEATS AT** – www.FPSCHEATS.com⁴⁰

Part of the allure of cheating for PC-FPS games is related to the internet. Anonymity as to name and location, coupled with a desire to win in order to be perceived as the best by fellow online Gamers, and with little if any punishment when caught, all combine to make the process of cheating almost as powerful as the desire to use one's innate skills to win. Because Gamers rarely use their real ID and because their specific location is often unknown, the only way to track down a cheater is to identify the cheater's internet protocol address ("IP address"), which is a numerical label assigned to each device (e.g., computer) participating in a computer network that uses the internet for communication. However, even if the user's screen name and IP address are identified and that Gamer is banned from competition, that Gamer merely needs to create a new screen name and secure a different computer which will have a different IP address in order to continue cheating. Detecting the IP address and blocking that address from competition is often laborious, expensive and difficult, whereas creating a new user name and securing a new computer and IP address is simple.

³⁸ http://www.gamasutra.com/view/feature/3149/how_to_hurt_the_hackers_the_scoop_.php.

³⁹ A patch is a small piece of software that is used to correct a problem with a software program. Patches are often called "fixes." Most major software companies will periodically release patches, usually downloadable from the Internet, that correct very specific problems in their software programs.

Our Technology Solution

Our business will be conducted over the internet via our WZS website. In the context of the Matches that we provide, those who will be driven to our WZS website already understand and play the types of FPS games that are supported by WZS website. These games are played by thousands of Gamers each day, across the globe – our customer base is already established. Our business offering is new, but the universe from which we secure our customers is not. Our business objective is to drive already-existing Gamers who are already inclined to enhance the FPS game-playing experience by entering competitive Matches where prizes can be awarded –without the concern of cheating by other players— to our WZS website, and then via both loyalty/dedication and competitive attachment, continue playing these games via our Matches.

The opportunity to win money is important, but that alone cannot be the driver. In addition, not every Gamer can win money. However, if the value is perceived as real and multiple opportunities for public recognition are provided, winning money is often secondary – competing against others and improving one’s skills in the process is what drives true competitors. Because our system is designed to ensure that every participant wins something each time they play a tournament, we believe that this will provide a desirable benefit and allows for retention of those who use our WZS website.

A key component of our technology differentiator is our proprietary anti-cheat software and algorithms. Our technology is the subject of two different approaches to thwarting cheats. The first is set forth in United States Patent 8,529,343, “Method for Monitoring Computer Programs” which is owned by us, having been fully assigned to us by one of our co-founders. The second is set forth in pending United States provisional patent application, “Method for Assessing Scoring Behavior” filed in 3Q2013, which is also owned by us via an assignment from a member of our Management Team⁴¹. As of now, the allowed patent is not part of our commercial offering. The pending provisional patent application encompasses the technological approach that we use on our website⁴².

⁴¹ Under US Patent Law, the provisional application must be converted into a regular US patent application within one year of the original filing date. The pending patent application does not require such conversion until early 3Q2014. Thereafter, the application is published, which is expected to occur in 1Q2015. Until such time as the application is published, it is confidential and in this competitive space, we believe that it is imprudent to disclose any non-confidential information about the application, including its original filing date. Those who desire to review and study the application may do so under appropriate and mutually agreeable confidentiality provisions. The description of the technology as set forth in this section is not designed to be vague for nefarious purposes, but rather to ensure confidentiality of the methodology until otherwise publicly disclosed by us via the patent process.

⁴² This is a particularly competitive industry, and, for that reason, the Company believes that it is in the best interest of our business and our investors to not provide extensive detail about our algorithms, proprietary software approach and pending patent applications in order to reduce the opportunity for accidental or nefarious misappropriation of intellectual property. The Company is confident in its ability to execute on its development objectives and will freely share more detailed information about the anti-cheat software with those who enter into

Both technologies are “server-side”, meaning that our customers do not need to download or install or purchase any software on their system in order to have the benefits of our anti-cheat technology. We believe that this is an important differentiator. To our knowledge, all other anti-cheat approaches are based upon a software-model, i.e., the person must download or buy software and install it on their computer. The obvious flaws in such an approach are evident: if only “good” Gamers use such software, then the cheaters can continue cheating with impunity. By creating server-side, as opposed to client-side software, then the technology we utilize monitors every Match, regardless of desire on the part of a Gamer. For the Gamers who play fair, this has no impact; the software monitors the Matches and if no cheat behavior is detected, nothing *per se* happens. However, when cheating behavior is detected, the software can remove the cheater from a match. We believe that over time, as our technological approach becomes more widely understood by the PC-FPS community, those who desire to cheat will go to other sites where we believe that cheating is easier.

Our approach to cheating follows the analogy of a referee. A referee cannot catch all “fouls.” However, the presence of the referee often reduces rampant fouls or cheating. Indeed, our server-side software is meant to primarily catch Gamers who may be cheating and remove them from the playing field. If a Match is ruined by the removal of a cheater, we provide a free Match to the Gamers whose experience was marred by the cheater. In order to sign up and register for our site, Gamers must acknowledge review of our terms and conditions, which make clear that if a Gamer is caught cheating, they forfeit any credits they have purchased and/or won, with no refund.

Our mitigation of cheating activity is not limited to technology alone. A unique aspect of our service offering is the requirement that all users must provide us with the GUID associated with their game title.⁴³ Indeed, true Gamers detest cheats and those that use them, and we encourage our customers to report cheaters. To facilitate this process, if a cheat or cheater disrupts a Match, the other Gamers receive a free Match credit. In addition, we will also post a “Wall of Shame” on our website where those caught cheating are publicly identified by their Gamer handle and other identifying information (so as to prevent them from playing not just on our site, but on other sites). Our terms and conditions will in the future indicate that all that use our site provide us their permission to post their Game handle on both our Wall of Fame and Wall of Shame as a condition of participation.

From a non-technological perspective, in order to even consider cheating on our website, a Gamer must still pay a Match Entry Fee⁴⁴; thus, if the cheat is used for enhancement of credibility, the price to pay for such

mutually-agreeable non-disclosure agreements with the Company. The pending patent application will not be published and publicly available until about 2Q 2014, such that early release of the information removes a competitive advantage that we believe that we currently hold over would-be competitors.

⁴³ A GUID (Global Unique Identifier) is the unique code/product key associated with each game. If one of our customers is caught cheating, banning the individual simply requires securing a new identify/handle or new IP address for their computer. However, a GUID can NOT be changed and as a result, we ban the “GUID” of the player caught cheating. We believe that this can also act as an effective and permanent ban to those caught cheating on our system.

⁴⁴ Except FreeZone™.

recognition is expected to create a negative cost-benefit outcome for a cheater. And for those considering using a cheat in order to win cash or other prizes, that goal is somewhat thwarted by the comparatively low cash prizes; for the competitive Gamer, the winning of the cash prize is significant because it is earned by success, but for a cheater out to game the system to secure money, intuitively one can understand that such a Gamer would have to cheat in a significant number of Matches, each requiring an entry fee, in order to make the process financially viable and cost-beneficial. A Gamer who cheats will have to cheat in an inordinate number of Matches in order to make the cost-benefit process cost effective. We intend to monitor all recipients of prizes on a regular basis such that if we spot Gamers who are consistently winning, we can add a further layer of review on top of the anti-cheat software.

WarZone Secure Is Not Internet Gambling: Games of Skill versus Games of Chance⁴⁵

Players using our WZS website are paying to participate, and because we award prizes to players using the WZS website, an assumption may be made that our business involves online or internet gambling. Internet gambling is almost entirely illegal in almost every state within the United States.

In this context, states typically employ the “Dominant Factor Test” (DFT) in determining whether a game, where player-participation is paid-for and prizes (cash or other things of value) can be awarded, is a game of skill or a game of chance. In this context, the distinction need not be 100% of one or the other –every competition involves some “chance” or “luck.” Rather, the DFT seeks to determine which predominates in the process.

For example, in a lottery game where a player pays for a ticket that includes randomly-assigned numbers and the winner is based on selection from a corresponding set of tickets that can include that player’s numbers, winning is pure chance. No skill is involved in purchasing a random set of numbers.

In a game such as “Trivial Pursuit™”, winning is based on skill predicated upon knowledge, intelligence, etc. Almost no “chance” is involved; a player either knows the answer or does not know the answer.

In many games, however, there is some combination of both skill and chance. In most sporting events, almost every victory is based upon superior skill – however, elements of chance can determine the outcome: for example in football, a recovered fumble may change the outcome of the game, the fumble being based on chance, and the recovery involving chance or skill.

Games typically involved in “gambling” (for example, poker), tend to involve a mixture of both. However, it is intuitively obvious that the element that is dominant in terms of winning is chance – cards that are dealt from a fully-shuffled and “hidden” deck determines the outcome, such that even a non-professional card player can beat a

professional if a winning hand is randomly dealt to the non-professional. On the other hand, gambling games such as roulette is entirely a game of luck – absolutely no skill is involved in selecting a number and then having a rotating wheel stop at a corresponding number to determine a winner.

In determining whether a game is such that the outcome of victory is based on skill or based on chance, states typically rely upon the DFT in making such determinations.

Dominant Factor Test

The Dominant Factor Test can be described as follows:

‘Chance’ is one of the elements generally required to be present in order for a game to violate a state anti-gambling statute. Most states have concluded that where the elements of skill, whatever they may be, predominate over the elements of chance, whatever they may be, in determining outcome, then the ‘chance’ element is lacking and the game involved does not violate that state’s anti-gambling law. This question considers whether the state applies this ‘dominant factor,’ or predominance, test.⁴⁶

Historically, the Dominant Factor Test was defined in a 1973 case from Alaska, *Morrow v State* 511 P.2d 127 (Alaska, 1973). In *Morrow*, the court articulated four qualifications to determine if the outcome is based predominately on skill, or on chance/luck:

- The participants must have a distinct possibility of exercising skill and must have sufficient data upon which to calculate an informed judgment.
- The participants must have the opportunity to exercise the skill, and the general class of participants must possess the skill.
- Skill or the competitor’s efforts must sufficiently govern the results.
- The standard of skill must be known to the participants, and this standard must govern the results.

As an example, golf meets the above criteria. Tiger Woods could be expected to beat the casual weekend golfer. Even if the golfer were to place a wager on the outcome, the results would be determined primarily upon the skill of the competitors. While there is a slim chance that the professional might lose – based on either bad luck by the professional or “beginner’s luck” for the casual golfer -- the dominant factor is skill, not chance. As such, the event would not be deemed gambling under the Dominant Factor Test.

In states that use the Dominant Factor Test, a bowling alley, golf course, or bar could hold a tournament where they collect an entry fee and award a prize without violating anti-gambling laws. Similarly, individuals could make bets on the outcomes of these events without violating anti-gambling laws.

CHI believes that much in the same way, the Matches offered on the WZS website fit within the same category and therefore do not involve prohibited gambling⁴⁷.

First Person Shooters: Skill Predominates

In assessing the four criteria with respect to FPS games it is intuitively obvious that the factor of skill predominates: furthermore, the lack of anti-cheat software can artificially increase the factor of “luck” in that the lack of such software removes most of the elements of the game that demand and require skill. Therefore, we believe that our proprietary anti-cheat software actually *decreases* the element of chance and therefore correspondingly increases the requirement of skill.

FPS games all require significant skills to achieve victory, including excellent hand-eye coordination, intelligence, memory, strategy, coordination, teamwork, etc. Luck rarely, if ever, is involved. Applying the four factors articulated by the *Morrow* court, an analysis can be suggested as follows with respect to FPS games:

The participants must have a distinct possibility of exercising skill and must have sufficient data upon which to calculate an informed judgment.

In all FPS games, all participants have a distinct possibility of exercising skill (except of course beginners whose skill set is improving or developing) and by having knowledge of the game, how it operates, what the goals and objectives of the game are, the participants have or can gain access to data upon which to calculate and informed judgment as to playing the game.

The participants must have the opportunity to exercise the skill, and the general class of participants must possess the skill.

In all FPS games, all players have the opportunity to exercise skill, and those participating have the skill sets necessary to play (this is not to suggest that all players have the same skill level – however, a player will be expected to, for example, know how to operate a joy-stick or similar device to allow the “cyber-persona” for that player to function during the game). Indeed researchers at Leiden University and Leiden Institute for Brain and Cognition, have shown that playing FPS video games is associated with superior mental flexibility, and that compared to non-players, players of FPS games were found to require a significantly shorter reaction time while switching between complex tasks, possibly because they are required to develop a more responsive mindset to rapidly react to fast-moving visual and auditory stimuli, and to shift back and forth between different sub-duties⁴⁸.

Skill or the competitor’s efforts must sufficiently govern the results.

In all FPS games, the elements that determine the results are all skill-based. The abilities of the players and their efforts more than sufficiently govern the results.

⁴⁷ Recently, a Federal Judge, in *USA v. DiCristina*, 11-CR-41 NYLJ 1202568480608 (EDNY, August 21, 2012) in dismissing an indictment and setting aside a jury verdict, held that *poker* is a *game of skill* and not chance under the Illegal Gambling Business Act, 18 USC Section 1955.

⁴⁸ Colzato LS, van Leeuwen PJA, van den Wildenberg WPM and Hommel B (2010-04-21). "DOOM'd to switch: superior cognitive flexibility in players of first person shooter games". *Frontiers in Psychology*. <http://www.frontiersin.org/Cognition/10.3389/fpsyg.2010.00008/abstract>. Retrieved 2011-02-08.

The standard of skill must be known to the participants, and this standard must govern the results.

In all FPS games, players improve their skill sets by continuous play, and it is understood by these players that those with higher skills and experience will tend to win more often than not, such that the best way to compete at that level is by practice and improvement in the skill sets of the player. These standards govern the results, and are well understood by those who participate in these games.

Note that the determining factor is not based upon the transfer of money, the payment of money to participate, or the payment of money to winners. Stated differently, providing a financial reward is not the issue, and most often those who are unfamiliar with the Dominant Factor Test can incorrectly assume that paying to play a game where cash can be awarded is by definition “gambling.” That assumption is incorrect. The issue turns on whether the game involves skill, or involves chance, and which element predominates in determining the outcome.

Our proprietary “Anti-Cheat” software reduces chance and increases skill

We believe that when cheating software is utilized in FPS games, such software artificially enhances the opportunity for winning by providing an unfair advantage over those players who rely on skill alone. Cheats, by diminishing the element of skill, correspondingly increase the element of chance because skill is no longer the standard by which victory is determined, and the cheater who wins with such cheat-software does so by essentially eliminating the skill set of the other players. Even the most skilled FPS player cannot be assured that his/her skill will determine the outcome when an opposing player is cheating.

Thus, independent of the FPS games for which the element of skill dominates that of chance, our anti-cheat software further increases the element of skill in situations where a player may otherwise be inclined to use cheat software. By removing the opportunity for cheating software to be utilized, we believe that the WZS website “levels” the playing field and assures that the outcome is predominately focused on player skill.

Marketing

We will launch our WarZone Secure service offering with limited marketing. We elected to pursue a more viral marketing approach at launch so as to establish a level of understanding as to what marketing efforts would be most productive. We believe that this approach will provide us with a better sense of how to optimize marketing spend following completion of the current financing round. Our objective is to allow a limited marketing effort to assist in our viral, or word of mouth advertising by Gamers, to help define where we should direct our marketing efforts.

FreeZone™ Competitive Level

Our FreeZone Competitive Level is just that: free. We view FreeZone to be a “freemium” offering, a term coined to describe a business strategy that allows users to utilize some or all of a service offering for free. The goal of a freemium model is to convert those who use the service offered for free to paying customers, and to create a word-

of-mouth foundation by users who like the offering and invite others to join. In general, between approximately 1 and 10% of freemium users convert to paying customers, with an average of between 2 and 4%.⁴⁹

Different approaches can be used with respect to a freemium model; in the case of WZS and FreeZone, we offer all of the features provided in our other fee-based levels, but with much lower prizes, and the only prizes awarded are credits (not cash)⁵⁰. Because our FreeZone™ participants already play these games on-line, the only issue is getting them to sign-up as a registered player on our system. Once accomplished (requiring at most a few minutes), Gamers who want to use FreeZone can enter our system and try out our process. Because only credits are awarded to winners of FreeZone matches, and these credits can only be used for entry fees for our Matches, at some point, we believe, that Gamers will want to use won-credits to advance to one of our fee-based levels. In the meantime, users who enjoy FreeZone are expected to spread their views to others and invite them to join WZS.

Because we do provide free credits to winners of FreeZone matches (unlike our other levels, these prizes do not increase as the number of Gamers in a Match increases), we anticipate a loss with each FreeZone match (based on the value of credits awarded), which we project to be approximately \$0.09 per FreeZone match. For example, for every 100,000 FreeZone matches, we expect our net loss to be \$9,000.

We anticipate that 4% of the Gamers who participate in FreeZone and/or Standard. Matches will convert to Skill- or High-Level Match participants. We consider FreeZone and Standard Matches to be marketing tools to attract FPS Gamers to our site, providing participants with the opportunity to explore our offerings at low or limited cost.

Professional Gamers

Video games are beginning to achieve the same status as other forms of competitive sport-, i.e. there are Gamers who can earn significant compensation based solely upon competing in large, organized tournaments. These Gamers, particularly in the FPS community, are held in high regard and are often closely followed. Many of these professional have their own “channels” on Twitch.tv⁵¹ where they provide commentary and post games in which they participate. We have secured the endorsement services of two such professional gamers who have each agreed

⁴⁹ <http://www.inc.com/janine-popick/freemium-is-it-right-for-you-and-your-customers.html> For our financial projections, we anticipate a 4% conversion rate.

⁵⁰ We do not provide free participation credits to those who use FreeZone.

⁵¹ According to their website, “Twitch is the world’s largest video platform and community for gamers. More than 45 million gamers gather each month on Twitch to broadcast, watch and chat about gaming. Twitch’s video platform is the backbone of both live and on-demand for leading video game broadcasters including casual gamers, pro players, tournaments, leagues, developers and gaming media organizations.” Twitch.tv is in many ways to CHI what ESPN is for other sports.

to provide a 5-7 minute video endorsement and promotion of our WZS service offering.⁵² A portion of our use of proceeds from this financing will be dedicated to sponsorship of several professional Gamers to promote our WarZone Secure brand and service offerings⁵³.

CHI Survey

Following development of our initial business model, we conducted a non-scientific online survey (which included a prize offering for survey participants), not to validate our model *per se* but rather to determine if our approach would resonate with Gamers. We did not overtly market the survey so as to avoid encouraging expectations of our commercial launch and as such, our intent was to essentially secure a few hundred Gamers who happened across the survey. In that context, we secured responses from about 350 Gamers and we believe that the results validate our business model.

For example, and consistent with available public data, the average age of the survey participants was 30. By an almost 2:1 ratio, participants indicated that they like it better when a team they are playing with wins, rather than how they do individually, and in this context, when asked if they were “ok” if a stranger was added to their team for a tournament, 72% of the respondents indicated either “yes” or that it “doesn’t matter.”

In terms of how many hours per week the participants spend playing FPS Games, the results were as follows:

Hours Per Week	Individuals
0-5	92 (26%)
6-11	118 (33%)
12 - 17	67 (19%)
18 - 23	36 (10%)
24+	41 (12%)

Our Matches are configured based on the types of contexts FPS Gamers are already accustomed to, such a “Capture the Flag” and “King of the Hill.” The strategic approach to these types of Matches varies between match styles, and some will take longer than others to complete. Gamers gravitate to the Match style they already utilize or prefer and therefore understand that some match styles will take more time than others. However, we can assume that for many of the Matches, the average playing time will be less than about an hour. When asked if “three game Matches (60 minutes) with prizes were available all day, how many would you participate in?” participants provided the following responses:

⁵² We have not, as of yet, announced the names of these professionals based on the highly competitive nature of this space. However, we anticipate their respective video endorsements to be broadcast on their Twitch.tv channels in 2Q 2014, once our commercial service offering has begun.

⁵³ The professionals that we have secured by contract are compensated \$500 each for their time, as well as receiving 2,000 performance based stock options to purchase 2,000 shares of our Common Stock.

Number of Matches per day	Individuals
1 - 3	149 (49%)
4 - 6	90 (29%)
7 - 9	49 (16%)
10-12	19 (6%)

Finally, in terms of how much money the participants spend per month on video games, and consistent with the data indicating that this demographic has significant disposable income available for FPS games, the amount of money spent by participants per month was as follows:

Amount Spent Per Month	Individuals
\$0-\$25	136 (41%)
\$26-50	122 (37%)
\$51-75	53 (16%)
\$76-99	12 (4%)
\$100+	11(3%)

As set forth in greater detail below, prior to the survey, our assumption was that if the most expensive Tournament entry fees ranged from \$2.50 to \$5.00, a target of Gamers playing 5-8 Matches per month (i.e. about \$20 - \$25) would provide revenue opportunities that would lead to adoption of our offering.

WarZone Secure Ambassador Program

We are actively recruiting skilled Gamers located in various countries throughout the world that we will use to recruit Gamers to our site. We refer to these recruiters as “Ambassadors.” Ambassadors are compensated with free memberships, credits stock options. Each Ambassador will be provided a unique code identifier that they can give to recruits who can use that identifier when the recruit signs up for the site. The recruit/participant will be provided a small number of credits at no cost. We currently have seven Ambassadors under engagement and are working to secure several additional Ambassadors from South America, Europe and Canada.

Organized Teams/Clans

Our WZS website is designed for both Individual Gamers as well as small teams, and to our knowledge and unlike any other Gamer-based website, we also provide separate Matches for large, coordinated and established groups of highly competitive and sophisticated Gamers known in the industry as “Clans.” Clans are comprised of individual Gamers who are typically recruited and tested to become members of the Clan. A Clan can comprise dozens to hundreds of Gamers. Clans often seek out other Clans for more robust and intense competition using FPS games.

Part of our marketing approach is to target Clan Members to register on our WZS website as individuals, and participate in our Matches against individual Gamers and small teams as well as with their Clan⁵⁴.

Clan members are often the most competitive and dedicated FPS Gamers. Because Clans compete differently than individuals and small teams, we created a separate set of Matches exclusively for Clans. To our knowledge, we are the only competitive gaming site that offers Matches exclusively for Clans, and we believe that this will be a significant and financially beneficial market differentiator.

Clans take the process of recruitment quite seriously, owing to the highly competitive nature that Clan members have with respect to playing FPS games against their internal members as well as other Clans. Indeed, Clans rate each other in terms of the best Clans (*see*, for example, <http://www.top100clans.com/>). One such top-ranked Clan is Combat Applications Group™ (CAG). To get a sense of the nature of how the Clans operate, the CAG website provides the following⁵⁵:

Prospect

A CAG prospect is someone who has been invited to join CAG by a Clan Member after seeing him/her play in a public lobby. Prospects have a slight advantage over a recruit in that they have already been scouted and the clan member or members that invited him to the Clan already liked what they saw. If you are referred to or invited to join the Clan you do not have to go through a try out and you are automatically accepted as an official Clan Member and you receive the rank of Private.

Recruit

A recruit is someone who has asked or requested to join CAG via a recruiting post or by simply visiting our website. All recruits must go through and pass a tryout session with the Clan.

Recruits must make sure the following requirements are completed:

Must be registered and submit a clan application

Must show up for tryouts which are held every Wednesday from 10 a.m. through midnight. (note: times are pacific)

After tryout is completed, recruits must check in their application to see if they have been accepted into the Clan

We hold tryouts every Wednesday from 10 a.m. through Midnight.

REQUIREMENTS

Must be (REGISTERED) on our website and submit a Clan Application

Must be 18 years old (some exceptions apply)

Must have a working headset

Must communicate during games

Must be able to attend Wednesday only tryouts

If you meet these requirements you may attend tryouts every Wednesday starting at 10 a.m. through Midnight.

DURING THE TRYOUT WE MAINLY FOCUS ON THE FOLLOWING 2 AREAS:

How well you communicate during the match

SUGGESTIONS AND TIPS

Don't worry about your personal score during matches, with time you will develop into a dominant player especially when playing objective games.

If you have a bad game don't get discouraged, the longer you play with us the better you will get. You are not going to be told you didn't make it into the Clan just because you had a bad game.

Play as many games with the Clan as possible. This will prove to the Clan that you really want to be part of them.

If you are invited to a game respond as quick as possible, not responding to an invite will give us the assumption that you are no longer interested in joining the Clan.

You are not obligated or required to be active on our forums. However, if you want to rank up in the clan you must reach certain posts counts or have a certain amount of time with the clan. You can also find a lot of useful information in our forums. Use the forums to your advantage and to help you rank up faster in the Clan⁵⁶.

We believe that recruitment into a Clan is taken quite seriously, with a primary objective being to enhance the quality and skill of the entire Clan. In this context, the Clans provide an opportunity for Gamers to “belong.” The power of this concept should not be underestimated. Indeed, as more individuals rely upon the internet for social interactions, being part of a Clan satisfies an innate need, i.e., a desire to socially interact with others. As such, and while many may assume that Gamers are cloistered individuals who retreat from society into a fantasy world, in quite an opposite manner, Gamers have cleverly adopted the social aspects of “being” human to the internet, bounded by the enjoyment, thrill and competition aspects of FPS games that can be derived from participating in FPS games, and in belonging to a Clan.

The social-interactive nature of Clans cannot be emphasized enough with respect to our marketing efforts. While we will target individual Gamers to utilize our WZS website, the Clans provide, in the vernacular, a “target rich environment” where we can secure dozens to hundreds of Gamers at a relatively low cost in terms of recruitment.

One Clan aggregation group, BF4Clans (<http://bf4clans.com/>) that focuses on worldwide Clans that play Battlefield, has posted a description of our website under “Competitive Wars” as a courtesy to its members. We believe that because many of our Matches are designed exclusively for Clans, something that to our knowledge no other similar site provides, as the word-of-mouth process begins in earnest, more Clans will become involved with our service offering, and as with BF4Clans, essential do some marketing for us to their members.

⁵⁶ See, <https://www.cagclan.com/>

Marketing Advisory Board

We have created a Marketing Advisory Board (“MAB”) comprised of three groups whose business involves marketing and who have been retained by us as consultants: Catalyst Strategies, a Palo-Alto-based group (<http://www.catalyststrategies.com>); IgnitingSolutions, a Bay Area-based group (<http://ignitingsolutions.com>); and Runningfish, Inc., a San Diego-based group (<http://www.runningfish.net>). Both Catalyst Strategies and IgnitingSolutions receive stock options from us for their services, while the members of Runningfish are co-Founders in our company and have received “Founder” shares of our Common Stock.⁵⁷ We utilize our MAB to help guide us on the development and implementation of marketing initiatives.

WarZone Girls

We have also established a companion website, WarZone Girls. We developed this website based upon data indicating approximately one-half of all PC Gamers are female. We created the WarZone Girls website (located at <http://www.warzonegirls.com>) to serve as a launch point for our graphic novel series, WarZone Girls. The novels include female protagonists in fictionalized FPS settings based upon a storyline that we believe will be of interest to many female (and male) Gamers. Eventually, and based upon public acceptances and adoption of the storyline, we envision out-licensing rights in and to the concept to game developers to potentially create an FPS game based upon the WarZone Girls. Other types of similar media, including animated cartoons, are also possible. In terms of near-term revenue anticipated to be generated from the WarZone Girls, we expect this to be relatively inconsequential to our business and have therefore not included this in our financial projections.⁵⁸ Inside the back cover of every issue of WarZone Girls we include an advertisement for WarZone Secure⁵⁹.

Video Advertisement

We have developed several brief video-advertisement/primer introductions to WarZone Secure that are located on the home page of the website. We also include these “primers” and a lengthier video ad on our YouTube™

⁵⁷ Runningfish is also responsible for the development, maintenance and updating of the WarZone Girls website, for which their compensation is part of the Founder shares issued to the two principals of Runningfish.

⁵⁸ All appropriate agreements necessary to secure intellectual property rights, including copyright and “work for hire” agreements, in and to characters and the graphic novels, have been secured by us.

⁵⁹ Because of our Joint Development Agreement involving WZG, we do not anticipate producing any more of the graphic novels beyond the 4 that have been issued.

Channel. We secured the services of voice-over professionals (via Super Mackerel) to provide the verbal portion of the primers and advertisement.

Social Interaction

We believe that the social aspect of FPS gaming cannot be understated. FPS Gamers are both highly competitive and highly interactive with one another. Individuals, Small Teams and Clans communicate with each other, and routinely engage in “trash talk” with other Gamers while playing. Gamers seek peer recognition for their skills, scores, etc.⁶⁰

In this regard, our website provides several ways for Gamers to engage with one another, primarily via our community forums, private messenger, and blog. In addition, we also provide a Wall of Fame that lists high scores for individuals, teams and clans, and we plan to publicly announce via press-release type disclosures the key and top gamers on a quarterly or semi-annual basis. We anticipate introducing instructional videos on competitive techniques and strategies beginning in 2015.

These initiatives are designed to keep our customers engaged within our website “world” even when they may not be competing in Matches. To this end, we have issued one such press release based on the winner of the survey-contest mentioned in the previous section⁶¹. We believe that this type of publicity will differentiate our offerings from potential competitors.

Super Mackerel, Inc.

Super Mackerel, Inc. is a Los Angeles-based multimedia marketing company. We currently own 20% of the equity (on a fully-diluted basis) of Super Mackerel. In exchange for our ownership, we provide in-house agreement and other business consultation and advice. Super Mackerel designed and implemented the current “skin” for our WZS home-page, as well as the initial tutorial videos. We anticipate utilizing Super Mackerel for certain marketing endeavors over the coming years, at a reduced price based on our relationship with that organization.

Game Servers

Our customers own or have access to the FPS games that they use. We do not provide dedicated game servers through which Gamers can play the FPS Games. A “game server” is a server that is the authoritative source of events in a multiplayer video game, such as the games that we offer through our website. The server transmits sufficient data about its internal state to allow the connected Gamers to maintain their own accurate version of the game world for display to themselves and other Gamers. These servers also receive and process each Gamer's real-time input. Dedicated servers simulate game worlds without supporting direct input or output, except that required

⁶⁰ This is, in a somewhat “odd” way, reason why cheats and cheaters exist: to create an artificial sense of superior skills.

⁶¹ See Footnote 16, *supra*.

for their administration. Gamers must connect to the server with separate client programs in order to see and interact with the game. The foremost advantage of dedicated servers is their suitability for hosting in professional data centers, with all of the reliability and performance benefits that entails. Remote hosting also eliminates the low-latency advantage that would otherwise be held by any Gamer who hosts and connects to a server from the same machine or local network. We rely on the service of third party providers for access to their game servers (for which we pay a monthly fee).

One significant issue that affects the quality of internet-based competitive matches is "ping." FPS ping refers to the network latency between a Gamer's computer and the game server. This could be reported quantitatively as an average time in milliseconds, or qualitatively as low ping or high ping. The lower the ping, the better. Having a low ping is always desirable because lower latency provides smoother game play by allowing faster updates of game data. Servers sometimes disconnect a Gamer if the ping is too high and it poses a detriment to others' game play. Numerous factors can affect ping including network protocol engineering, internet connection speed, the quality of a user's Internet service provider and the configuration of firewalls, etc. In our context, ping is also affected by geographical location. For example, if someone is in India, playing on a server located in the United States, the distance between the two is greater than it would be for players located within the US, and therefore it takes longer for data to be transmitted.

We have partnered with a leading game server provider, Nuclear Fallout Enterprises, to host our solutions. We have spoken to several Gamers in Europe who use Nuclear Fallout and have indicated that ping is often not an issue. However, we can, and indeed will, utilize other Gamer Server providers located in other countries if the issue is significant, something that we will be better able to determine as our service offering is more widely utilized.

Nuclear Fallout Enterprises, Inc.

We currently lease several dedicated game servers from Nuclear Fallout Enterprises, Inc. ("NF") on a recurring charge of approximately \$1,000 per month. We also lease an additional server for hosting our anti-cheat software and TeamSpeak™ (an on-line system that allows Gamers to communicate with each other during FPS Matches) at annual charge of approximately \$500. Gamers, via our website, are connected to a third-party game server (such as those that we lease from NF) in order to play the games online with other Gamers⁶².

NF is one of the largest game server providers in North America and has been renting out premium game servers since 2002. NF has a strong focus on both performance and service. NF's game servers are hosted in multiple cities (e.g., Seattle, Los Angeles, Atlanta, San Jose, Chicago, Denver and Washington, DC). All of their servers are owned. A key determinant in selecting NF as our dedicated game server provider, in addition to their personnel, machines and technological innovations, is their rapid customer support and service. Some game server providers assure their clients that they will respond to questions/issues within 24 hours; in our experience, NF does

⁶² CHI also leases a webserver at a cost of approximately \$1,200 per year and for one type of FPS game not currently part of our service offering but anticipated to be in the next 6 months, Activision's® Call of Duty: Black Ops™), we are required to utilize Activision sponsored servers at a cost of about \$1,000 per year.

so within less than a few hours at most. We believe that this level of service is an important factor in our ability to maintain integrity with our customers in the event of issues, problems or concerns that may result from these servers. Our current projections are such that after discussion with NF, we believe that as we evolve and accumulate more Gamers to our business, NF will be able to readily accommodate our needs. This approach allows us to marshal our resources towards our business, rather than expending significant capital to purchase our own servers, and to secure a facility suitable for these servers. This allows us to minimize our capital needs without sacrificing the quality of our business or deleteriously impacting the experience of Gamers who utilize our website.

Business Model

Our business model is predicated upon our ability to attract Gamers who already participate in First-Person Shooter games.

Our business is not dependent on attracting Gamers to the games. We anticipate that our customers will overwhelmingly be experienced and active participants in these games. Our goal is to drive Gamers who are already accustomed to playing these games into our virtual arena (the WZS website) based on a recognized value-add. We intend to accomplish this by providing a multiplayer FPS tournament venue focused on creating a “full-circle” gaming experience where Gamers can actively compete in our Matches, engage in social interactions with other Gamers, experience a cheat-free environment with our patent-pending “Win-With-Honor” anti-cheat technologies, be recognized by fellow Gamers, learn FPS Gaming techniques and secure cash and Credit prizes.

Our website provides Matches for both individuals and small teams, and Matches exclusively for Clans. The initial launch will include seven of the most popular FPS titles available. The Matches will be conducted online and will be available worldwide 24/7/365. Because these games are played on the internet and can involve Gamers from around the world, the competitive spirit and resulting emotional attachment to the process already exists. By adding the opportunity to win cash and to secure prizes, CHI believes that the motivation to try, and stay with, our website will exist, driven primarily by making the experience emotionally, competitively and intellectually rewarding.

Our business model ensures that all participants win something every time that they participate. Cash prizes alone may not be sufficient to motivate players to continue using the service in that not every player can win a cash prize. Accordingly, we believe that independent of winning a cash prize, Gamers must sense that they are winning or receiving something of value by participation alone. We believe that this is a key driver to retaining customers: the ability to win something every time they compete. This emotional connectivity is quite often a sufficient motivator to remain with, and actively participate in, an opportunity such as ours. We believe that another value-add is our anti-cheat software which is provided as a function of playing the games via our website.⁶³ The perceived

⁶³ Most anti-cheat software has been developed using a software-based model, whereby the developer attempts to sell that anti-cheat software to individual Gamers. We believe that this approach is not feasible in that,

value in such an approach is clear: Gamers will understand that the anti-cheat software applies to all those playing on our website, thus creating a substantially level playing field. Using this approach, we have designed the process to entice players to participate on a regular basis with the WZS website in order to transform that player from a casual participant into a loyal customer – such transformation almost always leads such customers to recruit other players to join them in the process (so-called “viral marketing”).

Our primary goal was is to secure a margin per Match (excluding FreeZone and Standard Matches) of approximately 45%. Our margin for Organized Teams/Clans, are relatively smaller because Clans are the most intense and dedicated FPS competitors, and because Clans are made up of FPS Gamers, such that Organized Teams Gamers are expected to play Organized Teams Matches as well as Individual and Small Team Matches.

Match Types

- ***Individuals and Small Teams***

We segregate our Match types into separate categories based on the seven titles we released at launch, and the types of match-styles that Gamers use for these Matches. Because our website is scalable, as we add more titles, the number of Match-types also increases.

The total number of Gamers per Match needs to be even so that each side has an even number of Gamers (an odd number would give one side an advantage). Our Matches are designed to maximize participant selectivity; as such, we cannot at this time predict which Matches will be used more than others. For purposes of our financial forecast, we have assumed that approximately 12 Gamers will participate in an average Match.

- ***Organized Teams***

The Match-styles described above are also offered to Organized Teams. The difference is with respect to the winners. For Organized Teams Matches, there is one Clan that wins; division of proceeds is determined by the Organized Teams (e.g., the Organized Teams can secure all winning or the Organized Teams can divide among the Clan participants). In terms of the Participation Credits, each Organized Teams member on the side that lost receives Participation Credits. In essence, the amount of Participation Credits is reduced with Organized Teams Matches because only half of the Match participants receive these following a loss.

Entry fees, cash/credit prizes awarded, and participation credits awarded for each level are set forth below⁶⁴.

as is obvious, unless all Gamers playing at any particular time are using that type of anti-cheat software, nothing prohibits a Gamer from playing and not using the anti-cheat software.

⁶⁴ Gamers who win cash prizes are given the option of either receiving a cash credit (e.g. to the Gamers PayPal account), or credits in lieu of cash. Credits are never redeemable for cash.

Projected Match Volume, Gamers and Slots

Because our marketing efforts are primarily based on a “viral” approach at launch, we expect the number of Entry-Fee based Matches in 2Q2014 to be modest. We believe that the primary playing time for our Matches will be between Thursday and Sunday evenings, based on Gamer preferences⁶⁵. Our belief is that Gamers who like our service will direct fellow Gamers that they interact with to our website.

Projected Matches equal the total number of Matches we estimate will be played in the specified time period. It is noted that Matches do not equate to numbers of unique Gamers. For that figure, we have estimated the average number of Gamers needed per Match-style to be 12 (i.e. a 6 v 6 Match), and multiplied this by the Projected Matches for that time period. This provides us with the number of “Slots” needed to be filled in that period. A Slot is not a Gamer. If a Gamer plays two Matches, that Gamer has occupied two Slots; if the Gamer plays 10 Matches, that Gamer occupies 10 Slots, and so on.

	2014	2015	2016	2017
Projected Matches⁶⁶	35,000	100,000	275,000	375,000

Estimated Slots	405,913	1,159,750	2,899,375	4,349,063

Match Levels

Skill, High Value, Organized Teams Match Participation Mix⁶⁷

With respect to the three Match levels, we anticipate that for the projection periods, the majority of Matches will be Skill Value. This assumption is based on a best estimate predicated upon comparative cost. Because Skill Value entry fees are the lowest of the three entry-fee Match levels, if our assumption is incorrect, i.e. more Gamers play in the other match types, our revenue projections would be expected to increase.

The key differences between Skill and High Value are entry fees and prizes (*see* “Match Prizes” next page).

⁶⁵ We have projected during 2014 that there will be 100,000 FreeZone Matches and 50,000 Standard Matches.

⁶⁶ Skill, High-Value and Team/Clan Matches.

⁶⁷ Because FreeZone and Standard provide no or de minimum revenue, and are viewed by us as more of an adoption and marketing approach to attract and secure Gamers to our site, we do not include these in any projections.

	2014	2015	2016	2017
Match Type (Entry Fee)				
Skill Value (\$2.50)	90%	88%	86%	84%
High Value (\$5.00)	5%	7%	9%	11%
Organized Team (\$4.00)	5%	5%	5%	5%

Entry Fees

We have developed our entry fees with an eye towards keeping these modest, with cash prize amounts that are dependent upon the number of participants. Note that we do not anticipate increasing our entry fees during the entire projection period. The weighted average entry fee is based upon the participation mix and the Entry Fees. Stated differently, because we assume that most of our Matches will be Skill based, the weighted average of all entry fees will be closest to the Skill-level entry fee.

	2014	2015	2016	2017
Skill	\$2.50	\$2.50	\$2.50	\$2.50
High-Value	\$5.00	\$5.00	\$5.00	\$5.00
Organized Team	\$4.00	\$4.00	\$4.00	\$4.00
Weighted Average Entry Fee⁶⁸	\$2.70	\$2.75	\$2.80	\$2.85

Monthly Spend Per Gamer

In estimating the amount of money that a Gamer will spend per month, we assumed the minimal amount of \$20 for almost all Gamers who use our system, with modest increases over the forecast period⁶⁹.

The minimum amount of \$20 per month was determined based upon our survey data coupled with assumptions about gaming behavior. For most people, especially within our demographic, \$20 is a minimal investment to try something that may provide value as a new offering.

⁶⁸ Based, e.g., on the change in estimated usage of these three levels over time.

⁶⁹ We do not anticipate a Gamer only spending \$20 per month on a service offering; indeed, as this represents between on 4 and 8 Matches in total, we believe that in all likelihood, this amount will be much higher per month.

	2014	2015	2016	2017
\$20.00	95%	90%	85%	80%
\$25.00	5%	8%	11%	14%
\$40.00	0%	2%	4%	6%

**Monthly Matches Played
Based on Monthly Spend**

We have estimated the number of Matches that each Gamer is expected to play per period. The data were derived by dividing the monthly spend per Gamer by the weighted average entry fee; using the monthly spend percentages we then derived a weighted average, equivalent to the weighted number of Matches per Gamer per month, and annualized this for the specified period.

Annualized Matches per Gamer is the projected number of Matches that each Gamer is expected to play.

	2014	2015	2016	2017
\$20.00	7.4	7.3	7.1	7.0
\$25.00	9.3	9.1	8.9	8.8
\$45.00	14.8	14.5	14.3	14.0

Annualized (per year) Matches Per Gamer/Per month in [] (rounded up to whole number)	30 [3]	91 [8]	92 [8]	92 [8]

Number of Unique Participants

As noted, the number of required Slots does not equal the number of required Gamers. There are expected to be far more Slots than unique. We estimated the number of unique Gamers that we will need to attract per period by dividing Slots by the estimated number of annualized Matches per Gamer.

	2014	2015	2016	2017
Total Number of Slots	405,913	1,159,750	2,899,375	4,349,063

Summary

Using the numbers derived from the foregoing, we summarize as follows:

For purposes of comparison, Major League Gaming⁷³, a competitive website that caters to multiple gaming types (primarily sports oriented) publicly indicates that they sponsor 750,000 online matches *each month*. As the foregoing indicates, we anticipate a fraction of this amount for annual match volume, i.e. a penetration rate of less than about 1.0% of the 5,000,000 estimated PC-FPS gamers.

Prizes

In developing our business model, we desired to provide cash prizes to the top three Gamers in each Match (except for Matches with four Gamers), with 3rd Place being equal to the entry fee, and with target margins of 45% - 50%, including the cost of the free participation Credits⁷⁴:

*** Although not *de minimus*, CHI believes these relatively small losses per match are akin to marketing, or a “Loss-Leader” approach to attracting and retaining Gamers, who can then be “converted” to the Entry-Fee Competitive Levels. For example, if there were 100,000 Matches at the FreeZone level (representing several tens-of-thousand Gamers playing FreeZone), the cost would be between \$8,000 and \$9,000 in terms of Credit Value.

We believe that approximately 100,000 FreeZone matches will take place beginning in 2015. We further assume that the average Match size for FreeZone will be approximately 12 Gamers, or 1,200,000. We further estimate that the number of unique participants for these slots will be between 12,000 and 15,000 Gamers. In terms of conversion, we believe that many of these Gamers, if they like and enjoy the WZS service offering, will use any Credits won in FreeZone to participate in Skill level matches.

Some Gamers, we believe, will at first gravitate towards Standard, while others will recognize the benefit of playing in the higher Entry Fee levels where they can win larger prizes. We assume that the conversion rate for those in FreeZone to Standard, Skill and High-Value (Organized Teams compete a bit differently and so for these assumptions we do not include Organized Teams for the conversion) will be approximately 4%, or between 480 and 600 Gamers. If we further assume that these Gamers will also spend an average of about \$20 per month, then these “converted Gamers” are estimated to spend in gross entry fees between about \$9,600 and \$12,000 per month which we believe supports the concept and strategy of FreeZone. And of course FreeZone can continue with this process as our brand is further recognized and the word-of-mouth process with favorably inclined Gamers who like our service offering increases.

Customer Retention

Not every participant can be assured winning a cash prize. Gaming psychology indicates that players who win something tend to be motivated to continue participating in the process – it is not so much the monetary value of the prize as it is the ability to know that a player received something for “free” simply for playing. Using this approach, our model has been developed to include focusing on retaining Gamers even if they do not win cash prizes. We accomplish this by awarding Credits to all Match participants⁷⁵. The credits can be accumulated and redeemed to participate in other Matches. Issued and outstanding Credits will be carried as a liability on our financial statements. The value of each Credit is \$.005, equal to the cash cost of purchase. Credits cannot be redeemed for cash. If a Gamer wins a cash prize the Gamer can take this in the Credit equivalent but once that choice is made, the credits cannot then be converted to cash.

Because Credits are primarily used for Match entry fees, the incentive to secure more Credits to derive more benefits is a useful tool to retain customers.

Payments

Customer purchases can be accomplished via credit card, debit card or PayPal®. All cash awards will be processed via PayPal®. Cash awards may be delayed for up to 48 hours in the event of a disputed match, but otherwise is intended to occur automatically⁷⁶.

⁷⁵ Except in FreeZone, and in some Standard Matches.

⁷⁶ Our model takes into account bad debt generally classified as payments required for recurring purchases and that cannot be made due to an expired or no-longer valid credit card/debit card. Our projections assume bad debt expense of 0.5% per year. As should be intuitively understood, when a charge card cannot be processed for whatever reason, the player does not secure the benefit until a new card is provided. However, for purposes of

Operations and Exit Strategy

The majority of the financing that we intend to raise in this Offering will be directed towards marketing efforts. We believe that marketing can be a key driver to success in that as set forth above, once we acquire a customer, our business model is designed to retain these customers and utilize word-of-mouth recruitment (viral marketing) to secure additional players at no cost to us in terms of customer acquisition.

Our management team has opted to share the risks and rewards with our investors by receiving modest compensation. We believe that this approach more appropriately aligns the interests of the team with our investors.

Operations

Management and key advisers have opted to not receive cash compensation during our three-year development period (actual or deferred), and modest compensation subsequently, as we initiate our operations. In this manner, the Company believes that the team aligns itself with the investment goals of investors.

We believe that rental costs for operations are projected to be modest. Because the number of employees required to manage the business is low, we estimate, based upon inspection and discussion with office-space holders in this region, that our San Diego office space expenses will be approximately \$15,000 per year. ⁸⁰ Some investors have questioned why Mr. Burgoon does not serve on the Board of Directors. Mr. Burgoon has a personal view that a CEO should not serve on the BOD because the CEO in effect ends up reporting to "himself". Because the CEO occupies such an important role in terms of overall management, Mr. Burgoon has opted to serve at the discretion and pleasure of the Board of Directors and not comingle his executive duties with the duties required of a Board member. Again, this was a personal decision of Mr. Burgoon and not a requirement placed on him by the Company and/or investors.

It has the potential to turn a fervent fan’s weekly (or daily) after-work, after-school “Call of Duty” multiplayer sessions into what will essentially be participation in a season of

"CoD" played as game show or sport. A Program Guide in the Events page will list upcoming challenges. Some challenges will involve uploading videos or screenshots that meet certain contest criteria. So-called Lone Wolf Operations will challenge players to perform certain one-off feats in multiplayer —say, a set number of kills in a game mode that day — and could, the Activision people who showed us "Elite" said, win a player anything from an in-game badge to a real Jeep. The grander Events will pit players against each other in weeks-long Matches that are set up for "CoD" gamers at different levels of skill. A similar standard is applicable in the case of derivative actions, except that indemnification only extends to expenses including attorneys' fees incurred in connection with the defense or settlement of such actions and the statute requires court approval before there can be any indemnification where the person seeking indemnification has been found liable to the corporation. The statute provides that it is not exclusive of other indemnification that may be granted by a corporation's certificate of incorporation, bylaws, agreement, and a vote of stockholders or disinterested directors or otherwise.

The Company's Certificate of Incorporation provides that it will indemnify and hold harmless, to the fullest extent permitted by Delaware's General Corporation Law, as amended from time to time, each person that such section grants us the power to indemnify.

Delaware General Corporation Law permits a corporation to provide in its certificate of incorporation that a director of the corporation shall not be personally liable to the corporation or its stockholders for monetary damages for breach of fiduciary duty as a director, except for liability for:

- any breach of the director's duty of loyalty to the corporation or its stockholders;

- any transaction from which the director derived an improper personal benefit.

The Company's Certificate of Incorporation provides that, to the fullest extent permitted by applicable law, none of our directors will be personally liable to us or our stockholders for monetary damages for breach of fiduciary duty as a director. Government Regulation Information

While the Company does not believe that its WZS website and Matches involve online “gambling”, individuals or entities interested in CHI and a possible investment should consult with their attorney and advisers with respect to potentially applicable online “gaming” laws. Although not definitive or endorsed by CHI, a compilation website developed by Chuck Humphrey may be found at <http://www.gambling-law-us.com/>. Mr. Humphrey is neither associated with CHI nor has he been contacted or retained to provide any legal, business, regulatory or other guidance with respect to CHI and its WZS website.

CHI is based in California, and California Penal Code Section 318 et seq. generally involves information regarding online gambling. The following sections are provided for informational purposes only:

Penal Code Sec. 330a. Every person, who has in his possession or under his control, either as owner, lessee, agent, employee, mortgagee, or otherwise, or who permits to be placed, maintained or kept, in any room, space, enclosure or building owned, leased or occupied by him, or under his management or control, any slot or card machine, contrivance, appliance or mechanical device, upon the result of action of which money or other valuable thing is staked or hazarded, and which is operated, or played, by placing or depositing therein any coins, checks, slugs, balls, or other articles or device, or in any other manner and by means whereof, or as a result of the operation of which any merchandise, money, representative or articles of value, checks, or tokens, redeemable in, or exchangeable for money or any other thing of value, is won or lost, or taken from or obtained from such machine, when the result of action or operation of such machine, contrivance, appliance, or mechanical device is dependent upon hazard or chance, and every person, who has in his possession or under his control, either as owner, lessee, agent, employee, mortgagee, or otherwise, or who permits to be placed, maintained or kept, in any room, space, enclosure or building, owned, leased or occupied by him, or under his management or control, any card dice, or any dice having more than six faces or bases each, upon the result of action of which any money or other valuable thing is staked or hazarded, or as a result of the operation of which any merchandise, money, representative or article of value, check or token, redeemable in or exchangeable for money or any other thing of value, is won or lost or taken, when the result of action or operation of such dice is dependent upon hazard or chance, is guilty of a misdemeanor, and shall be punishable by a fine not less than one hundred dollars (\$100) nor more than one thousand dollars (\$1,000), or by imprisonment in the county jail not exceeding six months, or by both such fine and imprisonment.

Penal Code Sec. 330b.

Possession or keeping of slot machines or devices.

(a) It is unlawful for any person to manufacture, repair, own, store, possess, sell, rent, lease, let on shares, lend or give away, transport, or expose for sale or lease, or to offer to repair, sell, rent, lease, let on shares, lend or give away, or permit the operation, placement, maintenance, or keeping of, in any place, room, space, or building owned, leased, or occupied, managed, or controlled by that person, any slot machine or device, as defined in this section.

It is unlawful for any person to make or to permit the making of an agreement with another person regarding any slot machine or device, by which the user of the slot machine or device, as a result of the element of hazard or chance or other unpredictable outcome, may become entitled to receive money, credit, allowance, or other thing of value or additional chance or right to use the slot machine or device, or to receive any check, slug, token, or memorandum entitling the holder to receive money, credit, allowance, or other thing of value.

(b) The limitations of subdivision (a), insofar as they relate to owning, storing, possessing, or transporting any slot machine or device, do not apply to any slot machine or device located upon or being transported by any vessel regularly operated and engaged in interstate or foreign commerce, so long as the slot machine or device is located in a locked compartment of the vessel, is not accessible for use, and is not used or operated within the territorial jurisdiction of this state.

(c) The limitations of subdivision (a) do not apply to a manufacturer's business activities that are conducted in accordance with the terms of a license issued by a tribal gaming agency pursuant to the tribal-state gaming compacts entered into in accordance with the Indian Gaming Regulatory Act (18 U.S.C. Sec. 1166 to 1168, inclusive, and 25 U.S.C. Sec. 2701 et seq.)

(d) For purposes of this section, "slot machine or device" means a machine, apparatus, or device that is adapted, or may readily be converted, for use in a way that, as a result of the insertion of any piece of money or coin or other object, or by any other means, the machine or device is caused to operate or may be operated, and by reason of any element of hazard or chance or of other outcome of operation unpredictable by him or her, the user may receive or become entitled to receive any piece of money, credit, allowance, or thing of value, or additional chance or right to use the slot machine or device, or any check, slug, token, or memorandum, whether of value or otherwise, which may be exchanged for any money, credit, allowance, or thing of value, or which may be given in trade, irrespective of whether it may, apart from any element of hazard or chance or unpredictable outcome of operation, also sell, deliver, or present some merchandise, indication of weight, entertainment, or other thing of value.

(e) Every person who violates this section is guilty of a misdemeanor.

(f) Pinball and other amusement machines or devices, which are predominantly games of skill, whether affording the opportunity of additional chances or free plays or not, are not included within the term slot machine or device, as defined in this section.

Penal Code Sec. 337t.

The following definitions govern the construction of this Section[:]

f) "**Gambling game device**" means any equipment or mechanical, electromechanical, or electronic contrivance, component or machine used remotely or directly in connection with gaming or any game which affects the result of a wager by determining win or loss. The term includes any of the following:

- (1) A slot machine.
- (2) A collection of two or more of the following components:
 - (A) An assembled electronic circuit which cannot be reasonably demonstrated to have any use other than in a slot machine.
 - (B) A cabinet with electrical wiring and provisions for mounting a coin, token, or currency acceptor and provisions for mounting a dispenser of coins, tokens, or anything of value.
 - (C) A storage medium containing the source language or executable code of a computer program that cannot be reasonably demonstrated to have any use other than in a slot machine.
 - (D) An assembled video display unit.
 - (E) An assembled mechanical or electromechanical display unit intended for use in gambling.
 - (F) An assembled mechanical or electromechanical unit which cannot be demonstrated to have any use other than in a slot machine.

(3) Any mechanical, electrical, or other device that may be connected to or used with a slot machine to alter the normal criteria of random selection or affect the outcome of a game.

(4) A system for the accounting or management of any game in which the result of the wager is determined electronically by using any combination of hardware or software for computers.

(5) Any combination of one of the components set forth in subparagraphs (A) to (F), inclusive, of paragraph (2) and any other component that the commission determines, by regulation, to be a machine used directly or remotely in connection with gaming or any game which affects the results of a wager by determining a win or loss.

Many states follow what is referred to as the Dominant Factor Test when determining whether games involving money or prizes are games of skill, which are not considered gambling in general, or games of chance, which are considered gambling in general. The Dominant Factor Test can be described as follows:

“‘Chance’ is one of the elements generally required to be present in order for a game to violate a state anti-gambling statute. Most states have concluded that where the elements of skill, whatever they may be, predominate over the elements of chance, whatever they may be, in determining outcome, then the ‘chance’ element is lacking and the game involved does not violate that state’s anti-gambling law. This question considers whether the state applies this ‘dominant factor,’ or predominance, test.”

<http://www.gambling-law-us.com/State-Law-Summary/>

Although neither intended nor presented as definitive or predictive, the California Supreme Court has set forth its views on this test:

“The term ‘game of chance’ has an accepted meaning established by numerous adjudications. Although different language is used in some of the cases in defining the term, the definitions are substantially the same. *It is the character of the game rather than a particular player’s skill or lack of it that determines whether the game is one of chance or skill.* The test is not whether the game contains an element of chance or an element of skill but which of them is the *dominating factor* in determining the result of the game.”

In re Allen, 27 Cal.Rptr. 168 at 169, 59 Cal.2d 5 at 6(Cal., 1962) Emphasis supplied.

The California Supreme Court has also indicated in a case involving pinball machines in which the California Supreme Court agreed that the machines in question predominately involved skill over chance, that:

“Whether a game is a game of skill or a game of chance depends on which factor predominates, and this is a question of fact for the trial court [citation omitted]”.

Cossack v City of Los Angeles, 114 Cal.Rptr.460 (1974)

Lower courts in California have noted that “the ‘domination’ standard is a well-settled test in California.” *Bell Gardens v. Dept of Justice*, 42 CalRptr.2d 730 (Cal.App. 2 Dist 1995). *Knowles v. O’Connor*, 71 Cal.Rptr 879, 881 (Cal.App. 4 Dist 1968), citing *In re Allen*, noted that “[t]he term ‘game of skill’ has a reasonably ascertainable meaning.” Recently, a US Federal Court rules that poker was “predominantly a game of skill” and therefore not covered by Illegal Gambling Business Act (IGBA), 18

U.S.C. § 1955. *United States v. Lawrence DiCristina*, 546 F.2d 419 (3rd Cir. 2012). In his decision, Judge Weinstein noted that an expert witness for the defense “has shown persuasively that skilled players will predominate over the less skilled in a relatively short time,” supporting his ultimate findings about the question of skill versus chance. Although we do not analogize the games played on our website with poker, it is noted that if a Federal Court has held that poker, which most people associate with “pure” gambling, is a game of skill, we believe that any other legal authority understanding and accepting this decision would conclude that the FPS games played on our website are much more skill-oriented than even poker.

Use of Estimates

The Company's unaudited financial results for the fiscal years ended December 31, 2012, December 31, 2013 and fiscal year-to-date June 30, 2014 are presented in conformity with accounting principles generally accepted in the United States of America. This presentation requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

Cash and Cash Equivalents

Cash and cash equivalents are maintained at one financial institution and consist of highly liquid investments with original maturities of three months or less. Cash and cash equivalents are stated at fair value.

Fair Value

The carrying amounts of cash and cash equivalents and accounts payable approximate fair value due to the relatively short-term maturities and are classified as short-term assets and liabilities in the accompanying balance sheets.

2. Significant Balance Sheet Components

Financing Arrangements

In 2012, the Company raised \$112,000 via the sale of 14 Units. Each Unit provides to the purchasers thereof Common Stock, Warrants and Notes. The aggregate amount of Common Stock issued in conjunction with the 2012

Unit sales was 746,662 shares. The aggregate amount of Warrants issued in conjunction with the 2012 Unit sales was 1,003,338 (each Warrant exercisable at \$0.18 per share, for a period of five years). The aggregate amount of Notes Payable in conjunction with the 2012 Unit sales was \$94,000. Each Note is payable on or before March 1, 2015. At the Company's sole discretion, the Notes can be repaid in cash or in Company stock. In the event that the Company elects to repay the Notes in Company stock, the following issuances will occur:

- (1) 71,678 shares of Common Stock, par value \$0.0001 (with a per-share valuation of \$0.11) for each of Notes 1-5 for a total number of shares of 358,390 Common Shares, par value, \$0.001 per share, and

In 2013, the Company secured (a) \$50,000 via the sale of 10 Units (separate and distinct from the first offering) and \$112,500 via the sale of 4.5 Units (separate and distinct from the second offering). Each Unit provides to the purchasers thereof Common Stock and Warrants. The aggregate amount of Common Stock issued in conjunction with the 2013 Unit sales was 574,999 shares. The aggregate amount of Warrants issued in conjunction with the 2013 Unit sales was 574,999 (each Warrant exercisable between \$0.45 and \$0.50 per share, for a period of five years).

Total shares issued from these financing rounds were as follows: 1,321,661 shares Common Stock, par value \$0.001 per share, and 1,578,337 Warrants to purchase 1,578,337 shares of Common stock, par value \$0.001 per share.. On an as-issued, fully diluted basis, with 100% exercise of Warrants, these prior rounds would involve issuance of 2,899,998 shares of our Common Stock, \$0.001 par value. None of the Warrants from any of the raises have been exercised as of the date of this Memorandum.

Common Stock

The Company's Certificate of Incorporation authorizes the Company to issue 30,000,000 shares of \$0.0001 par value Common stock, and 5,000,000 shares of \$0.0001 par value Preferred stock. Each share of common stock is entitled to one vote per share. The holders of common stock are also entitled to receive dividends whenever funds are legally available and when declared by the Board of Directors, subject to the prior rights of holders of all other classes of stock outstanding.

Share-Based Compensation Plan

The Company accounts for share-based awards with compensation cost measured using the fair value of the awards issued. The Company uses the Black-Scholes option pricing model to value share-based awards and determine the related compensation expense. Stock-based compensation expense is recorded over the requisite service period, generally two years.

In July 2012, the Company adopted the Company's 2012 Stock Plan (the "Plan"). The Plan provides for the award of up to 2,500,000 stock options to employees, Directors and consultants at an exercise price not less than 100% of the fair value at the grant date as determined by the Board of Directors. The Plan also provides for the issuance of nonqualified stock options and restricted stock to employees, outside directors and consultants. Options granted have a maximum term of ten years from grant date, are exercisable upon vesting and generally vest over a four-year requisite service period. As of June 30, 2014, 1,898,900 options are outstanding under the Plan.

A summary of the Company's stock option activity under the Plan is as follows:

A legend describing those restrictions will be placed on the certificate representing the Shares, and the issuer of the Shares may give stop transfer instructions to the transfer agent for the Shares. Any Shares that you purchase in a "Restricted Offering" may not be resold without registration or an exemption from registration under applicable federal and state securities laws. You will ordinarily be required to wait at least one year before an exemption may become available for you to resell Shares. Statement of Understanding for Securities Offered to Investors on www.AlternativeSecuritiesMarket.com

Regulation A (Current): Regulation A is an exemption for **PUBLIC OFFERINGS** not exceeding \$5 Million USD in any 12-month period. Companies choosing to rely on this exemption must file an offering statement with the U.S. Securities & Exchange Commission on Form 1-A, consisting of a notification, offering circular and exhibits. The SEC staff reviews this offering statement.

Regulation A Offerings share many characteristics with registered offerings. For example, purchasers ("*Investors*") must be provided with an offering circular similar to a prospectus. Just as in registered offerings, the securities can be offered PUBLICLY, using general solicitation and advertising, and purchasers DO NOT RECEIVE '*RESTRICTED SECURITIES*', as explained at www.AlternativeSecuritiesMarket.com. The Principle difference between Regulation A Offerings and Registered Public Offerings are:

- 1) Financial Statements for a Regulation A Offerings are simpler and do not need to be audited unless audited financial statements are otherwise available.
- 2) Regulation A issuers do not incur either Exchange Act Reporting obligations after the offering or Sarbanes-Oxley Obligations applicable only to SEC reporting companies, unless the company '*meets the thresholds that trigger Exchange ACT Registration*'.
- 3) Companies may choose among three formats to prepare the Regulation A Offering Circular, one of which is a simplified question-and-answer document; and
- 4) Companies may "*test the waters*" to determine market interest in their securities before going through the expense of filing with the SEC.

SEC reporting companies are not eligible to use Regulation A. All other types of companies may use Regulation A, except developmental stage companies without a specified business (for example, "*Blank Check Companies*") and investment companies registered or required to be registered under the Investment Company act of 1940. In most cases, shareholders may use Regulation A to resell up to \$1.5 Million USD of Securities.

The "*test the waters*" provision of a Regulation A allows companies to publish or deliver a written document to prospective purchasers or make scripted radio or television broadcasts to determine whether there is an interest in their contemplated securities offering before filing an offering statement with the SEC. This gives companies the opportunity of being able to determine whether enough market interest in their securities exists before they incur the full range of legal, accounting and other costs associated with filing an offering statement with the SEC. Companies may NOT, however, solicit or accept money for securities offered under Regulation A until the SEC completes its review of the filed offering statement and the Company delivers offering materials to Investors.

NOTE ABOUT REGULATION A: The JOBS Act requires the SEC to develop rules for a new exemption to the existing Regulation A, which will permit offerings up to \$50 Million USD a year without SEC Registration.

Proposed Changes to Regulation A pursuant to the Passage of the JOBS Act in 2012. These changes are expected to be enacted during the first half of 2014.

The SEC's proposed rules will update and expand the Regulation A exemption by creating the following Two Tiers of Regulation A Offerings:

- **TIER ONE:** Tier One would consist of those offerings already covered by Regulation A – namely securities of up to \$5 Million USD in a twelve month period, including up to \$1.5 Million USD for the account of selling security-holders.
- **TIER TWO:** Tier Two would consist of securities offerings of up to \$50 Million USD in a twelve month period, including up to \$15 Million USD for the account of selling security-holders.

For offerings up to \$5 Million USD, the Company could elect whether to proceed under Tier 1 or Tier 2.

Basic Requirements:

Under Tier 1 and Tier 2, companies would be subject to basic requirements, including ones addressing issuer eligibility and disclosures that are drawn from the existing provisions of Regulation A. The proposed rules would update Regulation A to among the other things.

1. Permit companies to submit draft offering statements for nonpublic SEC review prior to filing
2. Permit the use of “testing the waters” solicitation materials both before and after filing of the Offering Statement
3. Modernize the qualification, communication and offering process in Regulation A to reflect analogous provisions of the Securities Act registration process, including electronic filing of offering materials.

Additional Tier 2 Requirements:

In addition to the three basic requirements, companies conducting Tier 2 Offerings would be subject to the following requirements.

1. Investors would be limited to purchasing no more than 10% of the greater of the investor's annual income or net worth.
2. The Financial Statements included in the Offering Circular would be required to be audited.
3. The Company would be required to file annual and semi-annual ongoing reports and current event updates that are similar to the requirements for public reporting companies.

<http://www.AlternativeSecuritiesMarket.com>

Eligibility:

Regulation A would be available to companies organized in and with their principal business in the United States or Canada, as is currently the case under Regulation A.

The Exemption would not be available to companies that:

- Are already SEC reporting companies and certain investment companies
- Have no specific business plan or purpose or have indicated their business plan is to engaged in a merger or acquisition with an unidentified company.
- Are seeking to offer and sell asset-backed securities or fractional undivided interests in oil, gas or other mineral rights.
- Have not filed the ongoing reports required by the proposed rules during the preceding two years.
- Are or have been subject to a Commission order revoking the company's registration under the Exchange Act during the preceding five years.
- Are disqualified under the proposed 'bad actor' disqualification rules.

Preemption of Blue Sky Law:

Under current Regulation A, offerings are currently subject to registration and qualification requirements in the States where the offering is conducted unless a State-level exemption is available. This has been identified by the GAO and market participants as a central factor for the limited use of current Regulation A.

In view of the range of investors protections provided under the proposal, state securities law requirements would be preempted for Tier 2 offerings. The proposal also explores alternative approaches to addressing this matter, including the coordinated review program proposed by the North American Securities Administrators Association.

Current Status:

The Commission has recently completed a sixty day public comment period on the proposed rules. The Commission is currently reviewing the comments and determining whether to adopt the proposed rules as illustrated above. Enactment is expected during the first half of 2014.

Companies cannot use this new exemption until the SEC adopts final rules.

OTHER SECURITIES THAT MAY BE OFFERED:

California Intra-State Exempt Securities ("CA1001"): Section 3(a) (11) of the Securities Act exempts from registration any offering made solely to persons residing in a single State or Territory, where the issuer is incorporated and doing business in the same state. The rationale is that a wholly Intra-State transaction is adequately policed by the Laws of the State, hence there is no need for an additional layer of Federal Law.

Under Rule 147, an issuer does business in the State (1) at least 80% of its gross revenues (*including subsidiaries*) is derived from operations or assets in-state; (2) atleast 80% of its assets (*including subsidiaries*) is located in-state; (3) atleast 80% of the offering's net proceeds is used in-state; and (4) its principal office is in-state. During the offering period and for nine months from the last sale by the issuer, purchasers may only resell their stock to other persons living in-state.

Companies listed on www.AlternativeSecuritiesMarket.com use CA1001 in combination with California Section 25102(n)

California 25102(n) is limited to issuers that are California Companies (*with some minor exemptions*). Investors must be "*qualified purchasers*". This means, generally, accredited investors and natural persons with a net worth specified in the statute.

Issuers relying on 25102(n) may **PUBLICLY** disseminate a limited written announcement of the offering. Potential investors may then respond to the announcement by contacting the issuer. The issuer may not telephone a prospective investor until it has determined that the investor is a qualified purchaser. Issuers must provide disclosure documents to the non-accredited investors at least five days prior to sale.

Regulation S: Regulation S ("*Reg S*") is an exemption designed by the U.S. Securities & Exchange Commission for Companies seeking to raise capital from investors located OUTSIDE of the United States. A Regulation S Offering under the Securities Act of 1933, as amended (the "*Securities Act*") is a safe harbor rule that defines when an offering of Securities would be considered an "offshore transaction" so as not to be subject to the registration obligations imposed under Section 5 of the Securities Act.

A Regulation S Offering (Foreign Direct Public Offering) only exempts the issuer from the registration requirements. It does not exempt the issuer from anti-fraud provisions. There are two main requirements in using a Regulation S Offering. The first is the offer and the sale of the securities must be in legitimate offshore transactions. Under a Regulation S Offering, the Company may not offer or sell any securities to a U.S. Citizen or Resident even if that person purchases the securities abroad. Also, the sale must not be done for the purpose of secretly selling the Securities to a U.S. Investor. The second requirement under Regulation S is that there cannot be any directed selling efforts in the United States. Generally, this means a company cannot advertise the Offering in a publication where the circulation crosses over to the United States.

A Regulation S Offering provides two exemptions from safe harbors from U.S. Securities Registrations: an exemption for the initial sale and another exemption for the resale of securities after they are held for a period of time, normally one year.

An important advantage to Companies utilizing Regulation S is that they are able to advertise in the foreign markets in newspapers and other publications. Under Regulation S the Company is allowed to hold seminars, road shows and engage in other general solicitation outside of the United States.

Also, Foreign Direct Public Offerings (Regulation S) are not integrated with Section 5 Public Offerings or Regulation D Private Placements. Regulation D documents contain rules which apply to transactions in the United States. Regulation S Offering Documents contain rules which apply to foreign transactions only. Therefore, a Company can conduct simultaneous Private Placement Stock Offerings and Foreign Direct Public Offerings without jeopardizing either exemption. Also, Regulation S Investors are treated the same way as accredited investors for the purpose of determining compliance with the 35 non-accredited investor limitation outlined in the Regulation D Private Placement.

Regulation D / Rule 504: Rule 504, sometimes referred to as the “*Seed Capital Exemption*”, provides an exemption for the offer and sale of up to \$1 Million USD of Securities in a 12-month period. A Company may use this exemption so long as it is not a Blank Check Company and it is not subject to Exchange Reporting Requirements. In general, a Company may not use general solicitation or advertising to market the securities, and purchasers generally receive “*restricted securities*”. Purchasers of restricted securities may not sell them without SEC Registration or using another exemption, which is further explained on the “*Resale of Restricted Securities*” page at www.AlternativeSecuritiesMarket.com. Investors should be informed that they may not be able to sell securities of non-reporting companies for at least a year without the issuer registering the transaction with the SEC.

A Company may, however, use the Rule 504 Exemption for a Public Offering of its Securities with general solicitation and advertising, and investors will receive “*non-restricted securities*”, under the following circumstances:

- The Company sells in accordance with a State Law that requires the public filing and delivery to investors a substantive disclosure document, or
- The Company sells in accordance with a State Law that requires registration and disclosure document delivery and also sells in a State without those requirements, so long as the Company delivers to all purchasers the disclosure documents mandated by a State in which it is registered; or
- It sells exclusively accordingly to State Law Exemptions that permit general solicitation and advertising, so long as sales are made only to “*accredited investors*”.

Even if a Company makes a private sale of its Securities, and not specific disclosure delivery requirements are required, a Company should take care to provide sufficient information to investors to avoid violating the anti-fraud provisions of the securities laws. This means that any information a Company provides to Investors must be free from false and misleading statements. Similarly, a Company should not exclude any information if the omission makes what is provided to investors false or misleading.

Regulation D / Rule 505: Rule 505 provides an exemption for offers and sales of Securities totaling up to \$5 Million USD in any 12-month period. Under this exemption, a Company may sell to an unlimited number of “*accredited investors*” and up to 35 persons that are not accredited investors. Purchasers must buy for investment purposes only, and not for the purpose of reselling the securities. The issued securities are ‘*restricted securities*’, meaning purchasers may not resell them without registration on an applicable exemption, as explained on the ‘*Resales of Restricted Securities*’ page. If a Company is not a SEC Reporting Company, Investors should be informed that they may not be able to sell securities for at least one year without the Company registering the transaction with the SEC. A Company may not use general solicitation or advertising to sell the Securities.

Under Rule 505, if the Company's Offering involves any purchasers that are not accredited investors, the Company must give these purchasers disclosure documents that generally contain the same information as those included in a registration statement for a registered offering. There are also financial statement requirements that apply to Rule 505 Offerings involving purchasers that are not accredited investors. For instance, if financial statements are required, they must be audited by a certified public accountant. The Company must also be available to answer questions from prospective purchasers who are not accredited investors.

The Company may decide what information to give to accredited investors, so long as it does not violate the antifraud prohibitions of the Federal Securities Laws. If a Company provides information to accredited investors, it must make this information available to the non-accredited investors as well.

Regulation D / Rule 506: Rule 506 is a "Safe Harbor" for the non-public exemption in Section 4(a)(2) of the Securities Act, which means it provides specific requirements that, if followed, establish that a transaction falls within the Section 4(a)(2) exemption. Rule 506 does not limit the amount of money a Company can raise or the number of accredited investors it can sell securities to, but to qualify for the safe harbor, a Company must:

1. Not use general solicitation or advertising to market the Securities.
2. No sell Securities to more than 35 non-accredited investors (unlike Rule 505, all non-accredited investors, either alone or with a purchaser representative, must meet the legal standard of having sufficient knowledge and experience in financial and business matters to be capable of evaluating the merits and risks of the prospective investment);
3. Give "*non-accredited investors*" specified disclosure documents that generally contain the same information as provided in registered offerings (*the Company is not required to provide specified disclosure documents to accredited investors, but, if it does provide information to accredited investors, it must also make this information available to the non-accredited investors as well*);
4. Be available to answer questions from prospective purchasers who are non-accredited investors; and
5. Provide the same financial statement information as required under Rule 505.

Purchasers receive "restricted securities" in a Rule 506 Offering. Therefore, they may not freely trade the Securities after the Offering, as explained on the "Resales of Restricted Securities" page at www.AlternativeSecuritiesMarket.com.

Section 18 of the Securities Act provides a Federal preemption of exemption from State registration and review of private offerings that are exempt under Rule 506. The States still have authority, however, to investigate and bring enforcement actions for fraud, impose State Notice Requirements and collect State Fees.

Special Note for 506 Offerings: The JOBS Act requires the SEC to eliminate the prohibition on using general solicitation and advertising to qualify for the Rule 506 Safe Harbor where all purchasers of the Securities are accredited investors and the issuer takes reasonable steps to verify that the purchasers are accredited investors. This not provision is not yet effective.

Mandatory Public Reporting Requirements for Companies listed on the Alternative Securities Markets Group are listed starting at the bottom of this page. Though these requirements may differ from those required of the Securities & Exchange Commission or by any State Securities Regulator, it is the Alternative Securities Markets Group Corporation's determination that these mandatory public reporting requirements are in the best interest of the investing public, and are mandatory for all companies listed on the Alternative Securities Market. The Alternative Securities Markets Group Corporation's policy is not to engage or list any company on the Alternative Securities Market that does not fully agree to, and keep current on the below public reporting requirements. Any company who fails to supply the below listed public reporting items, shall be 'delisted' from the Alternative Securities Market and that Company's unrestricted securities held by investors, will not be allowed to be posted on the Alternative Securities Markets Group Secondary Resale Market ("*Alternative Securities Markets Group's Securities Clearinghouse*").

The Alternative Securities Markets Group's Securities Clearinghouse is essentially an "Ebay Style" of an online auction board where a holder of an unrestricted security of a company listed on the Alternative Securities Market can post an "ask" for the sale of shares, and a potential buyer can post a "bid" to buy the shares. The transaction is ONLY between a seller and a buyer, and a seller pays a nominal fee to post an "ask" on the "*Alternative Securities Markets Group's Securities Clearinghouse*". There are no sales commissions or "spreads" paid to the Alternative Securities Markets Group Corporation, and trades are only closed during a two hour window per week, which will be part of the Company's weekly "*concentrated trade volume*" (*though "asks" can be posted 24/7, and "bids" can be submitted 24/7*). The Alternative Securities Markets Group Corporation's only compensation is from the seller, and that is paid at the time of the seller posting the "ask", it is not dependent on whether the seller is successful in selling their securities or not. There is no compensation paid by the buyer.

The Mandatory Public Reporting Requirements of all Companies listed on the Alternative Securities Market are as follows:

NOTE: The costs detailed above are either earned or paid by the Alternative Securities Markets Group Corporation, and are considered a debt of the Company. The Company issues a "Debt Note" to the Alternative Securities Markets Group Corporation upon each expenditure, or at qualification of the Regulation A by the SEC. Each debt note shall have an annualized rate of interest of 12%, with no monthly interest payments due, and all debt notes have a maturity of twelve months from the date of issuance. The Alternative Securities Markets Group recovers these expenditures from the "Cost of Offering" of each Company's Public Offering, and debt notes are paid as the Company gains capitalization on the Alternative Securities Market. If after 365 days from the date of issue, if any debt notes have not been paid in full (repurchased by the Company) from the "costs of offering proceeds", the entire debt note shall be voided and no further attempts to collect the funds will be made by the Alternative Securities Markets Group.

NOTE: Though the Company's on the Alternative Securities Market estimate a "Cost of Offering" of roughly 5% of offering amount, ABSOLUTELY NONE OF THESE FUNDS ABOVE THOSE POSTED ABOVE ARE PAID TO THE ALTERNATIVE SECURITIES MARKETS GROUP CORPORATION OR ANY AFFILIATES OR SUBSIDIARIES OF THE ALTERNATIVE SECURITIES MARKETS GROUP CORPORATION. It is estimated that Company legal fees, Company accounting expenses, Company Marketing and Advertising expenses 'could' potentially reach 5% of the gross offering amount. All of the costs and fees are at the discretion of the Company, and not the Alternative Securities Markets Group.

Alternative Securities Markets Group's Compensation:

- All companies pay a monthly "Public Reporting fee" to the Alternative Securities Markets Group per month. This monthly revolving fee is between \$35 and \$75 per month. Item 11 Disclosure Information

In this Item, we ask for information about your disciplinary history and the disciplinary history of all your *advisory affiliates*. We use this information to determine whether to grant your application for registration, to decide whether to revoke your registration or to place limitations on your activities as an investment adviser, and to identify potential problem areas to focus on during our on-site examinations. One event may result in "yes" answers to more than one of the questions below.

Your *advisory affiliates* are: (1) all of your current *employees* (other than *employees* performing only clerical, administrative, support or similar functions); (2) all of your officers, partners, or directors (or any *person* performing similar functions); and (3) all *persons* directly or indirectly *controlling* you or *controlled* by you. If you are a "separately identifiable department or division" (SID) of a bank, see the Glossary of Terms to determine who your *advisory affiliates* are.

If you are registered or registering with the SEC or if you are an exempt reporting adviser, you may limit your disclosure of any event listed in Item 11 to ten years following the date of the event. If you are registered or registering with a state, you must respond to the questions as posed; you may, therefore, limit your disclosure to ten years following the date of an event only in responding to Items 11.A.(1), 11.A.(2), 11.B.(1), 11.B.(2), 11.D.(4), and 11.H(1)(a). For purposes of calculating this ten-year period, the date of an event is the date the final order, judgment, or decree was entered, or the date any rights of appeal from preliminary orders, judgments, or decrees lapsed.

You must complete the appropriate Disclosure Reporting Page ("DRP") for "yes" answers to the questions in this Item 11.

Item 12 Small Businesses

The SEC is required by the Regulatory Flexibility Act to consider the effect of its regulations on small entities. In order to do this, we need to determine whether you meet the definition of "small business" or "small organization" under rule 0-7.

Answer this Item 12 only if you are registered or registering with the SEC and you indicated in response to Item 5.F.(2)(c) that you have regulatory assets under management of less than \$25 million. You are not required to answer this Item 12 if you are filing for initial registration as a state adviser, amending a current state registration, or switching from SEC to state registration.

For purposes of this Item 12 only:

- **Total Assets** refers to the total assets of a firm, rather than the assets managed on behalf of *clients*. In determining your or another *person's* total assets, you may use the total assets shown on a current balance sheet (but use total assets reported on a consolidated balance sheet with subsidiaries included, if that amount is larger).
- **Control** means the power to direct or cause the direction of the management or policies of a *person*, whether through ownership of securities, by contract, or otherwise. Any *person* that directly or indirectly has the right to vote 25 percent or more of the voting securities, or is entitled to 25 percent or more of the profits, of another *person* is presumed to *control* the other *person*.

	<u>Yes</u>	<u>No</u>
A. Did you have total assets of \$5 million or more on the last day of your most recent fiscal year?	<input type="checkbox"/>	<input checked="" type="checkbox"/>

If "yes," you do not need to answer Items 12.B. and 12.C.

B. Do you:

- | | | |
|--|--------------------------|-------------------------------------|
| (1) <i>control</i> another investment adviser that had regulatory assets under management (calculated in response to Item 5.F.(2)(c) of Form ADV) \$25 million or more on the last day of its most recent fiscal year? | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| (2) <i>control</i> another <i>person</i> (other than a natural person) that had total assets of \$5 million or more on the last day of its most recent fiscal year? | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

C. Are you:

- | | | |
|---|--------------------------|-------------------------------------|
| (1) <i>controlled by</i> or under common <i>control</i> with another investment adviser that had regulatory assets under management (calculated in response to Item 5.F.(2)(c) of Form ADV) of \$25 million or more on the last day of its most recent fiscal year? | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| (2) <i>controlled by</i> or under common <i>control</i> with another <i>person</i> (other than a natural person) that had total assets of \$5 million or more on the last day of its most recent fiscal year? | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

The firm seeks to establish this personal dimension through a careful, fact-finding interview and series of discussions with each client.

Item 8. Methods of Analysis:

- A. An Adviser must describe its methods of analysis and investment strategies used in formulating its investment advice. It must explain in detail any unusual risks.

**CAUTION:
INVESTING IN ALTERNATIVE SECURITIES
INVOLVES RISK OF LOSS**

An Adviser must explain the material risks involved for each significant investment, investment strategy, or method of analysis used and particular type of security recommended, with more detail if those risks are significant or unusual (i.e., not otherwise apparent from reading this brochure). A strategy or method of analysis is significant if the adviser uses the strategy or method in advising "more than a small portion of the adviser's client's assets."

Alternative Securities Markets Group Corporation follows an "open architecture" approach to building a diversified portfolio of Alternative Securities portfolios for clients. Though each portfolio will differ based on the needs of the Investment Client, Alternative Securities Markets Group Corporation's goal is to build Alternative Securities Portfolios for our Investment Advisory Clients that generate strong risk-adjusted returns and are consistent with the Investment Advisory Client's stated objectives and risk tolerance. To create consistency with advisors and clients, we narrow the scope of investments down to those offerings the Firm's Management feels offer the best options with certain asset classes of Alternative Securities. This process allows a level of due diligence to be performed on Alternative Securities Investments being presented to Investment Advisory Clients by Alternative Securities Markets Group Corporation's Advisers.

- B. Alternative Securities Markets Group Corporation does not advise any strategy that involves "frequent trading". The majority of the Alternative Securities that our Advisers recommend are either restricted from trade for a period of up to a minimum of one year, or do not have an established secondary market for the trade of the securities. The Alternative Securities Markets Group Corporation uses a "long term purchase approach" (holding for at least one year). The majority of the Firm's Alternative Securities Portfolio of Offerings do not have liquidity events for shareholders for 1-5 years.

Cyber Holdings Public Offering

INVEST (U.S. Citizens)

Cyber Holdings, Inc.

Cyber Holdings, Inc. ("CHI" or the "Company"), a Delaware corporation operating and qualified to do business in California and formed in June 2011, is an internet-based commercialization-stage entertainment organization focused on the design and implementation of personal computer (PC) online, First-Person-Shooter (FPS) world-wide Matches for participants (PC Gamers) through its WarZone Secure™ ("WZS") web site, located at <http://www.warzonesecure.com>. The WZS website is configured for FPS games such as Activision's® "Call of Duty" series. First-Person Shooter is a video game genre that allows the PC Gamer to experience combat through a first-person perspective; i.e., the PC Gamer experiences the action through the eyes of a protagonist-avatar. FPS games are a fast growing segment of the video-game market, with an estimated 5 million PC-based players worldwide. Our financial forecast (contained herein) assumes that in 2016 approximately 1.1% of this market segment will participate in our offering, and that these participants will spend, on average, approximately \$20 per month.

We believe that the core demographics of FPS Gamers will drive the financial results of our business. While the stereotypical view of a Gamer is often a young teenage boy sitting alone on a Friday night in a basement playing these games, in actuality, the demographics are much more profound. The average age of a FPS Gamer is 30, with median income is about \$50,000, and the Male/Female breakdown is 53%/47%. Critically, on average, Gamers spend about 6 hours per week playing video games. These Gamers also spend thousands of dollars per year on equipment. This is a market niche that is not only underappreciated, but all but ignored. We expect to change that with WZS.

CHI provides organized online PC FPS Matches where PC Gamers may compete as individuals, small teams or as Clans in cheat-free competitions to win cash and prizes. To our knowledge, we are the only online site in the world that offers Matches in a cheat-free environment for both individuals/small teams and Clans.

Matches held on the WZS website are provided via dedicated gaming servers which are housed in data centers located within the United States of America and Germany. PC Gamers who compete in WZS Matches can be located virtually anywhere in the world—as long as they have an internet connection. Much in the same way that sports teams may pay a fee to use a playing field and hire referees to compete with other teams, regardless of the sport, CHI provides a virtual "playing field" and virtual "referees" where PC Gamers can compete online with other PC Gamers using games that they already own or possess.

Importantly, CHI is not providing the actual games themselves, but rather a safe, secure and cheat-free virtual arena (via our proprietary, patent-pending Win With Honor™ anti-cheat technology) on which these games can be played. Our forum allows PC Gamers to compete for cash and other prizes with reduced concerns about cheating, a rampant cottage business in the gaming industry which has all but prevented any type of online Matches from being adopted by PC Gamers or actively promoted by the developers of the games. To our knowledge, other gaming sites require Gamers to own a console such as the Microsoft® "Xbox" or Sony® "PlayStation". We do not. Our Matches can be played via a PC connected to the internet, with no need for any console device.

We also operate a companion website, WarZone Girls, located at <http://www.warzonegirls.com>. Based upon the demographics of PC Gamers, nearly half of whom are female, we provide online graphic novels (comic books) based upon a story-line and all-female protagonists that are intended to direct PC Gamers to our main website. We view the WarZone Girls graphic novel/comic book website as primarily a marketing tool for the WarZone Secure site, and indeed, the last page of each issue is a full-page advertisement for WZS. If the series secures a following, our goal for WZG would be to out-license the characters for merchandising, as well as explore the potential for animated or live-action shorts or films.

Matches: CHI does not provide the PC games to the PC Gamers. The games are already owned or available to the

INVEST (International)

PC Gamers. Rather, CHI, through its WZS website, provides a secure, virtual "arena" on which the games are played. Our commercial launch (September 2013) comprised 120 different Match-types for 7 of the most popular FPS game titles, including both the Call of Duty™ and Battlefield™ series. Our WZS website is coded, such that we can readily add new titles to our system on a regular basis and apply our anti-cheat technology to the new titles. We plan on adding a few new titles approximately every six months. We segregate the Match-types into three categories: Skill-Based, with a \$6 entry fee per Gamer; High-Value, with a \$10 entry fee per Gamer; and Clan-Match, with an \$8 entry fee per Clan member. Our Matches are designed based upon the way FPS Gamers already compete, such as "King of the Hill" and "Capture the Flag." Each Match provides up to three cash prizes (which can also be taken by the winner in the form of playing credits), with the cash prize (or credit equivalent) for 3rd place being no less than the Match entry fee, and with 2nd and 1st prizes being correspondingly greater. In addition, every Gamer who completes a WZS Match receives free playing credits that can be accumulated and used for Match entry fees. On average, we expect to generate an approximate 48% margin on all Matches (gross Match fees, less cash prizes and the cash value of free participation credits).

Anti-Cheat Technology: Cheating is rampant in this sector. Indeed, custom or commercial PC-software that allows players to cheat and gain an unfair advantage over other players, commonly referred to as "cheats", are often simultaneously released by third parties when the video games amenable for play on our website are released.

To prevent cheating and prevent the use of cheats, CHI utilizes proprietary and patent-pending multi-level algorithms for detecting, catching and deterring cheating during each Match. One such patent has been allowed by the US Patent Office and is expected to issue in September of this year; the second has been filed. We believe that our anti-cheat technology is the unique differentiator between CHI and all other tournament sites, the vast majority being console-based (using, for example, Xbox® and other proprietary platforms) and most often conducted in stadium-like settings where the players compete in physical proximity with one another. To our knowledge, CHI is the only entity that provides server-side anti-cheat technology, meaning that our customers do not need to purchase, download or install any anti-cheat software in order to compete in our cheat-free environment. Our anti-cheat technology is a key component of our service offering and is intended to ensure a level playing field for all WZS participants.

Disruptive Innovation: "A term of art describing a process by which a product or service takes root initially in simple applications at the bottom of a market and then relentlessly moves up market, eventually displacing established competitors."

In April of 2014, I introduced the "Alternative Securities Markets Group" and the "Alternative Securities Market" to the the Crowdfunding Landscape. The Landscape of Crowdfunding today is oversaturated with with "alleged Crowdfunding professionals" that have absolutely no investment banking experience. Currently, Crowdfunders are limited to the issuance of Regulation D Securities to a class of investors known as "Accredited Investors" (generally the elite upper 7% of U.S. Citizens, also referred to as "the rich") to invest in their companies. Because the Alternative Securities Market main class of securities are Regulation A Securities, all investors (not just "the rich") can invest in the majority of the securities listed for sale on the Alternative Securities Market.

You may be asking yourself at this point, "why don't the "Crowdfunders" utilize Regulation A to raise investor capital"? The answer is quite simply (and quite sad), as is stated on the "About" tab on this website (toward the bottom of the page), a Regulation A Securities Offering requires the legal drafting of "SEC Form 1-A" (a lengthy legal document), and the submission of the SEC Form 1-A to the SEC for Review, Comment and Qualification. This process can take weeks to months (depending on your ability to prepare a complete registration document and then respond to comments from the SEC), and then once completed, there can be costs of thousands of dollars of costs as the company files the qualified Regulation A for a public offering of securities in multiple states. Lets be honest, most "Regulation D" entrepreneurs and brokers generally are not willing, or are even unable to incur thousands of dollars in registration fees.

It is for this exact fact I established the Alternative Securities Markets Group, essentially invading the Crowdfunding Landscape with a "superior Crowdfunding product at a price point that other Crowdfunders cannot compete with". How do we do this you may ask? The answer is simple, we pay for all the State Registration Costs associated with a Company's Regulation A Public Offering (we do recover the costs as the company becomes capitalized on the Alternative Securities Market as a cost of offering), and the only financial responsibility any listed company has to the Alternative Securities Market is a monthly public reporting fee of \$75, which is for the public distribution of the annual, quarterly and monthly public reporting requirements of all companies on the Alternative Securities Market.

The ultimate differences between the Alternative Securities Market and the rest of the Crowdfunders are:

- The Alternative Securities Market is able to be invested in by ALL INVESTORS, including Accredited and Non-Accredited Investors, U.S. Citizens and Non-U.S. Citizens, as well as private individual investors and institutional investors.
- Investors do not need to submit personal financial documents in order to invest (as is associated with Regulation D Investments)
- All Companies on the Alternative Securities Market agree to be "public reporting companies", which includes (but is not limited to): (1) quarterly unaudited financial statements, (2) annual audited financial statements, (3) quarterly conference calls with shareholders, (4) monthly "state of the company letter" to shareholders, (5) corporate action notices, which include (but not limited to): mergers, acquisitions, stock issues and stock splits, reverse splits, etc.
- Most Securities on the Alternative Securities Market are able to be sold or traded on the Alternative Securities Markets Group Secondary Securities Market, which is a secondary "Ebay" style market where Investors can post their Regulation A, Regulation S and Regulation D "unrestricted" Securities for sale (termed as "posting an Ask"), and buyers can review sellers "ask" terms, as well as the company's information for which the seller is selling securities, and post a "bid" to buy the securities for sale in an "online auction". The majority of Regulation A are Issued "non-restricted" and can be immediately bought and resold immediately, while Regulation D and Regulation S Securities are restricted from resale for a period of 6-12 months.
- The Alternative Securities Market is not a "for hire" market (unlike all the Crowdfunding platforms that post information for any company that will pay their listing fees)! All companies must apply for listing, go through a due diligence period while we consider the Company's listing, and then go through a registration process with the United States Securities & Exchange Commission as well as with various State Regulators.

In each of the last five years, less than twenty Regulation A's have been submitted to the United States Securities & Exchange Commission for review, comment and qualification. In 2013, only a total of eleven Regulation A Registration Statements were submitted to the SEC. The Alternative Securities Market opened its doors in April of 2014, and since opening, I have personally authored and submitted more than Thirty Regulation A Registration Statements to the United States Securities & Exchange Commission in just over four months (I am currently the undisputed Regulation A Champion with no close second). I fully expect the eclipse the 100 mark before the close of 2014!
