Notes to Financial Statements

Note 1 - Summary of Significant Accounting Policies

Perryman Securities, Inc. (the "Company") is a broker-dealer in securities registered with the Securities and Exchange Commission ("SEC") and is a member of the Financial Industry Regulatory Authority ("FINRA"). The Company operates under (SEC) Rule 15c3-3(k)(1), (the Customer Protection Rule), limiting business to the distribution of mutual funds and/or variable life insurance or annuities. The Company's customers are located throughout the United States.

Marketable securities owned are carried at quoted market value. The increase or decrease in net unrealized appreciation or depreciation of securities is credited or charged to operations.

Purchases and sales of securities are recorded on a trade date basis. Commission revenue and expense are recorded on a settlement date basis, generally the third business day following the transactions. If materially different, commission revenue and expense are adjusted to a trade date basis.

Commissions receivable are generally collected in full in the month following their accrual. As such, management has not recorded an allowance for doubtful accounts on these receivables. Management records an allowance for bad debts based on a collectability review of specific accounts. Any receivables deemed uncollectible are written off against the allowance.

Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due. The provision for federal income taxes differs from the expected amount using statutory rates because certain income and expenses included in the determination of net income are non-deductible or non-taxable for tax reporting purposes.

Any potential interest and penalty associated with a tax contingency, should one arise, would be included as a component of income tax expense in the period in which the assessment arises.

Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due. The provision (benefit) for federal income taxes differs from the expected amount using statutory rates because certain expenses included in the determination of net income are non-deductible for tax reporting purposes.

Income tax returns are generally subject to examination by the respective federal and state authorities over various statutes of limitations generally three to five years from date of filing.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

PERRYMAN SECURITIES, INC.  
Notes to Financial Statements  
September 30, 2014

Note 2 - Fair Value Disclosures

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In determining fair value, the Company uses various methods including market, income and cost approaches. Based on these approaches, the Company often utilizes certain assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and/or the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable inputs. The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Based on the observability of the inputs used in the valuation techniques the Company is required to provide the following information according to the fair value hierarchy. The fair value hierarchy ranks the quality and reliability of the information used to determine fair values. Financial assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

Level 1 - Valuations for assets and liabilities traded in active exchange markets, such as the New York Stock Exchange. Level 1 also includes U.S. Treasury and federal agency securities and federal agency mortgage-backed securities, which are traded by dealers or brokers in active markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.

Level 2 - Valuations for assets and liabilities traded in less active dealer or broker markets. Valuations are obtained from third party pricing services for identical or similar assets or liabilities.

Level 3 - Valuations for assets and liabilities that are derived from other valuation methodologies, including option pricing models, discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities.

For the year ended September 30, 2014, the application of valuation techniques applied to similar assets and liabilities has been consistent. The fair value of all securities owned are deemed to be Level 1 investments at September 30, 2014 and during the period then ended.

Note 3 - Net Capital Requirements

Pursuant to the net capital provisions of Rule 15c3-1 of the Securities Exchange Act of 1934, the Company is required to maintain a minimum net capital, as defined under such provisions. Net capital and the related net capital ratio may fluctuate on a daily basis.

At September 30, 2014, the Company had net capital of approximately \$54,803 and net capital requirements of \$5,359. The Company's ratio of aggregate indebtedness to net capital was 1.47 to 1. The Securities and Exchange Commission permits a ratio of no greater than 15 to 1.

Note 4 - Possession or Control Requirements

The Company does not have any possession or control of customer funds or securities. There were no material inadequacies in the procedures followed in adhering to the exemptive provisions of (SEC) Rule 15c3-3(k)(1) by not holding customer funds or safekeeping customer securities.

PERRYMAN SECURITIES, INC.  
Notes to Financial Statements  
September 30, 2014

Note 5 - Related Party

An affiliated company has agreed by contract to furnish office space, various items of personal property, and various general and administrative services to the Company. Expenses incurred with the affiliate under this contract through September 30, 2014, were \$341,236 and are reflected in other expenses. The Company and the affiliate are under common control and the existence of that control creates operating results and financial position significantly different than if the companies were autonomous.

Note 6 - Employee Benefits

The Company has a medical expense plan used to reimburse an employee who is a Participant ("Participant") in the plan for the medical care of the Participant, the Participant's spouse and dependents not otherwise reimbursed under any other plan of the Company, and to replace Participants lost wages due to absence from work caused by occupational and non-occupational personal injuries and sickness.
