INDEPENDENT AUDITOR'S REPORT

Board of Directors and Stockholder
Multi-Bank Securities, Inc.

We have audited the accompanying statement of financial condition of Multi-Bank Securities, Inc. as of December 31, 2013, that is filed pursuant to Rule 17a-5 under the Securities Exchange Act of 1934, and the related notes to the financial statement.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of this financial statement in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on this financial statement based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statement is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statement. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statement, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statement in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statement.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statement referred to above presents fairly, in all material respects, the financial position of Multi-Bank Securities, Inc. as of December 31, 2013 in accordance with accounting principles generally accepted in the United States of America.

MULTI-BANK SECURITIES, INC.
NOTES TO STATEMENT OF FINANCIAL CONDITION
December 31, 2013

Note 1 - ORGANIZATION

Multi-Bank Securities, Inc. (the "Company") is an institutional fixed-income securities broker-dealer registered with the Financial Industry Regulatory Authority (FINRA) and the U.S. Securities and Exchange Commission. The Company is a wholly owned subsidiary of Multi-Bank Services, Ltd. See Note 4 for transactions with Parent Company.

Note 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Revenue Recognition

Securities transactions are recorded on the trade date, as if they had settled. Profit and losses arising from all securities transactions are recorded on a trade date basis.

Securities owned and securities sold, not yet purchased are recorded at fair value in accordance with FASB ASC 820, *Fair Value Measurements and Disclosures*.

Management Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Concentrations of Counterparty Credit Risk

The Company is engaged in various trading and brokerage activities with counterparties that primarily include broker-dealers, banks, and other financial institutions. In the event the counterparties do not fulfill their obligations, the Company may be exposed to risk. The risk of default depends on the creditworthiness of the counterparty. The Company monitors its exposure to risk through a variety of control procedures, including daily review of trading positions.

Federal Income Taxes

The Company files a consolidated Federal income tax return with its Parent Company. The provision for Federal income tax for the year ended December 31, 2013 is based on a separate return filing. The amount of current and deferred taxes payable or refundable is recognized as of the date of the financial statements, utilizing currently enacted tax laws and rates. The Company's income tax asset relates primarily to deferred compensation and represents the amount available to reduce income taxes payable in future years.

The Company recognizes and measures its unrecognized tax benefits in accordance with FASB ASC 740, Income Taxes. The primary objective of ASC 740 is to prescribe measurement and disclosure requirements for income tax provisions when uncertainty exists as to whether the reporting entity's tax positions would be sustained in the event of an examination. Company management believes that there are no material uncertainties in which tax positions taken would not be sustained upon examination.

Subsequent Events

The Company has evaluated events and transactions for potential recognition or disclosure through February 19, 2014, which is the same date the financial statements were available to be issued.

Note 3 – FAIR VALUE

Fair Value Measurement

FASB ASC 820 defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach, as specified by FASB ASC 820, are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities the Company has the ability to access.
- Level 2 inputs are inputs (other than quoted prices included within level 1) that are observable for the asset or liability, either directly or indirectly.
- Level 3 are unobservable inputs for the asset or liability and rely on management's own assumptions about the assumptions that market participants would use in pricing the asset or liability. (The unobservable inputs should be developed based on the best information available in the circumstances and may include the Company's own data.)

The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.
