**SCHEDULE R  
CRITICAL DELIVERABLES**

**SCHEDULE R**  
**CRITICAL DELIVERABLES**

**1. GENERAL**

**1.1 Critical Deliverables; Critical Deliverables Credits**

- (a) As part of Supplier's obligations under the Agreement, Supplier is required to create and deliver to Health Net certain important deliverables ("*Critical Deliverables*," by certain dates ("*Deliverable Due Dates*"). The Critical Deliverables and their applicable Deliverable Due Date are set forth below.
- (b) If Supplier fails to complete and deliver a Critical Deliverable by the applicable Deliverable Due Date set forth below, then unless the failure is excused pursuant to Section 1.2, Supplier will pay to Health Net a credit ("*Critical Deliverable Credit*") as specified below on Supplier's next invoice provided to Health Net under this Agreement.
- (c) Health Net's receipt of Critical Deliverable Credits will be without prejudice to any other rights and remedies available to Health Net under the Agreement, at law, or in equity with respect to any failure of Supplier to complete the Critical Deliverables in a timely manner and otherwise in accordance with this Agreement.

**1.2 Excuses for Failure to Complete and Deliver Critical Deliverables**

Supplier's failure to complete and deliver a Critical Deliverable by the applicable Deliverable Due Date will be excused to the extent (but only to the extent) that (i) such failure is caused by an Excusable Performance Failure Event as defined in Section 4.4 of Schedule B (*Service Levels*), (ii) Supplier would have completed and delivered such Critical Deliverable prior to the Deliverable Due Date but for such Excusable Performance Failure Event, and (iii) Supplier is without fault in causing such Excusable Performance Failure Event.

**2. CRITICAL DELIVERABLE CREDITS**

The table below identifies the Critical Deliverables, the Deliverable Due Date for each such Critical Deliverable, and the Critical Deliverable Credit payable by Supplier to Health Net if Supplier fails to complete and deliver a Critical Deliverable on or before the applicable Deliverable Due Date. The Critical Deliverable Credit will be paid in the first invoice month after the Deliverable Due Date for the Critical Deliverable for which Supplier failed to perform as provided herein.

No.	Contract Section Where Deliverable Described	Deliverable Name	Critical Deliverable	Deliverable Due Date(s)	Critical Deliverable Credit
1.	MSA 11.5	True-up Plan	A plan describing Supplier's approach to conducting and completing the true-up contemplated by Section 11.5 of the Terms and Conditions.	45 days after the Effective Date	***
2.	MSA 11.5	True-up Results	The results of the true-up process as described in Section 11.5 of the Terms and Conditions.	45 days after BPaaS Services Commencement Date	***
3.	Section 1 of Schedule Z (Transition) and MSA 13.2	Transition Documents	Actionable Transition Documents, including Transition Deliverables and Transition Milestones (including transition gates) and Acceptance Criteria for each, per Section 1 of Schedule Z ( <i>Transition</i> ) and Section 13.2 of Terms and Conditions.	Weekly update by the Friday of each week, until completion of Transition  Initial Updated Transition Documents ("December Updated Transition Documents") – due December 12, 2014  Updated Transition Documents addressing all Health Net comments provided to that point, and in form and substance satisfactory to Health Net ("January Updated Transition Documents") - due January 16, 2015	December Updated Transition Documents - ***  January Updated Transition Documents - ***  (No further items are subject to a credit here)

**SCHEDULE S**  
**PROCEDURES MANUAL TABLE OF CONTENTS**

With reference to Section 17.2 (Procedures Manual) of the Terms and Conditions, the Procedures Manual table of contents is set forth below.

**1. INTRODUCTION AND OVERVIEW**

- (a) **Overview:** A high-level description of the Procedures Manual and its contents
- (b) **Objectives:** The purpose of the Procedures Manual; the expected audience and benefits
- (c) **Owner:** The resources responsible for drafting and updating the Procedures Manual, and the approving authority

**2. SERVICE PERFORMANCE MANAGEMENT**

**2.1 Service Level Management**

- (a) **Baselining:** Process for Baselining to set targets for Service Level metrics that have no historical performance data available, in accordance with the Baselining provisions set forth in Schedule B (*Service Levels*)
- (b) **Performance Management:** Procedures to ensure Services will be performed as per Service Level agreement listed in Schedules B, B-1, B-2, B-2-1, B-2-2, and B-3, and corrective action procedures for any Services not meeting the Service Levels
- (c) **Performance Measurement & Reporting:** Sample selection, measurement and reporting methodology and tools
- (d) **Dispute Management:** Process for addressing disputes connected to Service Level performance; roles and responsibilities; escalation matrix

**3. CHARGES**

- (a) **Invoicing and Billing:** Format and process for raising invoices with due consideration to PMPM Charges, Fixed Fees, Service Level Credits, any other Charges or fees, dates due, etc. as listed in Schedule C (*Charges*)
- (b) **Dispute Management:** Process for addressing disputes connected to billing; escalation matrix

**4. KEY SUPPLIER PERSONNEL**

- (a) **Resources:** Procedure for selection, removal, replacement, and training of Supplier Personnel and Key Supplier Personnel
- (b) **Retention:** Procedures for reducing turnover rate

**5. GOVERNANCE**

- (a) **Governance Management:** Procedures for managing the governance related requirements in the Agreement, including those listed in Schedule G (*Governance*) and its sub-schedules including the methodology and tools to receive, qualify, identify, manage, and track Deliverables to completion
- (b) **Resources:** Organization charts containing operational and contractual authority and authorization levels, contact lists for Health Net, Supplier and third-parties, and roles and responsibilities
- (c) **Communications Management:** Procedures and protocol for formal communications between Health Net, Supplier and third parties, including for those related to the obligations in Schedules G-2 (*Committee and Meeting Framework*) and G-3 (*Management Reports*)
- (d) **Dispute Management:** Process for addressing disputes between Health Net, Supplier and third parties; escalation matrix

## 6. CONTRACT MANAGEMENT

- (a) **Contract Administration:** Processes to manage the Agreement when action, negotiation, monitoring, review or tracking, are required - including contract interpretation, review of proposed new Charges, management related to approvals, authorizations, consents and notices, and management of correspondence
- (b) **Contract Issue Management:** Process for maintaining and tracking Agreement-related issues from initiation through resolution with proper documentation
- (c) **Change Control Management:** Procedures for managing the requirements listed in Schedule H (*Change Control Process*)
- (d) **Dispute Management:** Process for addressing disputes connected to Change
- (e) **Supplier Audit:** Process for initiating, managing, and summarizing Supplier audits

## 7. REGULATORY COMPLIANCE

- (a) **Regulatory Compliance Management:** Procedures for managing the regulatory compliance related requirements, including those listed in Schedule A (*Cross Functional Services*) and Schedule K (*Regulatory Compliance Addendum*)
- (b) **Dispute Management:** Process for addressing disputes connected to Regulatory Compliance; roles and responsibilities; escalation matrix

## 8. DISENGAGEMENT ASSISTANCE

- (a) **Disengagement Assistance Management:** Procedures for managing the Disengagement related requirements, including those listed in Schedule L (*Disengagement Assistance*) including knowledge retention, transfer of assets, licenses, etc.
- (b) **Resources:** Staffing, roles and responsibilities

- (c) **Dispute Management:** Process for addressing disputes connected to Disengagement Assistance; roles and responsibilities; escalation matrix

## 9. CRITICAL DELIVERABLES

- (a) **Critical Deliverables Management:** Procedures for managing the quality and timings of Critical Deliverables and other requirements listed in Schedule R (*Critical Deliverables*)
- (b) **Entry and Exit:** Procedures to create the entry and exit criteria, sign-off process, etc.
- (c) **Resources:** Staffing, roles and responsibilities
- (d) **Dispute Management:** Process for addressing disputes connect to Critical Deliverables; roles and responsibilities; escalation matrix

## 10. SUPPLIER OWNED AND THIRD PARTY SOFTWARE

- (a) **Software Management:** Procedures for managing the duties and obligations related to Supplier owned and Third Party software
- (b) **Costs:** Procedures to manage any costs including those incurred by Health Net under any of the third party Software licenses during the Term, Disengagement Assistance or prior to Phase 3
- (c) **Dispute Management:** Process for addressing disputes connect to Supplier Owned and Third Party Software; roles and responsibilities; escalation matrix

## 11. OPERATIONAL OVERSIGHT

- (a) **Activities:** Procedures describing the high level activities that Supplier proposes to undertake in order to provide the Services, including direction, supervision, monitoring, staffing, reporting, planning, and oversight activities; such processes may include:
  - (i) Process Management
  - (ii) Project Management
  - (iii) Quality Management
  - (iv) Service Continuity
  - (v) Measurements and Reporting

## 12. PROJECT MANAGEMENT

- (a) **Project Management:** Procedures for managing the requirements and project lifecycle, including as related to the framework detailed in Schedule J (*Project Framework*)
- (b) **Resources:** Staffing, roles and responsibilities

## 13. SERVICE DELIVERY MANAGEMENT (CROSS FUNCTIONAL)

- (a) **Service Delivery Management:** Procedures for managing the obligations and responsibilities listed in Schedule A (*Services*)
- (b) **Documentation Management:** Procedures for creation of Standard Operating Manuals and Desktop Procedures, refresh of manuals, training and refreshers, assessments, etc.
- (c) **Change Management:** Process for initiating changes to Supplier responsibilities under the Statements of Work, recording and socializing the changes, etc.

**14. SERVICE DELIVERY MANAGEMENT (CLAIMS – SOW 1)**

- (a) **Demand and Forecast Management:** Process for estimating demand and creating a corresponding forecast of FTE's using Membership volume adjusted for seasonality under the Statements of Work
- (b) **Resource Planning and Scheduling:** Process for planning resources and scheduling them to meet the demand and forecast volume necessary to delivery on the Services Outlined in the Statement of Work combined with corresponding Service Levels
- (c) **Service Delivery Management:** Procedures for delivering the Services outlined in the Statement of Work
- (d) **SLA Management:** Management and supervisory processes as well as corrective actions necessary to comply with the corresponding Service Levels for this Statement of Work

**15. SERVICE DELIVERY MANAGEMENT (MEMBERSHIP AND CONFIGURATION – SOW 2)**

- (a) **Demand and Forecast Management:** Process for estimating demand and creating a corresponding forecast of FTE's using Membership volume adjusted for seasonality under the Statements of Work
- (b) **Resource Planning and Scheduling:** Process for planning resources and scheduling them to meet the demand and forecast volume necessary to delivery on the Services outlined in the Statement of Work combined with corresponding Service Levels
- (c) **Service Delivery Management:** Procedures for delivering the Services outlined in the Statement of Work
- (d) **SLA Management:** Management and supervisory processes as well as corrective actions necessary to comply with the corresponding Service Levels for this Statement of Work

**16. SERVICE DELIVERY MANAGEMENT (CONTACT CENTER – SOW 3)**

- (a) **Demand and Forecast Management:** Process for estimating demand and creating a corresponding forecast of FTE's using Membership volume adjusted for seasonality under the Statements of Work
- (b) **Resource Planning and Scheduling:** Process for planning resources and scheduling them to meet the Demand and Forecast volume necessary to delivery on the Services Outlined in the Statement of Work combined with corresponding Service Levels

- (c) **Service Delivery Management:** Procedures for delivering the Services outlined in the Statement of Work
- (d) **SLA Management:** Management and supervisory processes as well as corrective actions necessary to comply with the corresponding Service Levels for this Statement of Work

**17. SERVICE DELIVERY MANAGEMENT (AO AND IO SERVICES – SOW 4)**

- (a) **Demand and Forecast Management:** Process for estimating demand and creating a corresponding forecast of FTE's using Membership volume adjusted for seasonality under the Statements of Work
- (b) **Resource Planning and Scheduling:** Process for planning resources and scheduling them to meet the demand and forecast volume necessary to delivery on the Services outlined in the Statement of Work combined with corresponding Service Levels
- (c) **Service Delivery Management:** Procedures for delivering the Services outlined in the Statement of Work
- (d) **SLA Management:** Management and supervisory processes as well as corrective actions necessary to comply with the corresponding Service Levels for this Statement of Work

**18. SERVICE DELIVERY MANAGEMENT (QUALITY ASSURANCE – SOW 5)**

- (a) **Demand and Forecast Management:** Process for estimating demand and creating a corresponding forecast of FTE's using Membership volume adjusted for seasonality under the Statements of Work
- (b) **Resource Planning and Scheduling:** Process for planning resources and scheduling them to meet the demand and forecast volume necessary to delivery on the Services outlined in the Statement of Work combined with corresponding Service Levels
- (c) **Service Delivery Management:** Procedures for delivering the Services outlined in the Statement of Work
- (d) **SLA Management:** Management and supervisory processes as well as corrective actions necessary to comply with the corresponding Service Levels for this Statement of Work

**19. SERVICE DELIVERY MANAGEMENT (APPEALS AND GRIEVANCES – SOW 6)**

- (a) **Demand and Forecast Management:** Process for estimating demand and creating a corresponding forecast of FTE's using Membership volume adjusted for seasonality under the Statements of Work
- (b) **Resource Planning and Scheduling:** Process for planning resources and scheduling them to meet the demand and forecast volume necessary to delivery on the Services outlined in the Statement of Work combined with corresponding Service Levels.
- (c) **Service Delivery Management:** Procedures for delivering the Services outlined in the Statement of Work

- (d) **SLA Management:** Management and supervisory processes as well as corrective actions necessary to comply with the corresponding Service Levels for this Statement of Work

**20. SERVICE DELIVERY MANAGEMENT (MEDICAL MANAGEMENT – SOW 7)**

- (a) **Demand and Forecast Management:** Process for estimating demand and creating a corresponding forecast of FTE's using Membership volume adjusted for seasonality under the Statements of Work
- (b) **Resource Planning and Scheduling:** Process for planning resources and scheduling them to meet the demand and forecast volume necessary to delivery on the Services Outlined in the Statement of Work combined with corresponding Service Levels
- (c) **Service Delivery Management:** Procedures for delivering the Services outlined in the Statement of Work
- (d) **SLA Management:** Management and supervisory processes as well as corrective actions necessary to comply with the corresponding Service Levels for this Statement of Work

**SCHEDULE T**  
**JOINDER AGREEMENT**

**SCHEDULE T**  
**JOINDER AGREEMENT**

**THIS JOINDER AGREEMENT** is made on this [TBD] day of [DATE] (the “*Joinder Agreement*”), by and between:

[Fill in name of Health Net related entity], a company incorporated in [Delaware] with its principle place of business located at [TBD] (“*Customer*”); and

**Cognizant Healthcare Services, LLC**, a Delaware limited liability company with its principle place of business located at 500 Frank W. Burr Blvd., Teaneck, New Jersey 07666 (“*Supplier*”); Customer and Supplier being referred to individually as a “*Joinder Party*” and collectively as the “*Joinder Parties*”.

**BACKGROUND:**

- (A) Health Net, Inc. (“*HNI*”) and Supplier are parties to that certain Master Services Agreement dated November 2, 2014 (the “*Agreement*”), pursuant to which HNI will procure, and Supplier will deliver, certain Services.
- (B) Customer is an HNI-related entity that requires certain of the Services from Supplier. As concerns any such HNI-related entity that requires Services from Supplier, HNI and Supplier have entered into the Agreement with the understanding and intention that each such HNI-related entity may enter into a separate Joinder Agreement directly with Supplier should it desire to obtain services from Supplier.
- (C) In that regard, Section 3.9 of the Agreement’s Terms and Conditions provides that each such HNI-related entity may enter into a joinder agreement directly with Supplier, enabling such entity to procure Services directly from Supplier, provided that such entity is financially responsible only for the charges associated with such Services provided by Supplier to such entity and not for any amounts due Supplier by HNI or any of HNI’s other affiliates or any HNI-related entities.
- (D) Accordingly, Customer and Supplier wish to enter into this Joinder Agreement for the provision of Services by Supplier to Customer, which shall be deemed a separate agreement as between Customer and Supplier and shall not be or form the basis for an agreement, directly or indirectly, between HNI and Customer.

**NOW IT IS HEREBY AGREED AS FOLLOWS:**

**1. DEFINITIONS AND INTERPRETATION**

**1.1 Defined Terms**

All capitalized terms used in this Joinder Agreement and not otherwise defined herein shall have the meanings ascribed to them in Section 2.1 of the Agreement’s Terms and Conditions or, if applicable, elsewhere in the Agreement.

## **1.2 Conflicts**

This Joinder Agreement and the Agreement shall be construed wherever possible to avoid conflict. In the event that a conflict cannot be avoided, the terms of the Agreement shall prevail, unless and to the extent that (i) this Joinder Agreement expressly identifies the provision(s) the Parties intend to override, and (ii) such change applies solely to this Joinder Agreement.

## **2. TERM AND TERMINATION**

### **2.1 Commencement**

This Joinder Agreement shall come into effect on the date that Customer and Supplier sign this Joinder Agreement.

### **2.2 Term**

This Joinder Agreement shall remain in effect until the earlier of (a) the expiration or termination of the Agreement in its entirety, or (b) the termination of this Joinder Agreement pursuant to Section 2.3.

### **2.3 Termination**

- (a) Customer may terminate this Joinder Agreement, in whole or in part, upon written notice to Supplier to the limited extent that the Services to be provided under this Joinder Agreement expire, cease or are otherwise terminated, each pursuant to the Agreement.
- (b) Supplier may terminate this Joinder Agreement upon written notice to Customer only to the extent that Supplier terminates the Agreement in accordance with Section 16.3 of the Agreement's Terms and Conditions.
- (c) For avoidance of doubt, the termination of this Joinder Agreement shall apply solely to this Joinder Agreement and shall not result in a termination of any other Joinder Agreement or the Agreement.

## **3. SUPPLIER AND CUSTOMER OBLIGATIONS**

### **3.1 Services**

Supplier shall provide the Services to Customer in accordance with the terms of this Joinder Agreement and the Agreement.

### **3.2 Charges**

Customer shall pay Supplier the Charges for such Services provided to Customer under this Joinder Agreement, in accordance with the Agreement's Terms and Conditions.

### **3.3 General**

- (a) Customer and Supplier each hereby agree to comply with all applicable provisions of the Agreement with respect to the Services provided hereunder. For purposes of this clause, references in the Agreement to "Health Net" shall mean Customer.

- (b) Customer shall have the right to enforce the rights granted to HNI under the Agreement as they relate to Services provided to Customer under this Joinder Agreement.
- (c) Supplier shall have the right to enforce the rights granted to Supplier under the Agreement as they relate to Services provided to Customer under this Joinder Agreement.
- (d) Nothing set forth herein shall be interpreted to make Customer liable (i) under any other Joinder Agreement, or (ii) under the Agreement except as it relates solely to Services provided to Customer under this Joinder Agreement.
- (e) Customer and Supplier agree and acknowledge that this Joinder Agreement is entered into for the provision of Services by Supplier to Customer, shall be deemed to be a separate agreement as between Customer and Supplier and shall not be or form the basis for an agreement, directly or indirectly, between HNI and Customer.

## **4. DISPUTE RESOLUTION**

### **4.1 Resolution of Claims and Disputes**

All disputes, claims, actions and proceedings arising out of or related to this Joinder Agreement shall be resolved in accordance with Article 26 of the Agreement's Terms and Conditions.

## **5. RELATIONSHIP OF JOINDER AGREEMENT TO AGREEMENT; AMENDMENTS**

### **5.1 General**

This Joinder Agreement, and each Joinder Party's obligations hereunder, shall be governed by and subject to the Agreement, as such Agreement may be amended from time to time in accordance with Section 25.3 of the Agreement's Terms and Conditions.

### **5.2 Amendments to the Agreement**

Any amendment to or modification of the Agreement shall be binding on the Joinder Parties under this Agreement, as applicable, without the necessity of further action by either Joinder Party.

### **5.3 Effect of this Joinder Agreement on Agreement**

Except as may be expressly set forth herein as a term that the Parties intend modifies the Agreement, this Joinder Agreement shall not be construed or interpreted to amend or modify the Agreement. Without limiting the generality of the foregoing, this Joinder Agreement shall not be construed to (a) alter the Charges for the Services set forth in the Agreement, (b) create a separate or prorated obligation with regard to the Minimum Revenue Commitment, or (c) create a separate or prorated amount at risk with respect to Service Level Credits.

## **6. ADDITIONAL TERMS**

### **6.1 Governing Law**

This Joinder Agreement and performance under it shall be governed by and construed in accordance with the laws of the State of California without regard to its choice of law principles.

**6.2 Amendments**

No change, waiver, or discharge of the terms of this Joinder Agreement shall be valid unless in writing and signed by an authorized representative of each Joinder Party.

**6.3 Further Assurances**

Customer and Supplier hereby agree that, in connection with and subsequent to the execution and delivery of this Joinder Agreement and without any additional consideration, each of Customer and Supplier will execute and deliver any further legal instruments and perform any acts which are or may become reasonably necessary to effectuate this Joinder Agreement, including in connection with obtaining any consents, approvals or other actions required for the implementation of the rights and obligations under this Joinder Agreement.

**6.4 Counterparts**

This Joinder Agreement may be executed in several counterparts, all of which taken together constitute a single agreement between the Joinder Parties. Each signed counterpart, including a signed counterpart reproduced by facsimile or other reliable means, will be considered an original.

**6.5 Notices**

A notice under or in connection with this Joinder Agreement shall be made in accordance with Section 27.5 of the Agreement's Terms and Conditions and delivered as follows:

If to Customer:

**[Fill in name of Health Net related entity and notice address]**

\_\_\_\_\_

GENERAL TERMS AND CONDITIONS]***

**SCHEDULE V  
GUARANTY**

## PARENT GUARANTY

This Parent Guaranty (this “*Guaranty*”), dated November 2, 2014, is issued by Cognizant Technology Solutions Corporation, a Delaware corporation (“*Cognizant*”) and Cognizant Technology Solutions U.S. Corporation, a Delaware corporation (“*CTS US*” and collectively with Cognizant, “*Guarantors*”), in favor of Health Net, Inc., a Delaware corporation (including its successors and permitted assigns under each of the Agreements, “*Client*”).

Client and CTS US are parties to that certain Master Services Agreement dated September 28, 2008 (the “*AO Agreement*”). On or about the date hereof, Client and Cognizant Healthcare Services, LLC, a Delaware limited liability company (“*CHS*” and collectively with CTS US, “*Obligors*”), entered into the following agreements: (i) a Master Services Agreement (“*MSA*”), and (ii) an Asset Purchase Agreement (“*APA*”), and (iii) Client and Obligors entered into a Business Associate Agreement (“*BAA*”) (such MSA, APA, BAA and AO Agreement, each as amended from time to time in accordance with its terms, are referred to herein as the “*Agreements*”, and individually as an “*Agreement*”). CHS is a wholly owned subsidiary of CTS US, and CTS US is a wholly owned subsidiary of Cognizant and the Agreements form the legal framework for Client’s procurement of services from Obligors.

In consideration of Client entering into the Agreements with Obligors, Guarantors hereby provide Client with this Guaranty.

Guarantors and Client agree as follows:

1. Subject to the terms of this Guaranty, (a) Cognizant hereby guarantees the payment of all sums payable by Obligors to Client under the Agreements as and when the same fall due (the “*Secured Obligations*”), and CTS US hereby guarantees the payment of CHS’s Secured Obligations; and (b) Cognizant shall cause the due and punctual performance and observance by Obligors of all acts and obligations to be performed or observed by Obligors under the Agreements (the “*Obligor Performance Obligations*”), and CTS US shall cause the due and punctual performance and observance by CHS of CHS’s Obligor Performance Obligations. All obligations under this Guaranty that are obligations of both Cognizant and CTS US are joint and several.
2. Except to the extent that Client is prohibited from giving notice as the result of a stay in bankruptcy or as a result of other applicable law, Client (including its successors and assigns) may not claim any amounts pursuant to or under this Guaranty in respect of any Agreement unless Client (including its successors and assigns) gives all notices of breach to the applicable Obligor(s) required pursuant to such Agreement and the applicable period(s) (if any) for Obligors to remedy such breaches(s) have expired. Provided that Client has given any notice required by this Section 2 and applicable time periods have expired, it shall not be necessary or required that Client file suit or proceed to obtain or assert a claim for a judgment directly against Obligors or any other person or entity or make any other effort to require Obligors or any other person or entity to pay or perform as a condition of Guarantors fulfilling their obligations under this Guaranty. Subject to the requirements of the first sentence of this Section 2, this is a Guaranty of payment and performance and not a Guaranty of collection.
3. Client may not recover any loss or expense under this Guaranty which it would not have been able to recover from one of the Obligors under the Agreements except to the extent that Client’s inability to recover is the result of (i) the failure of any of the Agreements to be duly authorized, executed or delivered by Obligors or (ii) the reduction or discharge of any obligations of either of the Obligors in a bankruptcy or other insolvency proceeding. Client is subject to the same burden

- of proof in an action related to this Guaranty as it would have been subject to in an action under the Agreements.
4. Client may request payment of the Secured Obligations under this Guaranty in one or several times, provided that (i) the aggregate amount payable by Guarantors under this Guaranty in respect of any Agreement shall not exceed the value of the sums required to be paid by Obligor under such Agreement, and (ii) there shall be no duplication of sums paid by Obligor under the Agreements and sums paid by Guarantors under this Guaranty. Guarantors' liability under this Guaranty in respect of any Agreement will not exceed Obligor's liability or obligations under such Agreement, and Guarantors are entitled to claim all of the rights, limitations (including the limitation of liability), benefits and defenses of Obligor under the Agreements, which are incorporated herein by this reference, except that Guarantors' liability under this Guaranty may exceed Obligor's liability or obligations under an Agreement, and Guarantors shall not be entitled to claim any of the rights, limitations, benefits and defenses of Obligor, to the extent that Obligor's liability or obligations are reduced or Obligor has any rights, limitations, benefits or defenses resulting from or arising out of (i) the failure of any of the Agreements to be duly authorized, executed or delivered by Obligor or (ii) the reduction or discharge of any obligations of either of the Obligor in a bankruptcy or other insolvency proceeding. The liability of Guarantors under this Guaranty shall be reinstated and revived and the rights of Client shall continue if and to the extent that for any reason any payment by or on behalf of a Guarantor or an Obligor in respect of any obligations is rescinded or must be otherwise restored by Client, whether as a result of any proceedings in bankruptcy or reorganization or otherwise. Guarantors' obligations under the preceding sentence of this Section 4 shall survive termination of this Guaranty.
  5. Client may request Guarantors to cause performance of the Obligor Performance Obligations under this Guaranty at any time and from time to time, and Guarantors are entitled to claim all of the rights, limitations (including the limitation of liability), benefits and defenses of Obligor under the Agreements, which are incorporated herein by this reference, except that Guarantors' liability under this Guaranty may exceed Obligor's liability or obligations under an Agreement, and Guarantors shall not be entitled to claim any of the rights, limitations, benefits and defenses of Obligor to the extent that Obligor's liability or obligations are reduced or Obligor has any rights, limitations, benefits or defenses resulting from or arising out of (i) the failure of any of the Agreements to be duly authorized, executed or delivered or (ii) the reduction or discharge of any obligations of an Obligor in a bankruptcy or other insolvency proceeding.
  6. Except as provided in this Guaranty, this Guaranty is irrevocable, unconditional and absolute. To the extent Guarantors pay a Secured Obligation pursuant to this Guaranty, such payment shall be in satisfaction of Obligor's obligations under the Agreement that gave rise to the Secured Obligation and Guarantors' obligations under this Guaranty with respect to that Secured Obligation.
  7. The obligations, covenants, agreements and duties of Guarantors under this Guaranty shall in no way be affected or impaired by reason of the happening from time to time of any of the following: (i) any permitted assignment or subcontracting of any interests under the Agreements; (ii) to the extent permitted by applicable law, the voluntary or involuntary liquidation, dissolution, insolvency, or bankruptcy affecting a Guarantor or an Obligor or any of their respective assets; or (iii) any merger, acquisition or corporate reorganization involving Guarantors or Obligor. This Guaranty will remain in full force and effect as to any renewal, modification or extension of each of the Agreements consistent with its terms.

8. Guarantors waive (i) any right of subrogation, reimbursement, indemnification, contribution, substitution or any similar right it has against the Obligor (collectively, "**Reimbursement Rights**") until all Secured Obligations and Obligor Performance Obligations are paid and performed in full; (ii) any rights or defenses resulting from any loss, suspension or impairment of any Reimbursement Right; (iii) any rights or defenses against Client resulting from release or waiver of Client's rights against either of the Guarantors or any other guarantor; and (iv) any duty on the part of Client to disclose to Guarantors any facts Client may now or hereafter know about Obligor, regardless of whether Client has reason to believe that any such facts materially increase the risk beyond that which Guarantors intends to assume or has reason to believe that such facts are unknown to Guarantors.
9. Guarantors' liability under this Guaranty will not be discharged automatically or otherwise by any amendment, addendum or variation to an Agreement that is executed in accordance with the terms of such Agreement.
10. Sections 24.3 (Force Majeure), 25.12 (Severability), 26.1 (Informal Dispute Resolution), 27.8 (Covenant of Good Faith), and 27.12 (Mutually Negotiated) of the MSA shall be incorporated herein by reference and apply to this Guaranty.
11. This Guaranty shall remain in force from the date hereof until Obligor's obligations under the Agreements are satisfied or otherwise completely terminated; provided, however, that this Guaranty shall remain in force until Obligor's obligations under the Agreements are satisfied if Obligor's obligations are terminated as a result of rejection, discharge or other termination or reduction in a bankruptcy or other insolvency proceeding.
12. This Guaranty may be modified only by a written amendment executed by duly authorized officers or representatives of each of Guarantors and Client. Neither Guarantors nor Client may assign or otherwise transfer any of its rights, duties or obligations under this Guaranty without the prior written consent of the other parties except that Client may assign its rights under this Guaranty in respect of an Agreement without the consent of Guarantors to the same extent it assigns its rights under such Agreement in accordance with the terms of such Agreement. If any provision of this Guaranty is invalid, illegal or unenforceable in any jurisdiction, the validity, legality and enforceability of the remaining provisions will not in any way be affected or impaired thereby.
13. Except for claims made under this Guaranty against the Guarantors as legal entities, no claim may be made or recourse shall be had under this Guaranty against any direct or indirect, past, present or future, partners, members, shareholders or other direct or indirect holders of ownership interests in Guarantors, whether by virtue of any statute or rule of law, or by assessment or penalty or otherwise. Client expressly and irrevocably waives, by virtue of its acceptance of or reliance upon this Guaranty or its benefits, any such claim or recourse, and any liability otherwise arising therefrom. Nothing in this Section 13 is intended to release either Guarantor from any obligation under this Guaranty because CTS US is a subsidiary of Cognizant.
14. This Guaranty will be governed by and construed in accordance with the laws of the State of New York, without giving effect to the principles thereof relating to the conflicts of laws. The parties hereby irrevocably and unconditionally consent to submit to the exclusive jurisdiction of the courts in the State of New York within the County of New York and of the United States of America located in the Southern District of New York for any actions, suits or proceedings arising out of or relating to this Guaranty and the transactions contemplated hereby.

15. All notices under this Guaranty will be in writing and will be deemed to have been duly given if delivered personally or by commercial overnight delivery, or mailed by registered or certified mail, return receipt requested, postage prepaid, to the parties at the addresses set forth below:

(a) If to Guarantors or either Guarantor:

Attention: General Counsel  
Cognizant Technology Solutions Corporation  
500 Frank W. Burr Boulevard  
Teaneck, New Jersey 07666

(b) If to Client:

Attention: General Counsel  
Health Net, Inc.  
21650 Oxnard Street  
Woodland Hills, CA 91367

All notices under this Guaranty that are addressed as provided in this Section, (i) if delivered personally or by commercial overnight delivery, will be deemed given upon delivery, or (ii) if delivered by mail, will be deemed given on the fifth (5th) business day after the day it is deposited in a regular depository of the United States mail. Either Guarantors or Client from time to time may change its address or designee for notification purposes by giving the other parties notice of the new address or designee and the date upon which such change will become effective.

Guarantors and Client are signing this Guaranty on the date stated in the introductory clause.

**SCHEDULE X  
IN-FLIGHT AND ACCELERATED PROJECTS**

**SCHEDULE X**  
**IN-FLIGHT AND ACCELERATED PROJECTS**

**1. IN-FLIGHT AND ACCELERATED PROJECTS**

- (a) **“In-Flight Project”** means a project listed in Schedule X-1 (*In-Flight Project List*).
- (b) **“Accelerated Project”** means a project listed in Schedule X-2 (*Accelerated Project List*).

**2. PERFORMANCE AND COMPLETION OF IN-FLIGHT PROJECTS**

If Supplier is at fault for failing to complete an In-Flight Project by the applicable implementation date identified in Schedule X-1 (*In-Flight Project List*), the provisions of Section 13.7 (*Completion of Transition Projects*) of the Terms and Conditions will apply. The following conditions will apply to In-Flight Projects

- In-Flight Projects contain identification of BPaaS and Non-BPaaS IT Projects.
- All resources assigned to In-Flight Projects will continue through implementation of the currently defined scope.
- For projects which involve IBM oversight, only the PM/Oversight work is part of in-flight scope. All IBM work will be paid based on current terms.
- For any changes to the in-flight project due to a Health Net requested schedule/ scope change on the agreed X-1, will be handled as AO until the BPaaS commencement date and transitions to the Phase-2 pool allocation after the BPaaS commencement date.
- For any new projects which are not included on the list, will be paid out of AO before the BPaaS commencement date and will transition to the Phase-2 Project governance model.

An updated COFR has been developed to contractually support this. There has been a pending document and taking steps to begin discussions with PPOs. Strategy is to have PPOs to agree to a global rate of 5% to have an operational and fully pay change for ESRD-DRG members. Currently the system is not capable of calculating and producing automated cap payments to support the various CA and AZ regions. The manual work would require manual coding for three years from the original effective date and significant manual entry of maintenance, modification and handling. Potential impact to 51 participating PPOs and would not be sustainable as a manual workload. Maximum savings for this particular initiative was \$3.8M in 2013, \$15.4M in 2014 and \$17.6M in 2015. Infrastructure	Earl Kuehner	Active	Conditional Approval	Parent	18176	18176	18176 18176	SPaid	In-Flight - No WO			3 sub PPOs completed and moved to sub PPO on half pending calculation		18176 18176 - Migrates Flat Server Jobs and Data to F	Server PSA-FIDAPPS and FIDATAPPS are located at the Chatsworth Print Facility, and have several PSA/DOE applications including FlatServer. Servers has reduced the space. These systems have been running out of disk space, which is impacting Production operations. The existing storage array supporting the two PSA servers in Chatsworth is a SCSI-attached Sun Storage 3108. The array cannot support further expansion for the following reasons: The array cannot be expanded beyond the existing capacity of 24 x 150GB drives (only 14 years old, and Oracle will be terminating support for these servers with effect from December 2012). The hardware expansion needs to be located on a server in close proximity to the primary in Chatsworth, which prevents the systems from being migrated out of the Chatsworth Print Facility to a redundant data center. The removal of the server running the PSA systems is only supported on Solaris 8, and therefore an upgrade is not possible.	Light On	Unassigned			1484

PREP	Service Delivery	Burt Kearney	Active	Approved	Single	18066	18066	18066 18066	ISM	In-Flight - No WO					18066 18066 - ASB Zip Code, County & Address Based	Background: There have been several issues identified with the way address and zip code information is currently stored and processed in ASB. As a result of different methods that have been implemented in the last couple of years, there is the urgent need to address these issues as they result in non-compliance and potential privacy breaches. ASB currently has a system limitation that only allows one zip code to be used for one county. There are multiple scenarios where one zip code is used to serve three or more counties, otherwise known as cross-over zip. In ASB, we follow the county with the highest member population. It is determined to be the default county in the zip code table. The issue with this system limitation is there are members located in ASB whose address of record does not reflect their "true" county of residence and therefore are in the wrong county. There are two projects being submitted to correct the above stated issue. This project will be to support ASB changes that will have no downstream impact. 1. Result in erroneous enrollment, appropriate denial of enrollment or disenrollment. There have been 2-3 CMS Write-Ups in the last 2 years that are to cross-over zip code tables. 2. Post Enrollment ID and ANOC mappings are based on a member's Group and Residence County. Having to vary county in ASB could result in erroneous benefit information sent to the member. 3. Incorrect or missing bill mailing address mapping for both ANOC's & PEC result in member records being dropped into the Error Work Basket in the Information Management System (IMS). This error may require manual research by multiple teams to correct the problem and possibly trigger the PEC of ANOC. This complexity in the daily work results in not meeting CMS turn-around guidelines. 4. Single incorrect PEC sends additional costs (e.g. material, postage, different units, etc.) 5. Increases Call Center volume. 6. Results in additional group set-up specific to cross-over group. Implementing the ability to allow a zip code to have multiple counties will eliminate approximately 100 groups. 7. Results in the Enrollment Eligibility team contacting the BAC (Business Analyst Support) team to request a zip code be temporarily reaped to add a "cross-over" county to allow the enrollment representative to add the member to a specific group. This is not the process. In an Eligibility representative to allow the member's record in the future, that request will automatically change the county back to the original default county for that zip code. In addition, there are several different ASB/CA Enrollment address and county use cases that will be fixed in this project as they will address these use cases. Issues in this project are: 1. 18066 18066 - Business County Landfill Issue	Confirmed Compliance	Compliance - Business	Approved by EPCO	5/1/2015	1582

PRET	Unassigned	Bar Keeney	Active	Approved	Parent	1905	1905	1905	1905	1905		1905-1905 E-1905 1905 COO_WO_V er 1.1			1905 1905 - Medicare Open Enrollment (ACEP) 2015	Medicare Annual Enrollment (consists of numerous components in three separate parts) is a process that spans the period of May through December. In the past, these efforts have been grouped together because it is managed by a single project manager with oversight of a number of groupings of smaller efforts that have previously been identified as major enhancements. This brief requests that the AEP oversight structure be established to have management and oversight of the systems and production process changes and efforts needed to address Medicare Products and operational needs for the 2015 AEP period. It also requests that web-oriented changes, which have some of the highest lead time needs, be identified, assessed, and prioritized for work by the WCOE and web production support teams as applicable. The brief also specifically asks for the actions on the part of teams to perform the system modifications needed for AEP in the production support efforts for product support to be added to the release calendar. For more details, refer to the attached (ACEP) production of brochures, ID Cards, and Letters which require change based on Health Risk and CMS requirements. Some of the need for this project includes in addition to compliance requirements, but most portions are driven by the business need. As such they will not be submitted as a compliance effort. REF1	ERCO	Bart Kearny	Active	Approved	Single	18226	18226	18226 18226	SP&E	In-Fight - No WO					18226 18226 - Misc 202 CY 2015 Fee Rate Brake	Currently, Health Net utilizes a first pay process whereby under commission payments are sent shortly after receipt of the enrollment application year-round. For the CY2015 Rate Rule, CMS has changed the timing of payments during the Annual Enrollment Period (AEP), which requires that payments may not be made until January 1 of the enrollment year and must be paid in full by the end of 31 of the enrollment year. This will reduce the number of payments that need to be re-processed based on changes made during AEP. Currently, the provider's reporting timeline is that the returned payment equal 50% of the Full Market Value (FMV) for the year the member enrolled in the plan. Beginning in 2015, CMS has changed it to where the returned payment is up to 50% of the FMV for the current enrollment year. MA organizations and PAID sponsors may decide the duration of their contract with agents, number of applicable months, and the actual rate for renewal for each year. Subject to the limits in the Rate Rule.	Committed Compliance					
REF1	Infrastructure	Bart Kearny	Active	Approved	Single	18227	18227	18227 18227	RM	In-Fight - No WO					18227 18227 - Expand ERIT Miss Tracking, Case M	Each Enterprise Incident Response (ERIT) team has specific requirements and processes that their unique processes must meet. In order to make this an efficient as possible, a critical goal of this project is to meet all of these requirements should be established. This critical goal of this project needs to be highly configurable in order to meet the unique demands of the various ERIT teams. Teams who already have the ability to report in the reporting process. Any tool or capability must also provide several key features for incident tracking, correlation and reporting. A central intake center or process will not eliminate incident reporting through other channels, such as direct phone calls or email, so the process must be able to handle these exceptions.	Performance Improvement					
REF1	Infrastructure	Bart Kearny	Active	Approved	Single	18228	18228	18228 18228	RM	In-Fight - No WO					18228 18228 - Replace Vulnerability Scanning Tools	Health Net's current vulnerability scanning solution has several technical weaknesses that are not able to be addressed by enhancing/patching the existing product/option. The current vulnerability scanning tool has the following weaknesses: - has an out of date vulnerability database, unable to scan for the latest threats - is unable to scan SOC Security Technical Implementation Guide (STIG) and Center for Internet Security (CIS) compliance scans for configuration management across the environment. - It's reporting capabilities require a considerable amount of manual effort to reflect an accurate system inventory to scan - It's threat scan lists require a considerable amount of manual effort to reflect an accurate system inventory to scan - It's current solution does not provide for a scalable policy compliance, web application scanning, and database scanning. Therefore, this project is to implement a new vulnerability scanning tool to address these weaknesses.	Performance Improvement					
REF1	Service Delivery	Bart Kearny	On Hold	Not Approved	Single	18231	18231	18231 18231	SP&E	In-Fight - No WO					18231 18231 - Obsolete: Architecture Act A-Quad	Currently, Act A-Quad is in the process of being decommissioned. Architecture when claim is made to be forwarded to A-Quad for processing and to be denied for that contract benefit.	Committed Compliance					
REF1	Infrastructure	Bart Kearny	Active	Approved	Single	18236	18236	18236 18236	RM	In-Fight - No WO					18236 18236 - Patch Enterprise Desktops	Health Net currently has a backlog of missing patches. These missing patches need to be applied to the entire Enterprise Desktop environment. Deploying software patches for updates is essential to securing business critical systems, protecting sensitive company information, meeting government compliance and security best practices. Security updates from vendors for workstations must be prioritized for testing and deployment in order to achieve a secure enterprise.	Light On

**SCHEDULE Y**  
**OFFSHORE PROHIBITIONS AND REQUIREMENTS**

**SCHEDULE Y****OFFSHORE PROHIBITIONS AND REQUIREMENTS****1. GENERAL**

- (a) This Schedule Y (*Offshore Prohibitions and Requirements*) contains prohibitions and requirements regarding the provision of Services from Offshore which are in addition to those provisions set forth elsewhere in the Agreement, including:
- (i) Section 4.3(d) (*Regulatory and Customer Approvals*) of the Terms and Conditions regarding restrictions on Offshoring arising out of Health Net's contracts for federal business;
  - (ii) Section 5.2 (*Place of Performance*) of the Terms and Conditions regarding the Services that may be provided from certain Offshore Supplier Facilities;
  - (iii) Section 14.3(d) (*Data Security*) of the Terms and Conditions regarding storing and accessing of Health Net Data from Offshore;
  - (iv) The provisions in Schedule C (*Charges*) regarding the Onshore / Offshore ratio; and
  - (v) Any provisions in the Statements of Work that place restrictions on the location of the Services, including the terms in Statement of Work # 3 (*Contact Center Services*) regarding the location from where Supplier may make or answer Voice Calls.

**2. DEFINED TERMS**

- (a) "**Offshore**" (whether or not capitalized) means any location outside the fifty (50) United States of America and its territories and possessions.
- (b) "**Onshore**" (whether or not capitalized) means any location within the fifty (50) United States of America and its territories and possessions.
- (c) "**Transition and Implementation Costs**" means any non-recurring costs associated with implementing and standing up the transitioned service(s) in a new location that are incurred prior to a new facility beginning live production. Some examples of Implementation Costs include initial staffing, initial recruiting, training and time spent in training, identifying and readying the new facility for production, networking costs, infrastructure costs, etc.
- (d) "**Voice Calls**" means all inbound or outbound calls received or made by Supplier as part of the Services.
- (e) "**Voice Call Service Levels**" means the question in the Customer Satisfaction Service Level in Statement of Work #3 (Contact Center Services) Exhibit B-1 (*Contact Center Operational Service Levels*) that asks customers "Are you satisfied with the service provided by the associate who assisted you today?" or such similar question(s) as the satisfaction survey may be modified during the Term.

### 3. PROHIBITED AND RESTRICTED OFFSHORE SERVICES

#### 3.1 Offshoring Prohibitions

\*\*\*

- (a) \*\*\*
- (b) Supplier agrees that Supplier's provision of the Services during the Term will remain in compliance with such Offshoring Prohibitions, including by performing all monitoring, support and other Services (with the exception of production support and systems maintenance) used to support Offshore Restricted Entities from Supplier Facilities in the United States.
- (c) If Health Net desires to (i) add a new Exiting Offshore Restricted Entity, or (ii) modify the list of entities set forth in Section 3.1(a), then such modifications shall be changed via the Change Control Process, provided that the Parties agree that the pricing impacts associated with such changes shall be subject to Section 8.4 (*Change in Onshore / Offshore Requirements*) of Schedule C (*Charges*).

#### 3.2 Offshore Voice Call Restrictions

- (a) As of the Effective Date, Health Net has Offshoring Prohibitions in place for all Voice Calls regardless of the Tower or caller (e.g., Members, Providers, Employer Groups, Brokers or Regulatory Agencies). Supplier will originate and answer all Voice Calls from the United States, Mexico and the Philippines ("*Approved Voice Countries*"). Supplier will only support Spanish language calls during business hours from Mexico or the United States, after business hours support of Spanish language calls may be handled from the Philippines if Supplier uses a translation service. Supplier's provision of the Services during the Term will remain in compliance with the Voice Call restrictions set forth in this Section 3.2(a).
- (b) Supplier may propose alternative Approved Voice Countries during the Term, but Health Net reserves the right in its sole discretion to approve or reject such locations before inbound and outbound call support may commence in the proposed country.
- (c) Additionally, if at any time during the Term Supplier fails to meet the same Voice Call Service Levels in any Approved Voice Country four times in a rolling six month period for the same root cause failure, Supplier will upon Health Net's request be required with 120 days' notice to move the specific voice operations at issue to a different location to be mutually agreed upon by the Parties. Supplier will be responsible for all Transition and Implementation Costs associated with moving and implementing the affected Services to the new location. The Parties will work through the Change Control Process to develop a transition plan for transitioning the affected services that includes transition gates and addresses the potential impact on service levels during such transition. To the extent the move results in a change to the cost for Supplier of providing the fully transitioned and steady state Services in the new location, the parties will equitably adjust the PMPM Charges through the Change Control Process to account the difference in such steady state costs.

**4. PRIVACY AND SECURITY CONTROLS**

- (a) Supplier will not store or transmit any Health Net Data Offshore. Supplier will only access Health Net Data from Offshore locations approved in accordance with Section 5.2 (*Place of Performance*) of the Terms and Conditions.
- (b) Supplier Personnel will not be permitted to access Health Net Data from, or transmit it to, offshore locations except in compliance with Health Net's privacy and security standards, policies, and requirements, as set forth in the Terms and Conditions, and applicable Laws, including those relating to privacy, import-export controls, and information and data protection and security.
- (c) Supplier acknowledges that Health Net may establish additional special privacy and security requirements and controls for Offshore Supplier Facilities based on the specific Functions that will be performed Offshore and the types of Health Net Data that will be disclosed to Supplier Personnel working there.

**5. GOVERNMENTAL FILINGS, AUTHORIZATIONS AND DISCLOSURES**

- (a) If the government of any country in which a Supplier Facility is located requires a copy of the Agreement or any Statement of Work (or other document) to be filed, Supplier will be responsible for making the required filing in a timely manner, at Supplier's expense (including payment of any applicable stamp taxes or other charges).
- (b) Supplier will be responsible for, and will bear all costs and expenses associated with, obtaining and maintaining all necessary governmental permissions and authorizations required to perform the Services in the designated locations and otherwise comply with the Agreement, including passports, visas, work permits and other immigration and customs documents. At Supplier's reasonable request, Health Net will provide Supplier with such information, attestations and other assistance as Health Net may deem appropriate to provide in connection with Supplier applying for and obtaining such governmental authorizations. If and when required by applicable Law, Supplier will identify to Health Net the visa / immigration status of Supplier Personnel who are not U.S. citizens in connection with their performance of Services in the U.S.
- (c) Notwithstanding any other provision of the Agreement to the contrary, either Party may disclose the terms of this Schedule Y to relevant government entities, outside counsel or auditors for the purpose of complying (or demonstrating compliance) with applicable Laws, which may include reporting any anti-corruption violations to U.S. or other government officials.

## SCHEDULE Z

### TRANSITION

#### 1. INTRODUCTION

This Schedule Z (Transition) provides a consolidated overview of Supplier's approach to the Transition, from Health Net (or the incumbent provider, when not Health Net) to Supplier, of the BPaaS and Non-BPaaS IT Services (and associated personnel, processes, delivery systems and infrastructure) across all Service Towers comprising the Initial SOWs, including the migration of all Functions comprising the BPaaS Services and the Non-BPaaS IT Services from the current 'as-is' delivery model to Supplier's planned 'to-be' onshore/offshore delivery model. Unless expressly stated otherwise, the provisions of this Schedule Z shall apply (and be interpreted to apply) to all Transition activities under or pursuant to the Agreement, whether carried out or to be carried out by Supplier or a Subcontractor.

This Schedule Z (Transition) reflects high-level 'indicative' (preliminary) Transition plans - they are not yet developed at this stage with an actionable level of planning or detail. During Phase 1, which runs from the date of execution of the Agreement until the beginning of Phase 2 - at which time Health Net's Transitioned Employees will transfer to the employment of Supplier (or its Approved Subcontractor) and the Transition will commence - Supplier will plan and develop in close collaboration with Health Net (and in accordance with Section 13.3 (Transition Documents) of the Terms and Conditions) actionable (detailed) Transition Documents, which will be subject to Health Net's prior written approval. Upon their approval by Health Net, they will supersede and replace their respective counterparts in this Schedule Z (Transition). The actionable Transition Documents (which are Critical Deliverables for Phase 1) will include, as critical components, clear definitions of the waves, stages, and discrete work streams that will comprise the Transition for each Initial SOW and a delineation of the Transition Deliverables and Transition Milestones, and their respective Acceptance Criteria, that will be used to determine, at logical stages of each Transition, whether progress has been sufficient to warrant proceeding to the next stage, whether there are any corrective actions that must or should be taken before proceeding to the next stage or with other Transition activities, and what lessons (if any) were learned from the current stage that should be applied to subsequent stages and the Transitions under other SOWs in order to minimize the recurrence of problems or other undesirable outcomes. Schedule Z-1 (Acceptance of Transition Deliverables and Milestones) details the process by which Health Net will determine whether the Acceptance Criteria for each Transition Deliverable and Transition Milestone have been met.

#### 2. DEFINITIONS

The following terms, when used in this Schedule Z (Transition), will have the meanings given them below unless otherwise specified or required by the context in which the term is used. Capitalized terms not defined herein shall have the meanings given them elsewhere in the Agreement.

Defined Term	Meaning
<b>Acceptance</b>	In the context of the Transition, a written communication that Health Net has accepted either (i) a Transition Deliverable as having been properly completed and delivered in conformance with its requirements and specifications, or (ii) a Transition Milestone as having been fully accomplished. See also <u>Schedule Z-1 (Acceptance Procedures for Transition Deliverables and Transition Milestones)</u> , which details the

<b>Defined Term</b>	<b>Meaning</b>
	process by which Acceptance shall be determined.
<b>Acceptance Criteria</b>	In the context of the Transition, the criteria jointly developed by Health Net and Supplier Transition teams that will be used to determine whether and when (i) a Transition Deliverable has been properly completed and delivered in conformance with its requirements and specifications or, alternatively, (ii) a Transition Milestone has been fully accomplished.
<b>Initial SOW Transition</b>	Has the meaning given in Section 13.2(b) of the Terms and Conditions.
<b>Knowledge Transfer</b>	The process and activities necessary to document and transfer knowledge and relevant subject matter expertise from one individual to one or more other individuals who are intended to assume responsibility for the Functions performed by the incumbent from whom the knowledge is to be transferred.
<b>Personnel Group</b>	A group of Supplier Personnel that is reflected in the onshore/offshore ramp plan and is assigned responsibility for certain Transition Deliverables and Transition Milestones.
<b>Phase 1</b>	The period from the Effective Date of the Agreement until the BPaaS Services Commencement Date, and all activities that occur under or pursuant to the Agreement during that period.
<b>Phase 2 (sometimes also referred to as the “Transition Period”)</b>	The period from the BPaaS Services Commencement Date until the completion of all of the Initial SOW Transitions - which is currently expected to be approximately a 24-month period - and all activities that occur under or pursuant to the Agreement during that period.
<b>Phase 3</b>	The period of ‘steady state’ performance of the Services - which commences upon the successful completion of the Transition and runs through the end of the Term - and all activities that occur under or pursuant to the Agreement during that period.
<b>Ramp Up</b>	The period of time from when a Supplier associate completes process training to the time when it has been confirmed through quality assurance monitoring of the associate’s performance of his or her assigned job functions for a reasonable period of time that the associate is able to perform his or her job functions without external intervention in accordance with the requirements of the Agreement, including applicable Service Levels and productivity standards.
<b>Transition</b>	Has the meaning given in Section 13.2 (“Transition” Defined)

Defined Term	Meaning
	of the Terms and Conditions.
<b>Transition Deliverables</b>	Deliverables to be prepared as part of the Transition.
<b>Transition Documents</b>	Has the meaning given in Section 13.3 (Transition Changes) of the Terms and Conditions.
<b>Transition Management Office (TMO)</b>	The roles and personnel who will manage and oversee the conduct of the Transition.
<b>Transition Milestones</b>	Checkpoint gates that will be used to determine, at logical stages of each SOW-level Transition, whether progress has been sufficient to warrant proceeding to the next stage, whether there are any corrective actions that must or should be taken before proceeding to the next stage and what lessons (if any) were learned from the current stage that should be applied to subsequent stages and the Transitions under other SOWs in order to minimize the recurrence of problems or other undesirable outcomes.
<b>Transition Period (sometimes also referred to as “Phase 2”)</b>	The period from the BPaaS Services Commencement Date until the completion of all of the Initial SOW Transitions - which is currently expected to be approximately a 24-month period - and all activities that occur under or pursuant to the Agreement during that period.
<b>Transition Program Manager</b>	An individual appointed by Supplier who has overall responsibility for the Transition and who, as such, is responsible for overseeing all day-to-day strategic Transition activities by Tower and also for keeping apprised of Transition operations to provide feedback back to key stakeholders.
<b>Transitioned Employees</b>	Has the meaning given in <u>Schedule E</u> ( <i>Transitioned Employees</i> ).

### 3. OVERVIEW OF THE TRANSITION

#### 3.1 POINT OF DEPARTURE - HEALTH NET'S 'AS-IS' DELIVERY MODEL

A summary of each of the service Towers is provided below:

1. **Claims Management Services** – The Claims Management Services are the Functions associated with the review, editing, validation and processing of a Claim from receipt through settlement for all geographies and lines of business. . Additional functions include Claims Audit, Recovery, Provider Dispute Resolution (excluding clinical review, which will be retained by Health Net) and Reporting.

2. **Membership & Configuration Services** - The Membership Services are the Functions associated with the provision of Group Setup Services, Group Maintenance, Renewal & Termination Services, Enrollment Services, Accounts Receivable Services, Financial Reporting Services, Finance Operations Services, Broker Commissions Services, Sales Incentives Services, Cash Unit Services, Collections Services, Reporting Services, Miscellaneous Membership Services, Audit Support Services, and Medicare OEV Outbound Calls Services and other membership-related services for all geographies and lines of business.

The Configuration Services are the Functions associated with the provision of Configuration, Provider Data Management, and Capitation Functions for all geographies and lines of business.

3. **Appeals and Grievances Services** - The Appeals and Grievances (A&G) Services are the Functions associated with the intake, processing, resolution and archiving of Appeals and Grievances received from Members or their representatives through all Channels for all regions and Lines of Business. The A&G Services do not include medical decision-making.

4. **Medical Management Services** - The Medical Management Services are the Functions performed by the non-clinical intake and production teams consisting of the Prior Authorization unit, Hospital Notification unit, Post Service Review unit and Concurrent Review unit. The Medical Management Services do not include medical decision-making.

5. **Quality Assurance Services** - The Quality Assurance (QA) Services are the Functions associated with the post transaction auditing and reporting of finalized accuracy results (including the resolution of error disputes) for Claims, Membership, Appeals & Grievances, Configuration, and Contact Center work for all geographies and lines of business.

6. **Contact Center Services** – The Contact Center Services are the Functions associated with the intake, routing, and tracking of inquiries and requests received from Members, Providers, Brokers, Employer Groups and Sales through all Channels for all Regions and Lines of Business.

7. **IT and ITIS** – The IT and ITIS services are the Functions associated with Production Support Management, Change Management, IT Currency/Capacity Management, Production Support Analyst, IBM Oversight, Physical/System/ Enterprise Security, Compliance / Risk Management, Federal Systems, Corporate Systems, IT 3rd party contract management, IT Finance – Portfolio/Spend management, Web, Mobile, Content management, Developers, System Analysts, IT Architect, QA, UAT Support, and Release Management.

The table below provides an overview of delivery locations for Health Net’s current (As Is) operating model, as well as the current providers of the respective Functions.

**3.2 POINT OF ARRIVAL - SUPPLIER’S ‘TO-BE’ DELIVERY MODEL**

Supplier and Health Net have agreed that Supplier will utilize a ‘Business Process-as-a-Service’ (BPaaS) delivery model for the BPaaS Services. The BPaaS model is a fully integrated vertical service model, in which Supplier is responsible for delivering agreed business outcomes, and in the process of doing so providing all the associated resource and service layers that support Health Net’s business, which include IT infrastructure, tools, labor, applications development, maintenance & support, and performance of the associated business operations.

Supplier’s point of arrival will be built on the following foundational aspects:

- **Quality Focus** – Supplier’s primary focus is to maintain continuity of services and operations while ensuring regulatory and contractual compliance.
- **Support Ratio** – To enable focused monitoring and feedback, Supplier’s delivery model provides personnel for supervision and Quality Assurance.
- **Continuous Improvement** - Supplier will appoint dedicated “Six Sigma” process improvement resources during the Term to identify sustainable improvement opportunities.
- **Knowledge Capture & Retention** – Supplier will deploy staff (existing and hired) with previous healthcare experience for key functions, including Operations, Transition, Training, Quality and Compliance, who will create and/or update the Policy and Procedure Manual and training documents to enable knowledge capture and retention.

Supplier has considered the following criteria to define its delivery location strategy:

2. **Membership & Configuration Services** - The Membership Services are the Functions associated with the provision of Group Setup Services, Group Maintenance, Renewal & Termination Services, Enrollment Services, Accounts Receivable Services, Financial Reporting Services, Finance Operations Services, Broker Commissions Services, Sales Incentives Services, Cash Unit Services, Collections Services, Reporting Services, Miscellaneous Membership Services, Audit Support Services, and Medicare OEV Outbound Calls Services and other membership-related services for all geographies and lines of business.

The Configuration Services are the Functions associated with the provision of Configuration, Provider Data Management, and Capitation Functions for all geographies and lines of business.

3. **Appeals and Grievances Services** - The Appeals and Grievances (A&G) Services are the Functions associated with the intake, processing, resolution and archiving of Appeals and Grievances received from Members or their representatives through all Channels for all regions and Lines of Business. The A&G Services do not include medical decision-making.

4. **Medical Management Services** - The Medical Management Services are the Functions performed by the non-clinical intake and production teams consisting of the Prior Authorization unit, Hospital Notification unit, Post Service Review unit and Concurrent Review unit. The Medical Management Services do not include medical decision-making.

5. **Quality Assurance Services** - The Quality Assurance (QA) Services are the Functions associated with the post transaction auditing and reporting of finalized accuracy results (including the resolution of error disputes) for Claims, Membership, Appeals & Grievances, Configuration, and Contact Center work for all geographies and lines of business.

6. **Contact Center Services** – The Contact Center Services are the Functions associated with the intake, routing, and tracking of inquiries and requests received from Members, Providers, Brokers, Employer Groups and Sales through all Channels for all Regions and Lines of Business.

7. **IT and ITIS** – The IT and ITIS services are the Functions associated with Production Support Management, Change Management, IT Currency/Capacity Management, Production Support Analyst, IBM Oversight, Physical/System/ Enterprise Security, Compliance / Risk Management, Federal Systems, Corporate Systems, IT 3rd party contract management, IT Finance – Portfolio/Spend management, Web, Mobile, Content management, Developers, System Analysts, IT Architect, QA, UAT Support, and Release Management.

The table below provides an overview of delivery locations for Health Net's current (As Is) operating model, as well as the current providers of the respective Functions.

- Regulatory requirements
- Skills availability
- Processes requiring voice support will be delivered out of US and/or Philippines and/or Mexico

This section provides an overview of the geographical spread and the Service Delivery Centers Supplier will use to provide the Services, including Operations, Contact Center Services, IT, and ITIS. The ‘To be’ delivery model has been determined based on multiple parameters such as availability of talent pool, skill requirements, Regulatory limitations, business continuity, and on-shore requirements. All Operations and IT related Functions will be performed by Supplier, while the Contact Center Services will be provided by a Supplier Affiliate. Supplier will be overall accountable and responsible for all of the Services.

**3.3 HIGH-LEVEL VIEW OF THE TRANSITION**

This section provides an overview of Transition during Phases 1 and 2. The principal objectives during these phases are to understand the “As Is” operating model, and to design and implement the “To Be” operating model. Phase 1 of Transition encompasses the following stages: Transition Readiness, Process Assessment & Transition Planning and Knowledge Management, and Phase 2 of Transition encompasses Re-badging, Offshore Knowledge Transfer and Offshore Ramp Up.

The Phase 1 aspects of Transition encompasses the following stages and activities, which are described further in Section 3.7 (Transition Stages) below:

Transition Stage	Activities
------------------	------------

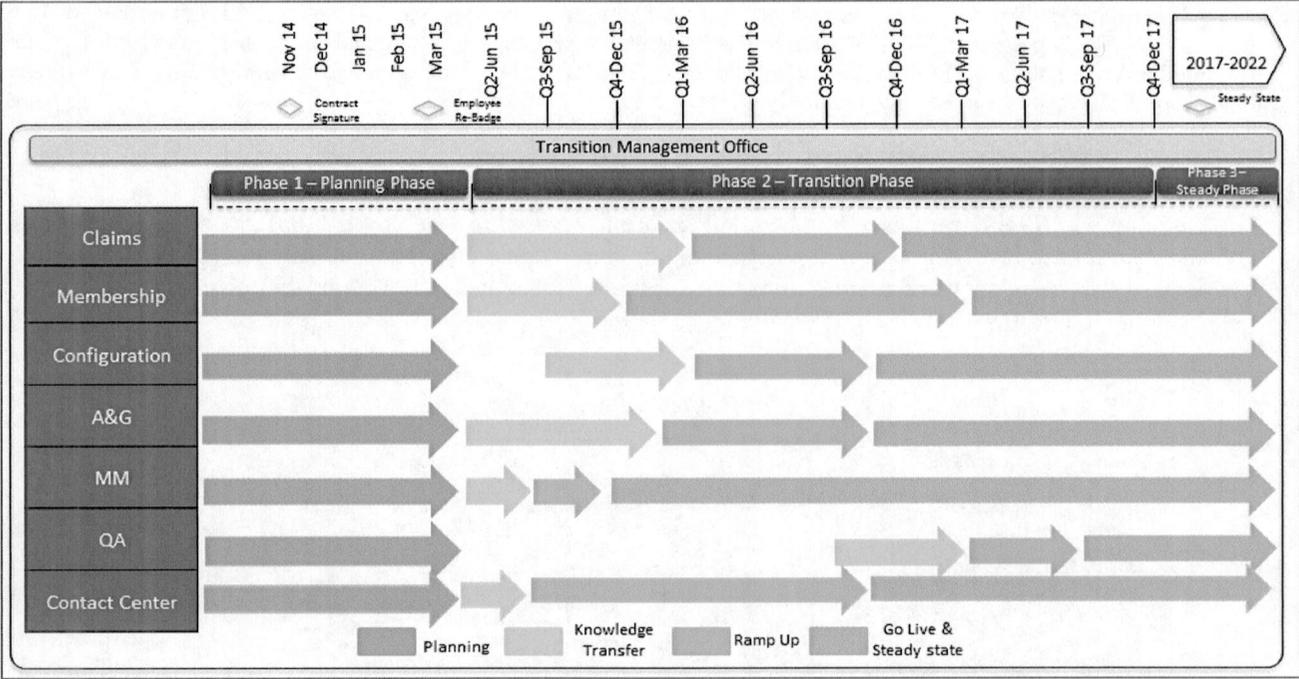

Transition Readiness	<ul style="list-style-type: none"> <li>• Define Project objectives and goals</li> <li>• Agreement on Project timelines, dependencies and deliverables</li> <li>• Agreement on Roles and Responsibilities</li> <li>• Setting up a Transition Management office</li> <li>• Transition kick off meeting</li> <li>• Agreement of Communication, Escalation and program governance routines</li> </ul>
Process Assessment and Transition Planning	<ul style="list-style-type: none"> <li>• Validation of Processes and Roles to be offshored</li> <li>• Agreement on sequence of processes to be offshored</li> <li>• Readiness assessment for processes to Transitioned offshore</li> <li>• Assessment of as-is status of process and training documentation, and re-source availability</li> <li>• Design to-be process flow for Phase 2 with defined hand-offs and dependencies between Supplier and Health Net</li> <li>• Detailed Transition Plan</li> </ul>
Knowledge management	<ul style="list-style-type: none"> <li>• Update process documentation for Training, P&amp;P's and desktop procedures</li> <li>• Agreement on Phase 2 process flow and hand offs</li> <li>• Validate Transition plan training timelines and ramp period</li> <li>• Sign off on any updated Training, P&amp;P and desktop procedure documents</li> </ul>

The Phase 2 aspects of Transition encompass the following stages and activities, which are described further in Section 3.7 (Transition Stages) below:

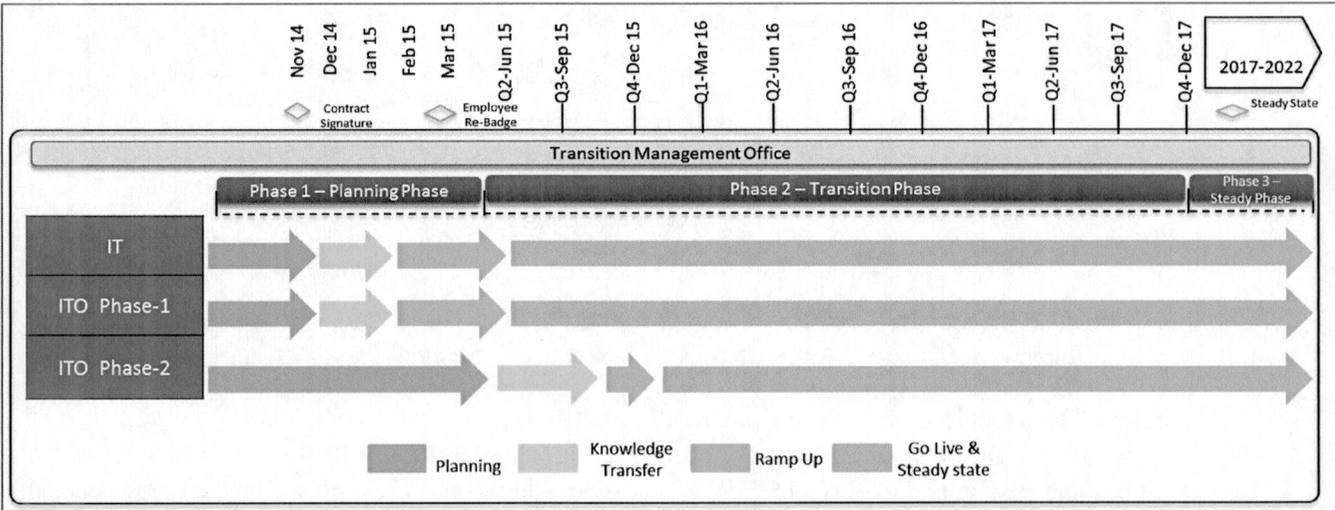

Transition Stage	Activities
Re-badging	<ul style="list-style-type: none"> <li>• Deployment of specialist senior HR resource with extensive knowledge and prior experience in matters relating rebadging</li> <li>• Address employee change concerns and in providing rebadged employees with an embracing work environment</li> <li>• Identification of relevant roles in the Supplier hierarchy and rolling out offer letters</li> </ul>
Offshore Knowledge Transfer	<ul style="list-style-type: none"> <li>• Process training of Supplier's offshore staff</li> </ul>
Offshore Ramp Up	<ul style="list-style-type: none"> <li>• Increase in volume of work processed by the Supplier's offshore team as per the Ramp Up plan</li> </ul>

A pictorial representation (as below) provides a high level overview of the Transition (Phase 1 and 2) cutting across Operations, Contact Center Services, IT and ITIS.

**Operations and Contact Center Services:**

**IT and ITIS:**

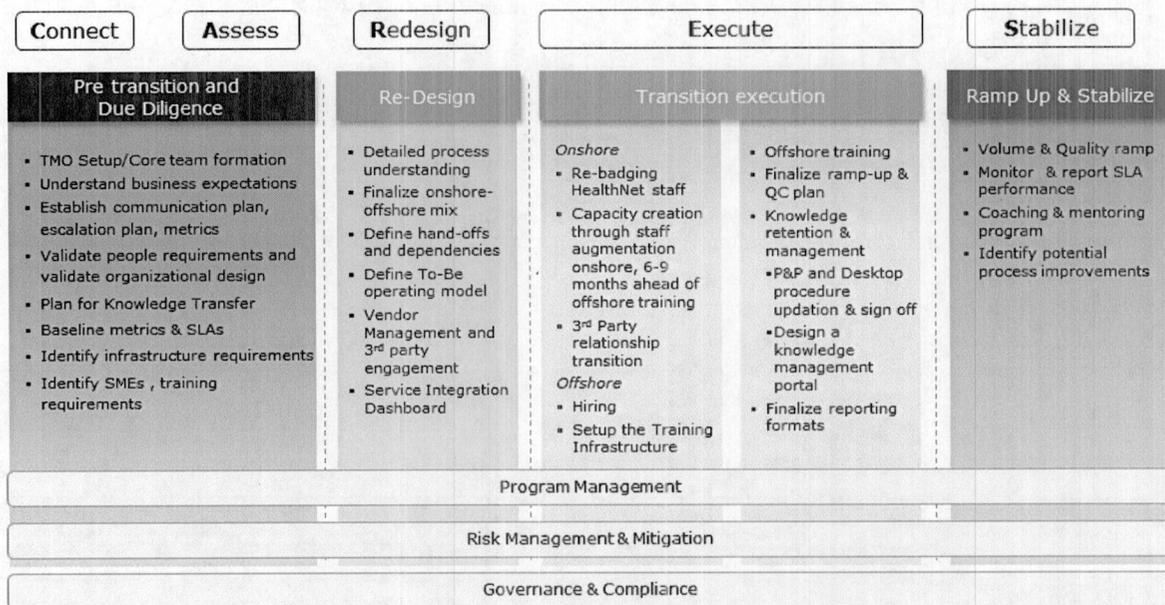

### 3.4 TRANSITION APPROACH

With reference to Supplier’s proposed delivery Solution for each of the Initial SOWs, as described in Exhibit A-2 of each Initial SOW, and considering the sensitivity associated with transfer of employees, the Transition of Services and people needs to be viewed as a comprehensive and end-to-end seamless undertaking of activities across Supplier and Health Net, and not simply as an isolated list of activities that Supplier will perform. The Transition will be carried out using Supplier’s CARES Transition framework - a proven, risk-mitigated and robust project management model that is aptly suited to provide the structure, discipline and governance required to successfully implement the proposed Transition on the scale required for Health Net.

### 3.5 TRANSITION FRAMEWORK

Supplier’s CARES transition framework has been successfully deployed for large-scale Transitions, including those involving large-scale rebadging of employees, and is continuously upgraded from various learnings, experiences and market relevant expectations. The key elements of the methodology that will be deployed for this Transition are as illustrated in Figure 1.

Figure 1

The following paragraphs describe the activities that will occur during each phase of the CARES transition framework (Connect, Assess, Redesign, Execute and Stabilize):

**Connect:** During the Connect stage, which will occur during Phase 1, Supplier will engage with Health Net to conduct Due Diligence and define the Transition program milestones, resource requirements, timelines and key deliverables, including an indicative Transition project plan. For the purposes of this program, the CARES Connect phase is a pre-Transition stage , during which Supplier will conduct due diligence of Health Net operations and Transition Readiness activities as described in this Schedule Z (Transition).

**Assess:** During the Assess stage, which will occur during Phase 1, Supplier will conduct meetings with key Health Net operational leaders, review team profiles, and identify training requirements and other operational nuances. Supplier will conduct focused group discussions with Health Net's process owner(s) to identify specific requirements regarding compliance, security and data privacy factors and policies. In context to this Transition, the activities and outcomes as described in Section 3.7 (Transition Stages) below will comprise the CARES Assess phase.

**Redesign:** During the Redesign stage, which will occur during Phase 1, Supplier will develop the blueprint and configure the 'To-Be' Services operating environment. Supplier will analyze every aspect of the Services delivery (People, Process, Quality Assurance, Service Levels, Training, and Technology) and design the process flows necessary to perform the Services. In context to this Transition, the outcomes described in Section 3.7 (Transition Stages) below will comprise the CARES Redesign phase.

**Execute:** In the Execute stage, which will occur during Phase 2, Supplier will transition the Services with specific focus on people and knowledge transfer and retention. Supplier will take into account every aspect of process control to minimize disruption to Health Net's current operations. In context to this Transition, the activities and outcomes described in Section 3.7 (Transition Stages) below will comprise the CARES Execute phase.

**Stabilize:** In the Stabilize stage, which will occur commence during Phase 2, Supplier will achieve operational effectiveness through careful implementation and execution of operational rigor. In context to this Transition, the activities and outcomes as described in Section 3.7 (Transition Stages) below will comprise the CARES Stabilize phase.

### **3.6 TRANSITION FOCUS AREAS**

Key areas of emphasis on which Supplier will focus attention during Transition include the following:

#### **Retaining Health Net Employees and Knowledge**

- Supplier will deploy a specialist senior HR resource with extensive knowledge and prior experience in matters relating rebadging, employee change concerns and in providing Transitioned Personnel with an embracing work environment. In addition, Supplier will also deploy a dedicated Transition Program Manager with extensive experience in implementing large-scale projects and migrations
- Heath Net will be responsible for retention of the Transitioned Personnel until the end of Phase 1.
- All Transitioned Personnel will undergo new-hire orientation training delivered by Supplier.

#### **Comprehensive Knowledge Capture and Documentation**

- Supplier will conduct a comprehensive review of existing documentation to identify any gaps
- Based on the gap analysis, Supplier will deploy a team to complete documentation of in-scope processes that require additional documentation

## Guiding Principles

The following guiding principles will be observed during the Transition:

- Supplier will lead the planning and preparations for the Transition with active engagement and participation from Health Net
- Supplier will have overall responsibility for the successful planning, orchestration and execution of the Transition, with Supplier and Health Net each having responsibility for managing specific elements of the Transition within their respective control
- Designated representatives from both Supplier and Health Net will work together to achieve the required outcomes and implementation of the Services
- Supplier and Health Net will jointly manage and track issues, risks, assumptions and dependencies related to Transition
- All Transition planning and execution activities will be undertaken consistent with an overriding objective to minimize disruption and risk to Health Net's operations

### 3.7 TRANSITION STAGES

Following is a high-level description of the general stages of Transition.

#### 1. Transition Readiness:

The objective of Transition Readiness will be to define the project goals and objectives, setting up a Transition Management Office (TMO), identifying tasks and how goals will be achieved, quantifying the resources needed, and determining budgets and timelines for completion. This will include conducting a joint Supplier and Health Net workshop to align all parties on the Transition objectives, roles and responsibilities, methodology, tools, timelines & milestones, and key dependencies. The detailed planning and agenda for the Process Assessment and Knowledge Management teams will be done as part of this stage.

#### 2. Staff Augmentation Team Deployment:

This stage of the Transition involves creating additional capacity within Health Net operations to enable adequate availability of Health Net Transitioned Personnel with relevant process and domain experience to support Supplier's offshore Transition with minimal disruption and risk to Health Net's ongoing operations.

#### 3. Process Assessment:

The objective of the Process Assessment stage of the Transition is to enable Supplier to understand in greater detail all of the in-scope processes. Supplier will conduct a Process Assessment exercise to assess in greater detail the current as-is processes, current levels of process documentation, training documentation, trainer availability, and quality assurance resources that are required to enable service cutover. The Process Assessment will also assess the in-scope processes that are to

be migrated to Supplier's offshore locations with minimal disruption and risk to Health Net's ongoing operations. This phase will require the Supplier team to interact with identified key Health Net staff that have the required knowledge and access to such information. This team will consist of Supplier resources from operations, training and quality process excellence.

#### **4. Detailed Transition Planning:**

Supplier's Transition Management Office (TMO) will engage with the Health Net Transition and business teams to jointly deliver detailed Transition plans for each Tower for Health Net's approval that will at a minimum include:

- Individual level roles and functions to be Transitioned
- Sequencing of processes to be Transitioned
- Key Transition Deliverables and Milestones, with associated completion dates and dependencies
- Identification of Personnel Groups (including both Supplier Personnel Groups and Subcontractor Personnel Groups), together with the identities of the individuals assigned to each Personnel Group and a listing of the Transition Deliverables and Transition Milestones for which each Personnel Group is responsible
- Key tasks and activities with clearly defined responsibility between Supplier and Health Net.
- A knowledge retention and transfer plan for each in-scope process
- Identification of trainers & QA resources who could support the offshore Transition
- Governance and review

#### **5. Knowledge Management:**

After completion of the process assessment stage of the Transition, Supplier will conduct a knowledge management process wherein Supplier will update any gaps in the process and training documentation and have it ready for use by its offshore teams. The Knowledge Management team will consist of Supplier resources from operations and training. Post completion of this stage, the team will move into steady state (Phase 3) in support of offshore operations.

#### **6. Transfers of Transitioned Personnel:**

Starting at the beginning of Phase 2, Supplier will employ the Transitioned Personnel as per Schedule E (*Employee Transfer*) of the Agreement, and assume responsibility of all in-scope activities of Health Net's operations as defined in Exhibit A of each of the Initial SOWs.

#### **7. Knowledge Transfer and Ramp Up:**

During this stage of Transition, Supplier will leverage the deep process and domain experience of Health Net Transitioned Personnel to support offshore process training and Ramp Up. The details of specific number of trainers, duration of stay and accommodation etc will be determined as part of the Process Assessment & Transition Planning stage.

### 3.8 TRANSITION WAVES

The Transition of processes to Supplier's offshore locations will be carried out in multiple waves. The first wave of Transitions will consist of low complexity processes and the complexity of the processes in subsequent waves will be higher. This approach minimizes the risk of Service Level failures and other disruptions to Health Net's operations during the Transition.

The parameters used to determine processes within each of the Transition waves are as follows:

1. Impact of any potential process failure on the overall business
2. Process complexity and maturity in terms of process documentation and standard operating procedures
3. Possible offshore-onshore mix at the point of arrival, as per findings of Process Assessment and Transition planning
4. Overall timelines for Transition as per the findings of the Process Assessment and Transition planning

At a high level the following processes (per tower) will be Transitioned in multiple waves on the principle of waving logic as described above.

<b>Towers</b>	<b>Phase 2 - Wave 1</b>	<b>Phase 2 - Wave 2</b>	<b>Phase 2 - Wave 3</b>
<b>Claims</b>	<ul style="list-style-type: none"> <li>• Claims Recovery</li> <li>• Claims Adjudication</li> <li>• Reinsurance</li> <li>• Member Fallout</li> </ul>	<ul style="list-style-type: none"> <li>• COB</li> <li>• Provider Disputes</li> <li>• Accum Research</li> <li>• Claims Reporting</li> </ul>	<ul style="list-style-type: none"> <li>• Claims Compliance</li> <li>• SOX and P&amp;P</li> <li>• Prepay Audit</li> <li>• Legal/Adjustments</li> <li>• EDI</li> </ul>
<b>Membership</b>	<ul style="list-style-type: none"> <li>• Commercial enrollment</li> <li>• Commercial account receivables</li> </ul>	<ul style="list-style-type: none"> <li>• Medicare enrollment</li> <li>• Medicare account receivables</li> </ul>	<ul style="list-style-type: none"> <li>• Group Employer set up</li> <li>• Broker commission</li> <li>• Financial reporting</li> </ul>

- IBM oversight
- Contract management
- Business Analyst
- CTO
- Project management office
- All in-flight projects will be handled post wave 3

### 3.9 USE OF HEALTH NET FACILITIES

Health Net will work with Supplier to provide reasonable work space to Supplier Personnel as outlined in Schedule Z-5 (Health Net Provided Transition Work Space), with respect to which the Parties agree as follows:

1. Health Net will work to provide the seating necessary for shadowing Health Net personnel and a sufficient amount of available workstations to provide each Supplier associate a workspace within the vicinity of the Health Net associate they will be "shadowing" (i.e. in the same building and in most cases on the same floor). However, the workstation locations may be scattered, and therefore Supplier associates may not be co-located in the same workstation pod.
2. Health Net's available facilities space will be provided as a snapshot in time and available workspaces for Supplier may change as Health Net's day-to-day requirements for staff are accommodated.
3. Workstations will be equipped with internet-only port connections. Network ports will not be enabled for use without protocol approval, including that of Health Net's Information Security.
4. Land line phones may be provided upon request to any workstation.
5. Conference rooms may be booked by Supplier personnel via the Health Net scheduler. Conference rooms will not be dedicated to Supplier, but may be used by Supplier as needed and based on availability.
6. Training rooms will be booked by Supplier personnel through Health Net's operations training group. Training rooms will not be dedicated to Supplier, but may be used by Supplier as needed and based on availability.
7. Workspace can generally be made available on a week's notice or less, depending on the IT requirements and based on availability.
8. Supplier will be responsible for purchasing parking for the Supplier personnel.

### 4. ATTACHMENTS

Following are brief descriptions of the attachments to this Schedule Z (Transition), which are incorporated as part of this Schedule Z (Transition).

**4.1 SCHEDULE Z-1 (ACCEPTANCE OF TRANSITION DELIVERABLES AND MILESTONES)**

Schedule Z-1 (*Acceptance of Transition Deliverables and Milestones*) sets forth the process that will be followed for Health Net to determine when Transition Deliverables and Transition Milestones have met the criteria for their Acceptance by Health Net.

**4.2 SCHEDULE Z-2 (SUMMARY OF ONSHORE AND OFFSHORE COUNTS AND RATIOS)**

Schedule Z-2 (*Summary of Onshore and Offshore Counts and Ratios*) sets forth information about the current state and end state numbers of onshore and offshore positions and the current and end state onshore/offshore ratios.

**4.3 SCHEDULE Z-3 (HEALTH NET TRANSITION SUPPORT ROLE DESCRIPTIONS)**

Schedule Z-3 (*Health Net Transition Support Role Descriptions*) sets forth role descriptions of the Health Net personnel that Health Net will provide in support of the Transition.

**4.4 SCHEDULE Z-4 (HEALTH NET TRANSITION SUPPORT PERSONNEL LEVELS)**

Schedule Z-4 (*Health Net Transition Support Personnel Levels*) sets forth the nature, amounts, and timing of personnel support from Health Net that Supplier has requested and Health Net has agreed to make available to support the Phase 1 staff augmentation knowledge transfer activities and the conduct of the Transition during Phase 2.

**4.5 SCHEDULE Z-5 (HEALTH NET PROVIDED TRANSITION WORK SPACE)**

Schedule Z-5 (*Health Net Provided Transition Work Space*) sets forth information about the work space that Health Net will make available for use by Supplier Personnel in support of the Transition, by time period.

**4.6 SCHEDULE Z-6 (RAMP-DOWN PLAN)**

Schedule Z-6 (*Ramp-Down Plan*) sets forth information about the pace of the planned Ramp Down of onshore Supplier resources during Transition.

**4.7 SCHEDULE Z-7 (OFFSHORE RAMP-UP PLAN)**

Schedule Z-7 (*Offshore Ramp-Up Plan*) sets forth information about the pace of the planned Ramp Up of offshore Supplier resources during Transition.

**4.8 SCHEDULE Z-8 (REQUIRED ONSHORE POSITIONS)**

Schedule Z-8 (*Required Onshore Positions*) sets forth a listing of Supplier positions that Health Net requires remain onshore.

**4.9 SCHEDULE Z-9 (STAFF AUGMENTATION PLAN)**

Schedule Z-9 (Staff Augmentation Plan) sets forth information about the manner in which Supplier will augment the capacity of Health Net's BPaaS Tower personnel in order to enable them to support Knowledge Transfer and other Transition activities.

**4.10 SCHEDULE Z-10 (CONSOLIDATED BPAAS TRANSITION PLANS)**

Schedule Z-10 (*Consolidated Transition Plan*) contains a consolidated Transition plan reflecting a rolled up view of the individual Transition plans for each of the Towers.

**4.11 SCHEDULE Z-11 (IT TRANSITION PLAN)**

Schedule Z-11 (*IT Transition Plan*) sets forth the Transition Plan for the IT Tower.

**4.12 SCHEDULE Z-12 (CALL CENTER TRANSITION PLAN)****4.13 SCHEDULE Z-12 (CALL CENTER TRANSITION PLAN) SETS FORTH THE TRANSITION PLAN FOR THE CALL CENTER TOWER.****5. RELATIONSHIP BETWEEN TRANSITION AND PERSONNEL REDEPLOYMENT**

As described in Sections 4.6 and 4.7 above, Schedule Z-6 (*Ramp Down Plan*) and Schedule Z-7 (*Offshore Ramp Up Plan*) set out the currently planned onshore/offshore ramp plan. That ramp plan is for Transition planning and monitoring purposes only, in that Supplier and its Subcontractors are not permitted to reassign or otherwise redeploy or remove any Transitioned Personnel from their assigned Transition responsibilities, or to reassign or otherwise redeploy or remove any Supplier Personnel from onshore roles that are being moved to another location (whether to an offshore, near shore, or alternate onshore location), until all of the following conditions (the "**Transition Release Conditions**") have been met with respect to the relevant Personnel Group: (i) Health Net has approved in writing Supplier's (or, where applicable, a Subcontractor's) Knowledge Transfer and onshore/offshore ramp plans as they pertain to the Personnel Group subject to the same ramp down count as in Schedule Z-6 (*Ramp Down Plan*); (ii) all Transition Deliverables to be prepared by the Personnel Group have been completed and Accepted by Health Net; (iii) all Knowledge Transfer activities involving the Personnel Group have been completed and confirmed through quality assurance to have been completed successfully, (iv) all Transition Milestones including Knowledge Transfer milestones that the Personnel Group has a role in achieving have been achieved and Accepted by Health Net; (v) at least 30 days prior to Supplier's (or its Subcontractor's) proposed redeployment (or termination) of the members of the Personnel Group, Supplier has provided to Health Net (in writing) a list or other notice identifying the individual employees comprising the Personnel Group and indicating which are to be redeployed while remaining employed with Supplier or its Subcontractor and which are to be terminated, and Health Net has not, within the first 15 days of the 30-day notice period, objected to the proposed redeployment (or termination) on the basis that all Transition Release Conditions applicable to the relevant Personnel Group have not been met. For the avoidance of doubt, nothing in this Schedule Z is intended to limit in any way the provisions of Schedule E (*Employee Transfer*) that relate to the termination or redeployment of Transitioned Employees.

**SCHEDULE Z-1****ACCEPTANCE PROCEDURES FOR TRANSITION DELIVERABLES AND MILESTONES****1. GENERAL**

(a) The successful completion of any Transition Deliverable prepared and delivered pursuant to this Agreement or achievement of any Transition Milestone requires Acceptance of such Transition Deliverable or Transition Milestone by Health Net. Acceptance by Health Net requires that the Transition Deliverables and Transition Milestones be confirmed in writing by Health Net to meet applicable Acceptance Criteria which, in the case of Transition Deliverables consisting of Software, will include the successful completion of agreed upon acceptance and performance testing. In the case of Transition Deliverables that are component parts of larger Transition Deliverables, in addition to Acceptance of the component Transition Deliverables, the Transition Deliverable comprised of the component Transition Deliverables will also be subject to Health Net's Acceptance in its entirety.

(b) Upon completion of a Transition Deliverable or the accomplishment of a Transition Milestone, Supplier shall notify Health Net in writing that it has been completed and ready for Acceptance by Health Net. Health Net will evaluate it for Acceptance in accordance with this Schedule Z-1.

(c) Acceptance procedures for Transition Deliverables and Transition Milestones will be documented in the applicable Transition Plan (or referenced therein to the extent the Parties agree on standard procedures). Acceptance procedures will be sufficiently rigorous so as to verify that the Transition Deliverables conform in all material respects to all applicable specifications, Acceptance Criteria and performance requirements, as applicable, and, in the case of Transition Milestones, that their Acceptance Criteria have been accomplished.

(d) Health Net will be responsible for performing acceptance testing it requires prior to Acceptance of Transition Deliverables under this Schedule Z-1. Supplier shall support Health Net's Acceptance testing as reasonably requested by Health Net, including by preparing appropriate test data, making available test collateral or other applicable documentation, answering questions, etc.

(e) The Acceptance process outlined below shall not be deemed to extend the scheduled completion date for any Transition Deliverable specified in a Transition Plan.

**2. ACCEPTANCE PERIOD**

Unless otherwise mutually agreed, Health Net shall notify Supplier whether a Transition Deliverable or Transition Milestone has satisfied the applicable Acceptance Criteria no later than (a) ten (10) Business Days (unless otherwise mutually agreed by the Parties) after (i) Supplier notifies Health Net that it has been completed and is ready for Health Net's confirmation that the Acceptance Criteria have been met, and (ii) makes available to Health Net all applicable Transition Deliverables in order for Health Net to confirm that Health Net has already completed all required acceptance testing on the Transition Deliverable(s) or (b) for Transition Deliverables that Health Net determines require acceptance testing by Health Net in the production environment, the Parties shall mutually agree upon the Acceptance Period on a case by case basis ("*Acceptance Period*").

### 3. ACCEPTANCE OF WRITTEN TRANSITION DELIVERABLES

(a) “*Written Transition Deliverables*” are all Transition Deliverables other than Operational Transition Deliverables as defined in Section 4 below. Supplier may submit interim drafts of Written Transition Deliverables (e.g., system designs and documentation, manuals) to Health Net for review. Health Net agrees to review and, if requested by Supplier, to reply to each interim draft within a reasonable period of time after receiving it from Supplier.

(b) When Supplier delivers a final Written Transition Deliverable to Health Net, Health Net will complete its review of such Deliverable within the Acceptance Period; provided that, if and to the extent any Written Transition Deliverable is delivered earlier or later than scheduled, the Acceptance Period shall be extended as reasonably necessary to accommodate the availability of the Health Net personnel responsible for reviewing such Written Transition Deliverable. Similarly, if and to the extent multiple Written Transition Deliverables are delivered to Health Net within an Acceptance Period, the Acceptance Period shall be extended for a mutually agreed upon period of time as reasonably necessary to accommodate the availability of Health Net personnel responsible for reviewing them.

(c) Health Net will notify Supplier in writing by the end of the Acceptance Period stating that such Written Transition Deliverable is accepted in the form delivered by Supplier or describing with reasonable particularity any deficiencies that must be corrected prior to acceptance of such Written Transition Deliverable. If Supplier does not receive any such notice from Health Net by the end of the Acceptance Period, Supplier shall promptly notify Health Net in writing that no such notice has been received. If Supplier does not receive a notice specifying deficiencies within ten (10) Business Days, or as otherwise mutually agreed by the Parties, after Health Net receives such written notification from Supplier, such Written Transition Deliverable will be deemed accepted by Health Net.

(d) If Health Net delivers to Supplier a notice of deficiencies, Supplier will at no additional charge to Health Net, correct the described deficiencies as quickly as possible and, in any event, unless otherwise mutually agreed by the Parties, within five (5) Business Days after Health Net notifies Supplier of the deficiencies.

(e) Upon receipt of a corrected Written Transition Deliverable from Supplier, Health Net will have a reasonable additional period of time to review the corrected Written Transition Deliverable. Supplier will, at no additional charge to Health Net, correct any further deficiencies identified by Health Net as quickly as possible and, in any event, unless otherwise mutually agreed by the Parties, within five (5) Business Days after Health Net notifies Supplier of the further deficiencies.

### 4. ACCEPTANCE OF OPERATIONAL TRANSITION DELIVERABLES

(a) “*Operational Transition Deliverables*” are Transition Deliverables comprised in whole or in part of Software. Prior to the date on which Supplier is scheduled to deliver each Operational Transition Deliverable to Health Net, Supplier and Health Net will (to the extent not previously set forth in the applicable Transition Plan) agree upon the testing procedures for the Operational Transition Deliverable, including detailed test criteria and expected results (the “*Acceptance Tests*”). The Acceptance Tests will be designed to determine whether the Operational Transition Deliverable contains any Transition Deliverable Defects (as defined below). Health Net will have the opportunity during the Acceptance Period to evaluate and test each Operational Transition Deliverable in accordance with the procedures set forth herein or in any Transition Plan.

(b) When Supplier has completed an Operational Transition Deliverable, Supplier will deliver the Operational Transition Deliverable to Health Net’s designated site, notify the designated

Health Net person of delivery, and if Supplier is responsible for installation, install such Operational Transition Deliverable and perform an installation test reasonably acceptable to Health Net to verify that the Operational Transition Deliverable has been properly delivered and installed. Supplier shall notify Health Net in writing when the Operational Transition Deliverable is ready for Acceptance, provided that such notice shall not occur prior to the successful completion by Supplier of any installation tests. Receipt of such notice by Health Net will start the Acceptance Period or such other period as is stated in the applicable Transition Plan or as otherwise agreed to by the Parties.

(c) Health Net's obligation to review any Operational Transition Deliverable within the applicable Acceptance Period will be contingent on such Operational Transition Deliverable being delivered to Health Net as scheduled. If and to the extent any Operational Transition Deliverable is delivered earlier or later than scheduled, the Acceptance Period shall be extended as reasonably necessary to accommodate the availability of the Health Net personnel responsible for reviewing such Operational Transition Deliverable. Similarly, if and to the extent multiple Operational Transition Deliverables are delivered to Health Net within an Acceptance Period, the Acceptance Period shall be extended for a mutually agreed upon period of time as reasonably necessary to accommodate the availability of Health Net personnel responsible for reviewing them.

(d) Health Net shall notify Supplier in writing before the end of the Acceptance Period stating that the Operational Transition Deliverable is accepted in the form delivered by Supplier or describing the Transition Deliverable Defects as provided in Section 4(e) below. If Supplier does not receive any such notice from Health Net by the end of the Acceptance Period, Supplier shall promptly notify Health Net in writing that no such notice has been received. If Supplier does not receive a notice of Transition Deliverable Defects within ten (10) Business Days, or as otherwise mutually agreed by the Parties, after Health Net receives such written notification from Supplier, such Operational Transition Deliverable will be deemed accepted by Health Net.

(e) If Health Net determines during the Acceptance Period that the Operational Transition Deliverable as delivered by Supplier deviates in any material respect from its Acceptance Criteria or otherwise fails in any noted respect to successfully complete applicable Acceptance Tests (a "***Transition Deliverable Defect***"), Health Net will inform Supplier in writing, describing the Transition Deliverable Defect in sufficient detail to allow Supplier to recreate it. Supplier will correct any Transition Deliverable Defects in an Operational Transition Deliverable as soon as possible after receiving Health Net's notice of the Transition Deliverable Defects, but in any event within a period equal to the original Acceptance Period (unless otherwise specified in the applicable Transition Plan). Supplier will provide the corrected Operational Transition Deliverables to Health Net for re-testing.

(f) Health Net will have a reasonable additional period of time after receipt of the corrected Operational Transition Deliverable to re-test it so as to confirm that it does not deviate in any material respect from its Acceptance Criteria. Supplier will, at no additional charge to Health Net, correct any further Transition Deliverable Defects identified by Health Net during the re-test as quickly as possible, but in any event within a period equal to the original Acceptance Period (unless otherwise specified in the applicable Transition Plan).

## **5. ACCEPTANCE OF TRANSITION MILESTONES**

To the extent that any Transition Milestone consists of or includes the delivery and Acceptance of Transition Deliverables, Acceptance of those aspects of the Transition Milestone will be as set forth in Sections 3 and 4 above, as applicable. Otherwise, when a Transition Milestone includes the accomplishment of certain results other than the completion of Transition Deliverables, Supplier will

notify Health Net in writing when Supplier believes all results to be accomplished and Acceptance Criteria to be met for the Transition Milestone to have been achieved. Upon receiving such a notice from Supplier, Health Net will respond in writing within ten (10) business days, or such other period as the Parties may agree to, either indicating Health Net's Acceptance of the Transition Milestone or describing what remains to be accomplished to meet its Acceptance Criteria.

Notes:

Resource ramp within the P5 structure to support transition and service continuity will be managed as per the phase 2 solution and will not require staffing increases from a HealthNet perspective. Normal attrition will be managed within the forecast (95% acceptance rates with 20% attrition in the first year).  
 Redeployment will be offered for each resource pool per month but will be dictated based on resource demand and released resource skill sets, location preferences and role applicability.  
 End state changes to the on shore / rebudgeted headcount post 24 months will be managed by Cognizant and may change based on the detailed solution operating model.  
 Role by role definitions of on / off shore by tower and process category will be dependent on the detailed HR system data transfer and finalized post MSA signature but prior to the start of phase 2.  
 On shore resources will be required to support regulatory, voice and commercial contract requirements as per the on shore required tab.  
 General functional wave by wave transition schedules are outlined in each of the SOW exhibit A-2 schedules.

\*\* Does not include current state delivery from CTS

- Notes**
- 1 Staff Augmentation team will consist of processors who will be trained and deployed by HN in its onshore operations
  - 2 Staff Augmentation team will create additional capacity for HN, enabling the release of more experienced resources to support offshore knowledge transfer and ramp up
  - 3 The Staff Augmentation team needs to be deployed by Nov 2014 to allow sufficient time for the seed to learn the processes and become fully productive, to enable release of more experienced HN resources for offshore Transito
  - 4 No Staff Augmentation team required for Medical Management and the QA/Training tower
  - 5 Trainer ratios assumed in the above estimation are ~ 1:20-25
  - 6 QA Ratios assumed in the above estimation are ~ 1:10 for Claims, ~ 1: 6-8 for Membership, ~ 1:5 for A&G and ~ 1: 3-5 for Configuration area
  - 7 Number of Trainers required to train the Staff Augmentation team are based on the number of processes within tower in which the Staff Augmentation team needs to be deployed
  - 8 Trainers needed to train the Medical Management trainers is not listed

## ANNEX 1

## SUPPLEMENTAL TERMS AND CONDITIONS FOR BPaaS SERVICES

## 1. INTRODUCTION

## 1.1 Structure of Supplemental Terms and Conditions

This Supplemental Terms and Conditions for BPaaS Services (the “*BPaaS Supplemental Terms*”) sets forth additional terms and conditions (in addition to those in the remainder of this Agreement) which are applicable to the BPaaS Services.

This BPaaS Annex includes the following:

Schedule 1-A (*Escrow Agreement*)

## 2. DEFINITIONS

## 2.1 Defined Terms

The following capitalized terms, when used in this Agreement, will have the meanings given them below:

- (a) “*Escrow Agent*” has the meaning given in Section 5.
- (b) “*Escrow Agreement*” has the meaning given in Section 5.
- (c) “*Escrowed Materials*” means the Technology Platform Software (as it evolves over the Term), in both Object Code form and Source Code form. For clarity, “Escrowed Materials” includes:
  - (i) Source Code, Object Code, programming interfaces, Documentation, artifacts, manuals and other materials useful in connection with the Use of the Technology Platform Software,
  - (ii) any and all Software Updates to the Technology Platform Software used to provide the Services, and
  - (iii) any new Software in the Technology Platform Software, or new items of the type described in clause (i) or (ii), used to provide the BPaaS Services.“*Escrowed Materials*” does not include any Commercially Available Third Party Software that is part of the Technology Platform Software, although it does include any interfaces between such Commercially Available Third Party Software and the Technology Platform Software.
- (d) “*Technology Platform Software*” means that part of the Technology Platform that is Software.

- (e) “**Software Update**” means any modification, enhancement, patch, upgrade, update, version, release or Derivative Work of any Software.
- (f) “**Technology Platform**” means the Equipment and Software (including Source Code, programming interfaces, Documentation, artifacts, manuals and other materials useful in connection with the Use of such Equipment or Software) used by Supplier to deliver the BPaaS Services, as the same may be modified or replaced over the Term. It is the intent of the Parties that the initial Technology Platform Software shall be based on the ABS Platform Software acquired by Supplier from Health Net, or a derivative work thereof developed by Supplier.

### 3. TECHNOLOGY PLATFORM

3.1 Health Net’s own instance of the Technology Platform Software and access to Source Code and Configuration Layer.

- (a) Supplier shall maintain and operate for Health Net a separate instance of the Technology Platform Software (the “*Health Net Instance*”).
- (b) The Parties agree that Health Net, its Affiliates and (subject to Section 3.1(b)(iii) below) their respective contractors, shall have the right to access and Use the Technology Platform Software (including Source Code, technical interfaces, Documentation, artifacts, manuals and other materials useful in connection with the Use of such Licensed Technology Platform Software) in a development and pre-production environment furnished by Supplier to develop enhancements, modifications, interfaces and extensions to the Licensed Technology Platform Software (collectively “*Modifications*”), during the Term and Disengagement Assistance Period. Supplier agrees to promote such Modifications into the production environment, subject to the following restrictions:
  - (i) Supplier shall have the right to review any Modification that Health Net proposes to promote into production (such review shall be conducted as promptly as is practicable). If Supplier, acting reasonably and in good faith, identifies in writing any performance, security, operational risk, ongoing maintenance or other reasonable Technology Platform Software integrity concerns relating to such Modification, the Parties shall meet and discuss the same. The Parties will work in good faith to identify ways to mitigate such risks. If the Parties are unable to agree on ways to mitigate such risks, and if a reasonable person with IT experience in such matters would agree that such Modification should not be promoted to production due to such risk, then such Modification shall not be moved into production, provided however that the “reasonable person with IT experience” standard set forth above shall not extend to security concerns and Supplier shall in all cases have sole authority to approve security related elements of a Modification.
  - (ii) Notwithstanding the requirements of Section 8.3 of the Agreement, if a root cause analysis determines that such Modification results or resulted in performance or other operational issues with the Health Net Instance or the Services, Supplier shall be excused to the extent such issue was caused by the Modification, provided however such excuse shall not extend to a Security Breach.

- (iii) Supplier shall have the right to approve any contractor that would have access to the Source Code if such contractor: (A) has a platform that competes with the Technology Platform, or (B) is listed on Schedule M, provided that Health Net shall have the right to utilize, without Supplier's approval, the following suppliers: \*\*\*.
- (iv) Any resulting increase in costs resulting from the Modifications including; development, integration, testing, upgrade, infrastructure, software and support cost shall be charged back to Health Net. To the extent practicable, Supplier shall provide Health Net with estimates of any identifiable expenditures for which Health Net will be responsible. All work shall be done using the AO T&M Rates.
- (c) The Parties agree that Health Net, its Affiliates and their respective contractors shall also have the right to access and Use the configuration layer of any portion of the Technology Platform Software (including technical interfaces, Documentation, artifacts, manuals and other materials useful in connection with the Use of such configuration layer), including such configuration layer in HP extreme, in a development and pre-production environment furnished by Supplier to make configuration changes to the Licensed Technology Platform Software, during the Term and Disengagement Assistance Period..
- (d) Any Modification shall be understood to be an "other item" as those words are used in Section 23.3(g)(2) of the Agreement.

### 3.2 Users Group

Supplier shall organize a user group for Supplier's customers for whom Supplier is utilizing the Technology Platform to provide services ("Users Group"), and shall permit Health Net an opportunity to review and provide input into the organization and rights of the users prior to the formalization and establishment of the Users Group. Health Net shall have a seat on the Users Group and voting rights as outlined in Section 3.4(b) below.

### 3.3 Roadmap

Supplier shall maintain a written description of Supplier's product strategy for the Technology Platform, which will include at least the following (the "Technology Platform Roadmap" or "Roadmap"):

- (a) a description of Supplier's long-term strategy for each major component of the Technology Platform,
- (b) a plan that shows all enhancements, upgrades and investments planned for the Technology Platform on a prospective twenty-four (24) month rolling basis,
- (c) a review of the prior year's activities relative to items (a) and (b) above,
- (d) a description and reconciliation of BPaaS Roadmap Projects and BPaaS Non-Discretionary Projects to be invested by Supplier each Contract Year on the Technology Platform, as further described in Schedule C (Charges),

(e) a mapping of the new features and functionality on a release calendar (including those paid for out of the Discretionary Projects pool described in Schedule C (Charges) and those paid for by Supplier pursuant to Supplier's roadmap investment obligations set forth in Schedule C (Charges)).

Supplier shall provide to Health Net and other members of the Users Group a copy of such Roadmap in January of each calendar year, and Supplier shall also make the Roadmap available to Health Net upon Health Net's request from time to time.

#### 3.4 Technology Platform Roadmap Committee and Voting:

(a) Composition of the Committee. Supplier shall form a team made up of technology experts, business leaders, the User Group and other subject matters experts to design and draft the Technology Platform Roadmap (the "*Technology Platform Roadmap Committee*"). All members of the User Group, including Health Net, shall hold a seat on the Technology Platform Roadmap Committee in order to consult with Supplier regarding enhancements and new functionality to be added by Supplier to the Technology Platform as part of the Technology Platform Roadmap.

(b) Voting Rights.

The enhancements and new functionality to be added by Supplier to the Technology Platform utilizing funds from Supplier's \$\*\*\* required investment in BPaaS Roadmap Projects set forth in Section 12.4 of Schedule C (*Charges*) shall be determined based on votes as follows:

- (i) The User Group shall have an equal vote with Supplier on the Technology Platform Roadmap Committee in order to decide upon which enhancements to make to the Technology Platform, provided however that a Supplier executive officer shall at all times hold the tie breaking vote on the Technology Platform Roadmap Committee;
- (ii) Each customer that is a member of the User Group shall have a share of the vote that is based on the respective number of members each customer has installed on the Technology Platform; and
- (iii) In all cases, the BPaaS Roadmap Projects must benefit the lines of business of the then-existing members of the Users Group and planned future lines of business of such then-existing User Group members.

#### 3.5 Compliance

Supplier shall be responsible for enhancing the Technology Platform as necessary for Supplier and Health Net to comply with all applicable Laws. Supplier's obligations in this regard are further described in the Terms and Conditions and Schedule C (Charges).

#### 3.6 Releases

Supplier shall provide releases of the Technology Platform Software no less than quarterly.

#### 3.7 Governance of the Technology Platform

The Technology Platform shall be governed by the Governance Committee, as described in Schedule G (*Governance*). The Roadmap and input from the Technology Platform Roadmap Committee will drive the discussions.

#### 4. LICENSES TO THE TECHNOLOGY PLATFORM SOFTWARE

- (a) Option to License the Technology Platform Software.
- (i) During the Term and until twenty four (24) months after the end of the Term, Health Net shall have the option, by sending written notice to Supplier, to license all or any portion of the Technology Platform Software. Health Net shall have the right to license all of the Technology Platform Software or any portion of the Technology Platform Software, at different times, so long as Health Net does so within the timeframe described in the preceding sentence. Supplier shall provide reasonable cooperation to Health Net in connection with Health Net's exercise of its option rights set forth in this Section.
- (ii) For clarity, this Section 4(a) shall not apply to those portions of the Technology Platform Software that are Commercially Available Third Party Software. Upon receipt of Health Net's notice pursuant to Section 4(a)(i) above or any other written notice received from Health Net, Supplier shall provide written notice to Health Net identifying any such Commercially Available Third Party Software. Health Net shall be obligated to obtain its own licenses for any such Software.
- (b) Process. Health Net shall exercise such option by sending written notice to Supplier. Such notice shall identify whether Health Net is licensing all of the Technology Platform Software or only a portion of it (in either case, the "***Licensed Technology Platform Software***"). Upon receipt of such notice, the Parties shall meet to discuss the terms of the license. Such license shall be on the following terms, unless the Parties agree otherwise:
- (i) *Scope of License.* Supplier hereby grants to Health Net and its Affiliates (and - for the sole purpose of providing services to Health Net, its Affiliates, Former Health Net Affiliates and Service Recipients - to Health Net's and its Affiliates' respective service providers) (collectively, the "***Health Net Licensees***") a perpetual (unless Health Net designates a shorter period of time), world-wide, irrevocable, fully paid-up (except for payment of the applicable charge for such license (if any) as determined pursuant to Section 4(b)(ii) below), royalty-free, non-exclusive license to Use the Licensed Technology Platform Software (including technical interfaces, Documentation, artifacts, manuals and other materials useful in connection with the Use of such Licensed Technology Platform Software") in order for any Health Net Licensee to perform services for Health Net, its Affiliates, Former Health Net Affiliates and Service Recipients, and the receipt and use of such services. The term of such license shall be (as requested by Health Net) (1) during the Term and any Disengagement Assistance Periods for which any Services for which such Software is used, and/or (2) after any such Disengagement Assistance Periods.
- (ii) *Charges for the Foregoing License.* The license granted in Section 4(b)(i) shall be provided at no charge during the Term and any Disengagement Assistance Periods. Thereafter, subject to Section 4(b)(iv), Supplier shall be permitted to

charge Health Net a license fee for the foregoing license, the amount of which shall be determined as follows:

- (A) Health Net shall pay a license fee amount that is determined by an independent third party (“**Independent Third Party**”) and in accordance with the following to be a fair and reasonable license fee for such Licensed Technology Platform Software or such portion thereof identified by Health Net:
- (1) The Independent Third Party shall be designated by Health Net and approved by Supplier. Supplier agrees that Pricewaterhouse Coopers is acceptable as an Independent Third Party. The Parties shall each be responsible for fifty percent (50%) of the charges for the Independent Third Party.
  - (2) The Independent Third Party shall perform an analysis and recommendation of what the fair and reasonable license fee for the Licensed Technology Platform Software (or portion thereof requested by Health Net) should be, in accordance with its professional judgment and its own procedures and methodologies. The Independent Third Party shall prepare and provide to the Parties a preliminary report setting forth its findings regarding the license fee for the applicable Software (a “**Preliminary License Fees Report**”).
  - (3) Each Party shall be provided a reasonable opportunity to review, comment on and request changes in the Preliminary License Fees Report. Following such review and comment, the Independent Third Party shall issue a final report of its findings and conclusions regarding the license fees (“**Final License Fees Report**”).
- (B) In the event of a dispute between Health Net and Supplier regarding the amount of the license fees described in this Section 4(b)(ii) or the Final License Fees Report that the Parties are unable to resolve, then the matter shall be escalated to the informal dispute resolution procedure described in Section 26 (*Dispute Resolution*) of the Terms and Conditions. If the dispute is not resolved pursuant to such procedure described in the preceding sentence, the Independent Third Party shall proceed to resolve the dispute as it deems reasonable and appropriate in its professional judgment, and such resolution shall be binding on the Parties. Absent fraud, the Final License Fees Report (and its findings regarding the license fee) shall be final and binding on the Parties.
- (iii) *Maintenance and Support.* In addition, if requested by Health Net and subject to Section 4(b)(iv), the Parties will mutually agree upon applicable terms for Supplier’s maintenance and support of such Licensed Technology Platform Software licensed by Health Net pursuant to this Section, provided that if Health Net elects, such maintenance and support shall be performed (1) pursuant to the AO Agreement, in which event the Parties shall negotiate in good faith an appropriate amendment to the AO Agreement, or (2) on a time and materials

basis, including using the professional services rates set forth in Schedule C (*Charges*).

- (iv) For clarity, license rights granted in this Section 4 are in addition to, and not in lieu of, the rights of use and licenses granted in Sections 12.3 and 15 of the Terms and Conditions, and charges (if any) payable by Health Net under this Section 4 shall only apply to the extent Health Net's use of the Licensed Technology Platform Software (both in terms of its purpose and its duration) is not covered by the rights of use granted in Section 12.3 and 15 of the Terms and Conditions.

## **5. ESCROW OF THE TECHNOLOGY PLATFORM SOFTWARE.**

Health Net and Supplier shall execute concurrently with the execution of this Agreement a software escrow agreement with Iron Mountain (the "*Escrow Agent*"), the form of which escrow agreement is attached hereto as Schedule 1-A (the "*Escrow Agreement*"). Supplier shall maintain the Escrow Agreement in effect until two \*\*\* after the Disengagement Assistance Period. Under the Escrow Agreement, Supplier shall place the Escrowed Materials into escrow upon the terms set forth in the Escrow Agreement and the following terms:

### **5.1 Execution by Escrow Agent.**

The Parties shall submit the Escrow Agreement to the Escrow Agent for execution by the Escrow Agent within fifteen (15) days after the Effective Date, and work diligently and cooperate in good faith to have the Escrow Agreement signed by the Escrow Agent. If the Escrow Agent requires changes to the Escrow Agreement, the Parties shall cooperate in good faith to accommodate such requested changes and upon agreement by the Parties and the Escrow Agent on such revised terms, shall re-execute the Escrow Agreement. The Parties shall maintain the Escrow Agreement during the Term (including renewal periods and extensions pursuant to Section 16.3 and any Disengagement Assistance Periods). The Parties shall comply in all respects with the Escrow Agreement.

### **5.2 Cost.**

Supplier shall be responsible for all costs associated with the Escrow Agreement, except as otherwise provided within the Escrow Agreement.

### **5.3 Bankruptcy of Supplier.**

The Escrow Agreement is an "agreement supplementary" to this Agreement (as that term is used in 11 U.S.C. Section 365(n), as amended).

### **5.4 Initial Deposit.**

Supplier shall deposit the then-current version of all Escrowed Materials into the escrow established by the Escrow Agreement on or before the later of: ten (10) days after execution of the Escrow Agreement by the Escrow Agent, or ten (10) days after the sale of the Acquired Assets by Health Net to Supplier under the Asset Purchase Agreement.

### 5.5 Quarterly deposits.

Supplier shall deposit, within ten days (10) after the first day of each calendar quarter (i.e., by January 10<sup>th</sup>, April 10<sup>th</sup>, July 10<sup>th</sup> and October 10<sup>th</sup> - each such date a “Deposit Date”), the then-current versions of all Escrowed Materials. Supplier shall provide Health Net with written notice promptly after making each such deposit, notifying Health Net that a deposit has been made into escrow in accordance with this Section, which notice shall identify the items placed into escrow.

### 5.6 Failure to make deposit.

If Supplier fails to make any deposit as required by this Section 5 and/or the Escrow Agreement within thirty (30) days after receipt of written notice (which notice may come from Iron Mountain or Health Net), such failure shall be deemed a material breach of this Agreement, and Supplier shall pay to Health Net liquidated damages in the amount of \*\*\* dollars (\$\*\*\*) per day for each day thereafter that such failure continues. Additionally, upon Health Net’s request from time to time, Supplier shall provide to Health Net a statement signed by a Supplier executive indicating whether Supplier is in compliance with the terms of this Section 5 (including its obligation to update the escrow pursuant to Section 5.5 and the Escrow Agreement. For clarity, payment of the amounts set forth in this Section shall not relieve Supplier from its obligation to make escrow deposits as contemplated herein.

### 5.7 License to Escrowed Materials.

- (a) Supplier hereby grants to Health Net and its Affiliates a perpetual, worldwide, irrevocable, fully paid-up, royalty-free, non-exclusive license (and - for the sole purpose of providing services to Health Net, its Affiliates, Former Health Net Affiliates and Service Recipients - to Health Net’s and its Affiliates’ service providers) to Use the Escrowed Materials, at no additional charge, as may be required to meet Health Net’s and its Affiliates’ business and operational needs; provided, however, that Health Net’s right to exercise the foregoing right and license shall be deferred until the occurrence of a Release Condition (as defined in the Escrow Agreement), as further described in Section 5.7(b) below. Such license shall be transferable by Health Net to any entity that is a successor to Health Net under this Agreement or an assignee of Health Net pursuant to Section 27.1 (*Binding Nature and Assignment*) of the Terms and Conditions.
- (b) Upon the occurrence of one or more events specified in the Escrow Agreement as “Release Conditions”:
  - (i) Health Net shall be entitled to the release of the Escrowed Materials from the Escrow Agent (and the Escrow Agent shall release the Escrowed Materials to Health Net) pursuant to the terms of the Escrow Agreement and Health Net shall be permitted to exercise the right and license granted in Section 5.7(a) with respect to such Escrowed Materials; and
  - (ii) if (upon such occurrence) the most recently escrowed forms of any Escrowed Materials is not the version of such Escrowed Materials that Supplier is then using to provide the Services (e.g., Supplier is using a version of the Technology Platform Software with some non-escrowed modifications or enhancements), then Health Net (A) shall have the right to obtain from Supplier (and Supplier shall provide to Health Net within ten (10) days from the date of Health Net’s request), the versions of the Escrowed Materials then being operated or used by

Supplier to provide the Services, and (B) shall be permitted to exercise the rights and license granted in Section 5.7(a) with respect to such.

#### **5.8 Replacement Escrow Agent.**

If (i) the Escrow Agent resigns or withdraws from its role as escrow agent, or (ii) the Escrow Agreement is otherwise terminated, then Health Net and Supplier shall negotiate and execute a replacement escrow agreement, and each Party shall negotiate such in good faith, provided that neither Party shall have the right to object to terms and conditions within the replacement escrow agreement that are substantially similar to those in the original Escrow Agreement. If (A) the Parties do not execute a replacement escrow agreement within thirty (30) days after the occurrence of item (i) or (ii) in the previous sentence, and (B) there occurs one or more events which constitute a “Release Condition” pursuant to the Escrow Agreement, prior to such time that the Parties have executed a replacement escrow agreement, then Health Net (x) shall have the right to obtain from Supplier (and Supplier shall release to Health Net within ten (10) days from the date of Health Net’s request) the then-current versions of the Escrowed Materials being used by Supplier to provide the Services, and (y) shall be permitted to exercise the rights and license granted in Section 5.7(a) with respect to such.

#### **5.9 Terms relating to Licenses granted under this BPaaS Supplemental Terms**

(a) Relationship to other License rights

The licenses in this BPaaS Supplemental Terms and those in the Escrow Agreement are separate and independent from the other licenses granted to Health Net pursuant to Sections 12.3 and 15 of the Terms and Conditions, and Schedule L (*Disengagement Assistance*).

(b) Transferability of licenses.

All licenses granted to Health Net pursuant to this BPaaS Supplemental Terms and those in the Escrow Agreement shall be transferable by Health Net and its Affiliates to any entity that is a successor to Health Net under this Agreement or an assignee of Health Net pursuant to Section 27 (*Binding Nature and Assignment*) of the Terms and Conditions.

**ANNEX 1 SCHEDULE 1-A  
ESCROW AGREEMENT**

**ANNEX 1 SCHEDULE 1-A**  
**ESCROW AGREEMENT**

The form of the Escrow Agreement referenced in Section 5 (*Escrow of the Technology Platform Software*) of Annex 1 (*Supplemental Terms and Conditions for BPaaS Services*) consists of the following pages.

<b>Effective Date</b>	
<b>Deposit Account Number</b>	
*Effective Date and Deposit Account Number to be supplied by Iron Mountain only.	

**Three-Party Escrow Service Agreement**

**1. Introduction**

This Three Party Escrow Service Agreement (the "**Agreement**") is entered into by and between Cognizant Healthcare Services, LLC (the "**Depositor**"), and by Health Net, Inc. (the "**Beneficiary**") and by Iron Mountain Intellectual Property Management, Inc. ("**Iron Mountain**"). Depositor, Beneficiary, and Iron Mountain may be referred to individually as a "Party" or collectively as the "Parties" throughout this Agreement.

- (a) The use of the term services in this Agreement shall refer to Iron Mountain services that facilitate the creation, management, and enforcement of software or other technology escrow accounts as described in Exhibit A attached hereto, including any services provided by Iron Mountain under any Work Request (collectively, "**Services**"). A Party shall request Services under this Agreement by selecting such Service on Exhibit A upon execution of the Agreement or by submitting a work request for certain Iron Mountain Services ("**Work Request**") via written instruction or the online portal maintained at the website located at [www.ironmountainconnect.com](http://www.ironmountainconnect.com) or other websites owned or controlled by Iron Mountain that are linked to that website (collectively the "**Iron Mountain Website**").
- (b) The Beneficiary and Depositor have entered into a Master Services Agreement dated November 2, 2014 ("**BPaaS Agreement**") conveying intellectual property rights to the Beneficiary, and the Parties intend this Agreement to be considered as supplementary to such agreement, pursuant to Title 11 United States [Bankruptcy] Code, Section 365(n).

**2. Depositor Responsibilities and Representations**

- (a) It shall be solely the Depositor's responsibility to: (i) make an initial deposit of all proprietary technology and other materials defined as "Escrowed Materials" under the BPaaS Agreement ("**Deposit Material**") to Iron Mountain on or before ten (10) days after the later to occur of the Effective Date or the sale of the Acquired Assets by Health Net to Beneficiary under the Asset Purchase Agreement; (ii) make updates to the Deposit Material during the Term (as defined below) of this Agreement within ten (10) days after the first day of each calendar quarter (i.e., by January 10<sup>th</sup>, April 10<sup>th</sup>, July 10<sup>th</sup> and October 10<sup>th</sup>); and (iii) ensure that a minimum of one (1) copy of Deposit Material is deposited with Iron Mountain at all times. At the time of each deposit or update, Depositor will provide to Iron Mountain and Beneficiary an accurate and complete description of all Deposit Material sent to Iron Mountain using the form attached hereto as Exhibit B.
- (b) Depositor represents that it lawfully possesses all Deposit Material provided to Iron Mountain under this Agreement and that any current or future Deposit Material liens or encumbrances will not prohibit, limit, or alter the rights and obligations of Iron Mountain or Beneficiary under this Agreement. Depositor warrants that with respect to the Deposit Material, Iron Mountain's proper administration of this Agreement, and Beneficiary's Use (as defined in the BPaaS Agreement) of the Deposit Materials in the event such Deposit Materials are released to Beneficiary, will not violate the rights of any third parties.
- (c) Depositor represents that all Deposit Material is readable and useable in its then current form; if any portion of such Deposit Material is encrypted, the necessary decryption tools and keys to read such material are deposited contemporaneously.

**3. Beneficiary Responsibilities and Representations**

- (a) Beneficiary acknowledges that, as between Iron Mountain and Beneficiary, Iron Mountain's obligation is to maintain the Deposit Material as delivered by the Depositor and that, other than Iron Mountain's inspection of the Deposit Material (as described in Section 4) and the performance of any of the optional verification Services listed in Exhibit A or as agreed by Iron Mountain to be performed pursuant to a Work Request, Iron Mountain has no other obligation regarding the completeness, accuracy, or functionality of the Deposit Material.
  - (b) Unless Depositor or Beneficiary submits a Work Request for "**Deposit Tracking Notification**" as described in Exhibit A, it shall be solely the Beneficiary's responsibility to monitor whether a deposit or deposit update has been accepted by Iron Mountain.
- 4. Iron Mountain Responsibilities and Representations**
- (a) Iron Mountain agrees to use commercially reasonable efforts to provide the Services requested by Authorized Person(s) (as identified in the "**Authorized Person(s)/Notices Table**" below) representing the Depositor or Beneficiary in a Work Request. Iron Mountain may reject a Work Request (in whole or in part) that does not contain all required information at any time upon notification to the Party originating the Work Request.
  - (b) Iron Mountain will conduct a visual inspection upon receipt of any Deposit Material and associated Exhibit B. If Iron Mountain determines that the Deposit Material does not match the description provided by Depositor represented in Exhibit B, Iron Mountain will notify Depositor of such discrepancy.
  - (c) Iron Mountain will provide written notice to the Beneficiary of all Deposit Material that is accepted and deposited into the escrow account under this Agreement. Unless Depositor or Beneficiary submits a Work Request for "**Deposit Tracking Notification**" as described in Exhibit A, Iron Mountain shall not have any obligation to prompt the Depositor to make a deposit, nor shall it have an obligation to notify the Beneficiary of the Depositor's failure to make a deposit or deposit update. Notwithstanding the forgoing, either Depositor or Beneficiary may obtain information regarding deposits or deposit updates upon request or through the Iron Mountain Website.
  - (d) Iron Mountain will follow the provisions of Exhibit C attached hereto in administering the release of Deposit Material.
  - (e) Iron Mountain will hold and protect Deposit Material in physical or electronic vaults that are either owned or under the control of Iron Mountain, unless otherwise agreed to by the Parties in writing.
  - (f) Upon receipt of written instructions by both Depositor and Beneficiary, Iron Mountain will permit the replacement or removal of previously submitted Deposit Material. The Party making such request shall be responsible for getting the other Party to approve the joint instructions. Any Deposit Material that is removed from the deposit account will be either returned to Depositor or destroyed in accordance with Depositor's written instructions.
  - (g) Should transport of Deposit Material be necessary for Iron Mountain to perform Services requested by Beneficiary under this Agreement or following the termination of this Agreement, Iron Mountain will use a commercially recognized overnight carrier such as Federal Express or United Parcel Service. Iron Mountain will not be responsible for any loss or destruction of, or damage to, such Deposit Material while in the custody of the common carrier.
- 5. Deposit Material Verification**
- (a) Beneficiary may submit a verification Work Request to Iron Mountain for one or more of the Services defined in Exhibit A attached hereto and Depositor consents to Iron Mountain's performance of any level(s) of such Services. Upon request by Iron Mountain and in support of Beneficiary's request for verification Services, Depositor shall promptly complete and return the Escrow Deposit Questionnaire attached hereto as Exhibit Q and reasonably cooperate with Iron Mountain by providing reasonable access to its technical personnel whenever reasonably necessary.
  - (b) The Parties consent to Iron Mountain's use of a subcontractor to perform verification Services [*Note to Iron Mountain: Which subcontractor(s) do you use to perform these Services?*]. Such subcontractor shall be bound by the same confidentiality obligations as Iron Mountain and shall not be a direct competitor to either Depositor or Beneficiary. The Parties agree that the following entities shall be deemed acceptable to perform verification Services: [TBD]. Iron Mountain shall be responsible for the delivery of Services of any such subcontractor as if Iron Mountain had performed the Services. Depositor warrants and Beneficiary warrants that any material it supplies for verification Services is lawful, does not violate the rights of any third parties and is provided with all rights necessary for Iron Mountain to perform verification of the Deposit Material.
  - (c) Iron Mountain will work with a Party should submits any verification Work Request for Deposit Material covered under this Agreement to either fulfill any standard verification Services Work Request or develop a custom Statement of Work ("**SOW**"), including requests to have a third party auditor inspect the Deposit Materials to verify the accuracy, completeness and proper compilation of the Deposit Materials. Iron Mountain and the requesting Party will mutually agree in writing to an SOW on terms and conditions that include but are not limited to: description of Deposit Material to be tested; description of verification testing; the requesting Party responsibilities; Iron Mountain responsibilities; Service Fees; invoice payment instructions; designation of the paying Party; designation of authorized SOW representatives for both the requesting Party and Iron Mountain with name and contact information; and description of any final deliverables prior to the start of any fulfillment activity. Provided that the requesting Party has identified in the verification Work Request or SOW that the Deposit Material is subject to the regulations of the International Traffic in Arms Regulations (22 CFR 120)(hereinafter "**ITAR**"), Iron Mountain shall ensure that any subcontractor who is granted access to the Deposit Material for the performance of verification Services shall be a U.S. Person as defined in 8 U.S.C. 1101(a)(20) or who is a protected person as defined in 8 U.S.C. 1324b(a)(3). After the start of fulfillment activity, each SOW may only be amended or modified in writing with the mutual agreement of both Parties. If the verification Services extend beyond those described in Exhibit A, the Depositor shall be a necessary Party to the

SOW governing the Services, provided that the Depositor shall cooperate in good faith with Beneficiary's request and shall not unreasonably withhold or delay its consent to or execution of such SOW.

- (d) During the term of this Agreement, Depositor and Beneficiary each shall have the right to inspect the written records of Iron Mountain pertaining to this Agreement.

**6. Payment**

The Party responsible for payment designated in Exhibit A ("**Paying Party**") shall pay to Iron Mountain all fees as set forth in the Work Request ("**Service Fees**"). All Service Fees are due within thirty (30) calendar days from the date of invoice in U.S. currency and are non-refundable. Iron Mountain may update Service Fees with a ninety (90) calendar day written notice to the Paying Party during the Term of this Agreement (as defined below). The Paying Party is liable for any taxes (other than Iron Mountain income taxes) related to Services purchased under this Agreement or shall present to Iron Mountain an exemption certificate acceptable to the taxing authorities. Applicable taxes shall be billed as a separate item on the invoice. Any Service Fees not collected by Iron Mountain when due shall bear interest until paid at a rate of one percent (1%) per month (12% per annum) or the maximum rate permitted by law, whichever is less. Notwithstanding the non-performance of any obligations of Depositor to deliver Deposit Material under the BPaaS Agreement or this Agreement, Iron Mountain is entitled to be paid all Service Fees that accrue during the Term of this Agreement.

**7. Term and Termination**

- (a) The term of this Agreement is for a period of one (1) year from the Effective Date ("**Initial Term**") and will automatically renew for additional one (1) year terms ("**Renewal Term**") (collectively the "**Term**"). This Agreement shall continue in full force and effect until one of the following events occur: (i) Depositor and Beneficiary provide Iron Mountain with sixty (60) days' prior written joint notice of their intent to terminate this Agreement; (ii) Beneficiary provides Iron Mountain and Depositor with sixty (60) days' prior written notice of its intent to terminate this Agreement; (iii) the Agreement terminates under another provision of this Agreement; or (iv) any time after the Initial Term, Iron Mountain provides sixty (60) days' prior written notice to the Depositor and Beneficiary of Iron Mountain's intent to terminate this Agreement. The Effective Date and the Deposit Account Number shall be supplied by Iron Mountain only. The Effective Date supplied by Iron Mountain and specified above shall be the date Iron Mountain sets up the escrow account.
- (b) Unless the express terms of this Agreement provide otherwise, upon termination of this Agreement, Iron Mountain shall return physical Deposit Material to the Depositor and erase electronically submitted Deposit Material. If reasonable attempts to return the physical Deposit Material to Depositor are unsuccessful, Iron Mountain shall destroy the Deposit Material.
- (c) In the event of the nonpayment of undisputed Service Fees owed to Iron Mountain, Iron Mountain shall provide all Parties to this Agreement with written notice of Iron Mountain's intent to terminate this Agreement. Any Party to this Agreement shall have the right to make the payment to Iron Mountain to cure the default. If the past due payment is not received in full by Iron Mountain within thirty (30) calendar days of the date of such written notice, then Iron Mountain shall have the right to terminate this Agreement at any time thereafter by sending written notice to all Parties. Iron Mountain shall have no obligation to perform the Services under this Agreement (except those obligations that survive termination of this Agreement, which includes the confidentiality obligations in Section 10) so long as any undisputed Service Fees due Iron Mountain under this Agreement remain unpaid.

**8. Infringement Indemnification**

Anything in this Agreement to the contrary notwithstanding, Depositor at its own expense shall defend, indemnify and hold Iron Mountain fully harmless against any claim or action asserted against Iron Mountain (specifically including costs and reasonable attorneys' fees associated with any such claim or action) to the extent such claim or action is based on an assertion that Iron Mountain's proper administration of this Agreement infringes any patent, copyright, license or other proprietary right of any third party. When Iron Mountain has notice of a claim or action, it shall promptly notify Depositor in writing. Depositor may elect to control the defense of such claim or action or enter into a settlement agreement, provided that no such settlement or defense shall include any admission or implication of wrongdoing on the part of Iron Mountain without Iron Mountain's prior written consent, which consent shall not be unreasonably delayed or withheld. Iron Mountain shall have the right to employ separate counsel and participate in the defense of any claim at its own expense.

**9. Warranties**

IRON MOUNTAIN WARRANTS ANY AND ALL SERVICES PROVIDED HEREUNDER SHALL BE PERFORMED IN A COMMERCIALY REASONABLE MANNER CONSISTENT WITH INDUSTRY STANDARDS. EXCEPT AS SPECIFIED IN THIS SECTION, ALL CONDITIONS, REPRESENTATIONS, AND WARRANTIES INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, SATISFACTORY QUALITY, OR ARISING FROM A COURSE OF DEALING, USAGE, OR TRADE PRACTICE, ARE HEREBY EXCLUDED TO THE EXTENT ALLOWED BY APPLICABLE LAW. AN AGGRIEVED PARTY MUST NOTIFY IRON MOUNTAIN PROMPTLY UPON LEARNING OF ANY CLAIMED BREACH OF ANY WARRANTY AND, TO THE EXTENT ALLOWED BY APPLICABLE LAW, SUCH PARTY'S REMEDY FOR BREACH OF THIS WARRANTY SHALL BE SUBJECT TO THE LIMITATION OF LIABILITY AND CONSEQUENTIAL DAMAGES WAIVER IN THIS AGREEMENT. THIS DISCLAIMER AND EXCLUSION SHALL APPLY EVEN IF THE EXPRESS WARRANTY AND LIMITED REMEDY SET FORTH ABOVE FAILS OF ITS ESSENTIAL PURPOSE.

**10. Confidential Information**

Iron Mountain shall have the obligation to implement and maintain safeguards designed to protect the confidentiality of the Deposit Material and use at least the same degree of care to safeguard the confidentiality of the Deposit Material as it uses to

protect its own confidential information, but in no event less than a reasonable degree of care. Except as provided in this Agreement Iron Mountain shall not use or disclose the Deposit Material. Iron Mountain shall not disclose the terms of this Agreement to any third party other than its financial, technical, or legal advisors, or its administrative support service providers. Any such third party shall be bound by the same confidentiality obligations as Iron Mountain. If Iron Mountain receives a subpoena or any other order from a court or other judicial tribunal pertaining to the disclosure or release of the Deposit Material, Iron Mountain will promptly notify the Parties to this Agreement unless prohibited by law. After notifying the Parties, Iron Mountain may comply in good faith with such order. It shall be the responsibility of Depositor or Beneficiary to challenge any such order; provided, however, that Iron Mountain does not waive its rights to present its position with respect to any such order. Iron Mountain will cooperate with the Depositor or Beneficiary, as applicable, to support efforts to quash or limit any subpoena, at such Party's expense.

**11. Limitation of Liability**

EXCEPT FOR: (I) LIABILITY FOR DEATH OR BODILY INJURY; (II) PROVEN GROSS NEGLIGENCE OR WILLFUL MISCONDUCT; OR (III) THE INFRINGEMENT INDEMNIFICATION OBLIGATIONS OF SECTION 8, ALL OTHER LIABILITY RELATED TO THIS AGREEMENT, IF ANY, WHETHER ARISING IN CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, OF (A) DEPOSITOR OR BENEFICIARY TO IRON MOUNTAIN, AND (B) IRON MOUNTAIN TO DEPOSITOR OR BENEFICIARY, SHALL BE LIMITED TO THE AMOUNT EQUAL TO ONE YEAR OF FEES PAID TO IRON MOUNTAIN UNDER THIS AGREEMENT. IF CLAIM OR LOSS IS MADE IN RELATION TO A SPECIFIC DEPOSIT OR DEPOSITS, SUCH LIABILITY OF (A) DEPOSITOR OR BENEFICIARY TO IRON MOUNTAIN, AND (B) IRON MOUNTAIN TO DEPOSITOR OR BENEFICIARY, SHALL BE LIMITED TO THE FEES RELATED SPECIFICALLY TO SUCH DEPOSITS. FOR CLARITY, ALL LIABILITY BETWEEN DEPOSITOR AND BENEFICIARY UNDER THIS AGREEMENT SHALL BE GOVERNED BY SECTION 24 (LIABILITY) OF THE BPAAS AGREEMENT.

**12. Consequential Damages Waiver**

IN NO EVENT SHALL (A) DEPOSITOR OR BENEFICIARY BE LIABLE TO IRON MOUNTAIN, AND (B) IRON MOUNTAIN BE LIABLE TO DEPOSITOR OR BENEFICIARY, FOR ANY INCIDENTAL, SPECIAL, PUNITIVE OR CONSEQUENTIAL DAMAGES, LOST PROFITS, ANY COSTS OR EXPENSES FOR THE PROCUREMENT OF SUBSTITUTE SERVICES (EXCLUDING SUBSTITUTE ESCROW SERVICES), OR ANY OTHER INDIRECT DAMAGES, WHETHER ARISING IN CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE EVEN IF THE POSSIBILITY THEREOF MAY BE KNOWN IN ADVANCE TO ONE OR MORE PARTIES. FOR CLARITY, ALL LIABILITY BETWEEN DEPOSITOR AND BENEFICIARY UNDER THIS AGREEMENT SHALL BE GOVERNED BY SECTION 24 (LIABILITY) OF THE BPAAS AGREEMENT.

**13. General**

- (a) Purchase Orders. In the event that the Paying Party issues a purchase order or other instrument used to pay Service Fees to Iron Mountain, any terms and conditions set forth in the purchase order which constitute terms and conditions which are in addition to those set forth in this Agreement or which establish conflicting terms and conditions to those set forth in this Agreement are expressly rejected by Iron Mountain.
- (b) Right to Make Copies. Iron Mountain shall have the right to make copies of all Deposit Material as reasonably necessary to perform the Services. Iron Mountain shall copy all copyright, nondisclosure, and other proprietary notices and titles contained on Deposit Material onto any copies made by Iron Mountain. Any copying expenses incurred by Iron Mountain as a result of a Work Request to copy will be borne by the requesting Party. Iron Mountain may request Depositor's reasonable cooperation in promptly copying Deposit Material in order for Iron Mountain to perform this Agreement.
- (c) Choice of Law. The validity, interpretation, and performance of this Agreement shall be construed under the laws of the Commonwealth of Massachusetts, USA, without giving effect to the principles of conflicts of laws.
- (d) Authorized Person(s). Depositor and Beneficiary must each authorize and designate one person whose actions will legally bind such Party ("Authorized Person" who shall be identified in the Authorized Person(s) Notices Table of this Agreement or such Party's legal representative) and who may manage the Iron Mountain escrow account through the Iron Mountain website or written instruction. Depositor and Beneficiary warrant that they shall maintain the accuracy of the name and contact information of their respective designated Authorized Person during the Term of this Agreement by providing Iron Mountain and the other Party with a written request to update its records for the Party's respective Authorized Person which includes the updated information and applicable deposit account number(s).
- (e) Right to Rely on Instructions. With respect to release of Deposit Material or the destruction of Deposit Material, Iron Mountain shall rely on instructions from a Party's Authorized Person, provided that it is in accordance with Exhibit C. In all other cases, Iron Mountain may act in reliance upon any instruction, instrument, or signature reasonably believed by Iron Mountain to be genuine and from an Authorized Person, officer, or other employee of a Party. Iron Mountain may assume that such representative of a Party to this Agreement who gives any written notice, request, or instruction has the authority to do so. Iron Mountain will not be required to inquire into the truth of, or evaluate the merit of, any statement or representation contained in any notice or document reasonably believed to be from such representative.
- (f) Force Majeure. No Party shall be liable for any delay or failure in performance under this Agreement due to events outside the defaulting Party's reasonable control, including without limitation acts of God, strikes, riots, war, acts of terrorism, fire, epidemics, or delays of common carriers or other circumstances beyond its reasonable control. The obligations and rights of the excused Party shall be extended on a day-to-day basis for the time period equal to the period of the excusable delay.

- (g) **Notices.** Iron Mountain shall have the right to rely on the last known notice address provided by each of the Depositor and Beneficiary, which are as follows as of the Effective Date:

DEPOSITOR	BENEFICIARY
Cognizant Technology Solutions US Corporation 500 Frank W. Burr Blvd. Teaneck, New Jersey 07666 Attn: General Counsel	Health Net, Inc. 21650 Oxnard Street Woodland Hills, CA 91367 Attn: Vendor Management Officer  With a copy to: Health Net, Inc. 21650 Oxnard Street Woodland Hills, CA 91367 Attn: General Counsel

Iron Mountain's notice address as of the Effective Date is set forth on page 7 of this Agreement. Iron Mountain, Beneficiary, and Depositor may change their respective notice addresses by sending written notice to the other Parties in accordance with this Section identifying such new address. If Depositor or Beneficiary changes their Authorized Person, Depositor and Beneficiary shall also provide notice of the change to the other Parties. All notices regarding Exhibit C (Release of Deposit Material) shall be sent by commercial express mail or other commercially appropriate means that provide prompt delivery and require proof of delivery. All other correspondence, including but not limited to invoices and payments, may be sent electronically or by regular mail. The Parties shall have the right to rely on the last known notice address of the other Parties set forth above, or as may be changed as provided above. Any correctly addressed notice to the last known address of the other Parties, that is refused, unclaimed, or undeliverable shall be deemed effective as of the first date that said notice was refused, unclaimed, or deemed undeliverable by the postal authorities or commercial express mail.

- (h) **No Waiver.** No waiver of any right under this Agreement by any Party shall constitute a subsequent waiver of that or any other right under this Agreement.
- (i) **Assignment.** No assignment of this Agreement by Depositor or any rights or obligations of Depositor under this Agreement is permitted without the written consent of Iron Mountain and Beneficiary. Any assignment by Deposit by operation of law, order of any court, or pursuant to any plan of merger, consolidation, or liquidation, shall be deemed an assignment for which prior consent is required and any assignment by Depositor made without any such consent shall be void and of no effect as between the Parties. Iron Mountain shall have no obligation in performing this Agreement to recognize any successor or assign of Depositor unless Iron Mountain receives clear, authoritative and conclusive written evidence of the change of Parties. Beneficiary may assign its rights and obligations under this Agreement without the approval of Iron Mountain or Depositor to the extent that Beneficiary may assign its interest in the BPaaS Agreement without such consent.
- (j) **Severability.** In the event any of the terms of this Agreement become or are declared to be illegal or otherwise unenforceable by any court of competent jurisdiction, such term(s) shall be null and void and shall be deemed deleted from this Agreement. All remaining terms of this Agreement shall remain in full force and effect.
- (k) **Independent Contractor Relationship.** Depositor and Beneficiary understand, acknowledge, and agree that Iron Mountain's relationship with Depositor and Beneficiary will be that of an independent contractor and that nothing in this Agreement is intended to or should be construed to create a partnership, joint venture, or employment relationship.
- (l) **Attorneys' Fees.** Any costs and fees incurred by Iron Mountain in the performance of obligations imposed upon Iron Mountain solely by virtue of its role as escrow service provider including, without limitation, compliance with subpoenas, court orders, discovery requests, and disputes arising solely between Depositor and Beneficiary, including, but not limited to, disputes concerning a release of the Deposit Material shall, unless adjudged otherwise, be divided equally and paid by Depositor and Beneficiary. In any suit or proceeding between the Parties relating to this Agreement, the prevailing Party will have the right to recover from the other(s) its costs and reasonable fees and expenses of attorneys, accountants, and other professionals incurred in connection with the suit or proceeding, including costs, fees and expenses upon appeal, separately from and in addition to any other amount included in such judgment, except that in no event shall Iron Mountain be liable for any costs or fees incurred by either Depositor or Beneficiary. This provision is intended to be severable from the other provisions of this Agreement, and shall survive and not be merged into any such judgment.
- (m) **No Agency.** No Party has the right or authority to, and shall not, assume or create any obligation of any nature whatsoever on behalf of the other Parties or bind the other Parties in any respect whatsoever.
- (n) **Disputes.** Any dispute, difference or question arising among (i) Iron Mountain and (ii) any of the Parties, concerning the construction, meaning, effect or implementation of this Agreement or the rights or obligations of any Party under this Agreement will be submitted to, and settled by arbitration by a single arbitrator chosen by the corresponding Regional Office of the American Arbitration Association in accordance with the Commercial Rules of the American Arbitration Association. The Parties shall submit briefs of no more than 10 pages and the arbitration hearing shall be limited to two (2) days maximum. Arbitration will take place in Boston, Massachusetts, USA. Any court having jurisdiction over the matter may enter judgment

on the award of the arbitrator. Service of a petition to confirm the arbitration award may be made by regular mail or by commercial express mail, to the attorney for the Party or, if unrepresented, to the Party at the last known business address. Notwithstanding the foregoing, any dispute, difference or question arising between Beneficiary and Depositor will be governed by the dispute resolution provisions of the BPaaS Agreement.

- (o) Interpleader. Anything to the contrary notwithstanding, in the event of any dispute regarding the interpretation of this Agreement, or the rights and obligations with respect to the Deposit Material in escrow or the propriety of any action contemplated by Iron Mountain hereunder, then Iron Mountain may, in its sole discretion, file an interpleader or similar action in any court of competent jurisdiction to resolve any such dispute.
- (p) Regulations. Depositor and Beneficiary are responsible for and warrant, to the extent of their individual actions or omissions, compliance with all applicable laws, rules and regulations, including but not limited to: customs laws; import; export and re-export laws; and government regulations of any country from or to which the Deposit Material may be delivered in accordance with the provisions of this Agreement. Depositor represents and warrants that the establishment of a deposit account containing ITAR regulated Deposit Material for the Beneficiary, and Iron Mountain's subsequent release of such Deposit Material under the terms of this Agreement will be lawful under any applicable U.S. export control regulations and laws, including ITAR. Conversely, Depositor shall refrain from establishing a deposit account containing ITAR regulated Deposit Material for the Beneficiary if the release of such Deposit Material to the Beneficiary, under the terms of this Agreement, would be in violation of any applicable U.S export control regulations and laws, including ITAR. With respect to Deposit Material containing personal information and data, Depositor agrees to (i) procure all necessary consents in relation to personal information and data; and (ii) otherwise comply with all applicable privacy and data protection laws as they relate to the subject matter of this Agreement. Iron Mountain is responsible for and warrants, to the extent of their individual actions or omissions, compliance with all applicable laws, rules and regulations to the extent that it is directly regulated by the law, rule or regulation and to the extent that it knows or has been advised that, as a result of this Agreement, its activities are subject to the law, rule or regulation. Notwithstanding anything in this Agreement to the contrary, if an applicable law or regulation exists or should be enacted which is contrary to the obligations imposed upon Iron Mountain hereunder, and results in the activities contemplated hereunder unlawful, Depositor and/or Beneficiary will notify Iron Mountain and Iron Mountain will be relieved of its obligations hereunder unless and until such time as such activity is permitted.
- (q) No Third Party Rights. This Agreement is made solely for the benefit of the Parties to this Agreement and their respective permitted successors and assigns under this Agreement or the BPaaS Agreement, and no other person or entity shall have or acquire any right by virtue of this Agreement unless otherwise agreed to by all the Parties hereto.
- (r) Entire Agreement. The Parties agree that this Agreement, which includes all attached Exhibits and all valid Work Requests and SOWs submitted by the Parties, is the complete agreement between the Parties concerning the subject matter of this Agreement and replaces any prior or contemporaneous oral or written communications between the Parties. There are no conditions, understandings, agreements, representations, or warranties, expressed or implied, which are not specified herein. Each of the Parties warrant that the execution, delivery, and performance of this Agreement has been duly authorized and signed by a person who meets statutory or other binding approval to sign on behalf of its organization as named in this Agreement. This Agreement may be modified only by mutual written agreement of all the Parties.
- (s) Counterparts. This Agreement may be executed electronically in accordance with applicable law or in any number of counterparts, each of which shall be an original, but all of which together shall constitute one instrument.
- (t) Survival. Sections 7 (Term and Termination), 8 (Infringement Indemnification), 9 (Warranties), 10 (Confidential Information), 11 (Limitation of Liability), 12 (Consequential Damages Waiver), and 13 (General) of this Agreement shall survive termination of this Agreement or any Exhibit attached hereto.

IN WITNESS WHEREOF, the Parties have duly executed this Agreement as of the Effective Date by their authorized representatives:

 Facsimile: 770-239-9201

## Exhibit C Release of Deposit Material

Deposit Account Number	
------------------------	--

Iron Mountain will use the following procedures to process any written notice from Beneficiary to release the Deposit Material. [Note to Iron Mountain: Why is a Work Request necessary for Iron Mountain just to release the Deposit Material? Would it be sufficient for Beneficiary to provide written notice? There should be no negotiation of terms related to a request to release Deposit Materials.] All notices under this Exhibit C shall be sent pursuant to the terms of Section 13(g) Notices.

### 1. **Release Conditions.**

Depositor and Beneficiary agree that a Request for Release Notice (defined below) from Beneficiary for the release of the Deposit Material shall be based solely on one or more of the following conditions (defined as “**Release Conditions**”):

- (i) Depositor’s material breach of the BPaaS Agreement or other agreement between the Depositor and Beneficiary regulating the use of the Deposit Material covered under this Agreement, provided that such material breach has not been cured within thirty (30) days of receipt of notice of such material breach;
- (ii) Failure of the Depositor to function as a going concern or operate in the ordinary course or Depositor fails to carry on its business or the part of its business which relates to the Deposit Materials;
- (iii) Depositor (a) files any petition in bankruptcy, (b) has an involuntary petition in bankruptcy filed against it which is not challenged in thirty (30) days and dismissed within ninety (90) days, (c) becomes insolvent, (d) makes a general assignment for the benefit of creditors, or (e) has a receiver appointed for its assets;
- (iv) The BPaaS Agreement is terminated by Beneficiary pursuant to Section 16.1(a) (*Termination for Cause*), 16.1(c) (*Termination for Certain Service Level Failures*), 16.1(e) (*Termination Following a Change of Control of Supplier*), 16.1(i) (*Termination Due To Adverse Changes in Supplier’s Financial Circumstances*), 16.1 (k) (*Termination if Supplier Becomes a Competitor of Health Net*), 16.1(l) (*Termination Relating to Supplier’s Liability Cap*), or 16.1(m) (*Termination Relating to Business Associate Agreement*); or
- (v) Depositor fails to make a deposit in accordance with this Agreement within thirty (30) days of written notice to Depositor.

### 2. **Request for Release Notice.**

Beneficiary may submit a written notice to Iron Mountain to release the Deposit Material covered under this Agreement (a “Request for Release Notice”). To the extent that the Deposit Material is subject to applicable U.S. export control regulations and laws, including ITAR, the Request for Release Notice must include Beneficiary’s certification that such release would be compliant with the applicable U.S. export control regulations and laws, including ITAR. Beneficiary shall send concurrently a copy of any such Request for Release Notice to Depositor.

### 3. **Release of Deposit Material.**

Iron Mountain shall release the Deposit Material to the Beneficiary promptly after the fifth (5th) business day following its receipt of a Request for Release Notice; provided that Iron Mountain has not been enjoined by a court of competent jurisdiction from doing so. Iron Mountain shall also promptly release the Deposit Materials to the Beneficiary upon written instructions from Depositor, or joint written instructions from Depositor and Beneficiary. Iron Mountain is entitled to receive any undisputed, unpaid Service Fees due Iron Mountain from the Parties before fulfilling the Work Request for Release Notice to release Deposit Material covered under this Agreement. If any Service Fees are owed to Iron Mountain when Iron Mountain receives a Request for Release Notice, or joint written instructions from Depositor and Beneficiary, Iron Mountain shall promptly give notice to the Beneficiary of the amount of such unpaid Service Fees. Any Party may cure a default of payment of Service Fees.

### 4. **Termination of Agreement Upon Release.**

This Agreement will terminate upon the release of Deposit Material held by Iron Mountain.

### 5. **Right to Use Following Release.**

Beneficiary has the right under this Agreement to use the Deposit Material for the sole purpose set forth in the BPaaS Agreement. Notwithstanding, the Beneficiary shall not have access to the Deposit Material under this Agreement unless there is a release of the Deposit Material in accordance with this Agreement. Beneficiary shall be obligated to maintain the confidentiality of the Deposit Material released under this Agreement in accordance with the BPaaS Agreement.

## Exhibit Q Escrow Deposit Questionnaire

Deposit Account Number	
------------------------	--

### Purpose of Questionnaire

In order for Iron Mountain to determine the deposit material requirements and to quote fees associated with verification Services, a completed Deposit Questionnaire is requested. It is the responsibility of the escrow depositor to complete the questionnaire.

### Technical Contact Information

List the appropriate technical person(s) Iron Mountain may contact regarding this set of escrow deposit materials.

<b>Company Name</b>	
<b>Print Contact Name</b>	
<b>Address 1</b>	
<b>City</b>	
<b>State/Province</b>	
<b>Postal/Zip Code</b>	
<b>Telephone</b>	
<b>Email Address</b>	

### Instructions

Complete the questionnaire in its entirety by answering every question accurately. Upon completion, return the questionnaire to the beneficiary asking for its completion, or e-mail it to your Iron Mountain Solution Sales Representative.

### General Description (Required) – Please answer all questions.

What is the general function of the software (i.e. the deposit) to be placed into escrow?	
On what media will the source and object code be delivered?	
If the deposit is on magnetic tape media, what tape format (e.g. DAT DDS4, DLT 8000, LTO-3, etc.) will be used for the deposit?	
If the deposit is on tape, what operating system and version was used to create the tape and what tools (either native OS (e.g. tar, cpio, etc.) or commercial (e.g. Backup Exec, NetBackup, ArcServ etc.) were used to load the data; if a third party or commercial software tool was used, specify the vendor and exact version of the tool used.	
Will the deposit be in the format of a database/repository of any type of Versioning or Configuration Management Tool (e.g. Visual Source Safe, Clearcase, Perforce, etc.) or will the software in the deposit be in a clear text/native file system format? If a Versioning or CM tool will be necessary to examine any part the deposit contents, specify the Vendor and tool and exact version used.	
Is the deposit encrypted, including password protected archives, in any way? If so, what tool and version will be used to perform the encryption and will all necessary user id's, passwords or encryption keys be provided to extract the	

software?	
What is the total uncompressed size of the deposit in megabytes?	

**Requirements for the Assembly of the Deposit (Required) – Please answer all questions.**

Describe the nature of the source and object code in the deposit. (Does the deposit include interpreted code, compiled source, object code, or a mixture? How do the different parts of the deposit relate to each other?) What types of source code and object code make up the deposit (e.g. – C++, Java, etc.)	
How many build processes are there?	
How many unique build environments are required to assemble the material in the deposit into the deliverables?	
What hardware is required for each build environment to compile the software (including memory, disk space, etc.)?	
What operating systems (including versions) are used during compilation? Is the software executed on any other operating systems/version?	
How many separate deliverable components (executables, share libraries, etc.) are built?	
What compilers/linkers/other tools (brand and version) are necessary to build the application?	
What, if any, third-party libraries are used to build the software? Specify vendor, tool name and exact or minimum required version. If multiple build environments are required, specify for which environment each tool is required.	
If a database of any kind is necessary to support compilation, is a running instance of the database necessary or is a static instance consisting of the static and shared libraries and/or header files installed by the database sufficient to support compilation? If not already identified above, provide the vendor and version of the required database.	
How long does a complete build of the software take? How much of that time requires some form of human interaction and how much is automated?	
Does the deposit contain formal build document(s) describing the necessary steps for build system configuration and compilation?	

**Requirements for the Execution of the Software Protected by the Deposit - (Required) – Please answer all questions.**

What are the system hardware requirements to successfully execute the software? (memory, disk space, etc.); include any additional peripheral devices that may be necessary to support correct function of the software/system.	
What is the minimum number of machines required to completely set up the software sufficient to support functional testing? What Operating systems and version are required for each machine?	
Beyond the operating systems, what additional third party software and tools are required to execute the software and verify correct operation? Please provide vendor and versions of all third party tools or libraries required to completely configure a system suitable to support functional testing. If multiple machines are required to support testing, identify the software to be installed to each machine.	
Is a database of any kind required to support functional testing	

of the software? If so, provide the vendor and version required.	
If a database is required, does the deposit contain or can the depositor provide scripts and backups/imports necessary to create a database instance suitable to support functional testing. Note: a database containing test data is satisfactory to support functional testing so long as the data is realistic.	
Including the installation of any software tools required to support the function of the software, approximately how much time is required to setup and configure a system suitable to support functional testing?	
Approximately how much time would be required to perform a set of limited tests once a test system is configured?	
Does the deposit contain or can the depositor provide test plans, scripts or procedures to facilitate testing?	
With the exception of any database identified above, are any connections to external data sources, feeds or sinks required to support the proper functioning of the software and to support software testing?	

For additional information about Iron Mountain Technical Verification Services, please contact our Iron Mountain Solution Sales Representative.

**BUSINESS ASSOCIATE AGREEMENT**

**Between**

**Health Net, Inc.**

**and**

**Cognizant Healthcare Services, LLC**

**and**

**Cognizant Technology Solutions U.S. Corporation**

**Dated**

**November 21, 2014**

## BUSINESS ASSOCIATE AGREEMENT

This Business Associate Agreement (“Agreement”) is dated November 21, 2014, but is effective as of November 2, 2014, by and between Health Net, Inc., and/or one or more of its affiliates or subsidiaries (“Covered Entity” or “Health Net”) and Cognizant Technology Solutions U.S. Corporation (“CTS US”) and Cognizant Healthcare Services, LLC (“CH LLC”). CTS US and CH LLC are each sometimes referred to herein as “Business Associate” or “Vendor”. Health Net and Business Associates are sometimes referred to individually in this Agreement as a “Party” and collectively as the “Parties”. This Business Associate Agreement replaces and supersedes in all respects the Business Associate Agreement dated November 2, 2014.

### RECITALS

A. On September 30, 2008, CTS US and Health Net entered into a Master Services Agreement for the provision of services (“AO Agreement”). On or around the date of this Agreement or shortly thereafter, Health Net and CH LLC entered (or will enter) into a contract or contracts for the provision of services, software or some other business arrangement, as amended. Such contracts and the AO Agreement are collectively referred to hereinafter as the “Current Contract(s)”.

B. The Parties contemplate that they may enter into additional agreements in the future pursuant to which Vendors may provide services to Health Net, license software to Health Net or enter into some other business arrangement (“Future Contracts”).

C. In connection with the Current Contracts(s) and the Future Contracts (collectively, the “Health Net – Vendor Contracts” and individually, a “Health Net – Vendor Contract”), Vendors may, on Health Net’s behalf, access, use, create and/or disclose Protected Health Information (“PHI”) or Electronic Protected Health Information (“ePHI”), as defined in the federal regulations set forth at 45 C.F.R. §§ 160 and 164.

D. Health Net and Vendors intend to protect the privacy and provide for the security of PHI and/or ePHI disclosed to Vendors in compliance with the HIPAA Requirements.

**NOW THEREFORE**, in consideration of the mutual promises set forth below and in the Health Net – Vendor Contracts and the exchange of information pursuant to this Agreement, the Parties hereto agree as follows:

### I. DEFINITIONS

- a. “*Breach*” shall mean (i) any actual circumstance that compromises the privacy and/or security of any Health Net data or Health Net software or systems which are possessed or operated by (or for) or are under the control of Vendor or a third party that received such Health Net data (directly or indirectly) through Vendor (with the exception of a third party to which Health Net directs Vendor in writing to provide Health Net data, including auditors, regulators and contractors but excluding Subcontractors); or (ii) any loss or unauthorized acquisition, access, destruction, alteration, disclosure or use (in all cases whether intentional or not) of, or the inability to locate, Health Net data which was delivered to, created, maintained or accessed by, Vendor or a third party that received such Health Net data (directly or indirectly) through Vendor (with the exception of a third party to which Health Net directs Vendor in writing to provide

Health Net data, but excluding Subcontractors). For purposes of defining “in control” as that term is used in clause (i) of this definition, Vendor shall be deemed to be in control of Health Net data, Health Net software or systems in the IBM data center to the extent (A) Vendor provides or is required to provide systems monitoring or related management or other services that affect the security of such Health Net data, Health Net software or systems, (B) Vendor is obligated to manage IBM or any third party under this Agreement, or (C) any other circumstance in which Supplier’s acts or omissions could have prevented the Breach if Vendor had exercised due care and complied with its obligations under this Agreement.

- b. *“Breach Notification Rule”* shall refer to the provisions set forth in 45 C.F.R. Part 160 and Part 164, Subpart D.
- c. *“Business Associate”* shall have the meaning given to such term at 45 C.F.R. § 160.103 and includes a person or entity that creates, receives, maintains, or transmits PHI on behalf of a covered entity. For the purposes of this Agreement, Vendors are Business Associates.
- d. *“Covered Entity”* shall have the meaning given to such term at 45 C.F.R. § 160.103. For the purposes of this Agreement, the Covered Entity is Health Net.
- e. *“Designated Record Set”* shall have the meaning given to such term in 45 C.F.R. § 164.501.
- f. *“Discovery”* shall mean the first day on which a Breach is known to Business Associate (including any person, other than the individual committing the breach, that is an employee, officer, or Subcontractor of Business Associate), or should reasonably have been known to Business Associate, to have occurred.
- g. *“Final Omnibus HIPAA/HITECH Rules”* shall mean the rules published on January 25, 2013 at 78 Fed. Reg. 5566.
- h. *“HIPAA”* or *“Health Insurance Portability and Accountability Act of 1996”* shall refer to Public Law 104-191 and its implementing regulations.
- i. *“HIPAA Rules”* shall mean the Privacy, Security, Breach Notification, and Enforcement Rules at 45 C.F.R. Part 160 and Part 164.
- j. *“HIPAA Requirements”* shall mean collectively HIPAA, the HIPAA Rules, the HITECH Act and the Final Omnibus HIPAA/HITECH Rules.
- k. *“HITECH Act”* or *“Health Information Technology for Economic and Clinical Health Act”* are those provisions set forth in Title XIII of Public Law 111-5 as enacted on February 17, 2009 and its implementing regulations.
- l. *“Individual”* shall have the meaning given to such term at 45 C.F.R. § 160.103, and shall include a person who qualifies as a personal representative in accordance with 45 C.F.R. § 164.502(g).

- m. *"Privacy Rule"* is the regulation entitled "Standards for Privacy of Individually Identifiable Health Information," promulgated under HIPAA and/or the HITECH Act that is codified at 45 C.F.R. Parts 160 and 164, Subparts A and E.
- n. *"Protected Health Information" ("PHI") and "Electronic Protected Health Information" ("ePHI")* shall have the meaning given to such terms at 45 C.F.R. § 160.103; provided, such PHI or ePHI shall be limited to the information Business Associate creates, receives, maintains or transmits on behalf of Covered Entity. Unless specifically delineated otherwise, references herein to PHI shall include ePHI.
- o. *"Required by Law"* shall have the meaning given to such term at 45 C.F.R. § 164.103.
- p. *"Secretary"* shall mean the Secretary of the United States Department of Health and Human Services or her designee.
- q. *"Security Rule"* is the regulation entitled "Security Standards for the Protection of Electronic Protected Health Information," promulgated under HIPAA and/or the HITECH Act that is codified at 45 C.F.R. parts 160 and 164, Subparts A and C.
- r. *"Subcontractor"* shall mean any entity (including an agent) that creates, receives, maintains, or transmits PHI on behalf of a Business Associate.
- s. *"Unsecured Protected Health Information" or "Unsecured PHI"* means Protected Health Information that is not secured through the use of a technology or methodology specified by guidance issued by the Secretary from time to time.
- t. *Catch-all definitions:* The following terms used in this Agreement shall have the same meaning as those terms in the HIPAA Rules: Data Aggregation, Disclosure, Health Care Operations, Individual, Minimum Necessary, Notice of Privacy Practices, Required By Law, Secretary, Security Incident, Subcontractor, Unsecured Protected Health Information, and Use.

## II. OBLIGATIONS OF BUSINESS ASSOCIATES

- a. Business Associates agree to not access, use, maintain and/or disclose PHI other than as permitted or required by this Agreement, the Health Net – Vendor Contracts or as Required by Law. Business Associates may not further use or disclose PHI in a manner that would violate the HIPAA Requirements if done by Covered Entity. Business Associates shall also comply with any further limitations on uses and disclosures agreed to by Covered Entity provided that such agreed upon limitations have been communicated to the Business Associate in writing.

If either Business Associate subcontracts some or all of the services set forth in the Health Net – Vendor Contracts that require an entity to access, create, receive, maintain, transmit, or use PHI, on behalf of Covered Entity, any such entities are Subcontractors and are subject to the HIPAA Requirements. Each Business Associate, accordingly, must, within a reasonable time following the execution of this Agreement, enter into written Business Associate Agreements with all such Subcontractors (i) that comply with the HIPAA Requirements, (ii) that include restrictions, conditions, requirements and obligations at least as stringent as those set forth in this Agreement,

and (iii) that describe the Subcontractors' permitted uses and disclosures of PHI. Any such uses and disclosures may not include uses and disclosures not permitted by Business Associates.

Each Business Associate and its Subcontractors must keep records and submit compliance reports to HHS, when HHS requires such disclosure, in order to investigate Business Associates' and their Subcontractors' compliance with the HIPAA Requirements, and to cooperate with complaint investigations and compliance reviews in compliance with 45 C.F.R. § 160.310(a), (b). Each Business Associate and its Subcontractors must make reasonable efforts to limit use and disclosure of PHI and requests for PHI to the minimum necessary. To the extent either Business Associates are to carry out one or more of Health Net's obligation(s) under Subpart E of 45 C.F.R. Part 164 (the Privacy Rule), such Business Associate will comply with the requirements of Subpart E that apply to the Covered Entity in the performance of such obligation(s).

- b. *Permitted Uses and Disclosures.* Business Associates may use and disclose PHI created or received pursuant to this Agreement as follows:
- i. *To carry out the purposes of this Agreement or the applicable Health Net – Vendor Contracts.* Each Business Associate may access, use and/or disclose Covered Entity's PHI received or created by Business Associate (or its Subcontractors) in performing its obligations pursuant to this Agreement or the applicable Health Net - Vendor Contract(s), solely in accordance with the specifications set forth in this Agreement and the Health Net – Vendor Contract(s), or as Required by Law.
  - ii. *Use for Management and Administration.* Each Business Associate may use PHI created or received in its capacity as a Business Associate of Covered Entity for the proper management and administration of Business Associate, if such use is necessary (i) for the proper management and administration of Business Associate or (ii) to carry out the legal responsibilities of Business Associate.
  - iii. *Disclosure for Management and Administration.* Each Business Associate may disclose PHI created or received in its capacity as a Business Associate of Covered Entity for the proper management and administration of Business Associate if (i) the disclosure is Required by Law or (ii) Business Associate (a) obtains reasonable assurances in writing from the person to whom the PHI is disclosed that it will be held confidentially and used or further disclosed only as Required by Law or for the purpose for which it was disclosed to the person and (b) the person agrees to notify Business Associate in writing of any instances of which it becomes aware in which the confidentiality or security of the PHI has been breached. Business Associate shall notify Covered Entity at least five (5) days prior to making a disclosure of PHI pursuant to this subsection.
  - iv. *De-Identification and Data Aggregation.* Each Business Associate may not de-identify PHI received or created pursuant to this Agreement unless specifically data de-identification is a service identified in the Health Net – Vendor Contracts. Should a Business Associate perform data de-identification functions for Health Net, pursuant to the Health Net – Vendor Contracts, such de-identification shall conform to the requirements of 45 C.F.R. § 164.514(b). If included in the Health Net – Vendor contracts, a Business Associate may provide data aggregation services relating to the health care operations of Health Net.

c. *Security and Privacy Safeguards.* Each Business Associate shall use reasonable and appropriate administrative, physical, and technical safeguards designed to prevent improper use or disclosure of PHI, in any form or media; and, each Business Associate shall comply with the applicable provisions of Subpart C of 45 C.F.R. Part 164 with respect to electronic protected health information (ePHI).

i. With respect to ePHI, each Business Associate shall implement and comply with (and ensure that its Subcontractors implement and comply with) the applicable administrative safeguards set forth at 45 C.F.R. 164.308, the physical safeguards set forth at 45 C.F.R. 164.310, the technical safeguards set forth at 45 C.F.R. 164.312, the organization requirements set forth at 45 C.F.R. 164.314, and the policies and procedures set forth at 45 C.F.R. 164.316 to reasonably and appropriately protect the confidentiality, integrity, and availability of the PHI and ePHI that it accesses, uses, creates, maintain, transmits and/or discloses on behalf of Health Net.

If a Business Associate is to carry out any part of Health Net's obligations under the Privacy Rule, the Business Associate and, as applicable, its Subcontractors must also comply with the Privacy Rule with respect to any such obligations. Business Associates acknowledge that, the foregoing safeguards and requirements shall apply to Business Associates and Business Associates' Subcontractors in the same manner that such requirements apply to Health Net, and (b) Business Associates and their Subcontractors may be liable under the civil and criminal enforcement provisions set forth at 42 U.S.C. 1320d-5 and 1320d-6, as amended from time to time, for failure to comply with the safeguards, policies and procedures and requirements and any guidance issued by the Secretary from time to time with respect to such requirements. Business Associates and their Subcontractors may be liable for violations of any applicable HIPAA Requirement. Each Business Associate shall ensure that, within a reasonable time following the execution of this Agreement, any Subcontractor to whom it discloses PHI agrees in writing to implement safeguards at least as stringent as those applicable to Business Associate as set forth in this Agreement.

d. *Reporting of Breaches.* Each Business Associate agrees to report to Covered Entity any Breach of Unsecured PHI involving it or its Subcontractor(s) without unreasonable delay and in no case later than two (2) business days after Discovery of a Breach. Such notice shall include, to the extent known to the Business Associate, the identification of each individual whose Unsecured PHI has been, or is reasonably believed to have been accessed, acquired, maintained, used or disclosed in connection with such Breach. Notifications must be sent to [privacy@healthnet.com](mailto:privacy@healthnet.com). In addition, Business Associate shall provide any additional information reasonably requested by Covered Entity for purposes of investigating, reporting or, responding to the Breach..

e. *Reporting of additional Incidents:* Each Business Associate and its Subcontractors shall report to Health Net any: (i) loss, destruction, alteration, or other incident in which PHI cannot be accounted for, (ii) any successful Security Incidents, or (iii) any other acquisition, access, use, or disclosure of PHI not permitted by the Health Net – Vendor Contracts or this Agreement (collectively, an "Incident"). Business Associate shall notify Health Net of any Incident within two (2) business days of knowledge by Business Associate or Subcontractor of such Incident.

f. *Determination of Breach:* Each Business Associate shall (i) notify Health Net of any Incident, and (ii) assist Health Net in performing (or at Health Net's direction, perform) a risk assessment to determine if there is a low probability that the PHI has been compromised. Health Net shall

make the ultimate determination as to whether there has been a Breach and if so, whether the required notifications, including to individuals, the media, as applicable, and the Secretary, will be provided by Covered Entity or Business Associate. To enable Health Net to make a determination whether or not there is a low probability that PHI has been compromised, Business Associate, and any Subcontractor of Business Associate, shall promptly undertake a risk assessment that addresses the following factors and provide the results of such risk assessment to Health Net:

- (i) The nature and extent of the protected health information involved, including the types of identifiers and the likelihood of re-identification;
- (ii) the unauthorized person who used the protected health information or to whom the disclosure was made;
- (iii) whether the protected health information was actually acquired or viewed; and,
- (iv) the extent to which the risk to the protected health information has been mitigated.

Each Business Associate shall maintain complete records regarding any Incident or Breach for the period required by 45 C.F.R. § 164.530(j) or such longer period required by state law, and shall make such records available to Covered Entity promptly upon request, but in no event later than within five (5) business days. Each Business Associate further agrees to mitigate, to the extent practicable, any harmful effect that becomes known to Business Associate of an Incident or Breach. Each Business Associate shall be responsible for all reasonable Identity-Related Costs incurred in connection with the Incident or Breach involving PHI delivered to, created, maintained, or accessed by Business Associate or a Subcontractor of Business Associate, including but not limited to, any notifications and mitigation activities taken pursuant to this provision.

- g. *Additional Responsibilities in the Event of Incident or Breach.* Business Associates shall take prompt steps designed to prevent the recurrence of any Incident or Breach and take any other action pertaining to any unauthorized access, use and/or disclosure required by applicable federal and state laws and regulations. Business Associates must comply with this provision regardless of any actions taken by Covered Entity.
- h. *Use of Subcontractors.* Other than as may be set forth in the Health Net – Vendor Contracts, Business Associates shall not contract with a Subcontractor without the express prior written consent of Health Net’s Privacy Officer. Upon request, a Business Associate shall provide, in writing, to Health Net’s Privacy Office at Privacy@healthnet.com, a list of those entities that will fall within the scope of “Subcontractors” as defined in this Agreement, meaning that such entities receive or are expected to receive, access, use, maintain and/or disclose PHI or ePHI that is subject to this Agreement and the Health Net – Vendor Contract(s). Each Business Associate shall ensure that, consistent with the terms of the Health Net – Vendor Contract(s) with regard to use of Subcontractors, any of its Subcontractors to whom it discloses or provides, or which have access to, PHI and/or ePHI pursuant to this Agreement or any Health Net – Vendor Contract(s), agree in writing, within a reasonable time following the execution of this Agreement, to

restrictions, conditions and safeguards that are at least as stringent as those that apply to Business Associate pursuant to this Agreement with respect to any such PHI and/or ePHI. With respect to the obligations of Section II.d. and II.e. hereof, each Business Associate represents that any Subcontractor shall be obligated to notify the respective Business Associate, who will in turn notify Covered Entity, of any Breach or Incident within two (2) business days in the same manner and according to the same terms as provided herein.

*Availability of Information to Covered Entity.* If applicable, within five (5) business days of receipt of a request from Covered Entity, a Business Associate and, as applicable, its Subcontractor(s) shall make available to Covered Entity such information as Covered Entity may require to fulfill Covered Entity's obligations to provide access to, and a copy of, PHI pursuant to the Privacy Rule, including but not limited to 45 C.F.R. § 164.524. If an Individual requests such information directly from a Business Associate or a Business Associate's Subcontractors, the respective Business Associate must notify Covered Entity in writing within five (5) business days of any such request. Business Associates shall not give the Individual access to the information unless access is approved by Covered Entity. If the PHI requested is maintained electronically in one or more Designated Record Sets, Business Associate will be required to produce an electronic copy of PHI if the individual requests it and the form is readily produceable. If PHI is not readily producible in the requested form, then Business Associate will work with Health Net on an alternate form and format in which to provide the copy of PHI. Covered Entity shall have full discretion to determine whether the Individual shall be given access. If a Business Associate maintains an Electronic Health Record with PHI, and an individual requests a copy of such information in an electronic format, Business Associate shall provide such information in an electronic format to enable Covered Entity to fulfill its obligations under the HITECH Act, including but not limited to, 42 U.S.C. § 17935(e).

- i. *Amendment of PHI.* If applicable, within five (5) business days of receipt of a request from Covered Entity or directly from an Individual or third party, Business Associate and, as applicable, its Subcontractor(s) shall make Covered Entity's PHI and/or ePHI available to Covered Entity as it may require to fulfill Covered Entity's obligations to amend such PHI and/or ePHI pursuant to the Privacy Rule, including but not limited to, 45 C.F.R. § 164.526. Business Associates shall incorporate any amendments to Covered Entity's PHI and/or ePHI Business Associates maintain.
- j. *Accounting of PHI.* If applicable, within (5) business days of notice by Covered Entity of a request for an accounting of disclosures of PHI or ePHI, Business Associates and, as applicable, their Subcontractor(s) shall make available the PHI and/or ePHI to Covered Entity as required for Covered Entity to fulfill its obligations to provide an accounting pursuant to the Privacy Rule, including but not limited to, 45 C.F.R. § 164.528. Business Associates and their Subcontractor(s) shall implement a documented process that allows for such an accounting. Business Associates shall maintain records sufficient to meet this provision for a period of six years in order to ensure compliance with the Privacy Rule.
- k. *Availability of Books and Records.* Business Associates and, as applicable, their Subcontractor(s) shall promptly make its internal practices, books and records relating to the use and disclosure of PHI and ePHI, accessed, used, disclosed, created or received pursuant to this Agreement and the Health Net – Vendor Contract(s) available to the Secretary of the United States Department of Health and Human Services, for the purpose of determining Covered Entity's compliance with the Privacy and Security Rules as set forth in 45 C.F.R. § 160.310.

- l. *Record Retention.* Subject to section V below, Business Associates and, as applicable, their Subcontractor(s) shall retain all PHI and/or ePHI disclosed to or received from Covered Entity, or created or received in the course of performing its obligations, at a minimum and subject to the terms of Section V(c) below, until the termination of all Current Contracts and Future Contracts.
- m. *Minimum Necessary Amount of PHI.* Each Business Associate acknowledges that it shall request from Health Net and so disclose to its affiliates, Subcontractors or other authorized third parties, only (i) the information contained in a “limited data set,” as such term is defined at 45 C.F.R. § 164.514(e) (2), or, (ii) if needed by a Business Associate or its affiliates, Subcontractors or other authorized third parties, the minimum necessary data to accomplish the intended purpose of such requests or disclosures.
- n. *Data Ownership.* Business Associates acknowledge that Covered Entity is the owner of all PHI and/or ePHI that Covered Entity discloses to Business Associates, that Business Associates receive from, or creates, accesses or obtains or maintains on behalf of or in the name of, Covered Entity.
- o. *Indemnification.* Each Business Associate shall defend, indemnify and hold harmless Health Net and any of Health Net’s affiliates, directors, officers, employees and agents from and against any claim, cause of action, liability, damage, reasonable cost or expense (including reasonable attorneys’ fees) arising out of or relating to any Breach.
- p. *Limitation of Liability.* The parties agree that, notwithstanding anything to the contrary set forth in any Health Net – Vendor Contracts, Vendors’ liability under this Agreement and any other Breach or Incident related to HIPAA, PHI and any other laws applicable to PHI shall not exceed \$225 million (the “BAA Cap”). The parties further agree that, notwithstanding any contrary provision in the Health Net – Vendor Contracts, Business Associates’ liability under this Agreement and any other Breach or Incident related to HIPAA, PHI and/or any other laws applicable to PHI shall include liability for indirect, incidental, or consequential, exemplary, punitive, or special damages of any kind or nature whatsoever, up to the BAA Cap. The parties agree that reasonable Identity-Related Costs shall be considered direct damages but will be subject to the BAA Cap. “*Identity-Related Costs*” means the following costs that are reasonable and incurred by Health Net relating to a Breach: (i) preparation and mailing or other transmission of notifications and other communications to affected individuals and others, which are required by applicable law; (ii) establishment of a call center or other communications procedures in response to such Breach as customary in the industry or directed by a regulator (e.g., customer service frequently asked questions, talking points and training); (iii) costs for credit monitoring services, identity theft insurance, reimbursement for credit freezes, fraud resolution services, identity restoration services, and any similar service which corporate entities which maintain or store PHI routinely make available to impacted individuals in the event of a Breach; (iv) fees paid to forensic consultants associated with Health Net’s investigation of the event; (v) legal fees and expenses associated with Health Net’s investigation of and response to such event and defending claims made by parties affected by such Breach or by regulators or other governmental entities relating to such Breach, and costs of settlement or judgment in connection with any such litigation or arbitration; and (vi) any other costs, expenses or liabilities incurred in connection with such Breach.
- q. *Standard Transactions.* Unless otherwise agreed by the parties, to the extent Business Associates conduct Standard Transaction(s) on behalf of Health Net, Business Associates shall, without

limitation, comply with the HIPAA Regulations, “Administrative Requirements for Transactions,” 45 C.F.R. § 162.100 *et seq.*, and shall not: (a) Change the definition, data condition or use of a data element or segment in a standard; (b) Add any data elements or segments to the maximum defined data set; (c) Use any code or data elements that are either marked “not used” in the standard’s implementation specification or are not in the standard’s implementation specification(s); or (d) Change the meaning or intent of the standard’s implementation specifications.

- r. *Notice of Investigation or Lawsuit.* Each Business Associate shall notify Health Net immediately upon receipt of notice of an investigation or of a lawsuit filed against the respective Business Associate or any of its Subcontractors related to or arising from the use or disclosure of PHI or ePHI by the Business Associate pursuant to this Agreement or any of the Health Net - Vendor Contract(s).
- s. *State Law Requirements.* Business Associates and, as applicable, their Subcontractor(s) shall comply with applicable state law confidentiality, privacy, security, document retention, and breach notification requirements involving “Personal Information” or “Personally Identifiable Information” (collectively “PII”) as those terms are defined under state law. For purposes of this Agreement, PII shall refer to any data elements that identify an individual or that could be used to identify an individual, including but not limited to an individual’s first name or initial and last name in combination with one or more of the following data elements: social security number; driver’s license or State issued identification number; credit or debit card number; medical information (such as an individual’s condition, treatment, or payment information); financial information, such as checking account or other account number (either in combination with a required security code, access code, or password that would permit access to the account, or alone if the account does not require such an access code); or other identifying information, such as email addresses and usernames in combination with passwords or security questions, date of birth, mother’s maiden name, digital signature, passport number, fingerprint or other biometric data, an insurance policy number, employment information, employment history, an employer, student, tribal, or military identification numbers.

Notwithstanding any provision to the contrary, the provisions of this Agreement shall apply equally with respect to PII as they do to PHI; provided, however, that to the extent that state law is more stringent than the HIPAA Requirements or the terms of this Agreement, Business Associates agree to comply with such applicable State law in addition to the provisions herein.

- t. *Regulatory References.* A reference in this Agreement to a section in the HIPAA Rules means the section as in effect or as amended.

### III. COVERED ENTITY’S OBLIGATIONS

- a. In some circumstances, Health Net has agreed to further limitations on uses and disclosures where Health Net is itself a business associate of a self-funded Group Health Plan (as defined in 45 C.F.R. § 160.103, each of which is itself a Covered Entity). Where this is the case, Health Net shall notify Business Associates of such additional restrictions, including any limitation(s) in Health Net’s or any applicable Covered Entity’s notice of privacy practices that are produced in accordance with 45 C.F.R. § 164.520 (as well as any changes to that notice), to the extent that such limitation(s) may affect Business Associates’ use or disclosure of PHI. Business Associates

in turn shall notify any Subcontractors of the additional agreed upon limitations on uses and disclosures of PHI.

- b. Health Net shall provide Business Associates with any changes in, or revocation of, permission by Individual to use or disclose PHI, to the extent that such changes affect Business Associates' use or disclosure of PHI. Business Associates in turn shall notify any Subcontractors of any changes in, or revocation of, permission by Individual to use or disclose PHI.
- c. Health Net shall notify Business Associates of any restriction to the use or disclosure of PHI that Health Net has agreed to in accordance with 45 C.F.R. 164.522, to the extent that such restriction may affect Business Associates' use or disclosure of PHI. Business Associates in turn shall notify any Subcontractors of any restriction to the use or disclosure of PHI that Health Net has agreed to.
- d. Health Net shall make reasonable efforts to provide Business Associates with a Limited Data Set and, otherwise shall disclose to Business Associates only the minimum amount of PHI reasonably necessary for Business Associates to accomplish the intended purpose of such disclosure.

#### **IV. AUDITS, INSPECTION AND ENFORCEMENT**

Covered Entity, after providing ten (10) business days' written notice, may inspect the facilities, systems, records, policies and procedures relating to the access, use and/or disclosure of PHI or ePHI pursuant to this Agreement for the purpose of determining whether Business Associates have complied with this Agreement, and Covered Entity may, upon request therefrom, disclose the results of such audit with Covered Entity's regulators including the U.S. Centers for Medicare & Medicaid Services. Any audit or inspection by Covered Entity shall be subject to the following limitations: (i) use of any third party auditor that is or acts for a competitor of either Business Associate shall be subject to the applicable Business Associate's prior written approval, such approval not to be unreasonably withheld or delayed; and (ii) Covered Entity or any third party auditor conducting any such audit or inspection shall at all times comply with any and all reasonable security and confidentiality guidelines and other policies of Business Associates with respect to the audit or inspection.

#### **V. TERM AND TERMINATION**

- a. *Termination for Material Breach.* Covered Entity may terminate this Agreement or any or all of the Health Net – Vendor Contract(s) (in whole or in part) immediately if Covered Entity determines that a Business Associate has materially breached this Agreement or violated any HIPAA Requirement and has failed to cure such material breach or violation within thirty (30) days following Covered Entity's written notice to Business Associate. Business Associates acknowledge that any material breach would result in irreparable harm to Covered Entity and that Covered Entity has the right to seek an injunction and other legal and equitable rights and remedies available under the law. A Business Associate may terminate this Agreement if Business Associate determines that Covered Entity has materially breached its obligations under the HIPAA Requirements.
- b. *Cure.*

- (i) If termination of this Agreement or the Health Net – Vendor Contract(s) is not feasible, Covered Entity shall report the problem to the Secretary of U.S. Health and Human Services.
  - (ii) As an alternative to the rights set forth in Section V.a. above, Business Associate may choose to provide Covered Entity with written notice of the existence of an alleged material breach of this Agreement, and afford Covered Entity the opportunity to cure such alleged material breach.
- c. *Effect of Termination.* Upon termination or expiration of the Health Net – Vendor Contract or Agreement for any reason, with respect to PHI received from Health Net, or created, maintained, or received by Business Associates or Business Associates' Subcontractors on behalf of Covered Entity and upon Covered Entity's written request, Business Associates shall either return or destroy all PHI received or created pursuant to this Agreement and/or the Health Net – Vendor Contract that Business Associates or their Subcontractor(s) maintain in any form, and shall retain no copies of such PHI; or if return or destruction is not feasible or contrary to (i) the record retention requirements of a Health Net - Vendor Contract(s), (ii) the record retention requirements of Business Associates, or (iii) applicable state or federal law, then Business Associates and any Subcontractor of Business Associates shall continue to extend protections of this Agreement to such information, and limit further use of such PHI to those purposes that make the return or destruction infeasible or that require Business Associates or Business Associates' Subcontractor to retain PHI for so long as Business Associates maintain such PHI. If the return or destruction of PHI is delayed pursuant to any of the foregoing reasons, then Business Associates shall notify Health Net in writing when such infeasibility ends and, upon written direction from Health Net, either return or destroy such PHI promptly upon Health Net's written request. Business Associates agree that if applicable state or federal law requires the retention of PHI for a specified time period, Business Associates or Business Associates' Subcontractor shall in all cases postpone destruction of such PHI until directed to do so by Health Net in writing to ensure compliance with applicable state or federal law.

Business Associates and their Subcontractor(s) shall continue to maintain reasonable and appropriate administrative, physical, and technical safeguards designed to prevent improper use or disclosure of PHI, in any form or media, and comply with Subpart C of 45 C.F.R. Part 164 with respect to ePHI retained after termination or expiration for as long as Business Associates and/or their Subcontractor(s) retain such PHI. Business Associates and their Subcontractor(s) shall not use or disclose the PHI retained after termination or expiration other than for the purposes for which such PHI information was originally disclosed. Each Business Associate shall return to Health Net or, if directed by Health Net in writing, destroy the PHI retained by each Business Associate when it is no longer needed by the Business Associate for its proper management and administration or to carry out its legal responsibilities. If applicable, upon written direction of Health Net, each Business Associate will transmit PHI in its possession and/or the possession of its Subcontractors to another business associate of Health Net at termination. The obligations of each Business Associate under this Section shall survive the termination of this Agreement.

## **VI. NO THIRD PARTY BENEFICIARIES**

Nothing express or implied in this Agreement is intended to confer, nor shall anything herein confer, upon any person other than Covered Entity, Business Associates and their respective successors and assigns, any rights, remedies, obligations or liabilities whatsoever.

**VII. CHANGE IN APPLICABLE LAWS OR REGULATIONS**

In the event the laws or regulations of the United States or any State are modified or amended in any material way with respect to this Agreement, this Agreement shall not be terminated but rather, to the extent feasible, shall be promptly amended by the Parties to operate in compliance with the existing law. The Parties acknowledge that their responsibilities under this Agreement may be affected and governed by the requirements of the HIPAA Requirements that become effective during the term of this Agreement or any renewal thereof, both Parties agree that, upon the effective date of any such new or revised HIPAA Requirements, this Agreement shall be deemed to incorporate, and impose on the Parties, any obligations applicable to each of them under such new or revised HIPAA Requirements pursuant to their responsibilities hereunder. To the extent any amendments to this Agreement shall be necessary to effectuate or clarify the obligations of the Parties pursuant to such new or revised HIPAA Requirements, the Parties hereby agree to negotiate such amendments in good faith, subject to the right of either party to terminate this Agreement and any Health Net - Vendor Contract pursuant to which PHI is provided to Business Associates.

**VIII. SURVIVAL**

The respective rights and obligations of Business Associates under Section II of this Agreement shall survive the termination of this Agreement.

**IX. INTERPRETATION**

Any ambiguity in this Agreement shall be resolved in favor of a meaning that permits each Party to comply with the HIPAA Requirements.

**X. ENTIRE AGREEMENT**

This Agreement – consisting of the signature page, these terms and conditions constitute the entire agreement between the Parties with respect to its subject matter and merges, integrates and supersedes all prior and contemporaneous agreements, addenda and understandings between the Parties, whether written (including within any Health Net-Vendor Contract(s)) or oral, concerning its subject matter.

IN WITNESS WHEREOF, the Parties hereto have duly executed this Agreement as of the date set forth below.

**BUSINESS ASSOCIATE AGREEMENT****SCHEDULE "A"****MASSACHUSETTS STANDARDS FOR THE PROTECTION OF PERSONAL INFORMATION**

Pursuant to this Addendum, Health Net incorporates and Business Associates agree to abide by the applicable Standards for the Protection of Personal Information of Residents of the Commonwealth of Massachusetts, 201 CMR 17.00.

In addition to the requirements set forth in the Addendum, Business Associates further agree to:

(i) Implement and maintain appropriate technical security measures for personal information as required by 201 CMR 17.00; including, but not limited: (a) Encrypting all transmitted records and files containing personal information that will travel across public networks, and encryption of all data containing personal information to be transmitted wirelessly; and (b) Prohibiting the transfer of personal information to any portable device unless such transfer has been approved in advance by Health Net; provided further that any such personal information to be transferred to a portable device must be encrypted; and (ii) Implement and maintain a Written Information Security program as required by 201 CMR 17.00.

The Addendum, as amended by this Addendum, shall apply equally to PHI, ePHI and "personal information." Personal information means a Massachusetts resident's first name and last name or first initial and last name in combination with any one or more of the following data elements that relate to such resident: (a) Social Security number; (b) driver's license number or state-issued identification card number; or (c) financial account number, or credit or debit card number, with or without any required security code, access code, personal identification number or password, that would permit access to a resident's financial account; provided, however, that "Personal information" shall not include information that is lawfully obtained from publicly available information, or from federal, state or local government records lawfully made available to the general public.

**AMENDED AND RESTATED  
MASTER SERVICES AGREEMENT  
STATEMENT OF WORK #1 (CLAIMS MANAGEMENT SERVICES)**

**AMENDED AND RESTATED  
MASTER SERVICES AGREEMENT**

**STATEMENT OF WORK #1 (CLAIMS MANAGEMENT SERVICES)**

This Statement of Work #1 (*Claims Management Services*), dated November 21, 2014, but effective as of November 2, 2014 (“the **SOW Effective Date**”), is made by and between Health Net, Inc., a Delaware corporation with its principal place of business located at 21650 Oxnard Street, Woodland Hills, California 91367 (“**Health Net**”), and Cognizant Healthcare Services, LLC (“**Supplier**”), a Delaware corporation having an office at 500 Frank W. Burr Blvd., Teaneck, New Jersey 07666 (each, a “**Party**” and collectively, the “**Parties**”). This SOW #1 (*Claims Management Services*) is entered into and shall be governed by the terms of that certain Amended and Restated Master Services Agreement entered into between the Parties dated November 21, 2014 (the “**Agreement**”). This Statement of Work #1 (*Claims Management Services*) replaces and supersedes in all respects the Statement of Work #1 dated November 2, 2014.

**1. INTRODUCTION**

**1.1 Background & Purpose**

This SOW #1 (*Claims Management Services*) describes the Claims Management Services Supplier will provide for Health Net, as such Services are defined in Exhibit A (*Claims Management Services*) to this SOW #1 (*Claims Management Services*), and sets forth certain terms and conditions relating to them, including, among other things:

- (a) The scope of the Claims Management Services;
- (b) The Solution Supplier will use to perform and deliver them;
- (c) The Operational Service Levels Supplier will meet in providing them;
- (d) The Key Supplier Positions applicable to them; and
- (e) The Subcontractors (if any) approved by Health Net to provide certain of them.

**1.2 Structure**

This SOW #1 (*Claims Management Services*) is comprised of this cover document and the following Exhibits:

<b>Table 1: Exhibits to SOW #1 (<i>Claims Management Services</i>)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
1	Exhibit A ( <i>Services</i> )	Describes the scope of the Claims Management Services.

<b>Table 1: Exhibits to SOW #1 (Claims Management Services)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
2	Exhibit A-1 ( <i>Solution Description</i> )	Describes Supplier's solution for the provision of the Claims Management Services and includes as exhibits: <ul style="list-style-type: none"> <li>• Exhibit A-1-1 (<i>Approved Service Delivery Centers</i>)</li> <li>• Exhibit A-1-2 (<i>Service Delivery Configuration at the Completion of Phase 2</i>)</li> </ul>
3	Exhibit A-3 ( <i>Organizational Chart</i> )	Identifies the Health Net roles being transferred to Supplier or displaced by Supplier roles as a result of the execution of this SOW #1 ( <i>Claims Management Services</i> ).
4	Exhibit B-1 ( <i>Operational SLAs</i> )	Identifies the Operational Service Levels applicable to the Claims Management Services.
5	Exhibit D ( <i>Key Supplier Positions</i> )	Identifies the Key Supplier Positions applicable to the Claims Management Services.
6	Exhibit H ( <i>Subcontractors</i> )	Identifies the Subcontractors approved by Health Net to provide certain of the Claims Management Services.

## 2. DEFINITIONS

Capitalized terms used but not defined in this SOW #1 (*Claims Management Services*) shall have the meanings given them in the Agreement.

## 3. APPLICABILITY OF THE AGREEMENT

This SOW #1 (*Claims Management Services*) is hereby made a part of, and is subject to and governed by, the Agreement. This SOW #1 (*Claims Management Services*) is one of the Initial Statements of Work executed under the Agreement.

**IN WITNESS WHEREOF**, Health Net and Supplier have each caused this SOW #1 (*Claims Management Services*) to be signed and delivered by its duly authorized officer, all as of the SOW Effective Date set forth above.

**Health Net, Inc.**

**Cognizant Healthcare Services, LLC**

**EXHIBIT A**  
**CLAIMS MANAGEMENT SERVICES**

**1. INTRODUCTION**

**1.1 General**

- (a) In general terms, the “*Claims Management Services*” or “*Claims Services*” are Functions associated with the review, editing, validation and processing of a Claim from receipt through settlement for all geographies and lines of business requested by Health Net (unless expressly excluded under this Agreement), including the following activities:
- (i) Receipt, assessment, and entry into the Claims processing and imaging platform(s) and system(s) (the “*Claims System(s)*”) of Claims and Claim-related collateral;
  - (ii) Validation and processing of Claims; and
  - (iii) Post-payment activities, including adjustments of Claims and recovery of monies.
- (b) The Claims Management Services are more fully described in Section 3, and include the Cross Functional Services described in Section 3 of Schedule A (*Cross Functional Services*) and the Functions included as part of the Embedded Processes described in Section 4 of Schedule A (*Cross Functional Services*), each as they relate to the Functions included as part of the Claims Management Services. For clarity, this includes Supplier’s responsibility to manage all activities performed under Managed Third Party Contracts in accordance with Section 3.8 of Schedule A (*Cross Functional Services*). Supplier shall perform the Claims Management Services, except for those Functions that are expressly identified as retained Health Net responsibilities in Section 2 below. For purposes of clarity, the Party that is assigned responsibility for a Function as per the designations in Section 2 is also responsible for the Embedded Processes applicable to that Function.
- (c) In addition to those Functions specifically designated in this Statement of Work as Functions for which Supplier is responsible, the Claims Management Services to be performed by Supplier include all Functions performed by or associated with the roles in the Claims Management Organization Chart set forth in Exhibit A-3 (*Claims Management Organization Chart*), all of which are either being transferred to Supplier or displaced by Supplier roles as a result of the execution of this Statement of Work. Such Functions will be deemed to be part of the Claims Management Services to be performed by Supplier as if expressly set forth in this Statement of Work.
- (d) In addition to the retained Health Net responsibilities expressly identified in this Exhibit A (*Claims Management Services*), and in addition to and without limiting Health Net’s rights under the Terms and Conditions, Health Net may perform quality reviews and audits of Supplier’s performance of the Claims Management Services in accordance with the Terms and Conditions. For the avoidance of doubt, Health Net is not obligated to perform any level of such quality reviews and activities, except to the extent required by applicable Law.
- (e) Supplier shall generate and provide to Health Net (i) each operational report generated prior to the BPaaS Services Commencement Date, unless and until Health Net confirms in writing that

such operational report is no longer required, (ii) such other operational reports as Health Net may reasonably request from time to time, and (iii) such modifications to or replacements for the foregoing reports as may be necessary to reflect changes to and evolutions of the Claims Management Services during the term of this Statement of Work.”

**1.2 Definitions**

- (a) Certain Terms.
  - (i) **“Provider Inquiry”** means any written provider correspondence (A) resulting in a grievance, or (B) regarding the status or outcome of claims, claims-related transactions, PDRs, or (C) any other correspondence received that Health Net designates as a Provider Inquiry. Provider Inquiries include Provider Disputes, PDRs and Provider Appeals.
  - (ii) **“Provider Dispute”** or **“PDR”** or **“Provider Appeal”** is a written notice from a provider to Health Net that: (a) challenges, appeals or requests reconsideration of a claim (including a bundled group of similar multiple claims) that has been denied, adjusted or contested; (b) challenges a request for reimbursement for an overpayment of a claim; or (c) seeks resolution of a billing determination or a contractual dispute. For clarity, in California the nomenclature used for these appeals is Provider Dispute or PDR, and in Oregon and Washington, the nomenclature used is Provider Appeal. References to the term “PDR” will refer collectively to Provider Disputes and Provider Appeals.
  - (iii) **“Service Form”** or **“SF”** means the electronic service form that results in a permanent record that is used to document contacts, both internal and external to Health Net.
- (b) Capitalized terms not defined in this Section 1.2(a) shall have the meanings given them elsewhere in this Exhibit A or elsewhere in this Agreement, including Schedule W (*Glossary*).

**2. RESPONSIBLE PARTY**

The following table sets forth the responsible party for the Claims Management Services. The headings have the following meaning: (i) Line of Business is inclusive of Commercial, Medicare, SHP, Arizona AHCCCS, Dual Eligibles, Performance Groups, MHN, Life & Disability; and (ii) Regions are inclusive of California, Oregon, Washington, Arizona, and North East business. The exclusive Onshore Activities are as follows: Arizona AHCCCS, Performance Groups (UC, Boeing, Verizon, and Southern California Edison (SCE)), Legal, Provider Reimbursement Specialists, and Vendor Oversight.

### 3. CLAIMS MANAGEMENT SERVICES

#### 3.1 Claims Acquisition

Claim acquisition Services are those Functions associated with the receipt of Claims and Claim-related collateral and information and uploading such documentation and information into the applicable Claims System(s) in preparation for adjudication. Supplier shall perform the Claim acquisition Services, including those Functions listed in the roles and responsibilities table below, except for those Functions that are expressly identified as retained Health Net responsibilities in the roles and responsibilities table below.

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Identify and re-route Claims and Claim-related collateral that were not mailed to the proper address.	X	
2. Receive hardcopy paper-form Claims and Claim-related collateral, and perform the following activities: <ul style="list-style-type: none"> <li>a. date stamp all pages,</li> <li>b. create a scanned images of all pages,</li> <li>c. convert the information contained in such documentation to data files (e.g., using OCR functionality combined with manual data validation and correction), and</li> <li>d. make available the scanned images and data files for uploading into the applicable Claims System(s).</li> </ul>	X	
3. Transmit EDI files containing claim information to Health Net for uploading into the applicable Claims System(s). Examples of EDI files that are received include inbound Claims and Claims-related collateral / inquiries.	X	
4. Upload the scanned images and data files into the applicable Claims System(s). Assign document control numbers to each Claim. Manually key, from the Claim images, all Claim information that is not automatically uploaded into the applicable Claims System(s).	X	
5. For Claim information submitted directly from Providers via a spreadsheet, manually enter such data directly into, and create the associated Claims in, the applicable Claims System(s). Follow-up with the applicable Provider as needed to obtain missing data or corrected data, including by making telephone calls to Providers. Retain electronic and hardcopy versions of the spreadsheets. For the avoidance of doubt, this is the pay and recovery process.	X	
6. Receive, review, analyze and enter data (including manually, where necessary) into the applicable Claims Systems of prior period Claims history, and deductible and out-of-pocket expenses. For the avoidance of	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
doubt, this is the manual cross-accumulator process.		
<p>7. For Claims that are pended because of a failure to identify or match a Member or Provider:</p> <p>a. Verify the existence or non-existence of an active Member or an appropriate provider record for the Claim in question, as applicable;</p> <p>b. If the provider exists, update the information on the Claim in order for the Claim to be adjudicated and continue the adjudication process for that Claim;</p> <p>c. If the provider record does not exist, create an Service Form and provide to Health Net all necessary information to have the provider record added, and once the provider record is established, update the Claim and continue the adjudication process; and</p> <p>d. If an active Member does not exist, contest the Claim and return it to the sender.</p>	X	
8. Route the Claim or other electronically submitted transaction type (e.g., 270/271) to the appropriate adjudication / processing workflow.	X	

### 3.2 Claims Adjudication

Claims adjudication Services are those Functions associated with adjudicating Claims, including by processing Claims to completion in accordance with Health Net Policies. Supplier shall perform the Claims adjudication Services, including those Functions listed in the roles and responsibilities table below, except for those Functions that are expressly identified as retained Health Net responsibilities in the roles and responsibilities table below.

Roles and Responsibilities	Responsible Party	
	Supplier	HN
<p>1. Validate that the Claim information in the applicable Claims System(s) is correct, accurate and complete, including by comparing the information contained in the applicable Claims System(s) with the information contained on the Claim, Claim image or supporting documentation. Information to be validated includes:</p> <p>a. Member information, including name, date of birth, eligibility, authorization function, and date of service;</p> <p>b. Provider information, including tax ID number (with relevant “suffixes” and/or Provider ID number), assignment of benefits flag,</p>	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
<p>account number, billed amount, referring physician and facility name (if available). For Claims that do not have the servicing provider loaded in the applicable claims processing system:</p> <ul style="list-style-type: none"> <li>i. Route the claim to the applicable team to have the provider record added and monitor the system for notification that such record has been added; and</li> <li>ii. Once the provider record is established, update the Claim and continue the adjudication process for that Claim.</li> </ul> <p>c. Coordination of benefit (“COB”) information, including by making sure all non-Health Net insurance company information listed on explanations of benefits documentation attached to the Claim match the coordination of benefit information in the system.</p> <ul style="list-style-type: none"> <li>i. If Health Net is not the primary insurer for the Claim, validating that all information regarding the primary insurance that is required for the Claim to be processed is attached to the Claim (e.g., if there is a primary insurance company, that there are Explanations of Benefit from such insurance company). If such documentation is not attached, requesting such documentation, and</li> <li>ii. If there is a discrepancy between the COB information provided on the Claim and the COB information contained in the claims processing system, notify the person/team responsible for maintaining the COB information in the system in order to research and resolve such discrepancy prior to finishing the adjudication of the affected Claim;</li> <li>iii. Supplier will perform all services in respect to COB investigation including making outbound phone calls to members, providers, facilities, written communications and will update the COB maintenance screens accordingly. All COB inquiries should be completed within five (5) business days unless the claim in question is facing interest penalties and or going out of compliance. At that point, Supplier must make the appropriate attempts to avoid penalties and going out of compliance by performing related functions in fewer than five (5) days.</li> </ul> <p>d. Diagnosis information, including the Provider’s diagnosis, and whether or not it is a Claim for which Health Net has a contract with a Provider (a “<i>Contracted Claim</i>”);</p> <p>e. Claim information, including billed amount, specific health care plan, detail around each line item submitted (e.g., if there is both an office visit and a lab test, there should be two separate line items for each); and</p> <p>f. All secondary information that is required for the Claim to be</p>		

Roles and Responsibilities	Responsible Party	
	Supplier	HN
processed is attached to the Claim (e.g., if there is a secondary insurance a company, that there are Explanations of Benefit from such insurance company).		
<p>2. Complete missing information using all available resource material. If the missing information is not available, requesting the missing information via written correspondence or telephone calls, as required by Health Net Policies or Applicable Laws, to Providers and/or Members.</p> <p>a. To the extent such information is obtained, enter such information into the applicable Claims System(s) and request resubmission of the Claim (and if received, scan and upload the revised or additional Claim or Claim-related collateral into the applicable Claims System(s)).</p> <p>b. To the extent such information cannot be obtained, deny or contest the claim, as applicable, in accordance with Health Net Policies, and send the appropriate communications advising the Member or Provider, as applicable, of the missing information.</p> <p>c. In all cases, log all correspondence in the applicable Claims System(s).</p>	X	
3. Review and address all system edits.	X	
<p>4. Validate the following with respect to each Claim:</p> <p>a. The eligibility information associated with a Claim, including whether the Member is a valid Member of a group for the date of service, whether the Provider was eligible to provide service to the Member (e.g., Member/Provider matching, as required by the applicable Benefit Plan), and whether the Member was eligible to receive services;</p> <p>b. The Claim was submitted in accordance with the Member's policy (e.g., service usage limits, out-of-network restrictions, pre-certification requirements) and/or the Provider's policy;</p> <p>c. That coverage is provided for procedures and services listed on a Claim as part of the Member's benefits; and</p> <p>d. All necessary authorizations have been granted and medical determinations have been made (e.g., whether the service was deemed medically necessary).</p> <p>i. To the extent that authorizations or medical determinations are missing or do not align with the information on the Claim, route such Claim to the applicable person/team responsible for reviewing such information.</p> <p>ii. Upon receiving feedback from the applicable person/team responsible for reviewing authorizations and making medical determinations, update the information in the applicable Claims</p>	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
System(s).		
<p>5. Identify and deny Claims submitted more than one time for the same procedure and/or service (including by running adhoc reports). For potentially duplicate Claims, perform the following:</p> <p>a. If the later Claim is not a duplicate of the original submission, enable that later Claim to continue through the process.</p> <p>b. If the later Claim is identified as a partial or complete duplicate (e.g., if the original submission was for the same services) of the original submission, review the original submission to determine if the original submission or any portion thereof was correctly contested.</p> <p>c. If any portion of the original submission was incorrectly contested, enable the original Claim to continue through the process by manually reentering the Claim in the applicable Claims System(s) using the original Claim receipt date. Also allow the later Claim to continue through the process, but ensure that the later Claim (or line items on a Claim) will be denied as a duplicate. After manually processing the corrected services, cancel the contested letter of the originally submitted claim.</p> <p>d. If any portion of the original submission was correctly contested, and the later Claim does not contain the missing information, enable that later Claim to continue through the process and re-contest.</p> <p>e. If any portion of the original submission was correctly contested, and the later Claim contains the missing information, correct those components of the original Claim that were incorrect or missing to enable the original Claim to continue through the process or re-enter the information including cancelling the original contest (using the date of receipt when the corrected information was provided). Also, allow the later Claim to continue through the process, but ensure that the later Claim (or line items on a Claim) will be denied as a duplicate.</p>	X	
<p>6. Identify potentially fraudulent Claims and route them to Health Net for further review. At the direction of Health Net (including as to whether any such Claim should be approved or contested), continue the Claims adjudication process for such Claims.</p>	X	
<p>7. Determine the amount of the benefit and calculate the Member's liability (to the extent the applicable Claims System does not automatically do so), in each case in accordance with the Member's benefits, Health Net's contract with the Provider and Health Net Policies, including by:</p> <p>a. In accordance with Health Net Policies, submitting non-Contracted Claims to the applicable Health Net's third party pricing vendor to</p>	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
<p>determine possible discount pricing for such Claims (and confirm the same number of Claims submitted are received back), and</p> <ol style="list-style-type: none"> <li>i. Validating that the same number of Claims submitted to third party pricing vendors are processed and received back, and</li> <li>ii. To the extent the third party pricing vendor cannot completely price the Claim, performing the activities described in 7.b below;</li> </ol> <p>b. For (x) Contracted Claims, (y) Claims that go to a third party pricing, but for which the third party pricing vendor cannot completely price the Claim, and (z) other Claims that do not go to a Health Net third party pricing vendor, manually price the Claim, including by:</p> <ol style="list-style-type: none"> <li>i. researching pricing (e.g., using appropriate websites (as designated by Health Net) pricing tools and published fee schedules (e.g., for Medi-Cal, Medicare) to obtain the correct price, coordinating and working with Health Net as necessary printing out the pricing sheets used to perform the manual pricing, and scanning and attaching those pricing documents into the applicable Claims System(s));</li> <li>ii. applying the coordination of benefit amount, if any;</li> <li>iii. calculating, where necessary, the “usual and customary” amount, including by considering all factors based on the type of plan (e.g., in-network versus out-of-network, emergency services); and</li> <li>iv. as applicable, determining, either manually (e.g., my using on-line Division of Financial Risk (DOFR) tools) or automatically (e.g., by executing the DOFR module linked to the claims processing system), the appropriate risk factor to determine whether a Participating Provider Group (PPG) is responsible for all or part of the Claim. <ol style="list-style-type: none"> <li>1. Except as described in Section 7.b.iv.2, below: <ol style="list-style-type: none"> <li>a. To the extent a PPG is responsible for all of the Claim, deny such Claim and forward the Claim to the PPG; and</li> <li>b. To the extent a PPG is responsible for part of the Claim, process and pay that portion of the Claim for which Health Net is responsible, and perform the activities described in 7.b.iv.1.a, above, with respect to that part of the Claim that is the responsibility of the PPG.</li> </ol> </li> <li>2. At the specific direction of Health Net in certain circumstances: <ol style="list-style-type: none"> <li>a. Manually over-ride the system and process Claims that are the PPG’s responsibility, and</li> </ol> </li> </ol> </li> </ol>		

Roles and Responsibilities	Responsible Party	
	Supplier	HN
b. Enter the necessary information into the applicable Claims System(s) so that there is a capitation deduction made against that PPG.		
8. Resolve all issues related to a Claim that are identified either by Supplier's Quality Audit Services described in Section 3.4(hh), including: <ul style="list-style-type: none"> <li>a. Reviewing requests to correct Claims adjudication errors;</li> <li>b. Contesting such requests in accordance with Rebuttal Process described below in Exhibit A-2; and</li> <li>c. Correcting all errors in the claims processing systems.</li> </ul>	X	
9. Appropriately code each Claim in the applicable Claims System(s) at all stages during the processing of the Claim, including by using the following coding categories as applicable: <ul style="list-style-type: none"> <li>a. Pending the Claim, using the appropriate pending codes (as determined in accordance with Health Net's policies and procedures), if other processes or Health Net business units need to investigate any aspect of the Claim. Examples of potential pend (which may differ across the different claims processing system(s)) include provider update, eligibility, configuration health services (e.g., unlisted codes, missing authorizations), review with team lead or supervisor, high dollar claims exceeding Supplier's management dollar authority limit.</li> <li>b. Contesting the Claim if additional information or documentation is required from the Employer Group, Member or Provider, including by coding the Claim as contested, adding a detailed description around what is required in order to continue processing the Claim, and requesting the appropriate notification letter; and</li> <li>c. Denying Claims that do not meet eligibility requirements, including by coding the Claim with the appropriate denial code, and adding a detailed description of why the Claim was denied.</li> </ul>	X	
10. Taking appropriate action to resolve (or effectuate the resolution of), using all available resource material, pended Claims in a timely manner, including by, on a daily basis, monitoring and resolving where possible pended claims and ensuring escalation of any Claims that remain pended for a longer period of time than permitted by Health Net policies and procedures.	X	
11. Once Supplier has received additional documentation for Contested Claims or previously processed Claims, then as applicable, upload the information into the applicable Claims System, attach the image to the appropriate Claim and complete the Claims adjudication process.	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
12. Once adjudicated, if the Claim requires a manual check, returning that Claim to Health Net for manual check processing.	X	
13. For Claims processed in the QCare Claims System, balance Health Net's check register against the reports from QCare and approve the release of the checks; perform trending analysis over prior months and identify large variances in the dollar amounts. If significant variances are identified, notify the applicable Health Net groups in accordance with Health Net Policies. For Claims processed in the QCare or MC400 Claims Systems, coordinate regularly with Health Net's OCOE to ensure that checks are printed and mailed on time (including to account for holidays).	X	
14. While Claims Adjudication does not have any specific Medicare Part C & D Star Ratings, Claims Adjudication plays a significant part in the customer experience. Supplier must ensure that the current Star measures are not directly impacted in a negative manner.  Current Star Ratings (which can change quarterly or yearly by CMS) impacted by Claims Adjudication include: <ul style="list-style-type: none"> <li>- C22 Customer Service</li> <li>- C24 Overall Rating of Plan</li> <li>- C26 Complaints about the Health Plan</li> <li>- C27 Beneficiary Access &amp; Performance Problems</li> <li>- C28 Member Choosing to Leave the Plan</li> <li>- C29 Improvement</li> <li>- C30 Plan Makes Timely Decisions about Appeals (Member appeals portion)</li> <li>- C31 Reviewing Appeals Decisions (Member appeals portion)</li> <li>- D02 Appeals Auto-Forward (Applies to Members only)</li> <li>- D03 Appeals Upheld (Applies to Members only)</li> <li>- D04 Complaints about the Drug Plan</li> <li>- D05 Beneficiary Access &amp; Performance Problems</li> <li>- D06 Member Choosing to Leave the Plan</li> <li>- D07 Improvement</li> </ul>	X	
15. At the request of Health Net, for (a) unique and/or difficult contract administration of provider contracts, or (b) with respect to processing trends that are identified, which are not meeting service level objectives, the Responsible Party may create specialized units or identify dedicated team members to achieve or remediate service level objectives.	X	

### 3.3 Claim Adjustment and Post-Pay Activities

Claims adjustment and post-pay Services are those Functions associated with the adjustment of Claims, the recovery of monies overpaid to Members (if applicable) or Providers, and other post-pay related activities. Supplier shall perform the Claims adjustment and post-pay Services, including those Functions listed in the roles and responsibilities table below, except for those Functions that are expressly identified as retained Health Net responsibilities in the roles and responsibilities table below.

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Respond to inquiries from the Contact Center or Health Net to facilitate resolution of Member grievances and appeals, including by determining whether any errors were made during the Claims adjudication process.	X	
2. Receive (either directly or via the Contact Center), track, and resolve Provider Claims disputes (e.g., regarding allegedly incorrectly processed Claims) and inquiries (e.g., questions regarding reimbursements, billings and payments associated with services they have performed), including as required by Exhibit A-1 to this Exhibit A. This applies to all Lines of Business, including Medi-Cal (SHP).	X	
3. There are specific Medicare Part C & D Star Ratings pertaining to Provider Appeals. Supplier must ensure that these Star items are met in accordance with the Service Levels in Exhibit B-1 ( <i>Operational SLA's</i> ).	X	
4. Supplier to cooperate and coordinate with Health Net review nurses for clinical determinations.	X	
5. Respond to inquiries from Health Net regarding adjudicated Claims, including as a result of Health Net's post-pay audit activities or other focused auditing, regulatory reviews, legal research, or similar activities.	X	
6. Perform post-payment review and auditing to identify errors in the Claims adjudication Services, including as a result of missed or incorrectly applied coordination of benefits, retroactive terminations and/or reinstatements, or otherwise resulting from Supplier error. For the avoidance of doubt, this is in addition to (and not in lieu of) any post-payment review and auditing performed by Health Net or a Health Net third party recovery vendor pursuant to item #11.	X	
7. Research and review errors related to Claims that are identified or determined as a result of items 1- 5, above, or otherwise determined by Health Net or Supplier, and determine whether the original Claim determination should be upheld (i.e., no changes needed) or overturned (an adjustment is required), including by following up with the applicable Provider and/or coordinating with other Supplier and Health Net groups (e.g., Health Net legal, Health Net's provider network management team). Such research and review shall include:	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
<ul style="list-style-type: none"> <li>a. performing the relevant Claims adjudication Services to determine the validity of the Claim (e.g., eligibility determinations, authorizations obtained, covered service determinations, etc.), and</li> <li>b. coordinating with other teams as needed to determine the validity of the Claim (e.g., Medical Management in the case of validating the authorizations).</li> </ul> <p>Document, where necessary, such determination in the applicable Claims System(s) and/or other documentation, as required by Health Net Policies.</p>		
8. Respond to and resolve Claims-related inquiries (including requests for ad hoc reports) from other Towers and other Health Net business units.	X	
9. For incorrectly processed Claims, perform the necessary activities in the applicable Claims System in order to correct such Claim. <ul style="list-style-type: none"> <li>a. If an adjustment is required in order to pay additional monies to a Member or Provider, enter the adjustment in the applicable Claims System (including entering the appropriate date information based on Health Net Policies) and perform all necessary Claims adjudication Services based on the new, updated or corrected information.</li> <li>b. If a receivable is required in order to collect overpaid amounts, create such receivable in the applicable Claims System(s) and commencing recovery efforts as described in item #10.</li> </ul>	X	
10. Perform a root cause analysis to determine the cause of the problem resulting in an adjustment request and taking such action as necessary to prevent the problem from reoccurring.	X	
11. For incorrectly processed Claims that resulted in an overpayment to a Member or Provider, determine whether any such payment made is recoverable (including in accordance with Laws, Regulators, contracts and Health Net Policies, or otherwise at the direction of Health Net). Overpayments to Members are only recoverable at the express direction and approval of Health Net. For any such payment that is recoverable, recover such monies in accordance with Laws and Health Net Policies, including as follows: <ul style="list-style-type: none"> <li>a. Where permitted by Law, Regulators, contracts and Health net Policies or otherwise at the direction of Health Net, automatically deducting such amounts from future payments to the Member or Provider,</li> <li>b. Sending notification letters,</li> <li>c. As requested by Health Net, coordinating with a Health Net third party collection agency for them to attempt to recover such amounts, and</li> </ul>	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
<p>d. Update the applicable Claims System(s) as necessary to (i) reflect recovery of any such amounts or (ii) in accordance with Health Net Policies or otherwise only to the extent Health Net has approved for amounts not recovered, reflect write-off of any such amounts.</p> <p>For the avoidance of doubt, this is in addition to (and not in lieu of) any recovery efforts performed by Health Net or a Health Net third party recovery vendor pursuant to item #11.</p>		
<p>12. In coordination with a Health Net third party recovery vendor:</p> <p>a. Perform post-payment review and auditing to determine any payments made in error and potential recovery amounts,</p> <p>b. If an overpayment to a Member or Provider is identified, determine whether any such payment made is recoverable (including in accordance with Laws and Health Net Policies), and</p> <p>c. For any such payment that is recoverable, recover such monies in accordance with Laws and Health Net Policies. Such recover efforts include sending notification letters and/or making phone calls to the applicable Member or Provider. If recovery is obtained, all relevant information and monies to Health Net or Supplier, as applicable.</p>	X	
<p>13. Upon notification by Health Net, update the applicable Claims System(s) as necessary to reflect the adjustment required as determined by item #11 and the recovery of the applicable monies.</p>	X	
<p>14. Determine if a Claim is eligible for subrogation, and initiate subrogation process and collections in accordance with regulatory guidelines.</p>	X	
<p>15. Perform the following finance-related activities associated with Claims processing:</p> <p>a. Upon notification by Health Net, post all refunds and credits to applicable Claims System(s), including by coordinating with other Supplier and Health Net groups to identify the correct Member associated with the refund/credit; update all logs required by Health Net, including Health Net's finance organization.</p> <p>b. Receive and process check void requests in the applicable Claims System(s).</p> <p>c. Receive stop payment requests (or otherwise discover the need to issue a stop payment); complete a check tracer to confirm that the check has not been cashed; record the stop payment in the applicable Claims System; and if applicable from the stop payment request, designate that the check should be re-issued and specify the appropriate payee</p>	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
<p>for such re-issue.</p> <p>d. Identify (in accordance with Laws and Health Net Policies) stale-dated payments to Members or Providers that have not yet been deposited, including by completing a check tracer to confirm that the check has not been cashed; submit, as applicable, a check void request or a check stop payment request to the Check Void Support or Check Stop Payment Support Processes, respectively; determine whether the check should be re-issued and notify the Check Re-Issue Process accordingly.</p> <p>e. Designate in the applicable Claims System(s) that a check needs to be re-issued, and confirm/specify the appropriate payee information for such re-issue.</p> <p>f. As required by Health Net Policies, monitor Member accounts in order to identify all the Negative Vendor Records; research and review the Negative Vendor Records to determine the cause of the Negative Vendor Record; and correct Negative Vendor Record in the applicable Claims System(s), including by processing the Negative Vendor Record in the appropriate order so that such record posts as a positive result. “<i>Negative Vendor Record</i>” means a record in the applicable Claims System(s) that indicates that an account maintains a negative balance.</p> <p>g. Review the tax lien report prepared by Health Net and stop the applicable checks from being mailed to the payee; submit a check void request to the Check Void Support Process for the original check; re-enter the Claim, and include all notes in the applicable system – to insure all year end reporting is accurate (1099’s).</p>		

### 3.4 Other Claims Functions

Other Claims Functions are those additional Functions described in this Section 3.4 related to the Claims Management Services not already addressed in Sections 3.1 through 3.3. Supplier shall perform the additional Claims Management Services, including those Functions listed in the roles and responsibilities table below, except for those Functions that are expressly identified as retained Health Net responsibilities in the roles and responsibilities table below.

- (a) Life and Disability Processing and NYHCRA payments

Roles and Responsibilities	Responsible Party	
	Supplier	HN

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. In accordance with Health Net Policies, preparing ((including manually <b>(100% manual – no core adjudication system)</b> ), as required) and submitting to Health Net the appropriate written correspondence in the course of performing the Claims Management Services, including: <ul style="list-style-type: none"> <li>a. Life Insurance Claims. Manually calculate including any applicable interest.</li> <li>b. Disability Insurance Claims. Manually calculate including any applicable interest.</li> <li>c. Monthly NYHCRA payments.</li> </ul>	X	
2. Coordinating with Health Net business units as necessary to perform the Claims Management Services (e.g., coordinating with Health Net’s medical management group and or legal if a determination is necessary in relationship to cause of death.	X	
3. Coordinate with beneficiaries in both written and verbal format (must have a dedicated phone number for contact) for additional information.	X	
4. Research, update and provide written communications to beneficiaries including but not limited to claim determination, request for information and any other applicable documents.	X	
5. Archive (as required by Law, this Agreement, and Health Net’s Policy on records retention) Claims-related data and stored images of Claims and Claim-related collateral and retrieve such data and images as necessary to perform the Services or otherwise at the request of Health Net.	X	
6. Maintain daily inventory and report out to HN.	X	
7. Perform monthly reporting to finance.	X	
8. Remain compliant as identified by regulators and or HN policy.	X	

(b) CMS Incentives

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. In accordance with Health Net Policies, preparing ((including manually <b>(100% manual – no core adjudication system)</b> ), as required) and	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
submitting to Health Net the appropriate written correspondence in the course of performing the Claims Management Services, including: a. CMS Incentives for the Medicare line of business for applicable claims on both ABS and MC400 as identified CMS regulations.		
2. Running of all applicable reports necessary to perform manual calculations.	X	
3. Perform Calculation Required.	X	
4. Request related incentive checks through the SAP system.	X	
5. Bind checks with appropriate back-up documentation and supply to mail services for mailing.	X	
6. Maintain appropriate back-up as required and defined by retention management.	X	
7. Perform appropriate reporting to finance.	X	

(c) Perform (QCare) MediCal and File Net Testing

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Perform QCare (core adjudication system) and File Net (work flow system) testing and validation of system enhancements, upgrades, benefits and any other functions necessary to insure accurate adjudication.	X	
2. Running of all applicable reports necessary to perform testing.	X	
3. Report out on testing results and provide "Go / No Go" decisions.	X	
4. Actively participate in BARR/Project creation and necessary meetings to support objective.	X	

(d) Performance Group Processing

Performance Groups are employer groups who have performance penalties assessed based on monthly, quarterly, semi-annual or annual outcomes. Typical penalties from a claims

standpoint are related to accuracy (all types), turn-around time, and or adjustment/re-work opportunities. There are Performance Groups for all respective regions including MHN. A list of performance groups will be attached with their corresponding goals in the P5 Metric Analysis labeled Performance Groups. **It should be noted that there are currently 4 specific performance groups that require all functions related to claims processing be performed onshore. This includes, triage, claims intake, provider disputes, adjustments, recoveries, medical management and any other function required to complete a claim. The 4 groups in question are as follows: Verizon, Boeing, UC and SCE with UC representing nearly 10% of the entire book of business for CA. This would apply to HNCA, HNOR, HNAZ and MHN.**

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Process all claims, adjustments, and recovery functions in accordance with established contracts.	X	
2. Running of all applicable reports necessary to achieve desired outcomes.	X	
3. Insure segregation of duties between off-shore and off-shore claims processing to avoid fines, penalties or loss of group/revenue.	X	
4. Report out on a monthly basis to various leaders performance outcomes by group.	X	
5. Respond to and implement corrective action plans as necessary.	X	
6. Respond and prepare to outside out-side audits and site visits with in-person representation. Typically 2 – 4 audits per year.	X	
7. Create audit files for outside audit reviews.	X	
8. Initial response to all RFPs requests from sales and/or Health Net leadership for new and existing business.	X	
9. Provide final response on RFP requests after initial assessment performed.		X

(e) Reinsurance

Reinsurance Services are those Functions to provide Reinsurance claims processing to approximately 12 – 15 medial groups. In today’s current environment there are system limitations based on the software needed to perform these functions off-shore. The team consists of approximately 13 associates (excluding leadership).

Responsible Party
-------------------

Roles and Responsibilities	Supplier	HN
1. In accordance with Health Net Policies, contracts and Provider Policy manually and systematically prepare reinsurance claims to be processed through ABS.	X	
2. Running of all applicable reports necessary to perform manual calculations.	X	
3. Perform Calculations Required.	X	
4. Enter related claims information into ABS for adjudication.	X	
5. Answer related questions/inquiries through either MACESS Service Forms and or by Phone from PPG and or Finance.	X	
6. Maintain appropriate back-up as required and defined by retention management.	X	
7. Perform appropriate reporting to finance on a monthly basis up to and including accruals for expected reimbursements.	X	

(f) Manual Claims Processing for NE and AZ MC400 Related Claims from 1/1/2015 forward (for claims with a received date equal to or greater than 1/1/2015).

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Health Net will decommission the MC400 effective 1/1/2015 and will be required to perform manual claims adjudication for AZ and NE claims. a. 100% manual claims adjudication including but not limited to accumulator calculations, contract look-up, archiving, validation, mailing, collating checks and backers for appropriate regulator, responding to inquiries both in written and verbal format.	X	
2. Running of all applicable reports necessary to perform manual calculations.	X	
3. Perform Calculation Required.	X	
4. Request related incentive claims checks through the SAP system.	X	
5. Bind checks with appropriate back-up documentation and supply to mail services for mailing.	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
6. Maintain appropriate back-up as required and defined by retention management.	X	
7. Perform appropriate reporting to finance.	X	
8. Validating appropriate 1099 calculations.	X	

(g) Legal

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. In accordance with Health Net Policies and Procedures, Supplier will support Health Net Legal Department with the following (currently a team of 6 individuals and one leader); a. Review of legal matters related to claims adjudication. This includes but is not limited to review of spreadsheets, analysis of underpayments and overpayments, manual calculations of claims and supply the Health Net Legal Team with said documents, spreadsheets and analysis. b. 10. Provide assistance and backup in handling of special claims projects for settlement and evaluation purposes of litigation risks at the request and direction of Health Net legal counsel. It is agreed and understood that the members of this team will perform tasks at the direction of Health Net legal Department; that any and all communications between Health Net's legal Department, it's in house and outside counsels and the members of this team are considered to be confidential and subject to attorney client privilege, the attorney work product doctrine and common interest Privilege.	X	

(h) Medicare Secondary Payor Request Team

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. In accordance with Health Net Policies and Procedures, and CMS Guidelines, HN must respond to inquiries from either Employer Groups and or Medicare surrounding claims "possibly" incorrectly paid by Medicare as primary. a. Intake of request (typically request comes from Medicare hard copy paper). b. Date stamp, review, scan and acknowledge.	X	
2. Perform required research necessary to determine primacy.	X	
3. Respond within the requested/required time frame.	X	
4. Create adjustment in Claims adjudication system for payment.	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
5. Adjust claims as required.	X	
6. Maintain appropriate back-up as required and defined by retention management.	X	
7. Update appropriate COB related screens.	X	

(i) Pay and Recover

Pay and Recover is typically defined as a service provided by a PPG that is HN risk that Health Net needs to reimburse related services back to the PPG within the contractual agreed upon time frames. (Primarily Sutter)

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Intake of a pay and recover item typically comes in the form of a spreadsheet through a secured transmission to Health Net. Health Net has agreed upon contractual agreements to; a. Acknowledge spreadsheets. b. Review and respond to each claim item on the spreadsheet and return spreadsheet with responses. c. Perform multiple reconciliations with Sutter on disputed pay and recover items and “new day items.” d. Work in conjunction with the PNAs and Legal Team in arbitrations/litigation specific to “pay and recover.” e. Analyze reconciliations for possible settlements.	X	
2. Create a claim for each line item within ABS even if no payment is due.	X	
3. Respond back with each spreadsheet through the secured website back to Sutter.	X	
4. Insure that any member identified as a “performance group” member for any of the 4 specific performance groups are performed onshore for any “pay and recover” item.	X	
5. Retain spreadsheets in secure location as required by retention management.	X	

(j) Accumulator Updates

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Review requests received from multiple sources (contact center, Sales, direct correspondence, etc.,) in respect to incorrect accumulations.	X	
2. Running of all applicable reports (dump of data from various databases including but not limited to pharmacy, medical, mental health) necessary to perform manual calculations.	X	
3. Perform calculations requested to validate.	X	
4. Respond back to requestor within thirty (30) days or less of original receipt date.	X	
5. Adjust claims as required.	X	
6. Maintain appropriate back-up as required and defined by retention management.	X	

(k) REPER processing

A REPER is a claim that needs to be reprocessed, which is typically based on additional charges being added to an original claim, or additional information coming in to a previously contested claim.

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Review and process all REPER related claims within the regulatory time frames and or sooner based on contractual time frames such as “performance group processing).	X	
2. REPER analysis will also be done on a monthly basis and trends will be shared with senior leadership.	X	

(l) Compliance

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Review, update and implement compliance regulations. This will include the following (incorporate HNCA, HNOR, HNAZ, HNWA, NE, MHN (all): a. In conjunction with HN Corporate Compliance (these individuals) will interpret compliance regulations and implementing necessary changes. b. Will also include the creating and implementation of project briefs through implementation and testing of any systematic changes. c. Training of associates on compliance related changes and or refresher of existing regulations. d. Participation in on-site HEDIS audit and follow-up on any items requested during the HEDIS audit.	X	
2. Validation of compliance reporting and metrics as necessary/required.	X	
3. Respond within the requested time frames defined by either the HN Legal Team or HM Compliance for guidance and interpretation.	X	
4. Final validation of existing regulations to ensure compliance.		X

(m) Financial Reporting/Analytics

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Perform various functions to validate and insure appropriate integrity of data and will participate on monthly finance and quarterly calls.	X	
2. On a daily basis validate that the EIS (Everybody Information System) system is updated, current and correct. a. Discrepancies identified will be reported through the remedy system and key personnel supporting EIS. b. If necessary, participate in creation of BARR/Project to correct data and support testing and validation.	X	
3. Participate, analyze and provide data to finance/actuary in respect to Day 3 and Day 4 reporting on a monthly and quarterly basis.	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
4. Maintain and update monthly report card and do analysis on PDRs, REPERs, Denials.	X	
5. Do predictive modeling, analytics and forecasting and partner with Finance and Actuary on a daily, weekly, monthly, quarterly, semi-annual and annual basis.	X	
6. Approve/Validate Weekly QCare check registers for MediCal claims processing each Monday.	X	
7. Approve/Validate Weekly MC400 check registers and interest reports for MC400 related claims (NE and AZ) as identified for DOS prior to 1/1/2013.	X	
8. Monthly and Quarterly MTR reporting for Medi-Cal and MHN with supporting back-up. a. Maintain back-up in a secured location. b. Use appropriate tools for reporting.	X	
9. SOX Controls a. Validate all SOX Controls. b. Run all necessary reports for validation. c. Participate in SOX Audits. d. Respond to all SOX inquiries within established time frames either dictated by policy or auditor request for both pre-pay, and post SOX review.	X	
10. Maintain appropriate back-up as required and defined by retention management.	X	
11. Perform appropriate reporting to finance.	X	

(n) Vendor Oversight – List of Vendors to be included in Metric Analysis Document (excel document)

Roles and Responsibilities	Responsible Party	
	Supplier	HN

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. In accordance with Health Net Policies and Procedures, support vendor oversight of multiple suppliers of related services for accurate, timely claims adjudication and will insure compliance and appropriate controls as necessary. Functions will include but will not be limited to the following: <ul style="list-style-type: none"> <li>a. Validating incoming and outgoing file transmissions.</li> <li>b. 	Supplier	HN
1. Perform development functions through outbound phone calls. a. Supplier will do outbound phone call and development as per regulatory guidelines on Medicare related claims. b. Supplier will do outbound phone call and development on high dollar claims (typically billed amounts greater than 100,000.00) to obtain necessary information to avoid bouncing of claims between provider/facility and Health Net.	X	

(z) Request For Proposal Responses (for nonperformance groups)

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Respond to all requests for proposals. a. Supplier will partner with Sales and Product teams to supply data surrounding new business. b. Supplier will support Health Net with presentations and demonstrations to potential clients for new and existing business.	X	
2. Provide final response on RFP requests after initial assessment performed.		X

(aa) Compliance and Regulatory Affairs

Responsible Party

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Designate a minimum of one SME to support compliance review and regulatory affairs. This individuals tasks include but are not limited to <ul style="list-style-type: none"> <li>a. Review of All Plan Letters (APLs) from DHCS, Regulatory Notifications from CMS and other regulatory agencies.</li> <li>b. Initial interpretation of letters and documents and communicate findings to Health Net.</li> <li>c. Participate and assist with system design to implement new and or existing legislation.</li> <li>d. Develop Policies and Procedures.</li> <li>e. Support and cooperate with Health Net’s Compliance Oversight Team.</li> </ul>	X	

(bb) SOX/Sarbanes Controls

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Ensure SOX/Sarbanes controls are in place. <ul style="list-style-type: none"> <li>a. Interpret and validate controls.</li> <li>b. Run ad hoc reports for validation.</li> <li>c. Support and cooperate with HN’s designated auditors.</li> </ul>	X	

(cc) Electronic Data Interchange (EDI)

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Perform a daily reconciliation of claims received by the various Clearinghouses (i.e., Emdeon, Capario, MD Online, Group Health Incorporated (GHI – Medicare Coordination of Benefits Contractor), Data Systems Group (DSG – Qcare hospital claims only) and their successful loading into multiple Claims Adjudication Systems (i.e., ABS, Qcare, Symphony, and MC400). There are SOX controls relating to these validations.	X	
2. Provide SOX Auditors documentation of the daily electronic claim loads to the various systems as requested. Part of this SOX audit process includes describing the process used to validate, any changes since the previous	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
audit, and answering any questions from the SOX Auditors on either the process or the documentation.		
3. Answer the EDI Provider Number (800-977-3568) for various Provider EDI questions. Questions vary from why didn't the Plan receive my claims, how to sign-up for electronic remittance, and where is the specific transaction should certain data be submitted.	X	
4. Answer questions from various functional areas (i.e., Provider Network, Provider Reimbursement Specialist, Call Center, Appeals & Grievances, and Legal) relating to the EDI transactions.	X	
5. Current EDI transactions which are the responsibility of this team includes the 837I, 837P, 835, Claims Electronic Funds Transfer (EFT), 270/271 Eligibility, and the 276/277 Claim Status. Any additional future EDI transactions that are claims related would also be part of this team's responsibility such as the finalized ruling on the claims attachment format.	X	
6. Register providers for the electronic remittance (835) and/or the Claims EFT. Part of this process includes validating the correct account information with the bank as well as data entering information into the ABS/Qcare/Symphony screens.	X	
7. Respond to questions from the Clearinghouses that were either submitted by the Provider or Clearinghouse.	X	
8. For Weekend Releases, the Team will identify 837I and 837P files that need to be held for the Sunday Release Checkout.	X	
9. Administrative Simplification Act has implemented timelines for ICD-10, Operating Rules (i.e., Healthcare Claims and Claim Attachments), Health Plan ID (HPID), and Compliance Certifications. The ACS requires the Secretary to adopt and regularly update standards, implementation specifications, and operating rules for the information for the purpose of financial and administrative transactions. As an example, Council for Affordable Quality Healthcare (CAQH) has been selected to implement operating standards (CORE – The Committee on Operating Rules for Information Exchange) for various Claims EDI transactions (i.e., 835, 837I and 837P). The EDI Team works to implement these operating standards to become CORE certified. This includes understanding the regulations, writing the requirements, working with ITG on the design, EDI testing, implementation, and providing information to CAQH to become certified.	X	
10. The EDI Team sits on several Workgroup for Electronic Data Interchange (WEDI) committees to steer transaction decisions. Current committees	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
which they are participating are the 835, Claim Attachments, and HPID. This allows the Team to understand what requirements are needed for the Plan to maintain compliance.		
11. EDI Team works on multiple projects to determine what their impact is to the EDI transactions. Any projects with EDI impact would have the Team engaged in writing requirements, working with ITG on the design, EDI testing (which includes creating test scripts), implementation, and post implementation review. Some project examples that have EDI impact are AZ AHCCCS, ICD-10, Qcare migration, and CalPers.	X	
12. The EDI Team acts as the liaison between the ITG technical layouts and the Business use of this data. Therefore, members of this Team have to translate the file layouts and transmissions to how the Claims Team utilizes the data in their adjudication process.	X	

(dd) Claims Reporting

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Pull daily, monthly, quarterly, and annual Claims reports for various Claims Adjudication systems (i.e., ABS, Qcare, and Maces).	X	
2. Use various tools and databases to extract the claims data (i.e., FOCUS, UDMS files, Kbase, ODW, etc...)	X	
3. Completes ad-hoc Claim report request within three (3) Business days. These requests can come from Claims, Provider Network, Sales, Medical Management, Legal, and Corporate Executive Management.	X	
4. Claims Reports that ask for multiple years of claims data (typically over three years worth of data) are completed by a negotiated timeframe. These requests typically come from Provider Network, Compliance, and Legal. For these reports, the Claims Reporting Team creates the queries needed to obtain the specific data requested and then hands off those queries to ITG to run.	X	
5. Extracts Claims data necessary for various Compliance checks (i.e., CMS Monthly Claims report, AZ AHCCCS Monthly Claims report and PMRs). Part of the task includes the Claims Reporting Team to take the report results and work with the Claims Operations Team to validate and/or	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
determine why a variance occurred month over month. Typical responses include Membership declines/increases, New policy implemented, or New Project implemented.		
6. Maintains the configuration for the Claims Maccess queues. This would include working with the Claims Operations Team to determine why claims are dropping to another queue than what was expected.	X	
7. There are currently in excess of 300 scheduled reports – daily, weekly, monthly, quarterly, yearly. Other report requirements include regulator reports such as HEDIS roadmap.	X	

(ee) Benefit Testing Team

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Creates claims in the Benefit Testing environment to validate <b>new</b> Benefit plans are appropriately taking co-pays, deductibles, and accumulating correctly. All benefits having a Member's responsibility would have a claim created to validate the Benefit plan is working appropriately.	X	
2. Creates claims in the Benefit Testing environment to validate <b>modifications</b> to Benefit plans are appropriately taking co-pays, deductibles, and accumulating correctly. All benefits having a Member's responsibility would have a claim created to validate the Benefit plan is working appropriately.	X	
3. Based on set testing percentages provided by Claims and Benefit Configuration Management, Team will randomly select which Benefit plans are to be tested. Any Benefit plans not selected for testing can be moved directly into production.	X	
4. All testing documents must be maintained for annual SOX audit.	X	
5. Cross-train on the entry of manual claims accumulator to assist when available.	X	

(ff) Claims Project Team

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Claims expert on multiple Health Net projects to determine what their impact to Claims Operations. Projects with Claims impact would have a primary and back-up Member assigned. The Team would work with Project Management Office in writing the requirements, working with ITG on the design, review test scenarios from the Claims Testing Team to make sure all appropriate test cases are identified, implementation, and post implementation review.	X	
2. Creates Project Briefs and Minor Enhancements as needed based on either regulatory or process improvements changes.	X	
3. The Claims Project Team is the link between the technical Claims Adjudication system and the impact to the Claims Operations Team. Therefore, members of this Team have to understand the systematic process and translate how the Claims Operations Team utilizes the data in their adjudication process.	X	
4. For the implementation of Minor Enhancements, the Claims Project Team would work with the ITG Team on the requirements, solution, testing, and implementation of the Minor Enhancement.	X	
5. Researches issues from the Claims Operations Team to determine if there are Claims Adjudication issues which require ITG involvement. If the research determines that a system issue is present, then the Claims Project Team will open a Remedy Ticket.	X	
6. The Claims Project Team would work with ITG on the testing and validation to any code fixes relating to a Remedy Ticket. This Team would also coordinate with ITG on when the fix is moved to production.	X	
7. Performs audits of the Auto-adjudication (AA) logic and Division of Financial Responsibility (DOFR) to quickly identify any possible production issues.	X	
8. Triage AA and DOFR concerns from the Claims Operations Team to determine if system issue or training need is occurring.	X	
9. For HN projects, the Claims Project Team works with the Claims Testing Team (currently under ITG) to make sure the Claims scenarios and test scripts for each project are appropriate. If any questions relating to the testing outcomes develop, the Claims Testing Team reaches out to the Claims Project Team for validation that the results were expected or they will open a defect. The Claims Project Team does a random audit of completed test scripts and provides their questions or approval as	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
necessary.		
10. Will assist with the Paper Claim Vendor (Xerox) as concerns arise to determine if vendor issue or Claims Adjudication issue.	X	
11. Will research PHI concerns from the Privacy Office as needed.	X	
12. Works with the SOX and Internal Audit Teams to understand the Claims Adjudication systems. As an example, there is a current SOX control to show the ABS system is identifying possible duplicate claims. One of the Claims Project Team Members coordinates sitting with the SOX Auditors to provide screen shots and answer their questions.	X	
13. Data entry into the Adjustment Projects Database, which is monitored by the Adjustment Unit and Executive Management.	X	
14. Works with the Pricing Vendors (i.e., HNS and Multiplan) when possible claim pricing issues are directed to them by either the Call Center or Provider Network). An example is when a Provider calls HN insisting they don't have a Multiplan contract. The Claims Project Team would reach out to Multiplan to determine if the Provider's contract is still active or might have been retro-actively terminated.	X	

(gg) Manual Accumulator Team

Roles and Responsibilities	Responsible Party	
	Supplier	HN
1. Manually enters into the ABS Accumulator Screens missing accumulators as directed by the various functional areas.	X	
2. Requests to input accumulators information manually typically come from the Claims Accumulator Research Team under Supervisor C4d. This Team would provide documentation on what to manually enter. Accumulator questions and requests can also come from the Call Center, Sales, Brokers, Benefits, Medicare Financial Ops and Systems, and Appeals & Grievances.	X	
3. Research and adjust claims as appropriate based off the information supplied in the weekly Accumulator override report.	X	
4. Works on multiple HN projects to determine what their impact to	X	

Roles and Responsibilities	Responsible Party	
	Supplier	HN
Accumulators might be. Any projects with Accumulator impact would have a member of this Team engaged in creating requirements, working with ITG on the solution, review test scenarios from the Claims Testing Team to make sure all appropriate test cases are identified, implementation, and post implementation review.		
5. Works closely with the Benefit Configuration Team and the Membership Team to determine member impact when ABS cross-accumulation flags are not set-up properly.	X	
6. Works with Pharmacy and MHN when cross-accumulation issues arise to determine the issue and how to resolve.	X	
7. Cross-trained to be able to assist the Benefit Testing Team when available.	X	

(hh) Audit Support Services

Roles and Responsibilities	Responsible Party	
	Supplier	HN
<p><b><i>“Audit Support Services”</i></b> means those Functions associated with providing support for Audits of the applicable line of business or a component of it, whether conducted by (or on behalf of) Health Net itself or a Health Net Regulator or customer (e.g., a large Employer Group), including the following:</p> <ul style="list-style-type: none"> <li>a. Providing data and reports requested by the Auditors;</li> <li>b. Providing subject matter expertise and otherwise supporting the conduct of the Audit as requested by the Auditors;</li> <li>c. Assisting in the development and implementation of corrective action plans in response to Audit findings identifying weaknesses or deficiencies in the Audited Function; and</li> <li>d. Supporting Health Net communications with Regulators.</li> </ul>	X	

(ii) Audit Support Services

Roles and Responsibilities	Responsible Party	
	Supplier	HN
<b><i>“Claims Policy Services”</i></b> means those Functions associated with	X	

Roles and Responsibilities	Supplier	HN
<p>development and implementation of “<b>Health Net’s Claims Policies,</b>” which are the Health Net Policies as defined in Schedule P (<i>Health Net Policies</i>) governing or pertaining to the Claims Management Services, more specifically, the conduct of Health Net’s Claims Management Services</p> <p>Below are some examples of selected Claims Policy Development Services Functions, which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only:</p> <ul style="list-style-type: none"> <li>(a) Generally, provide operational subject matter expertise with respect to Health Net Claims Policies;</li> <li>(b) As requested, participate in meetings with Health Net and Supplier stakeholders having responsibility for the development, implementation, monitoring and enforcement of Health Net Claims Policies;</li> <li>(c) In response to changes in Laws, regulations, guidelines, policies, contracts or requests from Health Net’s Enterprise Process Change Organization (“EPCO”) or from Health Net’s or Supplier’s Compliance organization: <ul style="list-style-type: none"> <li>(i) Participate in Health Net EPCO Steering Committee meetings to review new legal and regulatory changes and assessment of business impact;</li> <li>(ii) Participate in Health Net EPCO regulatory implementation Change Teams;</li> <li>(iii) Project manage the operational implementation and/or affected system changes of legal and regulatory changes that affect Claims Management Services and participate in operational implementation and/or affected system changes of legal and regulatory changes that span multiple functions/departments, including tracking the progress of Deliverables and communicating status to Health Net’s EPCO and/or Compliance organization; and</li> <li>(iv) Based on the aforementioned meetings and guidance from the EPCO, prepare initial drafts of revised or new Health Net Claims Policies and submit them to the relevant Health Net and Supplier stakeholders for review, comment and approval;</li> </ul> </li> </ul>		

Roles and Responsibilities	Supplier	HN
(d) Prepare updated versions of Health Net Claims Policies to address input provided by relevant Health Net and Supplier stakeholder groups;		
(e) Provide communications and training to Supplier personnel regarding revised and new Health Net Claims Policies and access to Health Net personnel to such communications and training; and		
(f) Implement Health Net-approved Health Net Claims Policies by Supplier Personnel involved in the performance of the Claims Management Services.		

**EXHIBIT A-1**  
**PROVIDER INQUIRY PROCESSING SERVICES**

**1. GENERAL**

- (a) **“Provider Inquiry Processing Services”** means all life cycle Functions associated with the handling and processing of Provider Inquiries. Provider Inquiry Processing Services include (i) those Functions described in this Exhibit A-1, and (ii) the Cross Functional Services, as they apply to the Functions, Equipment, Software, process, or other activities described in this Exhibit A-1.
- (b) Supplier shall provide Provider Inquiry Processing Services for those Provider Inquiries for which Health Net requests that Supplier perform Provider Inquiry Processing Services.

**2. PROVIDER INQUIRY PROCESSING SERVICES**

Supplier shall perform the following Provider Inquiry Processing Services:

- (a) Process Provider Inquiries as follows:
- (i) Research PIs and determine whether an appeal will be upheld, modified or overturned.
  - (ii) For any PI that is not deemed a valid appeal and is to be marked as an error, document the reason why the appeal is not valid.
  - (iii) Review the SF to ensure all data elements listed are complete and correct, including the following data elements: member ID, provider ID, line of business, received date, closed date, grievance type, provider zip code, amount in dispute, case outcome, and provider specialty type. If the data elements are not complete or correct, update the information and continue processing the SF in accordance with Section 2(a)(iv).
  - (iv) Verify that the PI was received within the correct time period for both participating providers and non-participating providers. If the provider request was timely, Supplier shall continue processing the PI in accordance with Section 2(a)(v). If the request was not timely, Supplier shall generate an upheld letter indicating that the PI was not timely in accordance with Health Net policies and procedures.
  - (v) Determine whether additional information is required to complete the appeal and proceed as follows:
    - (A) If additional information is required, Supplier will:
      - (1) Generate the necessary correspondence to be sent to the provider;
      - (2) Pend the SF; and
      - (3) Save all relevant correspondence to the appropriate system.

- (B) If Supplier receives the requested additional information within the required timeframe, Supplier will continue to process the PI in accordance with Section 2(a)(vi).
  - (C) If the information is not timely received by Supplier, Supplier will generate a letter to the provider indicating that the Claim has been upheld.
- (vi) Review the PI documentation to determine whether the Claim in the PI has been previously appealed.
- (A) If the Claim has been appealed previously, determine whether the original PI was handled correctly. The Supplier Personnel performing this review function must be a different person than the person who processed the original Claim being appealed.
    - (1) If the original PI was determined to be handled correctly, determine whether additional documentation is included with the current PI.
      - a. If additional documents are attached, Supplier should continue processing the PI as provided in Section 2(a)(vii).
      - b. If additional documents are not attached, Supplier should generate correspondence to the provider indicating that the Claim will be upheld and should designate the correct grievance type in accordance with Health Net policies and procedures.
    - (B) If (1) the appeal was not originally handled correctly upon initial review; or (2) the Claim was not appealed previously, then Supplier shall proceed with the tasks provided in Section 2(a)(vii).
- (vii) Review the documentation and determine if an adjustment is due or if the original determination will be upheld.
- (A) If the Claim is to be overturned, review Claim history to determine if the Claim has since been paid correctly before making an adjustment.
    - (1) If the Claim has since been paid correctly, generate the appropriate correspondence, update the SF, and close the SF.
    - (2) If the Claim has not been paid correctly, either:
      - a. Reprocess the Claim;
      - b. Pend Claim for external review by a third party; or
      - c. Pend the Claim, update the SF, and keep pending until the Claim reaches remit status.

- (viii) If the PI is upheld, generate the appropriate correspondence (manual process from template) to the provider, file the correspondence in the correct folder, update the SF, and close the SF.
  - (ix) Quality audit all correspondence to the provider for accuracy (spelling, name, address, city location) before manually inserting into envelope.
- (b) For PIs that have been processed and are awaiting remit, Supplier shall perform the following:
- (i) Update the SF and validate all data elements in accordance with the Health Net policies and procedures;
  - (ii) Track the SF status until it reaches status that is ready for remit; and
  - (iii) Once the Claim reaches remit status, enter the appropriate close date on the SF.
- (c) Other Provider Inquiry Processing Services Requirements
- (i) Monitor appropriate mailboxes to receive PI processing requests from the Provider Inquiry Mail workstream and distribute the workload of SFs to be processed.
  - (ii) Process any provider appeals forwarded by IMedics in accordance with Health Net policies and procedures, including adjusting any Claims so designated by IMedics and generating all related correspondence to be sent to IMedics regarding the Claim.
  - (iii) Process all PIs in accordance with the timeframes as agreed by the Parties; and
  - (iv) Create and provide to Health Net a weekly report of all PI activity and status.

### 3. PROVIDER CORRESPONDENCE SERVICES

Supplier shall perform Provider Correspondence Services. “Provider Correspondence Services” are the Functions associated with the receipt, acknowledgment, routing and tracking of Provider inquiries via mail, including the following activities:

- (a) Scanning and distributing Provider white mail to Supplier;
- (b) Identifying and routing designated (PG) provider mail to the appropriate Tower (onshore);
- (c) Acknowledging to Provider receipt of Provider correspondence;
- (d) Reading Provider white mail, performing triage of the request, and routing correspondence to the correct Tower or Health Net, as appropriate (typically via Service Form);
- (e) Receiving response as appropriate from the appropriate Tower or Health Net;
- (f) Generating outgoing correspondence using Health Net templates and mail to Provider; and
- (g) Placing documents that require additional information in a designated folder and mail to Provider.

#### **4. PROVIDER ESCALATION SERVICES**

Supplier shall perform Provider Escalation Services. "Provider Escalation Services" are the Functions associated with the receipt and tracking of escalated Provider inquiries and communicating the escalation outcome to the Provider, including the following activities:

- (a) Escalating Provider inquiries based on type of issue presented, age or as required by Law or Health Net Policy;
- (b) Receiving Provider escalation outcome from Health Net and prepare draft communications outlining outcome to Provider;
- (c) Preparing final escalation outcome correspondence to the Provider;
- (d) Executing escalation outcome calls to Providers;
- (e) Sending escalation outcome emails; and
- (f) Responding in the Channel from which the escalation was received unless otherwise requested by the Provider.

#### **5. PROVIDER DISPUTE SERVICES**

Supplier shall perform Provider Dispute Services. "Provider Dispute Services" are the Functions associated with the receipt, initial inputting, forwarding (as required) and closing (as required) of PDRs (including Provider Inquiries, Re-Routes and Re-Scans) and any other documents, including the following activities:

- (a) Retrieving, researching, acknowledging, responding and/or routing to the appropriate tower for resolution;
- (b) Receiving, acknowledging and addressing the first submission of a Provider appeal of a claim payment;
- (c) Reviewing and routing to appropriate Health Net entity including MRU, Claims, Provider Network Management and/or Legal for final determination;
- (d) Tracking, addressing, and resolving Provider Disputes (e.g., regarding allegedly incorrectly processed Claims);
- (e) Performing SHP Provider Appeals Services;
- (f) Receiving dispute outcome from Health Net; and
- (g) Generating and distributing determination letter for state health programs.

For clarity, Health Net will retain responsibility for the clinical aspects of all Provider Disputes and Supplier will forward all Provider Disputes involving clinical decision making to Health Net for Health Net's resolution of the clinical aspect of the Provider Dispute.

**6. PROVIDER INQUIRY MAIL SERVICES**

Supplier shall perform Provider Inquiry Mail Services. "Provider Inquiry Mail Services" are the Functions associated with the receipt and initial inputting of Provider Inquiries, including the following activities:

- (a) Providing Provider Inquiry Mail Services for those Provider Inquiries for which Health Net requests that Supplier perform Provider Inquiry Mail Services;
- (b) Drawing the Provider Inquiry submission from the claims imaging system; and
- (c) Researching, acknowledging and responding or routing to the appropriate Tower for resolution within regulatory or Health Net guidelines.

**EXHIBIT A-2**  
**REBUTTAL PROCESS**

**THE PROCESS DESCRIBED IN THIS EXHIBIT A-2 SHALL APPLY IN THE EVENT THAT A SUPPLIER PERSONNEL BELIEVES THAT A HEALTH NET AUDITOR INCORRECTLY IDENTIFIED AN ERROR IN ANY OF THE ACTIVITIES PERFORMED BY SUPPLIER (E.G., CLAIM ADJUDICATION, ADJUSTMENT).**

**1. FIRST LEVEL REBUTTAL**

The first level of the rebuttal process involves the following:

- (a) The applicable Supplier Personnel is notified of the audit error(s) via an error ticket or other notification means (e.g., excel file).
- (b) If such Supplier Personnel believes that the Health Net audit team incorrectly classified the error, such Supplier Personnel will review the audit error(s) with the applicable Supplier supervisor.
- (c) If such Supplier supervisor is in agreement with the error issued by the Health Net audit team, such Supplier supervisor is responsible for communicating (including, where there is a need for an adjustment, via logging the request in the applicable system) the result to:
  - (i) If the audit was from Health Net's pre-pay audit team, the Supplier Personnel who performed the activity (e.g., processed the Claim, adjustment). Such Supplier Personnel is then responsible for correcting the error and re-processing the item (e.g., Claim, adjustment) in accordance with the applicable Service Level(s).
  - (ii) If the audit was from Health Net's post-pay audit team, the applicable Supplier supervisor. Such supervisor will then assign the item to the appropriate Supplier Personnel in order to correct the error and re-process the item (e.g., Claim, adjustment) in accordance with the applicable Service Level(s).
- (d) If such Supplier supervisor agrees that the error should be rebutted, the Supplier Personnel who performed the activity (e.g., the Claim, adjustment) will complete a "Rebuttal Form", of a form and format to be determined by Health Net, attach the necessary documentation to support the rebuttal, and forward it to the applicable Health Net audit supervisor within the applicable timeframes (as set forth in Health Net Policies).
- (e) If multiple errors were noted at a single time (associated with one or more Supplier Personnel), Health Net may require Supplier to consolidate its rebuttals into a single form and resubmit them to the applicable Health Net audit supervisor in a single response.
- (f) The Health Net audit supervisor and, if applicable based on Health Net Policies, the Health Net claims supervisor will review the error finding to determine if the audit error is based on established claims processing guidelines.
- (g) If the Health Net audit supervisor and, if applicable based on Health Net policies and procedures, the Health Net claims supervisor:

- (i) Accepts the rebuttal, then the errors are removed from the applicable Supplier Personnel's records.
- (ii) Does not accept the rebuttal (i.e., continues to believe there is an error), then the error is upheld and this decision along with the appropriate documentation is sent back to the applicable Supplier supervisor. The Supplier supervisor is responsible for communicating the result as described in Section 1(c)(i) and (ii), above.

## **2. SECOND LEVEL REBUTTAL**

The second level of the rebuttal process involves the following:

- (a) If the Supplier Personnel and the applicable Supplier supervisor continue to disagree with the error identified by Health Net, the rebuttal will be forwarded to the Supplier Director of the Claims Operation for review and determination.
- (b) The Supplier Director of Claims Operation will review the rebuttal along with the Supplier Claims Trainer and the Supplier Claims service manager.
  - (i) If the Supplier Director of Claims Operation, Supplier Claims Trainer, and Supplier Claims service manager are in agreement with the error, such decision will be forwarded to the appropriate Supplier supervisor. The Supplier supervisor is responsible for communicating the result as described in Section 1(c)(i) and (ii), above.
  - (ii) If all the members of the Supplier Claims service team are in agreement that a second level rebuttal is necessary, the Rebuttal Form and the supporting documentation shall be forwarded to the Health Net Claims Audit Director (Manager) for review.
    - (A) If the Health Net Claims Audit Director (Manager) and, if applicable based on Health Net Policies, the Health Net claims director, overturn the error, the error is removed from the applicable Supplier Personnel's record.
    - (B) If the Health Net Claims Audit Director (Manager) and, if applicable based on Health Net Policies, the Health Net claims director, upholds the error, such decision is final and the supplier Claims service team shall be notified electronically as described in Section 1(c)(i) and (ii) above.

## EXHIBIT A-1 CLAIMS SOLUTION

### 1. INTRODUCTION

This document is the Solution Description for Statement of Work # 1 (*Claims Management Services*) (“**Statement of Work**”). Whereas Exhibit A (*Claims Management Services*) describes which Functions Supplier is responsible for performing under this Statement of Work, this Exhibit A-1 (*Claims Solution Description*) describes the **means by which** and the **manner in which** Supplier will perform those Functions. This document contains an overview of Supplier’s service delivery architecture, a depiction of which is – displayed on a global map containing the geographic configuration (and delivery architecture of Supplier’s Solution (as it will exist at the completion of Phase 2, identifying all Service Delivery Centers of Supplier (and its Affiliates and other Subcontractors) that will be utilized in performing and delivering the Services (including the back-up and failover locations for each) and how they will be interconnected to each other and to Health Net’s IT Environment. It also provides additional descriptive information about each of the principal components of Supplier’s Solution.

This Exhibit A-1 (*Claims Solution Description*) includes the following attachments, which are incorporated herein by reference

Exhibit A-1.1 Approved Service Delivery Centers

Exhibit A-1.2 Service Delivery Configuration at the Completion of Phase 2

### 2. DEFINITIONS AND INTERPRETATION

#### 2.1 Defined Terms

The following terms, when used in this Statement of Work, will have the meanings set forth below unless otherwise specifically defined in the body of this document. Additionally any capitalized term used but not defined in this Exhibit A-1 (*Claims Solution Description*) will have the meaning indicated in Schedule W (*Glossary*).

Defined Term	Meaning
“ <b>Solution</b> ”	A collective term referring to the <b>means</b> by which and <b>manner</b> in which Supplier will perform and deliver the Services under this Statement of Work.

### 3. SOLUTION OVERVIEW

#### 3.1 High-level Service Delivery Architecture and Configuration

This section provides an overview of the geographical and physical configuration of Supplier’s Solution for the Services under this Statement of Work. Exhibit A-1.1 (*Approved Service Delivery Centers*) provides additional information about each of the Service Delivery Centers Supplier will use to provide the Services under this Statement of Work, including both the primary Service Delivery Centers and the back-up / failover locations that Supplier will activate

and use to provide the Services if operations at any primary Service Delivery Center are disrupted or disabled.

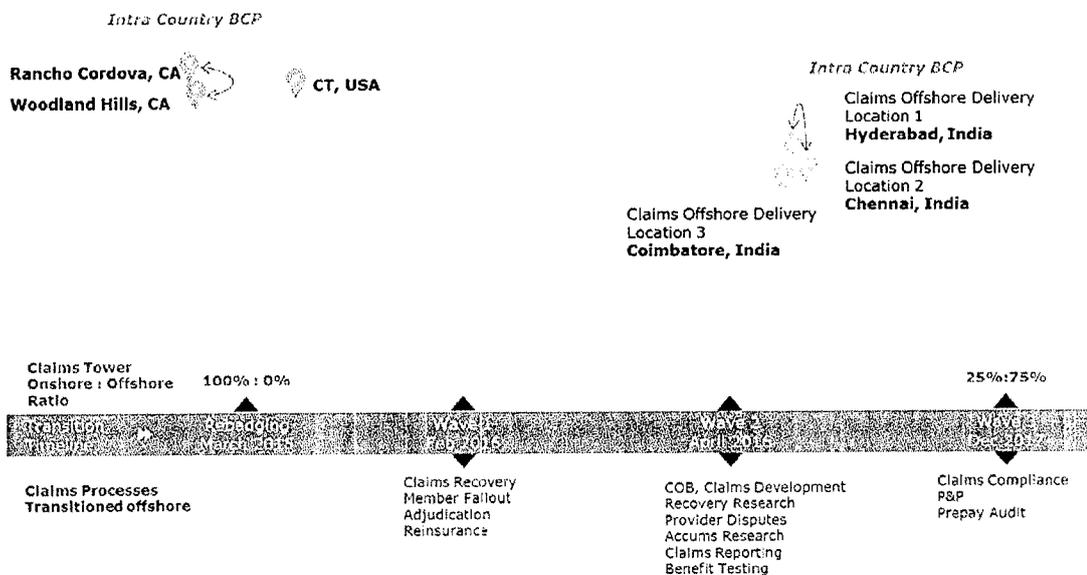

Figure 1

Note: Dates represent effective end date of each transition wave.

The above diagram illustrates the overall solution at the Point of Departure and how it evolves into the Point of Arrival. Initially all the Health Net resources will be rebadged and work out of the current Health Net US locations in Rancho Cordova and Woodland Hills. The Transition is planned to occur over in 3 waves as depicted in the diagram with some of the work gradually moving to the offshore locations of Chennai and Hyderabad in India. The onshore/offshore ratio at the Point of Arrival and the Point of Departure is illustrated above.

### 3.2 Service Delivery Model

This section provides an overview of the commercial delivery model Supplier will utilize to provide the Services under this Statement of Work. Exhibit H (*Claims Subcontractors*), Supplier will not use any Supplier Affiliates or Subcontractors to perform the Services under this Statement of Work.

### 3.3 Business-Process-as-a-Service

The Services to be provided under this Statement of Work will be provided under a ‘Business-Process-as-a-Service’ delivery model - i.e., as a fully integrated vertical service which Supplier is responsible for providing all the associated resource / service layers (facilities, IT infrastructure, tools, application software, labor, infrastructure and applications operations and support, and performance of the associated business processes); and Health Net is purchasing ‘business

outcomes' (e.g., fully processed claims). Supplier will be responsible for performing the Claims Management Services set forth in Exhibit A (*Claims Management Services*).

#### 4. CHANGES TO SUPPLIER'S SOLUTION

As a general principle, Supplier has both the right and the obligation to perform the Services to be provided by it under this Statement of Work in the manner described in this Exhibit A-1 (*Claims Solution Description*). That said, Supplier is charged with responsibility for the adequacy of its Solution, which is to say that if the Supplier's Solution, as described in this Exhibit A-1 (*Claims Solution Description*), should prove inadequate at any point during the Statement of Work Term for Supplier to perform and deliver the Services in accordance with the obligations of the Agreement (including this Statement of Work), then Supplier is responsible for making such changes to its Solution as are necessary to enable Supplier to perform and deliver the Services in accordance with such obligations. All such changes are to be made in accordance with Schedule H (*Change Control Process*) of the Agreement, as applicable according to its terms; provided, however, that Supplier is responsible for making such changes at its own cost and expense except in those cases (if any) in which the Agreement expressly provides that Health Net has Financial Responsibility for them. SOLUTION DESCRIPTION

Supplier's solution is built on the following foundational aspects:

- **Quality Focus**– Supplier's primary focus is to maintain seamless continuity of services while ensuring regulatory and contractual compliance requirements. For all processes migrated Offshore, the focus will be on ensuring adherence to compliance and quality.
- **Support ratio** – To enable focused monitoring and feedback, Supplier's delivery model provides an Personnel to Supervisor and QA ratio Onshore and Offshore as described in Section 7.4 of this exhibit
- **Continuous Improvement** - Supplier will appoint dedicated Six Sigma resources during the different stages of the project, to identify sustainable improvement opportunities. The typical ratio will be 1 Six Sigma resource for every 150 Supplier Personnel FTEs.

#### Knowledge Retention:

- **Domain Experts** – Supplier will invest in staff (existing and hired) with previous healthcare experience for key support functions including Operations, Transition, Training, Quality and Compliance.
- **Health Net Training Academy** –, Supplier's dedicated Health Net Training Academy will be tasked with the mandate of building a Knowledge repository during Phase 2. During phase 3, the Training Academy will be involved in maintaining a Knowledge repository, updating Training Academy, process documentation, providing training to new hire supplier personnel and providing higher level training to experienced resources for Claims Operations. Supplier will periodically conduct training to keep supplier personnel up-to date on regulatory, process and system changes. Supplier will provide ongoing/refresher training as per the updates received from Health Net and will conduct assessments to ensure that there are no knowledge gaps. Refresher training will be conducted based on Quality audit scores for Supplier Personnel

#### Solution Location:

- Supplier will deliver Claims Management Services from Service Delivery Centers in the US and India. Exhibit A-1.1 (*Approved Service Delivery Centers*) describes the On-shore, near-shore and Offshore Service Delivery Centers that Supplier will use to deliver the Claims Management Services.

## 5. SCOPE OF SERVICES

In addition to the Claim Management Services described in Exhibit A (*Claim Management Services*) and for clarity includes the following:

1. Supplier will research, respond, track and report privacy related incidents
2. Supplier will also train and educate the team on HIPAA Privacy and Security
3. Supplier's Claims operations team will provide necessary information to sales team
4. For RFP support, Supplier Claims operations team will provide opinion and operational data points
5. Supplier will provide necessary operational information for new vendor on-boarding and existing vendor renewals. Health Net will be responsible for vendor negotiations and contract execution.
6. Supplier Personnel for Claims Management Services will be dedicated only to Claims operations.

## 6. OPERATING MODEL

The operating model for Claims operations defines the service delivery blue print and key aspects of service delivery. The operating model also describes how the Claims Management Services will be delivered for each functional process area in a scalable global environment

### 6.1 Resource Mix

Supplier will leverage its global operating model to deliver the Claim Management Services.

Supplier has considered the following criteria to define its Onshore/Offshore strategy -

- Regulatory requirements
- Availability of skills at Offshore locations
- Health Net Offshore restrictions
- Consideration for work load to resource ratio
- HR constraints (i.e. PTO, illness, injury, etc.)

Processes requiring voice support will be delivered out of US and Philippines. Roles identified to move offshore (Supervisors/coordinators/sr. coordinators) will continue to be responsible for current tasks and activities being performed onshore.

The Onshore/Offshore resource mix for Claims Management Services listed below in Table 1.

Sub function	Estimated End State		
	Onshore %	Offshore %	Location
<b>Claims Management Team</b> (VP, Executive Assistant and Senior Systems Analysts)	100%	0%	W,R
<b>Claims Sub Tower A</b>			
Claims Pre Pay Audit	15%	85%	W,R,Ch,H,Co
Claims Compliance and SOX Control	25%	75%	W,R,Ch,H
Policies & Procedure	20%	80%	W,R,Ch,H
Legal / Adjustments	25%	75%	W,R,Ch,H
Claims Recovery and COB	25%	75%	W,R,Ch,H,Co
<b>Claims Sub Tower B</b>			
Cal MediConnect (Duals) and Medicare Advantage	25%	75%	W,R,Ch,H
Medi-Cal (Primarily Provider Disputes and Testing), Clerical and Life Insurance and Disability Claims	25%	75%	W,R,Ch,H
Reinsurance and Member Fallout	25%	75%	W,R,Ch,H
PDRs (From Call Center)	100%	0%	R
<b>Claims Sub Tower C</b>			
MHN Claims	20%	80%	W,R,Ch,H

Sub function	Estimated End State		
	Onshore %	Offshore %	Location
AZ AHCCCS	100%	0%	PH
Pay and Recover	15%	85%	W,R,Ch,H
Provider Disputes	25%	75%	W,R,Ch,H
Provider Reimbursement Specialist	25%	75%	W,R,Ch,H
Performance Group	100%	0%	W,R
Accumulator Research	25%	75%	W,R,Ch,H
<b>Claims Sub Tower D</b>			
Electronic Data Interchange	25%	75%	W,R,Ch,H
Claims Projects	25%	75%	W,R,Ch,H
Claims Reporting	15%	85%	W,R,Ch,H, Co
Benefit Testing	100%	0%	W,R,Ch,H, Co
Manual Accumulator Entry	20%	80%	W,R,Ch,H
Paper Vendor	25%	75%	W,R,Ch,H

Table 1

Legend	
Locations	Code
Woodland Hills (US)	W
Rancho Cordova (US)	R
Tempe (US)	Te
San Rafael (US)	S

Legend	
Telecommuting (US)	T
Manila (Philippines)	M
Cebu (Philippines)	Cb
Phoenix (US)	P

Key Note

- \*The above percentages are approximate estimates at this point.
- The above plan will be finalized during the Process Assessment Phase as described in the Transition Manual, with agreement between Health Net and Supplier.
- The estimated end state is expected by March 2017
- As shared in Section 6 above only those roles mandated by Health Net or where skills are not available offshore would be onshore.
- As shown in the Table 1, while a process can span across 4 locations there will be no role within a process which will span across more than 2 locations
- • Support for the Commercial and Medicare processes (as currently provided under the existing agreement between Supplier and Health Net) from Supplier’s delivery centers in Hyderabad and Coimbatore, India. Changes to the current Solution will be documented through the Change Management process

6.2 Location

Supplier will deliver the Claims Management Services from the US and India. Onshore services for the initial 2 years following the contract effective date will be provided from Health Net facilities at Woodland Hills and Rancho Cordova. For AZ AHCCCS, current resource will be relocated to Supplier Phoenix, AZ delivery center. For those not willing to relocate, Supplier will hire experienced staff in either Rancho Cordova or Woodland Hills and train them to ensure compliance, knowledge transfer and production ramp up before releasing existing staff.

- Health Net mandated onshore staffing
- Availability of talent pool
- Skill requirements
- Regulatory limitations
- Business continuity

Table 2

During Phase 2, Supplier will keep Health Net rebadged FTEs at its current location. Post Phase 2, Supplier will evaluate the operating model and will have the right to relocate resources to its other onsite US locations including Woodland Hills and Phoenix.

The below diagram illustrates how teams across locations in US & India will interact on an ongoing basis to ensure effective planning, monitoring and tracking of Claims processes, activities and requirements. Following are the key activities:

1. Forecasting – identifying the number of transactions, volumes and activities that would need to be transacted and processed in coming months
2. Capacity Planning- ensure staffing in place can manage the forecasted volumes
3. Monitor Productivity- An ongoing daily, weekly, monthly exercise to track, analyze and report on productivity trends
4. Reallocation based on productivity – An ongoing exercise to track and shift work, based on the transaction and volumes, within teams and individuals to ensure desired productivity
5. Monitor Quality and SLAs - An ongoing daily, weekly, monthly exercise to track, analyze and report on quality and Service Levels

The organization structure has been functionally designed in a manner that facilitates effective operations across locations. This model ensures that workflow is effective in real time facilitating tactical monitoring.

### 6.3 Operating Hours

Supplier will at minimum replicate the operating hours currently adhered to by Health Net's Claims organization as of the Effective Date, as set forth in the table below. Supplier acknowledges and agrees that performance of the Claims Management Services will regularly require Supplier Personnel to perform additional/overtime work outside regular operating hours, and that such additional/overtime work is within the scope of the Claims Management Services.

Supplier will extend its hours of operations (for example, through overtime, weekend and holiday work) from time to time as needed to meet regulatory requirements, Compliance and Service

Level metrics and other requirements of the Agreement. Supplier's work during such extended hours of operations is within the scope of the Claims Management Services.

Within the regular Hours of Operations listed below, Supplier will have staff work according to defined shift schedules. However, Supplier will make reasonable efforts to permit Supplier staff to work flexible shift times when that can be done without jeopardizing Supplier's ability to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement.

The operating hours for the Claims Management Services are given below.

Sub function	Hours of Operations (PST)
<b>Claims Sub Tower- A</b>	
Claims Pre Pay Audit	08:00 am to 17:00 pm
Claims Compliance and SOX Control	08:00 am to 17:00 pm
Policies & Procedure	08:00 am to 17:00 pm
Legal / Adjustments	08:00 am to 17:00 pm
Claims Recovery and COB	08:00 am to 17:00 pm
<b>Claims Sub Tower- B</b>	
Cal MediConnect (Duals) and Medicare Advantage	08:00 am to 17:00 pm
Medi-Cal, Clerical and Life Insurance and Disability Claims	08:00 am to 17:00 pm
Reinsurance and Member Fallout	08:00 am to 17:00 pm
PDRs (From Call Center)	08:00 am to 17:00 pm
<b>Claims Sub Tower- C</b>	
MHN Claims	08:00 am to 17:00 pm
AZ AHCCCS	08:00 am to 17:00 pm
Pay and Recover	08:00 am to 17:00 pm
Provider Disputes	08:00 am to 17:00 pm
Provider Reimbursement Specialists	08:00 am to 17:00 pm
Performance Group	08:00 am to 17:00 pm
Accumulator Research	08:00 am to 17:00 pm
<b>Claims Sub Tower- D</b>	
Electronic Data Interchange	08:00 am to 17:00 pm
Claims Projects	08:00 am to 17:00 pm
Claims Reporting	08:00 am to 17:00 pm
Benefit Testing	08:00 am to 17:00 pm

Sub function	Hours of Operations (PST)
Manual Accumulator Entry	08:00 am to 17:00 pm
Paper Vendor	08:00 am to 17:00 pm

Table 3

#### 6.4 Operations

Supplier approach managing operations, is as follows

- **Operations Focus:** Team huddles, floor walks, daily performance reviews, daily supplier personnel communication plan and customer calibration sessions.
- **Performance Management** Measure and manage supplier personnel performance through data and service dashboards
- **Span of Control:** Supplier will provide for the following span of control:
  - Operations Lead/1:500
  - Manager 1:50
  - Supervisor 1:15
  - Quality Auditor 1:15
  - Trainer 1:20 (during training)
  - Team Lead 1:15
  - Six Sigma & Process Excellence 1:150
- **Health Net Training Academy:** Supplier will establish a dedicated Health Net Training academy for management of training content and delivery of training programs. The Claims management function of the training academy will maintain a “Knowledge Management Portal” for management and easy access to training content, desktop procedures and P&Ps. The Health Net Training Academy will work closely with the Training operations and facilitate necessary training. Training material will be continuously updated based on the System updates and process updates.
- **Team Huddle:** Supplier’s team leads will conduct daily team meetings for individual processes to share any critical updates, provide feedback and communicate lessons learned, and plan for the day.
- **Quality:** Supplier will implement Health Net mandated specific quality and compliance programs in its delivery model for managing and achieving Service Levels. Supplier will analyse audit findings to determine root causes and will deploy corrective and preventive

solutions to improve quality. In the daily team meetings, prevalent trends in errors, root causes and preventive actions will be discussed and implemented.

- **Continuous Improvement:** Supplier will have a dedicated Process Excellence (PEX) team consisting of Six Sigma resources for Health Net Claims functions to optimize performance and handoffs in Health Net Claims processes while improving standardization.
- **Rewards and Recognition:** Supplier will recognize the efforts of its best performers using stack ranking and will reward them through a structured reward and recognition program that aligns with quality and productivity objectives. The Rewards and Recognition will be applicable for both Onshore and Offshore teams. The specific criteria for the awards will be decided by the Operations Leads depending on the specific behavior and/or results to be achieved

**6.5 Resource Profile**

Supplier has a very well defined methodology for recruitment and selection of candidates at offshore locations. Supplier will work closely with Health Net to establish job descriptions at various levels and functions. Based on these job descriptions, Supplier will select candidates with the proper qualifications and experience in order to ensure a “best-fit” for Health Net.

The table below is an illustration of indicative requirements for Offshore staffing and the minimum qualifications that must be met to be selected for the Claims operations.

<b>Claims Examiner</b>	
<b>Qualification &amp; Experience</b>	<b>Selection Process</b>
<ul style="list-style-type: none"> <li>• Graduates with 1-2 years with Healthcare claims experience</li> <li>• Good written and verbal communication skills.</li> <li>• Knowledge of healthcare basics</li> <li>• Familiar with claims processing applications</li> </ul>	<ul style="list-style-type: none"> <li>• Aptitude Test</li> <li>• HR Interview</li> <li>• Written test of Claims basics</li> <li>• Domain / Operations Interview</li> <li>• Technical interview on Claims adjudication concepts</li> <li>• Education and Professional</li> </ul>

Table 4

<b>Claims Adjuster</b>	
<b>Qualification &amp; Experience</b>	<b>Selection Process</b>
<ul style="list-style-type: none"> <li>• Graduates with 3-4 years with Healthcare claims experience</li> <li>• Good written and verbal communication skills.</li> <li>• Knowledge of healthcare basics</li> <li>• Familiar with one or more claims processing applications</li> <li>• Familiar with claims for multiple LOBs</li> </ul>	<ul style="list-style-type: none"> <li>• Aptitude Test</li> <li>• HR Interview</li> <li>• Written test of Claims basics</li> <li>• Domain / Operations Interview</li> <li>• Technical interview on Claims adjudication and recovery concepts</li> <li>• Education and Professional Background Check</li> </ul>

### 6.8 Third Party Tools and Services

Supplier will use the following Tools and Services. The contractual relationship for all Supplier Managed Third Parties will continue to remain with Health Net. Supplier will be responsible to manage day to day operational liaison.

Third Party Tools/Service	Tool/Service Provider	Contract Ownership
Scanning/Imaging Services	Xerox/ACS	Claims
Storage and Archival Services	MACCESS / Filenet / MHN Imaging System	Health Net
Language Translation	Marketing Translation Services	Claims
Clearing House	Emdeon, Capario, MD Online, GHI, DSG, WebMD	Claims
DRG Grouper	3M	Health Net
Pricing	Burgess	Configuration
Pricing	Viant	Configuration
Pricing	Multi Plan (Funnel pricing)	PNM
Data transfer to CMS for reimbursement	Ingenix	Claims
Subrogation Services	Rawlings	Claims
Recovery Services	Rawlings AIM CDR HRI Trover (Trover Solutions). Capital Recovery	Claims

	GB Collects	
	Souverign Receivables	
	HMS	
	RMS	
	HDI	
	CAQHC	
EDI Tools	Edifecs	Health Net IT
Code Sets	Optum	Claims

Pricing	FirstHealth	PNM
Pricing	FirstChoice - Oregon, Washington	PNM

Table 13

Table 14

**6.9 Regulatory On-shore Requirements**

Section 7 sets forth the Claims Management Services roles that Supplier is required to retain Onshore. Supplier will at all times provide the Claims Management Services in accordance with Schedule Y (*Offshore Prohibitions and Requirements*)

**6.10 Service Performance Management**

Supplier will provide and implement the quality assurance procedures that are necessary to perform the Claims Management Services in accordance with the Service Levels, reporting formats and frequency

**Approach**

- Supplier will use a statistically valid sample size will be for auditing

**Tools**

Supplier will use quality analysis using tools including:

- Pareto Analysis
- Fish Bone Diagram
- Box Plot

**7. KEY ASSUMPTIONS**

1. Any work request received directly at Health Net in non-digital format will be batched and sent by Supplier to the scanning/imaging service provider for conversion into digital format. However for regulatory requirements Onshore Supplier Personnel will scan the documents in the United States

2. The Onshore/Offshore mix will be validated during detailed Transition Planning as set forth in the Transition Manual.
3. Cognizant will deploy resources that are proficient in English for providing the Services, however, member communications will be in their preferred languages

**EXHIBIT A-1.1**

**APPROVED SERVICE DELIVERY CENTERS**

The Service Delivery Centers at (or from) which Supplier is authorized to perform the Services under this Statement of Work are those listed below. Even if Health Net has approved Supplier's use of an Affiliate or other Subcontractor to perform certain aspects of the Services, their performance must be from an approved Service Delivery Center listed in this Exhibit A-1.1 (*Approved Service Delivery Centers*).

Supplier will provide sufficient coverage for the Claims Management Services by leveraging its global delivery network. A list of holidays across delivery locations will be mutually agreed with Health Net to ensure that there is no impact on operations.

**Onshore Service Delivery Centers**

Primary Location	Type of Facility	Hours of Operation	Functions / Services	Languages Supported	Key Platform / Systems	Back-up / Fail-over Location	Facility Operator	Facility Owner	Date Placed in Service	Multi-client Site (Y/N)?

Supplier will mutually agree on the list of holidays and ensure sufficient coverage by leveraging the global delivery network to ensure no impact on operations.

### EXHIBIT A-1.2

### SERVICE DELIVERY CONFIGURATION AT THE COMPLETION OF PHASE 2

Set out below is a description of Supplier's 'To-Be' Solution for the Claims Management Services as it will be configured at the completion of Phase 2. The tactical To Be solution will be mutually defined during the Transition below is an illustrative technology environment for claims operations

\*Lotus notes above includes associated databases

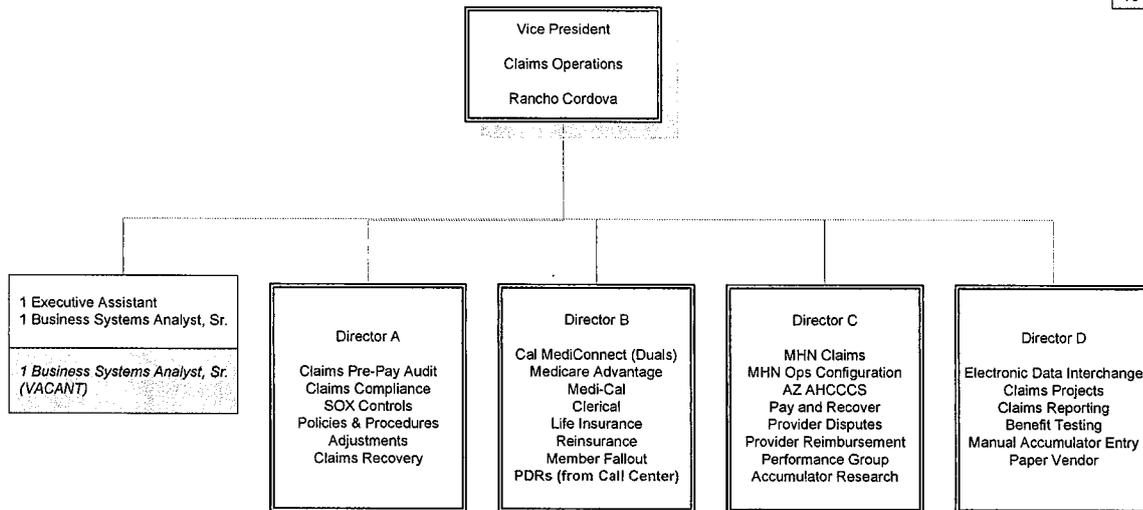

**EXHIBIT A-3**  
**CLAIMS ORGANIZATION CHART**

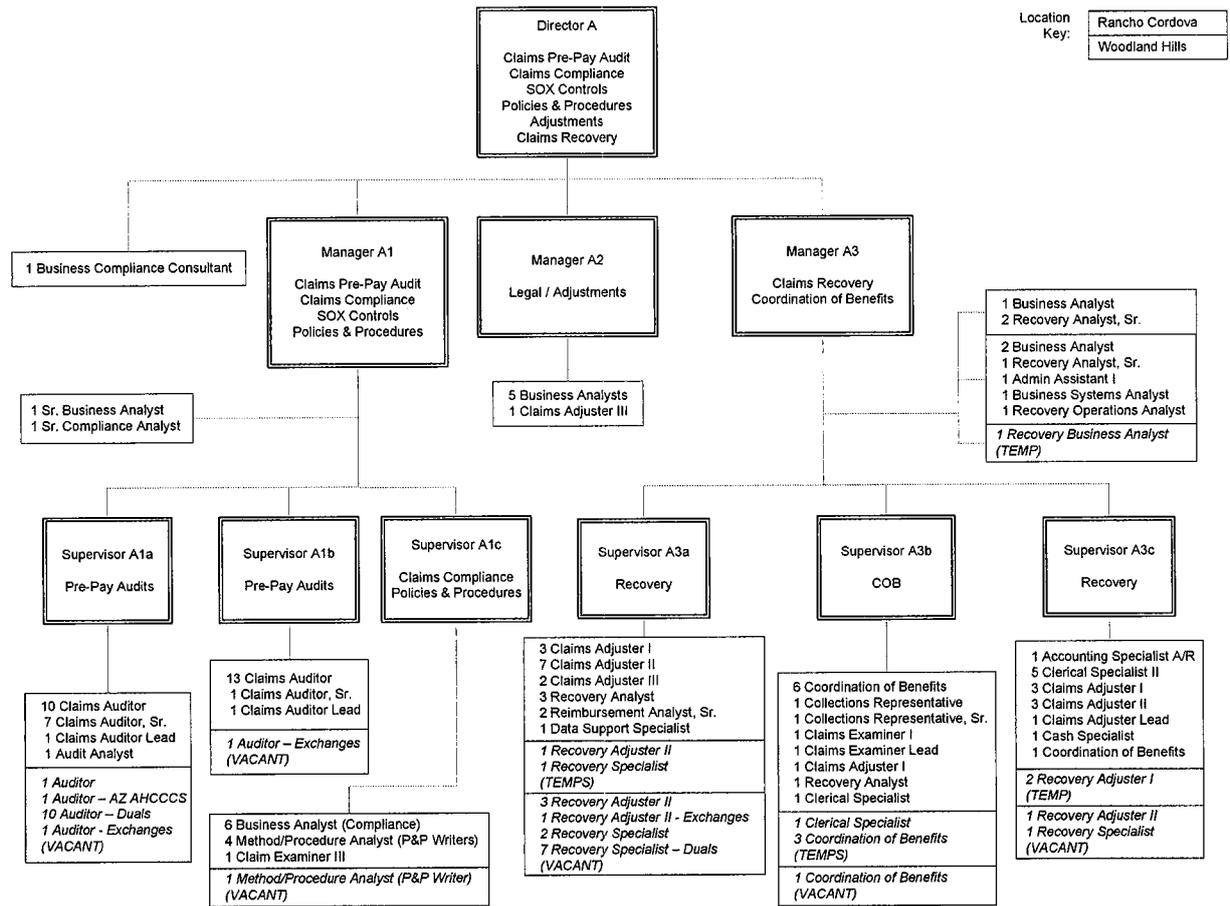

**EXHIBIT A-3****CLAIMS ORGANIZATION CHART**

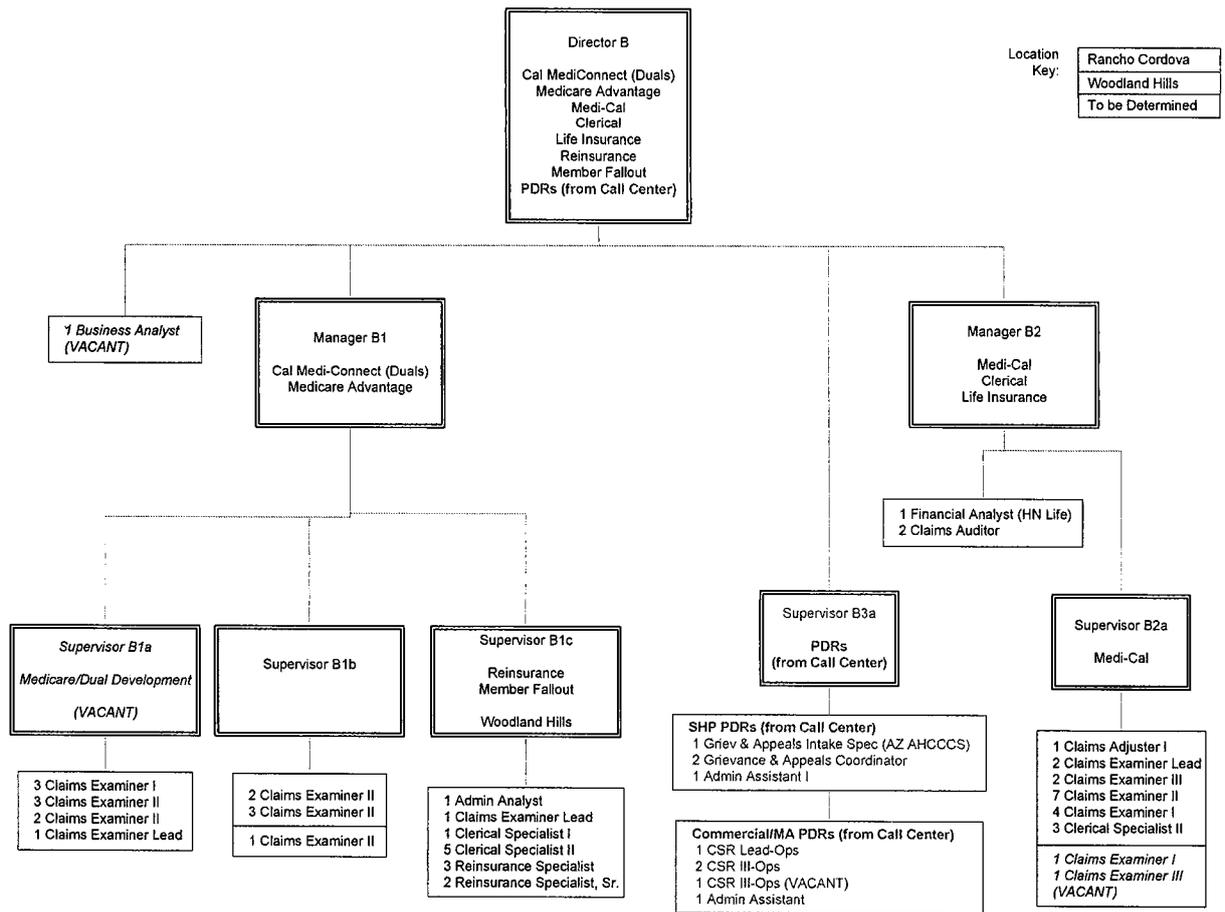

This Exhibit A-3 (*Claims Organization Chart*) contains organization charts showing, at a specific recent point in time prior to the Effective Date, the positions (including both filled and currently open positions) that represent the Health Net organizational unit(s) whose Functions are being outsourced to Supplier under this Statement of Work. This document is included as part of this Statement of Work as a supplemental means of depicting the Functions that comprise the Claims Management Services for which Supplier is assuming responsibility from Health Net under this Statement of Work. It is **not** included for the purpose of establishing any numerical FTE benchmark or baseline for use in determining Supplier's Charges for the Claims Management Services. Any changes in the organization charts between the Agreement's Effective Date and the BPaaS Services Commencement Date shall not be interpreted to represent a change in the scope of the Claims Management Services in the absence of Health Net specifically adding or removing Functions from Exhibit A (*Claims Management Services*) of this Statement of Work.

**STATEMENT OF WORK #2 (MEMBERSHIP AND CONFIGURATION SERVICES)**

**AMENDED AND RESTATED  
MASTER SERVICES AGREEMENT**

**STATEMENT OF WORK #2 (MEMBERSHIP AND CONFIGURATION SERVICES)**

This Statement of Work #2 (*Membership and Configuration Services*), dated November 21, 2014, but effective as of November 2, 2014 (“the **SOW Effective Date**”), is made by and between Health Net, Inc., a Delaware corporation with its principal place of business located at 21650 Oxnard Street, Woodland Hills, California 91367 (“**Health Net**”), and Cognizant Healthcare Services, LLC (“**Supplier**”), a Delaware corporation having an office at 500 Frank W. Burr Blvd., Teaneck, New Jersey 07666 (each, a “**Party**” and collectively, the “**Parties**”). This SOW #2 (*Membership and Configuration Services*) is entered into and shall be governed by the terms of that certain Amended and Restated Master Services Agreement entered into between the Parties dated November 21, 2014 (the “**Agreement**”). This Statement of Work #2 (*Membership and Configuration Services*) replaces and supersedes in all respects the Statement of Work #2 dated November 2, 2014.

**1. INTRODUCTION**

**1.1 Background & Purpose**

This SOW #2 (*Membership and Configuration Services*) describes the Membership and Configuration Services Supplier will provide for Health Net, as such Services are defined in Exhibit A (*Membership and Configuration Services*) to this SOW #2 (*Membership and Configuration Services*), and sets forth certain terms and conditions relating to them, including, among other things:

- (a) The scope of the Membership and Configuration Services;
- (b) The Solution Supplier will use to perform and deliver them;
- (c) The Operational Service Levels Supplier will meet in providing them;
- (d) The Key Supplier Positions applicable to them; and
- (e) The Subcontractors (if any) approved by Health Net to provide certain of them.

**1.2 Structure**

This SOW #2 (*Membership and Configuration Services*) is comprised of this cover document and the following Exhibits:

<b>Table 1: Exhibits to SOW #2 (<i>Membership and Configuration Services</i>)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
1	Exhibit A ( <i>Services</i> )	Describes the scope of the Membership and Configuration Services.

<b>Table 1: Exhibits to SOW #2 (<i>Membership and Configuration Services</i>)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
2	Exhibit A-1 ( <i>Solution Description</i> )	Describes Supplier's solution for the provision of the Membership and Configuration Services and includes as exhibits: <ul style="list-style-type: none"> <li>• Exhibit A-1-1 (<i>Approved Service Delivery Centers</i>)</li> <li>• Exhibit A-1-2 (<i>Service Delivery Configuration at the Completion of Phase 2</i>)</li> </ul>
3	Exhibit A-3 ( <i>Organizational Chart</i> )	Identifies the Health Net roles being transferred to Supplier or displaced by Supplier roles as a result of the execution of this SOW #2 ( <i>Membership and Configuration Services</i> ).
4	Exhibit B-1 ( <i>Operational SLAs</i> )	Identifies the Operational Service Levels applicable to the Membership and Configuration Services.
5	Exhibit D ( <i>Key Supplier Positions</i> )	Identifies the Key Supplier Positions applicable to the Membership and Configuration Services.
6	Exhibit H ( <i>Subcontractors</i> )	Identifies the Subcontractors approved by Health Net to provide certain of the Membership and Configuration Services.

## 2. DEFINITIONS

Capitalized terms used but not defined in this SOW #2 (*Membership and Configuration Services*) shall have the meanings given them in the Agreement.

## 3. APPLICABILITY OF THE AGREEMENT

This SOW #2 (*Membership and Configuration Services*) is hereby made a part of, and is subject to and governed by, the Agreement. This SOW #2 (*Membership and Configuration Services*) is one of the Initial Statements of Work executed under the Agreement.

**IN WITNESS WHEREOF**, Health Net and Supplier have each caused this SOW #2  
(*Membership and Configuration Services*) to be signed and delivered by its duly authorized officer, all as  
of the SOW Effective Date set forth above.

**Health Net, Inc.**

**EXHIBIT A**  
**MEMBERSHIP AND CONFIGURATION SERVICES**

**1. INTRODUCTION**

**1.1 General.**

- (a) The “*Membership Services*” means the Functions associated with the provision of Group Setup Services, Group Maintenance, Renewal & Termination Services, Enrollment Services, Accounts Receivable Services, Financial Reporting Services, Finance Operations Services, Broker Commissions Services, Sales Incentives Services, Cash Unit Services, Collections Services, Reporting Services, Miscellaneous Membership Services, Audit Support Services, and Medicare OEV Outbound Calls Services and other membership-related services for all geographies and lines of business requested by Health Net (unless expressly excluded under this Statement of Work).
- (b) The “*Configuration Services*” means the Functions associated with the provision of Configuration, Provider data management, and Capitation Functions for all geographies and lines of business requested by Health Net (unless expressly excluded under this Agreement) and include the following activities:
- (i) Load and configure new Products and new Provider contracts in core systems;
  - (ii) Perform on-boarding and maintenance of Physician Provider Group (PPG) and Provider demographic information; and
  - (iii) Perform Capitation payment calculation and reconciliation.
- (c) The Membership Services and Configuration Services are more fully described in Sections 3 and 5, and include the Cross Functional Services described in Section 3 of Schedule A (*Cross Functional Services*) and the Functions included as part of the Embedded Processes described in Section 4 of Schedule A (*Cross Functional Services*), each as they relate to the Functions included as part of the Membership Services and Configuration Services. For clarity, this includes Supplier’s responsibility to manage all activities performed under Managed Third Party Contracts in accordance with Section 3.8 (*Managed Third Party Contract Services*) of Schedule A (*Cross Functional Services*). Supplier shall perform the Membership Services and Configuration Services, except for those Functions that are expressly identified as retained Health Net responsibilities in Sections 2 and 4 below. For purposes of clarity, the Party that is assigned responsibility for a Function as per the designations in Sections 2 and 4 is also responsible for the Embedded Processes applicable to that Function.
- (d) In addition to those Functions specifically designated in this Statement of Work as Functions for which Supplier is responsible, the Membership Services and Configuration Services to be performed by Supplier include all Functions performed by or associated with the roles in the Membership Accounting and Eligibility Organization Chart set forth in Exhibit A-3 (*Membership and Configuration Organization Charts*), all of which are either being transferred to Supplier or displaced by Supplier roles as a result of the execution of this Statement of Work. Such Functions will be deemed to be part of the

Membership Services and Configuration Services to be performed by Supplier as if expressly set forth in this Statement of Work.

- (e) As part of the Membership and Configuration Services, Supplier shall generate and provide to Health Net (i) each operational report generated prior to the BPaaS Services Commencement Date, unless and until Health Net confirms in writing that such operational report is no longer required, (ii) such other operational reports as Health Net may reasonably request from time to time, and (iii) such modifications to or replacements for the foregoing reports as may be necessary to reflect changes to and evolutions of the Membership and Configuration Services during the term of this Statement of Work.
- (f) In addition to the Health Net responsibilities expressly identified in Sections 2 and 4 below, and in addition to and without limiting Health Net's rights under Section 18 (*Audits and Records*) of the Terms and Conditions, Health Net may perform quality reviews and audits of Supplier's performance of the Membership and Configuration Services in accordance with the Terms and Conditions. For the avoidance of doubt, Health Net is not obligated to perform any level of such quality reviews and audits, except to the extent required by applicable Law.

## 1.2 Definitions.

- (a) The following terms have the meaning set forth as follows:
  - (i) “**Behavioral Health IPAs**” means Behavioral Health Independent Practitioners Associations.
  - (ii) “**Beneficiary**” means a person who has health care insurance through the Health Net plan for Medicare programs.
  - (iii) “**Best Available Evidence**” or “**BAE**” means the policy created in 2006 by CMS to address situations where the CMS systems do not reflect a Beneficiary's correct low-income subsidy (LIS) status at a particular point in time and as a result, the most up-to-date and accurate subsidy information has not been communicated to the Medicare plan. This BAE policy requires sponsors to establish the appropriate cost-sharing for low-income Beneficiaries when presented with evidence as defined by CMS that the Beneficiary's information is not accurate.
  - (iv) “**Broker**” means an agent who sells for a principal on a commission basis.
  - (v) “**Business Hours**” means hours during the normal operating hours for the Function and location in question, which are set forth in Schedule A-1 (*Solution Description*) of this Statement of Work (specifically, in Section 3.1.5.3 for the Membership Services and in Section 3.2.4.3 for the Configuration Services).
  - (vi) “**Callidus**” means a Broker commission and Sales Incentive Compensation System.
  - (vii) “**CMS**” means the Centers for Medicare and Medicaid Services.

- (viii) “**CMS Guidance**” means CMS’s published regulations and guidance documentation, including all published policy manuals, chapters and exhibits.
- (ix) “**Commission Statements**” means a statement explaining the owed or commissions.
- (x) “**Election Period**” means the time when an eligible person may choose to join or leave the Medicare plan. There are three types of Election Periods for individuals during which the individual may join and leave Medicare health plans: (i) Annual Election Period (AEP), (ii) Initial Coverage Election Period (ICEP), and (iii) Special Election Period (SEP).
- (xi) “**Groups**” has the meaning provided in Schedule W (*Glossary*).
- (xii) “**Enrollment Application**” means hard copy or electronic enrollment applications or transactions.
- (xiii) “**Health Net Policies**” has the meaning provided in the Terms and Conditions.
- (xiv) “**ID Card**” means identity card identifying the Member by name and containing other health plan related data.
- (xv) “**LEP Reconsideration Process**” the process for reevaluating a Member disputed additional charge that was billed to an enrollee who appeared to not maintain creditable prescription drug coverage for a continuous period of 63 days or longer at any time following his/her initial enrollment period for the Medicare prescription drug benefit. See CMS’s Reconsideration Procedures Manual.
- (xvi) “**MARx Part A/B Eligibility**” means Member eligibility for Medicare Part A and Part B.
- (xvii) “**Member**” has the meaning provided in Schedule W (*Glossary*).
- (xviii) “**Membership and Configuration Services**” means the Membership Services and the Configuration Services.
- (xix) “**Out of Area**” means a designation for Members outside the service area who elected a plan while they were living in the service area.
- (xx) “**PCP Assignment**” means assignment of PCP to a Member using unique criteria specific for the Member’s health plan. If a Member in a managed care plan does not select a Primary Care Physician (PCP) before enrollment, a PCP Assignment occurs.
- (xxi) “**Pended Enrollments**” means those Enrollment Applications where the applicant-Member has omitted material information, except that in the context of SHP, Pended Enrollment means a Member benefit that is suspended until the Member requalifies.
- (xxii) “**Power of Attorney**” means a written document in which one person or entity (the principal) appoints another person or entity to act as an agent on the

principal's behalf, thus conferring authority on the agent to perform certain acts or functions on behalf of the principal.

(xxiii) “**Print and Mail Services**” means the Health Net department that is provides printing and mailing services (i.e., Customer Distributed Services (CDS) as of the Effective Date).

(xxiv) “**Ten-Day Demand Letter**” means a standardized letter to prompt a debtor into paying the amount that is past due on an invoice.

(b) The following acronyms have the meaning set forth as follows:

ABD	Automated Bank Draft
ABS	Automated Business System
ACH	Automated Clearing House
AEVS	Automated Eligibility Verification System
AHCCCS	Arizona Health Care Cost Containment System
APTC	Advanced Premium Tax Credit,
AR	Accounts Receivable
ASO	Administrative Services Only
BAE	Best Available Evidence
BARR	Business Area Requirements
BHA	Behavioral Health IPA
CHIPA	Children's Health Insurance Program
COB	Coordination of Benefits
CPT	Current Procedural Terminology
CSR	Customer Service Repetitive
ESRD	End Stage Renal Disease
FFS	Fee-For-Service
GSA	Group Service Agreement
HCPC	Health Care Common Procedure Codes
HEDIS	Healthcare Effectiveness Data and Information Set
HICN	Health Insurance Claim Number
IBNR	Incurred But Not Reported
ICD-9 / 10	International Classification of Diseases
IEP	Initial Enrollment Period
IPA	Independent Practitioners Associations
IRE	Independent Review Entity

ITG	Information Technology Group
LEP	Late Enrollment Penalty
LIS	Low Income Subsidy
MARx	Medicare Advantage Prescription Drug system
MHN	MHN Inc. and its subsidiaries
NCF	Network Change Form
OAEVS	Online Automated Eligibility Verification System
PBP	Plan Benefit Package
PCP	Primary Care Physician
PDE	Prescription Drug Event
PHI	Protected Health Information
PIF	Provider Information Form
RBRVS	Resource-Based Relative Value Scale
SEP	Special Enrollment Period
SF	Service Form
SWP	Sales Web Portal
TATs	Turn Around Time
TRR	Transaction Reply Report

- (c) Capitalized terms not defined herein shall have the meanings given them elsewhere in this Statement of Work, or in the Agreement.

## 2. MEMBERSHIP SERVICES – ROLES AND RESPONSIBILITIES

The following table sets forth the respective roles and responsibilities of Supplier and Health Net for the Membership Services, as well as identifying the Health Net lines of business and regions for which each listed component of the Membership Services is applicable. Supplier shall perform the Membership Services, including those Functions listed and described in Section 3 below, except for those Functions (if any) that are expressly identified herein as retained Health Net responsibilities.

Process / Function ID	Process/Function Name / Description	Lines of Bsns (LOB)	Region	Resp. Party	
				Supplier	Health Net
MS1	Group Services				
MS1.1	Group Setup Services	All	All	X	
MS1.2	Group Maintenance, Renewal & Termination Services	All	All	X	

Process / Function ID	Process/Function Name / Description	Lines of Bsns (LOB)	Region	Resp. Party	
				Supplier	Health Net
MS2	Enrollment Services	All	All	X	
MS2.1	Commercial Enrollment Services	Commercial	All	X	
MS2.2	MHN Enrollment Services	MHN	All	X	
MS2.3	State Health Program Enrollment Services	SHP	All	X	
MS2.4	Medicare Enrollment Services	Medicare	All	X	
MS2.5	Duals Demonstration Enrollment Services	Medicare	CA	X	
MS3	Accounts Receivable Services	All	All	X	
MS3.1	Commercial Accounts Receivable Services	Commercial	All	X	
MS3.2	MHN Accounts Receivable Services	MHN	All		
MS3.3	State Health Program Accounts Receivable Services	SHP	All	X	
MS3.4	Medicare Accounts Receivable Services	Medicare	All	X	
MS3.5	Duals Demonstration Accounts Receivable Services	Medicare	All	X	
MS4	Finance Operations Services				
MS4.1	Financial Reporting Services	All	All	X	
MS4.2	MHN Finance Operations Services	MHN	All	X	
MS5	Broker Commissions Services	All	All	X	
MS6	Sales Incentives Services	All	All	X	
MS7	Cash Unit Services	All	All	X	
MS8	Collections Services	All	All	X	
MS9	Reporting Services	All	All	X	
MS10	Miscellaneous Membership Services	All	All	X	
MS11	Medicare OEV Outbound Calls Services	All	All	X	
MS12	Audit Support Services	All	All	X	
MS13	Membership Policy Services	All	All	X	

### 3. MEMBERSHIP SERVICES – FUNCTIONAL DECOMPOSITION

### 3.1 Membership Services, Generally.

Except as set forth in Section 2, the Membership Services, which are described generally in Section 1.1(a), support all lines of business across Health Net and MHN. The principal Functions comprising the Membership Services are set forth in the remainder of this Section 3.

### 3.2 MS1: Group Services.

#### (a) MS1.1: Group Setup Services.

***“Group Setup Services”*** means those Functions associated with the receipt, uploading, testing and maintenance of the setup of Group information and Member information within each Group into the applicable system(s).

Below are some examples of selected Group Setup Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) Interact via phone with Health Net and external parties (including Brokers, Groups, and third party administrators) to understand Group requirements and gather and complete the applicable data.
- (ii) Communicate the account structure back to Sales team.
- (iii) Enter applicable Group setup data into the applicable system, including the applicable system data elements (approximately 5-7).
- (iv) Configure accurate billing information for Groups in the current billing system, including entering rates, populations, billing and payer information in the applicable system for each account.
- (v) Enter Enrollment Applications and create discrepancy report.
- (vi) Interact via phone with Health Net and external parties (including Brokers, Groups, underwriting, and third party administrators) to resolve any discrepancies.
- (vii) Enter final GSN into the applicable system.
- (viii) Check on status of the group setup and discrepancy report, and perform any outstanding items and resolve any outstanding issues.
- (ix) Perform 100% internal quality assurance of enrollment application, enrollment information, Group set up documents and GSA.
- (x) Validate if the discrepancy is over 30% and if so, prepare appropriate letter addressed to the applicable Groups.
- (xi) Release Group discrepancy letters to Print and Mail Services.
- (xii) Obtain corrected Group setup information as required.

- (xiii) Correct any outstanding errors in the applicable system.
  - (xiv) Activate the Group, including creating the enrollment files and ID Cards.
  - (xv) Generate ID Cards, GUI hold, audit ID Cards.
  - (xvi) Release ID Cards to Print and Mail Services.
  - (xvii) Complete the initial billing process for first bill.
  - (xviii) Enter skeleton data system into the applicable system (approximately 5-7 data elements).
  - (xix) Enter enrollment information into the applicable system.
  - (xx) Obtain from Health Net Underwriting team any missing or incorrect data from Health Net and external parties (including Brokers, Groups, and third party administrators) and input corrections into the applicable system.
  - (xxi) Compare GSA to final GSN, load Group into the applicable system and resolve any issues, including through gathering additional data from Health Net and external parties (including Brokers, Groups, and third party administrators).
  - (xxii) Implement the billing process in the applicable system and create initial bill.
  - (xxiii) Credit the binder check to the initial bill in the applicable system.
  - (xxiv) Reverse initial bill in the applicable system.
  - (xxv) Create the cover letter and welcome kit with billing information.
  - (xxvi) Release cover letter and welcome kit with billing information to Print and Mail Services.
  - (xxvii) Validate Group's first month payment against bill.
  - (xxviii) Update the applicable systems and databases as necessary.
- (b) MS1.2: Group Maintenance, Renewal & Termination Services.

***“Group Maintenance, Renewals & Termination Services”*** means those Functions associated with maintaining, renewing, and terminating Group information and Member information within each Group, including updating the applicable systems and databases as necessary.

Below are some examples of selected Group Maintenance, Renewals & Termination Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) Process assumptive renewal (based on existing plans) 45-60 days in advance of renewal deadline.

- (ii) If GSN is not complete, contact Health Net and external parties (including Brokers, Groups, and third party administrators) to complete all information accurately.
- (iii) Print GSN (to an image) from SWP and reconcile number of GSNs
- (iv) Prioritize renewals to be processed by bill date.
- (v) Notify Health Net and external parties (including Brokers, Groups, and third party administrators).
- (vi) Capturing any plan changes, including those identified by Health Net.
- (vii) Coordinate the Member transfer from old to new product (e.g., cancel Member, move to new Group, cancel old suffixes).
- (viii) Upon transferring members from old to new group numbers, coordinate with Broker Commissions team to update Broker linkages timely to enable appropriate transactions to be generated on ABS extract to Callidus.
- (ix) Coordinate with Accounts Receivable to move any and all applicable premiums that need to be moved to the new suffix, and do so timely to avoid impact to the Broker (commissions).
- (x) Coordinate with Billing team to verify that bills accurately reflect the changes in a timely manner.
- (xi) Generate new ID Card if change in plan or change billing if there is a rate change.
- (xii) Send renewal request to Supplier.
- (xiii) Process renewal (auto update in the applicable system for new suffixes or map suffixes, update in the applicable system) including contacting and coordinating with Health Net and external parties (including Brokers, Groups, and third party administrators) to process the renewal.
- (xiv) Send a spreadsheet to the Enrollment Services team.
- (xv) Coordinate with Accounts Receivable to move any and all applicable premiums that need to be moved to the new suffix, and do so timely to avoid impact to the Member (causing double drafts to Members) or Broker (commissions).

### 3.3 MS2: Enrollment Services.

- (a) Enrollment Services, Generally.

***“Enrollment Services”*** means those Functions associated with the receipt, uploading, and processing (manually or electronic) of Enrollment Applications and eligibility (managed and unmanaged), testing, and maintenance of enrollment information in the applicable system(s), including initial enrollments, renewals, modifications, terminations, disenrollment, and reenrollment services, research for inquiries, enrollment

reconciliation, troubleshooting, system error resolution, any quality checks that may be required.

Below are some examples of selected Enrollment Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) Update the applicable systems and databases as necessary.
  - (ii) Create ID Cards and Member materials.
  - (iii) Release ID Cards and Member material to Print and Mail Services.
  - (iv) Review requests received for completeness and accuracy.
  - (v) Validate the Member eligibility for transaction.
  - (vi) Comply with all regulatory, legislative or contractual mandates for all lines of business.
  - (vii) Receive any necessary approvals.
  - (viii) Contact Health Net and external parties (including Brokers, Groups, and third party administrators) as applicable.
  - (ix) Perform Member correspondence Functions, including CMS mandated correspondence, and release printed correspondence to Print and Mail Services.
  - (x) Validate and process Power of Attorney/PHI requests.
  - (xi) Record error research. Conduct and document on the Member record all research, perform all Member contact and make any necessary changes to a Member's record.
  - (xii) Address discrepancies. Conduct and document on the Member record all research, perform Member contact and will make any necessary changes to a Member's records for discrepancies, including enrollment effective date discrepancies, LIS, PBP and others (e.g., TRR rejects).
  - (xiii) Perform disenrollments (both voluntary and involuntary) and reenrollments.
- (b) MS2.1: Commercial Enrollment Services.

***“Commercial Enrollment Services”*** means Enrollment Services associated with Commercial Members.

Below are some examples of selected Commercial Enrollment Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) EDI file management and Member electronic file set up, which includes the following Functions:

- (A) Perform daily functions for processing enrollment, payment and any other Member electronic files interfaces;
  - (B) Reconcile Member enrollment;
  - (C) Work with Members to set up, test and implement new electronic files; and
  - (D) Update systems and files for any other changes.
- (ii) iBilling customer service support, which includes the following Functions:
- (A) Intake and resolve all internal and external Member inquiries, including password setups, resets;
  - (B) Identify and report any iBilling systems issues to iBilling system management team; and
  - (C) Coordinate with Health Net Sales team, enrollment and billing staff as necessary on iBilling Member issues.
- (iii) Receive paper Enrollment Applications via Fax, lock box and USPS Mail.
- (iv) Route Enrollment Applications to the applicable system.
- (v) Receive Enrollment Applications (for all markets) via the applicable system.
- (vi) Receive, review and process all emails related to Enrollment Applications.
- (vii) Prioritize and process all Enrollment Applications (including urgent and all non-critical).
- (viii) Route Enrollment Applications to the applicable system.
- (ix) Process any urgent Enrollment Applications that require pharmacy overrides, and make required contact.
- (x) Make phone calls or obtain overrides related to Enrollment Applications as required.
- (xi) Process all Enrollment Applications from all channels, including data entry.
- (xii) Create discrepancy report, follow up to resolve discrepancy via written contact or via phone calls with Health Net and external parties (including Brokers, Groups, and third party administrators), and resolve such discrepancy.
- (xiii) Contacts Group via phone, obtains required information and pass it on via the applicable system.
- (xiv) Activate, update or amend Member in the applicable system.
- (xv) Close Enrollment Applications in the applicable system, as appropriate.

- (xvi) Notify Members of the denied Enrollment Applications.
  - (xvii) Verify approved Enrollment Applications in IST against all critical fields and enable the 'Verification' status.
  - (xviii) Verify the Enrollment Applications in the applicable system through quality assurance.
  - (xix) Download approved Enrollment Applications to the applicable system.
  - (xx) Process all binder payments received.
  - (xxi) Prepare and release Member acceptance letter and contract documents to Print and Mail Services.
  - (xxii) Track and Audit enrollment for dependents reaching the maximum age.
  - (xxiii) COB notifications, as described in Section 3.3(e)(vi).
  - (xxiv) ID card services, as described in Section 3.3(e)(vii).
  - (xxv) Member maintenance services, as described in Section 3.3(e)(viii).
  - (xxvi) Resolve Pended Enrollments.
  - (xxvii) Application rejects, as described in Section 3.3(e)(xi).
  - (xxviii) PDE reconciliation, as applicable.
- (c) MS2.2: MHN Enrollment Services.

***"MHN Enrollment Services"*** means Enrollment Services associated with MHN Members. As of the Effective Date, the applicable system for MHN Members is Symphony.

Below are some examples of selected MHN Enrollment Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) Perform the accurate processing and maintenance of eligibility data into the applicable system including:
  - (A) Upload electronic eligibility data into Symphony via automated processes. Manually work eligibility queues (which validate various data) and stage the data. Use staged data (and validated data) to update the eligibility data in the Member and affiliate translation files.
  - (B) Manually enter and validate eligibility data where automated update is not feasible, including verifying Member data in third party systems (ABS, CSI, and QCARE as of the Effective Date).

- (C) Meet accuracy and timeliness standards – standards measured by internal audits performed on samples monthly by Eligibility Coordinator audits.
  - (D) Work queue related to eligibility verification requests (typically these are sent by intake and referral teams).
  - (E) Work queue for claims pended for lack of Member identification (AR27).
  - (F) Work cross-data accumulation (CDA) queues where record is pended for lack of Member identification.
  - (G) Implement new or modified client eligibility files (834v5010 and other proprietary formats)
  - (H) Implement new or modified cross-data accumulation (CDA) queues with Account Management and EDI teams.
  - (I) Implement system enhancements and process improvements related to eligibility, including requirements gathering, BARR review, testing, validation and check out (i.e., validation in production before the work week begins that no system functionality has been adversely affected) for process improvements/changes/projects/implementations/system changes that would maintain or improve MHN membership activities.
  - (J) Prepare internal audits (TATs and accuracy related) and metrics.
- (ii) Provide information to medical carriers as necessary, and confirm that information is successfully passed through.
- (d) MS2.3: State Health Program Enrollment Services.

***“State Health Program Enrollment Services”*** means Enrollment Services associated with State Health Program Members:

Below are some examples of selected State Health Program Enrollment Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) Update Enrollment Applications electronically including new enrollments and changes.
- (ii) Work on monthly error report to determine if a transaction needs to be entered and the system updated. If the system needs to be updated, determine if the required information from the State system (e.g., AEVS, AHCCCS) is available, and update and close the transaction as necessary.
- (iii) Document closure of the Enrollment Application on the error report.
- (iv) Work on daily system report to determine if both medical and dental transactions need to be updated. If the system needs to be updated, determine if the required

information from the State system (e.g., AEVS, AHCCCS) is available, and update and close the transaction as necessary.

- (v) ID card services, as described in Section 3.3(e)(vii).
- (e) MS2.4: Medicare Enrollment Services.

***“Medicare Enrollment Services”*** means Enrollment Services associated with Medicare Members.

Below are some examples of selected Medicare Enrollment Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) General. Perform maintenance and daily research/review of the following:
  - (A) TRR fallout workbasket;
  - (B) New enrollments;
  - (C) Disenrollments;
  - (D) Reinstatements/re-enrollments;
  - (E) Plan changes/PBP changes;
  - (F) Power of attorney/PHI;
  - (G) Enrollment correspondence;
  - (H) Enrollment exceptions and issues, including pre-edit and others;
  - (I) Member record maintenance;
  - (J) Billing services including Member set up;
  - (K) Posting cash / billing adjustments
  - (L) Accounts receivable processing;
  - (M) Work and resolve all work baskets(to be defined- those associated with processing of disenrollments, new enrollment, and select plan/PBP changes);
  - (N) COB; and
  - (O) BAE.
- (ii) Member outreach for various type of information verification.
- (iii) Pre-Enrollment Services.

- (A) Perform the following pre-enrollment Services:
- (1) Identify the transaction type (e.g., SEP, IEP, disenrollment, or change).
  - (2) Determine the Election Period for each Member.
  - (3) Verify Member eligibility.
  - (4) Identify the election source and display the method of receipt of the Enrollment Application (Internet, CMS online, paper).
  - (5) Determine LEP (Late Enrollment Penalty) for Members, including:
    - a. Process Late Enrollment Penalty correspondence and requests pertaining to the reconsideration process; and
    - b. Process each Member's attestation of creditable coverage.
      - i. Review the enrollment period data received from the Member, and make the creditable coverage determination and forward to Health Net all CMS-required correspondence.
      - ii. Submit any necessary changes/corrections to the number of uncovered months to CMS.
      - iii. Process response upon the receipt of TRR and within the timeframe mandated by CMS Guidance.
  - (6) Perform LEP Reconsideration Process.
  - (7) Process all documentation requests from the IRE (e.g., Maximus) regarding LEP reconsideration requests.
    - a. Gather the relevant documentation and create a case file.
    - b. Respond to requests within the timeframe set forth in the CMS Guidance or fourteen (14) days, whichever time period is shorter.
  - (8) Set up, attach and maintain Broker/GA information to the Member records as required, (Health Net may have as many as (three) 3 layers of Broker/GA classification (i.e. FMO, general agent, and Broker)).
  - (9) Prior to receiving final confirmation of enrollment of a Member from CMS, prepare a confirmation for the Member of their

enrollment in the plan so that the Member may access their benefits.

- (B) Provide access to the Services to new enrollees upon:
    - (1) the process date of the enrollee's application; or
    - (2) the qualifying effective date of the enrollee's membership, whichever is later.
  - (C) Generate a welcome letter to new enrollees.
  - (D) Verify and document the Member's MARx Part A/B Eligibility.
  - (E) Review all Medicare applications for possible gaps in coverage. Perform outreach to sales and or Member as necessary.
  - (F) Add Member level system notes as needed for audit purposes.
- (iv) CMS Transmissions/Reply Functions.
- (A) Submit all required data extracts to CMS;
  - (B) Perform all CMS file processing for files received from CMS (i.e., TRRs, MMR, etc);
  - (C) Submit all necessary 4Rx (CMS Pharmacy Report) data to CMS;
  - (D) Perform reporting of the data submissions, including the status of those submissions; and
  - (E) Prepare all related correspondence as required by CMS.
- (v) Member Correspondence Services.
- (A) Perform Member correspondence, including:
    - (1) Out of Area-related correspondence Functions, including instances when Supplier receives information from either CMS or the United States Postal Service ("*USPS*") that a Member no longer resides in the service area;
    - (2) Plan Benefit Package ("*PBP*") changes related correspondence Functions;
    - (3) LIS (Low Income Subsidy) correspondence Functions;
    - (4) HICN correspondence Functions, including accepting HICN changes from CMS;
    - (5) Enrollment application acknowledgement letter;

- (6) Disenrollment request acknowledgement letter; and
  - (7) PCP Assignment letter.
  - (B) Adhere to and use CMS and Health Net and RPC approved templates, guidance, time tables as required by CMS Guidance or as required by Health Net.
  - (C) Maintain CMS compliant templates in letter system.
  - (D) Generate both automated and manual letter files.
    - (1) All the letter files that are configured in the applicable system will be generated in an automated fashion.
    - (2) Generate manual letter files as triggered by the special requests made by the Members.
  - (E) Provide archive and retrieval capability and services for correspondence related to the Services (including all legacy correspondence converted by Supplier).
  - (F) Process all correspondence received related to Enrollment Applications, processing or status. Conduct all research and necessary Member contact, and make any necessary changes to a Member's record related to the received enrollment correspondence.
- (vi) COB Notifications. Perform COB notification related Functions, including:
- (A) Prepare and release to Print and Mail Services COB notification letters.
  - (B) If a response to the COB notification letter is not received from the Member, do not contact the Member further regarding COB.
    - (1) Anytime information is received concerning an addition or revision to an existing other coverage information, submit the new or revised information to the applicable party within 30 days of receipt.
    - (2) Track all COB responses and actions in the applicable system.
    - (3) Reach out directly to Members, other health plans or employer groups to correct inaccurate data.
- (vii) ID Card Services. Perform ID Card related Functions, including:
- (A) Maintain and utilize appropriate ID Card templates (e.g., individual vs. Group);
  - (B) Store ID Card history and archive electronic version of cards;

- (C) Meet all government regulations surrounding ID Cards, including card file generation;
  - (D) Generate ID Card files in accordance with Health Net specifications;
  - (E) Produce reports documenting ID Card file submission metrics;
  - (F) Generate replacement ID Card files for Members within required timeframes;
  - (G) Release ID Cards to Print and Mail Services.
- (viii) Member Maintenance Services. Perform Member maintenance related Functions, including:
- (A) Perform Out of Area tracking and processing in accordance with CMS guidelines.
  - (B) Perform enrollment requests for PBP (Plan Benefit Package) changes.
  - (C) Perform Member maintenance services related to LIS (Low Income Subsidy).
  - (D) Process all Member maintenance requests.
  - (E) Validate that data fields are correctly input and maintained (e.g., HICN (Health Insurance Claim Number)).
  - (F) Utilize the Best Available Evidence (BAE) as provided by the Member.
- (ix) Application Processing Failures.
- Using the Workflow ticket system, resolve all pre-edit (multiples, singleton and pending pre-edit) workbaskets. An “*Application Processing Failure*” occurs when an Enrollment Application is rejected by CMS. Upon the occurrence of an Application Processing Failure and upon receipt of the rejected Enrollment Application from CMS, conduct all research, perform Member contact and track expiration dates in order to resolve the Application Processing Failure.
- (x) Resolve Pended Enrollments.
  - (xi) Application Rejects. Resolve all enrollment rejects in accordance with the CMS Guidance and Health Net requirements.
  - (xii) TRR Processing.
    - (A) Using the workflow ticket system and enrollment systems, resolve all records that fail some point of validation within the TRR engine.
    - (B) Research and resubmit all failed records in accordance with CMS Guidance.

- (xiii) PDE (Prescription Drug Event) Reconciliation.
  - (A) Using various data sources, conduct and document on the Member record all research, perform Member contact and make any necessary changes to a Member's PDE record (for enrollment and eligibility rejects only).
  - (B) Resolve any eligibility issue that results in the rejection of a PDE record submitted to CMS with in the CMS mandated timeframes.
- (xiv) Health Net Plan vs Medicare Reconciliation Services. Research, work discrepancies identified by the eligibility reconciliation process, provide written confirmation that reconciliation occurred, and provide related information requested by Health Net.
  - (A) Update reconciliation logic as required to accommodate CMS software changes; and
  - (B) Provide guidance to the Member services team on discrepancy resolution process, work with the Application Development team as required to analyze automated discrepancy fixes, research causes of reconciliation discrepancies, and review discrepancy trends:
- (f) MS2.5: Duals Demonstration Enrollment Services.

***“Duals Demonstration Member Enrollment Services”*** means Enrollment Services associated with Duals Members.

Below are some examples of selected Duals Demonstration Member Enrollment Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) General.
 

Perform maintenance and daily research/review of the following:

  - (A) TRR fallout workbasket;
  - (B) New Enrollments
  - (C) Disenrollments;
  - (D) Reinstatements/re-enrollments;
  - (E) Plan changes/PBP changes;
  - (F) Power of attorney/PHI;
  - (G) Enrollment correspondence;
  - (H) Enrollment exceptions and issues, including pre-edit and others;

- (I) Member record maintenance;
  - (J) Work and resolve all work baskets(to be defined- those associated with processing of disenrollments, new enrollment, and select plan/PBP changes);
  - (K) COB; and
  - (L) BAE.
- (ii) Member outreach for various type of information verification.
  - (iii) Generate a welcome letter to new voluntary enrollee.
  - (iv) Add Member level system notes as needed for audit purposes.
  - (v) CMS Transmissions/Reply Functions.
- Submit all required data extracts to CMS including:
- (1) Perform all CMS file processing for files received from CMS (i.e., TRRs, MMR, etc);
  - (2) Submit all necessary 4Rx (CMS Pharmacy Report) data to CMS;
  - (3) Perform reporting of the data submissions, including the status of those submissions; and
  - (4) Prepare all related correspondence as required by CMS.
- (vi) Member correspondence services, as described in 3.3(e)(v) (but only those correspondences applicable to Duals Members).
  - (vii) COB notification, as described in Section 3.3(e)(vi).
  - (viii) ID Card services, as described in Section 3.3(e)(vii).
  - (ix) Member maintenance services, as described in Section 3.3(e)(viii).
  - (x) Application Processing Failures, as described in Section 3.3(e)(ix).
  - (xi) TRR processing, as described in Section 3.3(e)(xii).
  - (xii) PDE reconciliation, as described in Section 3.3(e)(xiii).
  - (xiii) Health Net Plan vs Medicare reconciliation services, as described in Section 3.3(e)(xiv).

### 3.4 MS3: Accounts Receivable Services.

- (a) Accounts Receivable Services, Generally.

**“Accounts Receivable Services”** means those Functions associated with performing daily and monthly financial reconciliation, including balancing and cash applications, performing eligibility reconciliation with the relevant government payer entity, working all system or database fall out and error reports, and performing accounts receivable Functions, including, e.g., generating and distributing invoices to payers, applying payments, research related to inquiries, troubleshooting, system error resolution and any quality checks that may be required.

At Health Net’s discretion, Health Net may require that Health Net review and approve certain accounts receivable transactions prior to Supplier completing such transactions.

Below are some examples of selected Accounts Receivable Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) Update the applicable systems and databases as necessary.
  - (ii) Comply with all regulatory, legislative or contractual mandates for all lines of business.
  - (iii) Receive any necessary approvals.
  - (iv) Deposit all monies collected for or on behalf of Health Net daily into the applicable Health Net bank account.
- (b) MS3.1: Commercial Accounts Receivable Services.

**“Commercial Accounts Receivable Services”** means Accounts Receivable Services associated with Commercial Members.

Below are some examples of selected Commercial Accounts Receivable Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) Create invoices.
- (ii) Complete quality check of all invoice files.
- (iii) Release invoices to Print and Mail Services.
- (iv) Upload the image files of the check and the supporting documents into the applicable system. Generate Unapplied Cash Report for all unapplied checks.
- (v) Validate that supporting documentation is included, and follow up as necessary. Reconcile at an individual Member level – billed versus paid in the applicable system.
- (vi) Allocate premium in the applicable system.
- (vii) Review and accordingly close auto-posted cases in the applicable system.
- (viii) Verify that all items in Unapplied Cash Report are designated ‘Complete’.

- (ix) Upload the approved discrepancy report along with the approval and the cover letter to the applicable system.
  - (x) Provide the discrepancy report along with cover letter to the respective payer.
  - (xi) Handle any calls/follow-up from payers/responsible party in connection with the discrepancy.
  - (xii) Resolve with the payer whether to pay or dispute as per the discrepancy report. Based on the outcome, update status and upload all supporting information.
  - (xiii) Update and present the reports required for the monthly accounts receivable meetings. Based on report, decide on next step/actions.
  - (xiv) For a refund request, perform a reconciliation to assess whether it is a valid refund request. Once refund is identified, complete a refund form and initiate approval process.
  - (xv) Sign-off on refund requests, or obtain Health Net approval of refund requests, as applicable, and make manual adjustments as required. Run a re-bill upon request by Health Net or Member.
- (c) MS3.2: MHN Accounts Receivable Services.

“*MHN Accounts Receivable Services*” means Accounts Receivable Services associated with MHN Members.

Below are some examples of selected MHN Accounts Receivable Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) Handle non-affiliate group client billing – affiliate activity is processed via intercompany transfers by Health Net corporate finance.
- (ii) Perform premium, administrative services (ASO) and fee-for-service (FFS) billing and related AR functions. Billing/AR is on SAP AR module which is fully integrated with Health Net’s general ledger.
- (iii) Process all related cash receipts and cash application, including:
  - (A) Premium and ASO fees billings based on per employee per month rates.
  - (B) ASO claims reimbursement billing.
    - (1) Perform periodic (weekly, bi-weekly, monthly, etc.) billing based on claims detail per reporting out of the MHN Data Warehouse.
    - (2) Upload invoices (with claims in aggregate) into the applicable system (SAP AR as of the Effective Date).

- (3) On a monthly basis, aggregate ASO claims from Symphony, interface into the general ledger, and track the ASO claims detail (tracked in a separate Access database as of the Effective Date).
  - (4) Reconcile claims detail, SAP AR and SAP G/L monthly and send to the Corporate Finance department.
- (C) Aggregate FFS or ad hoc client services billing (as of the Effective Date, aggregated from two systems - Salesforce and a Data Warehouse report on Unity FFS transactional data); 'scrub' data to verify fields are complete, validate data for appropriate and accurate content after reviewing with MHN Client Services and Training departments. Once scrubbed, put into the correct format, upload invoices to the applicable system (e.g., SAP AR) and feed back into Salesforce.
- (iv) Prepare, review and analyze AR aging, identify trends for collection purposes, and use reports to identify retro-active changes.
  - (v) Work collaboratively with MHN Account Management, configuration teams, Sales teams and Client Services/ Training departments.
  - (vi) Post cash daily as per bank statements and accompanying detail to SAP AR. Log and track received cash within appropriate turn-around-times. Coordinate with Health Net to confirm that they have complete information (i.e. about deposits in transit, etc.) for bank reconciliations and required entries.
  - (vii) Coordinate collections with MHN Sales / Account Management teams.
  - (viii) Prepare Schedule As (Form 5500).
  - (ix) Maintain standards (days sales and timely invoicing).
- (d) MS3.3: State Health Program Accounts Receivable Services.
- “State Health Program Accounts Receivable Services”*** means Accounts Receivable Services associated with State Health Program Members.
- (e) MS3.4: Medicare Accounts Receivable Services.
- “Medicare Accounts Receivable Services”*** means Accounts Receivable Services associated with Medicare Member.

Below are some examples of selected Medicare Accounts Receivable Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) Premium Billing. Perform premium billing services functions, including:
  - (A) Generate and distribute invoices/files;
  - (B) Maintain the capability and functions related to perform “split billing”;

- (C) Perform invoicing for both payer in a format to be designated by the payer;
  - (D) Perform Functions related to SSA (Social Security Administration) premium withholds, including reconciliations, discrepancy reporting, processing any change in SSA status, and any associated status correspondence; and
  - (E) Support ABD/ACH (Automated Clearing House) Functions.
- (ii) Process payments.
  - (iii) Perform Accounts Receivable (AR) functions, including:
    - (A) Apply and reconcile cash payments.
    - (B) Perform manual adjustments, including (1) write-offs, subject to Health Net's approval; and (2) non-revenue impacting payer payment information.
    - (C) Support transaction types as specified by Health Net.
    - (D) Process refunds with appropriate approvals.
    - (E) Delinquency processing Functions, including Member correspondence, bad debt write off, and disenrollment, each with appropriate approvals.
    - (F) Provide aging and financial reports, including a list of standard or previously created reports.
  - (iv) Perform billing reconciliations, including:
    - (A) Conduct billing reconciliations for all billing files and document all research.
    - (B) Make changes to correct identified discrepancies.
  - (f) MS3.5: Duals Demonstration Accounts Receivable Services.

*“Duals Demonstration Accounts Receivable Services”* means Accounts Receivable Services associated with Duals Members.

### 3.5 MS4: Finance Operations Services.

- (a) MS4.1: Financial Reporting Services.

*“Financial Reporting Services”* means those Functions that involve the gathering of data for and development of financial statements, assets and liabilities, revenue and revenue projections, the performance of financial analysis and financial reconciliations, and the payment of outside vendors.

- (b) MS4.2: MHN Finance Operations Services.

“*MHN Finance Operations Services*” means those Functions that sit in between MHN operations and financial reporting.

Below are some examples of selected MHN Finance Operations Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (i) Sub-ledger accounting for MHN revenue, healthcare, and membership.
- (ii) Act as finance liaison on MHN operations to various external departments (e.g., Tax, Actuarial, Statutory, Divisional Accounting, Treasury, Health Net Accounts Payable, and Internal Audit); coordinate the complete check cycle for Symphony claims.
- (iii) Report on healthcare operations, where the reporting is not strictly financial in nature.
- (iv) Run daily checkwrite for applicable system (e.g., Symphony) claims checks. Coordinate and monitor all related activities with Health Net Divisional Accounting and claims such as:
  - (A) Workflow and accounting related to system (e.g., Symphony) claims void checks; stop payments, stale dated checks, and escheatment. Perform management reporting to monitor that the processes are followed and finalized in a timely manner.
  - (B) Implement system enhancements and process improvements related to checkwrite function, including requirements gathering, BARR review, testing, validation and check out (i.e., validation in production before the work week begins that no system functionality has been adversely affected).
  - (C) Validate 1099 raw files for reasonableness.
  - (D) Process tax levies and garnishments. As of the Effective Date, MHN cannot pay levies/ garnishments directly from Symphony because the system doesn't allow splitting the payment. The manual process involves voiding the Symphony check and issuing a pair of checks out of SAP AP to split the payment.
- (v) Handle all MHN cash receipts (mostly AR payments and provider refunds) and deposit to the bank if payer didn't send directly to the lockboxes.
- (vi) Copy provider refund checks and their backups and send to claims department to process the credits in the claims system. Once reconciled to their related claims credits in the system, deposit provider refunds. Track and document via a detail claims refund database.
- (vii) Prepare monthly summarized sub-capitation documentation to pay the Behavioral Health IPAs (CHIPA and BHA) on behalf of Health Net California. There is a fair amount of trouble-shooting and analysis due to old programming that is very

sensitive to plan code changes and other set-up issues. Calculate Member counts and prepare reporting to test and validate the amounts.

- (viii) Run Policy and Procedure department to update P&Ps, desktops, and workflows for MHN Customer Service departments (Eligibility, Finance Operations, Claims, Configuration) and confirm these are compliant with regulations and legislation.
- (ix) Prepare sub-ledger financial support and trouble-shooting for a variety of accounts (by line of business, where indicated) including those related to:
  - (A) ASO claims detail reconciliation to aggregate claims on SAP G/L and AR.
  - (B) Calculates MHN Broker commissions and accruals (based on premiums cash receipts).
  - (C) Claims expense, IBNR and payables in coordination with Health Net actuary. This includes claims interfaced to affiliate general ledgers; as well as MHN entities.
  - (D) Revenue and accounts receivables (including AR aging and bad debt write-offs).
  - (E) Financial subscribers/ membership (also used for client reporting).
  - (F) Complete various management analyses and troubleshooting on an ad-hoc basis as issues arise. For example, troubleshoot issues w/ APTC eligibility extracts having incomplete data by running queries and looking for certain patterns.
  - (G) Review and trouble-shoot eligibility translation matrices (which map ABS eligibility data (and their claims) to Symphony) to verify affiliate Members and healthcare costs are classified correctly for general ledger purposes.
  - (H) Prepare cash receipts reports used for MHN Broker commissions and sales incentive compensation calculations. Also prepare cash to revenue reconciliation as required by financial auditors.
  - (I) Create, monitor and maintain, internal controls over all MHN financial operations and MHN eligibility to confirm accuracy and completeness. Comply with deadlines for month-end close, and mid-month reconciliations. Provide detail back-up for financial audits related to these accounts, when requested.
- (x) Regulatory, audit, financial reporting and internal controls support. Subject to final review and approval by Health Net.
  - (A) Prepare and reviews board of director financial statements quarterly for Knox-Keene regulated entity (7007 Managed Health Network).

- (B) Audit support and detail back up for auditor PBC requests (Ernst & Young, Deloitte & Touche, state auditors, etc.)
- (C) Prepare and review information for state licensures in states, many of which require views of Members, claims, or revenue by state compiled from reporting from the data warehouse and SAP systems.
- (D) Perform and review system access controls, in addition to basic management review of staff assigned to roles; provide finance oversight including reviewing roles for segregation of duties.
- (E) Prepare and assist with quarterly and annual regulatory filings and audit support for the Department of Managed Health Care (DMHC) – Schedule G & H and Medical Loss Ratio calculations.
- (F) Prepare reports used for state tax apportionment – revenue and/or claims by state for MHN Services which operates in multiple states. Other documentation as requested by Health Net Tax department.
- (G) Work with Health Net planning and budgeting teams to finalize budgets and research variances and allocation methodologies.
- (H) Complete other reporting and analysis in compliance w/ various regulatory agencies.

### 3.6 MS5: Broker Commissions Services.

“*Broker Commission Services*” means those Functions associated with the receipt and input into the applicable system of information relating to Broker commissions, verifying Broker files are accurate, sending and receiving files in a timely manner, producing commission statements, working with vendors to calculate Broker commissions correctly, facilitating payment, preventing duplicate payments, and any other Functions necessary to process Broker commissions accurately and timely.

Below are some examples of selected Broker Commission Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (a) Generate and manage timely Broker commission payments.
- (b) Review, address and respond to commissions-related inquiries and special ad hoc reporting that may be required.
- (c) Generate commission statements.
- (d) Maintain Broker contracting data, including implementing changes identified by Health Net.
- (e) Review annual guidance that may drive changes to commission types, structure and frequency. Implement the changes timely to avoid disruption to commissions for Brokers.

- (f) Oversee vendor software that performs the Broker commission calculations and tracks the Broker information, and act as the business customer for any system enhancements to the vendor software.
- (g) Input and maintain in the applicable system the Broker information (including administrative information, and group assignments), sales, and Broker commission and incentive structures, agreements, Commissions rates, and payments.
- (h) Respond to, research, follow up, contact, etc. inquiries received from Brokers and from Health Net.
- (i) Generate Broker commissions files.
- (j) Generate special handles/manual adjustment payments.
- (k) Complete various projects related to Broker commissions.
- (l) Obtain information required to determine Broker commissions earned and due, apply Broker commission and incentive structures, and determine payments due.
- (m) Maintain payment terms in the applicable system, cause payments to be generated and update and maintain payment history.
- (n) Aggregate, track and report Broker commissions across states and business segments.
- (o) Reconcile Broker commissions paid to sub-ledgers.
- (p) Address inquiries on Broker/Sales payments.
- (q) Perform Broker commission audits and analysis
- (r) Generate, validate, distribute and file daily, weekly, and monthly reports.
- (s) Provide financial data requested by Health Net.
- (t) Provide Month-end financial data to Accounts Payable and review monthly-allocated dues and open items in Health Net's financial system.
- (u) Prepare the Bonus Payment Files for Brokers per Health Net sales requests.
- (v) Perform the collections for Broker commissions.
- (w) Complete the monthly ERISA 5500 (Schedule A) reporting.
- (x) Complete the annual AB2589 reporting.

### 3.7 MS6: Sales Incentives Services.

*“Sales Incentives Services”* means those Functions associated with identifying persons that receive sales incentives, calculating payments, facilitating payment of sales incentives, tracking, reporting, and auditing sales incentives, responding to inquiries, implementing changes to sales incentives, generating and providing reports, and responding to ad hoc requests.

Below are some examples of selected Sales Incentives Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (a) Generate and manage timely Sales Incentive payments according to contractual obligations.
- (b) Obtain approvals for payments and adjustments.
- (c) Review, address and respond to incentive related inquiries and special ad hoc reporting.
- (d) Review annual amendments and/or new compensation plans in order to determine which (if any) components have changed or are new.
- (e) Implement changes so new component (or updates) can be calculated.
- (f) Develop the new reporting necessary in order to identify correct membership activity driving payment.
- (g) Calculate accruals for financial reporting.
- (h) Complete required manual processing.
- (i) Provide files to payroll for payment.

### **3.8 MS7: Cash Unit Services.**

*“Cash Unit Services”* means those Functions associated with the receipt, reconciliation, processing, and management of premium payments, deposit of paper payments, reclassification of non-premium payments, and other cash unit Functions.

Below are some examples of selected Cash Unit Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (a) Balance reports and process lockbox payments daily.
- (b) Intake all paper payments and deposit all paper payments into appropriate Health Net bank account.
- (c) Identify, process, and balance all premium payment wire transfers. Reclassify all non-premium receipts and prepare a manual adjustment to remove the item from the applicable system.
- (d) Process all check by Fax items.
- (e) Process all credit card remittance transactions.

### **3.9 MS8: Collections Services.**

*“Collections Services”* means those Functions associated with the collections process, including identifying delinquent payers, researching errors, producing demand and termination letters,

cancelling coverage, forwarding balances due to outside collection agencies, and completing associated write offs.

Below are some examples of selected Collections Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (a) Identify delinquent Group and Member payments.
- (b) Utilize collection database to track and manage delinquent Group and Member payments. Collection database for Groups and Individuals.
- (c) Research each account to determine if a payment has been made, and update account information as necessary.
- (d) Send delinquency letter (i.e., "*Risk of Termination*" letter) reports to the applicable parties.
- (e) Cancel Group or Member coverage in accordance with Health Net Policies.
- (f) Distribute Ten-Day Demand Letters, prior to groups being referred to outside third party collection agency.
- (g) Perform additional reconciliation/audit procedures as required to support Ten-Day Demand Letters.
- (h) Forward balances due to outside collection agency the following month and write off balances the same month, each with appropriate approval.

### 3.10 MS9: Reporting Services.

"*Reporting Services*" means those Functions that involve development of tools, programming and business support to the Customer Service areas.

Below are some examples of selected Reporting Services Functions, some of which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only.

- (a) Provide daily, weekly & monthly reports to the many different business teams (e.g: pending enrollments, new group data for broker commissions, monthly commission reports, dual coverage, unapplied cash, etc.).
- (b) Provide adhoc reporting for available data stored in data repositories (e.g. ODW, MR, KBASE, TRR, etc)
- (c) Provide reconciliation reports as requested by Health Net.
- (d) Aggregate documentation for error correction activities into an annual report for Medical Management (e.g., HEDIS reporting).
- (e) Report application reject rates.

- (f) Function as subject matter experts for back end repositories (ODW, MR, TRR, KBASE, etc.).
- (g) Provide requirements for data repositories in projects so that information flows appropriately.
- (h) Develop complex Access Databases, web tools and business tools that support Customer Services (eg enrollment, AR, Group Database, Provider, Claims, etc.).
- (i) Develop new and maintain existing Robotech/Technobot jobs.
- (j) Process Robotech/Technobot requests.
- (k) Provide analytical results to the business regarding Robotech/Technobot jobs that have been run along with detailed information around the fall out.
- (l) Automate letters and other customer facing documents as needed (e.g. manual bill generation) outside of the core systems.
- (m) Develop and maintain tools outside source system to improve accuracy or efficiency.
- (n) Provide the reports set forth in Exhibit G (*Operational Reports*).

### 3.11 MS10: Miscellaneous Membership Services.

“*Miscellaneous Membership Services*” means those additional Functions described in this Section 3.9 related to the Membership Services not already addressed in Sections 3.1 through 3.10, including:

- (a) Review and approve Member materials sent out by other teams.
- (b) Perform activities related to all components of system enhancements such as: requirements gathering, document review, gap analysis, writing UAT test scripts and test execution.
- (c) Implementation of new and revised processes and membership activities as it relates to the introduction of a new and revised product, operational processes, and regulations.
- (d) Requirements gathering, BARR review, testing, validation and check out (i.e., validation in production before the work week begins that no system functionality has been adversely affected) for system changes that impact Membership Services.
- (e) Testing and implementation of CMS changes and other regulatory changes.
  - (i) Supply SME knowledge support for requirements gathering.
  - (ii) Review and approve requirements documents.
  - (iii) Review and endorse design documentation.
  - (iv) Review and endorse system testing.

- (v) Review and endorse test plan.
  - (vi) Review and endorse gap analysis.
  - (vii) Write tests scripts.
  - (viii) Execute test scripts.
  - (ix) Document testing deficiencies.
  - (x) Supply testing status reports.
  - (xi) Record/report defects and track until resolution.
  - (xii) Implementation of CMS changes and other regulatory changes.
- (f) Perform all Services in a manner compliant with CMS call letters, CMS Guidance, and other policies and regulations.
- (g) Perform correspondence Functions related to the Membership Services in accordance with Health Net Policies.
- (h) At Health Net's request, support Health Net's testing activities related to Membership Services, including user acceptance testing (e.g., support for Health Net's testing in connection with a system release).
- (i) Collateral Design.
- (i) Implement and maintain the design of the Group's and Members collateral, including:
    - (A) Member ID Cards (e.g., layout, colors) which are consistent with the Product's regulatory and brand standards and in accordance with Health Net Policies;
    - (B) Bill designs and re-designs provided by Health Net;
    - (C) Broker commission statements; and
    - (D) Sales Incentive statements.
  - (ii) Unless otherwise directed by Health Net, define and design membership letter templates for all lines of business (e.g. layout, colors), which are consistent with the regulatory and brand standards.
- (j) Archive (as required by Law and this Agreement) stored images of membership collateral and membership-related collateral and retrieve such images as necessary to perform the Services or otherwise at the request of Health Net and in accordance with Health Net Policy and this Agreement.

### 3.12 MS11: Medicare OEV Outbound Calls Services.

“*Medicare OEV Outbound Calls Services*” are the Functions associated with providing technology, letter mailing fulfillment, and Contact Center Services to support the CMS Required Outbound Enrollment Verification (“*OEV*”) program, including the following activities:

- (a) Providing the services and activities hereunder regarding the Medicare Advantage plan products issued by Health Net in accordance with CMS regulations;
- (b) Verifying that new Medicare Advantage plan (“*MA*”) applicants and Prescription Drug plan (“*Part D*”) applicants (“*Enrolled Members*”) understand the Medicare Plan that they have applied for and to answer and address any concerns that such Enrolled Members may have (“*Activities*”) Using the CMS approved script, attempting to contact Enrolled Member(s) to make the OEV;
- (c) Upon second unsuccessful call attempt, mailing the CMS-approved Verification Letter (“*Verification Letter*”), provided by Health Net; regarding new applications for a Medicare Plan. Mailing out an OEV letter per CMS regulations;
- (d) Sending all letters using CMS approved templates in English, Spanish and Chinese;
- (e) Validating that the logic to calculate cancellation dates is accurate for both phone scripts and letter;
- (f) Using CSRs to make calls to and having the conversations set forth herein with Enrolled Members;
- (g) Documenting all enrollment verification activities including when each call was made to an Enrolled Member and the outcome of the call (disposition); and
- (h) Establishing an instance of Supplier’s proprietary or commercially standard system/ CRM platform for use by Supplier employees to assist in the completion of the efforts mentioned herein.

### 3.13 MS12: Audit Support Services.

“*Audit Support Services*” means those Functions associated with providing support for Audits of the applicable line of business or a component of it, whether conducted by (or on behalf of) Health Net itself or a Health Net Regulator or customer (e.g., a large Employer Group), including the following:

- (a) Providing data and reports requested by the Auditors;
- (b) Providing subject matter expertise and otherwise supporting the conduct of the Audit as requested by the Auditors;
- (c) Assisting in the development and implementation of corrective action plans in response to Audit findings identifying weaknesses or deficiencies in the Audited Function; and
- (d) Supporting Health Net communications with Regulators.

### 3.14 MS13: Membership Policy Services.

“**Membership Policy Services**” means those Functions associated with the development and implementation of “**Health Net Membership Policies**,” which are the Health Net Policies as defined in Schedule P (*Health Net Policies*) governing or pertaining to the Membership Services and, more specifically, the conduct of Health Net’s Membership Services.

Below are some examples of selected Membership Policy Development Services Functions, which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only:

- (a) Generally, provide operational subject matter expertise with respect to Health Net Membership Policies;
- (b) As requested, participate in meetings with Health Net and Supplier stakeholders having responsibility for the development, implementation, monitoring and enforcement of Health Net Membership Policies;
- (c) In response to changes in Laws, regulations, guidelines, policies, contracts or requests from Health Net’s Enterprise Process Change Organization (“**EPCO**”) or from Health Net’s or Supplier’s Compliance organization:
  - (i) Participate in Health Net EPCO Steering Committee meetings to review new legal and regulatory changes and assessment of business impact;
  - (ii) Participate in Health Net EPCO regulatory implementation Change Teams;
  - (iii) Project manage the operational implementation and/or affected system changes of legal and regulatory changes that affect Membership Services and participate in operational implementation and/or affected system changes of legal and regulatory changes that span multiple functions/departments, including tracking the progress of Deliverables and communicating status to Health Net’s EPCO and/or Compliance organization; and
  - (iv) Based on the aforementioned meetings and guidance from the EPCO, prepare initial drafts of revised or new Health Net Membership Policies and submit them to the relevant Health Net and Supplier stakeholders for review, comment and approval;
- (d) Prepare updated versions of Health Net Membership Policies to address input provided by relevant Health Net and Supplier stakeholder groups;
- (e) Provide communications and training to Supplier personnel regarding revised and new Health Net Membership Policies and access to Health Net personnel to such communication and training; and
- (f) Implement Health Net approved Health Net Membership Policies by Supplier Personnel involved in the performance of the Membership Services.

## 4. CONFIGURATION SERVICES - ROLES AND RESPONSIBILITIES

The following table sets forth the respective roles and responsibilities of Supplier and Health Net for the Configuration Services, as well as identifying the Health Net lines of business and regions for which each listed component of the Configuration Services is applicable. Supplier shall perform the Configuration Services, including those Functions listed and described in Section 5 below, except for those Functions (if any) that are expressly identified herein as retained Health Net responsibilities.

Process / Function ID	Process/Function Name / Description	Lines of Bsns (LOB)		Resp. Party	
		Region	Supplier	Health Net	
CS1	Health Net Configuration Services				
CS1.1	Benefits Configuration Services	All	All	X	
CS1.2	Pricing Configuration Services - Health Net	All	All	X	
CS2	Provider Configuration Services	All	All	X	
CS3	Division of Financial Risk (DOFR) Configuration Services - Health Net	All	All	X	
CS4	MHN Configuration Services	All	All	X	
CS5	Provider Data Management Services - Health Net	All	All	X	
CS6	Capitation Services - Health Net	All	All	X	
CS7	Audit Support Services	All	All	X	
CS8	Configuration Policy Services	All	All	X	

## 5. CONFIGURATION SERVICES - FUNCTIONAL DECOMPOSITION

### 5.1 Configuration Services, Generally.

“*Configuration Services*”, which are described generally in Section 1.1(b), support all lines of business (e.g. Commercial, Medicare, and Medicaid and Duals) across Health Net and MHN. The principal Functions comprising the Configuration Services are set forth in the remainder of this Section 5.

### 5.2 CS1: Health Net Configuration Services.

#### (a) CS1.1: Benefits Configuration Services.

“*Benefits Configuration Services*” are the Functions associated with benefits configuration, including the following activities:

- (i) Maintain databases and provide quality and timeliness reporting for date when Configuration team initially received the benefits information, validated it, returned it to Health Net for any clarifications, received clarifications and completed benefits system configuration, Summary of Benefits and Coverage (SBC) or Summary of Benefits processes.

- (ii) Receive new and updated data from Health Net (Product grids);
  - (iii) Setup and configure Health Net benefits information in the applicable systems, including to enable the following:
    - (A) Claims adjudication;
    - (B) Display benefits information on ID Cards, Web, etc.; and
    - (C) Use of benefits information by surround systems and process partners in capitation, medical management, membership, finance, claims, etc.
  - (iv) Review the benefits for completeness. For benefits that require clarification and/or additional information, research and obtain such clarification and/or information, and upon obtaining the missing data, complete the entry of the benefit data into the applicable system.
  - (v) For clean benefit information requiring no clarification and/or additional information, enter the complete benefit information into the applicable system.
  - (vi) Coordinate with Claims to test Benefit Plans to simulate proper processing and outcomes of different claim payment scenarios. Make any corrections and changes required as demonstrated from the test results and obtain final claims sign off.
  - (vii) Finalize benefits load into applicable production systems.
  - (viii) Maintain Benefit Plan accumulators.
  - (ix) Create and maintain the “*Prior Authorization List*”.
  - (x) Maintain understanding of benefits requirements on the web sites of CMS, other applicable regulatory agencies and industry vendors, and participate in Health Net and other regulatory activities.
  - (xi) Research, correct systems information and respond timely to benefits issues from internal and external audiences.
  - (xii) Create, quality monitor, translate and publish Summary of Benefits Coverage (SBC) and Schedule of Benefits (*SOB*) for quoting benefits to Members, providers and other internal and external audiences for:
    - (A) New products; and
    - (B) Existing products, monthly renewals or other updates as required by CMS.
- (b) CS1.2:Pricing Configuration Services - Health Net

“*Pricing Configuration Services*” are the Functions associated with pricing configuration, including the following activities:

- (i) Load and configure all professional fee schedules to support government and commercial pricing arrangements, which includes checking the applicable government website for updates to fee schedules (i.e. RBRVS).
- (ii) Configure and maintain the Provider fee schedule.
- (iii) Update all industry standard professional fee schedules (RBRVS, Medi-Cal, AWP) in Health Net systems, as well as confirm that Burgess tools are updated timely and accurately to support government and commercial pricing arrangements.
- (iv) Monitor web sites of CMS and other applicable regulatory agencies and industry vendors (e.g., Optum), and Medi-Cal for updates to industry pricing methodologies (RBRVS, Medi-Cal allowable, etc), industry standard coding updates, (e.g. CPT, HCPCs, ICD-9) daily, weekly, quarterly, or annually depending on the frequency of update releases.
- (v) Perform system updates, either through direct table updates or via a Service Request sent to ITG within 3 Business Days of update posting or notification.
- (vi) Test updates and releases prior to moving them to the live production environment.
- (vii) Notify affected Health Net departments of updates and releases - e.g., by posting them to Health Net's intranet.

### 5.3 CS2: Provider Configuration Services.

*“Provider Configuration Services”* are the Functions associated with provider configuration, including the following activities:

- (a) Conduct pre-signature review on any non-standard contracts and coordinate resolution of any issues with Network Management and Claims.
- (b) Maintain databases and provide quality and timeliness reporting for date when Configuration team initially received the information, validated it, returned it to Health Net for any clarifications, received clarifications and completed system configuration.
- (c) Based on provider contract data provided by Health Net, receive, configure, load and validate new and amended Provider rates and Division of Financial Risk (DOFR) for Professional Direct Network, PPG, Institutional Inpatient/Outpatient and Ancillary contracts in the system.
  - (i) Review the contract for completeness. For contracts that require clarification and/or additional information, research and obtain such clarification and/or information, and upon obtaining the missing data, complete the entry of the contract data into the applicable system.
  - (ii) For clean contracts requiring no clarification and/or additional information, enter the complete contract into the applicable system.

- (iii) Maintain existing provider contract data files to support SOX (Sarbanes Oxley) audits.
- (iv) After Finance approval of Viant load, activate contract configured in Health Net system to send claims batch files to Viant for pricing of Inpatient and Outpatient par and non-par claims per Viant rules.
- (v) Create provider fee keys per contractual agreements that can be utilized in the configuration of automated physician claims (CMS 1500) pricing. (Fee key cascading logic).

#### 5.4 CS3: DOFR Configuration Services – Health Net.

“*DOFR Configuration Services*” are the Functions associated with DOFR configuration, including the following activities:

- (a) Configure and load all DOFR contract risk arrangements for PPGs and Dual Risk facilities into the various Health Net systems for claims adjudication.
- (b) Receive the PPG contract and log the contract into the applicable system, including logging the date on which Supplier received the contract, and track all contracts in the database through the process to completion.
- (c) Assign contract to a Configuration Analyst and log it into the department’s internal Inventory Access Database.
- (d) Review the contract for completeness. For contracts that require clarification and/or additional information, research and obtain such clarification and/or information, and upon obtaining the missing data, complete the entry of the contract data into the applicable system.
- (e) For clean contracts requiring no clarification and/or additional information, enter the complete contract into the applicable system.
- (f) Maintain and update all applicable contract data in applicable Health Net systems.
- (g) Perform audits in accordance with Health Net Policies. Correct discrepancies and enter all data into the applicable system.

#### 5.5 CS4: MHN Configuration Services.

“*MHN Configuration Services*” are the Functions associated with MHN configuration, including the following activities:

- (a) MHN’s portfolio includes multiple products and states. Provide accurate business design and implementation of business rules into the applicable system to support client benefits and enable accurate claims adjudication. For Affiliate accounts, implement and maintain configuration grids that outline business rules for each of the Affiliates. Regularly review rules with the Affiliates to enable accuracy, consistency and specialization where required. Maintain these grids for Commercial and Medicare accounts as well.

- (b) Perform benefit design analysis to validate benefits against state and federal regulations, as well as current Health Net internal business rules. For Commercial accounts, act as a gatekeeper for the Managed Care Benefit record in applicable system. Validate all new and renewing benefit designs with changes in compliance with all Laws.
- (c) Accurately install Commercial and Affiliate matrices. These matrices are “*crosswalks*” that convert client specific data values into MHN Net data values. This facilitates an accurate benefit translation and update into the on-line system. Process Affiliate matrices weekly and process Commercial matrices as needed or as otherwise directed by Health Net.
- (d) Contribute subject matter expertise to support the accurate development of business requirements and appropriate system enhancements and modifications. Actively participate in projects for Health Net business areas, including Claims, Clinical Operations, Customer Service, Finance, and Membership Accounting.
- (e) Maintains multiple Configuration tables, including those related to various coding sets, benefit categories, maintenance, and financial indicators. Update and maintain Configuration items and tables, including the Cross Data Accumulation table, the Parity table, Procedure Codes, Benefit Category rules, and Diagnosis Code File.
- (f) Administer the Business Solutions Request Database. This database is used by operational departments within MHN & Health Net Affiliates to track operational issues and projects that require resolution. Closely track compliance of all requests in the database and follow up on all outstanding requests to facilitate meeting Service Level Agreement and other requirements.
- (g) Load account and benefit information in the Client and Benefit Repositories in the applicable system for all Affiliate and Commercial accounts.

#### 5.6 CS5: Provider Data Management Services – Health Net.

“*Provider Data Management Services*” are the Functions associated with provider data management, including the following activities:

- (a) Receive and maintain PPG and Provider demographic information in systems of record (including for Professional, Institutional and Ancillary Providers, as well as participating and non-participating Providers). Link pricing to Provider Tax ID number. Input and maintain Provider suffixing.
- (b) Receive and input Provider accreditation and affiliation information and artifacts from multiple sources (including third party agencies).
- (c) Receive and process debarment information provided by Credentialing to reflect timely and accurate provider licensing status in systems.
- (d) Identify missing PPG and Provider data (internally or through requests from other departments). Unless otherwise directed by Health Net, contact the Provider and obtain any missing information. Update additional information in the applicable systems of record.

- (e) Provide a concierge level of service to certain Providers (as identified by Health Net in its sole discretion, which list of Providers may be modified by Health Net from time to time during the Term). Such service shall NOT include making in-person visits.
- (f) Support requests from Health Net and other Supplier functional areas, including: Claims, Provider Services, Provider Network Management, Credentialing, Medicare Management, Finance, Tax, and Appeals and Grievances regarding Provider Data Management related information and assistance.
- (g) Receive requests to add / update Provider data via various media, including SFs, Profiles, Fee Schedules, NCFs, PIFs, 1099s, W-9s, Projects, miscellaneous mail and returned mail.
- (h) Provide accurate and timely data entry of contracted and non-contracted provider data for all applicable geographies.
- (i) Assign Configuration-related tasks to the applicable Managed Third Parties, including Profiles, Fee Schedules, NCF's, Projects, and auto-suffix claims for all contracted and non-contracted Provider data. Provide training and support as needed.
- (j) Research Provider information on Claims that are not auto-matched in the applicable system. Manually research and resolve any claim suffixing issues via claim review of all claims in the auto-suffix queue.
- (k) Validate the contents of debarred, sanctioned and suspended provider list.
- (l) Flag all (contracted and non-contracted) debarred, sanctioned or suspended providers.

#### 5.7 CS6: Capitation Services - Health Net.

“*Capitation Services*” are the Functions associated with Capitation, including the following activities:

- (a) Load New/Amended Capitated Provider/Vendor Contract Information into the applicable systems, including the date the contract was received for the applicable geographies;
- (b) Load and maintain Capitation benefit relativity rates for medical plans and ancillary riders; perform DOFR maintenance to process Capitation deductions.
- (c) Load Benefit Base Rate Table/Remit Rule/Age Sex Table for monthly capitation calculation.
- (d) Review the contract for completeness. For contracts that require clarification and/or additional information, research and obtain such clarification and/or information from internal and external partners and, upon obtaining the missing data, complete the entry of the contract data into the applicable system.
- (e) For clean contracts requiring no clarification and/or additional information, enter the complete contract into the applicable system.
- (f) Input the data into the applicable system for payment calculation and generation.

- (g) Generate on a monthly basis Provider Remittance/Audit Sheet/Check request documents and support requests from Health Net and other supplier functional areas, including but not limited to: Claims, Provider Services, Provider Network Management, Credentialing, Medicare Management, Finance and Tax.
- (h) Obtain necessary approvals for check requests.
- (i) Generate Capitation payment files based on PPG contract arrangement (Medicare, Medicaid, Duals and HMO) and other ancillary provider contracts as applicable.
- (j) Upload the Provider/Vendor Group payment files to the applicable system.
- (k) Reconcile payments with past dues and determine final payments.
- (l) Perform analysis and validation prior to making the final files available to Health Net.
- (m) Submit payment proposal/ check register to Accounts Payable. Submission timing differs for paper checks and electronic payments.
- (n) Reconcile paper checks and provide checks to the Health Net mail room.
- (o) Set up and maintain payee information (e.g., name, address, and tax ID) and routing information (e.g., routing number, account number, etc. for electronic payments) for payment submissions.
- (p) Conduct internal monthly capitation payment audits (pre-remittance), including the following:
  - (i) Generate and perform audit of Cap Remittance Summary/Audit Sheets.
  - (ii) Verify that Cap dollars, along with adjustments if applicable, are accounted for.
  - (iii) If error is found, make the appropriate adjustment(s) and resubmit for additional audit.
  - (iv) Forward to Health Net for final approval and payment generation.
- (q) Conduct internal daily / weekly provider contract audits.
- (r) Request check tracers and process check reissues as needed in the applicable system.
- (s) Provide a concierge level of service to certain Providers (as identified by Health Net in its sole discretion, which list of Providers may be modified by Health Net from time to time during the Term). Such service shall NOT include making in-person visits. Provide such concierge service (at the frequency and schedule specified by Health Net) to such Providers in order to educate the applicable Provider regarding the Capitation Services.
- (t) Generate the following Provider/Hospital Capitation reports:
  - (i) Remittance Detail – capitation paid per Member.
  - (ii) Eligibility – active eligible Members.

- (iii) Activity – Member changes (i.e. adds/cancels etc.).
- (iv) Eligibility Summary by Group Name – Member count by Group.
- (v) CMS MMR, CMS HCC Risk, SB 260 Reconciliation.
- (u) Set up PGP keys for WEB transmission with Providers/Hospitals. Perform testing to validate all data elements are correct and regulatory requirements are met.
- (v) Conduct meetings with Providers/Hospitals to field questions on capitation calculations at the Member level.

#### 5.8 CS7: Audit Support Services.

“*Audit Support Services*” means those Functions associated with providing support for Audits of the applicable line of business or a component of it, whether conducted by (or on behalf of) Health Net itself or a Health Net Regulator or customer (e.g., a large Employer Group), including the following:

- (a) Providing data and reports requested by the Auditors;
- (b) Providing subject matter expertise and otherwise supporting the conduct of the Audit as requested by the Auditors;
- (c) Assisting in the development and implementation of corrective action plans in response to Audit findings identifying weaknesses or deficiencies in the Audited Function; and
- (d) Supporting Health Net communications with Regulators.

#### 5.9 CS8: Configuration Policy Services.

“*Configuration Policy Services*” means those Functions associated with the development and implementation of “*Health Net Configuration Policies*,” which are the Health Net Policies as defined in Schedule P (*Health Net Policies*) governing or pertaining to the Configuration Services and, more specifically, the conduct of Health Net’s Configuration Services.

Below are some examples of selected Configuration Policy Development Services Functions, which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only:

- (a) Generally, provide operational subject matter expertise with respect to Health Net Configuration Policies;
- (b) As requested, participate in meetings with Health Net and Supplier stakeholders having responsibility for the development, implementation, monitoring and enforcement of Health Net Configuration Policies;
- (c) In response to changes in Laws, regulations, guidelines, policies, contracts or requests from Health Net’s Enterprise Process Change Organization (“*EPCO*”) or from Health Net’s or Supplier’s Compliance organization:

- (i) Participate in Health Net EPCO Steering Committee meetings to review new legal and regulatory changes and assessment of business impact;
  - (ii) Participate in Health Net EPCO regulatory implementation Change Teams;
  - (iii) Project manage the operational implementation and/or affected system changes of legal and regulatory changes that affect Configuration Services and participate in operational implementation and/or affected system changes of legal and regulatory changes that span multiple functions/departments, including tracking the progress of Deliverables and communicating status to Health Net's EPCO and/or Compliance organization; and
  - (iv) Prepare initial drafts of revised or new Health Net Configuration Policies and submit them to the relevant Health Net and Supplier stakeholders for review, comment and approval;
- (d) Based on the aforementioned meetings and guidance from the EPCO, prepare updated versions of Health Net Configuration Policies to address input provided by relevant Health Net and Supplier stakeholder groups;
- (e) Provide communications and training to Supplier personnel regarding revised and new Health Net Configuration Policies and access to Health Net personnel to such communications and training; and
- (f) Implement Health Net approved Health Net Configuration Policies by Supplier Personnel involved in the performance of the Configuration Services.

## 1. INTRODUCTION

This document is the Solution Description for Statement of Work #5 – Membership and Configuration (this “*Statement of Work*”). Whereas Exhibit A (*Membership and Configuration Services*) describes the Functions which Supplier is responsible for performing under this Statement of Work. This Exhibit A-1 (*Membership and Configuration Solution Description*) describes the **means by which** and the **manner in which** Supplier will perform those Functions. This document includes an overview of Supplier’s service delivery architecture –including a depiction on a global map of the geographic configuration and delivery architecture of Supplier’s Solution (as it will exist at the completion of Phase 2). This geographical depiction also identifies all Service Delivery Centers of Supplier (and its Affiliates and other Subcontractors) that will be utilized in performing and delivering the Services (including the back-up and failover locations for each) and how they will be interconnected to each other and to Health Net’s IT Environment. It then provides additional descriptive information about each of the principal components of Supplier’s Solution.

This Exhibit A-1 (*Membership and Configuration Solution Description*) includes the following attachments, which are incorporated herein by reference:

Exhibit A-1.1 Approved Service Delivery Centers

Exhibit A-1.2 Service Delivery Configuration at the Completion of Phase 2

## 2. DEFINITIONS AND INTERPRETATION

### 2.1 Defined Terms

The following terms, when used in this Statement of Work, will have the meanings set forth below unless otherwise specifically defined in the body of this document. Additionally any capitalized term used but not defined in this Exhibit A-1 (*Membership and Configuration Solution Description*) will have the meaning indicated in Schedule W (*Glossary*).

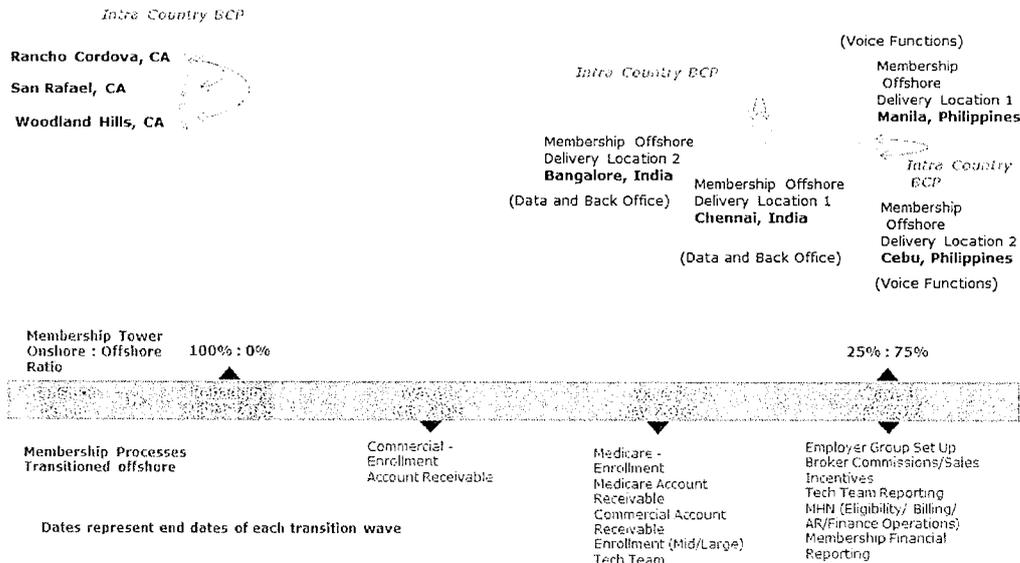

Defined Term	Meaning
“ <i>Solution</i> ”	A collective term referring to the means by which and manner in which Supplier will perform and deliver the Services under this Statement of Work.

## 3. MEMBERSHIP SOLUTION OVERVIEW

### (a) High-level Service Delivery Architecture and Configuration

This section provides an overview of the geographical and physical configuration of Supplier’s Solution for the Services under this Statement of Work. Exhibit A-1.1 (*Approved Service Delivery Centers*) provides additional information about each of the Service Delivery Centers Supplier will use to provide the Membership Services under this Statement of Work, including both the primary Service Delivery Centers and the back-up / failover locations that Supplier will activate and use to provide the Services if operations at any primary Service Delivery Center are disrupted or disabled.

Figure 1

The above diagram illustrates Supplier solution and Onshore Offshore ratio from the beginning of phase 2 to the end of phase 2. Initially all the Health Net resources will be rebadged and work out of the current Health Net US locations in Rancho Cordova, Woodland Hills and San Rafael. The Transition is planned to occur over 3 waves as depicted in Figure 1, with some of the work gradually moving to the Offshore locations of Chennai and Bangalore in India and Manila and Cebu in the Philippines. The overall target Onshore/ Offshore ratios at the initial state and the final state (Phase 3) are illustrated above.

(b) Service Delivery Model

This section provides an overview of the commercial delivery model Supplier will utilize in providing the Membership Services under this Statement of Work. As described in Exhibit H (*Membership and Configuration Subcontractors*), Supplier will not use any Supplier Affiliates or Subcontractors to perform the Services under this Statement of Work.

(c) Business-Process-as-a-Service

The Services to be provided under this Statement of Work will be provided under a 'Business-Process-as-a-Service' delivery model - i.e., as a fully integrated vertical service in which Supplier is responsible for providing all the associated resource / service layers (facilities, IT infrastructure, tools, application software, labor, infrastructure and applications operations and support, and performance of the associated business

processes); and Health Net is purchasing ‘business outcomes’ (e.g., fully processed enrollment).

### 3.2 Changes to Supplier’s Solution

As a general principle, Supplier has both the right and the obligation to perform the Services to be provided by it under this Statement of Work in the manner described in this Exhibit A-1 (*Membership and Configuration Solution Description*). That said, Supplier is charged with responsibility for the adequacy of its Solution, which is to say that if the Supplier’s Solution, as described in this Exhibit A-1 (*Membership and Configuration Solution Description*), should prove inadequate at any point during the Statement of Work Term for Supplier to perform and deliver the Services in accordance with the obligations of the Agreement (including this Statement of Work), then Supplier is responsible for making such changes to its Solution as are necessary to enable Supplier to perform and deliver the Services in accordance with such obligations. All such changes are to be made in accordance with Schedule H (*Change Control Process*) of the Agreement, as applicable according to its terms; provided, however, that Supplier is responsible for making such changes at its own cost and expense except in those cases (if any) in which the Agreement expressly provides that Health Net has Financial Responsibility for them.

### 3.3 Solution Description

Supplier’s Solution is built on the following foundational aspects:

#### Delivery Solution:

- **Quality Focus** – Supplier’s primary focus is to maintain continuity of services while ensuring regulatory and contractual compliance. For all processes migrated Offshore, the objective will be to adhere to compliance requirements and get the quality right.
- **Support ratio** – To enable focused monitoring and feedback, Supplier’s delivery model provides personnel to Supervisor and QA ratio Offshore as described in Section 3.4(d) of this Exhibit A (*Membership and Configuration Services*).
- **Continuous Improvement** - Supplier will appoint dedicated Six Sigma resources during the Term to identify sustainable improvement opportunities. The typical ratio is around 1 Six Sigma resource for every 150 FTEs.

#### Knowledge Retention:

- **Domain Experts** – Supplier will deploy staff (existing and hired) with previous Healthcare experience for key functions, including Operations, Transition, Training, Quality and Compliance.
- **Health Net Training Academy** – During Phase 2 and Phase 3, Supplier’s dedicated Health Net Training Academy will be tasked with the mandate of building/maintaining a Knowledge repository, updating Training and process documentation, providing training to new hire Supplier Personnel and providing higher level training to experienced resources for Membership Operations

### 3.4 Operating Model

The operating model for Membership Services describes the service delivery blue-print and key aspects of service delivery. The operating model also describes how the in-scope Services will be delivered for each functional process area in a scalable global delivery environment.

(a) Resource Mix

The initial Onshore/Offshore resource mix and target ratio for Phase 3 for Membership operations is listed in the following table.

Supplier has considered the following criteria to define its Onshore/ Offshore strategy -

- Regulatory requirements
- Non-availability of skill at Offshore
- Health Net mandated Offshore restricted function

Processes requiring voice support will be delivered out of US and Philippines.

**Table 1**

Service Function	Resource Allocation		
	Onshore %	Offshore %	Delivery Location
Duals Demonstration Enrollment Services	100.00%	0.00%	W,R
(a) Employer Group Setup Services	25.00%	75.00%	W,R,Ch,B
(a) Medicare Enrollment Services	40.00%	60.00%	W,R,Ch,B
Commercial Enrollment Services	10.00%	90.00%	W,R,Ch,B
Medicare Accounts Receivable Services	25.00%	75.00%	W,R,Ch,B
Commercial Accounts Receivable Services	10.00%	90.00%	W,R,Ch,B
Broker Commission Services	10.00%	90.00%	W,R,M,Ce
Compliance Oversight	100.00%	0.00%	W,R
Membership Financial Forecasting / Budgeting	100.00%	0.00%	W,R
Membership Financial Reporting	50.00%	50.00%	W,R,Ch,B
Membership Special Projects	100.00%	0.00%	W,R
Membership Support	25.00%	75.00%	W,R,Ch,B
MHN Billing and AR	33.00%	67.00%	SR,Ch,B

MHN Eligibility processing	25.00%	75.00%	SR,Ch,B
MHN Finance Operations	25.00%	75.00%	SR,Ch,B
MHN Membership Services	100.00%	0.00%	SR,Ch,B
Sales Incentives	25.00%	75.00%	W,R,M,Ce
Other Membership Services	100.00%	0.00%	W,R

<i>Legend</i>	
Location	Code
Woodland Hills (US)	W
Rancho Cordova (US)	R
San Rafael (US)	SR
Chennai (India)	Ch
Bangalore (India)	B
Manila (Philippines)	M
Cebu (Philippines)	Cb

- The above percentages are approximate estimates at this point.
- The estimated Final State ratios are expected to be reached by March 2017. This may change based on the final agreed Transition plan.
- Roles that Health Net mandates to remain Onshore and roles for which the required skills are not readily available at Supplier's Offshore locations will remain Onshore.
- As shown in Table 1, while a process can span across up to 4 locations, there will be no role within a process that will span across more than 2 locations.

(b) Service Locations

To achieve Health Net's objectives of improvement in services delivery, faster speed to market, focus on growth and significant reduction in cost, Supplier will leverage its global operating model. Supplier will deliver the in-scope services from US, India and Philippines locations. The delivery location strategy has been planned taking into consideration the following criteria.

- Health Net mandated Onshore staffing
- Availability of talent pool
- Skill requirements

- Regulatory limitations
- Business Continuity

Functional processes subject to regulatory location restrictions will be performed from US locations. The processes requiring voice-assisted stakeholder interaction will be performed from Philippines and US locations. Supplier will also adhere to the requirements of the Agreement, including those set forth in Schedule E (*Employee Transfer*) of the Agreement, relating to the work locations of Affected Employees who become Supplier Personnel.

As per Health Net's requirements, the Supplier Personnel performing the following Membership Services Functions must be retained in Onshore locations:

- AZ AHCCCS Line of Business
- Performance Groups
- Auditors interfacing with Compliance Group
- Power of Attorney/PHI
- Legal and Compliance Liaison
- All triage functions
- Scanning and batching of work requests received in non-digital format for transmission to the third party scanning/imaging service provider for conversion into digital format.

**Table 2**

Sub function	Delivery Location	
	Onshore	Offshore
Membership Management Team ( <i>VP</i> )	US	
Commercial Line of Business	US	Bangalore, Chennai
Medicare Line of Business	US	Bangalore, Chennai
The Duals Demonstration (Cal MediConnect also known as CMC) Line of Business	US	
MHN Membership Services	US	Bangalore, Chennai
Broker Commission Services	US	Manila, Cebu
Miscellaneous Membership Services	US	Bangalore, Chennai, Manila, Cebu

The teams across locations in the US, India and Philippines will interact on an ongoing basis to enable effective planning, monitoring and tracking of processes, activities and requirements. Following are the key activities:

- Forecasting – identifying the number of transactions, volumes and activities that would need to be transacted and processed in coming months
- Capacity Planning- verify staffing in place to manage the forecasted volumes
- Monitor Productivity- An ongoing daily, weekly, monthly exercise to track, analyze and report on productivity trends
- Reallocation based on productivity – Process wherein the transaction and volumes are shifted within teams and individuals to achieve desired productivity
- Monitor Quality and Service Levels - An ongoing daily, weekly, monthly exercise to track, analyze and report on quality and Service Levels

The organization structure has been functionally designed to facilitate effective operations across locations.

This model will enable the workflow to be effective in real time, facilitating tactical monitoring.

(c) Operating Hours

Supplier will at minimum replicate the operating hours currently adhered to by Health Net's Membership organization as of the Effective Date, as set forth in the table below. Supplier acknowledges and agrees that performance of the Membership Services will regularly require Supplier Personnel to perform additional/overtime work outside regular operating hours, and that such additional/overtime work is within the scope of the Membership Services. Examples include the following areas and time periods:

- Expanded operational hours to accommodate the increased time zone difference between Arizona (Mountain Standard Time year-round) and West Coast US locations (Pacific Time) during the portion of the year when West Coast US locations change from Daylight Savings Time to Standard Time.
- During any kind of regulatory or financial audits as necessary to meet assigned deadlines.
- During periods of Open Enrollment and Annual Election Period.

Supplier will extend its hours of operations (for example, through overtime, weekend and holiday work) from time to time as needed to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement. Supplier's work during such extended hours of operations is within the scope of the Membership Services.

Within the regular Hours of Operations listed in Table 3 below, Supplier will have staff work according to defined shift schedules. However, Supplier will make reasonable efforts to permit Supplier staff to work flexible shift times when that can be done without

jeopardizing Supplier's ability to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement.

**Table 3**

<b>Sub function</b>	<b>Hours of Operations (Pacific Time)</b>
<b>Commercial Line of Business</b>	
Supervisor – Group Setup	08:00 am to 17:00 pm
Employer Group Setup Services	08:00 am to 17:00 pm
Director - Commercial Membership	08:00 am to 17:00 pm
Manager – Enrollment	08:00 am to 17:00 pm
Supervisor – Enrollment	08:00 am to 17:00 pm
Commercial Enrollment Services	08:00 am to 17:00 pm
Manager - AR/Billing	08:00 am to 17:00 pm
Supervisor - AR/Billing	08:00 am to 17:00 pm
Commercial Accounts Receivable Services	08:00 am to 17:00 pm
<b>Medicare Line of Business</b>	
Director - Government Programs, Compliance Oversight	08:00 am to 17:00 pm
Manager – Enrollment, Member Project Support	08:00 am to 17:00 pm
Supervisor – Enrollment, Data/Systems, Project/System	08:00 am to 17:00 pm
Membership Project Support	08:00 am to 17:00 pm
Manager - AR/Billing	08:00 am to 17:00 pm
Supervisor - AR/Billing	08:00 am to 17:00 pm
Medicare Enrollment Services	08:00 am to 17:00 pm
Medicare Accounts Receivable Services	08:00 am to 17:00 pm
<b>The Duals Demonstration (Cal MediConnect also known as CMC) Line of Business</b>	
Duals Demonstration Enrollment Services	08:00 am to 17:00 pm
<b>MHN Membership Services</b>	
MHN Membership Services – Oversight	08:00 am to 17:00 pm
MHN Eligibility processing	08:00 am to 17:00 pm
MHN Billing and AR	08:00 am to 17:00 pm
MHN Finance Operations	08:00 am to 17:00 pm
<b>Broker Commission Services</b>	

Broker Commission Services – Oversight	08:00 am to 17:00 pm
Broker Commission Services – Medicare	08:00 am to 17:00 pm
Broker Commission Services – Commercial	08:00 am to 17:00 pm
Sales Incentives	08:00 am to 17:00 pm

#### **Miscellaneous Membership Services**

Compliance Oversight	08:00 am to 17:00 pm
Membership Financial Reporting	08:00 am to 17:00 pm
Membership Financial Forecasting / Budgeting	08:00 am to 17:00 pm
Membership Special Projects	08:00 am to 17:00 pm
Executive Admin	08:00 am to 17:00 pm
Tech Team Reporting	08:00 am to 17:00 pm

#### (d) Operations

Supplier's approach to managing Membership operations is as follows:

- **Operational Focus:**

Team huddles, floor walks, daily performance reviews, daily Supplier Personnel communication plan and customer calibration sessions.

- **Performance Management:**

Measure and manage Supplier Personnel performance through data and service dashboards

- **Span of Control:**

Supplier will provide for the following span of control (applicable during Phase 3 - i.e., after Transition has been completed):

- Operations Lead 1: ≤500
- Manager 1: ≤50
- Supervisor 1: ≤15
- Quality Auditor 1: ≤15
- Trainer 1: ≤20 (during training following completion of Transition) - Proposed training ratio of 1: ≤20 is based on typical classroom training. However for specific processes this ratio could be lower.
- Six Sigma and Process Excellence 1: ≤150

- **Health Net Training Academy:**

Supplier will establish a dedicated Health Net Training academy for the management of training content and the delivery of training programs. Supplier will establish a Knowledge Management Portal for management and easy access to Training Content, desktop procedures and P&Ps. Academy will work closely with the Training Tower and facilitate necessary training during Phase 2 and Phase 3. Based on the System updates and Process updates, the training materials will be constantly updated.

- **Team Huddle:**

Supplier's Team Leads will conduct daily team meetings for individual processes to share any critical updates, feedback and communication on learnings, and plan for the day.

- **Quality:**

Supplier will implement Health Net mandated specific quality/compliance programs in its delivery model for managing and achieving service levels. Supplier will analyse audit findings to determine root causes and will deploy corrective and preventive solutions to improve quality. In the daily team meetings, prevalent trends in errors, root causes and preventive actions will be discussed and implemented.

- **Continuous Improvement:**

Supplier will have a dedicated Process Excellence (PEX) team consisting of Six Sigma resources for Health Net Membership functions to enhance performance and handoffs in Health Net Membership's processes while improving standardization and the "To-Be operating model".

- **Rewards and Recognition**

Supplier will recognize the efforts of its best performers using stack ranking and will reward them through a structured reward and recognition program that aligns with quality and productivity objectives. The Rewards and Recognition will be applicable for both Onshore and Offshore teams. The specific criteria for the awards will be decided by the Operations Leads depending on the specific behavior and/or results to be achieved.

(e) **Resource Profile**

Supplier has a very well defined methodology for the recruitment and selection of candidates. Supplier will work closely with Health Net to establish job descriptions at various levels and functions. Based on these job descriptions, Supplier will select candidates with the proper qualifications and experience in order to achieve a "best-fit" for Health Net.

Tables 4-9 below set forth indicative requirements for Offshore staffing and the minimum qualifications required to be selected for Membership operations.

**Table 4**

<i>Qualification &amp; Experience</i>	<i>Selection Process</i>
<ul style="list-style-type: none"> <li>• Graduates with 1-2 years of Healthcare experience</li> <li>• Skills in membership / financial reconciliation process</li> <li>• Excellent written and verbal communication skills</li> <li>• Knowledge of healthcare basics</li> <li>• Familiar with financial processing applications</li> </ul>	<ul style="list-style-type: none"> <li>• Aptitude Test</li> <li>• HR Interview</li> <li>• Written test of Enrollment and Billing basics</li> <li>• Domain / Operations Interview</li> <li>• Technical interview on Financial terms and Healthcare AR concepts</li> <li>• Education and Professional Background Check</li> </ul>

**Table 5**

<i>Qualification &amp; Experience</i>	<i>Selection Process</i>
<ul style="list-style-type: none"> <li>• Graduates with 2-3 years of Healthcare experience</li> <li>• Skills in membership / financial reconciliation process</li> <li>• Excellent written and verbal communication skills.</li> <li>• Knowledge of healthcare basics</li> <li>• Familiar with one or more Financial applications</li> <li>• Familiar with Enrollment and Billing for multiple LOBs</li> </ul>	<ul style="list-style-type: none"> <li>• Aptitude Test</li> <li>• HR Interview</li> <li>• Written test of Enrollment and Billing basics</li> <li>• Domain / Operations Interview</li> <li>• Technical interview on Financial terms and Healthcare AR concepts</li> <li>• Education and Professional Background Check</li> </ul>

**Table 6**

<i>Qualification &amp; Experience</i>	<i>Selection Process</i>

- |  |  |
|--|--|
| <ul style="list-style-type: none"> <li>• Graduate with 4 to 5 years’ experience in Healthcare Industry specifically in respective in-scope process</li> <li>• 2 years of Supervisory experience leading teams of at least 30-40 team members</li> <li>• Leadership and Communication skills</li> </ul> | <ul style="list-style-type: none"> <li>• HR Interview for Cultural fitment</li> <li>• Communication Skills Screening</li> <li>• Domain/ Operations Interview</li> <li>• Education and Professional Background Check</li> </ul> |
|--|--|

**Table 7**

<i>Qualification &amp; Experience</i>	<i>Selection Process</i>
<ul style="list-style-type: none"> <li>• Graduates with 3-5 years’ experience in Healthcare process auditors</li> <li>• Six Sigma/Lean exposure of at least 2 years</li> </ul>	<ul style="list-style-type: none"> <li>• HR Interview for Cultural fitment</li> <li>• Communication Skills Screening</li> <li>• Domain/ Operations Interview</li> <li>• Education and Professional Background Check</li> </ul>

**Table 8**

<i>Qualification &amp; Experience</i>	<i>Selection Process</i>
<ul style="list-style-type: none"> <li>• Graduate/Post Graduate with 5+ years’ experience in one of the following Healthcare processes. Healthcare Claims / Enrollment / Account Receivables / Appeals and Grievances / Credentialing/ Benefits configuration/ Provider Calls/ Provider Data Management Process.</li> <li>• Excellent Communication and Leadership skills</li> <li>• 3-4 years’ experience leading large teams</li> </ul>	<ul style="list-style-type: none"> <li>• HR Interview-screening for roles and responsibility</li> <li>• Technical Interview</li> <li>• Operations Interview</li> <li>• HR/ Operations Leadership screening for leadership ability and cultural fit</li> <li>• Education and Professional Background Check.</li> </ul>

**Table 9**

<i>Qualification &amp; Experience</i>	<i>Selection Process</i>
<ul style="list-style-type: none"> <li>• <b>MBA with 8-10 years of experience</b></li> <li>• <b>Excellent Communication and Leadership skills</b></li> <li>• <b>7-9 years of overall BPO experience with at least 6 years leading a process in a BPO.</b></li> </ul>	<ul style="list-style-type: none"> <li>• Initial screening of profiles by recruitment team</li> <li>• Interview with Business Leader/ HR Manager</li> <li>• Technical/ Communication ability Interview</li> <li>• Screening for leadership ability and cultural fit</li> <li>• Salary Negotiation</li> <li>• Education and Professional Background Check</li> </ul>

(f) Voice Solution

Per Health Net requirements, Supplier will deliver voice-assisted member, employer group, financial institutions and provider interactions from Onshore US or Philippines locations.

**Table 10**

Enrollment– Member and Group calls
Billing and Reconciliation – Member, Group, Provider calls
Coordination with internal functions like Medical Management, Claims, Benefit Configuration, Compliance, Legal, Finance, Contact Center
Coordination with carve out service providers
Broker Services
Coordination with external Entities as described in SOW

(g) IT Systems

The following systems/systems from vendors will be used by Supplier for delivery of Membership Services. SOW #4 (*IT Services*) documents should be referenced for complete information.

**Table 11**

Genelco

ABS

MACCESS

Symphony

SAP

Salesforce

Showcase (Data Warehouse Query Tool)/Opus

CSI (Will be replaced by PEGA)

Monarch

Check deposit software

CMS MARX

Callidus

FindApps

MC400

OMNI

QCare/HNCS

Data warehouses (Kbase, ODW)

PL SQL Tool to query ODW, Kbase

AHCCCS (for Arizona Medicaid)

Salsa, AMES, EDI Translator (Upstream/surround systems which may require some ad hoc touch points on case to case basis)

**AEVS (External data sources to validate member eligibility)**

## (h) Third Party Tools and Services

Supplier will use the following third party tools and services in providing the Membership Services.

**Table 12**

Scanning/Imaging Services	Ricoh
Image Storage and Archival Services	Health Net IT
Vendor system used to process Broker Commissions for both Medicare and Commercial Lines of business.	Callidus
Source system for Enrollment, Billing and Broker Commissions. Only Life Product is on Genelco.	Genelco
Short term temporary staffing	Kelly Services

## (i) Service Performance Management

Supplier will provide and implement quality assurance procedures for the Membership Services that are reasonably necessary to satisfy the requirements of the Agreement, including Service Levels, reporting format and frequency.

**Approach**

- Initially during Transition (Phase 2), a higher frequency of audits will be performed, and any feedback on errors will be communicated to the processors on a daily basis.
- Once it has been confirmed through quality assurance that the processors are meeting the all requirements of the Agreement for their respective Functions, the audit frequency will be gradually reduced while keeping the quality levels constant.

- Post Transition (during Phase 3), a statistically valid sample size will be employed for quality assurance auditing.

**Tools**

- Quality analysis will be performed using tools such as the following:
  - Pareto Analysis
  - Fish Bone Diagram
  - Box Plot

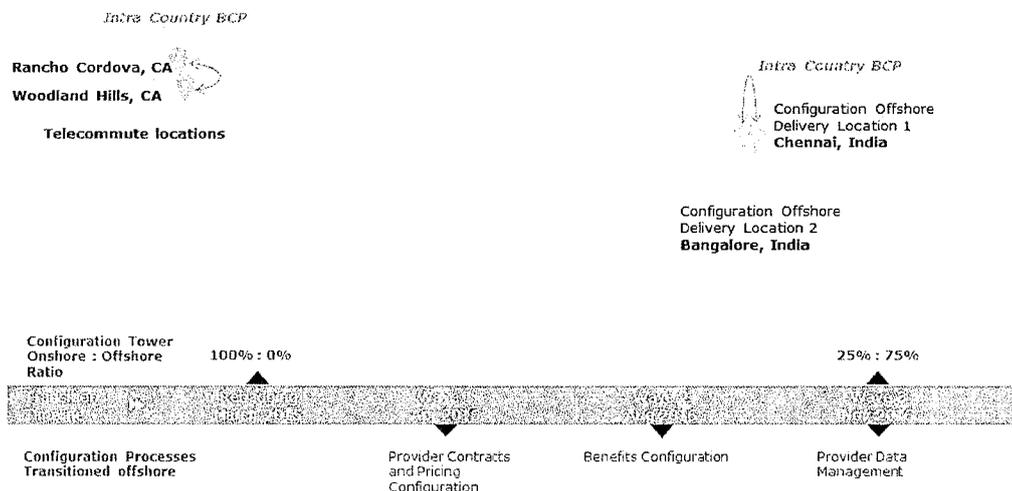

**4. CONFIGURATION SERVICES SOLUTION**

**4.1 Solution Overview**

(a) High-level Service Delivery Architecture and Configuration

This section provides an overview of the geographical and physical configuration of Supplier’s Solution for the Services under this Statement of Work. Exhibit A-1.1 (*Approved Service Delivery Centers*) provides additional information about each of the Service Delivery Centers Supplier will use to provide the Configuration Services under this Statement of Work, including both the primary Service Delivery Centers and the back-up / failover locations that Supplier will activate and use to provide the Services if operations at any primary Service Delivery Center are disrupted or disabled.

**Figure 2**

Note: Dates represent currently planned end date of each Transition wave. Timelines will need to be updated based on actual Transition timeline when finalized.

The above diagram illustrates Supplier solution and Onshore Offshore ratio from the beginning of phase 2 to the end of phase 2. Initially, all the Health Net resources will be rebadged and will continue to work out of the current US locations in Rancho Cordova and Woodland Hills. The Transition will happen in 3 waves as depicted in Figure 2, with some of the work gradually moving to the Offshore locations of Chennai and Bangalore in India. The overall target Onshore/ Offshore ratios at the initial state and the final state (Phase 3) are illustrated above.

(b) Service Delivery Model

This section provides an overview of the commercial delivery model Supplier will utilize in providing the Configuration Services under this Statement of Work. As described in Exhibit H (*Membership and Configuration Subcontractors*), Supplier will not use any Supplier Affiliates or Subcontractors to perform the Services under this Statement of Work.

(c) Business-Process-as-a-Service

The Services to be provided under this Statement of Work will be provided under a 'Business-Process-as-a-Service' delivery model - i.e., as a fully integrated vertical service in which Supplier is responsible for providing all the associated resource / service layers (facilities, IT infrastructure, tools, application software, labor, infrastructure and applications operations and support, and performance of the associated business processes); and Health Net is purchasing 'business outcomes' (e.g., fully processed claims).

#### 4.2 Changes to Supplier's Solution

As a general principle, Supplier has both the right and the obligation to perform the Services to be provided by it under this Statement of Work in the manner described in this Exhibit A-1 (*Membership and Configuration Solution Description*). That said, Supplier is charged with responsibility for the adequacy of its Solution, which is to say that if the Supplier's Solution, as described in this Exhibit A-1 (*Membership and Configuration Solution Description*), should prove inadequate at any point during the Statement of Work Term for Supplier to perform and deliver the Services in accordance with the obligations of the Agreement (including this Statement of Work), then Supplier is responsible for making such changes to its Solution as are necessary to enable Supplier to perform and deliver the Services in accordance with such obligations. All such changes are to be made in accordance with Schedule H (*Change Control Process*) of the Agreement, as applicable according to its terms; provided, however, that Supplier is responsible for making such changes at its own cost and expense except in those cases (if any) in which the Agreement expressly provides that Health Net has Financial Responsibility for them.

#### 4.3 Solution Description

Supplier's Solution is built on the following foundational aspects:

##### **Delivery Solution**

- **Quality Focus** – Supplier’s primary focus will be to maintain continuity of services, while ensuring regulatory and contractual compliance. For all processes migrated Offshore, the focus will be to adhere to compliance requirements and get the quality right.
- **Support Ratio** – To enable focused monitoring and feedback, Supplier’s delivery model provides a personnel to supervisor and QA ratio Onshore and Offshore as described in Section 4.4(d) of this exhibit.
- **Continuous Improvement** - Supplier will appoint dedicated Six Sigma resources during the Term to identify sustainable improvement opportunities. The typical ratio will be 1 Six Sigma resource for every 150 FTEs.

**Knowledge Retention:**

- **Domain Experts** – Supplier will deploy staff (existing and hired) with Healthcare experience for key support functions including Operations, Transition, Training, Quality and Compliance.
- **Health Net Training Academy** – During Phase 3, Supplier’s dedicated Health Net Training Academy will be tasked with the mandate of building/maintaining a Knowledge repository, update Training and process documentation, and provide training to new hire Supplier Personnel and higher level training to experienced resources for Configuration Operations. Why would there be a reference to Phase 2? Remove reference.

**4.4 Operating Model**

The operating model for Configuration Services describes the service delivery blue-print and key aspects of service delivery. The operating model also describes how the in-scope services will be delivered for each functional process area in a scalable global delivery environment.

(a) Resource Mix

The initial Onshore/Offshore resource mix and target ratio for Phase 3 for Configuration operations is listed in the following table.

Supplier has considered the following criteria to define its Onshore/ Offshore strategy -

- Regulatory requirements
- Non-availability of skill at Offshore
- Health Net mandated Offshore restricted function

**Table 17**

	Onshore %	Offshore %	Delivery Location
Configuration Services			

<b>Configuration Management Team (VP)</b>	100%	0%	W,R
<b>Director - Configuration</b>	100%	0%	W,R
Benefit Configuration MHN	25%	75%	W,R,C,B
Benefit Configuration SOB SBC	20%	80%	W,R,C,B
Benefit Configuration Production	20%	80%	W,R,C,B
Pricing, Contract, DOFR, Fee Schedule, Vendor management, Projects, P&P, Training	15%	85%	W,R,C,B
<b>Director – Cashiering/Capitation</b>	100%	0%	W,R
Capitation	47%	53%	W,R,C,B
Provider Data Management Commercial, Medicare and Medi- Cal and Prison	15%	85%	W,R,C,B
Auto Suffixing	42%	58%	W,R,C,B
PDM AZ and AHCCCS	100	0	W,R,C,B

<i>Legend</i>	
<i>Woodland Hills (US)</i>	<i>W</i>
<i>Rancho Cordova (US)</i>	<i>R</i>
<i>Chennai (India)</i>	<i>C</i>
<i>Bangalore (India)</i>	<i>B</i>
<i>Telecommute</i>	<i>T</i>

- The above percentages are approximate estimates at this point
- The estimated end state is expected by March 2017. This may change based on the final agreed Transition plan.
- Roles that Health Net mandates to remain Onshore and roles for which the required skills are not readily available at Supplier's Offshore locations will remain Onshore.
- As shown in Table 17, while a process can span across up to 4 locations, there will be no role within a process that will span across more than 2 locations.

(b) Service Locations

To achieve Health Net's objectives of improvement in services delivery, faster speed to market, focus on growth and significant reduction in cost, Supplier will leverage its global operating model. Supplier will deliver the in-scope services from US and India locations. The delivery location has been planned taking into consideration the following criteria:

- Health Net mandated Onshore staffing
- Availability of talent pool
- Skill requirements
- Regulatory limitations
- Business continuity

Functional processes subject to regulatory location restrictions will be performed from US locations. The processes requiring voice-assisted stakeholder interaction will be performed from Philippines and US locations. Supplier will also adhere to the requirements of the Agreement, including those set forth in Schedule E (*Employee Transfer*) of the Agreement, relating to the work locations of Affected Employees who become Supplier Personnel. During Phase 2, Supplier intends to keep Health Net transferred employees at their current locations.

As per Health Net’s requirements, the Supplier Personnel performing the following Configuration Services Functions must be retained in Onshore locations:

- Performance Group
- AZ AHCCCS (includes all AZ Provider Data Management)
- Auditors interfacing with Compliance Group
- Legal and Compliance Liaison

Table 18

Service Function	US	India
<b>Configuration Management Team (VP)</b>	Rancho	
<b>Director – Configuration</b>	Rancho, Woodland Hills	
Benefit Configuration MHN	Rancho, Woodland Hills	Chennai, Bangalore
Benefit Configuration SOB SBC	Rancho, Woodland Hills	Chennai, Bangalore
Benefit Configuration Production	Rancho, Woodland Hills	Chennai, Bangalore
Pricing, Contract, DOFR, Fee Schedule,	Rancho,	

	Woodland Hills	
Vendor management, Projects, P&P, Training	Rancho, Woodland Hills	Chennai, Bangalore
<b>Director – Capitation/Cashiering</b>	Rancho, Woodland Hills	
Capitation PDM	Rancho, Woodland Hills	Chennai, Bangalore
Provider Data Management Medi-Cal	Rancho, Woodland Hills	Chennai, Bangalore
Provider Data Management Commercial, AZ AHCCCS, Auto Suffixing	Rancho, Woodland Hills	Chennai, Bangalore
PDM production	Rancho, Woodland Hills	Chennai, Bangalore
PDM – HOV Outsourced		Chennai

Teams across locations in US and India, will typically interact on an ongoing basis to enable effective planning, monitoring and tracking of Configuration processes, activities and requirements

1. Forecasting – identifying the number of transactions, volumes and activities that would need to be transacted and processed in coming months
2. Capacity Planning- verify staffing in place to manage the forecasted volumes
3. Monitor Productivity- An ongoing daily, weekly, monthly exercise to track, analyze and report on productivity trends
4. Reallocation based on productivity – Process wherein the transaction and volumes are shifted within teams and individuals to achieve desired productivity
5. Monitor Quality and Service Levels - An ongoing daily, weekly, monthly exercise to track, analyze and report on quality and Service Levels

The organization structure has been functionally designed to facilitate effective operations across locations.

This model will enable the workflow to be effective in real time, facilitating tactical monitoring.

(c) Operating Hours

Supplier will at minimum replicate the operating hours currently adhered to by Health Net’s Configuration organization as of the Effective Date, as set forth in the table below. Supplier acknowledges and agrees that performance of the Configuration Services will regularly require Supplier Personnel to perform additional/overtime work outside regular operating hours, and that such additional/overtime work is within the scope of the Configuration Services. Examples include the following areas and time periods:

- Pricing Fee Schedules - Oct and Nov
- Pricing Code Updates - Jan and Feb
- Pricing Contracts - Dec, Jan and Feb
- Provider Data Management - Nov, Dec and Jan
- Capitation - Nov, Dec, Jan and Feb
- Benefit Config - Health Net - Nov, Dec, Jan and Feb
- Benefit Config - MHN - Nov, Dec, Jan and Feb

Supplier will extend its hours of operations (for example, through overtime, weekend and holiday work) from time to time as needed to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement. Supplier’s work during such extended hours of operations is within the scope of the Configuration Services.

Within the regular Hours of Operations listed in Table 19 below, Supplier will have staff work according to defined shift schedules. However, Supplier will have the right to evaluate operational requirements and if feasible permit Supplier staff to work flexible shift start times subject to it not jeopardizing Supplier’s ability to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement.

**Table 19**

Subfunction	Hours of Operations
-------------	---------------------

**Configuration Management Team (VP)**

**Director – Configuration**

Benefit Configuration MHN	08:00 am to 17:00 pm
Benefit Configuration SOB SBC	08:00 am to 17:00 pm
Benefit Configuration Production	08:00 am to 17:00 pm

Pricing, Contract, DOFR, Fee Schedule,	08:00 am to 17:00 pm
Vendor management, Projects, P&P, Training	08:00 am to 17:00 pm

**Director – Capitation/Cashiering**

Capitation PDM	08:00 am to 17:00 pm
Provider Data Management Medi-Cal	08:00 am to 17:00 pm
Provider Data Management Commercial, AZ AHCCCS, Auto Sufficing	08:00 am to 17:00 pm
PDM production	08:00 am to 17:00 pm

(d) Operations

Supplier's approach to managing Configuration operations is as follows

- **Operational Focus:**

Team leaders and supervisors take part in team huddles, floor walks, daily performance reviews, daily Supplier Personnel communication plan and customer calibration sessions

- **Performance Management:**

Measure and manage Supplier Personnel performance through data and service dashboards

- **Span of Control:**

Supplier will provide for the following span of control (applicable during Phase 3 - i.e., after Transition has been completed):

- Operations Lead 1: ≤500
- Manager 1: ≤50
- Supervisor 1: ≤15
- Quality Auditor 1: ≤15
- Trainer 1: ≤20 (during training following completion of Transition).  
Proposed training ratio of 1: ≤20 is based on typical classroom training.  
However for specific processes this ratio could be lower.
- Team Leader 1: ≤15
- Six Sigma & Process Excellence 1: ≤150

- **Health Net Training Academy:**

Supplier will establish a dedicated Health Net Training academy to manage content and delivery of training programs. Supplier will establish a Knowledge Management Portal for management organization, easy access to Configuration management content, desktop procedure and P&Ps. Academy will work closely with the training team to facilitate necessary training during Phase 2 and Phase 3. Based on system updates and process updates, the training material will be constantly updated.

- **Team Huddle:**

Supplier's Team Leads will conduct daily team meetings for individual processes to share any critical updates, feedback and communication on learnings, and plan for the day.

- **Quality:**

Supplier will implement Health Net mandated specific quality/compliance programs in its delivery model for managing and achieving service levels. Supplier will analyse audit findings to determine root causes and will deploy corrective and preventive solutions to improve quality. In the daily team meetings, prevalent trends in errors, root causes and preventive actions will be discussed and implemented.

- **Continuous Improvement:**

Supplier will have a dedicated Process Excellence (PEX) team consisting of Six Sigma resources for Health Net Configuration functions to enhance performance and handoffs in Health Net Configuration's processes while improving standardization and the "To-Be operating model".

- **Rewards and Recognition**

Supplier will recognize the efforts of its best performers using stack ranking and will reward them through a structured reward and recognition program that aligns with quality and productivity objectives. The Rewards and Recognition will be applicable for both Onshore and Offshore teams. The specific criteria for the awards will be decided by the Operations Leads depending on the specific behavior and/or results to be achieved.

(e) **Resource Profile**

Supplier has a very well defined methodology for recruitment and selection of candidates. Supplier will work closely with Health Net to establish job descriptions at various levels and functions. Based on these job descriptions, Supplier will select candidates with the proper qualifications and experience in order to achieve a "best-fit" for Health Net.

Tables 20-28 below set forth indicative requirements for Offshore staffing and the minimum qualifications required to be selected for Configuration operations.

**Table 20**

<i>Qualification &amp; Experience</i>	<i>Selection Process</i>
<ul style="list-style-type: none"> <li>• Graduates with 1-2 years with Healthcare experience</li> <li>• Configurations and benefits coding skills</li> <li>• Good written and verbal communication skills</li> <li>• Knowledge of healthcare products and services</li> <li>• Familiar with Configurations processing applications</li> <li>• Critical Thinking Ability</li> <li>• Knowledge of Federal and State regulations</li> </ul>	<ul style="list-style-type: none"> <li>• Aptitude Test</li> <li>• HR Interview</li> <li>• Written test of Benefits Coding and Testing basics</li> <li>• Domain / Operations Interview</li> <li>• Technical interview on Configurations, Claims and Benefit Coding concepts</li> <li>• Educational and Professional Background Check</li> </ul>

(h) Third Party Tools and Services

Supplier will use the following third party tools and services in providing the Configuration Services.

**Table 31**

Third Party Tools/Services	Third Party Tools/Services
HOV	Outsourced Partner
Viant	Claims Re-pricing
Marketing Translation Services	Translation Services
Burgess	Claims Pricing Software

(i) Service Performance Management

Supplier will provide and implement the quality assurance procedures that are reasonably necessary for the services in scope and as per mutually agreed Service Levels, reporting format and frequency

**Approach**

- Initially during Transition (Phase 2), a higher frequency of audits will be performed, and any feedback on errors will be communicated to the processors on a daily basis.
- Once it has been confirmed through quality assurance that the processors are meeting the all requirements of the Agreement for their respective Functions, the audit frequency will be gradually reduced while keeping the quality levels constant.
- Post Transition (during Phase 3), a statistically valid sample size will be employed for quality assurance auditing.

**Tools**

- Quality analysis will be performed using tools such as the following:
  - Pareto Analysis
  - Fish Bone Diagram
  - Box Plot

**MEMBERSHIP AND CONFIGURATION ORGANIZATION CHART**

**EXHIBIT A-3****MEMBERSHIP AND CONFIGURATION ORGANIZATION CHART**

This Exhibit A-3 (*Membership and Configuration Organization Chart*) contains organization charts showing, at a specific recent point in time prior to the Effective Date, the positions (including both filled and currently open positions) that represent the Health Net organizational unit(s) whose Functions are being outsourced to Supplier under this Statement of Work. This document is included as part of this Statement of Work as a supplemental means of depicting the Functions that comprise the Membership and Configuration Services for which Supplier is assuming responsibility from Health Net under this Statement of Work. It is **not** included for the purpose of establishing any numerical FTE benchmark or baseline for use in determining Supplier's Charges for the Membership and Configuration Services. Any changes in the organization charts between the Agreement's Effective Date and the BPaaS Services Commencement Date shall not be interpreted to represent a change in the scope of the Membership and Configuration Services in the absence of Health Net specifically adding or removing Functions from Exhibit A (*Membership and Configuration Services*) of this Statement of Work.

**SERVICE LEVEL METRICS - MEMBERSHIP AND CONFIGURATION**

**1. DEFINITIONS**

The following capitalized terms will have the meanings given them below:

“*Completed*” means that Supplier has performed all applicable Services with respect to the item to which the Service Level pertains, and in compliance with applicable Health Net Policies and procedures.

**2. OPERATIONAL SERVICE LEVELS**

All Service Levels are subject to the Service Level Methodology set forth in Schedule B (*Service Levels*) and the applicable provisions of the Agreement and the Exhibits thereto.

**2.1 Membership Services (MS).**

**AMENDED AND RESTATED  
MASTER SERVICES AGREEMENT  
STATEMENT OF WORK #3 (CONTACT CENTER SERVICES)**

**AMENDED AND RESTATED  
MASTER SERVICES AGREEMENT**

**STATEMENT OF WORK #3 (CONTACT CENTER SERVICES)**

This Statement of Work #3 (*Contact Center Services*), dated November 21, 2014, but effective as of November 2, 2014 (“the **SOW Effective Date**”), is made by and between Health Net, Inc., a Delaware corporation with its principal place of business located at 21650 Oxnard Street, Woodland Hills, California 91367 (“**Health Net**”), and Cognizant Healthcare Services, LLC (“**Supplier**”), a Delaware corporation having an office at 500 Frank W. Burr Blvd., Teaneck, New Jersey 07666 (each, a “**Party**” and collectively, the “**Parties**”). This SOW #3 (*Contact Center Services*) is entered into and shall be governed by the terms of that certain Amended and Restated Master Services Agreement entered into between the Parties dated November 21, 2014 (the “**Agreement**”). This Statement of Work #3 (*Contact Center Services*) replaces and supersedes in all respects the Statement of Work #3 dated November 2, 2014.

**1. INTRODUCTION**

**1.1 Background & Purpose**

This SOW #3 (*Contact Center Services*) describes the Contact Center Services Supplier will provide for Health Net, as such Services are defined in Exhibit A (*Contact Center Services*) to this SOW #3 (*Contact Center Services*), and sets forth certain terms and conditions relating to them, including, among other things:

- (a) The scope of the Contact Center Services;
- (b) The Solution Supplier will use to perform and deliver them;
- (c) The Operational Service Levels Supplier will meet in providing them;
- (d) The Key Supplier Positions applicable to them; and
- (e) The Subcontractors (if any) approved by Health Net to provide certain of them.

**1.2 Structure**

This SOW #3 (*Contact Center Services*) is comprised of this cover document and the following Exhibits:

<b>Table 1: Exhibits to SOW #3 (<i>Contact Center Services</i>)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
1	Exhibit A ( <i>Services</i> )	Describes the scope of the Contact Center Services.

<b>Table 1: Exhibits to SOW #3 (Contact Center Services)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
2	Exhibit A-1 ( <i>Solution Description</i> )	Describes Supplier's solution for the provision of the Contact Center Services and includes as exhibits: <ul style="list-style-type: none"> <li>• Exhibit A-1-1 (<i>Approved Service Delivery Centers</i>)</li> <li>• Exhibit A-1-2 (<i>Service Delivery Configuration at the Completion of Phase 2</i>)</li> </ul>
3	Exhibit A-3 ( <i>Organizational Chart</i> )	Identifies the Health Net roles being transferred to Supplier or displaced by Supplier roles as a result of the execution of this SOW #3 ( <i>Contact Center Services</i> ).
4	Exhibit B-1 ( <i>Operational SLAs</i> )	Identifies the Operational Service Levels applicable to the Contact Center Services.
5	Exhibit D ( <i>Key Supplier Positions</i> )	Identifies the Key Supplier Positions applicable to the Contact Center Services.
6	Exhibit H ( <i>Subcontractors</i> )	Identifies the Subcontractors approved by Health Net to provide certain of the Contact Center Services.

## 2. DEFINITIONS

Capitalized terms used but not defined in this SOW #3 (*Contact Center Services*) shall have the meanings given them in the Agreement.

## 3. APPLICABILITY OF THE AGREEMENT

This SOW #3 (*Contact Center Services*) is hereby made a part of, and is subject to and governed by, the Agreement. This SOW #3 (*Contact Center Services*) is one of the Initial Statements of Work executed under the Agreement.

**IN WITNESS WHEREOF**, Health Net and Supplier have each caused this SOW #3 (*Contact Center Services*) to be signed and delivered by its duly authorized officer, all as of the SOW Effective Date set forth above.

**Health Net, Inc.**

**EXHIBIT A**  
**CONTACT CENTER SERVICES**

**1. INTRODUCTION**

**1.1 General**

- (a) In the most general terms, the “*Contact Center Services*” are the Functions associated with the intake, routing, and tracking of inquiries and requests received from Members, Providers, Brokers, Employer Groups and Sales through all Channels for all Regions and Lines of Business requested by Health Net.
- (b) The Contact Center Services are more fully described in this Exhibit A (*Contact Center Services*), and include the Cross Functional Services described in Section 3 of Schedule A (*Cross Functional Services*) and the Functions included as part of the Embedded Processes described in Section 4 of Schedule A (*Cross Functional Services*), each as they relate to the Functions included as part of the Contact Center Services. For clarity, this includes Supplier’s responsibility to manage all activities performed under Managed Third Party Contracts in accordance with Section 3.8 of Schedule A (*Cross Functional Services*). Supplier shall perform the Contact Center Services, except for those Functions that are expressly identified as retained Health Net responsibilities in Section 2 below. For purposes of clarity, the Party that is assigned responsibility for a Function as per the designations in Section 2 is also responsible for the Embedded Processes applicable to that Function.
- (c) In addition to those Functions specifically designated in this Statement of Work as Functions for which Supplier is responsible, the Contact Center Services to be performed by Supplier include all Functions performed by or associated with the roles in the Contact Center Organization Chart set forth in Exhibit A-3 (*Contact Center Organization Chart*), all of which are either being transferred to Supplier or displaced by Supplier roles as a result of the execution of this Statement of Work. Such Functions will be deemed to be part of the Contact Center Services to be performed by Supplier as if expressly set forth in this Statement of Work.
- (d) In addition to the retained Health Net responsibilities expressly identified in this Exhibit A (Contact Center Services), and in addition to and without limiting Health Net’s rights under the Terms and Conditions, Health Net reserves the right to perform quality reviews and audits of Supplier’s performance of the Contact Center Services when and to the extent it desires in its sole discretion. For the avoidance of doubt, Health Net is not obligated to perform any level of such quality reviews and activities, except to the extent required by applicable Law.
- (e) Supplier shall generate and provide to Health Net (i) each operational report generated prior to the BPaaS Services Commencement Date, unless and until Health Net confirms in writing that such operational report is no longer required, (ii) such other operational reports as Health Net may reasonably request from time to time, and (iii) such modifications to or replacements for the foregoing reports as may be necessary to reflect changes to and evolutions of the Contact Center Services during the term of this Statement of Work.

## 1.2 Definitions

- (a) Certain Terms
- (i) “**Communications**” means phone calls, chats, emails, texts, SMS, etc.
  - (ii) “**Contact Centers**” means department that manages all inbound and outbound communication channels for Health Net
  - (iii) “**EOC**” or “**Evidence of Code**” means a brief explanation within a Health Net processed claim as to why a certain action was taken on the claim.
  - (iv) “**OMNI Interaction**” means call inquiry type in the specific system of record that the Contact Centers utilizes (e.g., View Member Auth, View Provider Auth, Add Dependent, etc.).
  - (v) “**OMNI Service Object**” means documentation within the specific system of record that the Contact Centers utilizes of the interaction with the caller.
  - (vi) “**Overturn**” means an SHP Provider Appeal that has been reviewed and determined to be in favor of the provider.
  - (vii) “**Partial Overturn**” means an SHP Provider Appeal that involves multiple claim lines, and after review, at least one (but not all) of the claim lines has been determined to be in favor of the provider.
  - (viii) “**Provider Dispute**” or “**PDR**” or “**Provider Appeal**” is a written notice, other than an SHP Provider Appeal, from a provider to Health Net that: (a) challenges, appeals or requests reconsideration of a claim (including a bundled group of similar multiple claims) that has been denied, adjusted or contested; (b) challenges a request for reimbursement for an overpayment of a claim; or (c) seeks resolution of a billing determination or a contractual dispute. For clarity, in some of Health Net’s geographies the nomenclature used for such appeals are Provider Dispute or PDR, and in other geographies, the nomenclature used is Provider Appeal. References to the term “PDR” will refer collectively to Provider Disputes and Provider Appeals.
  - (ix) “**Provider Inquiry**” or “**PI**” means a request from a provider or from Health Net regarding the status or outcome of claims, claims-related transactions, PDRs, or any other correspondence received that Health Net designates as a Provider Inquiry.
  - (x) “**Service Form**” or “**SF**” means the electronic service form that results in a permanent record that is used to document contacts, both internal and external to Health Net.
  - (xi) “**SHP Determination**” means the final outcome and decision of an SHP Provider Appeal, after review of the SHP Provider Appeal, which informs the appealing provider if it has been determined to be in favor of the provider or in favor of the health plan.

- (xii) “***SHP Provider Appeal***” means a written notice to Health Net submitted by a provider challenging, appealing or requesting reconsideration of a claim that has been denied, adjusted or contested or seeking resolution of a billing determination or other contract dispute or disputing a request for reimbursement of an overpayment of a claim, in each case for a state health plan.
- (xiii) “***SHP Provider Appeals Services***” means processing provider appeals for the SHP line of business.
- (xiv) “***Upheld***” means an SHP Provider Appeal that has been reviewed and determined to be in favor of the Health Plan. References to Uphelds shall also include the “upheld” portion of Partial Overturns.
- (b) Capitalized terms not defined in this Exhibit A (*Contact Center Services*) shall have the meanings given them in Schedule W (*Glossary*) or elsewhere in this Agreement.

## 2. RESPONSIBLE PARTY

The following table sets forth the responsible party for the Contact Center Services.

### 3. CONTACT CENTER SERVICES, GENERALLY

Supplier will provide the Contact Center Services described in this Exhibit A (*Contact Center Services*). Supplier will document and track all Contact Center processes in the appropriate system of record and adhere to all Health Net, regulatory, compliance and business standards applicable to all Products, Regions and Line of Business. Except as specifically noted, the Services set forth in this Section 3 apply to all Lines of Business, Regions, and Geographies.

#### 3.1 Infrastructure Services

**“Infrastructure Services”** means providing and supporting all infrastructure, technology and software required to be able to operate the Contact Centers and support the Contact Center Services, and aligns with all PHI, HIPAA, PCI and Compliance requirements including:

- (a) Operating Contact Centers that are open and completely functional during all required open hours of operations;
- (b) Providing voicemail boxes for all LOBs that require after hours voice mail coverage.

#### 3.2 Communication Intake Services

**“Communication Intake Services”** are the Functions associated with performing intake for all service requests or inquiries from all available Channels, including the following activities:

- (a) Addressing all Member, Provider, Broker Sales and Employer Group inquiries including, benefits, claims, eligibility, material requests, multiple claims, check tracers, W9, evidence of check, out of pocket member requests, and network including simple and complex calls and Web inquiries;
- (b) If required, making outbound calls on behalf of Members to facilitate issue resolution giving a “concierge”-like experience;
- (c) Properly identifying all Member, Provider, Broker, or Employer Group Representative Communications;
- (d) Providing the opening greeting for all calls in the required threshold languages;
- (e) Every communication, as appropriate, will be HIPAA verified;
- (f) Documenting Communications in the appropriate system of record;

- (g) Based on the type of inquiry or request or other information captured on intake, identifying the appropriate destination (e.g., Membership, Claims, etc.) for service inquiries and requests including routing to an outside contact center (e.g., Nurse Line, Pharmacy Service Center, etc.);
- (h) Coordinating translation of Communications and correspondence;
- (i) Escalating inquiries based on type of issue presented or as required by Law or Health Net Policy;
- (j) Monitoring all open service objects (also known as intents or Service forms);
- (k) Escalating open service objects as needed for prompt resolution based upon the turnaround times in the policies and procedures; and
- (l) Accepting payments and protecting all payment transactions in compliance with current PCI security requirements.

### 3.3 Customer Service Representatives (“CSRs”) Services

“*Customer Service Representatives Services*” are the Functions associated with staffing the Contact Center with CSRs that satisfy the following requirements:

- (a) Every bilingual CSR will be language certified; (for Spanish) Language Services Company will be used for other languages beyond English and Spanish)
- (b) Every CSR will complete all Health Net required LMS regulatory training;
- (c) Every CSR will adhere to all compliance and regulatory requirements outlined in the training documents;
- (d) Every CSR (as well as other dedicated Supplier Personnel) providing Contact Center Services will undergo a background check and complete a pre-employment screening;
- (e) Every CSR will complete medical terminology training and all other training as required by Health Net; and
- (f) Sending out periodic Communications to the CSRs informing them of changes in plans or policies;
- (g) Ensuring that periodic Communications are read and understood, and archiving all Communications, with all distribution data.

### 3.4 Knowledge Base Services

“*Knowledge Base Services*” are the Functions associated with managing and maintaining the Knowledge Base (KB) system and content according to Health Net policies and procedures.

### 3.5 Contact Center Quality Assurance Services

“*Contact Center Quality Assurance Services*” are the Functions associated with recording and storing all calls for quality assurance purposes and providing Health Net with the ability to listen live to active calls and listening of recorded calls.

### 3.6 Workforce Management Services

“*Workforce Management Services*” are the Functions associated with providing all necessary resources to forecast call volumes and staff the Contact Center to meet all key metrics including scheduling all PTO, team meetings, coaching time, and similar workforce management responsibilities to fall within a shrinkage utilized in the staffing run to meet all key metrics.

### 3.7 Project Support Services

“*Project Support Services*” are the Functions associated with participating in departmental and enterprise-wide projects and provide project support to ensure deliverables are implemented on schedule and adhere to all project, business, compliance, and regulatory requirements.

### 3.8 Policies and Procedures (P&Ps), Workflows and Desktops Services

“*Policies and Procedures (P&Ps), Workflows and Desktops Services*” are the Functions associated with maintaining the accuracy and completeness of existing P&Ps, workflows and desktops for all in scope Contact Center Services, including the following activities:

- (a) Ensuring that documents align to any process changes that may occur;
- (b) Ensuring that related P&Ps, workflows, and desktops align to one another;
- (c) Creating new P&Ps, workflows, and desktops for every new process developed;
- (d) Ensure all P&Ps, workflows, and desktops are in accordance with regulatory, compliance and business requirements; and
- (e) Following the P&P review timelines requirements as specified by Health Net policies.

### 3.9 Administrative Payments Services

“*Administrative Payments Services*” are the Functions associated with performing administrative payments in accordance with the regulatory, SOX requirements and Health Net policies and procedures, including the following activities:

- (a) Monitoring and trending administrative payments to identify areas of opportunity; and
- (b) Coaching and retraining associates as necessary to drive down administrative payment volumes.

### 3.10 Escalation Support Services

“*Escalation Support Services*” are the Functions associated with establishing a process to support escalated Communications and issues including complex billing, eligibility, claim, authorization escalation requests, regulatory requests, etc., including the following activities:

- (a) As necessary, establishing a team of highly skilled associates to handle, track, and respond;
- (b) Ensure all escalations are resolved;
- (c) Documenting inquiries in the appropriate system of record; and
- (d) Performing trend issues, inquiries, etc.

### 3.11 Email Inquiries Services

*“Email Inquiries Services”* are the Functions associated with providing a designated team to respond and resolve email inquiries and issues within the prescribed and required timeframes.

### 3.12 Silverlink Calls Services

*“Silverlink Calls Services”* are the Functions associated with welcoming new members to Health Net and explaining the plan and offer assistance and educating new members on various processes.

### 3.13 Documentation and Tracking Services

*“Documentation and Tracking Services”* are the Functions associated with ensuring that all Communications are appropriately documented in the applicable systems of record.

### 3.14 Post Call Surveys

*“Post Call Surveys”* means conducting and managing post call surveys for members and providers on a quarterly basis or more frequently as dictated by business and/or stakeholder needs. Post Call Survey Services include analyzing and trending the data and providing the results to Health Net following each survey and upon request. The Post Call Survey shall include the following questions:

- (a) “How many times have you contacted Health Net regarding your request or issue?”
- (b) “Was your request or issue resolved with this call?” (yes, no, or too soon to tell)
- (c) “On a scale of 1 to 4, where 1 means “very low effort” and 4 means “very high effort”, how much effort did you personally have to put forth to handle your request or issue?”
- (d) “On a scale of 1 to 4, where 1 means “never” and 4 means “always”, rate how Health Net’s customer service staff over the last 6 months treated you with courtesy and respect?”
- (e) “On a scale of 1 to 4, where 1 means “never” and 4 means “always”, please rate how often Health Net’s customer service over the last 6 months, including this call, gave you the information or help you needed?”
- (f) “Are you satisfied with the service provided by the associate who assisted you today?”

On an annual basis, the Supplier shall evaluate the effectiveness of the Post Call Survey and align to industry best practices. Supplier shall submit any changes to Health Net for approval.

### 3.15 Audit Support Services

“*Audit Support Services*” means those Functions associated with providing support for Audits of the applicable line of business or a component of it, whether conducted by (or on behalf of) Health Net itself or a Health Net Regulator or customer (e.g., a large Employer Group), including the following:

- (a) Providing data and reports requested by the Auditors;
- (b) Providing subject matter expertise and otherwise supporting the conduct of the Audit as requested by the Auditors;
- (c) Assisting in the development and implementation of corrective action plans in response to Audit findings identifying weaknesses or deficiencies in the Audited Function; and
- (d) Supporting Health Net communications with Regulators.

### 3.16 Health Net Policy Support

“*Contact Center Policy Services*” means those Functions associated with the development and implementation of “*Health Net Contact Center Policies*,” which are the Health Net Policies as defined in Schedule P (*Health Net Policies*) governing or pertaining to the Contact Center Services, more specifically, the conduct of Health Net’s Contact Center Services.

Below are some examples of selected Contact Center Policy Development Services Functions, which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only:

- (a) Generally, provide operational subject matter expertise with respect to Health Net Contact Center Policies;
- (b) As requested, participate in meetings with Health Net and Supplier stakeholders having responsibility for the development, implementation, monitoring and enforcement of Health Net Contact Center Policies;
- (c) In response to changes in Laws, regulations, guidelines, policies, contracts or requests from Health Net’s Enterprise Process Change Organization (“*EPCO*”) or from Health Net’s or Supplier’s Compliance organization:
  - (i) Participate in Health Net EPCO Steering Committee meetings to review new legal and regulatory changes and assessment of business impact;
  - (ii) Participate in Health Net EPCO regulatory implementation Change Teams;
  - (iii) Project manage the operational implementation and/or affected system changes of legal and regulatory changes that affect Contact Center Services and participate in operational implementation and/or affected system changes of legal and regulatory changes that span multiple functions/departments, including tracking the progress of Deliverables

and communicating status to Health Net's EPCO and/or Compliance organization; and

- (iv) Based on the aforementioned meetings and guidance from the EPCO, prepare initial drafts of revised or new Health Net Contact Center Policies and submit them to the relevant Health Net and Supplier stakeholders for review, comment and approval;
- (d) Prepare updated versions of Health Net Contact Center Policies to address input provided by relevant Health Net and Supplier stakeholder groups;
- (e) Provide communications and training to Supplier personnel regarding revised and new Health Net Contact Center Policies and access to Health Net personnel to such communications and training; and
- (f) Implement Health Net-approved Health Net Contact Center Policies by Supplier Personnel involved in the performance of the Contact Center Services.

#### **4. MEDICARE CONTACT CENTERS**

##### **4.1 Medicare Resolution Team - Oral grievances –Resolution Team Services**

*“Oral Grievances – Resolution Team Services”* are the Functions associated with providing a designated team to manage, track, and monitor the oral grievance process, including the following activities:

- (a) Tracking and documenting oral grievances in the appropriate system of record;
- (b) Identifying trends, preventable issues and outlier opportunities and informing Health Net points of contacts of trends, including increases in oral grievances volumes;
- (c) Partnering with other departments as necessary to identify root cause of issues identified as a trend or as preventable and of an increased number of oral grievances;
- (d) Collaborating with Appeals & Grievances for oversight and reporting purposes; and
- (e) Implementing a monitoring and reconciliation process to ensure that oral grievances are worked timely, accurately, and completed in accordance with Health Net, regulatory, compliance and business standards.

##### **4.2 Contact Center, Escalation Support–Resolution Team Services**

*“Contact Center, Escalation Support – Resolution Team Services”* are the Functions associated with providing a designated team to support Contact Center with inbound escalated member inquiries, including the following activities:

- (a) Ensuring all escalations are resolved timely;
- (b) Documenting inquiries in the appropriate system of record;
- (c) Supporting and responding to both live and email escalated calls; and

- (d) Processing fulfillment request i.e. marketing materials, ANOC, EOC, etc.

#### **4.3 Sales Desk Support–Resolution Team Services**

“*Sales Desk Support – Resolution Team Services*” are the Functions associated with providing a designated team to support CA Sales team with inbound potential enrollee inquiries calls, including the following activities:

- (a) Supporting and responding to both live and email inquiries (e.g. PCP availability, plan/benefits questions, Formulary questions, etc.); and
- (b) Documenting inquiries in the appropriate system of record.

#### **4.4 TTY Inbound Call Support–Resolution Team Services**

“*TTY Inbound Call Support – Resolution Team Services*” are the Functions associated with providing a designated team to support TTY inbound customer support services during all hours of operations, including the following activities:

- (a) Performing back-office coordination and follow up necessary to fully respond to the members’ inbound inquiry for Health Net’s California, Arizona and Oregon members under its Medicare product line;
- (b) Documenting inquiries in the appropriate system of record;
- (c) TTY is one of the CMS Star key measures, closely monitoring performance and oversee daily results ensure accuracy of calls and call handling;
- (d) Producing a daily report that outline all TTY activity and performance results; and
- (e) Transitioning TTY Inbound Call Support to the State Relay (711) program. This transition should begin in Q1 of 2015, however Supplier will maintain the current TTY process as long as it is required.

#### **4.5 Prior Authorization Calls**

“*Prior Authorization Calls*” are the Functions associated with supporting customer support services for prior authorization calls during all hours of operations, including the following activities:

- (a) Authorization Status – CSI, OMNI or ABS
- (b) Checking CPT Codes to see if Authorization Required
- (c) Benefits
- (d) Verify COB and Eligibility
- (e) Claims

### **5. MENTAL HEALTH NETWORK (MHN) CONTACT CENTERS**

## 5.1 Outbound Call Support Services

“*Outbound Call Support Services*” are the Functions associated with providing a designated team to support all out bound calls/follow up for the MHN Contact Center, including the following activities:

- (a) Responding to inquiries, including: Provider appointment notification, Eligibility verification to members, Exempt Grievance follow up calls, Provider Availability Check for member referrals, and Language Interpretation appointments;
- (b) Documenting inquiries in the appropriate system of record; and
- (c) Producing reporting that includes outbound aged calls and back log.

## 5.2 Claims Box Support Services

“*Claims Box Support Services*” are the Functions associated with providing a designated team to support the review of claims submissions and upload to ACS for the MHN Contact Center, including the following activities:

- (a) Submitting BSRs as needed for new claims submissions;
- (b) Documenting inquiries in the appropriate system of record;
- (c) Contacting providers regarding any issues with claim forms; and
- (d) Producing reporting that includes claims inventory and back log.

## 5.3 Exempt and Formal Grievances Process Services

“*Exempt and Formal Grievances Process Services*” are the Functions associated with following the California Department of Managed Health Care requirements contained in Knox-Keene Health Care Service Plan Act of 1975, Section 1368(a)(4)(B) in regard to handling and resolution of exempt grievances received by the MHN Representatives, including the following activities:

- (a) Per 28 CCR 1300.68 (d)(8), responding to grievances as required;
- (b) Facilitating biweekly calibration sessions for customer service and clinical leadership including preparing the cases that are discussed;
- (c) Preparing monthly reports (exempt/formal grievances, number of grievances submitted by CSR, learning tools report);
- (d) Preparing quarterly report for Quality Committee;
- (e) Providing a designated team to manage, track, and monitor the exempt grievance process;
- (f) Tracking and documenting exempt grievances in the appropriate system of record;
- (g) Identifying trends, preventable issues and outlier opportunities and inform Health Net points of contacts of trends, including increases in oral grievances volumes;

- (h) Partnering with other departments as necessary to identify root cause of issues identified as a trend or as preventable and of an increased number of exempt grievances;
- (i) Collaborating with Appeals & Grievances for oversight and reporting purposes; and
- (j) Implementing a monitoring and reconciliation process to ensure that exempt grievances are worked timely, accurately, and completely in accordance with Health Net, regulatory, compliance and business standards.

## **6. STATE HEALTH PROGRAMS (SHP) CA, AZ AND CAL MEDI CONNECT (CMC) CONTACT CENTERS**

### **6.1 15 day Letter Services**

*“15 Day Letter Services”* are the Functions associated with processing Pay demand letters sent to Providers for unpaid claims to ensure appropriate assumptions of financial responsibilities, including the following activities:

- (a) Determining the appropriate financial responsibility;
- (b) Creating and sending the 15 day letter (pay/demand letter);
- (c) Performing appropriate follow-up actions as necessary; and
- (d) Documenting in the appropriate system of record.

### **6.2 Pre Natal Forms Services**

*“Pre Natal Forms Services”* are the Functions associated with routing pre natal forms to the care management team to ensure information is accurate and also to ensure PCP/PPG/OBGYN /hospital are linked within the same network including performing all necessary work to ensure form is complete, accurate, linked and triaged to the Care Management Team.

### **6.3 Transition of Care Services**

*“Transition of Care Services”* are the Functions associated with ensuring members’ care is not interrupted due to change in network, incomplete information, etc., including the following activities:

- (a) Validating request and add any missing information to form;
- (b) Linking PCP/ PPG change via appropriate system of record;
- (c) If unable to link the request, triaging to the utilization management for further handling; and
- (d) For TOC/COC for SPD members, triaging to the Public program coordinator for handling track and log accordingly.

#### 6.4 Disenrollment Services

*“Disenrollment Services”* are the Functions associated with processing requests made by the PNM (provider network mgmt.), compliance, med management, Utilization mgmt. or PPC to disenroll a Member based on criteria provided by the regulators, including the following activities:

- (a) Researching, retrieving and communicating with HCO (Health care options, a supplier contracted by the state); and
- (b) Tracking and logging accordingly.

#### 6.5 Noncompliant Members Services

*“Noncompliant Members Services”* are the Functions associated with processing Providers’ requests to remove members from their practice due to non-compliant behavior, including the following activities:

- (a) Researching, retrieving and communicating via letter with appropriate parties;
- (b) Assisting members in finding a new Provider; and
- (c) Coordinating TOC/COC if applicable.

#### 6.6 Reimbursements Services

*“Reimbursements Services”* are the Functions associated with processing reimbursement for members who may have paid for services and/or medicine by mistake, including the following activities:

- (a) After check is processed and sent, logging and filing the case; and
- (b) Tracking and logging accordingly.

#### 6.7 Mail Return Services

*“Mail Return Services”* are the Functions associated with sending all returned member mail to SHP customer service team, including the following activities:

- (a) Looking up Member information in system and flagging accordingly so more mail does not go out until a new address is added in the system;
- (b) For returned ID cards, process sending of a copy of the ID card to privacy office; and
- (c) Tracking and logging accordingly.

#### 6.8 PCP Transfers Requiring Overrides Services

*“PCP Transfers Requiring Overrides Services”* are the Functions associated with processing PCP/PPG transfers that require override access, including the following activities:

- (a) Researching the case to consider to the appropriate override access and reaching out to PNM (Provider Network Management) whenever needed;

- (b) Processing PCP transfer in the appropriate system of record (e.g. HNCS/ABS);
- (c) Responding back to requestor with outcome; and
- (d) Tracking and logging accordingly.

#### **6.9 Exempt Grievances Services**

*“Exempt Grievance Services”* are the Functions associated with an oral expression of dissatisfaction excluding coverage disputes that are resolved within 1 business day. Where the plan is unable to distinguish between a grievance and an inquiry, it shall be considered a grievance. Supplier will perform the following Exempt Grievances activities including:

- (a) Taking appropriate actions to resolve member grievances to the member’s satisfaction;
- (b) Documenting all actions taken in the appropriate system of record;
- (c) Resolving exempt grievances within the prescribed or required timeframes; and
- (d) Routing to Appeals and Grievances as appropriate in adherence to Health Net policies and procedures and compliance requirements; and
- (e) Collaborating with Appeals and Grievances for oversight and reporting purposes.

#### **6.10 Grievance and Appeals Intake Services**

*“Grievance and Appeals Intake Services”* are the Functions associated with processing all Provider Disputes for AHCCCS to remain compliant, including the following activities:

- (a) Processing all AHCCCS disputes;
- (b) Processing Medical Management Overturns; and
- (c) Processing all uphold letters.

#### **6.11 Inquiries**

*“Inquiries”* are the Functions associated with responding to all written inquiries within the prescribed or required timeframes in adherence to Health Net policies and procedures, regulatory and/or contractual requirements, including the following activities:

- (a) Member outreach;
- (b) Complete investigation;
- (c) Real time case file updates;
- (d) Sending required correspondence;
- (e) Address all resolve all actionable items; and
- (f) Case closure.

## 6.12 Member Warnings Services

“*Member Warnings Services*” are the Functions associated with completing all member warning cases within the prescribed or required timeframes in adherence to Health Net policies and procedures, regulatory and/or contractual requirements, including the following activities:

- (a) Member and/or Provider outreach;
- (b) Assign warning level;
- (c) Process based on assigned level;
- (d) Complete investigation;
- (e) Real time case file updates; and
- (f) Sending required correspondence.

## 7. COMMERCIAL CONTACT CENTERS

### 7.1 Exempt Grievances Services

“*Exempt Grievance Services*” are the Functions associated with processing oral expressions of dissatisfaction excluding coverage disputes that are resolved within 1 business day, including the following activities:

- (a) Where the plan is unable to distinguish between a grievance and an inquiry, designating it as a grievance;
- (b) Providing training to identify, document, track and trend provider grievances by grievance type;
- (c) Managing all Functions associated with Exempt Grievances as defined in Health Net policies and procedures; and
- (d) Collaborating with Appeals and Grievances for oversight and reporting purposes.

### 7.2 Letter Requests Services

“*Letter Requests Services*” are the Functions associated with creating and responding to correspondence requests based on the nature of the request including sending cease and desist letters to Providers, benefit and eligibility confirmation, requests for remittance advice and explanation of coverage.

### 7.3 Technical Support Services (TST)

“*Technical Support Services*” are the Functions associated with providing technical web support to internal and external Health Net customers, including the following activities:

- (a) Researching or validating the issue and creating a remedy or incident ticket;
- (b) Tracking through resolution and escalate, where appropriate; and

- (c) Once ITG resolves the incident ticket, testing, validating and confirming the issue is resolved and following up with the Health Net customer to confirm resolution.

#### **7.4 Account Services Unit Services**

*“Account Services Unit Services”* are the Functions associated with providing a designated team to support Broker, Employer and Sales inquiries received via multiple Channels including processing member requests for alternate mailing addresses that are not reflected in the appropriate system (e.g. ABS) due to sensitive information in accordance with Health Net policies and procedures.

#### **7.5 Centralized Unit Services**

*“Centralized Unit Services”* are the Functions associated with fulfilling Member translation requests for written vital documents and oral (face to face) interpreter services at Provider offices or facility locations in accordance with SB853 and Health Net policies and procedures.

#### **7.6 Provider Email Services**

*“Provider Email Services”* are the Functions associated with responding to all Provider email inquiries received including Provider demographic and fee schedule/rate requests, including but not limited to the following activities:

- (a) As appropriate, routing emails to the appropriate Tower for resolution; and
- (b) Tracking email inquiries to ensure turnaround times.

#### **7.7 Provider Registrations Services**

*“Provider Registrations Services”* are the Functions associated with responding to and as appropriate processing all Provider registration requests in accordance with Health Net policies and procedures

#### **7.8 Member Email Services**

*“Member Email Services”* are the Functions associated with responding to all Member emails in accordance with required turnaround times and routing to the appropriate Tower for resolution, including the following activities:

- (a) Tracking inquiries routed to ensure turnaround times are achieved; and
- (b) Following-up with Members regarding status and/or resolution.

#### **7.9 IFP Emails and Faxes Services**

*“IFP Emails and Faxes Services”* are the Functions associated with responding to ACA on/off exchange member requests within the required turnaround times and route to the appropriate Tower for resolution including tracking inquiries to ensure turnaround times are achieved.

#### 7.10 Medical Services Costs Estimates Services

“*Medical Services Cost Estimates Services*” are the Functions associated with responding to and processing Member requests for cost estimates of certain medical services as required by the regulators.

#### 7.11 Provider Transfer Unit

“*Provider Transfer Unit*” are the Functions associated with processing Commercial, Medicare and State Health Programs Provider transitions (aka rollouts) in accordance with Health Net and regulatory guidelines, including the following activities:

- (a) Processing large ‘mass’ provider rollouts; and
- (b) Processing individual requests for PCP/PPG over-rides in accordance with Health Net policies and procedures.

#### 7.12 Chat Services

“*Chat Services*” are the Functions associated with providing chat services to Members in accordance with Health Net policies and procedures.

#### 7.13 Real Time Adjustments (RTA) Services

“*Real Time Adjustments (RTA) Services*” are the Functions associated with providing Real Time Adjustment capabilities for specific member, provider requests in accordance with Health Net policies and procedures.

#### 7.14 Inquiries

“*Inquiries*” are the Functions associated with responding to all written inquiries within the prescribed or required timeframes in adherence to Health Net policies and procedures, regulatory and/or contractual requirements, including the following activities:

- (a) Member outreach;
- (b) Complete investigation;
- (c) Real time case file updates;
- (d) Sending required correspondence;
- (e) Address all resolve all actionable items; and
- (f) Case closure.

#### 7.15 Member Warnings Services

“*Member Warnings Services*” are the Functions associated with completing all member warning cases within the prescribed or required timeframes in adherence to Health Net policies and procedures, regulatory and/or contractual requirements, including the following activities:

- (a) Member and/or Provider outreach;
- (b) Assign warning level;
- (c) Process based on assigned level;
- (d) Complete investigation;
- (e) Real time case file updates; and
- (f) Sending required correspondence.

#### **7.16 Prior Authorization Calls**

***“Prior Authorization Calls”*** are the Functions associated with supporting customer support services for prior authorization calls during all hours of operations, including the following activities:

- (a) Authorization Status – CSI, OMNI or ABS
- (b) Checking CPT Codes to see if Authorization Required
- (c) Benefits
- (d) Verify COB and Eligibility
- (e) Claims

#### **7.17 DMHC After Hours Calls Intake**

***“DMHC After Hours Calls Intake”*** are the Functions associated with intake for DMHC after hours calls, including the following activities:

- (a) When a call is received from the DMHC and the DMHC representative states the call is in reference to complaint or grievance, the Representative shall obtain the caller’s name and phone number, as well as member information and any information on the grievance provided.
- (b) The Representative shall use all available resources (HNCS/QCARE, OMNI, CSI, ABS, and Assume Identity) to verify eligibility and benefits (SHP & Commercial members).
- (c) The Representative shall reference the after- hours Medical Director On-Call List for the appropriate Medical Director.
- (d) If the after-hours Medical Director does not answer, the Representative shall leave a message with a call back number.
- (e) The Representative shall wait twenty (20) minutes and then call the next Medical Director listed on the on-call list.
- (f) If the Medical Director provides an immediate response (approval or denial), the Representative shall call the DMHC back with determination. (DMHC must be notified

within one hour of initial call – if Medical Director is not reached within this timeframe, call the DMHC back and give default authorization.)

- (g) Documentation and tracking:
  - (i) Maces: The Representative shall document in Maces under the Information Tab in the Hot Topic field “DMHC”.
  - (ii) Q-care
- (h) The Representative shall send an e-mail to Health Net Legal Department within an hour with a copy to their manager and supervisor. (is there a template)
- (i) Reporting:
  - (i) Monthly reports must be sent to the Health Net Compliance Department and cc the affected department Director.

**EXHIBIT A-1**  
**CONTACT CENTER SERVICES**  
**SOLUTION DESCRIPTION**

## EXHIBIT A-1

### CONTACT CENTER SERVICES SOLUTION DESCRIPTION

#### 1. INTRODUCTION

This document is the Solution Description for Statement of Work #3 - Contact Center Services (this “*Statement of Work*”). Exhibit A (*Contact Center Services*) describes **which** functions Supplier is responsible for performing under this Statement of Work, This Exhibit A-1 describes the **means by which** and the **manner in which** Supplier will perform those Functions. This document provides an overview of Supplier’s service delivery architecture – displaying the geographic configuration and delivery architecture of Supplier’s Solution (as it will exist at the completion of Phase 2 of the Transition as described in the Transition Description document), identifying all Service Delivery Centers of Supplier (and its Affiliates and other Subcontractors) that will be utilized in performing and delivering the Services (including the back-up and failover locations for each) and how they will be interconnected to each other and to Health Net’s IT Environment. It then provides additional descriptive information about each of the principal components of Supplier’s Solution.

This Exhibit A-1 includes the following attachments, which are incorporated as part of this Exhibit A-1:

- (a) Exhibit A-1.1 (*Approved Service Delivery Centers*)
- (b) Exhibit A-1.2 (*Service Delivery Configuration at the Completion of Phase 2 of the Transition*)

#### 2. DEFINITIONS AND INTERPRETATION

##### 2.1 Defined Terms

The following terms, when used in this Statement of Work, will have the meanings given them below unless otherwise specified or required by the context in which the term is used. Any capitalized term used but not defined in this Exhibit A-1 will have the meaning indicated in Schedule W (*MSA Glossary*),.

Defined Term	Meaning
“ <i>Solution</i> ”	A collective term referring to the means by which and manner in which Supplier will perform and deliver the Services under this Statement of Work – <i>i.e.</i> , Supplier’s Service Delivery Centers and Service Delivery Environment, including the platforms, systems and processes used to perform and deliver the Services.

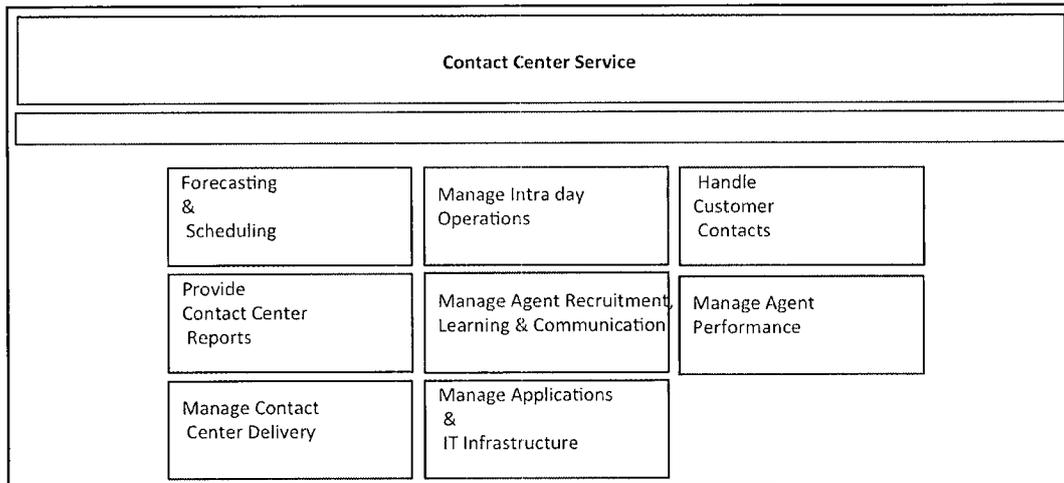

#### 3. SOLUTION OVERVIEW

##### 3.1 Solution Summary

Supplier as the prime contractor has chosen Teleperformance as the initial teaming partner to perform the Contact Center Services and reserves the right to migrate part of all of the Contact Cen-

ter Services as necessary to one or more alternative Approved Subcontractors. The Contact Center Solution will meet the following objectives:

- (a) Deliver cost savings as per the business case model
- (b) Provide consistent high quality customer service experience through robust operations rigor and best practices
- (c) Deliver enhanced technology solutions leveraging a best of breed portfolio of hosted multi-channel capabilities

(d) **Supplier’s Solution is built on the following foundational aspects:**

(i) **Delivery Solution**

- (A) **Continuity of service** – Supplier’s primary focus will be to facilitate a seamless continuity of Services. For all call center operational people, process, and expertise, the priority will be to achieve agreed upon level of service delivery and quality. Contact Center quality auditors shall monitor a minimum of ten (10) (no greater than fifty percent (50%) performed by Supervisor) calls for every Health Net CSR on the program (including bilingual) per month using a QA form provided by Health Net. Once an agent has sustained QA SLA levels, the average number of audits per FTE will remain at ten (10) per month but agents with lower quality scores may receive more audits and the agent meeting quality may receive less audits averaging the contract terms of ten (10)/agent/month.
- (B) **Associate to support ratio** – To enable focused monitoring and feedback, Teleperformance’s delivery model considers an extremely healthy Associate to Supervisor and QA ratio, which may vary by LOB within the scope. The agent to supervisor ratio will be 1:18 and the QA ratio to agent will be 1:60.

(C) **Continuous Improvement** – This Solution incorporates a combination of enterprise resources and a dedicated organization including but not limited to project management, client services and operations management from early on in the engagement to identify quick and sustainable improvement opportunities, including resources specifically related to long-term program governance.

(ii) **Health Net Training**

Teleperformance will build a dedicated Training function tasked with the mandate of building adult learning foundation from which to support the Health Net operational enterprise, including but not limited to updated training materials, curriculum, and process documentation along with facilitation leadership that will provide training to new hire associates and up-skill training to experienced resources. The solution for Training Services set forth in Schedule A-1 (Cross-functional Services Solution) documents how curriculum changes will be communicated to Health Net and approved for the Contact Center.

(iii) **Global Healthcare Delivery Expertise & Offshore Solution Engineering Protocols Hedge Risk**

Teleperformance will provide strategic guidance and in-market best practices from past delivery experience both near shore and offshore with major U.S. Health Plans. Where appropriate, Teleperformance will collaborate with Health Net to clearly define any specific process changes, hand-offs and inter dependencies as it relates to the rest of the Services.

(iv) **Multi-Site, Multi-Geo Global Solution; Teleperformance – Health Net Operational Care Centers**

Teleperformance will use a multi-site, multi-geo operational solution including but not limited to leveraging domestic US, near shore Mexico, and offshore Philippines locations as part of an integrated, comprehensive strategy that balances execution quality, labor arbitrage, disaster recovery/redundancy, and access to the largest global footprint of any contact center supplier that allows Health Net to leverage the strengths of each region and cost efficiency to its competitive advantage. The multi-location structure provides geographic dispersion and the foundation for sound Business Continuity Planning (BCP). Teleperformance's US, Mexico and Philippines sites have deep contact center experience for the Healthcare industry.

(A) Near shore and Offshore Teleperformance Service Delivery Center(s) will be utilized to handle transaction contact center work to leverage Teleperformance's scale, expertise and lower costs.

(B) Onshore US Service Delivery Center(s) that leverage Teleperformance employees and – as applicable - “re-badged” Health Net personnel to manage complex processes requirements and those processes required to remain domestic for regulatory reasons.

(v) **Seamless and Transparent Integration with Call Center / Multi-Channel Innovations and Technologies**

Supplier will provide ACD, IVR, and other related contact center technology infrastructure supporting the project engagement. This Solution includes multiple sites in multiple geographies inclusive of all in scope operations; U.S. domestic, near shore (ie., Mexico), offshore (ie., Philippines) with Supplier provided Technology solutions. The intent is to have a single technology solution for Health Net that minimizes complexity and cost redundancy.

(e) Risk Remediation Plan

Tower	Function	Risk	Phase 1 (ends 2/28/15)	Phase 2 (3/1/15- 2/28/17)	Phase 3 (3/1/17- 2/28/22)	Mitigation	Responsibility
CCC	Recruitment	Inadequate quality candidates applications	X	X	X	Ensure 4 weeks lead time before new hire class to attract qualified candidates. Choose sites that can attract healthcare talent in waves of 25/30 per hiring class. Add quick quit attrition new hires to meet the "required FTE". If less than 4 weeks, increase advertising, referral bonuses and add OT and hours to current staff to cover if service levels are at risk.	TP
CCC	Recruitment	"High" attrition and inability to meet nesting ramp and are terminated for performance	X	X	X	Regular attrition classes are added into the schedule based on prior history. Adjustment to hiring profiles and additional screening processes are added.	
CCC	Training	Log In and access to applications not available for training	X	X	X	Start training without log ins. Escalate for log ins to IT, Shadow agents on the floor to see how the systems work until log ins are received	CTS
CCC	Training	Train the trainer delays in getting visa or having volunteers to travel to near and off shore sites	X	X	X	Use webex and home agent technology for remote train the trainer technology access	TP
CCC	Training	SMEs not available for on site or volumes are too high to take off the phones	X	X	X	Use home agent technology for remote (chat) capability with tenured agents to support new hires in nesting. If volumes are high maintain SMEs and add OT or adjust hours of current agents to take on additional volumes	TP
CCC	Training	Changes are required to curriculum (real time)	X	X	X	Using TP technology (CCMS) agents are notified of alerts and given time to read and digital signature documents completion	TP
CCC	Forecast	Volumes are higher or lower than plan	X	X	X	Within forecasting window, schedulers adjust internal rescheduling up or down depending on the requirements. Change skills adding more agents where needed. Contact agents to arrive earlier, work OT or eliminate breaks and lunch. Stop all non-essential training and meetings.	TP
CCC	Forecast	Volumes are higher due to increased membership or lower due to less membership	X	X	X	Adjust the rolling forecast to add or remove agents from the plan. Reduce hiring and training cycles to accommodate the need for more agents.	CTS/TP
CCC	Scheduling	AHT, adherence and attendance put schedule to meet volumes at risk	X	X	X	Scheduling works with operations management to coach on AHT (call control), adherence to schedule and attendance. Use PIP (performance improvement process) and ask good standing agents to work OT, add hours... until back service levels are met	TP
CCC	Quality	Quality, CSAT, FCR SLAs are below plan	X	X	X	Understanding of call driver data, outliers are provided additional coaching to meet SLAs, PIP process used, remediation training added where needed	TP
CCC	Quality	Clarity of knowledge base and other application data is causing increased AHT and lower quality scores	X	X	X	Work with Service Integration tower to create a change management and approval process to improve data in the knowledge base and applications	CTS/TP
CCC	SLAs	SLAs are not being met as each LOB is transitioned	X	X	X	Review current hiring and training to ensure accuracy. Adjust as needed. Add more SMEs to bring new agents through learning curve. Delay additional waves of classes until LOBs are stabilized	TP
CCC	Technology	OMNI and Aspect delays ability to condense training and skills	X	X	X	Build FTE forecasting model using current "Allocation" model	CTS/TP
CCC	Technology	System slowness or technology issues cause agents inability to answer phones and provide answers	X	X	X	Create callback process with members, escalate outage or slowness to IT Tower, add OT to accommodate returning volumes	CTS/TP
CCC	BCP/DR	A site goes down due to BCP/DR	X	X	X	Use switch to reroute calls to another locations, do callbacks, add OT	CTS/TP
CCC	Escalations	Too many call transfers and escalations	X	X	X	Track types of transfers and escalation. Provide additional coaching and training. Retain more rebadged TIN agents as SMEs and to handle escalations	TP
CCC	Communication	Issues impacted customers, operations, SLAs	X	X	X	If issues occur an immediate communications and recovery plan will be communicated	TP/CTS

3.2 High-level Service Delivery Architecture and Configuration

This section provides an overview of the geographical and physical configuration of Supplier's Solution for the Services under this Statement of Work. Exhibit A-1.1 (*Service Delivery Centers*) provides additional information about each of the Service Delivery Centers Supplier will use to provide the Services under this Statement of Work, including both the primary Service Delivery Centers and the back-up / failover locations that Supplier will activate and use to provide the Services if operations at any primary Service Delivery Center are disrupted or disabled.

## P5 Health Net Contact Center Locations On, Near and Off Shore FTE

### 150+ FTE

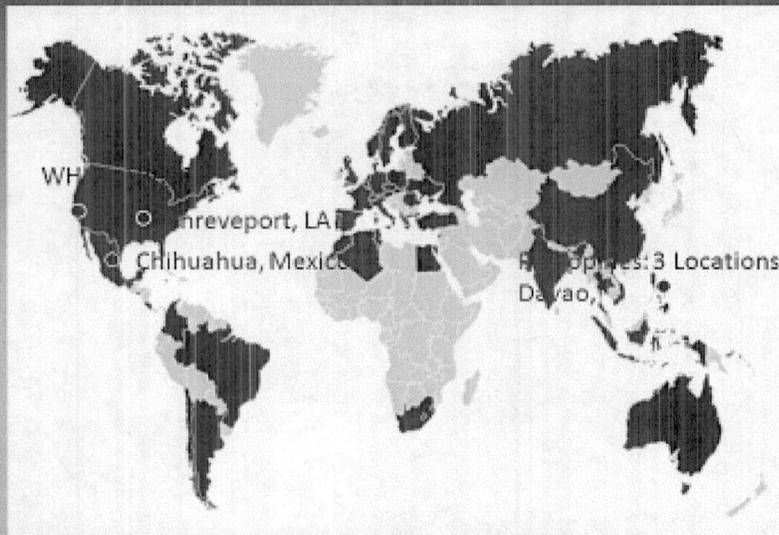

- Commercial P5, Member
- AZ Medicaid, Member and Provider (English and Spanish)
- California (Woodland Hills (WH) and Rancho Cordova (RC) FTE TBD
- Leadership, Ancillary and Support Staff

### NEAR SHORE: Chihuahua, Mexico 100-200+ FTE

- Spanish (bilingual) for (Commercial, Medicare, Medicaid, Duals and MHN Members)

### OFF SHORE: Philippines 900-1400+ (3-4 Locations)

- English for Commercial, Medicare, Medicaid, Duals, MHN Member, Correspondence Member and Provider

## Location Advantages

Near Shore Location for P5 Health Net

**Near Shore Mexico Strategy:**

- Public transportation, metro and bus, only meters away
- Close to important universities
- Training capacity for 1101+ employees with 976 work stations
- Common time zone as USA and accessible travel

**On Shore USA Strategy:**

- Low cost USA location
- Close to universities
- Existing healthcare experience
- Potential Home Agent Option
- Knowledge base and interface with other Health Net functions and Cognizant towers in CA

**Off Shore Philippines Strategy :**

- International ICT Awards 2011 BPO Employer of the Year, 2012 and 2013 BPO Employer of the Year and Company of the Year Finalist
- Access to multiple universities
- Walking distance to public transportation
- Site locations above flood zones for minimal BCP impact
- 37,000 FTE in 17 sites
- Established in 1996

(a) **Location Strategy**

The location selection criteria that Teleperformance and Supplier have applied to this Solution includes:

- (i) Business requirements – locations that promote compliance with all service objectives and contractual requirements
- (ii) Availability of talent pool – an ample labor supply which provides staffing for immediate and long term needs
- (iii) Skill requirements – a labor pool which both meets transition requirements and can be developed throughout the lifecycle of the program
- (iv) Regulatory limitations – the ability to meet all regulatory requirements as required for Health Net
- (v) Scale of operations – locations which provide sufficient room for the program to grow for both seasonality needs, membership growth and call type diversification
- (vi) Business continuity – locations linked together technologically and which can share common call types if needed to maintain continuity

- (vii) Cost of operations – a three-shore strategy which meets the financial design of the relationship

Consistent with Supplier and Teleperformance’s global operating model, significant technology capability and defined business processes, teams working across multiple locations will operate as a single cohesive unit delivering seamless Contact Center Services in accordance with this Agreement.

### 3.3 Service Delivery Model

This section provides an overview of the commercial delivery model Supplier will utilize in providing the Services under this Statement of Work. Exhibit H (*Contact Center Subcontractors*) provides additional information about each of the Supplier Affiliates and other Subcontractors who will be involved in performing certain aspects of the Services to be provided under this Statement of Work.

#### (a) Business-Process-as-a-Service

The Services to be provided under this Statement of Work will be provided under a ‘Business-Process-as-a-Service’ delivery model - i.e., as a fully integrated vertical service in which Supplier is responsible for providing all the associated resource / service layers (facilities, IT infrastructure, tools, application software, labor, infrastructure and applications operations and support, and performance of the associated business processes); and Health Net is purchasing ‘business outcomes’ (e.g., fully processed claims).

#### (b) Operations Rigor

Supplier’s approach is based on best practices that include having the team leads and supervisors available on the production floor to expedite feedback and continuous improvement with the following approach:

##### (i) Core Focus

On team huddles, floor walks, daily performance reviews, daily associate communication plan and customer calibration sessions. Adequate staffing levels will be maintained to accommodate appropriate shrinkages levels needed to account for team huddles, associate training, etc.

##### (ii) Metrics

Set daily targets to challenge team daily and publish progress. Communicate daily productivity and quality updates.

##### (iii) Innovation

Supplier and Teleperformance will create an environment dedicated to fostering associated ideas to improve the process and technology capabilities. This environment will focus on finding synergies and specific opportunities with IT teams and other towers to improve the end-to-end contact center process. Best practice sharing to improve team performance and standardization.

**(c) Span of Control**

Teleperformance will ensure that every FTE will get adequate supervision and support to achieve agreed quality and productivity. We will have one (1) Quality Auditor for fifty (50) FTE and one (1) Supervisor for every eighteen (18) FTEs. Training sessions will be facilitated in batches of FTEs with 1:28 FTE in classroom. Escalation/SME ratios are required until agents are meeting performance requirements and for escalated issue support.

- (i) Commercial and SHP - 8% of FTE
- (ii) Medicare – 10% of FTE
- (iii) MHN – 6% of FTE

Work Force Analyst ratios will be 1:100 and Schedulers at 1:100. This team will provide day to day operational functions such as schedule adherence, agent schedules, adjusting staff based on volumes, scheduling inbound, outbound, training, PTO and other scheduling functions working closely with the operations and client services teams. Teleperformance will receive detailed forecasts by LOB at the interval level from Supplier planning.

**(d) Typical span of control**

- (i) Manager 1:120
- (ii) Supervisor 1:18
- (iii) Quality Auditor 1:50
- (iv) Trainer 1:28 Classroom; 1:100 Otherwise

**(e) Team Huddle**

The team leads for individual processes will conduct daily meeting with the associates at the beginning of their day to share any critical update, communication or plan for the day. The huddles set stage for what needs to be accomplished. Team huddles also form a platform for associates to share learning and any unique finding from their previous day's work and discussed with management which if found useful to the team will be implemented.

**(f) Quality**

Teleperformance brings best practices and Industry specific quality / compliance programs in its delivery model to for continuous improvement in service levels. The approach to ensuring quality is focused on three critical components:

- (i) Considering the importance of deep institutional knowledge, Process Quality through globally acknowledged proprietary processes and technologies at Teleperformance, such as CCMS and TOPS.

- (ii) Transaction Quality by using root cause methodology to ensure compliance to transaction level quality using DMAIC (Define, Measure, Analyze, Improve and Control) approach and statistical and non-statistical tools.
- (iii) Quality improvement is measured by the quality audit document criteria of the Service Levels. Working with Health Net other improvements can be measured by CAHPS, STAR and improved retention. Details will be developed annually and goals set jointly.
- (iv) An average of ten (10) audits/FTE/month will be completed. No more than 50% of audits will be performed by supervisors. If an agent is consistently meeting SLA quality metrics, less audits may be performed on those agents and additional audits may be performed on agents not meeting quality Service Levels. Focus on outliers will improve overall Service Level quality metrics.

(g) **Continuous Improvement**

The Supplier SOW lead will oversee all continuous improvement activities associated directly with the Contact Center tower as well as participate in ongoing programs with other towers intended to improve the end-to-end experience for each member. Supplier will oversee and drive continuous improvement activities channeling resources from both Teleperformance and Supplier to drive measurable improvements in services and technology.

The core focus of the Continuous Improvement Program will be to manage all Contact Center initiatives utilizing a combined Six-Sigma/Lean methodology that works in conjunction with the Teleperformance resources to prioritize and manage all continuous improvement activities. Weekly, monthly and quarterly reporting and reviews will occur to ensure improvements are reported regularly and audited for additional improvements.

Potentially using the quality and call recording tool or analytics tool, top call drivers can be identified and analyzed from calls. This information is put into categories impacts the health plan can make, impacts the agents can make improving “soft skills” and third improvement management can make in training and coaching. Examples the health plan can improve are improving provider demographics on addresses, physicians taking new members, less auto assignments of PCPs and par/nonpar. Correct information in the applications will reduce incoming calls and therefore improve contract rate. Soft skills are key to improving CSAT scores and potentially reducing callbacks. Agents are required to clearly and accurately articulate membership benefits. But the way they are communicated can be equally important. Improving training and coaching methods will improve scores and even increase net promoter score (NPS) or recommending the plan to other prospects. The last is identifying unclear scripting or information in the knowledge base. Improving this data will provide accurate information, reducing callbacks due to incorrect information.

(h) **Teleperformance Training**

Teleperformance will establish a training academy for management of training content and delivery of training programs. Teleperformance training will work closely with the Supplier Training Services personnel and facilitate necessary training. Training and curriculum changes will be approved by Health Net. Based on system and process updates

training material will be regularly updated. Refresher and leadership trainings will be scheduled based on the training needs and requirements derived from the following two factors:

- (i) QA services audits and score boards – a training need analysis will be done on the basis of performance and quality audits, and training will be delivered for areas where the associate lags or needs additional coaching.

Process updates and assessments – all associates will be briefed and trained on change in P&P and Desktop procedures.

(i) **Training Requirements**

Due to current application requirements Commercial, Medicare, Medicaid and MHN are four unique training and up-training paths. Training includes in class and nesting or on the job training on the production floor with monitoring and assistance by SME and supervisors. Supplier will adhere to the following training requirements, as such requirements may be revised during the Term:

- (i) Commercial Training All LOB's - 5 weeks - +2 weeks nesting
- (ii) ACA Payment Only All LOB's - 1 week
- (iii) Broker and Correspondence 1-1.5 weeks up training from commercial training
- (iv) Medicare Training CA MAPD - 4 weeks -+ 2 weeks nesting
- (v) Medicare OR MAPD Up-Train from CA MAPD - +4 days
- (vi) Medicare AZ MAPD Up-Train from CA MAPD - +4 days
- (vii) Medical / SHP Training - CA - 7-8 weeks - +2 weeks nesting
- (viii) Medical / SHP Training - AZ Up-Training from CA Medi-Cal -+ 2 weeks.
- (ix) Duals Training Up-Training from CA Medi-Cal - +4 weeks
- (x) MHN Training - 6 weeks - +2 weeks nesting

(j) **Language Requirements**

Effective as of the BPaaS Services Commencement Date, Supplier will be responsible for all language assistance charges incurred to support the Services. By end of Phase 2 Teleperformance and Supplier will support at least 95% of all Spanish calls using Spanish speaking Supplier Personnel located in Mexico, and using Language Line for all other languages. As described in the Transition Manual all Spanish LOB's will be transitioning to Mexico.

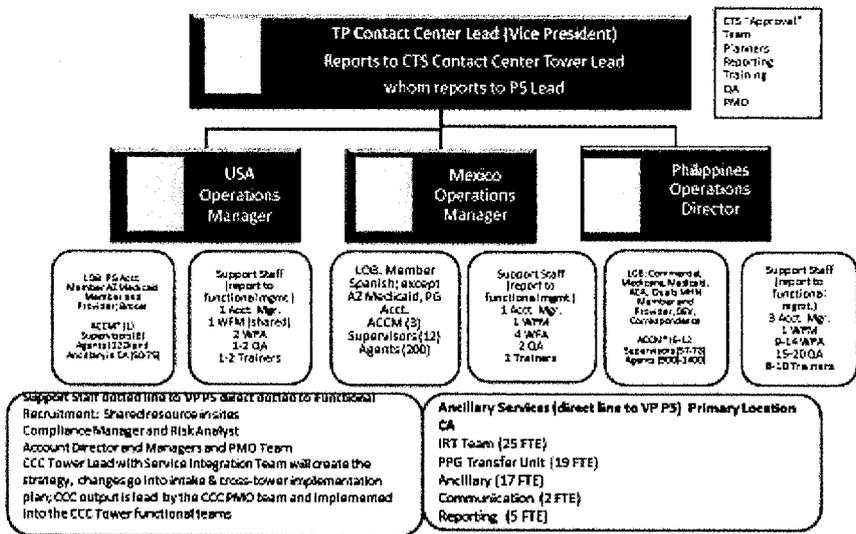

(k) **Organizational Structure**

Supplier in conjunction with Teleperformance will deploy a highly experienced delivery team for this engagement with Health Net. Health Net engagement will be anchored by

professionals with years of delivery and domain experience. This team will be augmented by experts spanning all facets of service delivery, technology, operations, domain and human resources. The RASCI document defines responsibilities and accountabilities. During the first sixty (60) days of transition, final determination of rebadged Health Net FTE will be defined to the correct organization.

- (i) Supplier and Teleperformance will deploy a function based organization structure rather than location based, ensuring clearly defined functional responsibility and consistency in service quality across delivery locations
- (ii) Supplier and Teleperformance will leverage the depth of knowledge, experience and legacy of Health Net culture acquired through re-badging and retention of key leaders from Health Net in key leadership roles
- (iii) Supplier and Teleperformance’s team performing the Contact Center Services includes global functional leaders, mostly from re-badged Health Net organization, to own service delivery across global locations, with location specific leaders at each of the delivery locations, directly reporting to them.
- (iv) Supplier and Teleperformance’s team performing the Contact Center Services includes local leadership talent that provides the local administrative and people connect, apart from their functional and domain capabilities

**Contact Center Tower Organization (Phase 3 3/1/17-2/28/22)**

Proprietary & Confidential - Not For Distribution

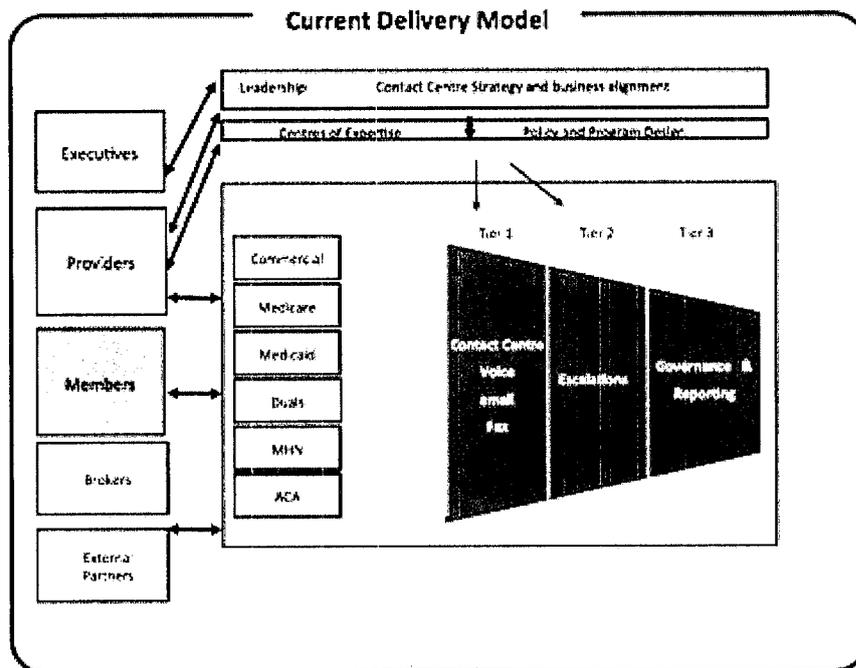

(I) **Multi-Site, Multi-Geo Global Solution; Teleperformance – Health Net Operational Care Centers**

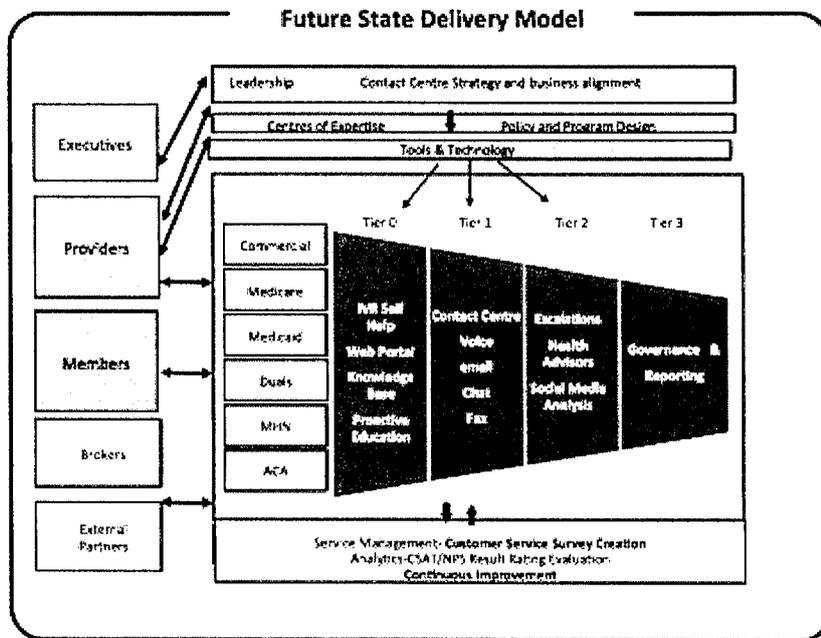

The Contact Center will have a multi-site, multi-geo operational solution including but not limited to leveraging domestic US, near shore Mexico, and offshore Philippines locations as part of an integrated, comprehensive strategy that balances execution quality, la-

bor arbitrage. The multi-location structure provides both geographic dispersion with its inherent foundation for sound Business Continuity Planning (BCP), but also allows us to align similar work with required agent skills in consolidated locations:

- (i) Offshore Service Delivery (Philippines) Center(s) – leveraging lower cost Teleperformance employees to provide cross skilled services and to manage complex processes across LOBs.
- (ii) Near Shore (Mexico or LATAM) Teleperformance Service Delivery Center(s) - to handle transaction contact center work to leverage our lower cost capabilities inherent to a non-US staffing footprint, primarily devoted to Spanish Language Contacts.
- (iii) Onshore US Service Delivery Center(s) – leveraging Teleperformance employees required by contact– and “re-badged” Health Net personnel to manage complex processes requirements and those processes required to remain domestic for regulatory reasons.

(m) **Seamless and Transparent Integration with Call Center / Multi-Channel Innovations and Leveraged Technology Integration**

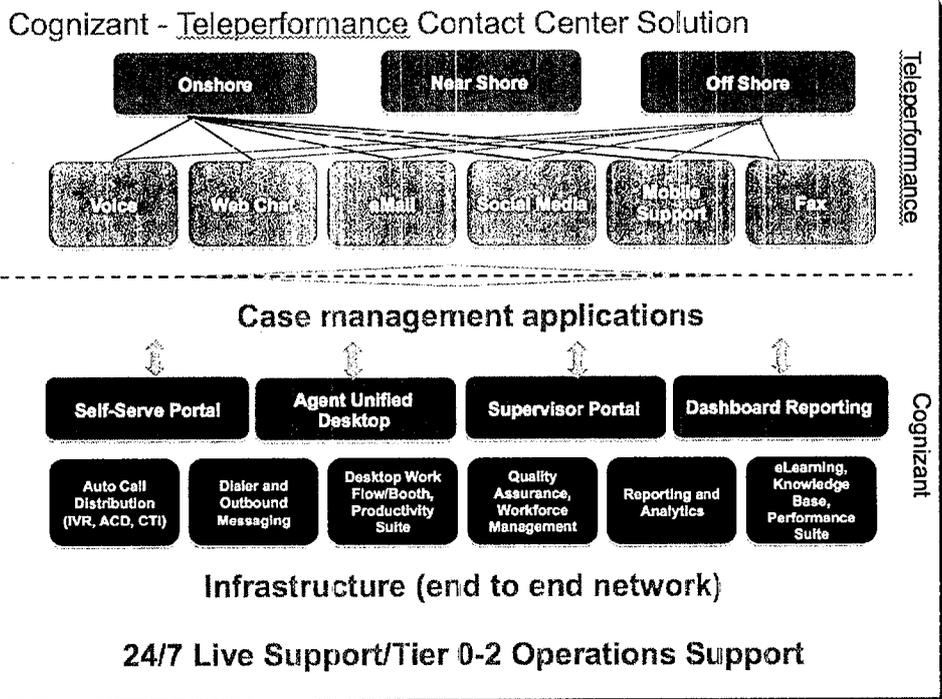

(n) **Transition Technology**

The Contact Center will already be providing live agent services to Health Net from three service locations; domestic services located in Shreveport, LA; Offshore services located in Philippines; and Spanish Services located in Chihuahua, MX. Voice and data connectivity and technology services will already be in place to enable this Service Teleperformance envisages little prior Technology provisioning past this stage. All technology transition activities will be related to full integration and provisioning of Health Net/Supplier provided technology capabilities, with Teleperformance day-to-day operational management solutions. See the Transition Manual for further integration details.

(o) **Integrated Technology Solution**

Supplier will deliver a unified technology platform via the Information Technology Services that will act as the foundation for integrated systems including MC Platform assets, Pega, ACD/IVR and future direction for multi-channel expansion.

Supplier will supply C-SAT survey capability in order for Teleperformance to provide capability and reporting to meet FCR and customer satisfaction surveys. In addition to industry standard C-SAT questions, Supplier’s CSAT survey will specifically address the member’s experience and interaction with Contact Center associates.

Supplier and Teleperformance will work in parallel to deliver an operating model that capitalizes on this unified Technology Platform and associated continuous improvement plan that will fully prioritize and leverage the full suite of the technologies into the combined operating model including Aspect SIP enabled VOIP ACD/IVR and corresponding technology capabilities.

Supplier will own the end-to end network via the infrastructure tower and deliver a unified technology approach combining self service, unified agent desktop, supervisor portals and dashboard reporting across the Contact Center.

Supplier will work directly with Teleperformance as new technology solutions are enabled to rollout these across various operational delivery models. Supplier intends to work directly with Health Net to determine and prioritize capabilities associated with case management applications and unified ACD/IVR and mutually determine how to prioritize and rollout capabilities and the impact on the existing delivery model.

(p) **Future State Technology Tier Solution**

Subject to approval by the Governance Body, the proposed customer support and contact center future state solution provides delivery of member services through multi-channel hub. This hub includes IVR, member self-service portal, email, Chat, Fax and on the phone customer service agents. Elements of this solution include:

- (i) Receipt and resolution of member inquiries, including those to initiate and process a transaction
- (ii) Management of member contact process, including contact analysis
- (iii) Connection to and operation of multi-channel infrastructure to support and manage member contact process
- (iv) A single point of contact for member multi-channel inquiries
- (v) A consistent and standard response to member policy and procedural inquiries across channels

Members can access services using any of the multi channels which are supported by future state contact center. The future state goal of the member services contact center is to provide “High Touch” (easy to use and answering the question) customer service at the lowest possible cost per contact.

In order to accomplish that goal, future state solution considers front end self-service tools that utilize IVR, self-service member portal integrated with an onshore/near shore/offshore mixed contact centers that utilizes robust case management, knowledge management tools to respond to inquiries coming through channels such as emails, chats, fax and phone. The future state considers (subject to governance approval on technology budget) using a tiered approach:

- (i) Tier 0: Self Services driven by IVR and Self Service Member Portal
- (ii) Tier 1: Contact Center low cost channel agents that handle email, Fax, Chat and Phone inquiries
- (iii) Tier 2: Case Workers and Advisors, complex inquiry management to mine social CRM, use predictive modeling, proactive and reactive to escalated cases (critical once)
- (iv) Tier 3: Governance & Reporting
- (v) Tier 0 – Self Service

Based on proposed future state strategy and plan, Supplier and Teleperformance will be implementing Aspect routing and Pega agent tools. It is being considered to integrate it with some of Teleperformance tools such as eWFM, time entry to increase efficiencies and effectiveness while overall solution improves customer experience.

With Aspect’ all-in-one communications solution — will be implemented, bring sophisticated routing capabilities that improve issue resolution, while reducing transfers and es-

calations. This directly results in volume reduction, increase first call resolution and improves customer experience.

- (q) **Routing with intelligence** - intelligent routing places customer interactions (phone, email, and chat) into the hands of the agents and associates who are best suited to handle them. They receive the information they need prior to the contact transfer to eliminate repetition and facilitate faster issue resolution.

Together or separately, our solution supports the following call routing processes to reduce costly transfers:

- (i) **Caller-directed call routing.** Use data entered by the caller via a touchtone pad (press one (1) for benefits, two (2) for claims, etc.) to route the call to the right resource.
- (ii) **Data-directed call routing.** Prompts callers to enter an account number, group number, contract number, etc. via a touch-tone phone. Our solution uses these inputs to search your database(s) (integrated) for related customer or account information.
- (iii) **Skills-based routing.** Our system can perform “data dips” by examining the database for the information needed to route the call. For example, if a specific technical skill is needed to resolve a particular issue, the system can look up records for skill sets, perform an availability query from the contact center, and then combine these two pieces of information to route the call to an available agent.

- (r) **Aspect and Pega integration considerations (subject to governance budget approvals)**

**Providing numerous on-screen communication tools and controls**

- (i) When Aspect is integrated with Pega suite of agent tools, provide agents a complete range of telephony capabilities embedded right into user interface. This includes features like conferencing, workgroup directories and status indicators, call hold, transfers, escalations, voicemail, and recording. Delays and dropped calls due to complicated phone controls are greatly decreased.
- (ii) The Self Service Member Portal is a web based self-service tool, uniquely configured for this Agreement, encourages members to become more self-sufficient by providing member driven experience where users have quick access to integrated tools and content needed to address their queries.

**By using a user-centric design process, our future state considerations, places members at the heart of the design and is:**

- (i) Personal: provides process, content and tools relevant to individual members
- (ii) Intuitive: an easily navigated solution that enables users to complete tasks accurately and inspires members confidence in and their willingness to use the solution

- (iii) Consistent: common terms, processes, content, and visual elements across the solution so users trust and believe in the information, as it is the same on phone as it is online
- (iv) Integrated: supports members as they navigate to an answer through different screens and technologies, without difficulty

### **Training Solution**

- (i) Health Net-facing eLearning Module

Future state solution considers to develop a mobile-friendly eLearning course featuring troubleshooting information on key identified customer inquiries. This includes creation of On Demand tutorial videos that are loaded directly into self-service portal, which ultimately feeds the customer-facing knowledge answer engine. This enables customers to conduct their own real-time troubleshooting and drives self-support.

- (ii) Proposed future state knowledge solution
  - (A) Leverages question-to-answer matching platform that allows both consumers and service agents to enter complete questions in plain language - including spelling mistakes, grammatical errors and “text speak” - and matches those questions to the knowledge management tool
  - (B) Includes reporting and analytics that capture customer intentions with sophisticated tools that extract full value from all the data and “voice of the customer” feedback, including an administrative platform that offers a wide range of standard and custom reports, and sophisticated quality analysis dashboards.
  - (C) Can be integrated with live help platforms; chat, click to call and email to (i) identify the question, (ii) provides suggested answers, and (iii) allow the agent to insert a response with a single click. By intelligently understanding the answer to the question organizations are able to improve agent efficiency, customer response times and self- help answer consistency/accuracy.
- (iii) As a key component of the proposed future state solution, the self-service tier 0 is integrated with the tier 1 one 800 number contact center. This integration includes
  - (A) Consistent Content: agents use the same content available to members to assist members on the phone, creating a consistent and trusting service.
  - (B) Daily Content Updates: by using the reports from the multi-channel interactions, the team determines what content needs updating and works with contact center staff to understand how the knowledgebase should be updated to better support members

- (C) Inquiry tracking: members are able to submit a request for assistance from the self-service portal, email, fax, chat, call and track status on the inquiry they made from all channels

### **Tier 0 - Self-service Key Capabilities**

Our proposed future state solution acts as “virtual assistants” for members and providers, delivering the right answer and resolution with exceptional speed and accuracy. This leads to a better overall self-service experience and lower costs.

- (i) Personalizing IVR interactions. Integrated voice response (IVR) solution integrates customer interaction and loyalty databases to ensure inquiries are routed and handled appropriately.
- (ii) Transforming online self-service. Intelligent Web self-service solution, accepts questions in the users ‘natural language,’ and delivers clear, accurate and specific answers to customer inquiries (rather than requiring them to sift through long lists of possible search and FAQ results).

### **Tier 1 – Contact Center**

Though a significant amount of member transactions can be delivered online and through self-service tools, as proposed in the future state solution, tier 2 supports managing alternative access points such as voice agent, chat agent, and email agent.

Members calling the 1-800 telephone numbers or emailing or chatting will be engaged by an agent in the customer service center. All inquiries will be routed to the appropriate contact point using the proposed multi-channel routing capability.

Proposed future state solution provides agents with a single, intuitive application for managing all customer interactions while minimizing applications, steps and barriers and Equipping agents with comprehensive customer details.

### **Tier 1 - Key Capabilities**

- (i) Review and acknowledge the details of the customers’ prior issues, and can focus on moving ahead. Pull data from multiple back-end systems into one coherent view.
- (ii) Precise information needed to answer questions, resolve complex issues, and deliver high quality, relevant information via email, phone, and chat.
- (iii) Providing an integrated, “proactive” knowledgebase, access to scripted answers and providing direct access to accurate and concise answers.
- (iv) Type in a customer’s question as they ask it—or select a question submitted via email or chat—to receive a rapid, concise and accurate answer.
- (v) Providing guidance and real time decision assistance.

- (vi) Retrieve and incorporates user specific information into the responses it delivers to your agents.

### **Tier 2 – Complex Case Workers and Advisors**

These are typically complex issues that need a very high level skills and expertise or in some cases having the ability to manage escalated calls. This tier also handles member inquiries that cannot be handled both at the self service level or contact center agent level.

In proposed future state Case managers are notified of escalated cases from Tier1 associates using the workflow tool. These case managers also work closely with HNT team on policy and procedure issues in addition to managing the content of the knowledge base.

This team also mines social CRM sites, manages predictive modeling tools and conducts member retention and loyalty reporting including member churn analysis.

Future state proposes to automate processes for improved issue resolution.

### **Tier 2 - Key Capabilities**

- (i) Automating workflow. Provides a consistent means to perform workflow-specific functions on a case, playing a major role in optimizing issue resolution.
- (ii) The workflow tool is configured to define when and how the system: initiates screen pops, suggests surveys, pops images and documents, tracks how a call was handled/resolved, schedules a follow-up (inbound or Outbound), transfers ownership of a case or issue to another user, or escalates cases without agent intervention.

### **Tier 3 - Governance & Program Reporting**

Below is a description of how Teleperformance will work with the Supplier Service Integration team on an ongoing basis.

For Contact Center Delivery Governance Teleperformance will rely on its PMO throughout the project to serve as the primary point of contact and communication for oversight of key functions, identification of needs, inter-company contact and internal referral for implementation. Once issues and needs are identified, the Teleperformance PMO will work with Health Net and Supplier Service Integration Team to clarify requirements, obtain documentation, provide feedback as needed and develop project plan methodologies, including tracking. Implementation will follow through the Client Services organization, which has day-to-day responsibility for communication of needs to Operations and other affected internal stakeholders. At the operations level, Teleperformance uses combinations of training, team meetings, systems based communication tools (such as CCMS) for both dissemination of changes and communication, as well as compliance tracking and documentation.

**RASCI (the RASCI below may be modified as accountabilities and responsibilities are more clearly defined).**

R = Responsible The person who is ultimately responsible for delivering the project and/or task successfully. A = Accountable The person who has ultimate accountability and authority; they are the person to whom "R" is accountable. S = Supportive The person or team of individuals who are needed to do "the real work." C = Consulted Someone whose input adds value and/or buy-in is essential for ultimate implementation. I = Informed The person or groups of individuals who need to be notified of results or actions taken but don't need to be involved in the decision-making process							
Tower	RASCI Categories	Description	CTS Service Integration	CTS Contact Center Tower	CTS Infrastructure Tower	HealthNet PMO	TPUSA
CCC	Governance	Escalations/Disputes	R	A	I	C	S

Our proposed future state considers a full range of reporting and analytics capabilities to help measure effectiveness.

### Tier 3 - Key Capabilities

- (i) Fine-tuning performance through extensive reporting, variety of reports, including “time on case” and “days to close” reports.
- (ii) Multichannel reports to identify trends in usage (i.e. fewer member/providers are calling and an increasing percentage are using chat or email).
- (iii) Exact reports, at the desired level of detail, with no effort required from contact center personnel.
- (iv) Leveraging complete interaction recording. Provides flexible options and configurations for recording voice interactions, capturing on-screen activities, and tracking agent performance.

- (v) Powerful tool for coaching and monitoring agents, helping them improve at a faster rate.

(s) **Technology Roadmap Supplier TO UPDATE with MILESTONES**

Supplier will work with Teleperformance and other suppliers to adapt the current operating model in conjunction with ongoing technology enhancements. These enhancements below will be mutually agreed to and defined in the Technology Roadmap.

Implement ACD, IVR, and WFO solutions

- (i) Provide solutions for the Health Net Contact Center business functions, including:
  - (A) Member and Provider calls for Commercial, Medicare, CA State Health Programs, Duals
  - (B) Member and Provider calls for MHN
- (ii) ACD and IVR solutions with support for multiple languages
- (iii) ACD solutions, developed with the target technology, including:
  - (A) Support for all existing toll-free phone numbers, including all numbers supported on the Rockwell (Commercial) and Symposium (MHN) ACDs
  - (B) ACD messaging and option gathering
  - (C) Skills-based routing
  - (D) Intelligent and emergent messaging
  - (E) Support for agent-initiated outbound calls
- (iv) IVR solutions, developed with the target technology, including:
  - (A) Self service functions which will provide the most benefit to the call statistics and user experience
  - (B) Support for member and provider callers and (for FED) DoD callers
  - (C) Authentication of all callers
  - (D) Development of Natural Language features
  - (E) Intelligent context for IVR menus
  - (F) Intelligent messaging
  - (G) Recording of messages with professional voice talent
  - (H) Support for work-at-home agents and virtual call centers

- (v) Integration of ACD, IVR, and WFO solutions with the PEGA contact center desktop (Omni)
- (vi) Integration of IVR with host systems, leveraging Omni web services to meet host communication requirements, including expansion of those services if needed
- (vii) Roll-out of integrated WFO solutions, including the following modules:
  - (A) speech analytics workforce scheduling e-training customer survey tied to the CSR
  - (B) quality recording -- 100% & real time on-demand quality evaluation
- (viii) Multi-channel support (email, mobile, SMS text, chat, voice, fax, and for COM, web "contact us", social networking), including:
  - (A) contact tracking of any channel type or of combinations thereof routing for all channel types scripted dialogs, used for multiple channel types
- (ix) A suite of reports and dashboards to be developed by the project team, focusing on compliance mandated reports, out-of-the box reports, and support needed for reports which the business will develop. Reporting needs include:
  - (A) Reports meeting all government requirements
  - (B) Dashboards, system monitors, alerts, and other diagnostic tools to be developed or configured within the scope of this project
  - (C) Cradle to Grave reporting of ACD history, indicating all stops within a contact and where the time was spent
  - (D) Management reports, including IVR utilization
  - (E) Logging contact activities (transactions, menus visited, etc.), integrated with Omni, for all channels (email, chat, IVR, fax, etc.)
  - (F) Access to data for reporting, dashboards, alerts, CTI
  - (G) Real-time and historic views of incidents and trends
  - (H) Leveraging of analytics
  - (I) Showing composite statistics for calls (including the full life of the call, e.g. ACD, IVR, CSR, and downstream transfers).
    - (1) Preparation for post-implementation development of reports and dashboards, including product installations user access data access training
- (x) Development and Test environments
- (xi) Code management and migration tools and procedures

- (xii) Stand up new hardware and install and configure vendor software for ACD, IVR, and WFO, integrating with the VoIP/SIP backbone infrastructure
- (xiii) Queue hold – dialer
- (xiv) Intelligent Outbound Dialer

This combined solution will be enabled and designed to provide a number of enhanced operational and customer capabilities including

- (A) Drive to increased and enhanced self-service to increase the % of calls completed by self-service
  - (B) Leverage IVR Analytics to identify ongoing opportunities to improve self-service through improved IVR design
  - (C) Increase routing accuracy, to minimize call transfers
    - (1) Improve customer satisfaction and service delivery via solutions that are scalable, reliable and stable
  - (D) Leverage the latest industry technology to automate or streamline the CCC handling of external contacts, received through various channels, such as telephone calls (via the IVR or direct CSR involvement), email, chat, web (healthnet.com and hnfs.com), faxes, and (for COM) social media
- (t) **Technology Hybrid Overview**

ACD/IVR capabilities will be fully leveraged across the Health Net infrastructure while some elements of TPUSA operational capabilities will be enabled via connectors and integrations to Health Net suite.

- (i) Quality Assurance
- (ii) RTA & Workforce Management
- (iii) Payroll Systems

## Technology Hybrid Solutions

ASPECT TECHNOLOGY	REQUIREMENT	CHALLENGES
Quality Assurance Tools	Possible Connector	TP QA Tools & Processes are leveraged and may require more dedicated resources and customized performance reporting and processes
Performance Mgmt.	24 Hr. Batch Upload	Batch upload to TP System (CCMS) will be required to collect agent level data in the format required
Scheduling & Forecasting	Possible Connector	TP Intraday Resources may need to be trained to non-standard systems and dedicated
RTA	Possible Connector	RTA Processes within TP may have challenges in leveraging Avaya tools and may require dedicated resources
Payroll	24 Hr. Batch Upload	Batch upload to CCMS will be required to collect agent level data to manage payroll/overtime etc

Supplier will also provide all telephony and data connectivity from the ACD/IVR platform to Teleperformance data centers:

- (i) Teleperformance will receive from Supplier a regular monthly forecast that will take into account membership fluctuations and historical daily volume distributions across call types. Teleperformance will produce expected call distribution reports, and staffing plans to cover the forecast call volumes.
- (ii) Teleperformance will re-assign agents between “queues” based on their skills etc. in order to provide the most effective use of available resources across the LOBs and call types associated with a particular location. Health Net/Supplier will provide TP with remote access to the ACD/IVR to facilitate queue and skill reassignment, etc.
- (iii) Teleperformance will attempt to minimize unnecessary call transfers between agents, after receipt. As an ongoing part of performance management, Teleperformance uses Call Management System (CMS) data to identify multiple fundamental root causes, including system level misroutes, appropriate agent driven transfers and inappropriate transfers, and any system level changes required. From the information gained, Teleperformance and Supplier will work together to manage transfer rates within control parameters, and manage exceptions based on root causes. These measures are reported within the customary set of reports traded with Health Net.
- (iv) Teleperformance manages the entire agent lifecycle of its employees through its CCMS tool/technology, which includes all aspects of personnel management including training, schedule management and eligibility. Additionally, day-to-day operational management related to call handling, call review, and all aspects of Quality Monitoring are facilitated through the same tools.

- (v) C-SAT surveys will be provided to measure C-SAT and FCR metrics. Final determination of content and number of surveys will be determined during Transition, jointly between Health Net and Supplier. The questions are documented in the Transition Manual.
- (vi) The Silver Link outbound dialer will be a responsibility of Supplier to provide to complete welcome calls. A forecast plan will be created during off-peak hours between Supplier and Teleperformance.
- (vii) TTY capability will be provided by IT Tower to meet compliance requirements.

(u) **Data Connectivity & Agent functionality**

All incoming telephony (voice calls) will be routed to Health Net/Supplier provisioned Aspect ACD/IVRs, and will receive any required treatment to enable self-service or routing functionalities prior to routing to the approximately located Teleperformance agent. Calls will be routed using Supplier provided gateways and handset/softphones directly to a specific agent identified by unique login. Any appropriate CTI functionality and application connectivity necessary will be enabled by Supplier.

All network circuits, and data connectivity to each Teleperformance Center will be provided and managed by Supplier, including provisioning of failover circuitry etc., is controlled by Supplier.

Teleperformance is responsible for all network connectivity within a center. No general purpose external internet connectivity is required. Teleperformance agents are connected remotely to data and applications functionality provided by Supplier. Secure desktop functionality will be provided leveraging VDI capabilities and applications. Agent workstations will be provided by Teleperformance in accordance with the specifications provided by Supplier, and will connect to Health Net/Supplier systems leveraging Citrix systems capabilities hosted by Supplier.

No Health Net, patient or provider data will be stored at any Teleperformance locations in order to ensure Teleperformance meets the Health Net/Supplier requirements related to HIPAA and similar. All appropriate systems security at the agent desktop level, as well as any redaction of appropriate segments etc. of call recordings used to monitor agent performance etc. will be enabled using systems capabilities provided by Supplier.

(v) **Business Continuity and Disaster Recovery**

The identified location strategy relies on cross skilling of agents across multiple LOBs, and the ability to assign agents to different incoming queues as workload dictates. Calls will be routed across centers based primarily on fundamental skills or LOB requirements, for example only where possible all voice calls requiring support in Spanish regardless of LOB will be routed to our centers in our Near Shore centers (e.g. Chihuahua); or calls with legal requirements to be treated in the USA. Teleperformance will rely on the underlying call delivery and routing capabilities inherent in the Health Net/Supplier call delivery platform to provide call delivery continuity and disaster recovery capabilities between centers.

Additionally, Teleperformance provides numerous strategies and capabilities to enable continued operations in the event of a local adverse event. Each BCP is inherently site specific, and is designed to provide for continued operation where possible (e.g. alternate network connectivity, standby power etc.), as well as each BCP covers plans to ensure safety of employees and protection of company resources, as well as options available for alternate delivery of operations should a center prove to be partially or completely unavailable.

Teleperformance has developed a business impact analysis matrix for all services. Services are categorized as per criticality and disasters by likelihood of occurrence, based on which the DR/BCP strategy is defined. The components of this include:

- (i) Configuration and maintenance of back-up sites (hot/warm/cold)
- (ii) Data back-up strategy and frequency
- (iii) Recovery drills and SLAs for service continuity
- (iv) Redundancy in network and other infrastructure
- (v) Back-ups for people

Teleperformance has assigned a priority to each of these disaster categories and service criticality and has identified suitable back up sites accordingly. The critical elements of the BCP at each of these levels are:

- (i) Categorization of disasters.
- (ii) Categorization of recovery process based on criticality. A categorization of LOB priority is as follows:
  - (A) MediCal Member
  - (B) MHN Member
  - (C) Medicaid AZ Member
  - (D) Medicare CA, OR, AZ Member
  - (E) Commercial Member CA, OR, AZ
  - (F) All Provider
  - (G) Ancillary Support Functions
  - (H) All Broker
- (iii) Disaster scenarios and the recovery process.
- (iv) Escalation and communication process
- (v) Compliance and review process

(w) **Security**

Teleperformance's solution for ensuring ongoing physical and logical security of Health Net's data in accordance with the requirements of the Agreement and Health Net's security policies is as follows:

- (i) Teleperformance will implement and follow Health Net security standards and policies in order to comply with industry practices and regulations. Such security standards and policies include:
- (ii) Applying individual and least privileged role-based access
- (iii) Enforcing input and parameter validation and restriction where possible
- (iv) Utilizing Health Net's single sign-on authentication mechanism (unless otherwise authorized by Health Net in writing)
- (v) Prohibiting the sharing of system sign-on IDs
- (vi) Employing secure methods of session management
- (vii) Facilitating individual user logging of transactions
- (viii) Implementing encrypted communication over open networks, as required by Health Net
- (ix) Teleperformance will (1) install firewalls at the network layer used to provide the Services; (2) not use (or permit any Teleperformance Personnel to use) any removable storage devices such as USB drives, or floppy and CD disc drives; and (3) control Internet access by Teleperformance Personnel providing the Services.
- (x) Teleperformance will not download any information (including Health Net Confidential Information) to hard drives on desktops or laptops, or print any such information
- (xi) Teleperformance shall establish and administer security violation and unauthorized access attempt report mechanisms. In the event Teleperformance discovers a Security Incident or an unauthorized access attempt, Teleperformance shall:
- (xii) Promptly contact Health Net and work with Health Net security to investigate such Security Incident or unauthorized access attempt in accordance with Health Net's security policies and procedures. Teleperformance shall provide information regarding such intrusion investigation to Health Net upon request
- (xiii) Promptly provide a written report to Health Net describing such Security Incident or unauthorized access attempt
- (xiv) Initiate commercially reasonable corrective actions to help minimize and prevent reoccurrence of such Security Incident or unauthorized access attempt

- (xv) Prepare and retain documentation of investigations of such Security Incident or unauthorized access attempt and provide a copy of such documentation to Health Net

#### 4. CHANGES TO SUPPLIER'S SOLUTION

As a general principle, Supplier has both the right and the obligation to perform the Services to be provided by it under this Statement of Work in the manner described in this Exhibit A-1. That said, Supplier is charged with responsibility for the adequacy of its Solution – which is to say that if Supplier's Solution, as described in this Exhibit A-1, should prove inadequate at any point during this Statement of Work's Term for Supplier to perform and deliver the Services in accordance with the obligations of the Agreement (including this Statement of Work), then Supplier is responsible for making such changes to its Solution as are necessary to enable Supplier to perform and deliver the Services in accordance with such obligations. All such changes are to be made in accordance with Schedule H (*Contract Change Control*) of the Agreement, as applicable according to its terms; *provided, however*, that Supplier is responsible for making such changes at its own cost and expense except in those cases (if any) in which the Agreement expressly provides that Health Net has Financial Responsibility for them.

#### 5. RESOURCES

##### 5.1 Resource Mix

To achieve Health Net's objectives of improvement in services delivery, faster speed to market, focus on growth and significant reduction in cost, Teleperformance will leverage its global operating model. The Onshore/Near shore/Offshore resource mix for contact centers operations is listed in the following table.

- (i) Commercial PG Member English and Spanish (Restricted) to USA
- (ii) Commercial PG Member English and Spanish (Non Restricted) to Philippines and Mexico
- (iii) Commercial Member CA, OR, AZ English to Philippines
- (iv) Commercial Member CA, OR, AZ Spanish to Mexico
- (v) Commercial Provider CA, OR, AZ English to Philippines
- (vi) ACA Member CA, OR, AZ English to Philippines
- (vii) ACA Member CA, OR, AZ Spanish to Mexico
- (viii) Medicare Member CA, OR, AZ - English to Philippines
- (ix) Medicare Member CA, OR, AZ - Spanish to Mexico
- (x) Medicare Provider English to Philippines
- (xi) Mental Health PG Member English and Spanish (Restricted) to USA

- (xii) Mental Health PG Member English and Spanish (Non Restricted) to Philippines and Mexico
- (xiii) Mental Health (Member/Provider/Claims) English to Philippines
- (xiv) Mental Health (Member/Provider/Claims) Spanish to Mexico
- (xv) Correspondence to USA (potentially Philippines)
- (xvi) Medicaid CA Member English to Philippines
- (xvii) Medicaid AZ Member English to USA
- (xviii) Medicaid CA Member Spanish to Mexico
- (xix) Medicaid AZ Member Spanish to USA
- (xx) Medicaid CA Provider English to Philippines
- (xxi) Medicaid AZ Provider English to USA
- (xxii) Commercial Broker CA, OR AZ English to Philippines (potentially USA)
- (xxiii) Duals CA Member – English to Philippines
- (xxiv) Duals CA Member – Spanish to Mexico
- (xxv) Duals CA Provider – English to Philippines

Functional Support (work force, quality, training, management of agents) will be located in the same locations as lines of business above.

Leadership, PMO, Client Services, Resolution, Escalation, Project Support Services. Policies and Procedure, Curriculum functions and locations will be determined during implementation.

**5.2 Resource Profile**

Teleperformance has a well-defined methodology for recruitment and selection of candidates. Teleperformance will work closely with Health Net to establish job descriptions at various levels and functions. Based on these job descriptions, Teleperformance will select candidates with the proper qualifications and experience in order to ensure a “best-fit” for Health Net.

The table below is an indicative illustration of requirements and the minimum qualifications required to be selected for the contact center operations roles which Teleperformance will rely upon for our processes in ongoing selection of employees to the program.

Contact center agent	
<i>Qualification &amp; Experience</i>	<i>Selection Process</i>

HS Graduates One year of contact center experience English written and verbal communication skills. Knowledge of healthcare basics Type thirty (30) WPM Willingness to work flexible schedules	HR Interview Operations Interview Criminal background check
---	---

Team Manager	
<i>Qualification &amp; Experience</i>	<i>Selection Process</i>
Bachelor's Degree or equivalent work experience. Excellent Communication and Leadership skills Three (3) to five (5) years' experience leading large teams	HR Interview-screening for roles and responsibility Operations Interview Criminal Background Check.

Work Force Management	
<i>Qualification &amp; Experience</i>	<i>Selection Process</i>
Bachelor's Degree or equivalent work experience Excellent Communication and Leadership skills Three (3) - five (5) years of call center experience. Previous workforce management experience.	HR interviews and screening. Interview with Business Leadership Screening for leadership ability and cultural fit Criminal background check.

## 6. OPERATING HOURS

Supplier and Teleperformance will at minimum replicate the operating hours adhered to by Health Net's Contact Center organization as of the Effective Date, as set forth in the table below. Supplier and Teleperformance acknowledges and agrees that performance of the Contact Center Services will regularly require Supplier Personnel to perform additional/overtime work outside regular operating hours, and that such additional/overtime work is within the scope of the Contact Center Services.

Supplier and Teleperformance will extend its hours of operations (for example, through overtime, weekend and holiday work) from time to time as needed to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement. Supplier's and Teleperformance's work during such extended hours of operations is within the scope of the Contact Center Services.

Within the regular Hours of Operations listed below, Supplier and Teleperformance will have staff work according to defined shift schedules. However, Supplier and Teleperformance will make reasonable efforts to permit Supplier and Teleperformance staff to work flexible shift times when that can be done without jeopardizing Supplier's and Teleperformance's ability to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement.

The operating hours for the Contact Center Services are given below.

LOB/Work Group	Hours and Days of Operation (US Pacific time)
<b>Commercial</b>	
Commercial CA Member	M-F 8-6
Commercial OR Member	M-F 7:30-5
Commercial AZ Member	M-F 7-6 (Outside Daylight Savings time 6-5)
ACA CA Member	M-Sa 8-8 11/15- 2/15; M-F 8-6 rest of the year
ACA OR Member	M-Sa 8-8 11/15- 2/15; M-F 8-6 rest of the year
ACA AZ Member	M-Sa 8-8 11/15- 2/15; M-F 8-6 rest of the year
Commercial and ACA CA, OR Provider	M-F 8-5
Commercial and ACA AZ Provider	M-F 7-6 (Outside of daylight savings 6-5)
<b>Medicare</b>	
Medicare CA Member	8-8 7days 10/1- 2/15; M-F 8-8 rest of the year
Medicare OR Member	8-8 7days 10/1- 2/15; M-F 8-8 rest of the year
Medicare AZ Member	8-8 7 days 10/1-2/15; M-F 8-8 rest of the year
OEV (Outbound Enrollment Verification)	8-8 7 days 10/1-2/15; M-F 8-8 rest of the year
Medicare CA/OR/AZ Provider	M-F 7-6 (Outside of daylight savings 6-5)
<b>State Health Plans</b>	
Medicaid CA Member	7 x 24 hrs.
Medicaid AZ Member	7 x 24 hrs.
Medicaid CA Provider	7 x 24 hrs.
Medicaid AZ Provider	7 x 24 hrs.

LOB/Work Group	Hours and Days of Operation (US Pacific time)
Duals CA Member	7 x 24 hrs.
Duals CA Provider	M-F 7-6
<b>Brokers</b>	
Commercial CA Broker	M-F 8-5
Commercial OR Broker	M-F 8-5
Commercial AZ Broker	M-F 8-5
<b>MHN</b>	
MHN Member	M-F 5-5
MHN Provider	M-F 5-5
MHN Claims	M-F 5-5

NOTE: Commercial, Medicare and ACA AZ Provider - M-F 7am-6pm (outside Daylight Saving Time Period: M-F 6am-5pm)

**EXHIBIT A-1.1****APPROVED SERVICE DELIVERY CENTERS**

The Service Delivery Centers at (or from) which Supplier is authorized to perform the Services under this Statement of Work are those listed below. Even if Health Net has approved Supplier's use of an Affiliate or other Subcontractor to perform certain aspects of the Services, their performance must be from an approved Service Delivery Center listed in this Exhibit A-1.1.

**Onshore Service Delivery Centers**

Primary Location	Type of Facility	Hours of Operation	Functions / Services	Languages Supported	Key Platform / Systems	Back-up / Fail-over Location	Facility Operator	Facility Owner	Date Placed in Service	Multi-client Site (Y/N)?
Shreveport, LA, USA TPUSA, Inc. 5800 Industrial Loop Shreveport, Louisiana USA 71129	Contact Center	7x24;365	IB/OB Call, off phone case follow up	English, Spanish and Language Line support for all other	Aspect, IEX (NICE), Pegasystems, email, web, IVR, Right-Fax, Macess, Lotus Notes, Health Net Connect, CSI, ABS, Clear-Tran, PSA	Davao, Philippines, Chihuahua, Mexico, Rancho Cordova, CA, Woodland Hills, CA	TPUSA	TPUSA leases from	October 2013	Y, Health Net has secured and locked area
Rancho Cordova, CA, USA	Contact Center	7x24; 365	IB/OB Call; off phone ancillary and support services	English, Spanish and Language Line support for all other	Aspect, IEX (NICE), Pegasystems, email, web, IVR, Right-Fax, Macess, Lotus Notes, Health Net Connect, CSI,	Davao, Philippines, Chihuahua, Mexico, Woodland Hills, CA	Health Net	Health Net leases from	N/A	Y Other Health Net functions; secured and locked area – until 2/28/17

Primary Location	Type of Facility	Hours of Operation	Functions / Services	Languages Supported	Key Platform / Systems	Back-up / Fail-over Location	Facility Operator	Facility Owner	Date Placed in Service	Multi-client Site (Y/N)?
					ABS, Clear-Tran, PSA					
Woodland Hills, CA, USA	Contact Center	7x24; 365	IB/OB Call; off phone ancillary and support services	English, Spanish and Language Line for support of all other	Aspect, Aspect, IEX (NICE), Pegasystems, Lotus Notes, Health Net Connect, CSI, ABS, Clear-Tran, PSA	Davao, Philippines, Chihuahua, Mexico, Rancho Cordova, CA	Health Net	Health Net leases from	N/A	Y Other Health Net functions; secured and locked area until 2/28/17

Holidays observed in the above-listed centers:

**Actual hours of operation will follow Health Net required days of operation regardless of local holidays.**

Six (6) annual holidays: New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

## Near-shore Service Delivery Centers

Primary Location	Type of Facility	Hours of Operation	Functions / Services	Languages Supported	Key Platform / Systems	Back-up / Fail-over Location	Facility Operator	Facility Owner	Date Placed in Service	Multi-client Site (Y/N)?
Chihuahua, Mexico Teleperformance Mexico S.A. Miguel de Cervantes Saavedra 100, Complejo	Contact Center	7x24;365	IB/OB and off phone case follow up	Spanish and English, Language Line for all other	Aspect, IEX (NICE), Pegasystems, email, web, IVR, Right-Fax, Macess, Lotus Notes, Health Net Connect, CSI, ABS, Clear-Tran, PSA	Davao, Philippines, Chihuahua, Mexico, Woodland Hills, CA	TPMexico	TP Mexico leases from	August 2014	Y, secured and locked area

Holidays observed in the above-listed centers:

**Actual hours of operation will follow Health Net required days of operation regardless of local holidays.**

**Mexico Holiday Schedule:**

- (a) January 1st - New Year's Day
- (b) February 5th - Constitution Day
- (c) March 21st - Benito Juarez Day (Presidents Day)
- (d) May 1st - Labor Day
- (e) September 16th - Independence Day
- (f) November 20th - Mexican Revolution Day
- (g) December 25th - Christmas Day

## Offshore Service Delivery Centers

Primary Location	Type of Facility	Hours of Operation	Functions / Services	Languages Supported	Key Platform / Systems	Back-up / Fail-over Location	Facility Operator	Facility Owner	Date Placed in Service	Multi-client Site (Y/N)?
Davao, Philippines 2nd Floor, SM City Davao Annex, Quimpo Blvd, Dabao 8000	Contact Center	7x24, 365	IB/OB call, off phone case follow up and correspondence	English and Language Line for all other	Aspect, IEX (NICE), Pegasystems, email, web, IVR, Right-Fax, Macess, Lotus Notes, Health Net Connect, CSI, ABS, ClearTran, PSA	Shreveport, LA, Chihuahua, Mexico, Rancho Cordova, CA, Woodland Hills, CA	TP Philippines	TP Philippines leases from	August, 2014	Y, secured and locked
TBD Philippines Teleperformance Philippines	Contact Center	7x24, 365	IB/OB call, off phone case follow up and correspondence	English and Language line for all other	Aspect, IEX (NICE), Pegasystems, email, web, IVR, Right-Fax, Macess, Lotus Notes, Health Net Connect, CSI, ABS, ClearTran, PSA	Davao, Philippines, Shreveport, LA, Chihuahua, Mexico, Rancho Cordova, CA, Woodland Hills, CA	TP Philippines	TP Philippines	December, 2014	Y secured and locked

Primary Location	Type of Facility	Hours of Operation	Functions / Services	Languages Supported	Key Platform / Systems	Back-up / Fail-over Location	Facility Operator	Facility Owner	Date Placed in Service	Multi-client Site (Y/N)?
TBD Philippines	Contact Center	7x24; 365	IB/OB call, off phone case follow up and correspondence	English and Language Line for all other	Aspect, IEX (NICE), Pegasystems, email, web, IVR, Right-Fax, Maccess, Lotus Notes, Health Net Connect, CSI, ABS, ClearTran, PSA	Davao, Philippines, Shreveport, LA, Chihuahua, Mexico, Rancho Cordova, CA, Woodland Hills, CA	TP Philippines	TP Philippines leases from	February, 2015	Y, secure and locked area
	Contact Center	7x24; 365	IB/OB call, off phone case follow up and correspondence	English and LanguageLine for all other	Aspect, IEX (NICE), Pegasystems, email, web, IVR, Right-Fax, Maccess, Lotus Notes, Health Net Connect, CSI, ABS, ClearTran, PSA	Davao, Philippines, Shreveport, LA, Chihuahua, Mexico, Rancho Cordova, CA, Woodland Hills, CA			May, 2015	Y, Secure and lock area

Actual hours of operation will follow Health Net required days of operation regardless of local holidays.

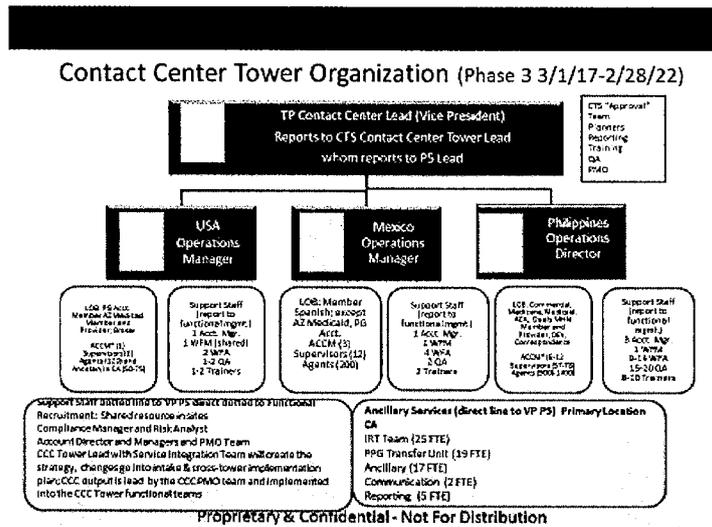

Holidays observed in the above-listed centers:

MONTH	TYPE OF HOLIDAY	HOLIDAY DESCRIPTION
JANUARY	LEGAL HOLIDAY	NEW YEAR
JANUARY	SPECIAL HOLIDAY	CHINESE NEW YEAR
FEBRUARY	SPECIAL HOLIDAY	PARANAQUE DAY

**EXHIBIT A-1.2**  
**SERVICE DELIVERY CONFIGURATION AT THE COMPLETION OF PHASE 2**  
**Contact Center Organization Structure (Phase 3)**

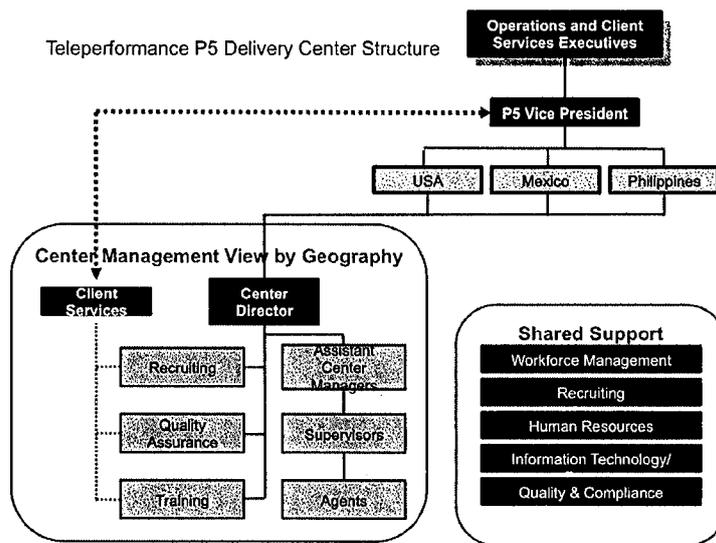

**Contact Center Tower Reporting Structure to Teleperformance**

Proprietary & Confidential - Not For Distribution

Contact Center Organization Structure (Teleperformance)

The Teleperformance Delivery structure will be providing up to 4 positions of ongoing PMO and consulting resources to promote governance, technology application, and program/project management throughout the lifecycle of the relationship and through ongoing operations. This will be delivered through Teleperformance Professional Services, under the close direction of the Vice President.

Subcontractors may be used to deliver some services under this agreement, however, at the time of this writing, Teleperformance has not identified any such required services and will provide any such identification going forward in accordance with governance practices outlined in the agreement.

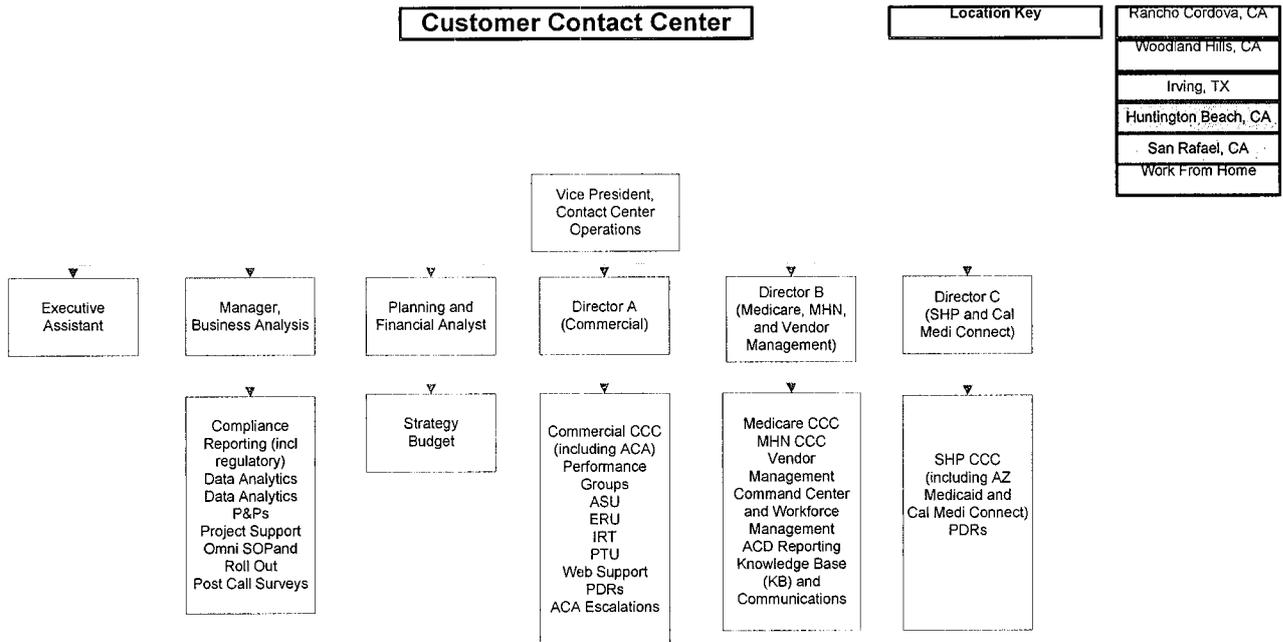

**EXHIBIT A-3**  
**CONTACT CENTER ORGANIZATION CHART**

**EXHIBIT A-3****CONTACT CENTER ORGANIZATION CHART**

This Exhibit A-3 (*Contact Center Organization Chart*) contains organization charts showing, at a specific recent point in time prior to the Effective Date, the positions (including both filled and currently open positions) that represent the Health Net organizational unit(s) whose Functions are being outsourced to Supplier under this Statement of Work. This document is included as part of this Statement of Work as a supplemental means of depicting the Functions that comprise the Contact Center Services for which Supplier is assuming responsibility from Health Net under this Statement of Work. It is **not** included for the purpose of establishing any numerical FTE benchmark or baseline for use in determining Supplier's Charges for the Contact Center Services. Any changes in the organization charts between the Agreement's Effective Date and the BPaaS Services Commencement Date shall not be interpreted to represent a change in the scope of the Contact Center Services in the absence of Health Net specifically adding or removing Functions from Exhibit A (*Contact Center Services*) of this Statement of Work.

**EXHIBIT B-1  
SERVICE LEVEL METRICS**

**I. CONTACT CENTER OPERATIONAL LEVELS**

All Service Levels are subject to the Service Level Methodology set forth in Schedule B (*Service Levels*) and the applicable provisions of the Agreement and the Exhibits thereto.

**\*Note: All Service Levels will be subject to the Service Level methodology set forth in the applicable provisions of the Agreement and Exhibits. All Service Levels will be measured per LOB with the Weighting Factor evenly split between each applicable LOB.**

Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improvement
Email Answer Time – Inquiry Response Time	<p>Inquiry Response Time measures the time it takes for a CSR to respond to a Customer who has inquired via email.</p> <p>Inquiry Response Time is calculated by dividing (i) the number of inquiries with a Response Time as defined by the specified SLA or less by (ii) the number of inquiries.</p> <p><b>“Response Time”</b> means the time between (i) when a message is Received by the Contact Center to (ii) when a CSR responds to the Customer in the medium of the Customers choice.</p> <p><b>“Received”</b> means, for purposes of this Service Level, that point in time when an inquiry has entered into the Contact Center work queue.</p>	Daily	Macess, Omni, database	<p>All LOBS Members 100% of inquiries responded to within one (1) Business Day</p> <p>Providers 100% of inquiries responded to within two (2) Business Days Contact Center agents must reply on receipt to the</p>	Y		A	N

Quality – Quality	Quality Monitoring Average measures the quality of CSR interactions with Customers,	Monthly	Macess, Omni, call	All LOBs Quality	Y		A	Y

Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improvement
Monitoring Average	<p>including the accuracy of information provided to Customers, adherence to established procedures and customer relations skills, and accuracy of CSRs in entering data into the CRM system during or following an interaction.</p> <p>Supplier will perform a minimum of Ten (10) audits per associate per month for all applicable established channels of interaction (e.g., email, web support, white mail, phone calls, etc.). For each monitored interaction Supplier will complete a scorecard as approved by Health Net. Supplier will rate each CSR's performance using the scorecard in a fair, accurate and consistent manner. Scoring for each interaction will be calculated by dividing (i) the total number of quality attributes passed by the CSR, by (ii) the total number of quality attributes measured (0% to 100%).</p> <p>At Health Net's request, from time to time, the parties will conduct calibration sessions in which a sampling of interactions will be jointly monitored and rated by both parties to ensure consistency in the rating of performance. At the end of the measurement period, Supplier will calculate the average score received by each CSR during the measurement period ("<i>CSR Average Score</i>").</p> <p>Quality Monitoring Average will be calculated by dividing (i) the sum of the CSR Average Scores, by (ii) the total number of</p>		recording systems, database	Monitoring Average $\geq 97.5\%$				

Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improvement
	<p>CSRs whose calls were monitored and scored.</p> <p>The aggregate quality scoring target per LOB is ninety seven and one half percent (97.5%) for all evaluations completed on employees with a minimum tenure of 90 days, in accordance with the Quality Assurance form used by Health Net ("QA Form"). The exclusion of tenured agents with less than 90 days will be effective during the Transition Phase 2 as described in Exhibit A-2 Transition Description only, and will apply to the period of measurement for each line of business transition. The exclusion will apply to the calculation measurement only. All other usage of QA monitoring for performance management in areas such as HIPAA compliance will be in effect.</p> <p>There is no exception of minimum tenure of agents for PG accounts (Commercial and MHN).</p>							
Quality – Customer Satisfaction	<p>Customer Satisfaction measures the level of Customer satisfaction in their interactions with the Contact Center. Supplier shall administer surveys to a random sample of Customers who have had a recent contact with the Contact Center.</p> <p>Customer Satisfaction is calculated by dividing (i) the total number of Survey responses with overall ratings of [TBD] (i.e. "very satisfied" or "extremely satisfied"), by</p>	Quarterly	ACD, database	All LOBs >= 90%	Y		B	Y

**AMENDED AND RESTATED  
MASTER SERVICES AGREEMENT  
STATEMENT OF WORK #4 (IT SERVICES)**

**AMENDED AND RESTATED**  
**MASTER SERVICES AGREEMENT**  
**STATEMENT OF WORK #4 (IT SERVICES)**

This Statement of Work #4 (*IT Services*), dated November 21, 2014, but effective as of November 2, 2014 (“the **SOW Effective Date**”), is made by and between Health Net, Inc., a Delaware corporation with its principal place of business located at 21650 Oxnard Street, Woodland Hills, California 91367 (“**Health Net**”), and Cognizant Healthcare Services, LLC (“**Supplier**”), a Delaware corporation having an office at 211 Quality Circle College Station, TX 77845 (each, a “**Party**” and collectively, the “**Parties**”). This SOW #4 (*IT Services*) is entered into and shall be governed by the terms of that certain Amended and Restated Master Services Agreement entered into between the Parties dated November 21, 2014 (the “**Agreement**”). This Statement of Work #4 (*IT Services*) replaces and supersedes in all respects the Statement of Work #4 dated November 2, 2014.

**1. INTRODUCTION**

**1.1 Background & Purpose**

This SOW #4 (*IT Services*) describes the IT Services Supplier will provide for Health Net, as such Services are defined in Exhibit A (*IT Services*) to this SOW #4 (*IT Services*), and sets forth certain terms and conditions relating to them, including, among other things:

- (a) The scope of the IT Services;
- (b) The Solution Supplier will use to perform and deliver them;
- (c) The Operational Service Levels Supplier will meet in providing them;
- (d) The Key Supplier Positions applicable to them; and
- (e) The Subcontractors (if any) approved by Health Net to provide certain of them.

**1.2 Structure**

This SOW #4 (*IT Services*) is comprised of this cover document and the following Exhibits:

<b>Table 1: Exhibits to SOW #4 (<i>IT Services</i>)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
1	Exhibit A ( <i>Services</i> )	Describes the scope of the IT Services.

3	Exhibit A-3 ( <i>Solution Description</i> )	Describes Supplier’s solution for the provision of the IT Services and includes individual solutions as exhibits: <ul style="list-style-type: none"> <li>• Exhibit A-3-1 (<i>Solution Description – ITO Phase I</i>)</li> <li>• Exhibit A-3-2 (<i>Solution Description – ITO Phase II</i>)</li> <li>• Exhibit A-3-3 (<i>Solution Description - BPaaS</i>)</li> <li>• Exhibit A-3-4 (<i>Solution Description – People/Process</i>)</li> <li>• Exhibit A-3-6 (<i>Solution Description - BPaaS Non-BPaaS Security</i>)</li> </ul>
4	Exhibit B ( <i>IT Service Levels</i> )	Provides the Service Levels applicable to the IT Services and includes as exhibits: <ul style="list-style-type: none"> <li>• Exhibit B-1 (<i>Service Level Metrics</i>)</li> <li>• Exhibit B-2 (<i>Critical Services</i>)</li> <li>• Exhibit B-3 (<i>Resolvable Call Categories</i>)</li> <li>• Exhibit B-4 (<i>Service Request Completion Times</i>)</li> <li>• Exhibit B-5 (<i>Procurement Request Completion Times</i>)</li> <li>• Exhibit B-6 (<i>Reports</i>)</li> </ul>
5	Exhibit D ( <i>IT Key Supplier Positions</i> )	Identifies the Key Supplier Positions applicable to the IT Services.
6	Exhibit H ( <i>IT Subcontractors</i> )	Identifies the Subcontractors approved by Health Net to provide certain of the IT Services.

### 1.3 Exhibit A-1-2 Element Definitions – Infrastructure Software

The Infrastructure Software Tab of Exhibit A-1 (Scope Model) lists the Infrastructure Elements Categories and assigns Actors roles to those Categories. The Elements applicable to each Category are listed in A-1-2 Elements Definitions. During Phase 1, Supplier and Health Net will assign all of the Infrastructure Software running or anticipated to be running in either the Supplier’s Data Centers or at Health Net locations to the appropriate Infrastructure Software Elements. All Infrastructure Software shall be assigned to an Infrastructure Software Element such that all Infrastructure Software is represented on the Infrastructure Scope Model.

### 1.4 Special Order of Precedence of SOW #4 Documents

To the extent there is any conflict or inconsistency as to the responsibilities of either Party between (a) Exhibit A-1 (Scope Model), on the one hand; and (b) Exhibit A-3 (Solution Description), on the other hand, then the Exhibit A-1 (Scope Model) shall prevail. The Parties explicitly acknowledge that Exhibit A-3 (Solution Description) may not address every aspect of the Services, including each of Supplier’s responsibilities otherwise covered in the Recurring Scope Exhibits.

### 1.5 BPaaS and non-BPaaS IT

This SOW #4 (*IT Services*) describes the IT Services and related terms that are required to support both the BPaaS Services (“**BPaaS IT**”) and other information technology requirements of Health Net that are unrelated to the BPaaS Services (“**Non-BPaaS IT**”). Unless expressly stated otherwise, all IT Services and related terms in this SOW #4 (*IT Services*) apply to both BPaaS IT and Non-BPaaS IT requirements.

### 1.6 Enterprise Security Processes

The Scope Model designates Health Net as responsible for certain Enterprise Security processes. In some cases these Enterprise Security processes may overlap with other Security processes that Supplier is responsible to perform. The intent of this overlap is to give Health Net the option (but not the obligation) to perform these functions itself and “shadow” functions performed by Supplier. The fact that Health Net is responsible for certain Enterprise Security processes shall not in any way limit Supplier’s responsibility and accountability for meeting its obligations with respect to information security under the Agreement.

## 2. DEFINITIONS

Capitalized terms used but not defined in this SOW #4 (*IT Services*) shall have the meanings given them in the Agreement.

## 3. ADDITIONAL IT SERVICES

In addition to the IT Services set forth in Exhibit A (*Scope Model*), the IT Services include (a) Audit Support Services, and (b) Health Net Policy Support Services as set forth in this Section 3.

### 3.1 VIP Support Services

Supplier will provide additional services (“*VIP Services*”) as necessary to support individuals designated as VIPs (defined in Exhibit C-6) by Health Net. The VIP Services include:

- (a) In addition to the standard End User Services, VIP support Services may require Supplier to dispatch technicians to the VIP’s home or other remote locations (e.g., hotel, conference center).
- (b) Supplier shall perform VIP Services for all VIPs, regardless of their location. At the following Health Net Facilities, Supplier shall have at least one deskside support Supplier Personnel who is specifically trained to and has the particular skills necessary to effectively and efficiently support VIPs and who will have primary responsibility for performing the VIP support Services for VIPs located at such Health Net Facilities: (1) Health Net Headquarters at Woodland Hills, CA, and (2) Health Net’s Rancho Cordova Facility.
- (c) VIP support shall be performed based on Exhibit B (IT Service Levels)

### 3.2 Health Net Policy Support

“*IT Policy Services*” means those Functions associated with the development and implementation of “*Health Net IT Policies*,” which are the Health Net Policies as defined in Schedule P (*Health Net Policies*) governing or pertaining to the IT Services, more specifically, the conduct of Health Net’s IT Services.

Below are some examples of selected IT Policy Development Services Functions, which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only:

- (a) Generally, provide operational subject matter expertise with respect to Health Net IT Policies;

- (b) As requested, participate in meetings with Health Net and Supplier stakeholders having responsibility for the development, implementation, monitoring and enforcement of Health Net IT Policies;
- (c) In response to changes in Laws, regulations, guidelines, policies, contracts or requests from Health Net's Enterprise Process Change Organization ("**EPCO**") or from Health Net's or Supplier's Compliance organization:
  - (i) Participate in Health Net EPCO Steering Committee meetings to review new legal and regulatory changes and assessment of business impact;
  - (ii) Participate in Health Net EPCO regulatory implementation Change Teams;
  - (iii) Project manage the operational implementation and/or affected system changes of legal and regulatory changes that affect IT Services and participate in operational implementation and/or affected system changes of legal and regulatory changes that span multiple functions/departments, including tracking the progress of Deliverables and communicating status to Health Net's EPCO and/or Compliance organization; and
  - (iv) Based on the aforementioned meetings and guidance from the EPCO, prepare initial drafts of revised or new Health Net IT Policies and submit them to the relevant Health Net and Supplier stakeholders for review and comment;
- (d) Prepare updated versions of Health Net IT Policies to address input provided by relevant Health Net and Supplier stakeholder groups;
- (e) Provide communications and training to Supplier personnel regarding revised and new Health Net IT Policies and access to Health Net personnel to such communications and training; and
- (f) Implement Health Net-approved Health Net IT Policies by Supplier Personnel involved in the performance of the IT Services.

#### **4. CHANGES TO SUPPLIER SOLUTION**

As a general principal, Supplier has both the right and the obligation to perform the Services to be provided by it under this Statement of Work in the manner described in this Exhibit A-3 (*Solution Description*). That said, Supplier is charged with responsibility for the adequacy of its Solution, which is to say that if the Supplier's Solution, as described in Exhibit A-3 (*Solution Description*), should prove inadequate at any point during the Statement of Work Term for Supplier to perform and deliver the Services in accordance with the obligations of the Agreement (including this Statement of Work), then Supplier is responsible for making such changes to its Solution as are necessary to enable Supplier to perform and deliver the Services in accordance with such obligations. All such changes are to be made in accordance with Schedule H (*Change Control Process*) of the Agreement, as applicable according to its terms; provided, however, that Supplier is responsible for making such changes at its own cost and expense except in those cases (if any) in which the Agreement expressly provides that Health Net has Financial Responsibility for them as defined in Schedule C-11 and as required by State or Federal Laws.

#### **5. OPERATIONAL REPORTING**

Supplier shall generate and provide to Health Net (a) each operational report generated prior to the BPaaS Services Commencement Date, unless and until Health Net confirms in writing that such operational report is no longer required, (b) such other operational reports as Health Net may reasonably request from time to time, and (c) such modifications to or replacements for the foregoing reports as may be necessary to reflect changes to and evolutions of the IT Services during the term of this Statement of Work.

## **6. OPERATING HOURS**

Supplier will at minimum mirror the regular operating hours adhered to by Health Net's IT organization as of the Effective Date. Supplier acknowledges and agrees that performance of the IT Services will regularly require Supplier Personnel to perform additional/overtime work outside regular operating hours, and that such additional/overtime work is within the scope of the IT Services.

Supplier will extend its hours of operations (for example, through overtime, weekend and holiday work) from time to time as needed to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement. Supplier's work during such extended hours of operations is within the scope of the IT Services.

## **7. APPLICABILITY OF THE AGREEMENT**

This SOW #4 (*IT Services*) is hereby made a part of, and is subject to and governed by, the Agreement. This SOW #4 (*IT Services*) is one of the Initial Statements of Work executed under the Agreement.

**IN WITNESS WHEREOF**, Health Net and Supplier have each caused this SOW #4 (*IT Services*) to be signed and delivered by its duly authorized officer, all as of the SOW Effective Date set forth above.

**Health Net, Inc.**

**EXHIBIT A  
TO SOW #4 (IT SERVICES)**

**1. INTRODUCTION**

**1.1 Overview of Services**

- (a) This Exhibit A describes the specific Services to be provided by Supplier under this IT SOW, as well as the dependent or related Functions for which Health Net is retaining responsibility. It does so by means of a Scope Model – a table or tables that encompass the portions of Health Net’s operations and Operating Environment within the scope of or relevant to the Services under this IT SOW and maps the standard processes performed within the relevant area of operations (referred to as the Processes) against various categories of associated operational infrastructure components or services (referred to as Elements). Each cell of the Scope Model represents the intersection of a Process with an Element and designates the party (referred to as the Actor) responsible for performing that Process in relation to such Element. Where Supplier is designated as an Actor, the Scope Model describes which Functions Supplier is responsible for performing as part of the Services (the ‘What’), not the manner in which Supplier is responsible for performing them (the ‘How’). The manner in which Supplier is to perform the Services is set forth elsewhere in this IT SOW and the Agreement, including Exhibit A-3 and Exhibit B (Service Levels).
- (b) As part of the Services, Supplier will provide to and perform for Health Net the Functions for which Supplier is identified as being the responsible Actor in the Scope Model. As part of such responsibility, Supplier will perform the associated activities identified in Exhibit A-1-1 (Process Definitions), including the Embedded Processes that are required or relevant under the circumstances.
- (c) Health Net (or an Other Third Party for whom Supplier is not responsible) will be responsible for performing those Functions for which Health Net or such an Other Third Party is identified as the responsible Actor in the Scope Model, including the Embedded Processes that are required or relevant under the circumstances.
- (d) Except as otherwise provided in the applicable Schedule C – 11 Financial Responsibility Matrix, the responsible Actor designated in a Process-Element intersection is responsible not only for performing the indicated Process in relation to such Element, but also for providing all types of resources necessary to perform those Processes. Where Supplier is the designated Actor in a Process-Element intersection and another Actor is designated as having Financial Responsibility for providing certain types of resources (e.g., Equipment, Software, labor, facilities, third-party services, business processes, recruiting and training) required by Supplier to so perform, Supplier’s responsibility to perform is subject to Supplier receiving timely access to the required resources from the Actor designated as having Financial Responsibility for those resources.
- (e) Where the documents comprising this Exhibit A include references to specific resources (e.g., tools, systems, Equipment or Software) that will be used by Supplier in performing the Services, if Supplier implements any successors or replacements to such resources, the applicable references will be deemed to include such successor or replacement resources.

## 1.2 Additional Services

- (a) The IT Services include the Cross Functional Services described in Section 3 of Schedule A (*Cross-Functional Services*) and the Functions included as part of the Embedded Processes described in Section 4 of Schedule A (*Cross-Functional Services*), each as they relate to the Functions included as part of the IT Services. For clarity, this includes Supplier's responsibility to manage all activities performed by Supplier Managed Third Parties in accordance Section 3.8 (Managed Third Party Management Services) of Schedule A (*Cross-Functional Services*).
- (b) The IT Services also include all Functions performed by or associated with the Health Net personnel referenced in Schedule Z, all of which are either being transferred to Supplier or displaced by Supplier roles as a result of the execution of this IT SOW. Such Functions will be deemed to be part of the IT Services to be performed by Supplier as if expressly set forth in this IT SOW.

## 1.3 Quality Reviews

Without limiting Health Net's rights under Section 18 (*Audits and Records*) of the Terms and Conditions, Health Net reserves the right to perform quality reviews and audits of Supplier's performance of the IT Services when and to the extent it desires in its sole discretion. For the avoidance of doubt, Health Net is not obligated to perform any level of such quality reviews and audits, except to the extent required by applicable Law.

## 1.4 Reporting

Supplier shall generate and provide to Health Net (i) each operational report generated prior to the BPaaS Services Commencement Date, unless and until Health Net confirms in writing that such operational report is no longer required, (ii) such other operational reports as Health Net may reasonably request from time to time consistent generally with the level of operational reporting performed internally by Health Net prior to the BPaaS Services Commencement Date, and (iii) such modifications to or replacements for the foregoing reports as may be necessary to reflect changes to and evolutions of the IT Services during the term of this IT SOW.

## 1.5 Infrastructure Software - Mapping Products to Elements

The Infrastructure Software Scope Model lists the Infrastructure Elements Categories and assigns Actors roles to those Categories. The Elements applicable to each Category are listed in A-3 Elements Definitions. During Phase 1, Supplier and Health Net shall assign the Infrastructure Software running or anticipated to be running in either the Supplier Data Centers or at Health Net locations to the appropriate Infrastructure Software Elements. Following this exercise, all Infrastructure Software shall be assigned to an Infrastructure Software Element such that all Infrastructure Software is represented on the Infrastructure Scope Model.

## 1.6 Supplier Facilities

The Supplier Facilities from which Supplier is permitted to provide the Services are listed in Schedule F of the Agreement.

## 2. EXHIBIT A CONTENT

Exhibit A is comprised of this cover document and the following Exhibits:

<b>Table 1: Exhibits to IT SOW</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
1	<b>Exhibit A-1 (Scope Model)</b>	Contains the Scope Model for this IT SOW. It allocates among the pertinent Actors functional responsibility for the Processes that are relevant to the scope of this IT SOW. As a means of identifying required interactions between Supplier and Health Net, and between Supplier and other third-party providers of related products and services to Health Net, the Scope Model's scope of coverage is, by design, broader than the scope of Supplier's Services under this IT SOW. Exhibit A-1 includes the following additional Exhibits:
2		Exhibit A-1-1 ( <i>Process Definitions</i> ) sets forth the definitions of the Processes used in the Scope Model. The Process definitions are intended to provide industry-standard descriptions of the processes that are typically performed by companies in the area of operations that is within the scope of this IT SOW.
3		Exhibit A-1-2 ( <i>Element Definitions</i> ) sets forth the definitions of the Elements used in the Span axis of the Scope Model.
4	<b>Exhibit A-3 (Solution Description)</b>	Describes Supplier's solution for the provision of the IT Services. Exhibit A-3 includes the following additional Exhibits:
5		Exhibit A-3-1 ( <i>Solution Description – ITO Phase 1</i> )
6		Exhibit A-3-2 ( <i>Solution Description – ITO Phase 2</i> )
7		Exhibit A-3-3 ( <i>Solution Description – BPaaS Services</i> )
8		Exhibit A-3-4 ( <i>Solution Description – People / Processes</i> )
9		Exhibit A-3-6 ( <i>Solution Description – Security Solution</i> )

## 3. DEFINITIONS AND INTERPRETATION

The following terms, when used in this IT SOW, will have the meanings given them below unless otherwise specified or required by the context in which the term is used. Any capitalized term used but not defined in this Exhibit 2 will have the meaning indicated in Schedule W (Glossary) or elsewhere in the Agreement.

<b>Defined Term</b>	<b>Meaning</b>
<b>"Actor"</b>	An entity (or group within an entity) assigned functional responsibility for a Process-Element intersection in the Scope Model – <i>i.e.</i> , assigned responsibility for performing the indicated Process with respect to the indicated Element category.
<b>"Elements"</b>	Entries on the Span axis of a Scope Model. Elements may represent a category of components ( <i>e.g.</i> , Servers), services ( <i>e.g.</i> , Managed WAN), individual

<b>Defined Term</b>	<b>Meaning</b>
	products ( <i>e.g.</i> , VPN Concentrator or individual applications).
<b><i>“Other Third Party”</i></b>	An Actor other than Health Net or Supplier. Certain Other Third Parties may be identified by name in a Scope Model, others by the general designation of “Other Third Party,” and others by type of provider.
<b><i>“Operating Environment”</i></b>	Collectively, the Equipment, Software, systems, communications networks and connectivity, facilities, and other infrastructure components owned, controlled, or operated by Health Net (or its Affiliates or third-party services providers on behalf of Health Net and Service Recipients) and used to receive, use transmit and otherwise enjoy the benefits of the Services.
<b><i>“Processes”</i></b>	The groupings of activities on the Process axis of a Scope Model, which may pertain to an individual (level 3) process ( <i>e.g.</i> , Technology Architecture Development, Solution Development) or a group of related (level 2) processes ( <i>e.g.</i> , Domain Architecture, Solution Formation).
<b><i>“Service Delivery Environment”</i></b>	Collectively, the Equipment, Software, systems, communications networks and connectivity, facilities, and other infrastructure components owned, controlled, or operated by Supplier (or its Affiliates or other Subcontractors) and used by Supplier Personnel in rendering the Services.
<b><i>“Span”</i></b>	The axis of a Scope Model that depicts Health Net’s Operating Environment and / or Supplier’s Service Delivery Environment or, alternatively, categories of services that are relevant to the Processes on the Process axis of the Scope Model.

#### **4. KEEPING SCOPE MODEL DOCUMENTS UP TO DATE**

At least once a year during the IT SOW Term, and more often as necessary to reflect the effects of agreed Changes, the parties will review the Scope Model and update it (and, as necessary, the associated Process and Element definitions) to reflect the following:

- (a) Changes in any of the Actors or the responsibilities assigned to any of the Actors in the Scope Model; or
- (b) Additions, deletions, or other modifications to the Scope Model’s Span, including as necessary to reflect changes in the Health Net locations served by Supplier or in Supplier’s Service Delivery Centers.

In as much as the Scope Model documents the allocation of functional responsibility to Actors other than Health Net and Supplier, Health Net has the right to make unilateral changes in the

Scope Model from time to time to reflect changes in any of the Other Third Parties or their assigned responsibilities (including by (i) adding or deleting Elements (including adding new Elements to A-1-2 (*Element Definitions*)) or (ii) changing the designated Actor(s)) *provided* such changes do not alter Supplier's scope of Services or affect Supplier's performance of the Services in any material respect. Any such changes to the Scope Model will not be considered to be Changes for purposes of the Change Control Procedure. If such changes alter Supplier's scope of Services or affect Supplier's performance of the Services in any material respect, such changes will be handled via the Change Control Procedure.

**PROCESS DEFINITIONS**

*ValueChain*  
IT Process Definitions  
Version 3.1.0

**Table of Contents**

Section I. IT Process Definitions

Section II. Embedded Processes

Section III. Glossary

**I. IT Process Definitions**

Processes		Definitions
<b>1</b>	<b>Governance and Leadership</b>	
<b>1.1</b>	<b>IT Management</b>	
<b>1.1.1</b>	<b>IT Leadership</b>	<p>The purpose of “IT Leadership” is to lead the IT organization in delivering IT services that meet the business requirements of its Clients.</p> <p>IT Leadership includes the following activities:</p>
		1. Promoting and maintaining the alignment of IT services with the needs of its Clients;
		2. Leading the IT organization so as to deliver on the requirements and objectives of Clients, including:
		(a) Enabling Clients to exploit business opportunities and maximize their individual and collective potential;
		(b) Promoting the responsible use of IT assets and services; and
		(c) Providing macro-level guidance as to how, when and where IT is to deliver its services; and
		3. Promulgating the desired values, philosophies, strategies and performance of IT throughout the IT organization and the enterprise.
<b>1.1.2</b>	<b>IT Governance</b>	<p>The purpose of “IT Governance” is to establish the framework for decision rights and the platform for the oversight of the key aspects of the IT environment and services.</p> <p>IT Governance includes the following activities:</p>
		1. Assigning, establishing and enforcing decision rights throughout the IT organization;
		2. Establishing appropriate oversight of IT compliance, risk management, program management, IT finance, Client relations, performance management, actor management, service integration and other key aspects of IT, including:
		(a) Assigning personnel with responsibility to oversee the underlying functions;

Processes		Definitions
		(b) Providing adequate resources and authority to such personnel to carry out their oversight-based activities; and
		(c) Establishing committees and meetings, including assigning committee heads and establishing meeting schedules; and
		3. Reviewing recommendations, requests for review and other similar interactions from Process owners and, as applicable, Actors and providing feedback, including advice and consent when appropriate.
<b>1.1.3</b>	<b>Risk Management</b>	The purpose of “Risk Management” is to monitor, identify, assess and develop actions to mitigate and remediate IT risk.  Risk Management includes the following activities:
		1. Obtaining and maintaining a comprehensive understanding of all relevant aspects of the IT and Client environments that may give rise to Risk Events or may result in IT risk, including:
		(a) Systems associated with the delivery of IT services, including the access and storage points for confidential customer and Client information;
		(b) IT plans or other similar information that could help identify exposure to risks that could limit the enterprise’s ability to implement its strategic priorities;
		(c) Business recovery and continuity plans to gain insight into the critical systems and control environment;
		(d) Due diligence and monitoring activities associated with the management of External Actors;
		(e) IT operational reports providing information regarding potential performance or control issues;
		(f) Quality control reviews performed by Process or Element owners pertaining to controls that could help identify noncompliance with policy or areas of weakness;
		(g) IT audit findings that could shed light on the veracity and responsiveness of the Actors’ commitments to policy compliance and operational control; and
		(h) Viewpoints of Actors’ senior management as they pertain to resource limitations, real and perceived threats, priorities and key controls;

Processes	Definitions	
		2. Analyzing the IT and Client environments and associated information for the purpose of:
		(a) Identifying the universe of Risk Events;
		(b) Estimating the likelihood of occurrence of Risk Events;
		(c) Identifying and estimating the impact of Risk Events on the enterprise from the applicable perspectives (e.g., strategic, operational, financial, reputation) and that appropriately take into consideration lost revenue, flawed business decisions, data recovery and reconstruction time and expense, costs of litigation and potential judgments, loss of market share, and increases to premiums or denials of insurance coverage;
		(d) Developing comprehensive risk assessments of IT operations and activities; and
		(e) Developing Key Risk Indicators to enable monitoring of changes in risk.
		3. Documenting the identified risks in a “Risk Register” and sharing the content with other Actors as appropriate.
		4. Identifying and developing a prioritization of actions that is appropriate for the complexity of the enterprise that is designed to:
		(a) Reduce risk exposure; and
		(b) Establish mitigating controls for safe, sound and efficient IT operations;
		5. Reporting the recommended prioritization of actions to the applicable Process or Element owner(s) and incorporating feedback into the prioritization;
		6. Submitting appropriately approved actions to the applicable Process or Element owner(s);
		7. Monitoring, analyzing and reporting on risk reduction, mitigation and remediation activities, including the extent to which risk assessment and prioritization results are integrated into various operational aspects of IT, including:
		(a) Technology budgeting, investment and deployment decisions;

Processes		Definitions
		(b) Contingency planning;
		(c) Policies and procedures;
		(d) Controls;
		(e) Staffing and expertise;
		(f) Insurance;
		(g) Performance benchmarks;
		(h) Service levels; and
		(i) Policy enforcement and compliance; and
		8. Reviewing business requirements and proposed solutions, and providing feedback regarding risk and control to the applicable Process owner(s).
<b>1.1.4</b>	<b>Compliance Management</b>	<p>The purpose of “Compliance Management” is to cause all applicable External Compliance Requirements and External Actor Compliance Requirements to be fulfilled and to monitor the fulfillment of such requirements.</p> <p>Compliance Management includes the following activities:</p>
		1. Identifying the External Compliance Requirements applicable to the IT environment;
		2. Obtaining from External Actors, comprehensive written descriptions of their External Actor Compliance Requirements, including detailed statements describing how such requirements are being fulfilled;
		3. Developing, documenting and disseminating to Actors the policies designed to fulfill the External Compliance Requirements for the IT environment;
		4. Developing and documenting the procedures and controls designed to detect and prevent noncompliance with the External Compliance Requirements;
		5. Developing and implementing an ongoing compliance (i.e., External Compliance Requirements) and ethics training program for all Actors, including those at senior levels;
		6. Determining the extent to which the IT environment is in compliance with the External Compliance Requirements, including, when appropriate, implementing:

Processes	Definitions	
		(a) Auditing and monitoring systems designed to assist in the detection of noncompliance;
		(b) Systems to report or seek guidance regarding potential or actual noncompliance; and
		(c) Mechanisms designed to protect anonymity and confidentiality;
		7. Determining the extent to which External Actors are in compliance with their respective External Actor Compliance Requirements, including (when appropriate):
		(a) Obtaining from the External Actors appropriate written statements regarding their compliance with the requirements; and
		(b) Obtaining audits and assessments of External Actors by appropriately recognized independent organizations;
		8. Documenting and disseminating information regarding the compliance program to the applicable Process or Element owner(s) and other personnel as appropriate;
		9. Enforcing and encouraging compliance through appropriate mechanisms, including:
		(a) Establishing disciplinary and incentive measures; and
		(b) Documenting and reporting instances of noncompliance to the applicable Process or Element owner(s), offending Actors and other personnel as appropriate;
		10. Responding to and taking reasonable steps to prevent incidents of noncompliance with the External Compliance Requirements;
		11. Identifying personnel or Actors within the IT environment that have shown either a disregard for compliance or a tendency toward improper conduct and notifying the applicable Process owner(s) and other personnel as appropriate; and
		12. Reviewing business requirements and proposed solutions to:
		(a) Identify and communicate the applicable External Compliance Requirements; and
		(b) Provide feedback to the applicable Process or Element owner(s), including advice and consent.
<b>1.2</b>	<b>Client Relations</b>	

Processes		Definitions
1.2.1	<b>Internal Client Relationship Management</b>	<p>The purpose of “Internal Client Relationship Management” is to coordinate and manage the activities necessary to initiate, enhance and maintain the IT services that support Internal Clients.</p> <p>Internal Client Relationship Management includes the following activities:</p>
		1. Identifying Internal Clients;
		2. Acting as an advocate for Internal Clients with IT by promoting and actively seeking resolution of issues related to the delivery, performance and pricing of IT services;
		3. Obtaining issue handling and escalation requirements from Internal Clients and providing to the applicable Process owner(s);
		4. Tracking Internal Client issues, escalations and resolutions;
		5. Obtaining Internal Client interaction requirements and providing to the applicable Process owner(s);
		6. Facilitating IT service activities with Internal Clients;
		7. Advising Internal Clients of potential opportunities to create value using IT services;
		8. Working with Internal Clients to identify and specify strategic IT-related business missions, objectives and concepts, including obtaining the input of the applicable Process owner(s);
		9. Coordinating the provision of broad-based input (e.g., technical, resource, process) to Internal Clients regarding new business requirements that may affect the IT environment, including:
		(a) Guidance on technical solutions in the pre-business requirements development phase; and
		(b) Pricing, risk and duration information;
		10. Reviewing periodically with Internal Clients relevant information regarding ongoing and project-based activities, including IT delivery of Client-specific results regarding:
		(a) Performance (e.g., measures and metrics, performance credits);
		(b) Projects (e.g., pipeline, status, issues, supply limitations);
		(c) Financials (e.g., allocations, chargebacks, invoices); and

Processes		Definitions
		(d) Satisfaction surveys (e.g., Client, stakeholder);
		11. Reviewing the Service Catalog with Internal Clients and providing feedback to the applicable Process owner(s);
		12. Attending, as applicable and appropriate, Internal Client management meetings or other similar forums to provide perspective, support and feedback regarding the IT services, including planned future delivery capabilities and performance of IT services;
		13. Coordinating the provision of technical input and guidance into the development of Internal Client responses to requests for proposals or other similar constructs used by its customers for goods and/or services; and
		14. Attending Actor disagreement and dispute forums pertaining to issues with Internal Clients.
1.2.2	<b>External Client Relationship Management</b>	The purpose of “External Client Relationship Management” is to coordinate and manage the applicable activities necessary to initiate, enhance and maintain the IT services that support External Clients.  External Client Relationship Management includes the following activities:
		1. Identifying External Clients;
		2. Acting as an advocate for External Clients by promoting and actively seeking resolution of issues related to the delivery, performance and pricing of IT services;
		3. Obtaining issue handling and escalation requirements from External Clients and providing to the applicable Process owner(s);
		4. Tracking External Client issues, escalations and resolutions;
		5. Obtaining External Client interaction requirements and providing to the applicable Process owner(s);
		6. Facilitating IT service activities with External Clients;
		7. Coordinating the provision of input (e.g., technical, resource, process) to External Clients regarding new business requirements that may affect the IT environment, including:

Processes		Definitions
		(a) Guidance on technical solutions in the pre-business requirements development phase; and
		(b) Pricing, risk and duration information;
		8. Reviewing periodically with External Clients relevant information regarding ongoing and project-based activities, including IT delivery of Client-specific results regarding:
		(a) Performance (e.g., measures and metrics, performance credits);
		(b) Projects (e.g., pipeline, status, issues, supply limitations);
		(c) Financials (e.g., allocations, chargebacks, invoices); and
		(d) Satisfaction surveys (e.g., Client, stakeholder);
		9. Reviewing the Service Catalog with External Clients and providing feedback to the applicable Process owner(s); and
		10. Attending Actor disagreement and dispute forums pertaining to issues with External Clients.
<b>1.2.3</b>	<b>Demand Management</b>	The purpose of “Demand Management” is to align Internal Client demand and consumption of IT services with the applicable resource and operational constraints, and to optimize demand by coordinating requests across Internal Clients and encouraging standards.  Demand Management includes the following activities:
		1. Informing, directly or indirectly through the owner of Internal Client Relationship Management, Internal Clients of their consumption of IT services and, to the extent applicable, the ramifications of such behavior;
		2. Obtaining information regarding historical, current and future requests for IT services;
		3. Evaluating the impact (e.g., strategic, tactical, operational) on IT and its Internal Clients based on historical and expected future receipt of requests for IT services;
		4. Rationalizing demand by regular review of work pipelines and identifying opportunities for collaboration, standardization and reuse; and

Processes		Definitions
		5. Developing and promulgating methodologies and/or tools that help in capturing, documenting and managing the impact, decisions and results associated with consumption and demand behavior.
<b>1.3</b>	<b>Enterprise Architecture</b>	
<b>1.3.1</b>	<b>Enterprise Architecture Development</b>	<p>The purpose of “Enterprise Architecture Development” is to design the underlying IT framework that defines and describes the applicable characteristics of the IT-enabled platforms, information, applications and security required by Clients to attain their objectives and achieve their business visions.</p> <p>Enterprise Architecture Development includes the following activities:</p>
		1. Defining the guiding principles, high-level objectives and scope of architecture development;
		2. Identifying, documenting and assessing business requirements, drivers and mandates, including those derived internally and those derived from external sources such as External Clients, regulations and other compliance mandates;
		3. Identifying high-level alternative approaches, including transition timelines and interim states;
		4. Developing, documenting and disseminating the Enterprise Architecture deliverables for use by the applicable Process owner(s) of Domain Architecture;
		5. Defining the architectural deliverables to be developed by the applicable Process owner(s) of Domain Architecture, including:
		(a) Architectural-level deliverables (e.g., vision statement, IT industry best practices);
		(b) Conceptual-level deliverables (e.g., conceptual models, high-level event process models, event-process matrices);
		(c) Solution-level deliverables (e.g., logical models, detailed event process models); and
		(d) Implementation-level deliverables (e.g., detailed designs);
		6. Developing service continuity requirements, including:

Processes		Definitions
		(a) Identifying and documenting Client business recovery requirements, expectations and constraints;
		(b) Defining success criteria; and
		(c) Developing and providing service continuity plan requirements to the applicable Process owner(s); and
		7. Managing development of Domain Architecture, including:
		(a) Establishing timelines;
		(b) Identifying transition steps/interim states;
		(c) Providing instructions regarding deliverable timing and quality requirements; and
		(d) Measuring the performance of Domain Architecture.
<b>1.3.2</b>	<b>Domain Architecture Approval</b>	<p>The purpose of “Domain Architecture Approval” is to perform the activities necessary to evaluate and approve each Domain Architecture.</p> <p>Domain Architecture Approval includes the following activities:</p>
		1. Confirming that, both individually and collectively, the Domain Architecture deliverables will satisfy the requirements, drivers and mandates identified by the Enterprise Architecture;
		2. Confirming that individual Domain Architectures do not conflict with other Domain Architectures;
		3. Authorizing deviation from the requirements, drivers and mandates identified by the Enterprise Architecture; and
		4. Obtaining approvals from the appropriate personnel designated to approve Domain Architectures.
<b>1.3.3</b>	<b>Enterprise Architecture Approval</b>	<p>The purpose of “Enterprise Architecture Approval” is to perform the activities necessary to evaluate and approve the Enterprise Architecture.</p> <p>Enterprise Architecture Approval includes the following activities:</p>
		1. Confirming that the Enterprise Architecture requirements, drivers and mandates are necessary and sufficient to balance Client needs and constraints;

Processes		Definitions
		2. Confirming that the Enterprise Architecture will satisfy the requirements, drivers and mandates;
		3. Authorizing deviation from Client requirements, drivers and mandates; and
		4. Obtaining approvals from the appropriate personnel designated to approve Enterprise Architectures.
<b>1.4</b>	<b>Delivery Strategy</b>	
<b>1.4.1</b>	<b>Delivery Strategy Development</b>	The purpose of “Delivery Strategy Development” is to define how the IT services will be delivered.  Delivery Strategy Development includes the following activities:
		1. Developing alternative Delivery Models in response to changes in the underlying goals, objectives and Domain Architecture, as well as technologies and services available in the marketplace;
		2. Determining the assignment of Actor responsibility for each Element and Process (or groups thereof) pertinent to the Delivery Model such that the assignment supports the applicable Domain Architecture(s), the Enterprise Architecture, and the applicable Client needs;
		3. Determining high-level characteristics (e.g., internal, external, local, regional, global) of the Actors and their span of service delivery (e.g., geographic, Client, facility types, technology grouping);
		4. Using Delivery Model constructs to develop detailed statements of responsibility for each Actor;
		5. Defining and documenting delivery requirements to be incorporated into sourcing strategies by the applicable Process owner(s) of Sourcing Strategy Development, including:
		(a) Strategic segmentation of the Processes;
		(b) Advice and consent guidelines regarding selection of Actors;
		(c) Service delivery integration requirements, including, as applicable, specific process and tool platforms;
		(d) Interaction requirements between Actors;

Processes		Definitions
		(e) Application of specific commercialization models;
		(f) Use of various service delivery performance regimes, measures and metrics;
		(g) Use of specific procurement processes; and
		(h) Required level of organizational readiness; and
		6. Developing requirements for the integration of Actors.
<b>1.4.2</b>	<b>Delivery Strategy Approval</b>	The purpose of “Delivery Strategy Approval” is to perform the activities necessary to evaluate and approve the delivery strategy, including the Delivery Models.  Delivery Strategy Approval includes the following activities:
		1. Confirming that the Delivery Models and delivery requirements satisfy the underlying goals, objectives, and the applicable Client need, and comply with, or have received the necessary exceptions from the applicable Process owner(s) of Enterprise Architecture and Domain Architecture; and
		2. Obtaining approvals from the appropriate personnel designated to approve delivery strategies.
<b>1.5</b>	<b>Sourcing Strategy</b>	
<b>1.5.1</b>	<b>Sourcing Strategy Development</b>	The purpose of “Sourcing Strategy Development” is to identify the actions necessary to achieve the commercial aspects associated with the configuration of Actors described in the delivery strategy, and to maintain alignment between these actions, the marketplace and Client requirements.  Sourcing Strategy Development includes the following activities:
		1. Analyzing organizational strategies, plans and constraints;
		2. Identifying sourcing objectives, desired outcomes and potential risks;
		3. Developing and documenting sourcing strategies;
		4. Identifying, prioritizing and sequencing (e.g., parallel, serial, staggered) and scheduling the number and type of sourcing activities to be performed in a given timeframe; including:

Processes	Definitions
	(a) Developing mechanisms to describe the relative sequence and timing for the major aspects of the sourcing activities for each underlying transaction; and
	(b) Identifying and documenting the points of linkage or dependence between the transactions;
	5. Developing performance measures to track the effectiveness of sourcing strategies against organizational performance;
	6. Tracking the achievement of the sourcing strategies;
	7. Obtaining and analyzing market information and trends, including with respect to services and suppliers;
	8. Identifying suppliers capable of performing the responsibility(ies) as allocated in the relevant delivery strategy and satisfying the associated delivery requirements, including:
	(a) Identifying the tier(s) or other segmentation schemas of suppliers to be considered for those components of IT services to be sourced externally;
	(b) Documenting the specific portfolio of suppliers to be considered for transactions;
	(c) Determining special handling requirements with respect to expected changes in the then-current population of External Actors providing components of IT services; and
	(d) Identifying supplier integration requirements (e.g., technical, commercial, process);
	9. Determining whether changes to the existing portfolio of Actors would be beneficial;
	10. Identifying, in response to new Delivery Models or need for supplier replacement, optimal methods of procuring and/or divesting (e.g., competitive procurement, termination of External Actors, renewal of External Actors, expansion/contraction of External Actor responsibility) those components of IT services to be performed by suppliers;
	11. Developing mature, standardized and repeatable sourcing transaction approaches and process models;
	12. Identifying and documenting the commercial terms required to achieve the desired level of Actor integration, interoperability and independence;

Processes		Definitions
		13. Confirming that the sourcing strategy will satisfy the delivery strategy; and
		14. Obtaining approvals from the appropriate personnel designated to approve sourcing strategies.
<b>1.5.2</b>	<b>Sourcing Execution</b>	The purpose of “Sourcing Execution” is to conduct the specific sourcing activities to establish or modify commercial relationships with Actors.  Sourcing Execution includes the following activities:
		1. Obtaining and reviewing sourcing strategies;
		2. Preparing for and initiating activities related to contracts or services to be renewed, re-competed or restructured;
		3. Developing transaction structures;
		4. Developing transaction-based organizational structures and teams;
		5. Developing communication requirements and providing to the applicable Process owner(s);
		6. Preparing requirements packages that define the products and/or services to be sourced;
		7. Soliciting and reviewing supplier proposals in response to requirements packages;
		8. Using an appropriate mix of objective and subjective measures to determine entities that best meet the specified requirements;
		9. Negotiating statements of work, implementation solutions, Service Level Agreements, pricing and business terms, including other operational, financial, regulatory or legal aspects relevant to transactions;
		10. Preparing and negotiating contractual documents;
		11. Obtaining approvals from the appropriate personnel designated to approve sourcing transactions; and
		12. Executing contractual documents.

Processes		Definitions
<b>1.5.3</b>	<b>Sourcing Approval</b>	<p>The purpose of “Sourcing Approval” is to perform those activities necessary to evaluate and approve new commercial arrangements and changes to existing commercial arrangements.</p> <p>Sourcing Approval includes the following activities:</p>
		1. Confirming that sourcing transactions are sufficient and appropriately balance stakeholder needs and constraints, including with respect to timing and overall solution;
		2. Confirming that sourcing transactions satisfy the delivery and sourcing strategies, and are otherwise reasonable;
		3. Confirming that the costs and benefits of sourcing transactions meet the requisite hurdles, including those for investment approval;
		4. Confirming that the appropriate risk analyses have been performed and the identified risks are adequately mitigated and in line with the applicable standards;
		5. Confirming that the organizational impact of sourcing transactions has been appropriately considered, including as it pertains to Clients;
		6. Obtaining stakeholder buy-for sourcing transactions; and
		7. Obtaining approvals from the appropriate personnel designated to approve sourcing transactions.
<b>1.6</b>	<b>IT Finance</b>	
<b>1.6.1</b>	<b>Financial Control</b>	<p>The purpose of “Financial Control” is to identify, measure, accumulate, analyze, prepare, interpret and communicate IT-based financial and related information.</p> <p>Financial Control includes the following activities:</p>
		1. Establishing financial policies and formulating financial plans that will subsequently be expressed in financial terms;
		2. Providing guidance for financial management decisions, including the generation, analysis, presentation and interpretation of various financial and other related information;

Processes		Definitions
		3. Contributing to the monitoring and control of financial performance through the provision of reports, analysis and interpretation of such reports, and the implementation of financial controls;
		4. Contributing to periodic reporting of accounting as required by statute or regulation for shareholders, government agencies and other parties external to the business;
		5. Obtaining and reviewing relevant financial and other related information for all Actors; and
		6. Reporting financial issues, concerns and risks to the applicable Process owner(s).
<b>1.6.2</b>	<b>Budgeting and Forecasting</b>	<p>The purpose of “Budgeting and Forecasting” is to (a) develop a comprehensive IT budget, including funding allocations and expense constraints, (b) establish a framework for operational units of Internal Actors to track and manage against their respective budgets, including capital and operational budgets, and (c) forecast future budget requirements.</p> <p>Budgeting and Forecasting includes the following activities:</p>
		1. Determining IT budgets and how such budgets will be allocated across each Actor’s various operational units, including:
		(a) Developing, maintaining and disseminating budget guidelines and parameters (e.g., standards, frameworks, timelines and other principles), which guidelines and parameters are intended to govern the creation and management of budgets;
		(b) Providing assistance to Internal Actors in developing budgets;
		(c) Collecting and compiling each Actor’s budgets;
		(d) Reviewing and confirming that Actor-developed budgets comply with the relevant budget guidelines and parameters, and advising Actors of discrepancies; and
		(e) Obtaining approvals from the appropriate personnel designated to approve budgets;
		2. Measuring and reporting on actual financial performance as compared to the budget; and

Processes		Definitions
		3. Forecasting and reporting future budget performance.
<b>1.6.3</b>	<b>Allocation and Chargeback</b>	<p>The purpose of “Allocation and Chargeback” is to use resource accounting, cost allocation, and chargeback systems to accurately and equitably allocate the cost of IT services to Clients.</p> <p>Allocation and Chargeback includes the following activities:</p>
		1. Understanding the scope of services provided by each Actor and the associated pricing or costs;
		2. Understanding the services and charges included within the Service Catalog and working with the applicable Process owner(s) of Service Catalog Management to revise such charges when warranted;
		3. Obtaining and analyzing IT service consumption information by relevant Client or other grouping;
		4. Assigning IT service costs to appropriate financial organizational groups (e.g., cost centers); and
		5. Implementing and administering a chargeback system that records, allocates and communicates IT service costs in an understandable, controllable manner.
<b>1.6.4</b>	<b>Invoice Review</b>	<p>The purpose of “Invoice Review” is to confirm that invoices submitted by Actors and other IT-based suppliers are proper and accurate.</p> <p>Invoice Review includes the following activities:</p>
		1. Obtaining invoices from Actors and other suppliers;
		2. Reviewing invoices to confirm they are:
		(a) Not previously paid or in the process of being paid;
		(b) For goods and services that were approved to be purchased;
		(c) For the correct amounts in the correct currencies;
		(d) Appropriately adjusted for available credits and/or rebates; and
		(e) Consistent with the terms of the underlying commercial arrangements;

Processes		Definitions
		3. Administering invoices that do not conform to expectations or that prompt questions, including:
		(a) Tracking the status of such invoices;
		(b) Communicating and working with the entities that rendered such invoices to determine the proper handling;
		(c) Obtaining suitably revised invoices or adequate additional information to enable the continuation of the invoice review process;
		(d) Rejecting invoices where suitably revised invoices or adequate additional information does not enable continuation of the invoice review process; and
		(e) Escalating invoices to the owner of Commercial Management and other personnel as appropriate when the invoice issuer will not cooperate with resolution of the issue or provide reasonably requested supporting information;
		4. Verifying that the goods and services referenced on invoices were actually received and of the appropriate quantity and quality;
		5. Coordinating with the appropriate personnel to properly identify invoices and answer questions regarding the invoices;
		6. Assigning the applicable financial or other coding (e.g., cost center numbers) to invoices; and
		7. Submitting invoices to the owner of Invoice Approval.
<b>1.6.5</b>	<b>Invoice Approval</b>	The purpose of “Invoice Approval” is to approve payment of reviewed invoices.  Invoice Approval includes the following activities:
		1. Obtaining invoices from the owner of Invoice Review;
		2. Reviewing invoices for proper coding and timely submission;
		3. Confirming the appropriateness of payment of invoices;
		4. Verifying that payment amounts match their corresponding invoices (as appropriately adjusted for available credits and rebates);
		5. Obtaining approvals from the appropriate personnel designated to approve invoices; and

Processes		Definitions
		6. Submitting approved invoices to the owner of Invoice Payment.
1.6.6	<b>Invoice Payment</b>	The purpose of “Invoice Payment” is to pay approved invoices.  Invoice Payment includes the following activities:
		1. Obtaining invoices from the owner of Invoice Approval; and
		2. Issuing payment of invoices in the proper form (e.g., check, ACH, wire), currency and timeframe.
2	<b>Service Management and Integration</b>	
2.1	<b>Actor Management</b>	
2.1.1	<b>Services Management</b>	The purpose of “Services Management” is to collect, understand and communicate to the applicable supply-side Process owner(s) of Service Delivery Management the demands of the IT enterprise, to work with the applicable supply-side Process owner(s) of Service Delivery Management, and to monitor and to evaluate the manner in which the demands of the IT enterprise are being met.  Services Management includes the following activities:
		1. Obtaining, organizing and validating the relevant drivers of demand for IT services by Clients and the IT environment in general from the applicable Process owner(s);
		2. Gaining and maintaining a comprehensive understanding of:
		(a) How each Process owner delivers its IT services;
		(b) Actor performance from both objective (e.g., SLA) and subjective perspectives;
		(c) The appetite for risk in the enterprise as it relates to operational IT service delivery alternatives;
		(d) The scope of services provided by the applicable Actors (e.g., the Service Catalog) and the costs and benefits of ordering services within the existing scope, expanding or contracting the existing scope, or ordering services that are not currently in scope for a given Actor; and

Processes	Definitions
	<p>(e) Each applicable External Actor's capabilities pertaining to its service delivery role both in the IT environment and for third parties receiving similar services from such External Actor;</p>
	<p>3. Establishing and maintaining a close working relationship with the applicable Process owner(s) of Service Delivery Management;</p>
	<p>4. Acting as an advocate for the demand side of the IT environment, Clients and the enterprise, including:</p>
	<p>(a) Providing relevant information to the applicable Process owner(s) of Service Delivery Management, including historical and institutional knowledge regarding the systems, data, configuration, organization, Clients, culture and preferences of the enterprise;</p>
	<p>(b) Establishing and communicating the demand-side service delivery expectations and demand drivers to the applicable Process owner(s) of Service Delivery Management; and</p>
	<p>(c) Enforcing accountability among the applicable Process owner(s) of Service Delivery Management for meeting the enterprise's demands for action, quality, cooperation, urgency and improvement pertaining to the delivery of IT services consistent with the capabilities and broad commitments made by the applicable Process owner(s) of Service Delivery Management and other applicable service delivery Actors;</p>
	<p>5. Taking the actions necessary with the applicable Process owner(s) of Service Delivery Management to minimize both the effect and number of instances of service-impacting episodes on the enterprise;</p>
	<p>6. Verifying that External Actor obligations regarding the External Actor personnel are fulfilled, including (when appropriate):</p>
	<p>(a) Screening the External Actor personnel consistent with the applicable policies before instituting such personnel within, or in support of, the IT and Client environments;</p>

Processes	Definitions
	(b) Reviewing the résumés of candidates submitted for review by External Actors, interviewing those selected for further review and providing feedback, including advice and consent;
	(c) Providing feedback, including advice and consent, to External Actors regarding their proposed changes to the then-current personnel fulfilling positions designated as key;
	(d) Validating that External Actors provide a sufficient number of personnel who possess the requisite education, skills and certification to provide the IT services; and
	(e) Advising External Actors of the need to remove certain of the External Actor personnel from providing IT services within or in support of the IT or Client environments;
	7. Reviewing policy and procedure manual documentation that is developed and submitted by Actors for review and approval, including:
	(a) Requesting and obtaining feedback on such documentation by the applicable Process owner(s) and other personnel as appropriate; and
	(b) Providing feedback to the submitting Actors, including advice and consent;
	8. Enforcing External Actor obligations regarding the use of subcontractors, including:
	(a) Obtaining and reviewing information from the applicable Process owner(s) regarding the performance of the subcontractors of External Actors;
	(b) Approving and rejecting External Actor requests to make changes to both its portfolio of approved subcontractors and scope of responsibilities to be subcontracted; and
	(c) Determining if previously approved subcontractors of an External Actor are no longer acceptable for use within or in support of the IT and Client environments, or parts thereof, and advising, as appropriate, the relevant Actor(s) and applicable Process owner(s) of Commercial Management;

Processes		Definitions
		9. Obtaining and reviewing documentation and other relevant information regarding deliverables produced by Actors, including requests by Actors for the acceptance of deliverables, and providing feedback, including advice and consent when appropriate to the relevant Actor(s) and applicable Process owner(s);
		10. Attending IT service delivery-related meetings, both recurring and ad hoc, including those where the applicable Process owner(s) of Service Delivery Management may also be present, and providing input, including (when appropriate):
		(a) Making recommendations;
		(b) Providing historical, Client or other information regarding the IT environment and the enterprise;
		(c) Countermanding decisions by other Process owner(s), including those of Service Delivery Management; and
		(d) Waiving an Actor's SLA obligations;
		11. Verifying that the applicable Process owner(s) of Service Delivery Management follow through with their short- to long-term service delivery commitments;
		12. Articulating the short- to long- term results of a comprehensive set of service delivery characteristics to the applicable Process owner(s), the enterprise and other personnel, as appropriate, including the:
		(a) Status, activities and timeframes regarding noteworthy Incidents and Problems, both ongoing and resolved;
		(b) Type, duration and purpose of IT change that will impact the enterprise;
		(c) Performance and financial shortfalls of service delivery Actors; and
		(d) Delivery and integration shortcomings of service delivery Actors (e.g., management, knowledge, personnel, process, organization, culture, tools);
		13. Escalating issues that cannot be reasonably resolved with the applicable Process owner(s) of Service Delivery Management to the applicable Process owner(s) or other appropriate personnel; and

Processes	Definitions	
		14. Attending Actor disagreement and dispute forums regarding matters pertaining to IT service delivery.
2.1.2	<b>Incident Oversight</b>	<p>The purpose of “Incident Oversight” is to oversee, inform and communicate to the applicable Process owner(s) of Incident Management and other Processes the relevant preferences for resolving Incidents, work with the applicable Process owner(s) of Incident Management to plan for, monitor and evaluate the manner in which Incidents are addressed and, if necessary, to take over various operational roles pertaining to the handling of an Incident.</p> <p>Incident Oversight includes the following activities:</p>
		1. Gaining and maintaining a comprehensive understanding of each delivery Actor’s role as it pertains to the management and resolution of Incidents, including, for the Process owner(s) of Incident Management and Incident Management Execution, their relevant methodologies, processes and tools;
		2. Establishing and maintaining a close working relationship with the applicable Process owner(s) of Incident Management and Incident Management Execution;
		3. Acting as an advocate for the demand side of the IT environment, Clients and the enterprise; including:
		(a) Gaining and maintaining an understanding of the perspectives and preferences of Clients, the enterprise and IT leadership regarding the handling of Incidents;
		(b) Establishing and communicating the demand-side Incident resolution expectations to the applicable Process owner(s), including Incident Management;
		(c) Providing information to the applicable Process owner(s) of Incident Management regarding notices to be issued regarding Incidents; and
		(d) Enforcing accountability among the applicable Process owner(s) of Incident Management and other relevant Processes for meeting the enterprise’s demands for action, quality, cooperation and urgency pertaining to the management and resolution of Incidents;
		4. Overseeing all Incidents across their lifecycles, including:

Processes	Definitions
	(a) Gaining information about Incidents from the applicable Process owner(s) of Incident Management, Incident Management Execution and other relevant Processes, including attending recurring or ad hoc meetings where Incidents are being discussed;
	(b) Obtaining and evaluating information regarding the management and resolution of Incidents, including the personnel and other resources assigned to specific Incidents;
	(c) Obtaining and providing available information (e.g., historical, Client) regarding the IT environment and the enterprise that is reasonably requested by the applicable Process owner(s) of Incident Management or that could be of importance to the resolution of Incidents by the applicable Process owner(s) of Incident Management, Incident Management Execution and other Processes;
	(d) Acting as an intermediary between the applicable Process owner(s) of Incident Management and the applicable internal personnel of the enterprise (e.g., Clients, IT leadership, other Process owners) to facilitate temporary change in resource allocation, policy or requirements to help mitigate the impact of an Incident;
	(e) Reviewing proposed Incident resolution solutions and providing input and preferences to the Process owner(s) of Incident Management;
	(f) Requesting alternative Incident resolution solutions from the Process owner(s) of Incident Management when proposed solutions do not meet the needs and preferences of Clients, the enterprise or IT leadership;
	(g) Mandating specific actions and/or solutions to be implemented by the Process owner(s) of Incident Management in response to an Incident;
	(h) Waiving an Actor's SLA obligations;
	(i) Evaluating the effectiveness of the applicable Process owner's(s') performance of Incident Management and other Processes as it pertains to an Incident and, when deemed warranted, taking control of Incident Management and/or other Processes as necessary for such Incident;

Processes		Definitions
		(j) Declaring disasters in the IT environment and setting in motion the applicable components of the ITBCP and/or the equivalent for External Actors; and
		(k) Providing informative updates regarding the resolution of Incidents to the Process owner(s) of Services Management for communication to the applicable personnel; and
		5. Escalating issues that cannot be reasonably resolved with the applicable Process owner(s) of Incident Management to the applicable Process owner(s) or other appropriate personnel.
<b>2.1.3</b>	<b>Commercial Management</b>	The purpose of “Commercial Management” is to manage the commercial aspects of relationships with External Actors so that the underlying arrangements are in line with the needs of the IT environment.  Commercial Management includes the following activities:
		1. Understanding all aspects of the then-current contractual agreements with External Actors;
		2. Serving as the primary point of contact for Internal Actors for the interpretation and modification of contractual agreements with External Actors;
		3. Managing and administering contractual agreements with External Actors, including:
		(a) Reviewing the circumstances regarding an External Actor’s rejection of requests for service where the pricing and other terms are already specified in such Actor’s service agreement, and working with the applicable Actor to resolve such matters;
		(b) Tracking and providing the requisite notices and other contract-based information to the applicable Actors;
		(c) Tracking and reporting actual costs incurred against contractual commitments;
		(d) Monitoring and verifying performance with respect to all Actor obligations;
		(e) Obtaining budgets and budget projections in the appropriate format;

Processes	Definitions
	(f) Validating the assessment, calculation and payment of credits related to service level failures and other types of credits and rebates;
	(g) Validating the assessment, calculation and payment of variable unit rate charges and adjustments (e.g., ARCs, RRCs and actual volumes versus baseline volumes);
	(h) Monitoring and validating COLA adjustments;
	(i) Reviewing and negotiating to conclusion the proposed contract changes of External Actors to implement requested change to the IT environment or IT services;
	(j) Reviewing the outcomes of dispute-based processes, forums and committees, and developing and negotiating to conclusion the corresponding contract changes (if any) to implement the agreed-to changes;
	(k) Revising service agreements with Actors to reflect properly authorized changes in scope, services, service levels and other conditions; and
	(l) Monitoring and reporting on expiring contracts and contracts intended to be renewed, re-competed or restructured;
	4. Recording the decisions and accommodations made with respect to External Actors and providing such information to the applicable Process owner(s);
	5. Inspecting, examining and auditing the systems, records, data, practices and procedures of External Actors used in rendering IT services or pertain to IT services (e.g., invoices for services, allocation of credits, determination of costs, asset counts, regulatory compliance, service level reports, number of personnel or FTE, quality and skill sets of personnel, personnel turnover rates, service continuity plans, procedure manuals);
	6. Identifying, documenting, and reporting instances of External Actor noncompliance with standards or contracted terms to the applicable Process owner(s) and other personnel as appropriate;
	7. Attending all Actor disagreement and dispute forums and presiding over those of a commercial nature; and
	8. Performing the oversight and administrative functions associated with Third Party Contract Managers, including:

Processes		Definitions
		(a) Providing the applicable notices regarding the addition or removal of Third Party Contracts from the pool(s) of such contracts to be managed by Third Party Contract Managers;
		(b) Developing and promulgating the commercial policies and standards to be enforced and performed by Third Party Contract Managers;
		(c) Developing and promulgating the guidelines for Third Party Contract Managers to use in negotiating, documenting, implementing and revising Third Party Contracts, including, as applicable, providing or reviewing contract templates;
		(d) Reviewing the strategic and operational plans of Third Party Contract Managers pertaining to the management of Third Party Contracts, and providing feedback, including advice and consent;
		(e) Reviewing the supplier selection processes and negotiation strategies of Third Party Contract Managers and providing feedback, including advice and consent;
		(f) Issuing orders to Third Party Contract Managers to revise the terms of a Third Party Contract (e.g., scope, performance, pricing, commercials) and appropriately reviewing and approving such modifications;
		(g) Reviewing the assessments and recommendations of Third Party Contract Managers pertaining to poorly performing Third Party Contracts and providing feedback, including advice and consent; and
		(h) Reviewing reports developed by Third Party Contract Managers showing the Third Party Contracts with upcoming term-based events (e.g., renewal, expiration) and providing feedback regarding the desired outcome for each.
2.1.4	<b>Actor Integration</b>	<p>The purpose of “Actor Integration” is to integrate the non-technical aspects of Actors into a cohesive IT service delivery fabric that is prepared with adequate knowledge of the traditions, customs and policies of the IT environment and Client perception of the IT services.</p> <p>Actor Integration includes the following activities:</p>

Processes		Definitions
		1. Obtaining from the applicable Process owner(s) (e.g., IT Management, Client Relations), Clients, Actors and other personnel as appropriate, insight and information regarding the fit of Actors and their personnel within the enterprise and the IT environment;
		2. Providing Actors with the information necessary to operate within the IT environment in an informed manner, including the:
		(a) Relevant policies, procedures and standards;
		(b) Roles and responsibilities of all Actors;
		(c) Leadership and governance structures, including the assignment and manner of enforcement of decision rights;
		(d) Cultural norms of the IT environment and the relevant similar aspects of the enterprise;
		(e) Business(es) of the enterprise, including its general drivers, risks, direction, priorities, concerns and trends; and
		(f) Confidentiality requirements of each Actor as it pertains to other Actors needing to access its owned or managed facilities and resources;
		3. Providing External Actors with the applicable information (e.g., policies, procedures, controls, regulatory requirements, standards, guidelines) regarding:
		(a) Accessing the networks or facilities in the IT and Client environments;
		(b) Screening of External Actor personnel as required, including the collection of relevant biometric data (e.g., fingerprints, retina scans) before such personnel perform IT services within, or in support of, the IT or Client environments;
		(c) Off-boarding of External Actor personnel, including, as applicable, the return of security badges, keys and confidential information, and terminating access privileges to systems and data within the IT and Client environments;
		(d) Subcontracting; and
		(e) Accessing, using and managing Client information;

Processes	Definitions	
		4. Informing Actors of the expectations regarding their assimilation into the non-technical aspects of the IT environment; including the:
		(a) Mechanisms to be used in evaluating such assimilation; and
		(b) Methods by which issues occurring between Actors are expected to be resolved;
		5. Facilitating communication, role clarity and non-technical process definition between and among Actors, certain strategic Internal Actor Process owners, Clients and other personnel as appropriate, including:
		(a) Maintaining updated contact information for the relevant personnel associated with all Actors, relevant Client personnel and other personnel as appropriate; and
		(b) Maintaining current organizational information for the IT environment and the enterprise;
		6. Establishing methods and forums in which Actors can exchange information and ideas to:
		(a) Enhance the camaraderie among the personnel of all Actors; and
		(b) Improve the mechanisms used to keep Actors informed of relevant changes;
		7. Obtaining, analyzing and, as appropriate, sharing with Actors, information from Clients regarding relevant Actor characteristics (e.g., stakeholder satisfaction surveys);
		8. Providing a forum for the resolution of disagreements and disputes among Actors and between Actors and Clients, including acting as a central point of contact for:
		(a) Registering Actor and Client disagreements and disputes;
		(b) Scheduling Actor disagreement and dispute forums and informing Actors, Clients and other personnel of their need to participate in such forums;
		(c) Requesting Actors to provide information and resources in advance of or during Actor disagreement and dispute forums to help facilitate orderly, efficient and valuable analysis and discussions; and

Processes		Definitions
		(d) Publishing the outcomes from Actor disagreement and dispute forums to the applicable Actors, Process owner(s), Clients and other personnel; and
		9. Attending all Actor disagreement and dispute forums and presiding over those that are not of a commercial nature.
2.1.5	<b>HR Management</b>	The purpose of “HR Management” is to design and implement an HR framework for the workforce of Internal Actors.  HR Management includes the following activities:
		1. Maintaining a current understanding of the HR-based requirements (e.g., staffing levels, skill sets, work locations) of that part of the IT environment performed by Internal Actors, including the timeframes in which such requirements are needed;
		2. Developing, in compliance with the applicable regulations, the strategies, programs, policies, channels and requirements for the Internal Actors to:
		(a) Evaluate personnel to determine their individual capabilities (e.g., skill sets, performance levels, trainability, aptitude);
		(b) Determine the optimal approach for obtaining the required workforce with the required skills in the required locations at the required times;
		(c) Acquire the relevant training for personnel designated to be re-trained, measure the success of such training and adapt accordingly;
		(d) Release personnel, including by transfer to External Actors;
		(e) Recruit and on-board personnel, including by transfer from External Actors;
		(f) Communicate changes with respect to personnel (e.g., relocation, outsourcing, outsourcing re-badging, layoffs, training, recruiting, evaluation, compensation);
		(g) Provide career path plans;
		(h) Develop succession plans;
		(i) Determine compensation levels, including periodic adjustments and bonuses; and

Processes		Definitions
		(j) Implement compensation and benefit changes;
		3. Obtaining and reviewing solutions developed by External Actors and prospective External Actors that involve the transfer of Internal Actor personnel to such External Actors and providing feedback to the applicable Process owner(s) and other personnel as appropriate;
		4. Obtaining, reviewing and appropriately fulfilling requests for information regarding Internal Actor personnel made by External Actors and prospective External Actors to facilitate the transfer of such personnel to such External Actors;
		5. Developing and communicating plans to accommodate the onboarding of External Actor personnel to the applicable Process owner(s), External Actors and other personnel as appropriate; and
		6. Attending Actor disagreement and dispute forums pertaining to personnel issues.
<b>2.1.6</b>	<b>Organizational Change Management</b>	The purpose of “Organizational Change Management” is to prepare the workforce of Internal Actors for major change initiatives.  Organizational Change Management includes the following activities:
		1. Preparing, motivating and equipping personnel to successfully address the challenges associated with change initiatives;
		2. Identifying change owners and associated stakeholders, and establishing and implementing sponsorship for organizational change activities;
		3. Assessing readiness for organizational change and developing strategies and mitigation plans to adequately address shortcomings;
		4. Communicating results of organizational change readiness assessments to stakeholders;
		5. Identifying and implementing methods, procedures, and approaches for managing organizational change;
		6. Identifying and taking action to address barriers and resistance to change; and
		7. Managing internal and external change-related communications.

Processes		Definitions
2.2	<b>Portfolio Management</b>	
2.2.1	<b>Service Catalog Management</b>	<p>The purpose of “Service Catalog Management” is to develop and maintain a complete list of the IT services offered to Clients.</p> <p>Service Catalog Management includes the following activities:</p>
		1. Developing, documenting and communicating policy regarding the content to be maintained within the Service Catalog;
		2. Producing and maintaining a Service Catalog and its contents, in alignment with the applicable Processes;
		3. Defining, for each item listed in the Service Catalog the relevant information, including:
		(a) A description of the service;
		(b) The expected timeframe or service level for fulfilling the service;
		(c) Who is entitled to request the service;
		(d) The charge (if any) of obtaining the service; and
		(e) How to order the service, including the required approvals; and
		4. Interacting with the applicable Process owner(s) to obtain insight into changes to be incorporated in the Service Catalog.
2.2.2	<b>Performance Management</b>	<p>The purpose of “Performance Management” is to develop a performance regime that provides systems of measurement for IT services.</p> <p>Performance Management includes the following activities:</p>
		1. Obtaining the performance requirements, including through discussions with the applicable Process owner(s) of Client Relations, Services Management, Incident Oversight, Service Delivery Management, Commercial Management and Actor Integration;
		2. Developing performance measures and associated levels to help meet the business requirements of Clients and to help verify that the IT environment functions as designed;

Processes	Definitions
	3. Developing performance terms to be included in SLAs (e.g., performance reporting, changes to measures and levels, financial and non-financial implications of non-performance) and providing such information to the applicable Process owner(s);
	4. Developing SLAs for the:
	(a) IT service responsibilities of Actors; and
	(b) IT services to be provided to Clients;
	5. Developing, maintaining and analyzing stakeholder satisfaction surveys (e.g., IT executives, Client executives, Client end users) designed to understand the extent to which the services of IT or a specific Actor are meeting the needs;
	6. Reviewing Actor-developed plans to resolve shortcomings identified by stakeholder satisfaction surveys and related mechanisms, and providing feedback to the applicable Process owner(s), including Services Management and, as appropriate, the relevant Actors and Clients;
	7. Assessing various technologies, products and services related to the management of performance-based information;
	8. Establishing and promulgating requirements for performance measurement, reporting and integration;
	9. Obtaining performance reports, including:
	(a) SLA reporting from the applicable Process owner(s), including Service Level Management; and
	(b) Quality control reviews performed by the applicable Process owner(s);
	10. Reviewing performance reports to identify performance and quality shortfalls, trends and other information of value to the performance regime, Actors or other Process owners, including:
	(a) Verifying the correct calculation of incentive and disincentive payments/credits;
	(b) Validating the information provided and comparing such information with Client-perceived experience; and

Processes		Definitions
		(c) Verifying that adequate quality control reviews are performed by the applicable Process owner(s) and that the results of such reviews are captured, analyzed and used by the Process owner(s) to implement the necessary corrective action(s);
		11. Discussing performance results and reporting with the applicable Process owner(s), including those of Service Level Management, to understand the underlying issues, problems and shortfalls and, to the extent applicable, commitments by Actors to resolve such matters;
		12. Developing recommendations regarding the acceptance or waiver of specific service level credits;
		13. Identifying SLA-enabled changes (e.g., re-balancing the allocation of service level credits, changing the portfolio of critical service levels, adding/deleting service measures) to Actor-specific performance requirements to help achieve the desired outcomes; and
		14. Developing and publishing reports and recommendations for the applicable Process owner(s) to discuss, as appropriate, performance related matters with Actors and Clients, including changes to be made to SLAs, stakeholder satisfaction surveys and quality control reviews.
<b>2.2.3</b>	<b>Benchmarking</b>	The purpose of “Benchmarking” is to determine performance characteristic differences between those produced by the IT environment and other applicable operations and standards.  Benchmarking includes the following activities:
		1. Maintaining knowledge of the relevant geographic-, Client- and industry- specific measurements and associated standards;
		2. Identifying the appropriate performance measures (e.g., operational, financial, organizational) to be benchmarked;
		3. Advising the applicable Process owner(s) of the information required to be provided for benchmarking purposes;
		4. Obtaining and reviewing the relevant IT environment performance results;
		5. Determining the most appropriate manner to perform benchmarkings;

Processes		Definitions
		6. Performing benchmarking exercises, including, to the extent applicable, providing appropriate oversight of external benchmarking specialists; and
		7. Analyzing and reporting the results of benchmarking exercises to the applicable Process owner(s).
<b>2.2.4</b>	<b>Knowledge Management</b>	<p>The purpose of “Knowledge Management” is to gather information regarding the IT and Client environments and the IT services and make such information available to the applicable Process owner(s) for reuse, awareness and learning across the IT environment, and to cause institutional knowledge to be documented and retained.</p> <p>Knowledge Management includes the following activities:</p>
		1. Developing plans for identifying, retaining and increasing institutional knowledge of the IT environment;
		2. Assessing various technologies, products and services related to the management of knowledge, including the storage, update and accessibility of knowledge;
		3. Establishing a uniform set of practices, methodologies and tools for the preservation of IT and Client knowledge, including:
		(a) Making knowledge of the IT and Client environments and IT services available, as appropriate, to those requiring such information to perform their designated roles;
		(b) Preserving organizational memory and decision-making;
		(c) Leveraging the knowledge and expertise of Actors and their personnel to facilitate organizational learning and innovation;
		(d) Preserving and managing knowledge in the workforce (e.g., the expertise and know-how possessed by certain individuals), including when key personnel retire, when functions are sourced from one Actor to another, and when personnel shift to other positions or pursue other employment opportunities; and
		(e) Obtaining appropriately approved updates to IT policies and procedures from all Process owners and Actors and maintaining a library of such information on a current and historical basis;

Processes		Definitions
		4. Causing lessons learned and best practices to be appropriately captured after operational events (e.g., Incidents, Problems, changes); and
		5. Establishing and managing the channels through which knowledge flows (e.g., town hall meetings, round-table discussions, mentoring programs), and key attributes of such flows (e.g., processes, timeframes, format, media).
<b>2.3</b>	<b>Domain Architecture</b>	
<b>2.3.1</b>	<b>Information Architecture Development</b>	<p>The purpose of “Information Architecture Development” is to design the Information Architecture so as to enable a common, shared, distributed, accurate and consistent data resource, including through (a) the design of data models and databases that serve the applicable participants, and (b) the development of strategies, standards and policies required to develop and implement such models and databases.</p> <p>Information Architecture Development includes the following activities:</p>
		1. Developing high-level Information Architecture alternatives that comply with the Enterprise Architecture and selection criteria (e.g., cost performance, complexity, risk) and selecting the best choice from among the alternatives, including:
		(a) Identifying benefits, potential risks and mitigating responses for each alternative; and
		(b) Documenting the rationale for using each alternative;
		2. Selecting Information Architecture alternatives that best satisfy the selection criteria, including:
		(a) Evaluating each alternative against the selection criteria;
		(b) Assessing, based on the evaluation of the alternatives, the adequacy of the selection criteria and updating these criteria as necessary; and
		(c) Identifying and resolving issues with the alternatives and requirements;

Processes		Definitions
		3. Completing, based on the selected Information Architectures, Information Architecture deliverables defined by the applicable Process owner(s) of Enterprise Architecture Development, which may include:
		(a) Architecture-level deliverables (e.g., vision statement, industry best practices);
		(b) Conceptual-level deliverables (e.g., conceptual data models, high-level use cases, high-level event process models, data entity-process relationship models);
		(c) Solution-level deliverables (e.g., logical data model, detailed event process models, package evaluation criteria, data attribute-process relationship models); and
		(d) Implementation-level deliverables (e.g., database design, presentation layer design, designed application modules); and
		4. Reviewing and updating the Information Architecture as required or in response to new technologies or as directed by the applicable Process owner(s) of Enterprise Architecture Development.
2.3.2	<b>Application Architecture Development</b>	<p>The purpose of “Application Architecture Development” is to design the Application Architecture, including the data and business process models to reflect applications, that will (a) simplify and facilitate the work activities of the applicable Client processes, (b) specify the requirements of information storage and retrieval required to accommodate the applicable objectives, and (c) appropriately address geographic considerations and how the information will be used.</p> <p>Application Architecture Development includes the following activities:</p>
		1. Developing high-level Application Architecture alternatives that comply with the Enterprise Architecture and selection criteria (e.g., cost, performance, complexity, risk) and selecting the best choice from among the alternatives, including:
		(a) Identifying benefits, potential risks and mitigating responses for each alternative; and
		(b) Documenting the rationale for using each alternative;

Processes		Definitions
		2. Selecting Application Architecture alternatives that best satisfy the selection criteria, including:
		(a) Evaluating each alternative against the selection criteria;
		(b) Assessing, based on the evaluation of the alternatives, the adequacy of the selection criteria and updating these criteria as necessary; and
		(c) Identifying and resolving issues with the alternatives and requirements;
		3. Completing, based on the selected Application Architectures, Application Architecture deliverables defined by the applicable Process owner(s) of Enterprise Architecture Development, which may include producing:
		(a) Architecture-level deliverables (e.g., vision statement, industry best practices);
		(b) Conceptual-level deliverables (e.g., high-level application design, major business process diagrams, high-level event process models);
		(c) Solution-level deliverables (e.g., application system evaluation documentation, middleware design diagrams and solution requirements, detailed event process models); and
		(d) Implementation-level deliverables (e.g., distributed systems diagram, application - server mapping diagram); and
		4. Reviewing and updating the Application Architecture as required or in response to new applications or as directed by the applicable Process owner(s) of Enterprise Architecture Development.
2.3.3	<b>Infrastructure Architecture Development</b>	<p>The purpose of “Infrastructure Architecture Development” is to design the Infrastructure Architecture, including identifying the technology platforms that will link the Information Architecture and the Application Architecture, and define operational and performance attributes, including backup, redundancy and availability in accordance with industry best practices and Client requirements.</p> <p>Infrastructure Architecture Development includes the following activities:</p>

Processes	Definitions	
		1. Developing high-level Infrastructure Architecture alternatives that comply with the Enterprise Architecture and selecting the best choice from among the alternatives, including:
		(a) Identifying benefits, potential risks and mitigating responses for each alternative; and
		(b) Documenting the rationale for using each alternative;
		2. Selecting Infrastructure Architecture alternatives that best satisfy the selection criteria, including:
		(a) Evaluating each alternative against the selection criteria;
		(b) Assessing, based on the evaluation of the alternatives, the adequacy of the selection criteria and updating these criteria as necessary; and
		(c) Identifying and resolving issues with the alternatives and requirements;
		3. Completing, based on the selected Infrastructure Architectures, the Infrastructure Architecture deliverables defined by the applicable Process owner(s) of Enterprise Architecture Development, which may include producing:
		(a) Architecture-level deliverables (e.g., vision statement, IT industry best practices);
		(b) Conceptual-level deliverables (e.g., high-level technology design, major business process diagrams, high-level event process models);
		(c) Solution-level deliverables (e.g., system technology evaluation documentation, network topology diagram); and
		(d) Implementation-level deliverables (e.g., Client location map, server location map, object expected/maximum volume requirements); and
		4. Reviewing and updating the Infrastructure Architecture as required or in response to new technologies or as directed by the applicable Process owner(s) of Enterprise Architecture Development.

Processes		Definitions
2.3.4	<b>Security Architecture Development</b>	<p>The purpose of “Security Architecture Development” is to design the Security Architecture, including the plans, principles and specifications that describe (a) the security services that a system is required to provide to address the security policies, (b) the technologies required to implement such security services, and (c) the performance levels and configurations required of such technologies and services.</p> <p>Security Architecture Development includes the following activities:</p>
		<ol style="list-style-type: none"> <li>1. Developing Security Architecture alternatives that comply with the security policies and the Enterprise Architecture and selection, criteria (e.g., cost, performance, complexity, risk) and selecting the best choice from among the alternatives, including:               <ol style="list-style-type: none"> <li>(a) Identifying benefits, potential risks and mitigating responses for each alternative; and</li> <li>(b) Documenting the rationale for using each alternative;</li> </ol> </li> </ol>
		<ol style="list-style-type: none"> <li>2. Selecting Security Architecture alternatives that best satisfy the selection criteria, including:               <ol style="list-style-type: none"> <li>(a) Evaluating each alternative against the selection criteria;</li> <li>(b) Assessing, based on the evaluation of the alternatives, the adequacy of the selection criteria and updating these criteria as necessary; and</li> <li>(c) Identifying and resolving issues with the alternatives and requirements;</li> </ol> </li> </ol>
		<ol style="list-style-type: none"> <li>3. Completing, based on the selected Security Architectures, the Security Architecture deliverables defined by the applicable Process owner(s) of Enterprise Architecture Development, which may include producing:               <ol style="list-style-type: none"> <li>(a) Architecture-level deliverables (e.g., vision statement, industry best practices);</li> <li>(b) Conceptual-level deliverables (e.g., high-level technology design, major business process diagrams, high-level event process models);</li> <li>(c) Solution-level deliverables (e.g., system technology evaluation documentation, network topology diagram); and</li> </ol> </li> </ol>

Processes		Definitions
		(d) Implementation-level deliverables (e.g., Client location map, server location map, object expected/maximum volume requirements); and
		4. Reviewing and updating the Security Architecture as required, in response to uncovered threats, or as directed by the applicable Process owner(s) of Enterprise Architecture Development.
<b>2.4</b>	<b>Process Architecture</b>	
<b>2.4.1</b>	<b>Process Architecture Development</b>	<p>The purpose of “Process Architecture Development” is to define the framework that will guide process development for Process groupings 1.3 (Enterprise Architecture) and 2.3 (Domain Architecture) through 3.14 (Project Management) for the applicable Process owners and promulgate specific linkages between and among such Processes.</p> <p>Process Architecture Development includes the following activities:</p>
		1. Maintaining an awareness of the work of the relevant best practice organizations and standards bodies;
		2. Assessing various technologies and products related to the management of IT processes;
		3. Understanding the then-current process configuration of the IT environment, its levels of performance and its compliance with the process architecture;
		4. Understanding the needs of those who will receive the outcomes of the Processes (e.g., interaction, information, speed, location, quality, cost);
		5. Providing instructions, objectives, guiding principles, performance levels, templates, toolsets, standards and other related information to enable the applicable Process owner(s) to develop linkages to other Processes;
		6. Performing an advise and consent role with respect to Actors’ process development work; and
		7. Defining, for use by the applicable Process owner(s), specific linkages between and among various Processes (e.g., inputs, outputs, sequence, flow).
<b>2.5</b>	<b>Standards</b>	

Processes		Definitions
2.5.1	<b>Standards Policies Establishment</b>	The purpose of “Standards Policies Establishment” is to develop, document and maintain a set of guiding principles for the development or adoption of technical specifications, practices and procedures.
		Standards Policies Establishment includes the following activities:
		1. Determining the requirements (e.g., Client, regulatory, security, audit, contractual) and factors (e.g., Internal Client business relationships) on which the policies will be based;
		2. Maintaining a repository of the current and historical policies and exceptions, and the underlying supporting material on which they were derived;
		3. Identifying and developing policies, including guidelines for exceptions to standards;
		4. Establishing timelines for the development or adoption, review and maintenance of standards;
		5. Instructing the owner of Standards Development with respect to the content, adoption criteria, timing and quality expectations of standards; and
		6. Identifying and establishing policies for measuring compliance with standards.
2.5.2	<b>Standards Development</b>	The purpose of “Standards Development” is to develop, identify for adoption, document and maintain standards in accordance with the applicable policies.
		Standards Development includes the following activities:
		1. Obtaining the policies, exceptions and guiding principles from the applicable Process owner(s) of Standards Policies Establishment;
		2. Identifying the applicable criteria on which the development of standards will be based;
		3. Maintaining ongoing knowledge of the relative components of the relevant marketplace, including the manufacturers, their goods, and the performance of such goods in similar environments;

Processes		Definitions
		4. Obtaining information as required to develop standards, including information promulgated by the applicable Process owner(s) of Enterprise Architecture and Domain Architecture;
		5. Developing standards and documenting the factors on which such standards were based, including, as appropriate, alternatives considered and the rationale for the decisions;
		6. Providing standards and supporting material to the applicable Process owner(s) of Standards Approval;
		7. Reviewing and revising standards based on new factors, new policies and requests for modification from the applicable Process owner(s) of Standards Policy Establishment and/or Standards Approval; and
		8. Publishing approved standards to the applicable Process owner(s).
<b>2.5.3</b>	<b>Standards Approval</b>	The purpose of “Standards Approval” is to perform the activities necessary to evaluate and approve proposed standards developed by Standards Development.  Standards Approval includes the following activities:
		1. Confirming that the proposed standards:
		(a) Comply with the requirements of the Enterprise Architecture;
		(b) Comply with the requirements of the relevant Domain Architecture(s);
		(c) Comply with the policies established by the applicable Process owner(s) of Standards Policies Establishment;
		(d) Meet the underlying business requirements; and
		(e) Do not create operational or technical conflicts with other standards;
		2. Advising the applicable Process owner(s) of Standards Development of proposed standards that are not accepted and providing information regarding why such conclusions were reached and/or the types of changes required to be made;
		3. Obtaining approvals from the appropriate personnel designated to approve standards; and

Processes		Definitions
		4. Communicating, when warranted, approval of proposed standards to the applicable Process owner(s) of Standards Development.
<b>2.5.4</b>	<b>Standards Audit</b>	The purpose of “Standards Audit” is to determine the extent to which standards have not been followed.  Standards Audit includes the following activities:
		1. Maintaining a complete listing of current and historical standards;
		2. Developing methods for auditing compliance with standards, including addressing the measurement policies developed by Standards Policies Establishment;
		3. Measuring noncompliance with the applicable standards;
		4. Identifying, documenting, and reporting instances of noncompliance with standards to the offending Process owners and other personnel as appropriate; and
		5. Escalating, as applicable, noncompliance with standards to the applicable Process owner(s) and other personnel as appropriate.
<b>2.6</b>	<b>Solution Requirements</b>	
<b>2.6.1</b>	<b>Business Requirements Documentation</b>	The purpose of “Business Requirements Documentation” is to document business requirements (e.g., inputs, outputs, scheduling, performance).  Business Requirements Documentation includes the following activities:
		1. Identifying stakeholders and documenting their needs, expectations and constraints (including quality, schedule and cost);
		2. Documenting business drivers and relevant business interfaces, including those that are internal and external to the enterprise, as well as those that are automated and manual);
		3. Documenting schedule and business case requirements;
		4. Transforming expressed stakeholder needs, expectations, constraints, and interfaces into documented business requirements; and

Processes		Definitions
		5. Providing business requirements to the applicable Process owner(s) of Solution Integration.
2.6.2	<b>Security Requirements Development</b>	<p>The purpose of “Security Requirements Development” is to analyze business and security requirements and refine them to a sufficient level of detail so that solutions can be developed.</p> <p>Security Requirements Development includes the following activities:</p>
		1. Obtaining, reviewing and analyzing business and security requirements from the applicable Process owner(s) of Business Requirements Documentation and solution requirements from the applicable Process owner(s) of Security Oversight, Security Policy Development, Security Operations and Security Analysis;
		2. Establishing and maintaining required capabilities lists;
		3. Analyzing and quantifying functional capabilities required by Clients;
		4. Analyzing and quantifying non-functional capabilities required by Clients (e.g., availability, performance, adaptability to change, re-use); and
		5. Establishing solution requirements, including:
		(a) Specifying required alignment with the reference Security Architecture(s), approved standards and risk mitigation objectives;
		(b) Developing technical requirements for solution design;
		(c) Identifying system interface requirements, both internal and external to such solutions;
		(d) Developing functional, performance, maintenance, support and disposal concepts, and scenarios;
		(e) Defining environments in which solutions will operate, including boundaries and constraints;
		(f) Documenting and providing technical requirements and associated material to the applicable Process owner(s); and

Processes		Definitions
		(g) Revising technical requirements based on feedback from the applicable Process owner(s), including the Process owner(s) of Security Solution Development, Security Operations and Security Analysis.
<b>2.6.3</b>	<b>Solution Integration</b>	The purpose of “Solution Integration” is to develop integrated solutions that meet their respective business requirements.  Solution Integration includes the following activities:
		1. Developing an approach to produce integrated solutions that are consistent with the required level of quality, schedule and cost;
		2. Developing solution requirements and constraints (e.g., technical, financial, geographic, process) specific to business requirements, including obtaining the External Compliance Requirements and feedback regarding risk and control applicable to such business requirements from the applicable Process owner(s) of Compliance Management and Risk Management;
		3. Providing solution requirements and business requirements to the applicable Process owner(s) of Technical Requirements Development;
		4. Resolving development and integration issues pertaining to technical requirements and solutions;
		5. Reviewing solutions and interactions between solution components, and confirming that overall solutions meet their respective underlying requirements, including obtaining, as applicable, advice and consent from the applicable Process owner(s);
		6. Reviewing estimates provided by the applicable Process owner(s) of Resource Estimation and confirming they contain the information necessary to develop the required business cases and are otherwise reasonable;
		7. Informing the applicable Process owner(s) of Solution Formation of errors or required changes, including those pertaining to technical requirements, solutions or sub-components of solutions and estimations;
		8. Confirming that the costs and benefits of solutions meet the relevant hurdles for investment approval;

Processes		Definitions
		9. Confirming that the risk profile of solutions are reasonable and in-line with the relevant requirements; and
		10. Consolidating solutions into comprehensive business cases, including the applicable development of financial information, that describe the relevant information necessary for the applicable Process owner(s) of Solution Approval and other personnel as appropriate to make sound business decisions.
<b>2.6.4</b>	<b>Security Solution Approval</b>	The purpose of “Security Solution Approval” is to provide a final review of solutions developed in response to security requirements or proposals presented by Actors on an unsolicited basis and, as applicable, providing feedback, including advice and consent.  Security Solution Approval includes the following activities:
		1. Reviewing the applicable aspects of security solutions;
		2. Confirming that the security solutions are consistent with their respective security requirements;
		3. Confirming that the applicable Process owner(s) of Risk Management and Compliance Management find that each solution adequately addresses the associated risks, controls and compliance requirements;
		4. Confirming that the financial and other terms to implement each solution on a commercial basis are either:
		(a) Consistent with the then-current terms of the service agreement(s) with the applicable External Actor(s) (i.e., no changes are necessary); or
		(b) Negotiated and documented to the satisfaction of the applicable Process owner(s) of Commercial Management and the applicable External Actor(s);
		5. Advising the applicable Actors and Process owner(s) of Security Solution Approval if changes to solutions, solution sub-components or commercial terms are needed;
		6. Obtaining approvals from the appropriate personnel designated for approving solutions as and when appropriate; and
		7. Communicating, when warranted, the final disposition (e.g., approved, disapproved) of solutions to the applicable Actors, Process owner(s) and other personnel as appropriate.

Processes		Definitions
2.6.5	<b>Solution Approval</b>	<p>The purpose of “Solution Approval” is to provide a final review of solutions developed in response to business requirements or proposals presented by Actors on an unsolicited basis and, as applicable, providing feedback, including advice and consent.</p> <p>Solution Approval includes the following activities:</p>
		1. Reviewing the applicable aspects of solutions and their respective business cases;
		2. Confirming that the business cases are consistent with their respective business requirements;
		3. Confirming that the applicable Process owner(s) of Risk Management and Compliance Management find that each solution adequately addresses the associated risks, controls and compliance requirements;
		4. Confirming that the financial and other terms to implement each solution on a commercial basis are either:
		(a) Consistent with the then-current terms of the service agreement(s) with the applicable External Actor(s) (i.e., no changes are necessary); or
		(b) Negotiated and documented to the satisfaction of the applicable Process owner(s) of Commercial Management and the applicable External Actor(s);
		5. Advising the applicable Actors and Process owner(s) of Solution Integration if changes to solutions, solution sub-components or commercial terms are needed;
		6. Obtaining approvals from the appropriate personnel designated for approving solutions as and when appropriate; and
		7. Communicating, when warranted, the final disposition (e.g., approved, disapproved) of solutions to the applicable Actors, Process owner(s) and other personnel as appropriate.
2.7	<b>Service Management</b>	
2.7.1	<b>Service Delivery Management</b>	<p>The purpose of “Service Delivery Management” is to manage the performance of Actors to optimize the delivery of IT services.</p> <p>Service Delivery Management includes the following activities:</p>

Processes	Definitions	
		1. Setting the service delivery expectations for Actors, including:
		(a) Developing, documenting, disseminating and monitoring actions to be implemented, including with regard to designated timeframe(s); and
		(b) Discussing action compliance and noncompliance with the relevant Actors;
		2. Coordinating work between and among Actors and Processes so that IT services are performed appropriately, including establishing recurring and one-time meetings;
		3. Establishing and maintaining a close working relationship with the applicable Process owner(s) of Services Management;
		4. Coordinating with the applicable Process owner(s) of Services Management and implementing directions provided by such Process owner(s);
		5. Establishing frameworks for measuring Actor delivery and contribution to optimized IT services;
		6. Obtaining and analyzing information regarding the performance of Actors;
		7. Developing recommended change in Actor responsibility and discussing such changes with the applicable Process owner(s) and other personnel as appropriate;
		8. Developing proposed projects and initiatives based on strategic direction provided by the applicable Process owner(s);
		9. Advising Actors as to the extent to which their performance meets expectations;
		10. Addressing Actor performance issues on an ongoing basis (e.g., performance trends, project delivery);
		11. Reviewing proposed changes to Actor SLAs and providing feedback to the applicable Process owner(s);
		12. Providing feedback regarding Actor performance remediation requirements to the applicable Process owner(s);
		13. Obtaining and analyzing information from the applicable Process owner(s) regarding expected future change to IT services and/or the IT environment and:

Processes		Definitions
		(a) Developing or modifying the appropriate strategies and activities necessary to adequately address the required change, including making recommendations for change in the allocation of Actor responsibility or change in the portfolio of Actors;
		(b) Obtaining the advice or approval of the appropriate personnel designated to approve IT environment and IT service changes; and
		(c) Implementing appropriately approved IT environment and IT service changes by communicating such changes to the applicable Process owner(s); and
		14. Attending Actor disagreement and dispute forums regarding matters pertaining to service delivery.
2.7.2	<b>Incident Management</b>	The purpose of “Incident Management” is to direct the restoration of service in response to Incidents, to minimize the adverse impact on Clients as a result of Incidents, and to maintain the required levels of service.  Incident Management includes the following activities:
		1. Defining the Incident management processes (e.g., detection, investigation, diagnosis, escalation, notification, resolution, recovery, closure, reporting), which are to include specification of the individuals to be involved in each aspect of managing Incidents;
		2. Establishing and maintaining a close working relationship with the applicable Process owner(s) of Incident Oversight;
		3. Reviewing the severity levels assigned to Incidents, and revising such levels as appropriate;
		4. Assessing service restoration plans to confirm development of comprehensive solutions that take into account the relevant conditions, events and needs;
		5. Reviewing Incident recovery actions developed by the applicable Process owner(s) of Incident Management Execution and providing guidance as required;

Processes		Definitions
		6. Coordinating the roles and responsibilities of the Processes to be involved in the resolution of Incidents, including, where appropriate, establishing separate teams to concentrate on specific Incidents or sub-components of Incidents;
		7. Coordinating with the applicable Process owner(s) of Incident Oversight and implementing directions provided by such Process owner(s);
		8. Confirming the appropriate closure of Incidents;
		9. Reviewing the process models and/or workflows developed by the applicable Process owner(s) of Incident Management Execution for pre-defined Incidents (e.g., recurring Incidents, Incidents requiring special handling) and providing guidance as required;
		10. Conducting Incident management review meetings with the applicable Process owner(s), Clients and other personnel as appropriate; and
		11. Identifying Process owners and Clients requiring training to reduce the number of Incidents, detect Incidents earlier and restore normal service following Incidents faster.
2.7.3	<b>Problem Management</b>	<p>The purpose of “Problem Management” is to direct the resolution of Problems to minimize the adverse impact on business operations, maintain the required levels of service and prevent the recurrence of Problems.</p> <p>Problem Management includes the following activities:</p>
		1. Defining the Problem management processes (e.g., root cause analysis, determination, investigation, diagnosis, resolution, recovery, closure, reporting), which are to include specification of the individuals to be involved in each aspect of managing Problems;
		2. Maintaining information about Problems and their appropriate workarounds to reduce the number and impact of Incidents over time (e.g., known error database);
		3. Classifying Problems in terms of their adverse impact on Clients; and

Processes		Definitions
		4. Coordinating the roles and responsibilities of the Processes to be involved in the resolution of Problems, including where appropriate, establishing separate teams to concentrate on specific Problems or sub-components of Problems;
		5. Confirming the appropriate closure of Problems;
		6. Conducting Problem management review meetings with the applicable Process owner(s) and Clients to identify ways to avoid such Problems occurring in the future, including capturing post-resolution knowledge; and
		7. Identifying Process owners and Clients requiring training to reduce the number of Problems, detect Problems earlier and restore normal service following Problems faster.
2.7.4	<b>Configuration and Asset Management</b>	<p>The purpose of “Configuration and Asset Management” is to direct the activities necessary to collect, track, manage, maintain and report on the physical presence, financial information, contractual terms, configuration states and associations among the assets/CIs in the environment.</p> <p>Configuration and Asset Management includes the following activities:</p>
		1. Obtaining the objectives and requirements for asset and CI information from the applicable Process owner(s);
		2. Establishing the detailed specifications for what asset and configuration information is to be maintained and obtaining approvals from the appropriate personnel designated to approve such specifications;
		3. Providing, implementing and operating a CMDB and the appropriate tools to:
		(a) Record and track the applicable asset and configuration information through the full lifecycle (e.g., purchase, configuration, installation, repair, redeployment, removal, disposal);
		(b) Understand how CIs, when combined, constitute broader categories of technology (e.g., network, system, storage);
		(c) Determine the associations between CIs themselves and, as applicable, with other relevant items (e.g., personnel, business units, buildings, Client or IT services);

Processes	Definitions
	(d) Forecast changes in asset populations and configurations;
	(e) Identify the underlying components or sub-components;
	(f) Monitor changes made to the CMDB and advise the applicable Process owner(s) of inconsistent or suspect information; and
	(g) Facilitate the redeployment and/or reuse of assets;
	4. Developing policies for how the information is to be maintained in the CMDB;
	5. Developing requirements for how various activities of other Processes are to interface with the CMDB;
	6. Making asset and configuration information available to the applicable Process owner(s);
	7. Compiling, and making available for review and/or publication, management reports regarding assets and their association with other information in the CMDB;
	8. Monitoring and enforcing software license compliance, including:
	(a) Monitoring the IT environment for software and reporting instances of detected and undetected licenses, as well as instances of unapproved software;
	(b) Fulfilling inquiries regarding the extent to which specific software signatures are present within the IT environment;
	(c) Fulfilling inquiries requiring the validation of the presence and version of specific software installed on a particular Element or group of Elements within defined boundaries; and
	(d) Developing periodic reporting of license information and the level of compliance with the terms of the licenses and providing such reporting to the applicable Process owner(s);
	9. Monitoring hardware and software warranties within the IT environment, including:
	(a) Developing periodic and ad hoc reporting regarding the status of such warranties (e.g., in force, about to expire);

Processes		Definitions
		(b) Identifying Elements that, based on then-current objectives, merit the purchase or renewal of warranties or similar mechanisms; and
		(c) Advising the applicable Process owner(s) of warranty optimization strategies and obtaining approvals from the appropriate personnel designated to approve and implement such strategies; and
		10. Performing, as necessary, audits of the CMDB and the practices of Process owners that provide input into the CMDB, to:
		(a) Determine if the required level of accuracy is being produced by the overall system of configuration management processes performed by the applicable Process owner(s); and
		(b) Provide useful input regarding CMDB accuracy to the applicable Process owner(s).
2.7.5	<b>Change Management</b>	The purpose of “Change Management” is to control changes to the IT environment or IT services in a manner that minimizes the number and impact of associated Incidents and Problems.  Change Management includes the following activities:
		1. Maintaining a well-grounded understanding of the type, reason, volume and frequency of change made to the IT environment;
		2. Maintaining awareness of the pipeline of change to the IT environment;
		3. Understanding the applicable Client policies and change procedures and aligning the relevant IT change processes as appropriate;
		4. Developing, documenting and maintaining the processes by which change is introduced to the IT environment, including:
		(a) Policies for the classification of change requests;
		(b) Activities for all classes of change (e.g., standard, recurring, special handling, emergency);
		(c) Policies for change approval, including, as applicable and appropriate for specific Clients and classes of change, those that can be implemented in an expedited or pre-approved manner;

Processes	Definitions	
		(d) Activities to be taken to handle unanticipated events that may occur during change execution;
		(e) Identification of dependencies;
		(f) Identification of the Process owners required to be involved in the change-based processes and their respective roles;
		(g) Expected timeframes and thresholds for the completion of the change processes;
		(h) Escalation and notification procedures; and
		(i) Requirements for preserving and/or archiving of change records;
		5. Obtaining and assessing change requests, including those obtained from the applicable Process owner(s) of Change Management Execution, and identifying impractical or unnecessary change requests, and providing feedback to the requestors;
		6. Classifying and prioritizing change requests, including assessing the appropriate factors (e.g., risk, cost, impact, security) applicable to such requests;
		7. Verifying the consistency and compatibility of the documentation for changes compiled by the applicable Process owner(s) of Change Management Execution;
		8. Scheduling changes;
		9. Registering completed changes and closing change requests;
		10. Developing, maintaining and documenting linkages with other Processes to establish traceability of changes, detect unauthorized changes and identify change-related Incidents and Problems;
		11. Developing, maintaining, documenting and publishing change schedules; and
		12. Reviewing (on a post-implementation basis) change requests and verifying that the change objectives were met without unexpected adverse impact.

Processes		Definitions
2.7.6	<b>Release Management</b>	<p>The purpose of “Release Management” is to plan, review, approve and coordinate releases.</p> <p>Release Management includes the following activities:</p>
		1. Developing and maintaining the policies, standards and processes to be followed for the lifecycle of releases and communicating such information to the applicable Process owner(s);
		2. Establishing roadmaps for releases and communicating such information to the applicable Process owner(s);
		3. Obtaining and reviewing release packages from the applicable Process owner(s) of Release Management Execution;
		4. Auditing release packages and identifying dependencies or schedule conflicts with other release packages;
		5. Coordinating the testing of releases;
		6. Coordinating release schedules;
		7. Confirming that the required change approvals have been obtained;
		8. Confirming that release packages can be tracked, installed, tested, verified, and/or uninstalled or backed out as appropriate;
		9. Providing feedback to the applicable Process owner(s) of Release Management Execution regarding proposed release packages;
		10. Obtaining approvals from the appropriate personnel designated to approve release packages;
		11. Communicating, when warranted, approval of proposed release packages to the applicable Process owner(s) of Release Management Execution;
		12. Developing communication notices regarding releases for publication to Clients and the applicable Process owner(s); and
		13. Archiving release information, including, as applicable, release images.

Processes		Definitions
2.7.7	<b>Capacity Management</b>	<p>The purpose of “Capacity Management” is to perform the functions necessary to determine the appropriate levels of IT services and resources to be available and matched to current and anticipated future business needs.</p> <p>Capacity Management includes the following activities:</p>
		1. Developing, maintaining and documenting capacity plans;
		2. Forecasting the volume of IT services based on the applicable criteria;
		3. Developing predictive and ongoing capacity indicators, including obtaining information and feedback from the applicable Process owner(s) of Client Relations;
		4. Analyzing utilization and trend forecasts produced by the owner of Capacity Reporting and proactively developing recommendations regarding change to the IT environment (e.g., upgrades, downgrades, enhancements, reconfiguration) to correctly align the performance and availability needs with IT service capacity;
		5. Responding to capacity-related “threshold” events and initiating the appropriate activities;
		6. Notifying the applicable Process owner(s) of recommended changes to the levels of IT services and resources to address current and forecasted capacity and capacity-related performance issues;
		7. Assisting with the diagnosis and resolution of performance and capacity-related Incidents and Problems;
		8. Obtaining information regarding the short, medium and long term plans for change to the IT environment; and
		9. Assessing the impact of change in the IT environment on capacity plans.
2.7.8	<b>Availability Management</b>	<p>The purpose of “Availability Management” is to understand the availability requirements, develop availability plans, analyze availability performance and develop recommendations for change to improve availability.</p> <p>Availability Management includes the following activities:</p>

Processes		Definitions
		1. Understanding the Clients' requirements for the availability of IT services, including obtaining information from the applicable Process owner(s) of Client Relations;
		2. Developing, maintaining and documenting IT availability plans;
		3. Developing and providing availability management reports to the applicable Process owner(s);
		4. Analyzing risks to availability;
		5. Analyzing availability information and developing recommendations for improvement; and
		6. Assessing the impact of change in the IT environment on availability plans.
<b>2.7.9</b>	<b>Service Level Management</b>	The purpose of "Service Level Management" is to enact and integrate the performance regime established by Performance Management.  Service Level Management includes the following activities:
		1. Obtaining the performance measurement, reporting and integration requirements;
		2. Obtaining, reviewing and monitoring the relevant SLAs;
		3. Making the applicable Process owner(s) aware of changes to the performance requirements and SLAs;
		4. Coordinating and integrating the performance reporting activities of Actors so that performance reporting to the enterprise is consistent;
		5. Obtaining Actor-produced performance reports and:
		(a) Verifying the reports are consistent with the performance reporting requirements;
		(b) Validating the information obtained;
		(c) Comparing the performance results with the applicable SLAs;
		(d) Determining which, if any, of an Actor's performance measures require special handling (e.g., service level credit, service level bonus);

Processes		Definitions
		(e) Validating or determining, as necessary, the correct calculation of incentive and disincentive payments/credits; and
		(f) Tracking the elections and payments of service level credits to and from the applicable Actors;
		6. Discussing performance results and reporting with Actors to understand the underlying issues, problems and shortfalls and, to the extent applicable, their commitments to resolve such matters;
		7. Performing relevant analysis of the performance results (current and historical) to identify trends that could signal systemic and/or structural issues;
		8. Determining, for performance measures that cross the boundaries of multiple Actors, the apportionment of service level responsibility to the appropriate Actor(s) in cases where service level failure has occurred;
		9. Aggregating Actor-specific performance reports into unified reports consistent with the performance reporting requirements, including those established by the applicable Process owner(s) of Performance Management;
		10. Publishing unified performance reports and the associated observations and recommendations to the applicable Process owner(s);
		11. Discussing performance results holistically with the applicable Process owner(s) of Performance Management; and
		12. Observing the underlying service delivery mechanisms and Actor behavior and making recommendations to the applicable Process owner(s) on ways to provide incentive for Actors to achieve the desired performance outcomes.
2.7.10	<b>Service Continuity Management</b>	<p>The purpose of “Service Continuity Management” is to confirm that the service continuity plans developed at the platform, system and Client levels will collectively meet the continuity requirements.</p> <p>Service Continuity Management includes the following activities:</p>
		1. Developing and providing service continuity plan guidelines (e.g., objectives, requirements, timeframes, format, process) to the applicable Process owner(s) of Service Continuity Plan Development;

Processes		Definitions
		2. Reviewing service continuity plans;
		3. Determining if service continuity plans individually and collectively meet the Client and technical continuity requirements;
		4. Providing advice and guidance regarding adjustments of service continuity plans so that activities within and across plans are appropriate and compatible;
		5. Compiling and publishing finalized service continuity plans into an integrated IT Business Continuity Plan (“ITBCP”);
		6. Obtaining approvals from the appropriate personnel designated to approve ITBCPs;
		7. Coordinating, scheduling and monitoring the performance and results of contingency plan testing, including the development of recommendations for change to the ITBCP;
		8. Monitoring Actors to verify that their applicable personnel are appropriately trained in the ITBCP and are able to successfully implement the plan; and
		9. Developing recommendations to improve the system of service continuity.
<b>2.8</b>	<b>Security Management</b>	
<b>2.8.1</b>	<b>Security Oversight</b>	<p>The purpose of “Security Oversight” is to oversee Information Security at a high level to ensure appropriate operation of the security controls with coordination both within the Information Security processes and between the Information Security Actors and other Actors within the IT environment.</p> <p>Security Oversight includes the following activities:</p>
		1. Reviewing and approving security policies prepared by the Process Owner of Security Policy Development.
		2. Gaining and maintaining a comprehensive understanding of each delivery Actor’s role as it pertains to the management of Information Security, relevant methodologies, processes and tools;

Processes	Definitions	
		3. Establishing and maintaining a close working relationship with the applicable Process owner(s) of Incident Oversight, Incident Management, Security Operations, Security Analysis and Security Incident Response;
		4. Acting as an advocate on Information Security issues for the demand side of the IT environment, Clients and the enterprise, including:
		(a) Gaining and maintaining an understanding of the perspectives and preferences of Clients, the enterprise and IT leadership regarding Information Security;
		(b) Establishing and communicating the demand-side Information Security expectations to the applicable Process owner(s); and
		(c) Enforcing accountability among the applicable Information Security Process owner(s) for meeting the enterprise's demands for action, quality, cooperation and urgency pertaining to the management of Information Security;
		5. Reviewing proposed Security Incident Response solutions and providing input and preferences to the Process owner(s) of Incident Oversight and Incident Management;
		6. Requesting alternative Security Incident Response solutions from the Process owner(s) of Security Incident Response when proposed solutions do not meet the needs and preferences of Clients, the enterprise or IT leadership;
		7. Mandating specific actions and/or solutions to be implemented by the Process owner(s) of Security Operations and Security Incident Response in response to a security incident;
		8. Providing ongoing, operational and tactical day-to-day business and enterprise risk mitigation context to the Security Operations and Security Analysis Process owners; and
		9. Providing strategic business and enterprise risk mitigation context to the Security Requirements Development Process owner(s).

Processes		Definitions
2.8.2	<b>Security Policy Development</b>	<p>The purpose of “Security Policy Development” is to develop and document the policies and strategies related to IT security.</p> <p>Security Policy Development includes the following activities:</p>
		1. Identifying the guiding principles and applicable drivers (e.g., risk, legal, industrial, environmental, corporate) that impact IT security policy;
		2. Developing security policies;
		3. Obtaining approvals from the appropriate personnel designated to approve IT security policies; and
		4. Documenting the security policies, including:
		(a) Maintaining them in an appropriate repository; and
		(b) Publishing them to the applicable Process owner(s).
2.9	<b>Program Office</b>	
2.9.1	<b>Program Management Oversight</b>	<p>The purpose of “Program Management Oversight” is to oversee, inform and communicate to the applicable Process owner(s) of Program Management and Project Management and other Processes involved in identifying and delivering Customer needs and requirements including monitoring and evaluating the manner in which Programs are used to achieve Customer objectives.</p>
2.9.2	<b>Program Management</b>	<p>The purpose of “Program Management” is to prioritize the projects to be performed, manage linkages between projects, and oversee Project Management.</p> <p>Program Management includes the following activities:</p>
		1. Establishing policies to which projects must conform (e.g., methodology, reporting, tools);
		2. Maintaining awareness of the pipeline of projects, their respective stakeholders, their purpose, and their expected benefits;
		3. Determining the sequence and/or priority of projects;
		4. Informing project stakeholders of the prioritization of their projects and re-prioritizing as appropriate based on feedback;
		5. Auditing projects to confirm compliance with the applicable policies and guidelines;

Processes		Definitions
		6. Determining stakeholder satisfaction with the handling of projects;
		7. Tracking and analyzing project performance, including:
		(a) Monitoring project progress based on major milestones; and
		(b) Meeting with project stakeholders and project managers to review project findings and recommendations;
		8. Developing and disseminating stakeholder communications, including:
		(a) Determining the information and communications needs of stakeholders (e.g., who needs what information, when they need it, and how will it be given to them);
		(b) Making needed information available to stakeholders; and
		(c) Helping Clients and stakeholders understand the implications of programs, projects and other change on their personnel;
		9. Assessing risk on projects of high-importance and on the collection of projects, including:
		(a) Identifying, analyzing, and responding to project risk;
		(b) Determining risks likely to affect projects and documenting the characteristics;
		(c) Performing a qualitative analysis of risks and conditions to prioritize their effects on project objectives; and
		(d) Tracking identified risks, monitoring residual risks, identifying new risks, executing risk plans and evaluating their effectiveness in reducing risk; and
		10. Integrating projects to provide proper and adequate coordination of the linkages between them.
<b>2.9.3</b>	<b>Project Management</b>	The purpose of "Project Management" is to supervise, monitor and manage projects, so that projects are performed in accordance with established plans, budgets and timelines.  Project Management includes the following activities:
		1. Planning projects, including:
		(a) Forming project teams;

Processes	Definitions
	(b) Defining the specific activities that must be performed to produce the various project deliverables;
	(c) Sequencing the activities and documenting dependencies among the activities;
	(d) Estimating the time needed to complete individual activities;
	(e) Analyzing the activity sequences, activity durations, and resource requirements;
	(f) Performing risk management planning;
	(g) Determining which resources (e.g., people, hardware, materials) and which quantities of each should be used to perform project activities;
	(h) Working with the applicable Process owner(s) and other personnel as appropriate to identify and assign the personnel needed to perform project activities;
	(i) Developing estimates of the resource costs required to complete projects;
	(j) Identifying which quality standards are relevant to projects and how they can be satisfied;
	(k) Identifying, documenting, and assigning project roles, responsibilities, and reporting relationships;
	(l) Determining the information and communications needs of stakeholders;
	(m) Identifying quantitative and qualitative risks and documenting the characteristics of each;
	(n) Developing procedures and techniques to enhance project success and to reduce threats to projects;
	(o) Determining, in conjunction with the applicable Process owner(s) of Acquisition and other applicable Processes, and Third Party Contract Managers, what to procure, how much to procure, and when to procure;

Processes		Definitions
		(p) Developing project plans by taking the results of the above and incorporating them into consistent, coherent documents, including planning inputs, historical information, organizational policies, constraints and assumptions, that can be used to guide both project execution and project control;
		(q) Submitting draft project plans to the applicable stakeholders and Process owner(s), including those of Program Management, for approval; and
		(r) Revising draft project plans as directed by the applicable stakeholders and Process owner(s), including those of Program Management;
		2. Monitoring and controlling projects, including:
		(a) Managing personnel assigned to projects;
		(b) Implementing appropriate project management methodology including the use of approved project management tools;
		(c) Preparing performance, financial, utilization and other status reports;
		(d) Providing appropriate access to information and project management templates;
		(e) Coordinating changes across/within projects;
		(f) Controlling changes to project scope;
		(g) Controlling changes to project schedules;
		(h) Controlling changes to project budgets;
		(i) Determining if projects comply with relevant quality standards and identifying ways to eliminate unsatisfactory performance; and
		(j) Tracking identified risks, monitoring residual risks, identifying new risks and executing risk plans and evaluating their effectiveness in reducing risk; and
		3. Executing projects, including:
		(a) Executing project plans by causing the assigned personnel, including those associated with other Process owners, to perform the applicable project activities therein;

Processes		Definitions
		(b) Evaluating overall project performance on a regular basis to verify that projects will satisfy the relevant quality standards and causing the applicable Process owner(s) to address deficiencies;
		(c) Developing individual and group skills/competencies to enhance project performance;
		(d) Verifying performance of project activities, including those performed by other Process owners (e.g., Quality Assurance);
		(e) Closing out projects and resolving open items; and
		(f) Providing administrative closure by generating, gathering, and disseminating information and formalizing phase or project completion, including evaluating projects and compiling lessons learned for use in planning future projects or phases.
<b>3</b>	<b>Service Delivery</b>	
<b>3.1</b>	<b>Solution Formulation</b>	
<b>3.1.1</b>	<b>Technical Requirements Development</b>	<p>The purpose of “Technical Requirements Development” is to analyze business requirements and refine them to a sufficient level of detail so that solutions can be developed.</p> <p>Technical Requirements Development includes the following activities:</p>
		1. Obtaining, reviewing and analyzing business requirements from the applicable Process owner(s) of Business Requirements Documentation and solution requirements from the applicable Process owner(s) of Solution Integration;
		2. Establishing and maintaining listings of required capabilities, including:
		(a) Analyzing and quantifying functional capabilities required by Clients; and
		(b) Analyzing and quantifying non-functional capabilities required by Clients (e.g., availability, performance, adaptability to change, re-use);
		3. Establishing solution requirements, including:

Processes		Definitions
		(a) Specifying required alignment with the relevant reference Domain Architecture(s) and approved standards;
		(b) Developing technical requirements for solution design;
		(c) Identifying system interface requirements, both internal and external to such solutions;
		(d) Developing functional, performance, maintenance, support and disposal concepts, and scenarios; and
		(e) Defining environments in which solutions will operate, including boundaries and constraints;
		4. Documenting and providing technical requirements and associated material to the applicable Process owner(s); and
		5. Revising technical requirements based on feedback from the applicable Process owner(s), including the applicable Process owner(s) of Solution Integration.
3.1.2	<b>Security Solution Development</b>	<p>The purpose of “Security Solution Development” is to design solutions that satisfy the business and security requirements (e.g., business, integration, technical, risk mitigation) provided by the Security Requirements Development Process owner.</p> <p>Security Solution Development includes the following activities:</p>
		6. Analyzing requirements to confirm they are necessary and sufficient, and adequately balance the objectives and constraints of Clients and IT;
		7. Designing solutions that comply with and leverage the Security Architecture(s) and industry best practice, and that will satisfy the requirements;
		8. Developing operational details that define the interaction of solutions, their Clients and the environment;
		9. Identifying ongoing maintenance, support and re-use attributes of solutions;
		10. Identifying attributes of solutions that have a significant influence on cost, schedule, timing, functionality, performance, and risk;
		11. Validating that solutions will perform appropriately in their intended-use environment;

Processes		Definitions
		12. Identifying interactivity dependencies and other assumptions related to solutions;
		13. Performing risk analysis for the development, implementation, operation and disposal of solutions;
		14. Documenting and providing solutions and associated material to the applicable Process owner(s); and
		15. Revising solutions based on feedback from the applicable Process owner(s), including the applicable Process owners of 4.1 Security Management.
<b>3.1.3</b>	<b>Solution Development</b>	The purpose of “Solution Development” is to design solutions that satisfy the requirements (e.g., business, integration, technical).  Solution Development includes the following activities:
		1. Analyzing requirements to confirm they are necessary and sufficient, and adequately balance the needs and constraints of Clients and IT;
		2. Designing solutions that comply with and leverage the relevant Domain Architecture(s) and that will satisfy the requirements;
		3. Developing operational details that define the interaction of solutions, their Clients and the environment;
		4. Identifying ongoing maintenance, support and re-use attributes of solutions;
		5. Identifying attributes of solutions that have a significant influence on cost, schedule, timing, functionality, performance, and risk;
		6. Validating that solutions will perform appropriately in their intended-use environment;
		7. Identifying interactivity dependencies and other assumptions related to solutions;
		8. Performing risk analyses for the development, implementation, operation and disposal of solutions;
		9. Documenting and providing solutions and associated material to the applicable Process owner(s); and

Processes		Definitions
		10. Revising solutions based on feedback from the applicable Process owner(s), including the applicable Process owner(s) of Solution Integration.
<b>3.1.4</b>	<b>Resource Estimation</b>	<p>The purpose of “Resource Estimation” is to develop estimates of the resources and time required to develop, implement, operate and dispose of solutions.</p> <p>Resource Estimation includes the following activities:</p>
		1. Identifying the types and estimated quantities and pricing of the resources (e.g., personnel, hardware, software, services, facilities) required to develop, implement, maintain and support solutions;
		2. Estimating the time necessary to build and implement solutions, including obtaining feedback as applicable from the applicable Process owner(s) of Program Management and Project Management;
		3. Documenting and providing estimates of resources and time in the appropriate form required by the applicable Process owner(s) of Solution Integration; and
		4. Revising estimates based on feedback from the applicable Process owner(s) of Solution Integration and other applicable Processes.
<b>3.2</b>	<b>Infrastructure Engineering</b>	
<b>3.2.1</b>	<b>Platform Engineering</b>	<p>The purpose of “Platform Engineering” is to design and develop the technology infrastructure platforms in use, or in development, within the IT environment.</p> <p>Platform Engineering includes the following activities:</p>
		1. Evaluating, optimizing and specifying hardware, infrastructure software and services CIs;
		2. Assessing the feasibility of and risks associated with proposed introduction or changes of CIs to the IT environment;
		3. Performing optimal matching of technical requirements with hardware, infrastructure software and services CIs available in the marketplace;

Processes	Definitions
	4. Testing configured hardware and infrastructure software for satisfaction of the requirements and compatibility with other CIs;
	5. Testing manufacturer's in-model revisions to hardware and infrastructure software to confirm proper operation within the IT environment;
	6. Evaluating and recommending or developing solution designs that keep the data assets accessible and recoverable, and meet the requirements for performance, protocol conversion and translation;
	7. Tuning and optimizing platform performance, including with respect to changes (i.e., additions, removals and modifications) of or to software in the IT environment;
	8. Developing specifications for physical and logical network addressing in coordination with other interconnected and third party networks;
	9. Developing and maintaining documents describing the physical and logical networks, including security components and addressing schemes;
	10. Developing and documenting configuration parameters in a manner consistent with maximizing the use, performance and availability of the IT environment within the capabilities of CIs;
	11. Developing, documenting and maintaining the configuration parameters and implementation guidelines for the building of Elements and their sub-components, and providing such information to the applicable Process owner(s);
	12. Specifying the type and quantity of hardware, software, facilities and services as required to meet actual and forecasted business demand;
	13. Testing to verify the successful inclusion of availability mechanisms (e.g., redundancy, failover, service continuity);
	14. Developing, testing and documenting architecturally consistent implementations, configurations and connections;
	15. Developing, testing and documenting configuration policy objects that implement the applicable approved enterprise, IT, security and Client policies;

Processes		Definitions
		16. Specifying the environmental (e.g., power, facilities, temperature, humidity) requirements for design, development and operation;
		17. Identifying and reviewing new types of hardware and infrastructure software applicable to the IT environment and determining compliance with the relevant standards and requirements;
		18. Providing input to and assisting with the development of standards; and
		19. Performing forward-looking assessments of emerging technology(ies) to assess applicability and potential benefit.
<b>3.3</b>	<b>Software Engineering</b>	
<b>3.3.1</b>	<b>Software Design</b>	<p>The purpose of “Software Design” is to transform software-based business, solution, technical requirements into complete, detailed system specifications.</p> <p>Software Design includes the following activities:</p>
		1. Developing detailed alternative software designs and selection criteria (e.g., cost, technical performance, complexity, risk), including:
		(a) Establishing and maintaining a process or processes for identifying software design alternatives, selection criteria, and design issues;
		(b) Identifying software design alternatives;
		(c) Developing criteria for selecting the best software design alternative;
		(d) Identifying and characterizing design issues for software design alternatives;
		(e) Identifying technologies in the IT environment and other technologies as they relate to software design alternatives;
		(f) Identifying potential risks and developing mitigating design features for software design alternatives;
		(g) Documenting the rationale for using particular software design alternatives; and

Processes	Definitions
	(h) Developing timelines for Client interaction with software development activities;
	2. Evolving, to an appropriate degree of detail, operational concepts, scenarios, and environments to describe conditions, operating modes, and operating states for software designs;
	3. Selecting software designs that best satisfy the applicable selection criteria, including:
	(a) Evaluating alternative software design against the applicable selection criteria;
	(b) Assessing, based on evaluation of alternatives, the adequacy of the selection criteria and updating these criteria as necessary;
	(c) Identifying and resolving issues with alternative software designs and requirements;
	(d) Selecting software design alternatives that best satisfy the established selection criteria;
	(e) Establishing requirements for software design alternatives;
	(f) Identifying software designs that will be retired, reused or acquired; and
	(g) Establishing and maintaining documentation for software designs, evaluations and rationale for decisions;
	4. Developing software designs, including:
	(a) Designing the data storage and access for the data layer;
	(b) Designing the user interface at the presentation layer;
	(c) Designing the business rules layer and the application logic;
	(d) Identifying, designing and documenting interfaces associated with other solution components, including those from application to application, and application to database;
	(e) Identifying and designing interfaces associated with external applications or data sources;
	(f) Establishing and maintaining criteria against which designs can be evaluated;
	(g) Identifying and implementing design methods appropriate for the solution;

Processes		Definitions
		(h) Adhering to the applicable design standards and criteria;
		(i) Adhering to the allocated requirements; and
		(j) Documenting designs;
		5. Establishing and maintaining technical data packages (e.g., solution requirements description, allocated requirements, solution component descriptions, solution-related life-cycle process descriptions, key solution characteristics, interface requirements, rationale for decisions and characteristics), including:
		(a) Determining the number of levels of design and the appropriate level of documentation for each design level;
		(b) Basing detailed design descriptions on the allocated solution requirements, architecture, and higher level designs;
		(c) Documenting the design in the technical data package;
		(d) Documenting the rationale for significant decisions affecting cost, schedule, or technical performance; and
		(e) Revising the technical data package as necessary;
		6. Developing application design documents that identify the steps used in design of applications;
		7. Developing and documenting design, conversion, migration, and transition strategies; and
		8. Evaluating whether solutions should be developed, purchased, or reused based on established criteria, including:
		(a) Developing criteria for the reuse of solution designs;
		(b) Analyzing designs to determine if solutions should be developed, reused, or purchased; and
		(c) Planning for how maintenance will be performed when purchased or non-developmental (e.g., commercial off-the-shelf, reuse) solutions are selected.
<b>3.3.2</b>	<b>Software Development</b>	The purpose of “Software Development” is to convert a software design into a complete application program or application system.  Software Development includes the following activities:
		1. Performing software development;

Processes		Definitions
		2. Selecting, tailoring and using methods, tools, and computer programming languages for performing software development activities;
		3. Developing software, including:
		(a) Developing and documenting each unit of the software;
		(b) Developing and documenting the data model and database schema associated with the software;
		(c) Developing and documenting the test requirements and procedures for testing each unit and system;
		(d) Updating the test requirements;
		(e) Evaluating software to confirm internal consistency, feasibility of operation and integration, and consistency with applicable requirements;
		(f) Revising software as necessary; and
		(g) Performing unit testing (e.g., statement coverage testing, branch coverage testing, predicate coverage testing, path coverage testing, boundary value testing, special value testing) of the software as appropriate;
		4. Developing plans to install software in the applicable target environments; and
		5. Developing and maintaining the applicable software documentation, including:
		(a) Reviewing the requirements, design, product, and test results to confirm issues affecting the installation, operation, and maintenance documentation have been identified and resolved, including creating known error records when software is to be released into production with known errors;
		(b) Developing the installation, operation, and maintenance documentation, including development of preliminary versions of such documentation during the early development phases for review and comment by the relevant stakeholders;
		(c) Conducting peer reviews of the installation, operation, and maintenance documentation; and

Processes		Definitions
		(d) Revising the installation, operation, and maintenance documentation as necessary.
<b>3.3.3</b>	<b>Software Integration</b>	The purpose of “Software Integration” is to assemble software from software units, confirm the software, as integrated, functions properly and delivers the solution.  Software Integration includes the following activities:
		1. Determining software integration sequences, including:
		(a) Identifying the software to be integrated;
		(b) Identifying the methods by which the definition of the interfaces between software units will be verified;
		(c) Identifying alternative software integration sequences;
		(d) Selecting the optimal integration sequence; and
		(e) Reviewing, periodically, the software integration sequence and revising as appropriate;
		2. Determining the environments required for integration of software, including:
		(a) Identifying the requirements for the software integration environment;
		(b) Identifying the testing criteria and procedures for the software integration environment; and
		(c) Deciding whether to make or buy the needed software integration environment;
		3. Reviewing interface descriptions for coverage and completeness, including:
		(a) Reviewing interface data for completeness and confirming complete coverage of all interfaces; and
		(b) Periodically reviewing the adequacy of interface descriptions;
		4. Managing internal and external interface definitions, designs, and changes for software including:
		(a) Maintaining the compatibility of the interfaces throughout the life of the software;
		(b) Resolving conflict, noncompliance and change issues; and

Processes	Definitions
	(c) Maintaining a repository for interface data;
	5. Confirming, prior to assembly, that software units required to assemble the software have been properly identified, function according to description, and interface in compliance with interface requirements, including:
	(a) Tracking the status of the software units as they become available for integration;
	(b) Delivering the software units to the integration environment in accordance with the integration sequence and available procedures;
	(c) Confirming the receipt of each software unit and that each meets its description; and
	(d) Checking the configuration status against the expected configuration;
	6. Assembling software units according to the integration sequence, including:
	(a) Confirming the readiness of the integration environment; and
	(b) Revising the software integration sequence as appropriate;
	7. Evaluating software for interface compatibility, including:
	(a) Conducting the evaluation of software following the integration sequence; and
	(b) Recording the evaluation results; and
	8. Packaging software and delivering it to the applicable Process owner(s), including:
	(a) Reviewing the requirements, design, software, verification results, and documentation so that issues affecting the packaging and delivery of the software or software units are identified and resolved;
	(b) Packaging and delivering the software and related documentation to the applicable Process owner(s); and
	(c) Satisfying the applicable requirements and standards (e.g., type of storage and delivery media, required documentation, copyrights, license provisions, security of the software) for packing and delivering the software.

Processes		Definitions
3.3.4	<b>Logical Database Administration</b>	The purpose of “Logical Database Administration” is to perform design-related database functions required to support the applicable Processes.
		Logical Database Administration includes the following activities:
		1. Designing, implementing and maintaining database schema;
		2. Maintaining design consistency across databases associated with different software and identifying data redundancies;
		3. Designing, developing and maintaining entity relationship diagrams;
		4. Reviewing database schema that are the subject of an Incident or Problem and:
		(a) Determining the underlying defects; and
		(b) Revising database schema to restore full functionality; and
3.3.5	<b>Peer Review</b>	The purpose of “Peer Review” is to evaluate software and data models so as to maintain or enhance the quality and verify adherence to the applicable specifications and standards.
		Peer Review includes the following activities:
		1. Conducting structured walkthroughs of software and data models;
		2. Developing insight into the suitability of software and data models, including:
		(a) Obtaining the perspectives of those with applicable backgrounds and experience;
		(b) Identifying errors in coding;
		(c) Identifying inconsistencies or inefficiencies in how data is managed;
		(d) Assessing the degree of compliance with requirements and applicable standards; and
(e) Developing suggestions for improvement; and		

Processes		Definitions
		3. Documenting and sharing the results of peer reviewed software and data models with the applicable Process owner(s) and other personnel.
<b>3.4</b>	<b>Quality Assurance</b>	
<b>3.4.1</b>	<b>Testing</b>	The purpose of “Testing” is to confirm that solutions to be added to the IT environment meet their requirements.  Testing includes the following activities:
		1. Developing testing methods to test solutions, including:
		(a) Identifying the requirements to be satisfied by each solution;
		(b) Identifying the testing methods that are available for use; and
		(c) Defining the testing methods to be used for each solution;
		2. Defining test environments, including:
		(a) Identifying the testing environment responsibilities;
		(b) Establishing the test team and developing the test files and data;
		(c) Identifying the testing resources (e.g., test scripts) that are available for reuse and modification; and
		(d) Identifying the testing hardware and tools;
		3. Establishing and maintaining test procedures and criteria, including:
		(a) Generating the set of comprehensive, integrated test scripts;
		(b) Developing and refining the test criteria when necessary; and
		(c) Identifying the expected results, any tolerances allowed in observation, and other criteria for satisfying the requirements;
		4. Testing solutions, including:
		(a) Performing testing of solutions or solution components against their requirements;

Processes		Definitions
		(b) Recording the results of testing activities;
		(c) Identifying action items resulting from testing of solutions or solution components; and
		(d) Documenting the “as-run” testing method and the deviations from the available methods and procedures discovered during its performance; and
		5. Analyzing test activity results and identifying corrective actions, including:
		(a) Comparing the actual results to expected results;
		(b) Identifying, based on the established testing criteria, those portions of the solution and solution sub-components that have not met their requirements and identifying issues with the methods, procedures, criteria, and verification environment;
		(c) Analyzing the testing data related to defects;
		(d) Using testing results to compare actual measurements and performance to technical performance parameters; and
		(e) Providing information on how defects may be resolved (e.g., verification methods, criteria, and verification environment) and preparing a plan for such resolution.
<b>3.4.2</b>	<b>Environment Integration Testing</b>	The purpose of “Environment Integration Testing” is to perform those activities necessary to confirm that solutions will perform as required in the proposed environment.  Environment Integration Testing includes the following activities:
		1. Applying the solutions to the appropriate test environments;
		2. Validating, for solutions that are tested in a test environment, that solutions perform as intended when:
		(a) All solution components comprising the required system (e.g., hardware, software) are tested together, and
		(b) Tested in a model production environment; and
		3. Validating, for solutions that are tested in the production environment, that solutions perform as intended when all solution components comprising the required system (e.g., hardware, software) are tested together.

Processes		Definitions
3.4.3 (a)	<b>User Acceptance Testing (CTS Users)</b>	The purpose of “User Acceptance” is to perform those activities necessary to confirm that solutions will perform as required by the applicable Clients.
		User Acceptance includes the following activities:
		1. Confirming that solutions satisfy the applicable test criteria;
		2. Confirming that solutions meet the applicable usability requirements (e.g., user interface, performance, reporting);
		3. Confirming that solutions satisfy the applicable business requirements; and
		4. Confirming that the introduction of solutions does not adversely impact pre-existing functionality other than as planned.
3.4.3 (b)	<b>User Acceptance Testing (HNT Users)</b>	The purpose of “User Acceptance” is to perform those activities necessary to confirm that solutions will perform as required by the applicable Clients.
		User Acceptance includes the following activities:
		5. Confirming that solutions satisfy the applicable test criteria;
		6. Confirming that solutions meet the applicable usability requirements (e.g., user interface, performance, reporting);
		7. Confirming that solutions satisfy the applicable business requirements; and
		8. Confirming that the introduction of solutions does not adversely impact pre-existing functionality other than as planned.
3.5	<b>Client Support</b>	
3.5.1	<b>Service Desk</b>	The purpose of “Service Desk” is to provide the primary point of contact related to IT services for Clients, regardless of the channel (e.g., phone, web, email, software-generated events) used for activities such as requesting information, registering complaints, requesting IT services or reporting IT-related performance issues such as Incidents or Problems (where all such activities are collectively “Events”). Service Desk acts as an advocate for Clients and provides an information link between and among Clients, the IT environment, other parts of the enterprise, Actors and third parties.
		Service Desk includes the following activities:

Processes	Definitions	
		1. Providing the ability for Clients to:
		(a) Submit Events, including complaints regarding the quality of IT services (e.g., non-functioning hardware, system access needs, other issues with hardware or software) and other inquiries regarding hardware, software and IT services; and
		(b) Submit orders for items within either the Service Catalog (e.g., IMACs) or other applicable mechanisms;
		2. Collecting information from the applicable Process owner(s) regarding resolution status and other activities that may impact or have already impacted Clients;
		3. Providing status updates to Clients (or their designees) on matters previously reported;
		4. Logging relevant details regarding Events and, as applicable, assigning categorization and prioritization codes;
		5. Making initial assessments of Events to determine whether they can be answered or resolved by the applicable Process owner(s) of Service Desk;
		6. Answering and resolving Events that can be performed by the applicable Process owner(s) of Service Desk, and transferring responsibility for resolution to the applicable Process owner(s) of other Processes for the remainder;
		7. Managing the lifecycle of Events, including opening, closing, verifying, documenting and communicating with Clients regarding Events, regardless of whether the actions in response to such Events are performed by the applicable Process owner(s) of Service Desk or other Processes;
		8. Updating the CMDB as applicable and appropriate;
		9. Obtaining approval, where necessary, for Client requests submitted to the applicable Process owner(s) of Service Desk;
		10. Developing and maintaining a repository of applicable knowledge regarding the IT environment so as to maximize the number of Events that can be handled by the applicable Process owner(s) of Service Desk (i.e., without the need of assistance from other Process owners);

Processes		Definitions
		11. Publishing approved communication notices, developed by the applicable Process owner(s) of Service Desk and other applicable Processes, regarding the IT services (e.g., software release schedules, planned outages);
		12. Coordinating the handoff of information between and among Clients, the IT environment, other parts of the enterprise, Actors and third parties to facilitate an effective and efficient delivery of IT services;
		13. Obtaining Client feedback regarding the performance of IT services via appropriate and applicable means; and
		14. Developing and producing comprehensive periodic management information packages regarding the delivery of IT services to Clients, including:
		(a) The various operations of Service Desk (e.g., call statistics, call durations, call abandonment, assistance resolution rates); and
		(b) Observations regarding IT service delivery and recommendations for improvement.
3.5.2	<b>Technical Support</b>	<p>The purpose of “Technical Support” is to provide technical input and assistance regarding the IT environment and technology in general to Clients and the applicable Process owner(s) of Internal Client Relationship Management and External Relationship Management, as directed by the applicable Process owner(s) of Internal Client Relationship Management, External Client Relationship Management and other Processes.</p> <p>Technical Support includes the following activities:</p>
		1. Working with Clients to provide technical input to the identification and specification of high-level IT-related business missions, objectives and concepts;
		2. Providing technical input and guidance regarding new business opportunities or requirements that could affect the IT environment, including general guidance on technical solutions in the pre-business requirements development phase and generating related sourcing and pricing information;

Processes		Definitions
		3. Attending periodic or ad hoc Client management meetings to provide technical support and feedback regarding IT technology plans and status; and
		4. Providing technical input and guidance into the development of Internal Client responses to requests for proposals and other similar constructs used by its customers for goods and/or services.
<b>3.5.3</b>	<b>Business Systems Support</b>	<p>The purpose of “Business Systems Support” is to provide input and assistance to Clients in their understanding and use of their business systems.</p> <p>Business Systems Support includes the following activities:</p>
		1. Maintaining a working knowledge of the business and industry of Clients;
		2. Understanding the business processes and systems of Clients, including how they are used collectively to achieve the desired business outcomes;
		3. Understanding the current configuration of the business systems of Clients and maintaining knowledge regarding the fuller capabilities of such systems;
		4. Developing ad hoc reports for Clients, including the provision of softcopy files for direct use and manipulation by Clients;
		5. Assisting Clients with developing strategies for the use of their business systems, including associated data, configuration options, system upgrade and system replacement;
		6. Assisting Clients with articulating their business system requirements and assessing the solutions developed to achieve such requirements, including those proposed by the applicable Process owner(s) of Solution Integration and other Processes;
		7. Assisting Clients with the design of their testing regime and scripts for their business systems;
		8. Identifying opportunities where Client training, change in business process or change in system configuration would likely improve the efficiency and effectiveness of Client operations and communicating such opportunities to the applicable Clients and Process owner(s);

Processes		Definitions
		9. Assisting Clients in revising their operational procedures based on change in technology; and
		10. Providing Clients with information and instructions necessary to perform system functions required to handle infrequently occurring and highly complex business functions.
<b>3.6</b>	<b>Acquire</b>	
<b>3.6.1</b>	<b>Procurement Management</b>	<p>The purpose of “Procurement Management” is to develop, enter into, and manage purchasing agreements (including master purchasing agreements and item-specific agreements under existing master purchasing agreements) for Elements and ancillary goods and services (e.g., warranties, Spare Parts, Consumables).</p> <p>Procurement Management includes the following activities:</p>
		1. Serving as the primary point of contact for Internal Actors for the interpretation and modification of purchase agreements with suppliers for Elements and ancillary goods and services;
		2. Obtaining and reviewing properly approved sourcing strategies and requirements for Elements and ancillary goods and services in the IT environment;
		3. Obtaining information regarding procurement standards, objectives and requirements from the applicable Process owner(s) of Commercial Management;
		4. Determining the need to develop or modify purchase agreements for Elements and ancillary goods and services;
		5. Establishing procurement and management strategies for purchase agreements for Elements and ancillary goods and services;
		6. Obtaining approval for procurement strategies from the applicable Process owner(s) of Commercial Management and, as applicable, other personnel designated to approve procurement strategies;
		7. Maintaining a knowledge base of the relevant supplier community (e.g., companies, pricing, procurement issues and trends, new services and products) for Elements and ancillary goods and services;

Processes		Definitions
		8. Negotiating purchase agreements with suppliers, including the associated pricing and service levels, for Elements and ancillary goods and services;
		9. Obtaining approvals from the appropriate personnel designated to approve new or modified purchase agreements for Elements and ancillary goods and services;
		10. Converting negotiated deals for Elements and ancillary goods and services into either standalone purchasing agreements, where an existing agreement is not in force, or contractual amendments to existing purchasing agreements as applicable;
		11. Administering the lifecycle of purchase agreements (e.g., renew, modify, renegotiate, terminate, replace) for Elements and ancillary goods and services, including:
		(a) Tracking and providing the requisite notices and other contract-based information to the suppliers;
		(b) Monitoring and verifying the performance of supplier obligations;
		(c) Validating the assessment of charges; and
		(d) Maintaining ongoing relationships with suppliers, with which purchasing agreements are in place, to facilitate resolution of issues and implementation of changes; and
		12. Reporting instances in which Actors or Clients are found not using the appropriate purchasing agreements for the purchase of Elements and ancillary goods and services, and advising the applicable Process owner(s) or other personnel as appropriate.
3.6.2	<b>Third Party Contract Management</b>	The purpose of “Third Party Contract Management” is to manage the contracts of Third Party Vendors as described at <b>[insert reference to Third Party Contract Management in Schedule O]</b>
3.6.3	<b>Acquisition</b>	The purpose of “Acquisition” is to use purchasing agreements developed, entered into or managed by Procurement Management to fulfill the acquisition of Elements and ancillary goods and services.  Acquisition includes the following activities:
		1. Obtaining orders for Elements and ancillary goods and services from the applicable Process owner(s) and:

Processes		Definitions
		(a) Validating such orders for correctness and approval from the appropriate personnel;
		(b) Determining whether the items requested are already in the IT inventory; and
		(c) Acquiring the items through purchasing agreements already in force and, as applicable, other means;
		2. Tracking the status of orders for Elements and ancillary goods and services and escalating delays or other matters associated with such orders to the applicable Process owner(s) and other personnel as appropriate;
		3. Processing appropriately approved order changes for Elements and ancillary goods and services;
		4. Reporting the status of orders for Elements and ancillary goods and services to the applicable Process owner(s); and
		5. Advising the applicable Process owner(s) of Procurement Management of problems or issues with the purchasing agreements for Elements and ancillary goods and services, and interacting with the underlying suppliers as necessary.
<b>3.7</b>	<b>Deploy</b>	
<b>3.7.1</b>	<b>Configuration</b>	The purpose of “Configuration” is to configure Elements according to the specifications for build and operational function provided by the applicable Process owner(s).  Configuration includes the following activities:
		1. Building Elements, including the integration of applicable sub-components (e.g., software, hardware);
		2. Performing operational selections, on or with respect to the Element, required to properly implement the required features, functionality and constraints, including the association of the Element or the user(s) of the Element with the applicable non-security-based policy objects; and
		3. Updating the CMDB as applicable and appropriate.

Processes		Definitions
3.7.2	<b>Implementation</b>	<p>The purpose of “Implementation” is to coordinate, manage and execute the activities necessary to perform change to Elements in the IT and Client environments, including adding and removing Elements and sub-components of Elements from such environments.</p> <p>Implementation includes the following activities:</p>
		1. Obtaining, from the applicable Process owner(s) (e.g., Service Desk), appropriately approved implementation requests;
		2. Performing those functions necessary to verify that the applicable attributes of the IT and Client environments can support the implementation requests, including:
		(a) Conducting, when applicable, site surveys and informing the applicable Process owner(s), Clients and other personnel as appropriate of issues (e.g., physical space limitations and requirements, changes to the cabling infrastructure);
		(b) Developing implementation plans; and
		(c) Coordinating with the applicable Process owner(s), Clients and other personnel as necessary;
		3. Optimizing performance from financial, timing and Client-disruption perspectives, including combining or disaggregating activities when applicable;
		4. Proposing, when applicable, implementation windows to, and as necessary obtaining approval for such windows from, the applicable Process owner(s) of Change Management Execution;
		5. Dispatching, when applicable, the appropriate personnel to the applicable location(s);
		6. Fulfilling implementation requests, including:
		(a) Obtaining, when applicable, items (e.g., Elements, sub-components of Elements, release packages) from the applicable Process owner(s);
		(b) Confirming, when applicable, that obtained items are properly configured;
		(c) Installing, moving, adding, changing, removing and releasing, when applicable, obtained items and existing Elements;

Processes	Definitions
	(d) Connecting, when applicable, obtained items and existing Elements to the applicable IT and Client environments;
	(e) Performing, or when applicable, requesting to be performed by the applicable Process owner(s), security, file access, directory and other administrative procedures as applicable;
	(f) Activating and deactivating, when applicable, obtained items and existing Elements, including their underlying services;
	(g) Notifying, when applicable, the applicable Process owner(s) of the readiness for supplemental activities to be performed to complete requests, including notifying the applicable Process owner(s) of Configuration and Security Administration regarding implementation of the associated non-security- and security- based policies and access rights;
	(h) Backing up and copying data when applicable, including, when appropriate, notifying Clients of self-service data restoration procedures;
	(i) Confirming that requests have been implemented as required;
	(j) Performing tests to confirm that fulfillment of requests provides the expected functionality, including, as applicable, with respect to other Elements;
	(k) Taking corrective action when necessary, including providing and executing appropriate back-out procedures for unsuccessful implementations; and
	(l) Confirming that Client and IT operational capabilities are not adversely impacted as a consequence of fulfilling requests;
	7. Returning, when applicable, to the applicable Process owner(s), Elements and sub-components of Elements removed from the IT and Client environments;
	8. Advising the applicable Process owner(s) of performance problems or other issues that are unrelated to the proper fulfillment of implementation requests;
	9. Updating the CMDB as applicable and appropriate; and

Processes		Definitions
		10. Notifying the applicable Process owner(s), Clients and other personnel of the completion of implementation requests.
<b>3.8</b>	<b>Maintain</b>	
<b>3.8.1</b>	<b>Maintenance Administration</b>	<p>The purpose of “Maintenance Administration” is to determine the activities necessary to maintain Elements in accordance with the applicable specifications, including from their manufacturers and applicable standards organizations.</p> <p>Maintenance Administration includes the following activities:</p>
		1. Obtaining, throughout the full lifecycle of Elements, the publications (e.g., bulletins, alerts, manuals, software, firmware) from the applicable organizations (e.g., manufacturers, standards organizations) regarding recommended maintenance activities (e.g., firmware updates, software patches/upgrades, physical cleaning, inspection of parts and connections, output testing, replacement of Consumables) to be performed (“Recommended Maintenance”);
		2. Determining the applicability and appropriateness of implementing Recommended Maintenance, including requesting the applicable Process owner(s) to review, test and propose recommendations for the modification, use and implementation of Recommended Maintenance;
		3. Aggregating and reporting recommendations regarding Recommended Maintenance to the applicable Process and Element owner(s) and soliciting feedback;
		4. Developing and revising maintenance requirements based on the feedback obtained from the applicable Process and Element owner(s) (“Maintenance Requirements”);
		5. Obtaining approvals for implementing recurring and one-time Maintenance Requirements from the appropriate personnel designated to approve such maintenance;
		6. Submitting appropriately approved Maintenance Requirements to the applicable Process owner(s) (e.g., Corrective Maintenance, Adaptive Maintenance, Release Management Execution, Local Maintenance & Repair, Remote Maintenance & Repair) to be implemented; and

Processes		Definitions
		7. Maintaining complete records of Recommended Maintenance and the associated approvals and rejections for the performance of Maintenance Requirements.
<b>3.8.2</b>	<b>Local Maintenance &amp; Repair</b>	The purpose of “Local Maintenance & Repair” is to coordinate, manage and execute the activities requiring physical intervention to perform approved Maintenance Requirements and correct Incidents and Problems.  Local Maintenance & Repair includes the following activities:
		1. Developing, when applicable, the appropriate mechanisms to provide, as required, for the ready availability of Spares, Spare Parts and Consumables;
		2. Obtaining, from the applicable Process owner(s) (e.g., Maintenance Administration, Service Desk), appropriately approved maintenance and repair requests;
		3. Performing those functions necessary to verify that the applicable attributes of the IT and Client environments can support the maintenance and repair requests, including:
		(a) Conducting, when applicable, site surveys and informing the applicable Process owner(s), Clients and other personnel as appropriate of issues (e.g., physical space limitations and requirements);
		(b) Developing maintenance and repair plans; and
		(c) Coordinating with the applicable Process owner(s), Clients and other personnel as necessary;
		4. Proposing, when applicable, implementation windows to, and as necessary obtaining approval for such windows from, the applicable Process owner(s) of Change Management Execution;
		5. Dispatching, when applicable, the appropriate personnel to the applicable location(s);
		6. Fulfilling maintenance and repair requests, including:
		(a) Obtaining, when applicable, items (e.g., Maintenance Requirements, Elements, sub-components of Elements, Spares, Spare Parts, Consumables, release packages) from the applicable Process owner(s);

Processes	Definitions	
		(b) Confirming, when applicable, that obtained items are properly configured;
		(c) Performing, when applicable, the applicable Maintenance Requirements;
		(d) Diagnosing, when applicable, Incidents and Problems within the IT and Client environments and formulating corrective actions designed to restore and/or repair the applicable IT services;
		(e) Performing repair activities as required, including, when applicable and appropriate, replacing malfunctioning sub-components with Spare Parts, replacing Consumables, installing patches and firmware updates, re-installing malfunctioning software, and restoring and reconfiguring the applicable settings;
		(f) Replacing Elements with Spares, subject to appropriate approval and prior performance of applicable repair methods;
		(g) Performing, or when applicable, requesting to be performed by the applicable Process owner(s), security, file access, directory and other administrative procedures as applicable;
		(h) Connecting, when applicable, obtained items and existing Elements to the applicable IT and Client environments;
		(i) Activating and deactivating, when applicable, obtained items and existing Elements, including their underlying services;
		(j) Notifying, when applicable, the applicable Process owner(s) of the readiness for supplemental activities to be performed to complete requests, including notifying the applicable Process owner(s) of Configuration and Security Administration regarding implementation of the associated non-security- and security- based policies and access rights;
		(k) Backing up and copying data when applicable, including, when appropriate, notifying Clients of self-service data restoration procedures;
		(l) Confirming that requests have been implemented as required;

Processes		Definitions
		(m) Performing tests to confirm that fulfillment of requests provides the expected functionality, including, as applicable, with respect to other Elements;
		(n) Taking corrective action when necessary, including providing and executing appropriate back-out procedures for unsuccessful maintenance and repair; and
		(o) Confirming that Client and IT operational capabilities are not adversely impacted as a consequence of fulfilling requests;
		7. Returning, when applicable, to the applicable Process owner(s), Elements and sub-components of Elements removed from the IT and Client environments;
		8. Advising the applicable Process owner(s) of performance problems or other issues that are unrelated to the proper fulfillment of maintenance and repair requests;
		9. Updating the CMDB as applicable and appropriate; and
		10. Notifying the applicable Process owner(s), Clients and other personnel of the completion of maintenance and repair requests.
<b>3.8.3</b>	<b>Remote Maintenance &amp; Repair</b>	The purpose of “Remote Maintenance & Repair” is to coordinate, manage and execute the activities not requiring physical intervention to perform approved Maintenance Requirements and correct Incidents and Problems.  Remote Maintenance & Repair includes the following activities:
		1. Obtaining, from the applicable Process owner(s) (e.g., Maintenance Administration, Service Desk), appropriately approved maintenance and repair requests;
		2. Performing those functions necessary to verify that the applicable attributes of the IT and Client environments can support the maintenance and repair requests, including:
		(a) Validating the availability of required network access and bandwidth;
		(b) Developing maintenance and repair plans; and
		(c) Coordinating with the applicable Process owner(s), Clients and other personnel as necessary;

Processes	Definitions
	3. Proposing, when applicable, implementation windows to, and as necessary obtaining approval for such windows from, the applicable Process owner(s) of Change Management Execution;
	4. Fulfilling maintenance and repair requests, including:
	(a) Obtaining, when applicable, items (e.g., Maintenance Requirements, Elements, sub-components of Elements, release packages) from the applicable Process owner(s);
	(b) Confirming, when applicable, that obtained items are properly configured;
	(c) Performing, when applicable, the applicable Maintenance Requirements;
	(d) Diagnosing, when applicable, Incidents and Problems within the IT and Client environments and formulating corrective actions designed to restore and/or repair the applicable IT services;
	(e) Performing repair activities as required, including, when applicable and appropriate, installing patches and firmware updates, re-installing malfunctioning software, and restoring and reconfiguring the applicable settings;
	(f) Performing, or when applicable, requesting to be performed by the applicable Process owner(s), security, file access, directory and other administrative procedures as applicable;
	(g) Connecting, when applicable, obtained items and existing Elements to the applicable IT and Client environments;
	(h) Activating and deactivating, when applicable, obtained items and existing Elements, including their underlying services;
	(i) Notifying, when applicable, the applicable Process owner(s) of the readiness for supplemental activities to be performed to complete requests, including notifying the applicable Process owner(s) of Configuration and Security Administration regarding implementation of the associated non-security- and security- based policies and access rights;
	(j) Backing up and copying data when applicable, including, when appropriate, notifying Clients of self-service data restoration procedures;

Processes		Definitions
		(k) Confirming that requests have been implemented as required;
		(l) Performing tests to confirm that fulfillment of requests provides the expected functionality, including, as applicable, with respect to other Elements;
		(m) Taking corrective action when necessary, including providing and executing appropriate back-out procedures for unsuccessful maintenance and repair; and
		(n) Confirming that Client and IT operational capabilities are not adversely impacted as a consequence of fulfilling requests;
		5. Advising the applicable Process owner(s) of performance problems or other issues that are unrelated to the proper fulfillment of maintenance and repair requests;
		6. Updating the CMDB as applicable and appropriate; and
		7. Notifying the applicable Process owner(s), Clients and other personnel of the completion of maintenance and repair requests or the need for the applicable Process owner(s) of other Processes (e.g., Local Maintenance & Repair, Implementation) to perform activities to resolve matters that cannot be performed remotely.
<b>3.9</b>	<b>Software Maintenance</b>	
<b>3.9.1</b>	<b>Corrective Maintenance</b>	<p>The purpose of “Corrective Maintenance” is to (a) modify software (using the applicable Processes and controls of Software Engineering) and data to correct discovered defects, recover from Incidents, resolve Problems and implement Maintenance Requirements, (b) work with software manufacturers regarding defects they are responsible to correct, and (c) develop recommendations regarding Recommended Maintenance software designed to address defects (e.g., patches).</p> <p>Corrective Maintenance includes the following activities:</p>
		1. Reviewing software that is the subject of an Incident or Problem and determining the underlying defects, including those:
		(a) Resulting from errors in design, logic, coding or other comparable issues;

Processes		Definitions
		(b) Resulting in or from errors and inconsistencies in the underlying data being produced or processed; and
		(c) Causing abnormal system performance characteristics;
		2. Restoring full functionality prevented by defects, including:
		(a) Developing changes to software (e.g., patches, fixes); and
		(b) Working, when applicable, with the underlying software manufacturers to cause them to develop and publish changes to software for which they are responsible;
		3. Developing, as required, additional software and other methods to:
		(a) Rectify erroneous results (e.g., data, reports) on both a current- and, as applicable, historical- basis;
		(b) Restore system integrity; and
		(c) Enable normal use;
		4. Documenting and providing to the applicable Process owner(s), detailed actions required to be performed by such owner(s) in support of the recovery from Incidents and the resolution of Problems with software and data (e.g., rollback of data, re-running of jobs, running of additional software to correct contaminated data);
		5. Reviewing, testing and analyzing Recommended Maintenance software and providing recommendations for use, including modifications to Recommended Maintenance software and, when applicable, other software, to the applicable Process owner(s) of Maintenance Administration;
		6. Developing changes, when applicable, to software to implement Maintenance Requirements;
		7. Updating supporting documentation to conform with changes to software;
		8. Providing the applicable Process owner(s), including those of Business Systems Support, with information regarding the scope of and potential impact from software changes;
		9. Developing and publishing testing schedules to the applicable Process owner(s);

Processes		Definitions
		10. Providing changed software to the applicable Process owner(s) for testing, packaging, implementation and use within the IT and Client environments;
		11. Modifying software and associated documentation based on test and implementation results;
		12. Submitting changes to the applicable Process owner(s) of Change Management Execution; and
		13. Updating the CMDB as applicable and appropriate.
3.9.2	<b>Adaptive Maintenance</b>	<p>The purpose of “Adaptive Maintenance” is to (a) modify software (using the applicable Processes and controls of Software Engineering) such that it remains operationally useful within the IT and Client environments over time in response to changing circumstances and needs, including implementing Maintenance Requirements, and (b) develop recommendations regarding Recommended Maintenance software designed to provide changed capabilities (e.g., upgrades).</p> <p>Adaptive Maintenance includes the following activities:</p>
		1. Developing changes to software to allow it to adapt over time as necessary, including complying with ongoing change in:
		(a) Client policy, procedure, process, staffing, organization, location, time and other business changes and requirements;
		(b) Client functionality requirements, including those that would (i) modify or remove then-current features and capabilities, and (ii) add new features and capabilities;
		(c) Connectivity requirements with systems both internal and external to the IT environment (i.e., interfaces);
		(d) Regulatory requirements and applicable industry standards; and
		(e) IT policy and technology (e.g., security, architecture, platform, hardware, configuration, tools), including (i) upgrades and changes to the hardware and infrastructure-based software in which the software must run, and (ii) changes to the interfaces the software must make with hardware or other software (e.g., storage, messaging systems, databases);

Processes		Definitions
		2. Reviewing, testing and analyzing Recommended Maintenance software and providing recommendations for use, including modifications to Recommended Maintenance software and, when applicable, other software, to the applicable Process owner(s) of Maintenance Administration;
		3. Developing changes, when applicable, to software to implement Maintenance Requirements;
		4. Populating and updating data tables, configuration settings and other adjustment mechanisms associated with software that are not designed to be performed directly by Clients;
		5. Updating supporting documentation to conform with changes to software;
		6. Providing the applicable Process owner(s), including those of Business Systems Support, with information regarding the scope of and potential impact from software changes;
		7. Developing and publishing testing schedules to the applicable Process owner(s);
		8. Providing changed software to the applicable Process owner(s) for testing, packaging, implementation and use within the IT and Client environments;
		9. Modifying software and associated documentation based on test and implementation results;
		10. Submitting changes to the applicable Process owner(s) of Change Management Execution; and
		11. Updating the CMDB as applicable and appropriate.
3.9.3	<b>Perfective Maintenance</b>	<p>The purpose of “Perfective Maintenance” is to modify software (using the applicable Processes and controls of Software Engineering) to improve its efficiency, reliability and maintainability.</p> <p>Perfective Maintenance includes the following activities:</p>
		1. Monitoring the operation and use of software to gain an understanding of how it performs in the IT and Client environments;

Processes		Definitions
		2. Reviewing the underlying code and determining if change from various methods (e.g., programming language, compiler optimization, code reorganization) could be used to achieve beneficial outcomes;
		3. Developing changes to software that will allow it to:
		(a) Perform its then-current functions using less IT resources (e.g., compute power, memory, bandwidth, storage);
		(b) Operate at higher levels of availability; and
		(c) Require less effort to be maintained, enhanced, adapted or corrected over time;
		4. Updating supporting documentation to conform with changes to software;
		5. Providing the applicable Process owner(s), including those of Business Systems Support, with information regarding the scope of and potential impact from software changes;
		6. Developing and publishing testing schedules to the applicable Process owner(s);
		7. Providing changed software to the applicable Process owner(s) for testing, packaging, implementation and use within the IT and Client environments;
		8. Modifying software and associated documentation based on test and implementation results;
		9. Submitting changes to the applicable Process owner(s) of Change Management Execution; and
		10. Updating the CMDB as applicable and appropriate.
<b>3.9.4</b>	<b>Preventive Maintenance</b>	The purpose of “Preventive Maintenance” is to modify software (using the applicable Processes and controls of Software Engineering) to reduce the probability of future failure from defects.  Preventive Maintenance includes the following activities:
		1. Monitoring the operation and performance of software under scenarios designed to provide early warning signals of potential defects (e.g., memory leaks, maximum number of records to be processed, file size thresholds, input error handling);
		2. Developing changes to software to:

Processes	Definitions	
		(a) Correct latent defects before such defects become Incidents or Problems; and
		(b) Improve error identification and error handling;
		3. Updating supporting documentation to conform with changes to software;
		4. Providing the applicable Process owner(s), including those of Business Systems Support, with information regarding the scope of and potential impact from software changes;
		5. Developing and publishing testing schedules to the applicable Process owner(s);
		6. Providing changed software to the applicable Process owner(s) for testing, packaging, implementation and use within the IT and Client environments;
		7. Modifying software and associated documentation based on test and implementation results;
		8. Submitting changes to the applicable Process owner(s) of Change Management Execution; and
		9. Updating the CMDB as applicable and appropriate.
<b>3.10</b>	<b>Operations</b>	
<b>3.10.1</b>	<b>Operations Scheduling</b>	<p>The purpose of “Operations Scheduling” is to develop and maintain a schedule for applications and services (e.g., production control) that meets Client requirements and appropriately takes into consideration dependencies and Client priorities.</p> <p>Operations Scheduling includes the following activities:</p>
		1. Resolving scheduling conflicts;
		2. Identifying and resolving errors with the execution of jobs, including:
		(a) Causing erroneous job activities to be circumvented and jobs to be restarted or rerun; and
		(b) Escalating errors that cannot be resolved to the applicable Process owner(s) to remove the underlying defects in software, hardware and data;

Processes		Definitions
		3. Assessing the feasibility of and risks associated with proposed changes that could affect processing schedules or other activities;
		4. Implementing changes to processing schedules that are approved by the applicable Process owner(s); and
		5. Proactively preparing for processing deadlines to meet Client requirements.
<b>3.10.2</b>	<b>Computer Operations</b>	The purpose of “Computer Operations” is to perform the functions necessary for operation of computing platforms.  Computer Operations includes the following activities:
		1. Providing the required environments (e.g., production, development, quality assurance, training), including:
		(a) Making online systems and applications for such environments available for access during scheduled hours; and
		(b) Maintaining the environments at the required release levels;
		2. Assessing the feasibility of and risks associated with proposed changes that affect the systems, platforms and applications;
		3. Implementing changes to systems in a controlled manner, including:
		(a) Facilitating the orderly turnover of systems, platforms and applications;
		(b) Adhering to documentation standards;
		(c) Informing stakeholders of the changes; and
		(d) Providing coordination of the implementation, integration, testing and acceptance of new systems, platforms and applications;
		4. Initiating and executing online and batch applications, including scheduled, unscheduled and on-request applications, as well as Client-initiated processing;
		5. Terminating applications as appropriate;
		6. Issuing operator commands;
		7. Performing back-ups;

Processes	Definitions	
		8. Performing the allocation and placement of files;
		9. Monitoring the usage of files;
		10. Logging off Clients;
		11. Initiating and terminating utilities;
		12. Canceling transactions as appropriate;
		13. Transmitting and receiving information to and from external organizations;
		14. Operating master console functions, including responding to program requests for intervention;
		15. Handling abnormal terminations and similar situations resulting from errors and conditions that can be resolved by correctly performing or re-performing the jobs (e.g., restarts, reruns) in accordance with documented procedures or workarounds, and escalating the errors and conditions that cannot be resolved to the applicable Process owner(s), including those of Operations Scheduling;
		16. Performing computer shutdowns and restarts as required; and
		17. Executing utility functions.
<b>3.10.3</b>	<b>Network Operations</b>	<p>The purpose of “Network Operations” is to perform the functions necessary for operation of separate or combined voice and data networks.</p> <p>Network Operations includes the following activities:</p>
		1. Inventorying and assigning network addresses, and updating naming and other systems;
		2. Verifying that network-related software is maintained at the required release levels and causing the applicable Process owner(s) to address deficiencies;
		3. Assessing the feasibility of and risks associated with proposed changes that affect the network(s);
		4. Collecting and analyzing logged network data;
		5. Reconfiguring or rerouting network traffic, including by using available alternative routing and back-up facilities, to:

Processes		Definitions
		(a) Achieve increased throughput or improved balance among network segments to accommodate unanticipated demand;
		(b) Circumvent a failed component;
		(c) Prevent denial of service to legitimate Clients; and
		(d) Provide network service to alternate locations in conjunction with disaster recovery tests and actual disasters;
		6. Verifying proper operation of interfaces with affiliated networks, both internal and external to the enterprise, and causing the applicable Process owner(s) and external network owner(s) to address deficiencies; and
		7. Troubleshooting and executing diagnostic tests.
<b>3.10.4</b>	<b>Media Operations</b>	The purpose of “Media Operations” is the management of the media providing input to and producing output from server-based peripherals.  Media Operations includes the following activities:
		1. Checking output queues, changing output priorities, taking media-based Elements in and out of service, and displaying, starting, spooling and draining output queues;
		2. Monitoring print performance and taking remedial action where required to meet the applicable performance objectives, including control of print queues, queue capacity and print request prioritization;
		3. Initiating and completing media mounts, including inserting and ejecting volumes associated with automated libraries;
		4. Executing off-site and on-site media storage processes, including logging and tracking of media on- and off-site, complying with physical specifications and retention periods, performing required cycling/rotation of media and security, packaging and transportation of media (and/or electronic transmission of information and data) to and from storage and remote computer recovery centers;
		5. Obtaining off-site media when required;
		6. Maintaining media library system inventory information;

Processes		Definitions
		7. Responding appropriately to media reliability threshold error events, including replacing media;
		8. Archiving data on the applicable media;
		9. Executing programs to retrieve data from archived media;
		10. Initializing new media and obtaining media inventories as required to fulfill operational needs;
		11. Monitoring and reporting media utilization;
		12. Testing retrieval and restoration capabilities (e.g., retrieving a randomly selected data file as a test and verifying that the data can be restored in a usable fashion);
		13. Separating, packaging, labeling and tracking printed output;
		14. Delivering printed output to required locations; and
		15. Finding, tracing or replacing lost printed output.
<b>3.10.5</b>	<b>Physical Database Administration</b>	The purpose of “Physical Database Administration” is to manage data, including data contained in files and databases.  Physical Database Administration includes the following activities:
		1. Planning for and changing the size of databases as required (e.g., change in business volume, addition or retirement of new software, software capabilities);
		2. Monitoring database and file performance;
		3. Monitoring space utilization;
		4. Improving database and file access performance;
		5. Designing, implementing, reorganizing and maintaining databases and file archives to provide data integrity and meet applicable business requirements;
		6. Recovering damaged or corrupted databases and files;
		7. Maintaining physical database definitions;
		8. Implementing, testing and promoting into production database structural changes;
		9. Updating the CMDB as applicable and appropriate;

Processes		Definitions
		10. Copying, moving and updating the information contained within databases and files to meet the appropriately approved needs of other Process owners and Clients; and
		11. Diagnosing and repairing damage to the information contained within databases and files as a result of actions arising from the storage (i.e., not from use) of such information, and escalating damage that cannot be repaired to the applicable Process owner(s).
<b>3.10.6</b>	<b>Operations Monitoring</b>	The purpose of “Operations Monitoring” is to monitor and report on the operation of Elements and their relevant sub-components.  Operations Monitoring includes the following activities:
		1. Monitoring functionality and performance (including monitoring of related manual processes) to:
		(a) Verify compliance with operational design characteristics; and
		(b) Identify causes of performance degradation;
		2. Monitoring the flow of demand on the IT environment and the achievement of the expected individual and systemic outcomes;
		3. Identifying abnormal circumstances that could be indicative of potential Incidents or Problems and requesting review, circumvention or repair by the applicable Process owner(s);
		4. Reporting Incidents and Problems to the applicable Process owner(s); and
		5. Providing reports on the operational status of Elements.
<b>3.11</b>	<b>Service Support</b>	
<b>3.11.1</b>	<b>Incident Management Execution</b>	The purpose of “Incident Management Execution” is to restore normal service following detection of an Incident.  Incident Management Execution includes the following activities:
		1. Obtaining Incident information, including the corresponding classification, from Incident Management;
		2. Reviewing Incidents and identifying the applicable Process owner(s) to identify the appropriate recovery actions;

Processes	Definitions
	3. Forming teams comprised of personnel from the applicable Processes;
	4. Diagnosing Incidents and developing Incident recovery actions, including assessing the impact of Incidents, and estimating recovery time and costs;
	5. Notifying the applicable Process owner(s) of Incident Management of Incident recovery actions;
	6. Notifying the applicable Process owner(s) of their role(s) in performing Incident recovery actions;
	7. Monitoring and directing Incident recovery actions, including coordinating the applicable Processes;
	8. Updating Incident recovery logs as recovery actions are undertaken, including notifying the applicable Process owner(s);
	9. Registering Incidents as closed upon successful recovery, including notifying the applicable Process owner(s), Clients and other personnel as appropriate;
	10. Matching Incidents against known errors and Problems and informing Problem Management of the existence of unmatched or multiple Incidents;
	11. Escalating Incidents and notifying the applicable Process owner(s) and other personnel as appropriate;
	12. Participating in Incident Management review meetings;
	13. Developing and maintaining Incident process models and/or workflows for:
	(a) Pre-defined Incidents (e.g., recurring Incidents, Incidents requiring special handling);
	(b) Major Incidents (often referred to as “severity 1” or “priority 1” Incidents); and
	(c) Preserving Incident evidence; and
	14. Establishing and maintaining a close working relationship with the applicable Process owner(s) of Incident Oversight.

Processes		Definitions
<b>3.11.2</b>	<b>Problem Identification and Resolution</b>	<p>The purpose of “Problem Identification and Resolution” is to identify Problems, direct the resolution of Problems, proactively and reactively minimize the adverse impact of Problems on Client operations, and prevent the recurrence of Problems and resulting Incidents.</p> <p>Problem Identification and Resolution includes the following activities:</p>
		1. Performing formal root cause analysis of Incidents as appropriate;
		2. Determining the existence and nature of workarounds and/or circumventions necessary to eliminate or reduce the adverse effects of Problems while more permanent solutions are developed;
		3. Initiating actions to minimize the adverse impact of Problems;
		4. Communicating the identification and assessment of the Problems to the applicable Process owner(s) of Problem Management and other applicable Processes;
		5. Updating records in a database or similar information repository to capture new or changed details regarding Problems;
		6. Identifying actions and/or potential areas of change to prevent the recurrence of Incidents related to identified Problems (e.g., performing historical Incident trend analysis); and
		7. Participating in Problem Management review meetings.
<b>3.11.3</b>	<b>Configuration Management Execution</b>	<p>The purpose of “Configuration Management Execution” is to develop the procedures by which the CMDB is updated and maintained accurate.</p> <p>Configuration Management Execution includes the following activities:</p>
		1. Developing configuration taxonomies (i.e., the CI information to be maintained);
		2. Developing procedures for the applicable Process owner(s) to capture and record CI information in the CMDB;
		3. Monitoring changes made to the CMDB and providing feedback to the applicable Process owner(s); and

Processes		Definitions
		4. Verifying the physical existence of items recorded in the CMDB, updating the CMDB as appropriate and informing the applicable Process owner(s) of such updates.
<b>3.11.4</b>	<b>Change Management Execution</b>	The purpose of “Change Management Execution” is to perform tasks supporting the delivery of Change Management.  Change Management Execution includes the following activities:
		1. Obtaining requests for changes from Process owners and Clients, including those arising from:
		(a) Incidents or Problems;
		(b) Externally imposed requirements (e.g., legislative changes); and
		(c) Business initiatives or programs, projects or service improvement initiatives (e.g., initiatives to improve efficiency or effectiveness);
		2. Performing initial classifications of requests for change that take into account the relevant factors (e.g., risk, cost impact) and are in accordance with the applicable guidelines;
		3. Performing quality control of change requests, including identification of:
		(a) Adequate change testing;
		(b) Appropriate back-out and remediation procedures; and
		(c) Impractical or unnecessary change requests;
		4. Providing feedback and guidance to Process owners that submit unsatisfactory change requests;
		5. Providing properly formed change requests to Change Management;
		6. Monitoring the performance of changes and invoking back-out or remediation activities as applicable;
		7. Registering completed changes as closed, including notifying the applicable Process owner(s); and
		8. Performing post-implementation reviews when issues arise during implementation.

Processes		Definitions
3.11.5	<b>Release Management Execution</b>	<p>The purpose of “Release Management Execution” is to construct release packages for Elements and provide appropriately approved release packages to the applicable Process owner(s) to be implemented within the applicable portions of the IT and Client environments.</p> <p>Release Management Execution includes the following activities:</p>
		1. Obtaining release components from the applicable Process owner(s);
		2. Preparing proposed release implementation plans;
		3. Compiling release notification lists;
		4. Developing release back-out plans;
		5. Submitting requests for change to the applicable Process owner(s) of Change Management Execution for release packages;
		6. Constructing release packages for release components, including, as applicable, appropriate implementation plans, notification lists, back-out plans and change approvals;
		7. Testing release packages and revising such packages as needed, including, if required, obtaining modified release components from the applicable Process owner(s);
		8. Submitting proposed release packages to the applicable Process owner(s) of Release Management;
		9. Modifying proposed release packages based on input from the applicable Process owner(s) of Release Management;
		10. Obtaining approval for release packages from the applicable Process owner(s) of Release Management;
		11. Submitting approved release packages to the applicable Process owner(s) (e.g., Implementation) to be deployed in the IT and Client environments;
		12. Modifying release packages to resolve problems encountered during implementation; and
		13. Performing post-implementation reviews and closing activities, including cataloging and preparing release information for archival.

Processes		Definitions
3.11.6	<b>Capacity Reporting</b>	The purpose of “Capacity Reporting” is to perform tasks supporting the delivery of Capacity Management.
		Capacity Reporting includes the following activities:
		1. Obtaining utilization reports from the applicable Process owner(s);
		2. Tracking performance, utilization and throughput, including service workloads and transactions, and confirming that collected data is recorded, analyzed, assessed relative to established limits and thresholds and reported to Capacity Management;
		3. Analyzing utilization and trend forecasts, along with the applicable established thresholds, and proactively developing change recommendations (e.g., upgrades, downgrades, enhancements, reconfiguration), including the associated impact on space, power and personnel to correctly align performance and availability needs with IT service capacity; and
		4. Providing capacity reports and analyses to Capacity Management.
3.11.7	<b>Availability Analysis</b>	The purpose of “Availability Analysis” is to perform tasks supporting the delivery of Availability Management.
		Availability Analysis includes the following activities:
		1. Obtaining operational reports from the applicable Process owner(s);
		2. Measuring availability based on operational information;
		3. Performing availability analyses, including:
		(a) Monitoring, measuring, analyzing and reporting availability;
		(b) Determining availability levels in comparison to established availability-based service levels; and
		(c) Investigating unavailability; and
		4. Providing availability reports to Availability Management.

Processes		Definitions
<b>3.11.8</b>	<b>Service Continuity Plan Development</b>	<p>The purpose of “Service Continuity Plan Development” is to evaluate potential risks and prepare service continuity plans and procedures to be integrated into the ITBCP.</p> <p>Service Continuity Plan Development includes the following activities:</p>
		1. Obtaining and reviewing service continuity plan guidelines from the applicable Process owner(s), including those of Service Continuity Management;
		2. Conducting risk assessments, including collecting input from the applicable Process owner(s);
		3. Conducting Client impact analyses of potential faults;
		4. Developing service continuity plans, including the specification of recovery point objectives and recovery time objectives;
		5. Submitting service continuity plans for approval to the applicable Process owner(s) of Service Continuity Management;
		6. Revising service continuity plans based on input from the applicable Process owner(s) of Service Continuity Management;
		7. Developing measures to reduce the chances of the occurrence and impact of disasters, including providing disaster recovery planning capability and procedures that are consistent with the applicable performance requirements;
		8. Reviewing and auditing the performance of the service continuity plan and addressing issues; and
		9. Maintaining recovery plans and options up-to-date.
<b>3.11.9</b>	<b>Service Continuity Plan Execution</b>	<p>The purpose of “Service Continuity Plan Execution” is to execute the ITBCP during disaster recovery tests and actual disasters, and to test and execute contingency plans as requested by the applicable Process owner(s) (e.g., Service Continuity Management, Incident Oversight).</p> <p>Service Continuity Plan Execution includes the following activities:</p>
		1. Implementing the applicable processes and procedures described in the ITBCP during disaster recovery tests and actual disasters;

Processes	Definitions	
		2. Documenting the recovery times, results and issues, if any, encountered and providing such information to the applicable Process owner(s), including those of Service Continuity Management and Service Continuity Plan Development; and
		3. Coordinating with the applicable Process owner(s) to resolve problems, if any, in implementing the ITBCP.
<b>3.12</b>	<b>Security</b>	
<b>3.12.1</b>	<b>Security Implementation</b>	<p>The purpose of “Security Implementation” is to develop and implement the methods, mechanisms and devices necessary to comply with security policies and standards.</p> <p>Security Implementation includes the following activities:</p>
		1. Developing methods and mechanisms to implement security policies and standards;
		2. Developing security rules to be used in conjunction with security hardware and software;
		3. Implementing security mechanisms, including the deployment of security rules to be used in conjunction with security hardware and software; and
		4. Implementing, when applicable based on security policy, security devices and software, including the configuration, installation, maintenance, and disposition of such devices and software in accordance with the applicable activities of the relevant Processes (e.g., Deploy, Maintain, Software Maintenance) and controls appropriate for such work.
<b>3.12.2</b>	<b>Security Operations</b>	<p>The purpose of “Security Operations” is to implement and operate processes that reduce the likelihood of security threats, reacts to threats identified, and minimizes the harm caused by security threats.</p> <p>Security Operations includes the following activities:</p>
		5. Implementing, maintaining and operating a data collection process, including:
		(a) Directing the assigned Service Delivery Actor(s) to configure the Element’s data collection tool(s) to enable proper consolidation, recording and normalization of data in accordance with the security solution; and

Processes	Definitions
	(b) Collecting data from the identified sources;
	6. Implementing, maintaining and operating vulnerability scanning functions, including:
	(a) Configuring scanning tool(s) according to the published Client security policy;
	(b) Scheduling and executing scans; and
	(c) Distributing scan results to the Vulnerability Assessment Process owner;
	7. Monitoring and reacting to security alerts, including:
	(a) Implementing the alert criteria as defined by the Security Analysis process;
	(b) Accepting and processing automated and derived alerts (e.g., rogue device detection, and Distributed Denial of Service Attack (DDOS) alerts);
	(c) Directing, through the Incident Management process, the appropriate assigned Service Delivery Actor(s) to take event related actions;
	(d) Following the alert escalation process; and
	(e) Distributing escalated alerts to the Security Analysis, Security Oversight and Incident Management Process owners; and
	8. Operating the security-specific application software, in accordance with established Change Management Processes, by using the application software user interface, including:
	(a) Manipulating rules and data entries;
	(b) Designing and ordering reports;
	(c) Designing and requesting queries; and
	(d) Setting data collection parameters.
	5. Reviewing security policies and standards and recommending areas for improvement to Security Policy Development.
	6. Maintaining historical data on security-related matters and Incidents, including performing and reporting on the applicable analyses (e.g., trends).

Processes		Definitions
3.12.3	<b>Security Credentials Management</b>	<p>The purpose of “Security Credentials Management” is to manage compliance with the security policy(ies) and standards and to implement authorized security credentials and access rights.</p> <p>Security Administration includes the following activities:</p>
		1. Managing the provision of security credentials and access, including issuance, replacement and revocation of individual access and authentication and authorization credentials, as authorized by the applicable Process owner(s), including those of Credentials Management and Security Enforcement;
		2. Implementing security policies and standards, including the association of the Element or the user(s) of the Element with the applicable security-based policy objects; and
		3. Maintaining historical data on security-related access changes.
3.12.4	<b>Credentials Authorization</b>	The purpose of “Credentials Authorization” is to authorize the granting (including issuance, replacement and revocation) of security credentials and access entitlements, individual access authentication and authorization credentials to Clients, Actors and other personnel as appropriate.
3.12.5	<b>Security Analysis</b>	<p>The purpose of “Security Analysis” is to analyze, disseminate and employ security information to protect against security threats as described in the security solution.</p> <p>Security Analysis includes the following activities:</p>
		4. Analyzing data to detect anomalies using rules and parameters established by the Security Oversight process;
		5. Monitoring compliance with the security solution, including:
		(a) Monitoring security settings to ensure that they meet or exceed relevant standards; and
		(b) Assigning proper remediation activities to the appropriate Service Delivery Actor(s);
		6. Monitoring service, system and device access, including:
		(a) Detecting misuse of access, with the highest level of scrutiny employed for monitoring misuse of privileged access;

Processes	Definitions
	(b) Detecting inappropriately obtained access, with the highest level of scrutiny employed for monitoring inappropriately obtained privileged access;
	(c) Generating and distributing appropriate alerts; and
	(d) Following appropriate escalation mechanisms;
	7. Detecting and reporting data leakage, including:
	(a) Detecting data leakage events;
	(b) Reporting data leakage events to Incident Management and Security Incident Response Process owner(s);
	(c) Measuring the effectiveness of the security solutions and/or controls in preventing data leakage; and
	(d) Making recommendations to improve controls through enhancements to the Security Solution Development Process;
	8. Analyzing security events, including:
	(a) Analyzing events for potential security incidents; and
	(b) Reporting event analysis to Incident Management and Security Incident Response Process owner(s) in accordance with the security event analysis process;
	9. Integrating external threat intelligence into the analysis process, including:
	(a) Acquiring and utilizing appropriate external threat intelligence;
	(b) Evaluating for technical need and business context; and
	(c) Notifying stakeholders of context-normalized external threats; and
	10. Analyzing environment resiliency, including:
	(a) Evaluating new deployments and technologies for security risks;
	(b) Proactively testing the environment for security defects; and
	(c) Coordinating with the appropriate Actor(s) to remediate based on the findings.

Processes		Definitions
3.12.6	<b>Security Incident Response</b>	The purpose of “Security Incident Response” is to contain and investigate security threats.
		Security Incident Response includes the following activities:
		11. Containing a security incident, including:
		(a) Identifying and recommending mechanisms for limiting the spread of, and exposure to, a security incident; and
		(b) Escalating threat alerts to Incident Management Process owner(s) for execution of threat response; and
		12. Conducting forensic investigation into security event, including:
		(a) Analyzing security event to determine impact and appropriate containment approach;
		(b) Documenting security event analysis to support root cause analysis (RCA) efforts in accordance with problem management process; and
		(c) Recreating and/or reverse engineering security events, as necessary.
3.12.7	<b>Vulnerability Assessment</b>	The purpose of “Vulnerability Assessment” is to assess the vulnerability of the environment to security threats.
		Vulnerability Assessment includes the following activities:
		13. Evaluating scans to detect exposure to security threats;
		14. Prioritizing remediation tasks;
		15. Assigning remediation tasks in accordance with Incident Management Process owner(s);
		16. Conducting Penetration Tests and analyzing results; and
		17. Assessing and reporting the effectiveness of remediation efforts.
3.13	<b>Logistics</b>	
3.13.1	<b>Disposition</b>	The purpose of “Disposition” is to prepare Elements and their sub-components to be reused, returned to third parties or disposed.
		Disposition includes the following activities:
		1. Obtaining Elements and sub-components of Elements that have been de-installed from the IT environment;

Processes		Definitions
		2. Removing data and software from the applicable storage media (fixed or removable);
		3. Repairing Elements and sub-components of Elements that are operationally and financially worthy of repair, including:
		(a) Determining whether such repair work is covered by a warranty; and
		(b) Causing warranty work or the financial equivalent to be performed/obtained when applicable;
		4. Upgrading Elements and sub-components of Elements to current standards that are operationally and financially worthy of upgrade;
		5. Returning Elements and sub-components of Elements to the applicable third parties (e.g., lessors);
		6. Providing repurposed, repaired and appropriately cleaned Elements and sub-components of Elements to be retained within the IT environment to the applicable Process and Element owner(s);
		7. Disposing of Elements and sub-components of Elements that are no longer required within the IT environment; and
		8. Updating the CMDB as applicable and appropriate.
<b>3.13.2</b>	<b>Warehouse Management</b>	The purpose of “Warehouse Management” is to securely store, track and manage the inventories of Elements, Spares, Spare Parts and Consumables.  Warehouse Management includes the following activities:
		1. Maintaining secure physical storage facilities;
		2. Performing receiving and shipping functions;
		3. Updating the CMDB as applicable and appropriate;
		4. Providing inventory reports as requested by other Process owners;
		5. Analyzing usage patterns and recommending changes to optimal inventory levels to the applicable Process owner(s);
		6. Developing and maintaining, with input obtained from the applicable Process owner(s), threshold levels for the replenishment of the various warehouse inventories; and

Processes		Definitions
		7. Notifying the applicable Process owner(s) when the level of an inventory item reaches its predefined threshold.
3.13.3	Distribution	The purpose of “Distribution” is to physically transport Elements, Spares, Spare Parts and Consumables to and from the physical storage locations under the control of Warehouse Management.
4.1	Enterprise Security	
4.1.1	Enterprise Security Operations	The purpose of “Enterprise Security Operations” is to implement and operate processes that reduce the likelihood of security threats to the Enterprise and react to threats identified and minimize the harm caused by security threats across the operations of the Enterprise including both business process and IT activities.  Enterprise Security Operations may include the following activities:
		1. Implementing, maintaining and operating a data collection process, including:
		(a) Directing the assigned Service Delivery Actor(s) to install and configure the Element’s data collection tool(s) to enable proper consolidation, recording and normalization of data in accordance with the security solution; and
		(b) Collecting data from the identified sources;
		2. Implementing, maintaining and operating vulnerability scanning functions, including:
		(a) Configuring scanning tool(s) according to the published Client security policy;
		(b) Scheduling and executing scans; and
		(c) Distributing scan results to the Vulnerability Assessment Process owner;
		3. Monitoring and reacting to security alerts, including:
		(a) Implementing the alert criteria as defined by the Security Analysis process;
		(b) Accepting and processing automated and derived alerts (e.g., rogue device detection, and Distributed Denial of Service Attack (DDOS) alerts);

Processes		Definitions
		(c) Directing, through the Enterprise Incident Response Team and the appropriate assigned Service Delivery Actor(s) to take event related actions; and
		(d) Following the Enterprise Incident Response Plan (EIRP).
		4. Operating security-specific application software, in accordance with established Change Management Processes including:
		(a) Manipulating rules and data entries;
		(b) Designing and ordering reports;
		(c) Designing and requesting queries; and
		(d) Setting data collection parameters.
		5. Reviewing security policies and standards and recommending areas for improvement to Security Policy Development.
		6. Maintaining historical data on security-related matters and Incidents, including performing and reporting on the applicable analyses (e.g., trends).
4.1.2	Enterprise Security Analysis	The purpose of “Enterprise Security Analysis” is to analyze, disseminate and employ security information across the Enterprise to protect against security threats and adverse events.  Enterprise Security Analysis may include the following activities:
		1. Analyzing information data to detect anomalies;
		2. Monitoring compliance with the security solutions, including:
		(a) Monitoring security settings to ensure that they meet or exceed relevant standards; and
		(b) Assigning proper remediation activities to the appropriate Actor(s);
		3. Monitoring service, system and device access, including:
		(a) Detecting misuse of access, with the highest level of scrutiny employed for monitoring misuse of privileged access;
		(b) Detecting inappropriately obtained access, with the highest level of scrutiny employed for monitoring inappropriately obtained privileged access;
		(c) Generating and distributing appropriate alerts; and

Processes		Definitions
		(d) Following appropriate escalation mechanisms;
		4. Detecting and reporting data leakage, including:
		(a) Detecting data leakage events;
		(b) Reporting data leakage events to Incident Management and Security Incident Response Process owner(s);
		(c) Measuring the effectiveness of the security solutions and/or controls in preventing data leakage; and
		(d) Making recommendations to improve controls through enhancements to the Security Solution Development Process;
		5. Analyzing security events, including:
		(a) Analyzing events for potential security incidents; and
		(b) Reporting event analysis to Incident Management and Security Incident Response Process owner(s) in accordance with the security event analysis process;
		6. Integrating external threat intelligence into the analysis process, including:
		(a) Acquiring and utilizing appropriate external threat intelligence;
		(b) Evaluating for technical need and business context; and
		(c) Notifying stakeholders of context-normalized external threats; and
		7. Analyzing environment resiliency, including:
		(a) Evaluating new deployments and technologies for security risks;
		(b) Proactively testing the environment for security defects; and
		(c) Coordinating with the appropriate Actor(s) to remediate based on the findings.
4.1.3	<b>Enterprise Incident Response</b>	<p>The purpose of “Enterprise Incident Response” is to contain and investigate security threats and to coordinate the Enterprise’s response across all Actors and Enterprise departments in accordance with Health Net’s Enterprise Incident Response Plan (EIRP).</p> <p>Enterprise Incident Response may include the following activities:</p>

Processes		Definitions
		1. Containing a security incident, including:
		(a) Identifying and recommending mechanisms for limiting the spread of, and exposure to, a security incident; and
		(b) Escalating threat alerts to Incident Management Process owner(s) for execution of threat response in the IT environment; and
		(c) Escalating to and coordinating with other Health Net departments and functions in accordance with Health Net's EIRP.
		2. Conducting forensic investigation into security events, including:
		(a) Analyzing security event to determine impact and appropriate containment approach;
		(b) Documenting security event analysis to support root cause analysis (RCA) efforts in accordance with problem management process; and
		(c) Recreating and/or reverse engineering security events, as necessary.
<b>4.1.4</b>	<b>Enterprise-Wide Vulnerability Assessment</b>	The purpose of "Enterprise-Wide Vulnerability Assessment" is to assess the vulnerability of the Enterprise to security threats.  Enterprise-Wide Vulnerability Assessment may include the following activities:
		1. Evaluating scans to detect exposure to security threats;
		2. Prioritizing remediation tasks;
		3. Assigning remediation tasks in accordance with Incident Management Process owner(s);
		4. Conducting or causing Penetration Tests to be performed and analyzing results; and
		5. Assessing and reporting the effectiveness of remediation efforts.

IT Process Definitions  
Version 3.1.0

## II. Embedded Processes

Except to the extent specifically identified elsewhere in the Agreement and formally assigned to another Actor or entity, the following activities are "embedded" within each of the Processes defined above and are to be performed by each Actor for each Process for which it is responsible:

1. Developing the procedures underlying the Process, subject to and in compliance with any requirements and constraints dictated by Health Net and in alignment with the approved policies and procedures of other Processes so as to enable the IT services to function cohesively and in a coordinated manner;
2. Performing the activities comprising the Process in accordance with approved policies and procedures;
3. Providing and maintaining the necessary non-human resources (e.g., hardware, property, plant, supplies, software, tools, infrastructure) and human resources (including to provide training) to perform the Process;
4. Retaining all financial, operational and administrative responsibility for the Process, including the resources necessary for its performance;
5. Performing the required activities necessary to manage the Process, including (i) supervising and reporting, including reporting to other personnel within the Process, (ii) measuring and reporting on the performance of the Process (or parts thereof) to other Actors, Clients and/or third parties as required, (iii) developing and distributing operational reporting related to the Process, including any reporting related to Service Level Agreements, (iv) developing and providing budgets and forecasts in accordance with the guidelines and parameters established by the applicable Process owner(s) of Budgeting and Forecasting, and (v) complying with the requests and/or instructions from the applicable Process owner(s) of Services Management and Incident Oversight;
6. Managing documents and data (including data acquisition, data entry, data recording and data distribution) related to the Process;
7. Performing quality control reviews of the Process, including testing the (i) accuracy, reliability and quality of work, (ii) compliance with approved policies and procedures, and (iii) performance and correction of issues identified during such reviews;

8. Engineering the Process, including performing those actions necessary to maintain or improve the underlying activities based on (i) then-current best practices, and (ii) how it is intended to interact with other Processes and/or Client processes;
9. Notifying other Actors as required of output or other findings or information developed or learned through the Process, including notifying the applicable Process owner(s) of the readiness for activities to be performed by such Process owner(s) that are necessary to either complete or progress a function that spans multiple Processes;
10. Notifying other Actors as required of detected security incidents or vulnerabilities learned through the Process;
11. Responding to queries and requests concerning activities associated with the performance of the Process, including making the applicable subject matter experts, documentation and other relevant content available as necessary to be responsive;
12. Handling all Events (including, if applicable, directly from Clients) relevant to the Process that cannot be adequately responded to by the applicable Process owner(s) of Service Desk or other Processes due to their lack of subject matter expertise regarding such Events, including (i) providing the information necessary for such Process owner(s) to respond directly to the Clients, (ii) accepting the transfer of such Events from such Process owner(s) and responding directly to the Clients, (iii) updating, when applicable, the service management system(s) of record regarding the tracking of such Events, and (iv) providing, to the applicable Process owner(s), information regarding Events that are likely to be recurring in nature so as to increase such Process owner's(s') ability to address such matters in the future without assistance;
13. Handling all aspects of Incidents and Problems relevant to the Process, including (i) receiving notification of and resolving Incidents and Problems, (ii) providing other applicable Process owner(s), including those of Incident Management, Problem Management and, to the extent requested, Incident Oversight, and other personnel as appropriate with updated information regarding the status of such Incidents and Problems and the associated resolution efforts, (iii) escalating Incidents and Problems that cannot be resolved, and (iv) responding to requests and complying with instructions from the applicable Process owner(s) of Incident Management and, to the extent applicable for a given Incident, Incident Oversight;
14. Interacting and coordinating as needed with other Process owners that are responsible for related functions, including (i) integrating the Process with the activities of such other Process owners such that the overall delivery of IT services is optimized (i.e., not sub-optimized within the confines of the Process), and (ii) monitoring the activities performed by other Process owners to mitigate negative impact on the Process;

15. Providing advice and guidance on the Process to other Process owners (e.g., best practices, operational issues, impact from other Processes) so as to enable such other Process owners to optimize the linkages of their Processes with the Process;
16. Adhering to the applicable documentation standards;
17. Managing all aspects of third parties who perform all or part of a Process assigned to the Actor (i.e., as if the Actor performed the Process itself); and
18. Using the Actor disagreement and dispute forum to resolve issues among Actors and between Actors and Clients, including (i) registering disagreements and disputes with the applicable Process owner(s) of Actor Integration, (ii) participating, as reasonably requested by the applicable Process owner(s) of Actor Integration, in Actor disagreement and dispute resolution forums, (iii) providing information and resources reasonably requested by the applicable Process owner(s) of Actor Integration that might be useful to the resolution of disagreements and/or disputes, and (iv) cooperating in the implementation of the final resolution of disagreements and disputes.
19. Providing support for Audits of the applicable line of business or a component of it, whether conducted by (or on behalf of) Health Net itself or a Health Net Regulator or customer (e.g., a large Employer Group), including the following:
  - a. Providing data and reports requested by the Auditors;
  - b. Providing subject matter expertise and otherwise supporting the conduct of the Audit as requested by the Auditors; and
  - c. Assisting in the development and implementation of corrective action plans in response to Audit findings identifying weaknesses or deficiencies in the Audited Function.

**III. Glossary**

Terms	Definitions
Actor	Means an entity or individual that is responsible for performing or providing part of the IT services.
Application Architecture	Means the data and business process models that reflect Applications that: (i) simplify and facilitate the work activities of the business processes and provide automated procedures; (ii) specify the management of information storage or retrieval required to accommodate the enterprise objectives; and (iii) address location considerations and how information is used.
Client	Means an entity or individual that receives or uses IT services.
Configuration Items or CIs	Means the configuration records of an Element, hardware, software, IT service or designated item (e.g., personnel, business units, buildings, Client service), including its respective components.
Consumables	Means physical items that are designed to work in conjunction with Elements and are intended to be consumed through use (e.g., toner, paper, ink, batteries) rather than subject to repair.
CMDB	Means a database that contains all relevant information about the components of the information system used in an organization's IT environment and the relationships between those components.
Delivery Model	Means the allocation of Actors to various levels of Processes and Elements that will be use to deliver the IT services.
Domain Architecture	Means the domain-specific architectures that form part of the Enterprise IT Architecture. The Domain Architectures as of the Effective Date consist of Information Architecture, Application Architecture, Infrastructure Architecture, and Security Architecture.
Element or Elements	Means entries on the span axis of a Delivery Model or scope model. Elements may represent a category of components (e.g., Unix Servers), services (e.g., Managed WAN), individual products (e.g., Riverbed WAN Compression Appliance) or individual applications (e.g., SAP HR Module).

Terms	Definitions
Enterprise Architecture	Means the underlying IT framework of a business, which defines and describes the applicable characteristics of the IT platforms, information, applications and security required by the enterprise to attain its objectives and achieve its business vision.
Event or Events	Has the meaning provided in Process <a href="#">3.5.1</a> (Service Desk).
External Actor	Means an Actor that is external to the Health Net organization.
External Actor Compliance Requirements	Means the regulations, directives, recommendations, orders, rulings and other similar requirements that are applicable to an External Actor by virtue of the Services being provided by that Actor from entities legally authorized to enact or enforce such requirements (including via contract and/or through the External Actor organization's membership in a trade association with enforcement authority over its members). <i>[Examples include the enforcement of HIPAA regulations directly onto Business Associates by the Dept. of Health &amp; Human Services, the enforcement of PCI DSS requirements by the Payment Card brands, relevant privacy and data security laws and regulations applicable to data held or processed by the External Actor.]</i>
External Client	Means a Client that is a customer or third party business partner external to the Health Net organization.
External Compliance Requirements	Means the laws, regulations, directives, recommendations, orders, rulings and other similar requirements that are applicable to the Health Net organization from entities legally authorized to enact or enforce such requirements (including via contract and/or through the Health Net organization's membership in a trade association with enforcement authority over its members).
IMAC or IMACs	Means a request for the installation, movement, addition, change or removal of Elements and sub-components of Elements (e.g., moving physical or virtual Elements from one location to another, "racking and stacking" Elements, installing physical Elements, adding physical sub-components to Elements, installing software patches, installing software on an Element, performing software configuration changes, establishing logical connections, installing virtual Elements).

Terms	Definitions
Incident	Means an event that causes or may cause interruption to or a reduction in the service delivered though or by an Element or Process.
Information Architecture	Means the data models and databases that serve all participants in the enterprise business environment, and the strategies, standards and policies required to develop and implement them, which enable the enterprise to develop a common, shared, distributed, accurate and consistent data resource.
Infrastructure Architecture	Means the interoperable technology platforms that link the Information Architecture and the Application Architecture and meet the needs of the various Client roles at identified work locations.
Internal Actor	Means an Actor that is internal to the Health Net organization.
Internal Client	Means a Client that is within the Health Net organization (i.e., business units or departments such as HR, F&A or Purchasing, including its respective personnel).
ITBCP	Has the meaning provided in Process <a href="#">2.7.10</a> (Service Continuity Management).
Maintenance Requirements	Has the meaning provided in Process <a href="#">3.8.1</a> (Maintenance Administration).
Problem	Means the underlying cause of one or more Incidents, which may include defects related to or arising from the IT infrastructure, human errors and external events.
Process or Processes	Means the groupings of activities identified in this definition document and identified on the process axis of a Delivery Model or scope model. May pertain to an individual (level 3) process (e.g., Infrastructure Architecture Development, Solution Development) or a group of related (level 2) processes (e.g., Domain Architecture, Solution Formation).
Recommended Maintenance	Has the meaning provided in Process <a href="#">3.8.1</a> (Maintenance Administration).
Risk Events	Means the IT-related events and threats that could negatively impact the enterprise strategically or operationally, including security breaches, system failures, external events, technology investment mistakes, system development and implementation problems, and capacity shortages.

Terms	Definitions
Security Architecture	Means the plan and set of principles that describe: (i) the security services that a system is required to provide to meet the needs of its Clients; (ii) the system elements required to implement the services; and (iii) the performance levels required in the elements to deal with the threat environment.
Service Catalog	Means a repository in which the IT services available to Clients are identified, including a definition of the service, SLAs associated with the service, who is entitled to use or receive the service, the costs or charges for the service and the procedures for requesting the service.
Service Level Agreement or SLA	Means an agreement describing: (i) the quantitative standards of performance an Actor or entity is required to meet or exceed in providing the IT services (e.g., availability, quality, speed); and (ii) a definition of the terms controlling various aspects of performance (e.g., measurement definition, priorities, responsibilities, guarantees, changes). SLAs can be between Actors, between Actors and IT, or between IT and Clients.
Spare Parts	Means an inventory of hardware-based sub-components of Elements (e.g., memory, motherboard, hard disk) that are currently not in use and are maintained in reserve to replace failed hardware-based sub-components of Elements used to provide the IT services.
Spares	Means an inventory of hardware-based Elements used to provide the IT services that are currently not in use and are maintained in reserve to replace or supplement failed hardware-based Elements used to provide the IT services.
Third Party Contract	Means a contractual arrangement with (i) an External Actor for the provision of IT services, and (ii) suppliers that provide Elements and ancillary goods/services.
Third Party Contract Manager	Means an entity that performs contract management functions with respect to Third Party Contracts.

**Exhibit A-1-2  
Element Definitions**

## Categories and Element Definitions

ScopeModel	Category	Element	Definition
N/A	Definition	Commercial Off The Shelf (COTS)	"Commercial Off The Shelf" or "COTS" means commercial off-the-shelf software or hardware products that are ready-made and available for sale to the general public.
N/A	Definition	Internally Developed	"Internally Developed" means software developed internally by the customer or at the direction of the customer (i.e., not COTS software).
N/A	Definition	Appliance	"Appliance" means a device attached to the Network with integrated and specially designed software and hardware that provide a narrow range of functions.
N/A	Definition	Applications Software	"Applications Software" shall mean an executable software component or tightly coupled set of executable software components (one or more), deployed together, that deliver some or all of a series of steps needed to create, update, manage, calculate, or display information for a specific business purpose.
Hardware	MER	MER Cabling	"MER Cabling" means cabling inside a managed equipment room (MER) at Health Net locations.
Hardware	MER	Building Cabling	"Building Cabling" means cabling running inside a Health Net location that is not MER Cabling.
Applications	CTS BPaaS	HNT Assets Purchase by CTS	"HNT Assets Purchased by CTS" means the Applications Software contained in the Heath Net - Cognizant Asset Purchase Agreement purchased by Cognizant or used by Cognizant to provide BPaaS Services to Health Net including any future enhancements or changes made by Cognizant and the Servers, Storage and Infrastructure Software needed to deliver the HNT Assets Purchased by CTS as part of the CTS BPaaS Services.
Applications	CTS BPaaS	HNT Custom Enhancements	"HNT Custom Enhancements" means enhancements to the HNT Assets Purchased by Cognizant that are funded by Health Net as Discretionary Projects. Includes the Servers, Storage and Infrastructure Software needed to deliver the HNT Custom Enhancements as part of the CTS BPaaS Services.
Applications	CTS BPaaS	Interfaces to HNT Systems	"Interfaces to HNT Systems" means all the system interfaces between the Cognizant BPaaS solution and the retained HNT applications (i.e., AO Applications - COTS and non-COTS and IO Applications, as applicable). Includes the Servers, Storage and Infrastructure Software needed to deliver the Interfaces to HNT Systems as part of the CTS BPaaS Services.
Applications	CTS BPaaS	Third Party Applications	"Third Party Applications" means the additional third party applications required by Cognizant to complete the Cognizant BPaaS IT solution to support Cognizant's delivery of BPaaS Services to Health Net. Includes the Servers, Storage and Infrastructure Software needed to deliver the Interfaces to HNT Systems as part of the CTS BPaaS Services.
Applications	CTS BPaaS	Third Party Services	"Third Party Services" means third party data or other electronically delivered services required by Cognizant to provide the BPaaS IT solution to support Cognizant's delivery of BPaaS Services to Health Net.
Applications	HNT Applications	AO Applications (COTS)	"AO Applications (COTS)" means the In-Scope Applications defined and listed in the AO Agreement that are COTS.
Applications	HNT Applications	AO Applications (non-COTS)	"AO Applications (non-COTS)" means the In-Scope Applications defined and listed in the AO Agreement that are not COTS.
Applications	HNT Applications	IO Applications	"IO Applications" means software and services designed to provide productivity, communications and collaboration solutions directly to end users. IO Applications include remote access including VDI and VPN, ITSM software (e.g., Remedy, Service Now), File Shares, e-mail, Good mobile messaging, electronic fax, identity and access management software, etc. IO Applications are not CTS BPaaS Applications or AO Applications. IO Applications includes the Servers, Storage and Infrastructure Software needed to deliver the IO Applications.
Applications	HNT Applications	SAAS	"SAAS" means third party hosted software delivered "as a Service" by remote connection.
Hardware	Collector	Collocated Third Party Equipment	"Collocated Third Party Equipment" means Appliances and other Servers, Storage or Network hardware, together with associated Software, which Health Net elects to have Cognizant provide Data Center Managed Service only.
Hardware	Collector	Network	"Network" means a telecommunications network that allows computers to exchange data. The connections (network links) between network points are established using either cable media or wireless media. Network may include any of the Elements categorized as Network including LAN and WAN.
Hardware	Collector	Server	"Server" means a computing platform utilizing an Operating System (e.g. Unix, Windows, Linux, AIX, Solaris, etc.), including the CPU, memory, internal hard disk, related peripherals, KVM cabling and the NIC. A server may perform a specific purpose (e.g., Access Control Server, Applications Server, Data Base Server, eMail Server, Extranet Server, File and Print Server, Infrastructure Server, Replication Server, Web Server, etc.). A Server may be a physical box, blade or a Virtualized instance.
Hardware	Collector	Storage	"Storage" means a category of Elements that records and provides access to computing data including NAS, SAN, DASD, Tape, Virtual Tape System, BUR Appliance, etc.
Infrastructure Software	Collector	Applications Development	"Applications Development" means computer software that is designed to facilitate the designing, building and testing of software.
Infrastructure Software	Collector	Business Applications	"Business Applications" means a category of Infrastructure Software that is designed to provide capability to automate a portion or portions of the enterprise's operations. They are typically standard applications that are typically provided across the enterprise to promote productivity and communications rather than support a specific business purpose as defined in Applications Software.

ScopeModel	Category	Element	Definition
Infrastructure Software	Collector	DBMS	"DBMS" means software that stores information in a database in an organized manner allowing data to be added, updated, and retrieved as individual items or to be queried in a structured manner. Additionally, a DBMS maintains metadata, which describe the schema or the organization and relationships between the individual data items.
Infrastructure Software	Collector	Operations	"Operations" means a category of Infrastructure Software that is used to control devices and other software and to facilitate communication, scheduling and execution of computer commands. Operations may include any of the Elements categorized as Operations Software.
Infrastructure Software	Collector	Roll Your Own (RYO)	"Roll Your Own" or "RYO" means certain types of custom proprietary software components, which include for example, Business Applications and utility applications used by IT, Tools, Tool Extensions, and Scripts.
Infrastructure Software	Collector	Security Management	"Security Management" means a category of Infrastructure Software that is designed to prevent unauthorized access or manipulation of data including access control as well as monitoring, detecting and managing viruses and intrusions. Security Management may include any of the Elements categorized as Security Management.
Infrastructure Software	Collector	Systems Software	"System Software" means a category of Infrastructure Software designed to operate the computer hardware and to provide a platform for running application software. Systems Software includes but is not limited to: (a) the operating system, (b) utility software used to analyze, configure, optimize, maintain, and connect to the system; and (c) middleware which provides additional common services, beyond those of the operating system, to Application Software. Systems Software may include any of the Elements categorized as Systems Software.
Hardware	Data Center	Battery	"Battery" means a battery used to power equipment.
Hardware	Data Center	Cable Management Drop Box to Server	"Cable Management Drop Box to Server" means the series of physical conduits, hangars, ladder racks, finger brackets, etc. that neatly thread/bundle horizontal copper/fiber cable runs and shorter fiber/copper cable patch-cords from the end-device connection point (Premise Distribution System (PDS) box) to the active server/end-device.
Hardware	Data Center	Cable Plant	"Cable Plant" means the cable or fiber that carries voice, video, or data signals between computing and communications devices within a building.
Hardware	Data Center	Cabling	"Cabling" means the physical cables in a data center, including voice, video and data LAN cabling and wiring.
Hardware	Data Center	Electrical Distribution	"Electrical Distribution" means a device used to distribute electric current in the IT Environment.
Hardware	Data Center	Equipment Rack	"Equipment Rack" means a cabinet that holds IT equipment (e.g., servers, Routers).
Hardware	Data Center	Facilities Equipment	"Facilities Equipment" means a category of devices that create a suitable computing environment at a data center.
Hardware	Data Center	Fire Detection	"Fire Detection" means a device used to detect fires and includes associated cabling.
Hardware	Data Center	Fire Suppression	"Fire Suppression" refers to a category of devices used to prevent and/or suppress fire outbreak and includes associated cabling.
Hardware	Data Center	Furniture/Fixture	"Furniture/Fixture" means any item of furniture or a fixture used in the data center.
Hardware	Data Center	Generator	"Generator" means a device used to generate and monitor a power supply (e.g., transformer, inverter, uninterruptible power supply device), including associated cabling.
Hardware	Data Center	Heating, Ventilation And Cooling (HVAC)	"Heating, Ventilation And Cooling" or "HVAC" means a device that controls temperature, humidity, air cleanliness and air motion within a physical space.
Hardware	Data Center	PDU	"PDU" means a power distribution unit and includes associated cabling.
Hardware	Data Center	Physical Access Control	"Physical Access Control" means any device used to restrict access to the data center, including locks, card readers, and man traps.
Hardware	Data Center	Uninterrupted Power Supply (UPS)	"Uninterrupted Power Supply" or "UPS" means a device that supplies power to a computer or other electrical equipment on a temporary basis when electricity from a primary power source is lost or degraded, including all communication cables.
Hardware	Definition	Collocated Third Party Equipment	"Collocated Third Party Equipment" means Appliances and other computing, storage, telecommunications and ancillary hardware, together with associated Software, for which Health Net elects to have Provider provide Data Center Managed Service only. Health Net shall be responsible for, and bear the costs and expenses associated with data center escort services, installation, testing, implementation, maintenance, upgrade, replacement and enhancement of all Collocated Third Party Equipment.
Hardware	End User	Desktop	"Desktop" means a computing platform that is not portable and is primarily used directly by an end user, whether networked or standalone, PC or Macintosh. A Desktop includes a central processing unit, Operating System, video display monitor, modem, related cables (e.g., patch cords), and related peripherals (e.g., keyboard, pointing device).
Hardware	End User	Desktop Phone	"Desktop Phone" means a standard or VOIP handset located at an End User's workstation.
Hardware	End User	Mobile Computing Device	"Mobile Computing Device" means a small, handheld computing device, typically having a display screen with touch input and/or a miniature keyboard and designed to be carried with little effort. A Mobile Computing Device has an operating system (OS), and can run various types of application software. Most are equipped with Wi-Fi, Bluetooth, and GPS capabilities that can allow connections to the Internet and other Bluetooth-capable devices. Mobile computing devices may have the capacity to provide voice communications over a cellular network.
Hardware	End User	Notebook	"Notebook" means a computing platform that is portable, and is primarily used directly by an end user, whether networked or standalone, PC or Macintosh, laptop or tablet PC, desk-based or mobile. A Notebook includes a central processing unit, operating system, video display monitor, modem, related cables (e.g., patch cords), and related peripherals (e.g., keyboard, pointing device).

ScopeModel	Category	Element	Definition
Hardware	End User	Personal Computer (PC)	"Personal Computer" or "PC" means a computing platform primarily used directly by an end user, whether networked or standalone, a Desktop or Notebook. A Personal Computer includes a central processing unit, operating system, video display monitor, network interface card, modem and related cables (e.g., patch cords), and related peripherals (e.g., keyboard, pointing device).
Hardware	End User	Thick Client	"Thick Client" means a Personal Computer that is not portable.
Hardware	End User	Thin Client	"Thin Client" means a device that: (a) enables end users to remotely enter information into one or more computing platforms; (b) displays but does not process data; and (c) includes a web browser.
Hardware	End User	Workstation Attached Printer	"Workstation Attached Printer" means a printer that is directly connected to a Desktop, Notebook or other similar end user device. Workstation Attached Printers may include built in scanning, copying, facsimile and similar features and functionality.
Hardware	Network	Access Circuit	"Access Circuit" means: (a) a physical (i.e., not logical or virtual) telecommunications connection that is used to carry voice, video and/or data signals between a client location and the telecommunications backbone; and (b) the logical voice or data communications circuit or path (i.e., PVC) used to carry voice, video and/or data signals across the physical connection.
Hardware	Network	B2B Connection	"B2B Connection" means a connection between the enterprise and a business partner of the enterprise that is provisioned and managed by the business partner.
Hardware	Network	Certificate Appliance	"Certificate Appliance" means an Appliance whose primary purpose is to manage the certificates required by the Public Key Infrastructure (PKI) environment.
Hardware	Network	Client Extranet	"Client Extranet" means a virtual connection between the enterprise and a business partner of the enterprise that is provisioned and managed by the enterprise.
Hardware	Network	Data Center LAN Service	"Data Center LAN Service" means all networking devices and connectivity required within a Data Center to support the Server, Storage and Appliance Elements in the Data Center.
Hardware	Network	Data Center Switch Port Aggregation	"Data Center Switch Port Aggregation" means a device that aggregates patches from network switches to allow the use of shared sniffers, probes, network traffic analyzers and other network inspection and diagnostic devices across a large scale data center network.
Hardware	Network	Data Leakage Protection (DLP) Appliance	"Data Leakage Protection Appliance or DLP Appliance" means an Appliance that is between the trusted and untrusted portions of a network and enables manual and automated inspection of network traffic for violations of data distribution policies.
Hardware	Network	Database Encryption Appliance	"Database Encryption Appliance" means a device connected to the network that uses purpose-built hardware and software to encrypt full duplex data at multi-gigabit line speeds.
Hardware	Network	DNS/DHCP	"DNS/DHCP" means a device that provides DNS and DHCP services. Dynamic Host Configuration Protocol (DHCP) provides network address to the network nodes.
Hardware	Network	Domain Name Services (DNS)	"Domain Name Services" or "DNS" means a software protocol to locate devices on a network and automatically assign and manage their addresses.
Hardware	Network	Edge Switch	"Edge Switch" means a Switch that provides an entry point into an enterprise or service provider core networks (typically into carrier and service provider networks).
Hardware	Network	Firewall	"Firewall" means a device or software, including the network interface, that prevents unauthorized access to a network.
Hardware	Network	Gateway Appliance	"Gateway Appliance" means an Appliance which provides communication to a remote network or an autonomous system that is out of bounds for the host network.
Hardware	Network	Internet	"Internet" means the connection provided by an Internet service provider enabling the enterprise and its employees to access the public Internet.
Hardware	Network	Intrusion Detection (System)	"Intrusion Detection (System)" means a device, including the network interface, that monitors and analyzes user and system configuration and activities to detect unauthorized access to a network or other attacks designed to adversely affect the performance of the network or systems connected to such network.
Hardware	Network	Load Balancer	"Load Balancer" is an Appliance or device that applies the technique in computer networking of spreading work between two or more computers, network links, CPUs, hard drives, or other resources, in order to get optimal resource utilization, throughput, or response time. The balancing service is usually provided by a dedicated hardware device or via a functional blade service within a high-end Ethernet switch (e.g., Cisco Content Switch Module (CSM) Blade).
Hardware	Network	Local Area Network (LAN)	"Local Area Network (LAN)" means computer network that interconnects computers in a limited area. The defining characteristics of LANs, in contrast to wide area networks (WANs), include their usually higher data-transfer rates, smaller geographic area, and lack of a need for access circuits or telecommunication lines.
Hardware	Network	Market Data Feed	"Market Data Feed" means a connection used to deliver financial market data provided by a data supplier.
Hardware	Network	Miscellaneous Telecommunications Devices	"Miscellaneous Telecommunications Devices" means various items of hardware used to provide telecommunications and call center services, including air cards, PBXs, PDAs, telephones, ACDs, ECDs, VRUs, CTI equipment, wallboards and headsets.
Hardware	Network	MPLS Service	"MPLS Service" means a telecommunications solution leveraging Multiprotocol Label Switching (MPLS) to provide high-performance telecommunications networks that direct data from one network node to the next based on short path labels rather than long network addresses, avoiding complex lookups in a routing table. MPLS can encapsulate packets of various network protocols.
Hardware	Network	Multimedia	"Multimedia" means telecommunications services, including all required hardware, systems, and software, that facilitate the audio and video transmissions of two or more people over either dedicated audio-visual equipment or publicly switched equipment.
Hardware	Network	Multiplexer	"Multiplexer" (MUX) means a device allowing one or more low-speed analog or digital input signals to be selected, combined and transmitted at a higher speed on a single shared medium or within a single shared device

Scope/Model	Category	Element	Definition
Hardware	Network	NAC Appliance	"NAC Appliance" means a Network Access Control (NAC) Appliance which provides identity and posture-based network access policy enforcement to prevent vulnerable computers from joining the network.
Hardware	Network	Network Edge Router	"Network Edge Router" means a Router that routes data between one or more local networks at a physical site and the wide or metropolitan area network serving the site.
Hardware	Network	Network Intrusion Detection and Prevention System (Network IDPS)	"Network Intrusion Detection and Prevention System" or "Network IDPS" means an Appliance that monitors and analyzes user and system configurations and activities to detect unauthorized access to a network, malicious activities or other attacks designed to adversely affect the performance of the network or systems connected to such network. The functions of intrusion prevention systems include identifying malicious activity, logging information about said activity, attempting to block/stop activity, and reporting activity.
Hardware	Network	Network Performance Management Platform	"Network Performance Management Platform" means a device that aggregates statistical information from network routing and switching devices for reporting and analysis purposes.
Hardware	Network	Network Traffic Analyzer	"Network Traffic Analyzer" means a device used to examine traffic across a network to aid in the diagnosis of troubles within the network or attached nodes.
Hardware	Network	OBM Appliance	"OBM Appliance" means a device dedicated to providing OBM (out-of-band management) to enable the network operator to establish trust boundaries in accessing the management function to apply it to network resources. It also can be used to ensure management connectivity (including the ability to determine the status of any network component) independent of the status of other in-band network components.
Hardware	Network	Office Network	"Office Network" means the access service provided by a common telecommunications carrier enabling the enterprise and its employees to access a private IP network.
Hardware	Network	Private Network Access	"Private Network Access" means a dedicated Access Circuit that provides an uninterrupted connection between one location and another.
Hardware	Network	Public Network Access	"Public Network Access" means an Access Circuit that provides connection to a public network.
Hardware	Network	Router	"Router" means a networking device that transmits data to multiple network connected devices, that provides Layer 1, Layer 2, and Layer 3 functionality (as defined by the OSI Reference Model), and that includes the capability to create VLANs. A Router includes the NIC.
Hardware	Network	Security Appliance	"Security Appliance" means a server or Appliance whose function is to "aggregate" security events within the processing center prior to sending to an off-site SIM portal. The SIM Portal and Security Appliance may be managed by a third-party provider of Security services. Examples of "aggregation" include but are not limited to parsing of logs, analysis of host-based intrusion detection events, etc.
Hardware	Network	SIEM Appliance	"SIEM Appliance" means a Security Information and Event Management Appliance which provides real-time analysis of security alerts generated by network devices and applications as well as log and data reporting and analysis.
Hardware	Network	Switch	"Switch" means an Ethernet network switch that is a computer networking device that connects Ethernet network segments. Ethernet Network Switches are capable of inspecting data packets as they are received, determining the source and destination device of that packet, and forwarding it appropriately. Most Ethernet switches operate at Layer 2 (as defined by the OSI Reference Model) and are used as the access layer connection point of networked end-devices. Layer 3 functionality is common in Ethernet Switches deployed as building "core" devices and access layer Switch aggregation points.
Hardware	Network	Telecom Server	"Telecom Server" means any Windows/Unix based server which supports the network services infrastructure. Examples of Telecom servers could contain anything from network monitoring servers to servers that help manage network routers and switches.
Hardware	Network	VPN	"VPN" means a network Appliance that uses IP protocols to host a secure network for authorized users on either privately or publicly owned equipment and infrastructure.
Hardware	Network	VPN Concentrator	"VPN Concentrator" means a network Appliance that uses IP protocols to host a secure network for authorized users on either privately or publicly owned equipment and infrastructure.
Hardware	Network	Vulnerability Assessment Scanner	"Vulnerability Assessment Scanner" means an Appliance that executes Vulnerability Scanning.
Hardware	Network	WAN Optimizer	"Wan Optimizer" means a physical or virtual appliance that combines monitoring, traffic prioritization, data deduplication, compression, protocol spoofing, transmission blocking and other techniques to improve the performance of wide area telecommunications facilities.
Hardware	Network	Wide Area Application Service (WAAS)	Wide Area Application Service (WAAS) means a device that accelerates applications, optimizes bandwidth, and reduces latency.
Hardware	Network	Wide Area Network (WAN)	"Wide Area Network (WAN)" means a telecommunication network that covers a broad area (i.e., any network that links across metropolitan, regional, state or national boundaries).
Hardware	Network	Wireless Access Point (WAP)	"Wireless Access Point (WAP)" means a device that is specially configured on wired local area networks that allows individuals to use wireless networking cards in their computers and other electronic devices.
Hardware	Network	Wireless Intrusion Prevention System (IPS)	"Wireless Intrusion Prevention System (IPS)" means a device that monitors the radio spectrum of a WAP for the presence of unauthorized access points and can automatically take counter measures.
Hardware	Network	Wireless LAN (WLAN)	"Wireless LAN (WLAN)" means a wireless local area network (WLAN) that links two or more devices using some wireless distribution method (typically spread-spectrum or OFDM radio).
Hardware	Print	High-Speed Printer	"High-Speed Print" means a centralized printing device directly attached to a server that prints large volume print jobs, typically associated with batch processing jobs.

ScopeModel	Category	Element	Definition
Hardware	Print	Multi Function Product/Printer/Peripheral (MFP)	"Multi Function Product/Printer/Peripheral" or "MFP" means a multifunctional, all-in-one (AIO), or Multifunction Device (MFD), office machine which incorporates the functionality of multiple devices in one, to provide centralized document management, distribution, and production. An MFP typically incorporates the functions of printers, scanners, photocopiers, and facsimile machines and may also provide eMail capability.
Hardware	Print	Printer	"Printer" means a device that accepts digital output from a queue and transfers the output to paper form.
Hardware	Print	Sorting / Processing	"Sorting / Processing" means a centralized device connected to a High-Speed Printer that sorts and processes large volume print jobs.
Hardware	Server	Access Control Server (ACS)	"Access Control Server (ACS)" means a dedicated server hosting Access Control software.
Hardware	Server	Alpha Server or Open VMS/Alpha	"Alpha Server" or "Open VMS/Alpha" means a Midrange computing platform utilizing the VMS Operating System produced by the Digital Equipment Corporation, including the CPU, memory, internal hard disk, related peripherals, keyboard/video/mouse (KVM) cabling and the NIC.
Hardware	Server	Applications Server (HDW)	"Applications Server (HDW)" means any computing platform (mainframe, midrange, entry level/blade) the primary purpose of which is to host Applications Software. An Applications Server (HDW) includes the Central Processing Unit ("CPU"), memory, related peripherals, internal hard disk, keyboard video mouse ("KVM") cabling, and the NIC.
Hardware	Server	Data Base (DB) Server	"DB Server" means a real or virtual instance of a server that is designated to be used exclusively to host one or more DBMS instances and that provides access to connected data via the DBMS from applications and other data consumers executing on other servers.
Hardware	Server	eMail Server	"eMail Server" means a computing platform that manages the distribution of electronic messages, including receipt, delivery, and prioritization.
Hardware	Server	Extranet Server	"Extranet Server" means any Windows/Unix based server which supports the extranet services infrastructure. Examples of Extranet servers could contain anything from network monitoring servers to servers that help manage firewalls, proxies and other Extranet services.
Hardware	Server	File & Print Server	"File & Print Server" means a computing platform that performs the functions of a File Server and a Print Server.
Hardware	Server	File Server	"File Server" means a computing platform (including the CPU, memory, related peripherals, internal hard disk and the NIC) that: (a) centrally stores network files; (b) controls the movement of files and data between workstations across the network; and (c) enables users to freely access such files.
Hardware	Server	Infrastructure Server	"Infrastructure Server" means any computing platform (mainframe, midrange, entry level/blade) the primary purpose of which is to serve traditional infrastructure services. An Infrastructure Server includes the Central Processing Unit ("CPU"), memory, related peripherals, internal hard disk, keyboard video mouse ("KVM") cabling, and the NIC.
Hardware	Server	POS Controller	"POS Controller" means a server that controls POS devices.
Hardware	Server	Print Server	"Print Server" means a computing platform that: (a) provides users or a network with access to a central printer; (b) holds the information to be printed out in memory until the printer is available; (c) prints jobs in a programmable sequence and queue; and (d) provides notice of a print job completion to the requesting user.
Hardware	Server	Replication Server	"Replication Server" means a server which provides bi-directional, heterogeneous replication, and synchronization between separate servers that support the same application.
Hardware	Server	Web Accelerator	"Web Accelerator" means a proxy server whose purpose is reduce web site access times.
Hardware	Server	Web Security Proxy	"Web Security Proxy" means a device, situated between a client application, such as a web browser, and a real Server, that: (a) intercepts all requests to the real server; (b) authenticates potential users; and (c) denies access to certain computers, URLs and IP addresses.
Hardware	Server	Web Server	"Web Server" means a computing platform that: (a) stores documents and files for use on one or more Internet or intranet websites; and (b) makes such documents and files accessible to users of such websites by providing interfaces between different access protocols.
Hardware	Server	zSeries Server	"zSeries Server" means an IBM computing platform utilizing an operating environment that is based on the z/OS, z/VM), or compatible Operating System, including the CPUs, memory, HMCs, service elements and channel cards.
Hardware	Service	Active Directory aaService	"Active Directory aaService" means the hardware, software and services necessary to run Microsoft Active Directory (AD) for Windows domain networks. AD includes the domain controller function used to authenticate and authorize all users and computers in a Windows domain type network—assigning and enforcing security policies for all computers and installing or updating software. Service includes PKI based AD Certificate Services.
Hardware	Service	Data Center Managed Service	"Data Center Managed Service" means the delivery as a service of the Data Center Elements for the housing and operation of computing, storage, telecommunications, and ancillary equipment. The service includes the building and all Data Center Elements including specialized flooring, cabling, access security, fire detection and suppression, primary and backup power provisioning and distribution and heating, ventilation, and air conditioning. Data Center Managed Service includes the provision of on-site technical support (i.e., "smart hands") as well as escort services to enable Health Net or Health Net's Third Party Supplier authorized access to appropriate hardware.
Hardware	Service	Disaster Recovery Management Services	"Disaster Recovery Management Services" means the contracted services for providing Data Center Facility Managed Services and hardware and software to meet specific recovery objectives for a temporary period in case of a disaster.

Scope/Model	Category	Element	Definition
Hardware	Service	Network Services	"Network Services" means services that provide voice data and video connectivity between the client's locations and to its business partners. Network Services is comprised of telecommunications equipment, telecommunications facilities and the people processes and tools required to operate and provide the services. Local, campus, metropolitan and wide area communications facilities are included with the scope of the Network Services.
Hardware	Service	VDI / Citrix aaService	"VDI / Citrix aaService" means the hardware, software and services necessary to deliver centralized, secure remote access control using the Citrix brand products.
Hardware	Storage	Attached Disk Array	"Attached Disk Array" means a DASD device consisting of two or more disk drives combined in a single unit for increased capacity, speed, and/or fault tolerant operation which may be attached to a SAN.
Hardware	Storage	Automated Tape Library	"Automated Tape Library" means a device that stores, reads and/or writes magnetic tapes used to store data and utilizes automated tape robots, which are mechanical handlers capable of storing multiple pieces of removable media and loading and unloading them from one or more drives in arbitrary order in response to electronic commands. An Automated Tape Library includes the media necessary to provide the required storage and recovery functionality. An Automated Tape Library may be attached to a SAN.
Hardware	Storage	Backup and Recovery (BUR)	"Backup and Recovery" or "BUR" means an Appliance or infrastructure solution that performs data backup onto and recovers data from DASD. BUR may be an Appliance or a solution that includes servers, silos, and software.
Hardware	Storage	DASD	"DASD" means a Storage device that allows direct access to data: (a) stores, reads and writes data on on-line magnetic media (e.g., disks); and (b) is accessed directly by a server.
Hardware	Storage	Data Base Logging and Compliance	"Data Base Logging and Compliance" means a device that (1) monitors all database changes, including changes to data structures, (2) monitors the activity of privileged users, and (3) provides compliance reports on all privileged user database activity.
Hardware	Storage	Data Replication	"Data Replication" means the process of sharing data across storage platforms as to ensure consistency between redundant resources. This includes both hardware and software methods.
Hardware	Storage	Direct Attached Storage	"Direct Attached Storage" means digital storage directly attached (i.e., not connected through a network) to a server.
Hardware	Storage	Disk Subsystem	"Disk Subsystem" means DASD that is attached to a LAN instead of directly to a server, has its own network address, is capable of handling multiple network protocols, and is not attached to a SAN.
Hardware	Storage	Internal or Embedded	"Internal" or "Embedded" means a DASD device that is located internally within a computing device.
Hardware	Storage	Manual Tape Drive	"Manual Tape Drive" means a device that stores, reads or writes magnetic tapes used to store data, and that requires manual loading and unloading of removable media from one or more drives. A Manual Tape Drive includes the media necessary to provide the required storage and recovery functionality.
Hardware	Storage	Network Attached Storage (NAS)	"Network Attached Storage" or "NAS" means a file-level computer data storage connected to a computer network providing data access to heterogeneous network clients.
Hardware	Storage	SAN	"SAN" means a Storage Area Network which is a system for storing data that is composed of SAN switches, frames, connection media, disk array cache and processors, disk controllers, and disk drives.
Hardware	Storage	Tape	"Tape" means a Storage device that: (a) stores, reads and writes data on on-line magnetic media (e.g., magnetic tapes); and (b) is sequentially accessed by a server.
Hardware	Storage	Virtual Tape Appliance	"Virtual Tape Appliance" means a device that provides the capability to emulate tape files on a random access storage device.
Hardware	Storage	Virtual Tape Library (VTL)	"Virtual Tape Library" or "VTL" means a server that temporarily stores data, previously residing on tapes for, use in batch processing, onto attached hard disks. Virtual Tape Library includes the CPU, memory, internal hard disk, related peripherals, KVM cabling and the NIC.
Hardware	Voice / Video	ACD/IVR	"ACD" (Automate Call Distribution) means a device or system (including applicable software) that distributes incoming calls to a specific group of phones based on customer need, type, and agent skill set and includes the switches and software for the routing strategy. The routing strategy is a rule-based set of instructions that tells the ACD how calls are handled inside the system. "IVR" (Interactive Voice Response) means a device or system (including applicable software) that allows a caller to interact with a company's host system via a telephone keypad or by speech recognition, after which they can service their own inquiries by following the IVR dialogue and/or information can be captured to pass on to the company agent.
Hardware	Voice / Video	AV Teleconference	"AV Teleconference" means the equipment used to provide group audio and visual presentation and teleconferencing to multiple locations in both conference and/or specialized meeting rooms.
Hardware	Voice / Video	VOIP Solution	"VOIP Solution" means all the hardware and software implemented by Cognizant under Work Order 1217 (VOIP Project) as an Accelerated Project.
Hardware	Voice / Video	Overhead Paging	"Overhead Paging" means the devices that allow paging through the use of loud speakers within IP telephones.
Hardware	Voice / Video	PBX	"PBX" means a telecommunications server that manages and operates the switches, internal lines, and pooled external lines of a private branch exchange telephone system.
Infrastructure Software	Applications Development	Application Development Tools	"Application Development Tools" means Infrastructure Utility Software the primary purpose of which is to assist in the creation of software programs and programming, such as development environments, compilers, debuggers, and editors.
Infrastructure Software	Applications Development	CASE Tool	"CASE Tool" means Application Development Computer-aided Software Engineering Tools Software that automates methods for designing, documenting, and producing structured computer code in the desired programming language.

Scope/Model	Category	Element	Definition
Infrastructure Software	Applications Development	Compiler/Interpreter	" <i>Compiler/Interpreter</i> " means an Application Development Tool that takes the source code a programmer has written and translates it into object code the computer can understand.
Infrastructure Software	Applications Development	Debugger	" <i>Debugger</i> " means an Application Development Tool used to identify and resolve coding errors (i.e., bugs).
Infrastructure Software	Applications Development	Development Tool	" <i>Development Tool</i> " means an Application Development Tool that assists programmers in designing, creating or documenting computer programs.
Infrastructure Software	Applications Development	Load Test	" <i>Load Test</i> " means an application development tool used to test and determine total capacity at which applications software can operate without failure.
Infrastructure Software	Applications Development	Program Documentation	" <i>Program Documentation</i> " means Infrastructure Utility Software that provides the tools required to develop and maintain documentation, including metadata, about computer programs.
Infrastructure Software	Applications Development	Programming Library	" <i>Programming Library</i> " means an Application Development Tool containing a pre-defined set of functions that are accessed and utilized by another program.
Infrastructure Software	Applications Development	QA	" <i>QA</i> " means an Application Development Tool used to facility quality assurance with respect to code development (i.e., testing tools).
Infrastructure Software	Applications Development	Query/Analysis/OLAP	" <i>Query/Analysis/OLAP</i> " means Infrastructure Utility Software that enables a user to selectively extract, view and report data from different points-of-view.
Infrastructure Software	Applications Development	Runtime Libraries	" <i>Runtime Libraries</i> " means Infrastructure Utility Software or Application Software housed in a special purpose library the primary purpose of which is used by a compiler, to implement functions built into or to extend a programming language, during the runtime (execution) of a computer program.
Infrastructure Software	Applications Development	Source Control	" <i>Source Control</i> " means an Application Development Tool used to manage applications source code under development by multiple developers.
Infrastructure Software	Applications Development	Version Control	" <i>Version Control</i> " means an Application Development Tool used to manage and control correct versions of applications source code under development by multiple developers.
Infrastructure Software	Business Applications	Speech Processing	" <i>Speech Processing</i> " means Infrastructure Utility Software the primary purpose of which is to provide ability to speech-enable business applications.
Infrastructure Software	Business Applications	Standard Collaboration Applications	" <i>Standard Collaboration Applications</i> " means those applications that are on the standard image and used for End User collaboration (e.g., eMail).
Infrastructure Software	Business Applications	Standard Productivity Applications	" <i>Standard Productivity Applications</i> " means those applications that are on the standard image and used for End User productivity (e.g., MS Office).
Infrastructure Software	DBMS	Allbase	" <i>Allbase</i> " means the proprietary DBMS produced by Hewlett Packard.
Infrastructure Software	DBMS	Allbase/SQL	" <i>Allbase/SQL</i> " means the proprietary relational DBMS that conforms to the SQL specification produced by Hewlett Packard.
Infrastructure Software	DBMS	Database Administration	" <i>Database Administration</i> " means Infrastructure Utility Software that configures and controls databases and restructures, backs-up and restores data contained with the database.
Infrastructure Software	DBMS	Database Management Software (DBMS)	" <i>Database Management Software</i> " or " <i>DBMS</i> " means software that stores information in a database in an organized manner allowing data to be added, updated, and retrieved as individual items or to be queried in a structured manner. Additionally, a DBMS maintains metadata, which describe the schema or the organization and relationships between the individual data items.
Infrastructure Software	DBMS	Datacom Database	" <i>Datacom Database</i> " means proprietary database software produced by the CA Technologies.
Infrastructure Software	DBMS	DB2 Universal Database (DB2)	" <i>DB2 Universal Database</i> " or " <i>DB2</i> " means the proprietary DB2 Universal Database Management System produced by IBM.
Infrastructure Software	DBMS	Informix	" <i>Informix</i> " means proprietary database software produced by the Informix Corporation.
Infrastructure Software	DBMS	Integrated Database Management System (IDMS)	" <i>Integrated Database Management System</i> " or " <i>IDMS</i> " means the network DBMS proprietary to CA Technologies.
Infrastructure Software	DBMS	Oracle	" <i>Oracle</i> " means the proprietary DBMS produced by Oracle that implements a relational database management system and that is accessed using the structured query language (SQL).
Infrastructure Software	DBMS	Sybase Database	" <i>Sybase Database</i> " means proprietary database software produced by the Sybase Corporation.
Infrastructure Software	DBMS	UDB	" <i>UDB</i> " means the proprietary IBM UDB (Universal Database) Management System produced by IBM that implements a relational database management system and that is accessed using the structured query language (SQL).
Infrastructure Software	eMail	eMail	" <i>eMail</i> " means Infrastructure Utility Software that manage the distribution of electronic messages, including receipt, delivery, and prioritization.
Infrastructure Software	eMail	eMail Scanning	" <i>eMail Scanning</i> " means a device or software that searches for and quarantines in-bound eMail messages containing potential Spam and viruses.
Infrastructure Software	Operations	Application Enabling Services	" <i>Application Enabling Services</i> " means the utility functions that provide software solutions, processes, and capabilities allowing business applications to interoperate with the infrastructure hardware and software. These are shared services leveraged by multiple applications, business units, or affiliates.
Infrastructure Software	Operations	Application Server (SFTW)	" <i>Application Server (SFTW)</i> " means a software framework that provides an environment where applications can run and allows execution of procedures (programs, routines, scripts) for supporting the delivery of applications. An Application Server behaves like an extended virtual machine for the running of applications, managing connections to the database at one side and connections to a Web client at the other.
Infrastructure Software	Operations	Audit Tool	" <i>Audit Tool</i> " means Infrastructure Utility Software the primary purpose of which is to inspect a computing resource and compare its configuration state to a compliance model and log or report discrepancies.
Infrastructure Software	Operations	Automation	" <i>Automation</i> " means an Infrastructure Utility Software that enables the unattended operation of a computer or of an Application.

Scope/Model	Category	Element	Definition
Infrastructure Software	Operations	Batch Processing Tool	"Batch Processing Tool" means Infrastructure Utility Software that manages and executes a series of non-interactive data processing jobs all at one time.
Infrastructure Software	Operations	Business Process Management	"Business Process Management" means Infrastructure Utility Software the primary purpose of which is to define and operationalize the flow of work through a network of activities or organized tasks to achieve the desired outcome of a business process.
Infrastructure Software	Operations	Certificate Management	"Certificate Management" means Infrastructure Utility Software the primary purpose of which is to manage the certificates required by the Public Key Infrastructure (PKI) environment.
Infrastructure Software	Operations	Chargeback Utility	"Chargeback Utility" means Infrastructure Utility Software the primary purpose of which is to analyze, summarize and allocate resource consumption accounting information for use in recovering the cost of the resources from the user or customer consuming the resources.
Infrastructure Software	Operations	Cluster Utility	"Cluster Utility" means Infrastructure Utility Software that joins together two or more computers to operate jointly or as a cluster.
Infrastructure Software	Operations	Clustering	"Clustering" means Infrastructure Utility Software that is used to couple multiple computer systems so that they, in many respects, appear and operate as a single computer system.
Infrastructure Software	Operations	Compression Tool	"Compression Tool" means Infrastructure Utility Software that reduces the size data files by means of algorithmic analysis, such that the same file can be restored to its original form without minimal or no loss of information.
Infrastructure Software	Operations	Computer Telephony Integration (CTI)	"Computer Telephony Integration" or "CTI" means Infrastructure Utility Software that enables increased productivity by utilizing information from the telephone system to automate certain call center processes.
Infrastructure Software	Operations	Configuration Management	"Configuration Management" means the Infrastructure Utility Software (tools or databases) that facilitates the task of tracking, controlling and storing of changes in Configurable Items.
Infrastructure Software	Operations	Connectivity	"Connectivity" means Infrastructure Utility Software that facilitates the transfer of data between servers and other devices, including verifying that the circuit is operational and the devices are compatible, monitoring data transmission, sequencing, and receipt, and correcting transmission errors.
Infrastructure Software	Operations	Content Filter	"Content Filter" means Infrastructure Utility Software that screens or filters content to identify certain types of data (e.g., a spam filter).
Infrastructure Software	Operations	Content Management	"Content Management" means Infrastructure Utility Software that collects, catalogs, stores and serves content destined for use in conjunction with web sites.
Infrastructure Software	Operations	Data Entry	"Data Entry" means Infrastructure Utility Software that provides a configurable means of capturing and validating data entered by an operator at a keyboard.
Infrastructure Software	Operations	Diagnostic Tool	"Diagnostic Tool" means Infrastructure Utility Software that assists operations or development personnel to investigate and perform problem determination and isolation.
Infrastructure Software	Operations	Directory Services	"Directory Services" means Infrastructure Utility Software the primary purpose of which is to provide a shared information repository for locating, managing, administering, and organizing common items and network resources, which may include volumes, folders, files, printers, users, groups, devices, telephone numbers, and other objects.
Infrastructure Software	Operations	Disaster Recovery	"Disaster Recovery" means Infrastructure Utility Software that is used to build and manage Disaster Recovery plans.
Infrastructure Software	Operations	Distributed Computing	"Distributed Computing" means Infrastructure Utility Software the primary purpose of which is to provide a framework for the development and operation of business applications using the client/server model.
Infrastructure Software	Operations	Document Management	"Document Management" means the Infrastructure Utility Software that tracks and stores electronic documents and/or images of paper documents and different versions created by different users (history tracking).
Infrastructure Software	Operations	Editor	"Editor" means Infrastructure Utility Software that allows the viewing and changing of text files.
Infrastructure Software	Operations	ETL Tool	"ETL Tool" means Infrastructure Utility Software the primary purpose of which is to extract data from its place of residence, transform it to meet the needs of the target data store, and load into the target data store.
Infrastructure Software	Operations	Event Management	"Event Management" means Infrastructure Utility Software the primary purpose of which is to detect abnormal operational situations (events), notify designed touchpoints and perform event correlation.
Infrastructure Software	Operations	Fax Output	"Fax Output" means Infrastructure Utility Software that allows facsimile messages to be sent programmatically from a computer.
Infrastructure Software	Operations	File System	"File System" means Infrastructure Utility Software that provides a structure for storing to and retrieving files from direct access storage media.
Infrastructure Software	Operations	File Transfer	"File Transfer" means Infrastructure Utility Software that transmits data files to or from a computer system to one or more other computer systems, generally over telecommunications (e.g., LAN, MAN, WAN) facilities.
Infrastructure Software	Operations	File Utility	"File Utility" means Infrastructure Utility Software that enables the viewing, back-up, restoration, copying, moving or manipulating of data and files.
Infrastructure Software	Operations	Fonts	"Fonts" means Infrastructure Utility Software the primary purpose of which is to provide outline and raster fonts and associated utility programs for use on certain IBM printers.
Infrastructure Software	Operations	FTP/SFTP	"FTP/SFTP" means Infrastructure Utility Software that is used to transfer data from one computer to another over the Internet, or through a network, including over an encrypted transport.
Infrastructure Software	Operations	Global Resource Serialization	"Global Resource Serialization" means Infrastructure Utility Software that serializes access between computers to shared resources to protect their integrity.
Infrastructure Software	Operations	Help Tool	"Help Tool" means Infrastructure Utility Software that is used to author, maintain and make available information that allows end users to understand how to utilize computer and software systems.

Scope/Model	Category	Element	Definition
Infrastructure Software	Operations	Job Entry/Management	"Job Entry/Management" means Infrastructure Utility Software the primary purpose of which is to provide supplementary job management, data management, and task management functions such as: scheduling, control of job flow, and spooling.
Infrastructure Software	Operations	License Manager	"License Manager" means Infrastructure Utility Software the primary purpose of which is to record license information associated with compliance, audits, and proof of ownership.
Infrastructure Software	Operations	Log Utility	"Log Utility" means Infrastructure Utility Software the primary purpose of which is to provide a mechanism for making and analyzing operational log entries.
Infrastructure Software	Operations	Machine Accounting	"Machine Accounting" means Infrastructure Utility Software that accounts for the usage of a computer and its associated peripheral devices.
Infrastructure Software	Operations	Messaging	"Messaging" means Infrastructure Utility Software that provides a communication mechanism to transmit data messages between applications on different platforms. Messaging is intended to connect different computer systems, diverse geographical locations, and dissimilar IT infrastructures.
Infrastructure Software	Operations	My SQL	"My SQL" means the open source software that implements structured query language (SQL).
Infrastructure Software	Operations	Network Management	"Network Management" means Infrastructure Utility Software that facilitates the monitoring and administration of a computer network including inventory (discovery), configuration, detecting faults, providing alerts, and performance tracking.
Infrastructure Software	Operations	Object Cache	"Object Cache" means Infrastructure Utility Software the primary purpose of which is to cache frequently accessed Java objects in order to improve the performance of e-business applications.
Infrastructure Software	Operations	OL Transaction Processing	"OL Transaction Processing" means Infrastructure Utility Software that facilitates and manages transaction-oriented applications, typically for data entry and retrieval transactions.
Infrastructure Software	Operations	Online Survey	"Online Survey" means Infrastructure Utility Software that is used to author, maintain, distribute and analyze inquiries intended to obtain end user feedback and opinion.
Infrastructure Software	Operations	Output Management	"Output Management" means Infrastructure Utility Software that controls the packaging and distribution of printed reports or maintains a structured repository of reports in electronic form and controls viewing access.
Infrastructure Software	Operations	Password Management	"Password Management" means Infrastructure Utility Software that provides for adding, changing and deleting credentials for access to and entitlements within computing and application systems.
Infrastructure Software	Operations	Patch Management	"Patch Management" means Infrastructure Utility Software that applies software changes to and tracks the current state of software products.
Infrastructure Software	Operations	Performance Management	"Performance Management" means Infrastructure Utility Software that manages (including by allowing users to observe, monitor, measure and improve) the availability and throughput of components of the infrastructure.
Infrastructure Software	Operations	Presentation Management	"Presentation Management" means System Software that locally executes applications on a server and enables remote access to such applications over telecommunications facilities by end users on suitably equipped client devices.
Infrastructure Software	Operations	Presentation Server	"Presentation Server" means System Software that locally executes applications and enables remote access to such applications over telecommunications facilities by end users on suitably equipped devices.
Infrastructure Software	Operations	Protocol Mediation	"Protocol Mediation" means Infrastructure Utility Software that allows two systems employing incompatible data communications protocols to exchange information.
Infrastructure Software	Operations	Remote Control	"Remote Control" means Infrastructure Utility Software that allows one computer system to control the operations of another computer system over a data communications connection.
Infrastructure Software	Operations	Replication	"Replication" means Infrastructure Utility Software that duplicates the data stored in computing platforms.
Infrastructure Software	Operations	Search Utility	"Search Utility" means Infrastructure Utility Software that allows a user to search through an archive of data looking for information with particular contents or characteristics.
Infrastructure Software	Operations	Session Management	"Session Management" means Infrastructure Utility Software that manages and implements the single sign-on of a user to multiple applications on multiple devices.
Infrastructure Software	Operations	Software Distribution	"Software Distribution" means Infrastructure Utility Software that is used to control and transmit software changes to remote computing devices.
Infrastructure Software	Operations	Sort	"Sort" means Infrastructure Utility Software that rearranges the sequence of individual records in data files.
Infrastructure Software	Operations	Storage Management	"Storage Management" means Infrastructure Utility Software that provides monitoring and control of data storage devices, including identification of occupied and available space and its owners.
Infrastructure Software	Operations	System Administration Tools	"System Administration Tools" means Infrastructure Utility Software used by Systems Administrators to install, maintain, monitor and control computer systems or networks.
Infrastructure Software	Operations	System Log Aggregator	"System Log Aggregator" means an Appliance that assembles the logs from diverse devices into a uniform, normalized format so that coherent and correlated reports and statistics can be produced for a complex heterogeneous computing environment.
Infrastructure Software	Operations	Systems Management	"Systems Management" means Infrastructure Utility Software that provides the ability to monitor, control and report on the computing and network infrastructure. Systems Management includes tools that are used to automate processes, including problem, incident, change, performance, and capacity management.
Infrastructure Software	Operations	Tape Encryption	"Tape Encryption" means hardware or software that encrypts the data within the recording device. The point at which the encryption occurs is dependent upon the underlying technology capabilities.
Infrastructure Software	Operations	Tape Management	"Tape Management" means Infrastructure Utility Software that keeps track of and controls the inventory of tape media and may catalog the contents of selected units of media.

Scope/Model	Category	Element	Definition
Infrastructure Software	Operations	Terminal Emulation	"Terminal Emulation" means Infrastructure Utility Software that allows a computer to perform the functions of keyboard/display device for the purpose of programmatically accessing a computing system with which the keyboard/display device is compatible.
Infrastructure Software	Operations	Time Management	"Time Management" means Infrastructure Utility Software that is used to capture the correct time and date set those parameters of the computing system.
Infrastructure Software	Operations	Time Sharing	"Time Sharing" means Infrastructure Utility Software that enables multiple remote users to access a shared computer system in a session-oriented manner, typically to perform functions such as file editing, remote batch job entry, program development and testing, and individual computing.
Infrastructure Software	Operations	Workload Automation Schedules	"Workload Automation Schedules" means the executable output from job scheduler software that defines workflows and/or job dependencies, automates submission of executions, monitor executions and priorities and/or queues to control the execution order of unrelated jobs.
Infrastructure Software	Security Management	Access Control	"Access Control" means Infrastructure Utility Software that performs authentication of users attempting to access systems and maintains access entitlements to systems.
Infrastructure Software	Security Management	Access Control (Application Level)	"Access Control (Application Level)" means Infrastructure Utility Software that performs authentication of users attempting to access applications and maintains access entitlements to applications.
Infrastructure Software	Security Management	Access Control (System Level)	"Access Control (System Level)" means Infrastructure Utility Software that performs authentication of users attempting to access the O/S and maintains access entitlements to the O/S.
Infrastructure Software	Security Management	Authentication Server	"Authentication Server" means security software that examines and verifies the credentials assigned to network users, servers, and devices prior to allowing access to other network resources.
Infrastructure Software	Security Management	Authentication Service (Application Level)	"Authentication Service (Application Level)" means security software that examines and verifies the credentials assigned to application users, servers, and devices prior to allowing access to other application resources.
Infrastructure Software	Security Management	Authentication Service (System Level)	"Authentication Service (System Level)" means security software that examines and verifies the credentials assigned to network users, servers, and devices prior to allowing access to other network resources.
Infrastructure Software	Security Management	Encryption	"Encryption" means Infrastructure Utility Software or Appliance that encodes data so that it systematically scrambled so that it cannot be read without knowing the decoding key.
Infrastructure Software	Security Management	Encryption (File Level)	"Encryption (File Level)" means Infrastructure Utility Software or Appliance that encodes data at rest so that it systematically scrambled so that it cannot be read without knowing the decoding key.
Infrastructure Software	Security Management	Encryption (Transmission)	"Encryption (Transmission)" means Infrastructure Utility Software or Appliance that encodes data in transit so that it systematically scrambled so that it cannot be read without knowing the decoding key.
Infrastructure Software	Security Management	Forensics	"Forensics" means Infrastructure Software used to conduct network-enabled computer investigations, e-discovery requests, internal investigations, regulatory inquiries, as well as data and compliance auditing.
Infrastructure Software	Security Management	Host Based Intrusion Detection System (Host Based IDS)	"Host Based Intrusion Detection System" or "Host Based IDS" means Infrastructure Utility Software that monitors and analyzes user and system configuration and activities to detect unauthorized access attempts to a computer or other attacks designed to adversely affect the performance of the computer.
Infrastructure Software	Security Management	Identity Management	"Identity Management" means the software to provide a broad administrative service that identifies individuals and controls their access to resources by associating their established identity with user rights, entitlements and privileges.
Infrastructure Software	Security Management	Intrusion Detection (Software)	"Intrusion Detection (Software)" means the Infrastructure Utility Software that that monitors and analyzes user and system configuration and activities to detect unauthorized access to a network or other attacks designed to adversely affect the performance of the network or systems.
Infrastructure Software	Security Management	Penetration Testing	"Penetration Testing" means Infrastructure Utility Software used in penetration testing to simulate an attack from malicious outsiders (who do not have an authorized means of accessing the organization's systems) and malicious insiders (who have some level of authorized access).
Infrastructure Software	Security Management	Security Administration	"Security Administration" means Infrastructure Utility Software that allows for the configuration and control of the security apparatus of a computer system or an Application.
Infrastructure Software	Security Management	Security Exits	"Security Exits" mean certain types of Client software that attaches to the security software to allow the behavior of the product to be customized at predefined places or exit points. Exit functions, for example, include issuing messages, accepting or rejecting various programmatic requests, changing or rerouting the processing flow or modifying the default behavior of the security software.
Infrastructure Software	Security Management	Security Monitoring	"Security Monitoring" means Infrastructure Utility Software that enables the detection, managing, handling, registering and recording of security-related breaches and Incidents including intrusion detection and hacking.
Infrastructure Software	Security Management	Virus Detection	"Virus Detection" means Infrastructure Utility Software that monitors for, scans, detects, quarantines and removes viruses. Virus Detection includes virus signature files.
Infrastructure Software	Security Management	Vulnerability Scanning	"Vulnerability Scanning" means a process by which you scan operating systems, databases, applications, networks, etc. to assess security weaknesses to enumerate the vulnerabilities present in one or more targets.
Infrastructure Software	System Software	Access Methods & Drivers	"Access Methods & Drivers" means System Software that supports a particular device (e.g., VTAM, VSAM).
Infrastructure Software	System Software	AIX	"AIX" means the proprietary AIX UNIX Operating System software produced by IBM.

Scope/Model	Category	Element	Definition
Infrastructure Software	System Software	Exits	"Exits" mean certain types of Client software that interfaces with the O/S to allow the behavior of the product to be customized at predefined places or exit points. Exit functions, for example, include issuing messages, accepting or rejecting various programmatic requests, changing or rerouting the processing flow or modifying the default behavior of the O/S.
Infrastructure Software	System Software	Hypervisor	"Hypervisor" means an Operating System that allows the simultaneous operation of multiple instances of the same or different subordinate Operating Systems (e.g., zVM or VMWare).
Infrastructure Software	System Software	Linux (Unix)	"Linux (Unix)" means a computing platform with a central processing unit that implements the instruction sets on various platforms designed to run UNIX and utilizing the Linux or compatible Operating System.
Infrastructure Software	System Software	Linux (x86)	"Linux (x86)" means a computing platform with a central processing unit that implements the x86 instruction set and utilizing the Linux or compatible Operating System.
Infrastructure Software	System Software	MPE	"MPE" means the proprietary MPE Operating System produced by Hewlett Packard.
Infrastructure Software	System Software	NonStop O/S	"NonStop O/S" means the proprietary NonStop Operating System produced by Hewlett Packard.
Infrastructure Software	System Software	Operating System (O/S)	"Operating System" or "O/S" means software that is the main control program of a computer device and that manages communication between the hardware and other software, including scheduling tasks, managing storage, and handling communication with peripherals.

## Addendum Summary

This document have been updated as per the design changes in the Foundation services due to the Impact of BpaaS and ITO requirement

Section	Use cases	Description
1.1	In-Scope Services	<ul style="list-style-type: none"> <li>Updated Network , Server and Storage scope</li> </ul>
2.2.1	Datacenter	<ul style="list-style-type: none"> <li>Updated Network Hardware configuration details , Tape library details in Secondary DC</li> </ul>
2.2.2	Network and Links	<ul style="list-style-type: none"> <li>Updated the entire section</li> </ul>
2.2.3	Storage & Backup	<ul style="list-style-type: none"> <li>Updated the Solution approach section Storage and backup architecture , connectivity overview of VSP and HNAS</li> </ul>
2.2.4	Servers/VMs	<ul style="list-style-type: none"> <li>Updated the Solution Approach Section Server Reference architecture</li> </ul>

# 1. Scope Definition

## 1.1 In-Scope Services

Health Net has indicated the scope for the ITO program to include the foundation services such as Datacenter, Servers/VM, Network and Links, Storage and Backup, and tools at Cognizant Data center and Service Towers such as VDI, File share and print, Deskside, Desktop engineering and Database. For detailed in-scope and out of scope Services, please refer to each Foundation and Service Towers scope definition below.

### Foundation Services

Service Towers	Scope
<b>Data center</b>	<ul style="list-style-type: none"> <li>• Production Datacenter - Centennial Datacenter (DC1) would have approximately 5msec latency from the incumbent Boulder Datacenter</li> <li>• Phoenix, AZ would be the Secondary datacenter (DC2)</li> <li>• Build Cage for Both Datacenters – type will be decided mutually with Health Net physical security team.</li> <li>• Robust Tier 3/4 datacenter facility that follows the TIA-942 standard</li> <li>• SSAE16 certified datacenter</li> <li>• Enough floor space for initial build to support up to 7500 Sq. ft. to accommodate growth in DC1.</li> <li>• Both Datacenters have MPLS connection capability to HN, Health Net Federal Services (HNFS), and Cognizant Technical Services (CTS)</li> <li>• DC1 to have P2P connection with Phoenix, AZ (DC2) and Boulder DC</li> <li>• Cisco UCS manager will be used for the Datacenter management and hardware for Cisco blades</li> <li>• Virtualization monitoring using HP OM VSPI (vSphere)</li> <li>• Database monitoring using HP OM DB SPI(SQL DC Monitoring related to VDI)</li> <li>• Event Flow Integration with HP OMi (MOM)</li> <li>• Cloud 360 for Virtual management, performance, capacity, and have a catalog for rapid provisioning</li> </ul>

Service Towers	Scope
<b>Network and Links</b>	<ul style="list-style-type: none"> <li>• Architecture design for WAN, LAN, Security (Firewall, IPS), DCI and Network Management</li> <li>• IP address design and allocation planning</li> <li>• ITIL process compliance</li> <li>• Network infrastructure build at Centennial (DC1) and Phoenix (DC2) Datacenters               <ul style="list-style-type: none"> <li>○ Installation and Configuration of Routers, Core/Access Switches, Firewalls, IPS, Load balancers and WAN optimizers</li> <li>○ Provisioning and integration of WAN Links</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>▪ Health Net Federal MPLS</li> <li>▪ Health Net Non-federal MPLS</li> <li>▪ Cognizant MPLS</li> <li>▪ P2P links between Centennial and Boulder Datacenters</li> <li>▪ P2P links between Centennial and Phoenix Datacenters</li> <li>○ Core and access switch configuration for L3/L2 VLANS, VPC, VDC, and failover</li> <li>○ Firewall context creation, access rules definition</li> <li>○ IPS filtering, policy configurations and failover configuration.</li> <li>○ Integrate firewall and IPS logs to existing SIEM collector in Boulder Datacenter</li> <li>○ Load balancer context creation, VIP and failover configurations</li> <li>○ <i>Riverbed WAN optimization services for the Health Net sites as supported by the remote sites</i></li> <li>○ High level and low level design</li> <li>• Design documentation for all the network components.</li> <li>• Provisioning of Cognizant datacenter network devices, monitoring and management</li> <li>• ITIL process compliance</li> <li>• Network administration services</li> <li>• Performance monitoring, management and optimization</li> <li>• IMAC, physical network environment services</li> <li>• Cabling and wiring services in both Datacenters</li> <li>• WAN circuit provisioning and administration</li> <li>• Reporting, analytics and documentation</li> <li>• Cisco Prime DCNM (Datacenter Network Management) tool</li> <li>• <i>Cisco NAM tool</i></li> <li>• HP Network Node Manager and iSPI for Datacenter network monitoring tool</li> <li>• Cisco Security manager tool for firewall monitoring and management</li> <li>• Riverbed 's management tool for monitoring and management</li> <li>• <i>Load balancer management tool</i></li> <li>• HP Operation Manager (Manager of Manager - MOM), tool for event management</li> <li>• Service Health Reporter – report overall monitoring of HPOM and HPNNM</li> </ul>
--	---

Service Towers	Scope
<b>Storage and Backup</b>	<p><b>Storage</b></p> <ul style="list-style-type: none"> <li>• Build the storage infrastructure in both Datacenters</li> <li>• Have Data replication capability for Centennial, and Phoenix DC with VSP and HNAS</li> <li>• SAN provisioning , monitoring and management for both storage and</li> </ul>

Service Towers	Scope
	<ul style="list-style-type: none"> <li>backup</li> <li>• ITIL process compliance</li> <li>• Support for VSAN/partitioning, NPIV</li> <li>• Storage array and NAS provisioning, monitoring and management</li> <li>• Capability for HNAS replication between DC1 and DC2</li> <li>• Data at rest encryption</li> <li>• Design documentation for the storage environment</li> <li>• VSP for VDI and Server storage</li> <li>• HNAS controllers to manage VDI storage pool</li> <li>• HCP/HUS storage for File</li> <li>• Hitachi command suite tools: <ul style="list-style-type: none"> <li>○ Device manager</li> <li>○ Tuning manager</li> <li>○ Command Director</li> <li>○ Tiered Storage manager</li> <li>○ Dynamic provisioning</li> </ul> </li> </ul> <p><b>Backup</b></p> <ul style="list-style-type: none"> <li>• Support encrypted backups for the following platforms: <ul style="list-style-type: none"> <li>○ Window, Linux, UNIX, physical and virtual host</li> <li>○ Databases: Oracle, Microsoft SQL Server, MySQL, Rdb, DB2</li> </ul> </li> <li>• NDMP backups of NAS storage</li> <li>• Backup policy and schedule creation, modification and management</li> <li>• ITIL process compliance</li> <li>• Backup monitoring, failure reporting and resolution</li> <li>• Capacity planning for the backup environment</li> <li>• Data recovery (ad-hoc and as part of a scheduled DR test)</li> <li>• Sepaton (Delta View) – monitoring of backup disc library</li> <li>• Spectra logic – monitoring of backup tape library</li> <li>• Symantec NetBackup</li> <li>▪ Design documentation for the Backup environment</li> </ul>

Service Towers	Scope
Server/VM	<ul style="list-style-type: none"> <li>• Assets <ul style="list-style-type: none"> <li>○ Primary Datacenter: 106 Physical Blade servers, 2 Rack Servers</li> <li>○ Secondary Datacenter: 11 Physical blade servers, 1 Rack Server</li> <li>○ Remote Locations: 33 rack servers</li> </ul> </li> <li>• OS licenses for Net-New Servers</li> <li>• Build services for Net-New servers in the primary and secondary datacenters</li> <li>• ITIL process compliance</li> <li>• Run services <ul style="list-style-type: none"> <li>○ Server provisioning, monitoring and management for net new servers in Cognizant Datacenters</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>○ Performance and capacity management</li> <li>○ Patching and upgrades management</li> <li>○ Asset refresh and disposal</li> <li>● Support Non-Disruptive upgrades for UCS</li> <li>● Support vSphere replication for purpose of DR</li> <li>● Server provisioning, monitoring and management for new servers in Datacenter and Health Net remote sites</li> <li>● Issue resolution</li> <li>● Security management</li> <li>● Audit and compliance reporting</li> <li>● Servers and VMs will be monitored using proposed HP Operations manager solution and Cloud 360</li> <li>● Cisco UCS manager tool for hardware monitoring</li> <li>● HP OMW and VSphere SPI monitoring tools for Servers/VM</li> <li>● Microsoft OEM tool for image management</li> <li>● Manage Engine Asset Explorer for asset management</li> <li>● Cloud 360 will be used for managing the cloud environment</li> <li>● Service Catalog will be developed in Cloud 360, and will be modified over time as Health Net needs changes</li> <li>● Performance Manager tool for OS data collection</li> <li>● Design documentation for the Server/VM environment</li> </ul>
--	---

Service Towers	Scope
<p><b>Monitoring Tools</b></p>	<ul style="list-style-type: none"> <li>● Design , Implementation and steady state support               <ul style="list-style-type: none"> <li>○ HP Operation Manager Window (1 each for Federal and Non-federal) -servers</li> <li>○ Virtualization monitoring using HP OM VSPI (VSphere)</li> <li>○ Database monitoring using HP OM DB SPI(SQL DC Monitoring related to VDI)</li> <li>○ Performance Manager tool</li> <li>○ HP Network Node Manager and iSPI</li> <li>○ Service Health Reporter for reporting overall monitoring HPOM and HPNNM</li> <li>○ HP Operation Manager (Manager of Manager – MOM)</li> <li>○ Manage Engine Asset Explorer for asset management</li> <li>○ Event Flow Integration with HP OMi (MOM)</li> <li>○ HP OMW Federal and Non-federal</li> <li>○ HP NNMi</li> <li>○ Hitachi Tuning Manager</li> <li>○ Sepaton (Delta View manager)</li> <li>○ Spectra logic</li> <li>○ Citrix EdgeSight</li> <li>○ Cisco UCS manager</li> <li>○ Cisco Prime DCNM (Datacenter Network Management)</li> <li>○ Cloud 360</li> </ul> </li> </ul>

Service Towers	Scope
	<ul style="list-style-type: none"> <li>○ Symantec NetBackup</li> <li>○ Management software for IPS(Intrusion Prevention system)</li> <li>○ Cisco security management tool</li> <li>● Leverage the exiting tools to support the Health Net hosted database environment in boulder DC <ul style="list-style-type: none"> <li>○ Oracle enterprise manager cloud control 12c to monitor database</li> <li>○ MS SQL IDERA and ITcam for SQL monitoring and management</li> <li>○ Lite speed and SSMS tools for MS SQL backup</li> <li>○ RMAN and TSM for Oracle databases</li> <li>○ Oracle utility RMU based backup for Rdb</li> </ul> </li> </ul>

Service Towers	Scope
VDI	<ul style="list-style-type: none"> <li>● Citrix XenDesktop-7.5 with PVS <ul style="list-style-type: none"> <li>○ Planning, design, build and steady state support services for VDI</li> <li>○ Initial build will be 5300 VDIs</li> </ul> </li> <li>● Citrix XenApp 5 for legacy application <ul style="list-style-type: none"> <li>○ Design , Build and steady state support</li> </ul> </li> <li>● Monitoring and management of VDIs</li> <li>● DR solution – 5% of 5300 VDI's (200 Non-persistent and 60 Persistent) Performance Manager tool for VM data collection</li> <li>● Citrix EdgeSight for Citrix monitoring</li> <li>● SCCM for software distribution /patching</li> <li>● MS OEM tools for image management</li> <li>● Design documentation for VDI</li> </ul>

Service Towers	Scope
File Share and Print	<p><b>File share</b></p> <ul style="list-style-type: none"> <li>● Planning, design, build and steady state support</li> <li>● IMAC and physical environment services</li> <li>● Centralization of files including MS Access Databases</li> <li>● Host and support Image backup with both image and file restoration</li> <li>● Host and support file performance reports</li> <li>● Migrate about 75000 MS Access Database into the new File/Print architecture</li> <li>● Migrate data from each of the remote sites into a local HDI appliance</li> <li>● Antivirus scanning</li> <li>● Provide encryption at rest</li> <li>● High available design with DR incorporated to support tapeless backups</li> <li>● Design documentation for File share</li> </ul>

Service Towers	Scope
	<ul style="list-style-type: none"> <li>• Utilize HCP/HUS/HDI infrastructure to support File share</li> <li>• Hitachi command suite tools for monitoring and management</li> <li>• Hitachi File Systems Manager tool for HDI event management</li> </ul> <p><b>Print</b></p> <ul style="list-style-type: none"> <li>• Plan, design, build and steady state support</li> <li>• IMAC and physical environment services</li> <li>• Migrate about 941 printers / print queues in the existing environment</li> <li>• Design documentation for print <ul style="list-style-type: none"> <li>○ Print settings needs to be retained</li> </ul> </li> <li>• High availability for print servers</li> <li>• HP OMW tool for monitoring Print service (spooler) and servers</li> </ul>

Service Towers	Scope
<p style="text-align: center;"><b>Database</b></p>	<ul style="list-style-type: none"> <li>• Support and administration of database (Oracle, MS SQL, MySQL and Rdb DB2) hosted in all Health Net's environments</li> <li>• License compliance</li> <li>• ITIL process compliance</li> <li>• Security management</li> <li>• Patch management</li> <li>• Performance tuning and configuration management</li> <li>• Capacity Management</li> <li>• Maintain and Administration of ASM and its Disk-groups</li> <li>• Backup and recovery of the databases</li> <li>• Federal resources will be provided for HNFS activities</li> <li>• Database design and engineering services <ul style="list-style-type: none"> <li>○ Database/Instance - creation, validation, testing, support and upgrade</li> </ul> </li> <li>• Database consulting services to the Application team</li> <li>• Performance Manager tool for Database data collection</li> <li>• Design documentation on Database</li> <li>• Leverage the existing tools to support the Health Net hosted database environment in boulder DC <ul style="list-style-type: none"> <li>○ Oracle enterprise manager cloud control 12c to monitor database</li> <li>○ MS SQL IDERA and ITcam for SQL monitoring and management</li> <li>○ Lite speed and SSMS tools for MS SQL backup</li> <li>○ RMAN and TSM for Oracle databases</li> <li>○ Oracle utility RMU based backup for Rdb</li> </ul> </li> </ul>

Service Towers	Scope
<p style="text-align: center;"><b>Desk side</b></p>	<ul style="list-style-type: none"> <li>• Define services and standards for supporting the desktop/laptop and</li> </ul>

Service Towers	Scope
	<p>end user capabilities</p> <ul style="list-style-type: none"> <li>• Support for desktop/laptop/Thin Client/VDI standard configurations</li> <li>• Installations, removals, decommissions and break –fix of desktops/laptop</li> <li>• ITIL process compliance Resources</li> <li>• Support services for Application Packaging, Software distribution, Patch Deployment, Image Management</li> <li>• Resolution of issues connecting/printing or mapping to networked printers on workstations</li> <li>• Assist remote access users with accessing a variety of applications at various locations</li> <li>• Support and troubleshoot users in manual installation of approved applications as requested</li> <li>• Design documentation on Desk side</li> <li>• Vendor co-ordination</li> <li>• Lease refresh program</li> <li>• MS OEM tools for image management</li> <li>• Flexera Admin Studio for Application packaging</li> <li>• SCCM 2012 tool for Software distribution/patching</li> <li>• Symantec Altiris for EUC ( desktop/laptop) asset lifecycle management</li> <li>• Facilitating End User computing asset disposal</li> </ul>

Service Towers	Scope
<p><b>Desktop Engineering</b></p>	<ul style="list-style-type: none"> <li>• Planning, design, build and Steady state support of SCCM 2012 environment</li> <li>• Migration of SCCM 2007 to SCCM 2012</li> <li>• Perform assessment on SCCM 2007 environment</li> <li>• Integration of WSUS with SCCM 2012 for Microsoft updates and synchronization for patching</li> <li>• Migrate Advertisements, Collections, Packages from SCCM 2007 to SCCM 2012</li> <li>• Roles and Policy configuration</li> <li>• Pre-Stage Distribution Points</li> <li>• Package Conversion and Steady State Support services for Application packaging, testing, patch deployment and image management</li> <li>• Software distribution, Patch deployment and Image management for Desktop , VDI and servers (printer servers and servers)</li> <li>• Define services and standards for supporting desktops/laptops</li> <li>• SCCM administration and support</li> <li>• HP OMW for monitoring availability of SCCM services and servers</li> </ul>

*Note: Activities not explicitly called out as 'In Scope' is considered as out of scope*

**Security Controls**

Service Towers	Scope
<p><b>Security Management &amp; Compliance</b></p>	<ul style="list-style-type: none"> <li>• Training &amp; Security Awareness Sessions for all associates associated to the Health Net Account                             <ul style="list-style-type: none"> <li>○ Cognizant Security Trainings</li> <li>○ Health Net Commercial - Security Trainings</li> <li>○ Health Net Federal Services – Security Trainings</li> </ul> </li> <li>• Defining , Adopting, Monitoring and Reporting all security controls that relates to                             <ul style="list-style-type: none"> <li>○ Desktop , Laptop and VDI</li> <li>○ Database</li> <li>○ Network</li> <li>○ Datacenter &amp; Delivery Centers (Onsite &amp; Offshore)                                     <ul style="list-style-type: none"> <li>▪ Physical Security</li> <li>▪ Logical Security</li> </ul> </li> <li>○ Servers (Windows &amp; Unix)</li> </ul> </li> <li>• Adopting, Monitoring and Reporting all SOX Compliance Controls</li> <li>• Supporting Vulnerability Assessment &amp; Remediation's</li> <li>• Supporting all Audit Requirements</li> <li>• Defining Password Vault Policy Services and/or Tools</li> <li>• Performing Required Security Patching for Operating Systems and COTS products.</li> </ul>

*Note: Detailed Security control design documents will be provided by Cognizant within 60 days of the start date of transition*

**1.2 Out-of-Scope and Scope Exclusions**

Note: Out of scope items listed are only scope exclusions for ITO Phase 1. Scope Model document “Ex A-1” defines the Cognizant responsibility for Phase 2 and Phase 3.

- **Antivirus support**  
Antivirus file detection, quick patches, vulnerability scanning, updates for Antivirus software
- **Network and Links**  
Implementation, configuration and documentation of network devices including Riverbeds at Health Net Boulder datacenter and at any Health Net remote branch offices, except 11 locations under new implementation scope for Riverbed, along with Centennial and Phoenix Datacenters
- **Incumbent Datacenter services**
  - Any implementation, configuration and documentation within the Boulder DC and Health Net remote branch offices.
  - No Internet connectivity service from Centennial DC and Phoenix DC
- **Database (hosted in Boulder DC)**

- DB Hardware Provisioning and Support – Infrastructure management service like Server , Storage , backup support in Boulder DC
- Server performance management
- Server capacity management in Boulder DC
- Tape procurement / Tape inventory / Tape management in Boulder DC
- **Desk-side Services**
  - Mobile device management
  - End user Computing asset procurement
  - End user Computing asset disposal
  - McAfee ePO- Antivirus, Encryption, HIPS, DLP Policy update and management
- **Desktop engineering**
  - Support and Management of non-windows devices or windows workstations not part of the Health Net domain
- **Server/VM**
- vCenter Operations Manager for detailed Virtualization management with the use of Cloud 360Asset
  - Software licenses for MS SQL, VDI, Desktop OS Windows 7, Citrix Xen Desktop, Desktop engineering SCCM 2012, VMware enterprise plus, etc. (Licenses will be provided by Health Net)
  - All infrastructure assets and licensing will be a cost to Health Net
  - Procurement of laptop/desktop/printers/telephones/fax
- **Third Party Services**
  - Offsite Storage of Tapes is not part of the scope. Cognizant will piggy back on existing Health Net's contract and agreement across both data centers

## 2. Solution Description

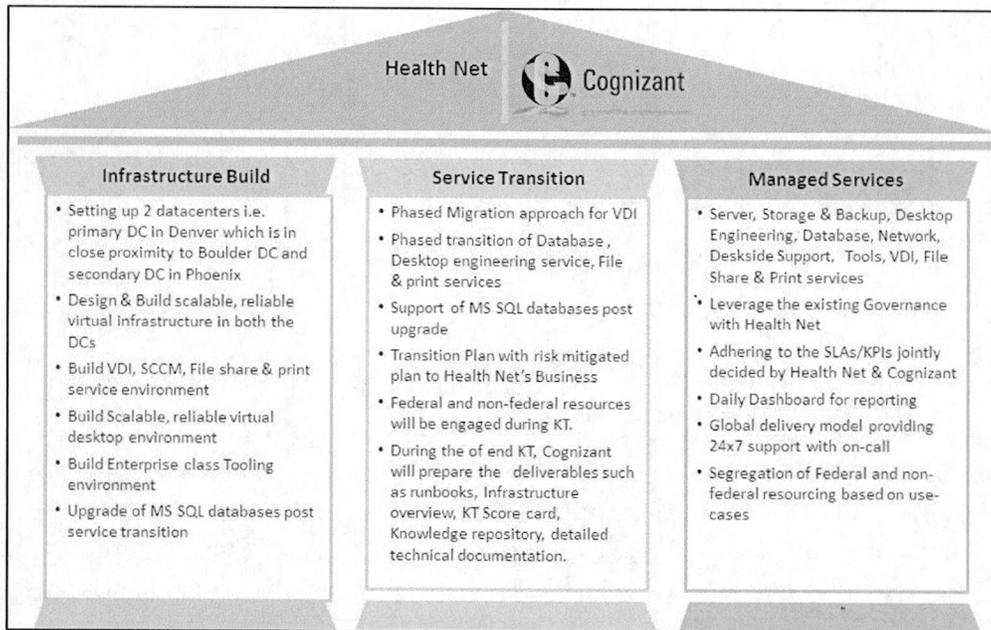

### 2.1 Cognizant's solution approach and strategy

Cognizant's services model is based on the following:

- Leveraging understandings and learning from the ongoing AO services
- Cognizant will provide the monitoring tools defined as part of in-scope
- Right shoring of services to meet Federal and Non-federal requirement
- Cognizant will follow the ITIL v3 processes on end to end ownership of tickets – Periodic, consistent and clear proactive client communications until tickets are closed.
- Cognizant will use the following security practices and processes for Onsite, offshore and on-call support:
  - All of the Cognizant resources working offshore will not be provided access to the Cognizant's customer environments
  - As we follow in AO and BPO contracts, all ITO resources that are supporting Health Net will be working out of Health Net approved Offshore Delivery Center (ODC) locations, in a clean room
  - All ODCs that are used to support Health Net are audited for Physical security and they undergo Cognizant internal auditing and also go through SSAE 16 audits.

- Onsite Resource Access: All of the onsite resources will access Health Net Environment through Health Net approved devices
- All Cognizant devices are secured by McAfee toolsets for Encryption and for Email/Web access restrictions
- Employee Termination: As per process establish in the account, we submit ISR to delete CID the day associate leave if it is immediate relieving or if it is planned release we submit ISR ahead of time to ensure successful deletion of the Cognizant resource's CID
- Under the new agreement Cognizant team will be providing support in managing remediation and incident responses that are required to address any security incident. Security Solution documentation will cover the team structure along with the roles and responsibilities
- Cognizant will be working with Health Net to define the Security Vault Requirements and such security requirement solution will be implemented within Health Net Environment and at no time will be implemented within Cognizant Environment. Our resource model for this engagement is dedicated for Health Net, hence our resource will first access the Cognizant/Health Net environment and they will be having access to Password Vault Services. To define the process and toolset for this, Cognizant team will understand existing policy and procedure from Health Net and/or IBM and will work with Health Net to develop solution and with proper controls that meets SOX compliance and any other compliance needs.

Cognizant's engagement partnership will comprise of the following three major pillars:

## 2.2 Foundation Services

The Foundation services are the core services which include the complete Greenfield set-up of the Datacenters. Cognizant proposes to build the primary Datacenter at Centennial while the secondary Datacenter will be at Phoenix.

## 2.2.1 Datacenter

### 2.2.1.1 Highlights of scope validation workshop

The table below highlights the scope outlined after the scope validation workshop

Description	Pre scope validation workshop	Post scope validation workshop
<b>Design Considerations</b>	<ul style="list-style-type: none"> <li>DC1 - 96 Cisco UCS (Unified Computing Systems) manager Blades</li> <li>DC2 - 19 Cisco UCS (Unified Computing Systems) manager Blades</li> </ul>	<ul style="list-style-type: none"> <li>DC1 - 106 Cisco UCS (Unified Computing Systems) manager Blades</li> <li>DC2 - 11 Cisco UCS (Unified Computing Systems) manager Blades</li> </ul>
	<ul style="list-style-type: none"> <li>DC1 12 chassis for blade servers, 2 network racks, 2 cable, 4 storage and 2 for tape, 1 for Sepaton</li> <li>DC2 2 chassis for blade servers, 2 network racks, 2 storage, 1 for tape, 1 cable , 1 for Sepaton</li> </ul>	<ul style="list-style-type: none"> <li>DC1-14 chassis for blade servers, 2 network racks, 2 HNAS/HDI , 2 cable, 4 storage and 2 tape, 1 for Sepaton, and built in space for expansion</li> <li>DC2 -2 chassis (1 Rack) for blade servers, 2 network racks, 2 storage and 1 for tape,1 for Sepaton , 1 HNAS/HDI , 1 cable, and built in space for expansion</li> </ul>
	<ul style="list-style-type: none"> <li>42 Cisco C220 rack servers</li> </ul>	<ul style="list-style-type: none"> <li>36 Cisco C220 rack servers</li> </ul>
	<ul style="list-style-type: none"> <li>400 Sq. ft. space in the Datacenter</li> </ul>	<ul style="list-style-type: none"> <li>600 to 700 Sq. ft. space in the Datacenter, to include reserve space for future expansion of devices like Hitachi VSP Storage and of blade servers.</li> </ul>
	<ul style="list-style-type: none"> <li>Solution had HUR for Storage replication, and SRM</li> </ul>	<ul style="list-style-type: none"> <li>HUR capable added Sepaton replication license. Will have HNAS and vSphere replication if needed, will determine during the detail design.</li> </ul>
	<ul style="list-style-type: none"> <li>No reserved space for expansion</li> </ul>	<ul style="list-style-type: none"> <li>Created reserved space for Sepaton, VSP, and spectra logic for expansion</li> </ul>

### 2.2.1.2 Solution Approach

Cognizant will setup two datacenters to meet Health Net's initiatives. For the Primary Datacenter (DC1), Cognizant will use our Partner Latisys to deliver the DC1 facility. For the Secondary Datacenter (DC2), Cognizant will utilize space in its Datacenter in Phoenix (Cyrus One facility).

#### Primary Datacenter (DC1) - Centennial DC

DC1 will be located in Centennial at the Latisys facility. This facility has an estimated space of 600 to 700 Sq. ft. This section provides infrastructure details for DC1 facility.

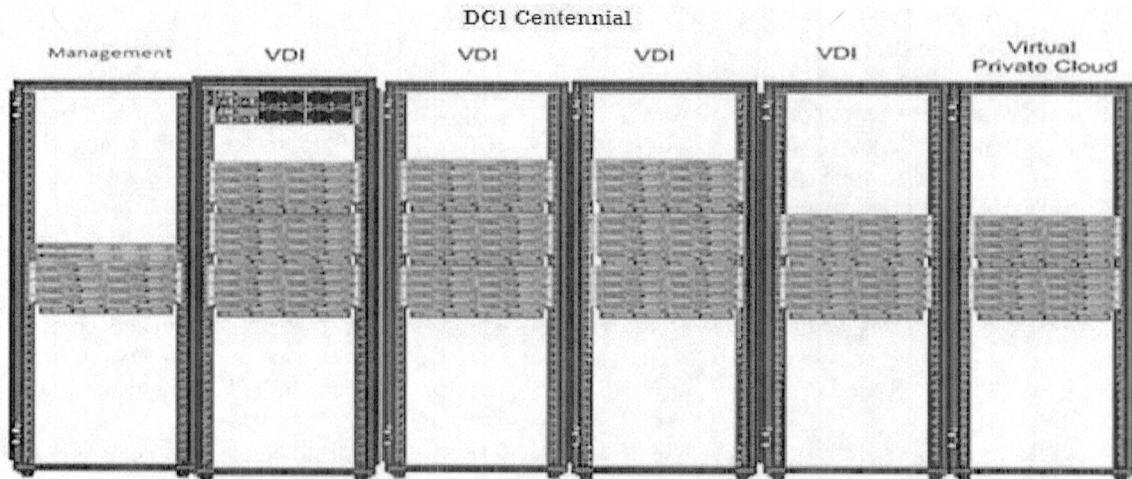

#### Blade Servers:

Blade Server Model	Hardware Configuration
<b>5108 chassis (x 14)</b>	<ul style="list-style-type: none"> <li>Per Chassis (H x W X D) – 6RU: 10.5 x 17.5 x 32</li> <li>Power (Per Chassis) - 4 2500 W capacity, 200v -240v, 50 to 60 HZ single-phase</li> </ul>
<b>6296 Cisco Switch (x 2)</b>	<ul style="list-style-type: none"> <li>(H X W x D) – 3.44 x 17.3 x29.5</li> <li>Power – 750 W</li> </ul>

The diagram below depicts the rack details for the following UCS blade:

- VDI will have 11 Chassis (3 slots open, and space for another chassis)
- Cloud will have 2 chassis (No open slots, but space for another chassis)
- \*Management will use 1 Chassis (4 open slots)

*\*Note - With the flexibility of the Cisco Chassis we can utilize all the slots to accommodate different workloads. (E.g. The 4 open slots in the management chassis could be used for Cloud or VDI if needed. For the open rack space, the same rule applies but it will be dependent on DC review to make sure we have enough power and the rack can support more weight.)*

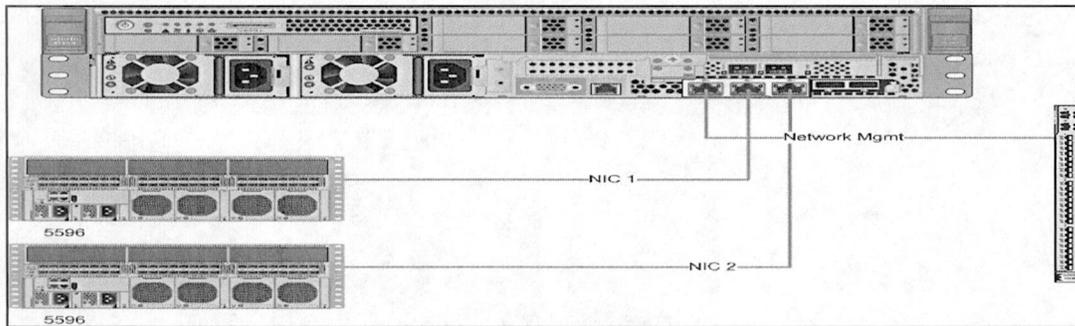

**Figure: Centennial DC**

Rack Components

Rack Server Model	Hardware Configuration
Cisco C220 (x2)	<ul style="list-style-type: none"> <li>• (H x W x D) - 1RU: 1.7 x 16.9 x 28.5 in. (4.32 x 43 x 72.4 cm)</li> <li>• Power – 90 to 264 VAC self-ranging, 100 to 120 VAC nominal and 200 to 240 VAC nominal</li> <li>• AC input frequency Range: 47 to 63 Hz (single phase, 50 to 60 Hz nominal)</li> <li>• Maximum AC input current 6.0 A peak at 100 VAC 3.0 A peak at 208 VAC</li> <li>• Maximum AC inrush current 11 A</li> <li>• Maximum output power for each power supply 450 W</li> </ul>

**Server - Rack mounted**

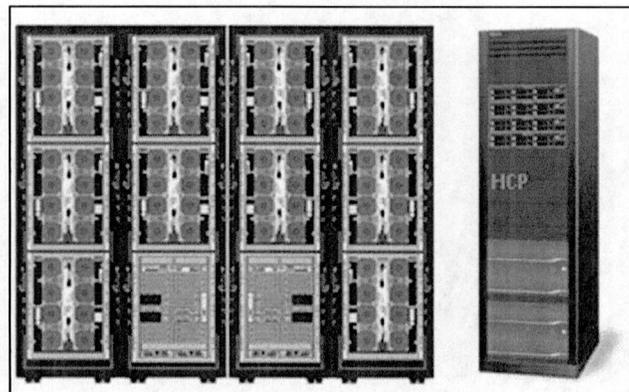

The diagram below depicts Network connectivity for the rack server

**Figure: Network Connectivity**

**Storage Hitachi VSP/HCP:**

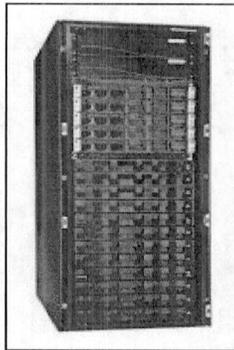

Model	Hardware Configuration
<b>Hitachi VSP</b>	<ul style="list-style-type: none"> <li>• VSP 4 19" racks , will need space on both the left and right side</li> <li>• (H x W x D)- 78.9 x 24 x 43.3 (x4, plus 1 space to left and right)</li> <li>• Power – Each rack requires 4 L6-30 connections 208V for a total of 16</li> </ul>
<b>HCP/HUS150</b>	<ul style="list-style-type: none"> <li>• HCP 1 19" rack, will need open space to right for expansion</li> <li>• (H x W x D)- Universal Rack 600x1200x2010 mm (WxDxH) 42U</li> <li>• Power - PDU 0RU 22xC13 1Phase 208V 30A NEMA L6-30P (x4)</li> </ul>

**Figure: Hitachi VSP/HCP**

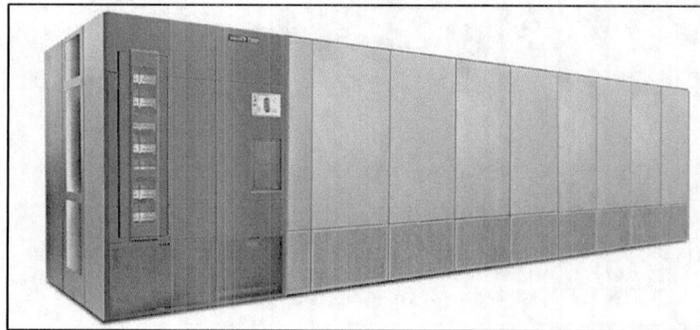

**Hitachi Storage (HCP) Storage Sepaton:**

Model	Hardware Configuration
<b>Sepaton</b>	<ul style="list-style-type: none"> <li>• 1 rack , standard 19" rack will need 1 space for expansion</li> <li>• (W x D) – 24 x 40</li> <li>• Power - 120/208 VAC - 3 phase, 30A/phase (3P+PE)</li> </ul>

**Figure: Storage Sepaton****Storage Spectra Logic: Hardware Configuration**

Consists of a base and an extended rack, not traditional size, will need up to 6 free spaces to the right (facing the product) for future growth

- (W x D) – 29 x 43.25, see page 19 of the document below for details (not standard size)
- Power - NEMA L6-20P, male or NEMA L6-30P, male IEC 60320-C19, female

**Figure: Spectra Logic**

## Storage HNAS/NetBackup/HDI Configuration Details: 2 racks

Model	Hardware Configuration
<b>HNAS (x2), 4080</b>	<ul style="list-style-type: none"> <li>(H x W x D) – 3U:5.1 x 19 x 32.2</li> <li>Power - requires 2 110 Power connections Management Switch requires 2 110V</li> </ul>
<b>HDI (x4 two sets of 2)</b>	<ul style="list-style-type: none"> <li>Per cluster (H x W x D) - 2U: 3.3 x 19 x 30.3</li> <li>Per cluster Power - requires 4 110 Power connections</li> </ul>
<b>NetBackup (4 boxes 3- Non-federal , 1 - Federal)</b>	<ul style="list-style-type: none"> <li>Each appliance (W x D) – 2U:17.3 x 27</li> <li>Power - 100 to 127, 200 to 240, Amps: 7 (100V to 127V), 3.5 (200V to 240V) L6 -30P</li> </ul>

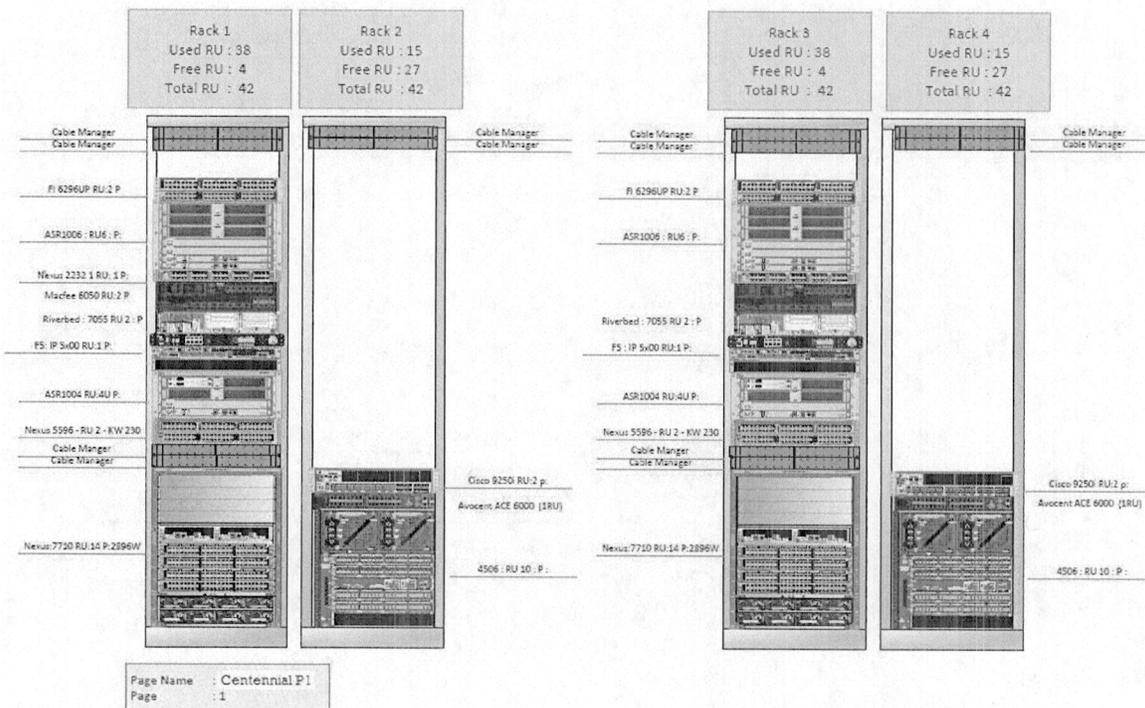

## Network

This section provides configuration details for all the network devices used in the Centennial DC.

Model	Hardware Configuration
<b>Nexus 5596</b>	<ul style="list-style-type: none"> <li>(H x W x D) – 2U: 3.47 x 17.3 x 29.5 in</li> <li>Power - 100 to 240 VAC and operating power 970 W</li> </ul>
<b>ASR 1004</b>	<ul style="list-style-type: none"> <li>(H x W x D) – 4U: 7x17.2x18.2 in</li> <li>Power - 120 to 240V and operating power 960 W</li> </ul>
<b>ASA 5585</b>	<ul style="list-style-type: none"> <li>(H x W x D) – 2U: 3.5 x 19 x 26.5 in.</li> <li>Power - 120 to 240V, Amps: 12A and operating power 800 W</li> </ul>
<b>F5 5200V</b>	<ul style="list-style-type: none"> <li>(H x W x D) – 1U:1.75 x 17 x 21 in.</li> <li>Power – single supply 120 V and operating power 400 W</li> </ul>
<b>Riverbed 7055</b>	<ul style="list-style-type: none"> <li>(H x W x D) – 2U:3.43 x 17.2 x 25.4 in.</li> <li>Power – dual power supply and operating power 420 W</li> </ul>

<b>Nexus 7710</b>	<ul style="list-style-type: none"> <li>(H x W x D) – 14RU: 24.35 x 17.3 x 34 in.</li> <li>Power: 110 to 240 VAC and operating power 3-kW</li> </ul>
<b>Cisco 4506-E</b>	<ul style="list-style-type: none"> <li>(H x W x D) – 10RU: 17.38 x 17.31 x 12.50 in.</li> <li>Dual Power -2000 W</li> </ul>
<b>MDS 9513</b>	<ul style="list-style-type: none"> <li>(H x W x D) - 14RU: 24.5 x 17.37 x 28.0 in.</li> <li>Power – 100 to 240VAC , 3.6KW</li> </ul>
<b>MDS 9250i</b>	<ul style="list-style-type: none"> <li>(H x W x D) - 2RU: 3.84 x 17.22 x 21.4 in.</li> <li>Power – 100 to 240VAC , power supply 300W</li> </ul>

Model	Hardware Configuration
<b>Riverbed 1555</b>	<ul style="list-style-type: none"> <li>(H x W x D) – 1U: 1.71 x 17.2 x 25.4 in.</li> <li>Power – dual power supply and operating power 175 W</li> </ul>

The diagram below depicts the network components in the rack

**Figure: Updated Rack Details of Network Components**

**Overall Layout DC1:**

This section describes datacenter floor layout. The space is broken into functional areas consisting of Core Network, Network services, Tape Library, SAN Storage, UCS blade compute and management / SCCM compute. The initial build-out will include the Core Network, Network Services and a mix of standard compute, Standalone, SAN Storage and tape library functional areas. The remaining space will be reserved for future growth and developed as required.

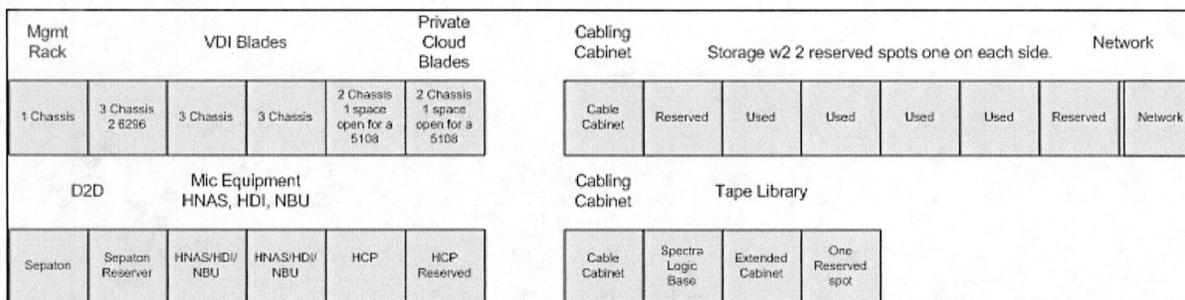

- **Core Network:** Contains the core routers, WAN edge, carrier devices, network fibre backbone and network copper cabling infrastructure, etc.
- **Network Services:** Contains the SAN Switches, and SAN fibre cabling infrastructure
- **Tape Library:** Contains Automated Tape Library units
- **SAN Storage:** Contains Storage Arrays (HNAS, SAN), Sepaton , HCP/HDI
- **Standard / standalone Compute:** Contains standard servers (blades and rack)

- **Cage:** Physical Cage around racks is as per standard recommended by Industrial security team
  - Raise floor to the ceiling cage or standard wall height with cap on top of the cage. As per the Centennial DC setup, there are motion sensors below the raised floor
  - Enable security control at cage level instead of rack level
  - Security will consist of cameras, notification setup at cage door when someone opens the door. This is the standard recommendation by the industrial security team being used in Health Net MRI rooms.

- **Power requirement :**

Centennial DC - 700 Sq. ft.		
Racks	Power/Rack ( Kw)	Total Power ( Kw)
<b>19</b>	<b>8.72</b>	<b>165.7</b>

The diagram below depicts the network components in the rack

**Figure: Rack Details of Network Components in DC2**

## DC2 - Overall layout

This section describes data center floor layout. The space is broken into functional areas consisting of Core network, Network services, Tape library, SAN Storage, UCS compute blade, management and SCCM Compute. The initial build-out will include the Core network, Network services and a mix of standard compute, Standalone SAN Storage, and Tape library functional areas. The remaining space will be reserved for future growth and developed as required.

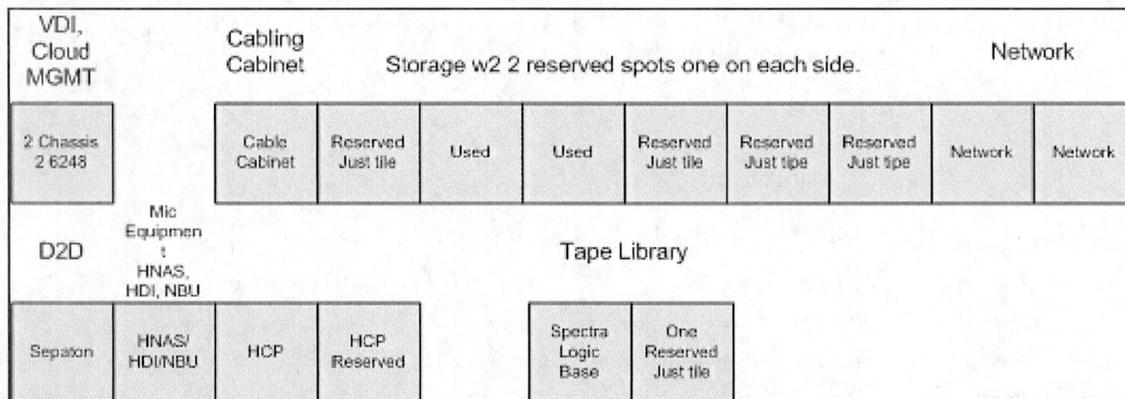

- **Core network:** Contains the core routers, WAN edge, carrier devices, network Fiber backbone and network copper cabling infrastructure etc.
- **Network services:** Contains the SAN Switches, and SAN Fiber cabling infrastructure
- **Tape library:** Contains Automated Tape Library units
- **SAN Storage:** Contains Storage Arrays (HNAS, SAN), Sepaton, HCP/HDI
- **Standard / Standalone compute:** Contains standard servers (blades and rack)
- **Cage:** Physical Cage around racks is as per standard recommended by Industrial security team.
  - Raise floor to ceiling Cage OR standard wall with cap on top of cage to cover from top. As per Centennial DC setup, there are motion sensors below the floor
  - Enable security control at cage level instead at rack level

- Security will consist of cameras, notification setup at cage door when someone opens the door. This is the standard recommendation by Industrial security team being used in Health Net MRI(Machine Room Instrument) rooms

• **Power requirement :**

Phoenix DC - 500 Sq. ft.		
Racks	Power/ Rack(KW)	Total Power ( Kw)
9	3.51	31.6

The following figure depicts the DC2 Rack layout

**Figure: Rack Layout – DC2**

**Boulder DC**

Proposed Cognizant DCs will have redundant 10 Gig Point to Point link towards the incumbent HN DC 2x Nexus 7004 is considered at Boulder to ensure 10 Gig link termination and encryptions services.

Model	Hardware Configuration
<b>Nexus 7004</b>	<ul style="list-style-type: none"> <li>• (H x W x D) – 7U : 12.2 x 17.4 x 24.5 in</li> <li>• Power - 110 to 240 VAC and operating power 3KW</li> </ul>

2.2.1.3 Service deliverables

**VMware infrastructure build**

- Build VMware infrastructure for Federal and Non-federal as per design
- Testing Federal and Non-federal to logically separate access restriction
- VMware functionality testing for vMotion, High Availability, VCenter heartbeat, etc.

**Storage and Backup infrastructure build**

- Build the Storage and backup infrastructure for Federal and Non-federal as per design
- Testing federal and non-federal to logically separate access restriction
- Testing Storage replication across DC for HCP, Zoning, performance and monitoring components

#### Network build and link Connectivity

- Build the Network infrastructure at DC1 and DC2 as per design
- Testing connectivity over redundant MPLS at Centennial and Single MPLS at Phoenix for Non-federal and Cognizant WAN.
- Testing connectivity over GET-VPN for Federal MPLS at Centennial and Phoenix DC
- Testing connectivity over Redundant P2P Links between Centennial-Boulder and Centennial-Phoenix with encryption over all the P2P links
- Testing Routing reachability between Centennial DC LAN and Boulder DC LAN (server Segment)
- Testing Routing reachability between Centennial DC LAN and Remote Location LAN
- Testing Logical Separation of Federal and non-federal traffic on DC firewall
- Testing firewall filters at Centennial DC, to permit legitimate traffic in-out of Centennial DC over P2P and MPLS Links
- Testing WAN traffic optimization between Centennial DC and remote locations with Riverbed Appliance, for VDI and File/Print traffic

Info Sec team to validate the hardening of network and security equipment implemented at Centennial and Phoenix

#### 2.2.1.4 Steady State Support - Deliverables

The key highlights of the proposed solution for the datacenter service towers are described below:

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>• A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>• 24X7 Onshore support               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net Offices</li> <li>• Offshore – Bangalore ; Coimbatore</li> </ul>

#### DC operation Services

##### Support Team

- 24x7 Surveillance of DC room / Infrastructure component

	• Coordination and tracking of all Datacenter service visits
	• Visual / Physical site inspecting / floor walk in the Datacenter
	• Backup Tape handling - Loading / Unload tape in Tape library
	• Monitor Power / Cooling / Datacenter cleaning
	• Basic observation and reporting on the environment in the Datacenter
	• Develop an annual preventive maintenance schedule
	• Route maintenance of critical infrastructure (UPS and Battery Systems, Power Distribution, Chillers, Generators, etc.)

**2.2.1.5 Assumptions**

The below assumptions have been considered for Datacenter Services.

**2.2.1.6 Dependency on Health Net**

The below dependencies have been considered for Datacenter services.

- Testing connectivity between DC1 and the incumbent DC
  - Dual 10 Gig link termination and service integration with the incumbent DC
  - Testing MPLS connectivity/performance between DC and Remote sites
- Decision on cage type will be determined before DC build out

**2.2.1.7 Risk and Mitigations**

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	Support of Key SME's from incumbent during Implementation	High	Medium	Involve Health Net to facilitate and govern the Implementation, requiring integration with Boulder DC
2	WAN network latency is within the 5 m sec response time between DC1 and the incumbent DC and Performance	Low	Low, but high for future growth	Will take a holistic approach to mitigate latency issues by equally looking at the interface layer, Network layer, Transaction layer, and the application layer. For each of these layers we use specific techniques to optimize performance and latency (e.g. for network layer we could do TCP optimization or QoS policy)

## 2.2.2 Network and Links

### 2.2.2.1 ITO Phase 1 Modified Scope

The table below highlights the scope outlined after the scope validation workshop:

Description	ITO Phase 1	ITO Phase 1 Modified
Architecture	<ul style="list-style-type: none"> <li>Layer architecture -Access and Core layer</li> </ul>	<ul style="list-style-type: none"> <li>Modular Layer architecture with dedicated Core, Aggregation and Access</li> </ul>
Core and Aggregation	<ul style="list-style-type: none"> <li>2*N5596 at Access and 2*N7004 at Core layer at Centennial DC.</li> <li>2*N5596 at Access and 2*N7004</li> </ul>	<ul style="list-style-type: none"> <li>2*N5596 at Access and 2*N7710 with VDC support for at Core, Aggregation, WAN Edge and DCI Edge</li> </ul>
Server Farm	<ul style="list-style-type: none"> <li>Cisco UCS manager chassis to connect to the Nexus 5596 with dual 10G coming through 6296 Fabric interconnect A and B</li> <li>Cisco FEX Nexus 2232 for connecting the C-Series Servers</li> <li>F5 Load Balancers with 2 x virtual context for federal and Non-federal for respective server application load balancing</li> </ul>	<ul style="list-style-type: none"> <li>Cisco UCS manager chassis to connect to the Nexus 5596, UCS Chassis connects to 6296 Fabric interconnect using dual 10 Gig links</li> <li>Cisco FEX Nexus 2232 for connecting the 1 Gig port requirements</li> <li>F5 Load Balancers with 2 x virtual context for federal and Non-federal for respective server application load balancing</li> </ul>
Storage Area Network	<ul style="list-style-type: none"> <li>FCoE from UCS Chassis to the Fabric Interconnect (2x FI 6296)</li> <li>FCoE from the FI to the Nexus 5Ks</li> </ul>	<ul style="list-style-type: none"> <li>FCoE from UCS Chassis to the Fabric Interconnect (2x FI 6296)</li> <li>Dedicated 2x MDS 9513 for SAN</li> <li>Dedicated 2x Cisco 9250i for FCIP Replication</li> <li>HBA Interfaces for the Physical Servers</li> </ul>
Services	<ul style="list-style-type: none"> <li>All the network devices Routers, Firewall, IPS, WAN optimizer, L/B connect to N7004 core switches in both Centennial and Phoenix DCs</li> <li>All the UCS Servers, storage (VSP), HNAS (4x10GB only per HNAS) connect to N5596 Access Switch, while at Centennial the above listed devices connect to N5596 Access Switch.</li> </ul>	<ul style="list-style-type: none"> <li>All the network devices Routers, Firewall, IPS, WAN optimizer, L/B connect to the respective VDCs on the N7710</li> <li>All the HNAS and NetAPP connect to the N7710</li> </ul>

Description	I/O Phase 1	I/O Phase 1 Modified
Security	<ul style="list-style-type: none"> <li>• ASA 5585 SSP 20 with dedicated Security Contexts for providing Firewall Security</li> <li>• McAfee 6050 IPS for WAN traffic inspection</li> <li>• Logical Separation of Federal and Non Federal Traffic</li> </ul>	<ul style="list-style-type: none"> <li>• ASA 5585 SSP 40 with dedicated Security Contexts for providing Firewall Security</li> <li>• McAfee 6050 IPS for WAN traffic inspection</li> <li>• Logical Separation of Federal and Non Federal Traffic</li> <li>• Cisco ACS for Authentication</li> </ul>
WAN MPLS	<ul style="list-style-type: none"> <li>• Shared 2x ASR 1004 for WAN MPLS</li> <li>• Centennial -Redundant WAN link from ATT providing MPLS Services for Health Net Non-federal, Federal and Cognizant.</li> <li>• Phoenix - Single MPLS link from ATT for Federal, non-Federal and Cognizant links</li> <li>• Existing GET VPN encryption service from ATT is considered for Federal MPLS</li> <li>• Redundant McAfee IPS Required for WAN traffic.</li> <li>• Riverbed required for Federal and Non-federal MPLS Traffic Optimization</li> <li>• Additional 11 Remote Locations require Riverbed Steelhead appliances</li> </ul>	<ul style="list-style-type: none"> <li>• Dedicated 2x ASR 1004 for WAN MPLS</li> <li>• Centennial -Redundant WAN link from ATT providing MPLS Services for Health Net Non-federal, Federal and Cognizant.</li> <li>• Phoenix - Single MPLS link from ATT for Federal, non-Federal and Cognizant links</li> <li>• Existing GET VPN encryption service from ATT is considered for Federal MPLS</li> <li>• Redundant McAfee IPS Required for WAN traffic.</li> <li>• Riverbed required for Federal and Non-federal MPLS Traffic Optimization</li> <li>• Additional 11 Remote Locations require Riverbed Steelhead appliances</li> </ul>
Data Center Interconnect	<ul style="list-style-type: none"> <li>• Shared ASR 1004 for DCI Link</li> <li>• 2 x 1Gig Link for Centennial to Boulder, terminated on the ASR with IPsec Encryption</li> <li>• 2 x 1Gig Link for Centennial to Phoenix, terminated on the ASR with IPsec Encryption</li> </ul>	<ul style="list-style-type: none"> <li>• Dedicated Nexus 7k VDC and 2x ASR 1006 for the DCI Edge</li> <li>• 2x Nexus 7004 at Boulder</li> <li>• 2 x 10 Gig Link for Centennial to Boulder, terminated on the N7k VDC with MACSec Encryption</li> <li>• 2 x 10 Gig Link for Centennial to Phoenix, terminated on the ASR with IPsec Encryption</li> <li>• Design to minimize the latency. No Riverbed, Firewall or IPS for the DCI</li> </ul>
Monitoring and Management	<ul style="list-style-type: none"> <li>• 2x 3750 for Out of Band Management</li> <li>• 2x Avocent ACS 6032 with Modem</li> <li>• Cisco Prime Infrastructure</li> <li>• HP NNMI</li> </ul>	<ul style="list-style-type: none"> <li>• 2 x 4506 for Out of Band Management</li> <li>• 2x Avocent ACS 6048 with Modem</li> <li>• Cisco Prime Infrastructure</li> <li>• HP NNMI</li> <li>• Cisco NAM 2320</li> </ul>

Description	ITO Phase 1	ITO Phase 1 Modified
		<ul style="list-style-type: none"> <li>• Riverbed CMC</li> <li>• F5 Enterprise Manager</li> </ul>

**2.2.2.2 Solution Approach**

Network infrastructure will be built at Centennial and Phoenix Datacenters to host about 5300 VDI client infrastructure, File and print solution and Virtual machines for future use. Centennial is the preferred choice for the primary Datacenter due to the requirement for a high speed connection with the incumbent DC, (i.e. Boulder DC over 2 x 10G fiber redundant links to achieve latency less than 5ms for any application and database access from Centennial VDI environment to Boulder DC). Phoenix DC is the proposed DR site for critical VDI users hosted at Centennial DC, for now it is expected to host about (200 Non-persistent and 60 persistent) VDI users (about 5% of total build) in cold standby mode. 2x10 Gig redundant link considered between Centennial and Phoenix with less than 60 ms link level latency.

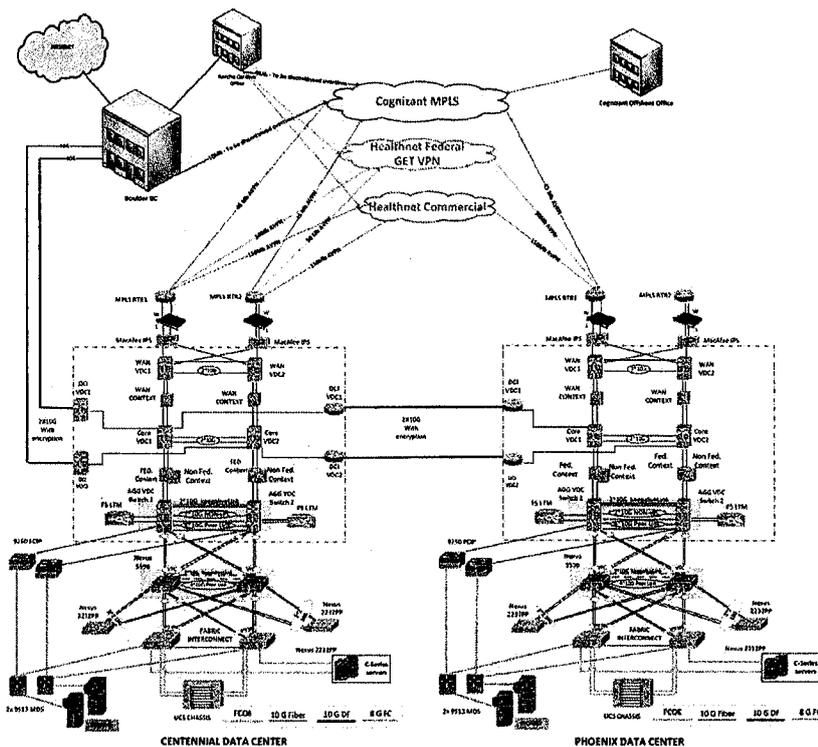

All network components shared between HNFS and Health Net Non-federal with transiting Federal data would be managed by onsite Federal network support team.

Incumbent – AT&T, a Health Net network service provider, would configure MPLS, Federal GET VPN, and routing schema at DC1 and DC2 WAN devices to cohesively interoperate with remainder of Health Net Enterprise network. Riverbed design will follow the current Health Net WAN Acceleration architecture managed by ATT.

Centennial DC is proposed with redundant MPLS links from ATT for Health Net Federal, Health Net Non-federal, and Cognizant. Phoenix DC is proposed with single MPLS link for Health Net Federal, Health Net Non-federal, and Cognizant. Redundant 10G P2P links between Centennial and Boulder DC, Centennial and Phoenix DC, and the links will be encrypted using MACSec/IPSEC, for the purpose of Federal compliance. Health Net Federal MPLS links will be encrypted with GETVPN encryption, managed by AT&T. Health Net Federal and Non-federal users are spread across the country connecting over existing MPLS networks respectively (Federal and Non-federal are separate MPLS networks over AT&T). Health Net Non-federal Internet users shall access the VDI infrastructure at Centennial via Boulder DC, using the 10G P2P redundant links between Centennial and Boulder DC. Redundant router, Core switch, Access switch, firewalls, Network IPS, Load Balancer, WAN optimizers will be positioned to support the VDI, File / Print, VM infrastructure, with 10G Ethernet connectivity across the DC LAN. For Cognizant’s management and monitoring of DC1 and DC2 infrastructure, a separate In-Band management switch will be deployed with management VLAN and traffic will be routed through Firewall context. The firewall will have three virtual contexts to separate traffic among Federal, Non-Federal and Cognizant. MacAfee IPS will be placed in line between ASR router and ASA firewalls to inspect Federal, Non-Federal and Cognizant data traffic.

### Logical Architecture – DC1 and DC2

The overall Network architectural design for Proposed DC1 and DC2 is shown below

**Figure: Logical Architecture DC1 and DC2**

## **DC Network Infrastructure (Phoenix and Centennial)**

DC LAN architecture follows a modular design with layered Access, Aggregation and Core Networks. A pair of Cisco Nexus 7710 with Virtual Device Context (VDC) will be set up in Centennial and Phoenix. Additional VDC is considered for WAN Edge and DCI Edge. Dedicated pair ASR 1004 is considered for WAN edge to provide MPLS termination and GET VPN encryption. Dedicated pair of ASR 1006 is considered for DCI edge. DCI link will use MACSec or IPsec encryption as appropriate.

Dedicated Pair of Nexus 7004 is proposed at Boulder for 10 Gig Link termination and DCI link encryption support.

A pair of Cisco ASA 5585 will be configured with multiple contexts and \*McAfee IPS M-6050 for protecting the network segments

Storage Area Network (SAN) will have a dedicated pair of MDS9513. A pair of 9250i is considered for Storage Replication using FCIP technology.

Cisco UCS Chassis and C-Series Servers will be connected to the Fabric Interconnect (FI 6296) for both Ethernet and Storage access. No FCoE is considered North bound from FIs. Multi Chassis Ether Channel considered providing efficient link utilization and redundancy. FIs will be directly connected to the san switches (MDS 9513) for Storage Access. A pair Cisco FEX 2232 considered for 1 Gig port requirements.

Health Net Federal and Non-Federal traffic flow will be logically segregated using appropriate technologies like VRFs, VLANs and Virtual Contexts. Cisco 5585 will support virtual firewall with multiple contexts for Federal, Non-Federal and Cognizant network segments. F5 Load balancers will be deployed in virtual appliance mode to segregate Federal and Non-Federal traffic load balancing. Nexus VDC is considered for maintaining the layered architecture with device consolidation approach. Nexus will use VRFs and VLANs to main the logical segregation of Federal and Non Federal Traffic.

Isolated Management Infrastructure with both IP level and console level access to all the network devices. PSTN (modem) is considered for Out of band management access. Management infrastructure access will be secured and controlled meeting industry best practices. Federal segment of the management zone will be managed from the Onshore location at Rancho Cordova office by the Federal approved Cognizant onshore users. Access from Rancho Cordova office to the Centennial DC will be through the Federal MPLS cloud

*\*All McAfee IPS appliances at DC1 and DC2 will be managed /monitored by Health Net SOC service provider: Leidos*

### **Cisco Prime DCNM for DC Network Management**

Cisco DCNM will be used for managing Cisco Datacenter network (SAN and LAN infrastructure) equipment at Centennial and Phoenix DC. The Cisco DCNM will be used to operate and manage a virtualized environment, which simplifies operational management of the virtualized environment. Apart from the above DCNM offers multiple advantages such as: flexibility in management by proactive monitoring and problem diagnosis, less time needed to troubleshoot problems, performance and capacity monitoring and trending of the SAN and LAN infrastructure, VMpath analytics and troubleshooting, simplified deployment of innovative Cisco NX-OS features, easy-to-use provisioning capabilities for technologies such as virtual PortChannel (vPC), VDC, Cisco FabricPath, Fiber Channel over Ethernet (FCoE), zoning, and virtual SANs (VSANs), and template-based configuration capabilities for efficient rollout of new technologies.

Cisco DCNM provides outstanding visibility into dependencies that exist between virtualized computing, networking, and storage infrastructures through features such as VMpath and virtual machine-aware topology views. Cisco DCNM streamlines the provisioning of the unified fabric and proactively monitors

the LAN and SAN components. Offering an exceptional level of visibility and control through a single management pane for the Cisco Nexus®, Cisco Unified Computing System.

Cisco Prime NAM 2320 is considered for future network troubleshooting and traffic analysis.

### **Security Infrastructure**

ASA 5585 security appliance with multi context mode will be used for traffic filtering; ASA will be deployed between ASR WAN edge and Nexus Core layer 7710 VDC. ASA will be deployed in HA mode with multiple contexts: WAN, Federal, Non-federal and Cognizant, Management etc. Traffic between the VRFs will be strictly controlled through appropriate firewall context to maintain the required isolation.

MacAfee IPS M6050 will be positioned in line between ASR router and ASA 5585-x firewalls to inspect and prevent the Federal, Non-Federal and Cognizant data traffic. McAfee IPS will send logs to existing Health Net's Nitro SIEM tool. Appropriate log collector will need be discussed and agreed with the SoC team to ensure all the logs are consolidated and compressed.

All in-band, and out of band network access will be secured by Cisco Access Control Server (ACS). Two factor authentication requirements can be achieved by service integration with Health Net's Active Directory and 2-factor systems at Boulder datacenter. Accounting logs will be sent to Health Net's security logging service for retention purpose.

Local database authentication will be configured as the fall back mechanism to authenticate, in case the centralized Authentication servers are not reachable. Local database accounts will be created and maintained per Health Net's password security policy

### **Network Management**

#### **OOB (Out-of-Band)**

Out of Band Management solution will be built at Centennial and Phoenix datacenters using Avocent ACS 6048, this solution would be used for both Network and Security Device console access.

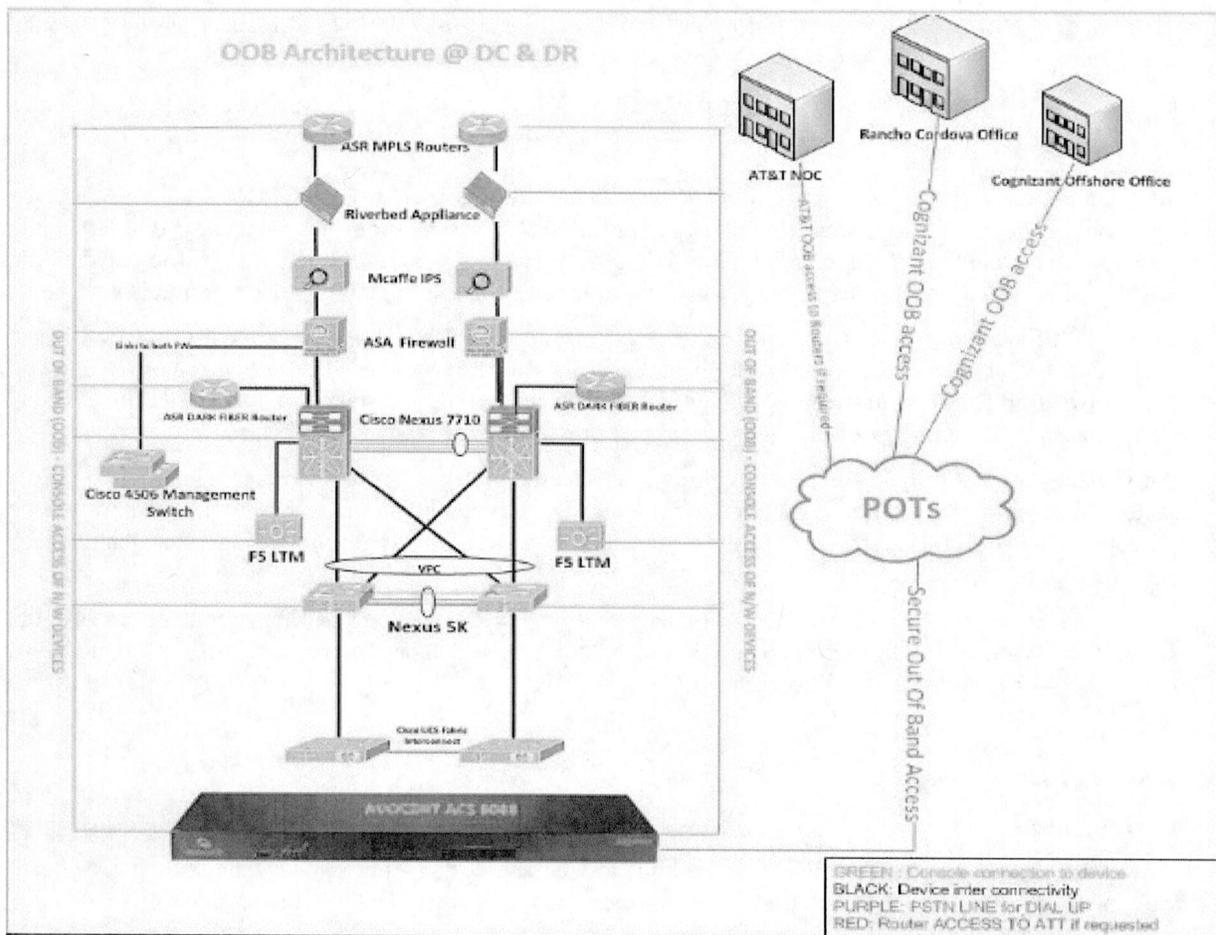

Each console server comes with built-in dial-up modems and would be connected to the POTs line and Ethernet port would be connected to the management switch (4506).

All OOB, network access will be secured by the use of Cisco ACS. Devices will be configured to forward the authentication request to ACS using TACACS+ or RADIUS protocol. Two factor authentication requirements can be achieved by service integration with Health Net's 2-factor (RSA/McAfee) systems at Boulder datacenter. Accounting logs will be sent to logging service for retention purpose. Local database authentication will be configured as the fall back mechanism to authenticate, in case the centralized Authentication servers are not reachable. Local database accounts will be created and maintained per Health Net's password security policy

Appropriate security measurement will be in place to restrict access between devices.

Centennial and Phoenix datacenters, Cognizant onsite (Rancho Cordova office) & offshore team will require POTs line and modems, as shown in the diagram through which they would be able to gain secure access to the network devices in DC & DR, in the event of the IP network failure.

If ISP requires OOB access to the Managed Routers/ASR, Avocent can be leveraged to gain access to the routers and will use an agreed approach meeting the security guide lines.

**Figure: OOB Architecture**

**INB (IN-Band)**

In Band Management solution will be built at Centennial and Phoenix datacenters, this solution would be used for both Network and Security Device MGMT interface access. The 4506 switches serves as a single point for access and administration of connected devices via management interface. These Switches will have connectivity to dedicated MGMT context to separate the MGMT traffic from other traffic.

All Inband network management access will be secured by the use of Cisco ACS. Devices will be configured to forward the authentication request to ACS using TACACS+ or RADIUS protocol. Two factor authentication requirements can be achieved by service integration with Health Net's 2-factor (RSA/McAfee) systems at Boulder datacenter. Accounting logs will be sent to logging service for retention purpose. Local database authentication will be configured as the fall back mechanism to authenticate, in case the centralized Authentication servers are not reachable. Local database accounts will be created and maintained per Health Net's password security policy

**DCI Infrastructure**

Dedicated P2P 10G redundant fiber links will be established between Centennial and Boulder DC for application and Database access for VDI functionality, over MACsec encryption for federal compliance. Redundant P2P 10G Redundant Fiber links will be established between Centennial and Phoenix DC with IPSEC VPN encryption for federal compliance. FCIP based SAN replication will utilize the DCI links. DCI environment at Centennial and Phoenix consists of dedicated Nexus 7K VDCs and ASR 1006s with 10 gig encryption throughput. Currently there is no requirement of layer 2 extension across the data centers. DCI link will traverse all the Federal and Non Federal traffic and there is no segregation considered. As this is just transit traffic there will not be any cross talk and appropriate traffic segregation will happen at the source and destination vicinity. Minimal latency is one of the main considerations for the DCI links and high throughput traffic (eg: FCIP Replication) path will not have any Firewall, IPS or Riverbed.

### **WAN Infrastructure**

WAN infrastructure will be provisioned with dual MPLS Links with different local access carriers for Secondary MPLS WAN circuits for each MPLS cloud. The local access carrier for the primary link is Century Link, followed by a Secondary Local Access Carrier.

WAN Infrastructure includes two ASR 1004s configured with device and link level redundancy. The existing MPLS will be extended to the Cognizant Datacenter at Centennial and Phoenix using two 150Mbps circuits over 1G links for Non-Federal, and 50Mbps AVPN over 1G links for Federal, and 45Mb AVPN over 1G links for Cognizant MPLS connectivity. All the MPLS AVPN links are scalable to 1g, with soft upgrades with a lead time of 2-3 weeks.

Once the Centennial DC becomes fully operational, all existing Cognizant traffic (towards Boulder) will be re-routed through Centennial DC via P2P links. Existing Cognizant MPLS links to Boulder and Rancho Cordova office will be de-commissioned in the future (as shown in the diagram). Federal MPLS cloud will be secured by extending the current GET VPN for the traffic encryption.

3VRF named Federal, Non-federal and Cognizant will be configured on the both ASR to isolate Federal and Non-Federal traffic and also keep Cognizant traffic separate, while the internal 10G link will be shared among the 3 VRF with logical separation.

Traffic isolation between Federal, Non-Federal and Cognizant will be maintained end-to-end by the logical separation of each layer. Then the WAN edge ASA firewalls and Nexus WAN edge VDC will be configured with similar 3 Contexts/VRFs and at the access layer and the logical separation will be achieved by configuring separate layer 2 VLANs for each zone. All traffic and routing (end-to-end) between the security zones (Contexts) will be denied by default until permitted by the super user.

*NOTE: Cognizant for now will assume the ownership of the ASR routers & the links and we assume Incumbent Health Net network service provider (AT&T) will own the ASR routers & links at the later stage and also will manage MPLS, Federal GET VPN, and routing schema at DC1 & DC2 WAN devices to cohesively interoperate with the remaining HN Enterprise network*

Riverbed Steelhead 7055-L is considered with redundancy for bandwidth optimization across WAN links for Remote site traffic optimization at Centennial and Phoenix DC. Steelhead will be deployed in in-line mode between the ASA 5585 and Nexus 7710. Steelhead will optimize all or any specific traffic (based on policy) between Steelhead peers placed at remote branch offices. Steelhead pair at Centennial and Phoenix DC will peer with Branch SH to optimize VDI, File and print traffic. Steelhead INPATH will be connected using 10G connections (LAN and WAN both).

McAfee IPS will be configured to provide Intrusion Prevention Service for the WAN Edge.

*NOTE: Cognizant for now will assume the ownership of the Riverbed boxes in DC1 & DC2 including 11 HN branches and we assume Incumbent Health Net network service provider (AT&T) will own the Riverbed boxes (DC1 & DC2 including 11 branches) at the later stage. Riverbed Steelhead WAAS appliances at DC1 & DC2 including 11 branches will be configured to cohesively interoperate with the remaining HN Enterprise network*

The table below has the Bill of Materials for the network components in both Centennial and Phoenix DCs:

**Network BOM for DC & DR**

<i>Device</i>	<i>DC1 Count</i>	<i>DC2 Count</i>

					Time Warner	Time Warner	SMF

*\*Note -The links will have LEC and POP diversity built into the solution as supported by the Telco. As shown in the above table, the LECs we are using are Time Warner Telecom, Integra and Level 3.*

### Latency of P2P Links

From	To	Latency
<b>Boulder DC</b>	<i>Centennial DC</i>	<i>5 m sec</i>
<b>Centennial DC</b>	<i>Phoenix DC</i>	<i>60 m sec</i>

### Network and Security component Scalability at DC1 and DC2

#### DC Switch (Access/Aggregation and Core)

Proposed Nexus 7710 has two slots for the Supervisor Engines and the remaining 8 slots for the line card modules. Only 3 x F3 line card modules are considered at this time, which provides ample scope for the future expansion. Currently one pair of Nexus 5596 pod is considered and the modular design support infrastructure scalability by introducing additional Nexus 5k pods. Nexus 7710 has 8 +1 VDC license and only 4 VDC will be consumed for ITO Phase 1 project. Nexus 2k acts as remote line card for the Nexus switches and currently one pair of nexus 2232 is considered for 1 Gig access

**Load Balancer** – The Load Balancer considered for this requirement is F5 5200v. This is a mid-range appliance from the F5 Big IP range; however is an entry range appliance for Virtual appliance purposes. 5200v is capable of 4 VCMP (virtual Appliance), however the current requirement is only for 2 (Federal and Non-Federal), with the additional 2 virtual appliances for future use. The B/w supported by 5200v is 15 Gbps.

**Riverbed WAN Optimizer** – The Riverbed Steelhead WAN optimizer chosen is 7055L, with capability of 622 Mbps of optimized b/w, scalable to 1.5Gbps. This model support software license upgrade (e.g.: 7055H) providing higher optimization throughput.

### 2.2.2.3 Network Monitoring Tools

This section describes the proposed monitoring tools solution for network service towers. The functionality benefits and reporting for this tool is described in detail in the Appendix.

- HP Network Node Manager and SPI for Datacenter network availability and performance monitoring
- Cisco Prime DCNM (Datacenter Network Management) tool for Event management, performance and capacity management
- Cisco Security Manager event management and performance monitoring
- Riverbed's Central Management Console (CMC) for availability, event management and log management
- F5 Enterprise Manager
- Cisco Prime Infrastructure and NAM 2320
- Cisco UCS manager will be used for the Datacenter management and hardware health monitoring
- Event Flow Integration with HP OMi (MOM)
- HP Service Health Reporter – report overall monitoring of HP OMi and HP NNMI

### 2.2.2.4 Service deliverables

- **Successful Reachability and Security:**
  - Testing connectivity over redundant MPLS Link at Centennial and Single MPLS Links at Phoenix for Non-federal, and Cognizant WAN
  - Testing connectivity over GET-VPN for Federal MPLS at Centennial and Phoenix DCs
  - Testing connectivity over Redundant P2P Links between Centennial-Boulder and Centennial-Phoenix encryption over all the P2P links
  - Testing Routing reachability between Centennial DC LAN and Boulder DC LAN (server Segment)
  - Testing Routing reachability between Centennial DC LAN and Remote Location LAN
  - Testing Logical Separation of Federal and Non-Federal traffic on the DC firewall.
  - Testing firewall filters at the Centennial DC, to permit legitimate traffic in and out of Centennial DC over P2P and MPLS Links
  - Testing WAN traffic optimization between Centennial DC and Remote locations with Riverbed Appliance, for VDI and File/Print traffic
  - Health Net Info Sec team to validate the hardening of network and security equipment implemented at Centennial and Phoenix DCs

### 2.2.2.5 Steady state support – Deliverables

The key highlights of the proposed solution for network service towers are described below:

#### **In Scope Services**

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>• A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>• 24X7 Onshore support                             <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net Offices</li> <li>• Offshore – Bangalore ; Coimbatore</li> </ul>

The high level activities for network services are mentioned below:

**Level 1 Services**

*L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:*

<b>L1 Team</b>	• Basic incident management - incident logging and tracking
	• Monitoring link UP and DOWN times
	• Monitoring routers and switches for CPU and memory utilization
	• Monitoring - performance and capacity of network devices
	• Monitoring bandwidth utilization
	• LAN/TCP/IP configuration
	• Pre designed Link re-routing
	• Performing health check as per defined procedure
	• Vendor management

**Level 2 Services**

*L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:*

- *Incident Management Services*
- *Change Management Services*

<b>L2 Team</b>	• Configuration management and change control
	• Performance and availability management
	• Working with service providers to implement new or upgraded data network
	• Managing router tables and IP addresses
	• Network device configuration
	• Perform hardware diagnostics
	• Implement firmware and software upgrades and patch installation and management

	• Problem management and troubleshooting
	• Handling escalated routing issues and routing changes
	• Performing network integration tests
	• Bandwidth management
	• IMAC of Network devices

### Level 3 Services

All unknown / new errors and problems will be resolved by L3 Network Support group. This team will work with Vendors when required.

<i>L3 Team</i>	• <i>Performing operational planning for capacity and performance purposes</i>
	• <i>Conducting feasibility studies for implementation of new technologies</i>
	• <i>Performing project management and project estimation</i>
	• <i>Reviewing efficiency and effectiveness of problem control process</i>
	• <i>Network design and architecture</i>
	• <i>Root Cause Analysis</i>

#### 2.2.2.6 Dependency on Health Net

- Details of IP schema information used across Health Net (Boulder DC, branches, etc.)
- New IP Schema requirement for Centennial and Phoenix DCs, and VDI IP range from Health Net existing Private IP Schema pool, and required configurations on Existing DHCP / IP management Server in Boulder DC
- Understanding of Health Net naming conventions, VLAN tag's, etc., to retain the same in new DC and DR.
- Detail understanding of existing Health Net routing architecture (LAN/WAN) at Boulder DC and Remote Locations
- Detail understanding of health Net Firewall and IPS policies to design the Centennial and Phoenix DC inline to Health Net Security standards
- DCI 10 Gig link termination and Service integration at Boulder
- Routing configuration on P2P 10G links at Boulder DC side to ensure successful routes are configured for servers / applications to be reachable from Centennial DC and vice-versa
- Implementation and Integration of Health Net MPLS circuits on Centennial and Phoenix DC Routers to be performed by Health Net/ATT
- Configuration of GETVPN on federal MPLS circuits on Centennial and Phoenix Routers to be performed by Health Net/ATT
- Health Net will extend their current services for NTP,IPAM and external DNS
- Health Net SoC to provide local SIEM log connector at the proposed Cognizant Data Center to conserve the bandwidth consumption

- Incumbent Health Net network service provider, AT&T, must configure MPLS, Federal GET VPN, and routing schema at DC1 and DC2 WAN devices to seamlessly interoperate with remainder of Health Net Enterprise network
- Understanding of existing Riverbed Architecture and remote site Riverbed Details
- Understanding of Remote Site Network Infrastructure to integrate new Riverbed Steelhead appliance
- Availability of IP Address range, VLAN, Rack space, switch ports, etc. at each site for Riverbed implementation and integration
- Configuration and Integration at Remote side existing riverbed appliance for peering with New DC/DR Riverbed steelhead appliance
- Configuration and Integration of Riverbed appliances at target DC1 and DC2 including all remote sites' existing and new to cohesively interoperate with the rest of Health Net's Enterprise network
- Firewall configuration on Boulder DC (perimeter and Core) to allow access to / from Centennial DC for application access, Network Services Access, and necessary access for Application, Infrastructure at Centennial DC to reach Boulder DC Server Farm. Access policies to be provided by Health Net team
- Firewall Configuration at Boulder DC (perimeter and Core) to allow Centennial / Phoenix DC firewall and IPS logs to be sent to Health Net Log collector in Boulder DC and also to the SOC at San Diego using existing IPSEC VPN tunnel over internet from Boulder DC
- Copy of the requirements document for information security compliance, to complete the hardening of network and security equipment for Health Net information security team approvals.
- Availability of Health Net SMEs to understand the details of the existing network and security setup in Health Net hosted DC at Boulder

Availability of Health Net SMEs to understand the details of required security policies at proposed Centennial and Phoenix DCs

#### 2.2.2.7 Risk and Mitigations

S. No	Risk Description	Probability	Impact	Mitigation Strategy
1	Access and support from key SME's from incumbent during implementation	High	Medium	Involve Health Net to facilitate and govern the implementation requiring integration with the Boulder DC
2	Based on discussions with Health Net team, task such as, GET VPN configuration at Centennial and Phoenix DC on Federal MPLS Links, IPSEC VPN configuration at Boulder DC on P2P Link, and are considered as project by IBM	High	High	Health Net to govern the incumbent to expedite planning and execution of said activities to establish routable and secure connectivity between the two Datacenters. Cognizant will provide these requirements in advance.

S No	Risk Description	Probability	Impact	Mitigation Strategy
	and lead time to execute could be between 1 to 3 months.			
3	Change management at Boulder firewall, DHCP, DNS, VLAN, IP schema, may cause delay of 3-5 days	High	High	Health Net to govern the incumbent for expedite change management especially during go-live time, to avoid delays in go-live schedule. Cognizant will provide detailed list of firewall ports to be opened, and other service requirements in advance for change management activities at Boulder, however this is subject to Cognizant's limited knowledge and understanding of the Boulder DC Setup. Requires expedited change management at Boulder DC for Centennial/ Phoenix integration.
4	Understanding of existing Boulder Datacenter firewall rules, load balancers policies, VLAN L2/L3, routing details, for specific environments being accessed from Centennial	High	High	Engage with Health Net SMEs to understand the details of existing DC networks and security that will be integrated with the new DCs
5	WAN Link commissioning timelines at Centennial / Phoenix DC for P2P, and MPLS circuits	High	High	Early initiation of link ordering and alignment of project plan in line with link availability. High level of dependencies across all WAN links.

### 2.2.3 Storage and Backup

#### 2.2.3.1 Highlights of Scope Validation Workshop

This table below highlights the scope outlined after the scope validation workshop:

Description	Pre Scope Validation Workshop	Post Scope Validation Workshop
<b>The number of ports on the VSP</b>	<ul style="list-style-type: none"> <li>There were 64 ports that were initially configured on the VSP</li> </ul>	<ul style="list-style-type: none"> <li>Now there would be an initial configuration of 32 ports on the VSP with 16 ports wired for use</li> </ul>
<b>The HDS HNAS model</b>	<ul style="list-style-type: none"> <li>HDS HNAS 3080 will be used</li> </ul>	<ul style="list-style-type: none"> <li>Now HNAS 4080 will be used in the Centennial DC and HNAS 4060 will be used in the Phoenix DC</li> </ul>
<b>Replication between Centennial</b>	<ul style="list-style-type: none"> <li>HDS HUR to be used for the storage level replication</li> </ul>	<ul style="list-style-type: none"> <li>HDS HUR will be available solution. There can be storage level replication from the VSP. Also,</li> </ul>

Description	Pre Scope Validation Workshop	Post Scope Validation Workshop
<b>and Phoenix DC</b>	between the VSP from Centennial and Phoenix DCs	replication would be from HNAS and the replication will be enabled at later phase
<b>Tape slots in the Spectra Logic Tape Library</b>	<ul style="list-style-type: none"> <li>In the Spectra Logic Tape library it was 1810 tape slots in the Centennial and 380 tape slots in Phoenix DC</li> </ul>	<ul style="list-style-type: none"> <li>In the Spectra Logic tape library there will be 700 tape slots in the Centennial DC and 100 tape slots in the Phoenix DC</li> </ul>

### 2.2.3.2 Solution Approach

- Design and Build Approach
  - Designing the target environment
  - Installation of infrastructure in the Datacenter
  - Dedicated VLAN for backup traffic
  - LAN Free (SAN-based) backups to be used for servers exceeding a defined storage capacity threshold > 600GB
  - Build infrastructure for Storage ( VSP , HNAS , Sepaton) and Backup
    - Logical separation and restricted Access for Federal data
    - Scalable and redundant Storage Area Network (SAN)
    - Multipath load balancing
    - Support port aggregation of inter-switch links
  - VSP Storage for all tiers of SAN storage, Thin Provisioning, Automatic Tiering
  - 262 TB usable capacity in the primary Datacenter and about 55 TB usable capacity in secondary Datacenter
  - Out of the 262 TB we will use 188.7 TB for VDI in primary DC
  - Out of the 52 TB we will use about 12.6 TB for VDI in DR DC
  - Storage model – HDS VSP and HNAS (to increase VDI capability)
    - HNAS will use EVS (Enterprise Virtual Servers) to separate Federal and Non-Federal data
  - Installation of management tool for managing Storage and Backup environment
  - Manage the Storage and Backup environments in the Centennial and Phoenix DCs.

### Storage and Backup

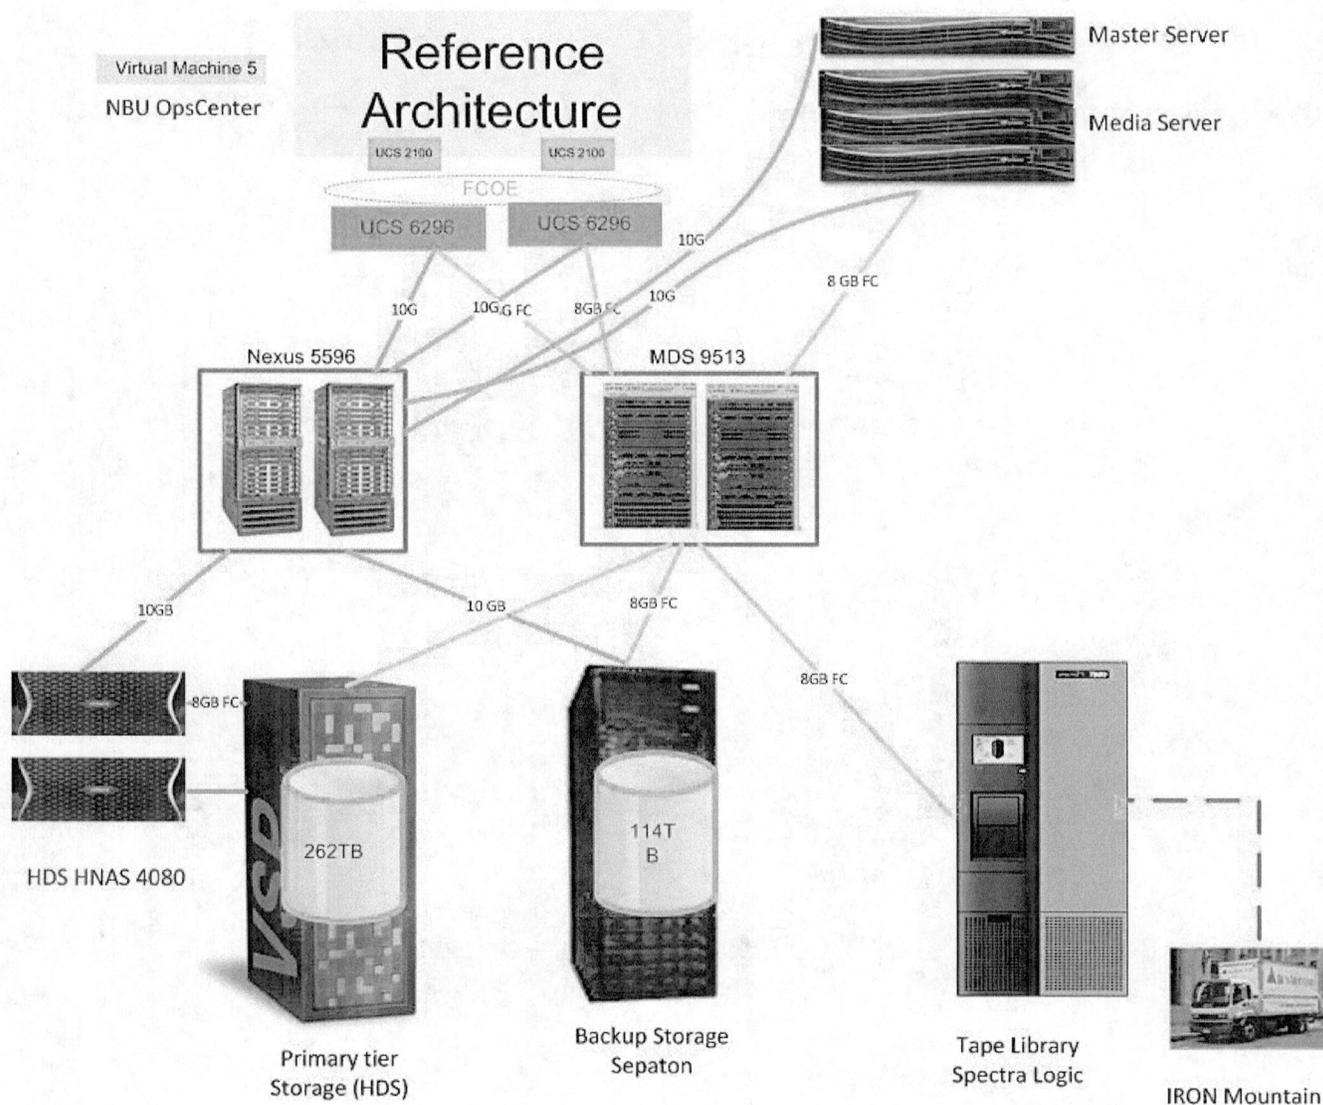

- Design and Build Approach
  - Dedicated Backup VLAN
- Designing the target environment
- Creating implementation Plan
- Procurement of required infrastructure

- Installation of infrastructure in our DC
- Build infrastructure for Storage and Backup
  - Build different pools support Federal and Non-Federal separation
- Encryption will be enabled for data at rest
- Installation of management tools for managing Storage and Backup environment
- Manage the Storage and Backup environments in the Centennial and Phoenix DCs.

### **Backup and VSP Storage Architecture**

#### **Primary Data Center (DC1) - Centennial**

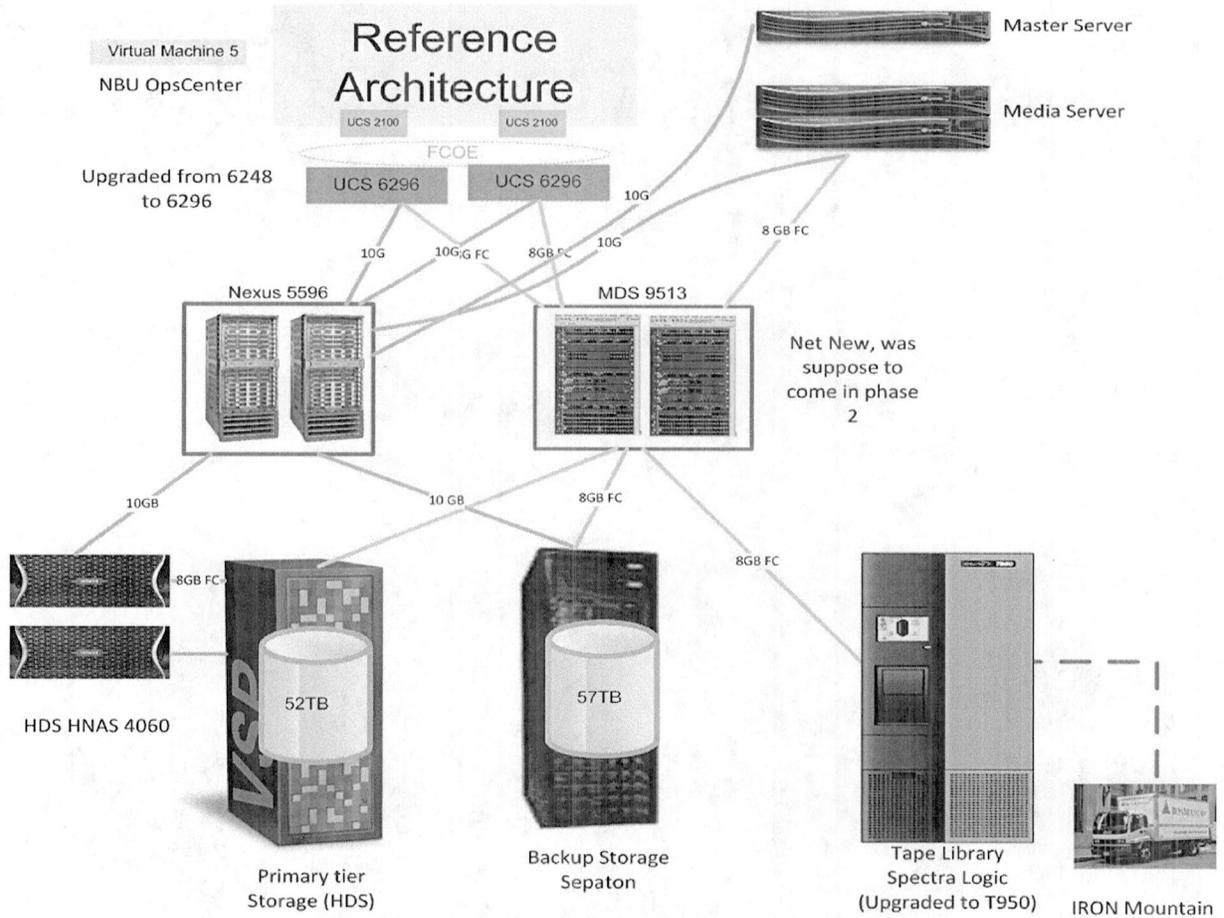

The diagram below depicts the High Level Storage and Backup architecture at DC1

**Figure: Storage and Backup architecture at DC1**

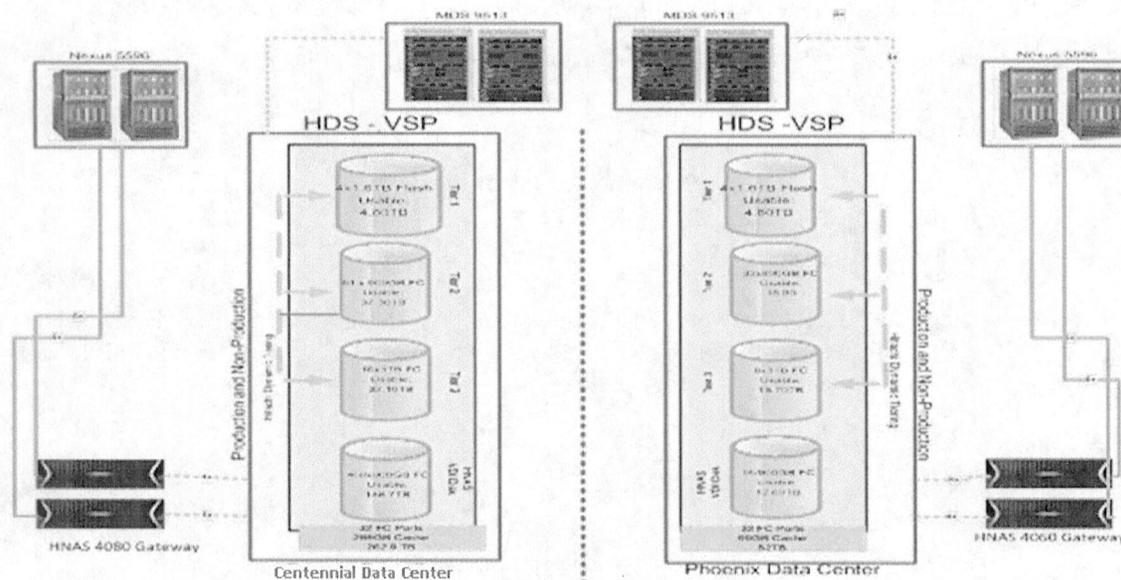

**Phoenix DC**

The diagram below depicts the High Level Storage and Backup architecture at DC2

**Figure: Storage and Backup architecture at DC2**

VSP Architecture

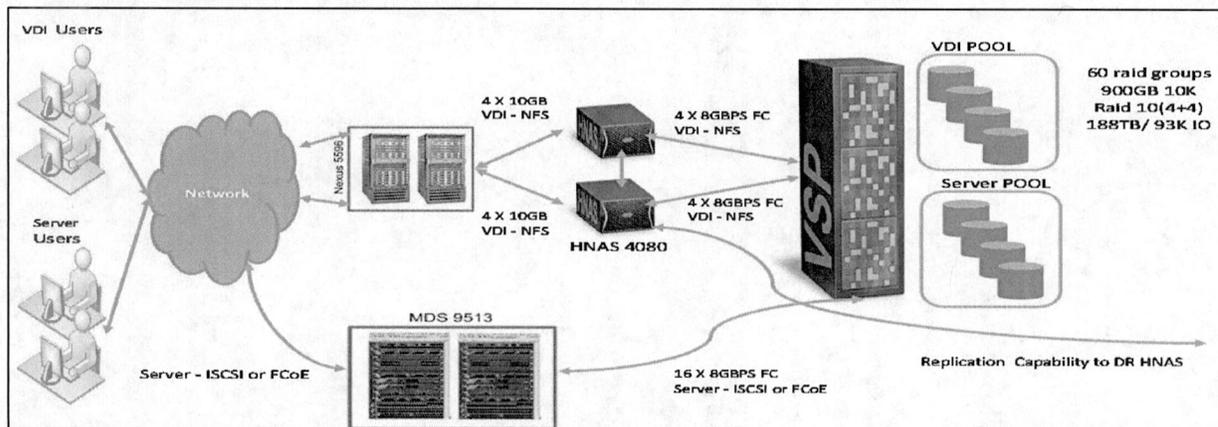

**Figure: VSP architecture in DC1 and DC2**

Storage Overview - Primary DC

The diagram below details the Connectivity overview of VSP, HNAS

- Each HNAS 4080 node will have 4 direct fiber channel connections (FC-AL) to the VSP
- Each HNAS 4080 node will have 4 10G LAN connection to the 5596
- The VDI traffic will use NFS
- The server traffic will use ISCSI or FCOE. Currently it will support both, during the LLD (low level design) we will determine the method

**Figure: VSP, HNAS connectivity**

Summary of Storage VSP Build

- The LUN details that would be configured in both DC and DR for storage
  - At initial install, the HDS team will create a single HDP pool for all Non-HNAS LUN
    - Once the Pools are created, HDS will work the Cognizant team to pre-determine the V-Volume size
  - HNAS devices will be presented raw 2.6 TB LUNS from the VSP
  - Configured VSP Storage for Federal, Non-Federal and VDI
  - Configured general capacity 80 TB
  - Configured HNAS capacity 160 TB+
    - Separate Federal and Non-Federal pools with EVS (Enterprise Virtual Servers), which is Hitachi multi-tenant feature that allows own file systems and separate disk on the storage arrays
  - HNAS capacity for VDI Infrastructure
  - 188 TB 900GB 10K Raid 10(4+4)
  - General Pool capacity
  - Tier1 – 4.8 TB FMD 1.6 TB RAID5 (3D+1P)
  - Tier2 – 37.7TB SAS 900GBx10k RAID6 (6D+2P)
  - Tier3 – 32.1TB 3TB NL-SAS RAID6 (6D+2P)
  - BOS License configured - 230TB+(Unlimited)

### Storage Tiering Details for DC1

Storage Model-VSP				YI configuration					
Tier 1	Disk Type	RA ID	RAID Type	Usable (TB) Ask	Tier (%)	RAID Groups Required	Usable (TB) Configured	Disks	HS
<b>Disk Tier1</b>	1.6 TB Flash module Drive	5	3D+1P	74.60	6.43%	1	4.80	4	1
<b>Disk Tier2</b>	900GB 10K rpm SAS 2.5” Drive	6	6D+2P		50.54 %	8	37.70	64	2
<b>Disk Tier 3</b>	3TB 7.2Krpm NL-SAS 3.5” Drive	6	6D+2P		43.03 %	2	32.10	16	2
<b>HNAS VDI Disk</b>	900GB 10K rpm SAS 2.5” Drive	1	2D+2 D	188.7	N/A	60	188.7	480	8
					<b>Total</b>	71	263.30	564	13

The Raid and Pool Configurations: Primary pool will be single HDT pool containing all of the 1.6TB FMD, 900GB HDD and the 3TB HDD. The underlying devices will be configured with Raid 5 for the

FMD's and Raid 6 for all other devices.

**VSP Encryption** – the VSP storage system uses the Encryption License key feature to set up the data encryption license keys to encrypt and decrypt data. We will use encryption license key feature to backup data encryption license keys. The VSP storage system automatically creates a primary backup of the data encryption license key, and stores this backup on each MP package. Cognizant will create Secondary backup data encryption license key to restore the key if the primary backup is unavailable. The lists below are the VSP encryption details:

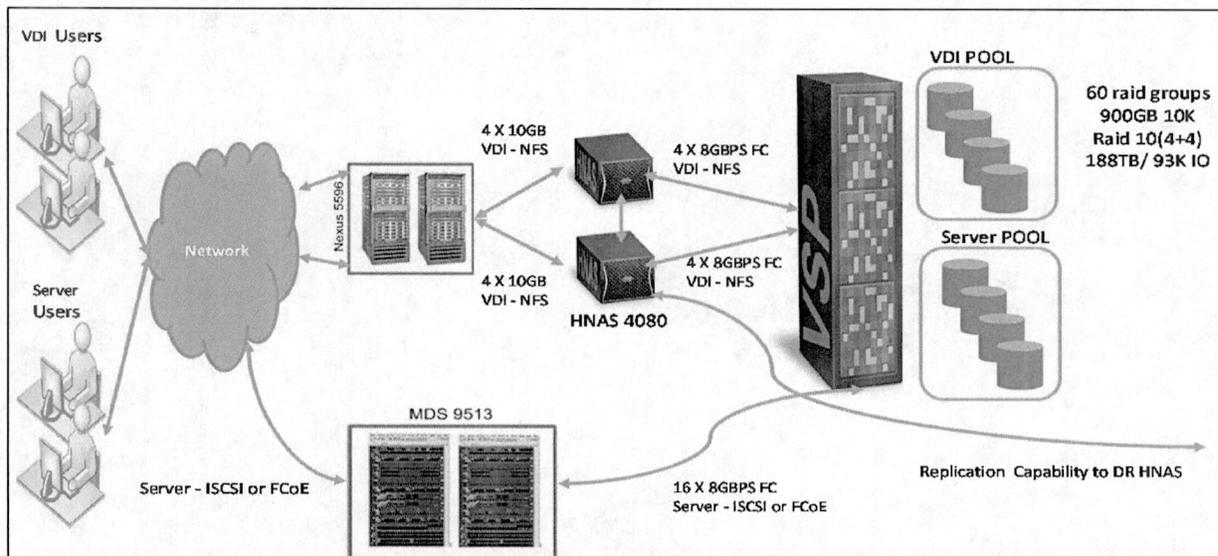

- Encryption algorithm – Advanced Encryption standard (AES) 256 bit.
- Encryption mode – XTS mode
- Creating data encryption license keys – Use Storage Navigator (SN) to create the data encryption license key
- Deleting data encryption license key – Use SN to delete data encryption license keys
- Scope of encryption license keys – 32 data encryption license keys per storage system
- Unit of encryption/decryption – Parity group

*Note: For more details please refer to the PDF: <http://www.hds.com/assets/pdf/vsp-hitachi-encryption-license-key-user-guide.pdf>*

## Storage Overview - Secondary DC

The diagram below details the Connectivity overview of VSP, HNAS

- Each HNAS 4060 node will have 4 direct fiber channel connections (FC-AL) to the VSP
- The VDI traffic will use NFS
- The server traffic will use ISCSI or FCOE. Currently it will support both but during the LLD (low level design) will determine the method.

**Figure: Connectivity Overview**

### Summary of VSP Build

- LUN details that would be configured in both DCs and DR for storage
  - At initial install, the HDS team will create a single HDP pool for all Non-HNAS LUN
    - Once the Pools are created, HDS will ask the Cognizant team to pre-determine the V-Volume size
  - HNAS devices will be presented raw 2.6TB LUNS from the VSP
  - Configured VSP Storage for Federal, Non-federal and VDI
  - Configured General Capacity 39.40TB
  - Configured HNAS Capacity 12.6TB
    - Separate Federal and Non-federal pools with EVS (Enterprise Virtual Servers), which is Hitachi multi-tenant feature that allows own file systems and separate disk on the storage arrays
  - HNAS Capacity for VDI Infrastructure
  - 12.6TB 900GB 10K Raid 10(4+4)
  - General pool capacity
  - Tier1 – 4.80TB FMD 1.6TB RAID5 (3D+1P)
  - Tier2 – 18.9TB SAS 900GBx10k RAID6(6D+2P)
  - Tier3 – 15.70TB 3TB NL-SAS RAID6(6D+2P)
  - BOS license configured - 60TB

### Storage Tiering Details for DC2

Storage Model-VSP				Y1 configuration					
Tier 1	Disk Type	RAID	RAID Type	Usable (TB) Ask	Tier (%)	RAID Groups Required	Usable (TB) Configured	Disks	HS
<b>Disk Tier1</b>	1.6 TB Flash module Drive	5	3D+1P	39.40	12%	1	4.80	4	1
<b>Disk Tier2</b>	900GB 10K rpm SAS 2.5" Drive	6	6D+2P		48%	4	18.90	32	1
<b>Disk Tier 3</b>	3TB 7.2Krpm NL-SAS 3.5" Drive	6	6D+2P		40%	1	15.70	8	2
<b>HNAS</b>	900GB 10K	1	4D+4D	12.6	N/A	4	12.60	16	1

Storage Model-VSP				Y1 configuration				
<b>VDI Disk</b>	rpm SAS 2.5" Drive							
				Total	10	52.00	60	5

Raid and pool configurations: Primary pool will be single HDT pool containing all of the 1.6TB FMD, 900GB HDD and the 3TB HDD. The underlying devices will be configured with Raid 5 for the FMD's and Raid 6 for all other devices.

**VSP Encryption** – the VSP storage system uses the Encryption License key feature to set up the data encryption license keys to encrypt and decrypt data. We will use encryption license key feature to backup data encryption license keys. The VSP storage system automatically creates a primary backup of the data encryption license key, and stores this backup on each MP package. Cognizant will create Secondary backup data encryption license key to restore the key if the primary backup is unavailable. The lists below are the VSP encryption details:

- Encryption algorithm – Advanced Encryption standard (AES) 256 bit.
- Encryption mode – XTS mode
- Creating data encryption license keys – Use Storage Navigator (SN) to create the data encryption license key
- Deleting data encryption license key – Use SN to delete data encryption license keys
- Scope of encryption license keys – 32 data encryption license keys per storage system
- Unit of encryption/decryption – Parity group

*Note: For more details please refer to the PDF <http://www.hds.com/assets/pdf/vsp-hitachi-encryption-license-key-user-guide.pdf>*

### Hitachi management tools

Cognizant uses the native capabilities of the device, vendor provided element managers and call home systems to manage and support the Storage environment. Some of these tools require servers to be installed with the equipment. Some of the base management elements include:

- **Hitachi command suite:** Simplify management to streamline application availability, performance and access to critical data. Unify management across all Hitachi storage systems and data types. It is comprised of the following integrated Hitachi software:
  - **Device Manager:** Manages one or many Hitachi storage systems from a single console. Increases productivity with consolidated views of physical, logical, host, and virtual server. Aligns storage assets, pools and provisioning with business applications and entities using logical views.
  - **Tuning Manager:** Applies intelligent, path-aware monitoring, analysis and reporting from application to storage devices. Identify, isolate and diagnose storage performance bottlenecks. Uses predictive capacity planning, proactive monitoring, integrated alerts and historical trending.
  - **Command Director:** Monitor, analyze and meet application-specific service level objectives by capacity, performance and tier. Improve capacity utilization and planning by monitoring

key metrics. Manage across block, file and unified Hitachi storage.

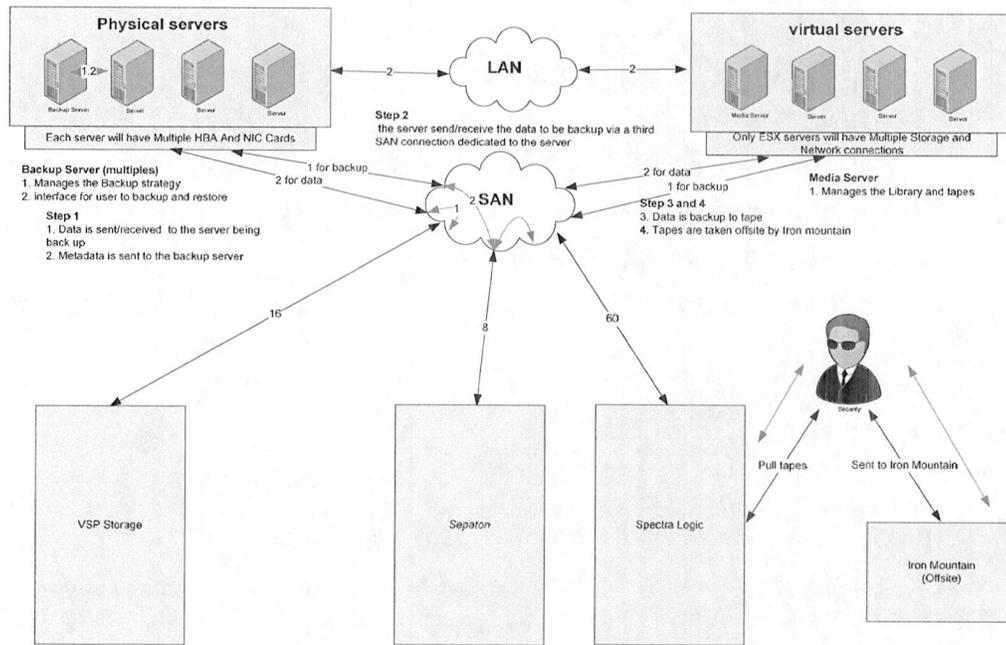

- **Tiered Storage Manager:** Lower costs by moving infrequently accessed and less demanding applications' data to economical storage tiers. Improve performance by moving I/O intensive data to higher performing storage tiers.
- **Dynamic provisioning:** The thin provisioning software that provides virtual storage capacity. Adds physical storage non-disruptively by allowing it to draw from a central pool when an application requires additional capacity rather than add physical disks. Improves storage performance and cuts time to provision new storage

**Backup environment**

The backup environment (NetBackup) would be built in the Cognizant DC adhering to Health Net's backup policy guidelines. There will be no migration of backup data from the existing Boulder DC.

There will be a logical separation between Federal and Non-federal at the EVS (Electronic vaulting service) level.

**Backup data flow diagram**

**Figure: Backup Data Flow Diagram**

**Backup Software**

Cognizant would implement Symantec NetBackup as the datacenter backup and recovery technology. Symantec NetBackup 7.5 provides a comprehensive yet integrated approach to protecting data for next generation data centers.

### **Backup to Tape**

The disk-to-disk-to-tape (D2D2T) combination allows backup administrators to have the following: keeping off-site backups in Iron Mountain location, while retaining fresh backups on disk for ultrafast restores. The D2D2T model uses a two-tiered architecture that can effectively handle both near-line and archival data. Dual-stage disks and automated tape backup effectively address the data protection gaps and performance limitations that result when either technology is used individually, enhancing a Health Net's existing tape backup process. All the backups to tape and disk will be encrypted.

*Note: Health net will own the Iron Mountain relationship.*

### **NDMP Backup**

Symantec NetBackup for NDMP helps provide reliable, high-performing backup and recovery services for NDMP enabled Network Attached Storage (NAS). To streamline operations, NetBackup for NDMP extends its advanced media management and virtually unlimited scalability via the Network Data Management Protocol (NDMP).

NDMP facilitates communication between Symantec NetBackup for NDMP and a NDMP server application to initiate backup and restore tasks. This communication integrates the protection of NAS into a consolidated, Datacenter- strength backup solution.

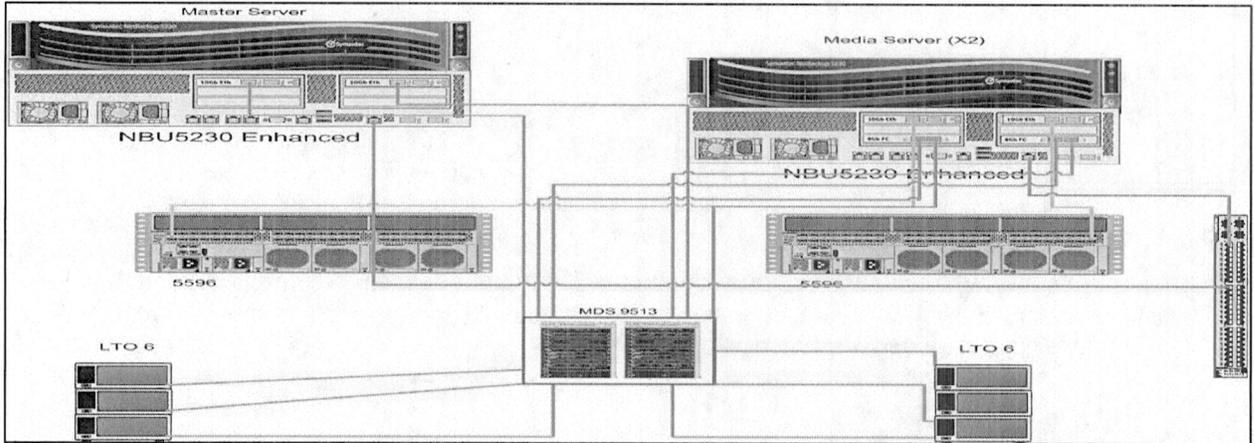

### **Backup policy**

- Production Systems
  - Daily (incremental) - 4 weeks
  - Weekly (full / synthetic full) - 2 months
  - Monthly (full / synthetic full) - 7 years
- Non-Production Systems (DEV / QA / UAT / STG)
  - Daily (incremental) - 4 weeks
  - Weekly (full /synthetic full) - 2 months
  - Monthly – None
- Backup methods
  - LAN Free (SAN-based) backup to be used for servers exceeding a defined storage capacity threshold of >600GB
  - Dedicated VLAN for network based backups

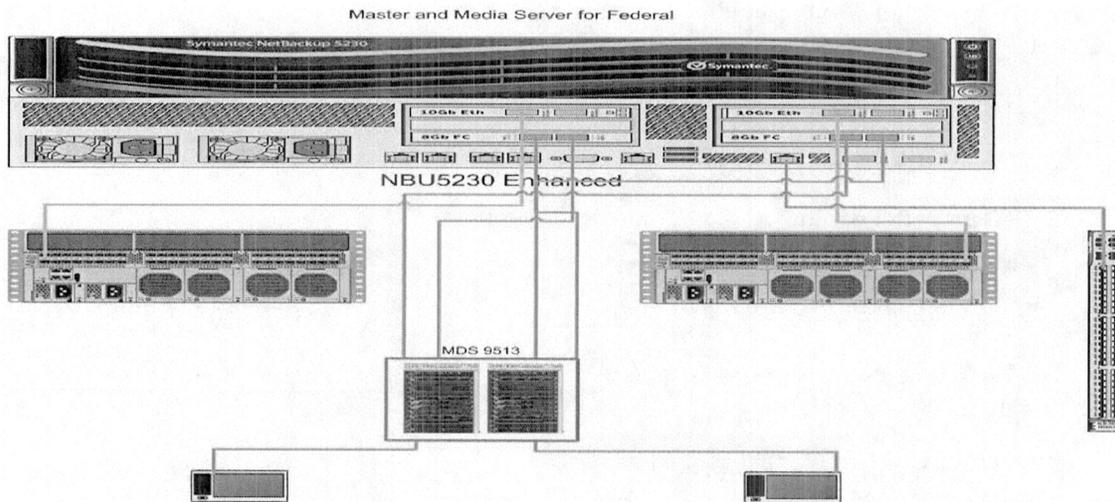

### **Backup Overview - Primary DC**

The backup solution will be supporting Multi-Master server architecture to support several capabilities. First, we will need two different Master servers in DC1; this is to support splitting backup data to either a Federal Master server or a Non- Federal Master server. The Non-Federal architecture will have a Master server and two physical media servers (see below) and the Federal Master server will act as both Master server and media server. A similar architecture will be in DC2 but at a smaller scale. Secondly, this

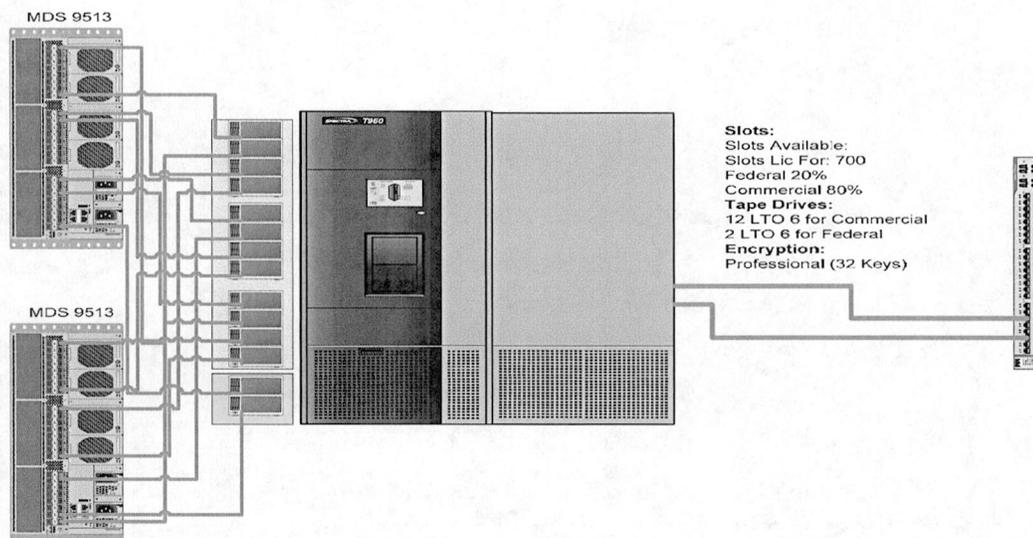

architecture prepares (future capability) Cognizant to implement A.I.R (auto image replication) with the Sepaton device, which allows DC1 Sepaton to replicate to DC2 Sepaton . For now, the design will have the data moved from source via dedicated backup VLAN or LAN-Free to the Sepaton device where it utilize tools like de-duplication and compression. Once it has arrived in the Sepaton the data will be laid out in a pre-defined structure (LLD – low level design phase). After the data meets pre-defined qualification (LLD – Low level design phase) the data then will be moved to the Spectra logic to either a Federal pool or Non-Federal pool. Lastly, in the Spectra Logic device will have pre-defined qualification (during LLD) to move the tape to a remote location using Iron Mountain.

**Figure: Backup Server Architecture and Connectivity – Commercial**

**Figure: Backup Server Architecture and Connectivity - Federal**

**Figure: Spectra Logic architecture and connectivity details for Federal and Commercial**

- **Slots**
  - 700 Slots that are licensed
  - Federal is 20% and Non-federal is 80%
- **Tape Drives**
  - 12 LTO-6 Tape drives for Non-Federal
  - 2 LTO-6 Tape drives for Federal

- **Encryption**

Spectra logic will be using Spectra BlueScale encryption key management. Spectra Logic BlueScale encryption key management provides an easy-to-use interface that lets Cognizant to quickly implement Spectra Logic encryption. The key is automatically handled in multiple software layers, as well, so it is not apparent to the end user. LTO tape drives use AES-256 bit encryption keys generated within BlueScale to encrypt data. This data cannot be read until it is decrypted, which requires the use of the same key that was used during data encryption. This kind of encryption requires creation, tracking and protection of the encryption keys. The life cycle of a BlueScale encryption key includes the following stages:

- Encryption User Definition
- Key Creation/Deletion
- Key Escrow
- Key Use in Data Encryption/Decryption

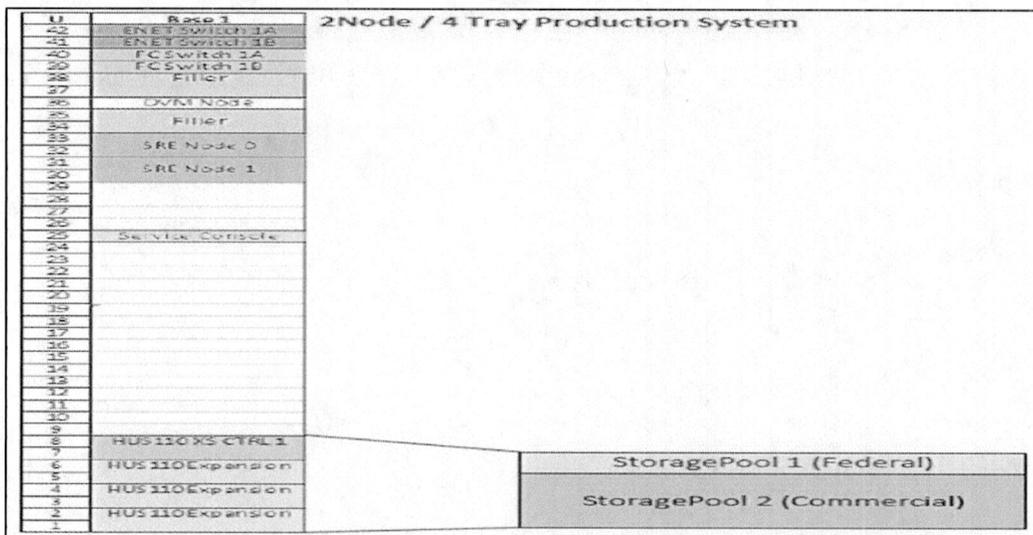

The following encryption type will be used:

- o Professional (32 keys)

*Note: See the following link for more details on Spectra logic encryption:*

*( <https://www.spectrallogic.com/index.cfm?fuseaction=home.displayFile&DocID=1902> )*

- **Ports**
  - o 14 FC ports are required for Spectra logic
  - o 2 Ethernet ports are required for management and camera
  
- **Power**
  - o 2 L6/20 outlets power connections are required for Spectra Logic

**Figure: Sepaton architecture and connectivity details for Federal and Commercial**

**Features and Benefits:**

- The world's fastest enterprise backup and recovery solution
- The Sepaton backs up data at an industry-leading ingest rate of up to 80 TB per hour, regardless of data type, data change rate or system capacity
- The Sepaton's patented Content Aware™ de-duplication technology delivers the fastest time to safety and most efficient capacity reduction of any solution available today
- The only data protection solution that can effectively de-duplicate separate parallel backup streams (multi stream) and across multiplexed data volumes, as required for large database environments such as Oracle, DB2 and SQL

- Delta Scale™ architecture makes it easy to increase storage capacity and maintain performance as your needs grow
- Enables fast and secure replication and transmission of massive backup volumes to remote disaster recovery sites over a wide area network. Replication is performed automatically
- Byte differential Content Aware™ de-duplication reclaims storage space continuously as it operates, freeing capacity sooner and saving administration time
- Symantec NetBackup OST features such as Auto Image Replication (A.I.R.), Optimized Synthetic Backups, GRT and Symantec NetBackup Accelerator, which we have purchased the licenses but it will be implemented in later projects
- Delta Scale™ architecture's secure multi-tenancy capability allows data managers to allocate performance, capacity bandwidth and quality of service as needed by their enterprise's various segments, departments and business units
- Encrypts data at rest while maintaining its blazing fast time to safety and industry-leading backup performance (Sepaton S2100-ES3's encryption of data at rest capability integrates with industry standard interoperability protocols for encryption key managers (EKM) that are compliant with industry-standards)

#### **Sepaton Management tools**

- VPN access / WebEx access
- SFTP access from the S2100 to the Sepaton support infrastructure
- Automation of daily SFTP uploads of the S2100 support ticket
- Delta View portal provides
  - Case management, Capacity planning
  - Backup reporting analytics
- Email configuration
  - Email Notification for Alerting
  - Email Distribution for DeltaStor Reporting

#### **2 – SRE Nodes**

We would be creating 2 - S2100 Storage pools to breakout Federal and Non-Federal. 4 trays of HUS110

- 1 Controller tray            27TBs Usable – 9/2/1 hot spare
- 1 Jbod                            30TBs usable – 10/2
- 1 Jbod                            27TBs usable – 9/2/1 hot spare
- 1 Jbod                            30TBs usable – 10/2

#### **Storage Pool Breakout**

The smallest storage pool can be 1 LUN = 1 tray

- 1 tray allocated for Federal
- 3 trays allocated for Non-Federal

### **Septon Encryption**

- Hardware-accelerated compression and encryption
- Leverages high-performance HiFn DX 1845 to do compression and encryption in unified pipeline
- Massive bandwidth provides compression and encryption throughput for 2 x 8Gbps Fibre Channel ports ingesting data with 100% change rate per SRE node
- Key management is external to VTL using an OASIS KMIP-compatible key manager (or the HP proprietary Enterprise Key Manger or the SafeNet Enterprise Key Manager which are both supported by our architectural approach)
- Communication with the Key Manager is via the CryptSoft KMIP SDK
- Provides linear scalability as SRE nodes are added to the system
- Performs predictably - no CPU performance impact on ingest or de-duplication processing
- All customer data is encrypted before landing on disk
- Encryption keys never stored on disk

### **Septon Key Management**

**Key Management Availability:** The VTL only needs to access the key manager at startup. The key is cached in memory (not on disk) while the VTL is running. At boot time the system interrogates the list of key managers (up to nine of them) to get the key. If no key manager responds, the system goes into maintenance mode. You can safely take key managers down for system maintenance once the Septon system has retrieved the key.

For security reasons, the VTL never stores the key on disk. It always checks for a key on reboot so that IT can revoke the key (or more commonly) disable the key manager in the event of a data center-wide security intrusion. If this were to happen, shut down the key manager and reboot the VTL to prevent access to live data on the VTL.

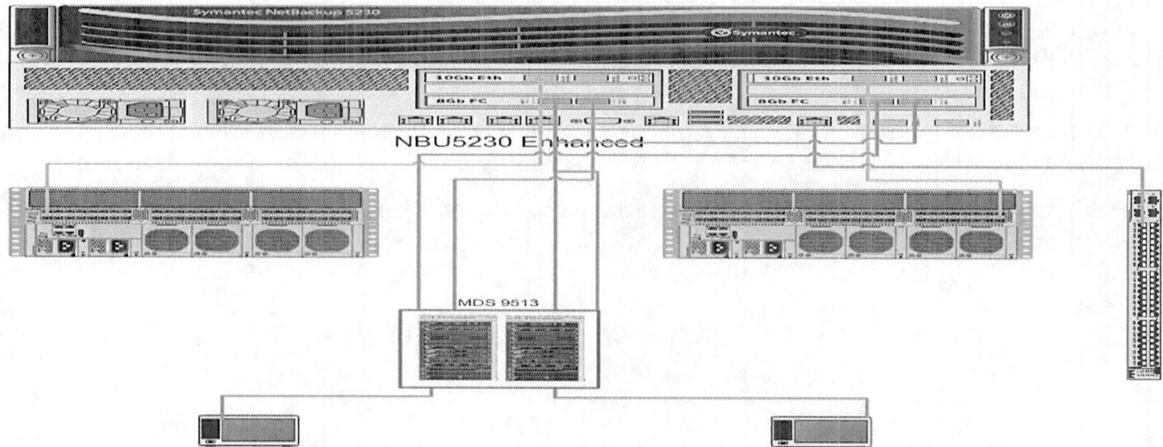

### **Backup Overview - Secondary DC**

The backup solution will be supporting multi-Master server architecture to support several capabilities. First, we will need two different Master servers in DC2; this is to support splitting backup data to either a Federal Master server or a Non-Federal Master server. The Non-Federal architecture will have a Master server and one physical media servers (see below) and the Federal Master server will act as both Master server and media server. A similar architecture will be in DC1 but at a larger scale. Secondly, this architecture prepares (future capability) Cognizant to implement A.I.R (auto image replication) with the Septon device, which allows DC1 Septon to replicate to DC2 Septon . For now, the design will have the data moved from source via dedicated Backup VLAN or LAN-Free to the Septon device where it utilize tools like de-duplication and compression. Once it has arrived in the Septon the data will be laid out in a pre-defined structure (LLD – low level design phase). After the data meets pre-defined qualification (LLD – Low level design phase) the data then will be moved to the Spectra logic to either a

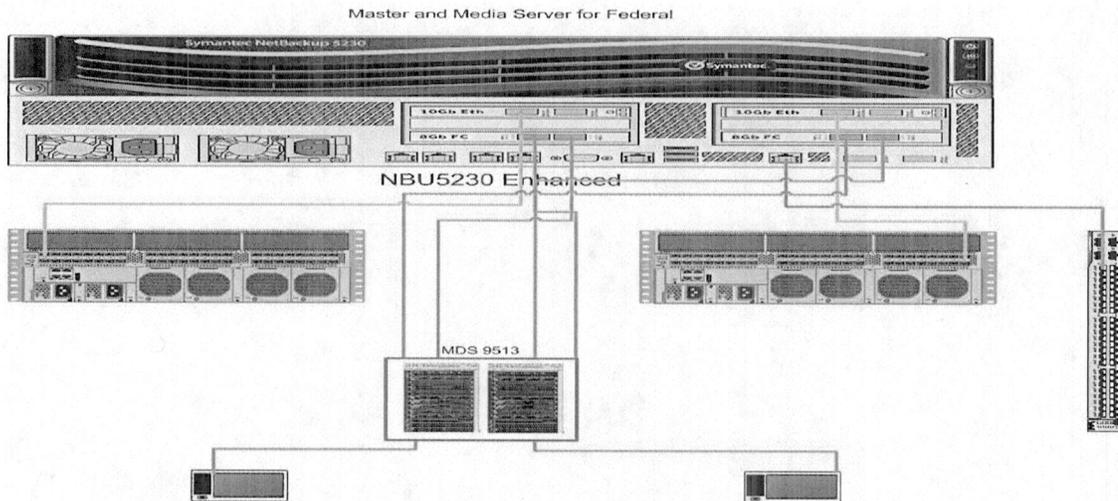

Federal pool or Non-Federal pool. Lastly, in the Spectra Logic device will have pre-defined qualification (during LLD) to move the tape to a remote location using Iron Mountain.

For future growth needs, we have adjusted the Phoenix Data Center Tape library from Spectra logic T380 to a Spectral logic T950. This will give us the ability to expand the tape environment with more tape slots and tape drives as needed.

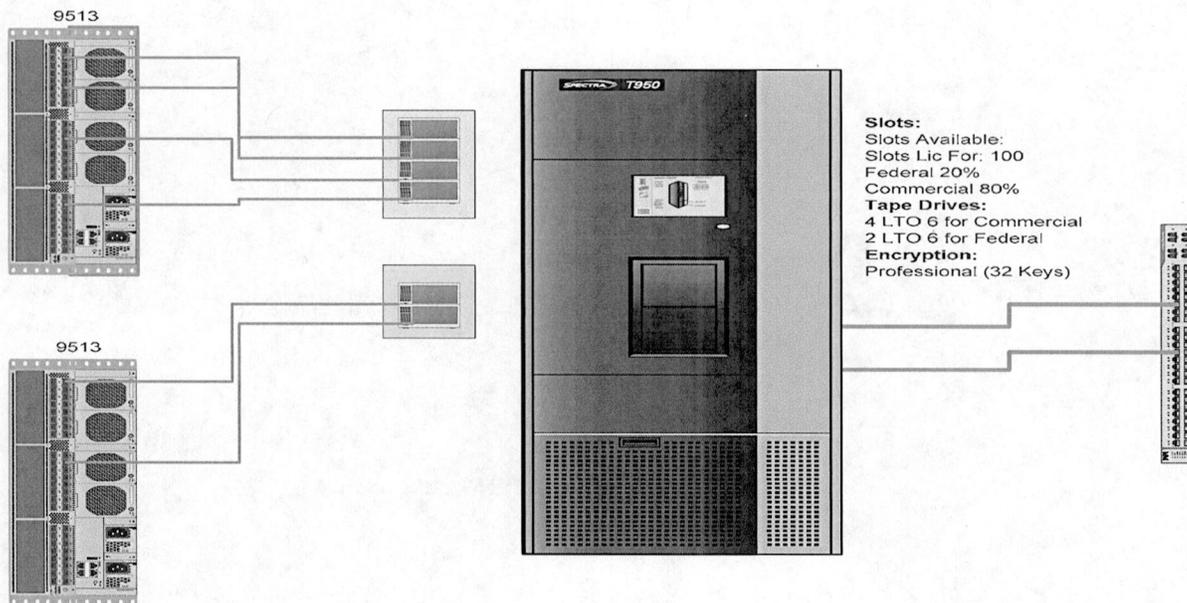

Additionally, we moved all fiber connection from the 5596 to a multi domain SAN using MDS 9513. This will make Health net tape environment agile and cost effective by creating a TAN environment.

**Figure: Backup Server architecture and connectivity (DC2) - Commercial**

**Figure: Backup Server architecture and connectivity (DC2) - Federal**

**Figure: Spectra Logic architecture and connectivity (DC2) – Commercial and Federal**

- Switched T380 to a T950 to support future growth
- **Slots**
  - 100 Slots that are licensed
  - Federal is 20% and Non-federal is 80%

#### **Tape Drives**

- 3 LTO-6 Tape drive for Non-federal
- 2 LTO-6 tape drives for Federal

- **Encryption**

Spectra logic will be using Spectra BlueScale encryption key management. Spectra Logic BlueScale Encryption key management provides an easy-to-use interface that lets Cognizant to quickly implement Spectra Logic encryption. The key is automatically handled in multiple software layers, as well, so it is not apparent to the end user. LTO tape drives use AES-256 bit encryption keys generated within BlueScale to encrypt data. This data cannot be read until it is decrypted, which requires the use of the same key that was used during data encryption. This kind of encryption requires creation, tracking and protection of the encryption keys. The life cycle of a BlueScale encryption key includes the following stages:

- Encryption User Definition
- Key Creation/Deletion
- Key Escrow

- Key Use in Data Encryption/Decryption.

The following encryption type will be used:

- Professional (32 keys)

*Note: For more details on Spectra logic encryption refer to the link below:*

*(<https://www.spectrallogic.com/index.cfm?fuseaction=home.displayFile&DocID=1902>)*

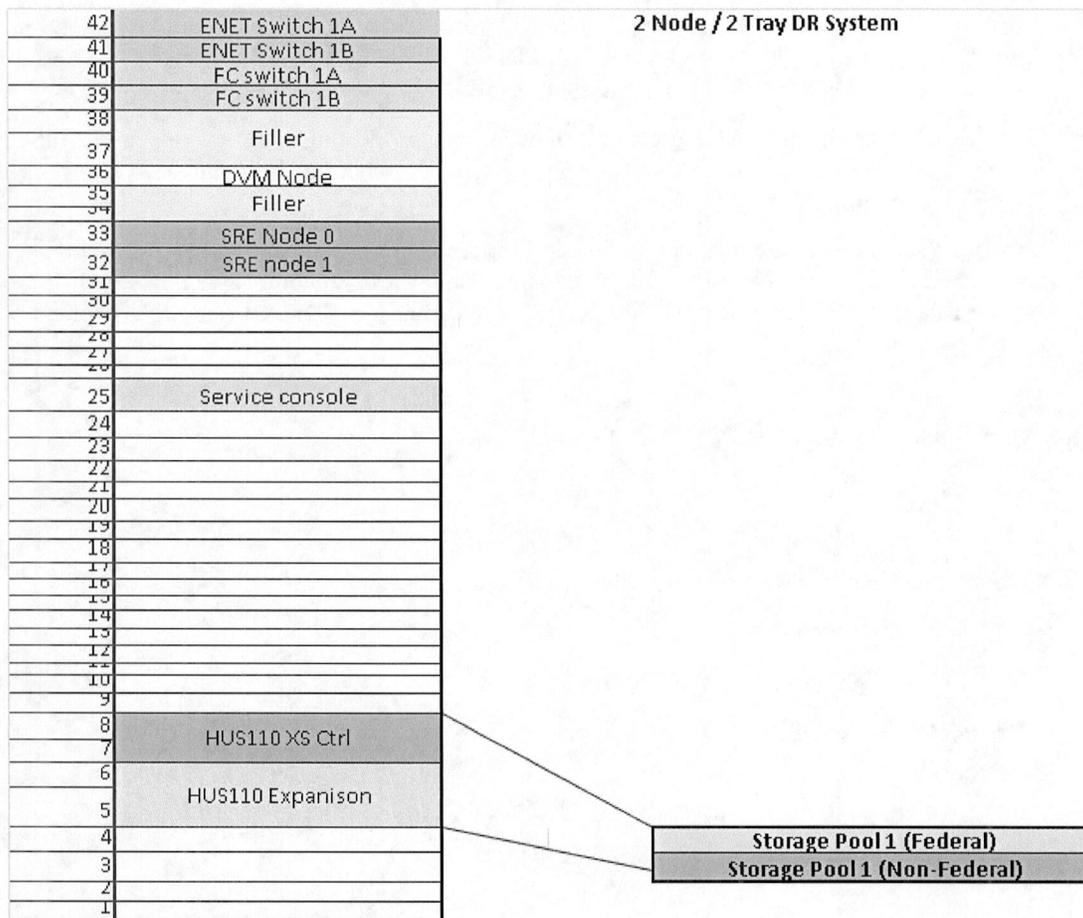

- **Ports**

- 6 FC ports are required for Spectra logic
- 2 Ethernet ports are required for management and camera

- **Power**

- 2 L6/20 outlets power connections are required for Spectra Logic

The figure below depicts Sepaton architecture for Federal and Commercial

**Figure: Sepaton architecture for Federal and Commercial**

**Features and Benefits:**

- The world's fastest enterprise backup and recovery solution
- The Sepaton backs up data at an industry-leading ingest rate of up to 80 TB per hour, regardless of data type, data change rate or system capacity
- The Sepaton's patented Content Aware™ de-duplication technology delivers the fastest time to safety and most efficient capacity reduction of any solution available today
- The only data protection solution that can effectively de-duplicate separate parallel backup streams (multi stream) and across multiplexed data volumes, as required for large database environments such as Oracle, DB2 and SQL
- Delta Scale™ architecture makes it easy to increase storage capacity and maintain performance as your needs grow
- Enables fast and secure replication and transmission of massive backup volumes to remote disaster recovery sites over a wide area network. Replication is performed automatically
- Byte differential Content Aware™ de-duplication reclaims storage space continuously as it operates, freeing capacity sooner and saving administration time

- Symantec NetBackup OST features such as Auto Image Replication (A.I.R.), Optimized Synthetic Backups, GRT and Symantec NetBackup Accelerator, which we have purchased the License but it will be implemented in later projects.
- Delta Scale™ architecture's secure multi-tenancy capability allows data managers to allocate performance, capacity bandwidth and quality of service as needed by their enterprise's various segments, departments and business units
- Encrypts data at rest while maintaining its blazing fast time to safety and industry-leading backup performance (Sepaton S2100-ES3's encryption of data at rest capability integrates with industry standard interoperability protocols for encryption key managers (EKM) that are compliant with industry-standards)

### **Sepaton Management tools**

- VPN access / WebEx access
- SFTP access from the S2100 to the Sepaton support infrastructure
- Automation of daily SFTP uploads of the S2100 support ticket
- Delta View portal provides
  - Case management, Capacity planning
  - Backup reporting analytics
- Email configuration
  - Email Notification for Alerting
  - Email Distribution for DeltaStor Reporting

### **2 - SRE Nodes**

We would be creating 2 - S2100 Storage pools to breakout Federal and Commercial. 2 trays of HUS110

- 1 Controller tray            27TBs Usable – 9/2/1 hot spare
- 1 Jbod                         30TBs usable – 10/2

### **Storage Pool Breakout**

The smallest storage pool can be 1 LUN = 1 tray

- 1 tray allocated for Federal
- 1 tray allocated for Non-Federal

### **Sepaton Encryption**

Hardware-accelerated compression & encryption

- Leverages high-performance HiFn DX 1845 to do compression and encryption in unified pipeline
- Massive bandwidth provides compression and encryption throughput for 2 x 8Gbps Fibre Channel ports ingesting data with 100% change rate per SRE node

- Key management is external to VTL using an OASIS KMIP-compatible key manager (or the HP proprietary Enterprise Key Manager or the SafeNet Enterprise Key Manager which are both supported by our architectural approach)
- Communication with the Key Manager is via the CryptSoft KMIP SDK
- Provides linear scalability as SRE nodes are added to the system
- Performs predictably - no CPU performance impact on ingest or deduplication processing
- All customer data is encrypted before landing on disk
- Encryption keys never stored on disk

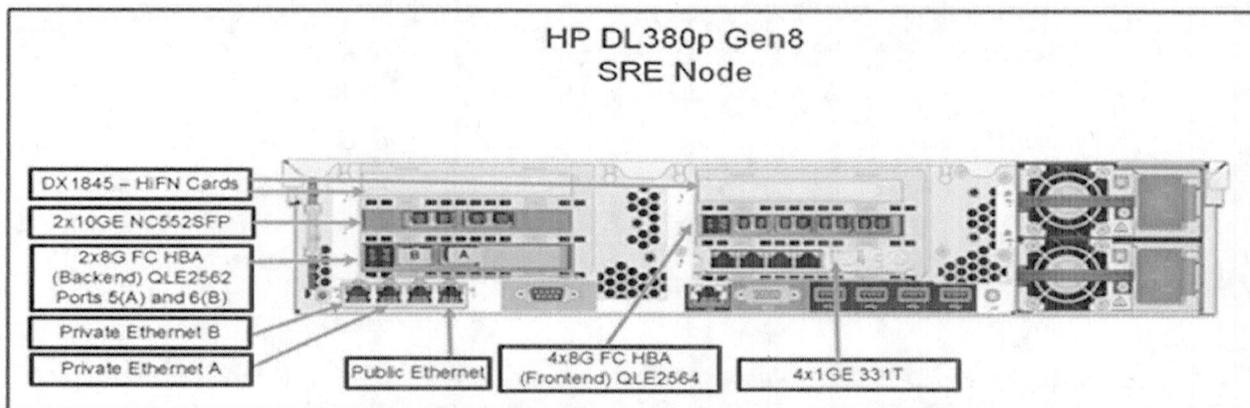

### **Septon Key Management**

**Key Management Availability:** The VTL only needs to access the key manager at startup. The key is cached in memory (not on disk) while the VTL is running. At boot time the system interrogates the list of key managers (up to nine of them) to get the key. If no key manager responds, the system goes into maintenance mode. You can safely take key managers down for system maintenance once the Septon system has retrieved the key.

For security reasons, the VTL never stores the key on disk. It always checks for a key on reboot so that IT can revoke the key (or more commonly) disable the key manager in the event of a data center-wide security intrusion. If this were to happen, shut down the key manager and reboot the VTL to prevent access to live data on the VTL.

The key manager is essential infrastructure, like power or cooling. Once you decide to implement encryption, you have to maintain the infrastructure to enable encryption and decryption. It's like putting locks on your doors and locking the doors. You must keep a key in your pocket (your key manager) to be able to operate the lock.

The figure below depicts backend of the HP DL380p

**Figure: Backend of HP DL380p**

### Iron Mountain Open Media and Closed Media Containers Procedures

- Closed Container Program:** Iron Mountain rotates the container by its retention date. Iron Mountain picks up the locked container from the Health Net and stores it unopened at its vaulting facility. Iron Mountain does not interact with the media inside the closed container. The container has a single retention date; hence, the entire contents have the same retention date. Iron Mountain can provide information on which containers you have stored at their facility. Detail of the contents is Health Net's responsibility.
- Open Container Program:** Iron Mountain rotates individual tapes by their retention date. Iron Mountain picks up the locked container from the Health Net, unlocks the container at its facility, and the media is slotted inside the Health Net's designated vault space. This interaction with the media is called an open container environment. Each tape within the transport container can have its own retention date. Iron Mountain can provide exact information on the media you have stored at their facility.

#### 2.2.3.3 Monitoring tools

This section describes the proposed monitoring tools solution for storage and backup service towers:

- Hitachi command suite tools - centralized management for Hitachi storage system , availability , capacity and performance monitoring
- Septon (Delta View manager) – monitoring, Event management, reporting, capacity and performance management
- Spectra logic (Blue scale)– manage tape library (Media lifecycle management), media health monitoring
- Symantec NetBackup for backup management and integrating SNMP traps to HP OMi for alerts
- Event Flow Integration with HP OMi (MOM)

#### 2.2.3.4 Service Deliverables

- Design , build and manage scalable, reliable online and offline storage environment in the primary and secondary DCs
- Logical separate storage setup for Federal and Non-federal applications and data
- Deploy Disk-to-Disk backup and Disk-to-Tape data vaulting
- To meet the VDI capacity requirements of approximately 5300 users (including about 3600 concurrent users)
- Primary and DR Storage Solutions will have high availability, resilience, performance and scalability.

#### 2.2.3.5 Steady state support - Deliverables

The key highlights of the proposed solution for storage and backup service towers are described below:

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>• A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>• 24x7 Onshore support:               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – (Federal onsite) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net offices</li> <li>• Offshore – Bangalore (India) ; Coimbatore (India)</li> </ul>

The high level activities of storage and backup services are described below:

#### Level 1 Services: Storage

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L1 Team</i>	• FC / director port monitoring
	• Array event monitoring
	• Storage array performance monitoring
	• Disk drives health monitoring
	• Array disk space capacity monitoring and reporting
	• Event monitoring
	• Storage controller Monitoring (CPU) and reporting
	• Where applicable, keep Health Net informed and notified on the status and progress

#### Level 2 Services: Storage

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

- Incident management services
- Change management services

<i>L2 Team</i>	• LUN/Meta device configuration (creation, deletion, allocation)
	• Host systems configuration in the array manager (addition, modification)
	• Array event analysis
	• FC / HBA configuration in the host server
	• Multi-path configuration
	• Port configuration
	• Zone configuration
	• Event analysis

**Types of incidents include following:**

Server Monitoring	
<i>L2 Team</i>	• Storage availability
	• Space, Memory and Cache
	• Unauthorized / Inactive User Access
	• Backup
	• Disk space utilization
	• Security and configuration exception alerts

Basic Administration	
<i>L2 Team</i>	• Startup/shutdowns of Storage and Backup
	• Additional Space allocation
	• Initial troubleshooting and incident management
	• Set up storage and backup auditing

**Level 3 Services: Storage**

All unknown / new errors and problems will be resolved by L3 Storage Support group. This team will work with Vendors when required.

<i>L3 Team</i>	• Storage array performance analysis
	• Hardware modification (replacement/ expansion)
	• FC / HBA hardware modification (replacement/ expansion)
	• Device parameter configuration
	• Fabric firmware upgrade / management
	• Switch port performance analysis
	• FC cable connectivity modification (new/changes)

### Level 1 Services: Backup and Recovery

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L1 Team</i>	• Proactive monitoring and management of the backup environment (Client / Catalog Backup Jobs)
	• Troubleshooting and preliminary investigations of problem tickets
	• Unresolved tickets escalating to L2 team ( whenever necessary )
	• Updating the problem tickets as per the observations and preliminary investigations
	• Monitoring backup server logs, OS logs, alert logs, event logs.
	• Maintaining and updating the log register
	• Monitoring of Scratch Pools

### Level 2 Services: Backup and Recovery

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L2 Team</i>	• Updating operation handbook / Runbooks.
	• Automation of backup jobs through scripting
	• Updating the design documents with respect to changes implemented
	• Troubleshooting, configuration management, Implementing changes
	• Restarting of failed backup jobs or running the jobs manually (whenever required)
	• Client configuration or de-configuration support
	• Coordinate hardware and software vendor technical support
	• Master / Media server configuration

### Level 3 Services: Backup and recovery

L3 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L3 Team</i>	• Hardware configurations (Tape, Drive, VTL, etc.)
	• Handle backup / Restore requests
	• Create / delete / modify storage pools
	• Diagnosing, analyzing, performance management and capacity planning
	• Configuring backup/Recovery policies and maintaining record of changes to policies
	• Implementing best practices and recommendations (Data Depute)
	• Resolving escalated issue and creating the K.E.D.B. Conducting Root Cause Analysis (RCA) on Severity 1/2 issues

#### 2.2.3.6 Dependency on Health Net

- Health Net to perform acceptance testing and sign-off on the following:
  - Backup Performance (LAN and LAN-Free)
  - RTO and RPO

- Testing the VDI environment

### 2.2.3.7 Risk and Mitigation

No	Risk Description	Probability	Impact	Mitigation Strategy
1	Availability of VM, Database and Application team resources for testing VDI and File shares	Medium	Medium	Resource requirements and schedules will be developed during the planning phase and will be communicated to the concerned teams

## 2.2.4 Servers/VMs

### 2.2.4.1 Highlights of Scope Validation Workshop

Description	Pre Scope Validation Workshop	Post Scope Validation Workshop
<b>Scope</b>	DC1 - 98 Cisco UCS (Unified Computing Systems) manager Blades <ul style="list-style-type: none"> <li>• 11 ESX Blades for service towers VM 25% and 2 blades for HA</li> <li>• 70 ESX Blades for VDI distribution and 4 blades for HA</li> <li>• 1 SCCM on Microsoft Hyper-V</li> <li>• 7 ESX blades for VDI infrastructure</li> <li>• 3 ESX blades for Citrix XenApp</li> </ul>	DC1 - 106 Cisco UCS (Unified Computing Systems) manager Blades <ul style="list-style-type: none"> <li>• 84 - B200 M3 2 socket 10 core 384GB memory               <ul style="list-style-type: none"> <li>○ 84 ESX Blades for VDI</li> </ul> </li> <li>• 22 - B200 M3 2 socket 10 core 256GB memory               <ul style="list-style-type: none"> <li>○ 1 bare-metal Blade for SCCM</li> <li>○ 16 ESX Blade for Private cloud</li> <li>○ 5 ESX Blade for - Management</li> </ul> </li> </ul>
	DC2 - 16 Cisco UCS (Unified Computing Systems) manager Blades <ul style="list-style-type: none"> <li>• 14 ESX blades for service towers VM25% (includes HA and Federal)</li> <li>• 1 ESX Blades for VDI distribution</li> <li>• 1 ESX blades for Citrix XenServer</li> </ul>	DC2 - 11 Cisco UCS (Unified Computing Systems) manager Blades <ul style="list-style-type: none"> <li>• 5 - B200 M3 2 socket 10 core 384GB memory</li> <li>• 6 - B200 M3 2 socket 10 core 256GB memory               <ul style="list-style-type: none"> <li>○ 6 ESX Blades for Private cloud</li> </ul> </li> </ul>
	<ul style="list-style-type: none"> <li>• 42 Cisco C220 M3 rack servers</li> </ul>	<ul style="list-style-type: none"> <li>• 36 Cisco C220 M3 rack servers</li> </ul>
	<ul style="list-style-type: none"> <li>• C220 M3 racks servers configured with single physical server to support SCCM , print service and Antivirus scan</li> </ul>	Servers will be configured to run two guest windows OS on Microsoft Hyper-V <ul style="list-style-type: none"> <li>• VM1 - server to support SCCM , print service and Antivirus scan</li> <li>• VM2 - Domain controller ( future requirement )</li> </ul>
		VMware architecture change <ul style="list-style-type: none"> <li>• 4 VMware clusters for resource grouping and access restriction between Federal , Non-federal, VDI, and</li> </ul>

Description	Pre Scope Validation Workshop	Post Scope Validation Workshop
		Cognizant management tools <ul style="list-style-type: none"> <li>• 3 vCenter with heart beat 1 for VDI, 1 Federal, and 1 for Non-federal</li> </ul>

#### 2.2.4.2 Solution Approach

Cognizant will deliver WAN connected highly virtualized production and test environments utilizing current generation Hypervisors including Microsoft Hyper-V and VMware ESXi. The delivered open systems environments will consist of the following: Wintel (with current Microsoft versions through Windows 2012 Standard), Red Hat Enterprise Linux and virtual Appliances (Symantec NetBackup and others). The environment split consists of the following Non-federal and Federal breakdown to meet the capacity consistent with 25% service towers. All VM's and Servers will utilize SCCM for patch management and software distribution.

- VM Non-federal 25%
  - Prod - 75 VM's with 4vCPU and 16GB vRAM
  - Non-Prod 20 VM's with 2 vCPU and 12GB vRAM
  - Storage 15TB
- VM Federal 25%
  - Prod – 40 VM's with 4vCPU and 16GB vRAM
  - Non-Prod 20 VM's with 2 vCPU and 12GB vRAM
  - Storage 10TB
- Enterprise class availability, scalability and robust infrastructure
- Standardization of server architecture to reduce cost of maintenance
- Will utilize a Reference Architecture approach with UCS B200 M3 blades (Cisco Unified Computing Systems) and Cisco C220 M3 1 RU servers
- Utilize 4x10Gbps ports for Networking and Storage
- Currently using 15:1 ratio for virtual servers
- About 10% white space for future growth
- Cognizant chose UCS because of its agile and flexible capabilities and its wide range acceptance by many storage vendors. Cisco UCS manager is the industry leader in scalable virtualized environments on converged networks
- Federal VM's will be isolated from Non-federal VM's by residing on designated Federal B200 M3 blades which will be in the same Chassis as Non-federal Blades. This configuration needs to meet NIST requirements. Once all servers are in place Cognizant will start the certification process. These efforts will consist of security scans, reporting and remediation in support of audit/compliance activities.
- Rapid provisioning and management with Cognizant proprietary provisioning tool - Cloud36.

#### C220 M3 Servers:

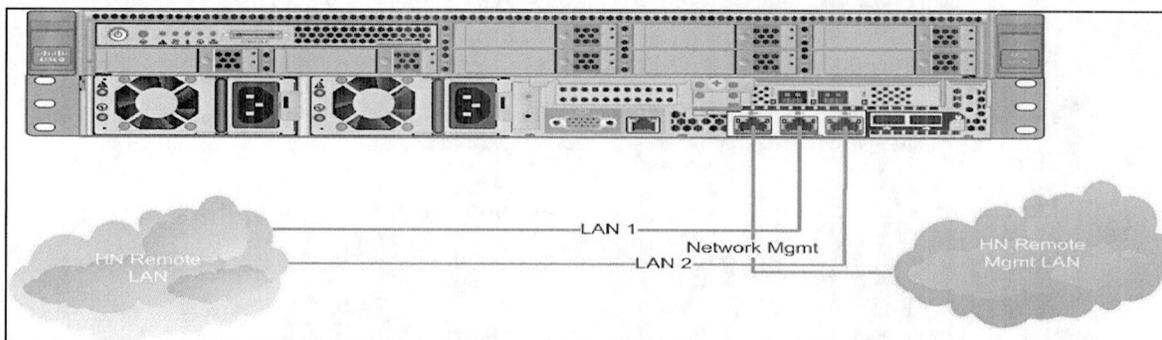

36 Cisco C220 M3 servers would be built and deployed at the remote Health Net offices to support services like SCCM 2012, Print service and Antivirus scan servers. The Cisco C220 M3 will be used to meet future requirement like Active Directory Domain Controllers

#### Connectivity Details for C220 M3

- 2 Network interface – 1Gbps for LAN connectivity (with redundancy)
- 1 Management Interface – 1Gbps for Management
- 33 Servers will be deployed in this configuration for connectivity to Health Net remote LAN
- 3 Servers will be deployed to Datacenter
- 2 servers in DC1 and 1 Server will be deployed in DC2
- 2 Network interface – 10Gbps for LAN connectivity (with redundancy)
- 1 Management interface - 1Gbps for management

#### C220 M3 server connectivity in Health Net remote sites

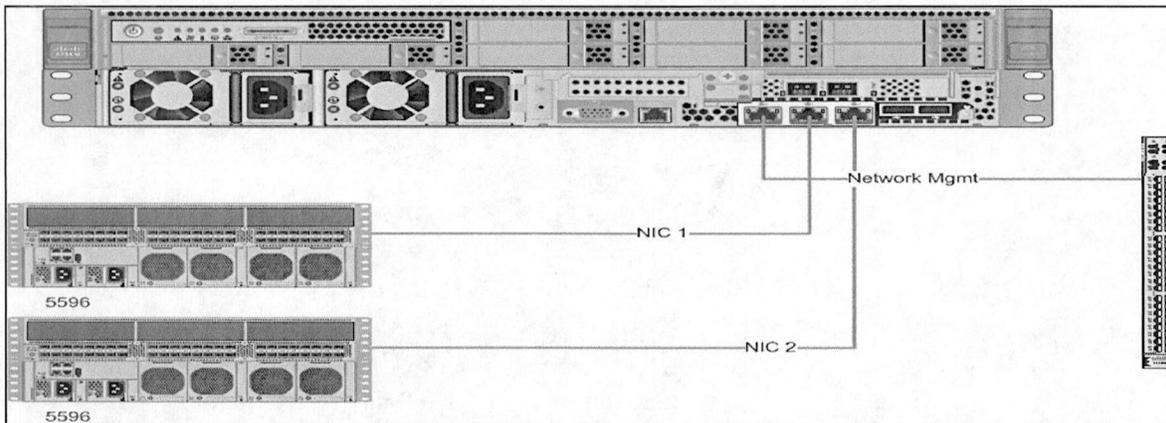

Diagram below depicts the connectivity of C220 M3 server in Health Net remote sites:

**Figure: Connectivity C220 M3 Server – Remote Site**

#### C220 M3 server connectivity in DC1 and DC2

Diagram below depicts the C220 M3 server connectivity in DC1 and DC2:

**Figure: Connectivity C220 M3 Server – DC1 and DC2**

**C220 M3 server - Virtualization Details**

- Servers will be configure to run two guest Windows OS on Microsoft Hyper-V
- If a C220 M3 requires more than 2 VM’s the Hypervisor will be changed to VMware ESXi
- VM1 - would be installed and configured with SCCM 2012 distribution point, print service and Antivirus scan servers
  - VM1 would be installed with SCCM 2012 to support 1 secondary site along with 28 distribution points for branch offices across CA location. For the remaining locations 5 dedicated distribution points are considered
  - VM1 will also be configured as print servers by adding the necessary print queues applicable to that respective site/ users
  - VM1 deployed in 26 smaller sites will also be configured to provide File Share and Antivirus scan. The 8 larger sites will have 2 C220 M3 physical servers and both the servers will be configured as antivirus scan servers
- VM 2 - Active directory domain controller (future requirement)

**Server Distribution details**

The following locations (22) will be installed with 1 Cisco C220 M3 Rack server

Server Distribution details				
Chatsworth	Oakland DDP	International/ Prospect Park	San Diego	Tigard
Fresno	Oakland Grand	Whiterock 2	San Marcos	Tucson
Huntington Beach	Glendale	San Bernardino	San Mateo	Arlington

Concord	Modesto	Tempe	Mercantile	Johnstown
Hampton	DC1	*ElCerrito	*Mountain view	*San Jose
	Visalia	Califa		

The following locations (7) will be installed with 2 Cisco C220 M3 Rack servers

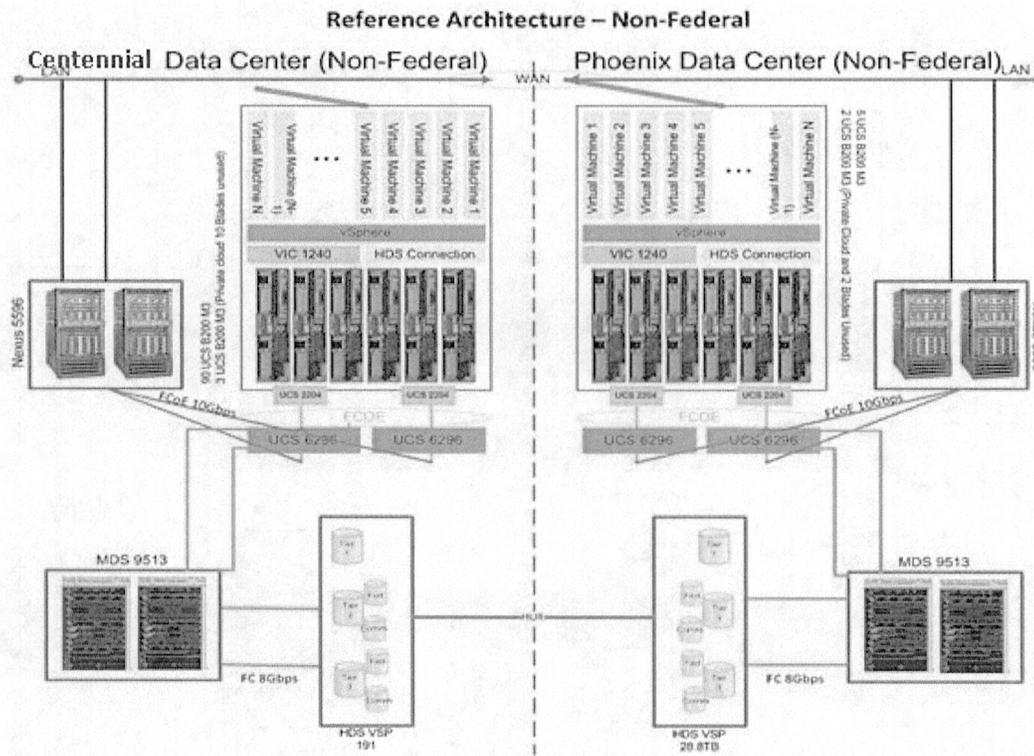

Server Distribution details			
<b>Irving</b>	Sun Center	San Rafael	Aerojet
<b>DC1</b>	Woodland Hills	GoldPoint	*Boulder FS
	*Boulder Corp		

*\*Note – Red boxes are sites that been determined to small or incumbent DC location and where not putting equipment in those sites.*

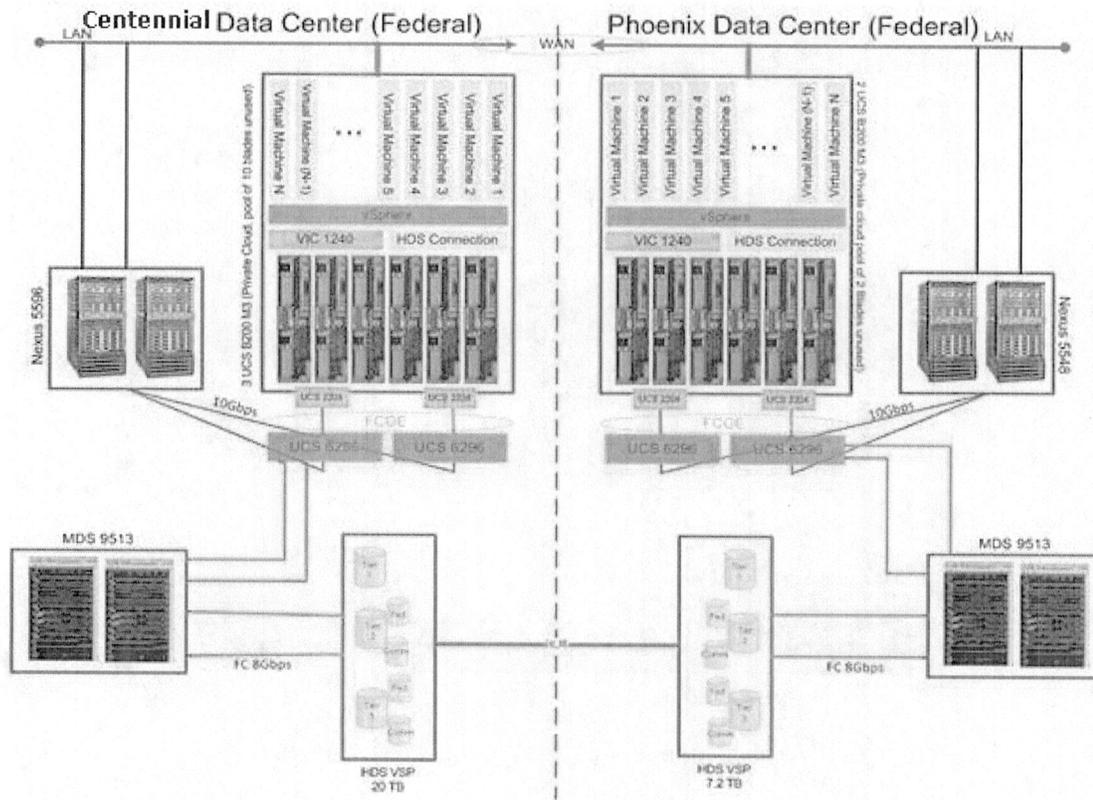

#### **Connectivity details for UCS with B200 M3 blades**

Connectivity to the Cisco UCS manager chassis consists of a 2 X 10Gbps Ethernet connection to each of the converged fabrics for 4 10GBps connection. This ensures that there is no single point of failure in the design. Virtual Connectivity to each B200 M3 blade is policy based. Traffic over the links is well defined to allow adequate bandwidth to all required services. Services bandwidth can be adjusted on demand to meet the needs of vMotion and Backup. The remaining bandwidth is for data traffic. Reference Architecture, Logical flow and Physical connectivity for UCS demonstrating end to end connectivity is represented in the illustration below.

Replication between DC1 and DC2 can be done using vCenter replication or HNAS

**Figure: Reference Architecture Commercial**

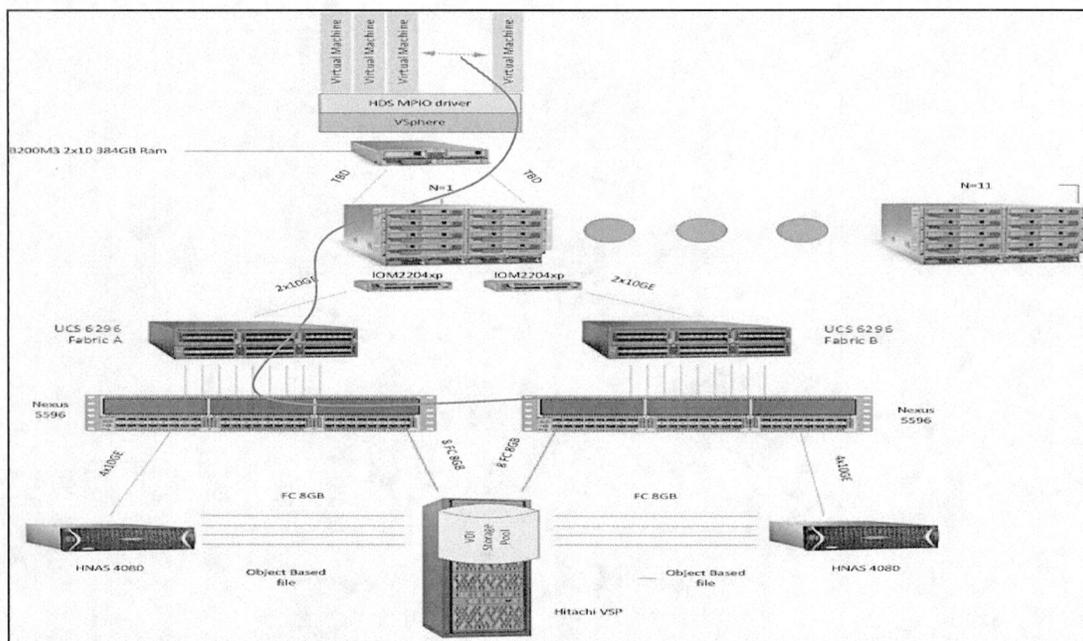

**Figure: Reference Architecture - Federal**

**UCS Infrastructure for VDI**

The diagram below depicts UCS blade server and Storage SAN connectivity:

(The red line shows the Data flow for VDI object storage, it will be using NFS via the 10G network to the HNAS. The HNAS will be the mechanism to control the VDI storage pool on the VSP via 4 FC connections per controller.)

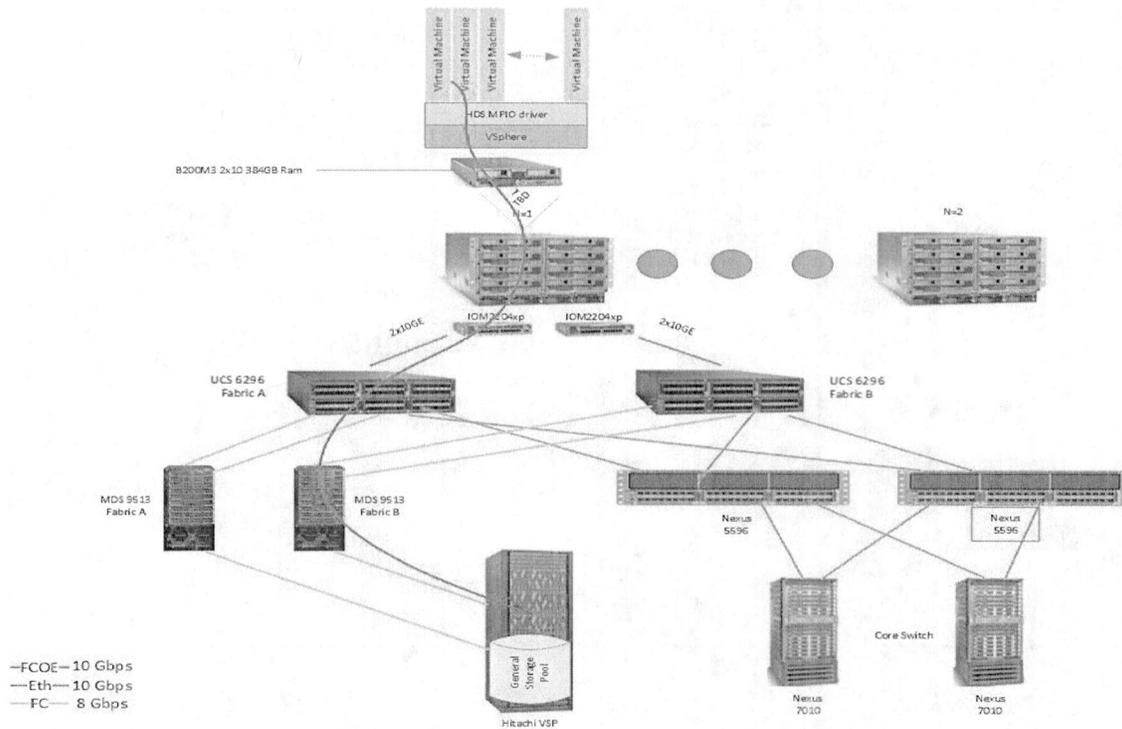

**Figure: UCS Blade Server and Storage San Connectivity - VDI**

### UCS Infrastructure for Cloud

The diagram below depicts UCS blade sever and Storage SAN connectivity:

The red line shows the data flow for block storage, it will be connecting from the USC chassis via 6296 (DC1) or 6296 (DC2) to a set of 5596 via 10G network. The set of 6296 will connect Cisco MDS 9513 to the VSP via 8GB fiber channel (16 8Gbps to switch 1 and switch 2). The environment is currently setup for FC and the final protocol will be determined during the LLD.

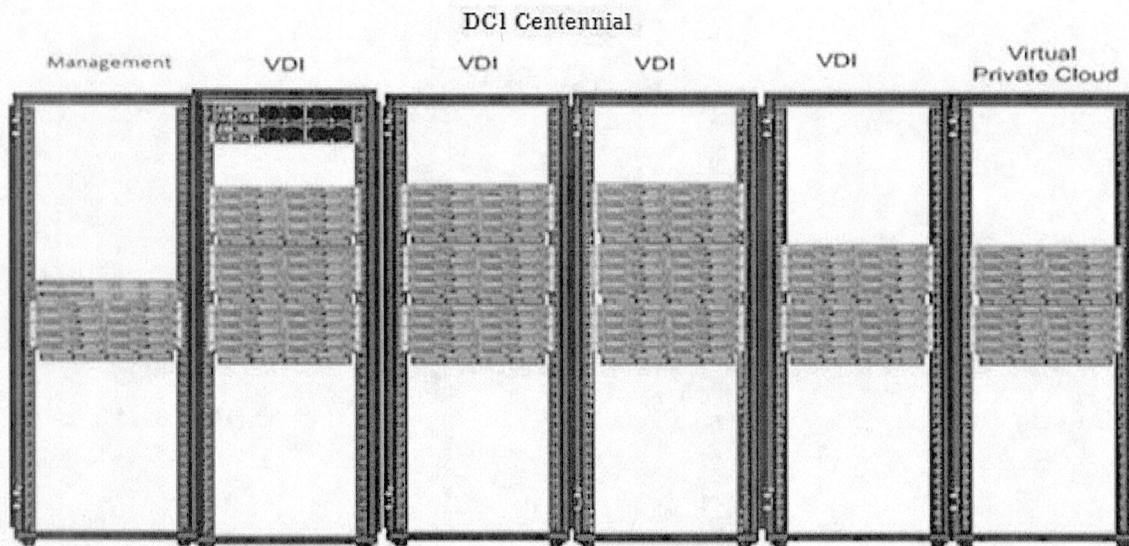

**Figure: UCS Blade Server and Storage San Connectivity - Cloud**

## Primary Datacenter DC1

### UCS blade server / Hardware details

- 106 Cisco UCS (Unified Computing Systems) manager Blades with 8 Blades per Chassis
  - 84 Blades - B200 M3 w/ 2 socket 10 Core and 384 GB Memory
  - 22 Blades DR - B200 M3 w/ 2 socket 10 Core and 256 GB Memory
- 2 Chassis for Private Cloud
- Break out of Blade Servers
  - 14 ESX Blades for service towers VM 25% (private cloud) with 2 blades for HA
    - 2 blades + 1HA for Federal and 5 blades free
    - 2 blades + 1HA for Non-federal and 5 blades free
  - 70 ESX Blades for VDI distribution with 4 blades for HA
  - 1 SCCM bare metal
  - 3 ESX blades for Citrix XenApp
  - 7 B200 M3 VDI Infrastructure
  - 5 Blades for management

The diagram below depicts Centennial Datacenter (DC1) - Physical rack layout

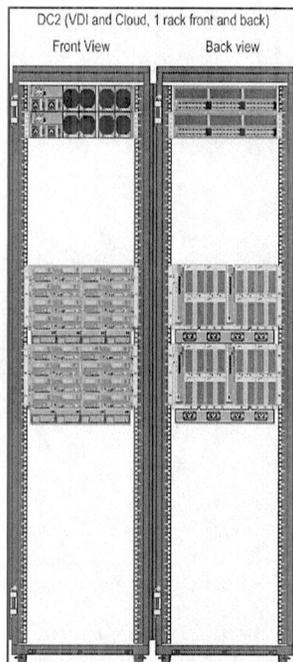

**Figure: Physical Rack Layout – DC1**

### Secondary Datacenter DC2

#### UCS blade server / Hardware details

- 11 Cisco UCS (Unified Computing Systems) manager Blades with 8 blades per chassis
  - 5 Blades (VDI) - B200 M3 w/ 2 socket 10 Core and 384 GB Memory
  - 6 Blades - B200 M3 w/ 2 socket 10 Core and 256 GB Memory
- Break out of Blade servers in Secondary DC
  - 6 ESX blades for service towers VM 25% (includes HA and Federal)
    - 1 Blades + 1 HA for Federal and 1 open blade
    - 1 Blades + 1 HA Non-federal and 1 open blade
  - 5 ESX Blades for VDI distribution

The diagram below depicts Secondary Datacenter (DC2) - Physical rack layout

**Figure: Physical Rack Layout – DC2**

Software Details	
Virtual Desktop Broker	Citrix Xen Desktop
VDI Desktop Provisioning	Citrix Provisioning Services 7.1
User Profile Management	Citrix User Profile Manager
VDI Personalization	Citrix Personal vDisks
Licensing	Citrix License Server 11.11
Virtual Desktop OS	Microsoft Windows 7
Windows Server 2012	Standard version
Database	Server Microsoft SQL Server 2012
Hypervisor Management	VMware vCenter Server 5 standard
HA monitoring	VMware vCenter Hearbeat 5.5
VDI Hypervisor	VMware vSphere Desktop Edition
Hypervisor	VMware VSphere Enterprise Plus
Private cloud	Cognizant Cloud 360

**DC1 Licensing**

- DC1 software licensing requirements comments
  - VMware is licensed by the CPU physical socket while Windows is license per computer
  - 81 of the blades will use VS5-dt100vm-c Qty 53. VS5-dt100vm-c are 100 count pool licenses for VDI

- 3 blades w/ 2cpu x = 6 CPU with VMware Enterprise Plus
- 16 blades for cloud infrastructure – In this phase there will be 3 (2+1HA) Non-federal, 3 (2+1HA) Federal (12CPU of VMware Enterprise Plus)
- 1 blade x 2CPU SCCM – dedicated
- 5 blades x2 (10cpu will have VMware Enterprise Plus )

### DC2 Licensing

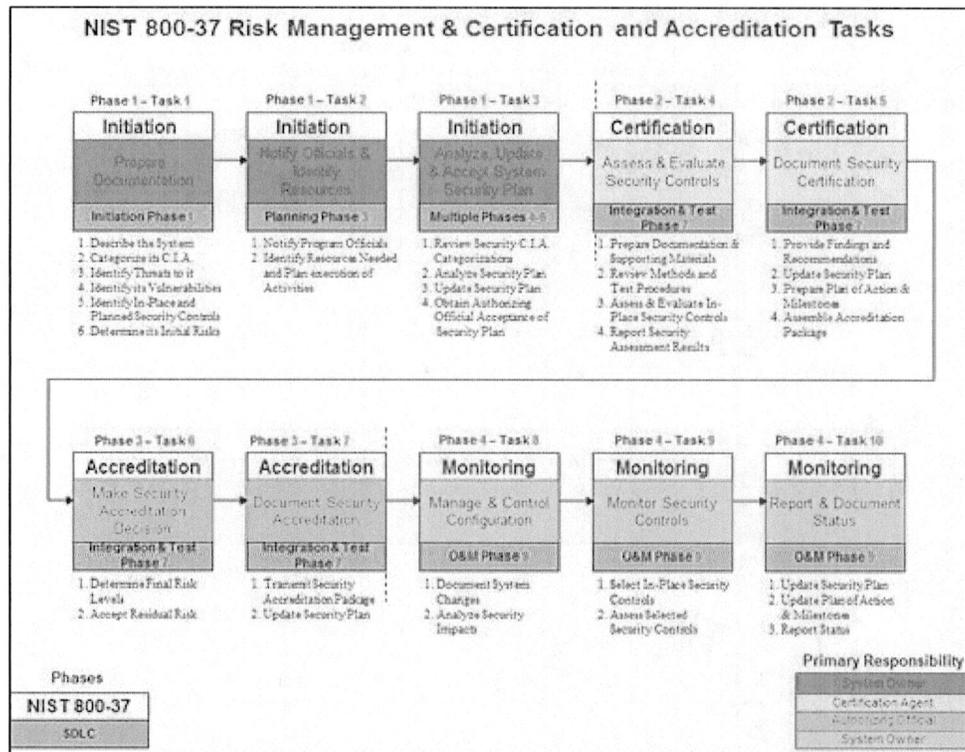

- DC2 software licensing requirements comments
  - 5 blades will use the VS5-DT100VM-C Qty 3 from the existing pool at DC1 during DR exercises
  - 6 blades for cloud but will start out with 2 (1+1HA) Non-federal, and 2 (1+1HA) for Federal (8CPU Cloud 360)

### Software Licensing Totals

Server / VM Licensing Requirements	DC1 C220 M3	DC1 B200 M3	DC2 C220 M3	DC2 B200 M3	Total
<b>Microsoft</b>					
<b>Windows 2012 Data Center Edition</b>					
<b>Windows 2012 Standard Edition</b>	5Mgmt 1 SCCM				6
<b>Cognizant Cloud 360</b>		TBD		TBD	TBD
<b>VMware</b>					
<b>VS5-dt100vm-c</b>		53		In DR 3 reassigned	53
<b>Enterprise Plus</b>		28		8	36
<b>Red Hat Enterprise</b>	TBD		TBD		

### Security considerations

Health Net Federal Information systems (IS) are currently following HN defined NIST requirements and will require recertification due to the state change. Health Net has indicated that IS going forward will be Certified and Accredited (C&A) on NIST. The NIST process is illustrated below:

**Figure: NIST Process**

#### 2.2.4.3 Monitoring Tools

This section describes the proposed tools solution for Server/VM service towers:

- Cisco UCS manager for monitoring hardware components, fault detection, auditing, and statistics collection
- Cisco UCS manager will be used for the Datacenter management
- HP OMW for Windows server monitoring
- Virtualization monitoring using HP OM VSphere SPI
- Database monitoring using HP OM DB SPI (SQL server Monitoring)
- Event Flow Integration with HP OMi (MOM)
- Cloud 360 for Virtual management, monitor Hypervisor and rapid VM provisioning
- SCCM for Software distribution/patching
- OEM tools like Microsoft Deployment tool for image management
- Manage Engine Asset Explorer for asset management

#### 2.2.4.4 Service deliverables

- Design, Build and Manage scalable, reliable server environment in DC1 and DC2 to meet Federal and Non-federal requirement for service towers like VDI, SCCM, VM and management server

- Integration with Cloud 360 into VMware for VM management and support VM provisioning
  - Create initial Service catalog for rapid provisioning, this will be a living catalog and will evolve over time.
  - Create initial customer reports based of detail design
- Test the server environment VMware HA functionality
- Health Net standard monitoring tools will be installed on the server as part of standard build. For ex: McAfee TPE, Titanium client, and Quest Intrust
- Create and maintain Build and Runbook documents

#### 2.2.4.5 Steady state support - Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>• A dedicated Onsite / Offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>• 24x7 Onshore support:               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – (Federal onsite) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net Offices</li> <li>• Offshore – Bangalore; Coimbatore</li> </ul>

#### Level 1 Services

"Level1" Services will be provided for the servers. L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L1 Team</i>	• Servers status Monitoring
	• Monitor server logs and do initial troubleshooting steps define in Runbook
	• Escalate to L2 team when necessary
	• Carry out daily, weekly and other regular reporting activities as defined in the SOPs
	• User / group account management, access permissions
	• Act as the central point of contact between Health Net and Cognizant for tickets
	• Broadcast communications authorized by the Health Net to users.
	• Where applicable, keep Health Net informed and notified on the service status and progress

#### Level 2 Services

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

- Incident Management Services
- Change Management Services
- Maintenance of server configuration documentation in the CMDB (Configuration Management Database)
- Managing and configuring Cloud360

- Managing and configuring VMware Enterprise Plus

<i>L2 Team</i>	• Security Management – OS hardening / Password management
	• Carry out scheduled server maintenance / reboot activities
	• Administration of Physical and Logical server Partitions
	• Administering clusters ( Adding packages , modifications to package configuration, startup/shutdown of packages)
	• Installation of patch bundles / firmware upgrades
	• Configuration of new hardware
	• Disk space management
	• Performance management like Kernel Tuning
	• Installation of packages / applications
	• Volumes / File system management
	• Escalate any technical problem to L3 team when necessary
	• Implementation of Service improvement plan / Best practices
	• Maintain Incident information in the KEDB (Known error Database)
	• Carry out daily, weekly and other regular reporting activities for Incidents.

#### Types of incidents include following:

Server Monitoring	
<i>L2 Team</i>	• Server availability
	• Space, Memory and Cache
	• Replication / Stand by monitoring
	• Unauthorized / Inactive User Access
	• Backup status
	• Disk space / Table space utilization
	• Security and configuration exception alerts

Basic Administration	
<i>L2 Team</i>	• Startup/shutdowns of Servers
	• Additional Space allocation
	• Initial troubleshooting
	• Set up server auditing

#### Level 3 Services

All unknown / new errors and problems will be resolved by L3 server Support group. This team will work with Vendors when required.

<i>L3 Team</i>	• Server planning and Design services
	• Design any special application or security requirements.
	• Setup redundant / load balanced servers for application requiring high availability –

Server clustering / network /Server load balancing
• Administration / handling issues related to clusters.
• Provide technical escalation support to L1 and L2 team when required
• Troubleshoot installation
• Validate the new servers before releasing to production
• Work closely with Problem Management organization on the remediation of all problems directly or indirectly related to server engineering
• Capacity Management
• Troubleshoot major server issues on virtual and physical servers
• Conduct Root Cause Analysis (RCA) on Severity 1 issues
• Monitor for patches and test
• Prepare work plan for major maintenance activity
• Deploy patch
• Confirm patch efficacy, no adverse effects
• Disaster recovery solution design, benchmarking, load testing, implementation, configuration, monitoring and troubleshooting, both internal and external

#### 2.2.4.6 Assumptions

The following are the assumptions considered under Servers/VMs

- Cognizant will provide the VM and OS licenses if they are not available with Health Net
- Cognizant will purchase Microsoft Windows Datacenter licenses and Redhat Enterprise subscriptions if needed to accomplish the design objectives of the solution architecture
- Cognizant will work with Health Net to ensure License compliance
- Cognizant will not use unlicensed software in the performance of this contract
- Advance notice for any large project with space requirement above the 10% additional capacity
- Cognizant to have prebuilt small, medium, and large VM profiles in our Service catalog within cloud 360 to help with rapid provisioning, but Cognizant will refine this during the detail design workshops with Health Net
- Federal and non- Federal servers may be physically co-located with spares in the chassis

#### 2.2.4.7 Dependency on Health Net

The following are the dependencies considered under Servers/VMs

- Health Net will provide standard security tools which needs to be installed as part of the standard builds.

#### 2.2.4.8 Risk and Mitigations

S.No	Risk Description	Probability	Impact	Mitigation Strategy
------	------------------	-------------	--------	---------------------

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	Licensing to ensure DC failover	Medium	Medium	Cognizant will review licensing with vendors to address gaps
2	Multiple Hypervisor solutions complicate management and require subject matter experts to possess deep knowledge of multiple competitive products	Medium	Medium	Cognizant will ensure that all subject matter experts possess the required knowledge to administrate deployed virtualization solutions
3	Blade based solutions draw more power than the typical rack infrastructure	Low	Low	Cognizant will work with DC managers to ensure that implemented UCS have adequate power and cooling
4	Vendor licensing changes during the life of UCS	Medium	Medium	Cognizant will work with solution providers to identify potential EOL and availability issues to ensure that UCS as deployed will not be impacted
5	IS NIST certification	High	High	Cognizant will work with Health Net to deployed IS meet NIST C&A requirements
6	Access to Key SME's from incumbent during Implementation	Medium	Medium	Cognizant will work with system owners to define escalation and support criteria that ensure timely access to SME's

## 2.2.5 Monitoring Tools

### 2.2.5.1 Highlights of Scope Validation Workshop

Description	Pre Scope Validation Workshop	Post Scope Validation Workshop
<b>Scope</b>	<ul style="list-style-type: none"> <li>Common OS Monitoring Solution for both Federal and Non-federal</li> </ul>	<ul style="list-style-type: none"> <li>Dedicated Federal OS monitoring solution</li> </ul>
	<ul style="list-style-type: none"> <li>Basic out of box performance reports which will be used for Capacity Management</li> </ul>	<ul style="list-style-type: none"> <li>Enhanced Service Health reporter with historical data storage capability for OS and Network performance analysis (Additional effort has been considered to build HP SHR)</li> </ul>
	<ul style="list-style-type: none"> <li>VMware Monitoring was considered through vCenter and planned only for OS monitoring using HP OM</li> </ul>	<ul style="list-style-type: none"> <li>In depth Virtualization monitoring has been added in the solution along with HP OM</li> </ul>
	<ul style="list-style-type: none"> <li>No Development and Test environment considered</li> </ul>	<ul style="list-style-type: none"> <li>Added development and Test environment as part of new solution</li> </ul>

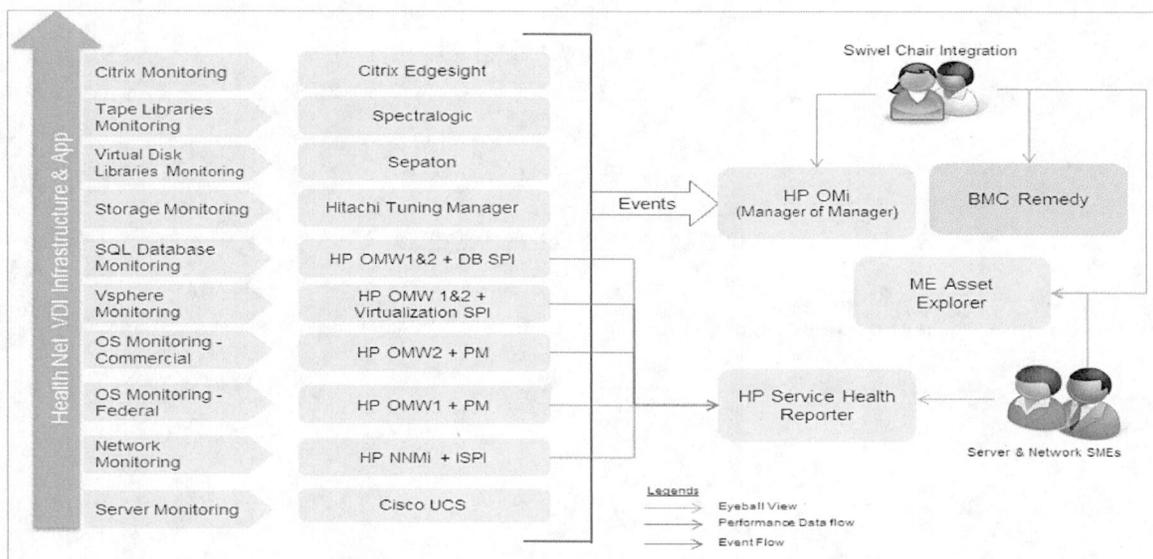

### 2.2.5.2 Solution Approach

Cognizant’s enterprise monitoring tools solution which has immense flexible and scalable architecture to support strategic requirement. The following are the key services achieved using our tools solution.

Technology	Environment	Availability Monitoring	Performance Monitoring (Used for Capacity Mgmt.)
<b>Operating System</b>	Federal	HP OMW-1	HP Service Health Reporter
<b>Operation System</b>	Non-Federal	HP OMW-2	HP Service Health Reporter
<b>Network Device</b>	Federal and Non-Federal	HP NNMi	HP Service Health Reporter
<b>Physical Server</b>	Federal and Non-federal	Cisco UCS manager	
<b>vSphere</b>	Federal and Non-federal	vCenter	HP OM VSPI and vCenter
<b>Storage</b>	Federal and Non-federal	Hitachi Tuning Manager	Hitachi Tuning Manager
<b>NetBackup</b>	Federal and Non-federal	Symantec NetBackup	Symantec NetBackup
<b>Virtual Disk Libraries</b>	Federal and Non-federal	Sepaton	Sepaton
<b>Tape Disk Libraries</b>	Federal and Non-federal	Spectra logic	Spectra logic
<b>VCloud Enterprise</b>	Federal and Non-federal	Cloud 360	Cloud 360

### High level ESA Tools Solution

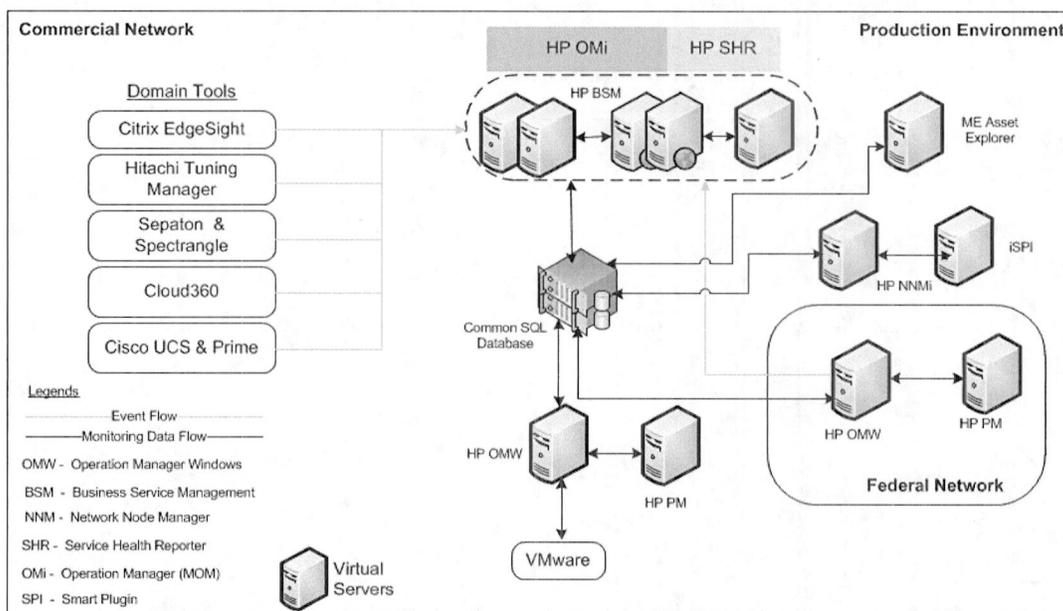

The figure below depicts the representation of the overall tools functionality, integration and IT user’s operation model

**Figure: Operation Model**

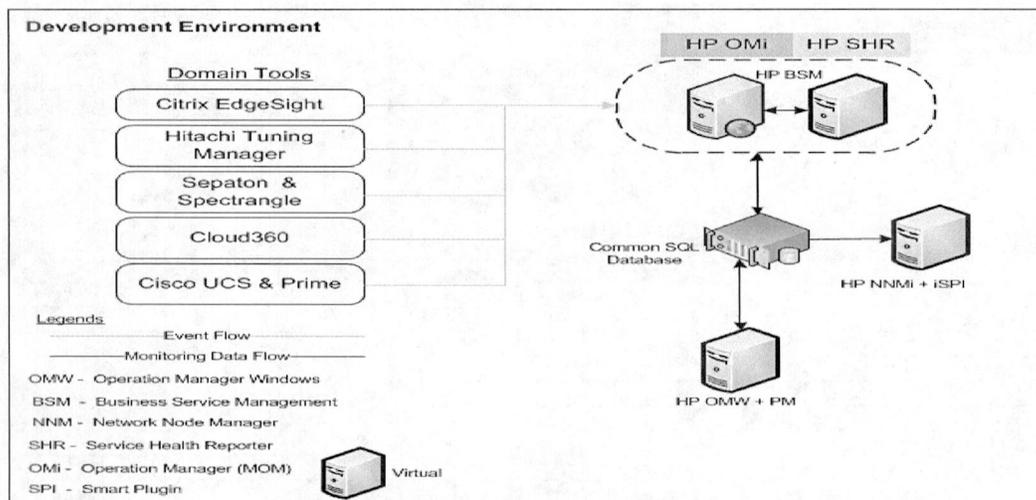

- HP tools will be integrated with HP OMi using built-in adaptors and other monitoring tools will be integrated with HP OMi through SNMP traps
- All the events from individual monitoring tools will be directed to HP OMi (MoM)
- Performance data from HP OMW and HP NNM will be directed to HP Service Health Reports (includes DB and Virtualization SPI performance report)
- BMC remedy will be integrated with HP OMi for auto ticketing
- Cognizant's L1 team will monitor incidents in the BMC remedy tool
- Asset information will be tracked in Manage Engine Asset Explorer
- Cognizant's IT operations team will leverage HP Service Health Reporter to analyze Operating System, Database, Virtualization and Network performance
- HP Service Health report has a capability to capture historical data for a year to perform trend analysis

### Proposed Tools Architecture in Production

**Figure: Commercial Network**

### Proposed tools architecture in development

**Figure: Development Environment**

### 2.2.5.3 Service Deliverables

- Implementation of HP Operation Manager Windows ( 1 – Federal and 2 – Non-federal)
- Implementation of Database monitoring using HP OM DB SPI(SQL DC Monitoring related to VDI)
- Implementation of Virtualization monitoring using HP OM VSPI (vSphere)
- Implementation of Performance Manager
- Implementation of HP Network Node Manager and iSPI
- Implementation of Service Health Reporter
- Implementation of HP Operation Manager (Manager of Manager – MOM)
- Centralized Event Integration using HP Omi for 9 individual Monitoring tools ( 2 – HP OMW, HP NNMI, Citrix Edge sight, Hitachi Tuning Manager, Sepaton, Spectra logic, Symantec NetBackup, Cloud360, Cisco UCS manager and vCenter)
- Operating system and Networks performance reports using HP Service Health Reporter
- Implementation of Manage Engine Asset Explorer and import asset inventory into Asset Explorer

### Service availability tools mapping

The figure below depicts the mapping of tools with their functionality for various infrastructure elements in Health Net's environment:

Health Net Tools Matrix																		
Legends	Event Aggregator	Primary Tools				HealthNet Tools				Future tools**								
Tools Vs. Funcnality		HP OMI (MOM) - Events	HP Operation Manager	HP Network Node Manager	HP Service Health Reporter	Citrix Edgesight	Hitachi Command Suite	Symantec Netbackup	Spelton Dellaview	Spectralogic	Cisco Prime DCNM	Riverbed Mgmt tool	Cisco UCS manager	Cisco Security Manager

IT Service Management Mapping

Solution	Description
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated monitoring support - Offshore</li> <li>• 24X7 Onshore support 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net Offices</li> <li>• Offshore – Bangalore ; Coimbatore</li> </ul>

### Tools Support Services

Tools support services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>Tools Support Team</i>	• Support tools environment
	• Configure and troubleshooting agents in new environment
	• Monitoring and tuning the alert parameters
	• Analysis, reduction event correlation, suppress duplicate alerts
	• Report preparation and analysis
	• Automatic trouble ticket generation for error conditions

#### 2.2.5.5 Assumptions

- Proposed effort are limited to out of box implementation and no customization
- Monitoring and management tools for the foundation and service towers will be installed on the management servers in standalone mode and HP OMI will be installed and configured with high availability
- All authorized support Health Net staff will have read access to any tools approved through Health Net's approval processes

#### 2.2.5.6 Dependency on Health Net

- Health Net would facilitate HP OMi integration with BMC Remedy tool for auto ticket creation
- Health Net Support is required to accomplish prerequisites like domain group creation AD, domain account creation, firewall access, etc.

## 2.3 Service Towers

### 2.3.1 VDI

#### 2.3.1.1 Highlights of Scope Validation

Description	Pre Scope Validation Workshop	Post Scope Validation Workshop
Scope	<ul style="list-style-type: none"> <li>• A total of <b>5000</b> hosted virtual desktops are required. There are <b>three waves</b> or phases to this implementation.</li> <li>• Initial wave wise VDI requirement               <ul style="list-style-type: none"> <li>○ Non-Persistent                   <ul style="list-style-type: none"> <li>▪ 300 (Wave 1)</li> <li>▪ 3000(Wave 2 )</li> </ul> </li> <li>○ Persistent = 1700 ( Wave 3 )</li> </ul> </li> <li>• Xen Desktop 7 with provisioning services</li> <li>• Citrix UPM will be used for user profiles</li> <li>• Citrix EdgeSight will be used for monitoring</li> <li>• Non-persisting VDI configuration details -2Gb RAM, 1 VCPU, 60 Gb, 10Gb Write cache, 12 IOPS</li> <li>• Persistent VDI configuration details - 8Gb RAM, 2 VCPU, Cache disc - 80 GB for provisioning - PVS + (persistent disc - 40Gb additional for storing data), 10Gb Write cache, 20 IOPS</li> <li>• Image - Win 7 64Bit( 2-3 images)</li> </ul>	<ul style="list-style-type: none"> <li>• A total of 5300 hosted virtual desktops are required. The implementation is going to spread across 2 phases</li> <li>• Updated wave wise VDI requirement               <ul style="list-style-type: none"> <li>○ Non-Persistent= 3300 (Wave 1)</li> <li>○ Persistent = 2000 ( Wave 2 )</li> </ul> </li> <li>• Xen Desktop 7.5 with provisioning services</li> <li>• Citrix UPM will be used for user profiles</li> <li>• Citrix EdgeSight will be used for monitoring</li> <li>• Non-persisting VDI configuration details -2Gb RAM, 1 VCPU, 60 Gb, 10Gb Write cache, 12 IOPS</li> <li>• Persistent VDI configuration details - 8Gb RAM, 2 VCPU, Cache disc - 80 GB for provisioning - PVS + (persistent disc - 40Gb additional for storing data), 10Gb Write cache, 20 IOPS</li> <li>• Image - Win 7 64Bit( 2-3 images)</li> <li>• Non-persistent( Federal – 300, Non-federal – 3000)</li> <li>• Persistent ( Federal – 30 and Non-federal – 1970 )</li> <li>• Test/UAT environment will be built and would be in use for all patch testing and other application update testing ( DC2 )</li> </ul>

**NOTE: Design Decision:**

PVS v/s MCS: Cognizant has designed based on best practices, and will be using Xen Desktop 7.5 with PVS for 2000 persistent VDI Users, based on consultation with Citrix and WWT. Per Health Net's request, if PVS does not work as advertised, Cognizant will revert to MCS, and an additional storage of 150 TB will need be procured at that time, and cost will be charged to Health Net.

### 2.3.1.2 Solution Approach

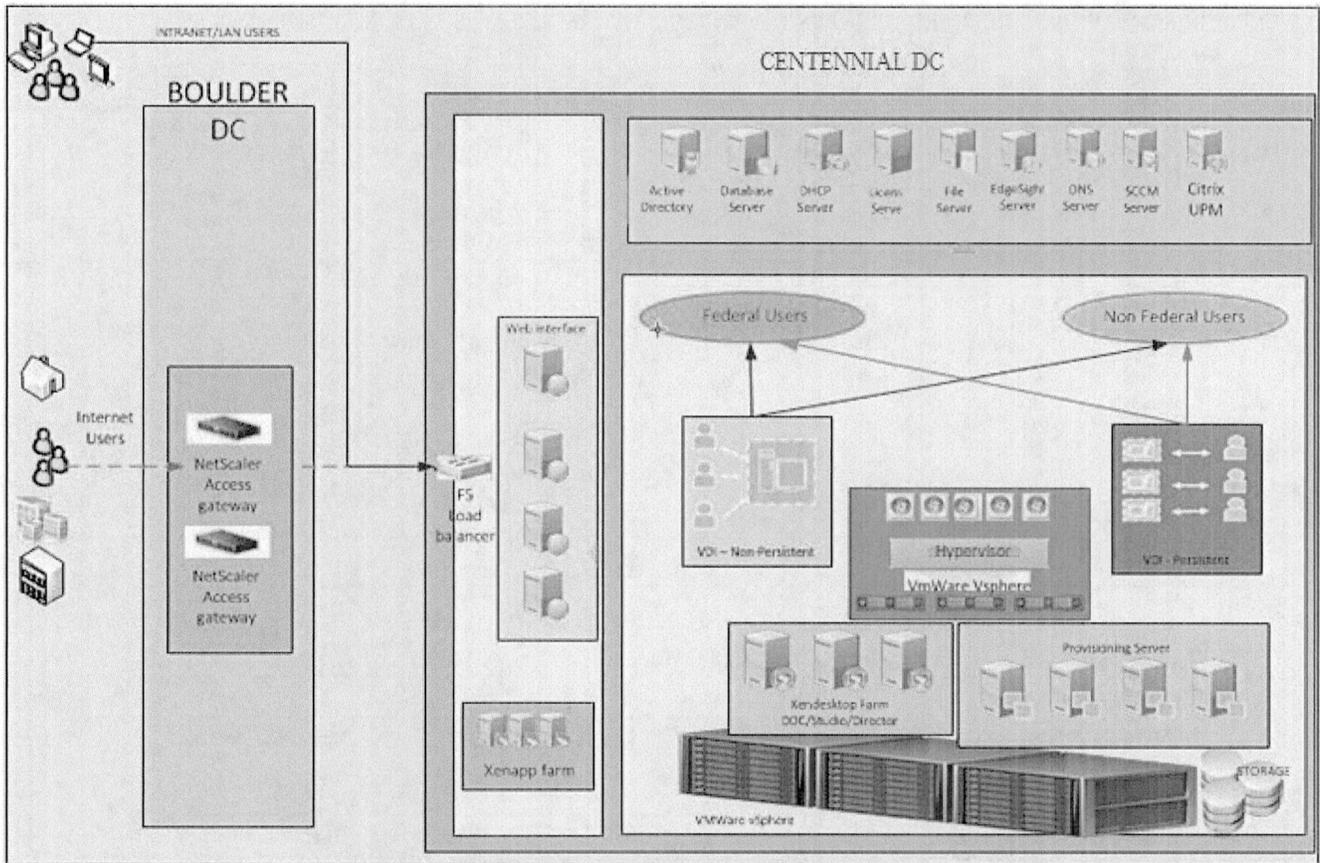

- The solution provided for Health Net uses Citrix Xen Desktop 7.5 with provisioning server over VMware vSphere platform.
- The Xen Desktop environment is a two-farm two site (Centennial and Phoenix) architecture.
- Citrix components like NetScaler servers, AD authentication and license servers would be common for both XenApp and Xen Desktop environment.
- Intranet Users within the LAN (Health Net) would directly hit the web interface placed in Centennial DC.
- Internet Users would hit the NetScaler Access Gateway placed in Boulder DC and would be routed to Web interface in Centennial DC
- The vDisks base image would have about 40-50 Health Net approved applications
- Citrix User profile management would be used for user profile solution
- The current VDI platform is designed for 5300 VDIs and can accommodate an additional 50-100 VDIs
- DR site would be the Phoenix DC and would cater to 200 Non-persistent and 60 Persistent virtual desktops which is 5% of 5300 VDI's.
- There would be no storage replication / SRM configuration for VDI Images, standard build of persistent and non-persistent VDI images will be maintained in DR site
- Dedicated Microsoft DHCP/DNS would be built in Centennial DC for VDI.
- Citrix XenApp 5.0 will be built for the legacy applications.
- A limited Citrix Xen App 5.0 environment will be built to host a small number of legacy applications that are not compatible with the Windows 7 VDI images. (Examples - IE 6, Hyperion, Access 97). This pool of servers will be used by a small number of clients and phased out as application requirements permit.
- For non-persistent VDI users will be able to save data only on their home drive (Network drives)
- Persistent VDI users will have Personal vDisks where users can store and install software.

**Components of the Xen Desktop 7.5 environment:**

S No.	Components	Physical/VM	No. of server	Configuration
1	NetScaler Access Gateway	Physical device	2	In Bolder DC not in scope
2	Storefront server	VM	10 Prod/test/DR	Win2012 r2, 8Gb ram, 4vpcu, 80gb.
3	License server	VM	3 Prod/test/DR	Win2012 r2, 8Gb ram, 4vpcu, 80gb.
4	SQL Database Server-Instances For XD and Xen App	VM	10 Prod/test/DR	60Gb/Instance
5	Desktop Delivery Controller (DDC)/Studio	VM	8 Prod/test/DR	Win2012 r2, 16Gb ram, 4vpcu, 120gb.
6	Desktop Director	VM	4 Prod/test/DR	Win2012 r2, 8Gb ram, 4vpcu, 120gb.
7	Provisioning Services server	VM	10 Prod/test/DR	Win2012 r2, 16Gb ram, 4vpcu, C: 120gb. D: 240gb
8	Virtual Desktop Agent (VDA)	VM		To be installed on images
9	Virtualization host infrastructure ( ESX/vSphere )	ESX/vSphere	5300VDI	XD/Xen App infrastructure and VDI execution
10	Citrix XenApp 5 for legacy application	VM	20 Prod	Xen App member server and infra servers (Win2k8r2, 16Gb ram, 4vpcu, 120gb.)
11	File server	appliance		Network drives
12	User profile Manager	appliance	30 Tb	Storage/Fileserver ( For 5300 users)
13	Active Directory	VM	2	Domain controller
14	DHCP /DNS	VM	3 Prod/DR	DC1 – 2 VM, active and passive, DC2 - 1 VM Win2012 r2, 16Gb ram, 4vpcu, C: 120gb.
15	Hitachi Storage	NAS	161TB +15Tb +10TB = 186Tb	161 Tb is for VDI, 15 TB is for infrastructure servers, UPM, 10 TB = Buffer.

Note: These are approximate figures and might changes during LLD phase.

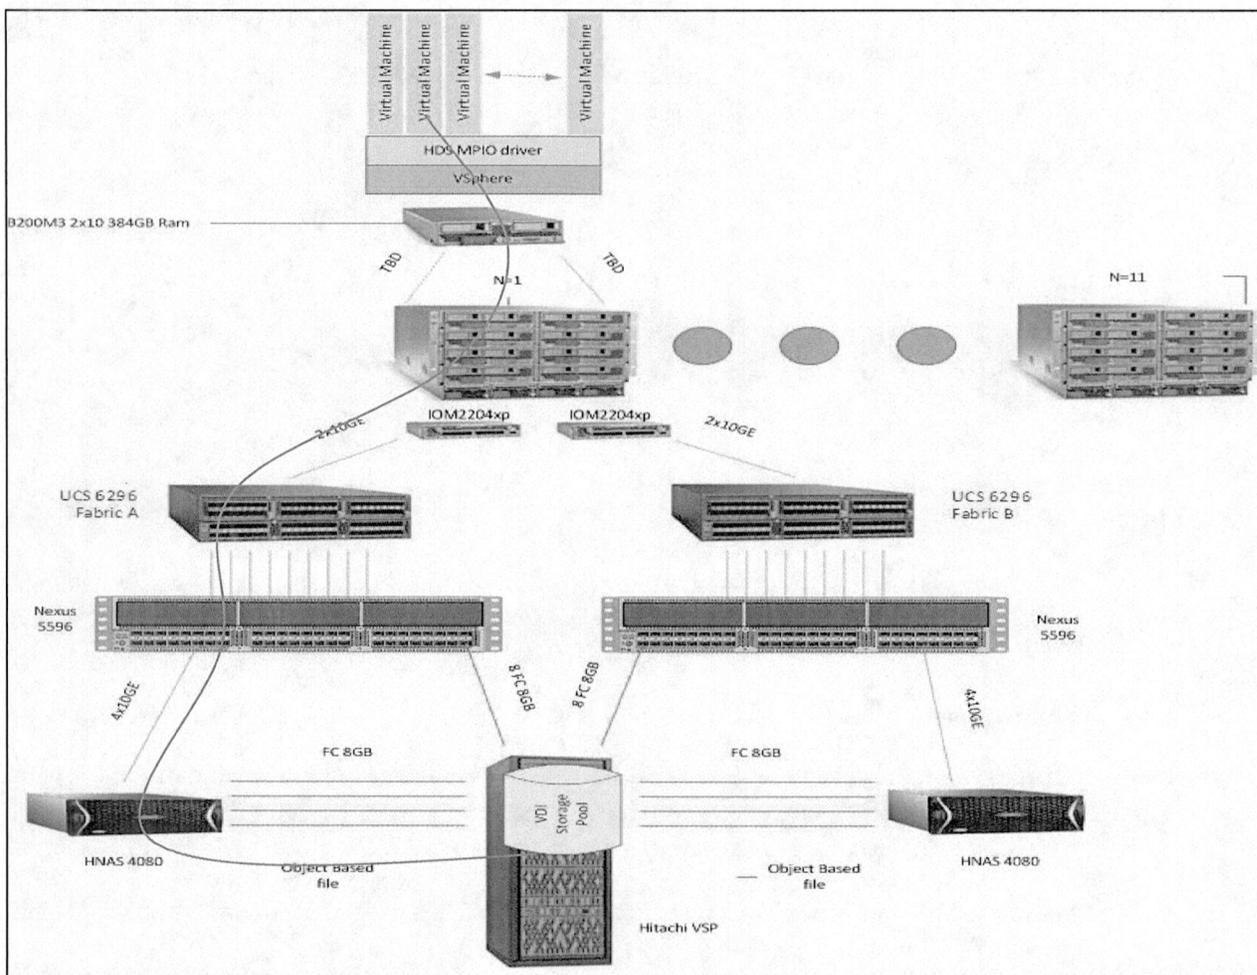

**VDI logical architectural design**

**UCS Infrastructure for VDI**

The diagram below depicts UCS blade server and Storage SAN connectivity:  
 (The red line shows the data flow for VDI object storage, it will be using NFS via the 10G network to the HNAS. The HNAS will be the mechanism to control the VDI storage pool on the VSP via 4 FC connections per controller.)

\*Note - Please refer to section 2.2.4 Servers/VM's for detailed information

Note: Refer Storage, Server/VM's section for detailed integration of VDI with vSphere and storage

**Sizing calculation done based on the VDI requirement:**

**Non-Persistent Image**

- Windows 7 64bit, 1vCPU, 2GB RAM, 60GB Disk, (approx. <10 GB write cache required).
- 12 IOPS estimated per Virtual desktop

**Persistent Image**

- Windows 7 64bit, 2vCPU, 8GB RAM, 80GB Disk
- 20 IOPS estimated per Virtual Desktop

#### VDI –BOM calculation in DC1 to cater for 5300 VDI's

	VCPU	RAM-Gb	Storage-Gb	Write Cache	IOP's	Assumption	Cores required
<b>Wave 1 – 3300 VDI</b>	3300	6600	240-Image	33000	49500	8 vcpu /Core Normal users	413
<b>Wave 2 – 2000 VDI</b>	4000	16000	240 for Image /80000 for PVD		40000	4 vcpu /Core Heavy users	1000

#### VDI – BOM calculation in DC2 to cater to 260 VDI's

	VCPU	RAM-Gb	Storage-Gb	Write Cache	IOP's	Assumption	Cores required
<b>Non-persistent -200</b>	200	400	480 GB	2000	2000	8 vcpu /Core	25
<b>Persistent -60</b>	120	480	240 for Image 2400 for PVD		1200	4 vcpu /Core Heavy users	30

#### Capacity Management

Please refer to the process document shared with Health Net for detailed understanding of the Capacity Management process flow. Typical high level activity to meet increase capacity of VDI requirements beyond 5300 users (e.g. to add additional 400 users)

- Assessments of the new VDI requirement like persistent and non-persistent, new application, image build requirement, etc.
- Follow the service request process
- Assess the current infrastructure capacity like server, storage space availability, network device capacity
- Assess the Network bandwidth i.e., Boulder to DC1, Health Net office link etc.
- Based on the assessment, if required procure new hardware like blade server, disk space, network module, software license etc.
- Design, build, test and deliver the VDI to users
- Document the build activity

### 2.3.1.3 Monitoring Tools

The section below describes the proposed tools solution for VDI service towers:

- Citrix EdgeSight for monitoring the citrix environment and real-time alerting
- Citrix EdgeSight for event management, performance management , trend usage and capacity planning
- Citrix EdgeSight reports will be shared with Infosec team
- SCCM for Software distribution/patching
- OEM tools like Microsoft Deployment tool for image management
- Event Flow Integration with HP OMi (MOM)

### 2.3.1.4 Service Deliverables

- Build of Citrix Xen Desktop and XenApp infrastructure
- Creation of Low level design document
- Creation and maintenance of build documents/ runbook
- Pilot testing before releasing to production
- Test and validation by end users
- Transition and handover to steady state support team
- Documentation of build and processes / runbooks for steady state team

### 2.3.1.5 Steady State Support – Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>• A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>• 24X7 Onshore support               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net Offices</li> <li>• Offshore – Bangalore (India) ; Coimbatore (India)</li> </ul>

### Level 1 Services

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L1 Team</i>	• Perform incident analysis
	• Perform initial troubleshooting to determine the nature of the issue
	• Collect basic user and session information
	• Update ticket and log all troubleshooting steps performed
	• Resolve basic Citrix related issues, connectivity problems and application related issues using existing KEDB articles
	• Escalate unsolved issue to Level -2

- |  |   |
|--|---|
|  | • If the issue is related to particular applications or other technologies and not the Citrix infrastructure, escalate the issue to the appropriate application or technology support units |
|  | • Generate requests for additional issue resolution guides as necessary   |
|  | • Assign user permission for Virtual Desktops   |
|  | • Citrix ICA/HDX Connectivity Issues  |
|  | • ICA settings / configurations   |
|  | • First level incident tickets from Citrix Edge Sight   |
|  | • Direct call handling from Health Net – Service request  |
|  | • Daily check list monitoring for Xen Desktop Site  |
|  | • Virtual desktop profile issues and login problems   |

### Level 2 Services

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

- |  |  |
|--|--|
| <i>L2 Team</i>   | • Perform intermediate issue analysis and resolution   |
|  | • Respond to VDI infrastructure alerts and system outages  |
|  | • Respond to critical monitoring alerts  |
|  | • Generate articles and issue resolution scripts   |
|  | • Perform basic server maintenance and operational procedures  |
|  | • Manage user profiles   |
|  | • Escalate unsolved ticket to L3 team or appropriate technology owner  |
|  | • Create periodic reports of server health, resource usage, user experience, and overall environment performance |
|  | • Configuration compliance reporting   |
|  | • Manage Desktop Catalog   |
|  | • Assign Desktops to end users   |
|  | • Manage Provisioning Server and Storage   |
|  | • License Management / Monitoring  |
|  | • Customize Desktop Group  |
|  | • Manage Desktop Delivery Controller   |
| • Update and Maintain Incident information in the KEDB |  |

### Level 3 Services

All unknown / new errors and problems will be resolved by L3 VDI Support group. This team will work with Vendors when required.

- |                |  |
|----------------|--|
| <i>L3 Team</i> | • Create Desktop Catalog   |
|                | • Perform advanced issue analysis and resolution   |
|                | • Perform maintenance and environment upgrades   |
|                | • Address high severity issues and service outages   |
|                | • Review periodic reports of server health, resource usage, user experience, and overall environment performance |

- |   |
|---|
| • Perform policy-level changes  |
| • Review change control requests that impact the Xen Desktop environment                    |
| • Create new image templates based on the project requirements                              |
| • Perform image updates on the configured images.   |
| • Adding or updating applications to Xen Desktop environment will be managed from SCCM 2012 |
| • Load balancing troubleshooting  |
| • HA and DR Support   |
| • Storage Awareness and Support   |
| • SQL Awareness and Support   |
| • Manage VMware ESX and Xen Desktop Delivery  |
| • Manage provisioning of Server and Storage   |
| • Update and Maintain Incident information in the KEDB                                      |

#### 2.3.1.6 Assumptions

- Non persistent - User data does not change, image remains the same.
- Persistent - User data will not be up to date as agreed with HN, and normal base image will be available and user's data can be stored on the network drives, this is specific to the DR site only.
- Netscaler would be transitioned to Cognizant delivery team at a later stage and will be supported
- Additional VDI requirements provided by Health Net will be implemented and Change Request will be submitted to Health Net

#### 2.3.1.7 Dependency on Health Net

The following are the dependencies which are required to be in place for successful implementation of this VDI environment.

- Network Connectivity, bandwidth and configuration
- Health Net to provide installation and configuration guide for applications in the Virtual desktop base images, Xen App member servers
- Netscaler Access Gateway configuration in Boulder DC

### 2.3.1.8 Risks and Mitigations

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	Bandwidth between Datacenter hosting virtual desktops and branch office	Medium	Medium	Review the bandwidth requirement with Health Net and upgrade the link
2	Netscaler Access gateway is in Bolder DC and supported by incumbent vendor	Medium	Medium	Co-ordinate with incumbent vendor for configuration / support

### 2.3.2 File Share and Print

#### 2.3.2.1 Highlights of Scope Validation

Description	Pre Scope Validation Workshop	Post Scope Validation Workshop
<b>Remote Location sites for File Shares</b>	<ul style="list-style-type: none"> <li>There were 8 large remote sites and 26 small remote sites for a total of 34 remote sites.</li> </ul>	<ul style="list-style-type: none"> <li>There are now 7 large sites including DC1 and 21 small remote sites for the file shares. Now there are total of 28 remote sites.</li> </ul>
<b>Failover solution for large remote sites</b>	<ul style="list-style-type: none"> <li>There was no failover solution</li> </ul>	<ul style="list-style-type: none"> <li>The proposed solution for "Failover Solution for Large Sites" is to take advantage of HDI's "Roaming Home Directories" feature. This feature takes advantage of Windows DFS capability of assigning network shares based on logon details (such as location). When a user is in a "failover" situation, they will launch a VDI session (located in Centennial) and DFS will dynamically determine that the HDI cluster in Centennial is now the "active" home directory for that session (and not their local HDI home directory) and will allow the user to read and write files to their directory in Centennial. The standby HDI server in Centennial is continuously populating its file system (each of the user's home directories) from the HCP so when a VDI session is launched in Centennial, the users' directories</li> </ul>

		have been pre-populated with metadata and stubs of their files.
--	--	---

### 2.3.2.2 Solution Approach

#### File Share Services

##### Design and Build Approach

- Design the target environment
- Install and configure HCP/HUS/HDI in the DC1 and DC2
- Setup HTTPS replication between DC1 HCP to DC2 HCP
- Build HDI infrastructure for File share in remote location in a phased approach
- Build C220 servers with hyper-V, with SCCM distribution point, print services and AV offload server. (refer to C220 server virtualization details)
- User / Shared data migration to new environment if required
- Manage the environments (HCP/HUS) for File Share in the Centennial and Phoenix DCs.
- Cognizant will utilize a client /server architecture with an appliance on the premises. The architecture is designed to move data back to the central location for both File and WAN optimization
- HDI (Hitachi Data Ingestor) cluster appliance would be placed in both the DCs
- The HCP/HUS (Hitachi Unified Storage) solution will reside in both ( Centennial and Phoenix ) DCs with storage capacity of 100TB for each DC, but depending on our design consideration during the LLD this number could be 50T. For example if we keep one copy local and the second copy in DC2 then the total usable will be 100TB, but if we do a local copy (two copies on a HCP before sending to DC2 (which will keep two copies as well) the useable will be 50TB. The reason it's half the size in option 1; a file that takes 1TB will need only 1TB , but in option2 if a file is 1TB and we make a local copy, then you will need a second TB and we have less risk but it comes at a price. Final design will be determined during the LLD.
- The HCP solution utilizes a non-tape archiving method and will be mitigated by configuring DC1 HCP to replicate to DC2 HCP environment.
- Primary and secondary DC will have one spare HDI appliance in case one HDI (Hitachi Data Ingestor) goes down and the remote site has a backup appliance
- HDI provides virus protection by working with scan server
- 7 HDI (Hitachi Data Ingestor) cluster appliances and 21 HDI (Hitachi Data Ingestor) single nodes in remote offices
- For the smaller 21 sites HDI appliance would leverage the existing SCCM server for AV scanning.
- The 7 large sites ( includes DC1 ) having clustered HDI appliance requires two scan servers out of which one would be the existing SCCM server and other would be new server for scanning
- MS Access and Data will be local to the remote site for performance but when file changes, the changed data gets synced up to the central repository over IP connectivity

#### High Level File share architecture

**Hardware Overview**

**HCP Overview:**

The Hitachi Content Platform, as a general-purpose object store, allows unstructured data files to be stored as objects. An object is essentially a container that includes both file data and associated metadata that describes the data.

Multi tenancy support allows the repository in a single physical HCP instance to be partitioned into multiple namespaces. A namespace is a logical partition that contains a collection of objects particular to one or more applications.

Data access to HCP namespaces would be authenticated and configuration of the access protocol. Authentication can be performed using Microsoft Active Directory® groups.

HCP supports encryption at rest capability that allows seamless encryption of data to the physical device. This ensures data privacy by preventing unauthorized access to the stored data.

**Hitachi Content Platform Services**

Policy	Description
<b>Protection</b>	Enforces DPL policy compliance by ensuring that the proper number of copies of each object exists in the system, and that damaged or lost objects can be recovered.
<b>Content Verification</b>	Guarantees data integrity of repository objects by ensuring that the content of a file matches its digital signature. Repairs the object if the hash does not match. SHA-256 hash algorithm is used by default.

<b>Scavenging</b>	Ensures that all objects in the repository have valid metadata, and reconstructs metadata in case the metadata is lost or corrupted, but data files exist.
<b>Garbage Collection</b>	Reclaims storage space by purging hidden data and metadata for objects marked for deletion, or left behind by incomplete transactions.
<b>Duplicate Elimination</b>	Identifies and eliminates redundant objects in the repository, and merges duplicate data to free space.
<b>Shredding</b>	Overwrites storage locations where copies of the deleted object were stored in such a way that none of its data or metadata can be reconstructed, for security reasons. Also called secure deletion. The default HCP shredding algorithm uses 3 passes to overwrite an object and is DoD 5220.22-M standard compliant.
<b>Disposition</b>	Automatic cleanup of expired objects. All HCP namespaces can be configured to automatically delete objects after their retention period expires.
<b>Compression</b>	Compresses object data to make more efficient use of system storage space. The space reclaimed by compression can be used for additional storage. A number of configurable parameters are provided via System Management Console (i.e. Scheduled service)
<b>Capacity Balancing</b>	Attempts to keep the usable storage capacity balanced across all storage nodes in the system. If storage utilization for the nodes differs by a wide margin, the service moves objects around to bring the nodes closer to a balanced state.
<b>Storage Tiering</b>	Determines which storage tiering strategy applies to an object, evaluates where the copies of the object should reside based on the rules in the applied service plan, and moves objects between running and spin-down storage as needed.

### HDI Overview:

#### Integrated Edge-to-core Storage Solution

Hitachi Data Ingestor (HDI) is an elastic and backup-free cloud on-ramp and filer. HDI with Hitachi Content Platform (HCP) is an integrated storage solution that is seamlessly scalable and backup-free for distributed consumers of IT, such as remote offices, branch offices (ROBO) and cloud storage users. Hitachi Data Ingestor provides a standard connection, or on-ramp, into the core data center without requiring application recoding and without changing the way users interact with storage today. Because HDI acts as a caching device, it gives users and applications seemingly endless storage and a host of newly available capabilities. These features reduce management time and cost by eliminating the need to constantly manage capacity, utilization and performance of the system.

- Content sharing and roaming home directories enable simplified access and management across different sites.
- Deploy a wide area content distribution framework.

- Data protection and file restore.
- No need for tape backup.
- Data security and encryption.
- Retrieve previous versions of a file as well as deleted files.
- Maintain file and directory access control.
- Automated migration.
- Easily transition from NAS and Windows Servers to HDI.

### HCP and HDI Encryption:

HDI and HCP uses DARE (Data at rest encrypted) encryption and Key management it installed when the system is initially installed, and can be done in several ways.

- HDI only
- HCP only
- HDI and HCP ( our planned configuration, will be revisited during LLD)

Once installed the key Blob is moved from the HDI to the central HCP during the first save, then removed from the HDI. Once on the HCP the key is partition over the nodes (4 currently for HN) and no on node will have the full key for protecting the Key. Currently will have 3 keys:

- DEK – Used to encrypt/decrypt data at rest in HDI
- KEK – Used to encrypt/decrypt the DEK embedded in the OS
- KEY Blob – created by encrypting the DEK with KEK and stored in the HCP

Note : For more details please refer to the PDF:

[https://hccpanywhere.hds.com/mobile/links/public/file/HDI%204.1%20DARE%20Details.pdf?token=Tm5aBSFdQMOgh3YXOVTO9sRpmCo8qWsd0WfLMb0i4yr8cjGMgIzCIUcKD56alZd7mPml0Inz9VKyEhtS\\_CidwI6x15Suzcm5qISPhsGStY0S9aDrGPX76Cc-KJXugvgJ](https://hccpanywhere.hds.com/mobile/links/public/file/HDI%204.1%20DARE%20Details.pdf?token=Tm5aBSFdQMOgh3YXOVTO9sRpmCo8qWsd0WfLMb0i4yr8cjGMgIzCIUcKD56alZd7mPml0Inz9VKyEhtS_CidwI6x15Suzcm5qISPhsGStY0S9aDrGPX76Cc-KJXugvgJ)

### HCP Replication

**Replication**, an HCP service, is the process of keeping selected tenants and namespaces in two HCP systems in sync with each other. This entails copying object creations, object deletions, metadata changes, and other information between the two systems. The HCP system in which the objects are initially created is called the **primary system**. The second system is called the **replica**. Typically, the two systems are in separate geographic locations and are connected by a high-speed wide area network.

To start the replication service, you create a **replication link** between the primary system and the replica. A replication link is a secure trust relationship between the two systems. It determines what is replicated and how data is transmitted between the primary system and the replica.

A link created on a primary system must be accepted by the replica before replication can begin. To the primary system, this link is an **outbound link** and to the replica, it's an **inbound link**.

You can also create a link remotely on the replica. When you do this, replication from the primary system to the replica begins right away, without the primary system having to accept the link. To the primary system, the link is still an **outbound link** and to the replica, it's still an **inbound link**.

Replication relies on SSL to ensure the integrity and security of transmitted data. Before you can create a replication link, the primary system and the replica must each have a valid SSL server certificate. Each system must also have the server certificate from the other system installed as a **trusted replication server certificate**.

Replication is asynchronous with other tenant and namespace activity on both the primary system and the replica. An HCP system can, therefore, develop a backlog of objects to be replicated.

You can choose to have the replication service work on objects with the oldest changes first, regardless of which namespaces they're in. Alternatively, you can have the service balance its processing time evenly across the namespaces being replicated. In this case, the service may replicate recent changes in some namespaces before older changes in others.

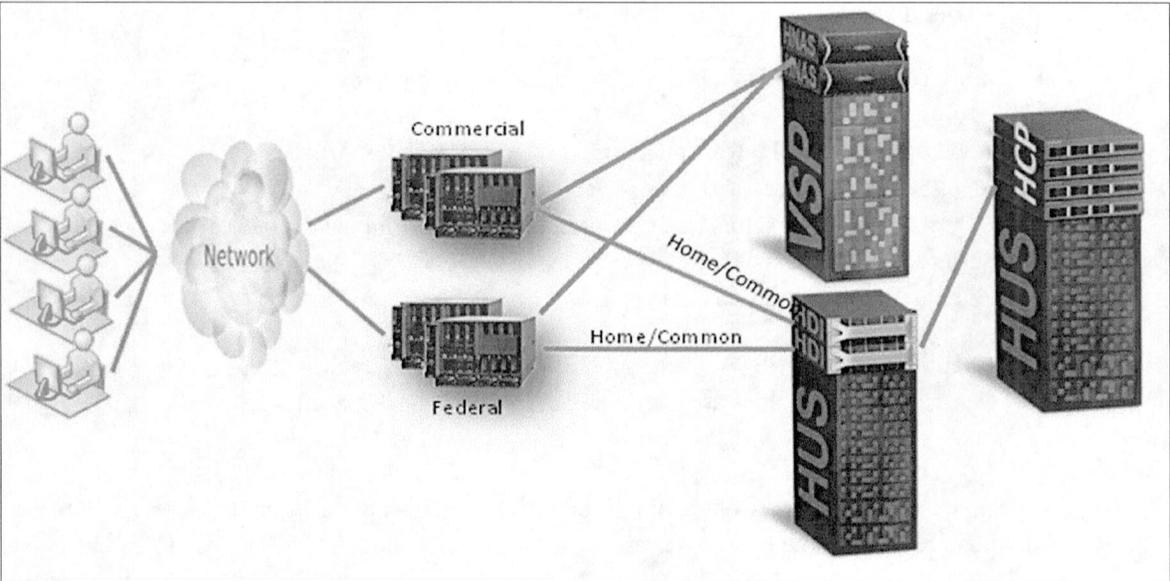

**Note :** For more details please refer to the PDF-

[https://hccpanywhere.hds.com/mobile/links/public/file/HCP%20Replicating%20Tenants%20and%20Namespaces%206.0.pdf?token=sYZO4aYyIkbr7LX1o645Xgy5g4TTnu3817rdj-5Rv6-I19UVmKRRNnQP0t2zttkcOnsTnRHPC6VdDC3qSjU6dHWJPaRIFRdEn9cBKah7C2Ox7IVCNJdxJ\\_GYgBGR](https://hccpanywhere.hds.com/mobile/links/public/file/HCP%20Replicating%20Tenants%20and%20Namespaces%206.0.pdf?token=sYZO4aYyIkbr7LX1o645Xgy5g4TTnu3817rdj-5Rv6-I19UVmKRRNnQP0t2zttkcOnsTnRHPC6VdDC3qSjU6dHWJPaRIFRdEn9cBKah7C2Ox7IVCNJdxJ_GYgBGR)

### **Datacenter**

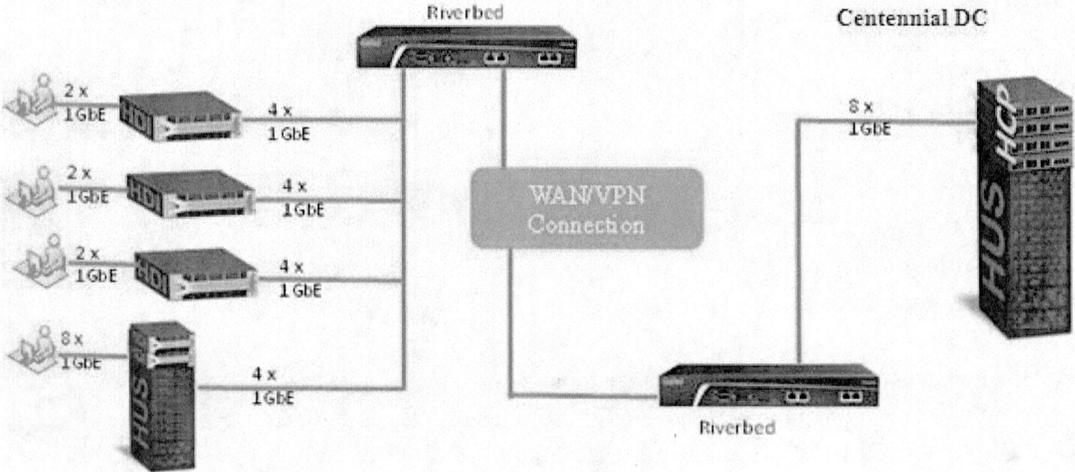

The diagram below depicts the HDI integration with UCS/storage for VDI user. This details the UCS/HNAS/HCP connectivity and HDI/HCP connectivity:

- UCS → HNAS: NFS 8 x 1GbE
- UCS → HDI: NFS 8 x 1GbE
- HNAS → HCP: HTTPS 8 x 1GbE
- HDI → HCP: HTTPS 8 x 1GbE

**Remote Sites –Health Net branch offices**

There are 7 large sites including a new one in DC1 and 21 small remote sites for the file shares. The 7 large sites will have clustered HDI appliance and smaller site will be configured with single node HDI. The diagram below illustrates the HDI architecture for remote offices. Users at Small Sites will connect to the single node HDIs via 2 x 1GbE connections on board the HDI. Users at Large Sites will connect to the clustered HDI via (up to) 8 x 1GbE connections (4 available on each HDI node). Each HDI cluster is backed by an HUS block storage system. The same 1GbE ports on the HDIs will be used to replicate/retrieve files to/from HCP at the Datacenter (through a Riverbed device). Each HCP node has 2 x 1GbE ports (both can be active) for a total of 8 x 1GbE ports available for receiving/retrieving files.

## HDI - Hardware details

- **Single node HDI** – 4 ports of 1 GbE each for data total of 4 ports
  - 1GbE port for maintenance port segregated from the data ports
  - The single node HDI will have a maximum cache size of 4 TB
- **Cluster Node HDI** – 4 ports of 1GbE each for data total of 8 ports
  - 1GbE for maintenance and management ports segregated from the data ports
  - The clustered node HDI will have a maximum cache size of 7TB.
  - The HDI cluster will be directly connected to the HUS 110.

**Replication:** the replication between the Centennial and Phoenix DC's will be through HCP via HTTPS over the WAN. The replication policies are configured at the HCP namespace level.

### Note:

- For the read/write failover from a single node HDI there has to be a single node HDI in the Centennial DC and for the read/write failover from a cluster node HDI there has to be clustered node HDI in the Centennial DC
- For read only failover from a single / clustered node HDI the HDI model does not matter whether it's a cluster or single node at the Centennial DC

Tools for managing the HCP and HDI Storage Management Unit (SMU) for the HDI  
SMU features:

- Data movement from distributed environments into centralized core infrastructures and maintains a local link to the content for fast retrieval
- Wide range of advanced storage features for simplified, automated and centralized management.
- Content sharing across a network of HDI systems
- File restore
- NAS migration

Hitachi content platform tool for HCP

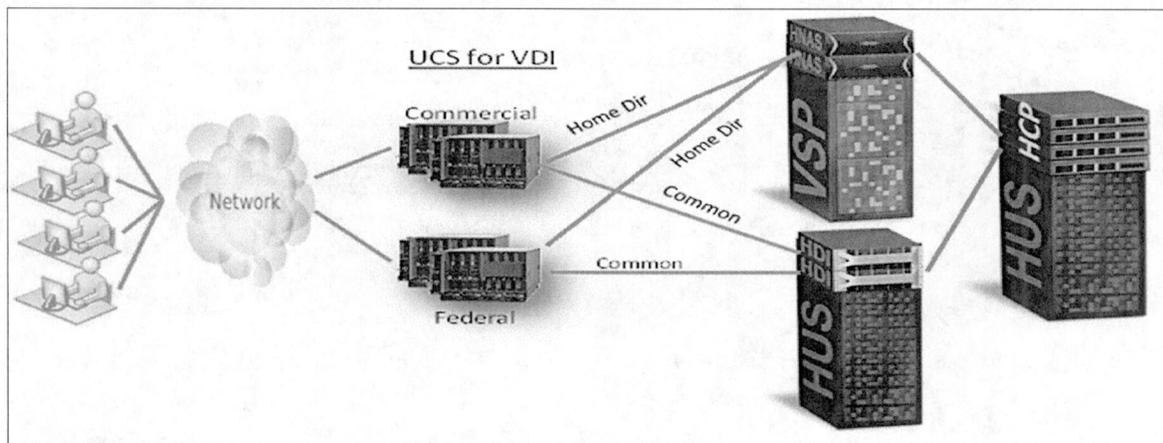

HCP features:

- Multi tenancy and scalability
- High-density, high-efficiency storage
- Reliable, utility-grade architecture
- Active data protection
- Easy to set up, manage and adapt
- Unique metadata gathering and intelligence tools
- Support for legacy, contemporary and emerging storage protocols and media types
- Safe, secure file synchronization and sharing with Hitachi Content Platform Anywhere
- Integrated with Hitachi Data Ingestor to connect remote and branch offices

### Failover Solution for Large Remote Sites

The proposed solution for "Failover Solution for Large Sites" is to take advantage of HDI's "Roaming Home Directories" feature. This feature takes advantage of Windows DFS capability of assigning network shares based on logon details (such as location). When a user is in a "failover" situation, they will launch a VDI session (located in Centennial) and DFS will dynamically determine that the HDI cluster in Centennial is now the "active" home directory for that session (and not their local HDI home directory) and will allow the user to read and write files to their directory in Centennial. The standby HDI server in Centennial is continuously populating its file system (each of the user's home directories) from the HCP so when a VDI session is launched in Centennial, the users' directories have been pre-populated with metadata and stubs of their files. The UCS/VDI solution will use CIFS shares on the HDI (backed by HUS block storage) for all user data files and use NFS/CIFS shares on HNAS (backed by VSP) to store all other information. The connections shown in the diagram are from UCS to HDI and HCP (not to HUS/VSP).

- UCS → HNAS: NFS 8 x 1GbE
  - UCS → HDI: NFS 8 x 1GbE
- HNAS → HCP: HTTPS 8 x 1GbE HDI → HCP: HTTPS 8 x 1GbE

#### 2.3.2.3 Monitoring Tools

The section below describes the proposed tools solution for File Share service towers:

- Hitachi command suite tools - centralized management for Hitachi storage system, availability, capacity and performance monitoring
- Hitachi File systems Manager ( HFSM) – for managing HDI and integrating SNMP traps to HP OMi for alerts
- HDI single nodes are managed by GUI connected via browser
- HCP has Admin GUI built in to the solution (connect via browser) for management
- Event Flow Integration with HP OMi (MOM)

#### 2.3.2.4 Service Deliverables

- Design and build File share HDI solution
- Testing the Failover of Single node and clustered HDI access from remote office

- Testing the failover of VDI users for file share

2.3.2.5 Steady State Support – Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>• A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>• 24x7 Onshore support: 8x5 dedicated support – (Federal onsite) with the rest on call</li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net Offices</li> <li>• Offshore – Bangalore ; Coimbatore</li> </ul>

**Level 1 Services**

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L1 Team</i>	• Monitoring of File share for alert
	• Assist in user permission and rights assignment
	• Fix level 1 issue and incident response
	• Co-ordinate with vendor for hardware failures/replacements
	• Update and Maintain Incident information in the KEDB

**Level 2 Services**

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

- Incident Management Services
- Change Management Services

<i>L2 Team</i>	• CIFS share configuration/Administration
	• File System Administration
	• Quota Management
	• Replication configuration and administration
	• NDMP backup/recovery co-ordination with backup team
	• Checkpoint Administration
	• DFS namespace configuration
	• HDI, HCP, HUS, and HNAS Configuration
	• Antivirus scanning integration with AV team.
	• Update and Maintain Incident information in the KEDB

**Level 3 Services**

All unknown / new errors and problems will be resolved by L3 file and print Support group. This team will work with Vendors when required.

<i>L3 Team</i>	• Co-ordinate with vendor for code level updates
	• Plan and co-ordinate during DR exercises
	• Plan and design file services architectural changes
	• Performance management and capacity planning
	• Update and Maintain Incident information in the KEDB

**2.3.2.6 Dependency on Health Net**

- Testing File Shares after they are moved to Cognizant DC
- Availability of Knowledge Management
- Access to servers to move data to the HDI appliance in the remote sites.
- Detail session on health net guidelines for configuring the HCP policies

**2.3.2.7 Risk and Mitigation**

None

**Print Services**

**2.3.2.8 Highlights of Scope Validation**

Description	Pre Scope Validation Workshop	Post Scope Validation Workshop
<b>Scope</b>	<ul style="list-style-type: none"> <li>• Migrate print queues from existing print servers to new servers</li> <li>• There are 941 Printers / Print queues in the existing environment which has to be migrated</li> <li>• Printers are spread across in 32 different locations</li> <li>• All the print settings has to be retained</li> <li>• High availability has to be configured if a print Server fails at branch location</li> </ul>	<ul style="list-style-type: none"> <li>• Migrate print queues from existing print servers to new servers which will be on the SCCM distribution server in the branch locations</li> <li>• There are 941 Printers / Print queues in the existing environment which has to be migrated</li> <li>• Printers are spread across in 32 different locations for 30 branch location the print queues will be configured on the SCCM distribution points and other 6 location where there is no SCCM DP servers were the print queues needs to configured will be configured on the central print servers in the Centennial datacenter and the fail back of those will be in servers in the phoenix</li> </ul>

		<p>datacenter. And the same server will host the backup queues for the 26 locations as well.</p> <ul style="list-style-type: none"> <li>• All the print settings has to be retained</li> <li>• High availability has to be configured if a print Server fails at branch location that will in the respective data centers.</li> </ul>
--	--	---

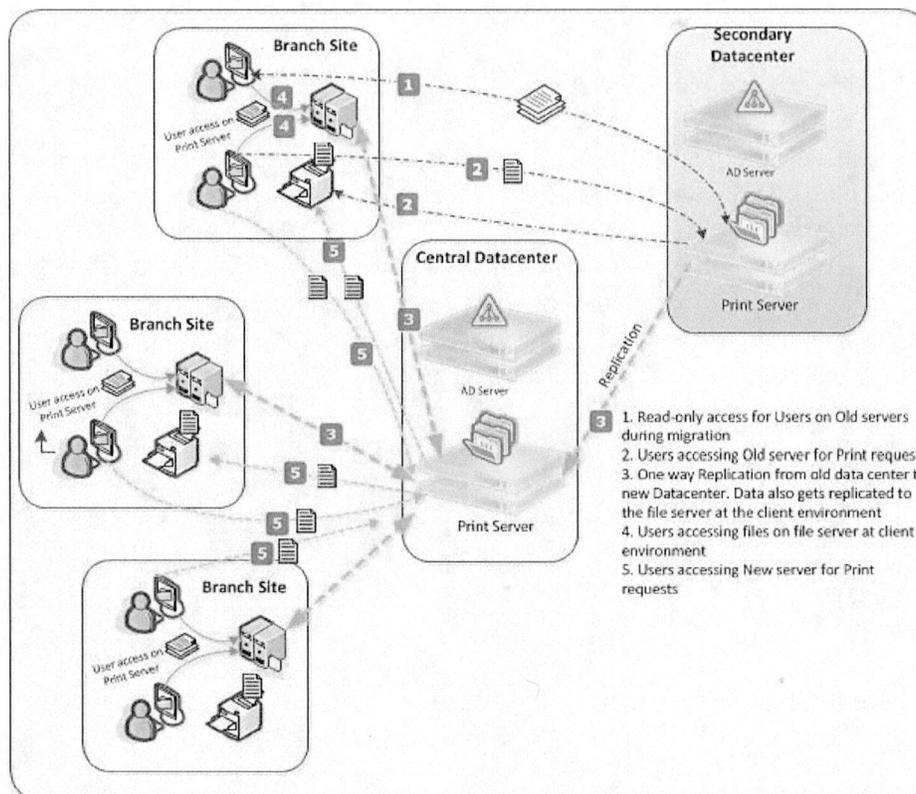

### 2.3.2.9 Solution Approach

Health Net currently has 941 printers spread across 32 locations and there are 30 locations there are print servers which is also configured on the existing SCCM 2007 servers. There is a backup print server in the IBM owned Boulder datacenter in which the backup queues for some of the major sites configure. There are AD domain controllers in Boulder Datacenter. The user send's the print request and gets it authenticated from the respective Domain controller and the request after authentication goes to print server, the print job gets spooled in the print server and is then send to the respective printer for printing that job.

The diagram below gives the current environment overview.

- Design Deploy and migrate the Print service from the existing print server to the new Printer server which would be hosted on the SCCM 2012.
- There will be a Print Servers installed and configured at Primary datacenter with 30 print queues. All the 30 print queues will be configured on the Primary datacenter, backup will be in the secondary datacenter as a part of DR.

## Print Service High Level Architecture

- **Design and Build Approach**

- Designing the target environment
- Creating implementation Plan
- Procurement of required infrastructure
- Installation of infrastructure in our DC
- Build infrastructure for print service server on the new SCCM 2012 servers
- Manage the environments for print servers as backup for the branch location in the Centennial and Phoenix DCs.

- **Design Consideration and approach**

- SCCM Distribution point Servers will be deployed onto 30 locations; same Servers will be configured as Print Servers by adding the necessary print queues applicable to that respective location users
- Print Servers will be loaded with 32 bit and 64 bit drivers to cater both types of end users
- Print management Export / Import utility will be used to migrate the print queues from existing Print Servers to new ones
- All the existing printer settings will be retained as it is
- New Print queues will be published in Active Directory so that Users can add the print queues

- Print queues can be deployed through group policy as well if that is feasible in Health Net environment
- **High availability**
  - There will be Print Servers installed and configured at the Primary datacenter with 30 print queues for the DR and will be using the Secondary Datacenter and vCenter replication technology to copy the print queues into the secondary Datacenter Servers
  - All the 30 print queues will be configured on the Primary datacenter backup will be in the secondary datacenter as a part of the DR
  - If any local print Server fails then backup print queue from Datacenter will be published so that users can access the print queue and print jobs can be continue (failover is manual operation)
  - Print Servers will be configured for high availability to address the DR scenario

## Hardware Overview

### Datacenters and Branch locations

S No	Specification	Configuration
1	Print server in Centennial DC (utilizing the SCCM server)	Processor: 4 x Quad Core RAM: 16 GB Disk Space: 72 GB
2	Print server in phoenix DC(utilizing the SCCM server)	Processor: 4 x Quad Core RAM: 8 GB e Disk Space: 72 GB
3	Print server in the Branch site (utilizing the SCCM server)	Processor: 4 x Quad Core RAM: 4 GB Disk Space: 72 GB

### Aspect that impact this design

There will be no impact on the current environment because the existing printers will be exported from the existing servers and will be imported on the target server

### Test

One machine should be provided with Windows 2003 Standard edition installed. This machine would be used for testing purposes, since we will install 64 bit driver's for existing printers and then check if the printer's functionality has been affected, if the test result are positive then we would proceed with the migration of existing printers on windows 2008 R2 OS.

If installation of 64 bit drivers affect any functionality of existing printing environment then we will not be able to proceed (export the settings and import it to the target) with migration of print servers on Windows 2008R2 OS. This way we can keep the existing environment unaffected as well as check the 64 bit driver compatibility issues if any.

This test virtual server will be built using VMware virtual machine software. This server will be configured with:

- 2003 standard edition
- Print spooler
- Printer drivers.(32bit and 64bit)
- Network printers

#### 2.3.2.10 Monitoring Tools

The list below describes the proposed tools solution for print services:

- HP OMW to monitor the availability of Print service ( spooler ) and servers
- Event Flow Integration with HP OMi (MOM)

#### 2.3.2.11 Service Deliverables

This list below describes the service deliverables for print services:

- Cognizant will utilize a client /server architecture and SCCM distribution point as the print server for the branch location.
- There will be a Print Servers installed and configured at Primary datacenter with 30 print queues
- All the 30 print queues will be configured on the Primary datacenter backup

#### 2.3.2.12 Steady State Support - Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>• A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>• 24X7 Onshore support               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net Offices</li> <li>• Offshore – Bangalore (India) ; Coimbatore (India)</li> </ul>

The high level activities for Print services are mentioned below:

- Support Services will be provided in accordance with the procedures documented in the SOPs and will include the following :

<i>Support services (L1, L2 and L3 )</i>	• Monitoring and ensuring availability of print servers
	• Perform incident analysis
	• Perform initial troubleshooting to determine the nature of the issue
	• Update ticket and log all troubleshooting steps performed
	• Co-ordinate with vendor for hardware failures/replacements
	• Reload the printer drivers
	• Print queue management
	• Perform print server configuration and administration
	• Install and configure new printers

- |  |
|--|
| <ul style="list-style-type: none"> <li>• Capacity planning</li> <li>• Review and update documentation</li> </ul> |
|--|

### 2.3.2.13 Assumptions

- Access to all the existing print servers
- Printers are compatible with 64/32 bit drivers and Windows 2008 / 2012
- Availability of Local IT for testing the printers post migration
- Technical information about product should be shared before migration begins

### 2.3.2.14 Risk and Mitigation

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	Impacts Design and Migration Plan Impacts High Availability Design and Failover	High	High	Prepare Inventory List using Manual and Discovery Tools ( HP) which would result in reduced cost and timelines
2				
3				
4	Migrating print data to Cognizant DC	Medium	Medium	Before migrating print data the details will be collected and tested on the test machine then it will rolled out to the production network

### 2.3.3 Deskside

#### 2.3.3.1 Highlights of Scope Validation Workshop

Description	Pre Scope Validation Workshop	Post Scope Validation Workshop
Scope	<ul style="list-style-type: none"> <li>• Field support</li> <li>• Managed print services support</li> <li>• Asset provisioning ( Including tagging and labeling)</li> <li>• Asset decommissioning</li> </ul>	<ul style="list-style-type: none"> <li>• Field Support</li> <li>• Hardware break fix</li> <li>• IMAC for Desktop and Laptop</li> <li>• Dispatch support to remote sites</li> <li>• Refresh of Laptops and Desktops based on refresh cycle</li> <li>• Lease refresh program</li> <li>• Asset provisioning ( Including tagging and labeling)</li> <li>• Asset decommissioning</li> <li>• Provide remote resolution for non-hardware related problems</li> <li>• Install custom software per request</li> <li>• Support Windows Desktop operating system related issues on End User devices</li> <li>• Reconfigure applications based on Service requests</li> <li>• Reinstall approved applications based on service requests</li> <li>• Support devices connected to end users devices like scanners and printers</li> <li>• Support remote and VPN users through remote support</li> <li>• Managed print services support               <ul style="list-style-type: none"> <li>○ Printer queues are managed by Desk-side team while Physical printers are managed by IKON. Refer the list of all published printers (Appendix section)</li> <li>○ Resolution of issues connecting, printing or mapping to networked printers on workstations</li> </ul> </li> </ul>

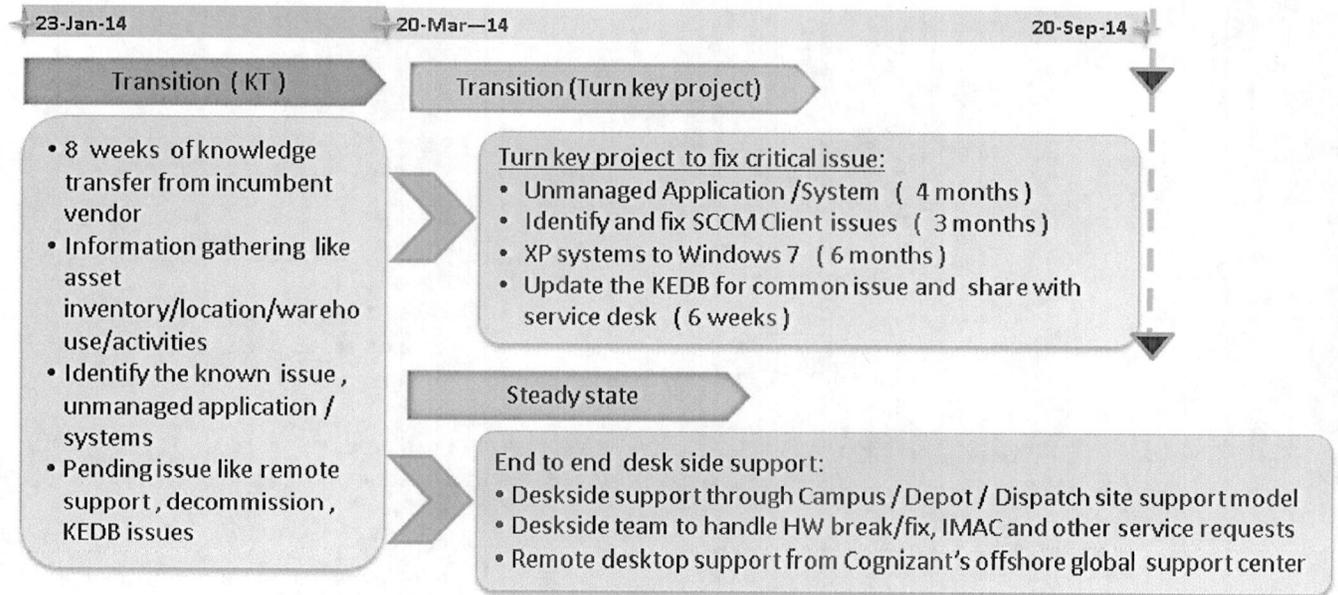

#### 2.3.3.2 Solution Approach

The Deskside support design is specific to Health Net's environment across multiple locations.

##### **Solution considerations**

Cognizant will take over desk side services from Incumbent and post transition, begin steady state operation and fix the critical issue via turn key projects in parallel.

The diagram below depicts the Deskside solution approach:

The details of turnkey projects are depicted below:

<b>XP systems to Windows 7</b>	<ul style="list-style-type: none"> <li>Migrate the remaining XP systems to Win 7</li> <li>Duration – 6 Months ( By end of Q3)</li> <li>Resourcing - Commercial 3 FTE and Federal 1 FTE</li> </ul>
<b>Unmanaged Application /System</b>	<ul style="list-style-type: none"> <li>Packaging and roll out of ~ 125 unmanaged Application</li> <li>Conversion of users of the 125 apps to managed system</li> <li>Duration – 4 Months</li> <li>Resourcing - Offshore 3 FTE and onsite 2 FTE</li> </ul>
<b>Identify and fix SCCM Client issues</b>	<ul style="list-style-type: none"> <li>Identify and Fix ~ 200 Desktops not responding to SCCM</li> <li>Duration – 3 Months</li> <li>Resourcing - Commercial 1 FTE and Federal 1 FTE</li> </ul>
<b>Backlogged and legacy issues</b>	<ul style="list-style-type: none"> <li>Fix Backlogged and legacy issues</li> <li>Update the KEDB for common issue and share with service desk for First call resolution</li> <li>Duration - 3 Months</li> <li>Resourcing - Offshore 2 FTE and onsite 2 FTE</li> </ul>

- Dedicated Service Model, VIP Support Requirement
- Provide hands-and-feet support at Health Net locations for hardware break/fix, IMAC and any other Desk-side support requests
- On call Support for critical incidents and VIP users
- Deskside support through Campus Site, Depot Model and Dispatch Model

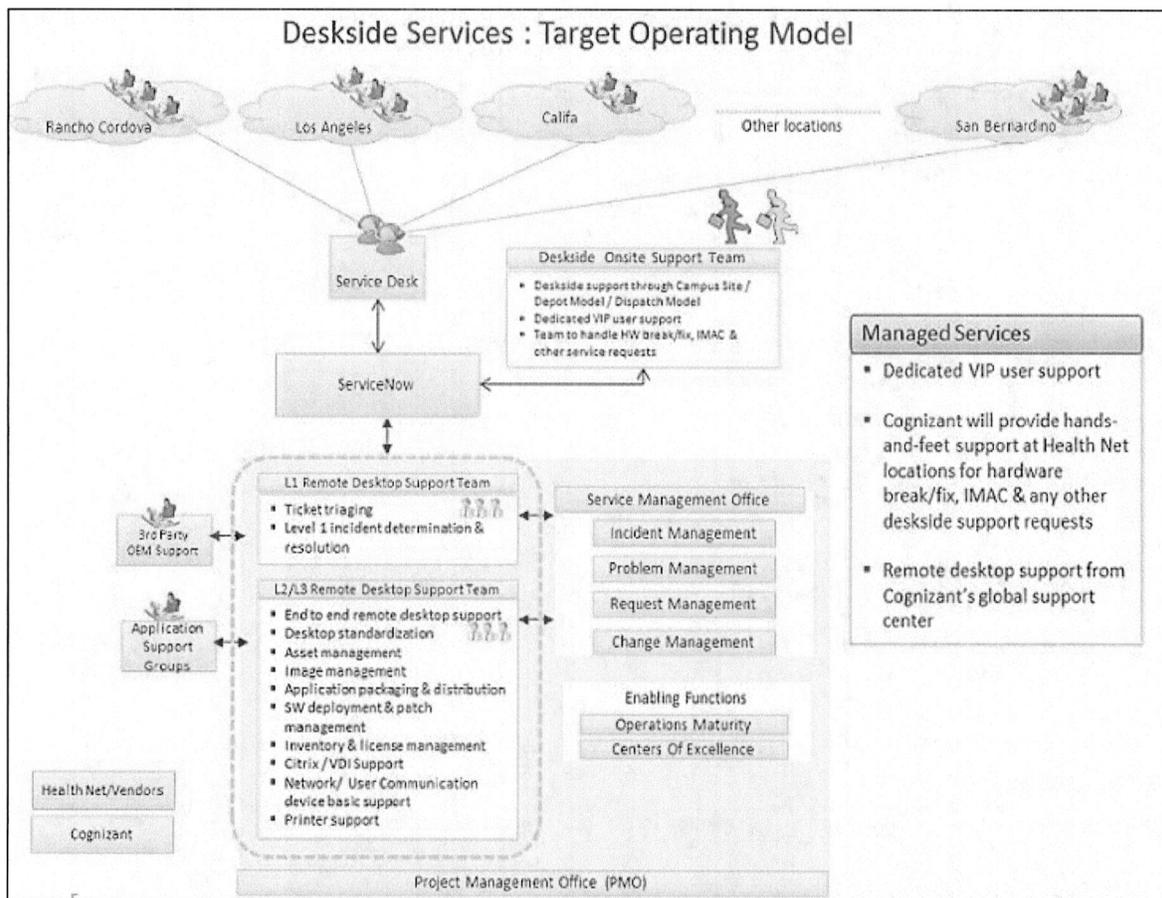

- Deskside support is further categorised as offshore remote support and onsite remote Deskside support,
  - For Commercial (Health Net environment) both offshore remote support & onsite remote Deskside support are available,
  - For federal (Health Net environment) due to regulations only onsite remote Deskside support is available
- Asset Refresh – ( Desktop/Laptop)
  - Cognizant understands that Health Net has an asset refresh policy of 36 months for desktop/Laptop. Asset refresh activity is executed in batches over a period of 36 months and the cycle continues.
  - Asset Refresh service includes provisioning a new desktop /laptop to users including:
    - Create and maintain planning/tracker of the refresh activity
    - Single point of contact for refresh co-ordination and status reporting to Health Net
    - Inventory management of Hardware at the warehouse
    - Verifying the build of the new system as per the Health Net build requirement and ship to Health Net office location
    - Cognizant shall co-ordinate and manage the receipt of new hardware at warehouse
      - Upon delivery of new hardware at warehouse, Cognizant would verify delivery content and report any discrepancies to Health Net and will work with vendor to remediate it.
      - Managing return of damaged item to the vendor
      - All equipment will be received with asset tag and if asset tags are missing Cognizant will add asset tag to the equipment.
    - Validate and report purchase order V/s actual system/equipment delivered across location for business property tax payment
    - Report to Health Net regarding equipment that is stolen/lost/untraceable.
    - Populate and update the asset information in the Symantec Altiris tools for new, upgraded and decommissioned hardware
    - During transition phase, Cognizant would work with Health Net and incumbent vendor to understand the asset refresh process and depot service process.

**Site locations are classified into Depot site, Campus site, Dispatch site and Depot support site**

Site classification	Description
<b>Depot site</b>	<ul style="list-style-type: none"> <li>• Dedicated Onsite Support</li> <li>• Number of users &gt; 350</li> <li>• Provisioning / De-provisioning of hardware</li> <li>• Spares / Inventory</li> </ul>
<b>Campus site</b>	<ul style="list-style-type: none"> <li>• Dedicated Onsite Support</li> <li>• Number of users &gt; 150 outside California</li> <li>• Number of users &gt; 250 inside California</li> </ul>
<b>Dispatch site</b>	<ul style="list-style-type: none"> <li>• No dedicated Onsite Support</li> </ul>

	<ul style="list-style-type: none"> <li>• Dispatch model if onsite support is required</li> <li>• # of users between 5 and 250 in California</li> </ul>
<b>Depot support site</b>	<ul style="list-style-type: none"> <li>• No dedicated Onsite or dispatch Support model</li> <li>• Hardware shipped to nearest depot location for support</li> <li>• Number of users less than 5</li> <li>• Small/Home Office</li> </ul>

**Target Operating Model for various locations**

The table below details out the activities and responsibilities for all inbound new/Leased hardware to depot (ware house), dispatching installed system to other Health Net location and decommissioned equipment

Deskside / Depot Responsibility	Cognizant	Health Net
Cognizant to provide rolling three month forecast report to HN	X	

Cognizant to provide monthly procurement forecast	X	
Cognizant to provide monthly end of lease report	X	
Hardware procurement		X
Receiving New Hardware at Depot location	X	
Upon delivery of new hardware at warehouse , cognizant would verify delivery content and reporting any discrepancies to Health Net	X	
Managing return of damaged item to the vendor	X	
Inventory management of Hardware at the depot	X	
Identify and allocation of new system to Health Net users		X
Co-ordinate with Health Net for asset tagging all the new hardware received at warehouse and updating the asset management system	X	
Report to Health Net regarding equipment's that is Stolen/lost/untraceable	X	
Dispatch the system to Other location	X	
Dispatch of hardware (Monitor, keyboard, etc.) to other location	X	
Co-ordinate for transportation and distribution on system to the health net location as needed by end users	X	
Shipping responsibility , insurance and charges	X	X
Identify and approval to decommission hardware		X
Cognizant to provide asset management report identifying the equipment that has been removed	X	
Degauss all decommissioned equipment		X
Shipping decommission equipment from remote location to Depot location	X	X
Packaging and shipping the equipment to Vendor	X	
Asset update in Altiris for decommissioned hardware	X	X
Health Net owned ( Decommissioned ) equipment disposal for recycling		X
Cognizant would return HealthNet leased hardware to the lessor as per the Health Net process	X	
Cognizant would relocate Health Net owned assets (Decommissioned , removed , not used ) in a secured area as designated by health net	X	

### 2.3.3.3 Monitoring Tools

This section describes the proposed tools solution for Deskside service towers:

- OEM tools like Microsoft Deployment tool for image management
- Flexera Admin Studio for Application packing
- SCCM 2012 for Software distribution/patching
- Symantec Altiris for EUC ( desktop/laptop) asset lifecycle management
- Manage Engine Asset Explorer for asset management

### 2.3.3.4 Service Deliverables

- Deskside service transition and support

### 2.3.3.5 Steady State Support - Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>• A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated support – Offshore (Non-federal) with on call</li> <li>• 24X7 Onshore support               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Non-federal) with the rest on call</li> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net Offices</li> <li>• Offshore – Bangalore (India) ; Coimbatore (India)</li> </ul>

Support Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>Support services (L1, L2 and L3)</i>	• End to end remote desktop support
	• Resolution of issues connecting/printing or mapping to networked printers on workstations
	• Define services and standards for supporting the desktop/laptop and End User capabilities
	• Deskside support(Local) for unmanaged application installation and troubleshooting
	• Support for desktop, laptop, thin client and VDI standard configurations
	• Assist remote access users with accessing a variety of applications at various locations
	• L1 Remote Desktop Support Team <ul style="list-style-type: none"> <li>○ Ticket triaging</li> <li>○ Level 1 incident determination and resolution</li> </ul>
	• L2/L3 Remote Desktop Support Team <ul style="list-style-type: none"> <li>○ End to end remote desktop support</li> <li>○ Asset tracking and update</li> <li>○ Print Queue Management</li> <li>○ Print driver update on print servers</li> <li>○ Setup and configuration of local printers</li> <li>○ Install and configure custom software's based on service requests</li> <li>○ Setup of new print queues for new printers in network</li> <li>○ Decommission of print queues for retired printers</li> <li>○ Trouble shoot operating and application related issues on end user devices</li> </ul>
	• Provide installations, removals, decommissions and break-fix for all End User Resources
	• Vendor coordination

- |   |
|---|
| <ul style="list-style-type: none"> <li>• Provide personal productivity services (e.g. PDA support) and office automation services, including setup, proper use, troubleshooting and RMAs for devices</li> </ul> |
| <ul style="list-style-type: none"> <li>• Perform installation and support services for user telecommunication devices</li> </ul>  |
| <ul style="list-style-type: none"> <li>• Image, configure and set up workstations and VDI's</li> </ul>  |
| <ul style="list-style-type: none"> <li>• Remotely diagnose equipment</li> </ul>   |
| <ul style="list-style-type: none"> <li>• Configure End User workstation/VDI's to utilize printer</li> </ul>   |
| <ul style="list-style-type: none"> <li>• Adjust and resolve issues with display properties, including screen resolution and color depth</li> </ul>  |
| <ul style="list-style-type: none"> <li>• Assist remote access users with accessing a variety of applications at various locations in different environments</li> </ul>  |
| <ul style="list-style-type: none"> <li>• Provide end user operating instructions and guidance</li> </ul>  |
| <ul style="list-style-type: none"> <li>• Support/troubleshoot issues with locally installed applications (standard and non-standard)</li> </ul>   |
| <ul style="list-style-type: none"> <li>• Managed print services support</li> </ul>  |
| <ul style="list-style-type: none"> <li>• Update and Maintain Incident information in the KEDB</li> </ul>  |

#### 2.3.3.6 Assumptions

- PDA device installation at new facilities or locations will be considered as a separate project
  - Overall, Cognizant does not envisage more than 10 new communication instrument installations per month
  - For all locations with less than 5 devices, a new device will be dispatched in case of hardware repair and office location staff will dispatch the faulty machine to depot location
  - Hardware maintenance will be supported by the respective support teams
  - Any migration activity will need to be handled as a separate project
  - Solution is based on the current infrastructure and scope
  - Support of applications issues and configuration on best effort basis which doesn't have any support groups or documentation
  - Health Net to provide standard and supported application catalog to Cognizant during knowledge transfer sessions
- Turn Key Project assumptions:
- Identify, review, fix the common issues and build the Known Error Database
  - 10% of 14,000 desktop/Laptop does not connect to SCCM
  - 70% of above issue are in Rancho Cordova and Woodland hills office
  - 30% of above issue are in small office
  - Desktop refresh activity - XP migration for the remaining system having dependency on applications will be done over a period of time
- Steady State Assumptions:
- Locations with less than 5 – 10 devices:
  - New device will be dispatched in case of hardware repair
  - Office location staff will dispatch the faulty machine to depot location
  - Health Net will provide the required infrastructure and access to perform the services in scope
  - Cognizant will use Health Net facility for desktop/laptop staging and build
  - Health Net will share the existing knowledge base

- Asset procurement (desktop, laptop, spares, consumables) and asset disposal are not considered as part of scope however, will be facilitated by Cognizant and managed by Health Net contracted Vendor

#### 2.3.3.7 Dependency on Health Net

- Health Net will provide the required infrastructure and access to perform the services in scope
- Cognizant will use Health Net facility for desktop/laptop staging and build
- Health Net will share the existing knowledge base
- Asset procurement (desktop, laptop, spares, consumables) and asset disposal are not considered as part of scope however, will be facilitated by Cognizant and managed by Health Net contracted Vendor
- UAT testing for the application package and images
- Pilot tester identification for Image, Application package, Software and Patch testing

#### 2.3.3.8 Risks and Mitigations

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	Infrastructure and access readiness for transition	High	High	Cognizant to work with Health Net POCs to receive and verify required infra and access for transition
2	Non-availability of SME's Stakeholders for Transition	High	High	Health Net to allocate SMEs for driving the transition plan
3	Any scope change because of in-flight projects like Win 7 Migration etc.	Medium	Medium	Cognizant SME participation in current in-flight Projects
4	Missing or unclear documentation/definition of Process, SOP, Roles and Responsibilities	Medium	Medium	Verify, create and manage required process docs based on Cognizant. If required Cognizant SME has to create documents during KT using Cognizant standard Runbook
5	Involvement and support from different support teams	Medium	Medium	Metrics and support requirements dependent on other support teams to be clearly defined as part of the each process and scope activities
6	Any migration support requirements/activities impacting managed service support activities.	Medium	Medium	Migration activities to be discussed and taken up as separate projects to be taken up in parallel whenever required

S.No	Risk Description	Probability	Impact	Mitigation Strategy
7	Any scope changes by new activities identified during transition will require revisiting the resource count. (e.g. In case the number of users and computers increased from the earlier proposed counts)	Medium	Medium	Buffer resources to be identified and need revisit the head counts

### 2.3.4 Desktop Engineering

#### 2.3.4.1 Highlights of Scope Validation Workshop

Phases	Pre Scope Validation workshop	Post Scope Validation Workshop
<b>Assessment Phase</b>	<ul style="list-style-type: none"> <li>Assessment document highlighting current state of SCCM 2007 and supporting infrastructure</li> </ul>	<ul style="list-style-type: none"> <li>No Change</li> </ul>
<b>Design Phase</b>	<ul style="list-style-type: none"> <li>Design document <ul style="list-style-type: none"> <li>Target SCCM 2012 Architecture with Roles and Features</li> <li>Steps for SCCM 2012 Upgrade Process</li> </ul> </li> <li>Phased Migration Approach for existing SCCM roles, objects, clients, security and delegation</li> </ul>	<ul style="list-style-type: none"> <li>No Change</li> </ul>
<b>Test Phase</b>	<ul style="list-style-type: none"> <li>Build the SCCM 2012 design in a test environment</li> <li>Document highlighting results on proposed Design, SCCM 2012 features, migration approach and test results</li> </ul>	<ul style="list-style-type: none"> <li>There are changes in proposed design and most recently validated resource count</li> </ul>
<b>Production Phase</b>	<ul style="list-style-type: none"> <li>Upgrade to SCCM 2012</li> <li>Migrate workstations, collections, packages</li> <li>Migration of SCCM 2007 environment which consists of two SCCM v2007sp3 R2 servers in Boulder location to SCCM 2012</li> <li>Migration of 14,000 workstation SCCM 2007 clients (Mix of 1450 Corporate and 150 Federal Services virtual desktops)</li> </ul>	<ul style="list-style-type: none"> <li>No change in the resource count for SCCM 2012 Migration post scope clarification workshop</li> </ul>

Phases	Pre Scope Validation workshop	Post Scope Validation Workshop
	<ul style="list-style-type: none"> <li>• Provide detailed analysis of packages active in SCCM 2007 to Health Net</li> <li>• Migration of 500 Packages from SCCM 2007 to SCCM 2012 based on inputs from Health Net</li> <li>• Migration of OS Imaging packages from SCCM 2007 to SCCM 2012</li> <li>• WSUS,MDT integration for OS deployment and Patch Management Migrate Packages to Applications in SCCM 2012</li> </ul>	
<b>Implementation of SCCM 2012 Features</b>	<ul style="list-style-type: none"> <li>• Patch Management <ul style="list-style-type: none"> <li>○ Patch Management for workstations will be done through SCCM</li> </ul> </li> <li>• Application Deployment <ul style="list-style-type: none"> <li>○ Leverage new Application Distribution model to target users and types of applications (virtual and non-virtual)</li> <li>○ App-V integration will be discussed and implemented as a proposed phase II</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Application Catalogue is one feature which Health Net is very interested in implementing</li> <li>• Health net would also like to see the Internet based management feature turned on</li> <li>• Health Net would also like to manage remote and DC servers (maintained by Cognizant) through SCCM. This will also be implemented in the BAU process for SCCM</li> </ul>
<b>Production Desktop Engineering Support</b>	<ul style="list-style-type: none"> <li>• Application packaging</li> <li>• Software distribution</li> <li>• Patch management</li> <li>• Image Management</li> <li>• Software metering</li> <li>• SCCM administration and support</li> <li>• Asset Management</li> </ul>	<ul style="list-style-type: none"> <li>• Application packaging <ul style="list-style-type: none"> <li>○ MSI/Vendor setup</li> <li>○ 10-20 is average volume per month</li> <li>○ Packaging process uniform across various regions and business units</li> <li>○ Manual installation check of applications in standard Windows 7 32bit and 64bit images for compatibility</li> <li>○ Application packaging requests are categorized as either steady state work or project Work</li> <li>○ Microsoft best practices and existing naming convention needs to be followed for all the packaging requests</li> <li>○ UAT Coordination support post packaging</li> </ul> </li> <li>• Image Management <ul style="list-style-type: none"> <li>○ Image refresh - Rebuilding the Gold Image based on Health Net requirements</li> <li>○ Adding Device drivers, Software</li> </ul> </li> </ul>

Phases	Pre Scope Validation workshop	Post Scope Validation Workshop
		<p>updates, Hot Fixes, Applications to Gold Image</p> <ul style="list-style-type: none"> <li>○ Image deployment environment setup and OSD configuration</li> <li>○ Image deployment issues trouble shooting</li> <li>○ Define Image Management Process</li> <li>○ Manage Windows 7 x86 and Windows 7 x64 Image</li> <li>● Software distribution               <ul style="list-style-type: none"> <li>○ Deployment compliance rate 95%</li> <li>○ Software deployment is part of the packaging lifecycle</li> <li>○ Define process for Application Software testing environment</li> <li>○ Application complexity and SLA are defined</li> <li>○ Application packaging process flow to be designed</li> <li>○ Support and troubleshoot users in manual installation of approved applications as requested</li> <li>○ Provide support services for standard desktop applications, including assisting in installation per standard configuration as well as troubleshooting</li> </ul> </li> <li>● Patch Management               <ul style="list-style-type: none"> <li>○ Patch deployment applicable for Workstation, Laptops and VDI</li> <li>○ Pilot test deployment for approved monthly security patches to pilot group</li> <li>○ Production deployment of patches post pilot testing (based on CMR approval)</li> <li>○ Goal is to complete cycle within 30 days. Typical compliance rate is around 95%. Detailed process attached</li> <li>○ Non-Microsoft application (Example: Adobe, JRE) patches are deployed as application deployment and Software deployment and process followed via SCCM</li> <li>○ All patching for COTS product will be handled by Cognizant team. As part of the support</li> </ul> </li> </ul>

Phases	Pre Scope Validation workshop	Post Scope Validation Workshop
		<p>model Cognizant will keep Health Net apprised about the patches availability and associated documentation that are delivered with it. Cognizant expectation is that HN Security and/or CTO team will review the patches list and will provide approval to Cognizant IO team to implement any patches. Our solution includes patching all the COTS application and is considered in our pricing</p> <ul style="list-style-type: none"> <li>○ Cognizant will work with all the stakeholders to review the patches</li> <li>● SCCM Administration and support</li> <li>● Asset Management with SCCM 2012                         <ul style="list-style-type: none"> <li>○ Software metering and reporting on requested software from Health Net</li> <li>○ Hardware asset reporting based on request from Health Net</li> <li>○ Ad-hoc asset reports from SCCM 2012</li> <li>○ Cleanup of AD computer objects to maintain a clean environment</li> </ul> </li> <li>● Manage Desktop Operating System GPO                         <ul style="list-style-type: none"> <li>○ Update GPO based on requirements</li> <li>○ Create new GPO based on service requests</li> </ul> </li> </ul>

**2.3.4.2 Solution Approach**

Cognizant will adapt a phased approach for this engagement, assessment, design, testing and production rollout. The table below depicts the activities and the associated deliverables across the different phases of the engagement.

Phase	Activities –Cognizant	Activities-Health Net	Deliverables
<b>Assessment Phase</b>	<ul style="list-style-type: none"> <li>● Review Current SCCM 2007 architecture (Central Sites, Primary</li> </ul>	<ul style="list-style-type: none"> <li>● Arrange for meeting with key stake holders to conduct interviews and understand their</li> </ul>	<ul style="list-style-type: none"> <li>● SCCM 2007 and supporting Infrastructure Assessment</li> </ul>

	<p>Sites, Secondary Sites, Distribution Points, Collections, packages, queries, reports, etc.)</p> <ul style="list-style-type: none"> <li>• Network Topology - Network bandwidth between sites</li> <li>• SCCM Client environment -</li> <li>• Workstation SCCM client deployment ,</li> <li>• SCCM Client settings ,</li> <li>• SCCM client enabled</li> <li>• features</li> <li>• SCCM Security - SCCM delegation</li> <li>• Active Directory (AD Sites , AD replication, AD Schema for SCCM, PKI Solution)</li> <li>• Documentation of the complete assessment</li> </ul>	<p>requirements and expectation from IT</p> <ul style="list-style-type: none"> <li>• Appoint single point of contact for Cognizant team to execute the engagement</li> <li>• Provide access to the environments and all relevant documentation for analysis purposes</li> <li>• Availability of key SMEs for validation of data collection and analysis results</li> <li>• Medium involvement of SME, typically 4 hours per week</li> <li>• Low involvement of Senior Management and technical staff, typically 2 hours per week</li> </ul>	<ul style="list-style-type: none"> <li>• Current state – SCCM</li> <li>• High level assessment of AD and Network</li> <li>• Prioritized findings</li> </ul>
<p><b>Design Phase</b></p>	<ul style="list-style-type: none"> <li>• Review of assessment findings</li> <li>• Design sessions with Health Net</li> <li>• SCCM 2012 Design - Upgrade planning, prerequisites, security design, discovery design, client installation\deployment \Upgrade - client agent settings, site design, role placement (Primary, Distribution Points, Branch DPs), Boundary planning</li> <li>• SCCM 2012 Feature (OSD, DCM, NAP, etc...)</li> <li>• SCCM 2012 Backup and Recovery and Failover</li> <li>• SCCM 2012 Upgrade</li> </ul>	<ul style="list-style-type: none"> <li>• Medium involvement of SME, typically 4 hours per week</li> <li>• Low involvement of Senior Management and technical staff, typically 2 hours per week</li> </ul>	<ul style="list-style-type: none"> <li>• Target SCCM 2012 Architecture</li> <li>• SCCM 2012 roles and features design - role placement</li> <li>• SCCM 2007 to 2012 upgrade process</li> <li>• Migration/Upgrade Approach</li> <li>• Develop phased migration for SCCM roles</li> <li>• Develop phased migration for SCCM object (collections, packages, queries, reports, etc.)</li> <li>• Develop phased migration for SCCM</li> </ul>

	<p>Project Plan</p> <ul style="list-style-type: none"> <li>• Documentation of the complete design phase with target SCCM 2012 architecture</li> </ul>		<p>clients</p> <ul style="list-style-type: none"> <li>• Develop Security/Delegation approach</li> <li>• Develop scheduling for migration/upgrade</li> </ul>
<b>Testing / Pilot Phase</b>	<ul style="list-style-type: none"> <li>• Build proposed SCCM 2012 environment based on Design</li> <li>• Implement SCCM 2012 Design features</li> <li>• Implement migration/upgrade process</li> <li>• Upgrade Pilot users to SCCM Client 2012 infrastructure set up in test environment</li> <li>• Create Validation Document</li> <li>• Document findings</li> <li>• Identify next steps</li> </ul>	<ul style="list-style-type: none"> <li>• High involvement of SME's , typically 12 hours per week</li> <li>• Low involvement of Senior Management and technical staff, typically 2 hours per week</li> </ul>	<ul style="list-style-type: none"> <li>• Setup Lab environment similar to production</li> <li>• Test proposed Design in lab</li> <li>• Test SCCM 2012 features in lab</li> <li>• Validate lab results and report on findings</li> <li>• Test Documentation</li> </ul>
<b>Production Migration Phase</b>	<ul style="list-style-type: none"> <li>• Build SCCM 2012 production environment in Centennial Datacenter</li> <li>• Build out SCCM 2012 roles and sites</li> <li>• Primary site(s) Distribution points, Branch Distribution points</li> <li>• Implement SCCM 2012 features (Applications, Patch Management, OSD Deployment)</li> <li>• Implement SCCM 2007 upgrade plan</li> <li>• Upgrade Pilot users to SCCM Client 2012</li> <li>• Scheduling and</li> </ul>	<ul style="list-style-type: none"> <li>• High involvement of senior management, SME's , and technical staff, typically 12 hours per week</li> </ul>	<ul style="list-style-type: none"> <li>• Implementation of SCCM 2012 Design into Production</li> <li>• Installation of SCCM servers</li> <li>• Enable SCCM roles</li> <li>• Migrate packages, collections etc.</li> <li>• Migrate all users/workstations (Pilot users will be 1% of users/workstations)</li> <li>• Scheduling and coordination of upgrade process</li> </ul>

	Coordination		
<b>Documentation and Sign-off</b>	<ul style="list-style-type: none"><li>• Create SCCM 2012 Build Document</li><li>• Project completion report documentation</li></ul>	<ul style="list-style-type: none"><li>• High involvement of Senior Management and SME's to sign off on the project completion report</li></ul>	<ul style="list-style-type: none"><li>• Documentation of SCCM 2012 Build Process</li><li>• Project completion report.</li></ul>

### SCCM Architecture

Given below is the reference design architecture for SCCM implementation which submitted during proposal stage:

Given below is the reference design architecture for SCCM implementation which includes the changes suggested by Health Net during scope verification workshops:

### Major changes to design:

- Changes suggested to SCCM Design
  - Currently there is only one DP for Tucson and Tempe. This is because both these sites fall in the state of Arizona with combined user count not more than 310. Health Net suggested that each of these sites should have its own DP
  - Arlington and Hampton – similar to above, should have separate DPs
  - Following sites are going to be decommissioned, as such no requirement to place a DP at these sites:
    - Visalia
    - El Cerrito
    - Mountain View

- San Jose
- Califa
- New York
- Only the sites with DPs in south California should report to secondary server proposed in Woodland Hills. These sites are:
  - Woodland Hills
  - Huntington Beach
  - Pasadena now also known as Glendale
  - Chatsworth
  - San Diego
  - San Bernardino

The list below are the sites and distribution points for SCCM implementation:

Site	State	Site/DP	Platform
<b>Centennial Datacenter</b>	Colorado	Primary SCCM Server	Server OS
<b>Woodland Hills</b>	CA(California)	Secondary With DP	Server OS
<b>Gold Pointe</b>	CA(California)	Distribution Point	Server OS
<b>Aero Jet</b>	CA(California)		Server OS
<b>Rancho Cordova-Sun Center</b>	CA(California)		Server OS
<b>Huntington Beach</b>	CA(California)		Server OS
<b>San Rafael</b>	CA(California)		Server OS
<b>Rancho Cordova-White Rock</b>	CA(California)		Server OS
<b>Pasadena(Glendale)</b>	CA(California)		Server OS
<b>Oakland</b>	CA(California)		Server OS
<b>San Marcos</b>	CA(California)		Server OS
<b>Chatsworth</b>	CA(California)		Server OS
<b>Rancho Cordova-International/Prospect Park</b>	CA(California)		Server OS
<b>San Diego</b>	CA(California)		Server OS
<b>Fresno</b>	CA(California)		Server OS
<b>San Bernardino</b>	CA(California)		Server OS
<b>Oakland-MHN</b>	CA(California)		Server OS
<b>Modesto</b>	CA(California)		Server OS
<b>Concord</b>	CA(California)		Server OS
<b>San Mateo</b>	CA(California)		Server OS
<b>Irving</b>	TX	Site with DP	Server OS
<b>Phoenix</b>	AZ(Arizona)	Site with DP	Server OS
<b>Tucson</b>	AZ(Arizona)	Site with DP	Server OS
<b>Tempe</b>	AZ(Arizona)	Site with DP	Server OS

<b>Johnston</b>	PA	Site with DP	Server OS
<b>Tigard</b>	OR	Site with DP	Server OS
<b>Arlington- Washington DC</b>	VA	Site with DP	Server OS
<b>Hampton</b>	VA	Site with DP	Server OS
<b>Boulder DC ( in DMZ)</b>	CO(Colorado)	Site with DP	Server OS

- Additional DP suggested to be placed in Boulder DC. An important consideration should be to place a DP in DMZ in Boulder to enable internet based management. Health Net would facilitate for the required server in the Boulder DC
- Health Net would like to see Software catalogue feature to be implemented along with SCCM implementation. This implementation should account for the time taken for software distribution process which needs to change

### **Software Distribution Management**

Cognizant would perform the Software distribution management services for Servers, Desktop/Laptop and VDI which includes operating system updates, software/security patches, other software and application releases through SCCM 2012 platform

- Software distribution activities would be executed in line with change and release management obligations
- Desktop engineering team would work in collaboration with Server/VDI/Desktop team for deployment requirement , testing plan and deployment requirement
- Create and Perform application packaging , testing & deployment
- Co-ordination for UAT testing post application packaging and testing
- Creating and maintaining standard images for Health Net End User desktop/laptop
- Develop Software deployment/management policies and procedures
- Performing installations, changes for the new Software components, including commercial and custom developed Applications

#### *2.3.4.3 Monitoring Tools*

This section describes the proposed tools solution for Desktop engineering service towers:

- HP OMW for monitoring availability of SCCM services and servers
- OEM tools like Microsoft Deployment tool for image management
- Flexera Admin Studio for Application packing

#### *2.3.4.4 Service Deliverables*

- Design SCCM 2012 target architecture
- Implementation of SCCM 2012 Design into Production
- Installation of SCCM Servers and enable SCCM Roles
- Migrate packages, collections, etc.
- Migrate all users\workstations (Pilot users will be 1% of users\workstations )
- Software distribution, Patch deployment and Image management for Desktop , VDI and servers

- Application packaging

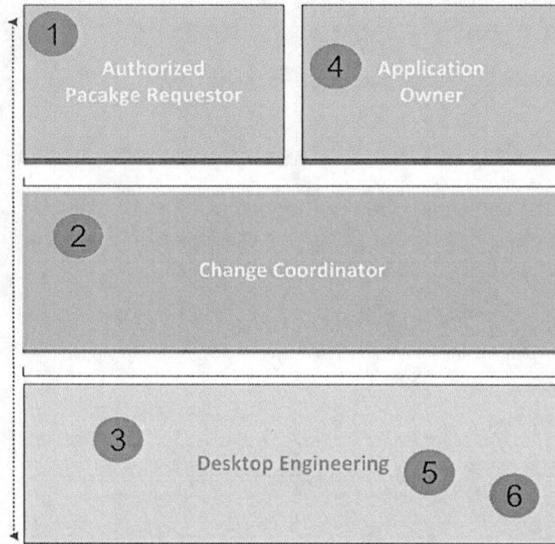

#### 2.3.4.5 Steady State Support - Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>• A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>• 24X7 Onshore support               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net Offices</li> <li>• Offshore – Bangalore (India) ; Coimbatore (India)</li> </ul>

**Solution Approach Desktop Engineering- Steady State**

**Application Packaging**

**Day in the Life of a Packaging Request**

1. Authorized Client contacts the Change Coordinator to request packaging for new PC application for distribution and self-install on user PCs.
2. Change Coordinator approves request and notifies Workplace Services team.
3. Desktop Engineering team handles request:
  - Verify if package exists in library
  - Conduct discovery call with application owner
  - Create or Update package
  - Test package
  - Provide package for user acceptance test
4. Application owner conducts user acceptance test and accepts package.
5. Desktop Engineering makes package available for distribution via electronic software distribution.
6. Desktop Engineering team notifies Change Coordinator and Customer of completion.

**Steady State Support Activities:**

**Level 1 Services**

"Level1" Services will be provided for the desktop engineering activities. L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L1 Team</i>	• Validate and categorize tickets
	• Monitor all tickets related to the desktop engineering in the Service Management System
	• Ensuring availability of SCCM site servers
	• Monitoring and Controlling SCCM site health status
	• Monitoring and Controlling client health status
	• Defragment all SCCM site systems
	• Where applicable, keep Health Net informed and notified on the status and progress of all tickets
	• Monitoring long running queries
	• Monitoring Audit messages
	• Delete unnecessary workstation objects from AD and SCCM DB
	• Delete unnecessary files from site systems
	• Check disk space on all site systems
	• Check advertisement status
	• Review Package status
	• Review sync between SCCM (Parent-Child) sites
	• Clean out old machines and user accounts

- |   |
|---|
| <ul style="list-style-type: none"> <li>• Carry out daily, weekly and other regular reporting activities as defined in the SOPs</li> <li>• Update and Maintain Incident information in the KEDB</li> </ul> |
|---|

### Level 2 Services

"Level 2" ("L2") Services will be provided by L2 support group. L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

- Incident Management Services
- Change Management Services

<i>L2 Team</i>	• Break-fix and provide workarounds acceptable to the User that reported the Incident which do not require database changes
	• Perform Database Maintenance
	• Review advertisement success/failure rate
	• As applicable, escalate incidents requiring immediate attention by using Health Net's current escalation guidelines
	• Review SCCM updates and SQL updates on all SCCM servers
	• Reviewing AD and SMS objects
	• Review SCCM site settings on all SCCM servers
	• Review SCCM Site boundaries
	• Review SCCM-OU mapping
	• Application packaging , testing
	• Co-ordinate for UAT post packaging
	• Image management (maintain image, update driver, software, patches to gold image)
	• Provide support service for desktop application and troubleshooting
	• Perform software deployment on servers ,VDI and desktops through SCCM 2012
	• Patch deployment Servers , VDI and desktops
	• Carry out daily, weekly and other regular reporting activities for Incidents
	• Maintain documentation for Incidents
• Update and Maintain Incident information in the KEDB	

### Level 3 Services

"Level3" ("L3") Services will be provided by the L3 Support Group. All unknown / new errors and problems will be resolved by this group.

• Performance review and tuning
• For new software components determine how to deploy and support
• Troubleshoot installation
• Work closely with Problem Management organization on the remediation of all problems directly or indirectly related to desktop engineering.
• Patch Deployment Process Determination
• Capacity planning

- |  |
|--|
| • Package Archival   |
| • SCCM hierarchy review  |
| • Review SCCM security / reports                                   |
| • Identify patch effects like reboots to calculate deployment time |
| • Deploy Patch on Servers , VDI and Desktop                        |
| • Work with Vendors when required                                  |
| • Perform root cause analysis                                      |
| • Update and Maintain Incident information in the KEDB             |

#### 2.3.4.6 Assumptions

- SCCM 2012 implementation is a onetime project which includes design, implementation and migration from SCCM 2007 to SCCM 2012
- Post SCCM 2012 implementation project, Cognizant resources will take over steady state operations for SCCM
- Health Net will allow Cognizant (with notification) to leverage discovery tools on the network where necessary to supplement existing documentation and meeting information.
- Cognizant assumes that at least one SME and technical staff from incumbent vendor will be available for each scope service towers – SCCM, Network (LAN/WAN), Security/Policy
- Current SCCM 2007 is in a healthy state
  - Enabled SCCM 2007 features are performing as intended
  - SCCM 2007 is reporting minimal to zero critical/severe errors
- The current network and support infrastructure environments are all healthy and able to support
  - SCCM 2012 upgrade goals
  - Database consistent without corruption
  - No network or latency issues affecting SCCM environment
- Travel to Health Net remote sites will be as per project needs
- During the Production Phase, packages, custom collections, custom reports and custom queries will be migrated to SCCM 2012
  - All users\workstations will be migrated during this project
- Existing Distribution points will be retained as Windows 7 rollout is in progress. It can be migrated to SCCM 2012
- Print services would be run on SCCM distribution points
- Images update frequency – biannually for hardware changes, security and software updates. Two core images/OS (One basic build and one with Health Net standard productive applications (email and Office).) Maintain one XP sp3. Support Windows 7x64 sp1 post migration
- Post Migration to SCCM 2012 applications will be deployed via SCCM 2012 for environments in-scope
- Application Packaging process flow will be designed during the KT phase and receive approval from Health Net

#### 2.3.4.7 Dependency on Health Net

- Access to existing SCCM 2007 environment and its Data(Inventory, Packages, Image Data, Collections)

- Existing process documents and process relates to SCCM
- Health Net SCCM SME availability for design review and Approvals
- Project Plan review and approvals from Health Net
- Appropriate rights access to existing SCCM 2007 servers
- AD,DHCP,DNS availability
- Access to existing SCCM 2007 Data ( App and Pack , Configurations )
- DOMAIN ADMIN in Active Directory access to 'SCCM account '
- SPOC from existing SCCM 2007 team During SCCM 2012 Migration and Cutover
- Health Net to facilitate for provisioning server in Boulder DC –DMZ to install SCCM Distribution Point

2.3.4.8 Risks and Mitigations

S No.	Risk Description	Probability	Impact	Mitigation Strategy
1	Not enough clarification for resource restrictions for Federated Environment and limited access from offshore.	Medium	Medium	Federal requirement would be discussed and documents in design phase
2	We have estimated 500 packages will be migrated to SCCM 2012 and any major changes in volumetric of these Packages will have on effect on project timelines.	Low	Low	Any new changes would be considered as new project
3	Access restriction to existing SCCM 2007 will result in manual migration of SCCM data like packages collections etc. which has effect on Project timelines	Low	Low	SCCM 2007 access and document requirement will be discussed with Health Net team during transition phase

2.3.5 Database

2.3.5.1 Highlights of Scope Validation Workshop

Description	Pre Scope Validation Workshop	Post Scope Validation Workshop
<b>Scope (Database Migration)</b>	<ul style="list-style-type: none"> <li>• Migrate approximately 1600 databases of the SQL Server in the Health Net environment</li> </ul>	<ul style="list-style-type: none"> <li>• Support services for all Databases across Health Net</li> </ul>

	<ul style="list-style-type: none"> <li>• Only databases that are SQL 7.0/SQL 2000 and SQL 2005 server.</li> <li>• Migrate about 105 instances of the SQL Server.</li> <li>• Federal databases should be migrated by Federal resource only</li> </ul>	
--	--	--

### 2.3.5.2 Solution Approach

This sections details Database managed services for all databases hosted in the Health Net environment (regardless of server type/location) (Refer to appendix for MS SQL database inventory).

#### Database Managed Services

Database managed services includes : maintenance and steady state support of existing and future databases (MS SQL , MYSQL , Oracle , Rdb) hosted in Health Net environment.

Cognizant will provide the Database steady state operation after a successful transition. Transition is the first and one of the most crucial phases of any sourcing engagement. Effective transition of knowledge and services are essential for the success of subsequent phases of steady state support and transformation. Cognizant will follow a unique Transition model to address Health Net requirement to implement a timely managed transition for database services while ensuring that the risk of sub-optimal knowledge and services transition is minimized. For MS SQL Databases, Health Net will pay for user databases, and not for the standard system databases (e.g. master, msdb, model, resource and tempdb) that are basic requirements to run the systems

### 2.3.5.3 Monitoring Tools

- Boulder DC-
  - Leverage the existing tools for performance, availability, server monitoring and capacity monitoring for all databases
  - SQL IDERA management and ITCam for SQL Monitoring
  - Oracle Enterprise Manager Cloud Control 12c, with plug-ins installed to monitor other database technologies and to implement Oracle 12c as standard
  - Lite Speed and SSMS ( SQL server management studio ) tool for MS SQL database backup and upgrade
  - RMAN and TSM backup tool for Oracle database
  - Oracle utility RMU based backup for Rdb
- Cognizant DC
  - HP OMW to be used for monitoring, availability and performance for MS SQL databases

### 2.3.5.4 Service Deliverables

- Service Improvement initiatives to be identified and implemented for frequent issues. (E.g. SQL Job optimization, space issues and long running Jobs.)
- Long running issues to be identified for Permanent fixes and root cause analysis. Those issues can be candidates for problem investigation.
- SQL Migration documentation for In-place and Side by Side Upgrade on all versions

- Run books and Work instructions of all processes which was handed over to Cognizant team during KT phase
- Shadow support / Guided phase will be supported by documents created

2.3.5.5 Steady state support – Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>• A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Supported Technologies</b>	<ul style="list-style-type: none"> <li>• Oracle</li> <li>• Microsoft SQL</li> <li>• MY SQL</li> <li>• Rdb</li> </ul>
<b>Database Inventory</b>	<ul style="list-style-type: none"> <li>• Oracle 272 databases</li> <li>• SQL Server 2129 databases / 105 instances</li> <li>• My SQL 33 databases</li> <li>• Rdb 150 databases</li> </ul> <p>Note: Database count are approximate and count will be updated during transition</p>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>• 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>• 24X7 Onshore support</li> <li>• 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>• Onsite - Health Net Offices</li> <li>• Offshore – Bangalore ; Coimbatore</li> </ul>

**Level 1 Services**

"Level1" Services will be provided for the Databases. L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<b>L1 Team</b>	• Validate, categorize tickets
	• Monitor all tickets related to the databases in the Service Management System
	• Report downtimes and uncommon system behavior to Health Net
	• Carry out daily, weekly and other regular reporting activities as defined in the SOPs
	• Act as the central point of contact between Health Net and Cognizant for tickets
	• Broadcast communications authorized by the Health Net to Users
	• Where applicable, keep Health Net informed and notified on the status and progress of all tickets
	• Database Instance availability
	• L1 Database monitoring (Query / Transaction/ Alert log / Trace file/Space etc. )
	• Job Monitoring
	• Replication / stand by monitoring
	• Object monitoring

	• Unauthorized / Inactive User Access
	• Backup status monitoring
	• Disk space / Table space utilization
	• Security and Configuration exception alerts
	• Listener Availability
	• Update and Maintain Incident information in the KEDB

**Level 2 Services**

"Level 2" ("L2") Services will be provided for the Databases receiving L2 as listed above. L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

- Incident Management Services
- Change Management Services

"Incident Management Services" mean the Services to resolve (or break-fix, as applicable). An Incident which has no known resolution will include the following:

<i>L2 Team</i>	• Resolve and document Incidents
	• Break-fix and provide workarounds acceptable to the User that reported the Incident which do not require database changes
	• As applicable, escalate incidents requiring immediate attention by using Health Net's current escalation guidelines
	• Maintain Incident information in the Service Management System
	• Carry out daily, weekly and other regular reporting activities for Incidents
	• Maintain documentation for Incidents
	• Update and Maintain Incident information in the KEDB and will responsible for maintaining & updating operation handbook / Runbooks as well

<b>Database Monitoring:</b>	
<i>L2 Team</i>	• Database Instance Availability
	• L2 Database monitoring (Query / Transaction/ Alert log / Trace file/Space etc. )
	• Job monitoring
	• Replication / stand by monitoring
	• Object monitoring
	• Unauthorized / Inactive User Access
	• Backup status monitoring
	• Disk space / Table space utilization
	• Security and configuration exception alerts
	• Listener Availability
	• HA (RAC, Cluster, ASM etc.,) services Availability
	• Update and Maintain Incident information in the KEDB and will responsible for maintaining & updating operation handbook / Runbooks as well

<i>Basic Administration:</i>	
<i>L2 Team</i>	<ul style="list-style-type: none"> <li>• Startups/Shutdowns of database servers</li> </ul>
	<ul style="list-style-type: none"> <li>• Additional Space allocation</li> </ul>
	<ul style="list-style-type: none"> <li>• Object maintenance</li> </ul>
	<ul style="list-style-type: none"> <li>• Job Purging/reruns</li> </ul>
	<ul style="list-style-type: none"> <li>• Initial troubleshooting</li> </ul>
	<ul style="list-style-type: none"> <li>• Cluster ware troubleshooting</li> </ul>
	<ul style="list-style-type: none"> <li>• Set up database auditing</li> </ul>
	<ul style="list-style-type: none"> <li>• Database refresh</li> </ul>
	<ul style="list-style-type: none"> <li>• Standby/Mirror database re-instantiation</li> </ul>
	<ul style="list-style-type: none"> <li>• Update and Maintain Incident information in the KEDB and will responsible for maintaining &amp; updating operation handbook / Runbooks as well</li> </ul>
<i>DB User Management:</i>	
<i>L2 Team</i>	<ul style="list-style-type: none"> <li>• End User account requests (create, delete, reset password, roles)</li> </ul>
	<ul style="list-style-type: none"> <li>• Elevated privileges requests for existing or new roles</li> </ul>
	<ul style="list-style-type: none"> <li>• Elevated privilege challenge process</li> </ul>
	<ul style="list-style-type: none"> <li>• Non-expiry profile requests</li> </ul>
	<ul style="list-style-type: none"> <li>• Update and Maintain Incident information in the KEDB and will responsible for maintaining &amp; updating operation handbook / Runbooks as well</li> </ul>
<i>Database Lifecycle Management:</i>	
<i>L2 Team</i>	<ul style="list-style-type: none"> <li>• Vendor software installation; includes RDBMS and related add-on products</li> </ul>
	<ul style="list-style-type: none"> <li>• Database creation, clones, copies and moves</li> </ul>
	<ul style="list-style-type: none"> <li>• Database upgrades as defined by the Refresh Report, Schema maintenance</li> </ul>
	<ul style="list-style-type: none"> <li>• Patch planning scheduling and installations</li> </ul>
	<ul style="list-style-type: none"> <li>• Database decommissioning</li> </ul>
	<ul style="list-style-type: none"> <li>• Database reorganization</li> </ul>
	<ul style="list-style-type: none"> <li>• Update and Maintain Incident information in the KEDB and will responsible for maintaining &amp; updating operation handbook / Runbooks as well</li> </ul>
<i>Backup and Recovery:</i>	
<i>L2 Team</i>	<ul style="list-style-type: none"> <li>• Implementing backup solutions</li> </ul>
	<ul style="list-style-type: none"> <li>• Scripts/tool based backup</li> </ul>
	<ul style="list-style-type: none"> <li>• Disaster recovery testing</li> </ul>
	<ul style="list-style-type: none"> <li>• Backup and recovery via various tools(e.g. – RMAN/Oracle, TSM, SQL Server Native tools/SQL Server, O/S utilities, Business copy, Ad-hoc backup and restore)</li> </ul>
	<ul style="list-style-type: none"> <li>• Quality: for integration testing and User Acceptance Tests.</li> </ul>
	<ul style="list-style-type: none"> <li>• Update and Maintain Incident information in the KEDB and will be responsible for maintaining &amp; updating operation handbook / Runbooks as well</li> </ul>

**Level 3 Services**

"Level3" ("L3") Services will be provided by the L3 Support Group for Database Management services. All unknown / new errors and problems will be resolved by this group.

<i>L3 Team</i>	• Database planning and Design services
	• Design any special application or security requirements.
	• For new software components determine how to deploy and support
	• Design database objects
	• Determine database parameters
	• Troubleshoot installation
	• Performance tuning of database parameters
	• Work closely with Problem Management organization on the remediation of all problems directly or indirectly related to database engineering.
	• Patch Deployment Process Determination
	• Identify vulnerable systems and determine severity
	• Determine Response until patch is available
	• Implement response until patch is available
	• Monitor for Patches and test
	• Identify patch effects like reboots to calculate deployment time
	• Deploy Patch
	• Confirm Patch Efficacy, no adverse effects
	• Recommend Server Placement/ Hardware Migration
	• Disaster recovery solution design, benchmarking, load testing, implementation, configuration, monitoring and troubleshooting, both internal and external.
	• Injection of HA (RAC, Data Guard, Clustering etc.,) Services assessment for new deployments/enhancements
	• Work with Vendors when required
	• Perform root cause analysis
	• Update and Maintain Incident information in the KEDB (Known error Database) and will responsible for maintaining & updating operation handbook / Runbooks as well

**2.3.5.6 Assumptions**

**Database Managed Services**

- Monitoring and alerting process and tools are in place
- All PHI, PCI, PII data in databases are encrypted at disk level for compliance and security
- Documented procedures exist for DB deployment qualification and validation processes
- DB refresh activities occur on a frequent basis (at least 4 refreshes per week)
- At the time of this agreement, User access/management is a manual activity, no automated tools are used
- Current infrastructure support team performs backups and reports on “failed backups” on a daily basis to the DB team

- At the time of this agreement DB provisioning is a manual process and qualification is done via a checklist
- Cognizant team will actively participate in audit activities
- Database backups will be scheduled through backup software and are managed and administered by backup administrators. For Oracle Databases, the RMAN backup are scheduled in CRONTAB
- All middleware related issues will be handled by the incumbent delivery team in Boulder DC
- DB Connection String on the application side will be changed appropriately so that the application can talk to the newly migrated Instances
- Database upgrades are performed by incumbent and considered to be completed before services transition to Cognizant

### 2.3.5.7 Dependency on Health Net

### 2.3.5.8 Risk and Mitigations

#### Database Managed Services

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	Legacy system support from Cognizant and Partners need to be identified and documented for every CI/Device in the list. Especially production and business critical systems	High	High	Cognizant requires separate SLA and waivers as required. Also those systems should be migrated to the latest platforms to avoid /mitigate this risk
2	Any change in scope might impact delivery (e.g. Increase Delivery cycle time, Attrition)	Low	Low	Contractual scope should be adhered by Cognizant and Health Net.
3	Tool capability in tracking SLA's proactively, assignment of right priorities, supporting escalation process, reporting capability not known. If not available, manual tracking of SLA's, timely escalation will require additional efforts	Medium	Medium	Need to validated during Transition Phase

## 2.4 Security Compliance and Controls

Security Controls: Entire Security requirements of Health Net and Cognizant GIS (Global Information Security) team will be defined and documented as Controls. For establishing the controls, Cognizant Security team will follow the direction of Health Net Info Security team to enforce the HIPAA, SOX and TRICARE contract security requirements. For every defined control, acceptance criteria will be established working with Health Net Information Security team. Any changes required to the security controls time to time as required by the Law /Legislation Enforcement will be supported by Cognizant Security team. To enforce security compliance, controls will be defined for following support areas under the ITO services

1. Physical Security – Applies to Primary and Secondary Datacenters and Cognizant Delivery Location with in United States and Cognizant Offshore Delivery Centres (ODC)
2. Logical Security – Applies to all associates equipment working for Health Net Account
3. Database
4. Servers
5. Desktop, VDI and Laptops
6. Networks
7. Security Patching Requirements for OS and COTS products.
8. SOX Compliance
9. Internal and External Audit Requirements
10. Support of security agents

All the security controls that are to be defined will be documented during the transition period and will be enforced from the Day-1 of the steady state. (Please refer Transition Schedule for detailed plan.)

### **Associate Training**

Cognizant associates working for the Health Net account will be trained on all the required Security courses as defined by Health Net Inc and Health Net Federal Services. Yearly compliance of such training will be enforced. Cognizant will ensure all associates are trained within 3 weeks after gaining necessary access to Health Net environments. Following are the list of Health Net Inc and Health Net Federal Services training that will be enforced by Cognizant. If any of the new courses introduced or any modification done to the existing training courses, Cognizant will enforce its associate to get trained in the new training courses within a month of written/e-mail notification from Health Net.

#### Health Net Inc – Security Training Courses

1. Getting the Records Straight – Disposition Procedures (1.0)
2. HIPAA Basic – Privacy and Security (1.0)
3. Painful Price of Healthcare Fraud and Pharmaceutical Fraud (1.0)
4. Health Net Code of Business Conduct and Ethics
5. Health Net General Compliance
6. Medicare Part D: Fraud, Waste and Abuse (for all associates whose job functions cover or may cover Medicare Part D)

7. Other training courses that Health Net requires its employees or contractors to take, as reasonably requested by Health Net, or updated version of the training courses listed above.

#### Health Net Federal Services – Security Training Courses

8. G&SS HIPPA Privacy Training
9. GSS Security Awareness
10. GSS Records Management Training
11. Security Baseline Training
12. ISO 101-2009
13. HNFS URAC CORE V3.0 (TRICARE ONLY)
14. URAC Applied Training (TRICARE ONLY)
15. HNFS Reporting Quality of Care and Serious Reportable Events

#### 2.4.1 Information System Security

McAfee antivirus and IDS units will be managed by HN's McAfee EPO instance and HN's SOC. Cognizant will work with HN INFOSEC team to apply McAfee AV in server & desktop equipment.

#### 2.4.2 Vulnerability Risk Assessment & Management

Cognizant understands Health Net Info security team performs Vulnerability Risk assessment and prepares plan to remediate them as per the governing rules, Cognizant associates will support such assessment and will work with Health Net security team for remediation and to prevent such incidents in the future.

#### **Incident Reporting**

All of the security incidents will be reported to Health Net within reasonable time frame and with detailed incident reports. Cognizant Management will ensure all of its associate provides complete cooperation to ensure the required remedy for such incident are derived quickly and per Health Net direction. The incident reporting will be filed to Privacy Officer of Health Net Inc. / Health Net Federal Services as deemed applicable.

#### **Security Controls Definition and Password Services Build Timeline**

All of the security services will be aligned based on the services delivery dates

HN ITO Security	Start Date	End Date
<b>Password Vault Services</b>	<b>3-Feb-2014</b>	<b>2-May-2014</b>

### 2.4.3 Password Vault Assessment

#### 2.4.3.1 Print and File services

##### Provisioning/De-provisioning

- Discuss Provisioning and De-provisioning process at high level
- Access to Print and File services to follow existing ISR process
- Cognizant Admin's will create file share (if it's a new share request) and provide appropriate rights (read/write) to user groups.
- IBM will create/modify user groups and also add/remove users to groups

##### Process for provisioning/De-provisioning

- User creates ISR for print and file share
- SR created for CTS team for provisioning (if request is for a new share) / De-provisioning files share
- CTS creates print/file share as needed and control's access to print and file services using group's
- Approval process for user access will be derived in design phase
- ISR to add/remove user's to existing file share group's will not trigger a SR to CTS admin

##### Issues/Concerns

- In current scenario file system privileges is not tightly controlled
- Users and privileges to different print and file services change over time
- Configuration drift on access modifications
- Delay in processing by Access Admin may delay CTS processing time for ISR

##### Proposed Remediation

- Setup process and monitoring utilities in place to report on users and access level's
- Create audit report on a periodic basis and share with HN audit team to review/approve
- Details on type of monitoring utility and reporting will be derived during design phase
- Setup automated De-provisioning of CID accounts using feed from CTS ESA system
- Cognizant model will have dedicated administrator's instead of shared admin's in IBM model

#### 2.4.3.2 Citrix and VDI services

##### Provisioning/De-provisioning

- Discuss Provisioning and De-provisioning process at high level
- Access to Citrix services to follow existing ISR process
- Access admin team to control ISR's process

- Cognizant Admin's will create Citrix VDI/application access and manage Citrix/VDI policies

#### **Process for provisioning/De-provisioning**

- User creates ISR for Citrix/VDI
- ISR follows existing approval process and access admin governs the process
- A SR is created for CTS team for provisioning/De-provisioning Citrix/VDI access
- CTS admin team creates or modifies Citrix profile/rules to indicate Secure/Remote Citrix, Persistent/Non-Persistent VDI, manage advanced configurations such as USB, File/Print share
- Adding/Removing users to groups is performed by IBM

#### **Issues/Concerns**

- In current scenario user's access is not tightly controlled
- User's moving between Secure and Remote access without right documentation
- Configuration drift within Citrix profile /policies
- Delay in access admin process could delay CTS turn-around time

#### **Proposed Remediation**

- Setup process and monitoring utilities in place to report when user profile changes
- Create audit report periodically and share with HN audit team to review/approve
- Details on type of monitoring utility and reporting will be derived during design phase
- CTS to monitor and manage capacity planning for Citrix/ Persistent VDI
- Cognizant model to have dedicated administrator's instead of shared admin's in IBM model

#### **2.4.3.3 Database Services**

#### **Provisioning/De-provisioning**

- MYSQL, Oracle DB's and RDB are not integrated with AD
- Majority of SQL Server DB's are integrated with AD
- Elevated privileges for admin's are controlled by having 2 AD accounts for administrators
- Elevated privileges are provided for 72 hours using the existing vault process where credentials need to be checked in/out for the duration of access needed
- Manual process involved in resetting password and check in credential for elevated accounts
- Discuss Provisioning and De-provisioning process access at high level
- Follow existing ISR process to gain access. ISR process managed by access admin
- CTS DBA to provide access to DB's and create DB roles and assign users to roles

#### **Process for provisioning/De-provisioning**

- CTS DB admin's will have three accounts
- CID for regular access
- ID with administrative access on non-SOX Compliance systems
- ID with elevated privileges for SOX Compliance systems. Privilege valid for 72 hours
- Elevated privilege is not needed to "Monitor" SOX Compliance systems
- Regular Access
- User creates ISR for DB access
- A SR is created for CTS DB team for provisioning/De-provisioning access
- Administrative access – for non-SOX Compliant systems
- CTS DB admin's create ISR for DB access for non-SOX compliance system administration
- For non-SOX Compliant systems CTS admin team creates or modifies user accounts in DB and creates DB roles to control privileges and assign roles to users
- Elevated Privilege's Access – for SOX compliant systems
- Create ISR for elevated access & EPSS approves it
- Elevated access account is enabled and credential is checked out from password vault
- User makes use of elevated privilege account for <= 72 hours (Renews as needed)
- Use Password vault system to checks-in credential after 72 hours and reset elevated account password

#### **Issues/Concerns**

- In addition to developers and system account's, users have access to database
- AD based authentication not in use for lot of DB's
- Delete privileges are not removed by default
- Need to have 72 hour elevated privileges for SOX compliant systems access which is not a industry practice for standard operating procedure
- IBM unable to provide audit report on elevated privilege users and access which calls for existence of Password Vault Service
- Lot of manual process involved in access admin and password reset
- No process/system is in place to ensure users do not use elevated privileges and credentials are checked into the vault after 72 hours
- Automation of process to remove 72 hour elevated privileges access and password vault needs to be approved by KPMG, Deloitte audit team

**Proposed Remediation**

- One ISR process to create accounts for regular access, admin access to non-SOX systems and elevated access to SOX compliant systems
- Setup process and monitoring utilities in place to report elevated privilege and regular access
- Create audit report periodically and share with HN audit team to review/approve
- Look at possibility of Integrating MYSQL, SQL Server and Oracle DB with LDAP
- Documentation to be derived to follow process for user account provisioning
- Detailed process and steps to be derived in low level design phase
- Follow current 72 hour elevated privilege process
- No new password vault system to be developed for CTS. Follow existing process for elevated privilege access on SOX compliant systems

Note: Cognizant has used NIST as general terminology, where it is required to define HN custom defined security controls that are built on top of NIST security controls.

### Data Center Build – Resource Model

The table below highlights the resources that will be used in the datacenter to build/implement the service towers:

SI No	Use Case	Phases	Non Federal	Federal	Comments
1	DataCenter	Build/Implement	✓	✓	Federal Links would be terminated by Federal resource
		DC Operations	✓	✓	NIST operational compliance by Federal resource
2	Network & Security	Build/Implement	✓		Design & build of network infrastructure would be executed by non federal resource till its not connected to Fed data
		Steady state /Operations	✓	✓	Logical Access for Fed and Non Fed Resources
3	Server/VM	Build/Implement	✓		Design & build of virtual infrastructure would be executed by non federal resource till its not connected to Fed data
		Steady state	✓	✓	Logical Access for Fed and Non Fed Resources
		Project	✓	✓	
4	Storage & Backup	Build/Implement	✓		Design & build of storage infrastructure would be executed by non federal resource till its not connected to Fed data
		Steady state	✓	✓	Logical Access for Fed and Non Fed Resources
5	FileShare service	Build/Implement	✓		Design & build of file share infrastructure would be executed by non federal resource till its not connected to Fed data
		Steady state	✓	✓	Logical Access for Fed and Non Fed Resources
6	Print Service	Build/Implement	✓		Design & build of print infrastructure would be executed by non federal resource till its not connected to Fed data
		Steady state	✓	✓	Logical Access for Fed and Non Fed Resources
		Hardware breakfix	✓	✓	
7	VDI	Build/Implement	✓		Build OS image & testing would be exected by non federal resource till its not connected to Fed data
		Steady state	✓	✓	Logical Access for Fed and Non Fed Resources
		OS Image build	✓		Build OS image & testing would be exected by non federal resource till its not connected to Fed data
8	Desktop Engineering	Build/Implement	✓		Design & build of desktop engineering infrastructure would be executed by non federal resource till its not connected to Fed data
		Steady state	✓	✓	Logical Access for Fed and Non Fed Resources
		Application Packaging	✓		Application packaging / test would be executed by non federal resource
9	Tools	Build/Implement	✓		Design & build of tools infrastructure would be executed by non federal resource till its not connected to Fed data
		Steady state	✓	✓	Logical Access for Fed and Non Fed Resources
10	Desk side support	Deskside support	✓	✓	Federal resources to support HN Federal users as per location demarcation
		Remote support	✓		
11	Database	Upgrade and Steady state	✓	✓	Logical Access for Fed and Non Fed Resources

### 3. Appendix

#### 3.1 Appendix I – Tools Functionality

##### 3.1.1 Introduction

As a follow-through of the Monitoring Tools solution described in Section 2, this section further details the over-all capability of the major tools that have been proposed for this engagement along with their features and snapshots of their reporting capabilities.

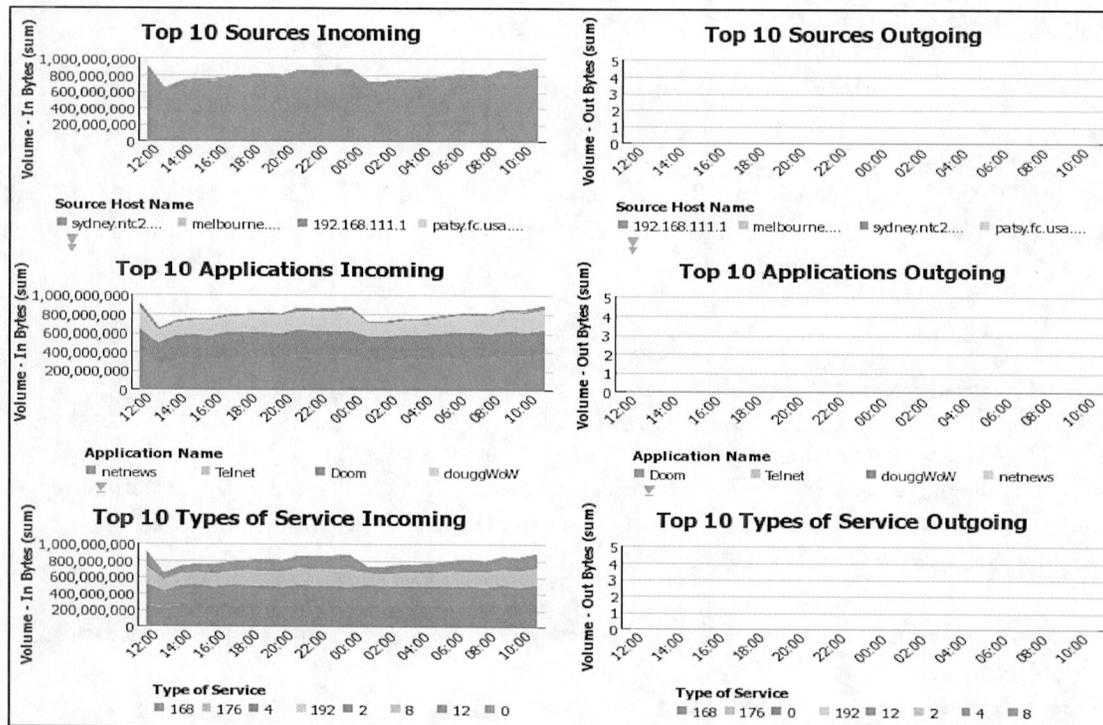

##### 3.1.2 Overview of Tools Functionality

#### **HP NNMi (Network Node Manager i) + iSPI**

HP NNMi (Network Node Manager i) 9.x is foundation of Network Fault and Performance Management. This tool, in Health Net environment, will be primarily used for availability and traffic performance monitoring of entire network components. It will be integrated with HP OMi for centralized event aggregation. The following are the additional benefits that will be leveraged by using this tool:

- Automatic discovery feature to simplify the complex Network architecture and also provide Map based views
- Automated action and notification support for quick remediation and reduction in MTTR
- Dynamic RCA and Service impact support to assess impact to network survivability, recovery and reductions in redundancy
- Real time graphs to enable Network expert to view the Network performance in real time

The HP NNMI (Network Node Manager i) iSmart Plug-ins (iSPI's) for performance is an add-on module that extends the capabilities of HP NNMi software to enable unified fault, availability, and performance management. The iSPIs add performance management capability to HP NNMi by analysing, processing, and aggregating a range of standard and advanced metrics collected by HP NNMi.

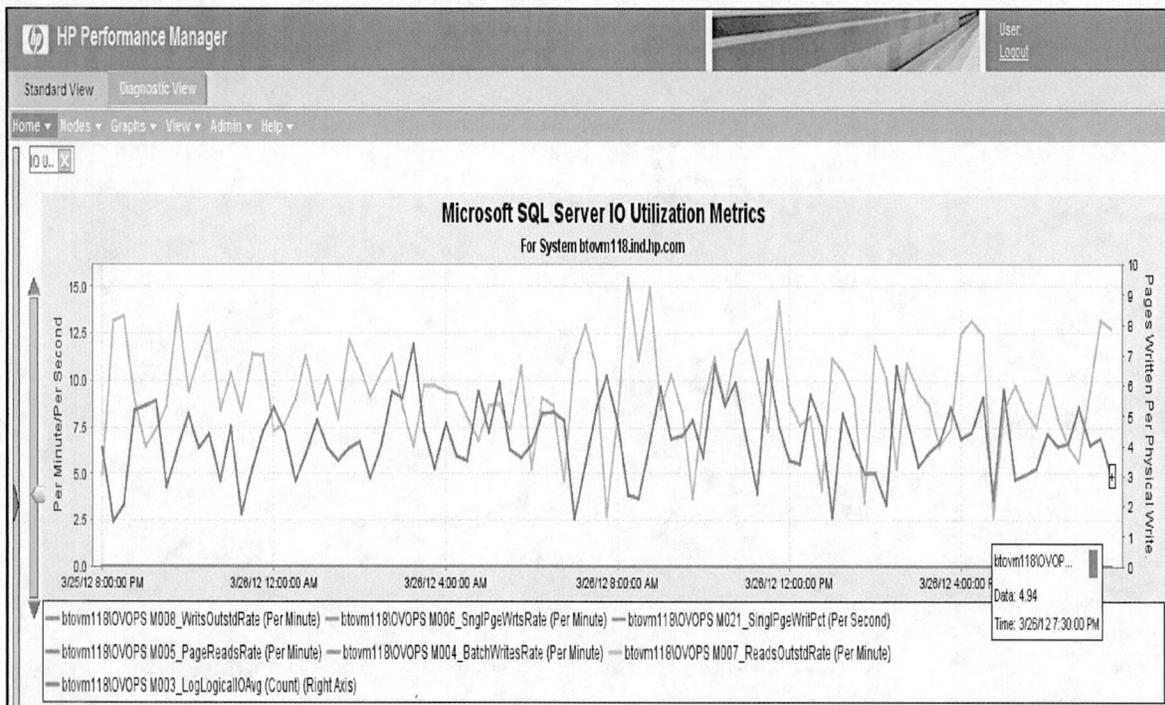

### Benefits of HP NNMi

- Maximizing network availability and performance
  - Continuous spiral discovery
  - Event pipeline for multi-phased conditioning and correlation
  - Deterministic root-cause analysis that adapts to changing topology
  - Unified fault and performance management
- Maximizing operator efficiency and productivity
  - Exception-based management
  - Quick start configuration wizard and configuration graphical user interface (GUI) forms
  - Integrated solution
- Minimizing total cost of ownership (TCO)
  - Extreme scalability
  - Flexible n-tier architecture
  - Web-based application accessibility

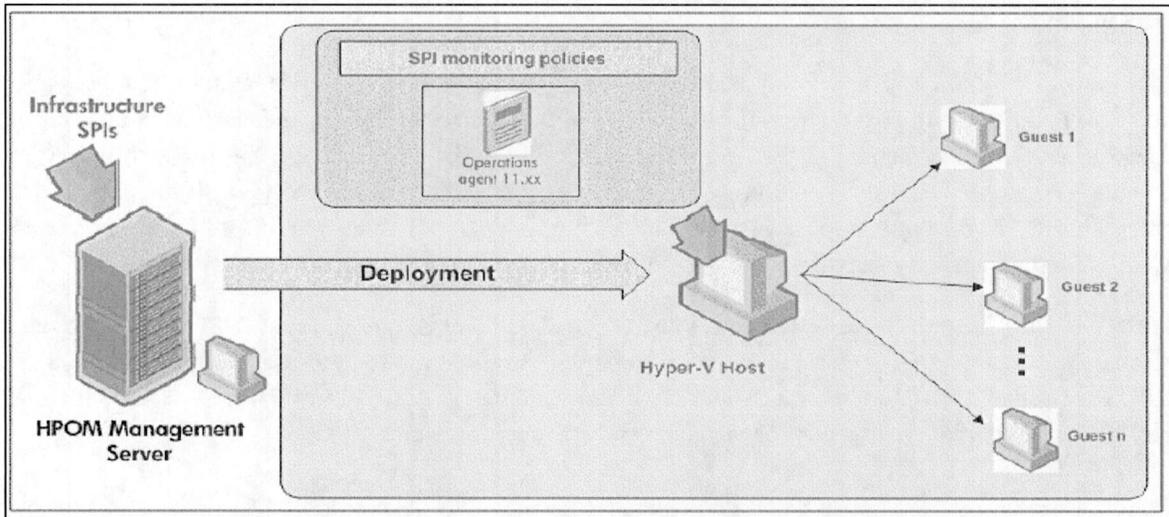

### HP Operations Manager (OMW)

HP OMW (Operation Manager for Windows) 9.x is one of the leading enterprise monitoring tools in the IT industry. This will provide out-of-box functionality to monitor heterogeneous operating systems components like CPU, memory, disk, event log, services, etc. This product also has ready-to-use smart plugins to perform deep dive monitoring for enterprise applications which will enable the monitoring process swift. Cognizant’s proposed solution also includes SQL DB smart plug-ins to enable deep dive monitoring of the database environment.

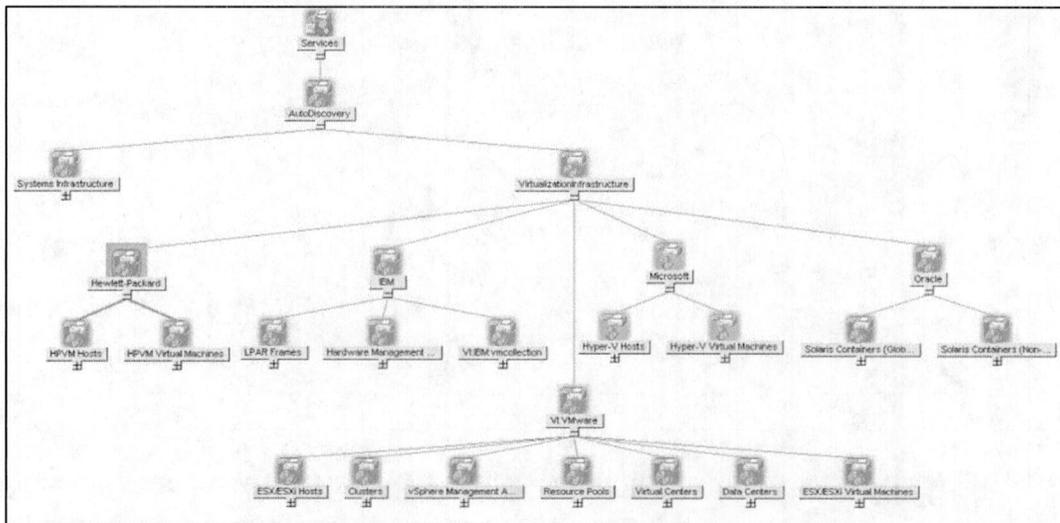

The Smart Plug-in for Databases (DB SPI) integrates with HP Operations Manager (HPOM) and provides database availability, performance and services reports from a central, easy-to-use dashboard through the HPOM console. Our DB monitoring solution will provide deeper visibility of database availability and performance and improve capacity management and planning for database use.

The HP OM Smart Plug-in for Virtualization Infrastructure (VI SPI) enables management and monitoring of virtual infrastructure on various technologies from an HP Operations Manager (HPOM) console. The VI SPI monitors the performance, capacity, utilization, availability, and resource consumption of the host machines, virtual machines, and resource pools.

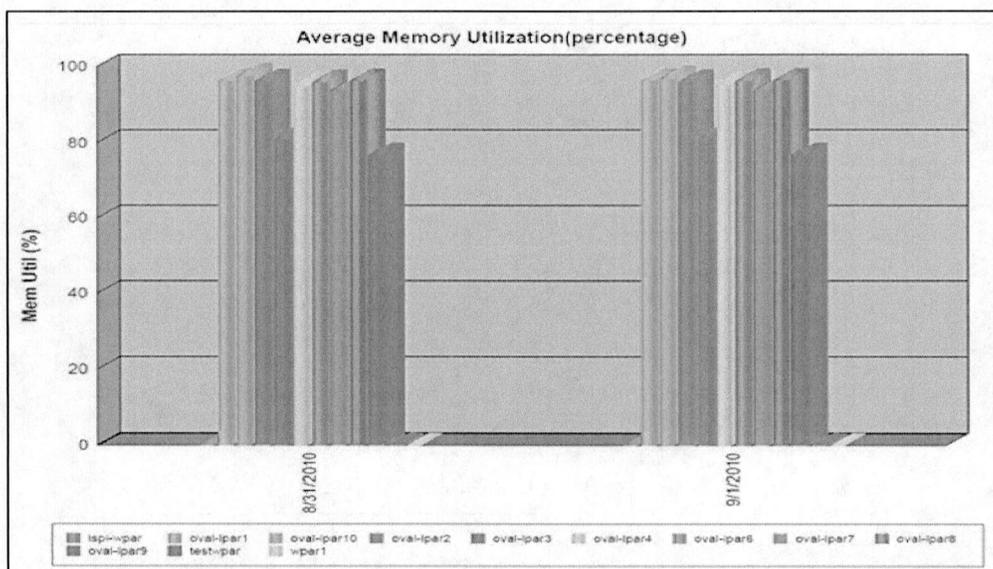

The image below represents the structural view of Health Net's virtualization infrastructure hierarchy in the environment.

The HP Virtualization SPI, along with HP Operations Agents, consolidates performance metrics to generate preconfigured reports, including:

- Configuration information, CPU and memory utilization of datacenter, host servers, and guest virtual machines configured on them
- List of top 10 CPUs according to usage
- List of top 10 host machines according to disk space consumed
- List of top 10 virtual machines reaching thresholds in terms of memory usage

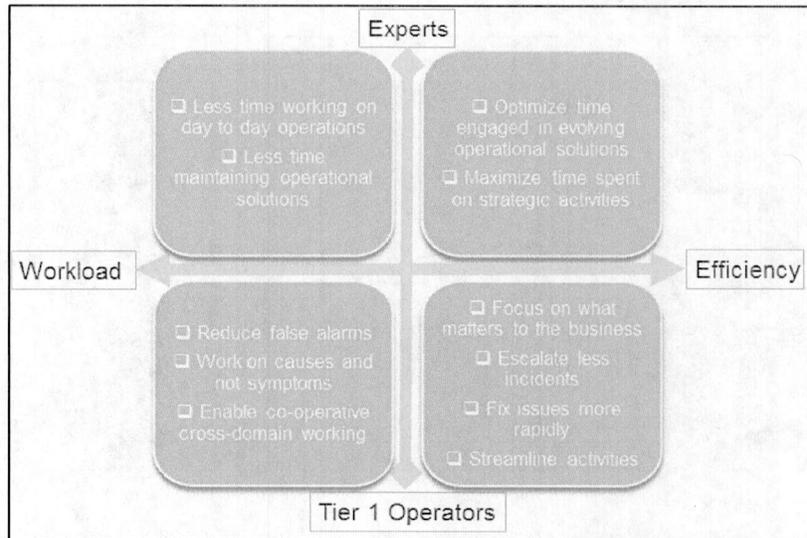

### Benefits of HM OM

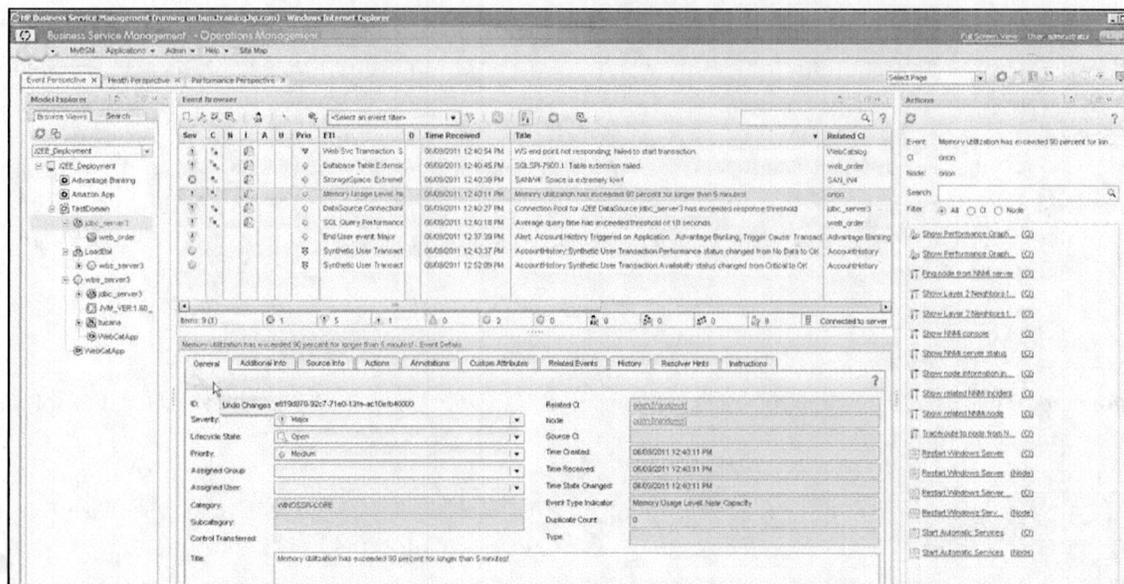

- Reduce costs and duplication of effort by consolidating events from disparate IT domains into a single enterprise console
- Speed the resolution of issues with improved visibility across the entire enterprise IT infrastructure
- Decrease the number of costly escalations by empowering Operations Bridge staff to resolve incidents on their own
- In-depth monitoring of physical and virtual environment and provide advance visualization of resource utilization

### Manager of Manager – HP OMi

Cognizant proposes HP OMi (Operations Manager i) as a centralized event management console to aggregate events from all the monitoring tools and perform Event correlation, Event Filtering and Event de-duplication. In the Health Net environment, the element managers like HP OMW, NNMi and other third party tools like Hitachi Tuning Manager, Sepaton, Spectra logic, Citrix EdgeSight, Cisco UCS manager and vCenter will be integrated with HP OMi to help minimize the gaps in operations.

Sample Event Browser View

Benefits of HP OMI

- Operations Bridge event-management improvement
  - Accelerate time to repair by focusing operators on causal events with topology-based event correlation

- Reduce outages proactively by linking business services to the underlying IT infrastructure, enabling operators to prioritize their activities
- Visualize application and service health
- Performance management
  - Identify resource problems in OS and Databases to reduce business risks associated with downtime or slow performance
  - Analyze historical performance trends to identify bottlenecks and drive infrastructure optimization
  - Provide immediate performance-issue identification with real-time diagnostic capabilities to lower business service impact
- Reporting
  - Identify issues using reports that unify performance, system, and availability information on a single graph
  - Clarify performance and usage trends based on historical application and system data to enable capacity management

### **Spectralogic tape library**

#### **Data Integrity Verification**

PreScan ensures that tapes are usable and can accept data. PreScan checks each imported tape and verifies that the tape can be written to, scanning the tape for potential issues including broken or dislodged leader, poor media health and write-protected status.

QuickScan confirms that a single track (one direction) can be read. QuickScan scans a tape unidirectionally by reading the length of one track of the tape to provide a rapid indicator of integrity of data written.

PostScan checks an entire tape to ensure that all sectors can be read. PostScan confirms that there are no media errors on the tape by reading the entire length of the tape up to the end of the recorded data.

#### **Media Lifecycle Management (MLM)**

When you use Spectra Certified Media, BlueScale Media Lifecycle Management (MLM) non-intrusively tracks more than 40 criteria about each tape throughout its usable life. This reporting helps you identify tapes that require retries to complete an operation, tapes with high error rates, and tapes with other problems so that you can evaluate whether the tape health is poor or the drive writing to the tape is the cause of the problem.

#### **Drive Lifecycle Management (DLM)**

Drive Lifecycle Management provides data about drives that you can use to identify drives with issues before those drives affect ongoing library operations. Used in conjunction with Spectra Logic's Certified Media, DLM, MLM, and LLM help you comprehensively manage your library and its drives and media across the life of each.

### Library Lifecycle Management (LLM)

BlueScale Library Lifecycle Management (LLM) tracks the library and its components across the library's lifecycle. Hardware Health Monitoring (HHM) tracks maintenance thresholds for key library components and notifies you when maintenance tasks are required to keep your library in optimum operating condition.

### BlueScale Management

The BlueScale management interface offers you unparalleled operator efficiency, giving you the ability to manage all library features including:

- Tape media with Media Lifecycle Management (MLM)
- Drives, robotics and other hardware components with Library Lifecycle Monitoring (LLM)
- Encryption and encryption keys with BlueScale Encryption
- Integrity of data with Data Integrity Verification (DIV)

### Encryption

Spectra T-series libraries support BlueScale Encryption and key management, with data encrypted through LTO drives. This is the only library-integrated encryption and key management available—no external hardware, appliance, or applications required. In a single step, you both encrypt and back up data. Because encryption is hardware-based, it minimally affects backup windows, and it doesn't burden the network. Managing encryption and the keys used to encrypt data is simple, because it's all handled through the library's graphic interface—on the Web and on the front panel.

### 3.2 Appendix II – File Share and Print Services

This appendix lists-out the printer names along with their locations, servers on which they are hosted and the drivers which are installed over these servers.

Printer Name	Location	Server Name	Driver Name
<b>P-YORKTOWN-01</b>	Remote Office-TSC	bld-fsvs01.FS.healthnet.com	RICOH Aficio MP 201 PCL 6

1081 Annex 2 (R)

Part 2-2

**EXHIBIT A-3-2**  
**SOLUTION DESCRIPTION - ITO PHASE II**

## **1. INTRODUCTION**

Cognizant would like to thank Health Net for its invitation to submit a proposal for a seamless Transition of outsourced infrastructure services to Cognizant from Health Net and incumbent vendors in a manner that will minimize business disruption and business risk to Health Net. The Health Net and Cognizant partnership will focus on services, solutions and a Service Delivery platform that will support rapid scalability, growth, and change in the composition and location of Health Net's businesses. Cognizant looks forward to this opportunity of extending our partnership to ITO services on a similar relationship paradigm that places excellence in execution and responsiveness to Health Net's business needs at the forefront of our engagement model. This proposal addresses the IT Solutions that will be delivered as part of Infrastructure Outsourcing.

Cognizant understands Health Net's business environment by virtue of its long-standing relationship and exposure to Health Net's IT and business processes. This document provides an overview of the scope of IT services, solution approach for Infrastructure Management, Storage, Service delivery with security and compliance controls. Leveraging Cognizant's comprehensive business process management expertise, the proposed ITO solution outlines process harmonization, optimal organization design and change management, and offering transformational benefits to meet the Health Net's objective.

Cognizant will provide all IT infrastructure services to Health Net in a unified BPaaS model with improved control over capability and increasing capacity. As part BPaaS Service Transition, Cognizant Infrastructure team will be working on moving them to Cognizant's Data Center at Centennial, CO. Once the applications are migrated to Cognizant Data Center, Cognizant Infrastructure team will be focused on providing end to end services for BPaaS Assets Infrastructure needs. The foundation towers proposed in this proposal will be a part of both ITO and BPaaS and the actual split in scope will happen at the core and application layer. The ITO support solution covers end to end support for all applications which are not hosted under the BPaaS model. The overall scope includes management, support and hosting of BPaaS assets. Infrastructure Management of Deployed BPaaS Assets, that include:-

- Data Center Hosting Services
- Network Management
- Infrastructure Server, Middleware and Database Management
- Capacity Planning and Capacity Management
- Service Desk Support

## EXHIBIT A-3-2

## SOLUTION DESCRIPTION - ITO PHASE II

<b>1. INTRODUCTION .....</b>	<b>2</b>
<b>2. SCOPE DEFINITION.....</b>	<b>3</b>
2.1. IN-SCOPE SERVICES .....	3
2.2. OUT-OF-SCOPE AND SCOPE EXCLUSIONS .....	3
<b>3. SOLUTION DESCRIPTION .....</b>	<b>3</b>
3.1. ITO – CORE SERVICES .....	3
3.1.1. <i>Data Center</i> .....	4
3.1.2. <i>DC Network (LAN and WAN)</i> .....	19
3.1.3. <i>Security</i> .....	39
3.1.4. <i>Servers</i> .....	52
3.1.5. <i>Storage</i> .....	70
3.1.6. <i>Backup</i> .....	81
3.1.7. <i>Middleware</i> .....	89
3.1.8. <i>Directory Services</i> .....	93
3.1.9. <i>DNS/DHCP</i> .....	97
3.1.10. <i>Messaging and Collaboration</i> .....	100
3.1.11. <i>Monitoring Tools</i> .....	103
3.1.12. <i>VoIP</i> .....	112
3.1.13. <i>Thin Client</i> .....	118
3.1.14. <i>Service Desk</i> .....	120
3.2. ITO SERVICE DELIVERY.....	126
3.2.1. <i>Delivery Location and Organization</i> .....	128
3.2.2. <i>Service Management</i> .....	132

## 2. SCOPE DEFINITION

The overall scope includes the hosting management and support for ITO application portfolio. Below is a summary of key scope items:-

- Hosting of all the infrastructure at Cognizant data center
- Provision of infrastructure hardware platform
- Provision of Operating Systems and Infrastructure Application Software
- ITIL framework based “dedicated” service delivery on 24x7 supporting SLA using Cognizant’s global delivery model with an exception of federal services support scope which will be delivered from US delivery center
- Provide periodic reporting and metrics / dashboards to Health Net.

The foundation towers will be a part of both ITO and BPaaS and the actual split in scope will happen at the core and application layer. The ITO support solution covers end to end support for all applications which are not hosted under the BPaaS model. This will be more aligned to traditional ITO support and includes hosting of those applications as well providing support to all Health Net end users.

### 2.1. In-Scope Services

Foundation services layers will be common for both the BPaaS and ITO portfolios. However, even for the foundation towers like network, security, active directory there will be logical separation for ITO and BPaaS scope. The core layer environment will be separate for BPaaS and ITO. The document describes the approach towards setting up and target state of the ITO environment as well as the operational aspects of service delivery.

Scope items are defined part of Exhibit document Ex A-1 Scope Model.

### 2.2. Out-Of-Scope and Scope Exclusions

Any activity not described explicitly in the above In scope section will be treated as out of scope. The activities identified as Out of Scope for this engagement are as follows:

#### **Network and Links**

Implementation, configuration and documentation of network devices including Riverbeds at Health Net Boulder data center.

## 3. SOLUTION DESCRIPTION

### 3.1. ITO – Core Services

This section details different services offered as part of this ITO engagement with Health Net. This section details the solution approach, deliverables, assumptions, dependency, associated risks and mitigations for the foundation services / use cases.

**3.1.1. Data Center**

Cognizant has architected its solution approach based on Health Net’s objectives and aligned to Health Net requirements, landscape and complexities. Solution has been architected with the information we learnt on Health Net’s infrastructure estate, the locational spread, the required support coverage, environment complexity, scope of activities and other key factors as defined in ITO Phase1 Documentations.

**3.1.1.1. Solution Approach**

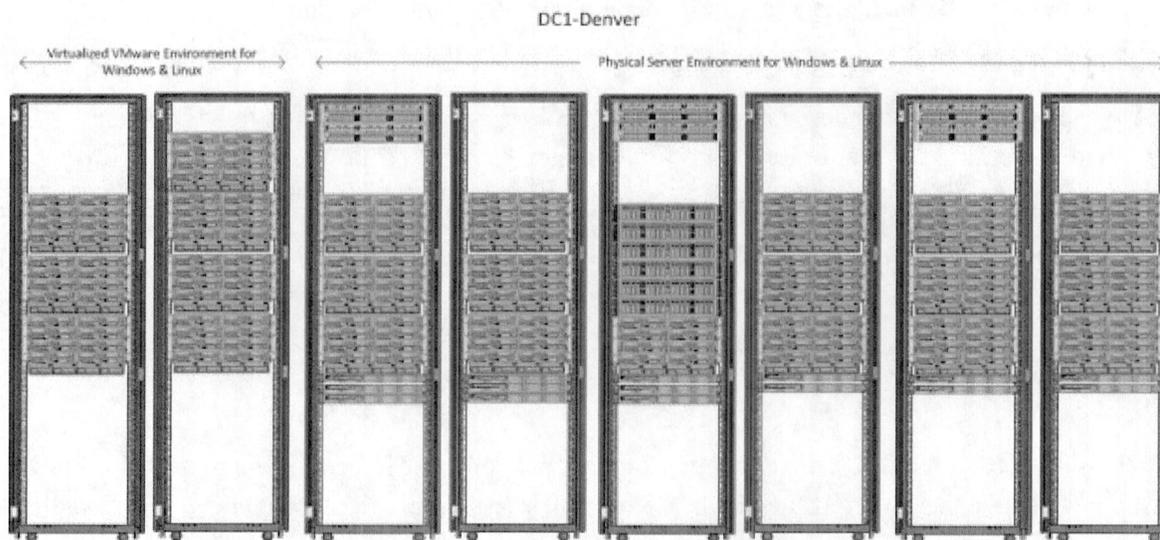

Cognizant will setup two data centers to meet Health Net’s initiatives. For the Primary Data center (DC1), Cognizant will use our partner Latisys to deliver the DC1 facility. For the Secondary Data center (DC2), Cognizant will utilize space in its Data center in Phoenix (Cyrus One facility).

**Blade Servers:**

Cognizant proposes Cisco UCS Blade servers for Server environment.

Blade Server Model	Hardware Configuration
<b>5108 chassis (x 23)</b>	<ul style="list-style-type: none"> <li>▪ Per Chassis (H x W X D) – 6RU: 10.5 x 17.5 x 32</li> <li>▪ Power (Per Chassis) - 4 2500 W capacity, 200v -240v, 50 to 60 HZ single-phase</li> </ul>
<b>6296 Cisco Switch (x 3 pair)</b>	<ul style="list-style-type: none"> <li>▪ (H X W x D) – 3.44 x 17.3 x29.5</li> <li>▪ Power – 750 W</li> </ul>

The diagram below depicts the rack details for the following UCS blade:

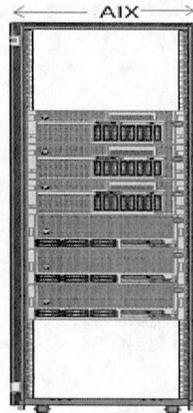

**Figure: Rack Components**

*Note - With the flexibility of the Cisco Chassis we can utilize all the slots to accommodate different workloads. (E.g. The 4 open slots in the management chassis could be used for Cloud or VDI if needed. For the open rack space, the same rule applies but it will be dependent on DC review to make sure we have enough power and the rack can support more weight.)*

**AIX Servers:**

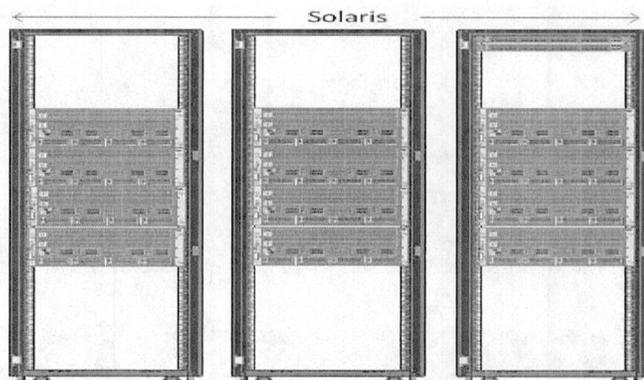

Server Model	Hardware Configuration
<b>P750 (3)</b>	<ul style="list-style-type: none"> <li>▪ 8.55"H x 17.6"W x 33.78"D (217 mm x 447 mm x 858 mm); Weight: 155 lb (70.3 kg)<sup>2</sup></li> <li>▪ 200 V to 240V AC, single phase</li> </ul>
<b>P760 (3)</b>	<ul style="list-style-type: none"> <li>▪ Same as Above</li> </ul>

**Figure: Aix Server**

**Solaris Servers:**

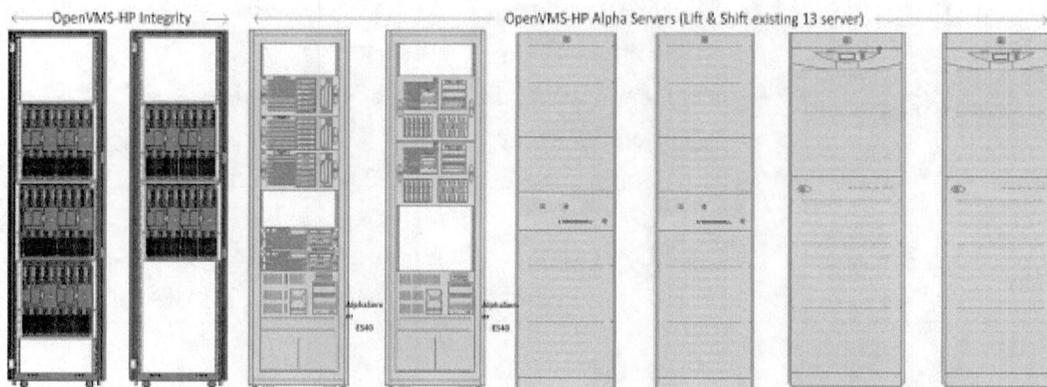

Server Model	Hardware Configuration
<b>T4-4 (12)</b>	<ul style="list-style-type: none"> <li>▪ Height: 219mm (8.62 in); 5RU</li> <li>▪ Width: 445 mm (17.5 in.)</li> <li>▪ Depth: 700mm (27.6 in.)</li> <li>▪ Weight: Approx. 79 kg (175 lbs.) max., without rackmount kit</li> <li>▪ Four hot-swappable AC 2,060 W redundant (2 + 2) power supplies</li> <li>▪ Maximum operating input current at 200 VAC: 14.6A</li> <li>▪ Maximum operating input power at 200 VAC:2770W</li> </ul>

**Figure: Solaris Server**

**HP Alpha Servers:**

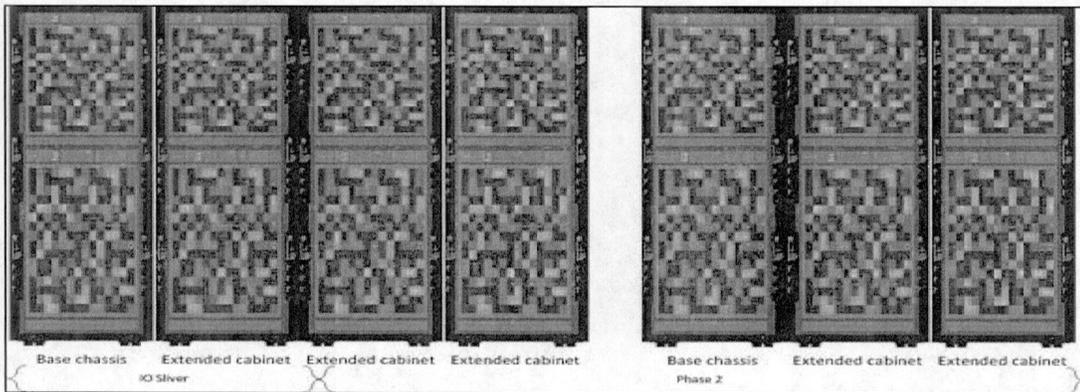

Blade Server Model	Hardware Configuration
<b>BL890 (9, 4 C7000 Chassis)</b>	<ul style="list-style-type: none"> <li>▪ Height 17.4 in (442 mm)</li> <li>▪ Width 17.6 in (447.04 mm)</li> <li>▪ Depth 32 in (813 mm)</li> <li>▪ Max input power per line cord 7836VA Max 2400W PSU Max input current per line cord 24A at 200 VAC 23.1A at 208 VAC Max input power per line cord 8340 VA Max</li> </ul>
<b>Alpha Servers</b>	<ul style="list-style-type: none"> <li>▪ DS15A 5.1 x 17.6 x 19 - 3U 1 x 400w qty 2</li> <li>▪ ES40 13.87 x 17.6 x 30.1 -8U 1 x 720w qty 2</li> <li>▪ GS160 67 x 55.1 x 39.4 39U 1 x 2000w qty 2</li> <li>▪ DS25 8.69 x 17.5 x 29.187 5U 2 x 500w qty 4</li> <li>▪ ES80 79 x 24 x 47 41U 2 x 700w qty 1</li> <li>▪ GS1280 79 x 24 x 47 41U 1 x 2800w qty 2</li> <li>▪ ES45 13.87 x 17.6 x 30.1 8U 1 x 1080w qty 3</li> </ul>

**Figure: HP Alpha Servers**

**Storage Hitachi VSP:**

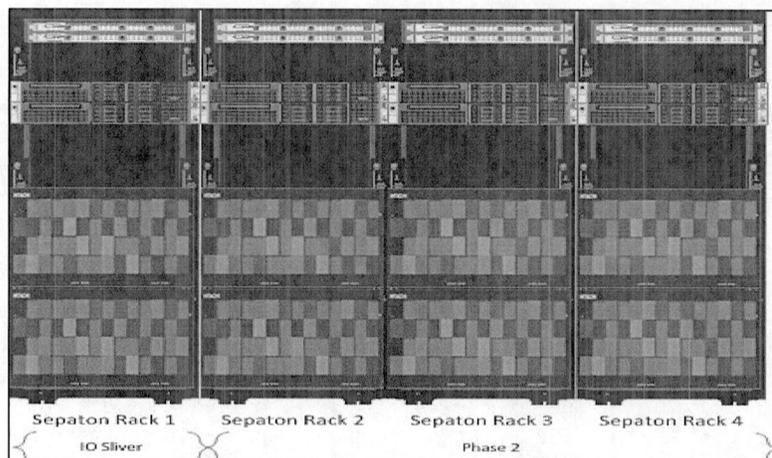

Model	Hardware Configuration
<b>Hitachi VSP 1</b>	<ul style="list-style-type: none"> <li>▪ VSP 4 19" racks , will need space on both the left and right side</li> <li>▪ (H x W x D)- 78.9 x 24 x 43.3 (x4, plus 1 space to left and right)</li> <li>▪ Power – Each rack requires 4 L6-30 connections 208V for a total of 16</li> </ul>
<b>Hitachi VSP 3</b>	<ul style="list-style-type: none"> <li>▪ VSP 4 19" racks , will need space on both the left and right side</li> <li>▪ (H x W x D)- 78.9 x 24 x 43.3 (x4, plus 1 space to left and right)</li> <li>▪ Power – Each rack requires 4 L6-30 connections 208V for a total of 16</li> </ul>

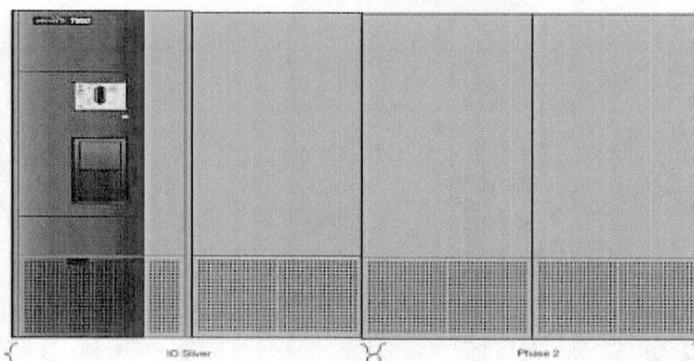

**Figure: Storage Hitachi**

**Sepaton:**

Model	Hardware Configuration
<b>Sepaton</b>	<ul style="list-style-type: none"> <li>• 1 rack (ITO Phase 1, Adding 3 more Rack for ITO Solution, standard 19" rack will need 1 space for expansion)</li> <li>• (W x D) – 24 x 40</li> <li>• Power - 120/208 VAC - 3 phase, 30A/phase (3P+PE)</li> </ul>

**Figure: Sepaton**

**Figure: Sepaton**

**NetBackup: 2 Additional racks, Plus 2 racks from ITO Phase 1.**

Model	Hardware Configuration
<b>NetBackup (4 appliance from ITO Phase 1, and adding 3 more media appliance for ITO Phase 2)</b>	<ul style="list-style-type: none"> <li>▪ Each appliance (W x D) – 2U:17.3 x 27</li> <li>▪ Power - 100 to 127, 200 to 240, Amps: 7 (100V to 127V), 3.5 (200V to 240V) L6 -30P</li> </ul>

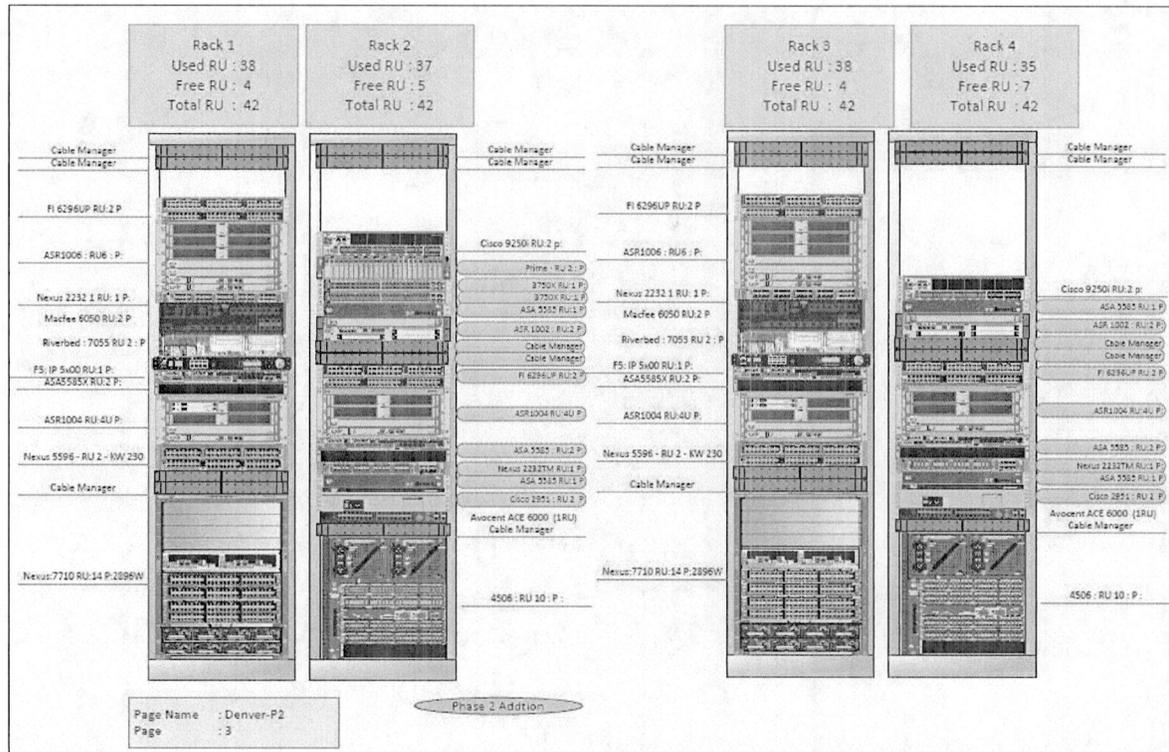

Note: 2 Media servers planned for Federal and rest for Commercial, this will be finalized during the LLD Phase

**Network**

This section provides configuration details for all the network devices used in the Centennial DC.

Model	Hardware Configuration
<b>CISCO2951/K9</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) – 2U : 3.5 x 17.25 x 18.5 in</li> <li>▪ Dual Power - 100 to 240 VAC and operating power 680 W</li> </ul>
<b>ASA5525</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) – 1U: 1.75 x 17.5 x 14.25 in</li> <li>▪ Power - 100 to 240 VAC and operating power 108W</li> </ul>

Model	Hardware Configuration
<b>Nexus 2232TM-E</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) – 1U: 1.72 x 17.3 x 17.7</li> <li>▪ Dual Power - 100 to 240 VAC and operating power 800W</li> </ul>
<b>ASA 5585</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) – 2U: 3.5 x 19 x 26.5 in.</li> <li>▪ Dual Power - 120 to 240V, and operating power 800 W</li> </ul>
<b>ASA 5545</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) – 1U: 1.67 x 16.7 x 19.1 in</li> <li>▪ Power - 100 to 240 VAC and operating power 125W</li> </ul>
<b>ASR 1004</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) – 4U: 7x17.2x18.2 in</li> <li>▪ Dual Power - 120 to 240V and operating power 960 W</li> </ul>
<b>UCS 6296UP</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) - 2 RU 3.44 x 17.3 x 29.5 in.</li> <li>▪ Dual Power - 100 to 240V and operating power 950 W</li> </ul>
<b>Cisco 3750 Switch</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) – 1U: 1.75 x 17.5 x 18.0 in.</li> <li>▪ Dual Power - 100 to 240V and operating power 660 W</li> </ul>
<b>ASR1002-X</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) – 2U: 3.5 x 17.2 x 22.0 in.</li> <li>▪ Dual Power - 120 to 240V and operating power 560 W</li> </ul>
<b>F5 5200V</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) – 1U:1.75 x 17 x 21 in.</li> <li>▪ Dual Power – 90-240 VAC operating power 800 W</li> </ul>
<b>F5 2000S</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) – 1U:1.75 x 17 x 21 in.</li> <li>▪ Power – 90-240 VAC operating power 400 W</li> </ul>

<b>McAfee IPS 6050</b>	<ul style="list-style-type: none"> <li>▪ (H x W x D) –2U:3.5 x 16.75 x 30 in.</li> <li>▪ Power – dual power supply and operating power 450 W</li> </ul>

**Figure: Rack Diagram**

### Overall Layout DC1:

This section describes data center floor layout. The space is broken into functional areas consisting of Core Network, Network services, Tape Library, SAN Storage, UCS blade compute and management / SCCM compute. The initial build-out will include the Core Network, Network Services and a mix of standard compute, Standalone, SAN Storage and tape library functional areas. The remaining space will be reserved for future growth and developed as required.

- **Core Network:** Contains the core routers, WAN edge, carrier devices, network fibre backbone and network copper cabling infrastructure, etc.
- **Network Services:** Contains the SAN Switches, and SAN fibre cabling infrastructure
- **Tape Library:** Contains Automated Tape Library units
- **SAN Storage:** Contains Storage Arrays (HNAS, SAN), Sepaton, HCP/HDI
- **Standard / standalone Compute:** Contains standard servers (Blades and Rack)
- **Cage:** Physical Cage around racks is as per standard recommended by Industrial security team
  - Raise floor to the ceiling cage or standard wall height with cap on top of the cage. As per the Centennial DC setup, there are motion sensors below the raised floor
  - Enable security control at cage level instead of rack level

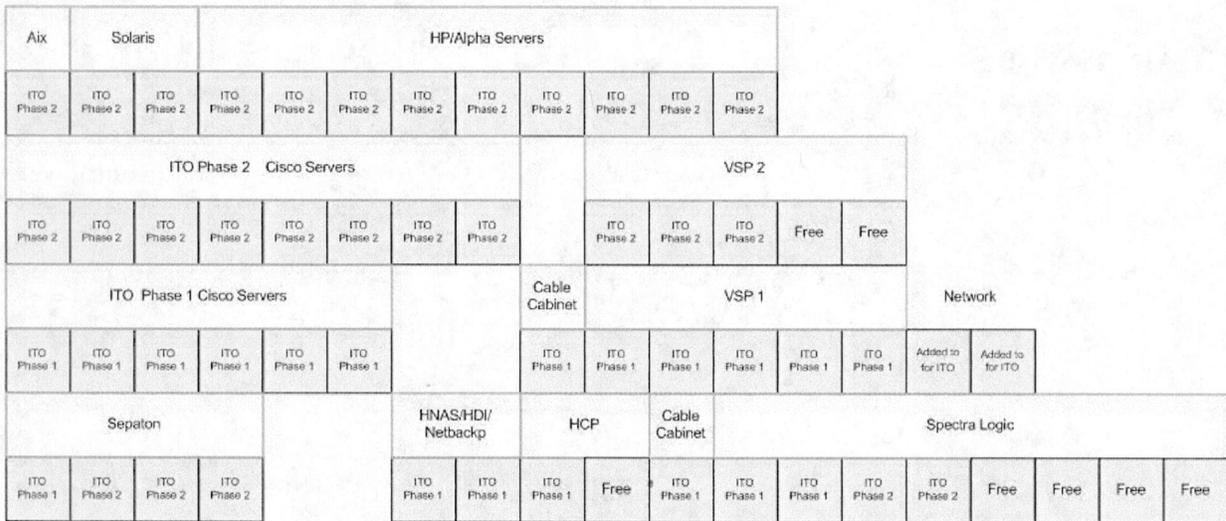

- Security will consist of cameras, notification setup at cage door when someone opens the door. This is the standard recommendation by the industrial security team being used in Health Net MRI rooms.

- **Power Requirement:** The power requirement is provided in the below table:

Centennial DC - Sq. ft.		
Racks	Power/Rack (Kw)	Total Power (Kw)
48	8.75	~420

**Rack Layout:**

The following diagram represents the rack layout of the DC1:

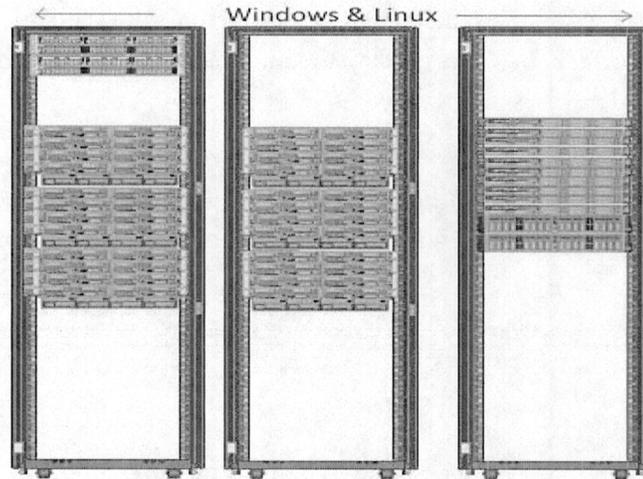

**Figure: Rack Layout – DC1**

**Secondary Data Center (DC2) – Phoenix DC**

**Server Blades:**

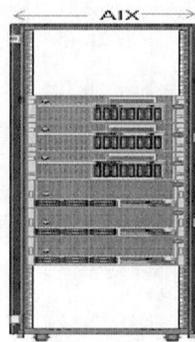

Model	Hardware Configuration
<b>Cisco - 5108 chassis (x 6)</b>	<ul style="list-style-type: none"> <li>▪ Per Chassis (H x W X D) – 6RU: 10.5 x 17.5 x 32</li> <li>▪ Power (Per Chassis) - Four 2500 W output, 200v -240, 50 to 60 HZ single-phase</li> </ul>

**Storage VSP:**

Model	Hardware Configuration
<b>Hitachi VSP 2</b>	<ul style="list-style-type: none"> <li>▪ VSP 3 19" racks , will need space on both the left and right side</li> <li>▪ (H x W x D)- 78.9 x 24 x 43.3 (x4, plus 1 space to left and right)</li> <li>▪ Power – Each rack requires 4 L6-30 connections 208V for a total of 16</li> <li>▪ Will add to extended cabinets</li> </ul>

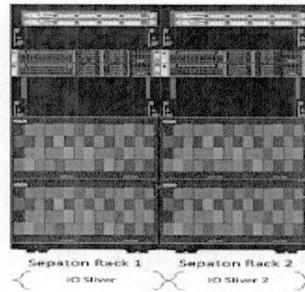

**Figure: Hitachi Storage (HCP)**

**Storage Sepaton:**

Model	Hardware Configuration
-------	------------------------

<p><b>Sepaton (x2)</b></p>	<ul style="list-style-type: none"> <li>▪ 1 rack ( ITO Phase 1, standard 19” rack will need 1 space for expansion, for ITO add 2 additional racks</li> <li>▪ (W x D) – 24 x 40</li> <li>Power - 120/208 VAC - 3 phase, 30A/phase (3P+PE)</li> </ul>
----------------------------	--

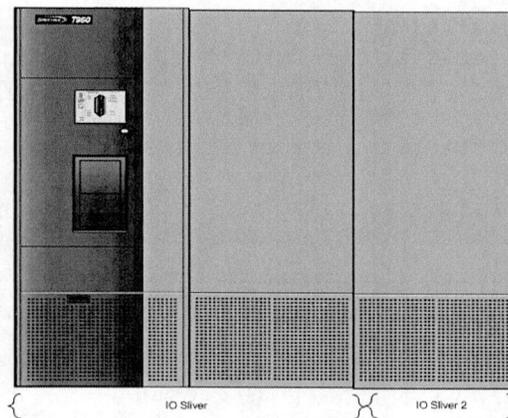

**Figure: Storage Sepaton**

**Storage Spectra Logic: Hardware Configuration**

Consists of One base cabinet for ITO Phase 1 and for ITO where adding two more extended cabinets, not traditional size, will need up to 5 free spaces to the right (facing the product) for future growth

- (W x D) – 29 x 43.25, see page 19 of the document below for details (not standard size)
- Power - NEMA L6-20P, male or NEMA L6-30P, male IEC 60320-C19, female

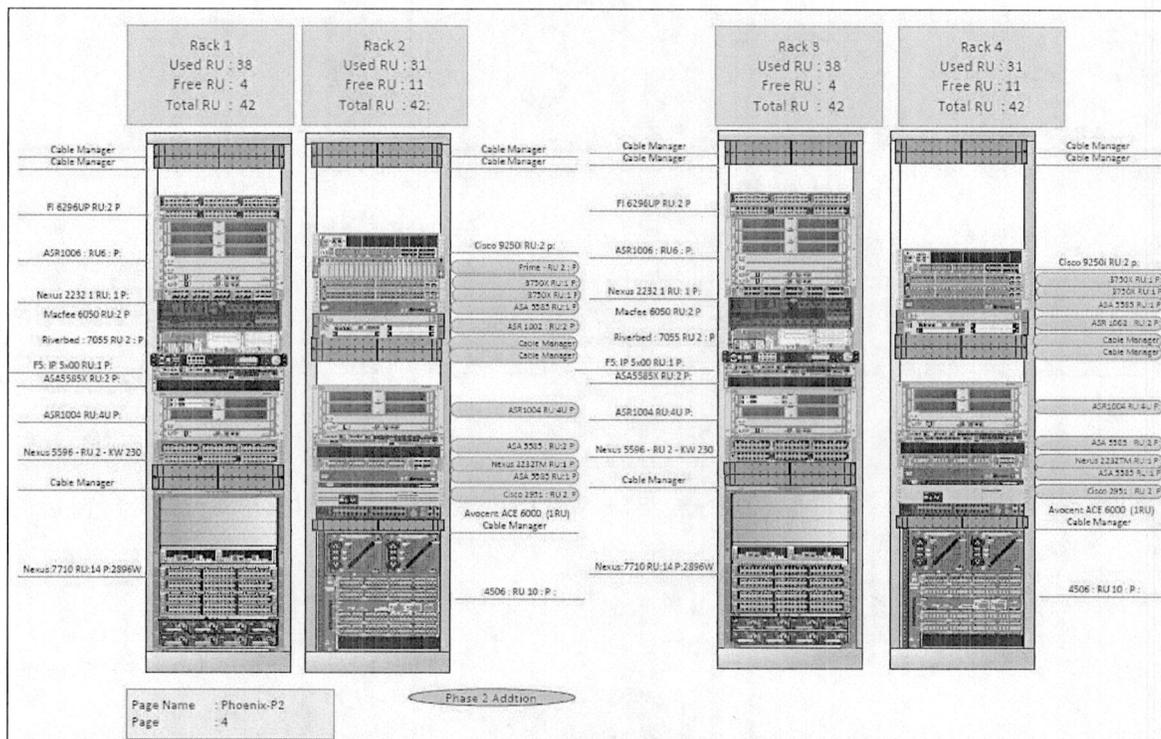

**Figure: Storage Logic Storage Device**

**Storage HNAS / NetBackup / HDI:**

Model	Hardware Configuration
<b>NetBackup (x2)</b>	<ul style="list-style-type: none"> <li>Each appliance (W x D) – 2U:17.3 x 27</li> <li>Power - 100 to 127, 200 to 240, Amps: 7 (100V to 127V), 3.5 (200V to 240V) L6 -30P</li> </ul>

**Network Environment:**

The diagram below depicts the network components in the Rack:

**Figure: Rack Details of Network Component DC2**

**DC2 over all Layout:**

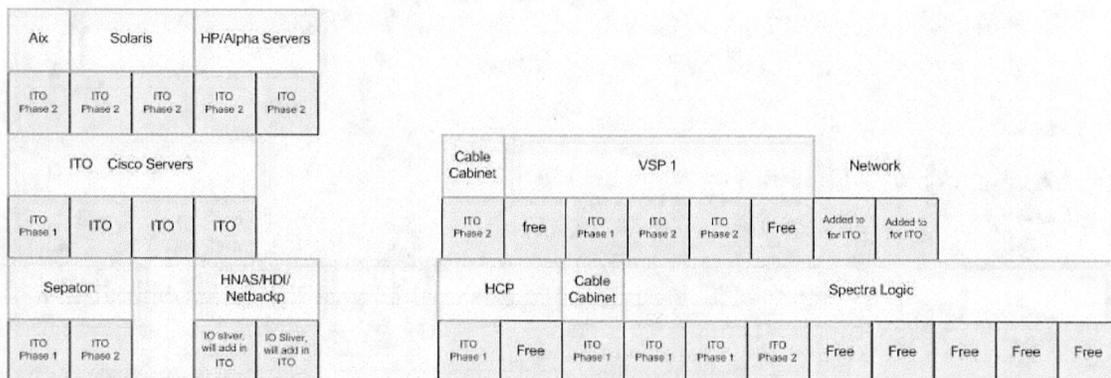

This section describes data center floor layout. The space is broken into functional areas consisting of Core network, Network services, Tape library, SAN Storage, UCS compute blade, management and SCCM Compute. The initial build-out will include the Core network, Network services and a mix of standard compute, Standalone SAN Storage, and Tape library functional areas. The remaining space will be reserved for future growth and developed as required.

- **Core network:** Contains the core routers, WAN edge, carrier devices, network Fiber backbone and network copper cabling infrastructure etc.

- **Network services:** Contains the SAN Switches, and SAN Fiber cabling infrastructure
- **Tape library:** Contains Automated Tape Library units
- **SAN Storage:** Contains Storage Arrays (SAN), Sepaton
- **Standard / Standalone compute:** Contains standard servers (Blades and Rack)
- **Cage:** Physical Cage around racks is as per standard recommended by Industrial security team.
  - Raise floor to ceiling Cage OR standard wall with cap on top of cage to cover from top. As per Centennial DC setup, there are motion sensors below the floor
  - Enable security control at cage level instead at rack level
  - Security will consist of cameras, notification setup at cage door when someone opens the door. This is the standard recommendation by Industrial security team being used in Health Net MRI(Machine Room Instrument) rooms
- **Power Requirement:** The power requirement is mentioned below:

Phoenix DC - Sq. ft.		
Racks	Power / Rack (KW)	Total Power (Kw)
24	~3.375	~81

The following figure depicts the DC2 Rack Layout:

**Figure: DC2 Rack Detail**

**3.1.1.2. Service Deliverables**

The services to be delivered as part of this Health Net engagement are as below:

**VMware Infrastructure Build**

- Build VMware infrastructure for Federal and Commercial as per design

- Testing Federal and Commercial to logically separate access restriction
- VMware functionality testing for vMotion, High Availability, VCenter heartbeat, etc.

#### **Storage and Backup Infrastructure Build**

- Build the Storage and backup infrastructure for Federal and Commercial as per design
- Testing Federal and Commercial to logically separate access restriction
- Testing Storage replication across DC for HCP, Zoning, performance and monitoring components.

#### **Network Build and Link Connectivity**

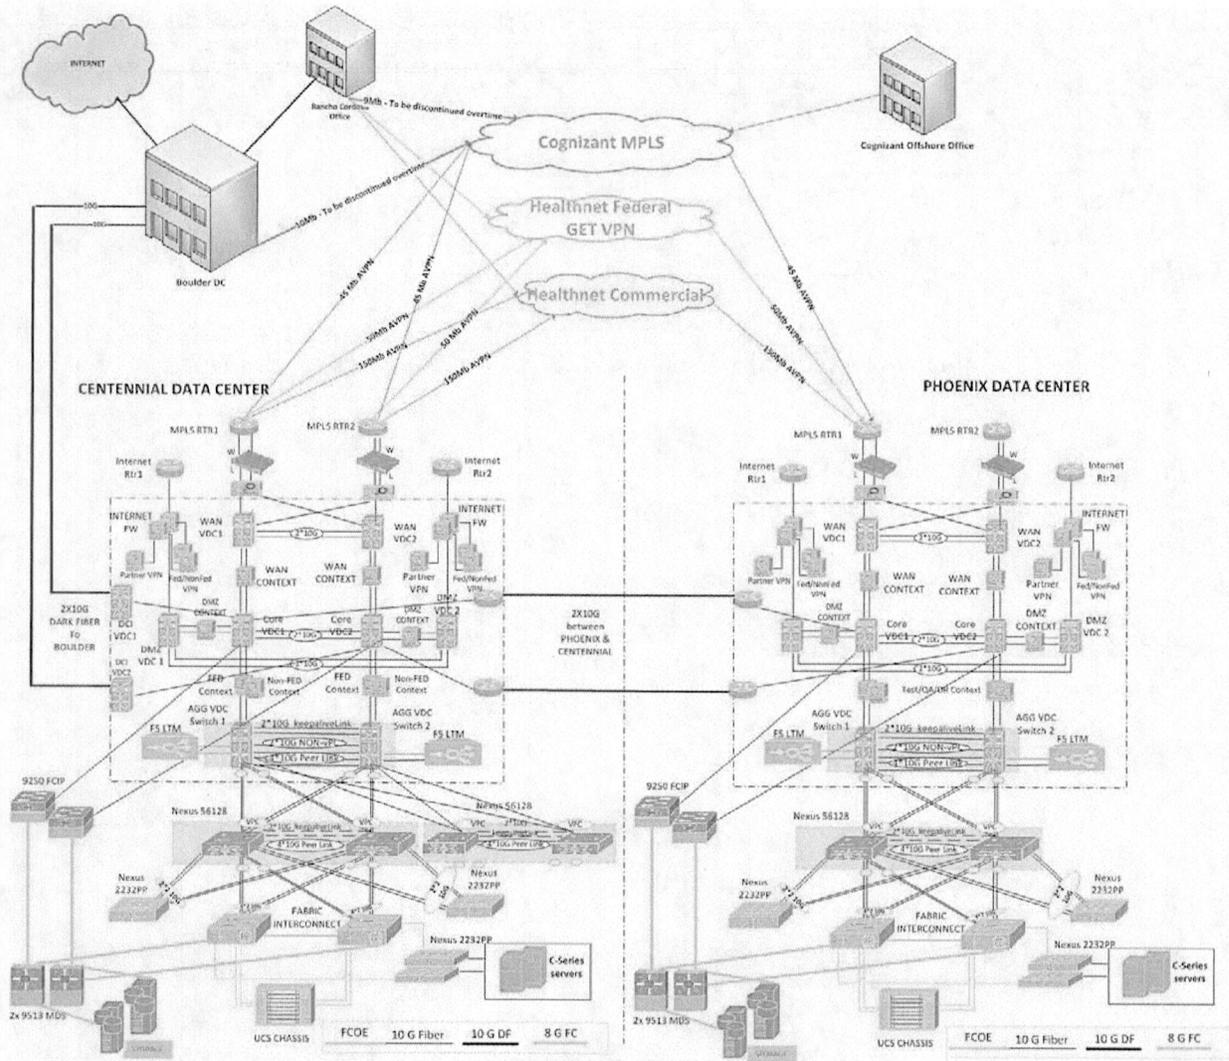

- Build the Network infrastructure at DC1 and DC2 as per design
- Testing Routing reachability between Centennial DC LAN and Boulder DC LAN (server Segment)
- Testing Routing reachability between Centennial DC LAN and Remote Location LAN
- Testing Logical Separation of Federal and Commercial traffic on DC firewall
- Testing firewall filters at Centennial DC, to permit legitimate traffic in-out of Centennial DC over P2P and MPLS Links
- Testing WAN traffic optimization between Centennial DC and remote locations with Riverbed Appliance, for VDI and File/Print traffic

*Note:- Health Net Information Security team to validate the hardening of network and security equipment implemented at Centennial and Phoenix.*

#### **3.1.1.3. Steady State Support Deliverables**

<b>Solution</b>	<b>Description</b>
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>▪ 24X7 Onshore support               <ul style="list-style-type: none"> <li>▪ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore ; Coimbatore</li> </ul>

#### **DC Operation Services**

**Figure: Combined Network View of Centennial and Phoenix Data centers**

**3.1.2.1. DC LAN**

Nexus 7710 will be configured with additional VDCs (DMZ VDC and Extranet VDC) to support the ITO Solution requirements. The below table provides a quick overview of the VDC design.

VDC Name	Purpose
WAN VDC	<ul style="list-style-type: none"> <li>MPLS access with logical segregation for Federal and</li> </ul>

Access Switch connectivity 56128 @ Centennial (Total of 4 X 56128) and Phoenix (Total of 2 X 56128)				Core Switch connectivity 2 x 7710 @ DC1 and DC2					
Access Switch									
*Total port counts (ITO Phase 1 + ITO Phase 2)		212		116			302		260

\*Total Port support @Centennial DC : 4 x 56128 ( 384 ports) and @ Phoenix : 2 \* 56128 ( 192 ports)

**Network Diagram**

Following diagram depicts the combined network view of Centennial and Phoenix data centers. ITO Phase 1 Network diagram has been modified with the ITO Phase 2 additions.

Access Switch connectivity 56128 @ Centennial (Total of 4 X 56128) and Phoenix (Total of 2 X 56128)					Core Switch connectivity 2 x 7710 @ DC1 and DC2

Description	ITO Phase 1 Modified	ITO Additions
	<p>Traffic</p> <ul style="list-style-type: none"> <li>▪ Cisco ACS for Authentication</li> </ul>	
<b>WAN MPLS</b>	<ul style="list-style-type: none"> <li>▪ Dedicated 2x ASR 1004 for WAN MPLS</li> <li>▪ Centennial -Redundant WAN link from ATT providing MPLS Services for Health Net Commercial, Federal and Cognizant.</li> <li>▪ Phoenix - Single MPLS link from ATT for Federal, Commercial and Cognizant links</li> <li>▪ Existing GET VPN encryption service from ATT is considered for Federal MPLS</li> <li>▪ Redundant McAfee IPS Required for WAN traffic.</li> <li>▪ Riverbed required for Federal and Commercial MPLS Traffic Optimization</li> <li>▪ Additional 11 Remote Locations require Riverbed Steelhead appliances</li> </ul>	<ul style="list-style-type: none"> <li>▪ WAN MPLS bandwidth upgrade</li> <li>▪ Dedicated GET VPN Key routers</li> </ul>
<b>Data Center Interconnect</b>	<ul style="list-style-type: none"> <li>▪ Dedicated Nexus 7k VDC and 2x ASR 1006 for the DCI Edge</li> <li>▪ 2x Nexus 7004 at Boulder</li> <li>▪ 2 x 10 Gig Link for Centennial to Boulder, terminated on the N7k VDC with MACSec Encryption</li> <li>▪ 2 x 10 Gig Link for Centennial to Phoenix, terminated on the ASR with IPsec Encryption</li> </ul>	<ul style="list-style-type: none"> <li>▪ Additional Traffic handling</li> </ul>

Description	ITO Phase 1 Modified	ITO Additions
		<ul style="list-style-type: none"> <li>▪ Partner COLO Routers</li> <li>▪ Partner Server</li> </ul>
<b>Server Farm</b>	<ul style="list-style-type: none"> <li>▪ Cisco UCS manager to connect to the Nexus 56128</li> <li>▪ UCS Chassis connects to 6296 Fabric interconnect using dual 10 Gig links</li> <li>▪ Cisco FEX Nexus 2232 for connecting the 1 Gig port requirements</li> <li>▪ F5 Load Balancers with 2 x virtual context for federal and Commercial for respective server application load balancing</li> </ul>	<ul style="list-style-type: none"> <li>▪ Additional ports on Nexus 5K</li> <li>▪ Additional Nexus 2K FEX</li> <li>▪ Additional UCS Domain (pair of FI) for Centennial</li> <li>▪ Additional Physical servers</li> </ul>
<b>Storage Area Network</b>	<ul style="list-style-type: none"> <li>▪ FCoE from UCS Chassis to the Fabric Interconnect (3x FI 6296)</li> <li>▪ Dedicated 2x MDS 9513 for SAN</li> <li>▪ Dedicated 2x Cisco 9250i for FCIP Replication</li> <li>▪ HBA Interfaces for the Physical Servers</li> </ul>	<ul style="list-style-type: none"> <li>▪ Additional FC Ports on MDS 9513</li> <li>▪ Increase in Replication and Migration Traffic in DCI links</li> </ul>
<b>Services</b>	<ul style="list-style-type: none"> <li>▪ All the network devices Routers, Firewall, IPS, WAN optimizer, L/B connect to the respective VDCs on the N7710</li> <li>▪ All the HNAS connect to the N7710</li> </ul>	<ul style="list-style-type: none"> <li>▪ Additional DMZ Load Balancers</li> <li>▪ Global Traffic Management</li> <li>▪ NTP Service through Infoblox</li> <li>▪ IP Address Management (IPAM) through Infoblox</li> </ul>
<b>Security</b>	<ul style="list-style-type: none"> <li>▪ ASA 5585 SSP 40 with dedicated Security Contexts for providing Firewall Security</li> <li>▪ McAfee 6050 IPS for WAN traffic inspection</li> <li>▪ Logical Separation of Federal and Commercial</li> </ul>	<ul style="list-style-type: none"> <li>▪ Additional DMZ Firewall</li> <li>▪ Remote Access VPN Firewall</li> <li>▪ Partner VPN Firewall</li> <li>▪ Intrusion Prevention Systems</li> </ul>

- DMZ and Internet
- Extranet Zone for Partner Connectivity
- Additional Servers and Applications
- WAN MPLS Bandwidth Upgrade

Please refer the ITO Phase 1 modified solution document for the revised ITO Phase 1 Network Design. This document is focused on the ITO Network component additions considered for Centennial and Phoenix Data Centers.

### Network ITO Additions

Following table provides an overview of the ITO Phase 1 Modified and the additional Network components added for ITO requirement.

Description	ITO Phase 1 Modified	ITO Additions
<b>Architecture</b>	<ul style="list-style-type: none"> <li>▪ Modular Layer architecture with dedicated Core, Aggregation and Access</li> </ul>	<ul style="list-style-type: none"> <li>▪ Architecture remains same with the following component additions               <ul style="list-style-type: none"> <li>○ DMZ and Internet</li> <li>○ Partner Connectivity</li> <li>○ Additional Server's Support</li> <li>○ Additional Application's Support</li> <li>○ WAN MPLS bandwidth upgrade</li> </ul> </li> </ul>
<b>Core and Aggregation</b>	<ul style="list-style-type: none"> <li>▪ 2 additional N56128 at Centennial will be deployed at Access which will be integrated to the existing 2x N7710 with VDC support for Core, Aggregation, WAN Edge and DCI Edge</li> </ul>	<ul style="list-style-type: none"> <li>▪ Additional VDCs for DMZ and Extranet Zone</li> <li>▪ Additional N56128 will be added to the existing ITO Phase 1 architecture</li> </ul>
<b>DMZ and Internet</b>	<ul style="list-style-type: none"> <li>▪ Not Available</li> </ul>	<ul style="list-style-type: none"> <li>▪ Dual Internet Service Provider</li> <li>▪ DMZ Security Controls</li> <li>▪ External Facing Servers</li> <li>▪ External DNS</li> <li>▪ External Server / application Load Balancers</li> <li>▪ Global Traffic Manager</li> </ul>
<b>Extranet Zone</b>	<ul style="list-style-type: none"> <li>▪ Not Available</li> </ul>	<ul style="list-style-type: none"> <li>▪ Partner Site to Site VPN</li> </ul>

Support Team	24x7 Surveillance of DC room / Infrastructure component
	<ul style="list-style-type: none"> <li>▪ Coordination and tracking of all Data center service visits</li> <li>▪ Visual / Physical site inspecting / floor walk in the Data center</li> <li>▪ Backup Tape handling - Loading / Unload tape in Tape library</li> <li>▪ Monitor Power / Cooling / Data center cleaning</li> <li>▪ Basic observation and reporting on the environment in the Data center</li> <li>▪ Develop an annual preventive maintenance schedule</li> <li>▪ Route maintenance of critical infrastructure (UPS and Battery Systems, Power Distribution, Chillers, Generators, etc.)</li> </ul>

#### 3.1.1.4. Assumptions

#### 3.1.1.5. Dependency

Below are the dependencies on Health Net:

- Testing connectivity between DC1 and the incumbent DC
- Testing MPLS connectivity / performance between DC and Remote sites
- Decision on cage type will be determined before DC build out.

#### 3.1.1.6. Risk and Mitigations

In the following section we will discuss about the risks and mitigations in detail mapping them with their respective probability and impact.

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	Support of Key SME's from incumbent during Implementation	High	Medium	Involve Health Net to facilitate and govern the Implementation, requiring integration with Boulder DC

#### 3.1.2. DC Network (LAN and WAN)

The proposed Data Center Network at Centennial and Phoenix is flexible and scalable to accommodate the additional growth requirements. ITO Phase 1 Network architecture will have the following additional infrastructure components added to support the ITO solution requirements.

VDC Name	Purpose
	Commercial traffic <ul style="list-style-type: none"> <li>▪ Multiple VRF will be created to segregate the traffic (Eg:, FED-VRF, Non-FED-VRF)</li> </ul>
AGG VDC	<ul style="list-style-type: none"> <li>▪ Multiple VRF will be created to segregate the traffic (Eg:, FED-VRF , Non-FED-VRF)</li> <li>▪ FHRP for Server VLANs</li> <li>▪ All communication between different environment will be restricted using Firewall</li> <li>▪ Only required route will be leaked between environment</li> <li>▪ If communication need to be restricted between any specific server with same VLAN then Private VLANs (PVLAN) feature in Nexus can be deployed</li> <li>▪ Multi Chassis Ether Channel Support</li> <li>▪ All unused ports will kept administratively down at Base VDC(Default VDC)</li> <li>▪ Dedicated Fabric for the SAN and no FCoE on Nexus 5K</li> </ul>
Core VDC	<ul style="list-style-type: none"> <li>▪ Core routing, all the environment IP routes will be learned and advertised to respective WAN VRF's</li> <li>▪ Dynamic routing protocol</li> <li>▪ Firewall context protection between Agg-VDC and Core VDC</li> <li>▪ ACLs on the Nexus will be used to secure the DCI link</li> <li>▪ No firewall will be configured between Data center replication link</li> </ul>
Extranet VDC	<ul style="list-style-type: none"> <li>▪ Partner Routers access to Health Net Infrastructure</li> <li>▪ Firewall and IPS protection</li> <li>▪ Private VLAN configured to restrict communication between different vendor host/server.</li> <li>▪ Static routing preferred at this VDC due to multiple vendor equipment's connected</li> </ul>
DMZ VDC	<ul style="list-style-type: none"> <li>▪ Multi-homed ISP access</li> <li>▪ BGP routing Protocol</li> <li>▪ External facing services</li> <li>▪ Firewall contexts for the DMZ segments</li> <li>▪ IPS protection</li> <li>▪ Global Load Balancing</li> <li>▪ Local Traffic Manager</li> </ul>
DCI VDC	<ul style="list-style-type: none"> <li>▪ 2 X 10 G Link for Inter DC Communication</li> <li>▪ Encryption will be configured to secure the data for the purpose</li> </ul>

VDC Name	Purpose
	of federal compliance

### 3.1.2.1.1. Solution Approach

In addition to the existing network infrastructure in ITO Phase 1 modified phase, following devices will be added for the DC LAN for ITO Phase 2 migration.

Additional ITO Device	Centennial	Phoenix
Nexus 2232TM-E 32 x 1/10GBASE-T host interfaces and modular uplinks (8 x 10 Gigabit Ethernet fabric interfaces)	12	6
Catalyst 3750X – 48 port	2	2

Fabric extender considered for the servers will be dual attached to additional pair of N56128. All the physical server will be dual homed to Fabric extender for redundancy purpose. A dedicated 2 X 3750X stack switch will be placed at DMZ to accommodate the 1G connections. Servers with high throughput requirements (eg: VMS) can be directly attached to the 5Ks.

Additional VDC will be created for Extranet / DMZ and additional switch will be patched to the vdc as required. A pair of 3750 is considered for DMZ VDC. Extranet VDC and WAN VDC will have a pair of N2k FEX each to meet the 1 Gig port connectivity requirements.

### 3.1.2.2. DMZ

DMZ and Internet Zone is considered for enabling secured Internet access for the proposed Centennial and Phoenix data centers. Internet Service Provider level redundancy and Infrastructure High-Availability are considered along with adequate internet bandwidth. Dedicated Physical F5 is considered for DMZ.

#### 3.1.2.2.1. Solution Approach

A dedicated pair of Cisco ASR 1004 is considered for terminating the internet circuits. Current assumption is to use Health Net owned public IP address segments for both Centennial and Phoenix data centers. BGP Routing protocol will ensure full route exchange with the service providers. Though the proposed hardware support dual-stack, the current network is designed for IPv4 protocol.

Internet bandwidth sizing done based on the current internet circuits available at Boulder, (dual connection through SIAU). During the Assessment/design phase of the discussion Cognizant will work with Health Net to review the current internet circuit utilization at Boulder and validate the proposed internet bandwidth.

### Internet Bandwidth

Following table shows the proposed internet bandwidth for the Centennial and Phoenix DCs

Data Center	Details	Telco Provider	B/W (Ethernet Handoff)
Centennial	Internet Link	Level3	150 Mbps
	Internet Link	Qwest	150 Mbps
Phoenix	Internet Link	Level 3	150 Mbps
	Internet Link	Qwest	150 Mbps

Note : Cognizant will work with Health Net to review the current internet circuit utilization at Boulder and validate the proposed internet bandwidth.

A dedicated VDC is considered on the Nexus 7710 for DMZ zone. Equal Cost Multi Path (ECMP) using 10 Gig links will be used for connecting Nexus 7Ks and the Internet ASR routers. This path will be protected with a dedicated pair of Cisco ASA 5585 firewalls and McAfee IPS. Additional firewall contexts will be defined on the firewall to support DMZ server infrastructure. A dedicated pair of Cisco 3750 is considered to support the 1 Gig connectivity requirements. Logical segregation of Federal and Commercial traffic will be achieved by using VRFs feature.

F5 5200v is considered for the application load balancing for the external facing servers. This mid-range appliance from the F5 is capable of 4 VCMP (virtual Appliance), however the current requirement is only for 2 (Federal and Commercial), with the additional 2 virtual appliances for future use. The B/w supported by 5200v is 15 Gbps. SSL offloading for the external facing servers will be performed by the load balancers.

F5 2000s is considered for Global Load Balancing Solution. This is a DNS based solution that will help to redirect the traffic to the appropriate data centers based on the defined load balancing policy and application availability. GTM will be tightly integrated with the external DNS servers to achieve the global availability feature.

NTP and IP Address Management (IPAM) will be configured on the Infoblox devices.

### 3.1.2.3. WAN

ITO Phase 1 WAN architecture will be modified to meet the ITO solution WAN requirements. Following components will be added

- WAN MPLS bandwidth upgrade
- GET VPN Key Server migration
- Legacy P2P link strategy (TBD)
- Pair of Nexus 2K with 1 Gig port capability

#### **3.1.2.3.1. Solution Approach**

As part of ITO, all the remote sites will be accessing Centennial and Phoenix data center for day to day business purpose. Cognizant has compared the current WAN MPLS bandwidth at Boulder and the following points are considered for performing the WAN MPLS bandwidth sizing.

- Commercial circuit bandwidth at Boulder is 2x OC12 (622 Mbps)
- Federal circuit bandwidth at Boulder is 2x OC3 (150 Mbps)
- Boulder data center is hosting both Production and Non-Production environment. With the proposed data center model, Production and Non-Production environment will be split between Centennial and Phoenix Data Centers
- Proposed MPLS bandwidth will be reviewed and validated with Health Net
  - Consider additional load due legacy p2p link to MPLS migration
  - Review the current utilization on the Boulder MPLS circuit
- ITO Phase 1 is proposed with a Unilink access link carrying both Federal and Commercial MPLS Traffic. Review Unilink vs Separate link approach to ensure future scalability of the MPLS circuit bandwidth.
- Centennial has redundant access link to ATT MPLS
- Phoenix is the Test/Dev/DR site and has only single access link to ATT MPLS
  - Traffic backhauling through DCI link is not considered to minimize the overhead to production environment at Centennial
  - In case of hardware failure on the WAN primary ASR, the circuit will need to be manually swapped to the second ASR
- No change for the Cognizant MPLS bandwidth (45 Mbps)
- Assessment of the current WAAS appliances and replica of the current polices will be configured in the target environment updated with same software version will be deployed for compatibility
- SMB2/3, CIFS, ICA and other standard protocols will be optimized and SSL optimization services will be turned on globally with cert & key additions

## WAN MPLS Link Bandwidth

Following table summarize the proposed bandwidth and the Telco service provider details

Data Center	Details	Telco Provider/LEC	B/W (Ethernet Handoff)
<b>Centennial</b>	Federal- Primary	ATT/Centurylink	150 Mbps
	Non-Federal-Primary	ATT/Centurylink	700 Mbps
<b>Centennial</b>	Federal- Secondary	ATT/Level3	150 Mbps
	Non-Federal-Secondary	ATT/Level3	700 Mbps
<b>Phoenix</b>	Federal- Primary	ATT/Integra	150 Mbps
	Non-Federal-Primary	ATT/Integra	700 Mbps

Cognizant expects all the legacy P2P link from Boulder to remote sites will be migrated to MPLS prior to ITO build. For budgeting purpose, we have considered a pair of ASR 1002 in Centennial for legacy link termination and will be reviewed during the LLD phase.

Boulder DC is hosting the GET VPN Key Servers. For ITO, a Pair of Cisco 2900 is considered for GET VPN Key Server migration. A pair of Nexus 2k is considered for 1 Gig port requirement in the WAN VDC.

Riverbed model considered for the ITO Phase 1 is 7055L. This model license is upgradable to 7055H for supporting higher throughput.

### HealthNet Locations

Network managed Services : Cognizant will assume responsibility (which includes maintenance and steady state support ) of Network components in HealthNet locations which are currently managed by incumbent vendor, post transition of responsibilities. All HealthNet owned network devices shall be assessed and refreshed based on EOL schedule.

#### 3.1.2.4. Service Deliverables

Network Services implementation will be validated with the following tests.

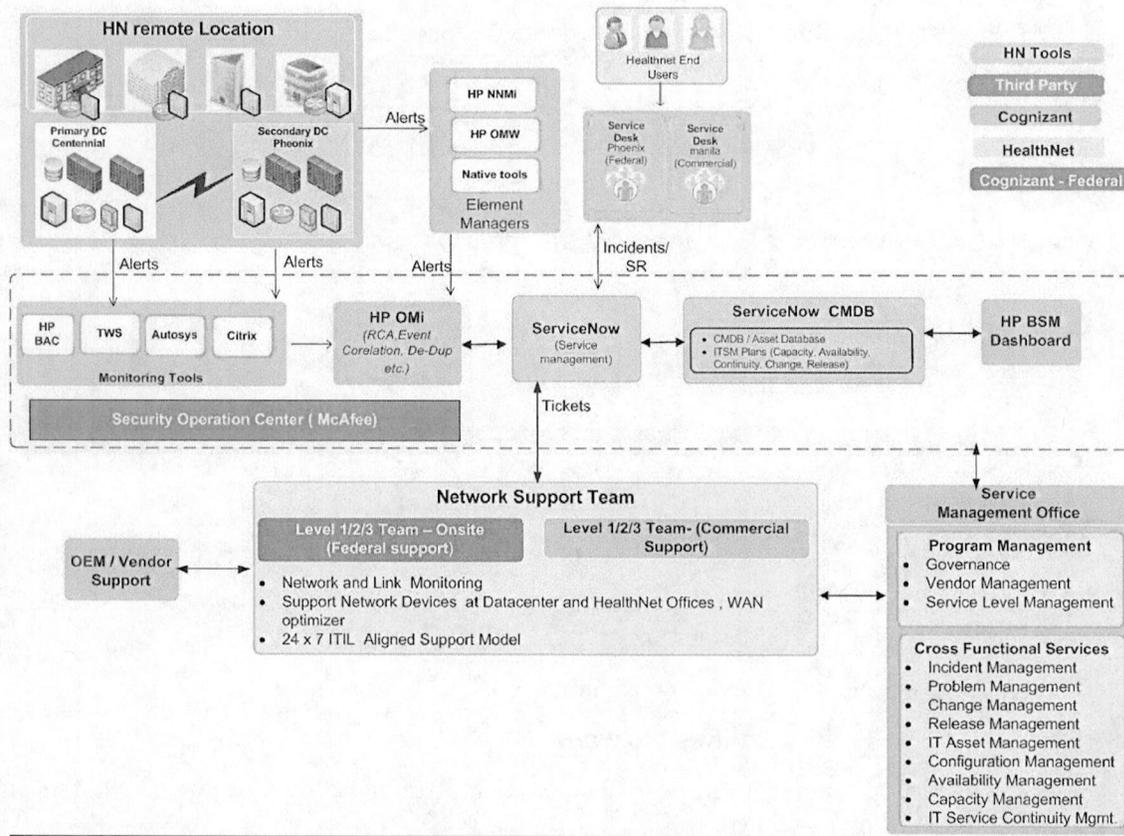

- Testing the circuit to ensure and validate the reported bandwidth and latency parameters
- Testing the external facing services connectivity over the Internet

- Testing connectivity to the business partners
- Testing connectivity over Redundant P2P Links between Centennial-Boulder and Centennial-Phoenix with encryption
- Testing Routing reachability between data centers and remote locations
- Testing Logical Separation of Federal and Commercial traffic on the DC firewall.
- Testing firewall filters at the Centennial DC, to permit legitimate traffic in and out of Centennial DC over P2P and MPLS Links
- Testing WAN traffic optimization between DC and Remote locations for the qualified traffic
- Health Net Info Sec team to validate the hardening of network and security equipment implemented at Centennial and Phoenix DCs

#### 3.1.2.5. Steady State Support Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Commercial) with on call</li> <li>▪ 24X7 Onshore support               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore ; Coimbatore</li> </ul>

The delivery model for Network platform is as depicted below:

**Figure: Delivery Model - Network**

The high level activities for network services are mentioned below:

**Level 1 Services**

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<b>L1 Team</b>	<b>Basic incident management - incident logging and tracking</b>
	<ul style="list-style-type: none"> <li>▪ Monitoring link UP and DOWN times</li> <li>▪ Monitoring routers and switches for CPU and memory utilization</li> <li>▪ Monitoring - performance and capacity of network devices</li> <li>▪ Monitoring bandwidth utilization</li> <li>▪ LAN/TCP/IP configuration</li> <li>▪ Pre designed Link re-routing</li> </ul>

	▪ Performing health check as per defined procedure
	▪ Vendor management

**Level 2 Services**

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

- Incident Management Services
- Change Management Services

<i>L2 Team</i>	Configuration management and change control
	▪ Performance and availability management
	▪ Working with service providers to implement new or upgraded data network
	▪ Managing router tables and IP addresses
	▪ Network device configuration
	▪ Perform hardware diagnostics
	▪ Implement firmware and software upgrades and patch installation and management
	▪ Problem management and troubleshooting
	▪ Handling escalated routing issues and routing changes
	▪ Performing network integration tests
	▪ Bandwidth management
	▪ IMAC of Network devices

**Level 3 Services**

All unknown / new errors and problems will be resolved by L3 Network Support group. This team will work with Vendors when required.

<i>L3 Team</i>	Performing operational planning for capacity and performance purposes
	▪ Conducting feasibility studies for implementation of new technologies
	▪ Performing project management and project estimation
	▪ Reviewing efficiency and effectiveness of problem control process
	▪ Network design and architecture
	▪ Root Cause Analysis

### 3.1.2.6. Assumptions

The following are the key assumptions:

- Health Net will provide public IPv4 addresses and associated AS numbers
- Completion of the legacy P2P links to MPLS migration
- No requirement of Layer 2 VLAN extension across the DCs or to any Health Net locations
- MPLS provider manages the Routing, QoS and MTU (Jumbo frame) within the MPLS cloud
- Federal and Commercial Separation through logical segregation of the Network devices
- Private v-lans will be configured to secure communication with the vlan
- SNMP alerts of all network devices will be configured and pointed to monitoring tools
- Current Network design is only based on TCP/IP protocol. Support for any legacy protocol (SNA, DECnet) will need additional review
- DCI link will be secured with the Nexus Security features. No Firewall/IPS/Riverbed considered for the DCI link
- FCIP based SAN replication across the DC Interconnect link
- Appropriate policy routing will configured to restrict route redistribution
- SoC provider will provide the local log collector to collect all the LOG from network and security device at Centennial and Phoenix Data centers.

### 3.1.2.7. Dependency

The following are the dependencies:

- Details of Public and Private IP schema used across Health Net (Boulder DC, branches, etc.)
- Health Net to provide Public IPv4 Addresses for both Centennial and Phoenix DCs
- Health Net to provide private IP addresses for both Centennial and Phoenix DCs
- VLAN schema details supporting the current Server and Application Architecture
- Understanding of Health Net naming conventions, VLAN tag's, etc., to retain the same in new DC and DR.
- Detailed understanding of existing Health Net routing architecture (LAN/WAN) at Boulder DC and Remote Locations
- Network configuration at Boulder DC to facilitate the migration

- Incumbent to provide the historic circuit utilization stats to validate the proposed Internet and MPLS bandwidth
- Coordination with external partners to facilitate the Partner VPN connectivity
- Coordination with external partners to facilitate the COLO routers and circuit
- Completion of legacy point to point link to MPLS migration
- Coordination with the SoC vendor to establish direct connectivity to Centennial and Phoenix DCs
- All network device Log will be sent to the LOG server
- SSL certificate for the published URLs
- Provide application specific load balancing requirements (if any)
- Provide GET VPN Server configuration details to facilitate the GET VPN Key Server migration
- Health Net SoC to provide local SIEM log connector at the proposed Cognizant Data Center to conserve the bandwidth consumption
- Copy of the requirements document for information security compliance, to complete the hardening of network and security equipment for Health Net information security team signoff.
- Availability of incumbent SMEs to understand the details of the existing network and security setup in Health Net hosted DC at Boulder

### 3.1.2.8. Risk and Mitigations

The following are the risks and mitigations:

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	Legacy P2P link to MPLS migration	Medium	Medium	Cognizant expect all the p2p link will be migrated to MPLS. However we have considered a pair of ASR1002 for link termination, if any of the legacy p2p link requires migration to Centennial DC
2	Health Net owned Public IPv4 Address availability for the external facing services	Low	High	As per ARIN, there is couple of IP segments owned by Health Net. Validate and confirm the availability of the public IPv4 address with Health Net and decide on 'hard cutover vs Parallel build'

S.No	Risk Description	Probability	Impact	Mitigation Strategy
				approach for the external facing services
4	Understanding of existing Boulder Data center firewall rules, load balancers policies, VLAN L2/L3, routing details, for developing low level design for Centennial and Phoenix DCs	High	High	Engage with incumbent SMEs to understand the details of existing DC network design considerations and security policies
5	WAN Link upgrade commissioning timelines at Centennial / Phoenix DC for MPLS circuits	Low	Low	Early initiation of link upgrade order placing and alignment of project to meet the target timelines
6	Partner Site to Site VPN migration	High	High	Early initiation of the communication to all the respective partners and build the tunnel. Engage project management team to track and coordinate the build effort
7	Partner circuit and COLO router migration. Telco circuit migration can take up to 90 to 120 days	High	High	Early initiation of the communication to all the respective partners to provision circuit and router for Centennial and Phoenix DCs. Engage project management team to track and coordinate the build effort

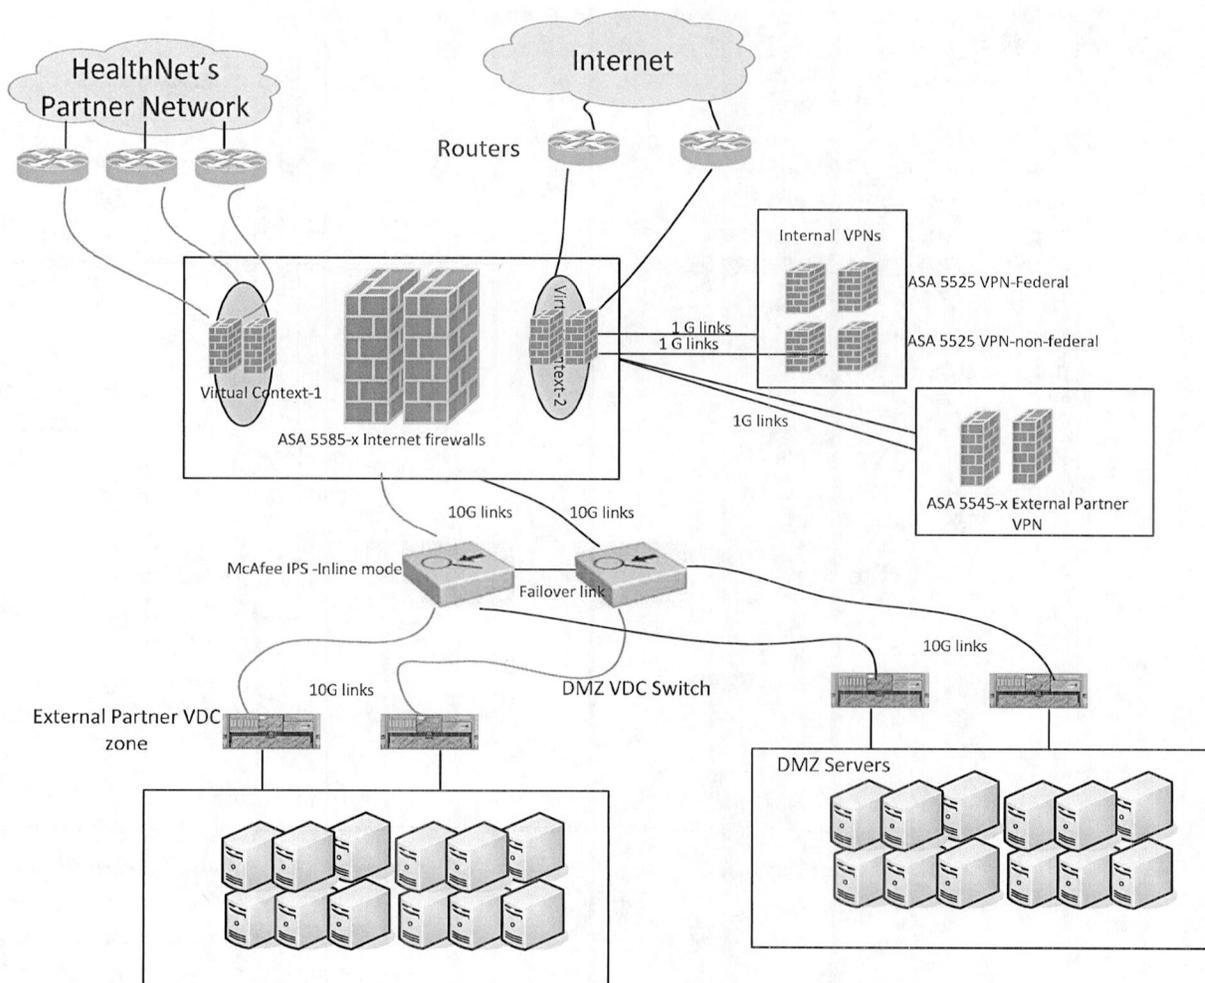

### 3.1.3. Security

#### 3.1.3.1. Solution Approach

Cognizant proposes DMZ and Extranet partner zone security solution at two data centers to meet Health Net's initiatives.

#### Primary Data center (DC1) – Centennial DC

This section provides infrastructure details for DC1 facility.

**Figure: DC1 Infrastructure Facility**

The solution will have DMZ and Extranet partner zone security infrastructure networks and it will be reachable by the Health Net's remote access users and Health Net's business partner. These both DMZ and partner zones are isolated from ASA 5585-x virtual contexts.

The proposed zones has one set of ASA 5585-x which will be placed behind the internet router and these Firewalls has long provided the first line of defense in Health Net's Internet security infrastructures. There will be two Virtual contexts to connect Internet and External partner to segregate the traffic between Internet and external partner traffic. They accomplish this by associating Health Net's security policies about internal or external Health Net users' to access rights to the connection information surrounding each access attempt. Before getting into Health Net's network, the user policies and connection information must match up, otherwise the firewall does not grant access to Health Net's internal network. The proposed firewall has 10 Gbps performance to packet

switch or route the traffic between segments. And important point is these two internet ASA 5585-x of firewalls are in clustering mode (for High availability).

There are 3 pair of VPN boxes are placed in the Health Net's network to connect Federal, Commercial and External Partner VPNs and we specified deployment classifications are Site to site and remote access VPNs, VPNs extend the Health Net's network to mobile workers, and remote offices. VPN enable users to connect to Health Net's corporate intranets or extranets whenever, wherever, or however they require. Remote access VPNs provide connectivity to a corporate intranet or extranet over a shared infrastructure with the Health Net's security policies as a private network and proposed concurrent VPN users are maximum 750 only and 300 Mbps of throughput in ASA 5525-x in each box vpn users are maximum 2500 concurrent users only and 400 Mbps of throughput in ASA 5545 box.

The proposed McAfee box delivers the most comprehensive and accurate Intrusion Prevention System (IPS) and Network Threat Behavior Analysis (NTBA) for Health Net's network to protect from spyware and known, zero-day, and encrypted attacks. All the traffic from Internet firewalls or access or core switch should forward traffic to monitor on IPS box before getting into Health Net's internal network. And the IPS box will be fine-tuned according Health Net's security guidelines. The proposed IPS box has capability to have virtualization sensors and virtual sensors will be connected to two segment one DMZ and other one will be extranet Partner zones in case if we required after gathering actual requirement from Health Net's team during the Due Diligence sessions.

### Secondary Data center (DC2) – Phoenix DC

This section is similar to the DC1 as detailed above.

#### 3.1.3.2. Service Deliverables

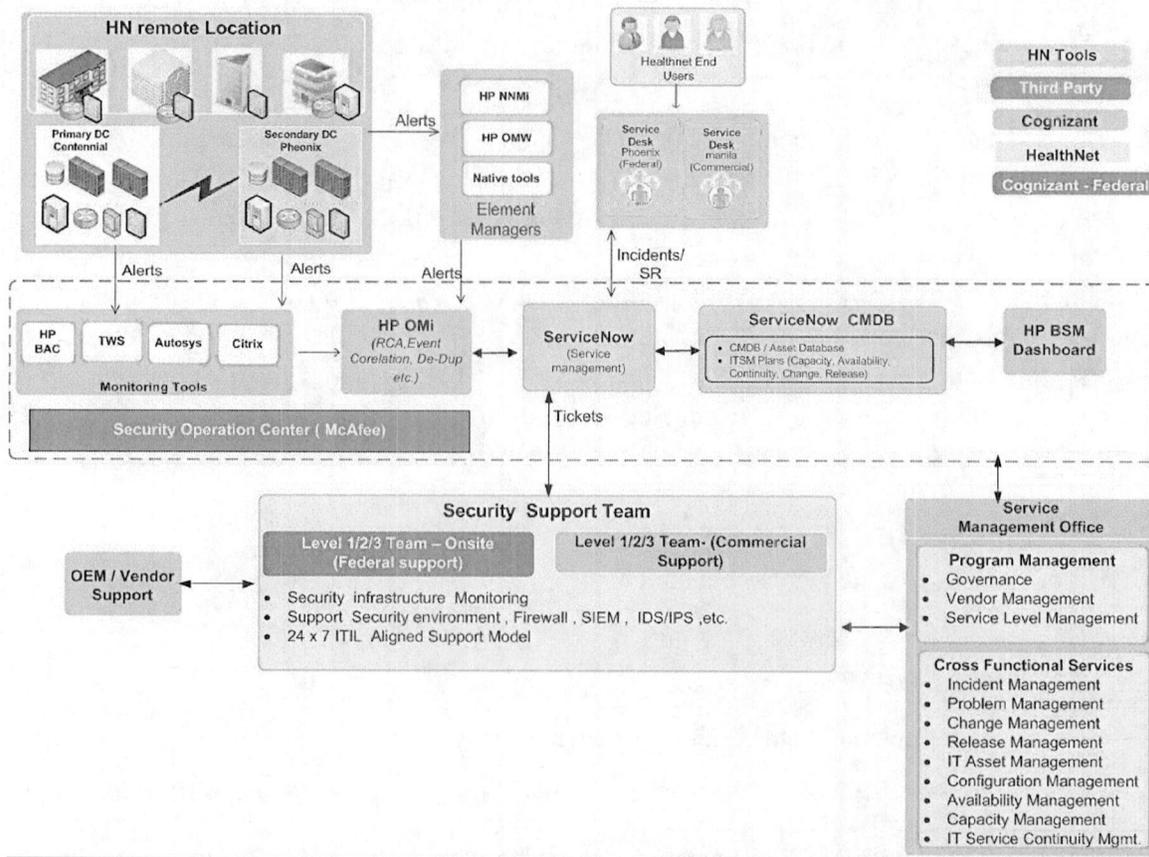

- Design and implement DMZ and perimeter security
- Testing firewall filters at the Centennial DC, to permit legitimate traffic in and out of Centennial DC over P2P and MPLS Links
- Create and maintain Design, Build and Run book documents

#### 3.1.3.3. Steady State Support Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Commercial) with on call</li> <li>▪ 24X7 Onshore support</li> </ul>

Solution	Description
	<ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore</li> </ul>

The delivery model for Security platform is as depicted below:

**Figure: Delivery Model – Security**

The high level activities for Security services are mentioned below:

**Level 1 Services**

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<b>L1 Team</b>	<ul style="list-style-type: none"> <li>▪ Monitoring the Firewall device and logs</li> </ul>
----------------	---

	▪ Log incidents and escalate to next level
	▪ Respond to alerts from monitoring system
	▪ Generate reports - Weekly, monthly and adhoc for customer review
	▪ Monitoring the IDS/IPS device and logs
	▪ Log incidents and escalate to next level
	▪ Respond to IDS/IPS alerts
	▪ Generate reports - Weekly, monthly and adhoc for customer review
	▪ Monitoring the IDS/IPS device and logs
	▪ Monthly Security Dashboard / Daily /Weekly/ Monthly Log reports
	▪ Facilitate Critical Incident support

### Level 2 Services

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

<i>L2 Team</i>	Firewall Request
	▪ Create/Modify Firewall Rules
	▪ Adding IP, Services to the group
	▪ Pushing firewall rules
	▪ Daily Health checks and event logs analysis
	▪ Troubleshooting connectivity related issues
	▪ Installation and Configuration of Firewalls
	▪ Version upgrade/patching firewall devices
	▪ Prepare documentation of known errors and KEDB
	▪ Alert appropriate teams for Capacity issues and remediation actions
	▪ Change request creation
	▪ Assist L3 team on Change request implementation as per process
	▪ Install and Configure the IDS/IPS
	▪ Signature Configuration
	▪ Perform Signature update
▪ Tuning IDS/IPS signature as per requirement	

	▪ Shun/Block attacker IP address
	▪ Event Correlation and analysis
	▪ Administration of Policy, profiles and rule set configuration
	▪ Performance statistics reports on noncompliance systems
	▪ Install and Configure the IDS/IPS
	▪ Signature Configuration
	▪ Perform Signature update
	▪ Create and update KEDB (Knowledge Event Database).
	▪ Create and modify the reports limited to data points provided within SIEM.

### Level 3 Services

All unknown / new errors and problems will be resolved by L3 Security Support group. This team will work with Vendors when required.

<i>L3 Team</i>	▪ Create, modify, delete policies
	▪ Pushing business Impacting changes on the Firewall
	▪ Work on Severity 1/critical incidents
	▪ Work on Incidents escalated by L2 team and document the resolution for future references
	▪ Installation and Configuration of high End Firewalls
	▪ VPN Configuration
	▪ Signature Fine tuning
	▪ IDS/IPS health check
	▪ Approve signature upgrade
	▪ TCP intercepts (Preventing Denial-of-Service Attacks)
	▪ Review, validate and approve security policies
	▪ Minimizing downtime by checking planned maintenances and new implementations
	▪ Enforcing best practices surrounding security incident response
	▪ Outbreak prevention plan for various security threats
▪ Participate in root cause analysis for major security outbreaks	

- |   |
|---|
| <ul style="list-style-type: none"> <li>▪ Signature Fine tuning</li> </ul> |
| <ul style="list-style-type: none"> <li>▪ IDS/IPS health check</li> </ul>  |

#### 3.1.3.4. Assumptions

The following are the assumptions considered under Security.

- Assuming that the VPN licenses are not exceed more than 750 on each ASA 5525-x box for Federal and Commercial users and 2500 users on ASA 5545-x box for External partners.
- All security products will be validated during the assessment phase.

#### 3.1.3.5. Dependency

The following are the dependencies considered under Security.

- The proposed new or existing hardware / software should be ready while time of Implement / deploy.
- Health Net will provide complete security guidelines and provide SPoC for the same.

#### 3.1.3.6. Risk and Mitigations

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	Support of Key SME's from incumbent during Implementation	High	Medium	Involve Health Net to facilitate and govern the Implementation, requiring integration and other security products at Cognizant target Data centers
2	Proposed boxes' Performance	High	Medium	Cognizant has sized based on the available information. However, performance reports have not been made available which may require an adjustment after performance baseline during the Transition phase. Any changes required due to

S.No	Risk Description	Probability	Impact	Mitigation Strategy
				performance adjustments will be managed and priced under the change process.

### 3.1.3.7. Identity and Access Management

#### In Scope

The following requirements are considered to be in scope for this project.

- Management and administration of computer accounts following prescribed access control procedures
- Assists in computer account security procedures and forms build
- SOX & Privileged Accounts
- Maintenance of computer account security files on all users
- Assists in developing policies and procedures to create, modify and delete accounts
- Support and follow-ups on password reset issues for Health Net associates (HNCORP,HNFS)
- Planning and implementation of Health Net policies and procedures
- Ensuring Health Net policy adherence
- Assists in build and maintenance of Access Administration procedures and documentation
- SOX Compliance
- Privileged account creation (Management)
- Generate daily report of ISRs
  - Number of ISRs completed by agent each day
  - Number of ISRs received each day
  - Number of Accounts created by agent each day
  - Number of USERS provisions by agent each day
  - Number of SYSTEMS provisioned by agent each day

#### Out of Scope

Any activity not described explicitly in the above In scope section will be treated as outside of the scope.

- Support Access Management Tool hosted in Incumbent datacenter
- Technical issues related to systems / applications.

### **Solution Approach**

Cognizant will follow the Health Net's current solution.

### **Activities**

- Creates, modifies and deletes computer accounts following prescribed access control procedure.
- Changes dial-in passwords periodically and notifies users.
- Handles password reset issues for Health Net associates by receiving, tracking, responding, resolving and coordinating these requests via phone calls, email, web/self-service, and IVR including analyzing and prioritizing problems to quickly arrive at workable solutions (Comes under Service desk).
- Assures timely, appropriate response to customer calls to Access Administration.
- Inform all Access administration personnel of any perceived trends, positive or negative, in calls being received and solutions used. Whenever possible addresses the cause of customer problems so that recurring situations may be avoided Remains current on policies and procedures that may impact customers. Identifies potential technology impacts and devises solution prior to implementation.
- Ensures that all Health Net policies are adhered to such as, but not limited to, Health Net confidentiality policy.
- Assists with the development and maintenance of Access Administration procedures and documentation.
- Assist Access Administration Supervisor when necessary Performs other related duties including projects support, training and communication activities as assigned by management Cognizant 85% of all ISRs to be completed in 5 business days. The remaining 15% to be completed in 8 business days.
- Reporting/Document Creation.

### **Management of Privileged User IDs and Cognizant User IDs**

For the operating systems, software tools and network infrastructure systems and devices, cognizant will perform the following:

- Provision and manage user IDs (following prescribed access control procedures for SOX compliance)
- Perform quarterly employment verification and remove user IDs, as appropriate
- Administrator passwords for user IDs and privileged user IDs
- Revalidate privileged authorizations and continued business need annually and remove user IDs, as appropriate
- Provide Health Net a list of privileged user IDs for revalidation and remove privileged user IDs, as directed by Health Net.

**Health Net User ID Administration**

For the operating systems, software tools and network infrastructure systems and devices, cognizant will perform the following:

- Provision and manage Health Net identified user IDs for Health Net personnel
- Investigate Health Net user ID security issues
- Perform password resets for user IDs
- Investigate Health Net user ID password issues.

**Compliance Reports**

- Perform annual employment verification for Health Net employees
- Maintain audit records for privileged user ID approvals, verifications and revalidations and retain such records for the required duration
- Provide for Health Net's review and approval, for non-expiring passwords and policy exception requests
- Capture system security logs of privileged access and log-on/log-off activities as defined in the Information Security Controls Document.

**Tools**

Cognizant would leverage the exiting tools as shown in the table below. Any more Applications will be discussed and finalized during transition phase.

Technology or Application	Tools used for Access Admin support

Solution	Description
----------	-------------

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated Onsite / Offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 8x5 dedicated support – Offshore/Onsite (Commercial) with on call</li> <li>▪ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore</li> </ul>

### Assumptions

- Health Net will provide approved policies & procedures for user IDs for Health Net personnel
- Health Net will establish the criteria for resetting passwords and disclosing such passwords to authorized personnel
- Health Net CID shall be created within 10 working days of Cognizant initiating the request.
- Cognizant deliverables shall be signed off by Health Net within a timeframe jointly agreed upon by Health Net and Cognizant for Access Management support deliverable.
- Health Net shall provide work stations (desktop or laptop) to Cognizant's onsite personnel.
- Health Net shall provide Cognizant onsite personnel with the necessary phone, email, network and communication capabilities.

### Risks

- Delay in obtaining timely approval on PDLC artifacts/SOW will affect Resource ramp up timelines Pending ISR approvals & Delay in response of other teams / clarification response from the requestor / delay in required approval from IT department / outage issues with computer systems will delay closure of ISR's will delay closure of ISR's
- Enough licenses of all In-scope application would be needed to be maintained to create users for the respective applications. E.g. Macess.

### Dependency

- Health Net will Approve non-expiring passwords and policy exception requests

### 3.1.4. Servers

The existing private cloud infrastructure in ITO Phase 1 will be extended by adding additional Blade servers to host the Windows and Linux Operating environment. The new infrastructure for OpenVMS, Solaris and AIX will be added to support the ITO Asset.

For details, please refer to the “ITO Phase 1 solution document” for the Rack layout, Architecture Design and Configuration Information. All the servers will be built as per Health Net Security Standards.

Use case	Specifications & Activities
<b>Server/VM</b>	<ul style="list-style-type: none"> <li>▪ Assets               <ul style="list-style-type: none"> <li>○ OS licenses for Net-New Servers</li> </ul> </li> <li>▪ Build services for Net-New servers in the primary and secondary Data center</li> <li>▪ Run services               <ul style="list-style-type: none"> <li>○ Server provisioning, monitoring and management for net new servers in Cognizant Data centers</li> <li>○ Performance and capacity management</li> <li>○ Patching and upgrades management</li> <li>○ Asset refresh and disposal</li> </ul> </li> <li>▪ Live migration of VM and Storage</li> <li>▪ Support Non-Disruptive upgrades</li> <li>▪ Support VM replication for purpose of DR</li> <li>▪ Server provisioning, monitoring and management for new servers in Data center and Health Net remote sites</li> <li>▪ Issue resolution</li> <li>▪ Security management</li> <li>▪ Audit and compliance reporting</li> </ul>

Following are the additional Server infrastructure proposed in both DC.

- x86 Server for hosting Windows and Linux
- Open VMS Server
- Solaris Server
- AIX Server

The table below shows the platform wise server summary showing AS IS and Target state in ITO.

OS Platform	AS IS State		Target State			Comments
	Physical	Virtual	Physical	Virtual	% Virtualization	
AIX	20	59	12	67	100	71 AIX LPARs to be hosted in 12 IBM P Series Server (P750/760) with 10 LPAR/Server
Solaris	161	110	20	277	100	277 Solaris LDOMs to be hosted in 20 Oracle T series Server(T4-4) with 20 LDOMS/Server
Windows / Linux	*471	*1040	**349	1162	77	1162 Windows/Linux VMs to be hosted in 56 UCS Server (B200M3) with 20 VMs/Server
OpenVMS	32	Nil	44	Nil	Nil	Lift and Shift of 14 Alpha Servers

\*Note – includes remote sites

\*\*Note – this included Servers from ITO Phase 1

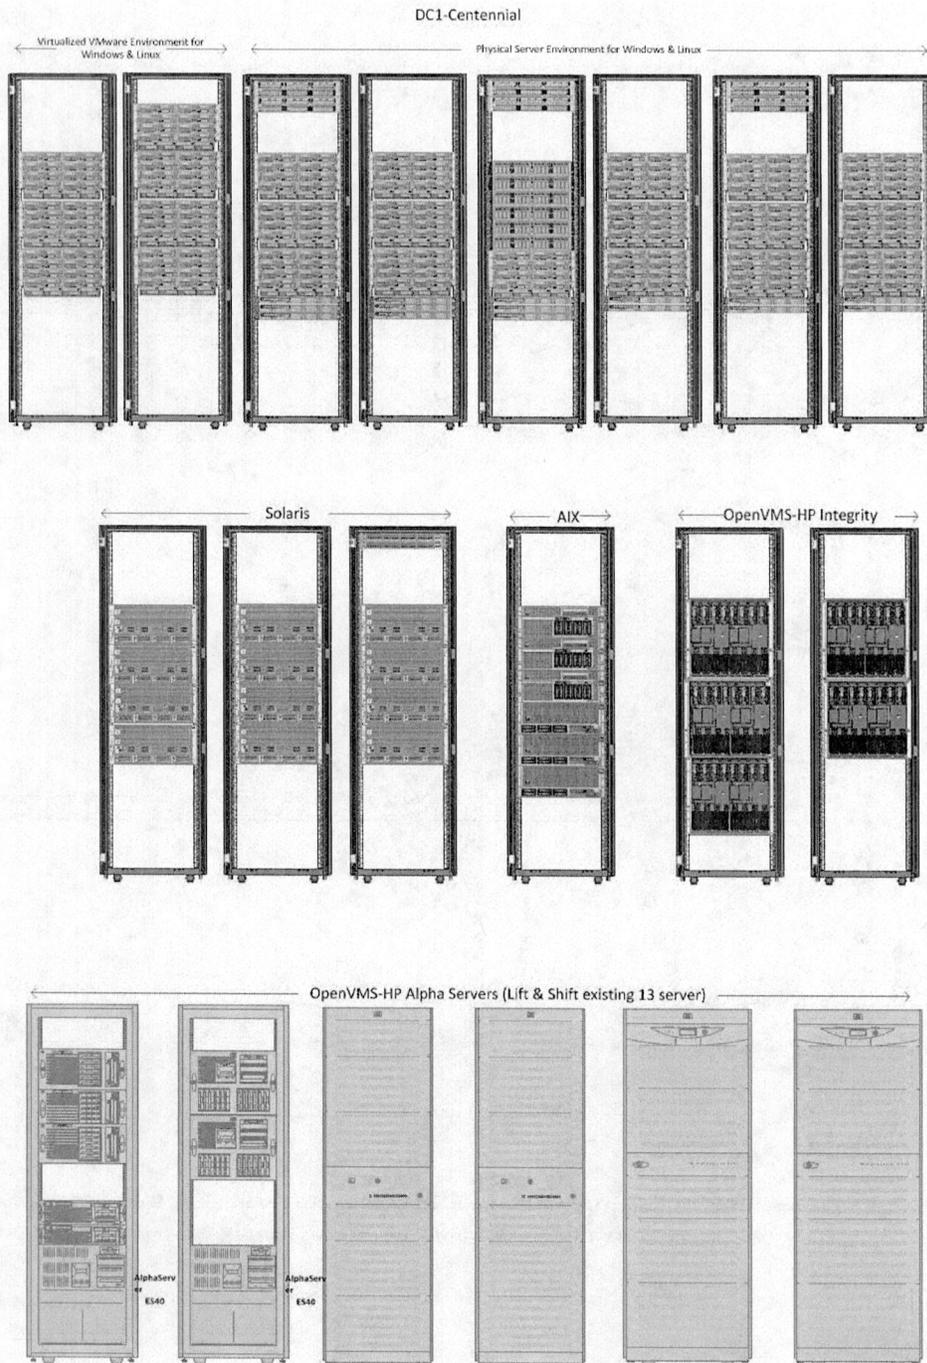

The existing private cloud infrastructure in ITO Phase 1 will be extended by adding additional 70 UCS Blade servers to host the windows and Linux virtual machines. The new Infrastructure for Solaris,AIX and OpenVMS will be added to support ITO applications.

The remote locations will have additional 60 UCS Rack servers to take load of ITO applications.

Description		Server Hardware Details
Scope	Windows / Linux-x86	DC1 - 184 Cisco UCS Blades-23 Chassis (Unified Computing Systems) <ul style="list-style-type: none"> <li>▪ 56 - B2003 M3 2 socket 10 core 384GB memory- ESX Blades</li> <li>▪ 128 - B2003 M3 2 socket 10 core 384GB memory- Blades for Physical Server (Windows, Linux)</li> <li>▪ 6 - C420 M3 2 socket 8 core 256GB Memory</li> <li>▪ 15 – C220 M3 2 socket 10 Core 128GB Memory</li> </ul> DC2 - 46 Cisco UCS Blades-6 Chassis (Unified Computing Systems)

Description	Server Hardware Details
	<ul style="list-style-type: none"> <li>▪ 14 - B2003 M3 2 socket 10 core 384GB memory- ESX Blades</li> <li>▪ 32 - B2003 M3 2 socket 10 core 384GB memory- Blades for Physical Server (Windows, Linux)</li> <li>▪ 2 - C420 M3 2 socket 8 core 256GB Memory</li> <li>▪ 10 – C220 M3 2 socket 10 Core 128GB Memory</li> </ul> Remote Sites- <ul style="list-style-type: none"> <li>▪ 2 - C420 M3 2 socket 8 core 256GB Memory</li> <li>▪ 25 – C220 M3 2 socket 8 core 128GB memory</li> </ul>
Solaris	DC1- 12 Oracle Solaris Servers <ul style="list-style-type: none"> <li>▪ 12 - SPARC T4-4 4 socket 8 core 512GB memory</li> </ul> DC2- 8 Oracle Solaris Servers <ul style="list-style-type: none"> <li>▪ 8 - SPARC T4-4 4 socket 8 core 512GB memory</li> </ul>
AIX	DC1- 6 IBM Power Servers <ul style="list-style-type: none"> <li>▪ 3 - IBM Power 750 3 socket 8 core 256GB memory</li> <li>▪ 3 – IBM Power 760 2 socket 12 core 256GB memory</li> </ul> DC2- 6 IBM Power Servers <ul style="list-style-type: none"> <li>▪ 3 - IBM Power 750 3 socket 8 core 256GB memory</li> <li>▪ 3 – IBM Power 760 2 socket 12 core 256GB memory</li> </ul>
VMS	DC1- 8 HP Integrity Blades and 16 existing Alpha servers (lifted and shifted) <ul style="list-style-type: none"> <li>▪ 8 – HP Integrity 890c i4 8 socket 8 core 256GB memory</li> <li>▪ 16 – existing Alpha servers (lifted and shifted)</li> </ul> DC2- 20 HP Integrity Blades and 3 existing Alpha servers (lifted and shifted) <ul style="list-style-type: none"> <li>▪ 14 – HP Integrity 870c i4 8 socket 8 core 256GB memory (7 for Dev, and 7 for Test)</li> <li>▪ 6 – HP Integrity 890c i4 8 socket 8 core 256GB memory (For DR)</li> <li>▪ 3 – existing Alpha servers (lifted and shifted)</li> </ul>

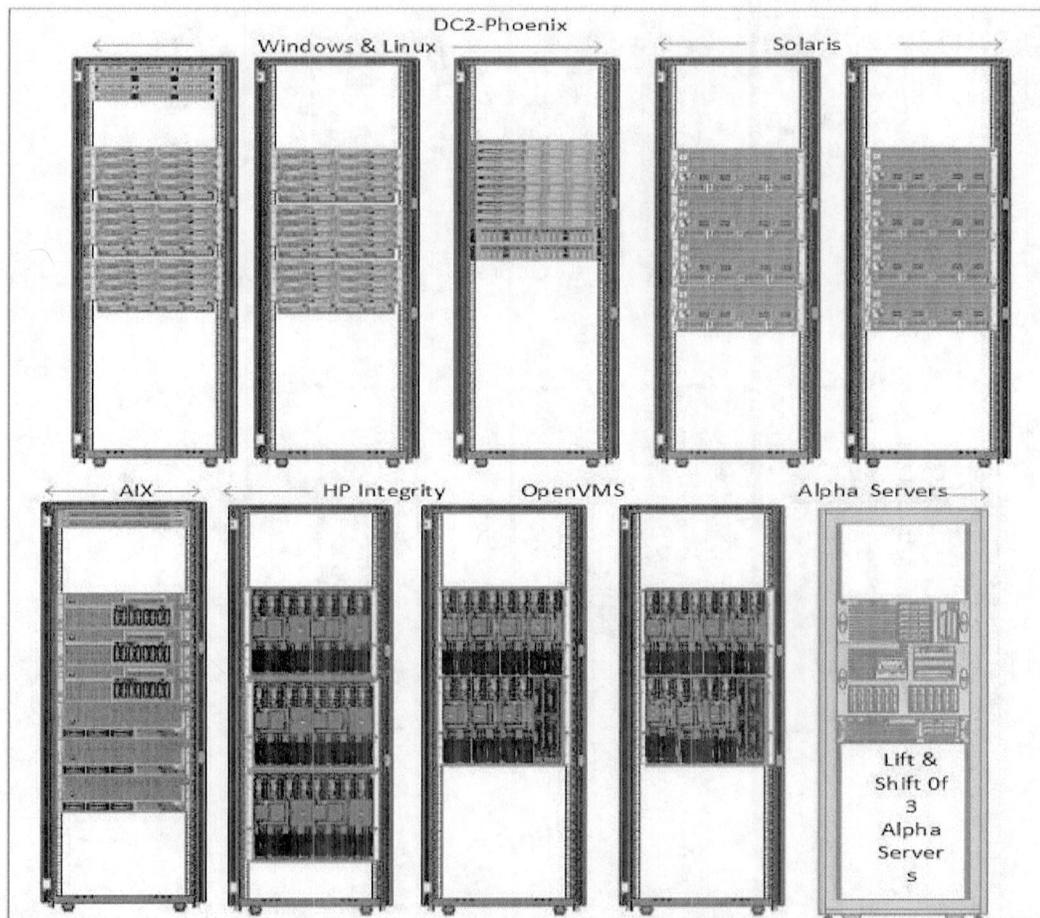

The diagram below depicts Centennial Data center (DC1) - Physical rack layout:

**Figure: Rack Diagram**

*Note: we estimated the 6 rack that will be required for lift and shift of the Alpha servers for the Centennial Data Center. We may modify based off the LLD phase of this project.*

The diagram below depicts Phoenix Data center (DC2) - Physical rack layout:

**Figure: Rack Layout**

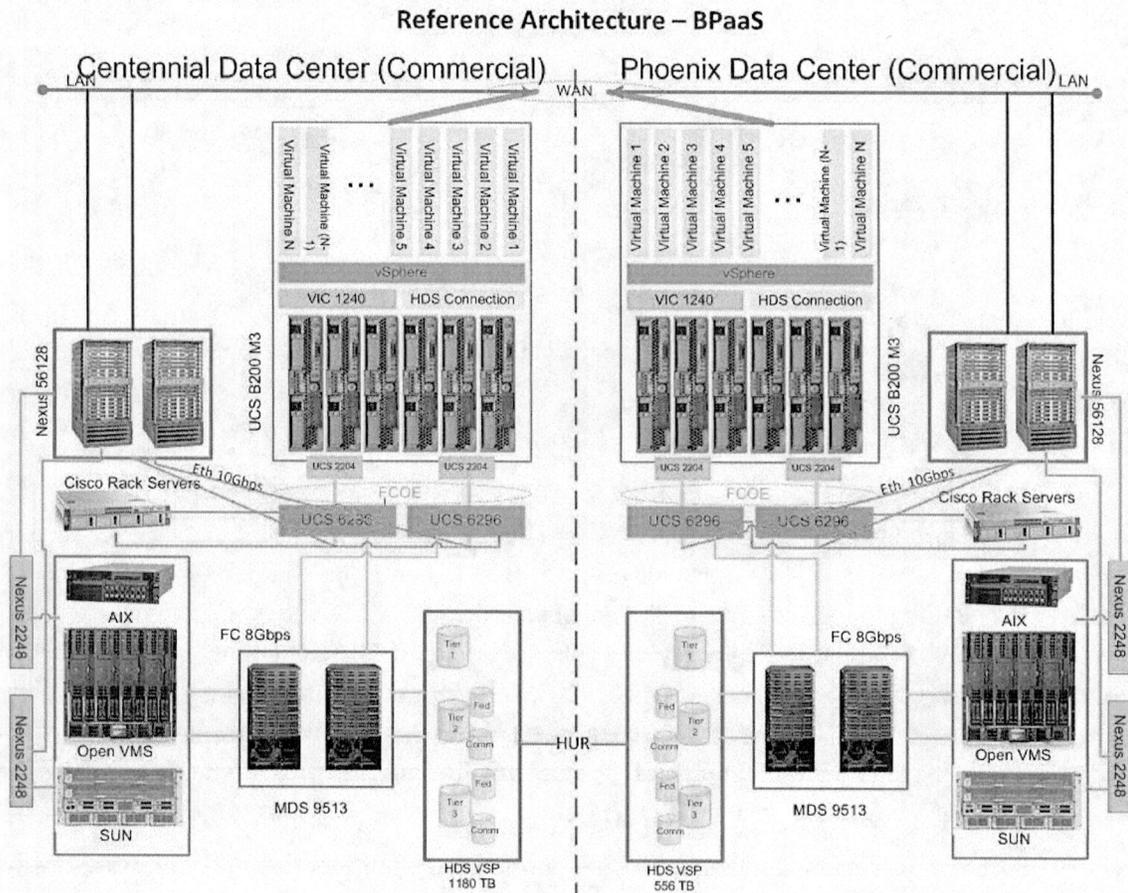

*Note: we estimated the 1 rack that will be required for lift and shift of the Alpha servers for the Centennial Data Center. We may modify based off the LLD phase of this project.*

#### 3.1.4.1. Solution Approach

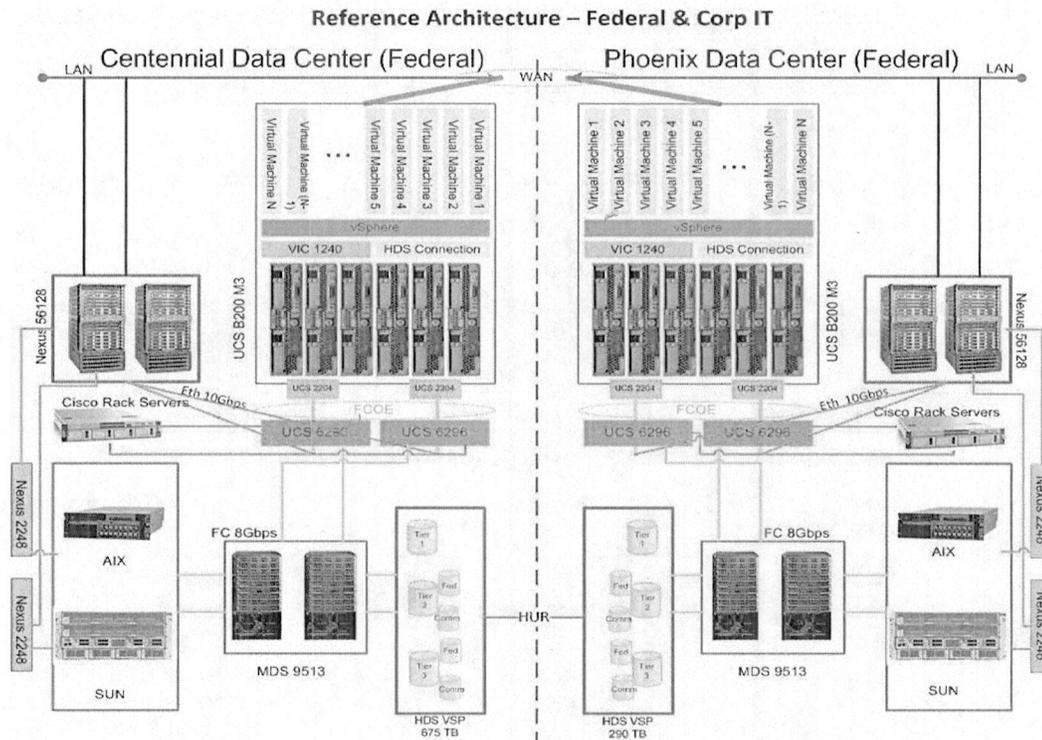

Cognizant will deliver WAN connected highly virtualized production and test environments utilizing current generation Hypervisors including Microsoft Hyper-V and VMware ESXi on Cisco UCS converged platform. The delivered open systems environments will consist of the following: Wintel (with current Microsoft versions through Windows 2012), Red Hat Enterprise Linux, Suse Linux.. Cognizant will use latest vendor specific virtualization technology (LPARs/LDOMs) for hosting non x86 (UNIX) based applications. The legacy UNIX platform will consist of following platform.

- Cisco UCS
- AIX- IBM Power
- Solaris-Oracle SPARC

Cognizant will procure latest HP itanium blade server for hosting OpenVMS application and shall lift and shift of existing Alpha servers from incumbent DC to cognizant DC. The server level physical segregation to be maintained to isolate Commercial and Federal data throughout the entire infrastructure. The Server reference architecture diagram for Commercial and Federal Architecture is shown below for illustration.

**Figure: Commercial Reference Architecture**

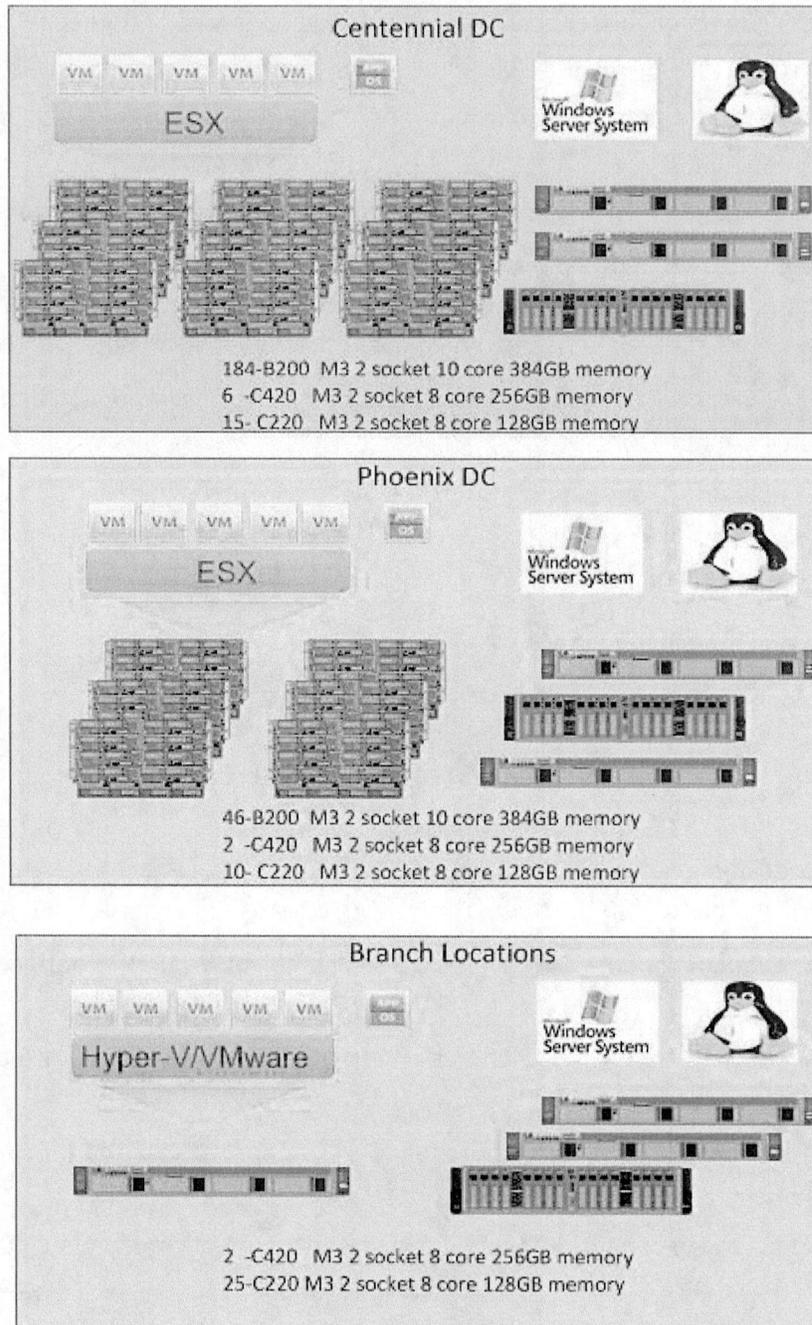

**Figure: Federal Reference Architecture**

**UCS Server Design**

There are 23 Cisco UCS blade chassis, with 230 B200 M3 blades and 60 C220/420 M3 rack server will be configured across two data center and branch locations. Six UCS 6296 96-port Fabric Interconnect devices are used to provide 32 X 10 GB Ethernet connection to networking. Network traffic is isolated by using separate VLANs. Hitachi HDS VSP storage is used to provide storage luns to the ESXi cluster and Physical Servers. There are 32 x 8 GB FC connections between the SAN Storage and the UCS blade Chassis through UCS Fabric Interconnect Fabric and SAN switches. In this solution, vCenter Server is hosted on a virtual machine in one of the ESXi blades to provide virtualization management. The actual server distribution of the server between Federal and Commercial will be decided during LLD phase.

The UCS hardware details for Centennial, Phoenix and branch locations are illustrated below in the diagram.

**Figure: UCS Server Design**

**Design Highlights**

- High availability, scalability and robust infrastructure

- Standardization of server architecture to reduce cost of maintenance, and improve serviceability with the help of few support staff over time.
- Will utilize a Reference Architecture approach with UCS B200 M3 blades (Cisco Unified Computing Systems) and Cisco C220/420 M3 servers.
- Cisco UCS Chassis will utilize 4x10Gbps ports for Networking and Storage
- Cognizant chose UCS because of its agile and flexible capabilities and its wide range acceptance by many storage vendors. Cisco UCS manager is the industry leader in scalable virtualized environments on converged networks
- VCenter Server will be used to provision and manage the workloads and ESXi hosts within the virtual environment.
- Federal VM's will be isolated from Commercial VM's by residing on designated Federal B200 M3 blades which will be in the same Chassis as Commercial Blades. This configuration needs to meet NIST guidelines , Rapid provisioning and management with Cognizant proprietary provisioning tool - Cloud360

## **VMware**

### **Design Decisions**

- VMware vSphere ESXi version 5.5 will be used as the hypervisor for this service.
- Microsoft windows 2012 hyper-v will be used in branch locations with a maximum of 2 VM with local storage, if over 2 VM will utilize VMware hypervisor.vSphere ESXi servers will be installed and booted from SAN LUNs. Boot LUNs will have mirrored raid level.
- The server platform will be Cisco UCS B200 M3 blade, each configured with 2x 10 Core CPU and 384GB RAM.
- Each server will have Cisco UCS VIC 1240 modular LOM CNA Card to configure multiple Virtual NICs and HBAs.
- Each Chassis will have 2204 utilizing 2 10G ports in each card (two total with 8 ports available)
- Each Chassis will connect to a 6296, which it will have 16 ports to the 56128 for LAN and 16 ports to the MDS 9513 for Storage.

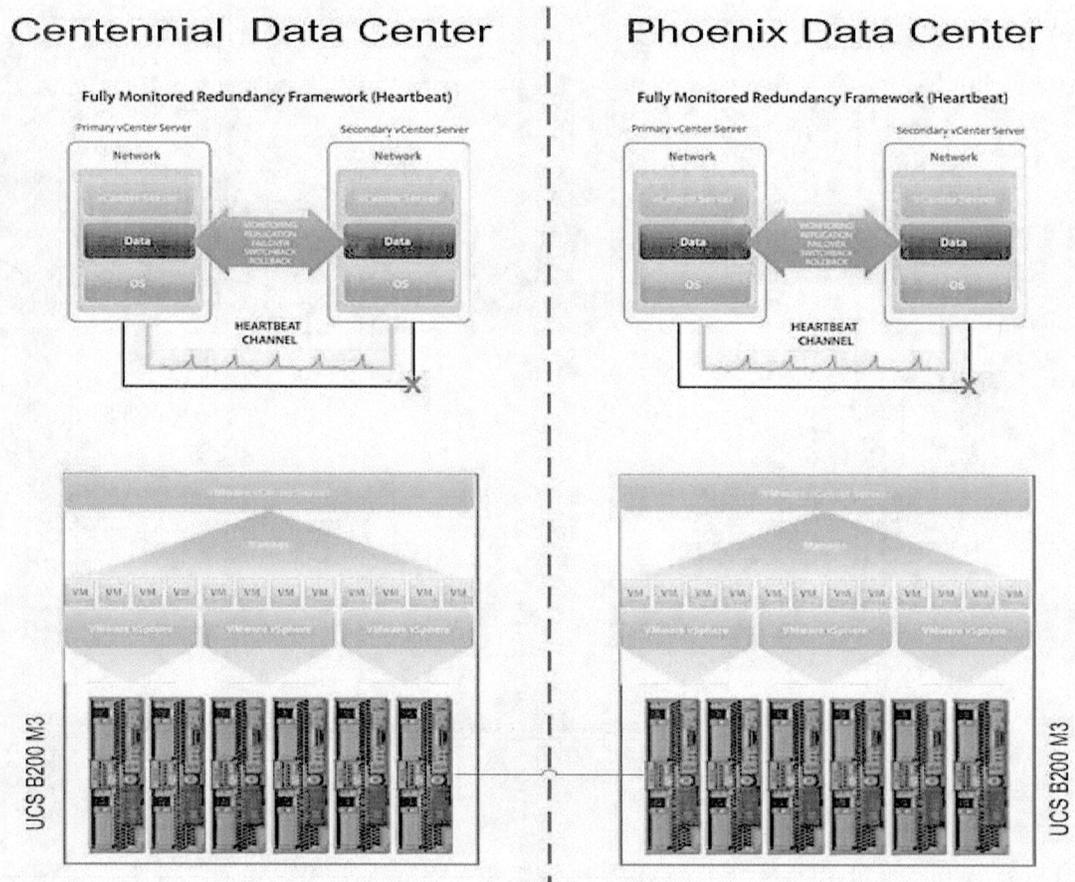

### **Design Rationales**

- VMware vSphere ESXi hypervisor is the industries most trusted and proven virtualization platform
- Health Net's existing virtualization platform is also VMware. Hence VMware vSphere will be used as the virtualization platform.

- The preferred hardware platforms for VMware host is UCS B200 M3 blade series server platform which has sufficient specification (memory and CPU) and expandable to cater the anticipated requirements of the compute requirements within the service.
- For planned maintenance activity, ESXi host maintenance can perform using vMotion to migrate Live VM's to other ESXi hosts.

**VMware vCenter Server**

This will be used as the central point for configuring and managing virtualized IT environments. It provides essential data center services such as access control, performance monitoring, and alarm management. The vCenter heart beat software will be used to provide high availability. Cognizant will configure vCenter linked mode to ensure both data centers are maintained from single vCenter pane.

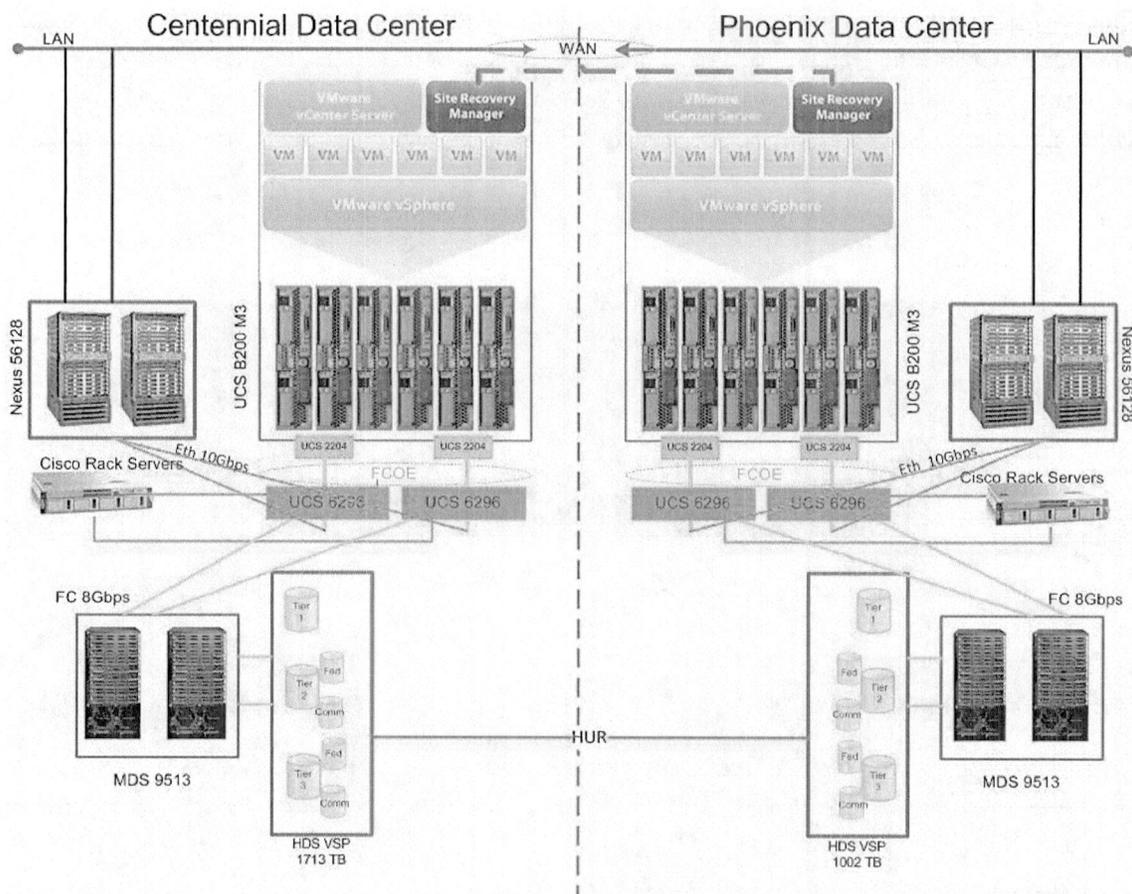

**Figure: VMware vCenter server**

**VMware Site Recovery Manager**

VMware vCenter Site Recovery Manager (SRM) will be used for disaster recovery of business critical application. The actual number of VMs to be protected using VMware SRM will be decided during the LLD phase.

VMware SRM coordinates the recovery process with the underlying replication mechanisms that the virtual machines at the protected site are shut down cleanly and the replicated VMs can be powered up.

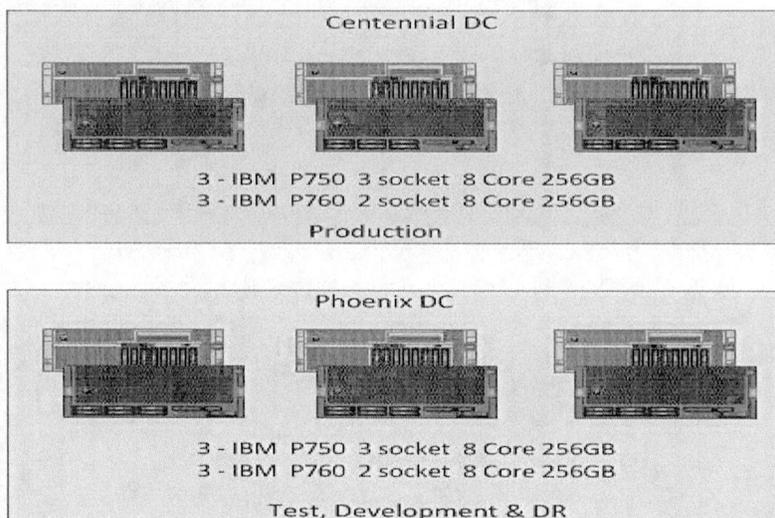

**Figure: VMware Site Recovery Manager**

**AIX- IBM Power Platform**

Cognizant is standardizing on version of AIX 7.1 with newer Power 7 hardware which provides backward compatibility for older versions of AIX (AIX 6/5 etc.). The IBM Power server environment will be configured with VIO servers to provide redundant network and SAN connectivity.

The OS and Application will be restored after base OS build to recover the AIX application environment and application re-configuration will be done manually as per the available run books.

The AIX hardware details for Centennial and Phoenix is illustrated below in the diagram.

**Figure: AIX Server Detail**

#### **Connectivity Details for IBM P 7xx series servers**

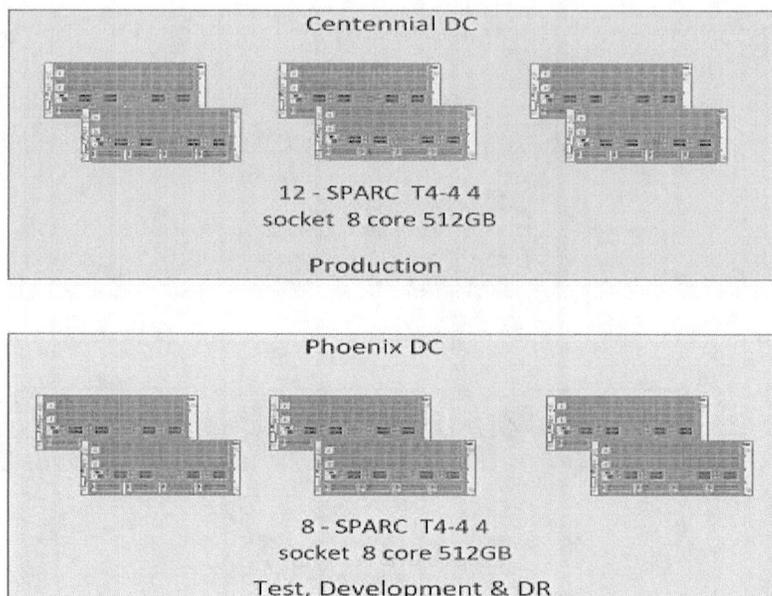

- Network interface – 10Gbps for LAN connectivity (with redundancy)
- 2 Management Interface – 1Gbps for Management
- 8 HBA- 8Gbps for SAN connectivity

#### **Solaris-Oracle SPARC Platform**

Cognizant has considered scalable Oracle T4-4 SPARC model to consolidate and virtualize entire workload. The Solaris infrastructure will be standardized on Solaris 11 platform and older version will be retained only in case of application incompatibility. Logical Domains Manager to be used to create and manage logical domains (LDMs) on SPARC servers.

The OS and Application will be restored after base OS build to recover the Solaris application environment and application re-configuration will be done manually as per the available run books.

The Solaris hardware details for Centennial and Phoenix is illustrated below in the diagram.

**Figure: Solaris Server Detail**

#### **Connectivity Details for Solaris**

- 6 Network interface – 10Gbps for LAN connectivity (with redundancy)
- 2 Management Interface – 1Gbps for Management
- 10 HBA- 8Gbps for SAN connectivity

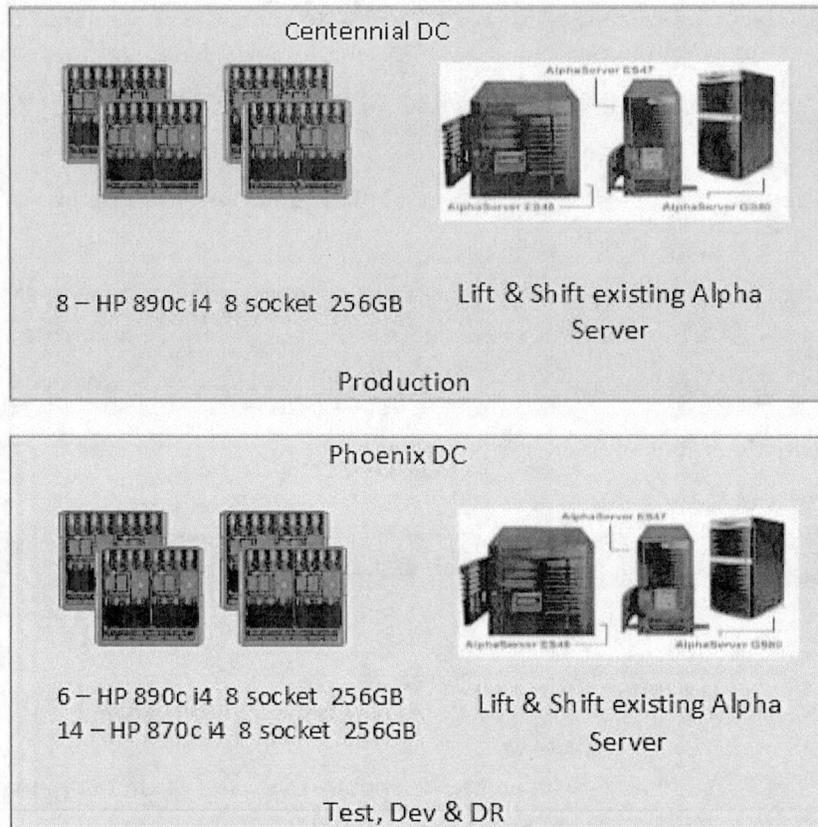

#### **Open VMS-HP Integrity Platform**

Cognizant will procure HP Intel Itanium (latest i4) blade based on C7000 Chassis (similar platform as Boulder DC) for hosting most business critical OpenVMS application. The OpenVMS version 8.4 shall be evaluated. The environment shall be the physical environment with no virtualization.

Cognizant will work with Health Net and incumbent for lift and shift of legacy Alpha Servers to Cognizant DC, however it recommends Health Net to migrate all the existing Alpha based applications to Itanium platform before the cut-over.

Have factored 2 Itanium servers for backup in production cluster and if required will ship two extra servers from PHX to DEN which is already factored part of the solution.

The HP Integrity hardware details for Centennial and Phoenix is illustrated below in the diagram

**Figure: HP Open VMS Details**

#### **Connectivity Details for HP Integrity-Open VMS**

- 8 Network interface per Chassis – 10Gbps for LAN connectivity (with redundancy)
- 2 Management Interface – 1Gbps for Management
- 8 HBA per Chassis- 8Gbps for SAN connectivity

#### **3.1.4.2. Service Deliverables**

- Design, Build and Manage scalable, reliable server environment in DC1 and DC2 to meet Federal and Commercial requirement for Health Net Infrastructure and Business applications
  - Create initial Service catalog for rapid provisioning, this will be a living catalog and will evolve over time.
  - Create initial customer reports based of detail design
- Design and Implementation of highly scalable virtualized infrastructure across multiple server platforms.

- Create secure and scalable server virtualization with VMware vSphere for hosting x86 Platform- Wintel and Linux
- Create secure and scalable server virtualization with IBM PowerVM based virtualization for hosting AIX platform.
- Create secure and scalable server virtualization with Oracle Solaris based virtualization for hosting Solaris Platform.
- Create secure and scalable server virtualization with HP OpenVMS Virtualization for hosting Health Core ABS application.
- Test the server environment for operation readiness
- Create and maintain Build and Run book documents

### 3.1.4.3. Steady State Support Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated Onsite / Offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Commercial) with on call</li> <li>▪ 24x7 Onsite support:               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – (Federal onsite) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore; Coimbatore</li> </ul>

### Level 1 Services

"Level1" Services will be provided for the servers. L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L1 Team</i>	<ul style="list-style-type: none"> <li>▪ Servers status Monitoring</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Monitor server logs and do initial troubleshooting steps define in Run book</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Escalate to L2 team when necessary</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Carry out daily, weekly and other regular reporting activities as defined in the SOPs</li> </ul>
	<ul style="list-style-type: none"> <li>▪ User / group account management, access permissions</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Act as the central point of contact between Health Net and Cognizant for tickets</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Broadcast communications authorized by the Health Net to users.</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Where applicable, keep Health Net informed and notified on the service status and progress</li> </ul>

**Level 2 Services**

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

- Incident Management Services
- Change Management Services
- Maintenance of server configuration documentation in the CMDB (Configuration Management Database)
- Managing and configuring VMware Enterprise Plus

<i>L2 Team</i>	▪ Security Management – OS hardening / Password management
	▪ Carry out scheduled server maintenance / reboot activities
	▪ Administration of Physical and Logical server Partitions
	▪ Administering clusters ( Adding packages , modifications to package configuration, startup/shutdown of packages)
	▪ Installation of patch bundles / firmware upgrades
	▪ Deploying patches to Windows, RHEL, Solaris & AIX servers
	▪ Configuration of new hardware
	▪ Disk space management
	▪ Performance management like Kernel Tuning
	▪ Installation of packages / applications
	▪ Volumes / File system management
	▪ Escalate any technical problem to L3 team when necessary
	▪ Implementation of Service improvement plan / Best practices
	▪ Maintain Incident information in the KEDB (Known error Database)
▪ Carry out daily, weekly and other regular reporting activities for Incidents.	

Types of Incidents include following:

Server Monitoring	
<i>L2 Team</i>	▪ Server availability
	▪ Space, Memory and Cache

	▪ Replication / Stand by monitoring
	▪ Unauthorized / Inactive User Access
	▪ Backup status
	▪ Disk space / Table space utilization
	▪ Security and configuration exception alerts

Basic Administration	
L2 Team	▪ Startup/shutdowns of Servers
	▪ Additional Space allocation
	▪ Initial troubleshooting
	▪ Set up server auditing

**Level 3 Services**

All unknown / new errors and problems will be resolved by L3 server Support group. This team will work with Vendors when required.

L3 Team	▪ Server planning and Design services
	▪ Design any special application or security requirements.
	▪ Setup redundant / load balanced servers for application requiring high availability – Server clustering / network /Server load balancing
	▪ Administration / handling issues related to clusters.
	▪ Provide technical escalation support to L1 and L2 team when required
	▪ Troubleshoot installation
	▪ Validate the new servers before releasing to production
	▪ Work closely with Problem Management organization on the remediation of all problems directly or indirectly related to server engineering
	▪ Capacity Management
	▪ Troubleshoot major server issues on virtual and physical servers
	▪ Conduct Root Cause Analysis (RCA) on Severity 1 issues
	▪ Monitor for patches and test
	▪ Prepare work plan for major maintenance activity
▪ Deploy patch	

- |  |  |
|--|--|
|  | <ul style="list-style-type: none"> <li>▪ Confirm patch efficacy, no adverse effects</li> </ul>   |
|  | <ul style="list-style-type: none"> <li>▪ Disaster recovery solution design, benchmarking, load testing, implementation, configuration, monitoring and troubleshooting, both internal and external</li> </ul> |

#### **Patch Management:**

Patch Management for Windows Servers will be through SCCM 2012 and RedHat Network (Satellite Server) will be used for Patching Redhat Linux servers. The Satellite server Connects to Redhat network to download the patches. The Linux servers will be configured to communicate with Satellite servers patching updates. For Solaris servers, Oracle OEM Ops Center is planned for automating Solaris patching and it integrates with OEM 12c Cloud Control, for AIX servers patching will be a manual activity.

#### **3.1.4.4. Assumptions**

The following assumptions are considered for this engagement with Health Net:

- Cognizant will purchase Microsoft Windows Data center licenses and Red hat Enterprise subscriptions if needed to accomplish the design objectives of the solution architecture
- Cognizant will work with Health Net to ensure License compliance
- Tool based (3rd party) V2V migration approach for virtual servers hosted in VMware environment.
- Increase Virtualization footprint by converting existing 112 Physical (x86) Servers in Boulder DC and reduction of 50% of Physical (x86) server footprint in branch locations.
- Lift and Shift approach for all the legacy servers where application migration is not possible.
- All remote AIX will be removed as we determined they are for TSM
- All Alpha servers will be lifted and shifted
- All Physical Sun, AIX servers to be virtualized to LDOM and LPAR respectively.
- Cognizant will not install and support unlicensed software in the execution of this contract
- Advance notice for any large project with space requirement above the 10% additional capacity
- Cognizant to have prebuilt small, medium, and large VM profiles (for Windows and LINUX) in our Service catalog within Cloud 360 to help with rapid provisioning, but Cognizant will refine this during the detail design workshops with Health Net
- Federal and Commercial servers may be physically co-located with spares in the chassis
- OS images will be built as per the security standard provided by Health Net.

### 3.1.4.5. Risk and Mitigations

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	Migration of Legacy applications	Medium	Medium	Cognizant will perform either P2V or P2P or Lift and Shift of the server.
2	WAN Performance/connectivity issue during data migration	Low	High	Forklift high critical server data to mitigate WAN performance issues
4	Licensing to ensure DC failover	Medium	Medium	Cognizant will review licensing with vendors to address gaps
5	Multiple Virtualization Solutions complicate management and require subject matter experts to possess deep knowledge of multiple competitive products.	Medium	Medium	Cognizant will ensure that all subject matter experts possess the required knowledge to administrate deployed virtualization solutions
6	Blade based solutions draw more power than the typical rack infrastructure	Low	Low	Cognizant will work with DC managers to ensure that implemented UCS have adequate power and cooling
7	Vendor licensing changes during the life of UCS	Medium	Medium	Cognizant will work with solution providers to identify potential EOL and availability issues to ensure that UCS as deployed will not be impacted

### 3.1.5. Storage

Storage Requirements for Corp IT, Federal and Commercial servers that are being migrated from the Incumbent data centers to the newly built DC's are fulfilled by upgrading the Storage Infrastructure at both Centennial DC and Phoenix DC. Storage Infrastructure at the new DC's are designed to support the scalability requirements without making major changes. This solution covers the design and approach for preparing the storage infrastructure at new DC's in Centennial and Phoenix to cater the storage needs for Corp IT, Federal and Commercial application servers which are going to be migrated from the incumbent Data centers.

Detailed design on the newly built Storage Infrastructure at Centennial and Phoenix is available in the ITO Phase 1 Solution Document .

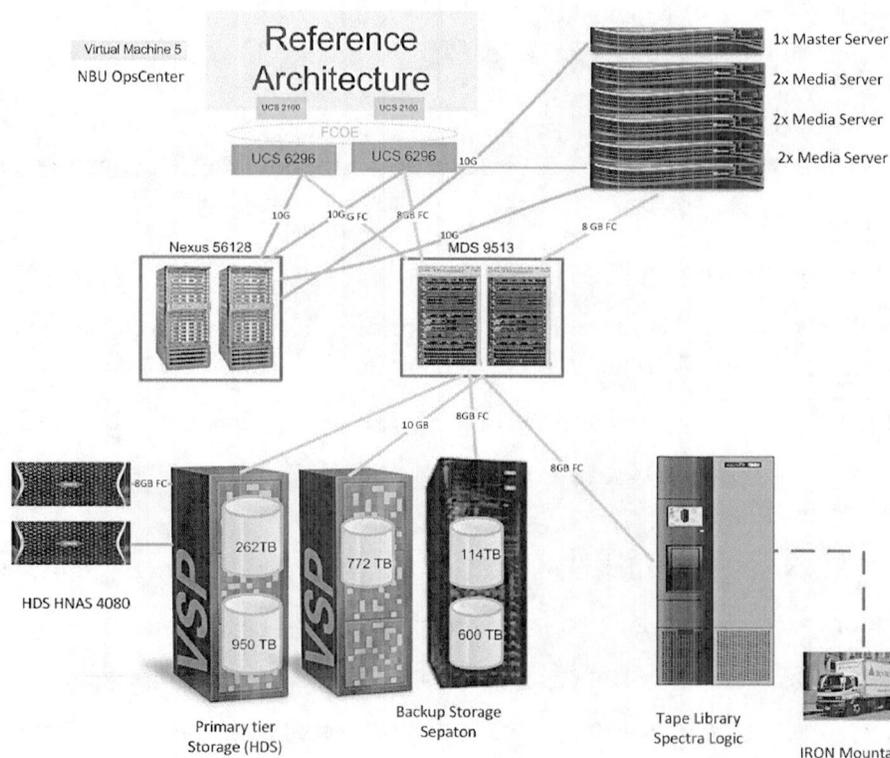

### 3.1.5.1. Solution Approach

Cognizant will be upgrading the Storage and Backup Infrastructure components in Centennial and Phoenix DC's. In Centennial DC, existing Hitachi VSP (ITO Phase 1) will be upgraded and additional Hitachi VSP will be installed. In Phoenix, the existing Hitachi VSP (ITO Phase 1) will be upgraded to support the data storage capacity.

- Summary of Storage upgrade:
  - Upgrade ITO Phase 1 VSP from 263TB to 1228TB a 965TB increase
  - Build a Second VSP with 772TB
  - Total increase of 1737TB in Centennial
- 2.75 PB usable capacity across both Data center after the upgrading the existing VSP storage and installation of additional VSP in Centennial
- Out of the 2.7 PB we will use about 1735 for BPaaS servers across both DC
- Out of the 2.7 PB we will use about 389 TB for Federal and 388 TB for Corp IT servers across both DC
- HDS VSP Storage for all tiers of SAN storage, Thin Provisioning, Automatic Tiering
- All Storage pools configured to be Dynamic Tiering Pools.
- Install a new HDS HUS 150 Array with 30 TB at Woodland Hill
- Install a new HDS HUS 150 Array with 25 TB at Rancho Cordova
- Upgrade the SAN Switch ports in both Data center to increase port availability
- Cisco MDS 9250i switch is considered for Storage Replication from Boulder to Centennial using FCIP technology
- HUR replication to continue with Incumbent (Boulder,co DC) until migration completed in July of 2016. Also, enhance replication between Centennial and Phoenix as requirements evolve over the migration period. Enable HNAS replication between DC1 (Centennial) and DC2 (Phoenix)
- Leverage the HUR Replication to meet the RPO requirements for DR for production
- Leverage the installed Hitachi management and monitoring tools for managing upgraded storage environment and new VSP added in Centennial DC.
- Monitoring and Management of the Storage environments in the Centennial and Phoenix DC
- Assess the servers which will be retained in Woodland Hills and Rancho Cordova and backup options (local/remote) will be developed based on the assessment outcome

### Storage Infrastructure – Centennial Data Center

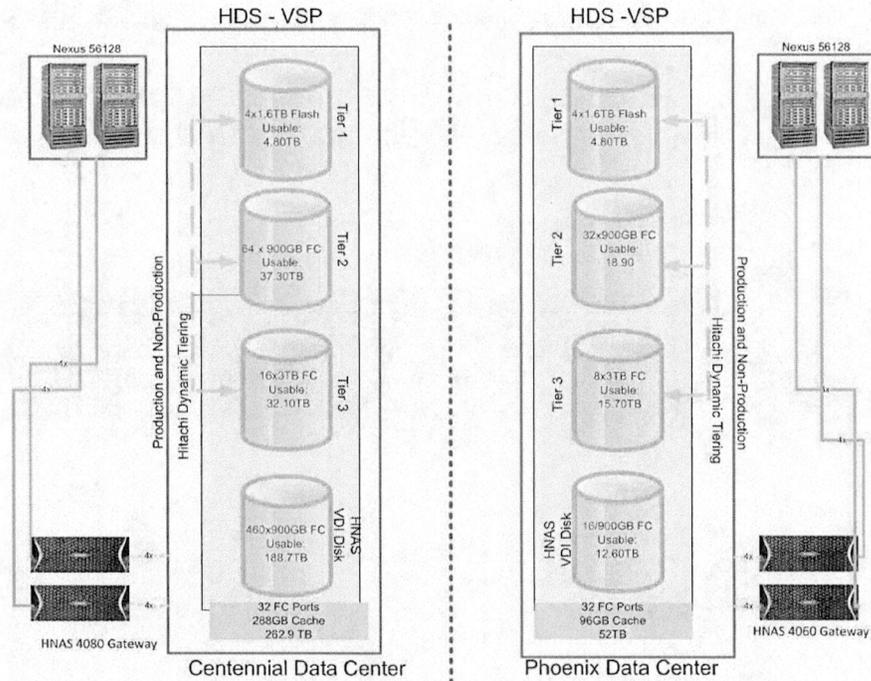

The diagram below depicts the High Level Storage and Backup architecture at Primary DC

**Figure: High Level Storage and Backup architecture at Primary DC - Centennial**

**VSP Architecture**

The VSP Architecture for both DC1 and DC2 is as depicted below.

**Figure: VSP Architecture**

The reference for the detailed architecture of proposed Storage Infrastructure at Centennial (DC1) & Phoenix (DC2) is available in the ITO Phase 1 Solution Document.

**VSP Capacity Summary – Centennial**

Storage Array	Usable Capacity ITO Phase 1	– Usable Capacity - ITO Upgrade	Total Usable Capacity
HDS VSP #1	263 TB	965 TB	1228 TB
HDS VSP #2	0	772 TB	772 TB
<b>Total Usable Capacity at Centennial DC</b>			<b>2 PB</b>

**VSP Storage Disk Configuration**

**VSP Storage Pool Configuration:**

- All storage pools will be configured using standard pool build layout design given in below table.

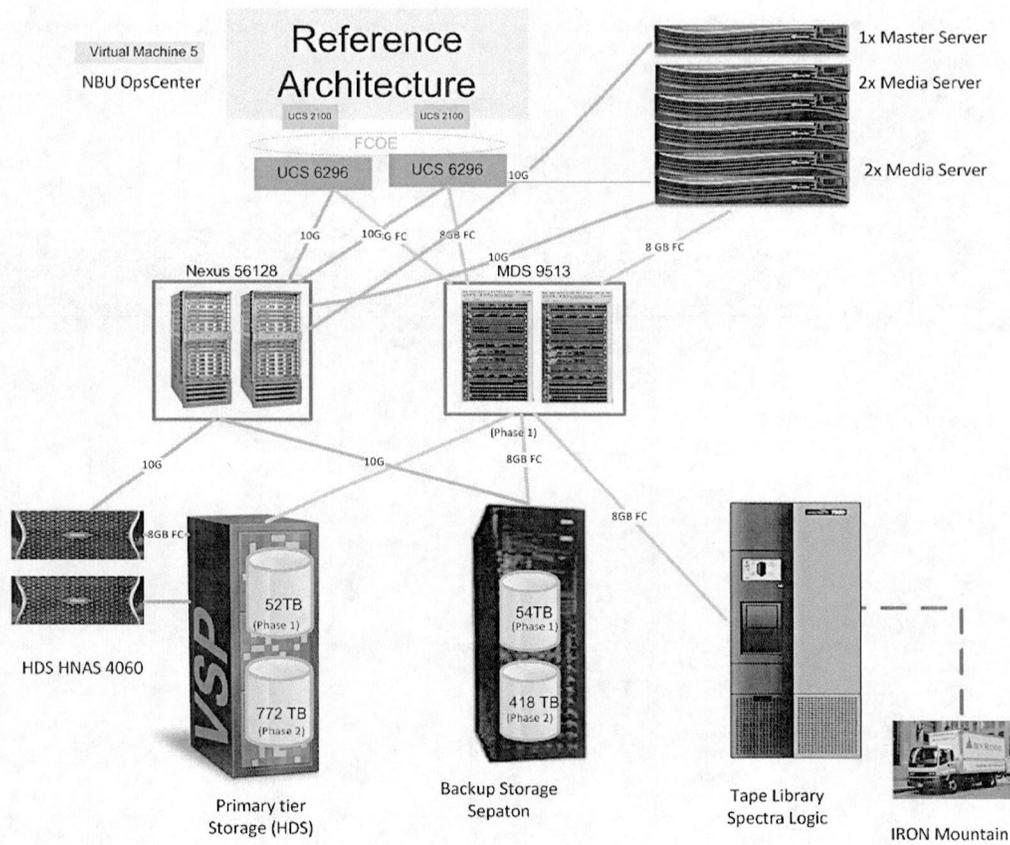

- Each Standard Pool build produce 193 TB of Usable Capacity after the raid overhead + Hot Spares.
- Total No. of pools in VSP 1 Upgrade – 5 x 193 TB = 965 TB usable capacity
- Total No. of pools in VSP 3 New Install - 4 x 193 TB = 772 TB usable capacity

### Standard Pool Build

Tier 1	Disk Type	RAID	RAID Type	Usable (TB) Ask	Tier (%)	RAID Groups Required	Usable (TB) Configured	Disks	HS
<b>Disk Tier1</b>	3.2 TB Flash module Drive	5	7D+1P	165	13.00%	1	21	8	1
<b>Disk Tier2</b>	1.2 TB 10K rpm SAS 2.5" Drive	6	14D+2P		54.00%	8	120	128	2
<b>Disk Tier 3</b>	4TB 7.2Krpm NL-SAS 3.5" Drive	6	14D+2P		33.00%	1	52	16	2
<b>HNAS VDI Disk</b>	900GB 10K rpm SAS 2.5" Drive	0	0	0	N/A	0	0	0	0
					<b>Total</b>	<b>71</b>	<b>193</b>	<b>564</b>	<b>13</b>

### Storage Infrastructure – Phoenix Data Center

The diagram below depicts the High Level Storage and Backup architecture at Secondary DC

**Figure: High Level Storage and Backup architecture at Secondary DC - Phoenix**

**VSP Capacity Summary – Phoenix**

Storage Array	Usable Capacity ITO Phase 1	Usable Capacity - ITO Upgrade	Total Usable Capacity
HDS VSP #1	52 TB	772 TB	824 TB
<b>Total Usable Capacity at Phoenix DC</b>			<b>824 TB</b>

**VSP Storage Disk Configuration**

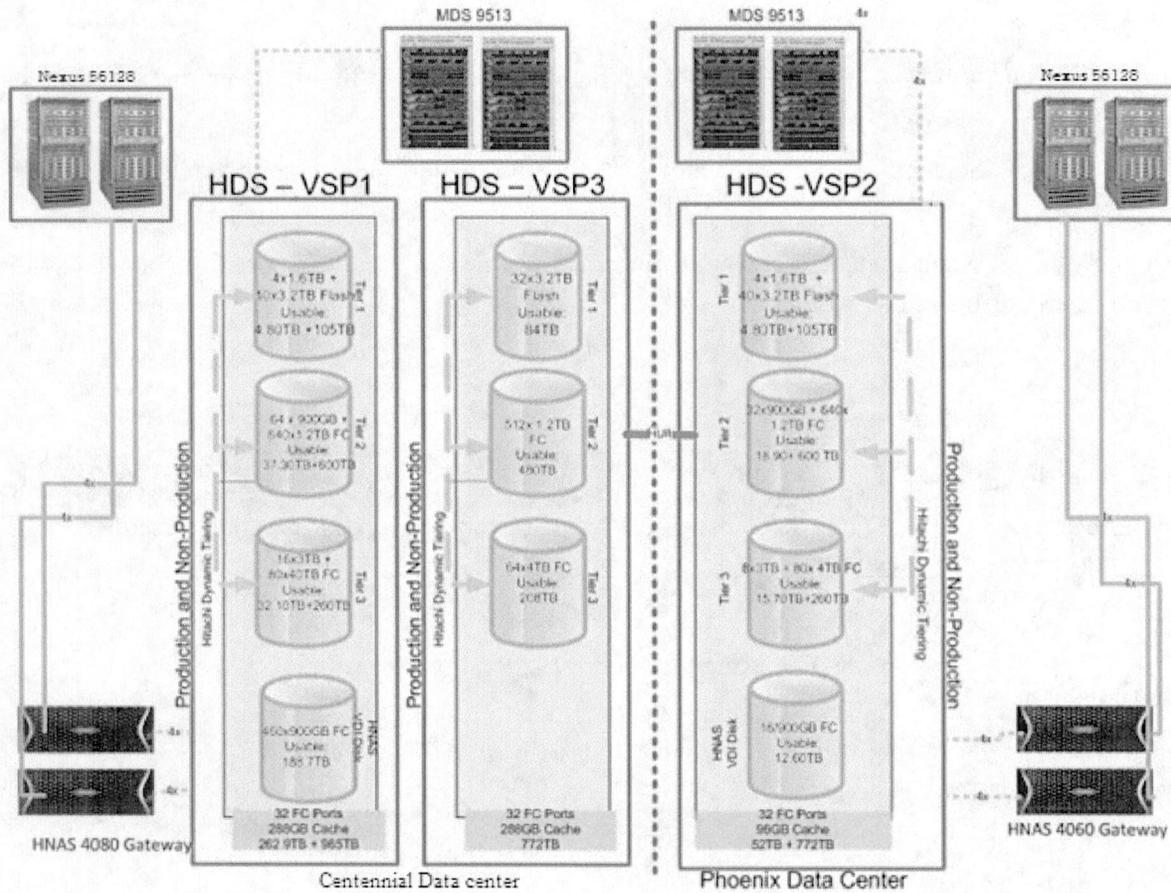

**VSP Storage Pool Configuration:**

- All storage pools will be configured using standard pool build layout design given in below table.

- Each Standard Pool build produce 193 TB Usable Capacity after the raid overhead + Hot Spares.
- Total No. of pools in VSP Upgrade – 4 x 193 TB = 772 TB usable capacity

### Standard Pool Build

Tier 1	Disk Type	RAID	RAID Type	Usable (TB) Ask	Tier (%)	RAID Groups Required	Usable (TB) Configured	Disks	HS
<b>Disk Tier1</b>	3.2 TB Flash module Drive	5	7D+1P	165	13.00%	1	21	8	1
<b>Disk Tier2</b>	1.2 TB 10K rpm SAS 2.5" Drive	6	14D+2P		54.00%	8	120	128	2
<b>Disk Tier 3</b>	4TB 7.2Krpm NL-SAS 3.5" Drive	6	14D+2P		33.00%	1	52	16	2
<b>HNAS VDI Disk</b>	900GB 10K rpm SAS 2.5" Drive	0	0	0	N/A	0	0	0	0
					<b>Total</b>	<b>71</b>	<b>193</b>	<b>564</b>	<b>13</b>

**Figure: High Level Storage Allocation**

**Regional Sites – Storage Configuration**

**VSP Capacity Summary – Centennial**

Storage Array	Usable Capacity ITO Phase 1	Usable Capacity - ITO Upgrade	Total Usable Capacity
HDS HUS 150 Woodland Hills	0	30 TB	30 TB
HDS HUS 150 Rancho Cordova	0	25 TB	25 TB
Total Usable Capacity at Regional Sites			55 TB

### 3.1.5.2. Service Deliverables

- Design, build and manage scalable, reliable online and offline storage environment in the primary and secondary DC's.
- Logical Separation of Storage infrastructure for Federal and Commercial applications and data.
- Storage Management Tools for live monitoring and notifications for all the Storage components in the Data center.

### 3.1.5.3. Steady State Support Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Commercial) with on call</li> <li>▪ 24x7 Onshore support:               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – (Federal onsite) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net offices</li> <li>▪ Offshore – Bangalore (India) ; Coimbatore (India)</li> </ul>

The high level activities of storage and backup services are described below:

#### Level 1 Services: Storage

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L1 Team</i>	▪ FC / director port monitoring
	▪ Array event monitoring
	▪ Storage array performance monitoring
	▪ Disk drives health monitoring
	▪ Array disk space capacity monitoring and reporting
	▪ Event monitoring
	▪ Storage controller Monitoring (CPU) and reporting
	▪ Where applicable, keep Health Net informed and notified on the status and progress

#### Level 2 Services: Storage

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

- Incident management services
- Change management services

<i>L2 Team</i>	▪ LUN/Meta device configuration (creation, deletion, allocation)
	▪ Host systems configuration in the array manager (addition, modification)
	▪ Array event analysis
	▪ FC / HBA configuration in the host server
	▪ Multi-path configuration
	▪ Port configuration
	▪ Zone configuration
	▪ Event analysis

Types of incidents include following:

<i>Server Monitoring</i>	
<i>L2 Team</i>	▪ Storage availability
	▪ Space, Memory and Cache
	▪ Unauthorized / Inactive User Access
	▪ Backup
	▪ Disk space utilization
	▪ Security and configuration exception alerts

<i>Basic Administration</i>	
<i>L2 Team</i>	▪ Startup/shutdowns of Storage and Backup
	▪ Additional Space allocation
	▪ Initial troubleshooting and incident management
	▪ Set up storage and backup auditing

### Level 3 Services: Storage

All unknown / new errors and problems will be resolved by L3 Storage Support group. This team will work with Vendors when required.

<i>L3 Team</i>	▪ Storage array performance analysis
	▪ Hardware modification (replacement/ expansion)
	▪ FC / HBA hardware modification (replacement/ expansion)
	▪ Device parameter configuration
	▪ Fabric firmware upgrade / management

#### 3.1.5.4. Assumptions

The following are the assumptions considered under Storage:

- Cognizant will work with Health Net to ensure License compliance
- Advance notice for any large project with space requirement above the 10% additional capacity Intrust
- Federal and Commercial servers may be physically co-located in the same storage but logically separated.
- The incumbent to supply details of current storage environment on the following during assessment phase:
  - IOPS
  - Performance
  - HUR capabilities
  - Capacity utilization

#### 3.1.5.5. Dependency

The following are the dependencies considered under Storage:

- Detailed server level capacity requirements for the data migration
- Application Level performance requirements
- Health Net to facilitate access or details to the incumbent DC Storage infrastructure during the low-level Assessment/design phase to gather required information.

#### 3.1.5.6. Risk and Mitigations

No	Risk Description	Probability	Impact	Mitigation Strategy
1	Host Compatibility Issues	Medium	High	Prior to the Host integration and the storage, detailed host compatibility exercise to be carried out and appropriate firmware, drivers to be installed/updated.

### 3.1.6. Backup

Backup Infrastructure built in the Centennial DC and Phoenix DC will be utilized to meet the backup requirements for the newly built servers and servers which are getting migrated from incumbent data center. This solution covers the design and approach for preparing the existing backup infrastructure by upgrading the backup storage capacity and adding more tape drives and tape medias in the tape libraries.

Detailed Backup Infrastructure design is described in the ITO Phase 1 Solution Document.

#### 3.1.6.1. Solution Approach

Cognizant will build backup pools to support ITO, which will be logically separated from Federal backup pools using dedicated VLAN. Following upgrades or addition will be made to back environment for supporting ITO asset data backup.

- Build infrastructure for Storage and Backup
  - Build different pools support Federal and Commercial separation
  - Dedicated VLAN for Backup for network based backup clients.
  - LAN Free (SAN-based) backups to be used for servers exceeding a defined storage capacity threshold > 600GB
  - Encryption will be enabled for data at rest
- Design/move current processes to CTS, but for some backups we may need to adjust the process to support HNT requirements. Creating implementation Plan Procurement of required infrastructure
- Upgrade the Sepaton Storage Capacity by adding additional SRE nodes
- Upgrade the Tape Libraries by adding additional 99 ( 66 for Centennial and 33 for Phoenix) LTO-6 Tape Drives
- Upgrade the Spectra Logic Tape Library to add more slots( 2300 for Centennial and 1900 for Phoenix) for a total of 4200 tapes
- Add additional NetBackup Media Servers to handle the increased backup load
- Add AIR+OST License and configure to use for NBU Servers and Sepaton
- 
- Cognizant understands that all the backup media is owned and maintained by Iron Mountain for Health Net. Cognizant will access these backups for any restoration and proposes to retain/lift & shift small setup of existing Incumbent Backup platform to restore historical backup in Cognizant DC
- Tape Libraries in Boulder, Rancho Cordova and Woodland Hills will be assessed and necessary steps will be taken for future restoration purposes

## **Backup Environment**

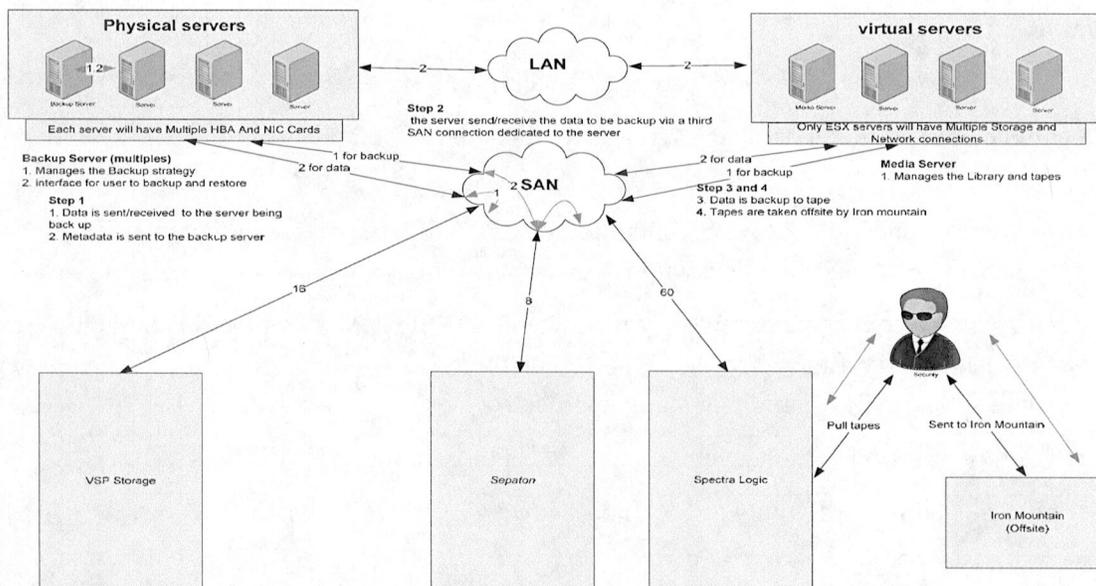

### **Backup Software**

Cognizant would implement Symantec NetBackup as the data center backup and recovery technology. Symantec NetBackup 7.5 provides a comprehensive yet integrated approach to protecting data for next generation data centers.

### **Backup Infrastructure Features**

- An highly agile and enterprise backup and recovery solution
- The Sepaton's patented Content Aware™ de-duplication technology delivers the fastest time to safety and most efficient capacity reduction of any solution available today
- The only data protection solution that can effectively de-duplicate separate parallel backup streams (multi stream) and across multiplexed data volumes, as required for large database environments such as Oracle, DB2 and SQL
- Delta Scale™ architecture makes it easy to increase storage capacity and maintain performance as your needs grow
- Enables fast and secure replication and transmission of massive backup volumes to remote disaster recovery sites over a wide area network. Replication is performed automatically
- Byte differential Content Aware™ de-duplication reclaims storage space continuously as it operates, freeing capacity sooner and saving administration time
- Symantec NetBackup OST features such as Auto Image Replication (A.I.R.), Optimized Synthetic Backups, GRT and Symantec NetBackup Accelerator, which we have purchased the licenses but it will be implemented in later projects
- Delta Scale™ architecture's secure multi-tenancy capability allows data managers to allocate performance, capacity bandwidth and quality of service as needed by their enterprise's various segments, departments and business units
- Encrypts data at rest while maintaining its blazing fast time to safety and industry-leading backup performance (Sepaton S2100-ES3's encryption of data at rest capability integrates with industry standard interoperability protocols for encryption key managers (EKM) that are compliant with industry-standards)

### **Backup Data Flow Diagram**

**Figure: Data Flow Diagram**

**Backup to Tape**

The disk-to-disk-to-tape (D2D2T) combination allows backup administrators to have the following: keeping off-site backups in Iron Mountain location, while retaining fresh backups on disk for ultrafast restores. The D2D2T model uses a two-tiered architecture that can effectively handle both near-line and archival data. Dual-stage disks and automated tape backup effectively address the data protection gaps and performance limitations that result when either technology is used individually, enhancing a Health Net’s existing tape backup process. All the backups to tape and disk will be encrypted.

*Note: Health Net will own the Iron Mountain contract and relationship.*

**NDMP Backup**

Symantec NetBackup for NDMP helps provide reliable, high-performing backup and recovery services for NDMP enabled Network Attached Storage (NAS). To streamline operations, NetBackup for NDMP extends its advanced media management and virtually unlimited scalability via the Network Data Management Protocol (NDMP).

NDMP facilitates communication between Symantec NetBackup for NDMP and a NDMP server application to initiate backup and restore tasks. This communication integrates the protection of NAS into a consolidated, Data center - strength backup solution:

**Backup Operations**

Support Team ( Backup Operations ) shall maintain the approved list, Backup details & policy for all the Servers , Application and data that are to be backedup. Backup team will review backup requirement at regular intervals with HealthNet and based on the RPO & RTO.

## **Septon Encryption**

- Hardware-accelerated compression and encryption
- Leverages high-performance HiFn DX 1845 to do compression and encryption in unified pipeline
- Massive bandwidth provides compression and encryption throughput for 2 x 8Gbps Fiber Channel ports ingesting data with 100% change rate per SRE node
- Key management is external to VTL using an OASIS KMIP-compatible key manager (or the HP proprietary Enterprise Key Manger or the SafeNet Enterprise Key Manager which are both supported by our architectural approach)
- Communication with the Key Manager is via the CryptSoft KMIP SDK
- Provides linear scalability as SRE nodes are added to the system
- Performs predictably - no CPU performance impact on ingest or de-duplication processing
- All customer data is encrypted before landing on disk
- Encryption keys never stored on disk

## **Septon Key Management**

**Key Management Availability:** The VTL only needs to access the key manager at startup. The key is cached in memory (not on disk) while the VTL is running. At boot time the system interrogates the list of key managers (up to nine of them) to get the key. If no key manager responds, the system goes into maintenance mode. You can safely take key managers down for system maintenance once the Septon system has retrieved the key.

For security reasons, the VTL never stores the key on disk. It always checks for a key on reboot so that IT can revoke the key (or more commonly) disable the key manager in the event of a data center-wide security intrusion. If this were to happen, shut down the key manager and reboot the VTL to prevent access to live data on the VTL.

## **Spectrologic Encryption**

Spectra logic will be using Spectra BlueScale encryption key management. Spectra Logic BlueScale encryption key management provides an easy-to-use interface that lets Cognizant to quickly implement Spectra Logic encryption. The key is automatically handled in multiple software layers, as well, so it is not apparent to the end user. LTO tape drives use AES-256 bit encryption keys generated within BlueScale to encrypt data. This data cannot be read until it is decrypted, which requires the use of the same key that was used during data encryption. This kind of encryption requires creation, tracking and protection of the encryption keys. The life cycle of a BlueScale encryption key includes the following stages:

- Encryption User Definition

- Key Creation/Deletion
- Key Escrow
- Key Use in Data Encryption/Decryption

The following encryption type will be used:

- Professional (32 keys)

*Note: See the following link for more details on Spectra logic encryption:*

*(<https://www.spectralogic.com/index.cfm?fuseaction=home.displayFile&DocID=1902>)*

**Backup Overview – Primary DC (Centennial)**

- The expanded backup solution to support ITO at Centennial DC will be utilized to protect the Federal and Commercial servers either moving from incumbent DC’s or installed in Centennial DC
- Federal and Commercial backup data will be logically separated by creating separate backup pools at Sepaton and Tape Library.
- Cognizant to implement A.I.R (auto image replication) with the Sepaton device, which allows DC1 Sepaton to replicate to DC2 Sepaton. For now, the design will have the data moved from source via dedicated backup VLAN or LAN-Free to the Sepaton device where it utilize tools like de-duplication and compression. Once it has arrived in the Sepaton the data will be laid out in a pre-defined structure (LLD – low level design phase). After the data meets pre-defined qualification (LLD – Low level design phase) the data then will be moved to the Spectra logic to either a Federal pool or Commercial pool. Lastly, in the Spectra Logic device will have pre-defined qualification (during LLD) to move the tape to a remote location using Iron Mountain.
- Add 3 NBU Media Servers to the existing backup infrastructure ( 2 for Commercial and 1 for federal )
- Upgrade the Sepaton Storage by adding SRE nodes and controller to provide additional 600 TB Backup Storage.
- Upgrade the SpectraLogic Tape Library by adding 2300 Tape Slots and 66 LTO-6 FC Tape Drives.

**NBU Appliance Sizing**

Component	ITO Phase 1 Sizing	ITO Upgrade	Total
<b>NBU Master Server</b>	1	0	7
<b>NBU Media Servers</b>	3	3	
<b>NBU License</b>	40 TB	960 TB	1000 TB

**Sepaton Storage Sizing**

Component	ITO Phase 1 Sizing	ITO Upgrade	Total
<b>Septon Capacity</b>	114 TB	600 TB	714 TB

### SpectraLogic Tape Library Sizing

Component	ITO Phase 1 Sizing	ITO Upgrade	Total
T950 Tape Slots	700	2300	3000
LTO-6 FC Tape Drives	16	66	82

### Backup Overview – Secondary DC (Phoenix)

- The expanded backup solution to support ITO at Phoenix DC will be utilized to protect the Federal and Commercial servers either moving from incumbent DC's or installed in Phoenix DC.
- Federal and Commercial backup data will be logically separated by creating separate backup pools at Sepaton and Tape Library.
- Cognizant to implement A.I.R (auto image replication) with the Sepaton device, which allows DC1 Sepaton to replicate to DC2 Sepaton. For now, the design will have the data moved from source via dedicated backup VLAN or LAN-Free to the Sepaton device where it utilize tools like de-duplication and compression. Once it has arrived in the Sepaton the data will be laid out in a pre-defined structure (LLD – low level design phase). After the data meets pre-defined qualification (LLD – Low level design phase) the data then will be moved to the Spectra logic to either a Federal pool or Commercial pool. Lastly, in the Spectra Logic device will have pre-defined qualification (during LLD) to move the tape to a remote location using Iron Mountain.
- Add 2 NBU Media Servers to the existing backup infrastructure ( commercial and federal )
- Upgrade the Sepaton Storage by adding SRE nodes and controller to provide additional 418 TB Backup Storage.
- Upgrade the SpectraLogic Tape Library by adding 1900 Tape Slots and 33 LTO-6 FC Tape Drives.

### NBU Appliance Sizing

Component	ITO Phase 1 Sizing	ITO Upgrade	Total
<b>NBU Master Server</b>	1	0	5
<b>NBU Media Servers</b>	2	2	
<b>NBU License</b>	10 TB	590 TB	600 TB

### Septon Storage Sizing

Component	ITO Phase 1 Sizing	ITO Upgrade	Total
<b>Septon Capacity</b>	54 TB	418 TB	472 TB

### SpectraLogic Tape Library Sizing

Component	ITO Phase 1 Sizing	ITO Upgrade	Total
<b>T950 Tape Slots</b>	100	1900	2000
<b>LTO-6 FC Tape Drives</b>	6	33	39

#### 3.1.6.2. Service Deliverables

- Design, build and manage scalable, reliable online and offline storage environment in the primary and secondary DCs
- Logical separate Backup setup for Federal and Commercial applications and data
- Deploy Disk-to-Disk backup and Disk-to-Tape data vaulting
- Encryption for data at rest by leveraging the Septon and SpectraLogic encryption mechanism.
- Tape Offsite Management for long term retention and retrieval.

#### 3.1.6.3. Steady State Support Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Commercial) with on call</li> <li>▪ 24x7 Onshore support:               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – (Federal onsite) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net offices</li> <li>▪ Offshore – Bangalore (India) ; Coimbatore (India)</li> </ul>

#### Level 1 Services: Backup and Recovery

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L1 Team</i>	<ul style="list-style-type: none"> <li>▪ Proactive monitoring and management of the backup environment (Client / Catalog Backup Jobs)</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Troubleshooting and preliminary investigations of problem tickets</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Unresolved tickets escalating to L2 team ( whenever necessary )</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Updating the problem tickets as per the observations and preliminary investigations</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Monitoring backup server logs, OS logs, alert logs, event logs.</li> </ul>

	▪ Maintaining and updating the log register
	▪ Monitoring of Scratch Pools

### Level 2 Services: Backup and Recovery

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L2 Team</i>	▪ Updating operation handbook / Run books.
	▪ Automation of backup jobs through scripting
	▪ Updating the design documents with respect to changes implemented
	▪ Troubleshooting, configuration management, Implementing changes
	▪ Restarting of failed backup jobs or running the jobs manually (whenever required)
	▪ Client configuration or de-configuration support
	▪ Coordinate hardware and software vendor technical support
	▪ Master / Media server configuration

### Level 3 Services: Backup and recovery

L3 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L3 Team</i>	▪ Hardware configurations (Tape, Drive, VTL, etc.)
	▪ Handle backup / Restore requests
	▪ Create / delete / modify storage pools
	▪ Diagnosing, analyzing, performance management and capacity planning
	▪ Configuring backup/Recovery policies and maintaining record of changes to policies
	▪ Implementing best practices and recommendations (Data Depute)
	▪ Resolving escalated issue and creating the K.E.D.B. Conducting Root Cause Analysis (RCA) on Severity 1/2 issues

#### 3.1.6.4. Assumptions

The following are the assumptions considered under Backup:

- Health Net to provide and own the Iron Mountain contract for Tape offsite management.

#### 3.1.6.5. Dependency

The following are the dependencies considered under Backup:

- Health Net to perform acceptance testing and sign-off on the following:
  - Backup Performance (LAN and LAN-Free)
  - RTO and RPO

### 3.1.6.6. Risk and Mitigations

No	Risk Description	Probability	Impact	Mitigation Strategy
1	Host Compatibility Issues	Medium	High	Prior to the Backup Client configuration, detailed host compatibility exercise to be carried out to rule out compatibility issues between backup software, host operating system and application software's. Necessary Firmware/Drivers to be updated.

### 3.1.7. Middleware

#### 3.1.7.1. Solution Approach

The future architecture of the middleware will be similar to the current setup. Below is the overall environment that Cognizant will setup and manage

- WebLogic servers
- IIS
- BizTalk
- Apache
- Site Minder
- Oracle Service Bus

Cognizant strategy towards middleware migration will be to continue the same architecture and schematics at the start of the engagement. The basic approach will be to maintain the same cluster environment and configurations at the application level.

The current Middleware landscape in Health Net ITO environment is illustrated below:

Current Landscape in Health Net	
Technology	No of Instances
WebLogic 7.0, 8.1, 8.1.5, 9.1, 9.2, 10.0.1, 11gR1	200
IIS 5.x, 6.x, 7.x	100
BizTalk	10

As per Health Net technology road map the existing TIBCO applications are to be migrated to WebLogic gradually. Cognizant is planning for AS IS migration from existing Data Center to the cognizant Data Centers.

### 3.1.7.2. Service Deliverables

- Build , Migrate and support the Middleware environment
- Create and maintain Design, Build and Run book documents

### 3.1.7.3. Steady State Support Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Commercial) with on call</li> <li>▪ 24X7 Onshore support               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore</li> </ul>

The high level activities for Middleware services are mentioned below:

#### Level 1 Services

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>L1 Team</i>	<ul style="list-style-type: none"> <li>▪ Logging and Tracking requests</li> <li>▪ Contribute information to knowledge base</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Perform initial troubleshooting to determine the nature of the issue</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Create ticket and log all troubleshooting steps performed</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Escalate unsolved issue to Level -2</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Direct call handling from Health Net – Service request</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Start/stop instances</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Deploy applications</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Check build logs</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Web/App server Instance/Cluster Member creation through Automated Scripts</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Deploying Applications via Automated Scripts</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Validating Prerequisites</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Web /app Server Installation via Automated Scripts</li> <li>▪ Web/App Server Checklist/verification via Defined Process</li> </ul>

	<ul style="list-style-type: none"> <li>▪ Check Build Logs</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Web/App server Performance Monitoring / Perform incident analysis</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Generating Performance reports from log files</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Generate reports/ Distribute reports</li> </ul>

### Level 2 Services

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

<i>L2 Team</i>	<ul style="list-style-type: none"> <li>▪ Create and modify build script</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Diagnose common build and deploy problems</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Analyzing performance reports</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Web/application server performance monitoring</li> </ul>
	<ul style="list-style-type: none"> <li>▪ SSL configuration and certificate management</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Create Environment Map</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Perform Build and Deployments</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Diagnose Common Build/Deploy Problems</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Web/App server Performance Monitoring</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Analyzing Performance reports</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Integrating Webserver for Single Sign On functionality</li> </ul>
	<ul style="list-style-type: none"> <li>▪ SSL Configuration and Certificate Management</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Install and Configure other Tools commonly used/ Supporting Other Tools</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Report analysis</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Contribute information to knowledge base</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Identification of improvement opportunities</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Working with OEM/3rd party vendors for problem resolution and break fix resolutions</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Escalate any technical problem to L3 team when necessary</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Implementation of Service improvement plan / Best practices</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Create and update KEDB (Knowledge Event Database).</li> </ul>
<ul style="list-style-type: none"> <li>▪ Hardening of servers</li> </ul>	

### Level 3 Services

All unknown / new errors and problems will be resolved by L3 Middleware Support group. This team will work with Vendors when required.

<i>L3 Team</i>	▪ Java/Admin Console Administration - Advanced Administration
	▪ Writing/Updating Webserver/web-Application start, stop scripts / Creating WAS Image
	▪ Work on Severity 1/critical incidents
	▪ Work on Incidents escalated by L2 team and document the resolution for future references
	▪ Shell / Perl scripting with respect to Web/App server Admin Tasks
	▪ Creating Ant/JACL/JAYTHON scripting with respect to Web/App server Admin Tasks
	▪ Heap Dump/ Java Core File Analysis
	▪ Web/App server Performance Tuning / Capacity planning
	▪ Web/App Server Migration
	▪ Diagnose Critical Build/Deploy Problems
	▪ Patch Administration - Selecting the Patch/Downloading/Applying/Testing for the First Time
	▪ Minimizing downtime by checking planned maintenances and new implementations
	▪ Planning and implementation of Continuous improvement Plan
	▪ DR Planning
	▪ Cluster Design
	▪ Taking Change Board Approval
	▪ Define standards / Define strategy
	▪ Review and Approve information submitted to knowledge base
	▪ Knowledge gap analysis
	▪ Identification of improvement opportunities

#### 3.1.7.4. Assumptions

The following are the assumptions considered under Middleware:

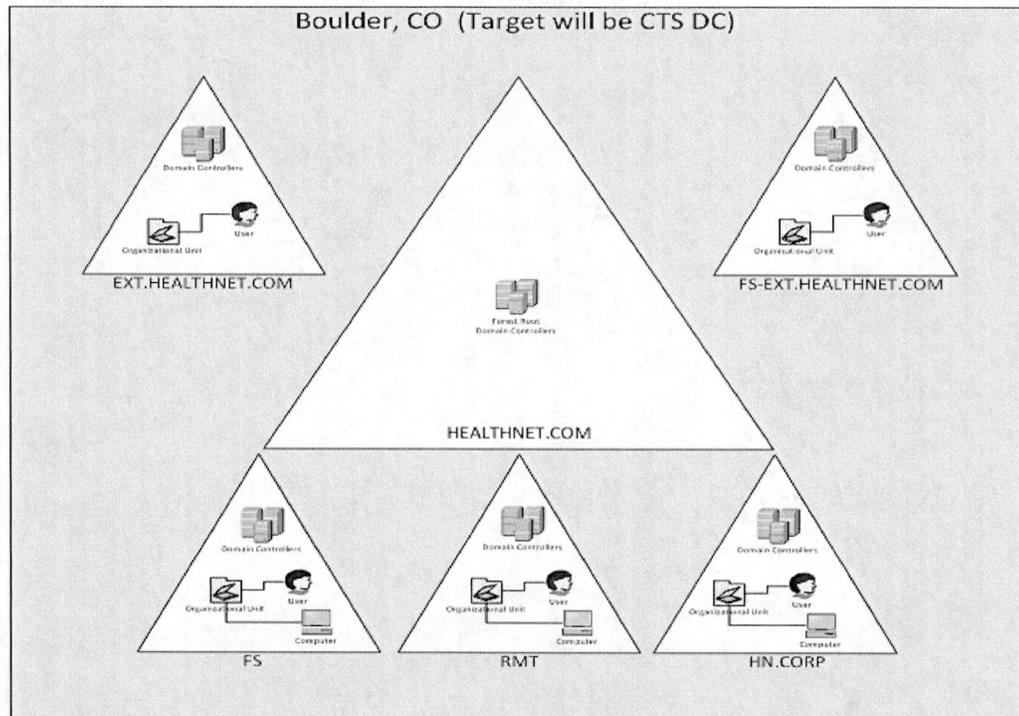

- Target versions of Middleware components will be same as current environment.

### 3.1.8. Directory Services

#### 3.1.8.1. Solution Approach

##### Current Architecture

Health Net has three forests HEALTHNET.COM, EXT.HEALTHNET.COM and FS.EXT.HEALTHNET.COM. HEALTHNET.COM is an internal forest and has 3 child domains HNCORP.HEALTHNET.COM, FS.HEALTHNET.COM and RMT.HEALTHNET.COM as shown in the diagram below:

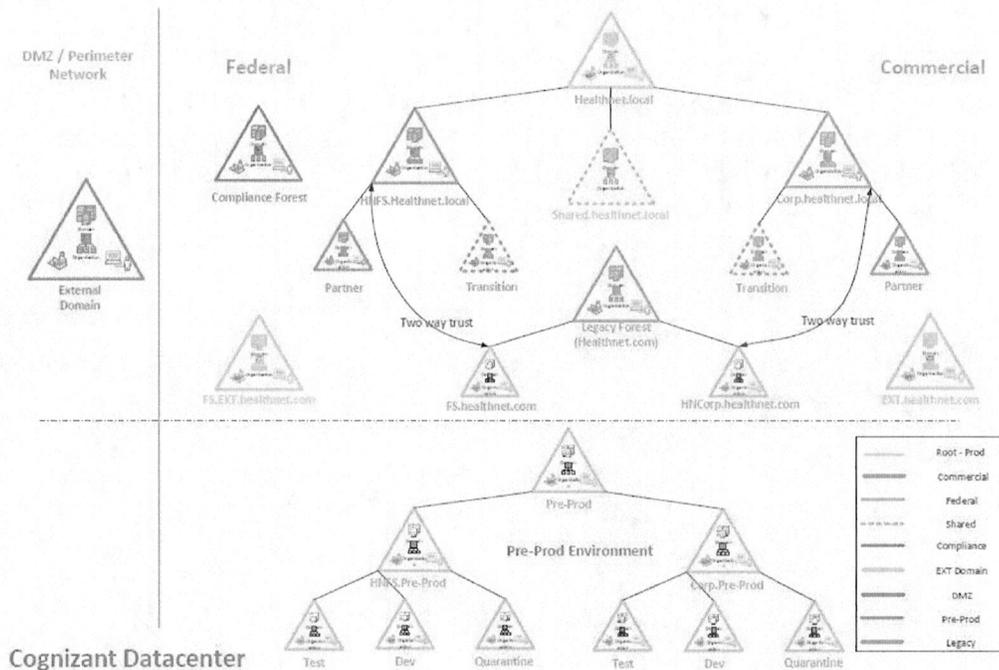

**Figure: Health Net Architecture**

HEALTHNET.COM has no resource or user in it and for administrative use only. HNCORP is used for corporate and subsidiary users. FS is used for Federal users. EXT.HEALTHNET.COM, FS.EXT.HEALTHNET.COM, and RMT.HEALTHNET.COM are placed in DMZ for outside facing web and application servers. PRE, DEV, SYS, QAS, and TST are development environments and a replica of production.

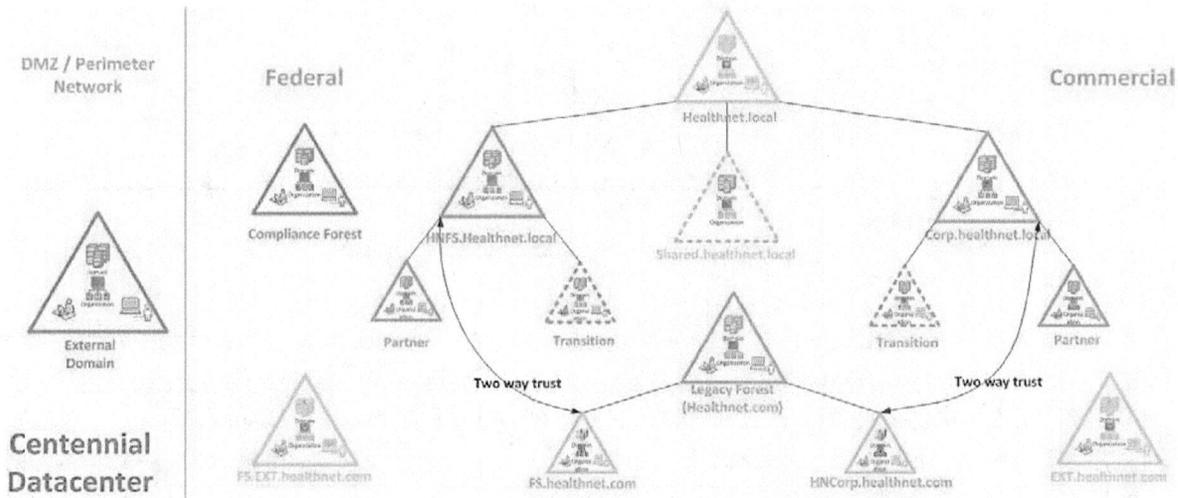

##### Target Architecture

To meet the HealthNet Security and compliance requirement, Cognizant proposes a new active directory architecture to meet HealthNet Commercial and Federal requirement.

The Below diagram details the Proposed new AD Architecture

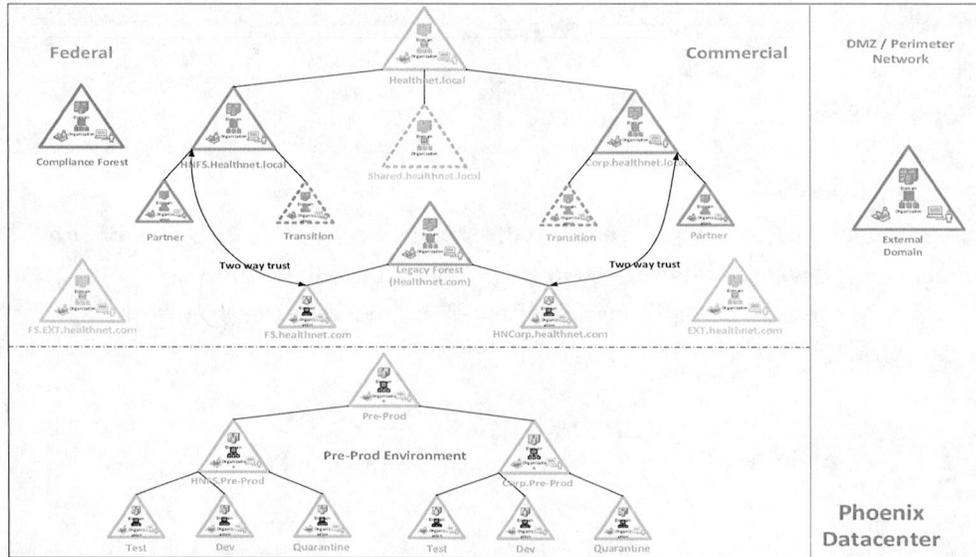

**Proposed AD logical Architectue in Primary ( Centennial) Datacenter**

**Figure: Proposed AD Architecture in Primary DC**

**Proposed AD logical Architectue in Primary ( Phoenix) Datacenter**

**Figure: Proposed AD Architecture in Secondary DC**

Cognizant would build new Active directory in both datacenter which meets the security guidelines outlined by Health net Security Team (InfoSec Team). Active directory solution is detailed in the Security Solution document HN\_CTS\_SOW4(IT)\_Ex\_A-3-3(security solution)

**3.1.8.2. Service Deliverables**

- Design, Build the Directory services in cognizant DC
- Transfer all FSMO roles (Active Directory specific roles) to new domain controllers
- Create and maintain Build and Run book documents
- Testing and Validate replication of Active Directory objects to new domain controllers
- Support the Windows CA's integrated with AD for internal PKI which Health Net leverages

**3.1.8.3. Steady State Support Deliverables**

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Commercial) with on call</li> <li>▪ 24X7 Onshore support                             <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>

Solution	Description
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore</li> </ul>

Cognizant directory service support team will organize in L1 / L2 / L3 groups providing monitoring and management services. This team will be a part of the overall platform services team and not an isolated separate tower. The delivery model for Directory Services platform is covered in the above section no. 3.1.4.3.

The high level activities for Directory services are mentioned below:

### Support Services

<i>L1/L2/L3 Team</i>	▪ Logging and Tracking requests
	▪ Perform initial troubleshooting to determine the nature of the issue
	▪ Create ticket and log all troubleshooting steps performed
	▪ Escalate unsolved issue to Level -2
	▪ User Administration
	▪ Management and creation of policies, rules and permissions
	▪ Password reset / Account management
	▪ Create/modify group
	▪ Create/Modify GPO
	▪ Adding new RIS/WDS/SMS OS images
	▪ Management of schema , site services , replication , group policy
	▪ Create/manage Site links / trust / inter forest trusts / OU structure
	▪ Working with OEM/3rd party vendors for problem resolution and break fix resolutions
	▪ Escalate any technical problem to L3 team when necessary
	▪ Implementation of Service improvement plan / Best practices
	▪ Create and update KEDB (Knowledge Event Database).
	▪ Generate reports/ Distribute reports
	▪ Delegate permission /
	▪ Designing the Group Policy requirements
▪ Participation in the CAB / Architecture Board	

- |  |   |
|--|---|
|  | <ul style="list-style-type: none"> <li>▪ Backup and restore of objects</li> </ul> |
|  | <ul style="list-style-type: none"> <li>▪</li> </ul>                               |

#### 3.1.8.4. Assumptions

The following are the assumptions considered under directory services:

- Novel eDirectory and Sun One Directory Services shall be removed ( decommissioned) from the Health Net system
- Existing domain controllers are running on Windows Server 2003 or 2008 R2

#### 3.1.8.5. Dependency

The following are the dependencies considered under directory services:

- Application migration needs to be done by respective application owners
- Application testing if any needs to be performed by application teams due to change in AD Schema
- Directory services depends on DNS heavily, as Health Net is using Infoblox appliance it should be migrated first.

#### 3.1.8.6. Risk and Mitigations

S.No	Risk Description	Probability	Impact	Mitigation Strategy
1	New domain structure might cause issues with applications dependent on directory services			The applications compatibility must be thoroughly tested against the New AD in dev/test environment before moving on to production

#### 3.1.9. DNS/DHCP

##### 3.1.9.1. Solution Approach

##### Current Architecture

Health Net currently has a mix of Windows and INFOBLOX appliance for DNS and DHCP service. Cognizant understands the decommission plan of windows servers (if required) and all DNS and DHCP services into INFOBLOX.

DNS and DHCP service has been segregated for commercial and federal segments for internal DNS and DHCP requests. These are configured in pairs of redundancy. Boulder data center holds the primary service and geographical redundancy has been added at Gold Pointe for commercial and at Aerojet for Federal. Additional appliance has been placed for caching internet bound DNS queries.

External DNS Nameserver are placed in DMZ for DNS queries by external clients, holds secondary external zones and do not allow recursion or dynamic DNS updates.

### Target Architecture

Cognizant Centennial data center will replicate the DNS and DHCP service architecture using Infoblox appliance. All existing DNS zones and DHCP scopes will be carried forward as is. Count of Infoblox appliance will be maintained as per current setup.

#### 3.1.9.2. Service Deliverables

- Implement and support DNS/DHCP
- Create and maintain Build and Run book documents

#### 3.1.9.3. Steady State Support Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Commercial) with on call</li> <li>▪ 24X7 Onshore support               <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore</li> </ul>

Cognizant DNS/DHCP support team will organize in L1 / L2 / L3 groups providing monitoring and management services. This team will be a part of the overall platform services team and not an isolated separate tower. The delivery model for Directory Services platform is covered in the above section no. 3.1.4.3.

The high level activities for the support services are mentioned below:

<b>L1/L2/L3 Team</b>	<ul style="list-style-type: none"> <li>▪ Logging and Tracking requests</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Perform initial troubleshooting to determine the nature of the issue</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Create ticket and log all troubleshooting steps performed</li> </ul>

<ul style="list-style-type: none"> <li>▪ Configure/manage DNS</li> <li>▪ Adding new forward and reverse lookup zone</li> <li>▪ Transferring DNS zones</li> <li>▪ Adding/remove resource records</li> <li>▪ Configure/Manage DHCP</li> <li>▪ Modifying/manage existing scope</li> <li>▪ Mapping subnet to site</li> <li>▪ Working with OEM/3rd party vendors for problem resolution and break fix resolutions</li> <li>▪ Escalate any technical problem to L3 team when necessary</li> <li>▪ Implementation of Service improvement plan / Best practices</li> <li>▪ Create and update KEDB (Knowledge Event Database).</li> <li>▪ Generate reports/ Distribute reports</li> </ul>
--

#### **3.1.9.4. Assumptions**

The following are the assumptions considered under DNS/DHCP:

- DNS/DHCP in Windows server shall be decommissioned at Cognizant Data Centre.

#### **3.1.9.5. Dependency**

The following are the dependencies considered under DNS/DHCP:

- Current configurations on Infoblox appliances need to be shared by the incumbent vendor
- Appropriate changes to be done on routers/switches to allow communication between clients and new Infoblox appliance for DHCP
- Application testing (if DNS server IP is hardcoded ) needs to be performed by application teams due to change in DNS server
- Health Net to decide about decommissioning of existing appliances and DNS/DHCP servers in IBM Boulder data center.

#### **3.1.9.6. Risk and Mitigations**

The applications compatibility must be thoroughly tested against the new DNS server in dev/test environment before moving on to production.

**3.1.10. Messaging and Collaboration**

**3.1.10.1. Solution Approach**

The Health Net current email infrastructure consists of IBM Lotus Notes on Solaris and Windows 2000/2003 platform. Cognizant strategy towards Lotus Notes migration will be to continue the same As-is architecture. The basic approach shall be to migrate the existing lotus notes environment from incumbent DC to cognizant DC on new solaris platform.

- Provide system administration services including mailbox administration, add/move/delete, mailbox permissions, and creation of distribution lists and owners
- Perform application upgrades for messaging environment (e.g., service packs, hot fixes, and version/currency upgrades)
- Continue to use AXS-one for email archiving messages

**E-mail Archiving - Lotus Notes Archival**

- AXSone (AXS-One Archiving System 3.9 ) which is currently used by Health Net for Archiving solution and also for integrity, security, privacy and retention policy will be migrated to Cognizant datacenter

**Current Archive Data count is :**

<b>Number of Archive Files</b>	~50 TB
--------------------------------	--------

**3.1.10.2. Service Deliverables**

- Design , Build , migrate the Lotus Notes messaging environment
- Create and maintain Design, Build and Run book documents
- Support for Good, Video Conferencing & Same Time services

**3.1.10.3. Steady State Support Deliverables**

<b>Solution</b>	<b>Description</b>
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Commercial) with on call</li> <li>▪ 24X7 Onshore support                             <ul style="list-style-type: none"> <li>○ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>

Solution	Description
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore</li> </ul>

The high level activities for Directory services are mentioned below:

### Level 1 Services

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<b>L1 Team</b>	▪ Logging and Tracking requests
	▪ Perform initial troubleshooting to determine the nature of the issue
	▪ Create ticket and log all troubleshooting steps performed
	▪ Escalate unsolved issue to Level -2
	▪ Mailbox management – create/modify/delete
	▪ Create/modify/delete DL
	▪ E Mail Queue - Manual/automated
	▪ Establishing Mail Quotas
	▪ Moving User Mail Files
	▪ Restarting the Router
	▪ Setting a user for Mail Archiving
	▪ Managing Roaming Users
	▪ Creating/ Renaming/ Deleting Groups
▪ Generate reports/ Distribute reports	

### Level 2 Services

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

<b>L2 Team</b>	▪ Move mailbox between servers / stores
	▪ Check the database White space
	▪ Configure mailbox settings manually
	▪ Troubleshoot Email delivery issues
	▪ Create /Delete /Modify PFs
	▪ Backup administration of database and logs. Online and offline

	<ul style="list-style-type: none"> <li>▪ Message Tracking / Mail queue analysis / Incoming and outgoing mail traffic</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Creating Replicas on Multiple Servers</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Creating an Organizational Policy</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Implementing Mail Delivery Controls / Transfer Controls</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Implementing Blacklist Tag and Whitelist Tag Mail Rule Conditions</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Setting up Message Tracking</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Setting up Message Recall</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Extending an Notes ID Expiration Date</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Changing a User's Location Within the Organizational Hierarchy</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Working with OEM/3rd party vendors for problem resolution and break fix resolutions</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Escalate any technical problem to L3 team when necessary</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Implementation of Service improvement plan / Best practices</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Create and update KEDB (Knowledge Event Database).</li> </ul>

### Level 3 Services

All unknown / new errors and problems will be resolved by L3 Support group. This team will work with Vendors when required.

<b>L3 Team</b>	<ul style="list-style-type: none"> <li>▪ Work on Severity 1/critical incidents</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Work on Incidents escalated by L2 team and document the resolution for future references</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Patch Administration - Selecting the Patch/Downloading/Applying/Testing for the First Time</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Review and Approve information submitted to knowledge base</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Knowledge gap analysis</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Identification of improvement opportunities</li> </ul>

#### 3.1.10.4. Assumptions

The following are the assumptions considered under messaging and collaboration:

- Incumbent to provide AD and Mail related permissions to Cognizant consultant during migration.
- In Notes Domino there are approx. 15,135 user mailboxes.

- There is ~50 TB data present in current archival solution, only these data can be considered for migration.
- Cognizant team will work in coordination with Health Net team to finalize the schedule for each migration.

### 3.1.10.5. Dependency

The following are the dependencies considered under messaging and collaboration:

- Current Lotus Notes Architecture and configuration documentation for assessment
- Access to Lotus Notes environment to Cognizant team for assessment activities
- Transfer of the email archival data to Cognizant
- 

### 3.1.10.6. Risk and Mitigations

Risks	Impact	Mitigation
Clearly defined business requirements and objectives for target platform	Medium	Cognizant would work closely with Health Net to capture the business requirements and objectives of the target platform
Loss of data and/or business continuity during migration effort	High	This is a residual risk and can be managed by good programme communication and escalation processes
Migration preparation activities will not finish on time for planned migration	High	This activity will run parallel to design, build and validate and will be placed on the critical path of the project plan

### 3.1.11. Monitoring Tools

#### 3.1.11.1. Solution Approach

Cognizant's Tools solution is designed to achieve an end state that integrates three key components of the tooling landscape, namely Service Assurance, Service Management and Service Automation. This core tooling capability is supplemented by a comprehensive reporting solution.

In order to achieve the above stated objective in the most cost efficient manner, Cognizant will use existing available tools where possible while bringing additional products to replace tools owned by incumbent that will not be available or fill the gaps in the current environment. The deployment of tools is planned in full synchronization with the data center migrations. This will ensure availability of full functionality tools platform for the data center management teams enabling them to work with effective collaboration while at the same time ensuring that there is

no impact to the existing services – irrespective of these being delivered from the existing or new data centers.

The key improvements brought about by the Cognizant solution are:

- Consolidation of multiple tools providing similar functionality in to single too wherever possible
- Full integration of all system monitoring in to a single-pane-of-view event manager acting as Manager of Managers
- Automation of ticket generation in to ServiceNow ITSM based on filtered and qualified alerts
- Integration of tools to a reporting engine enabling automated dashboard based reporting.

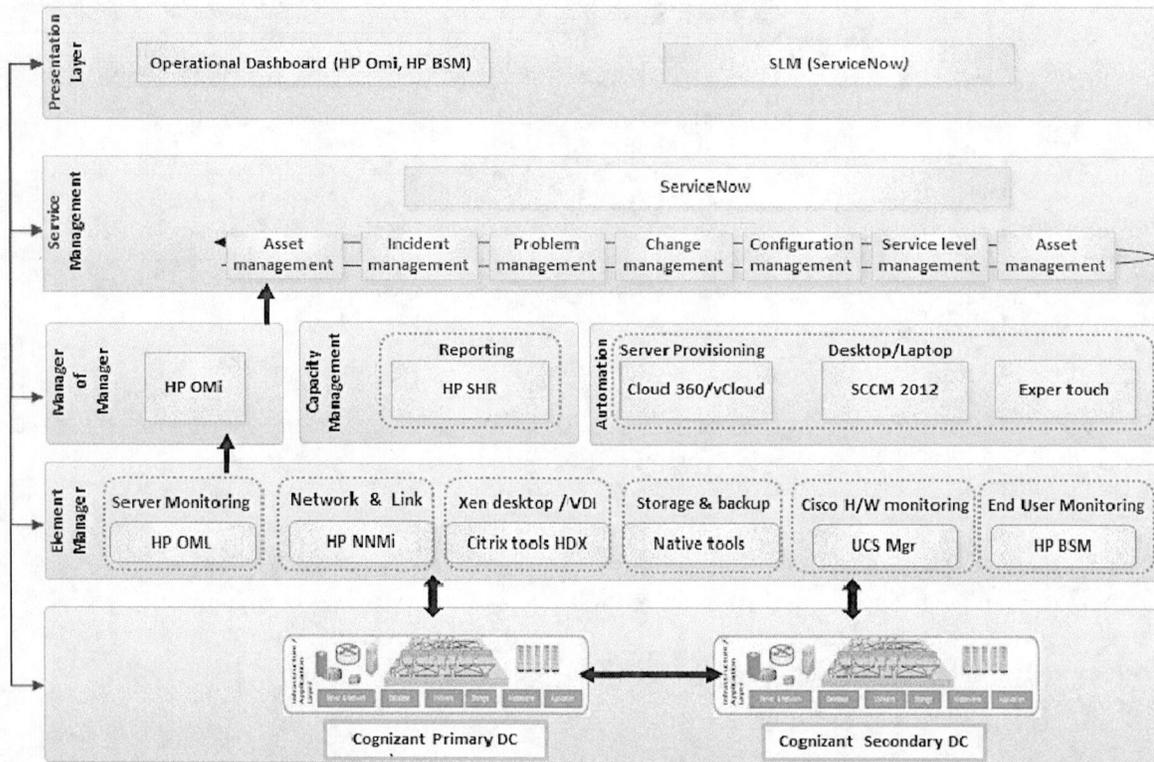

### **Solution consideration**

Scope of monitoring solution are based on following component

- 100 transactions for Business applications
- 50 URL monitoring
- System monitoring includes 2400 Primary and 675 Fail-over servers
- 1250 Network Devices
- Citrix Application instance - 194
- MS SQL Database instance- 65 Active and 30 Failover
- MS Active directory instance- 5 Active and 5 Failover
- Oracle Database instance - 320 Active and 100 Failover
- Weblogic Application instance - 400 Active and 210 Failover
- BizTalk Server instances - 15 Active and 10 Failover

### **Tool Landscape**

Cognizant's enterprise monitoring tools solution which has immense flexible and scalable architecture to support strategic requirement. Below diagram provides the overall Tools logical architecture.

**Figure: Tools Landscape**

Following table provides the details of various tools that will be deployed for monitoring application and infrastructure services.

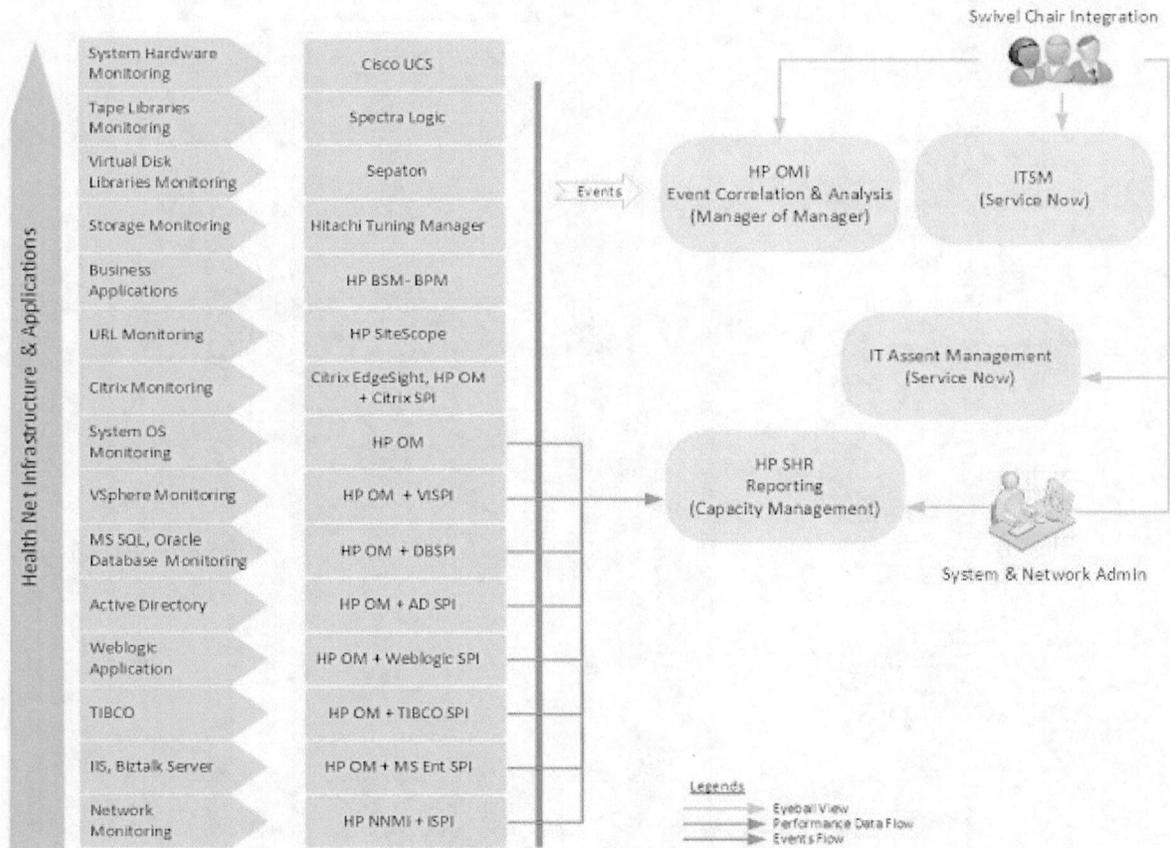

Technology	Availability Monitoring	Performance Monitoring (Used for Capacity Mgmt.)
<b>Business Applications</b>	HP BSM – BPM	HP Service Health Reporter
<b>URLs</b>	HP SiteScope	HP Service Health Reporter
<b>Operating System</b>	HP OML	HP Service Health Reporter
<b>Network Device</b>	HP NNMi	HP Service Health Reporter
<b>Physical Server</b>	Cisco UCS manager	
<b>vSphere</b>	vCenter	HP OM VSPI and vCenter
<b>Storage</b>	Hitachi Tuning Manager	Hitachi Tuning Manager

Technology	Availability Monitoring	Performance Monitoring (Used for Capacity Mgmt.)
<b>NetBackup</b>	Symantec NetBackup <i>OpsCenter</i>	Symantec NetBackup
<b>Virtual Disk Libraries</b>	<i>Delta View manager</i>	Septon
<b>Tape Disk Libraries</b>	<i>Blue scale</i>	Spectra logic
<b>VCloud Enterprise</b>	Cloud 360	Cloud 360
<b>Database</b>	Oracle Enterprise Manager (OEM) 12c	Oracle Enterprise Manager (OEM) 12c

Note: Current Sniffer Solution (NAM 2320) is applicable to the Data Center. For the remote sites, the expectation is that the incumbent will continue to support those sites with the existing Sniffer available at those sites. During Phase 2 LLD discussions and Remote Site Support transition process, additional sniffer requirement for these Sites will be assessed and planned

#### **High Level ESA Tools Solution**

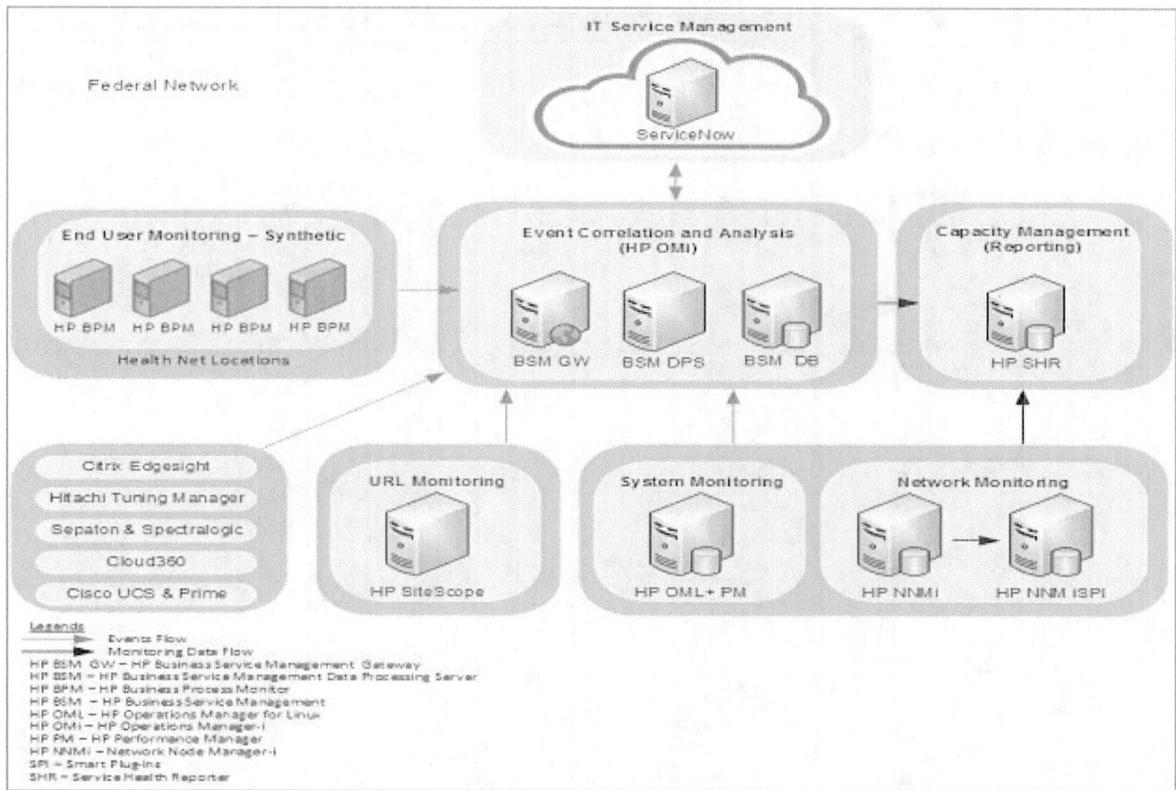

The figure below depicts the representation of the overall tools integration and IT user's operation model

**Figure: Operation Model**

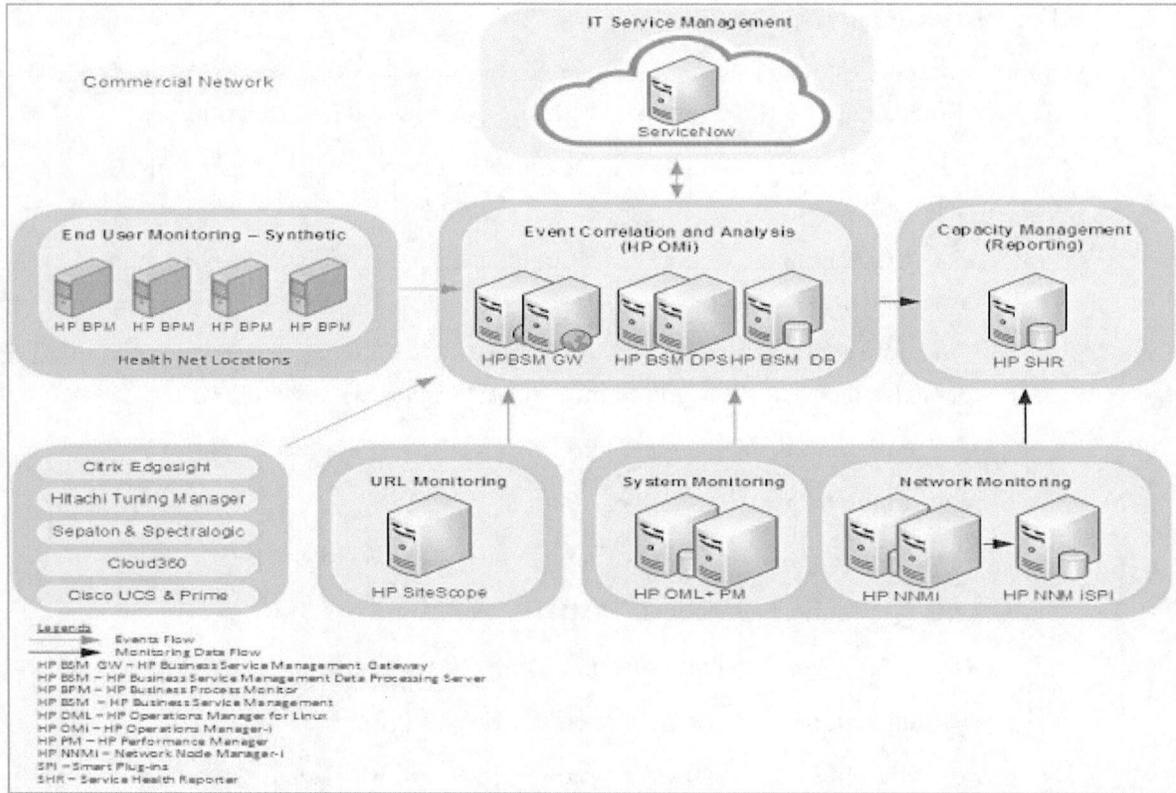

- HP tools will be integrated with HP Omi using built-in adaptors and other monitoring tools will be integrated with HP Omi through SNMP traps
- All the events from individual monitoring tools will be directed to HP Omi (MoM)
- Performance data from HP OML and HP NNM will be directed to HP Service Health Reports (includes SPI performance report)
- Cognizant's IT operations team will leverage HP Service Health Reporter to analyze Operating System, Database, Applications, Virtualization and Network performance
- HP Service Health report has a capability to capture historical data for a year to perform trend analysis

### Proposed Tools Architecture for Federal Network

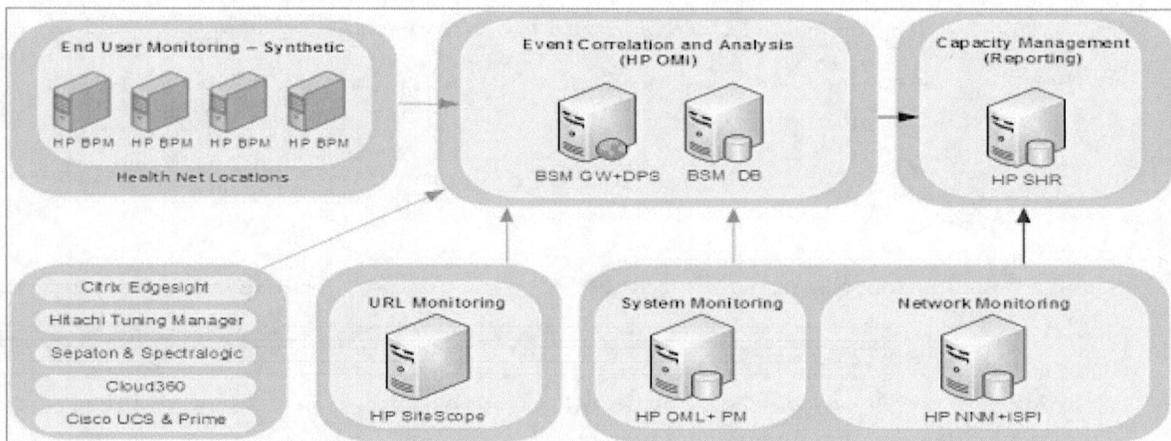

**Figure: Tools Architecture – Federal Network**

**Proposed Tools Architecture for Commercial Network**

**Figure: Tools Architecture – Commercial Network**

**Proposed Tools Architecture for Development**

**Figure: Tools Architecture - Development**

### 3.1.11.2. Service Deliverables

- Implementation of business applications from an end user perspective using HP Business Service Management – BPM module (Federal, Commercial and Development)
- System and application monitoring using HP Operation Manager for Linux (Federal, Commercial and Development)
- Following Application specific monitoring are part of Systems monitoring (Federal, Commercial and Development)
  - Oracle Enterprise Manager Cloud Control 12c, with plug-ins installed to monitor other database technologies and to implement Oracle 12c as standard
  - Database monitoring using HP OM MS SQL and Oracle Database SPI
  - Citrix monitoring using HP OM Citrix SPI
  - Weblogic Application monitoring using HP OM Weblogic SPI
  - TIBCO monitoring using HP OM TIBCO SPI
  - IIS and BizTalk server monitoring using HP OM MS Enterprise Server SPI
  - Virtualization monitoring using HP OM VSPI (vSphere)
- Network availability and performance monitoring using HP Network Node Manager and iSPI (Federal, Commercial and Development)
- Gathering and consolidation of system, network performance and business applications metrics using HP Service Health Reporter (Federal, Commercial and Development)
- Centralized Event Integration using HP OMi for element management systems or domain tools (HP OML, HP NNMi, Citrix Edge sight, Hitachi Tuning Manager, Sepaton, Spectralogic, Symantec NetBackup, Cloud360, Cisco UCS manager and vCenter)
- Event Correlation and Analysis tool (HP OMi) integration with IT Service Management (ServiceNow) using Applink adapter
- IT Operation End user Training in HP BSM

### 3.1.11.3. Steady State Support Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>▪ 24X7 Onshore support               <ul style="list-style-type: none"> <li>▪ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>

Solution	Description
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore</li> </ul>

### Tools Support Services

Tools support services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>Tools Support Team</i>	<ul style="list-style-type: none"> <li>▪ Support tools environment</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Configure and troubleshooting agents in new environment</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Monitoring and tuning the alert parameters</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Analysis, reduction event correlation, suppress duplicate alerts</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Report preparation and analysis</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Automatic trouble ticket generation for error conditions</li> </ul>

#### 3.1.11.4. Assumptions

The following are the assumptions considered under monitoring tools:

- Proposed effort are limited to out of box implementation and no customization
- Separate Element Managers and Event Correlation analysis solutions for Federal and Commercial network
- Prototype for each monitoring components will be configured in development stage
- Assuming VMware environment is designed with Vmotion for HA
- Solution designed in High availability for Commercial network considering the inventory distribution

#### 3.1.11.5. Dependency

The following are the dependencies considered under monitoring tools:

- Active Directory support team's involvement is required to integrate Active Directory and Key monitoring tools like HP SHR, HP OMi (but not limited to) to manage the user access

#### 3.1.11.6. Risk and Mitigations

- Non availability of Health Net locations to deploy synthetic monitoring probes

### 3.1.12. VoIP

#### 3.1.12.1. Solution Approach

##### Guiding Principles

The VoIP program strategy is being designed around certain key principles as mentioned below, which aims to minimize the business impact, and improve efficiency of the Voice solution. The Cognizant's solution is balanced and aligned to meet Health Net's goals and objectives.

- The target architecture to be designed needs to accommodate the existing solution, capacity and future growth
- The program strategy to be designed with minimal service disruption to Health Net customers as well as internal IT users during and after the exercise
- To meet regulatory / non-regulatory and Federal compliance requirements
- The design shall incorporate disaster recovery solution
- The assessment phase will be comprehensive and designed to understand the known, and account for unknown details of the current landscape.
- Opportunities to improve the efficiency of the VoIP environment in terms of cost, open, secure, and easy to use, to improve productivity, efficiency and end user experience.

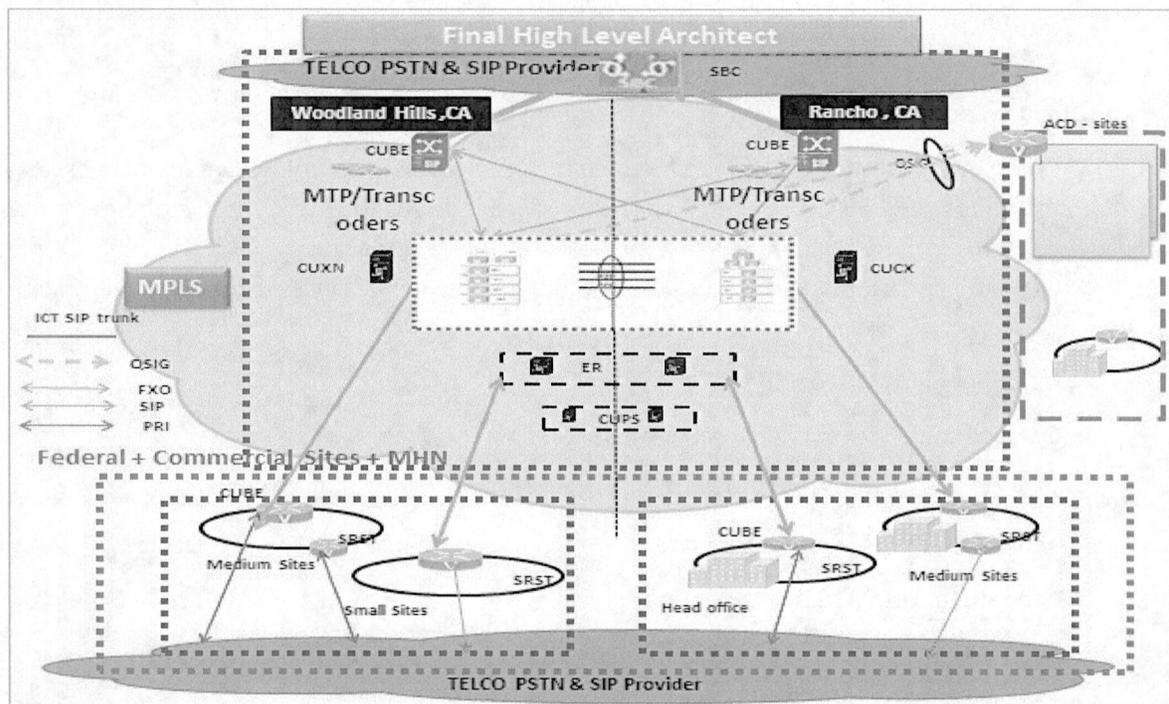

Cognizant proposes to host VoIP infrastructure in Health Net's location (Woodland hills, Rancho Cordova) using Cisco UCS C series servers to meet the Health Net Federal and commercial requirements.

##### Solution highlights

- Redundant Cisco Unified Communications system for approx. 9,000 end users and ready for future expansion.
- Capable to provide centralized SIP trunking for long distance
- Cisco Unity Connection voicemail for approximately 10000 end users
- CER platform for enhanced E911 compliance.
- Local fallback (SRST) for 911 and outbound calling during WAN failures
- Monitoring with cisco prime collaboration.
- Ability to integrate with the 3rd party applications over industry standard protocols.
- Phase out the existing voice infrastructure and legacy PBX system
- Ability to interact with existing Contact Center
- Capable to provide logical separation for Federal and Commercial verticals.
- Cognizant managed Services with 24x7 dedicated support model

Solution approach starts with a detailed assessment followed by design, build, pilot, migration and testing phase. During the design phase all the foundational UC dependencies, site specific design requirements and final high level design will be agreed upon. The server infrastructure will be built in Woodland Hills and Rancho Cordova locations, followed by UC implementation phase will begin. Prior to cutting over any Health Net site, Cognizant will run a pilot phase and will test call functionality with test phones and temporary directory numbers at the customer provided site. Voicemail functionality, including unified messaging and survivable remote site telephony will be tested as well. After successful completion of pilot phase the implementation of all other Health Net sites will be started according to the scheduled migration plan.

The following sections detail VoIP architecture solutions.

**Figure: High Level Architecture**

### Target state Architecture

Based on business and technical requirement the following solution components are proposed.

- CUCM 1 Cluster (Rancho and Woodland)
  - 8000 (Basic Users) + Diverse Users
    - Publisher (1)
    - 2 MOH and 2 TFTP servers
    - Subscribers for Call Processing (8)

- Unity Cluster (pub, sub)
- Jabber servers
- CER Cluster (1 publisher 1 subscriber) (9500 users)
- CUBEs (centralized SIP trunk for Long Distance)
- Remote TDM Sites Voice gateways (2911 and 2951)/SRST
- Analog Gateway (500 analog connections)
- 7942 (4000) and 7962 (1000) phones
- Centralized SIP Trunk : As per Cognizant understanding at this phase ,centralized PRI terminating at Rancho and Woodland will be migrated to SIP trunks with geographical redundancy and remote sites digital trunks will be replaced to SIP trunks at later stage under.

### Monitoring Tool

Cisco Prime Collaboration helps enable rapid installation and maintenance of Cisco Unified Communications and Cisco Telepresence components as well as the provisioning of users and services. Cisco Prime Collaboration also provides historical reporting of key performance indicators and enables IT network managers to analyze trends for capacity planning, resource optimization, and quality of service.

#### 3.1.12.2. Service Deliverables

Below section details the deliverables:

- Design, Build and Support CUCM infrastructure
- Refresh the Existing VoIP Platform
- Migrate the TDM phone to VoIP
- Implement the Monitoring tools

#### 3.1.12.3. Steady State Support Deliverables

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / offshore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Offshore/Onsite (Non-federal) with on call</li> <li>▪ 24X7 Onshore support               <ul style="list-style-type: none"> <li>▪ 8x5 dedicated support – Onsite (Federal) with the rest on call</li> </ul> </li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Health Net Offices</li> <li>▪ Offshore – Bangalore / Coimbatore</li> </ul>

L1 Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<b>L1 Team</b>	▪ Perform incident analysis
	▪ Perform initial troubleshooting to determine the nature of the issue
	▪ Fault monitoring of Unified Communication Manager (Up-Down Status monitoring)
	▪ Create ticket and log all troubleshooting steps performed
	▪ Performance statistics monitoring of Unified Communication Manager
	▪ Escalate unsolved issue to Level -2
	▪ Trunk link issues - Co-ordination efforts with vendors
	▪ Extension assignment - MACD for phones
	▪ Configuring Feature Access Codes
	▪ Configuring Authorization codes
	▪ Maintaining the Extension and Trunk inventory
	▪ Basic Trunk trouble shooting (D-Channel status check)
	▪ Direct call handling from Health Net – Service request
	▪ Daily Check list monitoring for Site

## Level 2 Services

L2 Services will be provided in accordance with the procedures documented in the SOPs and will include:

<b>L2 Team</b>	▪ Perform intermediate issue analysis and resolution
	▪ Configuring Trunks - T1-E1, Analog, IP
	▪ Respond to critical monitoring alerts
	▪ Generate articles and issue resolution scripts
	▪ Configuring Dial-peers
	▪ Hunt group configurations
	▪ Escalate unsolved ticket to L3 team or appropriate technology owner
	▪ Configuring L2/L3 QOS at Communication Manager, Gateways and LAN/WAN devices
	▪ Troubleshooting PSTN, Inter Trunk calls issues
	▪ Troubleshooting endpoints/gateways/gatekeeper registration
	▪ Analyzing the performance logs for any errors or degradation of service
	▪ Maintain Unified Communications architecture maps and relevant documents

<b>L3</b>	<ul style="list-style-type: none"> <li>▪ Working with OEM/3rd party vendors for problem resolution and break fix resolutions</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Access rights (TACACS etc.)</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Project configuration and deployment rollout assistance</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Prepare documentation of known errors and KEDB</li> </ul>

### Level 3 Services

All unknown / new errors and problems will be resolved by L3 VoIP Support group. This team will work with Vendors when required.

<b>L3 Team</b>	<ul style="list-style-type: none"> <li>▪ Maintains network architecture documentation</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Perform advanced issue analysis and resolution</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Perform maintenance and environment upgrades</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Addressing high severity issues and service outages</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Maintain the configurations and configuration backup</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Performing Communication Manager upgrades and fixing bugs in co-ordination with TAC</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Capacity Management - Providing recommendations and suggestions</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Historical trend analysis / Performance analysis</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Unified Communications Planning</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Advanced problem troubleshooting with detailed root cause analysis</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Advanced Unified Communications Design Assistance</li> </ul>
	<ul style="list-style-type: none"> <li>▪ HA and DR Support</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Root cause analysis for Communication Manager issues</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Ensuring 3rd party vendor contracts and warranties are up-to-date and renewed in time</li> </ul>
<ul style="list-style-type: none"> <li>▪ Service Level Management</li> </ul>	

#### 3.1.12.4. Assumptions

The following are the assumptions considered under VoIP:

- Existing TDM configuration details, extension, feature reports and integration configurations will be provided by existing vendor/Health Net.
- Existing CUCM configuration details, extension, feature reports and integration configurations will be provided by existing vendor.
- Network configuration such as DHCP, Subnets, Routing, QoS, VLAN, Port configuration, etc. will be provided by existing vendor.

- ACD/ IVR integration details to be provided by existing vendor. Cognizant has not factored any effort or hardware requirement for the integration.
- Total 2500 VoIP and 5500 TDM users
- Existing VoIP sites will use same voice gateways, VG224, ATA and IP Phones.
- Total of < 500 users would be using jabber
- Adequate bandwidth is available at Health Net Offices and branch locations to support voice traffic. Additional bandwidth / QoS requirement will be provided after the Assessment phase.
- Health Net has the required VPN solutions compatible for teleworkers end devices e.g jabber client or 79XX phones and no additional Cisco HW/SW needed for this secure connectivity
- Adequate bandwidth is available between Woodland Hills and Rancho Cordova to Health Net MPLs.
- Any new item or requirement identified during assessment phase shall be estimated separately on mutual agreement with Cognizant and Health Net.

#### 3.1.12.5. Dependency

The proposed solution depends on the accuracy of the required information like:

- Enterprise dial plan development (proposed by Cognizant after discovery phase)
- Site specific DID number to be ported / repointed schedule.
- Site survey and site readiness
- Analog needs
- Access Layer Cabling
- Network health
- Incumbent vendors availability for Network configuration changes and testing (L2/L3 QoS )

#### 3.1.12.6. Risk and Mitigations

Below tables describes the various risks and their mitigation.

Risk type	Risk	Mitigation Plan
Licenses	Non-availability of Software and their Licenses	<ul style="list-style-type: none"> <li>▪ Cognizant will explicitly highlight the pre-requisites in relation to Software for executing the project before the start of the project</li> <li>▪ Cognizant has considered adequate licenses based on the count given during the RFP/requirement understanding</li> </ul>

Risk type	Risk	Mitigation Plan
<b>Dependency</b>	Delay in User inputs	<ul style="list-style-type: none"> <li>▪ Health Net to assist in getting adequate user inputs to enable timely resolution of issues</li> </ul>
<b>Documentation</b>	Site documents are not detailed or not updated	<ul style="list-style-type: none"> <li>▪ Early identification of documentation required</li> <li>▪ Documenting all information from direct interactions with SMEs, System administrators and end users for problem areas and Common user requirements</li> <li>▪ Utilize best practice checklists to capture knowledge that is not documented</li> <li>▪ Recording site changes since document update date</li> <li>▪ Perform a detailed system analysis and site surveys for site specific configuration and customization and document it</li> </ul>

### 3.1.13. Thin Client

#### 3.1.13.1. Solution Approach

##### Guiding Principles

Thin Client implementation is a transformation program which will transform the Health Net End user computing devices to from Laptops and Desktops to Thin Clients.

- Assessment phase will be comprehensive and designed to understand the known, and account for unknown details of the current landscape.
- Opportunities to improve the efficiency of the Desktop environment in terms of cost, open, secure, and easy to use, to improve productivity, efficiency and end user experience.

##### Solution highlights

Cognizant proposes to use Thin client which will connect to the Citrix Xen Desktops for end users. Cognizant currently assumes a total of 3300 users can be migrated to Thin client platform, this will be validated during the assessment phase.

Thin Client rollout will be a phased approach as described below.

##### A. Assessment Phase

- Identify end users work function and form functional groups
- Identify Thin client devices which meets end user needs

##### B. Pilot Phase

- Rollout Thin client for identified pilot groups

##### C. Build Phase

- Rollout plan Thin Client to identified users based on Department, location and user functions

##### D. Implementation Phase

- Deploy Thin clients to end users based on roll out plan
- Support users migrated to Thin client

#### **3.1.13.2. Service Deliverables**

Below section details the deliverables:

- Design and build the Thin client environment
- Implement and rollout Thin client to end users
- Support end user issues post migration to Thin Client
- Hand off to steady state support team

#### **3.1.13.3. Assumptions**

The following are the assumptions considered under Thin Client

- Health Net end users primary use physical laptops/desktops
- Citrix XD VDI to be provisioned for use with Thin client
- Sites with less than 100 users are referred as Remote sites and will be considered Thin client only sites
- Other locations will be combo sites with Desktops, Laptops & Thin clients as applicable
- Any new item or requirement identified during assessment phase shall be estimated separately on mutual agreement with Cognizant and Health Net.

#### **3.1.13.4. Dependency**

Below are the dependencies from Health Net for the Thin Client implementation

- VMWare, Windows and Citrix Xen Desktop licenses for building the infrastructure to host VDI
- Network bandwidth between Centennial/Phoenix and Health Net locations-Rancho Cordova, Woodland Hills, other remote locations to accommodate the VDI traffic
- Procurement of Thin client devices by Health Net for roll out
- Health Net end user function and computing requirements

**3.1.14. Service Desk**

**3.1.14.1. Solution Approach**

Cognizant will logically separate the Federal and Commercial service desk and will use ServiceNow ITSM tool.

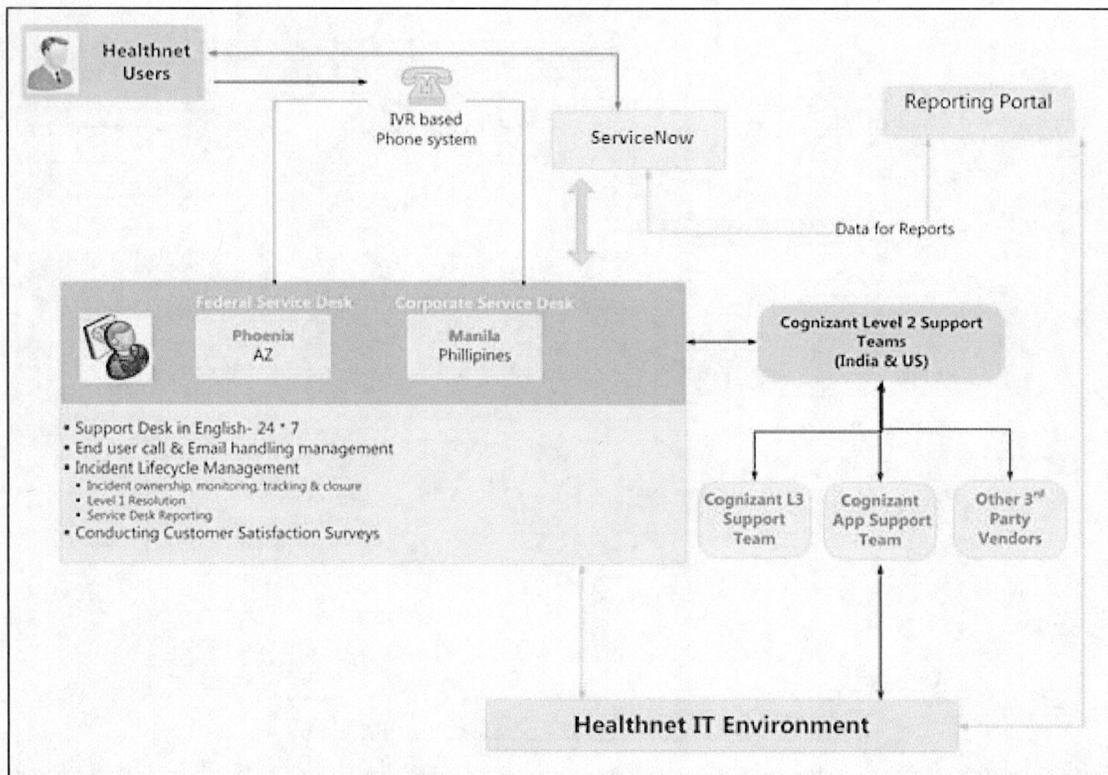

- As the Transition waves will go live, Cognizant will start picking up the respective support using ServiceNow ITSM tool.
- By the end of the Transition, Cognizant will use ServiceNow ITSM tool and will go live for end users covering both ITO and BPaaS groups of end users

Use case	Specifications & Activities
<b>Service Desk</b>	<ul style="list-style-type: none"> <li>▪ Single and first point of contact for all IT issues</li> <li>▪ Taking calls and handling incidents or service requests</li> <li>▪ Log all incidents / service request details, allocate categorization and prioritization codes</li> <li>▪ First line investigation and diagnosis</li> <li>▪ Escalate incidents / service requests</li> <li>▪ Inform users of progress, impending changes or outages</li> <li>▪ Track open, escalated issues to closure</li> <li>▪ Maintain regular communication to stakeholders during the incident lifecycle</li> <li>▪ Run Book automation</li> </ul>

**Solution Consideration**

- Logically separated Service Desk the Federal and commercial users
  - Federal Service Desk will be handled from Phoenix, AZ
  - Commercial Service desk services from Manila , Philippines
  - Separate IVR queue for Federal/Commercial queries/ issues
- Sized for 13800 contacts (calls/email/web request) per month with 20% for Federal and 80% for commercial
- 90% of the Contacts are during the Weekdays and 10% during weekends.
- Average call handling time (AHT) is 6mins
- Call Abandon rate is < 5%

- Users dial the In-country Toll Free / Toll number and Health Net identification Code to reach the service desk agents.

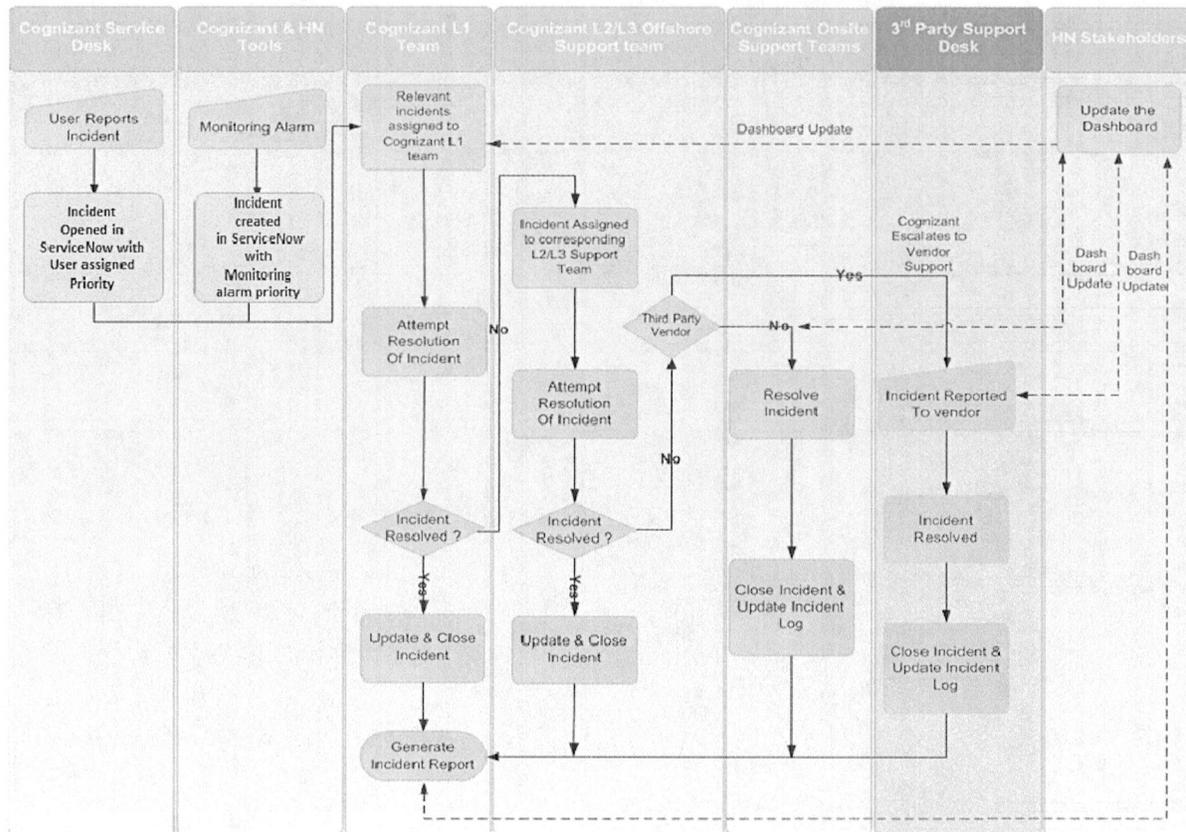

**Figure: Delivery Model – Service Desk**

**Ticket Flow**

Cognizant sees the interaction of our delivery team with the following Health Net 3rd party vendors for day to day operations:

- End User device leasing vendor
- Various Software/ hardware /applications/ tools vendors

Cognizant is well versed with working with multiple such stakeholders across engagements and will employ the best practices evolved over the years. The following is the typical incident management process when 3rd party vendor is involved.

**Figure: Ticket Handling**

Considering the multitude of vendors, Cognizant will also look at a model in which the individual vendor tickets are tracked to closure by the incident managers.

**VIP User Handling**

If an Incident compromises the availability or delivery of an enterprise service to Health Net’s VIP users, whether or not such service is subject to a service level, the Incident may, on the instruction of nominated users be classified as having a “high” urgency. Cognizant service desk will have a group of agents who will be specially trained to handle Health Net VIP users. Also the ServiceNow ticketing tool will be configured and customized to identify Health Net VIP users. The scope of support will be end to end ownership of calls/incidents. Cognizant will obtain the VIP list during the Transition stage and start acclimatizing its resources on the users, processes, involved support groups, etc.

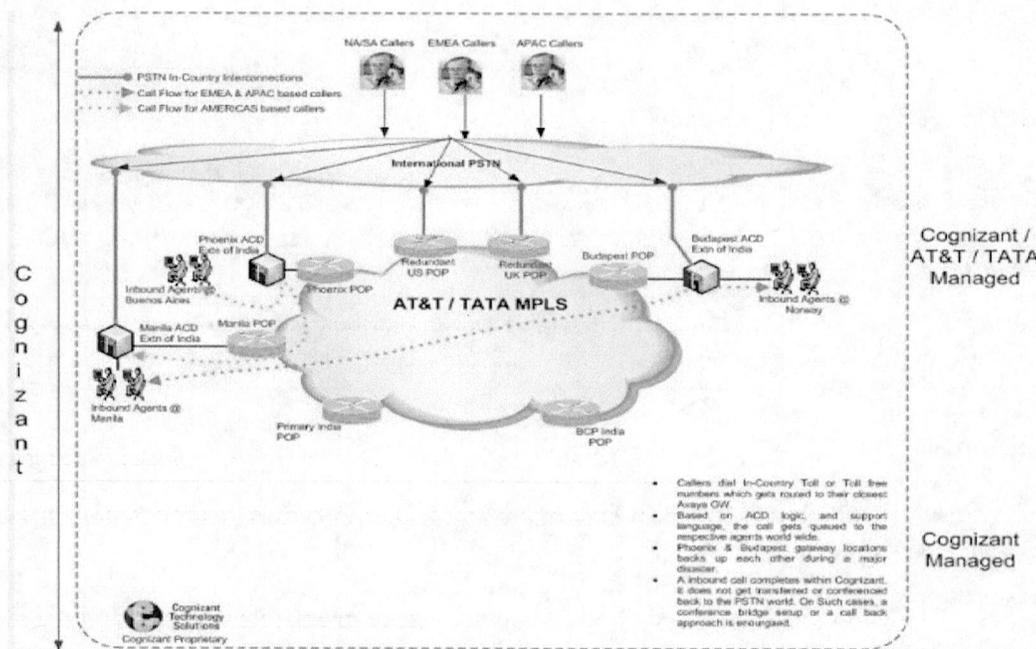

**Cognizant Voice Integration Solution**

Cognizant has a well-established Global Shared Voice infrastructure framework which is used for providing Service Desk support to various customers by leveraging our MPLS cloud. Cognizant will leverage the same infrastructure to deliver Service Desk support to Health Net.

Cognizant’s voice infrastructure consists of Avaya Multivantage PBX as an ACD switch and AT&T EVPN Network for connectivity. It also includes IVR and Avaya S8700 as the media server for the ACD functioning with communication manager ver. 2.0 loaded with the elite call center features.

Cognizant will leverage the existing external (Toll Free) number for Health Net users to contact the Service Desk. Health Net users can dial the external numbers which will get routed to the nearest Avaya Gateway. We will manage and ensure that all end-user calls are successfully routed to the closest Cognizant POP.

- All calls coming in from Health Net locations will be collected and routed to the nearest ACD (via the nearest POP).
- From there, the calls will be internally routed to the Service Desk located in different Cognizant proposed premises.
- There is a Customer Specific Code (CIC) for accessing IVR/ACD by end users calling Service Desk.
- Cognizant has high availability voice architecture and calls will be delivered to the nearest Avaya GW.

**Figure: Call flow for Internal and External User**

**Call Routing Procedure**

Initially the call will connect to Cognizant's Root IVR. Based on the Customer Identification Code (CIC), the authentication call will be directed to the Health Net specific IVR. The ACD configuration call will also be delivered to Cognizant's agents across locations. The following shows the process through which the customer will connect to Cognizant's Service Desk agents:

- End customer will dial internal or external numbers
- Select the Customer Identification Code for authentication (CIC code)
- Call will be directed to Health Net specific IVR
- Based on the IVR options end user will reach Cognizant's Service Desk agents

### Advantages of Cognizant's Shared Voice Infrastructure

- Authentication is based on CIC, which is customizable
- Cost effective setup
- Additional locations can be on-boarded with minimal setup

#### 3.1.14.2. Service Deliverables

Service deliverables for the service desk are the service desk solutions for BPaaS and ITO users.

#### 3.1.14.3. Steady State Support Deliverables

Below section details the steady state support deliverables.

Solution	Description
<b>Solution Highlights</b>	<ul style="list-style-type: none"> <li>▪ A dedicated onsite / near shore delivery team performing all in-scope activities</li> </ul>
<b>Support Coverage</b>	<ul style="list-style-type: none"> <li>▪ 24x7 dedicated support – Near shore ( Commercial)</li> <li>▪ 24x7 dedicated support – Onsite (Federal)</li> </ul>
<b>Delivery Location</b>	<ul style="list-style-type: none"> <li>▪ Onsite - Phoenix(US)</li> <li>▪ Near-shore – Manila;</li> </ul>

Support Services will be provided in accordance with the procedures documented in the SOPs and will include the following:

<i>Support services (L1)</i>	<ul style="list-style-type: none"> <li>▪ First point of contact for end users</li> <li>▪ Accept inquiries - telephone calls/e-mail/web-based from end users</li> <li>▪ Provide Level 1 problem resolution for all applications/systems and hardware</li> <li>▪ Attempt to resolve incoming calls during first customer contact</li> <li>▪ Notify appropriate management and escalate according to</li> </ul>
------------------------------	--

<i>Support services (L2 )</i>	<p>escalation matrix</p> <ul style="list-style-type: none"> <li>▪ Record the history of the problem in the problem tracking system</li> <li>▪ Update the problem ticket and communicate the status to users</li> <li>▪ Follow up with users after resolution to close out the service request</li> <li>▪ Monitor progress of incident resolution by third parties and update ticket status</li> </ul>
	<ul style="list-style-type: none"> <li>▪ Respond to, investigate, and resolve incidents initiated as a result of monitoring alarms at monitored sites</li> <li>▪ Resolve incidents escalated from Level 1 or escalate to Level 3 if unresolved</li> <li>▪ Act as liaison to OEMs and other third-parties</li> <li>▪ Monitor the implementation of the patches and upgrades and communicate to the user community as required</li> <li>▪ Make updates to the CMDB once the Change Request is completed</li> <li>▪ Collect and report monthly data on incoming call statistics and ticket volumes</li> </ul>
<i>Support services (L3 )</i>	<ul style="list-style-type: none"> <li>▪ Fulfill incident resolution activities for assigned incidents</li> <li>▪ Coordinate with Level 4 support or the OEM to resolve the incident when necessary</li> <li>▪ Provide resolution to problems as part of problem management, working together with Level 4 support when necessary</li> <li>▪ Document and maintain processes, standards, methods and procedures and continuously look for improvements</li> <li>▪ Investigate and address customer concerns or complaints regarding provision of the services</li> <li>▪ Report issues to customer management</li> <li>▪ Providing general assistance to Level 1 and Level 2 analysts</li> </ul>

#### 3.1.14.4. Assumptions

The following are the assumptions considered under service desk:

- Leverage Health Net proposed ITSM tool ServiceNow for ticketing
- Outbound calls volumes <= 20% of overall contact volume
- Support shall be provided in English language
- Out of the total contacts 75% of contacts are assumed to be by phone, 22% by Email and only 3% of contacts by chat
- Service desk team shall use ServiceNow ticketing tool for incident recording.

#### 3.1.14.5. Dependency

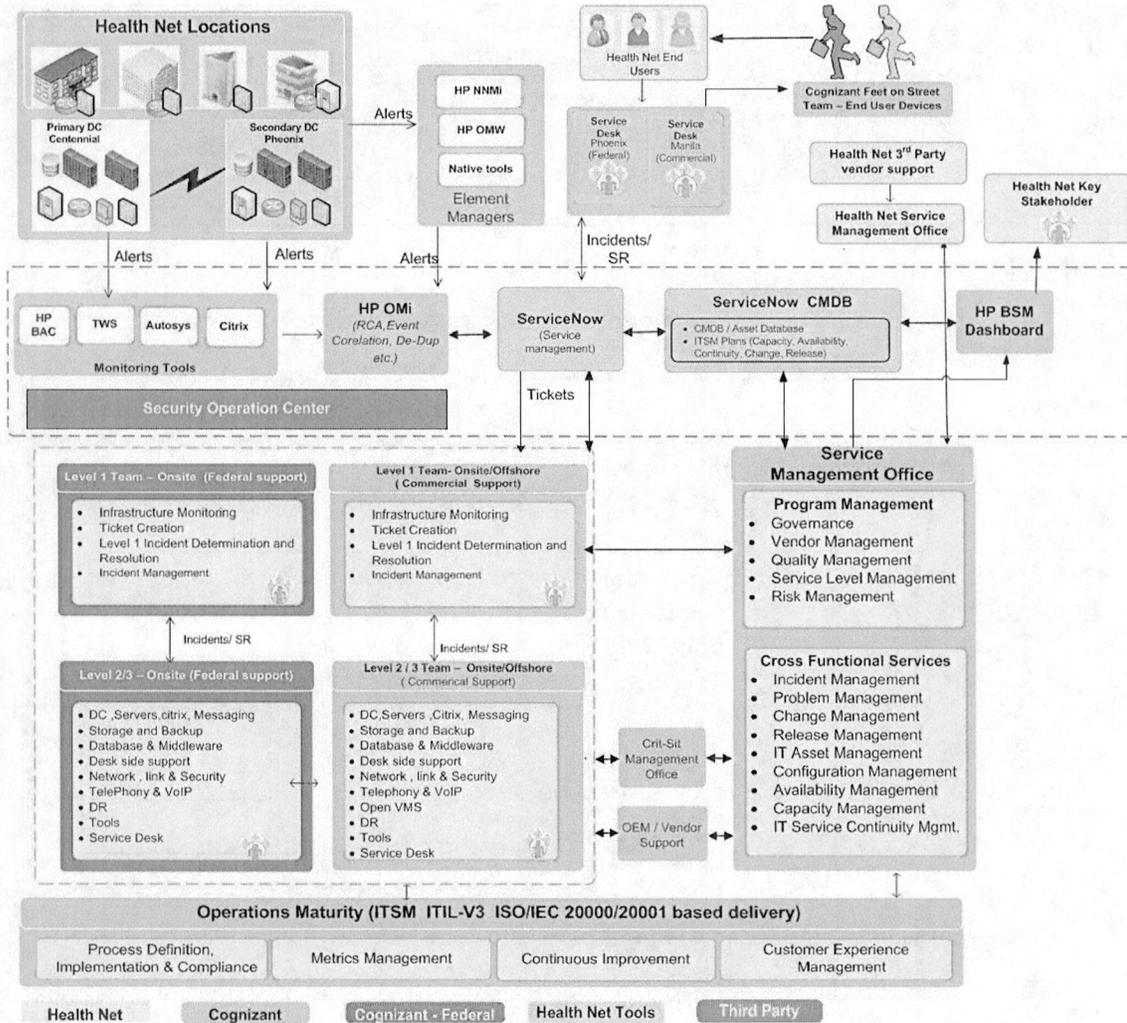

The following are the dependencies considered under service desk:

- ServiceNow ITSM tool implementation

### 3.2. ITO Service Delivery

Cognizant has configured an end to end ITO solution for supporting its applications by hosting the infrastructure as well as managing the services and the assets. The overall delivery will be ITIL framework based providing improved operational services. Cognizant will deploy dedicated team will comprise of Federal and Commercial resources. While Commercial resources will not be shared to Federal, the Federal resources will be shared to Commercial in order to realize efficiencies depending on the nature of activities to be performed. In this model, Cognizant will execute majority of the tasks from an offshore location, while activities requiring an Onsite physical presence to support the federal environment will be executed from the Onsite locations (Health Net facilities for Desk side support, Federal and Commercial environments, both will be supported from Onsite). ITO Services (such as, remote infrastructure services) will be delivered primarily from Cognizant's Offshore delivery centres in India. All Cognizant's Federal resources are US citizens and will undergo a clearance by NACLIC. The Data Centre will be certified for DIACAP and NIST controls.

Below diagram depicts the Target Operating Model and Cross Functional Services.

**Figure: Target Operating Model and Cross Functional Services**

The following table details the association of Cognizant’s affiliates, subcontractors and managed third parties.

Affiliates, Subcontractors and Managed Third Parties	Services Provided	Locations
AT & T	<ul style="list-style-type: none"> <li>▪ P2P and MPLS Link Management</li> </ul>	
Cisco	<ul style="list-style-type: none"> <li>▪ Server Hardware Maintenance Support</li> <li>▪ Network Devices Maintenance</li> </ul>	NA

Affiliates, Subcontractors and Managed Third Parties	Services Provided	Locations
	Support	
Hitachi	<ul style="list-style-type: none"> <li>▪ SAN, HDI &amp; NAS Maintenance Support</li> <li>▪ Sepaton , Tape Library Maintenance Support</li> </ul>	NA
HP	<ul style="list-style-type: none"> <li>▪ HP Tools Software Maintenance Support</li> </ul>	NA
Latisys	<ul style="list-style-type: none"> <li>▪ Datacenter Colo services</li> <li>▪ Facility Services</li> </ul>	Centennial
WWT	<ul style="list-style-type: none"> <li>▪ Professional services for VoIP implementation</li> <li>▪ Hardware procurement and physical Logistics, Integration and deploying</li> </ul>	Centennial and Phoenix

### 3.2.1. Delivery Location and Organization

- Commercial IT Service Desk location is based out of Manila, Philippines.
- Primary Onsite Delivery locations will be based out of Health Net's Rancho Cordova and Cognizant's Global Delivery Centre in Phoenix (Federal IT Service Desk).
- Primary Offshore Delivery locations will be based out of Cognizant's Global Delivery Centres Bangalore (India) and Coimbatore (India) locations.

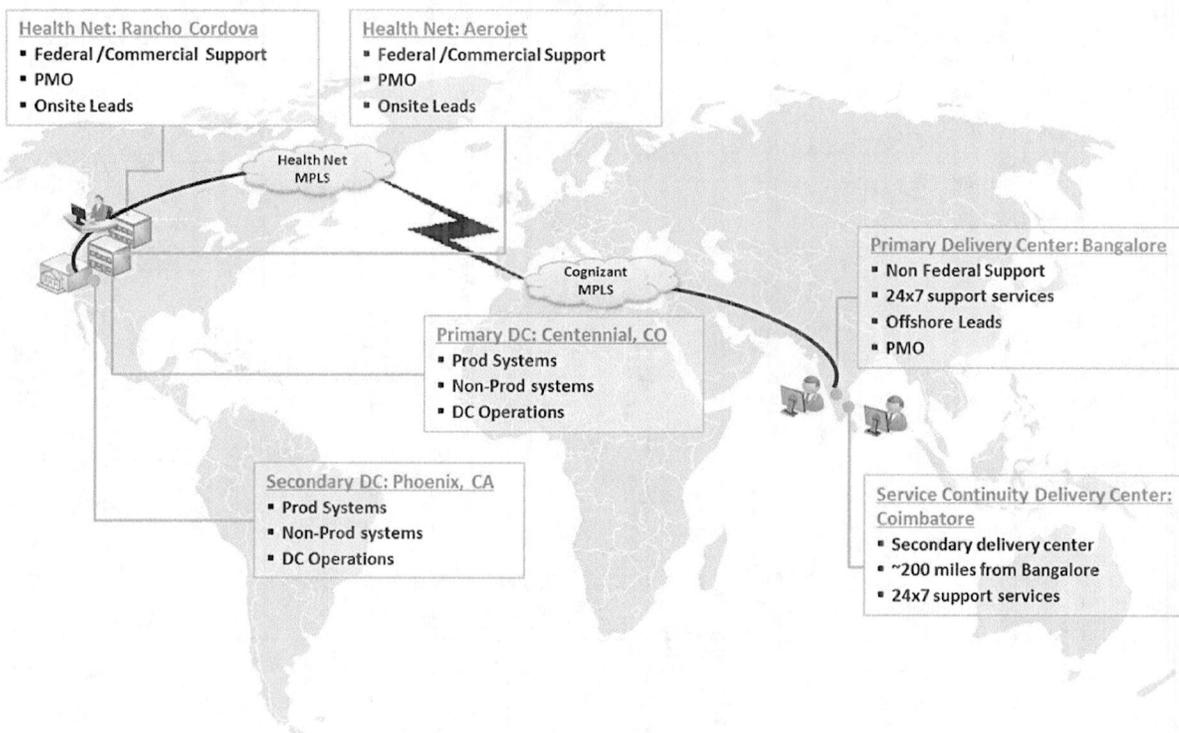

The following table details the Service Delivery locations.

Location	Primary Location	Backup / Failover Location	Services/Platform
Health Net Onsite Location Rancho Cordova, USA	●		<ul style="list-style-type: none"> <li>▪ Primary Onsite Delivery Centre</li> <li>▪ L1, L2 &amp; L3 support for Foundation Services &amp; Use cases</li> </ul>

Location	Primary Location	Backup / Failover Location	Services/Platform
Health Net Onsite Location Woodland Hills, USA		●	<ul style="list-style-type: none"> <li>▪ Backup/failover Onsite Delivery Centre</li> <li>▪ L1, L2 &amp; L3 support for Foundation Services &amp; Use cases</li> </ul>
Cognizant Location Phoenix, USA	●		<ul style="list-style-type: none"> <li>▪ Secondary Onsite Delivery Centre</li> <li>▪ DC Hosting and DR</li> <li>▪ Facility Service</li> <li>▪ 24/7 Service Desk for Federal</li> </ul>
Latisys Location Centennial, USA	●		<ul style="list-style-type: none"> <li>▪ Latisys DC Hosting</li> <li>▪ Facility Service</li> </ul>
Cognizant Location Manila, Philippines	●		<ul style="list-style-type: none"> <li>▪ 24/7 Service Desk for Commercial</li> </ul>
Cognizant Location Cebu, Philippines		●	<ul style="list-style-type: none"> <li>▪ 24/7 Service Desk for Commercial</li> </ul>
Cognizant Location Bangalore, India	●	●	<ul style="list-style-type: none"> <li>▪ Primary Location Services                             <ul style="list-style-type: none"> <li>○ Primary Offshore Delivery Centre</li> <li>○ L2 &amp; L3 support for Foundation Services &amp; Use cases</li> </ul> </li> <li>▪ Backup Location Services                             <ul style="list-style-type: none"> <li>○ L1 support for Foundation Services &amp; Use cases</li> </ul> </li> </ul>
Cognizant Location Coimbatore, India	●	●	<ul style="list-style-type: none"> <li>▪ Primary Location Services                             <ul style="list-style-type: none"> <li>○ Secondary Offshore Delivery Centre</li> <li>○ L1 support for Foundation Services &amp; Use cases</li> </ul> </li> <li>▪ Backup Location Services                             <ul style="list-style-type: none"> <li>○ L2 &amp; L3 support for</li> </ul> </li> </ul>

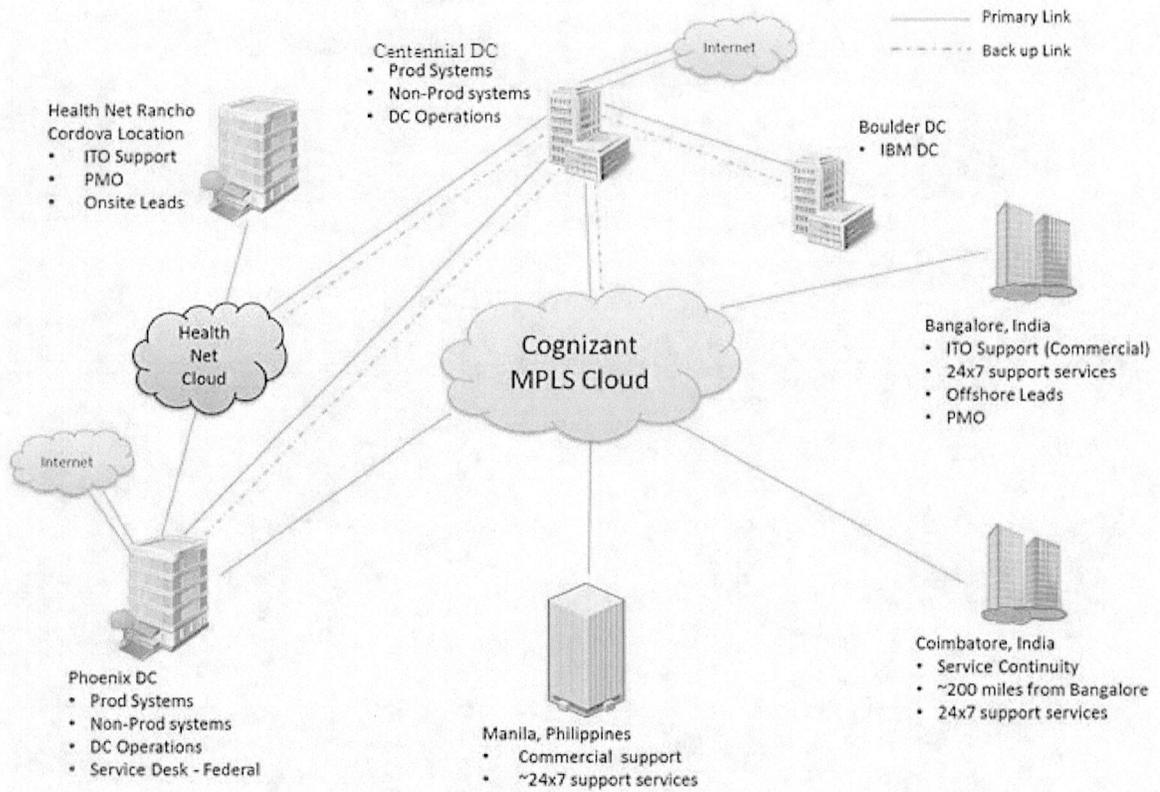

Location	Primary Location	Backup / Failover Location	Services/Platform
			Foundation Services & Use cases

The global overview of the delivery locations is as shown below:

**Figure: Onsite and Offshore Global Delivery Centres**

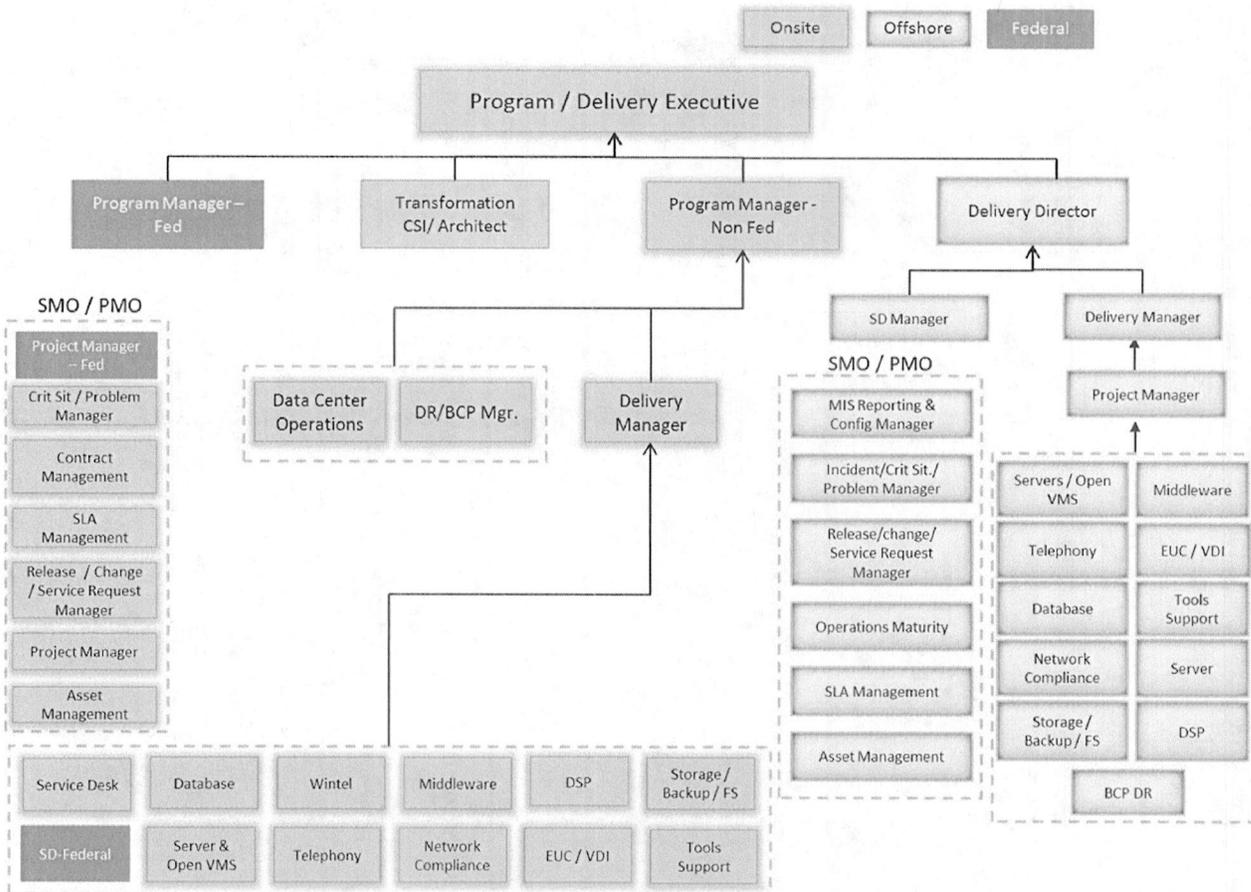

The network connections are as shown below:

**Figure: Network Connectivity Diagram**

**Organization**

Below diagram illustrates the organizational structure for this Health Net engagement.

**Figure: Organizational Structure**

**3.2.2. Service Management**

The ITO environment will follow the support process of an ITIL framework with greater participation in operations and governance directly interacting with Health Net. Both the ITO and BPaaS services are built upon common foundation layer and there will be similarity in terms of the support processes involved (ITIL). Cognizant’s approach is to move services delivered to Health Net to a more standardized, process- based delivery model, thereby enabling consistency in approach. One of the major components of the solution which will drive consistency in operations and cross-functional processes will be the Cognizant Service Management Office (SMO). Cognizant’s ITIL Process Framework is based on ITIL V3 framework and ISO 20000 standards which comprise of the ITSMF and ISO 9000 requirements for IT infrastructure projects. The Quality System provides a comprehensive process framework with standard procedures, guidelines, templates and checklists as depicted in the following sections addressing various service offerings. It covers all aspects of Cognizant’s Service Support and Service Delivery.

Cognizant will be submitting Integrated Service Process and Service Integration Documentations for Health Net Review to avoid redundancy and to ensure the completeness of its services across all Service Towers (BPaaS, IO and AO).

**Business Continuity/Disaster Recovery:** Cognizant will establish a BCP function to provide the following key capabilities designed to meet regulatory and customer requirements for uninterrupted service and effective strategies for backup and restoration:

- Inventory all applications and identify Restore Time Objectives (RTO) and Recovery Point Objectives (RPO).
- Ensure appropriate procedures and infrastructure is in place to meet all identified objectives.
- Perform BCP/DR risk assessments.
- Document all BCP and DR plans.
- Periodically test all documented plans.
- Perform root cause analysis and remediation of all identified issues in the event of an outage.
- Ensure appropriate backup processes are operating properly.

responsible for all product transformation with the agenda to keep the assets commercially viable and competitive in the market. Our key focus areas will be

- Meeting all State, Federal and other contractually obligated compliance requirements.
- Implementing all Health Net Specific Enhancements to enhance operational efficiency.
- Extending Product ability to Support new Healthcare Product that arises due to Market demands.
- Create and Manage Product Development Roadmap to Convert the procured assets to “Product” that are technically and commercially viable to implement for other Healthcare Payers

At all times, Cognizant Product Management team will keep Health Net Informed on all the Key decisions that will be made on improving the Asset capabilities.

### **BPaaS Infrastructure Management**

As part of BPaaS Service Delivery, Cognizant will be providing all the required Infrastructure services for the BPaaS Assets.

As of today all identified BPaaS assets (Health Net Applications) are deployed in IBM, Data Center at Boulder, CO. As per the ITO Phase I & ITO Phase 2 infrastructure design, Infrastructure Foundation Services that will be established on Cognizant DC for Health Net will be common to BPaaS assets and Health Net retained applications. Foundation Services of Infrastructure will include Data Center Service Management, Network Service Management, HN Link Services, Server and Database Management and Service Desk. Cognizant will put strong Governance in place to manage both the BPaaS asset and non BPaaS assets at same service levels to ensure that the product delivered as part of BPaaS Services are in line or exceeding the Health Net retained application standards. BPaaS Infrastructure solution will have 80% or more Virtualized infrastructure with Optimized tools monitoring the infrastructure.

### **BPaaS Service Delivery**

Cognizant will be establishing Transition Management Office, Healthcare product Management Team and Service Management Office as part of Service Delivery. The primary focus of Cognizant’s Transition Management team is to plan, oversee, spearhead and coordinate all transition activities to assure minimal disruption in Service Delivery, Perform effective Organizational Change Management and Knowledge Retention while managing delivery of the end state keeping triple constraints (Schedule, Scope and Budget) intact.

In the steady state, the TMO activities will be fully transitioned into Service Management Office for managing Operations and IT service delivery. Cognizant will follow the ITIL framework based on “dedicated” service delivery with 24x7 support model. During the BPaaS planning phase, Cognizant will work with Health Net to refine Organization model and Governance structure to meet specific Health Net needs. Cognizant core principles in establishing Governance will include:

- End-to-End Ownership of Service Levels – ensures accountability and compliance for all functional areas. Audit oversight for objective review of SLA outcomes

### **Security Compliance and Controls**

In order to ensure the effective delivery of Information Security, Cognizant will partner with Health Net to ensure appropriate management of all security functions in the delivery of the BPaaS solution.

## 1. BPaaS EXECUTIVE SUMMARY

Understanding Health Net's immediate need to reduce its General and Administrative cost (G&A) due to Healthcare Reform- MLR Implications, Cognizant proposes Business Process as a Service (BPaaS) solution that caters to this need.

This document addresses the IT Solutions that will be delivered as part of BPaaS. The Health Net and Cognizant partnership will focus on supporting growth and achieving optimal G&A operating expense ratio. The proposed BPaaS Solution will help Health Net to move from a high fixed-cost, capital intensive model to a variable, consumption-based cost structure. This approach will enable a predictable G&A profile (combined Cognizant and Health Net internal reductions) through a full utility back office model, priced using PMPM model. The PMPM cost will be dependent on the membership volume. BPaaS model will also reduce Health Net's platform investment without compromising regulatory risk while providing additional scalability and capability for growth.

Cognizant understands Health Net's business environment by virtue of its long-standing relationship and exposure to Health Net's IT and business processes. This document provides an overview of the scope of IT services, solution approach for Product Development, Infrastructure Management, and Service delivery with security and compliance controls. Leveraging Cognizant's comprehensive business process management expertise, this proposed BPaaS solution outlines process harmonization, optimal organization design and change management, and offering transformational benefits to meet Health Net's objective on this proposal.

### Scope of Services

Cognizant will provide all IT services to Health Net in a unified BPaaS model with improved control over capability and increasing capacity. The overall scope includes management, support and hosting of BPaaS assets, which is aligned to Scope Operating Model established in documents **SOW 4 IT Services Ex A-1 Scope Model**, **SOW 4 IT Services Ex A-1-1 Process Definitions** and **SOW 4 IT Services Ex A-1-2 Element Definitions**.

- Product Management and Development of all BPaaS Application Assets (**APA – Schedule F – Bill of Sale**)
- BPaaS Asset Production Support and Customization Support
- Infrastructure Management of Deployed BPaaS Assets, that includes
  - Data Center Hosting Services
  - Network Management
  - Infrastructure Server, Middleware and Database Management
  - Capacity Planning and Capacity Management.
  - Service Desk Support

### BPaaS Product Management

For providing solutions, Cognizant will be acquiring the identified and agreed Health Net applications. The Health Net application assets will be the base version of building BPaaS General Availability (GA) version. Cognizant's strategy is to modernize the BPaaS Assets for immediate Health Net needs and generalize it to meet the Product "General Availability" standards. BPaaS assets that are acquired from Health Net will be managed by Cognizant's Healthcare Product Management group and will be

Security management will be a collaborative approach with Health Net driving the overall security strategy, setting security policies and standards and providing information security governance. Cognizant will build a security execution strategy in line with the direction provided by the Health Net security leadership. Additionally, Cognizant will designate key functional leaders to interact with Health Net leadership and ensure seamless operation. The details of Cognizant security solution are documented in “**HN-CTS SOW4 IT Services Ex A-3-6 BPaaS Non-BPaaS Security Solution**”.

## 2. SCOPE DEFINITION

### 2.1. *In-Scope Assets*

Health Net and Cognizant teams accepted the list of systems that will be taken over by Cognizant as BPaaS Asset based on the following guiding principles.

- All Health Net IP and Third Party Business applications, Licenses, Infrastructure Licenses that are required to support following Business Operations Under P5 Program
  - Membership Management
  - Call Center Management
  - Print and Output Management
  - Claims Processing
  - Medical Management Intake
- Multi-Functional Systems – System Supporting P5 Business Operations and non P5 Business Operations
  - Membership systems
  - Medical management systems
  - Print and Output Management
  - Claims Systems
  - Contact center optimization

The detailed list of assets that will be taken over by Cognizant are defined in **APA – Schedule F – Bill of Sale**. The referred asset tracking information document contains list of Asset and non-Asset Details, Asset Details with IP information and Asset Details with underlying Infrastructure License mapping. Cognizant clearly understands any asset that will be taken over, which has Health Net Branding cannot be generalized for its product needs, such systems are Identified and classified. All BPaaS Services provided to HNT from Cognizant DC will be based on dedicated Infrastructure and it will not be shared with other customers.

### 2.2. *In-Scope Services*

Under BPaaS Service Delivery Model, Cognizant’s teams will be responsible for providing all the necessary IT Functions that are required for supporting Health Net.

IT Functions within BPaaS Service Delivery includes:

- Business Requirement Gathering and Assessment
- Product Roadmap Definition
- Enterprise, System and Domain Architecture Management
- Product Design and Development

- Product Testing
- Product Release Management
- Product Deployment
- Product Support
- Infrastructure Management – Compute, Storage, Network, DR and BCP
- Infrastructure Software and Currency Management
- Service Desk
- Integration Service Management
- Data Asset Security
- Project Management and Program Management.
- Architecture Support for HN Retained Systems.

Infrastructures for BPaaS Asset will be hosted in Primary and Secondary Data Centers that were chosen by Health Net. As HN retained applications and Cognizant BPaaS assets are going to be deployed in same datacenters, foundation layers will be common to both IT and Infrastructure Services. Cost of Management of Foundation Services that is common will be shared between Health Net Retained Applications and BPaaS Assets. Details of Product Management from Requirement through Delivery and implementation are described as part of the Solution Approach

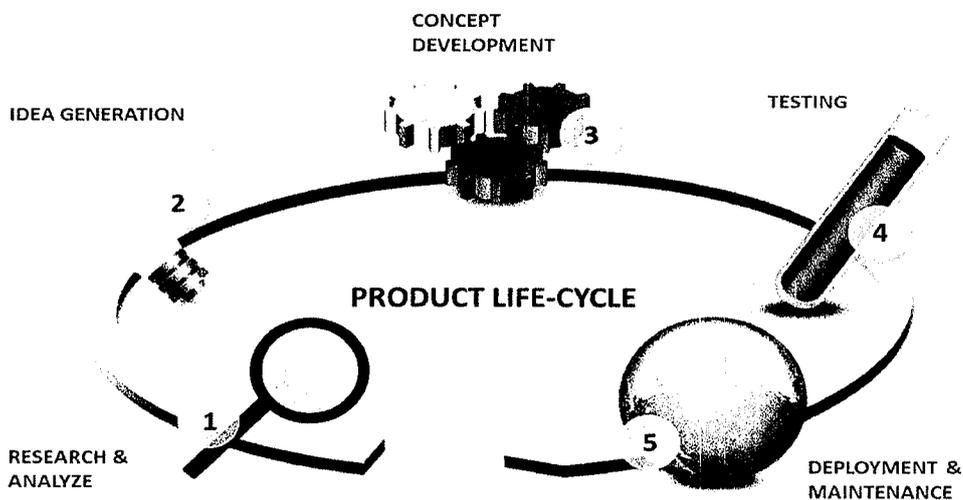

### 2.3. *Out-Of-Scope and Scope Exclusions*

Application and Infrastructure Support for assets that are classified in **APA – Schedule F – Bill of Sale** as HN Retained application and all branding related work such as Marketing content, Digital products, images, videos, pdf's, Site Branding, Site Contents, User Experience, Training

## 3. SOLUTION DESCRIPTION

### 3.1. *BPaaS – Product Management*

Cognizant will leverage its proprietary tried and tested '**ProdIgy**' product engineering framework for the management of BPaaS assets

**ProdIgy** stands for **Product Innovation and Engineering MethodoloGY** is a full-fledged framework for managing product development from Inception to Optimization

ProdIgy framework is designed based on the below fundamentals:

- Agile and Iterative methodologies for product development
- A set of processes and guidelines to ensure all critical product development activities are accomplished
- A set of ready to use proprietary tools, templates and checklists designed to help achieve repeatability, consistency and greater product quality

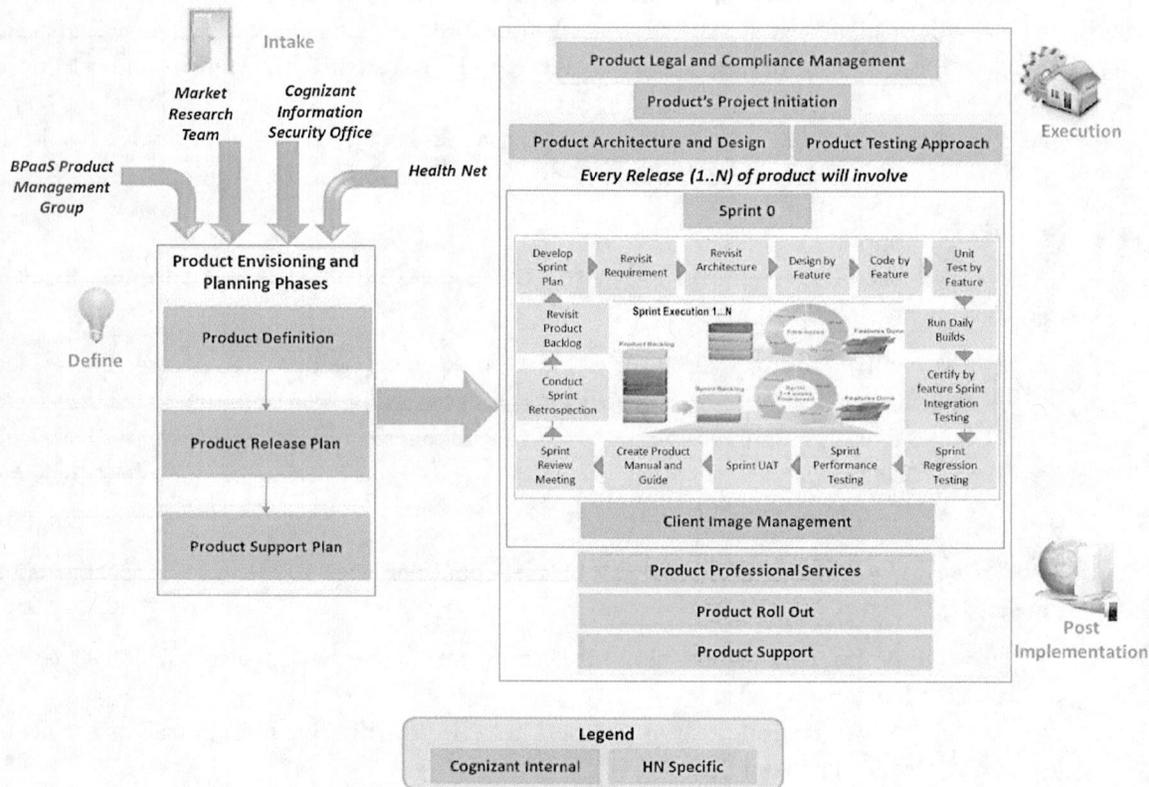

With a vision of

- Shorten time to market and product development cycles
- Lower cost of development while maintaining high quality standards
- Keeping it compliant to the statutory and regulatory needs

ProdIgy is designed to provide timely delivery of varying product development feature requirements. As part of developing the Podigy framework all design, development, testing and release management standards will be established and will be used as reference through out the lifecycles. The established standards will be reviewed yearly to accomadate the new learnings.

### 3.1.1. Cognizant’s ProdIgy Product Development Life Cycle

The customized Product Development Life Cycle covering the various stages is described in the figure below

### 3.1.2. Product Requirements Intake

As part of BPaaS product development Cognizant envisions requirements from the following 4 teams

#### 1. Cognizant BPaaS Product Management group:

Cognizant's Product Management group will be responsible for all product transformation with the agenda to keep the systems commercially viable and competitive in the market. The Product Management group will comprise of product experts as well as Health Net specific customization and integration specialist. Cognizant's product management group will address Health Net specific strategic, operational and market needs and to also address challenges shared with Cognizant by Health Net. The internal Cognizant groups will feed operational, market and Health Net needs and challenges through knowledge management, analytics and industry defined best practices to define the strategic roadmap

#### 2. Market Research Team:

Cognizant will conduct quarterly user group meetings to gather requests for feature enhancements. The Cognizant BPaaS Product Management Group will work closely with Cognizant Market Research team and Cognizant Operations team to gather the requirements from Industry experts and also from HC governance bodies to address the future roadmap

#### 3. Cognizant Information Security Office:

Cognizant Information Security office for Health Net and Healthcare will work with Cognizant Global Information Security- Legal wing team to provide compliance requirements that are mandated by the healthcare regulatory agencies like Center for Medicare and Medicaid Services (CMS), Health and Human Services (HHS), Health Insurance Portability and Accountability Act (HIPAA), Health and Human Services (HHS), Office of the National Coordinator for Health Information Technology (ONC) and Office of Civil Rights (OCR)

#### 4. Health Net:

Health Net specific requirements are those that are provided by Health Net for any focused needs as mentioned below

- Health Net's product market demand (E.g.: Enhancement needed to enter new geographies or Enhancements needed to introduce new products/LOBs ( ASO))
- Health Net specific Compliance and Security requirements
- Brand Management related requirements
- Non BPaaS asset integration requirements

Being the Most Favored Customer (MFC) for Cognizant, Health Net requirements will be handled via a defined methodology as described below

- For any specific business reason/need Health Net will approach Cognizant with the specific product functionality needs
- Such needs will be made through a project brief which will contain the priority of the need- Low, Medium and High

- On receiving the need, Cognizant will turnaround with the requirements as per the terms established in the Master Service Agreement (MSA) and/or MSA Schedules/Exhibits.
- Once both Cognizant and Health Net agree upon the requirement priority, the request will be forwarded to the Governance committee to get the funding allocation
- On approval from the Governance Committee, Cognizant will proceed to the next phase of the Product Development Life Cycle.

### 3.1.3. Product Definition and Planning

Using the requirements gathered from Intake, Product Definition and Planning will be carried out in three steps.

#### 1. Product Definition:

Product Definition Phase focuses on handling the *Product Requirements* and providing a *Roadmap*. It consists of the below mentioned sub-steps

- Define user stories
- Identify features from user stories and create consolidated feature list (product backlog)
- Evaluate and prioritize features (business value and costs)
- Define Product Design Principles and Coding Standards.
- Define product NFRs
- Document product requirements (product backlog + NFRs)
- Develop product roadmap - key product releases, supporting platforms and markets
- Parameters that are considered while defining the product roadmap:
  - Setting the timeline
  - Release prioritization process
  - Establishing the work streams
  - Work out the high-level activities within each work stream
  - Add labels for areas of high risk
  - Mark out the key milestones

#### 2. Product Release Plan

Product release will be managed in conjunction with the product release roadmap. Cognizant product management team will establish release calendar for major, minor, patch/hot fix and client image management. The release schedule of the BPaaS asset will be established to all of Cognizant's clients.

Any releases that are required for critical needs will be addressed based on client requirements in the required date as negotiated.

There are 4 kinds of releases that happen

Release	Description
Major	A major release contains several significant features or an architectural change

Release	Description
Minor	A minor release contains one significant feature or several small ones
Hotfix/Patch	A hotfix is any update to fix or improve the performance or address specific needs
Client Image Management	Client specific requirements are those that are very specific to Health Net needs

Cognizant will provide the release notes which will consist of – what is new in the release, previous release notes, focus of the release, compatibility and deployment methodology and issues resolved with this release

Cognizant will use a standard scheme by which anyone can tell the release type simply by looking at the version number

- x.0.0.0 - The first number signifies major version release of the product
- 0.x.0.0 - The second number signifies the minor version release of the product
- 0.0.x.0 - The third number signifies the hot fix/patch update of the product
- 0.0.0.x - The fourth number signifies the client image release of the product

### 3. Product Support Plan:

Product Support planning phase focuses on the support requirements and approach post implementation phase. It identifies roles that needs to be involved and guides development of other required deliverables, as well as indicates assumption and risks. It covers the feature list and how the current release is different to the previous one, any change in technology or modifications to the current stack, addresses the question as to how to revamp the support team

- Identify the support groups that participate in the production support process and their roles
- Plan for any coordination needs between production support, knowledge management, and release planning
- Establish early life support timeframe and required stabilization criteria
- Create a production support matrix of common scenarios and their escalation paths
- Determine any staff communication and documentation needs for early life support
- Create a final readiness assessment for early life support and production support
- Plan for a post-transition review of the approach development and implementation process and outcomes and evaluate all for effectiveness.

*Product SDLC Phases start after product concept, roadmap, release and support plan is approved by Product Governance Team*

#### 3.1.4. Product Legal and Compliance Management

Once the product roadmap and product release requirements are finalized by the Product Governance team, Product Compliance Management team will review all the requirements that are planned for a release and will provide feedback (add/delete/modify requirements) on the same to

ensure that the Product meets the compliance and security needs that are mandated by Federal and State Regulatory boards.

Product compliance management may conduct Legal review with Customer Legal departments to ensure that they are aligned with the solutions derived to meet compliance standards

### **3.1.5. Product Elaboration and Testing Phase**

The Product Elaboration and Test phase starts off with project initiation

#### **1. Product Project Initiation:**

Project Initiation Phase focuses on defining Product Charter and Project Plan. It consists of the below mentioned sub-steps

- Prepare Product Story Board (business objectives, Critical Success Factors, scope, timelines, Cost Benefit analysis, governance etc.)
- Prepare project plan

#### **2. Product Architecture and Design:**

Product Architecture and Design Phase focuses on defining Product Architecture and High Level Design. It consists of the below mentioned sub-steps

- Define product architecture (architectural goals, various views, framework, technology platform selection etc.)
- Define high level design
- Define user experience strategy
- Establish design and coding standards

#### **3. Product Testing Approach**

Product Testing Approach Phase focuses on defining or modifying the Product Acceptance Test Plan and High Level Test Strategies. It consists of the below mentioned sub-steps

- Define/Modify product acceptance test approach, test plan, acceptance criteria etc.
- Define/Modify product performance test strategy

#### **4. Sprint 0:**

Sprint 0 Phase focuses on preparing for product development in sprints (env. set ups). It consists of the below mentioned sub-steps

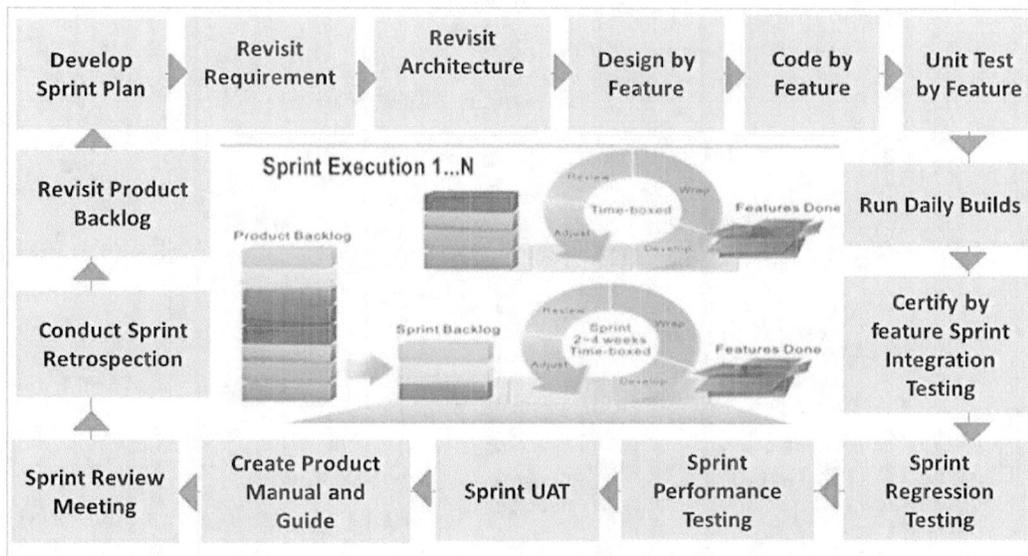

- Develop Sprint 0 plan
- Set up development environment
- Set up test environment
- Conduct Sprint 0 review meeting

#### **5. Sprint Execution (1..N):**

Development of every product release happens in multiple sprints. Each sprint focuses on designing, developing and certifying by feature. It consists of the below mentioned sub-steps

- Sprint plan is created before starting sprint execution
- Each sprint execution will involve design by feature, code by feature and certify by feature

- Sprint integration testing is conducted to certify all features included in sprint
- Sprint performance testing is conducted to ensure meeting performance requirements
- Sprint regression testing to ensure features covered in current and all previous sprints
- Sprint acceptance testing is done and user, ops and installation guides evolve over sprints

### 3.1.6. Product Training

Cognizant will provide the product manual and provide user demo for all the product releases. Learning requirements over and beyond this would not be handled by Cognizant as part of this contract

However, Specific request for learning requirements such as creation of learning materials will be provided by Cognizant as an add-on service. Once Cognizant team receives such request, Product Training team will work with client to understand their requirements for creating the Product training contents.

### 3.1.7. Client Image Management

For each customer there may be specific requirements and it may apply for their business models only, such requirements will developed as add on with the core products and will be e released to the specific client. The build and release management will be managed for specific client and will be released to them as Custom Images. All Health Net Specific requirements like Health Net branding will be managed through Client Image Processes

### 3.1.8. Product Professional Services

As part of the product management team, there would be a product professional services team which would comprise of product experts and integration specialists. The professional services team would help the client on implementation services, integration services with other systems, consulting services, interaction with 3<sup>rd</sup> party systems and productized services like managing IP.

### 3.1.9. Product Roll out

- Once the integration services are taken care of, next step deals with the Product deployment which is concerned with deploying the versioned release. This is based on whether the product is a GA (Generally Available) release or customized release
- GA Releases will be certified by the internal product team post which there would be a pilot testing phase before deploying to the client environment
- The Health Net custom releases are certified by Cognizant to be deployed in HNT environment following HNT TCoE guidelines.
- It consists of the following steps
  - Test Plan Strategy Development
  - Test Plan Preparation
  - Test Execution
  - Defect Fixing
  - Client Security Requirement
  - Certify product package for market release
  - Conduct market retrospection for product feedback
  - Update product backlog based on customer feedback

### 3.1.10. Product Support

- Product support focuses on providing necessary support for product defects, enhancements, upgrades and customizations post launch of product. The product support revolves around defined scope, resources, organizational structure, system availability, and support expectations for production support. Cognizant's standard offering for the product support is as described below
  - **First line (L1) application/product support** for initial review and response to customer service requests and escalation of unresolved issues to technical support specialists
  - **Second line (L2) technical support** through product specialists and subject matter experts for the provision of comprehensive diagnostic and root cause analysis and Incident resolution
  - **Third line (L3) escalation support** through product development engineers for the provision of Problem resolution and corrective maintenance releases
- Cognizant will deliver services via a 24 X 7 support model through a dedicated team. This team will receive incident requests from the helpdesk / service desk via ticketing system. The detailed explanation of each of the services involved is provided in the [Service Management](#) section

### 3.1.11. Third Party Licenses

For first two years, Cognizant will be utilizing Health Net Licenses for Providing Services to Health Net. From year three onwards Cognizant will be deploy its own License or will reimburse License Cost back to Health Net.

The List of Third Party Application, Infrastructure Middleware, Database and Operating System that are required for Supporting assets are called out in **APA – Schedule F – Bill of Sale**.

Cognizant will purchase any additional or new licenses that are required for providing BPaaS Services

### 3.1.12. Asset Transition to GA

Cognizant vision is to convert the assets to “Generally Available” (COTS) products. The GA/GTM version will be built upon the Health Net version; which will be modernized into suite of Healthcare solutions based on market needs. Converting the assets into Product provides ability for Cognizant team to Market the Product. Cognizant will follow structured steps for converting the assets to the Marketable Product.

- Address all compliance projects
- Consolidate all the LoB into single Platform
- Externalize Health Net Specific Contents
- Remove all Health Net Specific Hard codes
- Migrate Asset Integrations to Acceptable Standards or SOA Architecture
- Decommission any Third Party Applications by building the functionalities in unified Assets

Once the assets ready for “Plug and Play”, first General Availability version will be released, timing for each assets to gain “GA” status will vary and is subjected to Product Development team discretion

## 3.2. BPaaS - Infrastructure

Under BPaaS, Cognizant will be responsible for Infrastructure Services that provides scalability for Business Operations. Following sections will provide the details of Infrastructure that will be deployed for BPaaS Assets

### 3.2.1. Servers

The Server’s to support BPaaS is physically part of IO Sliver plus ITO solution (IO Sliver 2), but is logically separated in three categories BPaaS, Corp IT, and Federal. This section will only address the portion broken out to support BPaaS environment. For technical diagrams or details please refer to “HN-CTS SOW4 IT Services Ex A-3-2 Solution Description - ITO Phase II” solution document for details like Rack layout, Architecture design and configuration information.

Charge Components	Unit Of Measure	Servers
AIX Physical	Per Image	4
AIX Virtual	Per Image	21
Solaris Physical	Per Image	12
Solaris Virtual	Per Image	156
Windows/Linux Physical	Per Image	264
Windows/Linux Virtual	Per Image	784

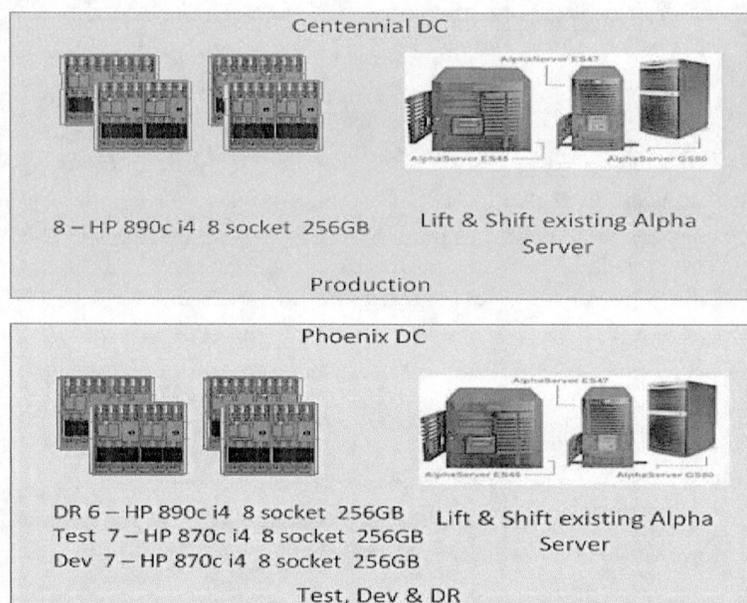

### 3.2.1.1. *Solution Approach*

Cognizant will deliver a logically separated solution for our approach please see exhibit “HN-CTS SOW4 IT Services Ex A-3-2 Solution Description - ITO Phase II” for details on our solution.

#### **Open VMS-HP Integrity Platform**

Cognizant will procure HP Intel Itanium (latest i4) blade based on C7000 Chassis (similar platform as Boulder DC) for hosting most business critical OpenVMS BPaaS Asset. The OpenVMS version 8.4 will be used for BPaaS standup. As per HP press release, Open VMS Licensing and Support will be moved to VSI, Cognizant is watching the market developments and it will take appropriate decision on OpenVMS Version and Hardware Requirements as situation demands. Prioritization of the project will be based on the timeline for migration and cost benefit analysis.

The HP Integrity hardware details for Centennial and Phoenix are as follows.

#### **Connectivity Details for HP Integrity-Open VMS**

- 8 Network interface per Chassis – 10 Gbps for LAN connectivity (with redundancy)
- 2 Management Interface – 1 Gbps for Management
- 8 HBA per Chassis - 8 Gbps for SAN connectivity

### 3.2.2. **Storage**

Storage Requirements for identified BPaaS assets that are being migrated from incumbent data centers to the newly built DC's are fulfilled by upgrading the Storage Infrastructure at both Denver and Phoenix DC. Storage Management Tools will be deployed for monitoring and notifications.

Logical Separation of Storage infrastructure for BPaaS and Commercial applications will be maintained.

The below details the Storage requirement for the BPaaS application and DR

Charge Components	Storage (TB)
Centennial Storage	1180
Phoenix Storage	506
DR Storage (Phoenix)	50
Total Storage	1736

*\*Note: Detailed design on the Storage Infrastructure at Centennial and Phoenix is available in the “HN-CTS SOW4 (IT) Ex A-3-A (Solution Desc)” Solution Document and HN-CTS SOW4 IT Services Ex A-3-2 Solution Description - ITO Phase II” Solution Document.*

### 3.2.3. Backup

The backup Infrastructure for BPaaS will leverage the solution built in IO Sliver and ITO. Cognizant will logically separate the BPaaS solution to support Health Net. Cognizant will ensure the data are backed up and retained as per HNT Record Management specifications.

*\*Note: Detailed design on the Backup Infrastructure at Centennial and Phoenix is available in the “HN-CTS SOW4 (IT) Ex A-3-A (Solution Desc)” Solution Document and HN-CTS SOW4 IT Services Ex A-3-2 Solution Description - ITO Phase II: Solution Document.*

#### 3.2.3.1. Solution Approach

Cognizant will build backup pools to support BPaaS, which will be logically separated from backup pools using dedicated backup Network. Following upgrades or addition will be made to back environment for supporting BPaaS asset data backup.

- 66 Tape drives will be added.
- SpectraLogic Tape Library will be upgraded for additional slots (2300 for Centennial and 1900 for Phoenix).

Additional NetBackup Media Servers will be installed to handle the increased backup load.

#### Backup environment

##### 1. Backup Software:

*For the detailed design, configuration documentation please refer to “HN-CTS SOW4 IT Services Ex A-3-2 Solution Description - ITO Phase II” solution document for initial build-out, and HN-CTS SOW4 IT Services Ex A-3-2 Solution Description - ITO Phase II solution document.*

Following table outlines, number of tape drives and slots that will be deployed BPaaS Infrastructures (Sepaton and NetBackup)

Location	Unit Of Measure	Environment	BPaaS
Centennial and Phoenix	Tape drive	Spectra logic	74
Centennial and Phoenix	Tape Slot	Spectra Logic	3250
Centennial and Phoenix	TB	Speaton	600
Centennial and Phoenix	%	Netbackup	65%

## 2. Backup Overview - Primary DC (Centennial) and Secondary DC (Phoenix)

Cognizant will be expanding backup solution to protect the BPaaS assets by scaling up the backup solution in Centennial DC and Phoenix DC as follows.

- Additional NBU Media Servers will be added to the backup infrastructure.
- Expand the Sepaton Storage by adding SRE nodes and controller to provide additional Backup Storage  
Expand the SpectraLogic Tape Library by adding Slots and LTO-6 FC Tape Drives

### 3.2.4. Middleware

#### 3.2.4.1. Solution Approach

Cognizant will stand up middleware application servers, as per the current application infrastructure requirements. Cognizant will be following build and deploy strategy to stand up the middleware services in the new datacenters. Following table provides the number of instances of Middleware services that will be deployed for BPaaS assets.

Technology	No of Instances
WebLogic 7.0, 8.1, 8.1.5, 9.1, 9.2, 10.0.1, 11gR1	200
IIS 5.x, 6.x, 7.x	100
Weblogic Aqualogic (Enterprise Service Bus)	12

As part of BPaaS technology road map assessment, TIBCO applications will be migrated to WebLogic gradually.

### 3.2.5. BPaaS Application Migration

For Application migration approach and details please refer to the Transition Manual.

### **3.3. BPaaS - Disaster Recovery (DR)**

Cognizant has a robust and proven Disaster Recovery /Business Continuity Plan (DR/BCP) that ensures that services offered to Health Net are protected in the event where any of our service locations becomes inoperable, or any other issues requiring us to move the work elsewhere.

The BCP reiterates our commitment to delivering the highest quality solution using the Onsite/Offshore model, and protecting Health Net from service continuity risks. Our business continuity plans are based on the need to protect professional staff, computing infrastructure, and intellectual property in order to help Health Net remain in business through any contingency; that includes provisions to ensure the mobility of professional skills along with fully redundant communications backbones and computing infrastructures.

**As part of providing BPaaS Services, Cognizant will work with Health Net DR and BCP team to build Health Net Specific DR and BCP Plan.**

Cognizant is ISO 27001 certified company- the authority that mandates stringent and tested Business Continuity Planning and Disaster Recovery operations. Cognizant's Business Continuity Plan will present the process and procedures to be followed if project activities are affected by a disaster or interruption.

#### **3.3.1. DR Strategy and Approach**

For details please refer to the "HN-CTS SOW4 IT Services Ex A-3-2 Solution Description - ITO Phase II" solution document

#### **3.3.2. Business Continuity Planning (BCP)**

For details please refer to the "HN-CTS SOW4 IT Services Ex A-3-2 Solution Description - ITO Phase II" solution document.

### **3.4. BPaaS Service Delivery**

The Section describes the approach towards setting up of the BPaaS environment as well as the operational aspects of BPaaS service delivery model.

Cognizant has configured an integrated BPaaS solution for supporting its applications by hosting the infrastructure as well as managing the services and the assets. The overall delivery will be ITIL framework based providing improved operational services.

***Cognizant's Integrated Service Process and Service Integration Documentations for Health Net are documented in HN-CTS SOW4 IT Services Exhibit A-3-4 Solution Description - People/Process.***

#### **3.4.1. Service Delivery Integration**

The overall solution strategy configured is now being split into support for BPaaS and ITO applications. The segregation has been done based on the core towers and the overlying applications. Cognizant envisages a roadmap in which the BPaaS services will be dedicated to Healthnet for a period of 24 months. As more customers are on-boarded onto this framework, Cognizant will look at further segregation of the offering to ensure there is no dependency on Health Net.

### 3.4.2. Delivery Location and Organization

Cognizant's offshore facilities will be connected among each other and with the Health Net network through robust network infrastructure – consisting of fail-over links and backup lines to handle traffic in times of disasters, more fully set forth below. Robust infrastructure and strong inter-connectivity among these facilities will ensure high operational coordination and the consistency of services in these centers. Cognizant will provide the Services from its dedicated onsite (California, USA) and offshore (India, Philippines) facilities. The following elements of Cognizant's operating model ensure high level of coordination, quality and distribution of work across multiple locations:

- Work will be distributed across multiple delivery facilities, but each individual project will be handled by a single location – to ensure a high level of coordination and planning for the respective project
- Cognizant will decide on the location best suited to execute this project by considering parameters such as required skills, available pools of resources, suitability of operating timings in the specific locations, benefits of scale etc. For example, projects that require a talent pool with niche skills or knowledge will be operated out of locations that specialize in such skills or knowledge, as long as such projects do not have interdependencies with other projects in the engagement

#### Delivery Location

The services to Health Net will be delivered from the following global delivery centers:

Location	Primary Location	Backup / Failover Location	Services/Platform
Health Net Onsite Location Rancho Cordova, USA	●		<ul style="list-style-type: none"> <li>▪ Primary Onsite Delivery Centre</li> <li>▪ L1, L2 &amp; L3 support for Foundation Services &amp; Use cases</li> </ul>
Health Net Onsite Location Woodland Hills, USA		●	<ul style="list-style-type: none"> <li>▪ Backup/failover Onsite Delivery Centre</li> <li>▪ L1, L2 &amp; L3 support for Foundation Services &amp; Use cases</li> </ul>
Cognizant Location Phoenix, USA	●		<ul style="list-style-type: none"> <li>▪ Secondary Onsite Delivery Centre</li> <li>▪ DC Hosting and DR</li> <li>▪ Facility Service</li> </ul>
Latisys Location Centennial, USA	●		<ul style="list-style-type: none"> <li>▪ Latisys DC Hosting</li> <li>▪ Facility Service</li> </ul>
Cognizant Location Manila, Philippines	●		<ul style="list-style-type: none"> <li>▪ 24/7 Service Desk for Commercial</li> </ul>
Cognizant Location Cebu, Philippines		●	<ul style="list-style-type: none"> <li>▪ 24/7 Service Desk for Commercial</li> </ul>
Cognizant Location Bangalore, India	●	●	<ul style="list-style-type: none"> <li>▪ Primary Location Services               <ul style="list-style-type: none"> <li>○ Primary Offshore Delivery Centre</li> <li>○ L2 &amp; L3 support for Foundation Services &amp; Use cases</li> </ul> </li> </ul>

Location	Primary Location	Backup / Failover Location	Services/Platform
			<ul style="list-style-type: none"> <li>▪ Backup Location Services <ul style="list-style-type: none"> <li>○ L1 support for Foundation Services &amp; Use cases</li> </ul> </li> </ul>
Cognizant Location Coimbatore, India	●	●	<ul style="list-style-type: none"> <li>▪ Primary Location Services <ul style="list-style-type: none"> <li>○ Secondary Offshore Delivery Centre</li> <li>○ L1 support for Foundation Services &amp; Use cases</li> </ul> </li> <li>▪ Backup Location Services <ul style="list-style-type: none"> <li>○ L2 &amp; L3 support for Foundation Services &amp; Use cases</li> </ul> </li> </ul>

### 3.4.3. Service Management

The BPaaS environment will follow the support process of an ITIL framework with greater participation in operations and governance –directly interacting with Health Net. Both the ITO and BPaaS services are built upon common foundation layer and there will be similarity in terms of the support processes involved (ITIL). Cognizant’s approach is to move services delivered to Health Net to a more standardized, process- based delivery model, thereby enabling consistency in approach. One of the major components of the solution which will drive consistency in operations and cross-functional processes will be the Cognizant Service Management Office (SMO). Cognizant’s ITIL Process Framework is based on ITIL V3 framework and ISO 20000 standards which comprise of the ITSMF and ISO 9000 requirements for IT infrastructure projects. The Quality System provides a comprehensive process framework with standard procedures, guidelines, templates and checklists as depicted in the following sections addressing various service offerings. It covers all aspects of Cognizant’s Service Support and Service Delivery.

*Cognizant will be submitting Integrated Service Process and Service Integration Documentations for Health Net Review to avoid redundancy and to ensure the completeness of its services across all Service Towers (BPaaS, IO and AO)*

### 3.5. Security, Compliance and Controls

The details of security compliance and controls are described in the Security Solution document **HN-CTS SOW4 IT Services Ex A-3-6 BPaaS Non-BPaaS Security Solution.**

## 1. Service and Support Overview

Health Net environment will be supported with services aligning to processes compliant with ITIL v3 framework. Cognizant's approach is to move services delivered to Health Net to a more standardized, process-based delivery model, thereby enabling consistency in approach. Cognizant will ensure that its service delivery is aligned to ITIL v3 service definitions and also ensure process compliance in all aspects of service delivery. One of the major components of the solution which will drive consistency in operations and cross-functional processes will be the Cognizant Service Management Office (SMO).

Cognizant's ITIL Process Framework is based on ITIL V3 framework and ISO 20000 standards which comprise of the ITSMF and ISO 9000 requirements. The Quality System provides a comprehensive process framework with standard procedures, guidelines, templates and checklists as depicted in the following sections—addressing various service offerings. It covers all aspects of Cognizant's Service Support and Service Delivery.

## 2. Target Operating Model

### 2.1 Service Delivery Model

Cognizant's services are modeled in alignment with the results of the Health Net's scope validation workshop to ensure efficiency, process improvements, documented and controlled processes, metrics management and business value expansion. Cognizant will use its global delivery Onsite-Offshore outsourcing model comprising of a dedicated team to support Health Net. This dedicated team will comprise of Federal and Non-Federal resources. While Non-Federal resources will not be shared to Federal, the Federal resources will be shared to Non-Federal in order to realize efficiencies depending on the nature of activities to be performed. In this model, Cognizant will execute majority of the tasks from an offshore location, while activities requiring an Onsite physical presence to support the federal environment will be executed from the Onsite locations (Datacenters and Health Net facilities). IT Services will be delivered primarily from Cognizant's offshore delivery centers in India. All Cognizant's Federal resources are US citizens and will undergo a clearance from NACLIC.

Use Cases		Health Net Locations	Health Net Offices		Bangalore	Coimbatore	Chennai

The high level activities performed by L1, L2 and L3 teams are described below:

Team	Activities
L1 Team	<ul style="list-style-type: none"> <li>• First point of contact for end users for all use cases services</li> <li>• Accept inquiries - telephone calls/e-mail/web-based from end users for all use cases services</li> <li>• Provide Level 1 problem resolution for all applications/systems and hardware based on standard SOPs</li> <li>• Notify appropriate management and escalate according to the escalation matrix</li> <li>• Record the history of the problem in the problem tracking system</li> <li>• Update the problem ticket and communicate the status to users</li> <li>• Follow up with users after resolution to close out the service request</li> <li>• Monitor progress of incident resolution by third parties and update ticket status</li> </ul>
L2 Team	<ul style="list-style-type: none"> <li>• Respond to, investigate, and resolve incidents initiated as a result of monitoring alarms at monitored sites</li> <li>• Resolve incidents escalated from Level 1 or escalate to Level 3 if unresolved</li> <li>• Act as liaison to Cognizant OEMs and other third-parties</li> <li>• Monitor the implementation of patches and upgrades and communicate to the user community as required</li> <li>• Make updates to the CMDB once the Change Request is completed</li> <li>• Collect and report monthly data on incoming call statistics and ticket volumes</li> </ul>
L3 Team	<ul style="list-style-type: none"> <li>• Fulfill incident resolution activities for assigned incidents</li> <li>• Coordinate with OEM to resolve the incident when necessary</li> <li>• Provide resolution to problems as part of problem management, working together with OEM when necessary</li> <li>• Document and maintain processes, standards, methods and procedures and continuously look for improvements</li> <li>• Investigate and address Health Net concerns or complaints regarding provision of the services</li> <li>• Report issues to Health Net management</li> <li>• Provide general assistance to Level 1 and Level 2 analysts</li> </ul>

- Cognizant proposes to deploy Level 1 and L2/L3 for both Federal and Non-Federal. This team will provide support related to L1, L2 and L3 for all the use cases
- Federal support would be provided from an Onsite location
- Level 1 and L2/L3 team will constitute of Cognizant IT support and Service Management for cross functional services
- In a typical situation, the incident workflow will be as follows:
  - End user will call the existing service desk provider. The service desk agents will raise the ticket in the ticketing tool with all the details like detailed incident description, severity, person contact details. The ticket will be allocated to the Cognizant L1 team
  - Primary responsibility of Level 1 team will be to handle all the backend related and operational issues and provide Level 1 resolution
  - Unresolved issues by Level 1 team will be escalated to the appropriate Level 2/Level 3 IT use case team. This will ensure that tickets are assigned and acknowledged by the right team

- o Each use case will have analysts reporting to a lead and support teams will be structured with Level 2 analysts and Level 3 specialists
- o Once a ticket is assigned to the Level 2 team, the analyst will perform an analysis and resolve the problem. All issues requiring specialist help will be forwarded to the concerned Level 3 teams. Level 3 teams will analyze the issues and provide appropriate resolution. Cognizant teams will also update the Knowledge Base (Health Net existing KEDB) with any new issues/processes
- Cognizant’s Service Delivery enabling functions will work with the service delivery organization to provide best in class services to Health Net. Cognizant will leverage its Operations Maturity teams to ensure continuous process improvement and provide productivity benefits to Health Net. Cognizant’s IT Centers of Excellence/Technical Architects will enable Health Net in the adoption of industry best practices. The overall solution model envisioned by Cognizant is depicted below:

### Following are the key components as identified in our Service Delivery Model

Support for all the use cases related to Federal and Non Federal can be provided by Federal support team depending on their availability whereas support for all use cases related to Federal will be provided only by Onsite Federal support team. Tickets from the Health Net's service management tool (ServiceNow) will flow to Cognizant's L1 team for Federal Support based at Onsite and Non-Federal Support based at Offshore.

The L2/L3 team for Federal Support will be based at Onsite and L2/L3 team for Non-Federal support will be based at Offshore. Federal support team would also support Non-federal environment based on their capacity and availability.

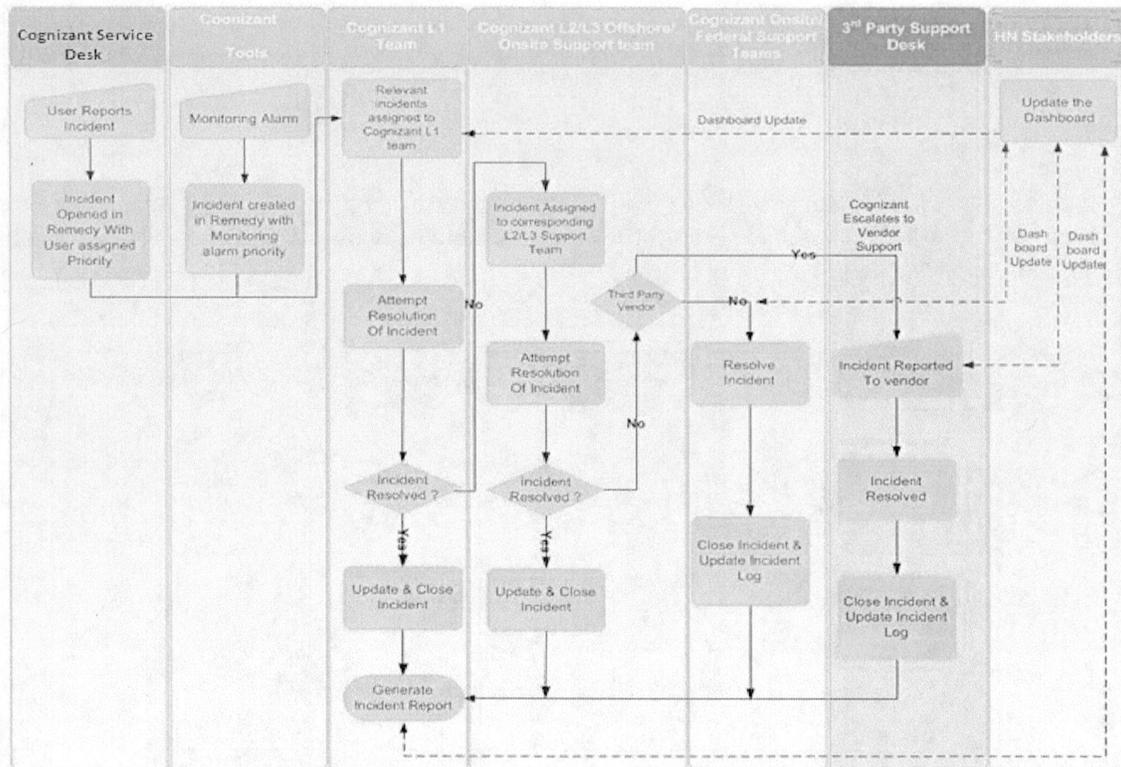

Database Services has a dependency with the existing Boulder Datacenter service provider since the services resides on the service provider's assets, while all other use cases will be on Cognizant's Datacenter. Any incident related to databases that involves infrastructure that belongs to the existing Boulder Datacenter service provider would be managed differently compared to other use cases since there is a dependency with the existing Boulder Datacenter service provider for the service. Cognizant would follow the existing ITSM processes of the existing Boulder Datacenter service provider related to Database Services to be delivered as part of the knowledge transition.

### L2 / L3 Support Layer

This layer will be responsible for service restoration and maintenance and to enable productivity improvements:

- **Level 2:** Activities include providing resolution and restoring services in case of incidents escalated by Level 1 and resolve any user queries/clarifications. The primary objective will be to ensure stability of the operations environment and associated business processes in addition to the availability of applications and infrastructure components
- **Level 3:** Will resolve complex incidents and perform proactive trend analysis to identify the bottlenecks (root cause of recurring incidents, availability and performance issues) and implement permanent fixes in consultation with Health Net. The primary objective will be to enable proactive service delivery, provide operational efficiencies through automation, enrich knowledge database and ensure reliability of the operational environment

## Ticket Flow Diagram

## Tools Implementation

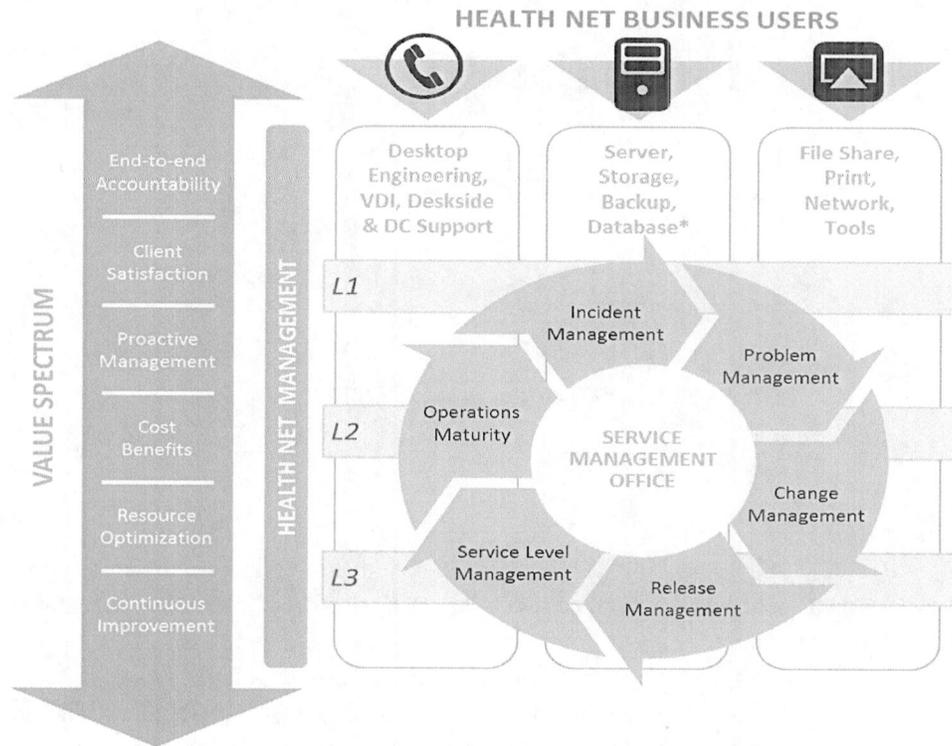

Cognizant's Tools solution is designed to achieve an end state that integrates three key components of the tooling landscape, namely Service Assurance, Service Management and Service Automation. This core tooling capability is supplemented by a comprehensive reporting solution. In order to achieve these objectives in the most cost efficient manner, Cognizant will use existing Health Net tools where possible while bringing additional products to replace tools owned by the existing Boulder Datacenter service provider that are not be available and to fill the gaps in the current environment. The deployment of these tools is planned during the data center migration. This will ensure the full functionality of the data center management team's tools platform to enable them to work with effective collaboration and no impact to existing services. The key improvements brought about by the Cognizant solutions are:

- Consolidation of multiple tools providing similar functionality in to single tool wherever possible
- Full integration of all system monitoring to a single-pane-of-view event manager acting as Manager of Managers
- Automation of ticket generation in to ServiceNow ITSM based on filtered and qualified alerts
- Enhancement of ITSM functionality through implementation of additional modules such as Asset Management, Knowledge Management and Service Level Management.
- Implementation of integrated Asset Management and CMDB solution which is in turn fully integrated with ITSM solution.

- Introduction of Service Automation functionality that can be leveraged for achieving provisioning and de-provisioning of virtual instances, runbook automation, tracking compliance and software release and distribution.
- Integration of tools to a reporting engine enabling automated dashboard based reporting.

**Service Management Office**

The proposed Service Management Office (SMO) provides managing use case, IT cross-functional services in an Onsite-Offshore model. Shown below are the key functions that the SMO performs and the benefits that Health Net will derive from them.

***Cross-functional umbrella for global processes, tools & people to ensure seamless service delivery across towers***

\* DEPENDENCY ON INCUMBENT PROCESSES

The SMO will have the overall accountability for all service related issues/escalations. Some of the key process areas that SMO will govern include:

Process Areas	Key Responsibilities
Incident Management	<ul style="list-style-type: none"> <li>• Manage Major Incidents (Severity 1s), Critical Situations and Disasters involving breakdown of business processes – Convene and chair incident management calls, coordinate with delivery managers and technical support teams (if needed) for faster incident resolution</li> <li>• Communicate timely and accurate information to key stakeholders (IT and Business) –Cognizant, Health Net, 3rd Parties and existing Boulder datacenter service provider</li> <li>• Manage 3rd party interactions during critical situations</li> <li>• Own the Incident from creation to closure irrespective of the internal or external technical support team’s involvement</li> <li>• Ensure appropriate communication to the user community on critical Incidents.</li> <li>• Initiate Problem Management process for performing Root cause analysis and to come up with possible permanent fixes to eliminate recurring incidents.</li> </ul>
Change and Release Management	<ul style="list-style-type: none"> <li>• Cognizant will own the change and release management processes</li> <li>• Cognizant will convene and chair Change Advisory Board</li> <li>• Ensure all changes are approved before implementation</li> <li>• Cognizant will maintain the forward schedule of changes and release calendar</li> <li>• Ensure appropriate communication to the user community before deployment of releases</li> <li>• Conduct post implementation review for major changes</li> <li>• Maintain a Release Acceptance framework to ensure proper handoff between project and steady state support teams</li> </ul>
Capacity Management	<ul style="list-style-type: none"> <li>• Develop/Enhance/Verify process guidelines for Capacity and Availability Management functions and train the teams on the respective processes</li> <li>• Manage and Lead Configuration, Capacity and Availability Management functions</li> <li>• Establish and document thresholds with approval from Health Net</li> <li>• Monitor trends and thresholds</li> <li>• Engage with Health Net when thresholds are reached</li> </ul>
Service Level Management	<ul style="list-style-type: none"> <li>• Health Net will define service levels using their baselines and business needs of their requirements.</li> <li>• Health Net will define Business Level SLAs and Cognizant will manage and govern them</li> </ul>
Vendor Management	<ul style="list-style-type: none"> <li>• Regular interaction with Cognizant’s 3rd Party Vendors</li> <li>• Vendor Performance Management</li> <li>• Define and Manage OLAs with Cognizant’s 3rd Party Vendors for End to End SLA Management</li> </ul>

In addition to the process areas mentioned in the table above, SMO will own and improve other operational processes across use cases and Cross-Functional services like incident problem management, knowledge management, critical-situation management and configuration management.

## 2.2 Operation Maturity Framework

Cognizant will implement its proven “Operation Maturity” (OM) Delivery Framework starting from the current mode of operations. This framework is based on measuring and managing of a number of KPIs and metrics that will be reported transparently to Health Net and will lay the foundation for robust operations delivery and drive continual improvements.

OM framework will provide direction to run the operations by having the overall service delivery for Health Net monitored, measured and reported on an ongoing basis through specific, measurable and transparent parameters along with a clear roadmap for Continuous Service Improvement and Transformation. Cognizant will work with Health Net to ensure we capture any additional metrics that may be important to Health Net’s performance indicators.

The OM Index, which is a measure of the service delivery excellence of a process, is divided into 6 parameters

- Stability
- Compliance
- Continuous Service Improvement
- Customer Experience
- Customer Specific Requirements
- Automation

**“Operations Maturity Index” measures various dimensions like Stability, Compliance, Customer Experience, Continual Service Improvement, Customer CSF & Automation Maturity**

**Automation- Enhance capabilities in various ESM tools and technologies, Service Automation, Task Automation. It measures 13 parameters on Process Optimization, Minimization of Manual effort, Mistake Proofing etc.**

Dimension	Cluster
Stability Index	Customer Essentials
	Customer Essentials
	SLO / KPI reporting
	Floor Management
	Governance
	People
	Process
	Environmental Stability
Compliance Index	IT Service Continuity
	Security Management
	Access management
	Statutory & Regulatory
Continual Service Improvement	CSI Plan
	CSI Benefits signed off : Hard benefits annualized
	CSI Benefits signed off : Customer
	Overall CSI benefits
	Managed Innovation Index
	SLO/ KPI improvements
Customer Experience	Escalations
	Customer Satisfaction Score
	Risk Assessment
	Business Impact Understanding
	Customer Governance experience
Customer Specific	Critical Success Factors
Automation	As per Automation Maturity

Automation	
Monitoring	Monitoring Systems
	Event Automation
	Business Service Management
Task Automation	System Administration Tasks
	Incident Management Tasks
	Change Management Tasks
	Provisioning Tasks
Workflow Automation	Ticket Management
	SLA Management
	Notifications
	User Access Control
Reporting	Ticket Workflow
	Floor Management
	SLM Reporting
	Performance & Availability

**Stability :**

Focuses on operations and Environment stability ( ITO)

**Compliance**

Focuses on Statutory & Regulatory, Service Continuity, Access and Security management in alignment with IT IS security compliance framework

**CSI – Continual service improvements**

Emphasis on Innovation , Kaizen, Service transformation, and LSS initiatives and Benefits will be measure both on Soft and Hard dollar benefits realized against contract value

**Customer Experience**

Focuses on CSAT , Risk Management and transaction feedbacks and effectiveness of Customer Governance

**Automation**

Focuses on customer's environment and estates automation level with respect to Monitoring, Task automation , workflow management and Reporting

**Example of an Operations Maturity Index – Standard**

OPERATIONS MATURITY INDEX -Standard				
SI No	Parameter / Scale	Weightage	Scoring	Weighted Scoring
1	Stability	35%	2.20	0.77
2	Compliance	10%	2.80	0.28
3	CSI	15%	4.00	0.60
4	Customer Experience	5%	3.50	0.18
5	Customer Specific	5%	3.00	0.15

	requirements			
6	Automation	30%	0.00	0.00
<b>OMI</b>		<b>100%</b>		<b>1.98</b>
<b>Calculated OMI</b>				<b>1.98</b>

Using these indices in conjunction with Cognizant's metrics culture, OM team will drive process standardization, optimization and Continuous Service Improvements in every facet of managed services delivery for Health Net.

Cognizant IO Program solution document details the proposed tools for availability and performance in section : 2.2.5 Monitoring Tools.

### 3. Service Delivery Process

The processes described below will be followed for Phase 1 Scope and for any future scope changes that Cognizant undertakes for Health Net.

#### 3.1 ITIL/ITSM Processes

##### 3.1.1 Incident Management

###### Goals and Objectives

The objective of the Incident Management Process is to restore normal service operation as quickly as possible and minimize the impact to business operations, thus ensuring that the service quality and availability is maintained.

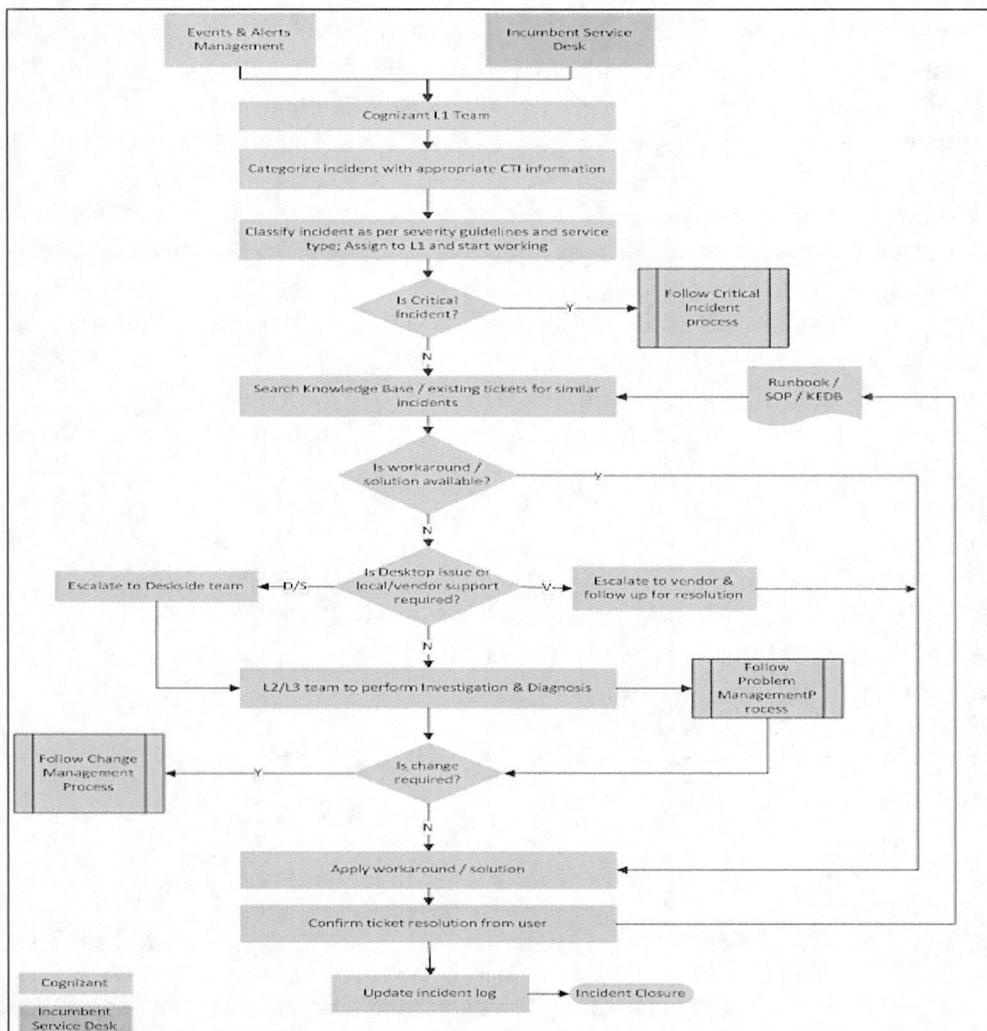

An Incident is defined as any event which is not a part of the standard operation of a service and which causes, or may cause, an interruption to, or a reduction in, the quality of the service.

The Incident Management activities will include:

- Incident detection and recording
- Classification and initial support
- Investigation and diagnosis
- Resolution and recovery
- Incident ownership, monitoring, tracking and closure

Cognizant's Incident Management team will restore normal services within the defined SLAs agreed and to minimize the impact to business operations. Incidents will be categorized and prioritized according to the SLA definition in the SLA schedule.

## Incident Management Process Flow

- Incident detection and recording by Cognizant L1 team/ Service Desk
  - Record basic details of the incident as required by Service Desk tool. Some of these details will be obtained from Health Net end user as the complaint is submitted
  - Alert specialist support group(s) as necessary ; for federal issues, the Onsite team will be alerted
- Classification and initial support
  - Classifying Incidents
  - Matching against Known Errors and Problems
  - L1 will inform the Problem Management team of the existence of new problems and of unmatched or multiple Incidents
  - Assessment of impact and urgency, and thereby defining priority
  - Incident Categorization

- Application - Service not available, Application bug
- Hardware - Automatic alert, Printer issues
- Service Request - forgotten passwords
- Assessing related configuration details (daily verification)
- Providing initial support (assess incident details, find quick resolution)
- Closing the Incident or routing to a specialist support group, and informing the User(s)
- Investigation and diagnosis
  - Assessment of incident details
  - Collection and analysis of all related information, and resolution (Including any work-around) or route to the next level of support
  - Engagement of existing Boulder database service provider, AO, software/hardware vendors or other 3rd parties as needed to participate in the investigation
- Resolution and recovery
  - Resolve the Incident using the solution/work-around or, alternatively to raise a Request For Change (RFC) tickets
  - Take recovery actions
- Incident closure
  - Details of action taken to resolve the incident are concise and readable
  - The resolution is agreed upon by Health Net end users/ affected teams
  - All details applicable to this incident are recorded
- Ownership, monitoring, tracking and communication
  - Monitor Incidents
  - Escalate Incidents
  - Inform User

#### Roles and Responsibilities: Incident Management

Roles	Responsibility
Health Net	<ul style="list-style-type: none"> <li>● Reporting all incidents to the Service Desk</li> <li>● Responding to requests for additional information in a timely fashion</li> <li>● Reporting their related incidents to the Service Desk</li> <li>● Responding in assisting with resolution in a timely fashion</li> <li>● Confirming that issue has been resolved</li> </ul>
Level 1 Support	<ul style="list-style-type: none"> <li>● Identifying incidents and be first point of contact for incidents reported by Service Desk. Diagnose, escalate, and resolve based on documented processes and procedures. Responsible for:</li> <li>● Recording, classification, prioritization and routing of incidents</li> <li>● Resolving incident using Level 1 SOP's, knowledge base articles and experience</li> <li>● Tracking progress of incidents by accurate and timely recording of incident status and of work notes</li> <li>● Ongoing communication of progress to the users</li> <li>● If incident can be resolved by Level 1 team, then:               <ul style="list-style-type: none"> <li>○ Documenting resolution of incident to ensure that this is</li> </ul> </li> </ul>

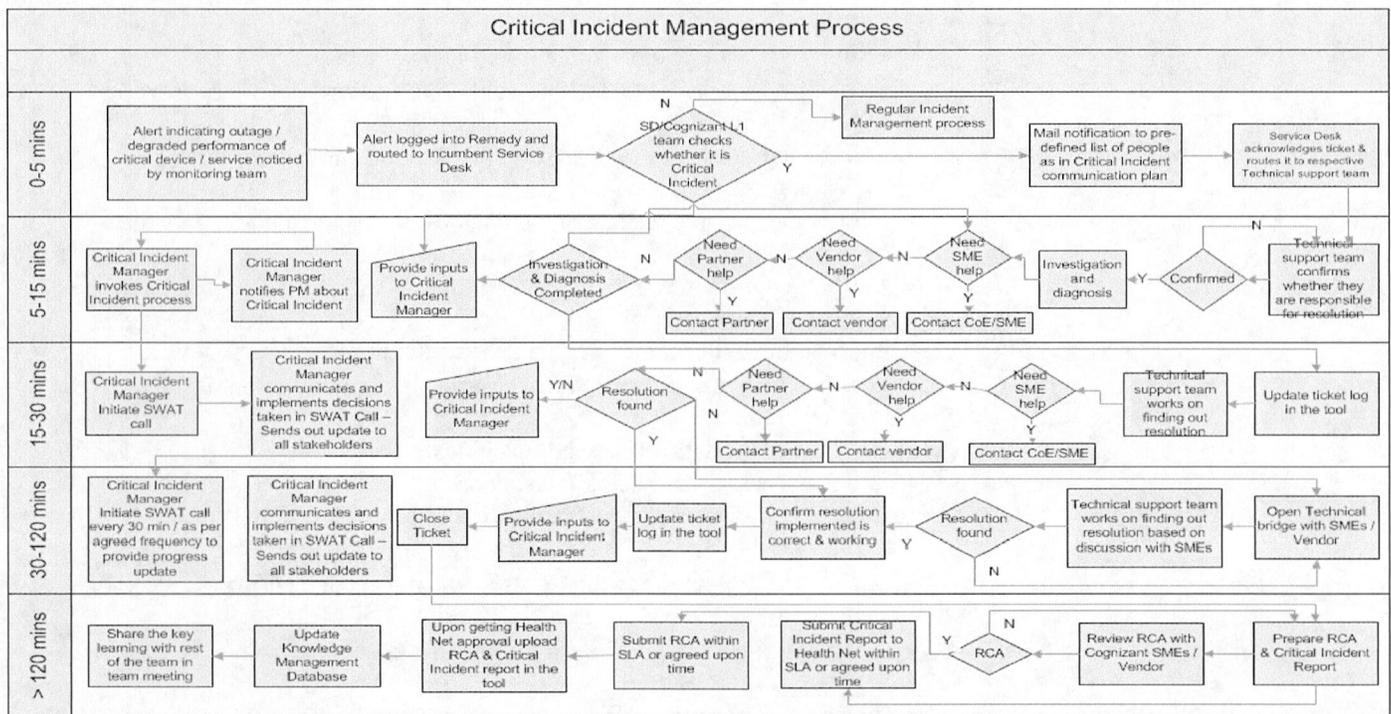

Roles	Responsibility
	<p>clear and understandable by the user</p> <ul style="list-style-type: none"> <li>○ Ensuring the user is satisfied with the resolution</li> <li>○ Confirming classification of the incidents request to improve management information and aid future incident matching</li> </ul> <ul style="list-style-type: none"> <li>● Responsible for incident investigation, diagnosis and recovery within the defined service levels.</li> <li>● Where appropriate, assign incident to Level 2 or 3.</li> </ul>
Level 2 Support	<ul style="list-style-type: none"> <li>● Providing first point of escalation, guidance and instructions to Level 1 support to diagnose and resolve the incident. Take assignment of incidents where subject matter expertise and experience is required for diagnosis. Responsible for: <ul style="list-style-type: none"> <li>○ Providing business/functional support</li> <li>○ Responsible for incident investigation, diagnosis and recovery within the defined service levels</li> <li>○ Providing Health Net updates, as required</li> <li>○ Escalating incidents, as required</li> </ul> </li> </ul>
Level 3 Support	<ul style="list-style-type: none"> <li>● Making changes to components or where a complex resolution is required, for example, code change, hardware replacement or vendor support. Responsible for: <ul style="list-style-type: none"> <li>○ Providing technical support</li> <li>○ Responsible for incident investigation, diagnosis and recovery within the defined service levels</li> <li>○ Providing Health Net updates, as required</li> </ul> </li> </ul>
Team Leader	<ul style="list-style-type: none"> <li>● Ensuring the team complies with documented processes including the Queue Management process and ensuring the team meets the required-Service Levels. Responsible for: <ul style="list-style-type: none"> <li>○ Ensuring the Queue management is performed within the team</li> <li>○ Providing the tools, training and support required by team members to perform their tasks</li> <li>○ Monitoring team performance and accountable for SLA breaches within the team</li> </ul> </li> </ul>
Incident Manager	<ul style="list-style-type: none"> <li>● Managing and supporting incidents and urgent service requests either personally or via the Service Desk, to ensure successful completion and user satisfaction. Responsible for: <ul style="list-style-type: none"> <li>○ Monitoring efficiency and effectiveness of the Incident Management process</li> <li>○ Providing periodic touch base with technical team /s for the exact status of the incident</li> <li>○ Providing updates to key Health Net/Cognizant stakeholders</li> <li>○ Providing escalation management for incidents arising from end users/stakeholders</li> </ul> </li> </ul>

Roles	Responsibility
	<ul style="list-style-type: none"> <li>○ Generating Incident Management performance reports</li> <li>○ Managing improvements within the Incident Management process</li> <li>○ Assisting the team with the Major Incident and Problem Management processes</li> </ul>

Incident Management Services Roles and Obligations	Cognizant	Health Net
Interface and coordinate with the Service Desk and Health Net for Incident Management Services activities and take ownership of end to end Incident Resolution	X	
Establish Incident classification by priority based on business case		X
Establish Incident workflow, escalation, communication and reporting processes that help to achieve SLAs	X	
Review and approve Incident classification, prioritization and workflow, communication, escalation and reporting processes	X	
Manage entire Incident lifecycle including detection, escalation, diagnosis, Health Net status reporting, repair and recovery	X	
Ensure Incident Resolution activities conform to defined Change Management procedures	X	
Daily/Weekly review of the state of open Incidents and the progress being made in addressing the incidents		X
Identify possible enhancement opportunities for improved operational performance and potential cost savings based on results of Incident Resolution activities	X	X
Review and approve projects to implement enhancement opportunities	X	X
Implement approved projects to implement enhancement opportunities	X	X

Critical Situation (Critical Incident) Incident Management

Cognizant will follow the critical incident management process\* as per ITIL standards. The overall process flow is summarized below:

\* The above critical incident process is applicable to both prod and non-prod critical systems

### Roles and Responsibilities: Critical Incident Team

Roles	Responsibility
Team Members	<ul style="list-style-type: none"> <li>• Accept assigned ticket during business Hours and off-business hours</li> <li>• Inform Operations Team about bridge opening details</li> <li>• Start troubleshooting of the incident if the issue is in scope</li> <li>• Provide technical expertise and ensure correctness of incident troubleshooting and impact assessment</li> <li>• Refer knowledge base and resolve incident as quickly as possible</li> <li>• Work on alternate solutions and discuss the solution with product vendor and Health Net</li> <li>• Follow the process documentation</li> <li>• Update the ticket with status regularly every 30 minutes as to notify stake holders.</li> <li>• Co-ordinate with vendors and ensure timely response</li> <li>• Prepare the RCA : share with Health Net and update the approved RCA in ServiceNow</li> </ul>
Critical Incident / Problem Manager	<ul style="list-style-type: none"> <li>• Control the escalation and involve appropriate individuals/teams as required to speed up the resolution</li> <li>• Inform the program manager about the incident in details and the ETR</li> <li>• Notify the Onsite team about the opening of Critical Incident bridge</li> <li>• Program Manager will provide the Critical Incident bridge information to all the Critical Incident stakeholders</li> <li>• Ensure timely (every 30 Min.) and accurate information is being updated until the incident is resolved</li> <li>• Handle any escalations during the incident</li> <li>• Provide necessary guidance and support to the team</li> <li>• Bring in 3rd party vendor/partner/ CoE for expert inputs towards resolution</li> <li>• Interact with operations team to assess the impact and current status</li> <li>• Coordinate RCA review with all stake holders</li> <li>• Prepare Major Incident Report (RCA) and share it with the Critical Incident stakeholders</li> </ul>
Other Members	<ul style="list-style-type: none"> <li>• Health Net program manager to be informed periodically by the Critical Incident manager or delivery manager about the progress and resolution of incident</li> <li>• Cognizant application team to provide inputs on the criticality and business impact of the incident</li> </ul>

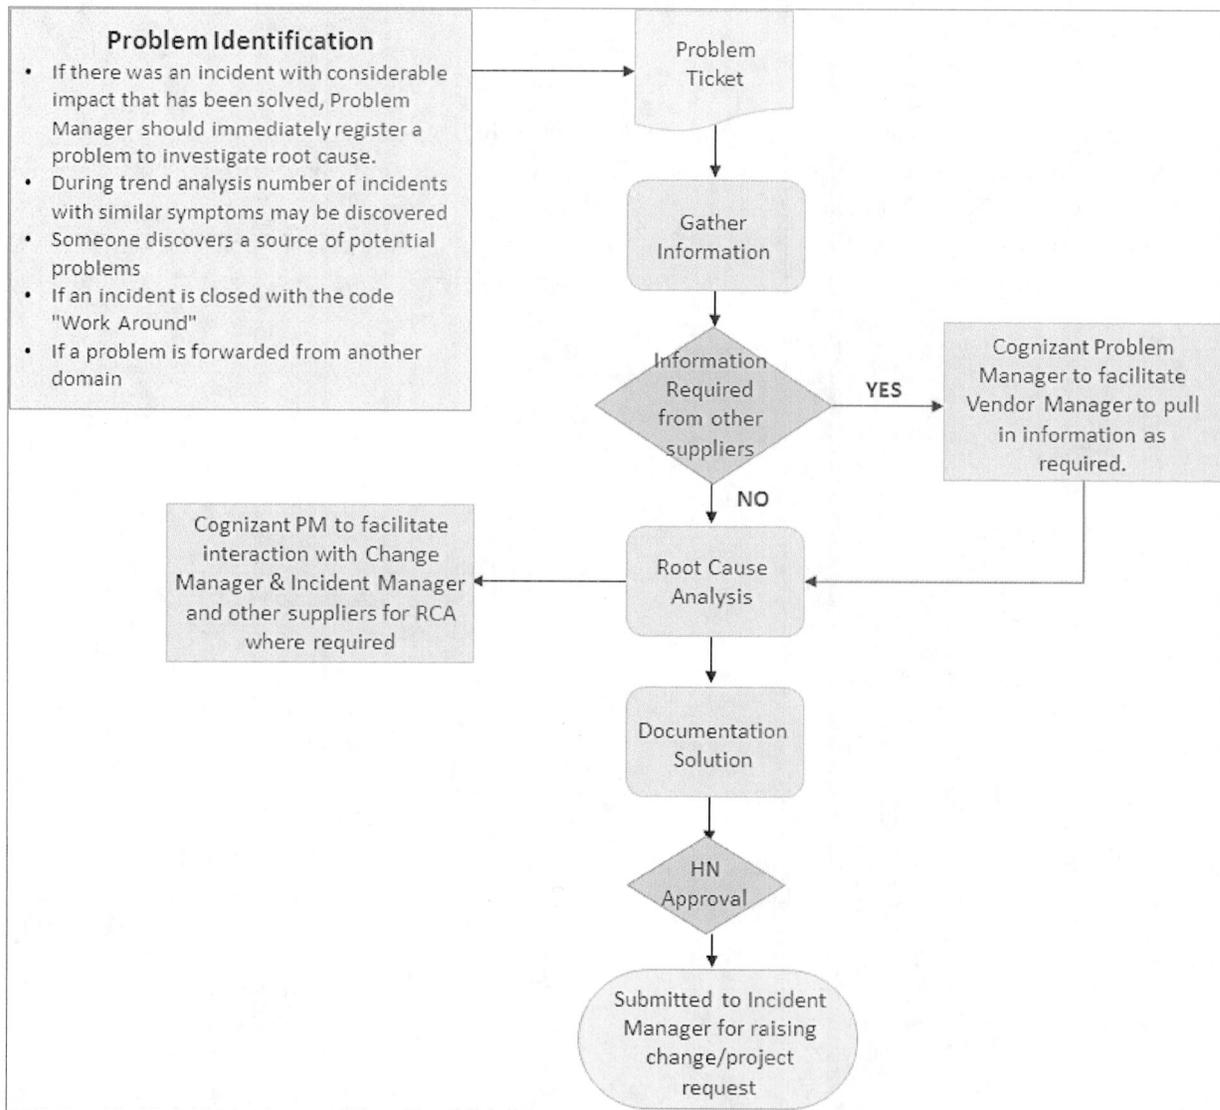

While the table above describes a critical situation scenario, in case of outage situations, the Service Desk will create an automated response in the IVR for end users to keep them informed of the on-going critical outage and also send out a mailer to the effected employees.

### 3.1.2 Problem Management

#### Goals and Objectives

The goal of Problem Management is to minimize the adverse impact of incidents and problems have on the business processes and to prevent incidents from reoccurring. Problem Management is both a reactive and proactive process that identifies the root cause for one or more incidents. The reactive approach to Problem Management looks at identifying the root cause of incidents, while the proactive method looks to prevent incidents from occurring in the first place by identifying and solving problems.

### Problem Management Process Flow

### Problem Management Flow for Health Net

- Problem identification and Recording
  - If there was an incident with considerable impact that has been solved, Problem Manager should immediately register a problem to investigate root cause
  - During trend analysis number of incidents with similar symptoms may be discovered
  - Someone discovers a source of potential problems
  - If an incident is closed with the code “Work Around”
  - If a problem is forwarded from another domain
- Classification (Involves collection of data so that problem can be categorized and prioritized)
  - What are the related incidents?
  - How urgently the problem needs to be solved?

- Assign Resources
  - Categorization and Prioritization of a problem enables the appropriate resources to be assigned. This ensures that problems are handled efficiently and effectively.
- Investigation and Diagnosis
  - To detect the underlying cause of one or more incidents
  - Provide workarounds for incidents related to problem
  - Records of recent changes to be interrogated because these may provide clues as to the cause
- Establish Known Error
  - Identified known error is recorded in KEDB
  - The error is routed to Error control process

Throughout the process the Problem Manager has a responsibility to track and monitor progress and quality as well as to provide necessary reports.

**Proactive Problem Management**

- Identifying and resolving Problems and Known Errors before Incidents occur
- Trend analysis
- Targeting of preventive action

**Roles and Responsibilities: Problem Management**

Roles	Responsibility
Critical Incident / Problem Manager	<ul style="list-style-type: none"> <li>• Reviewing the efficiency and effectiveness of problem control process</li> <li>• Managing problem support team (L2/L3 teams)</li> <li>• Monitoring the effectiveness of problem management process and making recommendations for improvements</li> <li>• Develop and publish RCA reports</li> <li>• Identifying problems (by analyzing Incident data etc.)</li> </ul>

Problem management activities/ Roles and Obligations	Cognizant	Health Net
Problem Identification, recording and Classification	X	
Categorization and Prioritization of a problem	X	
Investigation and Diagnosis to provide workarounds	X	
Identified known error is recorded in KEDB	X	
Conduct proactive trend analysis to identify recurring Problems and providing RCA Services trend analysis reporting to Health Net	X	
Track and report on all Severity Level 1 and 2 Incidents and provide associated consequences	X	
Recommend solutions to address recurring Problems or failures	X	
Review and approve solutions to address recurring Problems or failures		X
Identify root cause of Severity Level 1 and 2 Incidents and recommend	X	

Severity Level	Definition	Response Required
appropriate Resolution action		
Review and approve solutions to address Severity Levels 1 and 2 Incidents		X
Provide status report detailing the root cause of and procedure for correcting recurring Problems and Severity Levels 1 and 2 Incidents until closure as determined by Health Net	X	

**Root Cause Analysis (RCA)**

One of the most critical steps in Problem Management process is the root cause analysis (RCA) which would ensure either correct diagnosis of the incident leading to right solution. RCA will be done for Severity 1 and Severity 2 tickets only. The severity of the incidents as Severity 1 or Severity 2 will be defined as below:

Severity Level	Definition	Response Required
1 Critical	A serious fault prevents a business critical process from being performed and there is no workaround available for the problem.	Cognizant will commence work to resolve the problem immediately. Work shall continue uninterrupted until a suitable workaround is implemented.
2 High	A high percentage of Users are affected and a fault or workaround prevents a business process from being performed satisfactorily.	Cognizant will commence work to resolve the problem immediately and shall continue within normal business hours until a suitable workaround is implemented.

- Delivery Manager is responsible to ensure timely completion of RCA report
- Root cause analysis is mandatory for all Critical Situations
- Root Cause Analysis will done using techniques like Ishikawa diagrams, and brainstorming sessions. The inputs will be data and information from incident management team as well as metrics book and problem call log form
- Capture the inputs from all the stakeholders after the root cause is identified within the agreed time.
- Wherever applicable, get in touch with the 3<sup>rd</sup> party involved to ensure that the cause and solution is collaboratively closed
- The draft RCA report should be reviewed with all the stake holders with in agreed time frame after problem resolution
- RCA document will be available at common shared location
- The RCA report should clearly capture lessons learned and action items
- The final RCA report after review with all stakeholders to be and formally accepted by Health Net within agreed timelines
- RCA will be initiated within 24 hrs. of Severity 1 or Severity 2 ticket being closed

For all resolutions which are not dependent on any 3<sup>rd</sup> party vendors, RCA will be submitted to Health Net within 5 days from Severity 1 or Severity 2 ticket closure. As per Health Net CTS – Exhibit B-1 (Service Level Metrics) document Section 6.5 Root cause Analysis Completion, in the event of a critical service level failure due to the performance failure of an OEM vendor (e.g., Hitachi, Cisco, Telco, IBM), Cognizant may be excused from this critical level failure. Incident Manager will submit a Change/Project Request for implementing the solution/fix for the problem as documented in the RCA approved by Health Net.

### 3.1.3 Configuration Management

#### Goals and Objectives

Cognizant identifies Configuration Management Process as a pivotal process for all the other processes (especially the Service Support). Configuration Management is important as it is considered central and supportive to other ITIL processes where it provides information. All in-scope hardware/software inventory/version would be maintained in ServiceNow as well as in an MS excel spread sheet.

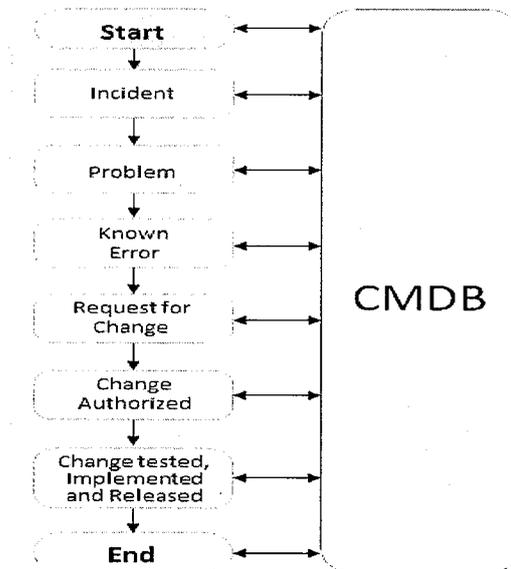

The objective of the configuration management process will be to:

- Provide IT Management with greater control over the IT Assets of the organization.
- Provide accurate information to other ITIL processes.
- Maintain a reliable Configuration Management Database (CMDB)

The Configuration Management Process will include the following activities

- Designing the Configuration Management Database
- Identifying and establishing the configuration item (CI)
- Taking inventory of the hardware and software assets and assigning a CI
- Documenting the As-is configuration of the systems and assigning a CI
- Providing access to the CI
- Changing the CI
- Reporting CI changes
- Reviewing CI regularly

## Configuration Management Process Flow

Configuration Management Flow and its Interaction with other processes

## Configuration Management Planning

Cognizant's Configuration Management plan will encompass:

- Related policies, standards and processes that are specific to the support group
- Configuration Management roles and responsibilities
- CI (Configuration Item) naming conventions
- The schedule and procedures for performing Configuration Management activities: configuration identification, control, status accounting, configuration audit and verification
- Interface control with third parties, e.g. Change Management, suppliers
- Configuration Management systems design, including scope and key interfaces

## Configuration Identification

- CIs are the components used to deliver a service. The CIs include hardware, software, documentation and SLAs
- Identify the relationship between CIs and the attributes for every CI (allocating identifiers and version numbers for CIs, labeling each item, and entering it on the Configuration management database (CMDB))

## Control of CIs

- Strict configuration control will ensure that only authorized and identifiable CIs are recorded in the Configuration management Database (CMDB) upon receipt.
- Cognizant will use ServiceNow
- The CMDB will be updated as and when there will be a change in the environment using the authorized change management cycle.

## Configuration Status Accounting

Status reports should be produced on a regular basis, listing, for all CIs under control, their current version and change history. Status accounting reports on the current, previous and planned states of the CIs should include:

- Unique identifiers of constituent CIs and their current status, e.g. 'under development', 'under test', 'live'
- Configuration baselines, Releases and their status (Base lining is done during the initial state of set up of CMDB which is on a year to year basis. It would help us to identify the amount of changes performed and correlate them to the impact created positively or negatively. Baseline in Configuration management is done with help of standard tools.)
- Latest software item versions and their status for a system baseline/application
- The person responsible for status change, e.g. from 'under test' to 'live'
- Change history/audit trail
- Open problems /RFCs

## Configuration Verification and Audits

Configuration audits would be considered during the following times:

- Shortly after implementation of a new Configuration Management system
- Before and after major Changes
- Before a software release or installation to ensure that the environment is as performing as expected
- Following recovery from disasters and after a 'return to normal' (this audit should be included in contingency plans)
- In response to the detection of any unauthorized CIs
- Quarterly audits

All processes within ITIL have links with configuration Management or retrieve information from the Configuration Management Database.

### Roles and Responsibilities: Configuration Management

Configuration Manager	<ul style="list-style-type: none"> <li>• Performs audits and establish baselines.</li> <li>• Selects, assigns responsibilities to, and trains the configuration management staff.</li> <li>• Establishes CMDB policies, including CI-naming conventions.</li> <li>• Oversee the day-to-day operations of the process.</li> <li>• Produces and distributes management reports.</li> <li>• Provides change owner with a baseline report for assessing the impact of a release.</li> <li>• Updates the CMDB with all changes to the target environment when both the pilot and the full release have been completed.</li> <li>• Conduct audits and reconcile the CMDB</li> </ul>
-----------------------	---

Configuration Management Services, Policies and Initiatives	Complete	Effective
Establish Configuration Management Database (CMDB), in accordance with Health Net requirements	X	
Review and approve all configurations and CMDB (critical and business impact)		X
Review and approve all configurations and CMDB (non-critical)	X	
Enter/upload configuration data into the CMDB	X	
Establish automated process Interfaces to Incident and Problem management, Change management, DR, technical support, maintenance and asset management processes	X	
Establish appropriate authorization controls for modifying configuration items and verify compliance with software licensing	X	
Ensure Configuration Management processes are consistent across all infrastructure(e.g., development, test and production)	X	
Establish process for verifying the accuracy of configuration items, adherence to Configuration Management process and identifying process deficiencies	X	
Track and flag configurations that are not in conformance with Health Net-defined standards and requirements (e.g., exceptions list)	X	

### 3.1.4 Release Management

#### Goals and Objectives

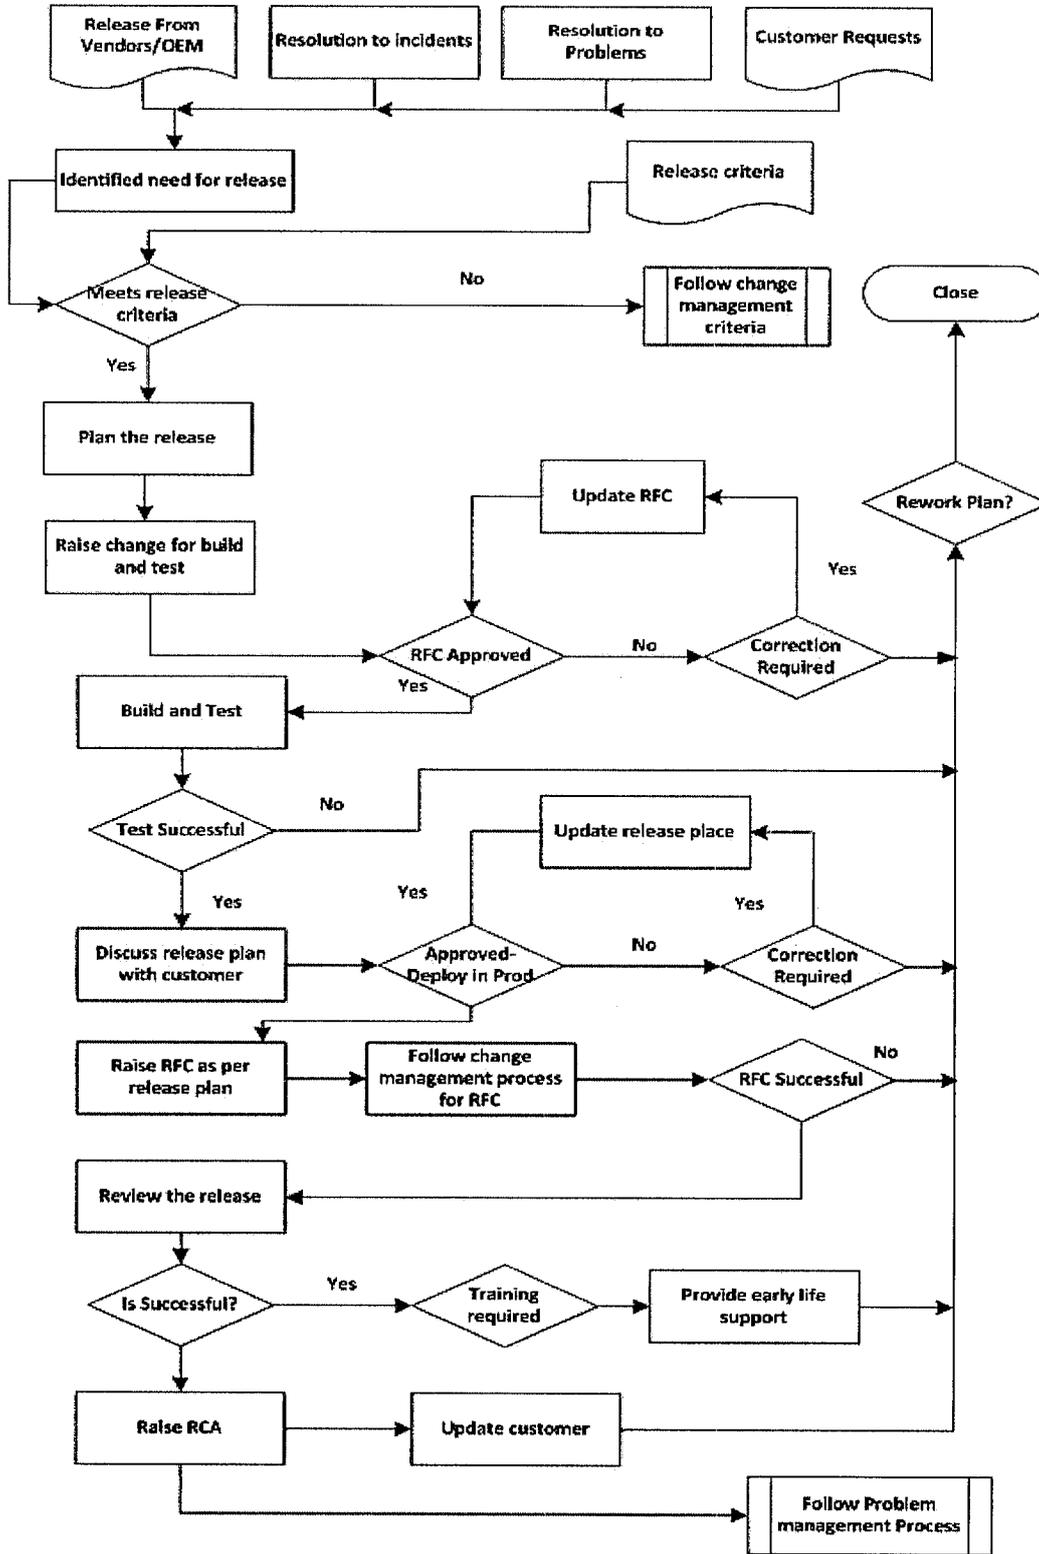

The goal of the Release Management process is to ensure the planning, design, build, configuration and testing of software and hardware systems to create a set of Release components for the service production environment. Testing (operational and service readiness), planning, preparation and scheduling of the Release is done by the Project/Build team before handing off to Steady State.

This procedure applies to all changes that require software and /or a hardware release. The Release Management process ensures that, both process oriented and technical aspects of a release are planned and standardized:

- Plan releases in line with requirements resulting from approved changes
- Plan technology refresh of the environment is in line with Health Net technology plan, Health Net release calendar and ensure that the IT changes-are implemented in a controlled manner to minimize the impact on Health Net application releases
- Cognizant IT support team under this process will deploy the entire release request submitted to them by the application support group like code promotion. Where the release would have some impact on the exiting environment, Cognizant IT team would follow the change management process. Cognizant IT team will work closely with all application team to understand the impact (if any) and take necessary precautionary measure/s and keep Health Net informed
- To design and implement efficient procedures for the distribution and installation of changes to IT systems
- Develop implementation and rollback plans for approved changes that will be included in the release
- Build effective release modules for the deployment of the changes to production
- To ensure that hardware and software being changed is traceable, secure and that only correct, authorized and tested versions are installed
- To ensure that master copies of all software are secured in the Definitive Software Library (DSL),hardware spares are stored in Definitive Hardware Store(DHS) and-the details are updated in asset management tool (ServiceNow)
- Cognizant support team will deploy the release in line with structured implementation guidelines

#### Release Management Process Flow

Cognizant has put in place a release management team who will work closely with change management and configuration management teams of Cognizant and Health Net to ensure that the changes are implemented as per the release schedule. The frequency and type of releases will be determined mutually between the Cognizant release manager and Health Net during the course of engagement.

### Release Management Process

Cognizant understands that the current infrastructure hosted in the Datacenter has a usable life of over 3 years, where at that time we will review the need for a technology refresh. This provides us with a unique opportunity to review and enhance the overall environment at the same time as the refresh.

Cognizant would look to follow the principles below when considering transformation

- Software currency roadmap
- Future Growth plan
- Out-of-support technology
- Compliance
- Cost reduction
- Standardization

Typical activities that Cognizant will perform during tech refresh process are:

- Conduct services and activities associated with the technology refresh to modernize the IT infrastructure on a continual basis
- Establish, implement, and manage plans, policies and procedures regarding continual technical improvement and publish to Health Net
- Maintain the Technology Refresh Plan for all the Infrastructure/Software currency in line with the approved technology plan
- Design, Build, upgrade, replace and test hardware and software components with appropriate new technology

#### Roles and Responsibilities: Release Management Process

Release Management Services Roles and Obligations	Cognizant	Health Net
Administer the version control system as it relates to Release Management of Health Net applications	X	
Establish Release Management plans for major releases	X	
Review Release Management details with Health Net and alter as appropriate (e.g., back out plan, go/no go decision)	X	
Ensure Release Management Services processes are consistent across all environments (e.g., development, test and production)	X	

### 3.1.5 Change Management

#### Goals and Objectives

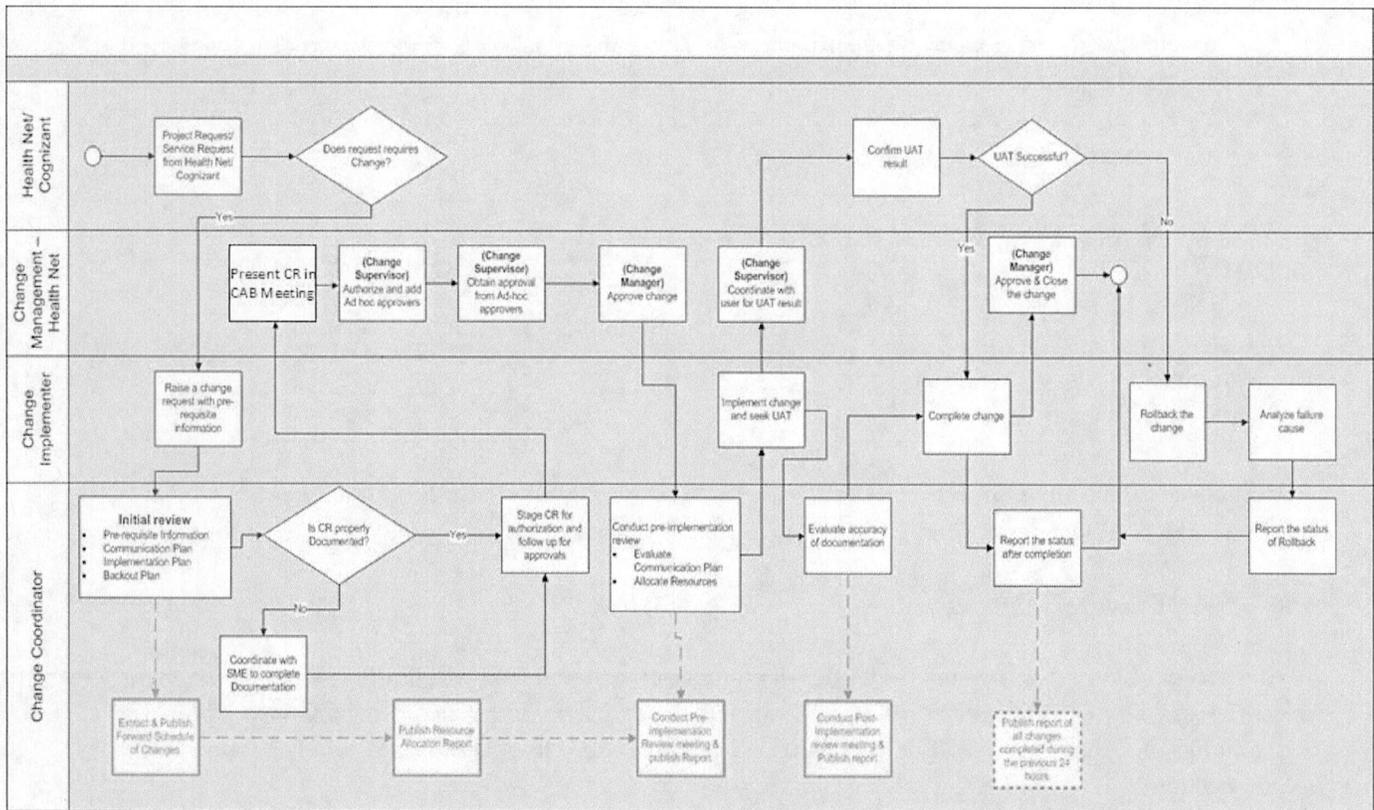

The Change Management process is used to ensure that standardized methods and procedures are used for the efficient and prompt handling of all changes. The Change Management process is designed to minimize the impact of change-related incidents on service quality, and consequently improve the day-to-day operations of the organization.

The change management process will perform the following activities:-

- Recording the change requests
- Accepting the change request
- Classifying the change requests
- Building and Testing the change
- Implementing the change
- Evaluating the business impact of the change

#### Change Management Process Flow

Cognizant will follow an extensive ITIL based change management process. Cognizant will utilize ServiceNow to run the Change Management process after receiving change tickets. The change management process will be run along with Cognizant application team to ensure that all changes are approved after validation of application impact. Cognizant will implement the changes in the Health Net environment as per the process below:

Change Management Process Flow

The Change Advisory Board (CAB) will consist of Health Net and Cognizant members and will take all decisions on planned and emergency changes. The CAB will be formed during the transition phase and will continue into the steady state of the engagement. The CAB will perform the following activities but not limited to:

- Reviews respective agenda and details of each RFC on the agenda prior to each CAB meeting based on Report distributed
- Approves/disapproves or requests more information for each RFC
- Assess Emergency Changes (for example outage due to hardware failure, as required)
- Participates in scheduling and coordination of change schedule
- Ensures all changes are properly assessed and evaluated
- Participates in Change Management process review and evaluation (efficiency and effectiveness of Change Management)
- Review all opened RFCs
- Other necessary tasks to complete the change

The CAB consists of the following members from Cognizant:

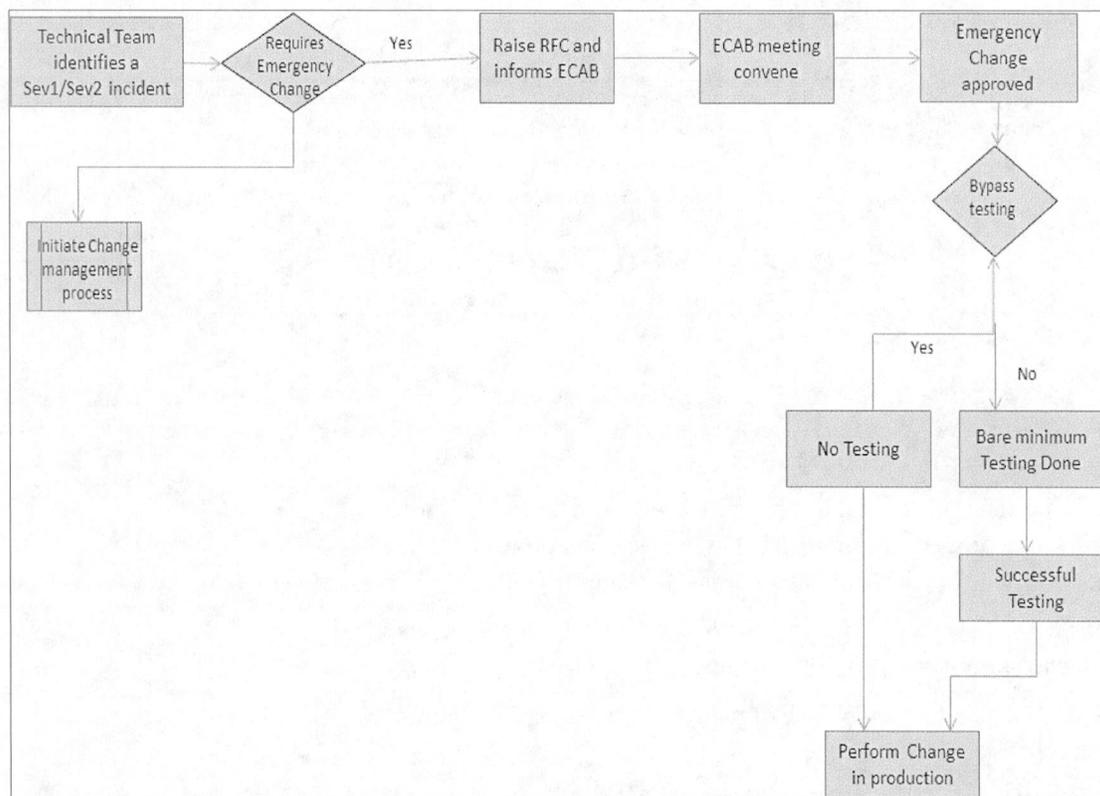

- Change Manager
- Incident Manager
- Delivery Manager
- Application support team
- Use case Lead

Health Net will be represented by:

- Health Net Operations Team

### **Emergency Change Management**

Any service interruption that is identified as high impact, where the number of users affected or systems or services that are critical to the organization are involved, must be attended to immediately. The resolution of the problem must be accomplished quickly, and will adhere to the following emergency process flow.

The procedure to be followed is the following:

- An urgent meeting of the ECAB (Emergency Change Approval Board) will be held
- If it is difficult for the ECAB to meet or if it occurs over a weekend or during a holidays a decision is needed from the change manager to postpone the problem resolution

As the priority objective in the event of emergency changes is to restore service, it may be needed for the associated processes to follow an out of sequence process order from the normal case (i.e. the CMDB is recorded and the associated documentation completed after the change has been made).

However, it is essential that when the emergency change is closed, the change information is recorded as it would be in the case of a normal change. If not, future changes may result in incompatibilities, incorrectly recorded configurations, etc. and could give rise to new incidents and problems.

Emergency changes are covered in the SLA document and it would be based on a Severity 1/ Severity 2 situation. The number of emergency changes with regards to total number of infrastructure changes should not exceed 10% in a month.

### Roles and Responsibilities: Change Management

Roles	Responsibility
Change Manager	<ul style="list-style-type: none"> <li>• Accepts, filters, and classifies RFCs.</li> <li>• Obtains required authorization for the change.</li> <li>• Plans and coordinates the implementation of the change.</li> <li>• Reviews implemented RFCs to ensure the objective was met.</li> <li>• Assembles CAB for emergency RFCs.</li> <li>• Generates change management reports.</li> </ul>

Change and Release Management Services Roles and Obligations	Cognizant	Health Net
Participate in weekly CAB meetings	X	X
Establish Change classifications (impact, severity, risk) and Change authorization process, including a list of contacts authorized to request Changes to scope by level of authority and any updates thereto	X	X
Document and classify proposed Changes to the CAB, including required risk impact, test plans and back out plans of those Changes	X	
Develop and maintain a schedule of planned Changes and provide to Health Net for review as required	X	
Determine Change logistics	X	
Communicate and coordinate recommended Changes with all affected parties	X	
Schedule and conduct Change and Release Management meetings to include review of planned Changes and results of Changes made	X	
Provide and continually maintain Change Documentation	X	
Authorize and approve scheduled Changes or alter the schedule of any or all Change requests	X	X
Notify Health Net and other Third Parties of Change timing and impact	X	
Implement Change and adhere to detailed release plans	X	
Modify and update systems and documentation impacted by implemented Changes (e.g., CMDB, Asset Management System, Service catalog (if applicable), DR plan, SOP)	X	
Verify that Change met objectives and Resolve negative impacts from the Change	X	
Monitor Changes and report results of Changes and impacts and provide single portal access to reports and associated logs	X	
Manage Change communication with Health Net and Third Parties as required	X	

Change and Release Management Services Roles and Obligations	Cognizant	Health Net
Perform quality control activities and approve Change results	X	X
Secure and maintain master copies of all in-scope Software versions in a secured Software library and update CMDB	X	
Implement and document out-of-CAB-cycle changes related to the Infrastructure components	X	

### 3.1.6 Capacity Management

#### Goals and Objectives

The goal of capacity management is to optimize the capability of the IT infrastructure in order to deliver a cost-effective and sustained level of availability that enables the business to satisfy its objectives. The goal of capacity management is to continuously optimize existing and future IT resource demands and supply. Based on this optimizing goal, the capacity management process maintains a capacity plan and initiates requests for change that may result in environmental updates or new facilities.

The activities include:

- Monitoring the infrastructure components to ensure the agreed-upon service levels are reached
- Analyzing the data monitored from the previous activity and creating trends to establish baselines
- Tuning the systems based on the established baselines
- Implementation of new or changed capacity
- Influencing the demand for capacity. This activity provides important inputs into both the capacity plan and service level agreements
- Gathering and updating technical, business, and other information relevant to the Capacity Management database

#### Capacity Management Process Flow

Cognizant will adopt a structured process for capacity management to ensure that the current and future needs of the business with respect to IT infrastructure are provided cost effectively by understanding the performance trends of existing infrastructure and business needs in line with the technology changes in the industry. This will be discussed with Health Net periodically in monthly governance meetings. Cognizant will gather all the necessary inputs to the capacity plan from incident information from incident management, CMDB and performance management tools. (Refer to the tools section for more details).

Capacity Management Process is broken down into following sub-processes

**Business Capacity Management** - Typical strategic activities to plan and implement business requirements in a timely manner are:

- Ensure that future business requirements are planned and implemented in time
  - Understand Health Net's capacity requirements including business demands which can be brought forward at the governance meetings with the Health Net Program Manager
  - Design new services or make recommendations for procuring hardware and software, where performance and /or Capacity are needed
- Propose service design targets to SLM that can be monitored
- Provide SLM with information, any analysis done to the SLA breaches
- Use the current resource utilization data to trend, forecast or model the future requirements. Consider business inputs, plans outlining new services, any improvements and growth envisaged in existing services while forecasting for future requirements

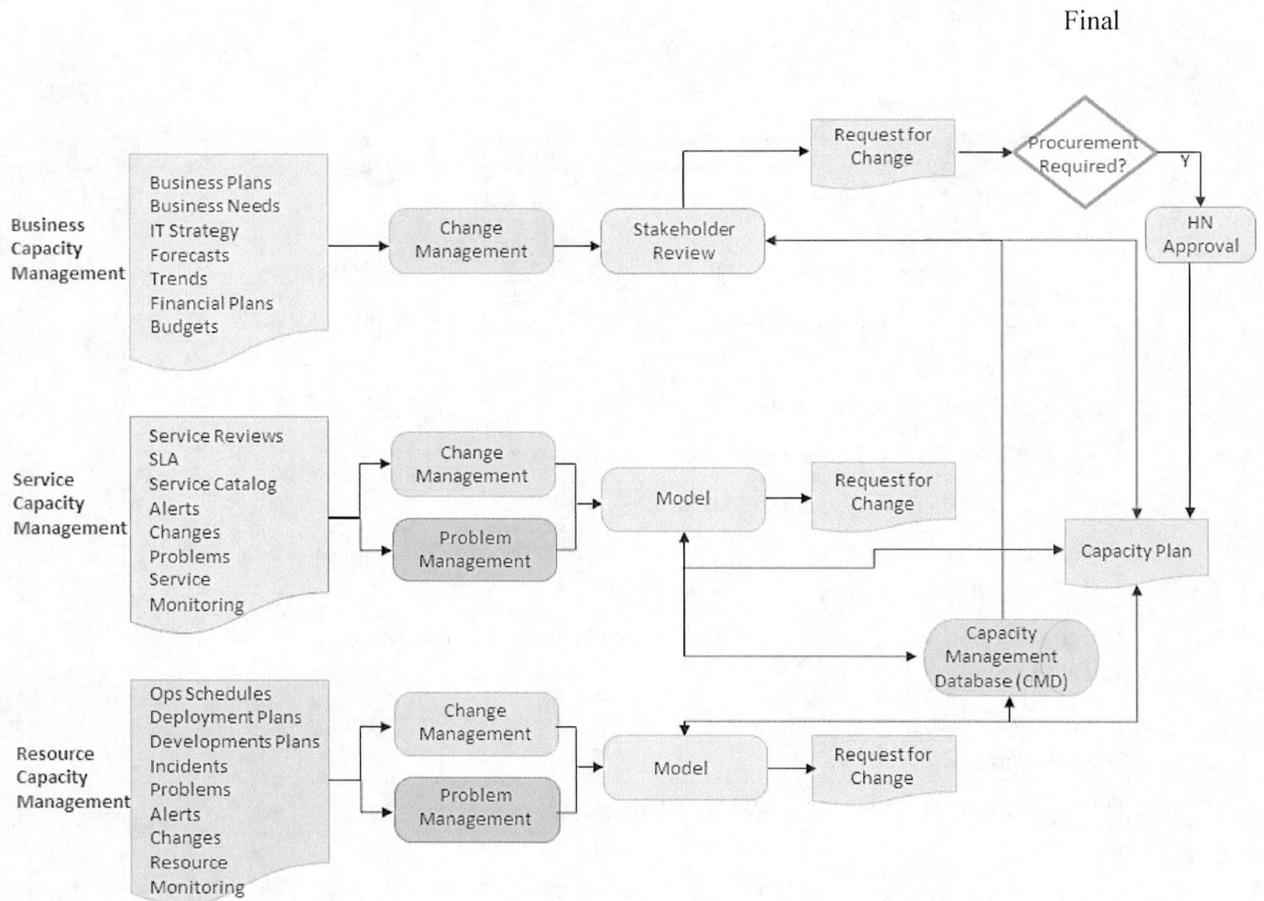

**Service Capacity Management** - Typical tactical activities to performed to compliance with service level agreements

- Monitor applications and business processes and understand resource consumption patterns and cycles to ensure SLAs are met
- Record, analyze and report the data
- Ensure data is collected, services are modeled, and normal service level trends are maintained
- If service related incidents / problems are raised pertaining to Capacity, evaluate the issues and provide necessary inputs
- Raise RFCs pertaining to service capacity through formal Change Management Process
- Establishing acceptable capacity thresholds

**Resource Capacity Management** - Typical operational activities to manage the capacity and performance of individual components within the infrastructure in a timely fashion are

- Monitor, measure and record utilization details for all the individual components within the infrastructure; this will be discussed at monthly PMR meetings and appropriate action will be agreed upon
- Analyze the collected data and prepare utilization reports and exception reports
- Whenever exceptions (threshold , SLA breach) occur take short-term or immediate actions (disk clean-up, fine tuning, etc.) to meet business requirements
- Provide solutions to resolve any incidents, problems pertaining to capacity. If any change is necessary implement using the RFC process
- Establishing acceptable capacity thresholds
- Obtain Health Net approval for procuring additional capacity

As this is an ongoing activity, each capacity management request would logically follow a well-defined process to maintain consistency. As a result of the capacity plans, there can be a trigger to the change management process and subsequently to procurement process. Both these activities will involve the discussion and approval from Health Net before an actual change can be made. Also based on the future growth forecast of Health Net, Cognizant will jointly work to frame the capacity plan. The high level approach is outlined below:

### Capacity Management

#### Roles and Responsibilities: Capacity Management

Roles	Responsibility
Capacity Manager	<ul style="list-style-type: none"> <li>• Forecasting future service capacity requirements</li> <li>• Providing consulting expertise for the review and creation of any external contracts that include capacity clauses</li> <li>• Use of modeling tools and other capacity planning techniques</li> <li>• Changing the batch schedule</li> <li>• Capturing metrics and creating performance reports</li> <li>• Submitting RFCs for schedule changes</li> <li>• Ensuring high availability (24x7)</li> </ul>

Capacity Management Services Roles and Obligations	Cognizant	Health Net
Establish and continually maintain a comprehensive Capacity Management planning process	X	
Review and approve Capacity Management planning process		X
Develop capacity plans that meet Health Net demand and growth projection and SLRs	X	
Review and approve capacity plans		X
Define future capacity requirements and define thresholds		X
Participate in all capacity planning reviews		X
Assess capacity impacts to all technology when adding, removing or modifying services	X	
Continually monitor IT resource usage to enable proactive identification of capacity issues	X	
Recommend Changes to capacity to improve service performance and/or reduce costs	X	
Assess impact/risk and cost of capacity Changes	X	

### 3.1.7 Asset Management

#### Goals and Objectives

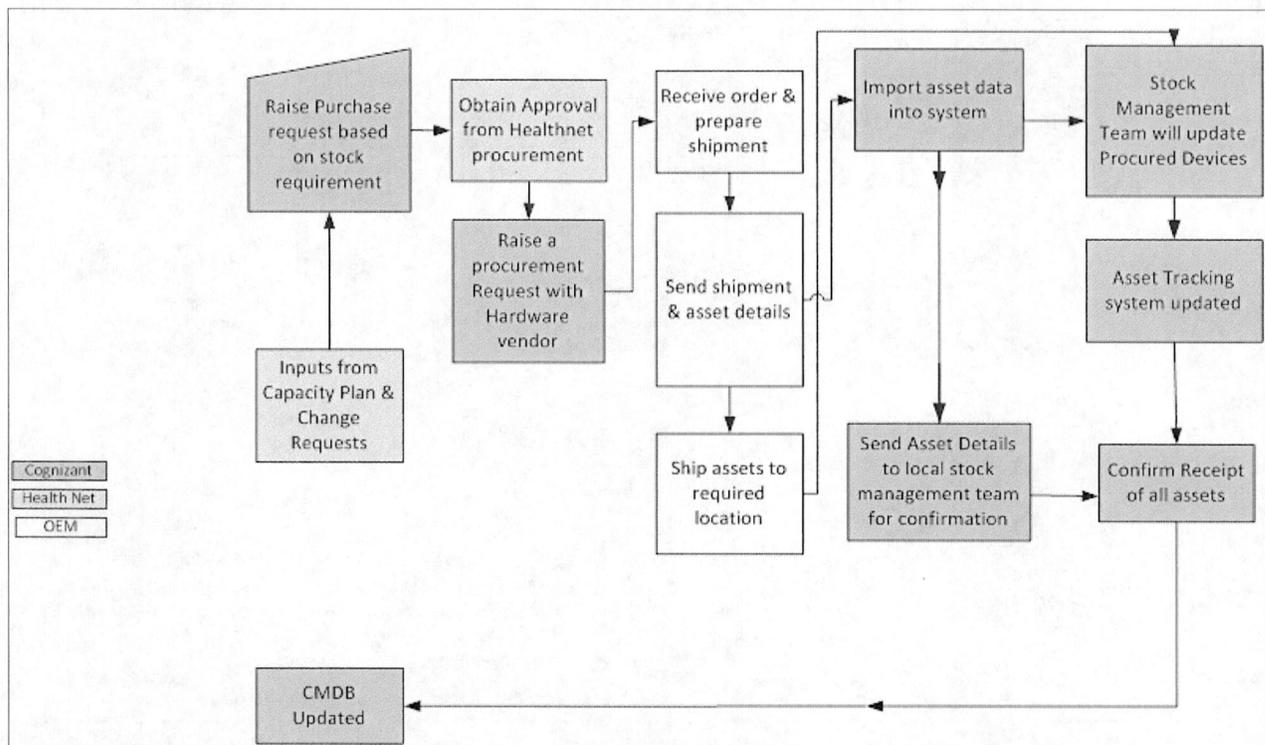

- Prolonging asset life and aiding in the decision to rehabilitate/repair/replacement assets through an efficient and quick method
- Meeting Health Net demands with a focus on system sustainability
- Meeting service expectations and regulatory requirements
- Improving response to emergencies
- Maintain License Compliancy for Hardware and Software

#### Asset Management Process

The following activities would be performed under the asset management that would be provided by Cognizant:

- Tracking and Reporting
  - Assets hosted and managed in cognizant datacenters
  - Ensure auditable control of all end points (deployed, stock, repair, quarantine, legal hold)
  - Identify location of end points using a Unique ID
  - Update Asset management tool (ServiceNow)
  - Report generation
- Asset Purchasing Management

- Includes all the purchase activities only for Cognizant’s data center equipment
  - Asset management tools Manage ServiceNow would be used to track PO management for the Cognizant data center equipment only (this is an offline and manual activity )
  - Cognizant would provide monthly procurement forecast report to Heath Net as part of Desktop/Laptop refresh activity
  - Stock Management
    - Hold and Manage stock, transfer stock between sites
    - Order and receive/ dispatch equipment
  - Disposal
    - Health Net would identify the EUC component (desktops, scanners, printers, etc.) that are to be decommissioned (such as end of lease equipment, complete hardware break down, etc.)
    - Cognizant would co-ordinate with existing Health Net contracted vendor for the asset disposal for recycling
- Note: High level Depot activities and responsibilities are detailed in the Health Net IO Program Solution documents in the Section 2.3.3.2*
- Support Repair Activities
    - Diagnosis, warranty and non-warranty repairs

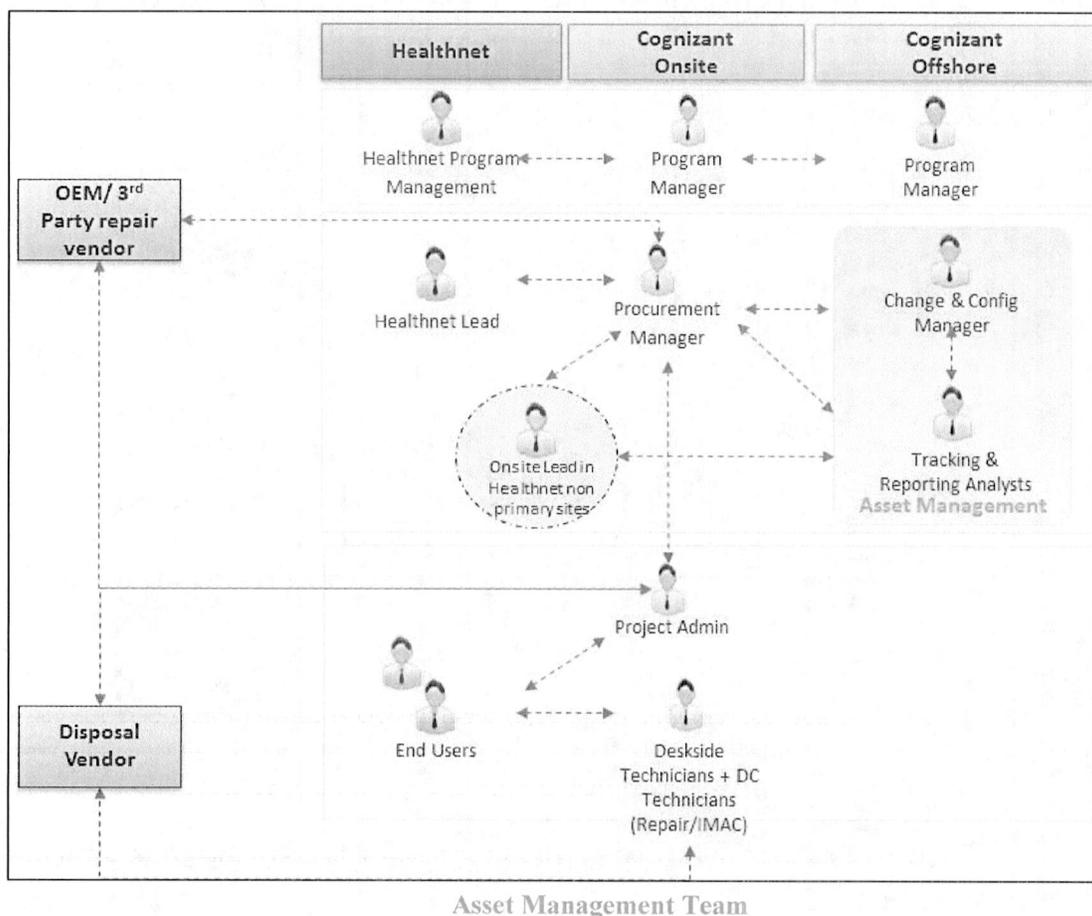

Asset Management Workflow

The ARC/RRC billing will be tied into asset management process through the ServiceNow tool which would be utilized to have up to date inventory of assets to enable the unit price model.

**Asset Tracking and Reporting**

Cognizant’s solution principles for managing asset data and achieving high quality include a comprehensive approach to asset management and tracking. Asset data in the asset database is created and maintained as the result of notifications from lifecycle activities, these data are continuously validated against what is found on the estate by manual audits or other trusted data sources (e.g. 3rd party contract schedules). Using asset data updates from change management and underpinning with a robust validation process typically results in data accuracy above 95%.

Cognizant Asset Tracking and reporting Team, which will be a part of the SMO, will actively investigate all data exceptions to discover the true status of each asset. Cognizant will be responsible for maintaining the asset data and accountable for its accuracy. Cognizant will have an Asset and Procurement Manager to be accountable for the maintenance of the data. This role will be based at Onsite. A team of Asset Management resources to perform data cleansing and processing will be located at Offshore to provide the service.

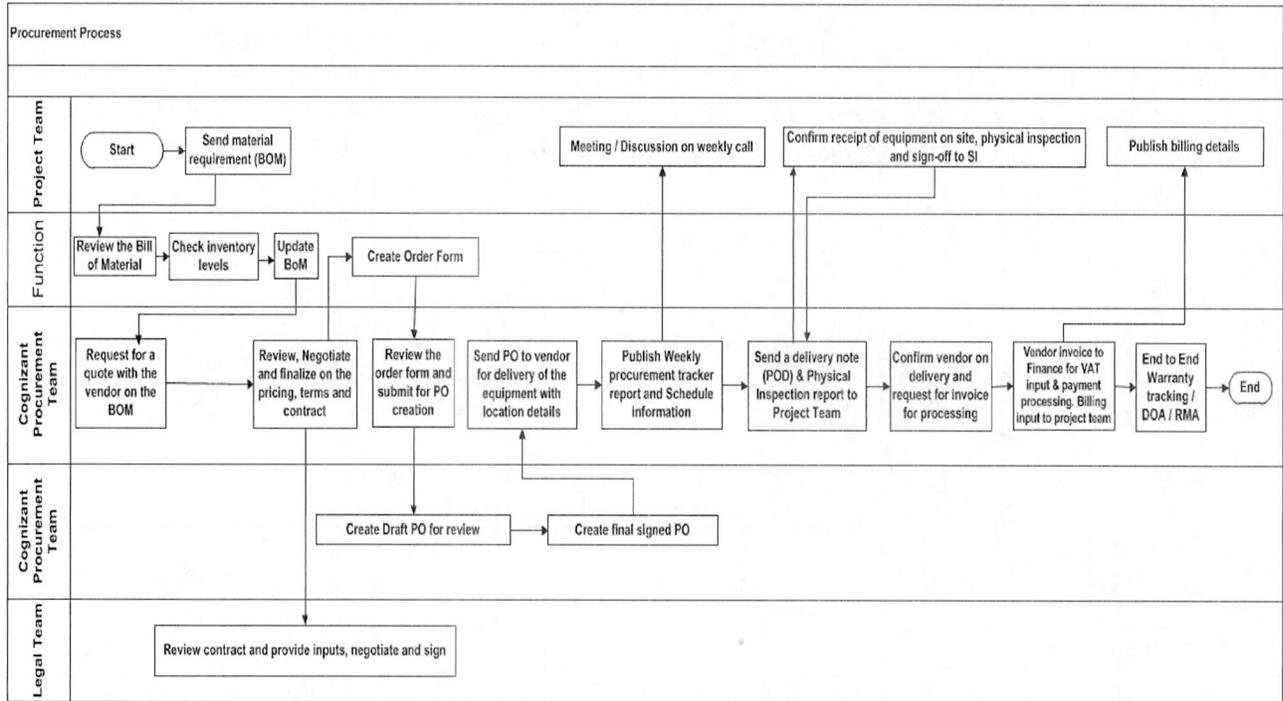

Cognizant will be responsible for ensuring that the Asset processes for all activities for which they are responsible are fully integrated with the asset lifecycle management processes, and will also work with Health Net to review the processes which impact asset lifecycle management and make recommendations

for improvements necessary to enable the maintenance of high quality asset data. Cognizant would use ServiceNow to Track and report Hardware, software inventory and ensure software license compliance for assets hosted and managed in Cognizant Datacenters. ServiceNow is a web-based IT Asset Management (ITAM) tool that helps to monitor and manage assets.

#### **Asset Purchasing Management**

The Procurement service will interface with asset management service, to check inventory levels before initiating new purchase orders. Cognizant will use ServiceNow for offline reporting of the asset inventory. The re-ordering levels will be decided during due diligence phase. Cognizant's vendor management team will be responsible for management of the procurement and interaction with Health Net/ Cognizant's 3<sup>rd</sup> party vendor. Shown below is the process flow to be followed for asset procurement:

DRAFT

Procurement Management Process

### End User Asset Management Services

Cognizant will provide End point provisioning, re-provisioning and decommissioning Service by a service request/IMAC request to add and remove standard end Points to/from the Health Net environment. This service will be delivered in an Onsite-Offshore model, where the Offshore team will service activities such as image deployment, user migration, active directory updates, and the Onsite team will coordinate with desk side teams and stock management teams for the execution of the “touch services” associated with the service requests. CMDB and inventory/asset system updates will be in line the asset management functions. The process will be managed by coordinators from the key primary sites and Cognizant Offshore delivery centers. Hardware stock management will be driven by dedicated procurement coordinators in key primary hub sites (sites which have high density of devices) and Onsite teams located in other primary sites. The service will closely work with the asset management service for managing stock assets, and utilize CMDB updates and asset/inventory management platform of Cognizant for stock tracking and reporting.

Desk side Services also includes depot service as part of the solution. Cognizant assumes Health Net would provision Secured room/warehouse to maintain Spares/inventory for EUC devices at identified locations.

Typical high level activities performed by depot support team would entail the following:

- Depot Support will maintain the inventory of spares/ in order to facilitate desktop/laptop/printers part replacement for sites under its administration area
- Depot Support will receive/maintain the inventory of New desktop/laptop to install new system or replace existing PC for the users
- Dispatching Parts and Repairing devices by replacing parts
- Depot Support Location would assist in imaging and build services for Laptops/Desktops which are not pre-built by the OEM.
- Depot Support will provision Laptops/Desktops to support home users for any quick replacements

### Roles and Responsibilities: Asset Management

Asset Management Services Roles and Obligations	Cognizant	Health Net
Provide an Asset Management System, processes and procedures for all Health Net hardware and Software.	X	
Manage lifecycle of all in-scope Assets from requisition ordering, inventory, installation, preventative maintenance to disposal	X	

Asset Management Services Roles and Obligations	Cognizant	Health Net
Provide Health Net inquiry and reporting access into the Asset Management System for all Assets including data access via a real-time access reporting portal in exportable and analyzable format and ad hoc and recurring (e.g., monthly) reports	X	
Input, maintain, update, track and report all in-scope Assets throughout the Asset lifecycle (i.e. acquisition to retirement)	X	
Continually maintain the accuracy of the data of Assets in the Asset Management System according to SLRs	X	
Update Asset records related to all Change activities (e.g., Install/Move/Add/Change/Disposal (IMACD) activities, Break/Fix activities, enterprise reorganization and Change Management activities)	X	
Provide, and upon Health Net approval, implement remediation plans for Asset Management System deficiencies	X	
Review and approve physical Asset inventory reports and remediation plans of the Asset Management System		X
Reporting the end-of-life assets/technology obsolesce	X	
Tech Refresh	X	X

### 3.1.8 SLA Reporting

#### Goals and Objectives

- To present a clear, concise, and measurable description of service levels to Health Net
- Proactive SLA Monitoring and Alerts to keep IT in Control
- Real-time status and SLA trends over time
- Management Reports based on services being monitored and reported to all stakeholders

### SLA Reporting Overview

Cognizant will implement several controls and measures that will assure consistent quality of services are delivered to Health Net. Cognizant's approach to project and engagement reporting is based on accuracy, transparency and timeliness.

Cognizant will implement a rigorous Service Level Management (ITIL) process to improve IT service quality via constant Monitoring and Reporting/Reviewing to meet Health Net business objectives. As part of monitoring, reporting and reviewing the following activities will be conducted:

- Monitoring SLA / KPIs using dashboard, alerts and reports
- Reporting, both scheduled and ad-hoc
- Disagreements and queries review, and resolution using corrections and exceptions

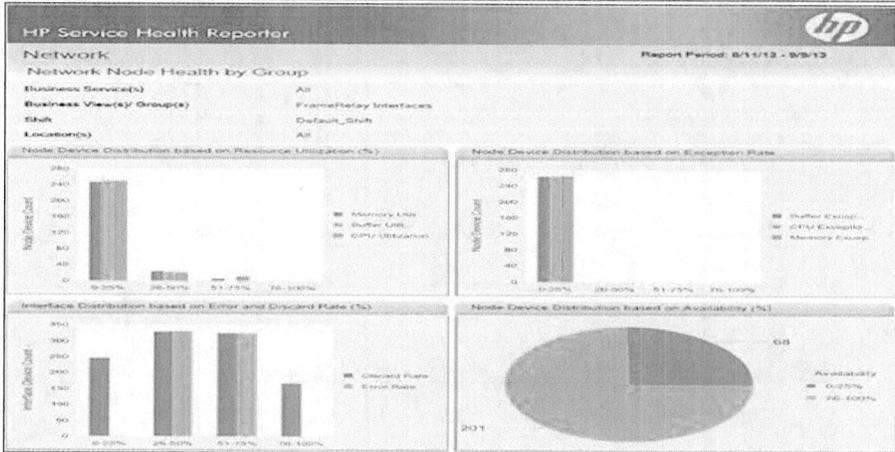

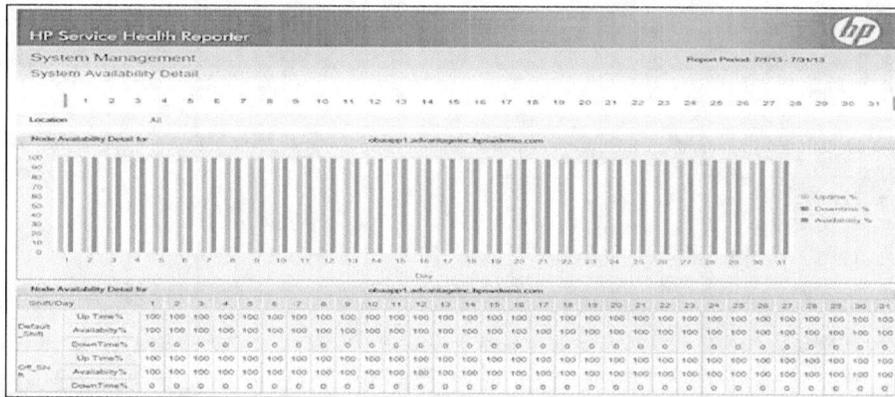

Our Cognizant proposed HP service Health Reporter provides cross-domain reporting of the availability and performance metrics for the IT infrastructure elements and enabling these metrics to be directly related to the business services. HP Service Health Reporter will be tightly integrated with HP OMW and HP NNMI to collect the performance data to be saved in PMDB (Performance Management database). This enables storing the reporting long term trend analysis and cross domain analysis. HP SHR comes with a comprehensive out of box reports which helps technical SME to use the tool quickly.

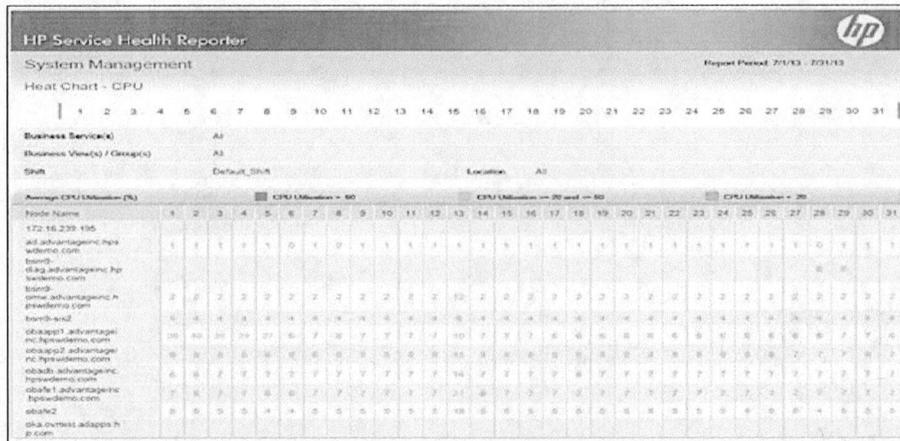

As part of Periodic Review Process, the following activities will be conducted:

- Review SLAs and KPIs with Health Net periodically
- Publish and review achievements with the aid of standard reports

Health Net will receive a set of standard reports that can include performance, utilization, and availability reports. These reports are scheduled and are provided to the client on a monthly basis.

Sample Reports

Roles and Responsibilities: SLA Reporting

SLA Reporting Services Roles and Obligations	Cognizant	Health Net
Define Service Level Monitoring and Reporting Services requirements and policies		X
Define SLRs		X
Report on SLR performance and improvement results	X	
Coordinate SLR monitoring and reporting with designated <b>Health Net</b> representative and Third Parties	X	
Measure, analyze, and provide management reports on performance relative to SLRs	X	
Develop and deliver SLR improvement plans where required	X	

### 3.1.9 Knowledge Management

#### Goals and Objectives

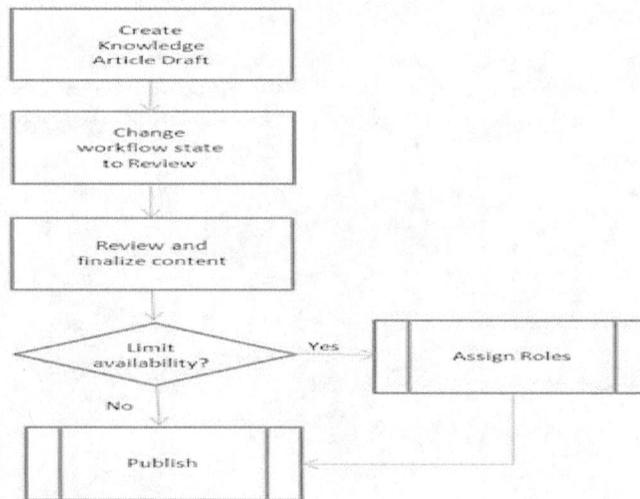

The key goal of various initiatives in knowledge management is to provide tactical support to enable improvements in the use and effectiveness of the knowledge base. The following are the detailed objectives:

- Productivity benefits and cost reduction
- Improved resolution time and effort
- Provide potential to expand and grow
- Encourage free flow of ideas leading to insight and innovation
- Foster a collaborative culture
- Facilitate better, more informed decision
- Increase Health Net satisfaction
- Continuously collect, store, manage and update explicit and tacit knowledge

Cognizant will develop a knowledge repository for Health Net right from the beginning of the engagement. During the transition phase, Cognizant would document all its learning from the Health Net environment, standard operating procedures (SOPs), processes etc. and place them in the repository. This repository would form the basis of how the support would be provided to Health Net during the steady state. During steady state, Cognizant would document and collect all the information related to process improvement, issue resolution, etc. These documents would also become part of the repository.

With the help of knowledge repository, Cognizant's support teams will be better equipped to handle the user queries and asking them the right questions to understand their issues / requirements.

## Knowledge Management Process

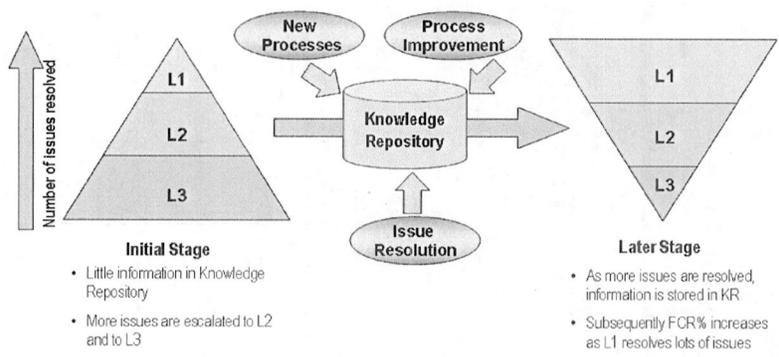

- Knowledge Process Manager creates a new article, either directly on the Knowledge form or from an incident or problem (one of the functions performed by CSI/Transformation Architect)
- Administrator adds roles to the article, if appropriate, and changes the workflow state to Review
- Knowledge Process Manager verifies that the article is not a duplicate and edits the content, as necessary
- Administrator changes the Workflow field to Published
- Article is available to appropriate users through the knowledge portal and search

All of Cognizant's support resources would undergo training on using the knowledge repository. This training would specify:

- The kind of questions to be asked to triage the problem at the first level

- Steps to be taken to narrow down the cause. E.g., if the user reports that he cannot send/receive mails, the analyst would narrow down the problem using a series of questions to identify if it's a network issue, a mailbox size issue or an exchange server issue
- Resolution methodology

Upon receiving the call, the L1 team will identify the problem. During identification, the L1 team would check if there is any solution / workaround available in the repository. If available, the L1 team will solve the issue and close the ticket. Otherwise, the analyst would escalate it to the proper support team. The use of repository thus would increase the efficiency of the analysts in resolving the issues. The reports on the KEDB usage will be retrieved monthly.

Typically, in any engagement, the knowledge base is initially small. The First level resolution team will forward most of the issues it receives to Level 2 / Level 3 teams due to limited information in the repository. The Level 2 / Level 3 experts will resolve the incident and add their learning / solutions in the knowledge repository. As the engagement progresses, the knowledge repository is filled with information specific to issue resolution. After some time, the First level resolution desk will start resolving more issues, thus increasing the First Call Resolution (FCR) % and decreasing the turnaround time to solve these issues.

**Roles and Responsibilities: Knowledge Management**

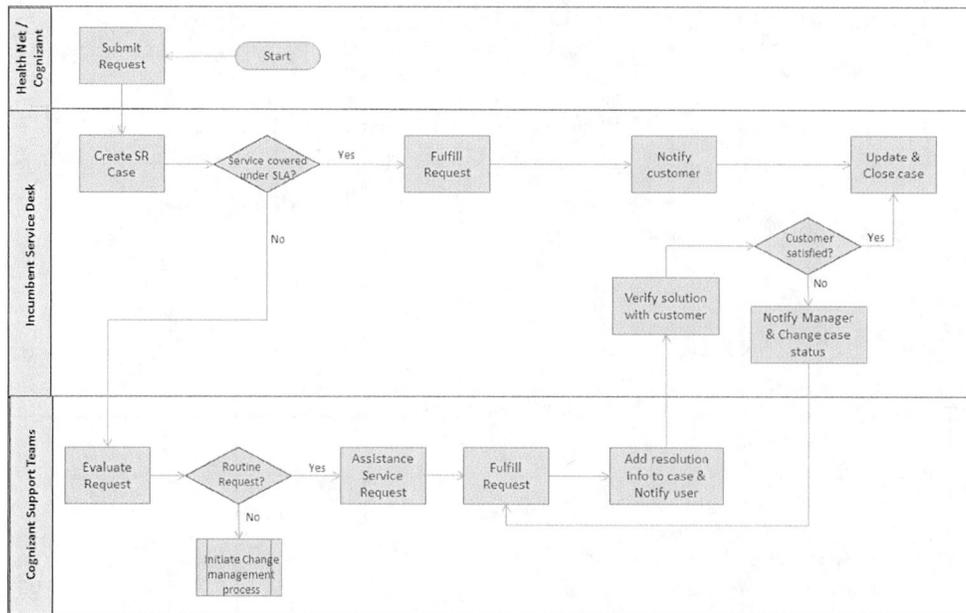

Roles	Responsibility
CSI/Transformation Architect	<ul style="list-style-type: none"><li>• Ensure that the KM process supports the Technical Support team, Support Groups, End Users and the other processes</li><li>• Preparing management reports and ensuring Knowledge Article reviews</li><li>• Reviewing monthly management metrics and taking action where necessary to ensure compliance, governance, and continued process maturity</li><li>• Knowledge monitoring and interaction to other processes</li><li>• Making recommendations for Process Improvement Plans</li></ul>

**3.1.10 Service Request Management****Goals and Objective**

The Service Request Processes manage submission and handling of all requests for service to ensure:

- Service requests are properly logged
- Service requests are properly routed
- Service request status is accurately reported
- Queue of unfulfilled requests is visible and reported
- Service requests are properly prioritized
- Solution provided meets the requirements specified by the user

Service Request Process Flow

- Perform the same functions and will have the same responsibilities for Service Requests as required for Incident Management, including:
  - Monitor, identify, integrate and resolve requests in Health Net’s environment, in accordance with the Service Levels
  - Provide Health Net’s representative with the estimated resource or cost impacts of Service Requests
  - Participate in Health Net’s IT Project process where applicable for the Services including but not limited to: participate in Project planning meetings, solution design sessions, provide timely estimates for resources or cost impact of Service Requests, contribute knowledge and expertise, including information based on “lessons learned” and experience with similar technologies used with the Cognizant’s other customers.

- Provide support for Service Requests, including interfacing with the Health Net entity initiating the Service Request and providing support for the following: the documentation standards; production task list and run sheet updates; informing day-to-day staff of the changes to the environment; and support for Health Net’s coordination and acceptance of any Service Request deliverables
- Escalate unresolved requests according to Health Net procedures. Health Net has the right to escalate at any time it deems necessary to meet its operational needs
- Address all Service Requests promptly after receipt; monitor, control, and report on each request until complete or otherwise resolved
- Provide a mechanism for expedited handling of Service Requests identified to Cognizant by Health Net as a high priority
- Track and manage all Service Requests from Authorized Users
- Fulfill Service Requests by working with service management teams, Business owners, and Third-Party Vendor(s)
- Liaise with Change Management to ensure that Service Requests follow the Change Management Process for Standard Changes and Requests For Changes (RFCs).
- Liaise with Access Management to ensure that Service Requests follow the Access Management Process for access to a service.
- Verify the request is fulfilled to Health Net user’s satisfaction prior to closing the ticket. If not fulfilled correctly, re-open the original ticket (user does not need create a new ticket)
  - Provide regular reporting identifying tasks, present current status reports and identify potential bottlenecks and problems. Cognizant will also notify user promptly of any problems that might affect the expected fulfillment date. In addition, Cognizant will provide user Service Request status reports on a monthly basis or as needed, including statistics on number of outstanding requests and planned completion dates, number of requests received for the current month, number of requests completed for the current month, and average time to complete requests (e.g., current month, year-to-date)

**Roles and Responsibilities: Service Request Management**

Role	Responsibilities
Service Request Manager	<ul style="list-style-type: none"> <li>● Develop task lists for the more complex and most common Assistance Service Requests. For example, a new employee needs active directory id and email account (Server Group), New PC (PC Group). These task lists will be set in CRM for the related service and used to provide more detail in each case</li> <li>● Monitor request queue to ensure all requests are being handled</li> <li>● Make final decision on priority of items in the request queue</li> <li>● If necessary, make decision on which resources need to be involved in fulfilling the request</li> </ul>

	<ul style="list-style-type: none"> <li>• Review service task lists for request fulfillment to ensure policy compliance, value tasks for service being rendered, and for any vulnerabilities or risks</li> <li>• Perform post-implementation review to ensure that all services are functioning properly and all documentation is complete</li> <li>• If issues arise during the service delivery, review service task list compliance or improvement needs</li> <li>• Monitor adherence to the agreed upon SLAs/KPIs for Service Request resolution</li> </ul>
--	--

Initiate Service Request	X	X
Creation of new SRs	X	X
modification of existing SRs	X	
Accept Request from Health Net	X	
Determine whether this request is a request for assistance or change	X	
Prioritize SR's in the queue	X	
Select next SR to be worked on	X	
Implement technical solution	X	
Verify solution with Health Net	X	
Close case	X	
Develop checklists to be followed for Service Requests	X	
Verify checklists are being utilized for SR's	X	
Develop task lists for SR's to be utilized by Service Desk	X	

### 3.1.11 Patch Management

#### Goals and Objectives

Patch management is the process of controlling the deployment and maintenance of interim software releases to production environments. It aims to ensure all patches required for system functionality and security. Patch Management also ensures the successful completion of patches without any failure.

The objective of the Patch Management procedure is to define a standard method based on the best practices available in the industry to carry out the installation of all patches.

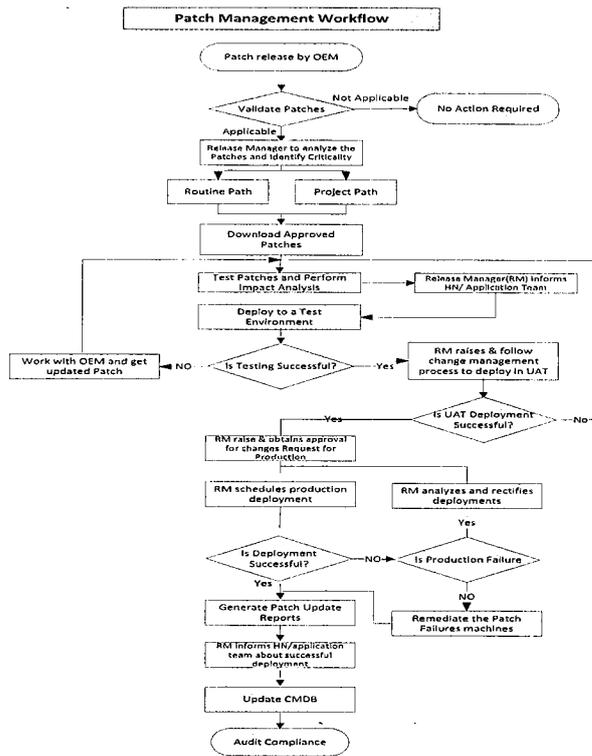

Considering the criticality of the patch management process, Cognizant will ensure that there is seamless integration of the release management and change management process. To achieve this, Cognizant has configured a dedicated release manager to drive successful patch implementation in the environment.

Patch Management helps maintain:

- Operational efficiency
- Effectiveness
- Overcome security vulnerabilities
- Stability of production environment

#### Patch Management Process

The following activities would be performed under patch management workflow provided by Cognizant:

Patch Management Workflow

- Notification is received from OEMs in advance of the normal release period

- Release manager identifies the criticality of the patches
- Classify the criticality type of path as either a routine path or a project path and patches to be made available for testing
- Test the patches and perform impact analysis
- Deploy the patches to the test environment
- Once successful, RM raises the change request for patch deployment to production
- Health Net approves patch deployment recommendations and Cognizant initiates patch deployment

**Roles and Responsibilities: Patch Management**

Activity	Health Net	Cognizant
Patch Validation	X	
Patch Criticality Definition	X	
Patch Testing and Impact Analysis	X	
Patch Production Deployment	X	
Patch Failure machines Remediation	X	
Patch Update Reports	X	
Update CMDB	X	
Approval of patch deployment recommendations		X

**3.1.12 Software Currency**

**Goals and Objectives**

Cognizant’s asset management team will administer Health Net’s license and currency management. This team will be entrusted with tracking the currency of IT software/entities such as Operating System, Database, Servers, Network and Routers etc. The asset management team coordinates with OEM for any updates. The update is driven by the following:

- The particular software is EOL ( End of Life)
- OEM mandated critical updates
- Application driven changes

This will help in:

- Inventory tracking
- Usage metering
- License harvesting
- Compliance verification

**Software Currency Management Process**

Cognizant will use ServiceNow to track and report software inventory and ensure software license compliance. It is a web-based IT Asset Management (ITAM) tool that helps to monitor and manage assets.

Cognizant will have regular meetings with Health Net on the importance of the changes and the implementation plan based on Health Net’s technology refresh plan and application release calendar. Once Health Net approves the change, Cognizant will follow the change management process to implement the change including testing and UAT deployment and finally production deployment. For application driven software updates, there will be a comprehensive testing plan to ensure all critical applications run without downtime. The software currency for Health Net would be managed at N-1 level for most of the software and at N-2 level which has dependency on other release activities like application upgrade etc. (N-OEM Vendor major release versions).

**Roles and Responsibilities: Software Currency Services**

Service	Health Net	Cognizant
Provide an Asset Management System, processes and procedures for all Health Net Software	X	
Manage lifecycle of all in-scope software Assets from inventory tracking, usage metering to compliance verification	X	
Provide Health Net inquiry and reporting access for all software Assets	X	

including data access via a real-time access reporting portal in exportable and analyzable format and ad hoc and recurring (e.g., monthly) reports		
Testing the updates and deployment in production	X	
Review and approve physical Asset inventory reports and remediation plans of Asset Management System		X

### 3.1.13 Project Life-cycle Management

#### Goals and Objectives

A “Project” is a discrete unit of non-recurring work that generally requires startup, planning, execution, and completion with a definite start date and finish date.

The goal of Cognizant’s Project Life-cycle Management is to integrate our industry’s operational and functional expertise in IT management and our deep Health Net experience and insight to ensure successful project implementation and value realization. Effective project process management includes strategies, tactics, and tools for managing the design, development and delivery processes and for controlling key factors to ensure that Health Net’s infrastructure matches their expectations and business functions.

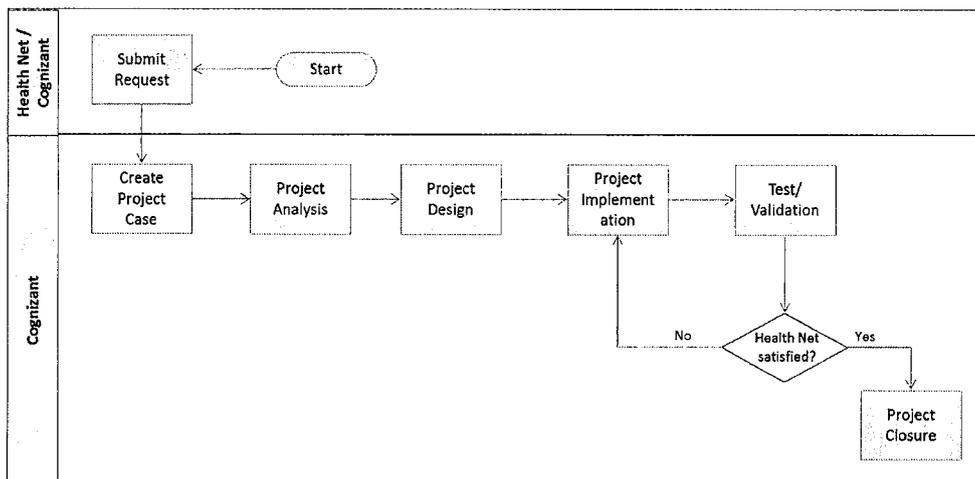

The planning and execution of in-flight projects are based on Cognizant’s proven experience and will be modified to meet Health Net -specific requirements. Some of the critical factors to be considered during the analysis of the in-flight projects are: the current stage of the project or enhancement timelines, business priorities, size, dependencies between in-flight projects, etc.

Cognizant understands that in-flight projects will run alongside the Transition phase of this engagement. For such projects Cognizant will mutually agree on a roadmap to take over project execution from Health Net if feasible. The project timelines and its impact to the Transition will also be evaluated and agreed upon by both parties.

**High Level Project Lifecycle Process Flow**

Cognizant will adopt a Project Lifecycle process flow to ensure that the current and future needs of Health Net with respect to IT are provided cost effectively.

Health Net would send out a BARR document through their project team that would include the Health Net’s IT requirements to Cognizant’s Account team. Cognizant’s Account and IO team would follow Health Net’s requirements based on the Health Net’s approved BARR document. Once the requirements are understood and agreed upon in terms of the scope and capabilities, Cognizant’s IO and Account team would proceed with initiation of the project. The project life cycle framework in-place would be used and the Cognizant team would work with all the stake holders involved to plan and get the necessary approvals and budget to deliver the project within the stipulated timeline as per the agreed terms and conditions. This diagram below depicts the high level project lifecycle process flow:

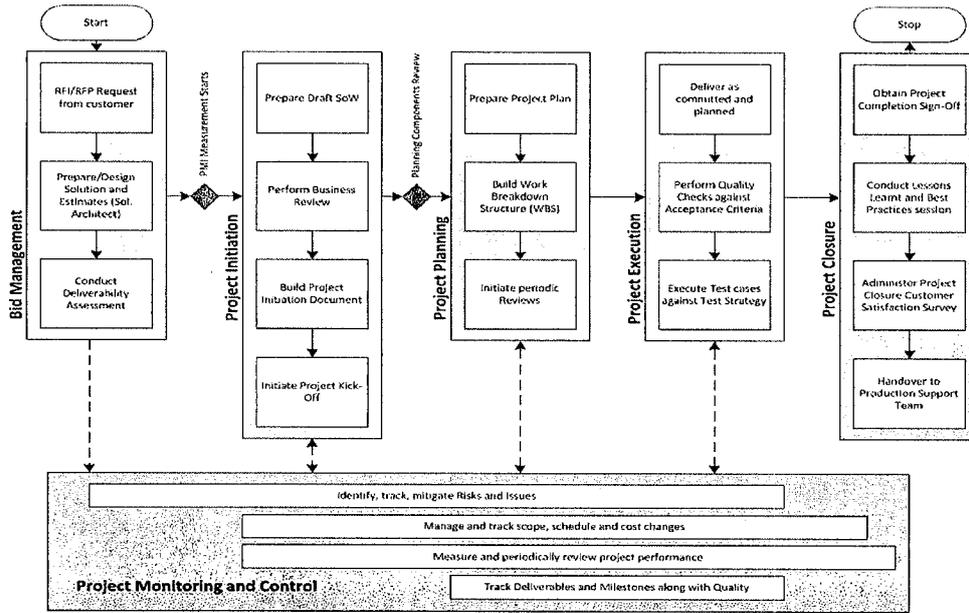

**Project Lifecycle Process flow**

- Analysis of the high level business requirement for the project
- Preparation of project schedule, project design and project management plan
- Project Estimation and technical solution provided by Cognizant for Health Net's approval
- Build/Implement the project deliverables
- Test the build environment and report to Health Net
- User Acceptance test by Health Net IT team
- Sign off by Health Net for the successful completion of the project

#### Project Lifecycle Methodology

This Project Lifecycle Methodology to be followed will be mutually agreed by Cognizant and Health Net. This will be based on the current Health Net Project Management processes and Cognizant's standard project lifecycle methodology during the start of the engagement. The diagram below shows Cognizant's project lifecycle methodology:

**Cognizant's Standard Project Lifecycle Methodology**

**Roles and Responsibilities: Project Process Management**

<p>Project Process Manager</p>	<ul style="list-style-type: none"> <li>• End to end management of project requests</li> <li>• Coordination with Health Net for all approvals related to the project</li> </ul>
--------------------------------	--

Activity	Start	End
Initiate Project Request	X	X
Prepare Project Process Plan and Design	X	
Review and approve Project Management Plan and Design		X
Pilot Testing	X	X
User Acceptance Testing		X
Approval of UAT/Test Phase Successful Completion		X

The above process flows and diagrams are for better understanding of the functions. In the event of a conflict between the solution and the scope model, the scope model document will be referred.

### 3.1.14 Infrastructure Testing

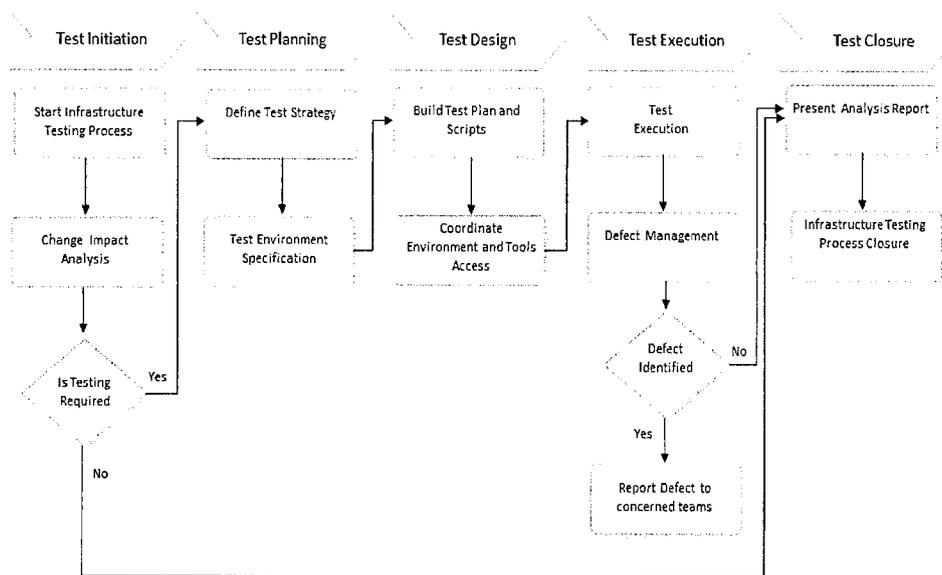

#### Goals and Objectives

Infrastructure testing depends on the nature of the change and the impact to the infrastructure. The objectives of Infrastructure Testing lifecycle which Cognizant has planned for Health Net are as outlined below:

- Infrastructure impact assessment
- Creation of test scenarios and test cases
- Validation of infrastructure and environment parameters using the test cases
- Testing the functionalities of infrastructure and environment components
- Validating that the Infrastructure and environments confirm to Health Net defined standards
-

**Infrastructure Test Life-cycle Management Process Flow**

Cognizant will follow a sequential and phased approach to the Infrastructure Testing requirement for approved Infrastructure projects (non-BAU). The Testing Lifecycle that will be followed by the Cognizant team for each phase will provide Health Net the necessary understanding of our approach. Cognizant will leverage Health Net's existing test case management tool for its infrastructure testing case management. The number of licenses which will be required will be mutually decided at the appropriate time.

**Requirement Understanding Phase**

In this phase the Business Requirement document, Design Documents and migration plans for the proposed Infrastructure change is shared with the team. Cognizant, in collaboration with Health Net's team, will analyze the documents to identify the infrastructure impacts and risks. The

Cognizant team will conduct assessment sessions with Health Net and migration teams/vendors in order to validate the understanding and the impact assessment.

**Test Planning Phase**

In this phase the Cognizant team will develop a Test Plan document which will describe how the testing will be carried out based on the approach specified in the test strategy. The test plan document will contain a detailed plan for testing the parameters as defined in the checklist along with the project phase schedule and timelines.

**Test Case Design Phase**

In this phase the Cognizant team will prepare detailed Test Cases based on the scenarios identified. There may be multiple test cases created for one test scenario. The Test Cases will contain Description, Pre-condition, Design Steps, and Expected Results for the test scenarios. The Test Cases will be then shared for review, approval and sign-off by the Health Net team.

**Test Environment Check (Smoke Testing)**

The objective of this phase is to ensure that the test environment is ready for the Cognizant team to execute the tests.

In this phase the Cognizant team will perform an initial check of the test environment which will include network connectivity to the Onsite Health Net environment, validating the server log in credentials, etc. In case any test in this phase fails, further tests will not be carried out by the Cognizant team.

**Test Execution**

The Cognizant team will implement a 2-pass approach in co-ordination with Health Net during the execution phase which is described below:

**Pass 1:** Test Cases defined in the Test Case Design phase will be executed in this pass in order to identify any deviation and defects, and will be logged accordingly

**Pass 2:** Typically consists of retesting of all deviation and defects that are found in Pass 1 and relevant regression testing if applicable.

**Test Closure**

At the end of all the test phase, Cognizant team will produce a Test closure Memo which will have details on

- The actual testing conducted against the scope
- List of outstanding defects with the assessment
- Details on required business dispensation for any deviation from entry / exit criteria
- List of all the defects raised during the execution with status and comments
- Certification note on whether the infrastructure/environment is in a state to go to next test phase

### 3.1.15 COLO Service for Third Party in Data Center

#### Goals and Objectives

This section details the process for Co-locating Health Net contracted third party vendor's IT infrastructure in the datacenter. Cognizant would host these IT infrastructures in Terremark's Centennial datacenter and Cognizant's Phoenix DC. More details on Datacenter service is detailed in Health Net IO program solution document. There is requirement to host third party's asset in the Datacenter and the following is the process that will be followed (to be refined during the course of the engagement):

- Third party vendor would share the infrastructure details of the component to be hosted in DC such as
  - New requirement like application to be hosted and associated infrastructure and security controls if any
  - Configuration details - number of devices/racks , dimensions , power utilization , network details
  - Duration of hosting, hands and feet support requirements
- Cognizant would perform capacity assessment regarding the required network bandwidth, MPLS link connectivity, floor space etc.
- Datacenter team would design, rack and stack the equipment , install cable and other activities in consultation with the vendor
- Depending on Health Net's contractual agreement with the Third party vendor, charge back for the Co-locating service would be directly with the third party vendor or with Health Net

#### Roles and Responsibilities:

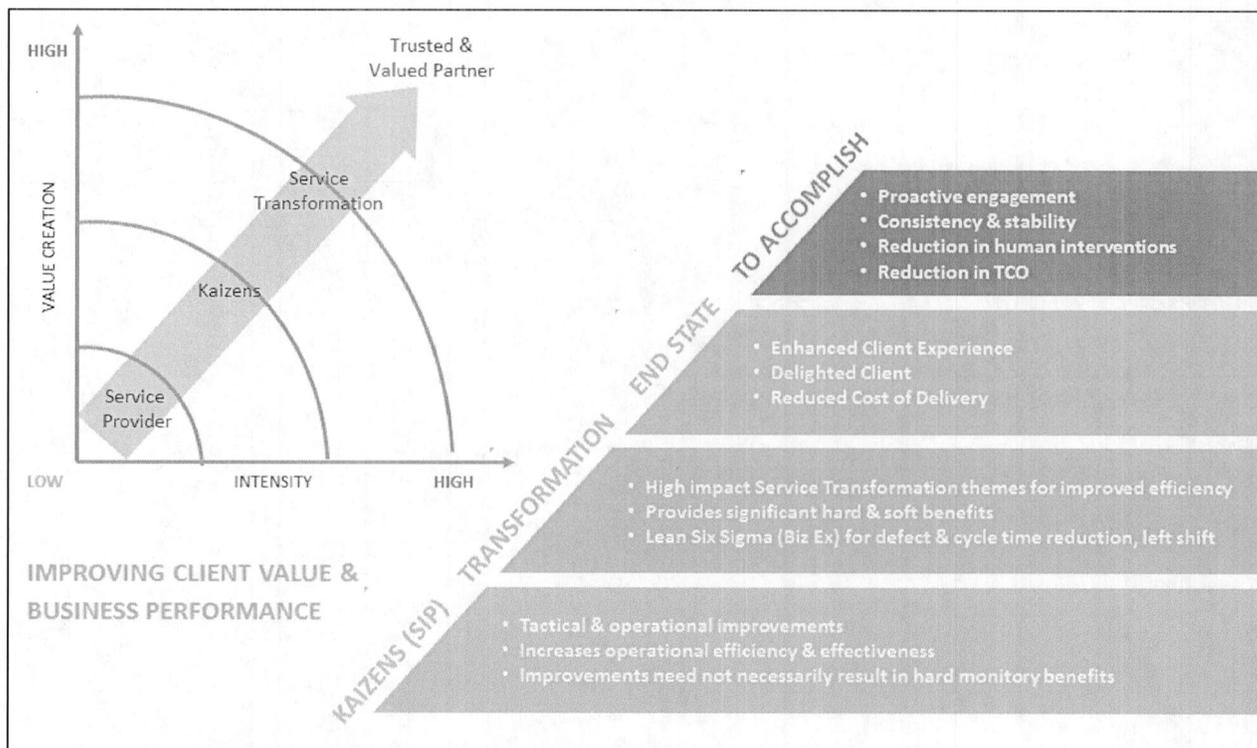

Co-locating Services	Cognizant/DC team	Vendor	Health Net
New hosting requirement in Datacenter			X
Co-locating requirements for the asset		X	
Assessment and Capacity management	X	X	X
Professional services for racking and stacking in DC	X		
Security assessment	X		X
Change management process	X		X

Final

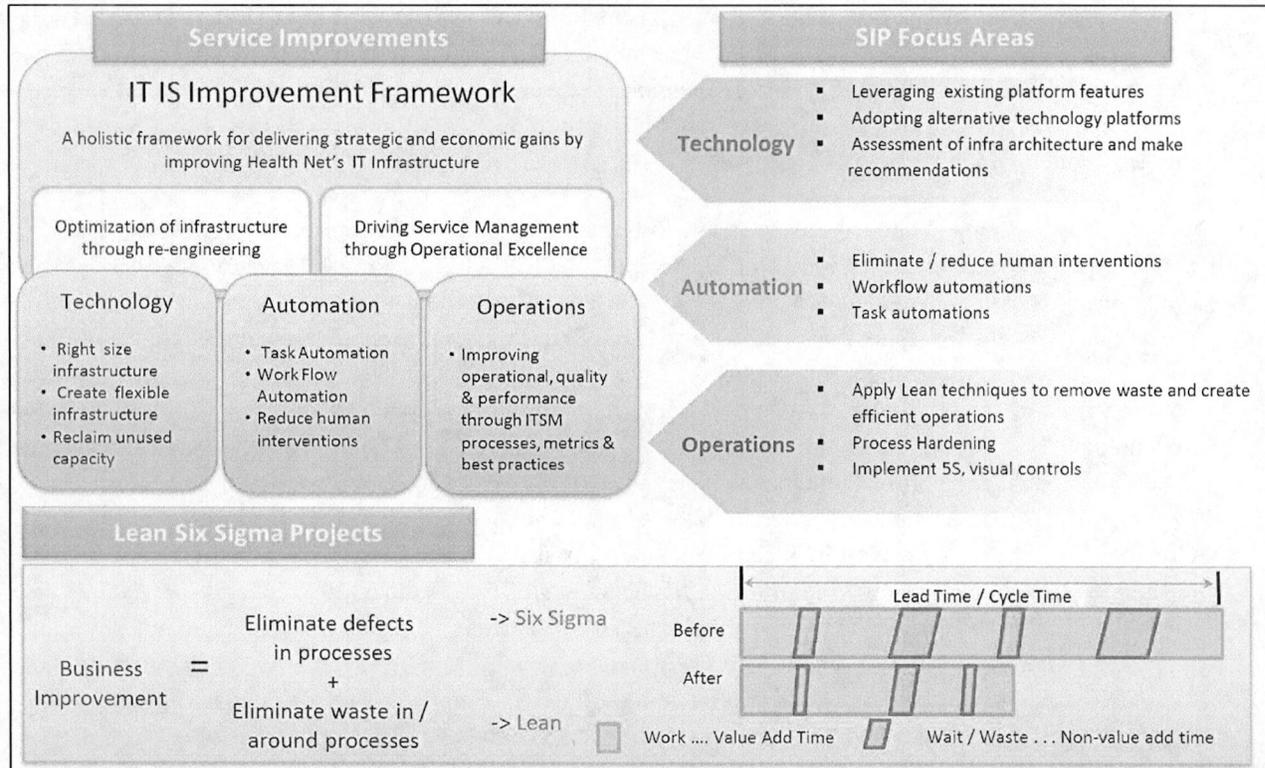

Management service for the new requirement	X	X	
Datacenter services such hands and feet support	X		
Charge back for the co-locating services	X		X
Termination of service		X	X
Asset Disposal			

#### 4. Continual Service Improvement

Cognizant has substantial experience in bringing about continuous improvements for large engagements. We have also developed a structured continuous improvements framework to assist us to drive efficient and effective continuous improvement themes. This framework focuses on a set of parameters which Cognizant believes are instrumental in bringing about continuous improvement opportunities.

Cognizant will leverage the Operations Maturity (OM) Delivery Framework and Transformation Program Office (TPO) to identify service improvements that can add value to Health Net. As a part of its OM Delivery framework, Cognizant will drive Continuous Service Improvement across the engagement through a proven methodology which will include Service Improvement Plans (SIPs), Business Excellence projects (BizEx) and Service Transformation Programs (STPs), as depicted in the illustration below:

During the stabilization phase of the Steady State support, Cognizant will analyze the feasibility of conducting service improvement initiatives within Health Net's environment, in order to improve the efficiency of the delivered services. During the course of the engagement, Cognizant will drive to suggest and execute more SIPs and STPs in Health Net environment.

Cognizant will consider several input parameters to initiate Continuous Service Improvement requests as listed below:

- Health Net Governance Review
- Internal and Health Net Brainstorming
- Escalation
- Health Net Customer Satisfaction Survey
- Voice of Process (this encompasses complaints or escalations, performance trends, voice of employees, business process mapping, technology improvements, automation opportunities, right sizing and skilling, service level reports, process deficiencies and performance metrics)
- Value Stream Mapping
- CSI Catalogue – Operations, Technology and Automation Track (as depicted in the diagram above)

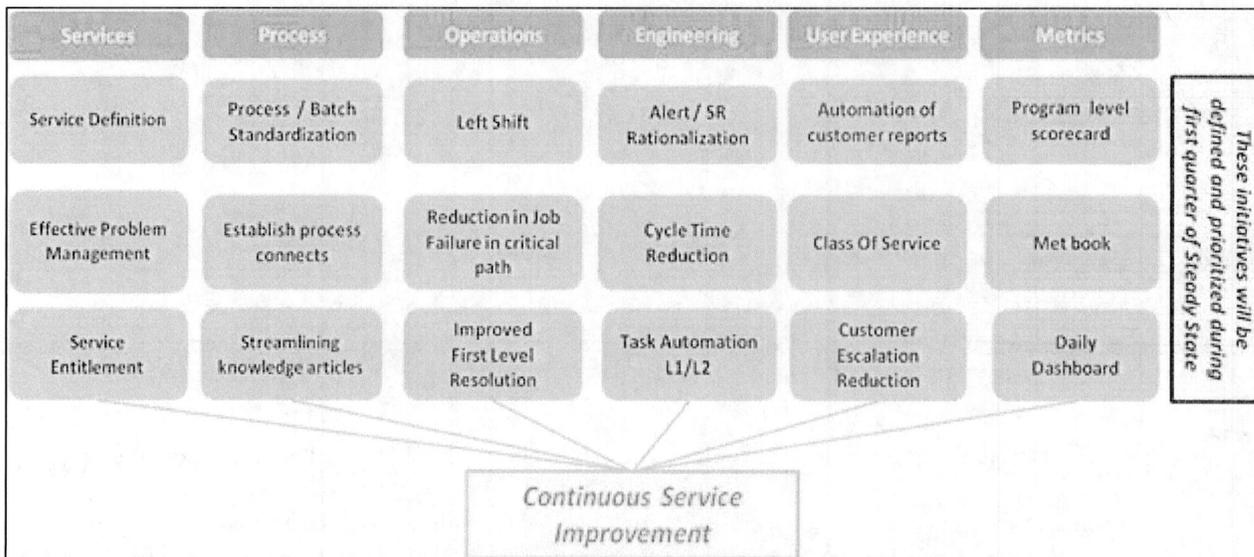

Cognizant has a repository of successfully implemented Continuous Service Improvement initiatives which have been categorized into Operations, Technology and Automation. This repository has been built from our experience with other projects and will help us in driving benefits to this engagement.

Based on the input parameters several improvement initiatives will be streamlined and forwarded for internal scrutiny. The initiatives will be then thoroughly screened and studied by the Delivery Managers and the OM team. The initiatives that are successfully screened will then be forwarded to Health Net for approval. Based on Health Net's approval, continuous improvement themes will then be approved for implementation within Cognizant.

Cognizant's engagement once in Steady state will be scoped-in for Transformation and Kaizen by default. Post transition, theme identification and CSI scope assessment will be completed one month after steady state. Such assessments will culminate into a transformation roadmap which Cognizant will jointly prepare with Health Net. This transformation roadmap will then be presented to Health Net's governing body for review, prioritization and approval before initiating the improvement plans. Depending upon project theme, suitable methodology will be applied for project execution (Six Sigma DMAIC, Lean Technology, Transformation, automation). During internal practice level quarterly governance apart from review discussions, new project/themes will be included. These meetings will revisit the transformation roadmap to identify the status of progress made. Brainstorming sessions with Delivery team Onsite and Offshore and process teams will be held on a quarterly basis. This encourages identification and addition of themes throughout the year and not just at the beginning of the year. This also ensures that there is no predefined cap on the number of themes which will be implemented in a year to achieve the objectives of the transformation roadmap. The CSI/transformation themes which involve CAPEX are planned separately from OPEX themes and will be implemented in parallel to OPEX initiatives with prior approval from Health Net and the same will be charged to Health Net accordingly.

Our Continuous Service Improvements will focus on six key areas of this engagement as depicted below:

Delivery Management, OM and TPO teams will together identify service improvements initiatives across these areas based on the engagement requirements and pain points:

**EXHIBIT A-3-5**

**[RESERVED]**

**EXHIBIT A-3-6**

**NON-BPAAS SECURITY SOLUTION**

\*\*\*

[Represents 52 pages of material pursuant to a request for confidential treatment under Rule 24b-2 of the Securities Exchange Act of 1934 which has been filed separately with the Securities and Exchange Commission]

**EXHIBIT B**  
**IT SERVICE LEVELS**

**1. CONTENT**

This Exhibit B provides the Service Levels for the IT Services. It consists of this document and the following:

Exhibit B-1: Service Level Metrics

Exhibit B-2: Critical Services

Exhibit B-3: Resolvable Call Categories

Exhibit B-4: Service Request Completion Times

Exhibit B-5: Procurement Request Completion Times

Exhibit B-6: Reports

**2. APPLICABILITY**

The Service Levels in this Exhibit B measure Supplier's performance of all IT Services, including those in support of BPaaS Services and Non-BPaaS IT Services, except as expressly provided otherwise below.

**2.1 BPaaS Exclusions**

The following Service Levels shall not apply to infrastructure used solely in support of the BPaaS Services:

##2-3: Production and Non-Production Server Availability

##3-4: SAN and NAS Availability

#5: Database Availability

#6: Production Batch Job Scheduling

#11: Production Server Backups

#12: Production Server Recovery

#13: Disaster Recovery Synchronization

#15: Installation of Standard Servers

#32: Capacity Reporting

## 2.2 Projects and Testing

The Service Levels in Rows 40 through 43 and 71 through 73 shall apply to all Discretionary Projects and all Infrastructure Projects.

## 3. DEFINITIONS

Term	Definition
Accurate Asset Data Field	A data field for an in-scope hardware asset is an "Accurate Asset Data Field" if the data elements in the asset configuration records in the CMDB for the in-scope hardware assets are complete and accurate, including with respect to: (i) asset tag; (ii) serial number; (iii) asset location (site location / building only); (iv) product manufacturer; (v) product category (e.g., laptop, desktop, server); (vi) product model; and (vii) asset owner or user.
Accurate Inventory Records	The asset-level records in Health Net's hardware inventory database that are complete and accurate. A record is not complete and accurate if: (i) an asset is missing from the database; (ii) the database includes an asset that does not exist in Health Net's environment; or (iii) Health Net can demonstrate any other inaccuracy in the database with respect to any asset.
Actual Uptime	The aggregate number of hours during the Scheduled Uptime in any calendar month during which the applicable equipment, software, network devices, services, or Health Net Data are Available for Use.
Availability	The extent to which such Equipment, Software, network devices, Services and Health Net Data are actually Available for Use.

<b>Term</b>	<b>Definition</b>
Available for Use	The ability of equipment, software, network devices, services, or Health Net Data (and all applicable functionality) to be accessed and used by Health Net and all of its applicable end users in accordance with normal operations (including, as applicable, equipment and software specifications and committed levels of service), and without degradation of performance.
Batch Processing Completion Time	The time of day at which the last data bit of the output of a completed processing job is Available for Use.
Critical Service	Each of the services listed in Exhibit B-2.
Priority 1 Incident (Critical)	<p>Critical application(s), service(s) or business function(s) is/are down resulting in complete work stoppage for 25 or more users and no work around is available. Failure to resolve will impact Compliance, Government Mandates and Deliverables. Has potential for negative financial impact to HN.</p> <p>Coding in Remedy: Problem Priority 1</p> <p>Coding in Service Now: Sev 1; Vital</p>
Priority 2 Incident (High)	<p>Slow response or degraded performance to critical application(s), service(s) or business function(s) resulting in partial work stoppage impacting 25 users or complete work stoppage impacting between 5 and 25 users. Failure to resolve will impact Compliance, Government Mandates and Deliverables. Critical Production Batch job failure.</p> <p>Failure to resolve issues will impact critical business function(s) with the potential for negative financial risks to HN.</p> <p>Coding in Remedy: Problem Priority 2</p> <p>Coding in Service Now: Sev 2; Critical</p>

Term	Definition
Priority 3 Incident (Moderate)	<p>Complete work stoppage for one to five associates. Unable to perform vital business function(s) and no business work around is available. Failure to resolve will have potential for lost productivity and/or negative financial impact to HN. Non -production environment down.</p> <p>A VIP outage. A VIP outage is an incident that impacts VIP work flow and minimizes ability to perform at maximum potential for a predefined VIP.</p> <p>Coding in Remedy: Incident Priority 1</p> <p>Coding in Service Now: Sev 3; High</p>
Priority 4 Incident	<p>Slow response or degraded performance for non-critical application(s), service(s) or business function(s) resulting in partial work stoppage for one to five users. No business work around in place. Failure to resolve will impact user's ability to perform some job functions. Non-Critical Batch job failure.</p> <p>Coding in Remedy: Incident Priority 2</p> <p>Coding in Service Now: Sev 4; Moderate</p>
Priority 5 Incident (Low)	<p>Software or hardware malfunctions with low business impact. Non-critical application(s), service(s) or business function(s) is/are slow or degraded with temporary work around in place.</p> <p>Coding in Remedy: Problem Priority 3, Incident Priority 3, Problem Priority 4</p> <p>Coding in Service Now: Sev 5; Low</p>
Procurement Request	<p>A Health Net-approved request for Supplier to order any Equipment, Software, network devices, or other material used to provide the Services.</p>

<b>Term</b>	<b>Definition</b>
Procurement Request Completion Time	The elapsed time between (i) Supplier's receipt of a Procurement Request (or, if a later scheduled start time provided by Health Net, such scheduled start time), and (ii) the time Supplier successfully completes such Procurement Request (e.g., the Procurement Request is satisfied and the corresponding Services are fully functional and ready for use by the user who made the Procurement Request, and such user agrees the Procurement Request has been satisfactorily completed (or if the user is unavailable, Supplier has provided notification to the user following an agreed notification process)).
Response Time	For any Incident, the elapsed time between (i) the earlier of the moment that an Incident is reported (by an end user, monitoring log or other automated alert) or the moment that Supplier otherwise becomes aware of such Incident, and (ii) the moment the relevant Supplier Personnel is assigned such Incident Ticket and Health Net is notified.
Restoration Time	For any Incident, the elapsed time between (i) the earlier of the moment that an Incident is reported (by an end user, monitoring log or other automated alert) or the moment that Supplier otherwise becomes aware of such Incident; and (ii) the moment that the affected Equipment, Software, network device, or Service is restored to normal operations in accordance with applicable Service Levels and specifications.
Root Cause Analysis Report	A completed analysis or action plan for root cause remediation that: (i) identifies, in a level of detail and at a level of accuracy that is reasonably complete under the circumstances, the actual root cause(s) of a Severity 1 Incident or Severity 2 Incident, and (ii) describes the means by which Supplier proposes to address such root cause(s) of such Incident (including appropriate measures to prevent recurrence of such problems and minimize risks to Health Net). For the avoidance of doubt, a Root Cause Analysis determines the analysis performed by Supplier and not the remediation Services themselves
Scheduled Uptime	With respect to a Service Level, the time during which the applicable corresponding Equipment, Software, network devices, Services or Health Net Data for which Supplier is responsible are scheduled to be Available for Use during the applicable Measurement Period. Mutually agreed scheduled maintenance windows shall be documented in the Procedures Manual. Scheduled Uptime is 24x7 or as defined in AO Contract unless mutually agreed otherwise.

Term	Definition
Successful Change	A Change (i) for which the performed actions described in the Change request are completed within the agreed upon change window; (ii) with no errors or deficiencies; (iii) that has been properly authorized by Health Net; (iv) that is executed in accordance with the agreed Change management process; and (v) that does not result in the opening of a Ticket for a Priority 1, 2 or 3 Incident.
Patch	A patch is a piece of software designed to update a computer program or its supporting data, to fix or improve it. This includes fixing security vulnerabilities and other bugs, and improving the usability or performance.

**Exhibit B-1**  
**Service Level Metrics**

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
	<b>Primary Compute</b>								
1	Critical Service Availability	<p>Measures the Availability of each Critical Service listed in Exhibit B-2.</p> <p>The Scheduled Uptime for each Critical Service is 24x7 (excluding scheduled maintenance windows approved by Health Net) except as otherwise documented by Health Net in Exhibit B-2.</p>	<p>(a) Average Availability of the Critical Services in each Group in Exhibit B-2 shall be greater than:</p> <ul style="list-style-type: none"> <li>- 99.9% for each Tier 1 Group</li> <li>- 99.5% for each Tier 2 Group; and</li> <li>- 99.0% for each Tier 3 Group;</li> </ul> <p>and</p> <p>(b) Availability of each Critical Service in Exhibit B-2 shall be greater than:</p> <ul style="list-style-type: none"> <li>- 98.9% for Critical Services within a Tier</li> </ul>	<p>Availability of each Critical Service (as measured in Remedy) = (Minutes in Month – P1/P2 full outage ticket minutes during Scheduled Uptime – 50%* P1/P2 partial outage or slowness ticket minutes during Scheduled Uptime) / (Minutes in Month)</p> <p>Availability of each Critical Service (as measured against Service Now) = (Minutes in Month – Severity 1 ticket minutes during Scheduled Uptime – 50% Severity 2 ticket minutes during Scheduled Uptime – 5% Severity 3 ticket minutes during Scheduled Uptime) / (Minutes in Month)</p>	Initially Remedy and then Service Now upon implementation within Health Net	A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
			1 Group - 99.0% for Critical Services within a Tier 2 Group; and - 98.0% for Critical Services within a Tier 3 Group	Minutes in Month = number of minutes in the calendar month – scheduled downtime minutes  This metric measures the Availability of all components within the scope of Supplier's responsibility that affect an end user's ability to access and use a Critical Service without material degradation (including network, server, server O/S and services).					
2	Production Server Availability	Measures the Availability of each individual Server Image in Health Net's production server environment.  Scheduled Uptime for each Server Image is 24x7 (excluding scheduled maintenance windows approved by Health Net)	≥99.90%	Availability of each Server Image = (Actual Uptime / Scheduled Uptime) x 100  Each Server and O/S must be Available for Use by end users in order for a Server Image to be "Available"		A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
3	Non-Production Server Availability	Measures the Availability of each individual Server Image in Health Net's non-production server environment.  Scheduled Uptime for each Server Image is 24x7 (excluding scheduled maintenance windows approved by Health Net)	≥99.00%	Availability of each Server Image = (Actual Uptime / Scheduled Uptime) x 100  Each Server and O/S must be Available for Use by end users in order for a Server Image to be "Available"		A	Y	Monthly	
4	SAN Availability	Measures the Availability of the Health Net storage area network (e.g., Hitachi VSP/SAN Switch).  Scheduled Uptime for this metric is 24x7 (excluding scheduled maintenance windows approved by Health Net).	≥99.999%	SAN Availability of = (Actual Uptime / Scheduled Uptime) x 100		A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
5a	NAS Availability (Redundant)	Measures the Availability of the network attached <b>redundant</b> storage supporting Health Net business operations (e.g., Hitachi HUS/HCP and HDI where deployed in a redundant configuration).  Scheduled Uptime for this metric is 24x7 (excluding scheduled maintenance windows approved by Health Net).	≥99.99%	NAS Availability of = (Actual Uptime / Scheduled Uptime) x 100		A	N	Monthly	
5b	NAS Availability (Non-Redundant)	Measures the Availability of the network attached <b>non redundant</b> storage supporting Health Net business operations (e.g., Hitachi HDI Caching Device at HNT branch office).  Scheduled Uptime for this metric is 24x7 (excluding scheduled maintenance windows approved by Health Net).	≥99.00%	NAS Availability of = (Actual Uptime / Scheduled Uptime) x 100		A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
6	Database Availability	Measures the Availability of each database instance within the Health Net environment.  Scheduled Uptime for this metric is 24x7 (excluding scheduled maintenance windows approved by Health Net).	≥99.90%	Database instance Availability of = (Actual Uptime / Scheduled Uptime) x 100		A	N	Monthly	
7	Production Batch Job Scheduling	Measures the percentage of scheduled batch jobs listed in Procedures Manual that (a) are initiated on-time and (b) have a Batch Processing Completion Time on or before the corresponding time provided in Procedures Manual.	(a) ≥ 98% of Critical Batch Jobs; and  (b) ≥ 90% of Non-Critical Batch Jobs.	Total scheduled batch jobs that are initiated on-time with on-time Batch Processing Completion Time / total scheduled batch jobs in the month.		A	N	Monthly	
8	Web Online Application Response Time	Measures the online response time for all online applications (Extranet, Web Based & eCommerce-based applications on production Unix, Linux & Windows platforms)  Online response time measurements will be	(a) ≥ 95% Home page and content pages load in 3 seconds or less; and  (b) ≥95% Application/Transactional pages load in 5	Online transactions completed within required timeframe / Total online transactions x 100	Apache	C	Y	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
		based on a representative set of specific named pages for each site. Health Net will designate between 30 and 60 pages per site for the measurement.	seconds or less						
9	Speed of Messaging	Measures the speed of messages delivered within Health Net's infrastructure (i.e., server to server messaging)	Average message delivered in less than 10 seconds	Aggregate number of seconds to deliver all messages / # of messages delivered x 100	GSX tool metric named, "Internal Average Mail Delivery Time"	A	N	Monthly	
10	Patches and Upgrades Delivered on Time	Measures the number of patches and upgrades delivered to machines that are Available for Use within the required timeframes (timeframes will be defined by the parties in Phase 1)	≥97%	Number of patches and upgrades delivered within the required timeframes / total number of patches and upgrades x 100		A	Y	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
11	Production Server Backups	Measures the percentage of server backups completed on or before the mutually agreed completion time (timeframes will be defined by the parties in Phase 1).  Unless parties agree otherwise Supplier will perform incremental daily backup and full weekly backup of programs and data on storage internally and externally attached to all compute systems.	≥99%	Number of server back-ups completed on-time / total number of server back-ups required x 100		A	N	Monthly	
12	Production Server Backup Recovery	Measures the number of backup recovery requests from Health Net completed on or before the completion time specified in the Procedures Manual.	≥99%	% Production Server Backup Recovery = (Number of backup recovery requests completed successfully within the completion time specified in the Procedures Manual / Total number of backup recovery requests) x 100		A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
13	Disaster Recovery Synchronization (i.e., data center to data center replication time)	Measures the percentage of time in which data center replications occurs in <6 hours  Scheduled Uptime for this metric is 24 x 7	100%	All data center replications must complete in less than 6 hours		A	N	Monthly	
14	Audit and Compliance	Measures the time to respond to requests for information about the Services or service delivery environment required to support an audit of Health Net (including internal, customer, and external audits)	100% within 72 hours (or other time as the parties may agree in writing)	All audit requests must be fulfilled on-time		A	N	Monthly	
15	Installation of Standard Server / Images	Measures the time to install a standard Server Image (i.e., single instance of an operating system with standard backup, encryption, monitoring, and packages)	≥98% within 7 Business Days	Number of Standard Images installed successfully within 5 Business Days / Requested number of Standard Images to be installed) x 100		A	N	Monthly	
	<b>Managed Network</b>								

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
16	WAN Network Availability (Redundant)	Measures the Availability of the LAN at locations with redundancy. Scheduled uptime is 24x7.	≥99.99%	WAN Availability = (Actual Uptime / Scheduled Uptime) x 100		A	N	Monthly	
17	WAN Network Availability (Non-Redundant)	Measures the availability of the LAN at locations without redundancy. Scheduled uptime is 24x7.	≥99.00%	WAN Availability = (Actual Uptime / Scheduled Uptime) x 100		A	N	Monthly	
18	LAN Network Availability (Redundant)	Measures the Availability of the LAN at locations with redundancy. Scheduled uptime is 24x7.	≥99.99%	LAN Availability = (Actual Uptime / Scheduled Uptime) x 100		A	N	Monthly	
19	LAN Network Availability (Non-Redundant)	Measures the Availability of the LAN at locations without redundancy. Scheduled uptime is 24x7.	≥99.00%	LAN Availability = (Actual Uptime / Scheduled Uptime) x 100		A	N	Monthly	
20	Voice Availability	Measures the Availability of the voice network. Scheduled uptime is 24x7.	≥99.14%	Availability of voice network = (Actual Uptime / Scheduled Uptime) x 100  Voice Services are Available for Use only if (A) all end users have a dial-tone and are able to place calls; (B) calls from		A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
				the end user are routed to the proper extensions and according to engineered routes; and (C) the end user are able to access their respective voicemail box and use other applicable voice network functionality (e.g., conferencing, call forwarding).					
	<b>Service Operations</b>								
21	First Call Resolution	Measures the percentage of Resolvable Calls that are resolved during the initial telephone conversation (excluding password resets and unlocks).  "Resolvable Calls" means the call types listed in Exhibit B-3	≥90%	Number of Resolvable Calls resolved during the first call / total Resolvable Calls received  Password resets and unlocks are excluded from this calculation.		A	Y	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
22	Average Speed of Answer	Measures average speed for a live agent to answer calls to the Service Desk	< 20 seconds by live agent 100% of the time	Total minutes of wait time in a Service Desk queue before an end user speaks to a Service Desk agent / total calls to Service Desk that are answered by a live agent.		A	N	Monthly	
23	Call Abandonment	Measures the percentage of calls (i) that are not answered by the Service Desk within twenty five (20) seconds of the moment that the end user selects an option to speak with a Service Desk representative, and (ii) that are subsequently terminated by the end user prior to being routed	< 6%	Number of calls that enter the Service Desk queue and "hang up" / total calls that enter the Service Desk queue		A	Y	Monthly	
24	Ticket Routing	Measures the percentage of tickets routed to more than three owners.	< 10%	Number of tickets that are routed to a resolver group and actually resolved by that group / total number of tickets routed for resolution.		A	Y	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
25	Service Desk and End User Satisfaction (Quarterly Measurement)	<p>(a) Measures satisfaction of Health Net end users and other third parties who interact with Supplier's Service Desk (measured on a per-contact basis)</p> <p>(b) Measures satisfaction of Health Net end users and other third parties who interact with Supplier's deskside support services.</p>	<p>(a) &gt; 91.5%</p> <p>and</p> <p>(b) &gt; 91.5%</p>	<p>a) Number of end users surveyed giving a "Satisfied" or "Very Satisfied" rating / total number of Survey responded end users survey (1/3 of end users will be survey each year)</p> <p>and</p> <p>b) Number of end users surveyed giving a "Satisfied" or "Very Satisfied" rating / total number of Survey responded end users survey (1/3 of end users will be survey each year)</p>		A	Y	Quarterly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
26	Privileged Access Admin Compliance	Measures the percentage of days in a month in which Supplier delivers an accurate consolidated report comprising eleven SOX system-related artifacts that, together, validate whether Supplier has granted or deactivated privileged access to SOX systems within the prescribed timeframe, which is currently 72 hours.	≥ 93%	<p>Number of daily reports delivered each day before 20:00 PST with accurate information / total number of days in a month.</p> <p>Delivery of the Privileged Access Artifacts is executed by posting the daily reports to the Global Bridge Service (GBS), where Health Net Compliance and Legal teams can pull the reports for daily validation.</p> <p>This metric requires delivery of a consolidated report consisting of the following eleven artifacts once daily (365 days/year) to Health Net no later than 20:00 PT where the artifacts illustrate the complete and accurate activity of the 24-hour performance period (00:01 - 23:59 PT) from the immediately preceding day: (i) SOX Daily Scorecard; (ii) Daily</p>		A	Y	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
				Privileged ISRs; (iii) Daily MEF3 Files; (iv) Daily Event logs; (v) Daily SOX Private ID Check; (vi) Vault Check-in/Check-out; (vii) Compare Report; (viii) Vault inventory; (xi) Daily Check Follow-up; (x) Exception MEF Backwards check report for Windows systems only; (xi) Final Daily Scorecard Report for prior reporting period.					
27	Privileged Access Reconciliation	Measures Supplier's reconciliation of all errors and omissions within the privileged access artifacts that are completed within 24 hours of Health Net's notification of errors or omissions	(a) All but 1 error/omission reconciled within 24 hours when there are $\leq 9$ errors or omissions in a month; and (b) $\geq 90\%$ of errors or omissions reconciled within 24 hours when there are 10 or more errors/omissions in the month.	(a) All reconciliations measured to confirm no more than one extends more than 24 hours; and  (b) Total reconciliations within 24 hours / Total reconciliations required.		A	Y	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
28	BAU Access Admin	<p>(a) Measures the percentage of non-privileged BAU access admin requests involving 10 or fewer end users that are completed within 5 Business Days</p> <p>BAU requests are any AA requests other than Privilege Access requests, Emergency IDs, Supplier requests, and requests fulfilled by Health Net or Third Parties engaged by Health Net to provide Access Administration services. and</p> <p>b) Fulfillment of BAU ISR requests that are not completed within 5 business days must be completed within 6 to 10 business days.</p>	<p>(a) ≥91%</p> <p>(b) 100%</p>	<p>(a) Number of non-privileged requests completed within 5 business days / total non-privileged requests</p> <p>(b) Number of non-privileged requests completed within 6-10 business days / total non-privileged requests not completed within 5 business days</p>		A	Y	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
29	Access Administration - User-ID Termination – Activities in support of complete removal of IDs associated with a terminated associate.	(a) Measures the effectiveness of deleting user-id's and account access based on an ISR Delete request for a terminated associate. IDs to be removed from Network, Active Directory, Remote Access Lotus Notes and application IDs such as Maces, ABS, VMS, Mainframe, MC400, Remedy, SAP, eBuyer, etc.  (b) Remediation within 5 Business Days	100% - Network ID & Lotus Notes  ≥95% - Others Systems	(a) Number of user accts not deleted in month as verified by application, system and AD user lists not to exceed 0 (zero).  (b) IDs found still active must be removed within 5 Business Days of notice.  NOTE: This will require addition of a new flag in ISR AA requests to identify requests for terminated associate. Otherwise will be labor intensive as each ISR with a Delete request will need to be examined for Delete type.	ISR System	A	N	Monthly	
30	Access Administration – Emergency ID Termination	Measures the turn-around-time for ID deactivation for emergency termination requests from Health Net Organization Effectiveness. ISR Termination Request need to be backed up with a phone call to the Service	100% of Emergency ID Termination requests completed within 30 Minutes of request	Number of Emergency ID Requests completed within 30 minutes divided by total number of Emergency ID requests.	ISR System + afterhours request handled via Priority 1 incident ticket	A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
		Desk.							
31	Access Administration – Open Inventory	Measures the number of ISRs that are in Open Request statuses during normal BAU operation days.  Exclusions Include : Mass ISR Submission for any major business event such as Transition during Phase 2. Open Enrollment staffing increases and other events of similar scope are not a major business events.	The average number of Under Review and Open Request statuses each day shall be < 400 during the month.	(Number of days the Under Review and Open Request ISR count is 400 or less divided by the total number of days in the calendar month) multiplied by 100%.	ISR System	A	Y	Monthly	
32	Capacity Reporting	Measures the reporting of Capacity Events to Health Net  A “Capacity Event” occurs anytime storage utilization or CPU utilization or other identified capacity constraint crosses a configured threshold that represents the normal	(a) At least 98% of Capacity Events reported within 1 Business Day; and  (b) 100% of Capacity Events reported within 4 Business Days	(a) % Capacity Reporting = (Number of Capacity Events reported within 1 Business Day / Total number of Capacity Events during the measured period) x 100  (b) No Capacity Reports reported more than 4		A	N	Monthly

				Number of Priority 4 Incidents reported) x 100					
38	Incident Resolution- Priority 5	Measures the Restoration Time for Priority 5	≥85% within 4 Business Days for Priority 5 Incidents	% Priority 5 Restoration Time = (Number of Priority 5 Incidents with Restoration Time ≤ 2 Business Days / Number of Priority 5 Incidents reported) x 100		C	Y	Monthly	0
39	Root Cause Analysis Completion	Measures the time in which Root Cause Analysis Reports for Priority 1 and Priority 2 Incidents are completed	≥98% within 5 Business Days following the incident	% Root Cause Analysis Completion = (Number of Root Cause Analysis Reports provided by Supplier within 5 Business Days / Total number of Root Cause Analysis Reports that are required to be completed by Supplier) x 100		A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
40	Project Intake, Design and Estimation Turnaround Time	<p>(a) Project Estimates will be provided to Health Net within 5 Business Days of Supplier's acceptance of a Project Brief;</p> <p>and</p> <p>(b) A detailed project plan (in sufficient detail to attach to a Work Order) for each Project shall be provided to Health Net within 5 Business Days of the date Health Net approves a Project Estimate and requests the project plan for each such Project.</p> <p>Project Estimate and Project Brief shall be defined in the Project Framework</p>	100%	<p>(a) Project Estimate Percentage = (# Brief's provided to HN within 5 Business Days of acceptance / total Brief's accepted) *100%</p> <p>and</p> <p>(b) Project Time to Schedule percentage = (# project plans provided to HN within 5 Business Days of estimate approval / total # of estimate approvals)*100%</p> <p>Project Managers keep log of request date and receive date.</p>	Planview, plus some manual calculations.	A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
41	On-Budget Completion of Projects	Measures the percentage of project milestones delivered within 10% of the estimated costs provided in the approved Work Order.  The Cost Components of a project are the following 6 items: (i) Hardware costs; (ii) ARC charges; (iii) Project pool hours; (iv) Software license required for CTS to provide; (v) Software license required for HN to provide; (vi) 3 <sup>rd</sup> party expenses (contracting, subcontracting)	≥95%	Delivery of projects to budget = (count of project milestones delivered within >= 90% of budget and <= 110%) / (number of project milestones reached)		A	N	Monthly	
42	On-Time Completion of Projects	Measures the percentage of Project milestones delivered within 10% of estimated delivery date provided in each Work Order.	≥95%	Milestone Delivery Percentage = (Number of Business Days required to reach the milestone measured from signing of work order/ (Number of Business Days projected to reach the milestone as stated in the Work Orders).  Percentage of Project		A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
				Milestones delivered within 10% of estimated delivery date = (Number of milestones reached within a Milestone Delivery Percentage of 90% - 110%) / (Number of milestones projected by approved Work Orders to be reached in the month) *100					
43	Quality of Project Deliverables	Measures the quality of Supplier deliverables and artifacts, which will be measured as a percentage of the time a deliverable does not meet its specifications three (3) times or more.  All comments must be provided as part of initial delivery.	≥99%	(Number of Deliverables delivered experiencing less than 3 notices of deficiencies / Total number of Deliverables) *100.  Each project artifact will be delivered and submitted to Health Net for acceptance. This metric measures the percentage of project artifacts that Health Net rejects 3 or more times.  Project artifacts will include documents provided at each stage of the project lifecycle, including (i) brief		A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
				assessments; (ii) requirements Work Orders; (iii) technical system designs; (iv) build, test, implement Work Orders; (v) IT change management plans; and (vi) revised Work Orders.					
44	Service Request Completion	Measures the percentage of Service Requests completed within the timeframe provided in Exhibit B-4	≥95% within the time required by Exhibit B-4	<p>Number of Service Requests completed on-time / Number of Service Requests) x 100. In addition, any Service Request not delivered on-time will result in a ticket being opened as a Priority 2 Incident.</p> <p>Exhibit B-4 will be a list of standard service requests and corresponding completion times.</p> <p>“Service Request” means a set of standardized IT requests that are smaller than projects and are mutually agreed to be made available for users to request via a standardized process and tool.</p>		A	Y	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
45	Procurement Management	Measures the percentage of Procurement Requests completed within the corresponding Procurement Request Completion Time provided in Exhibit B-5	≥95%	Number of Procurement Requests completed within the corresponding Procurement Request Completion Time / Number of Procurement Requests) x 100.  Exhibit B-5 will be a list of standard procurement requests and corresponding completion times.		A	Y	Monthly	
46	Change Execution	Measures the percentage of Successful Changes.	≥98.5%	% Change Execution = (Number of Successful Changes / Number of Changes required) x 100		A	N	Monthly	
47	Unauthorized Change Records	Measures the percentage of Changes that were implemented without authorization	100%	No unauthorized changes in a month.		A	N	Monthly	
48	Methodology Compliance Change Management	The number of Change Records performed in accordance with applicable change management policies ("Compliant	≥98%	Percentage of Changes in Compliant = (Compliant Changes / Total Changes) x 100		A	Y	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
	t	Changes”)for the month.							
49	Asset Configuration Accuracy	Measures the percentage of Accurate Asset Data Fields compared to the total number of asset configuration data fields that are sampled during the measured period in the Health Net environment	≥98%	<p>% Asset Configuration Accuracy = (Number of Accurate Asset Data Fields / Total number of asset data fields sampled) x 100.</p> <p><u>Example:</u> Each asset data field represents one (1) count in the total sample population. For example: if 100 assets are sampled and each asset contains 5 asset data fields, then the sample population is 500. Each data element missed counts as 1 error. With 500 data fields sampled and 25 misses = 5% error or 95% accuracy.</p>		A	N	Monthly	
50	Asset Inventory Accuracy	Measures the percentage of complete and Accurate Inventory Records compared to the total number of assets in the Health Net environment	≥98%	<p>% Asset Inventory Accuracy = (Number of Accurate Inventory Records / Total number of assets in the Health Net environment) x 100</p>		A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
51	Reporting Delivery	Measures the number of final, complete, and accurate reports delivered by Supplier by the required reporting delivery date	98% of reports listed in Exhibit B-6 are accurate and delivered by the required delivery date ("Reporting Delivery Date")	% Reporting Delivery = (Number of reports delivered by Supplier by the Reporting Delivery Date / Number of reports required to be delivered to Health Net) x 100. In addition, any report that is not delivered by the Reporting Delivery Date shall result in a Ticket being opened as a Priority 2 Incident.		A	N	Monthly	
	<b>Desktop</b>								
52	IMAC Completion	Measures the IMAC completion times in the Health Net end user environment  Excludes • Office movement • Refresh of end user devices  *IMAC volume over 150 per month will be excluded from measurement	(a) ≥95% of IMACs completed within three (3) Business Days for all end users in any location (other than VIP Users);  (b) ≥95% of IMACs completed within two (2) Business Days for VIP Users who are not in a Dedicated Location at the time of the IMAC Request; and	% IMAC Completion = (Number of IMACs completed within the applicable timeframe / Total number of IMACs completed) x 100		A	N	Monthly	

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
			(c) ≥95% of IMACs completed within one (1) Business Day for VIP Users who are located in a Dedicated Location at the time of the IMAC Request.  “Dedicated Location” means any location where Supplier provides an on-site deskside support resource.						
53	Application Image Development – COTS Application	Measures the percentage of Package Requests completed within 10 Business Days of request  “Package Request” means a request by Health Net to package an application for deployment to physical and virtual desktops.	≥98%	% Application Image Development – COTS Application = (Number of Package Requests completed within 10 Business Days / Number of Package Requests) x 100		A	N	Monthly	
	<b>Testing</b>								

#	Service Area	Description	Service Level Metric	Formula	Measurement Tools / Process	Code	Continuous Improvement	Measurement Period	Weighting Factor
54	Testing Effectiveness	Measures the Testing Failure rate at Integration Test and UAT phases	The Testing Failure Rate shall be less than or equal to the percentage set forth below for each of the following Testing Phases: (i) Integration Testing <10% (ii) User Acceptance Testing <3%	<p>“Testing Failure Rate” means the percentage of Critical Tests during a Testing Phase that fail to meet applicable success criteria, calculated in accordance with the following formula: Testing Failure Rate (for each Testing Phase) = (# of Critical Tests Failures / Total # Critical Tests) * 100</p> <p>“Critical Test” means a test case designated by Health Net as Critical during development of the testing plan for a particular Deliverable.</p>		A	N	Monthly	
55	Testing Coverage	Measures the Requirements Coverage Percentage for business and technical requirements	The Requirements Coverage Percentage for each Deliverable shall be greater than or equal to (a) 100% for business requirements and (b) 98% for technical	<p>“Requirements Coverage Percentage” means, for each Deliverable, the percentage of business or technical requirements, as applicable, for such Deliverable that have been mapped to a specific Test Case prior to delivery to</p>		A	Y	Monthly

**AMENDED AND RESTATED**  
**MASTER SERVICES AGREEMENT**  
**STATEMENT OF WORK #5 (QUALITY ASSURANCE SERVICES)**

**AMENDED AND RESTATED**  
**MASTER SERVICES AGREEMENT**

**STATEMENT OF WORK #5 (QUALITY ASSURANCE SERVICES)**

This Statement of Work #5 (*Quality Assurance Services*), dated November 21, 2014, but effective as of November 2, 2014 (“the **SOW Effective Date**”), is made by and between Health Net, Inc., a Delaware corporation with its principal place of business located at 21650 Oxnard Street, Woodland Hills, California 91367 (“**Health Net**”), and Cognizant Healthcare Services, LLC (“**Supplier**”), a Delaware corporation having an office at 500 Frank W. Burr Blvd., Teaneck, New Jersey 07666 (each, a “**Party**” and collectively, the “**Parties**”). This SOW #5 (Quality Assurance Services) is entered into and shall be governed by the terms of that certain Amended and Restated Master Services Agreement entered into between the Parties dated November 21, 2014 (the “**Agreement**”). This Statement of Work #5 (*Quality Assurance Services*) replaces and supersedes in all respects the Statement of Work #5 dated November 2, 2014.

**1. INTRODUCTION**

**1.1 Background & Purpose**

This SOW #5 (*Quality Assurance Services*) describes the Quality Assurance Services Supplier will provide for Health Net, as such Services are defined in Exhibit A (*Quality Assurance Services*) to this SOW #5 (*Quality Assurance Services*), and sets forth certain terms and conditions relating to them, including, among other things:

- (a) The scope of the Quality Assurance Services;
- (b) The Solution Supplier will use to perform and deliver them;
- (c) The Operational Service Levels Supplier will meet in providing them;
- (d) The Key Supplier Positions applicable to them; and
- (e) The Subcontractors (if any) approved by Health Net to provide certain of them.

**1.2 Structure**

This SOW #5 (*Quality Assurance Services*) is comprised of this cover document and the following Exhibits:

<b>Table 1: Exhibits to SOW #5 (<i>Quality Assurance Services</i>)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
1	Exhibit A ( <i>Services</i> )	Describes the scope of the Quality Assurance Services.

**Table 1: Exhibits to SOW #5 (Quality Assurance Services)**

Item #	Exhibit	Purpose of Exhibit
2	Exhibit A-1 ( <i>Solution Description</i> )	Describes Supplier's solution for the provision of the Quality Assurance Services and includes as exhibits: <ul style="list-style-type: none"> <li>• Exhibit A-1-1 (<i>Approved Service Delivery Centers</i>)</li> <li>• Exhibit A-1-2 (<i>Service Delivery Configuration at the Completion of Phase 2</i>)</li> </ul>
4	Exhibit A-3 ( <i>Organizational Chart</i> )	Identifies the Health Net roles being transferred to Supplier or displaced by Supplier roles as a result of the execution of this SOW #5 ( <i>Quality Assurance Services</i> ).
6	Exhibit B-1 ( <i>Operational SLAs</i> )	Identifies the Operational Service Levels applicable to the Quality Assurance Services.
7	Exhibit D ( <i>Key Supplier Positions</i> )	Identifies the Key Supplier Positions applicable to the Quality Assurance Services.
8	Exhibit H ( <i>Subcontractors</i> )	Identifies the Subcontractors approved by Health Net to provide certain of the Quality Assurance Services.

## 2. DEFINITIONS

Capitalized terms used but not defined in this SOW #5 (*Quality Assurance Services*) shall have the meanings given them in the Agreement.

## 3. APPLICABILITY OF THE AGREEMENT

This SOW #5 (*Quality Assurance Services*) is hereby made a part of, and is subject to and governed by, the Agreement. This SOW #5 (*Quality Assurance Services*) is one of the Initial Statements of Work executed under the Agreement.

**IN WITNESS WHEREOF**, Health Net and Supplier have each caused this SOW #5 (*Quality Assurance Services*) to be signed and delivered by its duly authorized officer, all as of the SOW Effective Date set forth above.

**Health Net, Inc.**

**EXHIBIT A**  
**QUALITY ASSURANCE SERVICES**

**1 INTRODUCTION**

**1.1 General**

- (a) In general terms, the “*Quality Assurance (QA) Services*” are the Functions associated with the post transaction auditing and reporting of finalized accuracy results (including the resolution of error disputes) for Claims, Membership, Appeals & Grievances, Contact Center Provider Dispute Resolution (PDR) Correspondence, Configuration, and Contact Center work for all geographies and lines of business requested by Health Net.
- (b) The Quality Assurance Services are more fully described in Section 3, and include the Cross Functional Services described in Section 3 of Schedule A (*Cross Functional Services*) and the Functions included as part of the Embedded Processes described in Section 4 of Schedule A (*Cross Functional Services*), each as they relate to the Functions included as part of the Quality Assurance Services. For clarity, this includes Supplier’s responsibility to manage all activities performed under Managed Third Party Contracts in accordance with Section 3.8 (*Managed Third Party Contract Services*) of Schedule A (*Cross Functional Services*). Supplier shall perform the Quality Assurance Services, except for those Functions that are expressly identified as retained Health Net responsibilities in Section 2 below. For purposes of clarity, the Party that is assigned responsibility for a Function as per the designations in Section 2 is also responsible for the Embedded Processes applicable to that Function.
- (c) In addition to those Functions specifically designated in this Statement of Work as Functions for which Supplier is responsible, the Quality Assurance Services to be performed by Supplier include all Functions performed by or associated with the roles in the Quality Assurance Organization Chart set forth in Exhibit A-3 (*QA Organization Chart*), all of which are either being transferred to Supplier or displaced by Supplier roles as a result of the execution of this Statement of Work. Such Functions will be deemed to be part of the Quality Assurance Services to be performed by Supplier as if expressly set forth in this Statement of Work.
- (d) In addition to the retained Health Net responsibilities expressly identified in this Exhibit A (*Quality Assurance Services*), and in addition to and without limiting Health Net’s rights under the Terms and Conditions, Health Net may perform quality reviews and audits of Supplier’s performance of the Quality and Assurance Services in accordance with the Terms and Conditions. For the avoidance of doubt, Health Net is not obligated to perform any level of such quality reviews and activities, except to the extent required by applicable Law.

Supplier shall generate and provide to Health Net (i) each operational report generated prior to the BPaaS Services Commencement Date, unless and until Health Net confirms in writing that such operational report is no longer required, (ii) such other operational reports as Health Net may reasonably request from time to time, and (iii) such modifications to or replacements for the foregoing reports as may be necessary to reflect

changes to and evolutions of the Quality Assurance Services during the term of this Statement of Work.

## 1.2 Definitions

- (a) “**Book of Business (BKB) Audit**” means audits performed to represent overall performance for a specific line of business and region for a given work area (e.g., Claims, Membership, etc.)
- (b) “**Client Business Area**” means the functional area that receives Quality Assurance Services (e.g. Claims, Membership, etc).
- (c) “**External Employer Group Audit**” means the planning and project management and oversight of on-site audits by Employer Groups.
- (d) “**Focused/Ad Hoc Audit**” means audits outside BKB Audits or Regulatory Audits as requested by the work area or another Health Net department.
- (e) “**Regulatory (Mock) Audit**” means audits performed for specific elements and universe sets as a Regulator (e.g., CMS, DMHC, etc.) would audit.
- (f) “**Sox/IPC Audit**” means the fulfillment of SOX and IPC audit requirements.
- (g) “**Uphold**” means to keep the original error finding after reviewing a dispute from the Client Business Area.

## 2 RESPONSIBLE PARTY

The following table sets forth the responsible party for the Quality Assurance Services.

Process / Function ID	Process/Function Name / Description	Health Net Department	Line of Business (LOB)	Region	Resp. Party	
					Supplier	Health Net
QA1	Quality Assurance Services					
QA1.1	SOX/IPC	All	All	All		
QA1.1.1	SOX/IPC Compliance	All	All	All	X	
QA1.1.2	SOX/IPC Control Approval	All	All	All		X
QA1.2	Book of Business Auditing	All	All	All	X	
QA1.3	Regulatory (Mock) Auditing	Claims, Membership, Appeals & Grievances	All	All	X	
QA1.4	Focused/Ad Hoc Auditing	All	All	All	X	

Process / Function ID	Process/Function Name / Description	Health Net Department	Line of Business (LOB)	Region	Resp. Party	
					Supplier	Health Net
QA1.5	External Employer Group Audits	Claims, Membership, Contact Center, Appeals & Grievances	Commer cial	All		
QA1.5.1	External Employer Group Auditing Services	Claims, Membership, Contact Center, Appeals & Grievances	Commer cial	All	X	
QA1.5.2	External Employer Group Auditing Oversight	Claims, Membership, Contact Center, Appeals & Grievances	Commer cial	All		X
QA1.6	Audit Oversight and Review	All	All	All		X
QA1.7	Audit Support Services	All	All	All	X	
QA1.8	Quality Assurance Policy Services	All	All	All	X	

### 3 QUALITY ASSURANCE SERVICES

#### 3.1 SOX/IPC

- (a) **“Sox/IPC Compliance”** are the Functions associated with performing all audit and reporting in compliance with regulatory SOX and IPC controls, including the following activities:
- (i) Intake and satisfy various SOX/IPC requests from Internal Audit and other parties within/outside of Health Net; and
  - (ii) Manage and satisfy monthly and quarterly SOX/IPC requests.
- (b) **“Sox/IPC Control Approval”** are the Functions associated with reviewing and approving new/amended SOX/IPC controls.

#### 3.2 Book of Business (BKB) Auditing

**“BKB Auditing”** are the Functions associated with the monthly sampling, auditing, and reporting results on a post transactional basis for BKB Audits, including the following activities:

- (a) Randomly sample universe, with a statistically valid sample size, using a stratified sampling rule set from a universe provided by the Client Business Area;
- (b) Validating the universe prior to sampling to ensure the appropriate universe was sampled;
- (c) Audit (on a post transaction basis) various work types for the listed Client Business Areas, in accordance with Client Business Area provided policies and procedures, inclusive of compliance to any regulations;
- (d) Notify Processor Associates and their Supervisor of any errors within the established turnaround times;
- (e) Manage the dispute process for any errors being disputed by the Client Business Area;
- (f) Finalize and publish final error findings and overall accuracy scores on a monthly basis within the established turnaround times;
- (g) Maintenance, upgrades, and development of audit tools and databases including but not limited to Microsoft Access and Lotus Notes and Excel;
- (h) Fulfill custom ad hoc report requests from the BKB auditing universe;
- (i) Manage and maintain intake process and system for new and adjusted audit requests;
- (j) Fulfill audit requirements from a SOX/IPC perspective;
- (k) On at least an annual basis, perform sample size analysis and universe stratification; and
- (l) Based on audit findings, make recommendations to business areas for policy and procedure creation/updates and/or process change/improvement.

### 3.3 Regulatory (Mock) Auditing

**“Regulatory Mock Auditing”** are those Functions associated with the monthly sampling, auditing, and reporting results for Regulatory (Mock) Audits, including the following activities:

- (a) Randomly sample universe based on regulatory criteria using a sampling rule set from a universe provided by the Client Business Area;
- (b) Validating the universe prior to sampling to ensure the appropriate universe was sampled;
- (c) Audit (on a post transaction basis) various regulatory elements for the listed Client Business Areas, in accordance with Client Business Area provided policies and procedures, inclusive of compliance to any regulations;
- (d) Manage the dispute process for any errors being disputed by the Client Business Area;
- (e) Finalize and publish final error findings and overall accuracy scores on a monthly basis within the established turnaround times;

- (f) Maintenance, upgrades, and development of audit tools and databases including but not limited to Microsoft Access and Excel;
- (g) Collect Corrective Action Plan (CAP) responses from Client Business Areas for elements which fail for the given month;
- (h) Manage and maintain intake process and system for new and adjusted audit requests;
- (i) Fulfill audit requirements from a SOX/IPC perspective; and
- (j) Based on audit findings, make recommendations to business areas for policy and procedure creation/updates and/or process change/improvement.

### 3.4 Focused/Ad Hoc Auditing

*“Focused/Ad Hoc Auditing”* are those Functions associated with the sampling, auditing, and reporting results on a post transactional basis for Focused/Ad Hoc Audits, including the following activities:

- (a) Randomly sample universe based on criteria using a sampling rule set from a universe provided by the Client Business Area;
- (b) Validate the universe prior to sampling to ensure the appropriate universe was sampled;
- (c) Audit (on a post transaction basis) specific focused elements for the listed Client Business Areas, in accordance with Client Business Area provided policies and procedures, inclusive of compliance to any regulations;
- (d) Manage the dispute process for any errors being disputed by the Client Business Area;
- (e) Finalize and publish final error findings and overall accuracy scores based upon an established turnaround time;
- (f) Creation of audit tools including but not limited to Excel and Microsoft Access databases;
- (g) If CAP's are required, collect Corrective Action Plan (CAP) responses from Client Business Areas for elements which fail for the given audit time period;
- (h) Fulfill custom ad hoc report requests from the focused / ad hoc auditing universe;
- (i) Manage and maintain intake process and system for new and adjusted audit requests;
- (j) Fulfill audit requirements from a SOX/IPC perspective; and
- (k) Based on audit findings, make recommendations to business areas for policy and procedure creation/updates and/or process change/improvement.

### 3.5 External Employer Group Audits

- (a) “**External Employer Group Auditing Services**” are those Functions associated with the planning, scheduling, auditing, and project management of on-site External Employer Group Audit requests, including the following activities:
  - (i) Audit Employer Group requested audit universe;
  - (ii) Provide systems training and systems oversight for Employer Group Auditors; and
  - (iii) Provide Subject Matter Experts during the on-site audit.
- (b) “**External Employer Group Oversight**” are those Functions associated with overseeing the External Employer Group Auditing Services, including the following activities:
  - (i) Receive and plan External Employer Group Audit request; and
  - (ii) Respond to External Employer Group Audit finalized findings.

### 3.6 Audit Oversight and Review

“**Audit Oversight and Review**” are those Functions associated with the overall management and oversight of the Quality Assurance Services, including the following activities:

- (a) Audit-the-Supplier Auditor;
- (b) Regular review of audit methodologies, strata, sampling, processes, and sample sizes;
- (c) Approve universe and sample size analysis;
- (d) External Employer Audit Management; and
- (e) Review and consultation of new audits and review requested changes to current audits.

### 3.7 Audit Support Services

“**Audit Support Services**” means those Functions associated with providing support for Audits of the applicable line of business or a component of it, whether conducted by (or on behalf of) Health Net itself or a Health Net Regulator or customer (e.g., a large Employer Group), including the following:

- (a) Providing data and reports requested by the Auditors;
- (b) Providing subject matter expertise and otherwise supporting the conduct of the Audit as requested by the Auditors;
- (c) Assisting in the development and implementation of corrective action plans in response to Audit findings identifying weaknesses or deficiencies in the Audited Function; and
- (d) Supporting Health Net communications with regulators.

### 3.8 Quality Assurance Policy Services

“**Quality Assurance Policy Services**” means those Functions associated with the development and implementation of “**Health Net Quality Assurance Policies**,” which are the Health Net Policies as defined in Schedule P (*Health Net Policies*) governing or pertaining to the Quality Assurance Services, more specifically, the conduct of Health Net’s Quality Assurance Services.

Below are some examples of selected Quality Assurance Policy Services Functions, which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only:

- (a) Generally, provide operational subject matter expertise with respect to Health Net Quality Assurance Policies;
- (b) As requested, participate in meetings with Health Net and Supplier stakeholders having responsibility for the development, implementation, monitoring and enforcement of Health Net Quality Assurance Policies;
- (c) In response to changes in Laws, regulations, guidelines, policies, contracts or requests from Health Net’s Enterprise Process Change Organization (“**EPCO**”) or from Health Net’s or Supplier’s Compliance organization:
  - (i) Participate in Health Net EPCO Steering Committee meetings to review new legal and regulatory changes and assessment of business impact;
  - (ii) Participate in Health Net EPCO regulatory implementation Change Teams;
  - (iii) Project manage the operational implementation and/or affected system changes of legal and regulatory changes that affect Quality Assurance Services and participate in operational implementation and/or affected system changes of legal and regulatory changes that span multiple functions/departments, including tracking the progress of Deliverables and communicating status to Health Net’s EPCO and/or Compliance organization; and
  - (iv) Based on the aforementioned meetings and guidance from the EPCO, prepare initial drafts of revised or new Health Net Quality Assurance Policies and submit them to the relevant Health Net and Supplier stakeholders for review, comment and approval;
- (d) Prepare updated versions of Health Net Quality Assurance Policies to address input provided by relevant Health Net and Supplier stakeholder groups;
- (e) Provide communications and training to Supplier personnel regarding revised and new Health Net Quality Assurance Policies and access to Health Net personnel to such communications and training; and
- (f) Implement Health Net-approved Health Net Quality Assurance Policies by Supplier Personnel involved in the performance of the Quality Assurance Services.

**QUALITY ASSURANCE**  
**SOLUTION DESCRIPTION**

**1. INTRODUCTION**

This document is the Solution Description for Statement of Work #5 – Quality Assurance (this “*Statement of Work*”). Whereas Exhibit A (*Quality Assurance Services*) describes the Functions which Supplier is responsible for performing under this Statement of Work. This Exhibit A-1 (*Quality Assurance Solution Description*) describes the **means by which** and the **manner in which** Supplier will perform those Functions. This document includes an overview of Supplier’s service delivery architecture –including a depiction on a global map of the geographic configuration and delivery architecture of Supplier’s Solution (as it will exist at the completion of Phase 2). This geographical depiction also identifies all Service Delivery Centers of Supplier (and its Affiliates and other Subcontractors) that will be utilized in performing and delivering the Services (including the back-up and failover locations for each) and how they will be interconnected to each other and to Health Net’s IT Environment. It then provides additional descriptive information about each of the principal components of Supplier’s Solution.

This Exhibit A-1 (*Quality Assurance Solution Description*) includes the following attachments, which are incorporated herein by reference:

Exhibit A-1.1 Approved Service Delivery Centers

Exhibit A-1.2 Service Delivery Configuration at the Completion of Phase 2

**2. DEFINITIONS AND INTERPRETATION**

**2.1 Defined Terms**

The following terms, when used in this Statement of Work, will have the meanings set forth below unless otherwise specifically defined in the body of this document. Additionally any capitalized term used but not defined in this Exhibit A-1 (*Quality Assurance Solution Description*) will have the meaning indicated in Schedule W (*Glossary*).

Defined Term	Meaning
“ <i>Solution</i> ”	A collective term referring to the means by which and manner in which Supplier will perform and deliver the Services under this Statement of Work.

**3. SOLUTION OVERVIEW**

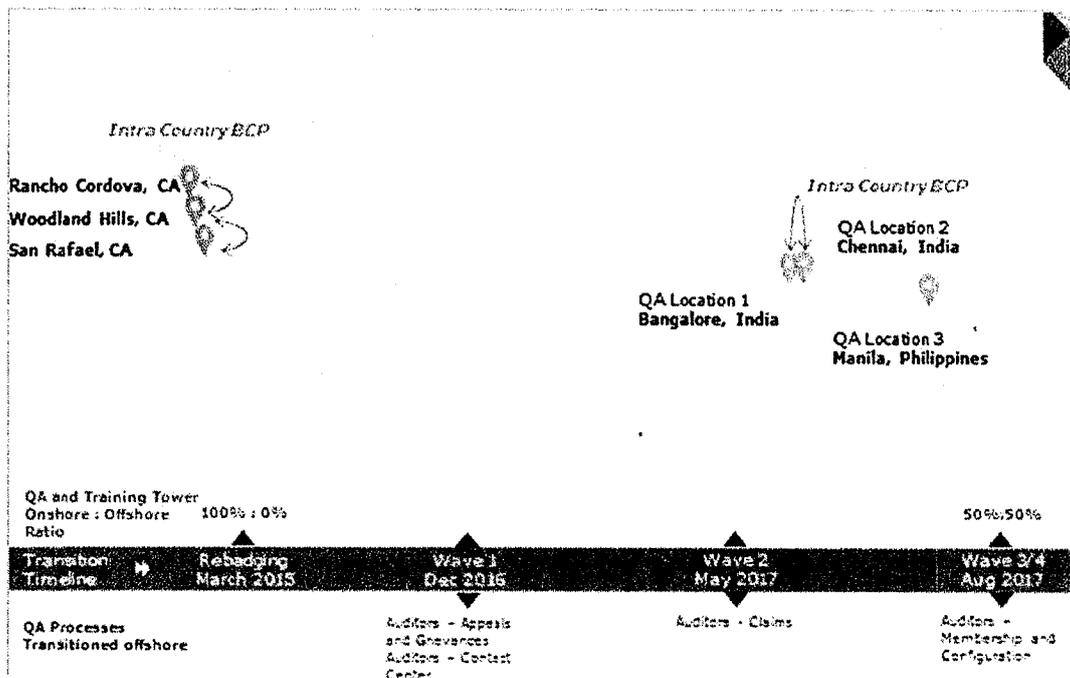

**3.1 High-level Service Delivery Architecture and Configuration**

This section provides an overview of the geographical and physical configuration of Supplier’s Solution for the Services under this Statement of Work. Exhibit A-1.1 (*Approved Service Delivery Centers*) provides additional information about each of the Service Delivery Centers Supplier will use to provide the Services under this Statement of Work, including both the primary Service Delivery Centers and the back-up / failover locations that Supplier will activate

and use to provide the Services if operations at any primary Service Delivery Center are disrupted or disabled.

**Figure 1**

*\*Dates represent end date of each transition wave.*

Supplier's Solution will be implemented in 3-4 waves as depicted in Figure 1 above with some of the work gradually moving to the Offshore locations of Chennai and Bangalore in India and Manila in the Philippines. The estimated end state for the Quality Assurance Services is expected by September 2017.

### 3.2 Service Delivery Model

This section provides an overview of the commercial delivery model that the Supplier will utilize in providing the Services under this Statement of Work. As described in Exhibit H (*Quality Assurance Subcontractors*), Supplier will not use any Supplier Affiliates or Subcontractors to perform the Services under this Statement of Work. The Supplier Personnel performing the Services will be located in Rancho Cordova, CA; Woodland Hills, CA; San Rafael, CA; Huntington Beach, CA; Chennai, India; and Manila, Philippines.

### 3.3 Business-Process-as-a-Service

The Services to be provided under this Statement of Work will be provided under a 'Business-Process-as-a-Service' delivery model - i.e., as a fully integrated vertical service in which Supplier is responsible for providing all the associated resource / service layers (facilities, IT infrastructure, tools, application software, labor, infrastructure and applications operations and support, and performance of the associated business processes); and Health Net is purchasing 'business outcomes'. Supplier will be responsible for performing the Quality Assurance Services set forth in Exhibit A (*Quality Assurance Services*).

At the end of the Transition, Supplier is targeting for 50% of the FTE work to be Offshore. Refer to Section 6 (Operating Model) for details on Onshore/Offshore mix, delivery locations, and processes.

#### 4. CHANGES TO SUPPLIER'S SOLUTION

As a general principle, Supplier has both the right and the obligation to perform the Services to be provided by it under this Statement of Work in the manner described in this Exhibit A-1 (*Quality Assurance Solution*). That said, Supplier is charged with responsibility for the adequacy of its Solution, which is to say that if the Supplier's Solution, as described in this Exhibit A-1 (*Quality Assurance Solution*), should prove inadequate at any point during the Statement of Work Term for Supplier to perform and deliver the Services in accordance with the obligations of the Agreement (including this Statement of Work), then Supplier is responsible for making such changes to its Solution as are necessary to enable Supplier to perform and deliver the Services in accordance with such obligations. All such changes are to be made in accordance with Schedule H (*Change Control Process*) of the Agreement, as applicable according to its terms; provided, however, that Supplier is responsible for making such changes at its own cost and expense except in those cases (if any) in which the Agreement expressly provides that Health Net has Financial Responsibility for them.

#### 5. SOLUTION DESCRIPTION

Supplier's solution is built on the following foundational aspects:

##### **Delivery Solution:**

- **Quality Focus** – Supplier's primary focus will be to maintain seamless continuity of Services. For all processes migrated Offshore, the focus will be to first ensure adherence to regulatory compliance and quality.
- **Support ratio** – To enable focused monitoring and feedback, Supplier's delivery model provides a Supplier Personnel to Supervisor and Manager ratio at Offshore and Onshore as described in Section 0.
- **Continuous Improvement** - Supplier will appoint dedicated Six Sigma and Process Excellence resources during the Term to identify sustainable improvement opportunities. \*\*\*

##### **Knowledge Retention:**

- **Domain Experts** – Supplier will invest in dedicated management staff with previous quality and compliance experience.
- **Health Net Training Academy** – Supplier will have in place a dedicated Health Net Training Academy tasked with the mandate of building/maintaining a knowledge repository, updating training and process documentation, providing training to new hire Supplier Personnel and providing higher level training to experienced resources for Quality Assurance operations. Supplier will periodically conduct training to keep Supplier Personnel up-to date on regulatory, process and system changes.

##### **Solution Location:**

Supplier will deliver the Quality Assurance Services from the United States, India and the Philippines. Exhibit A-1.1 (*Supplier Facilities*) lists the locations of the Supplier Service Delivery Centers for the Quality Assurance Services.

## 6. OPERATING MODEL

The operating model for Quality Assurance Services defines the service delivery blueprint and key aspects of service delivery. The operating model also describes how the Services will be delivered in a scalable global environment.

\*\*\*

### 6.1 Resource Mix

Supplier will leverage its global operating model to deliver the Quality Assurance Services. Supplier has considered the following criteria to define its Onshore/Offshore strategy:

- Regulatory requirements
- Availability of skills at Offshore locations
- Health Net Offshore restrictions

Roles identified to move Offshore will continue to be responsible for the same tasks and activities that were previously performed Onshore.

The Onshore/Offshore resource mix for Quality Assurance Services is listed below in Table 1.

**Table 1**

Function	Estimated End State		
	Onshore %	Offshore %	Location
Quality Assurance			
Membership & CCC Correspondence	***	***	W,R,Ch,B
Claims	***	***	W,R,Ch,B
MHN- Claims, A&G and Configuration	***	***	W,S,Ch,B
Claims and A&G Analyzing/Reporting	***	***	W, Ch,B
Business Analysis			
CCC/MHN Calls	***	***	W,R,H,Ch,B
Reports	***	***	W,Ch,B

Function	Estimated End State		
	Onshore %	Offshore %	Location
Reports/Configuration/Benefits Load Audits	***	***	W, Ch,B
Total (A+B+C+D)	***	***	

Legends	
Location	Code
Woodland Hills (US)	W
Rancho Cordova (US)	R
San Rafael	S
Chennai (India)	Ch
Bangalore (India)	B
Manila (Philippines)	M
Huntington Beach	H

- The above percentages are approximate estimates.
- The above plan will be finalized as part of the process assessment that will take place during the Transition as described in Transition Manual, with agreement between Health Net and Supplier.
- The estimated end state is expected by September 2017.
- Only those roles mandated by Health Net or where skills are not available Offshore will be Onshore.
- As shown in Table 1, while a process can span across 5 locations there will be no role within a process which will span across more than 2 locations.

## 6.2 Location

Supplier will deliver the in-scope Services from US, India and Philippines based locations. The delivery location strategy has been carefully planned considering following criteria:

- Health Net mandated Offshore staffing
- Availability of talent pool
- Skill requirements

- Regulatory limitations
- Business continuity

Supplier will deliver specific Quality Assurance Functions as set forth in Table 2 as follows:

**Table 2**

Function	Delivery Location	
	US	India
Membership and CCC Correspondence	Rancho Cordova, Woodland Hills	Bangalore/Chennai
Claims	Rancho Cordova, Woodland Hills	Bangalore/Chennai
MHN – Claims, A&G and Configuration	Rancho Cordova, Woodland Hills, San Rafael	Bangalore/Chennai/Manila
Claims and A&G analysis/reporting	Woodland Hills	Bangalore/Chennai
CCC/MHN calls	Rancho Cordova, Huntington Beach	Bangalore/Chennai
Reports / Business Analysis	Woodland Hills	Bangalore/Chennai

The teams across locations in US, India and Philippines will interact on an ongoing basis to ensure effective planning, monitoring and tracking of QA processes, activities and requirements. The following are the key activities that will be performed at each location:

- **Forecasting** – identifying the number of transactions, volumes and activities that would need to be transacted and processed in coming months
- **Capacity Planning** - ensuring staffing in place can manage the forecasted volumes
- **Monitor Productivity** - An ongoing daily, weekly, monthly exercise to track, analyze and report on productivity trends
- **Reallocation based on productivity** – An ongoing exercise to track and shift work , based on transaction and volumes, within teams and individuals to ensure desired productivity

- **Monitor Quality and SLAs** - An ongoing daily, weekly, monthly exercise to track, analyze and report on quality and Service Levels

The organization structure has been functionally designed in a manner that facilitates effective operations across locations. This model ensures that workflow is effective in real time facilitating tactical monitoring.

### 6.3 Operating Hours

Supplier will at minimum replicate the operating hours currently adhered to by Health Net's Quality Assurance organization as of the Effective Date, as set forth in the table below. Supplier acknowledges and agrees that performance of the Quality Assurance Services will regularly require Supplier Personnel to perform additional/overtime work outside regular operating hours, and that such additional/overtime work is within the scope of the Quality Assurance Services.

Supplier will extend its hours of operations (for example, through overtime, weekend and holiday work) from time to time as needed to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement. Supplier's work during such extended hours of operations is within the scope of the Quality Assurance Services.

Within the regular Hours of Operations listed below, Supplier will have staff work according to defined shift schedules. However, Supplier will make reasonable efforts to permit Supplier staff to work flexible shift times when that can be done without jeopardizing Supplier's ability to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement.

**Table 3**

Sub function	Weekday - Hours of Operations (PST)
Quality Assurance	
Membership and CCC Correspondence	08:00 am to 17:00 pm
Claims	08:00 am to 17:00 pm
MHN – Claims, A&G and Configuration	08:00 am to 17:00 pm
Claims and A&G analysis/reporting	08:00 am to 17:00 pm
Business Analysis	
CCC/MHN calls	08:00 am to 17:00 pm
Reports	08:00 am to 17:00 pm

### 6.4 Operations

Supplier approach to managing operations is as follows:

- **Operational Focus:**  
Team leaders and supervisors take part in team huddles, floor walks, daily performance reviews, daily supplier personnel communication plan and customer calibration sessions
- **Performance Management:**  
Measure and manage associate performance through data and service dashboards
- **Span of Control:**

Supplier will provide for the following span of control:

- **\*\*\*Health Net Training Academy:**  
Supplier will establish a dedicated Health Net Training academy for management of training content and delivery of training programs. Supplier will establish a Knowledge Management Portal for management and easy access to training content, desktop procedures and P&Ps. The Health Net Training Academy will work closely with the Training operations and facilitate necessary training. Training material will be continuously updated based on System and process updates.
- **Team Huddle:**  
Supplier's team leads will conduct daily team meetings for individual processes to share any critical updates, provide feedback and communicate lessons learned, and plan for the day.
- **Quality:**  
Supplier will implement Health Net mandated specific quality and compliance programs in its delivery model for managing and achieving Service Levels. Supplier will analyze audit findings to determine root causes and will deploy corrective and preventive solutions to improve quality. In the daily team meetings, prevalent trends in errors, root causes and preventive actions will be discussed and implemented.
- **Continuous Improvement:**  
Supplier will have a dedicated Process Excellence (PEX) team consisting of Six Sigma resources for Health Net Quality Assurance functions to optimize performance and handoffs in Health Net Quality Assurance processes while continuously improving standardization.
- **Rewards and Recognition:**  
Supplier will recognize the efforts of its best performers using stack ranking and will reward them through a structured reward and recognition program that aligns with quality and productivity objectives. The rewards and recognition will be applicable for both Onshore and Offshore teams. The specific criteria for the awards will be decided by the Supplier operations leads depending on the specific behavior and/or results to be achieved.

## 6.5 Resource Profile

Supplier has a very well defined methodology for recruitment and selection of candidates at the Offshore locations. Supplier will work closely with Health Net to establish job descriptions at various levels and functions. Based on these job descriptions, Supplier will select candidates with the proper qualifications and experience in order to ensure a "best-fit" for Health Net. These resources will be seeded from Health Net operations.

The table below is an illustration of indicative requirements for Offshore staffing and the minimum qualifications required to be selected for Quality Assurance Services.

<b>Audit Analyst – Claims</b>	
<b>Qualification &amp; Experience</b>	<b>Selection Process</b>
<b>Graduates with four to five (4-5) years' experience with Health Net Healthcare claims adjudication and audit processes</b> <b>Six Sigma/Lean exposure of at least two (2) years</b>	Aptitude test Domain/ Operations Interview HR Interview for Cultural fitment Medical and background check

<b>Audit Analyst – Membership</b>	
<b>Qualification &amp; Experience</b>	<b>Selection Process</b>
<b>Graduates with four to five (4-5) years' experience with Health Net membership / financial reconciliation process auditing experience</b> <b>Six Sigma/Lean exposure of at least two (2) years</b>	Aptitude test Domain/ Operations Interview HR Interview for Cultural fitment Education and Professional Background check

<b>Audit Analyst – Configuration</b>	
<b>Qualification &amp; Experience</b>	<b>Selection Process</b>
<b>Graduates with four to five (4-5) years' experience with Health Net Healthcare Configurations and benefits coding process auditing experience</b> <b>Six Sigma/Lean exposure of at least two (2) years</b>	Aptitude test Domain/ Operations Interview HR Interview for Cultural fitment Education and Professional Background check

<b>Audit Analyst – A&amp;G</b>	
<b>Qualification &amp; Experience</b>	<b>Selection Process</b>
<b>Graduates with two to three (2-3) years' experience with Health Net Healthcare &amp; A&amp;G processes</b> <b>Six Sigma/Lean exposure of at least two (2) years</b>	Aptitude test Domain/ Operations Interview HR Interview for Cultural fitment Education and Professional Background check

<b>Audit Analyst – Contact Center</b>

## 6.7 Onshore Requirements

Section 6 sets forth the Quality Assurance Services roles that Supplier is required to retain Onshore. Supplier will at all times provide the Quality Assurance Services in accordance with Schedule Y (*Offshore Prohibitions and Requirements*).

## 6.8 Service Performance Management

Supplier will provide and implement the quality assurance procedures that are necessary to perform the Quality Assurance Services in accordance with the Service Levels, reporting formats and frequency.

### Approach

Supplier will use a statistically valid sample size for auditing

### Tools

Supplier will use quality analysis using tools including:

- Pareto Analysis
- Fish Bone Diagram
- Box Plot

## 7. KEY ASSUMPTIONS

- 1) Any work request received directly at Health Net in non-digital format will be batched and sent by Supplier to the scanning/imaging service provider for conversion into digital format. However for regulatory requirements Onshore Supplier Personnel will scan the documents in the United States.
- 2) The Onshore-Offshore mix will be validated during detailed Transition planning as set forth in the Transition Manual.
- 3) All Services will be provided in English language only.

## 8. RISKS

Additional risks, if any will be identified and shared during Transition as part of the Processes Assessment exercise.

**EXHIBIT A-1.1****APPROVED SERVICE DELIVERY CENTERS**

The Service Delivery Centers at (or from) which Supplier is authorized to perform the Services under this Statement of Work are listed below. Even if Health Net has approved Supplier's use of an Affiliate or other Subcontractor to perform certain aspects of the Services, their performance must be from an approved Service Delivery Center listed in this Exhibit A-1.1 (*Approved Service Delivery Centers*).

Supplier will provide sufficient coverage for the Quality Assurance Services by leveraging its global delivery network. A list of holidays across delivery locations will be mutually agreed with Health Net to ensure that there is no impact on operations.

**Onshore Service Delivery Centers**

Primary Location	Type of Facility	Hours of Operation	Functions / Services	Languages Supported	Key Platform / Systems	Back-up / Fail-over Location	Facility Operator	Facility Owner	Date Placed in Service	Multi-client Site (Y/N)?

EXHIBIT A-1.2

SERVICE DELIVERY CONFIGURATION AT THE COMPLETION OF PHASE 2

Set out below is a description of Supplier's 'To-Be' Solution for the Quality Assurance Services as it will be configured at the completion of Phase 2. The tactical To Be solution will be mutually defined during the Transition, below is an illustrative technology environment:

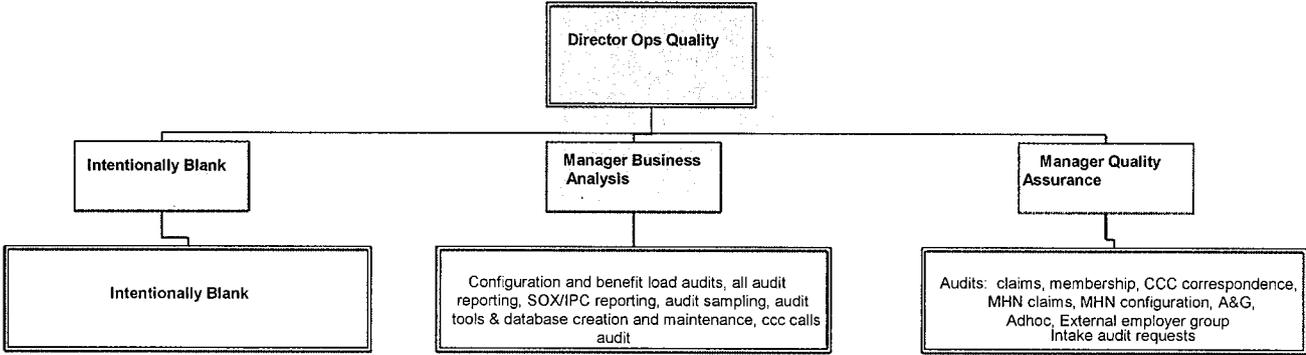

**EXHIBIT A-3**  
**QUALITY ASSURANCE ORGANIZATION CHART**

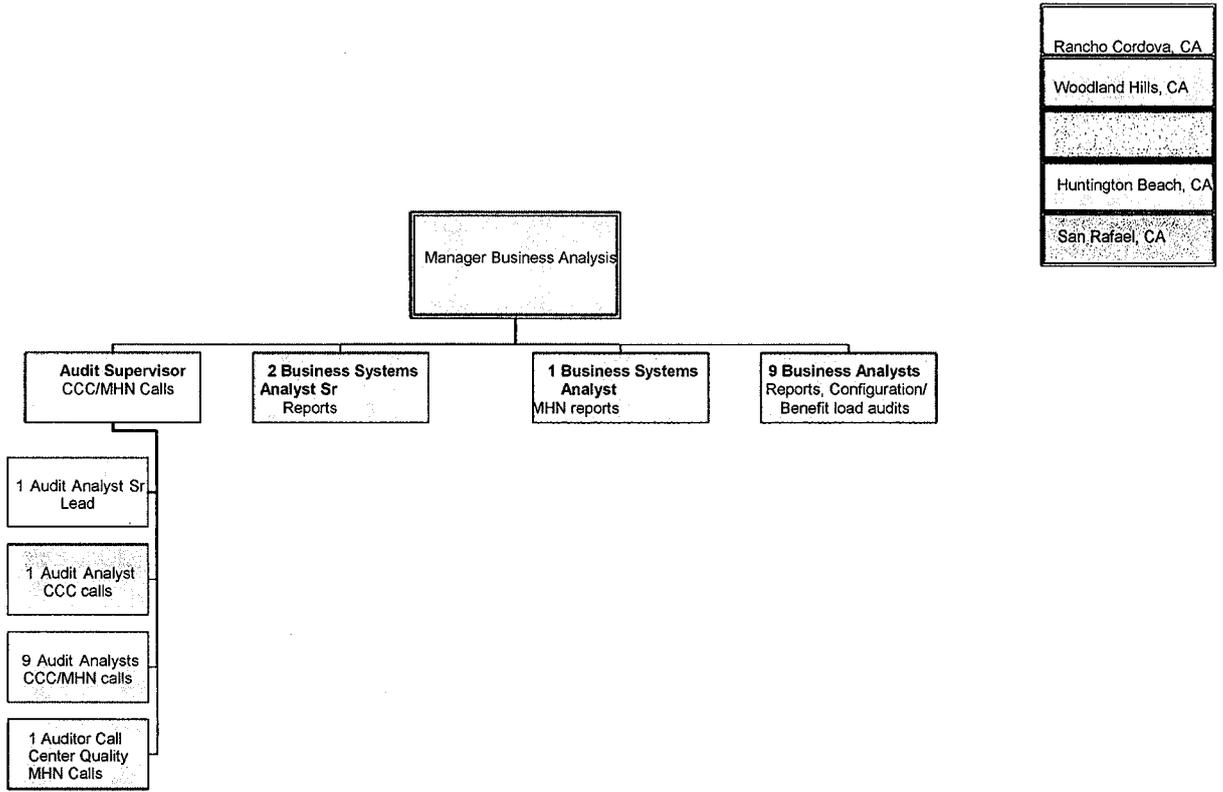

**EXHIBIT A-3****QUALITY ASSURANCE ORGANIZATION CHART**

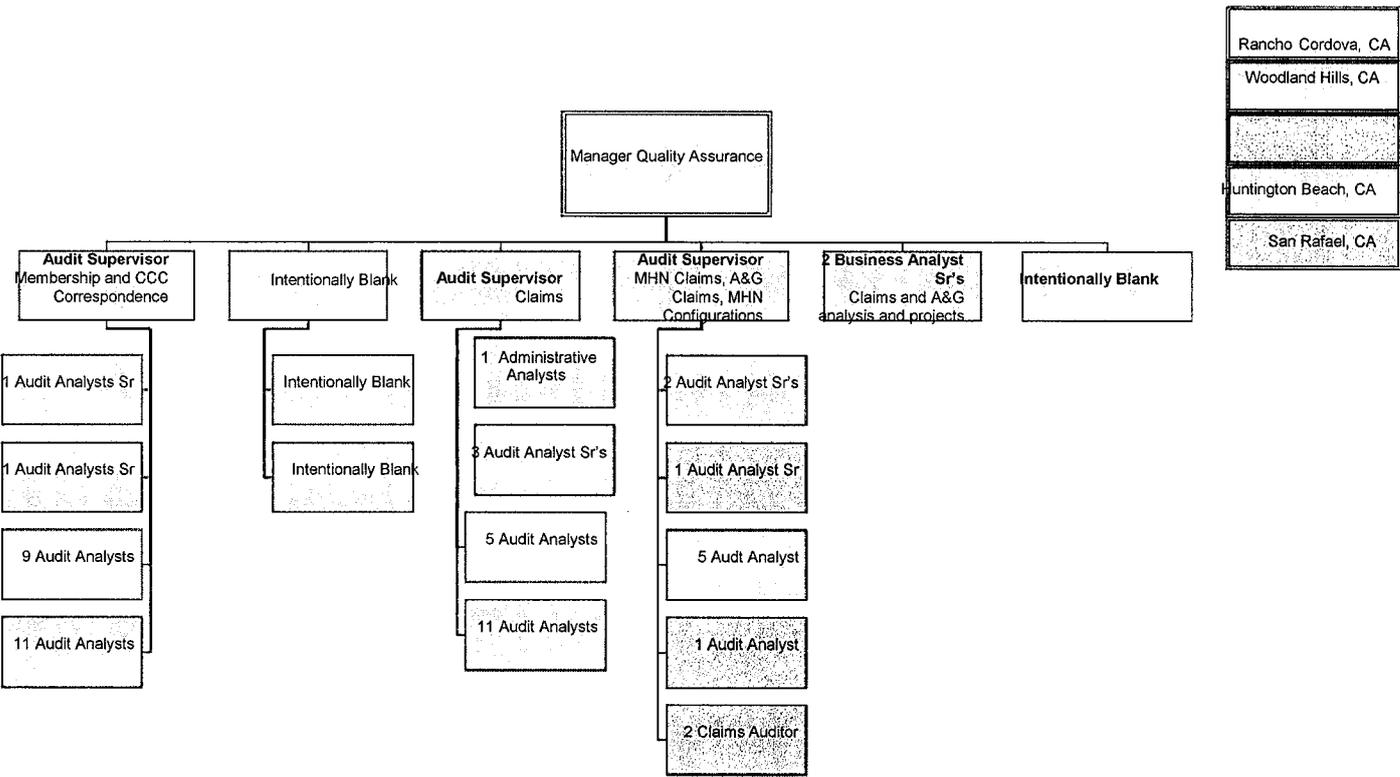

This Exhibit A-3 (*Quality Assurance Organization Chart*) contains organization charts showing, at a specific recent point in time prior to the Effective Date, the positions (including both filled and currently open positions) that represent the Health Net organizational unit(s) whose Functions are being outsourced to Supplier under this Statement of Work. This document is included as part of this Statement of Work as a supplemental means of depicting the Functions that comprise the Quality Assurance Services for which Supplier is assuming responsibility from Health Net under this Statement of Work. It is **not** included for the purpose of establishing any numerical FTE benchmark or baseline for use in determining Supplier's Charges for the Quality Assurance Services. Any changes in the organization charts between the Agreement's Effective Date and the BPaaS Services Commencement Date shall not be interpreted to represent a change in the scope of the Quality Assurance Services in the absence of Health Net specifically adding or removing Functions from Exhibit A (*Quality Assurance Services*) of this Statement of Work.

**MASTER SERVICES AGREEMENT**  
**STATEMENT OF WORK #6 (APPEALS AND GRIEVANCES SERVICES)**

**AMENDED AND RESTATED  
MASTER SERVICES AGREEMENT**

**STATEMENT OF WORK #6 (APPEALS AND GRIEVANCES SERVICES)**

This Statement of Work #6 (*Appeals and Grievances Services*), dated November 21, 2014, but effective as of November 2, 2014 (“the **SOW Effective Date**”), is made by and between Health Net, Inc., a Delaware corporation with its principal place of business located at 21650 Oxnard Street, Woodland Hills, California 91367 (“**Health Net**”), and Cognizant Healthcare Services, LLC (“**Supplier**”), a Delaware corporation having an office at 500 Frank W. Burr Blvd., Teaneck, New Jersey 07666 (each, a “**Party**” and collectively, the “**Parties**”). This SOW #6 (*Appeals and Grievances Services*) is entered into and shall be governed by the terms of that certain Amended and Restated Master Services Agreement entered into between the Parties dated November 21, 2014 (the “**Agreement**”). This Statement of Work #6 (*Appeals and Grievances Services*) replaces and supersedes in all respects the Statement of Work #6 dated November 2, 2014.

**1. INTRODUCTION**

**1.1 Background & Purpose**

This SOW #6 (*Appeals and Grievances Services*) describes the Appeals and Grievances Services Supplier will provide for Health Net, as such Services are defined in Exhibit A (*Appeals and Grievances Services*) to this SOW #6 (*Appeals and Grievances Services*), and sets forth certain terms and conditions relating to them, including, among other things:

- (a) The scope of the Appeals and Grievances Services;
- (b) The Solution Supplier will use to perform and deliver them;
- (c) The Operational Service Levels Supplier will meet in providing them;
- (d) The Key Supplier Positions applicable to them; and
- (e) The Subcontractors (if any) approved by Health Net to provide certain of them.

**1.2 Structure**

This SOW #6 (*Appeals and Grievances Services*) is comprised of this cover document and the following Exhibits:

<b>Table 1: Exhibits to SOW #6 (<i>Appeals and Grievances Services</i>)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
1	Exhibit A ( <i>Services</i> )	Describes the scope of the Appeals and Grievances Services.

<b>Table 1: Exhibits to SOW #6 (<i>Appeals and Grievances Services</i>)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
2	Exhibit A-1 ( <i>Solution Description</i> )	Describes Supplier's solution for the provision of the Appeals and Grievances Services and includes as exhibits: <ul style="list-style-type: none"> <li>• Exhibit A-1-1 (<i>Approved Service Delivery Centers</i>)</li> <li>• Exhibit A-1-2 (<i>Service Delivery Configuration at the Completion of Phase 2</i>)</li> </ul>
3	Exhibit A-3 ( <i>Organizational Chart</i> )	Identifies the Health Net roles being transferred to Supplier or displaced by Supplier roles as a result of the execution of this SOW #6 ( <i>Appeals and Grievances Services</i> ).
4	Exhibit B-1 ( <i>Operational SLAs</i> )	Identifies the Operational Service Levels applicable to the Appeals and Grievances Services.
5	Exhibit D ( <i>Key Supplier Positions</i> )	Identifies the Key Supplier Positions applicable to the Appeals and Grievances Services.
6	Exhibit H ( <i>Subcontractors</i> )	Identifies the Subcontractors approved by Health Net to provide certain of the Appeals and Grievances Services.

## 2. DEFINITIONS

Capitalized terms used but not defined in this SOW #6 (*Appeals and Grievances Services*) shall have the meanings given them in the Agreement.

## 3. APPLICABILITY OF THE AGREEMENT

This SOW #6 (*Appeals and Grievances Services*) is hereby made a part of, and is subject to and governed by, the Agreement. This SOW #6 (*Appeals and Grievances Services*) is one of the Initial Statements of Work executed under the Agreement.

**IN WITNESS WHEREOF**, Health Net and Supplier have each caused this SOW #6 (*Appeals and Grievances Services*) to be signed and delivered by its duly authorized officer, all as of the SOW Effective Date set forth above.

**EXHIBIT A**  
**APPEALS AND GRIEVANCES SERVICES**

**1. INTRODUCTION**

**1.1 General**

- (a) In the most general terms, the *Appeals and Grievances (A&G) Services* are Functions associated with the intake, processing, resolution and archiving of Appeals and Grievances received from Members or their representatives through all Channels for all regions and Lines of Business requested by Health Net including:
- (i) Documenting and tracking all Appeals and Grievances in the appropriate system of record and adherence with to all Health Net, regulatory, compliance and business standards applicable to all Products, Regions and Line of Business; and
  - (ii) Ensuring quality of work while meeting required timelines.
- (b) The Appeals and Grievances Services are more fully described in this Exhibit A-1 (*Appeals and Grievances Services*), and include the Cross Functional Services described in Section 3 of Schedule A (*Cross Functional Services*) and the Functions included as part of the Embedded Processes described in Section 4 of Schedule A (*Cross Functional Services*), each as they relate to the Functions included as part of the Appeals and Grievances Services. For clarity, this includes Supplier's responsibility to manage all activities performed under Managed Third Party Contracts in accordance with Section 3.8 of Schedule A (*Cross Functional Services*). Supplier shall perform the Appeals and Grievances Services, except for those Functions that are expressly identified as retained Health Net responsibilities in Section 2 below. For purposes of clarity, the Party that is assigned responsibility for a Function as per the designations in Section 2 is also responsible for the Embedded Processes applicable to that Function.
- (c) In addition to those Functions specifically designated in this Statement of Work as Functions for which Supplier is responsible, the Appeals and Grievances Services to be performed by Supplier include all Functions performed by or associated with the roles in the Appeals and Grievances Organization Chart set forth in Exhibit A-3 (*Appeals and Grievances Organization Chart*) except where specifically excluded in this Statement of Work, all of which are either being transferred to Supplier or displaced by Supplier roles as a result of the execution of this Statement of Work. Such Functions will be deemed to be part of the Appeals and Grievances Services to be performed by Supplier as if expressly set forth in this Statement of Work.
- (d) In addition to the retained Health Net responsibilities expressly identified in this Exhibit A (*Appeals and Grievance Services*), and in addition to and without limiting Health Net's rights under the Terms and Conditions, Health Net reserves the right to perform quality reviews and audits of Supplier's performance of the Appeals and Grievances Services when and to the extent it desires in its sole discretion. For the avoidance of doubt, Health Net is not obligated to perform any level of such quality reviews and activities, except to the extent required by applicable Law.

- (e) Supplier shall generate and provide to Health Net (i) each operational report generated prior to the BPaaS Services Commencement Date, unless and until Health Net confirms in writing that such operational report is no longer required, (ii) such other operational reports as Health Net may reasonably request from time to time, and (iii) such modifications to or replacements for the foregoing reports as may be necessary to reflect changes to and evolutions of the Appeals and Grievances Services during the term of this Statement of Work.

## 1.2 Definitions

The following definitions will apply to the Appeals and Grievances Services:

- (a) **“Acknowledgement Letter”** means an acknowledgement letter sent by Health Net to a Member either (i) upon Health Net’s receipt of an Appeal or Grievance; or (ii) upon the escalation of an Appeal to another level of review in the Appeals process.
- (b) **“Adverse Benefit Determination”** means any denial, reduction, termination, or failure to provide a payment or service (in whole or in part) when related to: (i) the determination of benefits available under the Plan, (ii) the determination of a member’s eligibility under the Plan, (iii) the application of utilization review and pre-authorization provisions, (iv) the application of experimental or investigational exclusions, (e) a determination that a benefit is not a covered benefit, or (v) the imposition of a preexisting condition exclusion, source-of-injury exclusion, network exclusion, or other limitation on otherwise covered benefits. The failure to make a payment in whole or in part includes any instance where a plan pays less than the total amount of expenses submitted with regard to a claim, including a denial of part of the claim due to the terms of a plan or health insurance coverage regarding copayments, deductibles, or other cost sharing requirements. Adverse Benefit Determination also includes any rescission of coverage, which are defined as a cancellation or discontinuance of coverage that has retroactive effect, except to the extent it is attributable to a failure to timely pay required premiums or contributions towards the cost of coverage.
- (c) **“Appeal”** means any oral or written request submitted by a member, their physician, or other member authorized representative pursuant to which such Member disagrees with a Health Net decision regarding (i) an initial adverse determination, (ii) the denial of a claim (in whole or in part), or (iii) other denial of coverage for service, as referenced in “Adverse Benefit Determination.”
- (d) **“Appeals Levels 1, 2 or 3”** or **“Levels”** means those Appeals or Grievances that (i) have reached either Level 1, Level 2 or Level 3 in the Appeals and Grievance process; and (ii) are not Expedited Appeals.
- (e) **“Congressional/Legislative Complaint”** means a written or oral expression of dissatisfaction regarding the Plan and/or Provider, including quality of care concerns, and shall include a complaint, dispute, request for reconsideration or Appeal made by an enrollee or the enrollee's representative to a congressional or other legislative office.
- (f) **“Expedited Review”** means the review of an urgent care issue, initiated orally or in writing by the member acting as a prudent layperson or a practitioner acting on the member’s behalf, involving an imminent and serious threat to the health of the member, including severe pain, potential loss of life, limb or major bodily function. In addition, a

“claim involving urgent care” includes any claim for medical care or treatment with respect to which the application of the time periods for making non-urgent care determinations: (i) could seriously jeopardize the life or health of the member or the ability of the member to regain maximum function, or (ii) in the opinion of a physician with knowledge of the member's medical condition, would subject the member to severe pain that cannot be adequately managed without the care or treatment that is the subject of the claim.

- (g) **“Grievance”** means a grievance submitted by or on behalf of a Member pursuant to which such Member expresses dissatisfaction with any aspect of the manner in which health care services are provided under a Plan.
- (h) **“Member Inquiry”** means a request made by a Member for clarification of a benefit or product, or request for information with respect to eligibility, where no expression of dissatisfaction, no initial determination, previously made decision, or denial was made. Where the Plan is unable to distinguish between a Grievance or an inquiry, it will be considered a Grievance.
- (i) **“Member Warning”** means the process of initiating involuntary transfers of members to another Primary Care Physician (PCP) or contracting Participating Physician Group (PPG) or the termination of members from a Health Net plan under certain circumstances.
- (j) **“Potential Quality Issue (PQI)”** means any potential or suspected deviation from expected performance, clinical care or outcome identified by an associate and/or the Plan’s Providers and practitioners which cannot be determined or be justified without additional review that has been.
- (k) **“Pre-Service Appeal”** means a request to change an adverse determination for care or services that the organization must approve in whole or in part, in advance of the Member obtaining care or services.
- (l) **“Post-Service Appeal”** means a request to change an adverse determination for care or services that the Member has received.

### 3. APPEALS AND GRIEVANCES SERVICES

#### 3.1 Intake Services

- (a) *“Intake Services”* are the Functions associated with performing front end processing of correspondence to determine the correct work stream pursuant to Health Net criteria, including the following activities:
- (i) Screening incoming correspondence from all Channels to identify and prioritize all cases that may meet criteria for Expedited Review; and

- (ii) Triaging incoming correspondence from all Channels, pursuant to the criteria specified by Health Net, including data capture, classification, documentation, Acknowledgement Letters, case assignment, and misroute processing.

### 3.2 Standard Appeals Processing Services

*“Standard Appeals Processing Services”* are the Functions associated with processing all of Appeals within the prescribed or required timeframes in adherence to Health Net policies and procedures, regulatory, and/or contractual requirements, including the following activities:

- (a) Processing all Pre-Service Appeals and Post-Service Appeals, including the following activities:
  - (i) Performing Member and/or Provider outreach;
  - (ii) Submitting request for information;
  - (iii) Completing investigations as dictated by the circumstances surrounding the case;
  - (iv) Performing real time case file updates;
  - (v) Making benefit determinations (favorable);
  - (vi) Routing cases requiring clinical review/determination to Health Net;
  - (vii) Clinical Review/Determination;
  - (viii) Routing recommendations on adverse benefit determinations to Health Net
  - (ix) Adverse Benefit Determinations;
  - (x) Sending required correspondence;
  - (xi) Addressing and resolving all concerns; and
  - (xii) Closing cases;

### 3.3 Process Grievances Services

*“Process Grievances Services”* are the Functions associated with processing all Grievances within the prescribed or required timeframes in adherence to Health Net policies and procedure, regulatory, and/or contractual requirements, including the following activities:

- (a) Performing Member and/or Provider outreach;
- (b) Submitting request for information;
- (c) Completing investigations;
- (d) Performing real time case file updates;
- (e) Performing benefit determinations (favorable);

- (f) Routing cases requiring clinical review/determination to Health Net;
- (g) Clinical Review/Determination;
- (h) Routing recommendations on adverse benefit determinations to Health Net
- (i) Adverse Benefit Determinations;
- (j) Sending required correspondence;
- (k) Addressing and resolving all concerns; and
- (l) Closing cases.

### 3.4 Expedited Review Services

*“Expedited Review Services”* are the Functions associated with resolving all expedited cases within the prescribed or required timeframes in adherence to Health Net policies and procedures, regulatory and/or contractual requirements including the following activities:

- (a) Submitting case for front end review;
- (b) Performing Member and/or Provider outreach;
- (c) Submitting request for information;
- (d) Completing investigations;
- (e) Performing real time case file updates;
- (f) Performing benefit determinations (favorable);
- (g) Routing cases requiring clinical review/determination to Health Net;
- (h) Clinical Review/Determination;
- (i) Routing recommendations on adverse benefit determinations to Health Net
- (j) Adverse Benefit Determinations;
- (k) Sending required correspondence;
- (l) Addressing and resolving all concerns; and
- (m) Closing cases.

### 3.5 Inquiries

*“Inquiries”* are the Functions associated with responding to all written inquiries within the prescribed or required timeframes in adherence to Health Net policies and procedures, regulatory and/or contractual requirements, including the following activities:

- (a) Performing Member outreach;
- (b) Completing investigation;
- (c) Performing real time case file updates;
- (d) Sending required correspondence;
- (e) Addressing all resolve all actionable items; and
- (f) Closing cases.

### **3.6 Member Warnings Services**

*“Member Warnings Services”* are the Functions associated with completing all Member Warning cases within the prescribed or required timeframes in adherence to Health Net policies and procedures, regulatory and/or contractual requirements, including the following activities:

- (a) Performing Member and/or Provider outreach;
- (b) Assigning warning Levels;
- (c) Processing based on assigned Levels;
- (d) Completing investigation;
- (e) Processing real time case file updates; and
- (f) Sending required correspondence.

### **3.7 Potential Quality Issue (PQI) Services**

*“Potential Quality Issue Services”* are the Functions associated with developing all PQI within the prescribed or required timeframes in adherence to Health Net policies and procedures, regulatory and/or contractual requirements, including the following activities:

- (a) Performing Provider outreach;
- (b) Submitting request for information;
- (c) Compiling case;
- (d) Submitting to Clinical for validation;
- (e) Completing investigations;
- (f) Performing real time case file updates;
- (g) Closing cases;
- (h) Validating presence of a Potential Quality Issue; and

- (i) Performing Peer Review or associated corrective Actions.

### **3.8 External Review Services**

*“External Review Services”* are the Functions associated with review of an adverse determination conducted pursuant to an applicable state external review process by an independent review organization, including the following activities:

- (a) Tracking and logging case details;
- (b) Sending all required correspondence;
- (c) Providing support services to Health Net to report to regulators, as required;
- (d) Performing effectuations on all cases where the external review entity overturns Health Net’s decision; and
- (e) For California External Review Services, working with Regulatory Affairs to provide support for all cases and ad hoc requests as necessary.

### **3.9 State Fair Hearings Services**

*“State Fair Hearings Services”* are the Functions associated with review of an adverse determination by an Administrative Law Judge, including the following activities:

- (a) Tracking and logging case details;
- (b) Sending all required correspondence;
- (c) Attending the hearing as requested by Health Net;
- (d) Effectuating the determination on all cases where the administrative law judge overturns Health Net’s decision; and
- (e) Performing legal review.

### **3.10 Independent Review Entity (IRE) (Maximus) Services**

*“Independent Review Entity (IRE) (Maximus) Services”* are the Functions associated with a review of an adverse determination conducted pursuant to an applicable state external review process by an independent review organization, including the following activities:

- (a) Tracking and logging case details;
- (b) Sending all required correspondence;
- (c) Providing support services to Health Net to report to regulators, as required;
- (d) Approving reports and submitting to IRE, if applicable; and
- (e) Performing effectuations on all cases where the IRE overturns Health Net’s decision.

### 3.11 Administrative Law Judge (ALJ) Services

“*Administrative Law Judge Services*” are the Functions associated with processing a review of an adverse determination conducted pursuant to CMS regulations, including the following activities:

- (a) Tracking and logging case details;
- (b) Sending all required correspondence;
- (c) Providing support services to Health Net to report to regulators, as required;
- (d) Approving reports and submissions to the ALJ, if applicable;
- (e) Performing effectuations on all cases where the administrative law judge overturns Health Net’s decision; and
- (f) Performing legal review.

### 3.12 Medicare Appeals Council (MAC) Services

“*Medicare Appeals Council (MAC) Services*” are the Functions associated with a review of an adverse determination conducted pursuant to CMS regulations, including the following activities:

- (a) Tracking and logging case details;
- (b) Sending all required correspondence;
- (c) Providing support services to Health Net to report to regulators, as required;
- (d) Approving reports and submissions to the MAC, if applicable;
- (e) Performing effectuations on all cases where the MAC overturns Health Net’s decision; and
- (f) Performing legal review.

### 3.13 Small Claims Cases Services

“*Small Claims Cases Services*” are the Functions associated with responding to small claims filed against Health Net in a court of law, including the following activities:

- (a) Preparing the position statement;
- (b) Tracking and logging case details;
- (c) Working with Health Net’s retained legal representation, as necessary;
- (d) Sending all required correspondence;
- (e) Performing effectuations on all cases where the court overturns Health Net’s decision;

- (f) Attending hearings; and
- (g) Performing legal review.

### **3.14 Investigation Support Services**

*“Investigation Support Services”* are the Functions associated with providing support services in the investigation of complaints, concerns, audit, and oversight activity from regulators and other entities (e.g., CMS, CTMs, HICS, ERU, SIU, Privacy Office, OID, ADOI, DMHC, DHCS, OIC, WIC, NCQA, URAC, Attorney General, Congressional and Legislative Complaints Cal Viva, Cal Optima, etc.), including the following activities:

- (a) Preparing case files;
- (b) Researching and responding to concerns; and
- (c) Performing Member and/or Provider outreach.

### **3.15 MHN Provider Disputes Services**

*“MHN Provider Dispute Services”* are the Functions associated with processing all cases within the prescribed or required timeframes in adherence to Health Net policies and procedures, regulatory and/or contractual requirements, including the following activities:

- (a) Provider outreach;
- (b) Submitting request for information;
- (c) Complete investigation;
- (d) Real time case file updates;
- (e) Benefit determinations (non-clinical);
- (f) Routing cases requiring clinical review/determination to Health Net;
- (g) Clinical Review/Determination;
- (h) Sending required correspondence;
- (i) Address and resolve all concerns; and
- (j) Case closure.

### **3.16 Oversight of Exempt Grievance Process Services**

*“Oversight of Exempt Grievance Process Services”* are the Functions associated with maintaining management level oversight for the Contact Center Exempt and Oral Grievance Services, including the following activities:

- (a) Facilitating and keeping a record of monthly review meetings;

- (b) Reviewing and approving Contact Center Policies related to Appeals and Grievances; and
- (c) Providing feedback to Contact Center management related to areas for improvement.

### **3.17 Administrative Payments Services**

*“Administrative Payments Services”* are the Functions associated with performing administrative payments in accordance with the regulatory, SOX requirements and Health Net policies and procedures, including the following activities:

- (a) Monitoring and trending administrative payments to identify areas of opportunity;
- (b) Coaching and retraining associates as necessary to drive down administrative payment volumes;
- (c) Conducting monthly SOX control audits;
- (d) Approving administrative payments exceeding dollar amount thresholds; and
- (e) Creating a delegation of authority matrix that includes retained authority at Health net for Administrative Payment approvals based on certain dollar amount thresholds.

### **3.18 SOX Reconciliation Processes**

*“SOX Reconciliation Process”* are the Functions associated with performing reconciliation activities in accordance with the regulatory, SOX requirements and Health Net policies and procedures, including the following activities:

- (a) Performing at a minimum a weekly review of cases on the exceptions reports;
- (b) Researching and tracking findings;
- (c) Monitoring and trending performance against SOX standards;
- (d) Coaching and retraining associates as necessary;
- (e) Conducting required SOX control audits; and
- (f) Reviewing audit results and monitoring performance.

### **3.19 A&G Translation Services**

*“A&G Translation Services”* are those Functions associated with interfacing with Health Net’s translation vendor to have all communications translated in accordance with regulatory, contractual and/or Health Net policies and procedures, including the following activities:

- (a) Coordinating with Health Net’s translation vendor to have documentation (e.g. member correspondence and provider records) translated; and
- (b) Coordinating with Health Net’s translation vendor to have language assistance provided to non-English speaking members as needed during member contact.

### 3.20 Executive Response Unit (ERU)

*“Executive Response Unit” or “ERU”* are the Functions associated with resolving complaints and inquiries received by the Health Net Executive Team via social media, phone, and email Channels as identified in the Policy and Procedure document including researching and resolving Better Business Bureau inquiries and internal Compliance inquiries. This Service is Offshore-restricted and must be performed Onshore.

### 3.21 Audit Support Services

*“Audit Support Services”* means those Functions associated with providing support for Audits of the applicable line of business or a component of it, whether conducted by (or on behalf of) Health Net itself or a Health Net Regulator or customer (e.g., a large Employer Group), including the following:

- (a) Providing data and reports requested by the Auditors;
- (b) Providing subject matter expertise and otherwise supporting the conduct of the Audit as requested by the Auditors;
- (c) Assisting in the development and implementation of corrective action plans in response to Audit findings identifying weaknesses or deficiencies in the Audited Function; and
- (d) Supporting Health Net communications with regulators.

### 3.22 Appeals and Grievances Policy Services

*“Appeals and Grievances Policy Services”* means those Functions associated with the development and implementation of *“Health Net Appeals and Grievances Policies,”* which are the Health Net Policies as defined in Schedule P (*Health Net Policies*) governing or pertaining to the Appeals and Grievances Services, more specifically, the conduct of Health Net’s Appeals and Grievances Services.

Below are some examples of selected Appeals and Grievances Policy Development Services Functions, which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only:

- (a) Generally, provide operational subject matter expertise with respect to Health Net Appeals and Grievances Policies;
- (b) As requested, participate in meetings with Health Net and Supplier stakeholders having responsibility for the development, implementation, monitoring and enforcement of Health Net Appeals and Grievances Policies;
- (c) In response to changes in Laws, regulations, guidelines, policies, contracts or requests from Health Net’s Enterprise Process Change Organization (*“EPCO”*) or from Health Net’s or Supplier’s Compliance organization:
  - (i) Participate in Health Net EPCO Steering Committee meetings to review new legal and regulatory changes and assessment of business impact;

- (ii) Participate in Health Net EPCO regulatory implementation Change Teams;
  - (iii) Project manage the operational implementation and/or affected system changes of legal and regulatory changes that affect Appeals and Grievances Services and participate in operational implementation and/or affected system changes of legal and regulatory changes that span multiple functions/departments, including tracking the progress of Deliverables and communicating status to Health Net's EPCO and/or Compliance organization; and
  - (iv) Based on the aforementioned meetings and guidance from the EPCO, prepare initial drafts of revised or new Health Net Appeals and Grievances Policies and submit them to the relevant Health Net and Supplier stakeholders for review, comment and approval;
- (d) Prepare updated versions of Health Net Appeals and Grievances Policies to address input provided by relevant Health Net and Supplier stakeholder groups;
  - (e) Provide communications and training to Supplier personnel regarding revised and new Health Net Appeals and Grievances Policies and access to Health Net personnel to such communications and training; and
  - (f) Implement Health Net-approved Health Net Appeals and Grievances Policies by Supplier Personnel involved in the performance of the Appeals and Grievances Services.

**EXHIBIT A-1**  
**APPEALS AND GRIEVANCES**  
**SOLUTION DESCRIPTION**

**1. INTRODUCTION**

This document is the Solution Description for Statement of Work #6 (*Appeals and Grievances*) Services (this “**Statement of Work**”). Whereas Exhibit A (*Appeals and Grievances Services*) describes **which** Functions Supplier is responsible for performing under this Statement of Work, this Exhibit A-1 (*Appeals and Grievances Solution Description*) describes the **means by which** and the **manner in which** Supplier will perform those Functions. This document contains an overview of Supplier’s service delivery architecture, a depiction of which is – displayed on a global map containing the geographic configuration and delivery architecture of Supplier’s Solution (as it will exist at the completion of Phase 2, identifying all Service Delivery Centers of Supplier (and its Affiliates and other Subcontractors) that will be utilized in performing and delivering the Services (including the back-up and failover locations for each) and how these components will be interconnected to each other and to Health Net’s IT Environment. It also provides additional descriptive information about each of the principal components of Supplier’s Solution.

This Exhibit A-1 (*Appeals and Grievances Solution Description*) includes the following attachments, which are incorporated herein by reference:

Exhibit A-1.1 Approved Service Delivery Centers

Exhibit A-1.2 Service Delivery Configuration at the Completion of Phase 2

**2. DEFINITIONS AND INTERPRETATION**

**2.1 Defined Terms**

The following terms, when used in this Statement of Work, will have the meanings set forth below unless otherwise specifically defined in the body of this document. Additionally any capitalized term used but not defined in this Exhibit A-1 (*Appeals and Grievances Solution Description*) will have the meaning indicated in Schedule W (*Glossary*).

Defined Term	Meaning
“ <b>Solution</b> ”	A collective term referring to the <b>means</b> by which and <b>manner</b> in which Supplier will perform and deliver the Services under this Statement of Work.

**3. SOLUTION OVERVIEW**

**3.1 High-level Service Delivery Architecture and Configuration**

This section provides an overview of the geographical and physical configuration of Supplier’s Solution for the Services under this Statement of Work. Exhibit A-1.1 (*Approved Service*

*Delivery Centers*) provides additional information about each of the Service Delivery Centers Supplier will use to provide the Services under this Statement of Work, including both the primary Service Delivery Centers and the back-up / failover locations that Supplier will activate and use to provide the Services if operations at any primary Service Delivery Center are disrupted or disabled.

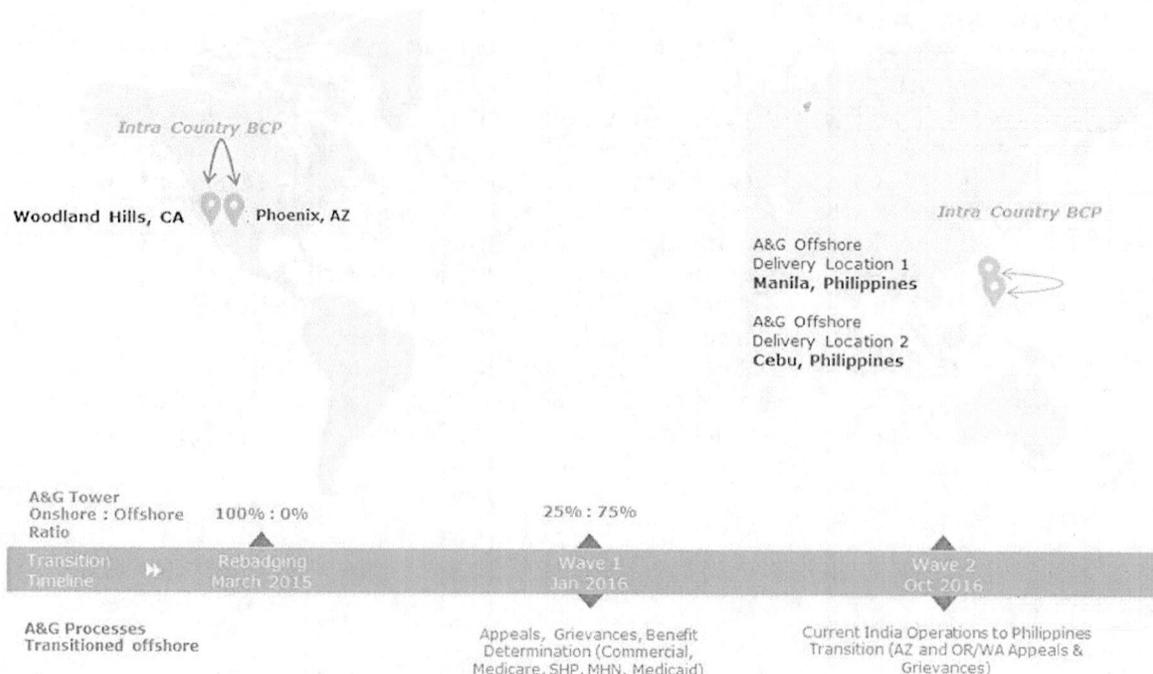

Figure 1

\*Dates represent end date of each transition wave.

Supplier's Solution will be implemented in 2 waves as depicted in Figure 1 above with some of the work moving to the Offshore locations of Manila and Cebu in Philippines, and the Tempe work would move to Supplier's Phoenix AZ location.

### 3.2 Service Delivery Model

This section provides an overview of the commercial delivery model that the Supplier will utilize to provide the Services under this Statement of Work. As described in Exhibit H (*Appeals and Grievances Subcontractors*), Supplier will not use any Supplier Affiliates or Subcontractors to perform the Services under this Statement of Work.

### 3.3 Business-Process-as-a-Service

The Services to be provided under this Statement of Work will be provided under a 'Business-Process-as-a-Service' delivery model - i.e., as a fully integrated vertical service in which Supplier is responsible for providing all the associated resource / service layers (facilities, IT infrastructure, tools, application software, labor, infrastructure and applications operations and support, and performance of the associated business processes); and Health Net is purchasing 'business outcomes' (e.g., fully resolved grievance or appeal). Supplier will be responsible for

performing the Appeals and Grievances Services set forth in Exhibit A (*Appeals and Grievances Services*).

#### 4. CHANGES TO SUPPLIER'S SOLUTION

As a general principle, Supplier has both the right and the obligation to perform the Services to be provided by it under this Statement of Work in the manner described in this Exhibit A-1 (Appeals and Grievances Solution). That said, Supplier is charged with responsibility for the adequacy of its Solution, which is to say that if the Supplier's Solution, as described in this Exhibit A-1 (Appeals and Grievances Solution), should prove inadequate at any point during the Statement of Work Term for Supplier to perform and deliver the Services in accordance with the obligations of the Agreement (including this Statement of Work), then Supplier is responsible for making such changes to its Solution as are necessary to enable Supplier to perform and deliver the Services in accordance with such obligations. All such changes are to be made in accordance with Schedule H (Change Control Process) of the Agreement, as applicable according to its terms; provided, however, that Supplier is responsible for making such changes at its own cost and expense except in those cases (if any) in which the Agreement expressly provides that Health Net has Financial Responsibility for them.

#### 5. SOLUTION DESCRIPTION

Supplier's solution is built on the following foundational aspects:

##### **Delivery Solution:**

- **Quality Focus** – Supplier's primary focus will be to maintain seamless continuity of Services while ensuring regulatory and contractual compliance requirements. For all processes migrated Offshore, the focus will be on ensuring adherence to compliance and quality.
- **Support ratio** – To enable focused monitoring and feedback, Supplier's delivery model provides Personnel to Supervisor and QA ratio Onshore and Offshore as described in Section 7.4 of this exhibit.
- **Continuous Improvement** – Supplier will appoint dedicated Six Sigma resources during the Term of the contract to identify sustainable improvement opportunities. The typical ratio will be 1 Six Sigma resource for every 150 Supplier Personnel FTEs.

##### **Knowledge Retention:**

- **Domain Experts** – Supplier will invest in staff (existing and hired) with previous Healthcare experience for key functions including Operations, Transition, Training, Quality and Compliance.
- **Health Net Training Academy** – Supplier's dedicated Health Net Training Academy will be tasked with the mandate of building a Knowledge repository during Phase 2. During phase 3, the Training Academy will be involved in maintaining the Knowledge repository, updating training and process documentation, providing training to new hire Supplier personnel and providing higher level training to experienced resources for Appeals and Grievances Operations. Supplier will periodically conduct training to keep Supplier personnel up-to date on regulatory, process and system changes. Supplier will provide ongoing/refresher training

as per the updates received from Health Net and will conduct assessments to ensure that there are no knowledge gaps. Refresher training will be conducted based on Quality audit scores for Supplier Personnel.

**Solution Location:**

- Supplier will deliver Appeals and Grievances from Service Delivery Centers in the US and Philippines. Exhibit A-1.1 (*Approved Service Delivery Centers*) describes the On-shore, near-shore and Offshore Service Delivery Centers that Supplier will use to deliver the A&G Services.

**6. SCOPE OF SERVICES**

In addition to the Appeals and Grievances services described in Exhibit A (*Appeals and Grievances Services*);

1. Supplier will research, respond, track and report privacy related incidents
2. Supplier will also train and educate the team on HIPAA Privacy and Security
3. Supplier's Appeals and Grievances operations team will provide necessary information to sales team
4. For RFP support, Supplier Appeals and Grievances operations team will provide opinion and operational data points
5. Supplier will provide necessary operational information for new vendor on-boarding and existing vendor renewals. Health Net will be responsible for vendor negotiations and contract execution.

Supplier Personnel for A&G Services will be dedicated only to Appeals and Grievances Operations.

**7. OPERATING MODEL**

The operating model for Appeals and Grievances operations defines the service delivery blue print and key aspects of service delivery. The operating model also describes how the A&G Services will be delivered for each functional process area in a scalable global environment.

Supplier will maintain twenty-two (22) FTEs Onshore to satisfy the requirements set forth in Schedule Y (*Offshore Restrictions and Prohibitions*). Any other resources staffed Onshore will be due to a lack of skill availability at the Supplier's Offshore Service Delivery Centers.

**7.1 Resource Mix**

Supplier will leverage its global operating model to deliver the A&G Services.

Supplier has considered the following criteria to define its Onshore/Offshore strategy:

- Regulatory requirements

- Availability of skills at Offshore locations
- Health Net Offshore restrictions
- Consideration for work load to resource ratio
- HR constraints (i.e. PTO, illness, injury, etc.)

Processes requiring voice support will be delivered out of US and Philippines. Roles identified to move offshore (Supervisors/coordinators/sr. coordinators) will continue to be responsible for current tasks and activities being performed onshore.

The Onshore/Offshore resource mix for A&G Services is listed below in Table 1.

Sub Function	Resource Mix Estimate*		
	Final State		Delivery Location
	Onshore %	Offshore %

Phoenix (US)	P

## Key Note:

- \*The above percentages are approximate estimates at this point
- The above plan will be finalized during the Process Assessment Phase as described in the Transition Manual, with agreement between Health Net and Supplier.
- The estimated end state is expected by March 2017
- As shared in Section 6 above, only those roles mandated by Health Net or where skills are not available offshore, will be onshore
- As shown in Table 1, while a process can span across 4 locations there will be no role within a process which will span across more than 2 locations
- Support for the AZ and OR/WA Appeals & Grievances processes (as currently provided under the existing agreement between Supplier and Health Net) from Supplier's delivery center in Chennai, India. Changes to the current solution will be documented through the Change Management process

## 7.2 Location

Supplier will deliver Appeals and Grievances Services from the US and Philippines. Exhibit A-1.1 (*Approved Service Delivery Centers*) has details of the proposed locations. The delivery location strategy has been carefully planned considering multiple criteria as follows:

- Health Net mandated onshore staffing
- Availability of talent pool
- Skill requirements
- Regulatory limitations
- Business continuity

Sub Function	Delivery Location	
	US	Philippines
<b>Appeals and Grievances Management Team (VP)</b>	US	
<b>Director</b>		
Program Manager	US	
Senior Coordinator	US	
Analyst	US

SHP Appeals and Grievances, Cal Medi Connect Grievances, Dental Appeals and Grievances (SHP)	US	
<b>Supervisor K</b>		
MHN for MHN Business, Member and Provider Appeals	US	Manila
<b>Supervisor L</b>		
Executive Response Unit	US	

*Table 2*

During Phase 2, resources working on AZ Medicare Grievances will continue to be based out of Tempe, AZ. Post Phase 2, Supplier will evaluate the operating model and will have the right to relocate resources to its other onsite US locations including Woodland Hills and Phoenix.

The below Figure 2 illustrates how teams across locations in US and Philippines, will typically interact on an ongoing basis to ensure effective planning, monitoring and tracking of Appeals and Grievance processes, activities and requirements

1. Forecasting – Identifying the number of transactions, volumes and activities that would need to be transacted and processed in coming months
2. Capacity Planning- Ensure staffing in place can manage the forecasted volumes
3. Monitor Productivity- An ongoing daily, weekly, monthly exercise to track, analyze and report on productivity trends
4. Reallocation based on productivity – An ongoing exercise to track and shift work, based on transaction and volumes, within teams and individuals to ensure desired productivity
5. Monitor Quality and SLAs - An ongoing daily, weekly, monthly exercise to track, analyze and report on quality and Service Levels

*Figure 2*

The organization structure has been functionally designed in a manner that facilitates effective operations across locations. The model ensures that workflow is effective in real time facilitating tactical monitoring.

*Figure 3*

### 7.3 Operating Hours

Supplier will at minimum replicate the operating hours adhered to by Health Net's Appeals and Grievances organization as of the Effective Date, as set forth in the table below. Supplier acknowledges and agrees that performance of the Appeals and Grievances Services will regularly require Supplier Personnel to perform additional/overtime work outside regular operating hours, and that such additional/overtime work is within the scope of the Appeals and Grievances Services.

Supplier will extend its hours of operations (for example, through overtime, weekend and holiday work) from time to time as needed to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement. Supplier's work during such extended hours of operations is within the scope of the Appeals and Grievances Services.

Within the regular Hours of Operations listed below, Supplier will have staff work according to defined shift schedules. However, Supplier will make reasonable efforts to permit Supplier staff to work flexible shift times when that can be done without jeopardizing Supplier's ability to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement.

The operating hours for the A&G Services are given below.

Sub Function	Hours of Operations (PST)
<b>Director</b>	
Program Manager	06:00 am to 08:00 pm
Senior Coordinator	06:00 am to 08:00 pm
Analyst	06:00 am to 08:00 pm
Admin III	06:00 am to 08:00 pm

<b>Manager – Appeals</b>	06:00 am to 08:00 pm
Business Analyst	06:00 am to 08:00 pm
<b>Supervisor A</b>	06:00 am to 08:00 pm
HMO Appeals, PPO Appeals, Benefit Determinations, Dental Appeals (Commercial)	06:00 am to 08:00 pm
<b>Supervisor B</b>	06:00 am to 08:00 pm
AZ Medicare Grievances, Medicaid Appeals and Grievances	06:00 am to 08:00 pm
<b>Supervisor C</b>	06:00 am to 08:00 pm
Intake (Screen and Triage), Audit, Final Letter Review, Admins Inquiry, Member Warnings	06:00 am to 08:00 pm
Associate	06:00 am to 08:00 pm
Associate – Remote	06:00 am to 08:00 pm
<b>Supervisor D</b>	06:00 am to 08:00 pm
Maximus, ALJ, MAC, Medicare Appeals, Cal Medi Connect Appeals Dental Appeals (Medicare)	06:00 am to 08:00 pm
<b>Supervisor E</b>	06:00 am to 08:00 pm
Benefit Determination EXR Appeals & Grievances (all)	06:00 am to 08:00 pm
<b>Manager – Grievances</b>	06:00 am to 08:00 pm

Executive Response Unit	06:00 am to 08:00 pm

Table 3

#### 7.4 Operations

Supplier approach to managing operations is as follows:

- **Operational Focus:** Team huddles, floor walks, daily performance reviews, daily associate communication plan and customer calibration sessions.
- **Performance Management:** Measure and manage associate performance through data and service dashboards
- **Span of Control:** Supplier will provide for the following span of control:
  - Operations Lead 1:500
  - Manager 1:50
  - Supervisor 1:15
  - Quality Auditor 1:15
  - Trainer 1:20 (during training)
  - Team Lead 1:15
  - Six Sigma & Process Excellence 1:150
- **Health Net Training Academy:** Supplier will establish a dedicated Health Net Training academy for the management of training content and delivery of training programs. The Appeals and Grievances management function of the training academy will maintain a “Knowledge Management Portal” for management and easy access to training content, desktop procedure and P&Ps. The Health Net Training Academy will work closely with the Training operations and facilitate necessary training. Training material will be continuously updated based on system updates and process updates.
- **Team Huddle:** Supplier’s team leads will conduct daily team meetings for individual processes to share any critical updates, provide feedback and communicate lessons learned, and plan for the day.
- **Quality:** Supplier will implement Health Net mandated specific quality and compliance programs in its delivery model for managing and achieving Service Levels. Supplier will analyze audit findings to determine root causes and will deploy corrective and preventive solutions to improve quality. In the daily team meetings, prevalent trends in errors, root causes and preventive actions will be discussed and implemented.
- **Continuous Improvement:** Supplier will have a dedicated Process Excellence (PEX) team consisting of Six Sigma resources for Health Net Appeals and Grievances functions to optimize performance and handoffs in Health Net Appeals and Grievances processes while continuously improving standardization.
- **Rewards and Recognition:** Supplier will recognize the efforts of its best performers using stack ranking and will reward them through a structured reward and recognition program that aligns with quality and productivity objectives. The Rewards and Recognition will be applicable for both Onshore and Offshore teams. The specific criteria for the awards will be

decided by the Operations Leads depending on the specific behavior and/or results to be achieved.

**7.5 Resource Profile**

Supplier has a very well defined methodology for the recruitment and selection of candidates. Supplier will work closely with Health Net to establish job descriptions at various levels and functions. Based on these job descriptions, Supplier will select candidates with the proper qualifications and experience in order to ensure a “best-fit” for Health Net.

The table below is an illustration of indicative requirements for Offshore staffing and the minimum qualifications that must be met to be selected for the Appeals and Grievances Services.

<b>Appeals Coordinator</b>	
<b>Qualification &amp; Experience</b>	<b>Selection Process</b>
<ul style="list-style-type: none"> <li>• Graduates with one to two (1-2) years with Healthcare experience</li> <li>• Excellent written and verbal communication skills</li> <li>• Knowledge of healthcare basics</li> <li>• Familiar with one or more contact center applications</li> <li>• Contact Center and/or A&amp;G experience preferred</li> <li>• Letter writing experience required</li> <li>• Familiar with multiple Healthcare LOBs</li> </ul>	<ul style="list-style-type: none"> <li>• Aptitude Test</li> <li>• HR Interview</li> <li>• Written test of customer service basics</li> <li>• Domain / Operations Interview</li> <li>• Technical interview on customer grievance resolution concepts</li> <li>• Education and Professional background check</li> </ul>

Table 11

**7.6 Voice Solution**

Health Net expects Supplier to deliver voice assisted Member and provider interactions from both Onshore in the US and the Philippines. All Supplier Personnel will be skilled to handle Member and provider interactions. Voice based services will be delivered from Woodland Hills and Phoenix in US and Manila and Cebu in Philippines.

Indicative Processes
Grievances, Expedited Grievances – Member and Provider
Appeals, Expedited Appeals - Member and Provider
Coordination with internal functions like Medical Management, Claims, Membership, Compliance, Legal, Finance, Contact Center
Coordination with carve out service providers

Table 12

**7.7 IT Systems**

The following systems will be used by Supplier for delivery of Appeals and Grievances Services.

Appeals and Grievance Applications / Platforms
MAGIC
MACCESS
CSI
OMNI
PRIME
ABS
QCare
UNITY
PAOS
API
RightFax
A&G Database

Table 13

### 7.8 Third Party Tools

Supplier will use the following Tools and Services. The contractual relationship for all Supplier Managed Third Parties will continue to remain with Health Net. Supplier will be responsible to manage day to day operational liaison.

Third Party Tools/Service	Tool/Service Provider	Contract Ownership
Scanning/Imaging Services	Xerox/ACS	Health Net
Diagnostic and Point-of-Care services	Alere	Health Net
Short term Temporary Staffing	Kelly Services	Health Net

Table 14

Table 15

### 7.9 Regulatory On-shore Requirements

Section 7 sets forth the Appeals and Grievances Services roles that Supplier is required to retain Onshore. Supplier will at all times provide the Appeals and Grievances Services in accordance with Schedule Y (*Offshore Prohibitions and Requirements*):

### 7.10 Service Performance Management

Supplier will provide and implement the quality assurance procedures that are necessary to perform the Appeals and Grievances Services in accordance with the Service Levels, reporting formats and frequency.

#### Approach

- Supplier will use a statistically valid sample size for auditing

#### Tools

Supplier will use quality analysis using tools including:

- Pareto Analysis
- Fish Bone Diagram
- Box Plot

### 7.11 Mailing Correspondence Onshore

Supplier will implement a process to mail 100% of all correspondence from an Onshore address, including correspondence that requires overnight mailing (e.g. case packets to the Independent

Review Entity (IRE)). Supplier will have controls in place to reconcile correspondence sent onshore by Offshore team to correspondence mailed out by onshore team.

#### **7.12 In-Person Filing Requirement**

In cases where regulator provisions allow for Members or their representatives to file appeals and grievances in person, Supplier will have a process that allows the ability to file appeals and grievances at an onshore location as applicable.

#### **7.13 Receiving Member and Member Representative Calls**

Supplier will have the technology for each coordinator to receive phone calls directly from members and their representatives related to A&G cases. Supplier will look into establishing an 800 toll free / US local number, with voice mail capability for after-hours support, and routing callers to specific coordinators using extensions as a potential solution.

### **8. KEY ASSUMPTIONS**

1. Any work request received directly at Health Net in non-digital format will be batched and sent to the scanning / imaging service provider for conversion into digital format. However for regulatory requirements, Onshore Supplier Personnel will scan the documents in the United States.
2. The Onshore/Offshore mix will be validated during detailed Transition planning as set forth in the Transition Manual.
3. All Services will be provided in English language only.

**EXHIBIT A-1.1****APPROVED SERVICE DELIVERY CENTERS**

The Service Delivery Centers at (or from) which Supplier is authorized to perform the Services under this Statement of Work are those listed below. Even if Health Net has approved Supplier's use of an Affiliate or other Subcontractor to perform certain aspects of the Services, their performance must be from an approved Service Delivery Center listed in this Exhibit A-1.1 (*Approved Service Delivery Centers*).

Supplier will provide sufficient coverage for the Appeals and Grievances Services by leveraging its global delivery network. A list of holidays across delivery locations will be mutually agreed with Health net to ensure that there is no impact on operations.

**Onshore Service Delivery Centers**

Primary Location	Type of Facility	Hours of Operation	Functions / Services	Languages Supported	Key Platform / Systems	Back-up / Fail-over Location	Facility Operator	Facility Owner	Date Placed in Service	Multi-client Site (Y/N)?
Phoenix, AZ	Office Building	Refer to Section 7.3	Appeals and Grievances Management	English	Refer to Section 7.7 IT Systems	Woodland Hills, CA	Third Party	Third Party	2010	Y
Woodland Hills, CA	Office Building	Refer to Section 7.3	Appeals and Grievances Management	English	Refer to Section 7.7 IT Systems	Phoenix, AZ				Health Net site

**Near-shore Service Delivery Centers**

Supplier will not use any near-shore Delivery Centers to perform the Appeals and Grievances Services.

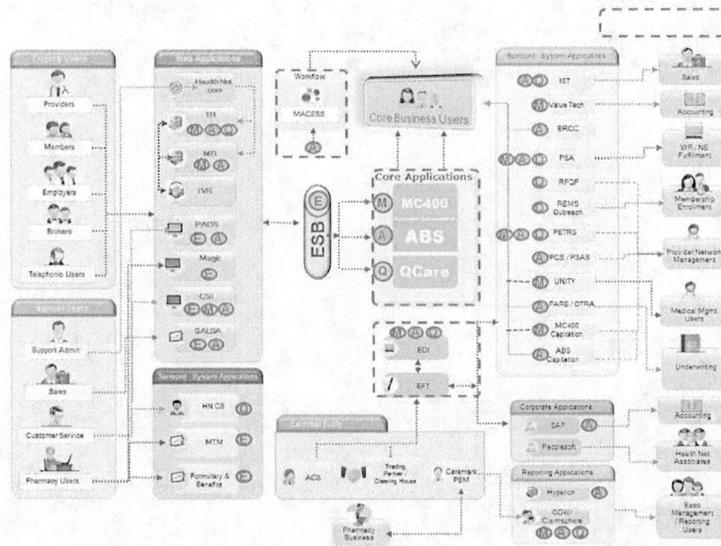

**Offshore Service Delivery Centers**

Primary Location	Type of Facility	Hours of Operation	Functions / Services	Languages Supported	Key Platform / Systems	Back-up / Fail-over Location	Facility Operator	Facility Owner	Date Placed in Service	Multi-client Site (Y/N)?
Manila - McKinley Hills – Science Hub 3	Office Building	Refer to Section 7.3	Appeals and Grievances	English, Spanish	Refer to Section 7.7 IT Systems	Cebu, Philippines	Third Party	Third Party	2013	Y
Cebu - Skyrise 4	Office Building	Refer to Section 7.3	Appeals and Grievances	English, Spanish	Refer to Section 7.7 IT Systems	Manila, Philippines	Third Party	Third Party	2013	Y

EXHIBIT A-1.2

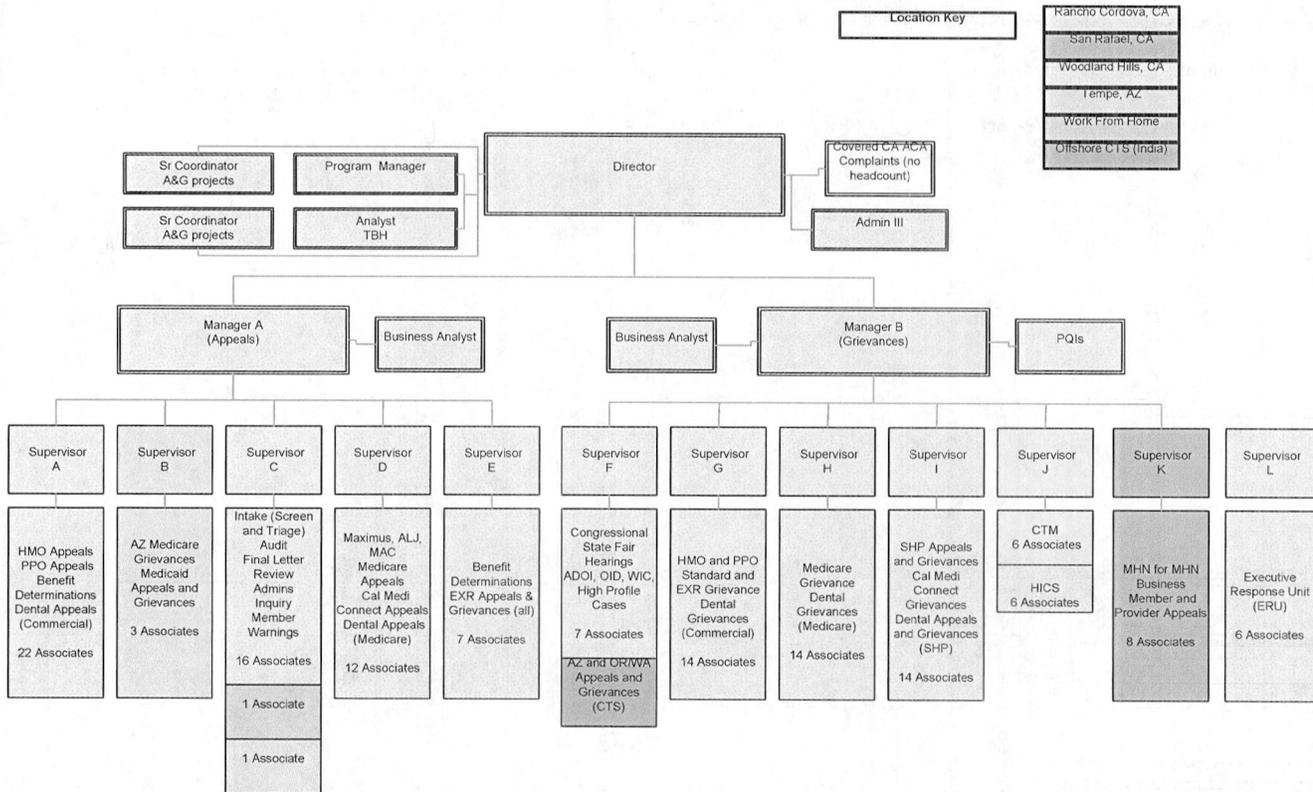

SERVICE DELIVERY CONFIGURATION AT THE COMPLETION OF PHASE 2

Set out below is a description of Supplier's 'To-Be' Solution for the Appeals and Grievances Services as it will be configured at the completion of Phase 2. The tactical To Be solution will be mutually defined during the Transition, below is an illustrative technology environment for Appeals and Grievance operations.

Member Appeals Grievances Organizational Chart

**EXHIBIT A-3**  
**APPEALS AND GRIEVANCES ORGANIZATION CHART**

**EXHIBIT A-3****APPEALS AND GRIEVANCES ORGANIZATION CHART**

This Exhibit A-3 (*Appeals and Grievances Organization Chart*) contains organization charts showing, at a specific recent point in time prior to the Effective Date, the positions (including both filled and currently open positions) that represent the Health Net organizational unit(s) whose Functions are being outsourced to Supplier under this Statement of Work. This document is included as part of this Statement of Work as a supplemental means of depicting the Functions that comprise the Appeals and Grievances Services for which Supplier is assuming responsibility from Health Net under this Statement of Work. It is **not** included for the purpose of establishing any numerical FTE benchmark or baseline for use in determining Supplier's Charges for the Appeals and Grievances Services. Any changes in the organization charts between the Agreement's Effective Date and the BPaaS Services Commencement Date shall not be interpreted to represent a change in the scope of the Appeals and Grievances Services in the absence of Health Net specifically adding or removing Functions from Exhibit A (*Appeals and Grievances Services*) of this Statement of Work.

**EXHIBIT B-1  
SERVICE LEVEL METRICS  
APPEALS AND GRIEVANCES**

**1. APPEALS AND GRIEVANCES OPERATIONAL LEVELS**

All Service Levels are subject to the Service Level Methodology set forth in Schedule B (*Service Levels*) and the applicable provisions of the Agreement and the Exhibits thereto.

Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improvement
<b>Appeals and Grievances- Misrouted Correspondence</b>	Misrouted correspondence is measured by dividing (i) the number of misrouted correspondence re-routed to the appropriate department within 4 hours of Receipt by (ii) the total number of misrouted correspondence received  "Receipt" means when the document is scanned and available in the appropriate queue as is the practice as of the Effective Date.	Monthly	Lotus Notes (current), Prime (future)	Baseline consideration of all misrouted correspondence rerouted to the appropriate department within 4 hours of receipt	Y	TBD	C	N
<b>Appeals and Grievances - Total Commercial Appeals Processed Per Thousand</b>	PTMPY Ratio of total # of appeals per 1000 members per year measured as (Total number of appeals)*12*1000/ Membership	Monthly	Macess/Magic , Prime, ODW	<= 15.24	Y	TBD	B	Y

**STATEMENT OF WORK #7 (MEDICAL MANAGEMENT SERVICES)**

**AMENDED AND RESTATED  
MASTER SERVICES AGREEMENT**

**STATEMENT OF WORK #7 (MEDICAL MANAGEMENT SERVICES)**

This Statement of Work #7 (*Medical Management Services*), dated November 21, 2014, but effective as of November 2, 2014 (“the **SOW Effective Date**”), is made by and between Health Net, Inc., a Delaware corporation with its principal place of business located at 21650 Oxnard Street, Woodland Hills, California 91367 (“**Health Net**”), and Cognizant Healthcare Services, LLC (“**Supplier**”), a Delaware corporation having an office at 500 Frank W. Burr Blvd., Teaneck, New Jersey 07666 (each, a “**Party**” and collectively, the “**Parties**”). This SOW #7 (Medical Management Services) is entered into and shall be governed by the terms of that certain Amended and Restated Master Services Agreement entered into between the Parties dated November 21, 2014 (the “**Agreement**”). This Statement of Work #7 (*Medical Management Services*) replaces and supersedes in all respects the Statement of Work #7 dated November 2, 2014.

**1. INTRODUCTION**

**1.1 Background & Purpose**

This SOW #7 (*Medical Management Services*) describes the Medical Management Services Supplier will provide for Health Net, as such Services are defined in Exhibit A (*Medical Management Services*) to this SOW #7 (*Medical Management Services*), and sets forth certain terms and conditions relating to them, including, among other things:

- (a) The scope of the Medical Management Services;
- (b) The Solution Supplier will use to perform and deliver them;
- (c) The Operational Service Levels Supplier will meet in providing them;
- (d) The Key Supplier Positions applicable to them; and
- (e) The Subcontractors (if any) approved by Health Net to provide certain of them.

**1.2 Structure**

This SOW #7 (*Medical Management Services*) is comprised of this cover document and the following Exhibits:

<b>Table 1: Exhibits to SOW #7 (<i>Medical Management Services</i>)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
1	Exhibit A ( <i>Services</i> )	Describes the scope of the Medical Management Services.

<b>Table 1: Exhibits to SOW #7 (Medical Management Services)</b>		
<b>Item #</b>	<b>Exhibit</b>	<b>Purpose of Exhibit</b>
2	Exhibit A-1 ( <i>Solution Description</i> )	Describes Supplier's solution for the provision of the Medical Management Services and includes as exhibits: <ul style="list-style-type: none"> <li>• Exhibit A-1-1 (<i>Approved Service Delivery Centers</i>)</li> <li>• Exhibit A-1-2 (<i>Service Delivery Configuration at the Completion of Phase 2</i>)</li> </ul>
3	Exhibit A-3 ( <i>Organizational Chart</i> )	Identifies the Health Net roles being transferred to Supplier or displaced by Supplier roles as a result of the execution of this SOW #7 ( <i>Medical Management Services</i> ).
4	Exhibit B-1 ( <i>Operational SLAs</i> )	Identifies the Operational Service Levels applicable to the Medical Management Services.
5	Exhibit D ( <i>Key Supplier Positions</i> )	Identifies the Key Supplier Positions applicable to the Medical Management Services.
6	Exhibit H ( <i>Subcontractors</i> )	Identifies the Subcontractors approved by Health Net to provide certain of the Medical Management Services.

## 2. DEFINITIONS

Capitalized terms used but not defined in this SOW #7 (*Medical Management Services*) shall have the meanings given them in the Agreement.

## 3. APPLICABILITY OF THE AGREEMENT

This SOW #7 (*Medical Management Services*) is hereby made a part of, and is subject to and governed by, the Agreement. This SOW #7 (*Medical Management Services*) is one of the Initial Statements of Work executed under the Agreement.

**IN WITNESS WHEREOF**, Health Net and Supplier have each caused this SOW #7 (*Medical Management Services*) to be signed and delivered by its duly authorized officer, all as of the SOW Effective Date set forth above.

**EXHIBIT A**  
**MEDICAL MANAGEMENT SERVICES**

**1. INTRODUCTION**

**1.1 General.**

- (a) In the most general terms, the “*Medical Management Services*” are the Functions performed by the non-clinical intake and production teams consisting of the Prior Authorization unit, Hospital Notification unit, Post Service Review unit and Concurrent Review unit.
- (i) Functions performed by the Prior Authorization unit include the intake, evaluation, determination of specific authorizations, as well as routing, and tracking of authorization requests submitted primarily from Providers (participating and non-participating) for all Regions and Lines of Business requested of Health Net.
- (ii) Functions performed by the Hospital Notification unit include receipt and processing of Hospital Inpatient Admission requests, including routing correctly to the clinical team as needed and appropriate based on Health Net processing guidelines. Prior to entering the admission, the team will check source systems for information including but not limited to, eligibility, benefits, and financial risk.
- (iii) Functions performed by the Post Service Review unit (also known as the Medical Review unit) include intake, evaluation and resolution of claim inquiries as well as updates to authorizations, as well as batching and triaging related requests that require medical review prior to claims adjudication. The Post Service Review unit or Medical Review unit will create and update authorizations as well as route cases to the clinical staff for review as needed and appropriate based on Health Net guidelines. After updating the authorization and resolving the outstanding concern, the unit will report findings back to Claims for processing. This unit will frequently interact with the Customer Contact Center and Claims on authorizations and claim payment questions.
- (iv) Functions performed by the Concurrent Review unit include calls to facilities to verify and update the member’s inpatient or discharge status. This unit accurately updates the Medical Management system and ensures timely monitoring of admissions for discharge and decision and also provides administrative assistance to the clinical staff with updates to authorizations, phone calls as needed and providing other information and follow up as instructed or required by the clinical team.
- (b) Clinical Determinations. All clinical determinations, whether part of Prior Authorization, Hospital Notification, Post Service Review, Concurrent Review or other function, remain the responsibility of Health Net and its retained clinical staff.

- (c) The Medical Management Services are more fully described in this Exhibit A (*Medical Management Services*), and include the Cross Functional Services described in Section 3 of Schedule A (*Cross Functional Services*) and the Functions included as part of the Embedded Processes described in Section 4 of Schedule A (*Cross Functional Services*), each as they relate to the Functions included as part of the Medical Management Services. For clarity, this includes Supplier's responsibility to manage all activities performed under Managed Third Party Contracts in accordance with Section 3.8 (*Managed Third Party Contract Services*) of Schedule A (*Cross Functional Services*). Supplier shall perform the Medical Management Services, except for those Functions that are expressly identified as retained Health Net responsibilities in Section 2 below. For purposes of clarity, the Party that is assigned responsibility for a Function as per the designations in Section 2 is also responsible for the Embedded Processes applicable to that Function.
- (d) In addition to those Functions specifically designated in this Statement of Work as Functions for which Supplier is responsible, the Medical Management Services to be performed by Supplier include all Functions performed by or associated with the roles in the Medical Management Organization Chart set forth in Exhibit A-3 (Medical Management Organization Chart), all of which are either being transferred to Supplier or displaced by Supplier roles as a result of the execution of this Statement of Work unless expressly designated in this Statement of Work as Functions retained by Health Net. Such Functions will be deemed to be part of the Medical Management Services to be performed by Supplier as if expressly set forth in this Statement of Work.
- (e) In addition to the retained Health Net responsibilities expressly identified in this Exhibit A (*Medical Management Services*), and in addition to and without limiting Health Net's rights under Section 18 (*Audits and Records*) of the Terms and Conditions, Health Net may perform quality reviews and audits of Supplier's performance of the Medical Management Services in accordance with the Terms and Conditions. For the avoidance of doubt, Health Net is not obligated to perform any level of such quality reviews and activities, except to the extent required by applicable Law.
- (f) Supplier shall generate and provide to Health Net (i) each operational report generated prior to the BPaaS Services Commencement Date, unless and until Health Net confirms in writing that such operational report is no longer required, (ii) such other operational reports as Health Net may reasonably request from time to time, and (iii) such modifications to or replacements for the foregoing reports as may be necessary to reflect changes to and evolutions of the Medical Management Services during the term of this Statement of Work.

## 1.2 Definitions.

- (a) Certain Terms.
- (i) "**Care Management System**" means any and all systems that procedurally must be updated and maintained based on work managed/processed by Supplier and/or Health Net. Care Management Systems include:
- (A) PEGA MARS
- (B) Lotus Notes Database (HNU Faxes)

- (C) Lotus Notes Database (SHP PCU)
- (D) Unity
- (E) Convergence
- (F) CSI - Eligibility Repository
- (G) HNCS - Red Phone
- (H) ABS
- (I) EPA-Enterprise Administrator
- (J) Qcare
- (K) FileNet
- (L) MACCESS
- (M) UPS II
- (N) AVES
- (O) MGCS
- (P) Rightfax
- (Q) OON Database
- (R) CDS – Reporting
- (S) Intranet- Medical information and P&Ps
- (T) Shared Drive: MEDDIV
- (U) Shared Drive: Tigard Drive
- (V) Shared Drive: Tempe Drive
- (W) Shared Drive: HCS
- (X) SHP Document Library
- (Y) CMS Website (Intranet)
- (Z) Intranet- Medical information and P&Ps
- (AA) Unity Training Environment
- (BB) PSAS

- (ii) **“Medicare Expedited”** means a circumstance where a physician indicates, either orally or in writing, that applying the standard time frame for making a determination could seriously jeopardize the life or health of the Member. Health Net must provide an expedited organization determination (also known as a “Medicare Expedited Review”). The expedited turnaround time is seventy-two (72) hours or less from receipt.
- (iii) **“Member”** has the meaning given in Schedule A (*Cross Functional Services*).
- (iv) **“Provider”** has the meaning given in Schedule A (*Cross Functional Services*).
- (b) The following acronyms have the meaning set forth as follows:

<b>Acronym</b>	<b>Meaning</b>
CCS	California Children’s Services
CM	Case Management
DENC	Detailed Explanation of Non Coverage Discharge
DND	Detailed Notice of Discharge
QIO	Quality Improvement Organization
QOC	Quality of Care
SF	Service Form
SIU	Special Investigations Unit
TAT	Turn Around Time
TOC	Transition of Care

## (c) Request Types and Priorities.

<b>Request Type</b>	<b>Definition of Request Type</b>	<b>Request Priority</b>	<b>Definition of Request Priority</b>
Pre-service	Any request for authorization before the service has been rendered.	Immediate (Washington Only)	<p>Any request for approval of an intervention, care or treatment where passage of time without treatment would, in the judgment of the provider, result in an imminent emergency room visit or hospital admission and deterioration of the enrollee's health status.</p> <p>Examples of situations that do not qualify under an immediate review request include, but are not limited to, situations where:</p> <ul style="list-style-type: none"> <li>(i) The requested service was prescheduled, was not an emergency when scheduled, and there has been no change in the patient's condition;</li> <li>(ii) The requested service is experimental or in a clinical trial;</li> <li>(iii) The request is for the convenience of the patient's schedule or physician's schedule; and</li> <li>(iv) The results of the requested service are not likely to lead to an immediate change in the enrollee's treatment.</li> </ul>
Pre-service	Any request for authorization before the service has been rendered.	Urgent/ Expedited	<p>Any request for medical care or treatment when standard determination timeframes could result in the following circumstances: Jeopardizing the member's life, limb or bodily function, based on a prudent layperson's judgment; or</p> <p>In the opinion of the treating practitioner or other practitioner with knowledge of the member's medical condition, the member would experience severe pain that cannot be adequately managed without the requested care or treatment.</p>
Pre-service	Any request for authorization before the service has been rendered.	Routine	Requests that do not meet the guidelines for an urgent request as determined by the treating/requested physician.

Request Type	Definition of Request Type	Request Priority	Definition of Request Priority
Concurrent	Any request for service or inpatient stay for which the member is currently in treatment or in-house and is requesting ongoing treatment.	Urgent Concurrent	<p>Any request for service or inpatient stay for which the member is currently in treatment or in-house and is requesting ongoing treatment.</p> <p>For a request to be considered Urgent Concurrent, the characteristics below must be identical to original request:</p> <ul style="list-style-type: none"> <li>• Provider</li> <li>• Diagnosis</li> <li>• Service</li> <li>• Setting (inpatient, ambulatory, etc.)</li> </ul>
Post-service	Any review request for appropriateness of medical care or services that has already been received prior to claim submission. Request for services that have already been rendered where there is no ongoing treatment or services being provided or requested.	Routine	Request for approval of care or treatment where the services have been rendered to the enrollee and the request is not an urgent care request.
Retrospective Review	The process of determining the medical necessity of a treatment/ service post delivery of care and following claims payment.	Routine	Retrospective reviews are reviews conducted once the claim (HFCA 1500/UB 04) has been received. Health Net defines retrospective review as part of the claims processing system.

(d) Capitalized terms not defined in this Exhibit A shall have the meanings given them in Schedule W (*Glossary*) or elsewhere in this Agreement.

## 2. RESPONSIBLE PARTY

The following table sets forth the responsible party for the Medical Management Services.

### 3. MEDICAL MANAGEMENT SERVICES, GENERALLY

Except as set forth in Section 2, Supplier will provide the Medical Management Services described in this Exhibit A. Supplier will document and track all Medical Management processes in the appropriate system of record and adhere to all Health Net, regulatory, compliance and business standards applicable to all Products, Regions and Line of Business. Except as specifically noted, the Services set forth in this Section 3 apply to all Lines of Business and Regions.

#### 3.1 MM1 Utilization Management.

##### (a) MM1.1 Prior Authorization.

##### (i) MM1.1.1 PA Intake, Support and Referrals.

***“PA Intake, Support and Referrals Services”*** are the Functions associated with Prior Authorization intake, support and referrals, including the following activities:

- (A) Receive requests for referrals and prior authorization of services and/or procedures for a Member; confirm eligibility for that Member; confirm that the services and/or procedures are covered by that Member’s benefit plan and require a prior authorization to be issued. As applicable:
  - (1) Provide the requested referrals or approve those authorization requests that can be approved and that do not require review by the Initial Clinical Review or Clinical Review (MD) processes (as determined by Health Net Policies);
  - (2) Otherwise, escalate to the Initial Clinical Review process.
- (B) Update the applicable Care Management System(s) accordingly.
- (C) Health Net may change the services requiring pre-certification on a regular basis. Changes to pre-certification conditions may translate into additions or deletions to the prior authorization requirements. The supplier will be required to implement these changes promptly and in alignment with communications to providers and/or regulators.
  - (1) Should Health Net exempt (i.e., “gold card”) certain providers from prior authorization requirements, the Supplier will follow these guidelines promptly and in coordination with communication timelines agreed to with the provider(s).

##### (ii) MM1.1.2 PA Initial Clinical Review.

***“PA Initial Clinical Review Services”*** are the Functions associated with Prior Authorization initial clinical review, including the following activities:

- (A) Review requests for referrals and prior authorizations that were escalated from the Intake, Support and Referrals process.

- (B) Either:
- (1) Provide the requested referrals and/or approve those authorization requests that can be approved and that do not require review by the Clinical Review (MD) process (as determined by Health Net Policies); or
  - (2) Escalate to the Clinical Review (MD) process.

Examples of why a request would be escalated: medical necessity decisions; denials if required by Law. If the Member's condition warrants an urgent/expedited review, the physician would request an escalated assessment.

- (C) As needed, route to the Pend Management process for further review.
- (D) Update the applicable Care Management System(s) accordingly.

(iii) MM1.1.3 PA Clinical Review (MD).

***“PA Clinical Review (MD) Services”*** are the Functions associated with Prior Authorization clinical review (MD), including the following activities:

- (A) Review requests for referrals and prior authorizations that were escalated from the Initial Clinical Review process. Provide the requested referrals and/or approve or deny such requests.
- (B) As needed, route to the Pend Management process for further review.
- (C) Update the applicable Care Management System(s) accordingly.

(iv) MM1.1.4 PA Pend Management.

***“PA Pend Management Services”*** are the Functions associated with Prior Authorization pend management, including the following activities:

- (A) For cases escalated from the Initial Clinical Review and the Clinical Review (MD) processes, review, research and resolve (including through calls and letters with the Provider and Member) requests for additional clinical information, labs, photos or other pieces of data in order for the prior authorization determination to be made.
- (B) Provide updates to the Initial Clinical Review and/or Clinical Review (MD) processes.
- (C) Once all required information is obtained, provide the required information and route the case back to the Initial Clinical Review or Clinical Review (MD) processes, as applicable.
- (D) Follow up with the Provider if no information is received and provide updates to the Initial Clinical Review and/or Clinical Review (MD)

process. Follow compliance timelines for notifications and decisions whether in writing or over the phone.

- (E) Receive input from the Initial Clinical Review or Clinical Review (MD) processes as to whether and when a case should be closed.

(v) MM1.1.5 PA Notifications.

***“PA Notifications Services”*** are the Functions associated with Prior Authorization notifications, including the following activities: Advise Members and Providers, as applicable, of approval of prior authorization requests, including written and verbal notifications as determined in accordance with Health Net Policies.

All Medicare Expedited requests require verbal notification to the Member and to the Provider. Notifications must be in the preferred language (both written and verbal). Notifications for all lines of business must be completed with the compliance standards as outlined for each region, and include appropriate/required notification verbally and/or in writing. Notification requirements are outlined in the regulations and may include phone calls as well as letters.

Notwithstanding the designations in Section 2, Health Net retains responsibility for notification of all denials of prior authorization requests.

(vi) MM1.1.6 PA Inquiry Status Management.

***“PA Inquiry Status Management Services”*** are the Functions associated with Prior Authorization inquiry status management, including the following activities:

- (A) Receive and respond to inquiries from Providers and Members related to prior authorizations, including whether a prior authorization is needed and/or the status of a requested prior authorization.
- (B) Update the applicable Care Management System(s) accordingly.

(b) MM1.2 Hospital Notification.

(i) MM1.2.1 HN Intake and Support.

***“HN Intake and Support Services”*** are the Functions associated with Hospital Notification intake and support, including the following activities:

- (A) Receive notifications from hospitals (through various channels, including phone notifications and written notifications) that a Member has been admitted, including via various channels such as fax, email, telephone; confirm eligibility for that Member; confirm that the services and/or procedures are covered by that Member’s benefit plan, and check PSAS

- (B) Update the applicable Care Management System(s) accordingly and route the notification to the Concurrent Review process.
- (ii) MM1.2.2 HN Status Management.
- “HN Status Management Services”*** are the Functions associated with Hospital Notification status management, including the following activities:
- (A) Receive and respond to inquiries related to hospital notifications.
  - (B) Follow-up with hospitals and PPGs as necessary to obtain additional information.
- (c) MM1.3 Concurrent Review.
- (i) MM1.3.1 CR Administrative Support.
- “CR Administrative Support Services”*** are the Functions associated with Concurrent Review administrative support, including the following activities:
- (A) Proactively communicate with the hospitals and PPGs to track the Member’s status and timing of discharge as well as requesting of medical records.
  - (B) Update the applicable Care Management System(s) accordingly and route information to the Clinical Review process.
- (ii) MM1.3.2 CR Initial Clinical Review.
- “CR Initial Clinical Review Services”*** are the Functions associated with Concurrent Review initial clinical review, including the following activities:
- (A) Confirm whether the admission is appropriate (i.e., the Member is eligible for coverage and the hospital stay is covered as part of the Member’s benefit plan).
  - (B) Either:
    - (1) Approve those benefits coverage that can be approved and that do not require review by the Clinical Reviewer (MD) - (as determined by Health Net Policies); or
    - (2) Otherwise, escalate to the Clinical Review (MD) process. Examples of why a request would be escalated - medical necessity decisions; denials if required by Law.
  - (C) For instances when benefits coverage is approved (either as part of this process or the Clinical Review (MD) process), develop a discharge plan to address what happens post-discharge (e.g. transfer to rehab, to home with some home help needs) and ensure this is ready at the point of discharge. Communicate with the hospital, other care facilities and the Member, as needed.

- (D) Update the applicable Care Management System(s) accordingly.
- (iii) MM1.3.3 CR Clinical Review (MD).

“**CR Clinical Review Services**” are the Functions associated with Concurrent Review clinical review, including the following activities:

- (A) Review requests for benefits coverage that were escalated from the Initial Clinical Review process. Either approve or deny such requests.
- (B) Update the applicable Care Management System(s) accordingly.
- (iv) MM1.3.4 CR Notifications.

“**CR Notifications Services**” are the Functions associated with Concurrent Review notifications, including the following activities: Advise Members and Providers, as applicable, of approval of benefits coverage, including written and verbal notifications as determined in accordance with Health Net Policies.

All Medicare Expedited requests require verbal notification to the Member and to the Provider. Notifications must be in the preferred language require bilingual capabilities, Spanish and English (both written and verbal). Notification requirements are outlined in the regulations and may include phone calls as well as letters.

Notwithstanding the designations in Section 2, Health Net retains responsibility for notification of all denials of benefits coverage.

- (v) MM1.3.5 CR Medicare DENC/DND Processing.

“**CR Medicare DENC/DND Processing Services**” are the Functions associated with Concurrent Review Medicare DENC/DND processing, including the following activities:

- (A) Receive, review, research and disposition all requests from Medicare Members for review of a decision that Medicare Services should end.
- (B) Prepare and provide to the Member the required Detailed Explanation of Non Coverage Discharge (DENC) and Detailed Notice of Discharge (DND) and provide any needed medical records to the Quality Improvement Organization (QIO) so that the QIO can issue a determination to either uphold or overturn the decision to end the service.

This process has very tight timelines and precision on letters is critical in meeting compliance on these requests. Ensure that proper notification is made to the member or provider based on the regulatory requirements for that line of business. All communications must be made within the compliance timelines orally or in writing as outlined for each line of business and region.

- (d) MM1.4 Post Service Review.

Notwithstanding the designations in Section 2, Health Net retains responsibility for all Post Service Review Functions for California Children’s Services (CCS) cases.

(i) MM1.4.1 PSR Intake and Support.

“**PSR Intake and Support Services**” are the Functions associated with Post Service Review intake and support, including the following activities:

- (A) Receive requests from the Claims Tower to review particular Claims for coverage determinations. Examples might be when a medical necessity determination is required. Perform initial review and information gathering, including by working directly with the Claims Tower as needed.
- (B) Either:
  - (1) To the extent permitted by Health Net Policies, provide the necessary input and information requested and resubmit back to the Claims Tower for continued adjudication; or
  - (2) Otherwise, escalate to the Initial Clinical Review process.
- (C) Update the applicable Care Management System(s) accordingly.

(ii) MM1.4.2 PSR Initial Clinical Review.

“**PSR Initial Clinical Review Services**” are the Functions associated with Post Service Review initial clinical review, including the following activities:

- (A) Review requests for authorizations that were escalated from the Intake and Support process.
- (B) Either:
  - (1) Approve those authorization requests that can be approved and that do not require review by the Clinical Review (MD) process (as determined by Health Net Policies); or
  - (2) Otherwise, escalate to the Clinical Review (MD) process.

Examples of why a request would be escalated - medical necessity decisions; denials if required by Law.
- (C) Update the applicable Care Management System(s) accordingly.

(iii) MM1.4.3 PSR Clinical Review (MD).

“**PSR Clinical Review (MD) Services**” are the Functions associated with Post Service Review clinical review (MD), including the following activities:

- (A) Review requests for prior authorizations that were escalated from the Initial Clinical Review process. Either approve or deny such requests.

- (B) Update the applicable Care Management System(s) accordingly.
- (iv) MM1.4.4 PSR Notifications.

“*PSR Notifications Services*” are the Functions associated with Post Service Review notifications, including the following activities: Advise Members and Providers of approval of benefits coverage, including written notifications as determined in accordance with regulatory requirements and/or Health Net Policies.

Notifications must be in the preferred language (both written and verbal). All communications must be made within the compliance timelines orally or in writing as outlined for each line of business and region. Notification requirements are outlined in the regulations and may include phone calls as well as letters.

Notwithstanding the designations in Section 2, Health Net retains responsibility for notification of all denials of benefits coverage.

### 3.2 **MM2 Regulatory and Quality Improvement Initiatives.**

“*Regulatory and Quality Improvement Initiatives Services*” means those Functions associated with the process to help drive improvements in Member clinical outcomes and satisfaction. Initiatives are generally required as outlined by regulators or accreditation agencies. Functions include examining HEDIS and CAHPS data annually and implementing interventions with Providers and Members to address and improve results. The goals of regulatory and quality improvement initiatives are Member satisfaction and wellness.

### 3.3 **MM3 Audit Support Services.**

“*Audit Support Services*” means those Functions associated with providing support for Audits of the applicable line of business or a component of it, whether conducted by (or on behalf of) Health Net itself or a Health Net Regulator or customer (e.g., a large Employer Group), including the following:

- (a) Providing data and reports requested by the Auditors;
- (b) Providing subject matter expertise and otherwise supporting the conduct of the Audit as requested by the Auditors;
- (c) Assisting in the development and implementation of corrective action plans in response to Audit findings identifying weaknesses or deficiencies in the Audited Function; and
- (d) Supporting Health Net communications with Regulators.

### 3.4 **MM4: Post Transaction Audit Services**

“*Post Transaction Audit Services*” are the functions associated with performing post transaction audit for all in-scope services to identify any errors/omissions in the transaction:

- (a) Supplier will randomly sample the transaction universe with statistically valid sample size (minimum ten (10) audits per month per FTE).
- (b) Supplier will audit (on a post transaction basis) in accordance with Health Net provided Policies and Procedures.
- (c) Notify Processor Associates and their Supervisor of any errors.
- (d) Finalize and publish final error findings and overall accuracy scores on a daily, weekly and monthly basis.

### 3.5 MM5: Medical Management Policy Services

“*Medical Management Policy Services*” means those Functions associated with the development and implementation of “*Health Net Medical Management Policies*,” which are the Health Net Policies as defined in Schedule P (*Health Net Policies*) governing or pertaining to the Medical Management Services, more specifically, the conduct of Health Net’s Medical Management Services.

Below are some examples of selected Medical Management Policy Services Functions, which include descriptions of the manner in which such Functions are currently performed by Health Net. The examples are illustrative only:

- (a) Generally, provide operational subject matter expertise with respect to Health Net Medical Management Policies;
- (b) As requested, participate in meetings with Health Net and Supplier stakeholders having responsibility for the development, implementation, monitoring and enforcement of Health Net Medical Management Policies;
- (c) In response to changes in Laws, regulations, guidelines, policies, contracts or requests from Health Net’s Enterprise Process Change Organization (“*EPCO*”) or from Health Net’s or Supplier’s Compliance organization:
  - (i) Participate in Health Net EPCO Steering Committee meetings to review new legal and regulatory changes and assessment of business impact;
  - (ii) Participate in Health Net EPCO regulatory implementation Change Teams;
  - (iii) Project manage the operational implementation and/or affected system changes of legal and regulatory changes that affect Medical Management Services and participate in operational implementation and/or affected system changes of legal and regulatory changes that span multiple functions/departments, including tracking the progress of Deliverables and communicating status to Health Net’s EPCO and/or Compliance organization; and
  - (iv) Based on the aforementioned meetings and guidance from the EPCO, prepare initial drafts of revised or new Health Net Medical Management

Policies and submit them to the relevant Health Net and Supplier stakeholders for review, comment, and approval;

- (d) Prepare updated versions of Health Net Medical Management Policies to address input provided by relevant Health Net and Supplier stakeholder groups;
- (e) Provide communications and training to Supplier personnel regarding revised and new Health Net Medical Management Policies and access to Health Net personnel to such communications and training; and
- (f) Implement Health Net-approved Health Net Medical Management Policies by Supplier Personnel involved in the performance of the Medical Management Services.

## 1. INTRODUCTION

This document is the Solution Description for Statement of Work #7 – Medical Management Services (this “*Statement of Work*”). Whereas Exhibit A (Medical Management Services) describes the Functions which Supplier is responsible for performing under this Statement of Work. This Exhibit A-1 (*Medical Management Solution Description*) describes the **means by which** and the **manner in which** Supplier will perform those Functions. This document includes an overview of Supplier’s service delivery architecture—including a depiction on a global map of the geographic configuration and delivery architecture of Supplier’s Solution (as it will exist at the completion of Phase 2). This geographical depiction also identifies all Service Delivery Centers of Supplier (and its Affiliates and other Subcontractors) that will be utilized in performing and delivering the Services (including the back-up and failover locations for each) and how they will be interconnected to each other and to Health Net’s IT Environment. It then provides additional descriptive information about each of the principal components of Supplier’s Solution.

This Exhibit A-1 (*Medical Management Solution Description*) includes the following attachments, which are incorporated herein by reference

Exhibit A-1.1 Approved Service Delivery Centers

Exhibit A-1.2 Service Delivery Configuration at the Completion of Phase 2

## 2. DEFINITIONS AND INTERPRETATION

### 2.1 Defined Terms

The following terms, when used in this Statement of Work, will have the meanings set forth below unless otherwise specifically defined in the body of this document. Additionally any capitalized term used but not defined in this Exhibit A-1 (*Medical Management Solution Description*) will have the meaning indicated in Schedule W (*Glossary*).

Defined Term	Meaning
“ <i>Solution</i> ”	A collective term referring to the means by which and manner in which Supplier will perform and deliver the Services under this Statement of Work
“ <i>Ramp Up</i> ”	The period of time from when a Supplier Personnel completes process training to the time when the supplier personnel starts meeting the required quality Service Levels and 100% productivity standards.

## 3. SOLUTION OVERVIEW

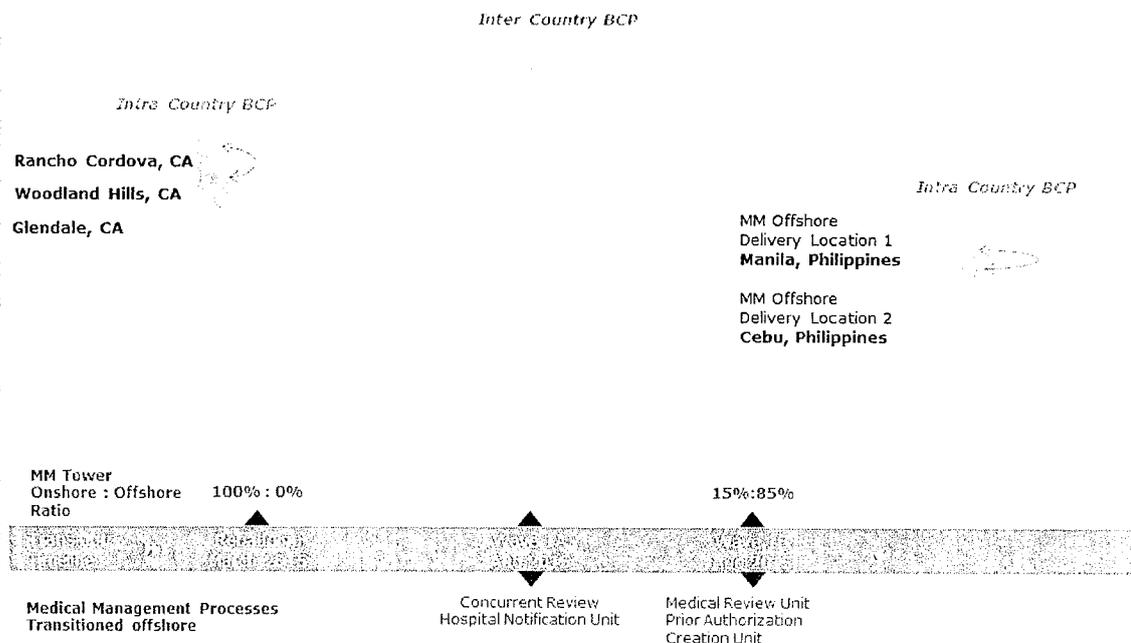

### 3.1 High-level Service Delivery Architecture and Configuration

This section provides an overview of the geographical and physical configuration of Supplier’s Solution for the Services under this Statement of Work. Exhibit A-1.1 (*Approved Service Delivery Centers*) provides additional information about each of the Service Delivery Centers Supplier will use to provide the Services under this Statement of Work, including both the

primary Service Delivery Centers and the back-up / failover locations that Supplier will activate and use to provide the Services if operations at any primary Service Delivery Center are disrupted or disabled.

**Figure 1**

*\*Dates represent effective end date of each transition wave.*

The above diagram illustrates the Supplier’s solution and Onshore/Offshore ratio at the beginning of Phase 2 to end of Phase 2. Initially, all the Health Net resources will be rebadged and would work out of the current Health Net US locations in Rancho Cordova, Glendale and Woodland Hills. The Transition will happen in two (2) waves as depicted in the diagram with some of the existing work gradually moving to the Offshore locations of Manila and Cebu in the Philippines.

**3.2 Service Delivery Model**

This section provides an overview of the commercial delivery model that the Supplier will utilize to provide the Services under this Statement of Work. As described in Exhibit H (*Medical Management Subcontractors*), Supplier will not use any Supplier Affiliates or Subcontractors to perform the Services under this Statement of Work.

**4. CHANGES TO SUPPLIER’S SOLUTION**

As a general principle, Supplier has both the right and the obligation to perform the Services to be provided by it under this Statement of Work in the manner described in this Exhibit A-1 (*Medical Management Solution*). That said, Supplier is charged with responsibility for the adequacy of its Solution, which is to say that if the Supplier’s Solution, as described in this Exhibit A-1 (*Medical Management Solution*), should prove inadequate at any point during the Statement of Work Term

for Supplier to perform and deliver the Services in accordance with the obligations of the Agreement (including this Statement of Work), then Supplier is responsible for making such changes to its Solution as are necessary to enable Supplier to perform and deliver the Services in accordance with such obligations. All such changes are to be made in accordance with Schedule H (*Change Control Process*) of the Agreement, as applicable according to its terms; provided, however, that Supplier is responsible for making such changes at its own cost and expense except in those cases (if any) in which the Agreement expressly provides that Health Net has Financial Responsibility for them.

## 5. SOLUTION DESCRIPTION

Supplier's solution is built on the following foundational aspects:

### 5.1 Delivery Solution:

- **Quality Focus**– Supplier's primary focus will be to maintain seamless continuity of Services. For all processes migrated Offshore, the focus will be to first ensure regulatory compliance and get the quality right.
- **Support ratio** – To enable focused monitoring and feedback, Supplier's delivery model an Personnel to Supervisor and QA ratio Onshore and Offshore as described in Section 7.4 of this exhibit.
- **Continuous Improvement** - Supplier will appoint dedicated Six Sigma resources during the Term to identify sustainable improvement opportunities. The typical ratio will be one (1) Six Sigma resource for every one hundred fifty (150) FTEs.

### 5.2 Risk Mitigated Transition Solution:

#### Knowledge Retention:

- **Domain Experts** – Supplier will invest in staff (existing and hired) with previous experience in Medical Management Intake Operations, Transition, Training, Quality and Compliance experience.
- **Health Net Training Academy** – During Phase 2 and Phase 3, Supplier's dedicated Health Net Training Academy will be tasked with the mandate of building / maintaining a Knowledge repository, updating training and process documentation, providing training to new hire supplier personnel and providing higher level training to experienced resources for Medical Management Intake Operations. Supplier will conduct HIPAA and Health Net mandated compliance/regulatory training once a year for each FTE to keep supplier personnel up-to date on regulatory, process and system changes.

Supplier will provide to Health Net a documented report, on a quarterly basis, the FTES that attended trainings including but not limited to regulatory required trainings.

#### Location Solution:

Supplier will deliver Intake Services from two locations - US and Philippines.

Exhibit A-1.1 (*Approved Service Delivery Centers*) describes the on-shore, near-shore and Offshore Service Delivery Centers that Supplier will use to deliver the Medical Management Intake Services.

## 6. SCOPE OF SERVICES

The scope of this Statement of Work is associated with Medical Management Services described in Exhibit A (*Medical Management Services*).

## 7. OPERATING MODEL

The operating model for Intake operations defines the service delivery blueprint and key aspects of service delivery. The operating model also describes how the in-scope services will be delivered for each functional process area in a scalable global environment

### 7.1 Resource Mix

Supplier will leverage its global operating model to meet the objectives of delivering Intake processes.

Supplier has considered the following criteria to define its Onshore/Offshore strategy

- Regulatory requirements
- Non-availability of skills at Offshore
- Health Net mandated Offshore restricted functions

Process requiring voice support will be delivered out of US and Philippines

Roles identified to move Offshore will continue to be responsible for current tasks and activities performed Onshore.

The Onshore/Offshore resource mix for Intake operations is listed in the following Table 1:

**Table 1**

Resource Mix			
Function	Estimated End State		
	Onshore %	Offshore %	Location
<b>Concurrent Review (CCR)</b>			
<b>Comm/Medicare – WH</b>	12.5%	87.5%	M,Cb,W
<b>Comm/Medicare – OR</b>	100%	0%	OR
<b>Comm/Medicare – SB</b>	0%	100%	M,Cb
<b>CCR SHP – Glendale</b>	15%	85%	M,Cb,GL
<b>CCR SHP - Rancho Cordova</b>	25%	75%	M,Cb,R

Hospital Notification Unit (HNU)			
<b>HNU - All LOBs</b>	15%	85%	M,Cb,W
Medical Review Unit (MRU)			
<b>MRU - WH, CA</b>	15%	85%	M,Cb,W
<b>MRU - Tigard, OR</b>	0%	100%	M,Cb
<b>MRU - Tucson, AZ</b>	0%	100%	M,Cb
<b>MRU - Telecommuter</b>	0%	100%	M,Cb
Prior Authorization (PCU)			
<b>PCU - AZ</b>	15%	85%	M,Cb,W
<b>PCU - SHP Rancho Cordova</b>	13%	87%	M,Cb,W
<b>PCU - SHP Glendale</b>	12.5%	87.5%	M,Cb,W
<b>PCU - OR,CA</b>	10%	90%	M,Cb,W
<b>Total</b>	<b>15%</b>	<b>85%</b>	
Total (A+B+C+D)	15.00%	85.00%	

Legends	
Location	Code
Woodland Hills (US)	W
Rancho Cordova (US)	R
Glendale (US)	GL
Arizona (US)	AZ
Oregon (US)	OR
Chennai (India)	Ch
Manila (Philippines)	M
Cebu (Philippines)	Cb

#### Key Note

- The above percentages are approximate estimates
- The above plan will be finalized as part of the process assessment that will take place during the Transition as described in Transition Manual, with agreement between Health Net and Supplier.
- The estimated end state is expected by December 2015.

- As shared in Section 6, above only those roles mandated by Health Net or where skills are not available Offshore will be Onshore.
- As shown in the above table, while a process can span across 4 locations there will be no role within a process which will span across more than 2 locations.

**7.2 Location**

Supplier will deliver the in-scope Services from US and Philippines based locations. Onshore Services will be provided from Health Net facilities at Woodland Hills, Glendale and Rancho Cordova. The delivery location strategy has been carefully planned considering multiple criteria.

Location selection criteria:

- Health Net mandated offshoring staffing
- Availability of talent pool
- Skill requirements
- Regulatory limitations
- Business continuity

**Table 2**

Sub Function	Delivery Location	
<b>Concurrent Review (CCR)</b>	US	Philippines
Comm/Medicare - OR	US	
CCR SHP - Glendale	US	Manila/ Cebu
<b>Hospital Notification Unit (HNU)</b>		
<b>Medical Review Unit (MRU)</b>		
MRU – Tigard, OR	US	
MRU - Telecommuter	US	Manila/ Cebu

PCU – AZ	US	Manila/ Cebu
PCU SHP – Rancho	US	Manila/ Cebu
PCU SHP – Glendale	US	Manila/ Cebu
PCU – ORCA	US	Manila/ Cebu

During Phase 2, Supplier intends to keep Health Net rebadged FTEs at its current location. Depending on operational constraints and requirements, and subject to any restrictions in this Agreement, Supplier has the right to relocate staff across different locations.

The teams across locations in US and Philippines, will interact on an ongoing basis to ensure effective planning, monitoring and tracking of Intake processes, activities and requirements. The following are the key activities that will be performed at each location:

- Forecasting – identifying the number of transactions, volumes and activities that would need to be transacted and processed in coming months
- Capacity Planning- ensure staffing in place to manage the forecasted volumes
- Monitor Productivity- An ongoing daily, weekly, monthly exercise to track, analyze and report on productivity trends
- Reallocation based on productivity – Process wherein the transaction and volumes are shifted within teams and individuals to ensure desired productivity
- Monitor Quality and Service Levels - An ongoing daily, weekly, monthly exercise to track, analyze and report on quality and Service Levels

The organization structure has been functionally designed in a manner that facilitates effective operations across locations.

The model ensures that workflow is effective in real time facilitating tactical monitoring.

### 7.3 Operating Hours

Supplier will at minimum replicate the operating hours currently adhered to by Health Net’s Medical Management organization as of the Effective Date, as set forth in the table below. Supplier acknowledges and agrees that performance of the Medical Management Services will regularly require Supplier Personnel to perform additional/overtime work outside regular operating hours, and that such additional/overtime work is within the scope of the Medical Management Services.

Supplier will extend its hours of operations (for example, through overtime, weekend and holiday work) from time to time as needed to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement. Supplier’s work during such extended hours of operations is within the scope of the Medical Management Services.

Within the regular Hours of Operations listed below, Supplier will have staff work according to defined shift schedules. However, Supplier will make reasonable efforts to permit Supplier staff

to work flexible shift times when that can be done without jeopardizing Supplier's ability to meet regulatory requirements, Compliance and Service Level metrics and other requirements of the Agreement.

Sub function	Weekday - Hours of Operations (PST)	Weekend- Hours of Operations (PST)
<b>Concurrent Review (CCR)</b>		
Comm/Medicare – WH	08:00 am to 17:00 pm	Need basis support
Comm/Medicare – SB	08:00 am to 17:00 pm	Need basis support
CCR SHP – Rancho	08:00 am to 17:00 pm	Need basis support
<b>Hospital Nutrition Unit (HNU)</b>		
HNU – All LOBs	08:00 am to 17:00 pm	07:00 am to 14:00 pm
<b>Medical Review Unit (MRU)</b>		
MRU – WH, CA	08:00 am to 17:00 pm	Need basis support
MRU – Tucson, AZ	08:00 am to 17:00 pm	Need basis support
MRU – Rancho	08:00 am to 17:00 pm	Need basis support
<b>Prior Authorization (PCU)</b>		
PCU – Rancho	08:00 am to 17:00 pm	07:00 am to 14:00 pm
PCU SHP – Rancho	08:00 am to 17:00 pm	07:00 am to 14:00 pm
PCU – OR, CA	08:00 am to 17:00 pm	07:00 am to 14:00 pm

Table 3

#### 7.4 Operations

Supplier's approach to manage operations is as follows:

- **Operational Focus:** Team huddles, floor walks, daily performance reviews, and daily supplier personnel communication plan and customer calibration sessions.
- **Performance Management:** Measure and manage associate performance through data and service dashboards
- **Span of Control:** Supplier will provide for the following span of control.
  - Manager 1:50
  - Supervisor 1:15

- QA Auditor 1:15
- Trainer 1:20 (during Phase 2)
- Trainer 1:100 (during steady state/refresher training)
- Six Sigma/ Process Excellence 1:150

#### **Health Net Training Academy:**

Supplier will establish a dedicated Health Net Training academy for management of training content and delivery of training programs. Supplier will establish a Knowledge Management Portal for management and easy access to training content, desktop procedures and P&Ps. The Health Net Training Academy will work closely with the Training operations and facilitate necessary training. Training material will be continuously updated based on System and process updates.

#### **Team Huddle**

Supplier's team leads will conduct daily team meetings for individual processes to share any critical updates, provide feedback and communicate lessons learned, and plan for the day.

#### **Quality:**

Supplier will implement Health Net mandated specific quality / compliance programs in its delivery model for managing and achieving Service Levels. Supplier will analyse audit findings to determine root causes and will deploy corrective and preventive solutions to improve quality. In the daily team meetings, prevalent trends in errors, root causes and preventive actions will be discussed and implemented.

#### **Continuous Improvement:**

Supplier will have a dedicated Process Excellence (PEX) team consisting of Six Sigma resources for Health Net Medical Management functions to optimize performance and handoffs in Health Net Medical Management processes while improving standardization and the "To-Be operating model".

#### **Rewards and Recognition**

Supplier will recognize the efforts of its best performers using stack ranking and will reward them through a structured reward and recognition program that aligns with quality and productivity objectives. The rewards and recognition will be applicable for both Onshore and Offshore teams. The specific criteria for the awards will be decided by the Supplier operations leads depending on the specific behavior and/or results to be achieved

### **7.5 Resource Profile**

Supplier has a very well defined methodology for recruitment, retention, and selection of candidates. Supplier will work closely with Health Net to establish job descriptions at various levels and functions. Based on these job descriptions, Supplier will select candidates with the proper qualifications and experience in order to ensure a "best-fit" for Health Net.

The table below illustrates the requirements and the minimum qualifications required to be selected for Intake operations.

Table 4

<b>Intake Associate – Data Entry</b>	
Qualification & Experience	Selection Process
<ul style="list-style-type: none"> <li>• College graduate</li> <li>• Knowledge of US Healthcare and Health Insurance industry</li> <li>• Minimum one (1) year of Authorization Intake experience</li> <li>• Understanding of different types of medical records, intake documents</li> </ul>	<ul style="list-style-type: none"> <li>• Aptitude test</li> <li>• Data entry/key board test</li> <li>• HR Interview for Cultural fitment</li> <li>• Domain / Operations Interview</li> <li>• Education and Professional Background Check</li> </ul>

## 7.8 Onshore Requirements

Section 7 sets forth the Medical Management Services roles that Supplier is required to retain Onshore. Supplier will at all times provide the Medical Management Services in accordance with Schedule Y (*Offshore Prohibitions and Requirements*).

## 7.9 Service Performance Management

Supplier will provide and implement the quality assurance procedures that are reasonably necessary for the services in scope and as per mutually agreed Service Levels, reporting format and frequency

### Approach

- Initially during the Ramp Up phase, higher percentage of audits will be performed and any feedback on errors will be communicated to the processors on a daily basis
- As the processors gain proficiency, the audit percentage will be gradually reduced
- Post Ramp Up, a statistically valid sample size will be considered for auditing

### Tools

- Supplier will use quality analysis using tools like:
  - Pareto Analysis
  - Fish Bone Diagram
  - Box Plot

## 8. KEY ASSUMPTIONS

- (a) Any work request received directly at Health Net in non-digital format will be batched and sent by Supplier to the scanning/imaging service provider for conversion in to digital format However for regulatory requirements Onshore supplier personnel will scan the documents locally.
- (b) Health Net to communicate to its supplier personnel that post contracting and prior to re-badging, Supplier will actively engage for detailed Transition planning.

- (c) The Onshore/Offshore mix will be validated during detailed Transition Planning as set forth in the Transition Manual.
- (d) Health Net to provide workspace and operating infrastructure for the Onshore train the trainer team documented in Schedule Z (*Transition*).

**9. RISKS**

Additional risks, if any will be identified and shared during Transition as part of the Processes Assessment exercise.

**EXHIBIT A-1.1****APPROVED SERVICE DELIVERY CENTERS**

The Service Delivery Centers at (or from) which Supplier is authorized to perform the Services under this Statement of Work are those listed below. Even if Health Net has approved Supplier's use of an Affiliate or other Subcontractor to perform certain aspects of the Services, their performance must be from an approved Service Delivery Center listed in this Exhibit A-1.1 (*Approved Service Delivery Centers*).

**Onshore Service Delivery Centers****Table 14**

Primary Location	Type of Facility	Hours of Operation	Functions / Services	Languages Supported	Key Platform / Systems	Back-up / Fail-over Location	Facility Operator	Facility Owner	Date Placed in Service	Multi-client Site (Y/N)?
Woodland Hills	Office Building	Please refer to section 6.3	Medical Management Intake Services	English	• Please refer to section 6.7	Rancho

Supplier will provide sufficient coverage for the in-scope services by leveraging the global delivery network. List of holidays across delivery locations will be mutually agreed with Health Net to ensure no impact on operations.

### EXHIBIT A-1.2

#### SERVICE DELIVERY CONFIGURATION AT THE COMPLETION OF PHASE 2

Set out below is a description of Supplier's 'To-Be' Solution for the Services as it will be configured at the completion of Phase 2. The tactical 'To Be' solution will be mutually defined during the transition phase however below is an illustrative technology environment:

**EXHIBIT A-3****MEDICAL MANAGEMENT ORGANIZATION CHART**

This Exhibit A-3 (*Medical Management Organization Chart*) contains organization charts showing, at a specific recent point in time prior to the Effective Date, the positions (including both filled and currently open positions) that represent the Health Net organizational unit(s) whose Functions are being outsourced to Supplier under this Statement of Work. This document is included as part of this Statement of Work as a supplemental means of depicting the Functions that comprise the Medical Management Services for which Supplier is assuming responsibility from Health Net under this Statement of Work. It is not included for the purpose of establishing any numerical FTE benchmark or baseline for use in determining Supplier's Charges for the Medical Management Services. Any changes in the organization charts between the Agreement's Effective Date and the BPaaS Services Commencement Date shall not be interpreted to represent a change in the scope of the Medical Management Services in the absence of Health Net specifically adding or removing Functions from Exhibit A (*Medical Management Services*) of this Statement of Work.

**MEDICAL MANAGEMENT SERVICE LEVEL METRICS**

**I. MEDICAL MANAGEMENT OPERATIONAL SERVICE LEVELS**

All Service Levels are subject to the Service Level Methodology set forth in Schedule B (*Service Levels*) and the applicable provisions of the Agreement and the Exhibits thereto.

#	Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improve
1.	Prior Authorization: Intake Routing	<p>Prior Authorization Intake measures the time it takes to complete or appropriately route each case.</p> <p>Supplier must process each case received, completing the case approval if appropriate for Intake team to approve, or routing cases that require Health Net's retained organization to be involved. Cases that must be referred to Health Net's retained organization include but are not limited to: CCS, Appeals, referrals for disease management, Quality of Care (QOC) and CM, Transplants and TOC, Pharmacy as well as SIU.</p> <p>"Urgent Concurrent Review" means an assessment that determines medical necessity or appropriateness of services as they are being rendered, such as an assessment of the need for continued inpatient care for hospitalized patients or continued outpatient therapy such as physical, or speech therapy. Urgent Concurrent cases need a decision within twenty-four (24) hours of receipt. Intake Team must complete these and route to the clinical staff with sufficient time in</p>	Monthly	PEGA MARS, Unity/CDS, other.	<p>(a) <b>Baseline%</b> of Urgent Concurrent Review cases Completed or Appropriately Routed in 4 hour or prior to the end of same business day (whichever is sooner); and</p> <p>(b) <b>Baseline%</b> of non-Urgent Concurrent Review cases (e.g. all other prior authorization requests) Completed or Appropriately Routed in 4 hours.</p>	Y	TBD	C	Y

#	Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improve
		<p>order for the clinical team to render a decision within the overall regulatory required TAT.</p> <p>This Service Level is comprised of two measures (parts (a) and (b) below), and Supplier must meet both measures.</p> <p>(a) <u>Urgent Concurrent Review Case Measure Calculation</u>                      Numerator: The number of non-duplicate Urgent Concurrent Review cases Completed or Appropriately Routed within 4 hours of Receipt or prior to 6 PM PST (whichever is sooner).                      Denominator: All non-duplicate Urgent Concurrent Review cases.</p> <p>(b) <u>Non-Urgent Concurrent Review Cases (e.g. all other prior authorization requests) Measure Calculation</u>                      Numerator: The number of non-duplicate, non-Urgent Concurrent Review cases Completed or Appropriately Routed within 4 hours of Receipt.                      Denominator: All non-duplicate, non-Urgent Concurrent Review cases.</p> <p>“Completed or Appropriately Routed” means all of the intake team’s responsibilities are complete with regard to such case. The steps required for a case to be Completed or Appropriately Routed vary depending on the case, and may involve closing the case by approving it (if it can be approved without clinical review), cancelling the request (e.g., if an authorization is not required), or</p>							

#	Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improve
		populating the necessary data and routing the request to the clinical team for review. "Receipt" means the moment that Supplier receives the request via any method (e.g., phone, web, fax).							
2.	Prior Authorization Notifications	<p>Prior Authorization Notifications measures the number of Member and Provider prior authorization notifications provided in the appropriate time and manner.</p> <p>Supplier must advise Members and Providers of approval of prior authorization requests, including written and verbal notifications. The approval notifications must be communicated verbally to Members and Providers as well as through the generation of appropriate and needed correspondences - to Members and Providers - as outlined in the regulations and/or Health Net's policies and procedures.</p> <p>Note: Supplier will be responsible for all approval notifications but not denials.</p> <p><u>Measure Calculation</u>  Numerator: The number of cases where prior authorization notification was provided in the appropriate time and manner (including in Member's requested language), in accordance with the Procedures Manual.  Denominator: All cases requiring prior authorization notification.</p>	Monthly	Pega/ MARS, Unity/CDS,	Baseline% of all prior authorization notifications provided in appropriate time and manner (including in Member's requested language).	Y	TBD	C	Y
3.	Concurrent Review	Long Term Care Urgent and Routine requests received into the Concurrent Review UMC team will be reviewed and given a decision within the timelines of the		TBD	(a) <b>Baseline%</b> of Long Term Care cases Completed			B	Y for (a) N for (b)

7.	Hospital Notification Intake and Routing to Clinical Team	<p>Hospital Notification Intake measures the time it takes to make necessary updates to the system related to hospital admissions, including routing cases as necessary within 4 business hours.</p> <p>Supplier will receive notifications of a hospital admission of a Health Net Member from hospitals through various channels, including phone, fax, web &amp; written notifications. Supplier must confirm eligibility, benefits and follow the documented Health Net procedures for case set up and routing as necessary to the clinical team.</p> <p><u>Measure Calculation</u>            Numerator: The number of updates related to hospital admissions entered into the Medical Management system (and routed if necessary) within 4 business hours (measured Monday through Saturday, 5 am – 6 pm PST) of receipt.            Denominator: The total number of updates related to hospital admissions requiring entry in the Medical Management system.</p>	Monthly (with daily reporting of Service Level volumes and compliance)	Lotus Fax/Right Fax, manual reporting, CDS	<b>Baseline%</b> of all updates related to hospital admissions entered into the Medical Management system (and routed if necessary) within 4 hours of receipt.	TBD	TBD	C	Y

#	Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improve
8.	Hospital Notification Batching Service Levels	Batch and route all fax requests received into the Hospital Notification Fax lines for all lines of business within two (2) business hours of receipt to Health Net.  Items should be checked for request priority and identify categories as outlined in the Batching Desktop procedures and route to the correct region and unit for processing.  Identify Long Term Care requests and route to the correct Hospital Notification processors for entry and routing	Daily	Lotus Fax/Right Fax, manual reporting,	<b>Baseline%</b> of requests received by fax are Batched and routed to the correct business unit within two (2) hours of receipt.	Y		B	Y
9.	Hospital Notification Long Term Care Processing	Cases identified as Long Term Care services will be entered and routed based on the Long Term Care routing guidelines within four (4) business hours of receipt to Health Net.	Daily	Lotus Fax/Right Fax, manual reporting, CDS,	<b>Baseline%</b> of Long Term Care requests received are processed and routed within four (4) business hours of receipt to Health Net.			B	Y

#	Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improve
10.	Hospital Notification Routing Guidelines	All routing guidelines will be followed for cases that are being sent to the CCR UMC's or the CCR Clinical staff. Routing guidelines are updated by the clinical staff and can be changed at any time.  Implementation of any changes will need to be rolled out to the HNU Intake teams within one (1) business day of the changes made.	Daily	TBD	<b>Baseline%</b> of changes made to the Routing Rules will be implemented to the intake staff within one (1) business day.			B	Y
11.	Hospital Notification Arizona Access Newborn Notification Entry	All Newborn Notifications received into Health Net from any facility will be entered into the Arizona Access State Website as well as the Medical Management Authorization System within twenty-four (24) hours of receipt into Health Net.	Daily	Lotus Fax/Right Fax, manual reporting, CDS	<b>Baseline%</b> of Newborn Notification requests received are entered within twenty-four (24) hours of receipt			B	Y
12.	MRU Claims – Inquiry Response Time	Inquiry Response Time measures the time it takes for a PSR (or MRU Representative) to respond to a claims submission request.  Inquiry Response Time is calculated by dividing (i) the number of inquiries with a Response Time of one (1) Business Days or less by (ii) the number of inquiries.  “ <i>Response Time</i> ” means the time between (i) when a message is Received by the Medical Review Unit to (ii) when a PSR responds to the Request and sent back to the in the medium of the Customers choice.	Daily	Macess, File Net	<b>Baseline%</b> of inquiries responded to within one (1) Business Day	Y		B	Y

#	Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improve
		“ <i>Received</i> ” means, for purposes of this Service Level, that point in time when an inquiry has entered into the Contact Center work queue.							
13.	Post Service Intake Routing and Responding to Inquiries/Requests	<p>Post Service Intake measures the number of post service requests responded to in a timely fashion, including routing to the Clinical team as necessary.</p> <p>Supplier must receive requests from the Claims Tower to review for coverage determinations. (Examples: authorization date does not match claim received date or if a medically necessary determination is required.) Intake Team must perform the initial review and gather required information to update the request or service form and complete the request including the return of the case to Claims for adjudication. Intake may also gather information as needed by the RN team to review the case for clinical review such as medical necessity determinations.</p> <p>Note: Cases that must be referred to Health Net’s retained organization include but are not limited to: CCS, Appeals, referrals for disease management, Quality of Care (QOC) and CM, Transplants and TOC as well as SIU.</p> <p>This Service Level is comprised of three measures (parts (a), (b), and (c) below), and Supplier must meet each measure.</p> <p>(a) <u>Clinical Review Routing Measure Calculation</u> Numerator: The number of post service</p>	Monthly	MACCESS and FileNet, Unity	<p>(a) <b>Baseline%</b> of post service requests requiring Clinical review will be triaged and routed to Health Net within 4 Business Hours;</p> <p>(b) <b>Baseline%</b> of post service requests escalated from Claims which do not require Clinical review completed within twenty-four (24) hours and</p> <p>(c) <b>Baseline%</b> of post service requests which do not require Clinical review and are not escalated from Claims completed</p>	TBD	TBD	C	Y

#	Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improve
		<p>requests routed for Clinical review within 4 Business Hours of receipt. Denominator: The total number of post service requests which need to be routed for Clinical review.</p> <p>(b) <u>Escalation from Claims Measure Calculation</u> Numerator: The number of post service requests escalated from Claims that are completed within twenty-four (24) hours of receipt. Denominator: The total number of post service requests escalated from Claims.</p> <p>(c) <u>Routine Measure Calculation</u> Numerator: The number of routine post service requests completed within nine (9) calendar days of receipt. Denominator: The total number of routine post service requests.</p>			within nine (9) calendar days.				
14.	MRU Phone Service Levels	Outbound Calls - Average length of calls answered should not exceed 660 seconds	Daily	Convergence Reports	Average Talk Time of calls should be <=660 seconds			B	N
15.	Concurrent Review Support	Outbound Calls - Average length of calls answered should not exceed 660 seconds	Daily	Convergence Reports	Average Talk Time of calls should be <=660 seconds			B	N
16.	Concurrent Review Support	Concurrent Review Support measures admission status, discharge disposition, timely RN escalations, and timely system updates of authorizations. Supplier must proactively communicate with	Monthly (with daily reporting of Service Level volumes and	CDS	(a) <b>Baseline%</b> of hospital admissions on daily work list confirmed within four (4)	TBD	TBD	C	Y

		<p>requiring RN escalation.</p> <p>(c) <u>Authorization Measure Calculation</u>                      Numerator: The number of requested authorizations updated in the system within 4 Business Hours of request.                      Denominator: The total number of requested authorizations requiring system updates.</p>							
17.	Concurrent Review UMC Team	<p>Long Term Care request Processes must be completed as outlined below:</p> <p>(a) Perform calls to providers and facilities after 14 days if no TAR or MDS has been received.</p> <p>(b) Monthly calls are made to the facilities for members who have been identified as potential LTC members to determine if member is indeed a Long Term Care member. Supplier to communicate outcome from these calls to Health Net contacts prior to the 15<sup>th</sup> of the month. Desktop outlines the communication protocol.</p> <p>(c) Members who are in Long Term Care, Facility reach out will be performed (thirty) 30 days prior to all Long Term Care Authorizations are set to expire. Calls are made as a reminder for the facility/provider to send in requests for further authorization of services.</p>	Daily	TBD	<p>(a) <b>Baseline%</b> of calls to be made to facilities requesting TAR or MDS.</p> <p>(b) <b>Baseline%</b> of calls to be made to facilities to identify potential LTC members prior to the tenth (10<sup>th</sup>) of each month</p> <p>(c) <b>Baseline%</b> of calls to be made to facilities for members in LTC as a reminder to send in authorization request within</p>			B	Y

#	Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improve
					thirty (30) days of authorization expiration date				
18.	Quality – Quality Monitoring Average MRU, PCU, CCR Intake, HNU	<p>Quality Monitoring Average measures the quality of intake support, including the accuracy of information documented in the Medical Management Systems, adherence to established procedures and customer relations with outside providers/members or with Health Net Clinical staff.</p> <p>Supplier will perform a minimum of ten (10) audits per associate per month for all applicable established channels of interaction (e.g., email, fax receipts, Service Form, phone calls, etc.). For each monitored interaction Supplier will complete a scorecard as approved by Health Net. Supplier will rate each UMC, PSR performance using the scorecard in a fair, accurate and consistent manner. Scoring for each interaction will be calculated by dividing (i) the total number of quality attributes passed by the UMC/PSR, by (ii) the total number of quality attributes measured (0% to 100%).</p> <p>At Health Net’s request, from time to time, the parties will conduct calibration sessions in which a sampling of interactions will be jointly monitored and rated by both parties to ensure consistency in the rating of performance. At the end of the measurement period, Supplier will calculate the average score received by each UMC/PSR during the measurement period (“<i>UMC/PSR Average</i>”).</p>	Monthly	TBD	All LOBs Quality Monitoring Average >= 97.5%	Y		B	Y

#	Category / Name	Description	Measurement Period	Measurement Tool	Service Level	Critical (Y/N)	Weighting Factor	Code	Continuous Improve
		Score"). Quality Monitoring Average will be calculated by dividing (i) the sum of the UMC/PSR Average Scores, by (ii) the total number of UMC/PSR whose requests were monitored and scored.							
19.	Quality – Customer Satisfaction MRU, PCU, CCR Intake, HNU	Customer Satisfaction measures the level of Customer satisfaction in their interactions with the Medical Management Intake teams. Supplier shall administer surveys to a random sample of Providers/Facilities who have had a recent contact with the Medical Management Intake Teams.  Customer Satisfaction is calculated by dividing (i) the total number of Survey responses with overall ratings of [Baseline] (i.e. “very satisfied” or “extremely satisfied”), by (ii) the total number of Survey responses. Minimum number of respondents for the metric to be valid, to be mutually agreed between Health Net and Supplier	Quarterly	TBD	All LOBs ≥ 90%	Y		C	Y

**EXHIBIT D****KEY SUPPLIER PERSONNEL**

Subject to Section 7.4 (Key Supplier Positions) of the Terms and Conditions, the following positions shall be Key Supplier Positions filled by the individuals listed in the table below.

<b>Key Supplier Position</b>	<b>Initially Approved Individual</b>
Supervisor, CCR Support Medi-Cal	TBD
MRU – Arizona	TBD
MRU - Oregon	TBD
Supervisor PCU – Medi-Cal and CMC/Duals	TBD

**EXHIBIT H**  
**SUBCONTRACTORS**

**1. INTRODUCTION**

With reference to Section 7.7 (*Subcontracting*) of the Terms and Conditions, this Schedule H (*Subcontractors*) identifies the Subcontractors who are Approved Subcontractors for the purposes of this Statement of Work as of the Effective Date with respect to the Functions of each Subcontractor set forth below.

**2. APPROVED SUBCONTRACTORS**

<b>Approved Subcontractor</b>	<b>Address</b>	<b>Functions</b>
