HAGEN SECURITIES, INC.
NOTES TO FINANCIAL STATEMENTS
June 30, 2015

Fair Value of Financial Instruments

Financial instruments that are subject to fair value disclosure requirements are carried in the financial statements at amount that approximate fair value and include cash and cash equivalents. Fair values are based on quoted market prices and assumptions concerning the amount and timing of estimated future cash flows and assumed discount rates reflecting varying degrees of perceived risk.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Business Risk Concentration

The Company's revenue is derived primarily from commissions related to the sale of private and public non-traded offerings in the real state and oil and gas industries.

Income Taxes

Federal and State corporate income taxes are calculated based on the statutory rates applicable. Prepaid or deferred income taxes which result from timing differences in the recognition of income and expenses for income tax purposes versus financial statement purposes have been recognized.

Retirement Plan

The company maintains a SEP-IRA retirement plan for the Company's sole owner-employee. The Company made a contribution of \$12,500.00 in the fiscal year ended June 30, 2015.

NOTE B – NET CAPITAL REQUIREMENTS

NOTE C – STATEMENT OF EXEMPTION OF RESERVE REQUIREMENT

to a fixed dollar amount or 6-2/3% percent of total aggregate indebtedness, as defined, whichever is greater, and does not therefore calculate its net capital requirement under the alternative reserve requirement method.

NOTE D – PROPERTY, EQUIPMENT AND LEASEHOLD IMPROVEMENTS

Property, equipment and leasehold improvements are stated at cost less accumulated depreciation. Expenditures for maintenance and repairs are charged to expense as incurred. Depreciation is calculated on the straight line method. The following is a summary of property, equipment and leasehold improvements:

	Estimated Useful Life		
Automobile	5 years	\$	63,000
Furniture and equipment	3 – 7 years		0
Leasehold improvements	7 years		0
			<u>63,000</u>
Less – accumulated depreciation			<u>(58,800)</u>
Total		\$	4,200

Depreciation expense was \$0.00 for the year June 30, 2015 and is included in the operating expenses in the accompanying statement of income.

NOTE E – OTHER ASSETS

Deferred income taxes amounted to \$825.00. Temporary differences that give rise to the deferred tax payable consist primarily of differences between income tax and financial statement treatment of depreciation. Other Assets included FINRA Flex Account - \$1,325.00, Prepaid Expenses - \$655.00, and Investment Account - \$1,484.00.

NOTE F – LEASES

In circumstances where the broker-dealer reports \$500,000 or less in gross revenues, they are not required to file the supplemental SIPC report. The Company is exempt from filing the supplemental report under SEA Rule 17a-5(e)(4) because it is reporting less than \$500,000 in gross revenue.

NOTES TO FINANCIAL STATEMENTS

NOTE I – RELATED PARTY TRANSACTIONS

The Company leases office space from its principal shareholder, Tye Wynfield. During the year ended June 30, 2015, the Company paid \$15,000.00 under this arrangement.

NOTE J – FAIR VALUE MEASUREMENTS

Management uses its best judgment in estimating the fair value of the Company's financial instruments; however, there are inherent weaknesses in any estimated technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the company could have realized in a sales transaction on the dates indicative. The estimated fair value amounts have been measured as of their respective periods ends, and have not been revaluated or updated for purposes of these financial subsequent to those respective period ends, and have not been revaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each period-end.

The following information should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only provided for a limited portion of the Company's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparison between the Company's disclosure and those of other companies may not be meaningful. The following methods and assumptions were used to estimating the fair values of the Company's financial instruments at June 30, 2015. There have been no significant changes in methodology for estimating fair value of the Company's financial instruments since June 30, 2015.

Fair Value Hierarchy

The Fair Value Measurements Topic of the FASB Accounting Standards Codification establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to measurements involving significant unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are as flows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2 inputs are inputs quoted other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs are unobservable inputs for the asset or liability.

See accountant's audit report

HAGEN SECURITIES, INC.
NOTES TO FINANCIAL STATEMENTS
June 30, 2015

Determination of Fair Value

Under the Fair Value Measurements Topic of the FASB Accounting Standards Codification, the Company bases its fair value on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs developing fair value measurements, in accordance with the fair value hierarchy. Fair Value measurable for assets and liabilities where there exists limited or no observable market data and, therefore, are based upon management's own estimates, are often calculated based on current pricing policy, the economic and competitive environment, the characteristics of the asset or liability and other such factors. Therefore, results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability. Additionally, there may be inherent weaknesses in any calculation technique, and changes in the underlying assumptions used, including discount rates and estimates of future cash flows, that could significantly affect the results of current or future value.

Following is a description of valuation methodologies used for assets and liabilities recorded at fair value and for estimating fair value for financial instruments not recorded at Fair Value Measurements Topic of the FASB Accounting Standards Codification).

Cash and cash equivalents

The carrying amount amounts of cash and cash equivalents approximate their fair value because of the short maturity of these instruments.

Accounts Receivable

The carrying amounts of accounts receivable approximate its fair value because of the short maturity of these instruments.

Investments in equity securities

Investments in equity securities that are classified as available for sale are recorded at fair value on a recurring basis. When quoted market prices are unobservable, management uses quotes from independent pricing vendors based on independent pricing models or other model-based valuation techniques such as the present value of future cash flows, adjusted for the security's credit rating and other credit loss assumptions. The pricing vendors may provide the Company with valuations that are based on unobservable inputs, and in those circumstances the Company would classify the fair value measurements of the investment securities as Level 3. Management conducted a review of its pricing vendor to validate that the inputs used in that vendor pricing process are deemed to be market observable or unobservable as defined in the standard. Based on the review performed, management believes that the valuations used in its financial statements are reasonable and are approximately classified in the fair value hierarchy.
