AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2014

1. ORGANIZATION AND NATURE OF BUSINESS

Herbert J. Sims & Co., Inc. ("HJS") is a Delaware Corporation re-incorporated on November 15, 2012. Previously, it was incorporated under the laws of the State of New York.

Herbert J. Sims & Co., Inc. and its wholly owned subsidiaries (collectively, the "Company") are principally engaged in investment banking, financial advisory, investment advisory, retail brokerage and other related financial services. These services are provided to institutions, businesses and individuals.

HJS is a broker-dealer registered with The Securities and Exchange Commission and is a member of the Financial Industry Regulatory Authority and the Securities Investor Protection Corporation.

2. SIGNIFICANT ACCOUNTING POLICIES

a. Principles of Consolidation

The consolidated financial statements include the accounts of HJS and its wholly owned subsidiaries:

Sims Mortgage Funding, Inc.

HJS Advisors, Inc.

Herbert J. Sims Capital Management Inc.

All significant intercompany balances and transactions are eliminated in consolidation.

b. Investment Banking

Investment banking revenues include income and fees, net of direct expenses arising from fixed income securities offerings in which the Company acts as underwriter or placement agent. Investment banking revenues also include fees earned from providing consulting, risk management and financial advisory services. Investment banking management fees are recorded when the income is reasonably determinable.

c. Securities Transactions

Proprietary securities transactions are recorded on a settlement date basis which is generally three business days after trade date. The recording of securities transactions on a trade date basis was considered, and the difference was deemed immaterial. In the normal course of business, the Company purchases and sells securities as both principal and agent.

Financial instruments are recorded at fair value in accordance with Statement of Financial Accounting Standards ("SFAS") No. 157, Fair Value Measurements.

d. Commission Income and Related Clearing Expenses

Acting as a principal, the Company earns substantially all commission income by buying and selling securities and mutual funds on behalf of its customers and earning commissions on the related transactions. Commission income and related clearing expenses are recorded on a settlement basis.

2. SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

e. Depreciation

The Company provides for depreciation of assets using the straight line method for financial reporting purposes. Furniture and equipment are depreciated over 3 to 7 years. Leasehold improvements are amortized over the lesser of economic useful life of the improvement or over the term of the lease. Depreciation and amortization expense was \$213,647 for the year.

f. Loan Receivable from Employees

The company has extended credit to certain employees upon commencement of employment with the Company. The credit is in the form of notes signed by the individuals. The outstanding balance of the notes is \$1,923,196 at December 31, 2014. The loans are for an average of five years, are repaid on a monthly basis over their term and are charged a market rate of interest.

g. Cash Equivalents

Cash equivalents are defined as unrestricted short term investments with original maturities within three months of the date of purchase and money market investments. The Company maintains deposits in financial institutions that consistently exceed the FDIC limit of \$250,000. The Company has not experienced any losses in such accounts and management believes the Company is not exposed to any significant credit risk.

h. Use of Estimates

The Company's consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America. The preparation of financial statements requires management to make assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reported period. Actual results could differ from those estimates.

i. Advertising and Promotion

The Company expenses advertising and promotion costs as incurred. The advertising and promotion expense was \$1,134,633 for the year.

j. Deferred Income Taxes

The Company accounts for deferred income taxes using the asset and liability method. Certain income and expense items are accounted for in different financial reporting periods for financial reporting purposes than for income tax purposes. Appropriate provisions are made in the Company's consolidated financial statement for deferred income taxes in recognition of these temporary differences. A valuation allowance is established for deferred income tax assets, when as determined by management, it is more likely than not that the tax benefit will not be realized.

The company recognizes and measures its unrecognized tax benefits in accordance with FASB ASC 740, Income Taxes. Under that guidance, the Company assesses the

likelihood, based upon their technical merit, that tax positions will be sustained upon examination based on the facts, circumstances and information available at the end of each period. The measurement of unrecognized tax benefits is adjusted when new information is available, or when an event occurs that requires a change.

3. SECURITIES OWNED

Securities owned at December 31, 2014 consist of trading securities at fair value as follows:

Municipal bonds - at fair value	\$ 7,490,628
Corporate bonds	41,285
Government	<u>297,000</u>
	<u>\$ 7,828,913</u>

Municipal bonds consist primarily of revenue bonds issued by state and local governmental authorities related to continuing care retirement communities and health care facilities.

4. FAIR VALUE OF FINANCIAL INSTRUMENTS

SFAS No. 157, Fair Value Measurements, defines fair value, establishes a framework for measuring fair value and expands disclosure about fair value measurements required under other accounting pronouncements, but does not change existing guidance as to whether or not an instrument is carried at fair value. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the assets or liability in an orderly transaction between market participants on the measurement date. The Company determines the fair values of its financial instruments and assets and liabilities recognized at fair value in the financial statements on a recurring basis in accordance with SFAS No. 157.

The Company's financial instruments are carried at fair value or amounts that approximate fair value. To differentiate between the approach to fair value measurements, SFAS No.157 uses a fair value hierarchy and describes three levels used to classify fair measurements.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date. An active market for the asset or liability is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 inputs are observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable

AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

4. FAIR VALUE OF FINANCIAL INSTRUMENTS (CONT'D)

market data, such as matrix pricing of fixed income securities.

Level 3 fair value measurements are based on unobservable inputs for the asset or liability. Unobservable inputs are used to measure fair value to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. Therefore, unobservable inputs reflect the Company's own assumptions about the inputs that market participants would use in pricing the asset or liability (including assumptions about risk).

The following valuation factors are considered for the financial assets and liabilities of the Company:

Cash equivalents consist of investments in money market mutual funds. Such instruments are classified within level 1 of the fair value hierarchy. Municipal bonds are classified as Level 1 or Level 2 in the fair value hierarchy.

Municipal variable rate demand notes that have a weekly or more frequent rate reset, are rated by a rating agency and are actively traded, are classified within Level 1 of the fair value hierarchy.

Fixed rate municipal bonds may be priced using matrix pricing models. The Company relies on outside pricing services to determine the fair value of the fixed rate municipal obligations. Fixed rate municipal bonds are classified within Level 2 of the fair value hierarchy.

The following table presents the Company's fair value hierarchy for those assets and liabilities at fair value basis as at December 31, 2014.

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets:
