Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenue and expenses during the reporting period. Actual results could differ from those estimates.

NOTE 2. FAIR VALUE MEASUREMENTS

FASB ASC 820 defines value, establishes a framework for measuring fair value, and establishes a fair value hierarchy which prioritizes the inputs to valuation techniques. Fair value is the price that would be received to sell an asset or paid to transfer a liability, in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability, or in the absence of a principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach, as specified by FASB ASC 820, are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities the Company have the ability to access.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 are unobservable inputs for the asset or liability and rely on management's own assumptions about the assumptions that market participants would use in pricing the asset or liability. The unobservable inputs should be developed based on the best information available in the circumstances and may include the Company's own data.

FASB ASC 820, *Fair Value Measurement* has no material effect on these financial statements.

NOTE 3. NET CAPITAL REQUIREMENTS

The Company is subject to the SEC Uniform Net Capital Rule (SEC Rule 15c3-1), which requires the maintenance of minimum net capital and requires that the ratio of aggregate indebtedness to net capital, both as defined, shall not exceed 15 to 1 (and the rule of the 'applicable' exchange also provides that equity capital may not be withdrawn or cash dividends paid if the resulting net capital ratio would not exceed 10 to 1). At December 31, 2014, the Company had net capital of \$40,556, which was \$35,556 in excess of its required net capital of \$5,000. The Company's net capital ratio was .17 to 1.

NOTE 4. RELATED PARTY AND AFFILIATED TRANSACTIONS

For the year ended December 31, 2014, Pro Securities, LLC received commission income from SpeedRoute, LLC in the amount of \$225,000.

This guidance also defines guarantees as contracts that contingently require the guarantor to make payments to the guaranteed party based on another entity's failure to perform under an agreement, as well as indirect guarantees of the indebtedness of others.

The Company has issued no guarantees effective at December 31, 2014 or during the year then ended.
