To the Board of Directors
of Capitol Securities Management, Inc.

We have audited the accompanying statement of financial condition of Capitol Securities Management, Inc. as of December 31, 2015, and the related notes to the financial statements. This financial statement is the responsibility of Capitol Securities Management, Inc.'s management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the statement of financial condition is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the statement of financial position. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall statement of financial position presentation. We believe that our audit provides a reasonable basis for our opinion.

CAPITOL SECURITIES MANAGEMENT, INC.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2015

Note 1—Organization and nature of business

Organization - Capitol Securities Management, Inc. (the "Company") is a broker dealer registered with the Securities and Exchange Commission (SEC), and is a member of the Financial Industry Regulatory Authority, Inc. (FINRA). The Company is a wholly owned subsidiary of CS Financial Group, Inc. (the "Parent"). The Parent's liability, as the sole member of the Company, is limited in that in any proceeding brought by or in the name of the Company, the Parent shall not have liability for damages other than for willful misconduct or a knowing violation of criminal law.

The Company is a registered broker-dealer under the Securities Exchange Act of 1934. The Company is also an investment advisor registered under the Investment Advisors Act of 1940.

Note 2—Summary of significant accounting policies

Basis of presentation - The preparation of the Company's financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions as to reported amounts and disclosures in the financial statements. Management believes that the estimates used in preparing the financial statements are reasonable and prudent. Actual results could differ from the estimates included in the financial statements.

Cash and cash equivalents - For purposes of the statement of cash flows, the Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

Accounts receivable - Accounts receivable is comprised of receivables from broker dealers. These are collected in a short period of time, and based on past experience, management has determined that an allowance for doubtful accounts is not necessary.

Notes receivable - Notes receivable consists of arrangements with certain employees. Each note has specific terms that are based on the nature of the respective employee agreement.

Property and equipment - Property and equipment is stated at cost. Depreciation is computed on the straight line basis over their estimated useful lives, which range from five to seven years. Purchases under \$1,000 are charged to expense as incurred; major renewals and betterments, which extend the useful life of the asset is capitalized. When items of property and equipment are sold or retired, the related cost and accumulated depreciation are removed from the accounts and any gain or loss is included in the results of operations. Leasehold improvements are amortized over the lesser of the economic useful life of the improvement or the term of the lease.

Income taxes - The Company accounts for income taxes using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amount of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered in income. Deferred tax assets are reduced by a valuation allowance if it is more likely than not that the tax benefits will not be realized. Management has evaluated tax positions that could have a significant effect on the financial statements and determined that the Company had no uncertain tax positions at December 31, 2015.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2015

Note 2—Summary of significant accounting policies (continued)

Fair Value Measurements – The carrying amounts of total current assets and total liabilities approximates fair value, because of the short term nature of these instruments. The contractual interest rates associated with these assets or liabilities are considered to be at market rates.

Deposits with Clearing Organizations – Deposits with clearing organizations consist of cash which has been placed with the Company's clearing organization in the normal course of business. These transactions are recorded on a trade date basis. At December 31, 2015, the Company had \$100,000 in cash on deposit with the Company's clearing organization.

Note 3—Off balance sheet risk and concentration of credit risk

Off balance sheet risk - The Company's customers' securities transactions are introduced on a fully disclosed basis with a clearing broker/dealer.

The Company currently has a clearing agreement with Pershing, LLC ("Pershing") to clear all trade transactions. The Company is required to maintain a cash deposit of \$100,000 with Pershing in accordance with the terms of the clearing agreement.

The clearing broker/dealer carries all of the accounts of the customers of the Company, and is responsible for execution, collection of and payment of funds, and receipts and delivery of securities relative to customer transactions. Off balance sheet risk exists with respect to these transactions, due to the possibility that customers may be unable to fulfill their contractual commitments. The clearing broker/dealer may charge any losses it incurs to the Company. The Company seeks to minimize this risk through procedures designed to monitor the credit worthiness of its customers, and customer transactions are executed properly by the clearing/broker dealer.

The Company is engaged in various trading and brokerage activities whose counterparties primarily include broker-dealers, banks and other financial institutions. In the event counterparties do not fulfill their obligations, the Company may be exposed to risk. The risk of default depends on the credit worthiness of the counterparty or issuer of the instrument. It is the Company's policy to review, as necessary, the credit standing of each counterparty with which it conducts business.

Concentration of credit risk - The Company places its cash and cash equivalents on deposit with financial institutions in the United States. The Federal Deposit Insurance Corporation (FDIC) provides insurance coverage for up to \$250,000 for substantially all depository accounts and temporarily provides unlimited coverage, through December 31, 2015, for certain qualifying and participating non-interest bearing transaction accounts. The Company, from time to time, may have amounts on deposit in excess of the insured limits. As of December 31, 2015, the Company had \$160,566, which exceeded these insured amounts.

The Company maintains cash and securities in excess of the established limit insured by the Securities Investors Protection Corp (SIPC).

Note 4—Net capital requirements

Rule 15c3-1 further requires that equity capital may not be withdrawn, or cash dividends paid if the resulting net capital ratio would exceed 10 to 1. In addition, certain advances, payment of dividends, and other equity withdrawals are subject to certain notification provisions of Rule 15c3-1. NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2015

Note 9—Income taxes

The provision for federal and state income taxes, for the year ended December 31, 2015 is as follows:

Current income tax expense	
Federal	\$ -
State	-
	<hr/>
Deferred income tax benefit	
Federal	133,335
State	88,890
	<hr/>
	222,225
	<hr/>
Income tax benefit	\$ 222,225

The income tax provision differs from the expense that would result from applying federal and state statutory rates to income before income taxes because the Company is subject to deferred income taxes. A portion of meals and entertainment and key man life insurance are not tax deductible. The Company as part of one of its lease agreements received six months of free rent. This benefit also impacts deferred income taxes.

The Company is a member of a group that files a consolidated tax return. The separate return method is used to allocate current and deferred taxes among the group members when issuing separate financial statements. In the current year, the Company included this amount as a corresponding deferred tax asset of \$222,225.

The Company is subject to routine audits by taxing jurisdictions, however, there are currently no audits in progress. The Company remains subject to examinations by U.S. Federal and various state authorities for years ending after December 31, 2012.
