Kenneth Jerome & Co., Inc.
Notes to the Financial Statements
For the Year Ended April 30, 2016

1. Organization

Kenneth Jerome & Co., Inc. (the Company) is a privately held corporation formed for the purpose of conducting business as a securities broker dealer (BD). As a BD, the Company is registered with the Financial Industry Regulatory Authority (FINRA) to market investments in registered securities.

2. Summary of Significant Accounting Policies

Use of Estimates- The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make reasonable estimates and assumptions that affect the reported amounts of the assets and liabilities and disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses at the date of the financial statements and for the period they include. Actual results may differ from these estimates.

Commission Revenues- Commission revenues and related fees are recorded when they become due and the Company is reasonably assured of their collection.

Cash- For the purpose of calculating changes in cash flows, cash includes all cash balances and highly liquid short-term investments with original maturity date of three months or less.

Income taxes- The Company accounts for income taxes in accordance with generally accepted accounting principles which require an asset and liability approach to financial accounting and reporting for income taxes. Deferred income tax assets and liabilities are computed annually for differences between financial statement and income tax bases of assets and liabilities that will result in taxable income or deductible expenses in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets and liabilities to the amount expected to be realized. Income tax expense is the tax payable or refundable for the period adjusted for the change during the period in deferred tax assets and liabilities.

The Company follows the accounting requirements associated with uncertainty in income taxes using the provisions of Financial Accounting Standards Board (FASB) ASC 740, *Income Taxes*. Using that guidance, tax positions initially need to be recognized in the financial statements when it is more likely than not the positions will be sustained upon examination by the tax authorities. It also provides guidance for derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. As of April 30, 2016, the Company has no uncertain tax positions that qualify for either recognition or disclosure in the financial statements. All tax returns from fiscal years 2013 to 2015 are subject to IRS audit.

3. Fair Value of Financial Instruments

Fair Value Measurements under generally accepted accounting principles clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements are separately disclosed by level within the fair value hierarchy as follows.

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which all significant inputs are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs to the valuation methodology that are significant to the measurement of fair value of assets or liabilities.

To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement is disclosed and is determined based on the lowest level input that is significant to the fair value measurement.

Cash and cash equivalents, commission receivable, deposit with clearing broker, and accounts payable and accrued expenses in the balance sheet are estimated to approximate fair market value at April 30, 2016 because of their short term nature.

4. Commitments and Contingencies

The Company is committed to a non-cancelable lease for office space in Florham Park, New Jersey, expiring in fiscal year 2019. The minimum payments due under the lease are as follows.

2017	\$20,592
2018	\$20,592
2019	<u>\$8,580</u>
Net minimum lease payments	<u><u>\$49,764</u></u>

Rent expense for the fiscal year 2016 was \$20,892.

5. Provision for Income Taxes

Provision for income taxes is comprised of the following:

Net income (loss) before provision for income taxes	(\$3,135)
Current tax expense:	
Federal (net of Net Operating Loss and Special Deductions)	\$0
State (statutory minimum)	<u>\$1,500</u>
Total	<u><u>\$1,500</u></u>
Add deferred tax payable (benefit):	
Timing differences	0
Allowance for recoverability	<u>0</u>
Provision for income taxes	<u><u>\$1,500</u></u>

7. Subsequent Events

The Company has made a review of material subsequent events from April 30, 2016 through the date of this report and found no material subsequent events reportable during this period.
