REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Member
of CMT Trading, LLC

We have audited the accompanying statement of financial condition of CMT Trading, LLC as of December 31, 2016, and the related notes to the statement of financial condition. This financial statement is the responsibility of CMT Trading, LLC's management. Our responsibility is to express an opinion on this financial statement based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the statement of financial condition is free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the statement of financial position. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall statement of financial position presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the statement of financial condition referred to above presents fairly, in all material respects, the financial position of CMT Trading, LLC as of December 31, 2016, in accordance with accounting principles generally accepted in the United States of America.

CMT TRADING LLC

(A Delaware Limited Liability Company)

NOTES TO STATEMENT OF FINANCIAL CONDITION AS OF DECEMBER 31, 2015 (Expressed in U.S. dollars)

1. ORGANIZATION AND BUSINESS PURPOSE

CMT TRADING LLC (“CMTT”) was formed in September 2013 as a limited liability company in the state of Delaware and commenced trading operations in March 2014. CMTT trades financial instruments on U.S. exchanges as a registered broker-dealer on its own account and has no clients.

CMTT has service contracts in place with CMT US Holdings LLC (“USH”), a Delaware limited liability company that was founded in June 1997, and xCelor LLC (“xCelor”), a Delaware limited liability company founded in October 2007. USH performs all of CMTT’s administrative services including tax, accounting, and record-keeping services. xCelor performs all information technology related functions.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting records of CMTT are maintained in accordance with accounting principles generally accepted in the United States of America and are expressed in United States dollars. A summary of the significant accounting policies utilized by CMTT is as follows:

Cash and Cash Equivalents — Cash and cash equivalents include cash held in financial institutions.

Depreciation — Fixed assets are depreciated on a straight-line basis over their estimated useful lives.

Collateralized agreements and financings — Collateralized financing consist of the net cash and/or securities borrowed in the course of trading operations. Securities borrowed facilitate the securities settlement process and require the CMTT to deposit cash or other collateral in order to maintain a solvency agreed upon with the clearing broker.

Due to Broker — Due to broker includes certain amounts that are due to or from the clearing broker for various income or expense items such as interest, brokerage and miscellaneous fees, and cash and foreign currencies held by or borrowed from the clearing broker.

Use of Estimates — The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Investments — Security transactions are accounted for on a trade date basis. CMTT may sell a security it does not own in anticipation of a decline in the fair value of that security (selling short). When Fund CMTT sells a security short, it must borrow the security sold short and deliver it to the broker-dealer through which it made the transaction.

Derivative Financial Instruments — CMTT trades derivative financial instruments, which may include options, futures, forward and swap contracts, all of which are recorded at fair value at the reporting date. The fair value of derivative financial instruments at the reporting date generally reflects the amount that CMTT would receive or pay to terminate the position at the reporting date. All derivative financial instruments traded by CMTT are exchange traded.

Exchange traded derivative products (futures and options) are recorded at fair value which is based on exchange published closing prices as of the reporting date. Futures contracts are recorded on the trade date. The market value of futures contracts is based upon daily exchange settlement prices.

Valuation — Securities, including securities sold, not yet purchased, are valued at fair value on the last business day of the period as reported by the broker and verified by an independent pricing service at closing prices for securities traded on a principal exchange (U.S. or foreign).

3. FAIR VALUE MEASUREMENT

CMTT applies the provisions of the *Fair Value Measurements and Disclosures* Topic of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 820 (“Topic 820”). Fair value is defined as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the reporting date. Topic 820 establishes a fair value hierarchy based on the observability of market prices used to measure fair value. Investments with readily available quoted prices in an active market or those for which fair value can be measured from actively quoted prices generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value. Topic 820 provides additional guidance on using the net asset value per share, provided by an investee, when estimating the fair value of an alternate investment that does not have a readily determinable fair value and enhances the disclosures concerning these investments. Investment assets and liabilities reported at fair value are classified in one of the following categories:

Level 1. The values for securities classified as Level 1 are based on unadjusted quoted prices for identical securities in an active market. Since valuations are based on quoted prices that are readily-accessible at the measurement date, valuation for these securities does not entail a significant degree of judgment.

Level 2. The values for securities classified as Level 2 are based on quoted prices in non-active markets for which all significant inputs are observable either directly or indirectly. Level 2 inputs may also include pricing models whose inputs are observable or derived principally from or corroborated by observable market data.

Level 3. The values for securities categorized as Level 3 are based on prices or valuation techniques that require inputs that are both significant to the fair value and unobservable. These inputs reflect Fund CMTT’s own assumptions about the assumptions a market participant would use in pricing the security. Little if any market activity exists for Level 3 securities.

When the inputs used to measure fair value fall within different levels of the hierarchy, the level within which the fair value measurement is categorized is based on the lowest level input that is significant to the fair value. As required by Topic 820, at December 31, 2016, CMTT’s portfolio investments were classified as follows, based on fair values:

	Level 1	Level 2	Level 3	Total
Assets				
Investment in equities, at fair value	\$ 102,991,224	\$ 0	\$ 0	\$ 102,991,224
Listed equity options	26,099,703	0	0	26,099,703
Futures contracts, at fair value	214,822			214,822
Total	<u>129,305,749</u>	<u>0</u>	<u>0</u>	<u>129,305,749</u>

Liabilities

Securities sold, not yet purchased, at fair value	84,951,181	0	0	84,951,181
Listed equity options sold	<u>125,564,172</u>			<u>125,564,172</u>
Total	<u>\$ 210,515,353</u>	<u>\$ 0</u>	<u>\$ 0</u>	<u>\$ 210,515,353</u>

The following table identifies the fair value amounts of derivative instruments included in the statement of financial condition as derivative contracts, categorized by primary underlying risk at December 31, 2016. Unrealized gains (losses) are presented on a gross basis, prior to the application of the impact of counterparty.

	Statement of Financial Condition Location	Fair Value
Asset Derivatives		
Listed equity options	Listed equity options	\$ 26,099,703
Futures contracts, at fair value	Futures contracts, at fair value	\$ 214,822
Liability Derivatives	Securities sold, not yet purchased	\$ 125,564,172

4. CAPITAL REQUIREMENTS AND TRANSACTIONS

CMTT is subject to United States Securities and Exchange Commission ("SEC") Uniform Net Capital Rule (Rule 15c3-1). The rule requires that a market making firm maintain minimum capital of \$1,500 for all stocks trading under \$5 per share and \$2,500 for all stocks over \$5 per share for which the company is making markets. Under this rule and as of December 31, 2016, CMTT's "net capital" requirement was \$172,500 and CMTT had net capital of \$2,026,245.

The only member in CMTT is CMT Equity Holdings LLC ("CMTEH"). New Members may be admitted only with the written consent of the CMTEH and membership is not currently offered. CMTEH contributes capital to CMTT from time to time in connection with payment of fund expenses, funding investment opportunities, and maintenance of CMTT's regulatory minimum net capital requirement.

CMTEH is permitted to take redemptions from CMTT only to the extent the redemption exceeds the capital contributed in the previous twelve months, unless with the prior written approval of the NYSE ARCA (the "Exchange"). New capital contributions may not be withdrawn within twelve months, and no unsecured loan or advance may be made by CMTT to CMTEH or any employee of the CMTT due to required compliance with the Exchange rules and regulations as well as the SEC.

5. CONCENTRATIONS OF CREDIT RISK

CMTT utilizes a clearing broker for its trading. Margin requirements are satisfied by cash on deposit with the clearing broker in the trading accounts. In the event that the clearing broker becomes insolvent, recovery of segregated funds may be limited to a pro rata share of all customer-segregated funds available from the clearing broker. In such an instance, CMTT could incur losses to the extent that the recovered amount is less than the total cash and securities deposited by CMTT with the clearing broker. Such risk, however, is mitigated by the obligation of the financial institution to comply with U.S. Rules and regulations governing brokers and dealers.

6. DERIVATIVE FINANCIAL INSTRUMENTS

Derivative financial instruments traded by CMTT include futures contracts whose values are based upon underlying assets and generally represent future commitments to exchange cash flows, or to purchase or sell other financial instruments at specified future dates. All derivatives traded by CMTT are exchange-traded. Exchange-traded derivatives are standardized and include futures and certain option contracts.

Derivatives are subject to various risks similar to those related to the underlying financial instruments including market and credit risk. CMTT uses derivative financial instruments in the normal course of its business to take trading positions and to manage exposure to loss due to interest rate, exchange rate and market risk. The risks of derivatives should not be viewed in isolation, but rather should be considered on an aggregate basis along with CMTT's other trading activities. CMTT manages the risks associated with derivatives along with its activities in cash instruments within CMTT's overall risk management framework.

Market risk is the potential for changes in the value of derivative financial instruments due to market changes, including interest and foreign exchange rate movements and fluctuations in security prices. Market risk is directly impacted by the volatility and liquidity in the markets in which the related underlying assets are traded. CMTT manages its exposure to market risk related to trading instruments on an aggregate basis combining the effects of cash instruments and derivative contracts.

Credit risk is the possibility that a loss may occur due to the failure of a counterparty to perform according to the terms of a contract, including the ability for brokers to deliver cash balances or securities or clear transaction on CMTT's behalf. Credit risk due to exchange-traded financial instruments, such as futures and options, is reduced by the regulatory requirements of the individual exchanges on which the instruments are traded. CMTT reviews the credit quality of counterparties prior to entering into transactions with counterparties and regularly monitors credit exposure when there is a net asset position with that counterparty.

Derivative instruments are marked to market at contractually specified intervals and the resulting gains and losses are recorded in the statement of financial condition as futures contracts, at fair value, prior to the exchange of the related cash flows. Included in the statement of operations for the year ended December 31, 2016 are realized and unrealized gains and losses associated with derivative financial instruments.

7. SIGNIFICANT AGREEMENTS AND AFFILIATED TRANSACTIONS

Agreements are in place between CMTT and the related entities, USH and xCelor. These entities are under common control as they are owned primarily by the same members as CMTEH.

8. SUBSEQUENT EVENTS

CMTT has evaluated subsequent events through February 27, 2017, which is the date the financial statements were available to be issued. No events have occurred from the date of the financial statements to February 27, 2017, which would require adjustments to or disclosure in the accompanying financial statements.
