The Company was incorporated on July 13, 1994 and started business on May 2, 1995. The Company operates as a fully disclosed broker/dealer based in Kansas City, Missouri. All customer cash balances and securities are carried by a clearing broker.

B. *Management Estimates*

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at December 31, 2017 and revenues and expenses during the year then ended. The actual outcome of the estimates could differ from the estimates made in the preparation of the financial statements.

C. *Commissions*

Commissions and related clearing expenses are recorded on a settlement date basis as securities transactions occur.

D. *Investment Banking*

Investment banking revenues include gains, losses, and fees, net of syndicate expenses, arising from securities offerings in which the Company acts as an underwriter. Investment banking sales concessions are recorded on settlement date, and underwriting fees at the time the underwriting is completed and the payment has been received.

At December 31, 2017, the Company had aggregate indebtedness of \$213,314 and net capital of \$216,999 which resulted in a ratio of .9830 to 1 and a ratio requirement of less than its minimum requirement of \$100,000. NOTE 4 FAIR VALUE

FASB ASC 820 defines fair value, establishes a framework for measuring fair value and establishes a hierarchy of fair value inputs. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market, the most advantageous market. Valuation techniques that are consistent with the market, income or cost approach, as specified by FASB ASC 820 are used to measure fair value.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

Level 1. Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date.

Level 2. Inputs other than quoted prices included within level 1 that are observable for the asset or liability either directly or indirectly.

Level 3. Unobservable inputs for the asset or liability

The availability of observable inputs can vary from security to security and is affected by a wide variety of factors, including, for example, the type of security, the liquidity of markets, and other characteristics particular to the security. To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in level 3.

See independent auditor's report

VALDÉS & MORENO, INC.

NOTES TO FINANCIAL STATEMENTS

DECEMBER 31, 2017

NOTE 4 FAIR VALUE (Continued)

The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

The following table presents the Company's fair value hierarchy for those assets and liabilities measured at fair value on a recurring basis as of December 31, 2017.
